TIMOLAEUMI (Timoגaiov), a fort or castle on the coast of Papblagonia, 40 or 60 atadia to the north of Climax, and 100 or 150 stadia from Cape Carambis. (Marciad, p. 71 ; Anon. Peripl. P. E. p. 6.)
[L. S.]
TIMONI'TIS (Ti $\mu \omega \overline{\text { ITt }}$ ) , a district in the interior of Papblagonis, near the borders of Bithynis. (Strab. xii. p. 562; Ptol. v. 1. § 12.) Plioy (v. 42) mentions its imhabitants under the bame of Timooiacenses, and Stephaous B. knows Timonium ( $\mathbf{T}(\mu \dot{\prime} \nu i o \nu)$ as a fort io Paphlagonia, from which the district no doubt derived its name.
[L. S.]
TINA (Tiva or Tivva, Ptol. ii. $3 . \S 5$ ), a river on the E. coast of Britannia Romana, forming the boundary between it and Britannia Barbara, and still called the Tyne.
[T. H. D.]
THNCONCIUM, in Gallia, is placed in the Itios. on a road between Araricum (Bourges) and Decetia (Décise). In the Table the bame is Tincollo. The distance in the Itins, is the same (xx.) from Avaricum to Tiaconcium (Sancoins), which is named Tincentium is some middle-age docoments. The Itios. do not agree in the distance between Tinconcium and Decetia.
[G. I. ]
TINFADI, a place in Numidia, 22 miles W. of Theveste (Itin. Ant. p. 33). According to Lapie, the ruins on the Oued Hrhia.
[T. H. D.]
TINGENTERA. [Transducta.]
TINGIS (Tiryts, Strab. iii. p. 140, and Tíya, xvii. p. 827; in Ptol. iv. 1. § 5, Ti $\gamma \gamma / s$ Ka. $\sigma$ d́peta), a very nocient city on the N. coast of Mauretaoia. Mela (i. 5) calls it Tinge, l'liny (v. 1. s. 1) Tingi. It lay 60 miles W. of the pronontory of Abyla (Itin. Aut. p. 9, \&re) and 30 miles from Belo on the oppesite coast of Spain (Ilio. l.c.). Mela and Pliny record the tradition of its foundation by Adtacus, whilst according to Ilutarch it was founded by Sophax, a son of Hercules and the widow of Autaros (Sert. 9). In that neighbourhood was the fabled zrave of Antacus, and his skeleton 60 cubits loug (Strab. xvii. 829, of. iii. p. 422). Tbese mythic legends serve at least to indicate the great antiqnity of the place. (Cf. Strab. l. c.; Solis. c. 45.) It was raised by Augustus to the rank of a frec city
（Dion Cass，xlviii．45），and in the time of Clau－ tins became a Romsn colony（l＇lin．l．c．；Itin．Aut． 8,12 ）and the capital of the province of Tingitana． It was also a place of considerable trate．Now Tangier．
［T．II．D．］
TI＇N1A（Tevéas：Timia），a small river of Utm－ bria，falling into the Tiber，a few miles below Perusia．The name is given by the ancient geogra－ phers to the affluent of the Tiber（one of the first tributaries which that river receives），but at the present day the stream called the Timia loses its natne after its junction with the Topino，a more considerahle stream．Four small rivers indeed bring down their united waters to the Tiher at this point： 1，the Merogyia，which rises between Todi and Spoleto，and hrings with it the waters of the Cli－ tnnno，the ancient Clitumxus；2，the Timia， which joins the Clifomnus near Mevania（Be－ ragna）；3，the Topino，which descends from the Apennines near Nocera，and turns abruptly to the NW．，after receiving the waters of the Timiz；and 4．the Chiascio，which joins the Topino from the N ．only 3 miles from the point where it falls into the Tiber．Though thus angmented from varions quarters the Tinia was always an inconsiderable stream．Pliny speaks of it as narigable with difficulty even for boats，and Silins Italicus calls it ＂Tiniae inglorins humor．＂（Sil．Ital．viii．452； Plin．iii．5．s．9；Strab，v．p．227．）［E．H．B．］

TINNE＇TIO，a place in Rhaetia，mentioned only in the Antonine Itinerary（p．277），bot still retaining its ancient name in the form of Tinzen．［L．S．］

TINU＇RTIUM，in Gallia，is placed in the Itins． near the Suine，between Cabillonum（Challon）and Matisco（Mácon）．The Antnnine Itic．marks M．P． sxi．，lencas siiii．between Cabillonum and Timur－ tiom，which is Tournus．The Table gives only xii．，which appears to be nearer the truth．The two Itins．do not agree in the distance between Tinurtium and Matiseo．Spartianns（I Iitn Septim， Severi，c．11）says that Severns defeated Clodius Albims at Tinortium，or Trinurtinm，for the reading is perhaps donbtful．（Is．Cassubon，in Aelium Spar－ tianumn notae）．Dion（Ixxv，c．6），Herodian（iii．7）， and Eutropius（viii．18）speak of Clodius Albinus beiog defeated by Severus at or near Logdunum （Lyon）．The name Tinortinin appears to be some－ times miswritten Tiburtinm．

TIORA MATIENA．［Anongines．］
TIPARENUS，an island ofl the coast of IIer－ mionis in Argolis，mentioned only by Pliny（iv． 12. s．19）．It is frequently identified with Spitzia；but Leake remarks that Tiparenus has no appearance of a Greek name，and conjectares that it is an error for Tricarenus，the same as the Tricrana of Pan－ sanias（ii．34．§ 8）and the modern Trikhiri， （Leake，Morer，vol．ii．p．465；Ross，Fanderungen in Griechenland，vel．ii．p．21）．

TIPASA（Timaoa，Ptol，ir．2．§5）．1．A town in Mauretania Caesariensis，endowed with the jns Latii by the emperor Clandins（Plin．v s．1）and subse－ quently a Roman colony（Itin．Ant．p．15）．It lay between lcosiom and Caesarea（ib．）．Procopius （B．Y．ii．10）mentions two colomns near Tipasa in the SE．of Mauretania，which had on them the fol－ lowing inscription in the Pboenician language：＂We are fagitives from the face of Joshua，the robber， and bis son Nare．＂Now Tefessad or Tefesch．

2．A town in Numidia，on the road from Sicca to Cirta（Itin．Aht．p．41）．Now Tebessa or Ti－ fech．
［T．H．D．］

TIPHAE：［Shmae．］
TIPHSALI．［Thasacus］
THPSUM or T1P＇sl＇s（ $/ 2$. ／her．p．569），a plam in Thrace，now Sundukli or Kiurassiui，aceurling to Lapie．
［J．I．］
TIRIDA．［Stableum Dtomedis，］
TIRISSA（Geugr．lav．iv．6），called by Arrian Tetpıfias（Per．P．Eux．p．24），and in the Tab． Pent．Trissa；a fortilied place on the promontory of Tirizis．From its situation on this bold healland it was sometimes called simply＂Axpa（Sleph．13．p． 53；Hierocl．p．637），and hence at present Ekerne or Kararma．
［T．H．1）．］
 Scyl．p．28；Tipiata⿱宀ts，Eipist．Phil．ad Ath．ap． Dem．p．159，1．），a town of the Thracian Cherso－ desus，on the coast of the Propontis．It was in－ cluded in the dominions of Philip，who in the letter above referred to complains that the Athenian general Diopeithes had taken it and sold its inhabit－ ants for slaves（in，c，340）［Dioreitimes，Hict． Biag．］According to Choisenl，its site is still occu－ pied by a village bearing the same name．［J．IR．］

TIRIZ1S（Tiplgs，Strab，vii．p 319），a very pro－ jecting beadland of Muesia in the J＇ontns Euxinus． The name varies，being written Tipt（a in Anon．
 by Ptolemy（iii．10．§8），and Tiristis by Mela（ii． 2）．Now Cape Gülgrad．
［T．H．D．］
TIRYNS（Tipuvs；Eth．Tipúvelos：the name is perhaps connected with $\tau i j p \rho / s$, Lepsins，Tyrrh．Pe－ lasger，p．13），one of the most ancient cities of Greece，lay a short distance SE．of Argos，on the right of the road leading to Epidaurus（Paus．ii． 25. § 8），and at the distance of 12 stadia from Nan－ plia．（Strab．viii．p．373．）Its massive walls， which have been regarded with wonder in all ages， are said to have heen the work of the Cycknies， and belong to the same age as those of Mycenae． （Pans，ii．16．§ 5，ii．25．§8，vii．25．§ 6，ix．36．§ 5：Strab．l．c．；Plin．vii．56．s．57．）Jlence Homer calls the city Típuvs $\tau \in\lceil\backslash(6 \in \sigma \sigma \alpha$ ．（1l．ii．559．） Pindar speaks of the Кvк入ஸ́ma $\pi$ ро́ $\theta \mathrm{v}$ рa of Tiryns （Fragm．642，ed．Bückh），and Pansanias sars that the walls are not less worthy of admiration than the pyramids of Egypt（ix．36．§ 5．）In another pas－ sage be describes the walls as consisting of wide masses of stone（ap ooi $\lambda(\theta 01$ ），of such a size，that a yoke of oxen conld not stir the least of them，the interstices being filled in with smaller stones to make the whole more compact and solid．（Pavs．ii． $25 . \S 8$ ．）The fonndation of Tiryns a－cends to the earliest mythical legends of the Argeis．It was said to have derived its name from Tirgus，the son of Argns（Paus．ii．25．§ 8），and to bave been founded by Proctus．（Strab，viii．p． 372 ；Paus，ii． 16．§2．）Aecording to the common tradition，Me－ gapenthes，tho son of Proetus，ceded Tiryns to Perseus，who transmitted it to his descendant Elec－ tryon．Alcmena，the daughter of Electryon，mar－ ried Amphitryon，who would have succeeded to the crown，had be not been expelled by Sthcuelus，king of Argos．Their son Hercnles afterwards regained possessinn of Tiryns，where he lived for many years， and bence is frequently called Tirynthins by the poets．（Hes．Scul． 81 ；Pind．Ol．x．37．Isthm．vi． 39 ；Virg．Aen．vii．662；Ov．Met．rii．410．）Al－ though Tirgns was thus closely connected with the Heraclidse，yet the city remained in the bands of the old Achaean population after the return of the Heraclidae and the conquest of Peloponnesus by the

Dorians. The strong fortress of Tiryns was dangerous to the neighbouring lorian colony of Argos. After the dreadful defent of the Argives by Cleomenes, their slaves took possession of Tiryns and hold it for many years, (Herod. vi, 83.) In the Persian War the Tirynthiams sent some men to the battle of Plataca. (1Herol, ix. 28.) sulsequently their city was taken by the Argives, probathly about the same time as Mycenae, , B. e. 4 the The lower city was entirely destroyed; the citalel was dismanthed; and the inbabitunts fled to Epidaurus and llatiels, a town on the coast of 1lemionis. (Strab. viii. p. 373 ; Ephorns, ap. Steph. B. s. v. 'A入ıeis: linstath. ad Ilvom. Il. ii. 559, p. 286, ) It was probably owing to this circumstance that Stephanus B. (s.v. Tipons) was led into the mintake of sayime that Tiryns was formerly called Halieis. The Tirynthians, who did notsurceed in effecting their rccape, were removed to Argos. (Paus. ii. 25. § 8.) From this time Tiryns remained noinhabited; and when Pausanias visited the city in the second century of our era, he saw nothing but the remains of the walls of the citadel, and beneath them towards the sea the so-called chambers of the daughters of Proetus. No trace of the lower city appears to have been left. The citadel was named Licymna, after Licymnius, son of Electryon, who was slain at Tiryns by Tleptolemus, son of Hercules. (Strab. vii. p. 373 ; Piud. Ol. vii. 47.) Hence Statius calls the marshes in the neighbourhood of Tiryns "stagna Licymania." (Theb. iv. 734.) Theophrastus represents the Tiryntbians as celebrated for their laughing propensities, which rendered then incapalle of attention to serious business (ap. Athen. vi. p. 26I, d.).
The ruins of the citadel of Tiryns are now called Palei Anipli. They occupy the lowest and flattest of several rocky hills, which rise like islands out of the plain. The impression which they produce upon the beholder is well described by Col. Mare: "This colossal fortress is certainly the greatest curiosity of the kind in existence. It occupies the table summit of an oblong bill, or rather knoll, of small extent or elevation, completely encased in masses of enormous stones, rudely puled in tiers one ahove another, into the form alteruately of towers, cortain walls, abutments, gates, and covered ways. There is not a fragment in the neighbourhoud indicating the existence of suburb or outer town at any period; and the whole, rising ubruptly from the dead level of the surrounding plain, proluces at a distance an effect very similar to that of the hulk of a man-of-war floating in a harbour." The length of the summit of the rock, aceording to Col. Leake's measurement, is about 250 yards, the bradth from 40 to 80 , the height above the plain fion 20 to 50 feet, the direction nearly N. and S. The entire circuit of the walls still remains more on Jess preserved. They consist of huge masses of stone piled upor one another, is I'ausmas describes. The wall is from about 20 to 25 feet in thicknens, and it had two entrances, one on the eastern, and the other on the mouthern side. "In its general design the fortress appears to have consisted of an upper and lower ewdosure of nearly equal dimensions, with an intermeliate platform, which may have served for the detence of the upper castle against an enemy in ponsession of the lower. The southern entrance led by an ascont to the left into the upper inclosure, and by a direct passuge between the upper lnclosure and the cesstern wall of the fortress into the lower inclosurc, baving also a branch
to the left into the middle platform, the entrance into which last was nearly opposite to the eastern gate. Besides the two principal gates, there was a postern in the western side. On either side of the great southern entrance, that is to say, in the eastern as well as in the soutbem wall, there were galleries in the body of the wall of singular construction. In the eastern wall, where they are better preserved, there are two parallel passages, of which the outer has six recesses or niches in the exterior wall. These niches were probably intended to serve for the protracted defence of the gallery itself, and the galleries for covered communications leadiog to towers or places of arms at the extremity of them. The passage which led directly from the southern entrance, between the upper inclosure and the eastern wall into the lower division of the fortress, was about 12 feet broad. About midway, there still exists au immense door-post, with a hole in it for a bolt, showing that the passage might be closed upon occasion. The lower inclosure of the fortress was of an oval shape, about 100 yards long and 40 broad; its walls forned an acute angle to the norlh, and several obtuse augles on the east and west. Of the apper inclosure of the fortress very little remains. There is some appearance of a wall of separation, dividing the higliest part of all from that next to the southern entrance ; thus forming four interior divisions besides the passages." (Leake.) The general appearance of these covered galleries is shown in the accompanying drawing from Gell's Itinevary. (Leake, Morea, vol. ii. p. 350, seq.; Mare, Tour in Giveece, vol. ii. p. 173, seq.; Curtius, Peloponnesos, vol. ii. p. 388, seq.)

## GALLERY AT THIYNS.

TISAEUM (Ti $\sigma a \hat{o} \nu=$ : Bardjüia), a lofty moantain on the promentory of Aeantium in Magnesia in Thessaly, at the entrance of the Pagusaran gulf, on which stood a temple of Artemis, and where in n. C. 207 Philip V., son of Demetrius, caused watch-Gires to he lighted, in order to obtain immediate knowledge of the movenents of the Roman fleet. (Apoll. Rhod. i. 56is; Val. Fluec. ii. 6; I'olyb. x. 42 ; Liv. xxviii . 5 ; Leake, Northern Greece, vol. iv. p. 397. .)

T1sCANUS (Jornand. Get. 5), or Trsca (ll. 34; Geogr. Rav. iv, 14); a river in Thrace, a tributary of the Danube, the modern Theiss. [T.H.D.]

Tisebaitice. [Tesebahica.]
TI'siA (Tıóa: Eth. Tıaıáns), a town of the Bruttii, mentioned by Appian in his account of the operations of Hamnibal in that country. It had been occupied by that general with a Carthaginian garrison, but was betrayed by one of the citizens into the hands of the Romans, who held it for a short time, hut it was soan recovered by llamnibal. (Appian, /lann. 44.) It is prebably the same place which is called Isia by Diodurus, from whom wo
learn that it was besieged without success by the leaders of the Italian forces during the Sucial War. (Diod, xxxvii. Exc. Phot. p. 240.) On both occasions it appears as a streng fortress, sitnated apparently in the neighbourhood of Rhegium; but no other mention is found of the city, which is not noticed by any of the gengraphers, and mast probatily have ceased to exist, like so many of the smaller tuwns of Bruttium. The name is, however, found in Stephanus of Byzantium, who confirms the correctness of the form Tivia, found in Appian. (Steph. B. s. v.) Its site is wholly uncertain. [E. H. B.]

TISSA (Ti $\sigma \sigma \alpha$, Ptol. ; Tí $\sigma \sigma \alpha$, , Steph. B.: Eth. Tı $\sigma \sigma a i o s$, Tissiensis, Cic., Tissinensis. Plin.), a town in the interior of Sicily, repeatedly mentioned by ancient anthers, but without any clne to its position. As its name is cited from Philistus by Stephanus of Byzantium (s.v.), it must have existed as a Siculian town from an early period, but its name is not found in history. Under the Romans it continued to subsist as a municipal town, theugh a very small place. Cicero calls it "perparva et tennis civitas," and Silius Italicus also terms it "parvo nomine Tisse." (Cic. Verr. iii. 38 ; Sil. Ital. xiv. 267.) It is again noticed by Pliny and Ptolemy anmug the towns of the interior of Sicily, but all trace of it is subsequently lost. The only clue to its site is derived from Ptolemy, who places it in the neighbourhood of Aetna. It has been fixed by Clnverius and others on the site of the modern town of Rondazzo, at the nortbern foot of Aetna, but this is a mere conjectnre. (Plin. iii. 8. s. 14; Ptol. iii. 4. § 12; Cluver. Sicil. p. 308.)
[ह. H. B.]
TITACIDAE. [Attica, p. 330, a.]
TITANE (Titáv s. v. : Eth. Tird́vios), a place in the Sicyenia, upon the left bank of the Asopus, distant 60 stadia from Sicyon, and 40 from Phlins. It was situated upen the summit of a hill, where Titan, the brother of the Sun, is said to bave dwelt, and to have given his mame to the spot. It was celebrated for a temple of Asclepius, reported to have been built by Alexander, the son of Machaon, the son of Asclepius. This temple still existed in the time of Pansanias, in the middle of a grove of cypress trees, in which the servants of the god attended to the patients who came thither for the recovery of their health. Witbin the temple stood statues of Asclepius and Hygieia, and of the heroes Alexanor and Euamerion. There was also a temple of Athena at Titane, situated upon a hill, and contuining an ancient weoden statue of the goddess. In descending from the hill there was an altar of the Winds. (Paus. ii. 11. §§ $5-8, ~ i i .12 . \S 1$, ii. 27. § 1.) Stephanus B. (s. v.) refers the Titávodó re $\lambda_{\epsilon u к \grave{~}}$ кápqva of Homer (1l. ii. 735) to Titane, but those words indicate a mountain in Thessaly. [Vol. 1. p. 248, b.] The rains of Titane were first discovered by Ross. Leake beard that there were seme ancient foundations on the summit of the hill above Liopesi, which he supposed to be the remains of the temple of Asclepins at Titane; but although Hellenic remains exist at this site, there can be no doubt that Titane is represented by the more important Paleókastron situated further $\mathrm{S}_{\text {, }}$, and a few minutes N. of the village of Voivórda. This Paleokastron stands upon a projecting spur of the mountains which run eastward towards the Asopus, and terminate just above the river in a small hill, which is surrounded by beautiful Hellenic walls, rising to the height of 20 or 30 ft . on the S. and SW. sile,
and flanked by three or four quadrangular towers. On this hill there stands a chapel of St. Tryphon, containing fragments of Doric columns. This was evidently the acropolis of the ancient citf, and here stood the temple of Athena mentiuned by l'susanias. The other parts of this projecting ridge are cosered with ancient fundations; and upon this part of the mountain the temple of Asclepins mnst lave stond. (Leake, Horea, vol. iii. p. 354, seq. : Russ, Reisen in Peloponnes, p. 49, seq.; Curtins, Peloponnesos, vol, ii. p. 500, seq.)

## PLAN OF THTANE

A. Village of Yoirónda.

1. Acropolis of Titane.
2. Temple of Asclepius and surrounding Bulldinga.

TI'TANUS [Asteriust,]
TITARE'sIUS. [Thessalia, p. 116G, a.]
TITARES. [Thessalai, p. 1166, a.]
TiTHOREA. [Neon.]
 a frontier town of Phocis, on the side of Doris. Livy. who calls it Tritonon, describes it as a town of Doris (xxxiii. 7), but all other writers place it in Plocis. It was destroyed by the army of Xerxes together with the other Plocian towns. It is placed by l'ausanias in the plain at the distance of 15 stadia frum Amphicleia. The site of Tithronium is probably indicated by some ruins at Mulliz helow Ierzaná, where a torrent unites with the Cephissns, (Herod, viii. 33; Paus. x. 3. § 2, x. 33. §ु 11 ; Stpph. B. s. v.; Leake, Northern Greece, vol. ii. p. 87.)

TITTHIUM. [Epidatres, p. 841, n.]
TlTUlClA, a town of the Carpetani in Ilispania Tarraconensis, on the road from Emerita to Caesaraugusta (Itin. Ant. pp. 436, 438, \&c.) it seems to be the same town called Titovakia by Ptolemy (ii. 6. § 57). Variously placed near Torrejon, at Getefe, and at Bayonec. [T. H.D.]
TITYBES (Titupos, Strab. x. p. 479), a mountain in the NW. part of Crete, not far from Cydonia. Upon it was the sanctuary or temple called Dictynnaeum. (Strab. ib.) One of its spurs formed the headland also called Tityrus (Stadiasm. p. 302) or Psscuin. (Cape Spada.)
[T. H. D.]
TIUS or TIUM (Tius or Tlov: EEth. Tiavós), a town on the coast of lithynia, or, according to others, belonging to Paphlagonia. It was a Greek town situated at the mouth of the river Billacus, and seems to have belonged to Paphlagonia until Prusias annexed it to Dithynia. (Memnon, 17-19; Pomp. Mela, 1. 19; Marcian, p. 70; Arrian, Peripl. P. E: p. 14 : Anan. Peripl. 1'. E. p. 2.) In Strabo's (xii. pp. 542, 543, 565) time, Tins was only a small place but remarkable as the birthplace of Philetaerns, the founder of the royal dynaty of Pergamum. (Comp. Plin. vi. 1.) There are coins of Tius as late as the reign of Gallienus, on which the etlmic name appears as Tiavoi, Teiol, and Teiavoi. (Sestini, p. 7t E. Ekhel, ii. p. 438.)

TLOS (T^ $\bar{s}$ or $T \lambda \bar{\omega} s$ ), all ancient and inportant

## TOLENTS,

city of Lyeia. It is not often mentioned by ancient writers, but we know from Artenidorus (ap. Strub. xiv. p. 665) that it was one of the six citics forming the Lycian confederacy. Strato only renalks further that it was situated on the ruad to Cibyra. (Comp. I'lin. v. 28; Ptol, v. $3 . \S 5$; Steph. B. s. v.; Jlierocl. p. 659.) Until recently the site of this town was unknown, though D'Anville had correctly conjectured that it ought to be looked for in the valley of the Xanthus. Sir C. Fellows was the first nodera traveller who saw and described its leantiful remains, the identity of which is established beyond a doubt by inscriptions. These ruins exist in the upper valley of the Canthus, at a little distance from its eastern hank, nlmest due north of the city of Kanthus, and about 5 miles from the village of Dhower. They are, says Sir Charles, very estensive, consisting of extremely massive buildings, suited coly for palaces; the design appears to be Roman, Lut not the mode of building nor the inscriptions. The original eity must have been demolished in very early times, and the fincly wrought fragments are now seen built into the strong walls, which have firtified the town raised upon its ruins. The theatre was large, aud the most lighly and expensively finished that he lad seen; the seats not only are of marble, but the marble is highly wrought and has been polished, and each seat has an overhanging connice often supported by lions' paws. There are also ruins of several other extensive buildings with colunms; but the most striking feature in the place is the perfect honeycomb formed in the sides of the acropolis by excavated tombs, which are cut ont of the rook with architectural ornanents, in the form of triangles, \&.e., some showing considerable taste, (Fellows, Asia Minor, p. 237, foll., Lycia, p. 132, toll, where some of the remains are figurod nad a number of inscriptions giveu.)
[L. S.]
TMAlRUS. [DODUNA, p. 783, b.]
TNOLUs (T $\mu \hat{\omega} \lambda o s$ ), a mountain range on the sonth of Sardes, forming the watershed between the basins of the llermus in the north and the Cayster in the sonth, and being connected io the east with Muant Messogis. It was said to have received its name from a Lydian kiug Tinnolus, whence Ovid (Met. vi. 16) gives this name to the mouotain itself. Mount Tmolus was celebrated for the excellent wine growing on its slopes (Virg. Gcorg. ii. 97 ; Senec. $I^{\text {Honen. } 602 \text {; Eurip. Bacch. } 55,64 \text {; Siral. }}$ xiv. p. 637 ; Plin. v. 30). It was equally rich in metals ; and the river J'actolns, which had its source in Mount Tmolns, at one time carried from its interior a sich supply of gold. (Strab, sini. pp. 591, 610, 625; I'lin. sxxiii. 43; comp. Hom. 11 . ii. 373 ; Ausch. Pers. 50 : Herod. i. 84, 93, v. 101; 1'tol. v. 2. § 13 ; Jion. Per. 831.) On the highest sumnit of Mount Tmolus, the I'ersians crected a marble watch-tower commanding a view of the whole of the surrounding country (Strab. xini. p, 62.5). The Turkx now call the mumntain Bouz Mugh. (Kicliter, Wallfahrten, נp. 512, 519.)
[L.S]
TMOLIS, a town of Lydia, sifuated on Mount Tinolus, which was destroyed during the great earthquahe in A. 1). 19. (Tic, Ann. ii. 47 ; Plin. v. 30; Euseb. Cliron. ud Aan. I. Tib.; Niceph. Call. i. 17.) Some coins are extant with the inseription T $\mu \omega \lambda$ eit $\omega \nu$. (Sestini, 1. 114.)
[L. S.]
'IOBILS' (Tóstos or Toúbios, I'tol. ii. 3. § 5), a river on the western coast of Dritannia liumana, now the Toryy.
[1. 11. 11.]
TUCAL (T $\bar{\kappa} \alpha$ ), a very large city of Numidia,
mentioned only by Diodorus (x. 5. 5i), is perhaps the same as Tucca.

TOCHARl (Tóxapot, P’ol. vi. $11 . \S$ 6), a powerful Scythian people in Bactriana, wbich slow spread itself to the E. of the Jaxartes over a portion of Sogdiana, and even as far as the borders of Serica. (Pliu. vi. 17. s. 20 ; Abm. Mare. xxiii. 6. § 57.)
[T. H. D.]
TOCOLOSIDA (Tокало́ $\sigma \delta$ ба, Ptol. iv, 1. § 14), the most southern place in the lioman possession in Mauretania Tingitana. (Itin.Ant. p. 23 ) Variously identified with Magilla, Furtio near Sidi Casseni, and Mergo or Ameryo.
[T. H. D.]
TUCOSANNA (Joкобávva, Ptol. vii. 2. § 2), a river which falls into the Bay of Bengal at its NE. end. It is probably that now called the river of Arrucan, which is furned by the junction near its mouth of three other rivers. (Lassen, Mop of Anc. India.)
[V].
 Ptol. iv. 2. §21), a people in Muretauia Caesariensis, on the left Lank of the Ampsaga. [T. H. D.]

TOE'SOBIS (Toíasis, Ptol.ii. 3. § 2), a river on the western const of Britannia Romana, now the Comeay.
[T. H. D.]
JOGAEDAAII. [Anmenia.]
'JUGISONUS (Bacchiglione), a river of Venetia, meationed only by I'liny, who describes it as flowing through the territory of Patavium, and contributing a part of its waters to the artificial canals cadled the Fossiones I'hilistinac, as well as to form the port of Brundulus (Plin. iii. 16. s. 20.) The rivers in this part of Italy have changed their course so frequently that it is very difficult to identify them : Lut the most probable conjecture is that the Togisonus of lliny is the modern Bacchiglione, one arm of which still flows into the sea near the Porto di Brondolo, while the other joins the Brenta (Meduacus) under the walls of Padoak (I'atavium).
[E. H. B.]
TOLBLACUM, in North Gallia, on the road from Aurusta Trevirorum (Trier) to Colotia Agrippina (Coloyne). The distance of Tolbiacum from Colonia is xvi. in the Autonine lin. Tolbiacum is $Z \mathrm{iu} p i c h$, soath-west of Bomu, on the direct road from Trier to Cologne. The words "vicus supernorun " or " vicus sujenorum," which occur in the MSS. of the lin, after the name "Tolbiaco," have not been explained. Several writers have propused to alter them. Tacitus (Ilist. iv. 79) places Tolbiacum within the limits of the teritory of the Agrippinenses or the Colunia Agrippina.
[G. L.]
TOLENTI'NUM or TOLLENTI'NUM (Eth. Tolentinas, atis: Tolentino), a town of Jicenum, in the valley of the Flusor or Chienti, about 12 mile's bolow Camerinum (Camerino). It is mentioned ly Iliny among the municipal towns of J'icenum, and its municjal rauk is attested by the Liber Coluniarum, which mentions the "ager Tulentinus," and ly iuscriptions. (1'lin. iii. 13. s. 18; Lit. Col. 11p. 226.259 ; Orell. Inscr. 2474 ; Gruter, Inscr. 1\%. 194. 2, 410. 2.) The modern city of Tolentinu, which retains the ancient site as well mas name, is situated on the present highroad from Nome to Ancona ; but as no ancient road descended the valley of the Fluser, the name is not found in the Itinerarics. [E. II. B.]

TOLE'NUS (Turano), a river of Central ltaly, which rises in the mountains between Carseoli and the lake Fucinus, flows within a short distance of the walls of the former city, and falls into the Velinus a few miles lelow lieate Its nume is men-
tioned only by Orid and Orosius，in reference to a great battle fousht on its banks during the Sucial War，hetween the loman consul Lutilius and the Marsi，in which the Romans were defeated with great slaughter and Rutilius bimself slnin．（Ovid， Fast．vi．565；Oros．v．18．）
［E．H．B．］
 Toleriensis：Valmontone？），an ancient town of Latium，the name of which oceurs in the early Roman history，but which appears to have ceased to exist at an early period．Its name is found in the liist given by Dionysius of the thirty Latin eities which formed the league in 31．C． 493 （Dionys，v． 61，according to the Vatican MS．；Niebubr，vol．ii． note 21）：and it is again mentioned among the places taken by Coriolanus at the Lead of the Volscian army in b．c． 486 （Diouys．viii．17；Plut． Coriol．28）．According to the narrative given by Diocysius，and by Plutarch who copies him，it was the first place attacked by Coriolanus in that cam－ paign，and its reduction was fullowed in succession ly that of Bola，Lathicum，l＇edum and Corbio．It is singular that no mention of Tolerium occurs in the narrative of the same operations by Livy（ii．39）， and it seems probable tliat the name of Trebiam， which is found in that author（for which the best MSS．give Trebium），is a corruption for Tulerium，a name otherwise little known snd therefure liable to alteration by copyists．（Clurer．Ital．p．969； Burmann，Alt－Lutinische Chorogruphie，p．203．） The only other notice of Tolerium is found in Pliny， who enumerates the＂Tolerienses＂among tie＂po－ puli＂of Latium who had formerly shared in the sacrifices on the Alban Mount，but were in his time utterly extinct（iii．5．s．9）．We bave no account of the period of its destruction or final decay．The only clue to its position is that derived from the narratives above referred to，and it seems very douht－ ful how far we are justified in drawing strict topo－ graphical inferences from such relations．It may， lowever，be admitted as probable that Tolerium was situated in the same neighbourhood with Bola， Laticum，and Pedum；and the conjecture of Nibby， who would place it at Yalmontone，derives at least some support from the cireamstance that the latter tuwu stauds just at the source of the river Sacco， called in ancient times the Trerus or Tolerus ［Trenus］．The name of I＇almontone，is of modera origin，but it in all probability occupies an ancient site：some vestiges of its ancient walls are still visible，as well as some remains of Roman date， while the scarped sides of the rocks which surround it，and render the position one of great natural strength， abound in ancient sepulchres．Gell，however，regards it as the site of Vitellia rather than Tolerium，a conjecture which has alsa much to recommend it． ［Vitellas．］Valmontone is 5 miles S．of Palestrina and about 3 miles beyond Lugnano，on the lise of the modern Via Latina，and 26 from Rome．（Nibby， Dintorni，vol．iii．pp．370，377；Gell，Top．of Rome， p．436；Abeken，Mittel－Italien，p．76．）［E．H．B．］ TOLE＇TUM（T＇́̉ $\eta$ Tov，Ptol．ii．6．§ 57 ：Eth． Toletani，Plin．iii．3．s．4；Orelli，Inser．bo．980）， the capital of the Carpetani，io Hispania Tar－ raconensis，situated on the Tagus，and on the road from Emerita to Caesaraugusta，and connected also by another road with Laminium．（Itin．Ant．pp．433， 446．）It was a very stroug town，though only of moderate size，and famed for its manufacture of arms and steel－ware．（Liv．xxxy．7，22，xxxix， 30 ； Grat．Cyneg．341；of．Miñano，Diczion．viii．P．

453．）According to an old Spanish tradition，To－ ledo was founded in the year 540 us ．C．by Jewish colunists，who named it Toledoch，that is，＂mother of people，＂whence we might perhaps infer a I＇hoe－ nician settlement．（Cf．Miñano，l．c．；Puente，Tra－ vels，i．p．27．）It is still called Toledo，and con－ tains several remains of Roman antiquities，and especially the ruins of a circus，（Cf，Flurez，Esp． Sugr．v．p．22；Puente，i．p．165，seq．）［T．II．1）．］

TOLIAl＇IS（To入ıónts，l＇tel．ii．3．§ 33），a snuall islaud on the E．coast of Albion，opposite to the country of the Trimobantes．Sheppy seems the only island with which it is at all possible to identify it； yet it lies farther S．than the uccount of Ptolemy appears to indicate．
［＇T．II．1）．］
TOLISTOBCGII，TOLISTOBOGI，or TOLIS－ Toboli．［Galatia．］

TOLLENTI＇NUM．［Tolentinem．］
TOLOB1S，a coast town of the llercaones，in Hispania Tarraconensis．（Mela，ii．6．）［T．1I．D．］

TOLOPHUN（Tu入oфஸ́v：Eth．To＾oф＇̈vios），a town of the Loeri Ozulae，pussessing a large harbour according to Dicaearchus（66；comp．Thuc．iii．101； Steph．B，s．v．）．According to Leake it occupied the valley of Kiseli．（Northern Greece，vol．if．p． 620．）

TOLO＇SA or THOI．O＇SA（To入 $\omega \sigma \sigma a$, To $\lambda \omega \bar{\omega} \alpha$, Tóroora，Dion Cass．xxxviii．c．32：Eth．Tolosates， Tolosenses，Tolosani），in Gallia，is Toulouse，in the department of Haute－Garonne，on the right bauk of the Garonne．

The identity of Tolosa and Toulouse is easily proved from the Itineraries and other evidence．In Caesar＇s time Tolosa was withiu the Roman I＇rovincia． （B．G．i．10．）When Caesar is speaking of the inten－ tion of the Helvetii to migrate into the country of the Santones，he remarks that the Santones are not far from the territory of the Tolusates，who are in the Provincia．He considered that it would be dan－ gerous to the l＇rovincia if the warlike Helvetii，the enemies of Rome，should be so near to an open country，which produced a great deal of grain． The commentators bave found some difficulty in Caesar＇s expression about the proximity of the San－ tones and the Tulosates，for the Nitiobriges and Petrocorii were between the Santones and the Tolo－ sates；but Caesar ooly means to say that the Hel－ vetii in the conntry of the Santones would be dao－ gerous neightours to the Proviacia In Caesar＇s time Tolosa and Carcaso，both in the hasin of the Garonne，were fully organised as a part of the Provigcia ；for when P．Crassus invaded Aquitanin， he summoned soldiers from the muster－rolls of these towns to join his army．（B．G．iii．20．）Tolosa being situated on the neck of land where Gallia is narrowest［Gallia Travsalpina，Vol．I．p．949］ and in a position easy of access from the west， north，and east，was ove of the places threatened by the Gall in the great rising of н．е． 52 ；but Caesar with bis usual vigilance protected the province on this side by placing a force at Tolosa．（B．G． vii．7．）
Tolosa was un old town of the Volcae Tectosages which existed probably many centuries before it was conquered by the Romans．A great quantity of gold and ailver was collected there，the golii the produce of the umriferous regien near the Pyrenees， and both the precious metals the offerings of Gallic superstition．The treasure was kept in chambers in the temples，and also in sacred tanks．This is the story of P＇osidonius（Strab．iv．p．188），who hat
travelled in Gallia; and it is more prolable than the tradition that the gold of Tolosa was the produce of the plunder of Delphi by Bremnus and his men, anong whom it is sitid there were some 'lectosages (Justin, xxxii. c. 3) ; for it is very doubtful if any of Brennus' soldiers got back to tiallia, if we admit that they came trom Gallia. Toloss was in some kind of alliance with Rome (Dion Cass. xxxiv. 97 ) about 1. c. 106 ; but the Teutopes and Cimbri at this time had broken into Gallia, and fear or policy induced the Tolosates to side with them. Q. Scrvilius Catpio (consul m.e. 106) made this a pretext for attacking Tolosa, which he took and plundered of its treasures, either in s. c. 106 or in the following year. This act of sacrilege was supposed to bave been punished by the goda, for Cuepio was defeated by the Cimbri 11, c. 105 , and his army was destroyed. (Liv, Eppit. 67 ; Orusius, v. 15; Gell. iii. 9.) The treasure of Thososa never reacbed Rome, and perhaps Caepio limsilf laid held of some of it. However this may be, the "Auruna Tolosanum" became a proverb. All who had touched the consecrated treasare came to a miserable end. It seems that there was inquiry made into the matter at Rome, for Cicero (De Nut. Deorum, iii. 30) speaks of a "quaestic auri Tolosani."

The Tulosani or Tolosates were that division of the Tectosages which was nearest to the Aquitani. A place called Fines, between Tolosa and Carcaso, denotes the boundary of the territory of Tolosa in that direction, as this term often indicates a territorial limit in the Roman geography of Gallia [Fines]: and another plice naned Fines marks the boundary on the north between the Tolosates and the Cadurci.

Pliny (iii. 4) mentions Tolusa ameng the Oppida Latima of Narbosensis, or those towns which liad the Latinitas, and, as P'tolemy (ii. 10. § 9) names it a Colonia, we most suppose that it was made a Colonia Latina. Tolosa maintained its importance under the Empire. Ausonius (Ordo Nob. Lrb. sii.) describes Tolosa as surrounded by a brick wall of great circuit, and as a populans city, which lad sent out inhubitants enough to found four other cities. The name Palladia, which Martial (Ep. ix. 101), Sidonius Apollinaris, and Ausonius give to Tolowa appears to refer to the cultivation of the liberal arts in this fiallic city -
"Te sibi Palladize autetolit toga docta Tolosse."
(Auson. Parent. iii. 6 ; and Commem. Profess. Burdig. xvii. 7.)
[G. L.]
HOLOUS, a place of the Ilergetes in Hispania Tarraconensis, (Itin. Ant. p. 391.) Probably Monzon.
[T. II. D.]
Tomidnts [Donosa, p. 783, b.]
TOME: RUS (Tómpos, Arran, Ind. 24), a river, or rather turent of Cicdrusia, called Tunberos or Tomberos by Pliny (vi. 23. s. $2.5 . \S 93$, ed. Sillig.), and Tubero ly Mela (iii. 7). Accorling to the distances in Arrian, this river is the Muklow ur Ilingul.

Tombeds. Messenta, p. 341, b.]
ToM1s or TOM1 (Tóucs, strab. vii. p. 319; Ov. Tr. iii. 9. 33; (ieór. Rav. iv, 6, \&e.: Tópat, I'tol. iii. 10. §s: Timm, Jlin, jv. 1t. s. 18; stat. S. i. 2, 255; Itin. Ant, p. 227. \&e.; in Mela, ii. 2. Tomoe: we also timl the Greek furm Toutevs, Steph. B. s. v.; Arrian, F'er. P. Eus. p. 24), a town of Lower Bloesia, on the Lasiue, and the
capital of the district of Sicythia Miner (Sozom, 11. Ecel. vii. 25; Hierocl. p. 6.37). It was situated at a distance of about 300 stadia or 36 miles from Istros or Istropolis (Anon. Per. P. Eus. p. 12; Itin. Ant. p. 227), but accordine to the Tab. Peut, 40 tuiles. It was a Milesian colony, and accurding to the legend the place where Medea cut up her brother's body, or where their father Aeetes got tugether and buried the piecrs (Ov, l. c.; Apullod. i. 9. 25 ; Hrgin. Fab. 13.) The legend is no doubt comnected with the name of the town, which, however, is still better kuown as the place of banishment of Ovid. Now Tomiscar or Jeni Pangola.
[T. II. D.]

COIN OF TOMHS OH TOMI.
 town of Sophene, io Armenia, was ceded by L.ucullus to the Cappadocians. (1'olyb. xxxiv. 13; Strab. xii. p. 535 , xiv. pp. 663, 664; Stepb. B. s. v.)

ToNbEROS. [Tomerus.]
TONICE. [Niconis Dromus.]
TONOSA, a town of Cappardocia, 50 miles from Sebastia, still called Tonus. (It. Ant. pp. 181, 182, 212.)

TONSUS, or TONZUS (Tóroos, Zos, ii. 22. § 8 ; cf. Lampr. Elag. 7), the priacipal tributary of the Hebrus in Tbrace, It risea in the Hacmus: its general course for about 70 miles is almost dne E.; it then makes a sudden bend to the S ., and, after a farther southerly course of nearly the same length, falls into the Hebrus, a short distance from Hadrianopolis. Now Tuncza or Toondja.
[J. R.]
TOPI'R1S (Plin. iv. 11. s. 18; Tonipis or Tomクpis, Ptol. iii. 11. § 13), or Tomers ( It. Ant. p. 321 ; in p. 331, it is ecrrupted into Otopisus ; and in It. Hier. p. 603, jntn Epyrus; Tab. Peut.; Tüntupos, Hieroel. p. 634), a tuwn in the SW. of Tbrace, a little NE. from the mouth of the Nestus, and a short distance W. of Abdera. In the time of Procopiss (B. G. iii. 38) it was the first of the maritime cities of Thrace, and is described as distant 12 days' journey from Byzantium. Very little is known about this place. In later times it was called Ihnusion ('Poöoiop, Hierucl. l. c.; ef. Aposposm. Geo. is Hudson, iv, p. 42 ; and Auna Como. p. 212), and was the sest of a bishopric. (Conc, Chalced.) Justinian rebuilt its walls, which had been demulisbed, and mate chem strunger than hefore. (Procop. de Aed. iv. 11.) According to Paul Lucas and Bondone, the moden Tisbur occupies its site; but Lapie ideatifies it with К"ara-Giuenzi.
[J. R.]
TUREA'TAE. [TonftaE.]
TORECCADAE. [Tonetas.]
'To'RETAE: (Topetai, Steph B. s. v.; Dionys. Per. 6ی2; I'lin, vi. 5; Mela, i. 2; Avien. Orb. Terr. 867) or TOREA'TAE (Tupeäтaı.Stral. xi. p. 495), a trile of the Mheotae in Asiatic Sarmatia. I'tolemy (v. 9 § 9) mentions a Topetiki) àкрà in Asianc Surrmatiat and in ausother passage (iii. 5. § 25) he
speaks of the Topeкксї̆aı as a people in Furapean Narmatia, whe are perlaps the same as the Toretae or Toreatas.

TORNADOTUS, a small river of Assyria, mentioned by Pliny (vi. 27, s. 31), and a tributary of the Tigris. It is probably the same stream as that noticed by Xenophon under the name of the l'hysens, (.1nab, ii. 4. § 25.) It may be the modern Torma or Otorneh. Mannert (vi, 2, p. 317) takes it to be the same as the Adiabas of Ammirnns ( $x$ xiii. 6); but the Adiabas is more likely to be that elsewhere called the Zabatus (now Zab).
[V.]
TORNATES, an Aquitanian people, whove name is preserved in Pliny (iv. 19). There is mo indication of their position, unless it be the name Tournai, a small town on the Arros, a branch of the Adour, and in the diocese of Tarbes, which, under the name of Tnrbs, was the chief place of the Bigerriones. [Bigerimones.]
[G. L.]

## TORONAICUS SINUS. [Torone.]

TORO'NE (Top ${ }^{\prime} v \eta$ : Eth. Top $\omega \nu$ âios), a town of Cbalcidice in Macedoni:t, situated upon the SW. coast of the peninsula of Sithonia. It was snid to have derived its name from Torone, a duaghter of Proetens or Poseidon and Pheenice. (Steph. B. s. v. Topwivn.) It was a Greek colony, founded by the Chalcidians of Enboea, and appears to have been originally the chief settlement of the Chalcidians in these parts. Hence the gulf lying between the peoinsulas of Sithonia and Torone was generally called the Toronaean, now the Gulf' of Kassandhro.
 iii. 13. § 13; Topavıкдेs кб́גтоs, Strab. vii. p. 330; Scymn. Ch. 640; Torenaicum mare, Liv, xliv. 11; Toronaens simus, Tac. Ann. v. 10.) Like the other Greek cities in these parts, Torone furnished ships and men to the ariny of Xerxes in his invasion of Greece. (Hercd. vii. 122.) After the Persian War Torone came under tbe dominion of Athens. In r.c. 424 a party in the town opened the gates to Brasidas, but it was retaken by Cleon two years afterwards. (Thuc, iv. 110, seq., v. 2.) At a later time it seens to have bren subject to Olynthns, since it was recovered by the Athenian general Timothens. (Diodor. sv. 81.) It was annexed by Philip, along with the other Chalcidian cities, to the Macedonian empire. (Diodor. xvi. 53.) In the war against Perseus, b. C. 169, it was attacked by a llomen fleet, but withent success. (Liv. xliv. 12.) Theopbrastus related that the Egyptian bean grew in a marsh near Torone (ap. Athen. iii. p. 72, d.); and Archestratns mentions a particular kind of tish. for which Torene was celebrated (ap. Athen. vii. p. 310, c.). The barbonr of Torone was called Cophos (K $\omega \phi$ ós), or "deaf," becanse being separated from the sea by two narrow passages, the noise of the waves was never heard there: hence the proverb кaфи́тєроs тoû Topavalov $\lambda ґ \mu$ évos. (Strab. vii. p. 330; Mela, ii. 3; Zenob. Prov. Graec, cent. iv. pr. 68.) This port is apparently the same as the one called by Thucydides (v. 2) the harbonr of the Colophonians, which he describes as only a little way from the city of the Toronaeans. Leake conjectures that we ought perlaps to read K $\omega \phi \hat{\omega} \nu$ instead of Ko入oф $\quad$ vi $\omega \nu$. It is still called $\kappa$ Kufö, and Torone likewise retains its ancient name. (Leake, Northern Greece, vol. iii. pp. 119, 155, 455.)

TORINE (Topúv $\eta$, Plut. Ant. 62: Topávn, Ptol. iii. 14. § 5), a town of Thesprotia in Ejeirus, off which the fleet of Angnstns was moored is short time before the battle of Actinm, seens from the vol. 11.
orier of the names in Ptolemy to have stood in one of the bays between the month of the river Thyami? and Syhota, prohably at Parga, (1.cake, Northern Greere, vol. i. p. 103, vol. iii. 1. 8.).

TorTAEUA1, a place in Bithynia of ancertain site (It. Ant. p. 141 ; It. Hieros. p. 573 , where it is called Tutaium; Concil. Chalced. p. 98); bat some lowk for its site near Geireh, and others nenr Karckaia.
[L. S.]
TOXANDRI. These inhabitants of North Gallia are first mentioned by Pliny (iv. 17) in a passage which has been interpreted several ways. Pliny'a Belgica is limited on the north by the sealdis (Schelde). [Ganha Trass., Vol. 1. p. 960.] Pliny says: "A Scnidi incolunt extern Toxandri pluribus numinibus. Deinde Menapii, Morini." D'Anville and others explain "extera" to signify beyond the limits of the Schelde, that is, north and east of this boundary; and Clnver places the Tozaodri in the islands of Zeeland. D'Anville supposes that they took a part of their territory from the Menapii, aod that this newly acquired conntry was the Campen north of Brabant and the bishopric of Liege. This conjecture is supposed to le confirmed by the passage of Ammianus Marcellinus (xvii. 8), in which he says that Julian marched against the Franci named Salii, who bad dared to fix themselves on Roman ground " apad Toxiandriam locum." The geographers who are hest acquainted with the Netherlands tix Tosiandri lucus nt Tessender Lo, a small place in the Campen to the north of Brabant. Lkert (Gallien, p. 372) gives a different meaning to the word "extera." He remarks that Pliny, describing the north coast of Europe (iv. 14), says : "Toto antem hoe mari ad Scaldim usque fluvinm Germanicae accolunt gentes," and be then enumerates the peoples as far as the Sisldis. Afterwards (c. 17) he adds "a Scaldi incolunt," \&c: ; aod a few lines further, a word "introrsns " is roposed to this "extera"; from which Lkert concludes that "extera" here means the coast country, a mesning which it has in two other passages of Pliny (ii. 67 , iv. 13). After describing the nations which occupy the "estera," or conast. Pliny mentions the peoples in the interinr, and in the third place the Germanic perples on the Rhine. Accordingly I kert concludes that we must liok for the Tuxandri in the neigbbourhood of Ghent and Broyes. ... [G. 1.]

TRACANA (Tpáкava, 1'tol. iii. 5. § 27), an inland city of European Karmatia. [T. H. D.]

TRACHIS or TRACHIN (Tpaqis, Ilerod., Thuc., et alii; Tpaxiv, Strab.: Fth. Tpaxivos). 1. A city of Malis, in the district called after it Trachimia. It stood in a plain at the foot of Mt. Oeta, a little to the N. or rnther W. of Thermopylae, and derived its name from the rocks which surronnded the plain. It commanded the approach to Thermopylae from Thessaly, and was, from its position, of great military importance. (Ilerul. vii. 176; Strab. ix. p. 428; Steph. B. s. v.) The entrance to the Trachioian plain was only lalf a plethrum in breadth, bnt the surface of the plain was 22,000 plethra, accerding to Herodetus. The same writer states that the city Trachis was 5 stadia from the river Melas, and that the river Asopus issued from a gorce in the monntuins, to the S. of Trachis. (Herod. vii. 198.) According to Thmeydides, Tracbis was 40 stadia from Thermopylac and 20 from the sen (Thuc. iii. 92.) Trachin is mentiened in Hlomer as one of the cities subject to Achilles ( $12 . \mathrm{ii} .682$ ), und is celebrated io the legends of Ilereules as the scene of

## TRACHONITIS.

this hero's death. (Suph. Trach. passim.) It became a place of historical impertance in consequence of the colony founded here by the Lacedaemonians in the sixth year of the Pelopennesian War, n. c. 426. The Trachinians and the ucighbouring Dorians, who suffercd much from the predatory irrenrsions of the Oetacan mountaineers, solicited aid from the Spartans, whe engerly availed themselves of this oppertunity to plant a strong colony in this commauding situation. They issued an invitation to the ether states of Greece to join in the celony ; and as many as 10,000 colonists, under three Spartan oecists, built and fortified a new town, to which the name of Hebaclemid was given, from the great here, whose name was so closely associated with the surrounding district. (Thuc. iii. 92; Diod. xii. 59.) It was usiaully called the Trachinian Heracleia, to distinguish it from other places of the same name, and by later writers Heracleia in Phthiotis, as this district wats subsequently included in the Thessalian Pbthio-
 § 18: Diod. xii. 77, xv. 57 ; 'Hpak $\lambda \epsilon \hat{\omega} \tau a$. oí $ย \nu$ Tpaxivh, Thac, v. 51 ; 'H. ŋ̀ Tpaxlv калоขцévך $\pi р$ отєроу, Strab. ix. p. 428; Heraclea Trachin dicta, Plin. iv. 7. s. 14 ; 'H. $\Phi \theta$ túri $\delta o s$, Ptel. iii. 13. § 46.$)$ The new celonists also built a port with docks near Thermopylae. It was generally expected that this city, under tbe pretection of Sparta, would beceme a formidable power in Northern Greece, bot it was attacked frem the beginning by the Thessalians, who regarded its establishment as an invasion of their territery; and the Spartans, who rarely succeeded in the government of dependencies, displayed baughtiness and corruption in its administration. Hence the city rapidly dwindled dewn ; and in e. c. 420 the Heracleots were defeated with great loss by the neighbouring Thessalian tribes, and Xenares, the Lacednemonian gevernor, was blain in the battle. Sparta was unable at the time to send assistance to their coleny; and in the following year the Boeotians, fearing lest the place should fall inte the bands of the Atherians, took possession of it, and dismissed the Lacedaemonian governor, on the ground of misconduct. (Thuc. v. 51, 52.) The Lacedaemenians, however, regained possession of the place; and in the winter of 1. c. $409-408$, they experienced here another disaster, 700 of the 11eracleats being slain in battle, together with the Lacedaemonian barmost. (Xen. Iftll. i. 3. § 1s.) But, after the Peloponnesian War, lleraclea again rose into importance, and became the head-quarters of the Spartan power in Nerthern Girecce. In n. c. 399 Herippidas, the Lacedaemonian, was sent thither to repress some facrious mevements in Heracieia; and be not only put tor death all the epponents of the Lacedaemenians in the town, but expelled the neighbouring Oetaeans and Trachiniaes fiom their abodes. (Diod. siv. 38; Polyaen. ii. 21.) In E. C. 395 the Thebans, muder the command of lsmenias, wrested this important place from the Spartans, killed the Lacedactnonian garrison, and gave the city to the old Trachinian and Oetaean iuhabitants. (Diod. xiv. 82.) The walls of lleracicia were destroyed by Jason, lest any state shonld serve this place and prevent him from marching into Greece. (Xen. Mell. vi. 4. § 27.) At a later time Heracleia came inte the hands of the Aetolians, unt was one of the main sources of their power in Northern Greece. After the defeat of Antiochus at Thermopylae, B. c. 19t, Hetacleia was besieged by the Romam consul Acilits Glabrio, who dividud his anny into four hodies, and directed his
attacka upon four points at once ; one body being stationed on the river Asopus, where was the gymnasiunn ; the secend near the citadel outside of the walls (extra mures), which was almost mere thickly inhabited than the city itself; the third towards the Maliac gulf; and the fourth on the river Melas, opposite the temple of Dians. The country around was marshy, and abounded in lefty trees. After a siege of twenty-four days the Romans socceeded in taking the town, and the Aetelians retired to thic citadel. On the fellowing day the consul seized a rocky surnmit, equal to the eitadel is beight, and separated from it enly by a chasm so narrow that the two summits were within reach of a missile. Thereupon the Aetolians survendered the citadej. (Liv. $x x x v i, ~ 24$. Leake remarks that it seems quite clear from thia account of Livy that the city eccupied the low ground between the rivers Karvanariá (Asopus) and Mavra-Néria (Melas), extending from the whe to the other, as well as a considerable distance into the plain in a seuth-eastern direction. There are still some vestiges of the citadel upon a lofty rock above ; and upon its perpendicular sides there are many catacombs excavated. "The distance of the citadel above the tewn justifies the words extra muros, which Livy applies to it, and may explain also the assertion of Strabo (l. c.), that IIeracleia was six stadia distant from the ancient Tracbis ; for, although the town of Heracleia seems to have occupied the same position as the Trachis of Herodetus, the citadel, which, accerding to Livy, was better inhabited is the Aetelian War than the city, may very possibly have been the only inhabited part of Heracleia two centuries later." (Leake, Northern Greece, vol. ii. pp. 26-29.)
2. Surnamed Phocica ( $\grave{\eta}$ Фwкuки́), a small city of Phocis, situated upon the confines of Boectia, and en the road to Lebadeia. (Strab. ix. p. 423; l’aus. x. 3. § 2.)

TRACHONI'TIS (Tpaxwîtis, Luke, iii. I; Joseph. Ant. ธvi. 9, B. J. iii. 3; Plin. v. 18. s. 16 ; Tpai $u v$, , Juseph. Ant. xiii. 16), according to Jesephus, a portion of Palestine which extended in a NE. directien from the neighbeurbood of the sea of Galilee in the direction of Damascus, having tho Syrian desert and Auranitis on its eastern frentier, limaea on the S., and Gaulanitis on the W. It was censidered as the northern portion of Peraea (IIepaia, i. e. Mépav тồ 'lop $\delta a v o v$, Judith, i. 9; Matth. iv. 25.) According to Strabe, it lay between Damascus and the Arabian meuntains (xvi. p. 755); and from ether authorities we may gather that it adjoined the province of Batanaea (Joseph. B. J. i. 20. § 4), and extended between the Regio Decapolitana (Plin. v. 15) as far S., as Bostra (Euseb. Onomast. e. c. Ituraco.) it derived its name frem the rongh nature of the ceuntry ( $\tau \rho \alpha \chi \dot{\omega} \nu$, i. e. $\tau \rho a \chi \dot{\omega}$ nal $\pi \epsilon \tau \rho \omega \dot{b} \eta \bar{s}$ $\tau o ́ \pi o s)$; and Strabo mentione tiro $\tau \rho a \chi \hat{\omega} \nu \in s$ (xvi. p. 755,756 ), which Burckhardt considers to be the summits of two mountain ranges on the read from Mekki to Damascus, near the village of Al-Kessue. (Travels, p. 115.) The inhabitants of Trachonitis are called by P'telemy, oi Tpaұ̄̄vital 'Apabes (v. its. $\$ 26$ ), and they seemed to have maintained their character for remarkable skill in slooting with the bow and plundering (Joseph. B. J. ii. 4. \& 2), for which the rocky nature of the country they inhabited, full as it was of clefts, and beles and secret fastnesses, was peculiarly well suited (Joseph. Ant. xv. 10. § 1.) Trachonitis belonged originally to the tetrarcily of l'halippus, the son of Herod the

Great (Josepl2. Ant, xxii. 8. § 1, i., J. ii. 6. § 3); but it subsequently formed part of the dominion of Herodes Agrippa. (Joseph. Ant. xviii. 6. § 10, B. J. iii. 3. § 5 ; Philo, Opp. ii. p. 593.)

The whole district has been recently explored and examined with much care and judgment by the Rev. J. L. Porter of Damasous, who bas shown that the ancient accounts of this province, properly weighed, coincide with remarkable accuracy with what we know of it now. According to him, it most bave been to the NW. of Batanaea, and have extended along the stony tract at the hase of the Jebel Haurim, as Kenath (now Kunawat) was a city of Trachon (Euseb. Onomast. s. v. Canath), while the Targums extend it, thongh improbably, as far S . as Bostra. Mr. Porter observes that the name is sometitnes applied in a more general sense by ancient writers, so as to include the neighbouring provinces (as in Luke, iii. 1, where the "Region of Trachonitis" must be understood as embracing Batanaea and Anranitis; Joseph. Ant. xrii. 14. § 4.) He thinks, too, that the plain on the western side as far as the Hüj raad was embraced in Trachonitis, and likewise that on the north to the Jebel Khiydirah, with a considerable section of the plain on the east, N. of Ard-al-Bathanyeh. The Argob of Numb. xxxiv. 15, 1 Kings, iv. 13, \&c., Mr. Porter considers to be the same district as Trachonitis, the latter being the Greek rendering of the Hebrew form. (Porter, Five Years in Damaseus, ii. pp. 259-262, 268-2i2; Robinson, iii. p. 907 ; Russegger, iii. p. 279 ; Winer, Bibl. Realwörterbuch.)

TRACHY. [Orchomexus, p. 490, a.]
TRACTARI, a tribe in the Cbersonesus Taurica (Plin. iv. 12. s. 26).
[T. H. D.]

## TRAELIUS. [Tragilis.]

TRAENS or TRAïS (Tpáets or Tpáevs, -evtos: Trionto), a river of Bruttion celebrated for the sanguinary defeat of the Sybarites on its banks by their rivals the Crotoniats, which led to the destruction of the city of Sybaris, B. c. 5t0. (Iambl. V'ì. Iyth. § 260.) It is singular that the banks of a stream which had been the scene of such a catastrophe should be again selected by the remnant of the Sybarites who were expelled from the new colony of Thurii shortly after its foondation [Tuunir] for the site of their settlement. They, however, did not remain long, being expelled and pot to the sword by the neighbouring barbarians, whom Diodorus by a remarkable anachronism calls Bruttians, apparently within a few years of their establishment. (Diod. xii, 22.) The name of the river is not found in any of the geographers, but there can be little doubt of its being the one still called the Trionto, which falls into the gulf of Tarentom a few miles E. of Rossano, and gives name also to an adjoining headland, the Capo di Trionto.
[E. H. B.]
TRA'G1A (Tpayía), also called Tragiac (Tpariau), Tragia, Tragaeae (Tpayaiat), or Tragaea (Tparaia), a small island off the south coast of Sumos, near which Pericles, in B. c. 440 , defeated the Samians in a naval engngement. (Thucyd. i. 116; Plin. iv. 71, v. 135 ; Plut. Per. 25; Strab. xiii. p. 635 ; Stepl. B. s. v. Tparaia.) Respecting the Tragasaeae Salinae, sec Halesion.
[L. S.]
TRA'GIA or TRAGAEA. [Nixos, p. 406, a.]
TRA'GlLUS (Tpáyi入os: Eth. Tpayìeús, Steph. B. s. v.), a town of Macedonia, and doubtless the same as the $\mathbf{B} \rho \dot{d} y i \lambda a s$ or $\Delta \rho a ́ \gamma i \lambda o s$ found in Hierocles (p. 639) among the towns of the first or consular Maccdonia. In the Table there is a place "Triulo"
marked as 10 miles from Philippi. Thus is apparently a corruption of "Traclio," since numerons coins (one of which is figured below) have been found near Amplapolis with tho inscription THALAI N. Leake conjectures with much probability that the real name was Tragilus, and that in the local form of the name the $\boldsymbol{\Gamma}$ may have been omitted, so that the TPAAMI 2 N of the coin may represcit the Hellemic Tpayiníw. (Eckhel, vol. ii. p. 81 ; leake, Northern Grecee, vol. iii. p. 228.)

COIN OF TRAGILE'S OR TRIELIUS.
TRAGU'RIUM (Tpayaúpiov, Strab., Ptol.; Tparúpoo, Polgb.), an important town of Dalnatia, situated upon an island, which was separated from the mainland by an artificial canal. According to the Antonine 1 tinerary, it was distant 16 miles from Practorium and 13 from Salonae. Pliny calls it "Tragorium civium Romanorum," and says that it was celebrated for its marble. Its name is preserved in the modern Trau. (Polyb, xxxii. 18 : Strab. ii. p. 124, vii. p. 315 ; Ptol. ii. $17 . \S$ § 14 ; Plin, iii. 22. s. 26 ; Mela, it. 3 ; It. Ant. p. 272 ; Tab. Peut.; Geogr. Rav. iv. 16.)

TRAGUS, [CaruyaE]
TRAIA CAI'1TA (Itin. Ant. p. 399), more correctly Ten Cailita (Geog. Rav. r. 3), since it lay near the three mouths of the Iberus, a town of the Cosetani, in Hispania Tarraconensis, between Dertosa and Tarraco. Varionsly identified with Tivisa and Torre del Aliga.
[T. H. D.]
TRAJA'NI MUNIMENTUM, a tort or castle buitt by Trajan on the sodthers bank of the river Muenus, not far from its junction with the Rhenus. (Amm. Marc. xvii. 1.) The site is uncertain, nor is it known what the Munimentom really was. [L. S.]

## TRAJA'NI PORTUS. [Ostia.]

TRAJANO'POLIS (Tpaiavonodis), a town in Mysia, in the district occupied by the tribe of the Thraemenothyritae, on the frontiers of Pbrygin. (Ptol. s. 2. §S 14, 15.) The Cilician city of Selinus also for a time bore the name of Trajanopolis. [Selincts.]
[L. S.]
TRAJANO'POLIS (Tраӥavóто入ıs), an important town in the S. of Thrace, which was probably founded by or in bonour of the emperor Trajan, about tbe time when Plotitopolis was founded, to perpetuate the name of his wife Plotina. Its exact site appears to be somewhat doubtful. Some anthorities describe it as situated on the right bank of the Helrus, near the pass in the range of Mount Rhodope, through which that river flows, and nbout 40 miles from its moutl. Now this is the site of the modern Orikhova, with which occordingly it is by some identified. It woukl be difficult, however, to recancile this with the various distances given in the Itincraries: e. g. Trajanopolis is stated to be 9000 paces from Tempyra, and 29,0u0 from Cypela; whereas the site above mentioned is nearly equidistant from those assigued to Tempyra and Cypsela, being, howeser, more distant from the former. But this is only ono example out of many showing how extremely imperfect is our knowledge of the geography of Thrace, both ancient and modern. In the map of the Society
for the Diffusion of Useful Knowledge Trajanopolis is placed on the Eenatian Way at a considerable dis－ tance W．of the Hebrus，and at a point which fulfils toletably well the conditions of distance from the two places above mentioned．

Trajanopolis became the capital of the province of Rladope，and continued to be a place of iraportance until the fourth century．It is remarkable，how－ ever，that it is not mentioned by Anmianns in lis general description of Thatace（xxvii．4）；according to him，the chief cities of Rhodope were Maximiano－ polis，Maroneia，and Acnus．（ P tol．iii．11．§ 13 ； Hierocl．p．631：Procop．de Aed．iv． 11 ：Const． l＇urph．de Caerin．ii． 54 ；Cantacuz．i．38，iii． 67. et alibi； $1 t$ ．Aut．pp．175，322，332，333；It． Hier．p． 602 ；Geog．Rav．iv． 6 ；cf．Mannert，vii． p．224．）
［J．R．］
TLAAJECTUM，in North Gallia，is not mentioned in any Roman writing before the Itin．of Antoninus． It was on the Roman road which ran along the Rline from Lugdunam Batavorum，and the site is l＇trecht in the kingdom of the Netherlands，at the bifurcation of the old Rhine and the lecht．The mo－ dern name contains the Roooan name abbreviated， and the part U seems to be a corruption of the word orule（Vetu：）；but D＇Anville observes that the name is written L＇treckt as early as 870 ．
［G．L．］
TRiAJECTUS in Gaullia，placed by the Avtonine， Itir，on a road which runs from Aginnum（Agen） through Excisum and Trajectus to Vesunna（ Peri－ guters）．Trajectus is axi．from Excisum（I＇ille Neare），and xviii．from Yesumna，and it marks the passage of the Duranius（Durdogne）between these two pusitions at a place called Pontons on the Dor－ clogne，opposite to which on the other bank of the river is La Linde，mentioned in the Table under the name of Diwlindum．［Dholindem．］［G．L．］

Thais．［Trafis．］
TRALLES or TRALL1S（Tpár入eis．Tpd入入is： Fth．Tpaidiav（s），a large and flourishing city of Caria，on the southern slope of mount Messogis，a little to the north of the Scamander，a sunall tribu－ t．ny of which，the Eudon，flowed close by the city， while another passed right through it．Its auropolis was situated on a lofty eminence in the north of the city．Trulles was said to have bem founded Ly Ar－ Eives in conjunction with a budy of Thracians，whence its name Tralles was believed to be derived（Strab． siv．Pp．64s，649；Hesych，s．w．；Diod．Sic．xvil． 65 ； Plut．Ages．16），for it is suid to have previously been called Anthea，Evanthea，Erymna，Charax，Seleucia， and Antiochis（Steph．B．s．vv．T $\rho \dot{\alpha} \lambda \lambda t s$, Xápa $\xi ;$ Etym．11．p．389；Plia．v．29）．Others，however， stite that it was a Pelasgian colony，and originally bore the name of Larissa（Agath．if．17；S．hol．aul Jhom．Il．x．429）．It was situated in a must fertile district，at a point where highroads met from the south，cant，and west；so that it must lave been a phace of considerable commerce．（Cic．ad Att．v． 14．all Fam．iui．5，ad Quint．Frat．i．I；strah．xiv． p．663．）The inlabitants of Tralles were celebuated for their great wealith，and were generally appointed aviarchs，that is，presidents of the ganes celebrated in the district．But the country in which Tralles w．ts situated was molt subject to carthquakes； in the reign of Augustus many of its public build－ ings were greatly damaged by a violent shock；and the emperor gave the inhabitants a handsome sum of money to repair the losses they land sustained． （Strab．xii．p．579．）Out of gratitule，the Trallians 1 －titioned to be pernitted to crect is tunple in honour

## TRANSDUCTA．

of Tiberius，bat without effect．（Tac．Ann．iv．55．） According to Pliny（xxxv．49），king Attalus lud a palace at Trudles．A statue of Cuesar was set up in the temple of Victoria at Tralles ；sod during the presence of Cassar in Asia a miracle is said to have haypened in the temple，respectong which see Caes． Bell．Civ．iii．105；Plut．Caes．47：aod Val．Max． i．6．The eity is very often mentioned by ancient writers（Xeu．Anab．i．4．§ 8，Mist．Gir．iii．2．§ 19； Polyls．xxii．27；Liv，xxxvii．45，xxxviii． 39 ；Dietl． xir．36，xix．75；Juven．iii．70；Ptol．v．2．§ 19 ； Hierocl．p．659）．During the middle ages the city fell into decay，but was repaired by Andronicus Pa－ laeologus（G．Pachymer，p．320）．Extensive ruibs of the place still exist above the modern Gliuzel Hissar，in a position perfectly agreeing with the de－ scription of Strub）．（See Arundell，Seven Churches， pp．58，65，293：Leake，Asia Minor，pp．243，246； Fellows，Asia Minor，p．276，Lycia，p．16；Hamil－ ton．Researches，i．p．533．）As to the coios of Tralles， which are very momerous，see Sestini，p．89．［L．S．］

## COIN OF TRMIIES．

TRALLES or TRALLIS（T $\rho$ ád $\lambda \eta s$ ），a town in Flrygia，on the west of Apamea，and 15 miles east of Ilierapulis，not far from the banks of the Maeander （Hierocl．p．667̄ ；Conc．Const．ii．p．243；Conc．Ni． caen．ii．p． 5 I ；Tab．Peut．）．The ruins scen by Arundell（Secen Churches，p．231）near the village of Kuslar are probably those of Tralles．［L．S．］

TRALLIA（Tpa入入ia：Étl．Tpa入入ós，Tpa入入eús， Steph．B．s．v．），a district of Illyria，whose inhabitants， the Tralli，are mentioned sereral times by Liry （xxvii．32，xxxi．35，xxxiii．4）．

TRALLICON，a town of Caria，mentioned only by Pliny（v．29），situated on the river Harpasus；but in bis time it lat already ceased to exist．［L．S．］

THADIPYA．［TYMPHAEA．］
TRANSCELLENSIS DONS，a mountain in Manaretania，between Caesares and the river China－ laph．（Amm．Marc．xxiz．5．§ 20．）［T．H．D．］

TRANSDUCTA（Tpavoסoukca，Piol．ii．4．§ 6），and in a fuller form，J／aka Thisspucti or Tradecta，a town of the Bastuli，in Hispania Baetica，to the E．of Mellaria．It is donbtless the same place which Strabo（ii．p．140）calls＇Iou入la ＇Iúsa，and sets down between Belon and Gades， whither the Romans transplanted the inhabitants of Zelis，in Mauretania Tingitana．According to Ckert（ii．pt．i．p．34．5）it is also the Tingentera of Mela（ii．6），who infurms us that he was born there； though it is not easy to see how it conld have had so many names．But the ground for the conjecture is that Tingentera，according to Mela，was inhabitel by Pluenicians，who had been transported thither． which in some respects resembles Strabo＇s account of Julia Fozs．It is sought at the modern Tarifa，or in its neighbourhood．Fur coins see Florez，Med．ii．p． 596；Feckhel，Ductr．Xum．i．1．p．30；Mionnet，i．
p．26，and Suppt．i．pp．19，45；Sestini，p． 90 ： Florez，Esp．Sagr．．．p． $50 ;$ Mem．de l＇Acad．des Inser．xxx p．103．）
［T．H．D．］
transmarisca（Tродápiona，1＇tol．iii． 10. § 11：Tраиарі́бкаs and Tрабна́рıка，1＇roeop．de Aed． iv．7．p．292；Stamarisca，Geogr．Rav．iv．7），a strong fortress of Lower Moesia，oppasite to the spot where the Mariscus flows into the Danube． It was the head－quarters of two cohorts of the Legio xi．Claudia，and also of some light－armed troops． （Itin．Aut．p．223；Not．Imp．；Tab．Peut）．Now Turtukai，Tuturkui，or Toterkan．［T．II．D．］

TRANSMONTA＇NI（Tpavo $\mu \circ \nu \tau a v o l$, Ptol．iii． 5. § 21），the name of a tribe in European Sarmatia dwelling between the sources of the Borysthenes and the Peucinian mountains．
［T．H．D．］
TRAPEZO＇POLIS（Tpane（ónadis or Tpane тoAts：Eth．Trapezopolitne），a town sifnated，accord－ ing to Ptnlemy（ii．2．§ 18），in Caria，but according to Socrates（Hist．Eccles，vii．36）and Hierocles（p． 665），in Plrygia．The former is the more correct statement，for the town stood on the southern slope of Mount Cadmus，to the sonth－east of Antioclia， and，according to the Notitia Imperii，afterwards belonged to the province of Paeatiana．It is possible that the ruins which Arundell（Discoveries，ii．p． 14i）found at Kesiljah－bouluk may be those of Trapezopolis．
［L．S．］
TRA＇PEZUS（Tpart Soüs：Eth．Tparȩoúvtios： now Tarabostan or Trebizond），an important city on the coast of Pontus，on the slope of a hill， 60 stadia th the east of llermonassa，in the territory of the Maerones（Anon．Peripl．P．E．p．13），was a colony founded by the Sinopians，who formed many esta－ hlishments on this coast．（Xenoph，Anab．iv．8．§22； Arrian，Peripl．P．E．pp．1，3，6；Scylax，p．33．）It derived its name probably from its form，being situ－ ated on an elevated platform，ns it were a table above the sea；though the town of Trapezus in Areadia pretended to be the mother－city of Trapezus in Pon－ tus（Paus，viii．27．§ 4）．Trapezus was already a flourishing town when Xenophon arrived there on his memorable retreat；and he and his men were most hospitahly treated by the Trapezuntians．（Xen． Anab．マ．5．§ 10．）At that time the Colchians were still in possession of the territory，but it after－ wards was occupied by the Macrones．The real great－ ness of Trapezus，however，seems to have commenced under the dominion of the Romana．Pliny（ri．4） calls it a free city，a distinction which it had pro－ hably nbtained from Pompey during his war acainst Nithridates．In the reign of Hadrian，when Arrian visited it，it was the most important city on the south cnast of the Exuxine，and Trajan had before made it the capital of Pontns Cappadocieus，and provided it with a larger and better harbour．（Arrian，Peripl． P．E．p． 17 ；comp．Tac．Ann．xiii．39，Hist．iii． 47 ； I＇onp．Mela，i．19：Strab，vii．pp．309，320，xi． p．499，xii．p． 548 ；Steph．B．s．r．）Henceforth it was a strongly fortified commercial town；and al－ though in the reign of Gallienus it was sacked and hurnt by the Goths（Zosim．i．33；Eastath．ad fiom．Per．687），it continued to be in such excel－ lent condition，that in the reign of Justinian it re－ quired but few repairs．（Procop．de Aed．iii．7．） From the Notitia Imperii（c．27）we learn that Trapezus was the station of the first Pontian legion and its staff．Some centuries later a branch of the inperial house of the Comneni declared themselves independent of the Greek Empire，and made Tra－ pezus the seat of their principality．This small
principality maintained ita independence eren for some time after the fall of Constnnting le ；liut being too weak to resist the nverwhehning joreer of the Turks，it was obliged，in A．D． $1+60$ ，to submit to Mohammed 11．，and lase ever siuce that time been a Turkish town．（Chalcond．ix．p．263，foll．；Duc． 45：comp．（iibbon，Declime，e．xlviii．foll．）The port of Trapezus，callcel 1）aphnus，was formed by the neropolis，which was built on a rock rumning out into the sea．（Aumn．Peripl．P，E．p，13．）Thro eity of Trebizond is still one of the most flourishing commercial cities of Asia Minor，but it contains no ancient remains of any interest，ns most of them belong to the perind of the Lower Empire．（Tonrne－ fort，Toyage wu Levant，iii．，lettre 17，p．79，foll．； Fontanier．Inyages dans l＇Orient，p．17－23： Ilamilton＇s Rescarches，i．p．240．）The coins of Trapezus all belong to the imperial period，and ex－ tend from the reign of Trajisn to that of Philip． （Eekhel，i．2．p． 358 ；Sestini，p．60．）［1．．S．］
TRA＇PEZU＇S（Tpant （oúvrios），a tomn of Areadia in the district l＇arrhasia， a little to the left of the river Alpheins，is ssid to have derived its name from its founder Trapezeus，the son of Lyeaon，or from trapeza（ $\tau \rho a ́ \pi \epsilon \varsigma \_$），＂a table，＂ because Zeus here nverturnel the table on which Lyeaon offered him homan food．（Pans，viii．3．§§ 2，3：Apollod．iii．8．§ 1．）It was the royal residence of Hippothous，who transferred the seat of govern－ ment from Tegea to Trajezus．On the foundation of Megalopolis，in n．c． 371 ，the inhabitants of Tra－ pezus refused to remove to the nerr city；and having thus incurred the anger of the other Arcadians，they quitted Peloponnesus，and took refoge in Trapezus on the Pontus Euxeinus，where they were received as a kindred people．The statnes of some of their gods were removed to Megalopolis，where they were seen by Pausanias．Traperus stood above the mo－ dern Marriá．（laus，viii．5．§4，2i．§§ 4－6， viii．29．§ 1，31．§5；Herod．vi．127；Steph．B．\＆．r．； Leake，Morea，vol．ii．p．292；Ross，Reisen int Peloponnes，vol．i．p．90．）

Trapbzts Mois．［Tameica Chersoxesus．］
TRA＇RILM（Tpápov），a town of Mysia，men－ tioned by Strabo in conjunction with Perperena（xiii． p．607．）Tzetzes（ad lycophr．1141，1159）men－ tions a mountain nained Traron（T $\mathrm{T} \alpha \rho \omega \omega$ ）in the Troad．

TRASIMENUS LACUS＊（方 Tpa⿱ovpivva or
 Lago di Perugia），one of the most extensive and important of the lakes of Etruria，situated between Cortona and l＇erusia．It is the largest of all the lakes of Etruria，being above 10 miles in length by 8 in breadth：and differs from all the other con－ siderable lakes of that country in not being of volcanie origin．It is inerely formed in a depresed basin，surrounded on all sides by hills of moderate elevation，and having no natural ontlet．The hills， on the N．side of the lake，which extend from Crotona to Perusia，are cunsiderably more elevated than those that form thie other sides of the basin， but even these scarcely rise to the dignity of moun－ tains．The lake itself is of snail depth，nowhere esceeding 30 feet，and its banks are almost every－ where low，flat，and corered with reeds．No con－

[^38]siderable town was situated on its shores: l'erusia, from which it derives its molern name of the Lago di Perugia, stands on a lofty hill about 10 miles to the E . of it; Clasium is sitnated about 9 miles to the SW. and Cortona between 6 and 7 to the NW. The bighroad from Arretiam to I'erusia followed the northern shore of the lake for a considerable distance.

The lake Trasimenus derives its chief celebrity from the great victory obtained upon its shores by Hamibal over the looman consal, C. Flamiaius, u.c. 217 , one of the greatest defents sustained by the Roman arms during the whole course of their history. The circumstatices of this battle are more clearly related and more readily understood with reference to the actual localities than those of any of the other great battles of Hsnuibal. The Carthaginian general, after crossing the Apeunines, and effecting his toilsome march through the marshes of Etruria, had encamped in the neighbourhood of Faesulae (Pol, iii. 80, 82). Flaminius was at this time posted with his army at Arretium, and Hannibal, wbose object was to draw him into a general battle, moved along the apper valley of the Arnus, and passing within a short distance of the consul's camp, adranced along the road towards Rome (i. e. by Perusia), laying waste the country as he adranced. Flaminius on this bastily broke up bis camp, and followed the Carthaginian army. Hannibal bad already passed tbe city of Cortona on his left, and was advancing along the N. shore of the lake, which lay on bis right hand, when, learning that Flaminius was following him, he determined to balt and await his attack, taking advantage of the strong position which offered itself to him. (Pol. iii. 82; Liv, axii. 4.) The hills which estend from Cortona to the lake, called by Livy the " montes Cortonenses," and now known as the Monte Gualandro, descend completely to the bank of the lake, or at least to the marshes that border it, at a point sear the NW. angle of the lake, pow marked by a village and a round tower called Borghetto. This spur of the hills completely separates the basio of the lake fron the plains below Curtona, and it is not uatil after surmounting it that the traveller by the modera road comes in sight of the lake, as well as of the small plain or valley, shut in between its N. sbore and the Gualandro, which was the actual scene of the catastrophe. "Arrived at the bighest poiat of the road, the traveller has a partial view of the fatal plaio, which opens fnlly upon him as he descends the Gualandro. He soon finds himself in a vale, enclused to the left, and in front, and belind hnm by the Gualandro hills, bending round in a segment larger than a semicircle, and ruoning down at each end to the lake, which obliques to the right and forms the chord of this monntain arc. The pasition cannot be guessed at from the plains of Cortona, nor appears to be so completely enclosed, unless to one who is fairly within the hilts. It then indeed appears a place made as it were on purpose for a saare, 'locus insidiis natus.' (Liv. xxii. 4.) Borghetto is then found to stand in a narrow marshy fass close to the bill and to the lake, whilst there is no other ontlet at the opposite turn of the mountains than through the little town of Passiguano, which is pushed into the water by the fiot of a high rocky acclivity. There is a woody eminence branching down from the mountains into the upper end of the plain nearer to the site of Passignano, and on this stands a village called

TRASIMENUS LACUS.
Torre" (more properly Tuoro). (Hobliouse, Noks and Illustrations to Childe Marold, canto iv, st. 63.)

From this description of the localitics by an eycwitness, which agrees almost exactly with that given by Livy ( $x$ xii. 4), the details of the battle are rendered perfectly clear. Ilamibal occupied the hill last-mentioned with the main body of his troops, his heavy-armed African and Spanish iafantry, while he sent round his light-armed truops to oceupy tha slopes of Monte Gualandro on his right, so as to threaten the left flank of the advancing Roman aruy, while he posted his cavalry and the Gaulish troops on the hills on the left between Borghetto and the present road. Flaminius advanced the next morning almost before daylight, while a thick fog rising from the lake still further concealed the position of the eaemy. He therefure advanced tbrough the pass, in igoorauce of the bodies of troops that bung upon botb his flanks, and, seeing only the array iu front on the bill of Tuoro, began to draw up bis forces for battle in the plain in front of them. But before be was able to coinmence the engagement, he found bimself soddenly attacked on all sides at once: the surprise was complete, and the battle quickly became a mere promiscnons massacre. Flaminius lyimself fell early in the day, and numbers of the Roman troops were driven into the lake, and citber perished in its waters or were put to the sword by the enemy's cavalry. A body of about 6000 men having forced their way through the eneny, occupied a hill on which there stood an Etruscan village, but finoing thomselves wholly isolated, sarrendered the next day to Maharbal. Sixteen thousand Roman troops perished in this disastrous battle: the site of the chief slauglater is still marked by a little rivulet which traverses the plain, and is known at the present day by the nane of the Sarguineto.* (Hobhouse, l.c.) The details of the battle are given by Polybius (iii. 83, 84) and Livy (xxii. 4-6). It is remarkable that in this instance the localities are mucb more clearly and accurately described by Livy than by Polybios: the account given by the latter author is not incorrpatible with the existing local details, but would not be easily understood, unless we were able to correct it by the certainty that the battle took place on this particular spot. The narratives of Appian and Zouaras add pothing to our knowledge of the battle. (Appian, Amib. 9, 10; Zonar. viii. 25.) Numerous allusions to and notices of the memorable slaughter at the lake of Trasimene are found in the later Roman writers, but they have preserved no additional circumstances of interest. The well-known story related by Livy, as well as by l'liny and later writers, that the fury of the combatants rendered them unconscious of the shock of an earthquake, which occurred during the battle, is easily understood without any prodigy, sach shocks being frequently very local atd irregular phenomena. (Plin. ii. 84. s. 86, xv. 18. s. 20 ; Cic. de N. D. ii. 3,

[^39]de Div. ii. 8; Eutrop. iii. 9; Flor. ii. 6. § 13; Oros. iv. 15 ; Val. Max. i. $6 . \S 6$; Sil. Ital. i. 49, v. 1, \&c. : Ovid, Fast. vi. 770 ; Strah. v. p. 226.)

The lake is new commonly known as the Lago di Perugia, though frequently called en maps and in guide-books the Lago Trasimeno. [E. H. B.]

TRAUSI (Tpavool, Herod. v. 3, 4 ; Thrausi, Liv. xxxviii. 41), a Thracian people, who appear, in later times at least, to have occupied the SE. offshoots of Mount Rhodope, to the W. of the Hebrus, and about Tempyra. Herodotus tells us that the Trausi entertained peculiar notions respecting human life, which were manifested in appropriate enstoms. When a child was borm, his kinsfulk, sitting around him, bewailed his lit in having to encounter the wiseries of mortal existence ; whereas when any one died, they buried bim with mirth and rejoicing, declaring him to lave been freed frem great evils, and to be now in perfect bliss.*

As to the Thrausi spoken of by Livy, see TemspyRA.

Suidas and Hesychias (s.v.) mention a Scythian tribe called the Trausi, who, according to Steph. B. (s.v.), were the same people as the Agathyrsi. The last-named anthor speaks of a Celtic race also, bearing this appellation. Ou this shight foundation the strange theory has been built that the Thracian Trausi were the original stock of the Celts; and hy way of supporting this notiod, its propoueders arbitrarily read Tpavaot iustead of Mpav̂бot in Strabo, iv. p. 187, where Strabo expressly says that be was unable to state what was the origival abode of the Prausi: had he been writing abont the Thracian Trausi we may safely assume that no such ignorance would have been acknowledged. (Cf. Ukert, ii. 2. § 230.)
[J. R.]
TRAVUS (Tpaūos, Herod. vii. 109), a small river in the S. of Thrace, which falla into the तifum Biotovis, a shallow aestuary penetratiog far into the land, NE of Abdera. The Travus is the principal outlet for the drainage of that part of soothern Thrace which is included between the Nestus and the Hebrus.
[J. R.]
TREBA or TRE'B1A. 1. (Eth. Trebias, ātis: Trevi), a municipal town of Umbria, situated at the western foot of the Apennines, betweeo Frlginiom and the smarees of the Clitumnus, about 4 miles from the latter. It is mentioned by Pliny among the muaicipal cities of Umbria, aod its vame is found in an inscription among the "xv Pepuli Umbriae:" in both these authorities the name of the people is written Trebiates. The Jerusalem Itinerary, which places it on the Via Flaminia, 4 miles from Sacraria (at the sources of the Clitumnus) and 5 from Fulginiom, writes the name Trevis, thus approximatiog closely to the modera name of Trevi. The moderu town is still a considerable place standing on a bill which rises abruptly from the valley of the Clitumnus. (Plin. iii. 14. s. 19; Itin. Hier. p. 613; Orell. Inser. 98).
2. (Tpinea, Ptol.: Eth. Trebanus: Trevi), a city of Latium, in the upper valley of the Anio, abont 5 miles from the sources of that river and 10 above Subiaco. It is mentioned both by Pliny and Ptolemy, as well as by Frostinus, who calls it Treba Augusta (Plio. iii. 5. s. 9; Ptol. iii. 1. § 62; Fron-

[^40]tin. de Aquaed. 93); and in an mseription, which proves it to have been a town of municijal rank under the Roman Empire. (Orell, Inser. 4101.) But its name is not mentioned in histors, and it was apparently never a place of importance, for which its secluded position is alone sofficient to ac count. The ancient name and site are retained by the modern village of Treci, a poor place, surrounded on all sides by lofty mountains.
[E. II. B.]
TRELIA ( $\delta$ Tpefias: Trebbia), a considerable river of Gallia Cispadana, falling into the Pades ahout 2 miles W . of l'lacent'a, From its proximity to the latter city Pliny designates it as "Trehias Placentinos." (Ṕlin. iii. 16. s. 20; Strab. v. p. 217.) It has its sources in the ligurian Apennines near Montelruno, and las a course of above 50 miles from thence to the Po. Throughont the greater part of this conrse it flows through a mountain ralley, passing under the walls of Bobbio (celebrated in the middle ages for its convent, from which sume of the most valuable MSS, of ancient authors have been derived), and does not cmerge from the hills which form the underfalls of the Apeanines till within abont 12 miles of its month. For the remainder of its course it flows throngh the fertile plain of the Padus, and crosses the Via Aemilia abont 3 miles W. of Placentia. It appears prubable that the Trebia was fixed by Angustus as the westent limit ef the Eighth Region, and continued from that perioul to be regarded as the limit of Gallia Cispadana towards Liguria. This is not distinctly stated, but may probably be inferred from the circumstance that Placentia was situated in the Eighth Region, while Iria (Voghera), the next town to the W., was certainly in Liguria. (Plin. iii. 5. ह. 7, 15. s. 20.) Like most of the rivers which flow from the Apennines, the Trebia varies rery moch according to the season: in summer it is but a scanty strean, winding through a broad bed of stones, but in winter and after beavy rains it becomes a formidable torrent.
The chief celebrity of the Trebia is derived from the battle which was fooght on its banks in B. C. 2 IS between Hannibal and the Roman consul Semprouins, and which was the first of the decisive rictories ob. taieed by the Carthaginian general. Unfortnnately the movements which preceded and led to this battle, and the exact site on which it occurred, are very difficult to determine. Scipio after lis defeat on the Ticious had recrossed the Padus and withdrawn to Placentia, where the presence of a Ruman colony afforded him a securo stronghold. Hanuibal on the other hand effected his passage of the I'adus higber up, abore its junction with the Ticines, and then advanced along the right bank of the river, till he approached Ilacentia, and established his camp within 5 miles of that of Sipio. (Pol. ini. 66.) The defection of the Boian Gauls having soon after given the alamn to Scipie, be hroke up his camp and withdrew "to the hills that bordered the river Trebia." (Ib.67.) In this morement, it is clear. from what we are told immediately afterwards that, he crossed the river Trebia ( $I b, 68$ ): his former camp therefore, thongh in the neighbourhood of Placentia, must have been on the W . side of the Trebia. In this new position, which was one of considerable natural strength (Ib. 67), Scipio awaited the arrival of Sempronius with his army, who was advancing from Ariminum, and succeeded in effocting a jupction with his celleague, without oppositim from Hanoibal. (Ib. 68.) The attention of the Carthaginian general had been apparcntly draw off

## TREBULA.

to the W. ; where the town of Clantidinm was betrased into his bands. Deanwhile Sempronius, who was newly arrived, after a short interval of repose, wis eager for a general engagement, and his confidence was increased by a partial success in a combat of cavalry, in the plain between the Trebia and the l'adus (Ib. 69.) Hannibal, who on his side was equally desirous of a battle, took advantage of this disposition of Sempronius, and succeeded in drawing him out of his camp, where he conld not venture to attack him, into the plain below, which was favourable to the operations of the Carthagioian cavalry and elepliants. For this parpose be sent forwand a boly of Nuntian horse, who crussed the Trebia and approached the Roman camp, but, as soon as a budy of Numan cavalry and light-anned troops were sent out against them, retreated skirmishing until they had recrossed the river. Sempronius followed with bis whole ariny, and crossed the Trebia, not without difficulty, for the river was swollen with late rains, and was only just fordable for the infantry. Wis troops suffered severely from cold and wet, and when the two armies met in order of buttle, early began to feel themselves inferior to the enemy : but the sictory was decided by a body of 1000 livot and 1000 honse, under the cominuid of Maro, the brother of Hamibal, which bad been placed by that general in ambuscade, in the hollow bed of a stream which crossed the field of battle, and by a sudden onset on the rear of the Roman amy, threw it into complete confusion. A body of about 10,000 Reman infantry succeeded in forcing their way through the centre of the evemy's line, but finding themselves isolated, and their retreat to their camp quite cut off, they directed their march at once towards Ilacentis, and succeeded in reaching that city in sufety. The other troops were thrown back in confusion upon the Trebis, and suffered very beavy loss in passing that river ; but those who succeeded in crossing it, fell back upon the body already mentioned and nade goo. 1 their retreat with them to Placeotia. Thither also Scipio on the following day repaired with that part of the Roman forces which bad not been engaged in the battle. (Pol. iii. $70-74$.)

From the view above given of the battle and the operations that preceded it, which coincides with that of Genersl Vaudoncourt (Campagnes $d$ 'Aunibal en Itatie, vol. i. Yp. 93-130), it seems certain that the hantle itself was fought on the left bank of the Trebia, is the plain, but a short distance from the foot of the bills; while the Roman camp was on the hills, and on the right bauk of the Trebia. It is certain that this view affords much the most intelligible explanation of the operations of the armies, and there is nuthing in the narrative of Polybius (which liw been exclusively followed in the above account) inconsistent with it, though it inust be admitted that some difficulties remain unexplained. Livy's untrative ou the contrary is confused, and though raned lor the most part on that of Polybius, seems to be mized up with that of other writers. (Liv, xxi. $52-56$-) From his account of the retreat of the Loman army and of Scipio to Placentia after the battle, it seens certuin that he considered the Roman camp to be sttuated on the left bank of the river, so that Sicipio must necessarily cross it in order to arrive at l'lacentia, and therefore lie must have conceived the battle as fought on the right bank: and this view has been adopted by many modern writers, including Niebular and Arnold: lut the difficulties in its way greatly exced those whid arise ou the cun-
trary hypothesis. Niebulur indeed summarily disposes of some of these, by maintaining, in opposition to the distinct statements of Polybius, that Hansibal lad crosised the Padus below Placentia, and that Sempronius joined Scipio from Gemua and not from Ariminam. Such arbitary assumptions as theve are worthless in discussing a question, the decision of which must rest mainly, if not entirely, on the authority of Polybius. (Niebuhr's Lectures on Roman History vol. ii. pp. 94-96; Arnold, Mist, of Rome, vol. ii. Pp. 94-101.) Cramer adopts the views of Geaeral Vanduncourt. (Anct, Italy, vol. i. p, 82.)

The battle on the Trebia is alluded to by Lucan, and described by Silius Italicus: it is noticed also by all the epitomisers of Roman history ; but none of these writers add anything to our knowledge of the details. (Lucan, ii. 46 ; Sil. Ital. iv. 484-666; Corn. Nep. Hann 4 ; Eutrop. iii. 9 ; Uras, iv. 14 ; Flor. ii. 6. § 12.)
[E. H. B.]
TREBULA (Tprigouna: Eth. Trebulanns: Treglia), a city of Campania, situated in the district $\lambda$. of the Vulturuns, in the mountain tract which eatends from near Cajazzo (Calatia) to the Via Latima. Bliny terms the citizens "Trebulani cognumine Balinienses," probably to distinguish them from those of the two cities of the same anne among the Sabines ( Plia. iii. 5. 8. 9) ; but the Canpanian towa seems to bave been the most considerable of the three, and is termed simply Trebula by Ptoleny, as well as by Livy. The first mention of the name occurs in B. C. 303 , when we are told that the Trcbulani received the Romas franchise at the same time with the Arpinates. (Liv. \&. 1.) There seems no donbt that the Campanian city is lere meant: and this is quite cersain in regard to the next notice in Livy, where he tells us that the three cities of Compalteria, Trebula, and Saticula, which had revolted to Hamibal, were recovered by Fabius in 1. c. 215. (1d. xxiii. 39.) The "Trebolanus ager" is mentioned also by Cicero among the fertile districts of Caoppanis, which liullus proposed to distribute smong the poorer Roman citizens (Cic. de Leg. Agr. ii. 25 ); and we learn from Pliny that it was noted for its wines, which had rapidly risea in estimation in his day. (Plin. xiv. 6. 5. 8.) The Liber Culoniarum also mentions Trebula among the muuicipal towns of Campania. It appears to have received a fresb body of settlers under Augustas, but without attaiuing the rank of a colony. ( Li b. Col. p. 238; 1'm. iii. 5. s. 9 ; Ptol. iii. 1. §68.) The site of Trebula, which was errmeously fixed by Cluverius and some local writers to the S . of the Vulturmos, appears to be correctly identified by local antiquarians with a place called Treglia or Tregghia, at the foot of the Pizio $S$. Salvatore, about 6 miles N. of the Vulturnus and 8 NE . of Capua. Tbere are said to be considerable ancient remains upon the spot, which tegether with the resemblance of name would seen clearly to estabiish the position of the ancient city. (linumalli, vol. iii. Pp. 575, 5 r̈t: Trutta, Antichitáa Allifane. Diss. xxiii; Abeken, Mittel-Ituliens, p. 99.)
[E. H. B.]
TREBULA (TpnGov入a: E'th. Trebulanas), was the name of twe cities or towns of the Sabines, apparently at no great distance from one another, which were called for the sake of distinction Trebula Diutusca and Trebula Suffenas.

1. Tuencla Mutesca, called by Virgil simply Netciscie., while the full nane is preserved to is by Pliny, the only author who mentions both places (* Trebulani quí coghominantur Mutuscaei, et qui

Suffenates," Plin, vi. 12. s. 17). Its site is clemry fixed at Monte Leone, sometimes called 1/onte Leone della Sabina, a village about 2 miles on the right of the Via Salaria, between Osteria Nuova and Poggio S. Lorenzo. Here there are considerable ruins, including those of a theatre, of thermae or laths, and portions of the ancient pavement. Siveral inscriptions have also been found here, some of which have the name of the people, " l'ebs Trebulana," "Trebulani Mutuscani," and "Trebulani Mut.," so that no doubt can remaiu of their attribu1ion. (Chaupy, Maison d'Horace, vol. iii. pp. 9396; Orell. Inscr. $923,3442,3963$.) As this seems to have been much the most considerable place of the two, it is probably that meant by Strabo, who mentions Trebula without any distinctive adjunct lat in coujunction with Eretum (Strab, r. p. 228). The Liber Coloniarum also mentions a "Tribule, municipium" (p. 258) which is probably the same place. Martial also alludes to Trebula as situated amoug cold and damp mountain valleys (v. 72), but it is not certaiu which of the two places he here refers to. Virgil speaks of Mutusca as abounding in olives (" oliviferaeque Mutuseae," Aen, vii. 711), which is still the case with the neighbourhood of Monte Leone, and a village near it bears in consequence the name of Oliveto.
2. Trenula suffenas, the dame of which is knowu only from Piny, is of very uncertain site. Chaupy would place it at Rocca Sinibaldi, in the valley of the Teraso, but this is mere conjecture. Guattani en the other hand fixes it un a lill near Stroncone, between Rieti and Terni, where there are said to be distinct traces of an ancient town. (Chaupy, l.c.; Guattani Mon. dclla Sabira, vol. i. p. 190.) It is probable that the Tribula (Tpi6oлa) of Dionysius, meutioned by him among the towns assigned by Varre to the Aborigines (Dionys, i. 14) may be the same with the Trebula Suffenas of Pliny. Iu this case we know that it could not be far from Lieate.
[E. H. B.]
TREIA (Eth. Treiensis: Ru. near Treja), a municipal town of Picenum, situated on the lett bank of the river Potentia, about 9 miles below Septempeda (S. Severino) and 5 above Niciaa. Pliny is the only gengrapher that mentions it; but it is probable that the Tpaiava of Ptolemy is only a corruption of its dame. (Plin. iii. 13. s. 18; Ptol. iii. 1. §52.) The Treienses are enumerated by Pliny among the municipal communities of Picenum, and the municipal rank of the town is further attested by several inscriptions. (Orell. Inscr. 516, 3899.) It seems indeed to have been a considerable place. The Itinerary of Antoninus places it on the branch of the Via Flaminia which led direct to Ancona: it was 9 miles from Septempeda and 18 from Auximum. (Itin.Ant. p. 312.) Cluverius says that he could find no trace either of the place or the name; but the ruios were pointed out by Holsteaius as still existing on the left bank of the Potenza, at the foot of the bill occupied by the village of Montecchio. The latter place has since adopted the ancient name of Treja, and laviog been augmented by the population of several neighbouring villages, is now become a considerable town. (Cluver. Itol. p. 738 ; Holsten. Not. ad Cluv. p. 136.) [E. H. B.]

## Tremerus INS. [Dromedeae Insulae.]

TRE'JIITHUS (T $\rho \in \mu i \theta_{0}$ ûs, Steph. B. s. v.; T $\rho \in-$ $\mu \eta \theta$ ous, Ptol. v. 14. § 6 ; Tpi $\mu u \theta$ os, Constant. de Them. i. 15. p. 39, ed. Bond ; Tpeu日品vtwv, Hierocl,

towu in the interior of Cyprus, was the seat of a bishopric and a flace of sume importmee in the Byzantine times. According to the l'eotinger 'Table it was 18 miles from Salaotis, 24 from Citium, and 24 from Tamassus. Stephanus B. cails it a village of Cyprus, and derives its name from the turpentine trees ( $\tau \in \rho \cdot 6$ iveot) which grew in its neighbuurluod. (Engel, Kyppos, vol, i. p. 148.)

TRE'MLLA, a town in Mauretania Tingitana. (Itin. Ant. p. 24.) Variously ideotified with Ezad. schen and Soe el Campa.
[1. 11. D.]
TREPONTIUA or TRIPUNTIUA, a place on the Appian Way near the entrance of the Pomtine Marshes, 4 miles nearer Rome than Forum Appil. It is not mentioned as a station in the Itineraries. but we learn from no inscription of the tune of Trajan that it was from thence the prart of the road which was restored ly tbat emperor began. This important work, as we are informed by another inscription, was continued for nineteen miles, a circumstance that explains the origin of the name of Decexnovies, which oecurs at a later period in commection with the I'ontine Marshes. Procopius calls the Decennovium a rieer; but it is evident that it was in reality an antificial cut or taual, such as must always have accompanied the lighread through these marstes, and as we know already existed in the days of Herace from Forum Appii. The importance of this work will account for the circumstance that we find the Pontine Marslies thenselves called by Cassiodorns "Decennovii I'sludes." (Cassiod. Var. 3i. 32, 33; I'rocop. B. G. i. 11.) The site of Trepontium is clearly marked at the distance of 39 miles from Rume, by the name of Torre di Treponti, together with the remains os the 3 ancient bridges, from which it derives its name (Chaupy, Maison d'Horace, vol. iii. pp. 387-392; D'Anville, Analyse de l'tatie, P1. 184-187.)

The inseriptions above cited are given by Sir I. Hoare, Class. Tour, vol. i. pp. 97,98 ; and by the Abvé Chaupy ( $l, c$.). The uame of Tpanóvtiov, found in Strabo (v. p. 23i) among the cities on the left of the Appian Way, can hardly be other than a corruption of Trepontuum, but it is whelly out of place in that passage, and is supposed by Kramer to be an interpolation.
[E. 11. B.]
THELIES (Tpīpes), a people repeatedly mentioned by Strabo, generally as a tribe of, or at least. as closely connected with, the Cimmerii, but in a few passages as Thracians. They are not named by Homer or Herodotus. Strabo was evidently undecided whether to resard them as a distinct race, or as identical with the Cimmerii, in whose company they several times made destructive iaroads into Asia Minor. "The Cimmerii, whom they name Treres also, or some tribe of them, often overran the southern shores of the Euxine and the adjuining countries, sometinies throwing themselves upon the Paphlagonians, at other times upon the Plorygians, at the time when they say Midus diwd from drinking bull's blood. And Lygdamis led his anny as far as Lydia and Ionia, nud took Sardes, but jerished in Cilicia. And tho Cimmerii and Treres often made such expeditions. But they say that the Treres and Cubus [their leuder] were at last driven out [of Asia] by Madys, the king of tho Scythians."* (Strab. i. p. Gt). "Cnllisthence states

[^41]
## TRETUM.

that Sardes was taken several times; first by the Cimmerians; then hy the Trerea and Lycians, as Callinns also shows; lastly in the time of Cyrus and Croesus." (Id. xiii. p. 627). "In olden times, it befel the Magnetes [the people of Magnesia on the Maeander] to be utterly destroyed by the Treres, a Cimmerian tribe." (ld. xiv. p. 647; see also xi. p. 511 , xii. p. 573 ; C1mmerir, Vol. I. p. 623 , seq.; Mitiller, Hist. Lit. Auc. Greece, pp. 108, 109; and cf. Herod. i. 6, 15, 16, 103.)

Various attempts have been made to fix the dates of these events ; but the means of doing so appear to he wanting, and hence scholars have arrived at very different conclusions on the subject. Strabo iafers from some expressions of Callinus that the destruction of Sardes preceded that of Magnesia, which latter occarred, he considers, after the time of that poet, and duriog the age of Archilochus, who alludes to it.
Thucydides (ii. 96 ) states that the kingdom of Sitalces was bounded on the side next to the Triballi by the Treres and Tilataei, who dwelt on the northern slope of Mount Scombris (Scomius), and extended towards the W. as far as the river Oscius (Oescus). Whether this relative clause applies to the Treres as well as to the Tilataei is doubtful ; but the cullocation of the words seems to confine it to the latter.

Strabo (i. p. 59) speaks of the Treres as dwelling with the Thracians; and says tbat the Treres, who were Thracians, jossessed a part of the Troad alter the time of Priam (xiii. p. 586).

Pliny does not mention the Treres as a Thracian people; but in the description of Macedonia (iv. 10. s. 17), says that they, with the Dardani and Pieres, dwelt on its borders ; it is not clear, however, which borders are meant. (Cf. Theopom. Frag. 313, where they are called Tpapes; and Steph. B. p. 664 , where also a district of Thrace inhabited by them is

It is possible that these Thracian Treres were the descendants of a body of the Cimmerian Treres, left N. of the Haemus when the main body advanced to Asia Ninor; for there can be little doubt that Niebuhr's view respecting the course of their ioroads is comrect. "The general opinioo, which is presupposed in Herodotus also, is that the Cimmerians invaded A-ia Mlinor from the E., along the coasts of the Euxine. But it would seem that, on the contrary, they came through Tbrace, for they make tbeir first appearance in Ionia and Lydia. The former rosd is almost entirely impassable for a nomadic people, as the Caucasus extends to the very shores of the Euxine." (Lect. Anc. Hist. i. p. 32, mote.)

In confirmation of the conjecture above made, we may refer to the parallel case mentioned by Caesar (B. G. ii. 29), that the Adnatuci, a Belgian tribe, were the descendants of the 600k) men whom the Cimbri and Tentoni, on their march towands Italy, left behind them W. of the Shine, to guard that part of their property which they were unabic to take with them any farther.
[J. R.]
TRERI's (Tpinpos, Strab.: Sacco), a river of Lat tiom, and one of the priocipal tributaries of the Liris (fiariglizno), iuto which it discharges its waters clase to the rains of Fabrateria. (Strab. v. p. 237.) Its name is mentioned only by Strabo, but there is ne doubt of its identibication: it is still called the
tion in adopting Kramer's emeadation of $\Sigma_{\kappa v \theta i \kappa \hat{\omega} \nu}$ for $\mathrm{K} i \mu \mu \epsilon \rho i \omega \nu$.

Tolero in the lower part of its course, near its junction with the Garigliano, bat more commonly known as the Sacco. It bas its sonrces in the clevated plain which separates the menntains abent l'racneste from the Volscian group; and the broad valley throngh which it flows for above 40 miles befure it joins the Garigliano must always have formed a remarkable feature io this part of Italy. Throughout its extent it separates the main or central ranges of the Apoonines from the eatlying mass of the Monti Lepini or Volscian mountains, and hence it must, from an early perivi, have constituted one of the natural lines of commanication between the plains of Latium proper (the modern Campagna di Roma) and those of Campania. After the wbole district had fallen under the power of lome it was the line followed by the great highroad called the Via Latioa. [Via Lativa.]
[E. 1. B.]
ThEs ARBORES, the Three Trees, was a Mutatio or relay for borses mentioned in the Jernsalem Itin. between Vasatae and Elusa (Eouse). The site is unknown.
[G. L.]
TliES TABERNAE, was the name of a station on the Via Appia, between Aricia and Forum Appii, which is noticed not enly in the lineraries (Itin. Ant. p. 107; Tab. Peut ), but by Cicero and in the Acts of the Apostles. From the former we learn that a branch road frem Antium joined the Appian Way at this point (Cic. ad Att, ii. 12) ; while in the latter it is mentioned as the place where many of the disciples met St. Panl on his journey to Rome. (Acts, xxviii. 15.) It was probably therefore a village or place of some importance from the traffic on the Appian Way. Its position would appear to be clearly deternined by the Antonine Itinerary, which gives 17 miles from Aricia to Tres Tabernae, and 10 from thence 10 Forum Appii: and it is a strong cenfirmation of the accuracy of these data that the distance thus obtained from Forum Appii to Rome corresponds exactly with the true distance of that place, as marked by ruins and ancient milestumes. It is therefore wholly unnecessary to change the distances in the licerary, as proposed by D'Anville and Chaupy, and we may safely fix Tres Tabernae at a spot about 3 miles from the modern Cisterna, on the road to Terracina, and very near the commencenent of tho Poutine Marshes. The Abbé Chaupy bimself points ont the existence of ancient remains on this spot, which he supposes to be those of the station Ad Sponsas mentioned only in the Jerusalem Itinerary. It is far more likely that they are those of Tres Tabernae; if indeed the two stations be not identical, which is very probable. This situation would also certainly accord better than that proposed by Chanpy with the mention of Tres Tabernae in Cicero, who there joined tho Appian Way on his road from Antium to his Formian villa, not to Rome. (Cic. ad Ath ii. 12, 13, 14; Chaupy, Maison d Horace, vol. iii. p. 383; D'Anville, Analyse de l'talie, p. 195; Westphal, Kom. Kampague, p. 69.)
[E. II. B.]
TRES TABERNAE, in Gaul. [Tabsinake]
THETA (T $\rho$ íra, Strab. xiv. p. 683), in Cyprus, called Tpito in the Stadiasmus Maris Magni (p. 285 , ed. Huffiann), where it is placed 50 staila from Palaepapbus or old Paphus, was apparently a promontory in the SW. of the island, and probably the same us the one called \$poúpion by Ptelemy (v. 14. § 2).

TRE'JUM (T $\rho$ ท́tò ăкро⿱, I'tol. iv. 3.§ 3), a
prementory of Numidia at the W. point of the Sinus Oleachites. (Strab. xvii. p. 829, 832.) It probably derived its name from the numerons caves in the cliffs, which are still the lurking places of the piratical tribes of this cosst. Now Sebba Rus.
[T. 11. D.]
TRETUM PRON. (T $\rho \eta \tau o ́ v$, Stadiasm. §327), the NW. promontory of Crete now called Grabuisa, the Corrcus of Ptolemy.
[E. B. J.]
TRETUS. [Angos, p. 201, b.]
TREVA (Tpクov́a), a town of the Sazones in north-western Germany (Ptel, ii. 11. § 27), which must have been situated somewhere on tho Trave, but as no further details are knewn, it is impossible to fix its site with any degree of certainty. [L. S.]

TREVENTUM or TEREVENTUM (Eth. Treventinas, Plin.; but inscriptions have Terventinas and 'Tereventias: Trivento), a town of Samnium, in the country of the Pentri, situated on the right bank of the Trinins (Trigno), not far from the frontiers of the Frentani. Its name is not noticed in histary, but Pliny mentions it among the municipal towns of Samnium in his time: and we learn from the Liber Coloniarum that it received a Roman colony, apparently under the Triomvirate (Plin. iii. 14. s. 17 ; Lib. Colon. p. 238). It is there spoken of as having been thrice besieged ("ager ejus ... post tertiam obsidionem adsignatus est "), probably during the Social War and the civil wars that followed; but we have ne ether account of these sieges; and the name is not elsewhere mentioned. But from existing remains, as well as inscriptions, it appears to have been a place of considerable importance, as well as of municipal rank. The modern Triveato, which is still the see of a bishop and the capital of the surrounding district, stands on a hill abeve the river Trigno, but the ruins of ancient buildings and fragineats of masonry are scattered to a considerahle extent through the valley below it. (Romanelli, vol. ii. p. 473.) The inscriptions which have been discovered there are given by Mommsen (Inscr. R. N. pp. 269, 270).
[E H. B.]
 Ptel.). There is authority for both forms of the name. The position of the Treviri is determined by several passages of Caesar. The Treviri bordered on the Rhine (B. G. iii. 11, iv. 10), and senth of them along the Rhine were the Triboci or Tribocci. The Arduenna Silva extended through the middle of the territory of the Treviri from the Rhine to the commancement of the territory of the $\operatorname{Remi}(B, G, \mathrm{v}, 3)$. The Treviri were separated from the Germans by the Phine (B. G. vii. 63, viii. 25); the Ulii were their neighbours on the opposite side of the Rbine (B. G. vi.29,35). In Caesar's time the Treviri differed little from the Germans in their way of living and their savage temper. Tacitus remarks (de Mor. Germ. c. 28) that the Treviri and Nervii affected a Germanic origin, and it is prebable that the Treviri were mixed with Germars, but Caesar supposed them to be a Gallic people. Mela (iii. 2) calls them the most renowned of the Belgae. When Hieronymus speaks of the resemblance between the language of the Galatae of Asia and of the Treviri, he means to say that the Treviri are Galli [Galatia, Vel. I. p. 931]. Strabe (iv. p. 194) speaks of the Nervii as being German. He says: "The Nervii are neighbours of the Treviri, and they (the Nervii) are also a German people;" which remark about the Nervii being also German does not refer to the Treviri, but to the Tribeci, whem he bad just spoken of as a German natien which had settled on the Gallic side of the Ehine.

It scems impossible to determine whether Caesur includes the Treviri among the Belgae or the Celtae. Some geographers include them in the Gallia of Caesar in the limited sense, that is, it the country of the Celtae, which lay between the Garonne and the Seine, and between the Ocean and the Rline. If this determination is correct, the Mediomatrici ntso of course belong to Caesar's Gallis in the limited sense. [Mediomathici.]

Tho Treviri are eften mentioned by Cacsar, for they had a strong body of cavalry and infantry, and often gave him trouble. From one passage (B. C. vi. 32) it appears that the Segni and Condrus, German settlers in Gallia, were between the Treviri and the Eburones ; and the Condrusi and Eburones were dependents if the Treviri (B, G. iv. 6). Caesar constructed his bridges over the Rhine in the territury of the Treviri (B. G. vi. 9) ; and Stabe speaks of a bridge over the libine in the territory of the Treviri. It appears then that the Treviri occupied a large tract of country between the Mosa (Maas) and the Rhine, which country was intersected by the lower course of the Mosella (Mosel), for Augusta Treviroram (Trier), on the Mosella, was the chief town of the Treviri in the Roman imperial period and probably a town of the Treviri in Caesar's lime. It is not possible to fix the exact limits of the Treviri on the Rhine, either to the north or the south. When the Germans were settled on the west side ol the Rhine by Agrippa and after his time, the Treviri lost part of their territory; and some modern writers maintain that they lost all their country on the Rhine, a conclusion derived from a passage of Pliny (iv. c. 17), but a conclasien by mo means certain. Anether passage of Pliny, cited by Suetonus (Calig. c. 8), says that Caligula was born "in Treveris, vice Ambiatino, supra Cenfluentes," and this passage places the Treviri on the Rhine. Ptolemy in his geography gives the Treviri no place oo the Rinine: he assigns the land on the west bank of the river to the Germania Inferior and Germania Superior. The bishopric of Trier used to extend from the Mans to the Whine, and along the Rhine from the Alir below Andernuch as far south as Bingen. The linsits of the old country of the Treviri mud of the dincese may have been the same, for we find many examples of this ceincidence in the geography of Giallia. The rugged valley of the $A \mathrm{hr}$ would be a nataral boundary of the Treviri on the nerth.

Tacitus gives the Treviri the name of Socii (Anm. i. 63); and in his time, and probably before, they had what the Romans called a Curia or senate. The name of the Treviri often appears in the hastory of the war with Civilis (Tacit. Ilist. iv.). The Trevirz under the Empiue werd in that part of Gulia which was named Belgica, and their city Augusta Trevirorum was the chief place, and under the later emperors frequently an imperial residence. [Argesta Trevheohem.]
[G. L.]
TREVIDON, a place in Gailia, mentioted by Sidonius A pollinaris (Propempt.), the position of which is partly determined by the fact of the poet dixing Trevidon in the mountainous negion of Central France, and partly hy the existence of a place named Trive on the boundary of the old prorince of Ronergue, and on a little river named Treresel. The mountain in which the Trecesel rises (Lesperou) is the
"Vicinum nimis heu! jugum Ratenis"
of Sidonius. [Rutexi.]
[G. L.]

## TREVIRI. 〔Teevem.]

TRIACONTASCHOENUS (TpıakovTáбXoivas, I'tol. iv. 7. § 32), a district so namaed by Ptolemy after the amalogy of the Dodecaschocuus of Egypt, and forming the most aorthern part of Aethiopia on the W. side of the Nile, between the cataracts of that river aod the Aethiopian mountains. [T. H.D.]

TRIADIT/A (Tpıáorr\}a: Nicet. Chon. iii. p. 214 ; Apost. Geog. Huds. iv. p. 43), a towa in Upper Moesia, at the coafluence of the sources of the Oencus, and the capital of the district called in lute times Dacia lnterior. It was situated in a fertile phain, and its site is identibied with that of some extensive ruins S. of Sophia.
[J. R.]
TRIBALLJ (TprEa入Noí), a Thracian prople which appears to have been in early tines a very widely diffused and powerful race, about the Danube: but which, being pressed upeo from the N. aod W. by various nations, became gradually more and more confined, and at length entirely disappeared from listory. Herodotus speaks of the Triballie plain, through which flowed the river Aogros, which fell into the Brongos, a tributary of the 1ster (iv, 49). This is probably the plain of fossovo in the moden Serria.

Thucydides states (ii. 96) that on the side of the Triballi, whe were independent at the heginoing of the Peloponnesian War, the territories of Sitalecs were bounded by the I reres and Tilataci, whase W. limit was the river Oscins (Oescus), which must therefore, at that time, have been the E. frontier of the Triballi. (Cf. Plio. iii. 29, iv. 17; Strab. vii. pp. 317, 318.) Strabo(vii. p. 305) informs us that tine Triballi were much exposed to the iaroads of naigrating hordes driven out of their own countries by more powerful neighbours, some expelled by the Scythians, Bastaroae, and Sauromatac, from the N. side of the Danube, who either settled in the islands of that river, or crossed over into Thrace; otbers from the W., set in motion by the Illyrians.

The earliest eveat recorded of then is the defeat which they gave to Sitalces, king of the Olrysue, who made an expedition agaiost them, R. C. 424 , in which he lost his life (Thuc. iv. 101). In B.c. 376 the Iriballi crossed the Haenus, and with 30000 men advanced as far S. as the territory of Abdera, which they ravaged withont opposition. Oo their retarn, however, loaded with booty, the people of Abdera took advantage of their careless and disorderly march, to attack them, killing upwards of 2000 men. The Triballi thereopon marched back 10 take revenge for this loss; and the Abderites, having been joined by some of the neighbouring 'Thracians, gave them battle; io the midst of which they were deserted by their treacheruns allies and, heng surrounded, were slain almost to a man. The Triballs theo prepared to lay siege to Abdera which would now have been quite uatble to resist them for more than a very sbort time; but at this critical moment, Chabrias appeared before the town with the Athenian fleet, which had receatly defeated the Lacedaemoaian fleet at Naxos. Chabrias compelled the Triballi to retire from Abdera, and garnsoned the city when he departed. (Diod, xv. 36). In R.C. 339, Philip II., after raising the siege of Byzantiona, marched to the Donoube, where he defeated the Getae, and took much booty. On his reture through the conotry of the Triballi, the lattor pasted themselves in a defile, and refused to allow the Macedonian army to pass, unless lluilip gave to them a purt of the plunder. A fierce battle ensuel, in which Philip
was severely wounded, and would have been slain, but for his son Alexander, whe threw himself before his father, and thus saved his life. The Tribulli were at length defeated, and probably jrofessed submission to Philip, so lung, at least, as he was io their country.

On Alexander's accession to the throne, he thought it necessary to make his power felt by the bartarians on the frontiers of his kingdonn, before he quitted Europe for his great enterprise against the Persian enpire. Accordingly, in the spring of 11. c. 335 , he marebed from Ainphipolis in a northeasterly direction, at the head of a large force. In ten days he reached the pass by which he intended to cross the Haemus, where a body of Thracians had ussembled to oppose his jregress. They were defeated, and Alexander adranced against the Triballi, whose prince, Syrmus, laving liad timely information of Alexander's movements, had already withdrawa, with the old men, women, and childrea info an island of the Danuobe, called Peuce, where many other Thracians also liad songht refuge. The main force of the Triballi posted thenselves in woody groand on the baoks of the river lygimas, abont 3 days' march from the Daoube. Ilaving ventured out intn the open piain, however, they were completely defeated by the Macedonians, with a loss of 3000 men. (Arrian, Anab. i. 2.)

Alexaoder then marched to the Danube, opposite to l'euce; but he was unable to make hiniselt master of that island, because he had fer boats, and the enemy were strongly posted at the top of the stecp, sides of the island. Alexander therefore abandoned the attempt to take. it, and crossed the Dambe to make war on the Getae. It would appear, how ever, that he had made sufficient impression on the Triballi to induce them to apply to him for peace, which he granted before his return to Macedonia. It was probably some time after these events that the Tri balli were attacked by the Autariatae, a powerfol Illyrian tribe, who seen to have completely subdued them, great numbers being killed, and the sorvisors driven farther towards the east. (Strab. vii. pp. 317, 318.) Heace, in B. C. 295 , the Gauls, with only 15,000 foot and 3000 horse. defeated the combinel forces of the Triballi and Getae (Iust. xyr. 1.) When the Romans began to extend their duminion in the direction of the Danube, the Triballi were is small and weak people, dwelling about the confluence of the Oescus with the Danube, near the tuwn Oescus (cf. I'tol. iii. 10. § 10, viii. 11. §6).

Pliny (vii. 2) states that, according to lsigonus, there were people among the Triballi who fascinated by their look, and destroyed those whon they gazed opon too long, especially with augry eyes : adults nere more liable to be injured by them than chitdren. This is probably the same superstition as the modern one respecting the "evil eye," which is peculiarly prevalent anoong the Slavonian races. (Arrain, duab. i. 1. § 4, 2. § 4, seqq., 3. § 3, seq., 4. § 6, v. 26 . § 6, vii. 9 . § 2 ; Steph. B. s. v.; Mannert, vii. § 2.5, seqq. $]$
[J. P.]
TRIBOCI or TRIBOCCI, a German prople in Gallia. Schneider (Caesar, B. G. i.51) las the form * Triboces" in the accuative plural. Pliny has Tribochi, and Ntrabo Tribocchi (TpiGón Xur). In the passace of Caesar (B. G. iv. 10) it is sad that all the MSS, have "Tribueoman" (Sclmeider, unte).

The Triboci were is the army of the Gorman king Ariovistus in the great battle in which Cacsur defeated lim; aud though Caesar dues not say that
they were Germans，his narrative shows that he considered them to be Germans．In another passage （B．G．iv．10）Caesar places the Triboci on the Khine between the Mediomatrici and the Treviri， and he means to place them on the left or Guillic side of the Rhine．Strabo（iv．p．193），after mentioning the Sequani and Medionatrici as extending to the Lhine，says，＂Among them a German people has settled，the Tribocchi，who have passed over from their native land．＂Pliny also（iv，17）and Taeitus （Giermun，c．28）say that the Tribocci are Germans． The true couclasion from Caesar is that he sup－ posed the Tribocei to be settled in Gallia before B．c． 58 ．

Ptolemy（ii．9．§ 17）places the Tribocci in Upper Germania，but he incorrectly places the Vangiones between the Nemetes and the Tribocei，for the Ne－ metes bordered on the Tribocei．However he places the Tribocci nest to the Rauraci，and be names Brevcomagus（Brocomagus）and Elcebus（Helcebus） as the tiwe towns of the Tribocci．D＇Auville supposes that the tenitory of the Tibbocci corresponded to the diocese of Strassburg．Saletio（Seltz or Setz），we may suppose，belonged to the Nemetes，as in modern times it belonged to the diocese of Speier；and it is near the northern limits of the diocese of Strassburg． On the south tewards the Rauraci，a place named Markelshein，on the southern limit of the diocese of Strassburg and bordering on that of Basle，indicates a boundary by a Teutonic name（mark），as Fines does in those parts of Gallia where the Ruman tongue prevailed．The dame of the Tribocci does not appear in the Notit．Provine．，though the names of the Nemetes and Vangiones are there；but instead of the Tribocci we have Civitas Argentoratum（Strass－ lnorg），the chief place of the Tribocci．P＇tuleny makes Argentoratum a city of the Vangiones．［G．L．］

TRI＇BOLA（Tpı6ठ $\lambda \alpha$, App．Hisp．62，63），a town of Lusitania，in the meuntainous regieds S．of the Tagus，probably the modern Trecoens．［T．H．D．］

Thibullida．［Tbilubium］．
TPIBUNCI，a place io Gallia，which we may assome to have been near Concordia，for Ammianus （xvi．12），after speaking of the battle near Strass－ burg，in which Chnodomarius，king of the Alemanni， was defeated hy Julian，says that the king hurried to his camp，which was near Concordia and Tribunci． Lut neither the site of Concordia nor of Tribunci is certain．［Concokdis．］
［G．L．］
TRICARA＇NUM．［Phlius，p．602，a．］
TRICASSES，a reople of Gallia Lugdunensis． （Plin．iv．18．）In Ptoiemy（ii．8．§§ 13）the name is Tricasii（Tpıк⿱㇒日幺十七ı），and their city is Angnstobona （Avjougtóava）．They border on the Parisii．The name appears in the form Tricassini in Aumianus （xvi．1）and in an isscription．In the Notit．Provibe． the pame Civitas Tricassium occurs；and the name of the people bas been transferred to the town，which is now Troyes on the Seine，the clief town of the Fresch department of Aube．Caesar does net men－ tion the Tricasses，aad his silence has led to the conjecture that in his time they were comprised within the powerful state of the Senones．［G．L．］

TRICASTI＇NI（Tpiкa $\sigma \tau$ vol），a Gallic people between the Rhone and the $A_{p}$ s．Livy（v，34） deseribing the taarch of Bellovesus and his Galli into Italy，says they came to the Tricastini：＂The Alps next were oppused to them；＂from which it is inferred that the Tricastini were vear the Alps． But nothing exact can be inferred from the narrative， ner from the rest of this coufused chapter．In the
description ef Innnibal＇s march（Liv．xxi．34）it is suid that Inannibal，atter setting the disputes of the Allobroges，being new en his road to the Aps，did not make his march straight forward，but turned to， the left into the territory of the Tricastini；and from the conntry of the Tricastini be went thruagh the attermest part of the territory of the Vocuntii into the country of the Tricerii，and finally reached the Druentia（Durance．）It would be out of place to examine this question fully，for it would require some pages to disenss the passages in Livy．He means，however，to phace the Tricastini somewhere between the Allobroges and part of the border of the Vicentinn territory．The capital of the Vocontii is Dea Vucontioram，or Die in the department of Drome；and toe conclusien is that the Tricastini were somewhere between the Isara（Isire）and the Druna（Drome）．This agrees with the positien of Augusta Tricastinorum［Augusta Thecastino－ Russ］as determined by the Itims．

Ptolemy（ii．10．§ 13）places the Tricastini east of the Segullauni，whose capital is Valentia，and he names as the capital of the Tricastini a town Noeomagus，which appears to be a differeot place from Augusta Tricastinorum．D＇Anville places the Tricastini along the e：st batk of the Khone，nerth of Arausio（Orange），a position which he fixea by bis determination of Augusta Tricastinerum：and be adds，＂that the name of the Tricastioi bas reen preserved pure in that of Tricastin．＂But the Tricastini of Livy and Ptolemy are certainly net where D＇Anville places them．［G．L．］

TRICCA（трікк $\boldsymbol{\eta}$ ：Eth．Tриккайоs：Trikkala）， an ancient city of Thessaly in the district Histiaeotis， stood upon the left bank of the Peneius，and near a small stream named Lethaeus．（Strab，is．p．438， xiv．p．647．）This city is said to lave derived its name from Tricea，a daughter of Peneius．（Steph． B．s．v．）It is mentioned is Hemer as sobject to Podalerins and Machaon，the twe sons of Asclepins or Aesculapius，who led the Triccaeans to the Trojan War（Hom．Il．ii．729，iv．202）；and it possessed a temple of Asclepius，which was regarded as the most ancient and illustrious of all the temples of this god． （Strab．ix．p．437．）This temple was visited by the sick，whose cures were recerded there，as in the temples of Aselepius at Epidaurus and Cos．（Strab． viii．p．374．）There were probably physicians at－ tached to the temple；and Leake gives an inscription in four elegiac versea，to the memery of a＂god－like physician ramed Cimber，by his wife Andromache．＂ which be fouod apon a marble in a bridge over the ancient Lethaeus．（Northern Grecoe，vel．iv．p． 285．）In the edict published by Polysperchon and the other generals of Alexander，after the death of the latter，allowing the exiles from the differeut Greek cities to return to their hemes，those of Tricen and of the neighbeuring town of Phareadon were excepted for some reason，which is not reconded． （Diod．ariii．56．）Tricca was the first town in Thessuly at which Philip V，anived after his defeat on the Auus．（Liv，xxxii．13．）Tricca is also mentioned by Liv．xxrvi． 13 ；Plin．iv．8．8． 15 ； Ptol．iii．13．\＆ 44 ；Them．Orat．xxvii．p． 333.

Procopius，who calls the town Tricatit̂s（Tрıкát－ Tous），says that it was restored by Jostinian（de Acdif．iv．3）；bat it is still called Trica by Hierocles （ P 642）in the sisth century，aod the ferm in Jus－ tini．in may be a corraption．In the twelfth century It already bears ita modern name（Tрікка入а，Anna Comn．v．1．137，ed．Paris．；Eustath，ad／h．ii．p．
330.) Trikkala is now one of the largest towns in this part of Greece. The castle occupies a hill projecting from the last falls of the monotain of Khassiá ; but the only traces of the ancient city which Leake could discover were some small remains of Hellenic masmry, forming part of the wall of the castle, and some squared blocks of stone of the same ages dispersed in different parts of the town. (Leake, Northern Greece, vol. i. p. 425, seq., vol. iv. p. 287.)

TRICCIA'NA, a place in Pannonia, in the valley called Cariniana ( 4. Ant. p. 267). It is probably the same as the Gurtiana noticed in the Peut. Table, as the difference in the statements about the distances amounts only to 2 miles.
[L. S.]
TRICESIMAE, in Gailia, one of the places mentioned by Ammianus Marcellinus (xviii. 2) in the list of those places along the Rhenish frontier which Julian repaired. Ammianus mentions Tricesimae between Quadriburgium and Novesium. [Quadrburgivm.]
[G. L.]
TRJCESIMITM, AD, in Gallin. D'Anville observes that the ancient Itins. contain many pesitions with similar names, which names of places are derived from the distances wbich they indicate from the principal towns; for the distances within the dependent territory were measured from the principal towns. This Tricesimum is measured from Narbo (Narbonne), as the Jerusalem Itin. shows, on the road to Toulouse, through Carccasonne. Trebes on the canal of Languedoc may represent the name; and Tricesimum may be near that place. [G. L.]

TRICHO'NIS LACUS. [AETOLA, p. 64, a.]
 town of Aetolia, from which the lake Trichonis derived its name. [Respecting the lake, see Vol. I. p. 64, a.] Its pusition is uncertain. Leake places it S . of the lake at a place called Giavala, and Kiepert, in his map E. of the lake. But since Strabe mentions it along with Stratus as situated in a fertile plain, it ought probably to be placed N. of the lake (Strab. x. p. $450 ;$ Pol. v. 7 ; Steph. B. s. v.). It was evidently a place of importance, and several natives of this town are wentioned in history. (Pol. iv, 3, v. 13, xvii. 10; Paus. ii. 37. § 3; Leake, Northern G'recce, vol, i. p. 155.)

TRICOLO'NI. [Megalolohts, p. 309.]
TRICO'M1A (T $\rho \iota \kappa \omega \mu i a$ ), a place in the eastern part of Plrygia, on the road from Dorylamm to Apamea Cibotus (Ptol, v. 2. § 22; Tab. Peut.), is placed by the Table at a distance of 28 miles from Midaeum and 21 from Pessidus.
[L. S.]
TEICORII (Tрико́ot), a people between the Rhone and the Alps. Hamnibal in his march from the Rhone to the Aips passed into the country of the Tricorii, us Livy says [Tmcastini]. Strabo(iv. pp. 185, 203) says in one passare that above the Cavares are "the Vocontii and Tricorii and Iconii and Meduli," from which we learn that he considered the Tricorii as neighbours of the Vocontii; and in another passage he says, "after the Vocontii are the Iconii and Tricorii, and next to them the Meduli, who occupy the highest summits of the Alps." Some geographers conclude that the Tricorii must bo on the Drac, a branch of the lsire, in the southern part of the diocese of Cirenoble, But if the Tricorii were in the valley of the Drac, we do not therefore admit that Hamibal's march to the Alps was through that valley.
[G. L.]
TRICORNE'NSII. [Thiconsium.]
TRICORNIUM (Tpוкópעוoд, Ptol, iii. 9. § 3), or Thicolsial Castra (Ltin. Hieros, p. 564), a town
in the territory of the Tricomensii, a peoplo of Upper Mlvesia, on the borders of Illyria.. Variously identified with Ritopls and Tricomi or Kolumbacz.
[T. H. D.]
TRICORYTHUS [MARATHON.]
TRICRANA (T píppava), an island eff tho coast of Ilemnionis in Argolis (Paus, ï. 34. §8), perhaps the same as the Tiparenns of Pliny. [Themenus.]

TRICRENA. [Phexews, p. 595, a.]
 occupying the southern part of Rhactia, in the north of Lacus Benacus, about the river Athesis. (Strab. iv. p. 204; Plin. iii. 23.) They, with many other Alpine tribes, were subdued in the reign of Augnstus.
[L. S.]
THIDENTUM or TRIDENTE (Tpióévtє: Trento or Trent), the capital of the Tridentini in thesouth of fthaetia, on the eastern bank of the Athesis, and on the highroad from Verona to Veldidena. (Plin. iii. 23; Justin, xx. 5; It. Ant. pp. 275, 281; Panl. Diac. i. 2, iii. 9, iv. 42, v. 36 ; Flor. iii. 3; Ptol. iii. I. § 31 ; Tab. Peut.) The town is said to have derived its name from the trident of Neptunc, which is still shown fixed in the wall of the ancient church of S . Vigil. The place seems to have been made a Roman colony (Orelli, Inscript. Nos. 2183, 3744, 3905,4823 ). Theodoric the Great surrounded Tridentum with a wall, of which a considerable portion still exists. (Comp. Pallhausen, Beschreib. der Röm. Heerstrasse von Jerona nach A ugsburg, p. 28, foll.; Benedetto Giovanelli, Liscorsa sopra un' lscrizione Trentina, Trento, 1824, and by the same author, Trento, Citta de' Rezj e Coloria Romana, Trente, 1825.) [L. S.]

TRIE'RES (Tptípqs, P'olgb. v. 68; Strab. xvi. p. 754), a small fortified place in Phoenicia, on the northern declivity of Lebanon, and about 12 miles distant from Tripolis. It is in all probability the same place as the Tridis of the Itin. Hierosol. (p. 583). Lapie identifies it with Enty, others with Belmont.
[T. II. D.].
 3. § 13), a headland of the Regio Syrtica in Africa, Propria. Kitter (Erdk: i. p. 928) identifies it with the promontory of Cephatie mentioned by Strabo (xvii. p. 836), the present Cape Cefalo or Mesurata. I'tolemy indeed mentions this as a separate and adjoining promontory; but as Cefalo still exhibits three points, it is possilile that the ancient names may be connected, and refer only to this one cape. (See Blaquiere, Letters fiom the Mediterranean, i. p. 18; Della Cella, Viagyio, p. bil.) [I. H. D.]

Tkifandis. [VESCiA.]
TRIGABOLI. [P'mus.]
TRIGISAMUM, a town of Noricum, mentioned only in the P'outing. Table, as situated not far from the mouth of the river Trigisamus (Trasen), which flows into the banubius. It still bears the name of Traismaur. (Sce Muchar, Norikum, val. i. p. 269.)
[L. S.]
 $I^{2}$ tol. vii. 2. $\S 23$ ), the metropulis and royal residetee (Bafinetod) of Cirrhadia, a district at the NE, corner of the Bay of Bengal. It is doubtless the present Tipperah (Tripira), which issituated on the (iumupty (Gomati), a small river which flows into the Brachmapntra nenr its mouth.
[V.]
TRGGLNDUN, a place in the territory of the Callaici Lucenses, in Gallaecia. (Ilispartin Tarraconensis). (ftin. Ant. p. 424.) Variously identified with Berrco and Avandon.
[1, 11. 1).]

TRILEUCLIM (T pì $\epsilon$ uкov akpov, I'tol. ii, 6. § 4), a promeatory in the territory of the Callaici Lucenses, oo the N. coast of Hispania Tarraconensis, known also by the name of Kẃou ákpov. (Mareiad, p. 44.) Now Cape Ortegal.
[T. H. D.]
 Ptol. iii. 10. § 10), a castle on the Danabe, in Lower Moesia. (Itin. Ant. p. 222; calted Trimamium in the Tab. Peut, and by the Geogr. Rav, iv. 7.) Varionsly identitied with Murotin, Dikalika, and the rnins near Pirgo or Birgos. [T. H. D.]

TRIMENOTHYRA. [Temenothyba.]

con of thimexothyra.
TRIMONTIUM (T $\rho t \mu \dot{\partial} \varphi \tau i o r$, Ptol. ii. 3. § 8), a town of the Selgovae, in Britannis Barbara, probably near Longholn, in the neighbourhood of the Soluay Frith.
[T. H. D.]

## TRI'MYTHUS. [Tremithus.] <br> Trina'cia. [Tyracia.]

TRINA ${ }^{\prime}$ CRIA. [Sicilla.]
TRINA'SUS (Tpivaá́s, Paus. iii. 22. § 3 ; Tplעafбos, Ptol. iii. 16. § 9), a town or rather fortress of Laconis, situated apon a promontory near the heat of the Laconian gulf, and 30 stadia above Gythium. It is oppusite to three small rocks, which gave their name to the place. The modern village is for the same reason still called Trinisa (rà Tpi$\nu \eta \sigma a)$. There are considerable remains of the ancient walls. The place was built in a semi-cireolar form, and was not more than 400 or 500 yards in circuit. (Leake, Jforea, vol. i. p. 232 ; Boblaye, Recherches, dंc. p. 94 ; Ross, Wanderungen in Griechenland, vol. ii. p. 239; Curtius, Peloponnesos, vol. ii. p. 287.)
TRINEAEIA. [AtTICA, p. 330, b.]
TRI'NIUS (Trigno), a considerable river of Samnium, which has its seorces in the rugged mountain district between Agnone and Castel di Sangro, and has a course of about 60 miles from thence to the Adriatic. During the lower part of its coarse it traverses the territory of the Freotaoi, and falls into the sea about 5 miles SE. of Histoninm ( Il l'asto). The only ancient writer who mentions it is Pliny (iii. 12. s. 17), who calls it "flumen portuosum:" it is, indeed, the only river along this line of coast the mouth of which affords shelter even for small vessels.
[E: H. B.]
TRINOBANTES (called by Ptolemy Tpuvóntes, ii. 3. § 22), a people on the E. coast of Britannia Romana, situated N. of London and the Thames, in Essex and the southern parts of Suffolk, whese capital was Camalodunnm (Colchester). They submitted to Caesar when be landed in Britain, bit reveited against the Romans in the reign of Nero. (Caes. B. G. v 20; Tac. Ann. xiv. 31.) [T.H.D.]

TRINURTIUML [Tinurtiua.]
TRIOBRRS, a river of Gallia named by Sidonias Apollinaris (Prapempt.). It is a branch of the Oltis (Lot), and is now named Truyere. [G. L.]

TRIO'CALA (Tpiókaגa: Eth, Triocalinus: liu. vear Cnlatabellotta), a city of Sicily, situated in
the ioterior of the island, sbout 12 miles from Thermae Selinuntiae (Sciacca). Aa the name ia cited by Stephanus of Byzantiom (who writes the name Tplinala) frem Philistus, it is probsble that it was a Sicolian town or fortress as early at least as the time of the elder Dionysius; but no notice of it is now found in bistory until the second Servile War in Sicily in b. c. 103-100. Oo that ocension Trioeala was selected, on account of its great natural strength and other advantages, by Tryphon, the leader of the iosargents, as his clief stronghold: he fortified the rocky summit on which it was situated, and was able to hold ont there, as in an impregnahle fortress, after his defeat in the field by L. Lacullus. (Diod. xxxvi. 7, 8.) The circumstances of its fall are not related to us, but Silins Italicus aliades to it as having suffered severely from the effeets of the war. ("Servili vastata Triocala bello," xiv. 270). Cicero nowhere netices the name amoog the manicipal towns of Sicily, but in one passage mentions the "Triocalinus ager" (1err. v. 4); and the Triocalini again appear in Pliny's list of the municipal towas of Sicily. The name is also found in Ptelemy, but in a mantrer that gives little iuformation as to its poskien. (Plin. iii. 8. a. 14; Ptol. iii. 4. § 14.) It was an episcopal see during the early part of the middle ages, and the site is identified by Fazello, who tells as that the ruins of the city were still visible in his time a short distance from Colatabellotla, a town of Saracen origio, situated on a lofty hill abont 12 miles ioland from Sciacca; and an old chnteh on the site still preserved the aocient appellation. (Fazell. de Reb. Sic. x. 472; Cluver. Sicil. p. 3i4). [E. II. B.]

TRIO'PIUM (Tpústion ட̆кpov: C. Crio), the promontory at the eastern extremity of the peninsula of Cuidus, furning at the saone time the southwestern extremity of Asia Minor. (Thucyd. viii. 35, 60; Scylas, p. 38 ; Pemp. Nela, i. 16.) On the summit of this premontory a temple of Apollo, bence called the Triopian, seems to bave stood, near which gamea were celebrated, whence Scylax calls
 to some authorities the town of Chidus itself abo bore the name of Triopium, having, it is said, beell founded by Triopas. (Steph. B. s. v. Tpıóiov; Plin. v. 29, who calls it Triopia; Eustath. ad Hom, Il. iv. 341: Cxidus.)
[L. S.]

## TRIPHYLIA. [Elis.|

TRIPODISCUS (Tpitaסifanos, Thnc. iv, 70 ; Трıтобíккоt, Paus, i. 43. § 8 ; Т Трітобо, Трьтобiaкıov, Strab. ix. p. 394 ; Tритобiaкп. Herod. ap.
 Steph. B. ; T $\rho$ iтодıккаios), su ancient towu of Dlegaris, said to have been one of the five hamlets into wlich the Megarid was originally divided. (Plut. Quaest. Graec, c. 17.) Strabo relates that, according to some critics, Tripodi was mentioned by Ilumer, along with Aegiruss and Nisaes, as part of the dominions of Ajax of Salamis, and that the vene containing these nomes was omitted by the Athenians, who suhstituted for it another to prove that Sulamis in the time of the Trojan War, belonged to Athens. (Strab. L. c.) Tripudiscus is celebrated in the histery of literature as the birthplace of Susarion, who is said to bave introduced comedy into Attica, and to have remored from this place to the Attic Icaria. (Aspas, ad Aristot. EiA. Nic. iv. 2 ; Dict. of Biegr. Vol. 111. p. 948 .) We learn from Thucydides (l. c.) that Tripodiscis was situ-
ated at the foot of Mount Geraneia, at a spot ennvenient for the junction of troops marehing from Plataes in the one direction, and from the Isthmus in the other. l'ausanias ( $l$. c.) also describes it as lyiag at the foot of Geraneia on the road from Bolphi to Argos. This author relates that it derived its name from a tripod, which Corvebus the Argive bronght from Delphi, with the injuection that wherever the tripod fell to the ground he was to reside there and build a temple to Apollo. (Cump. Conon, Narrat. 19.) Leake noticed the vestiges of an ancient town at the foot of Mt . Geraneia, on the rond from l'lataca to the Isthmus, four or five miles to the NW. of Megara. (Leake, Northern Greece, vol. ii. p. 410.)

Tli'POLIS (Tpinoxis, 1'tol. v. 15. § 4 : Eth. Tparaditทs: Adj. Tripuliticus, Plin. xiv. 7. s. 9), an important maritime town of Phoenicia, sifuated on the N. side of the promontory of Theuprosopon. (Strab. xri. p. 754.) The site of Tripulis has been wready described, and it has been mentioned that it derived its name, which Jiterally signifies the three rities, from its being the metropolis of the three confederate towns. Tyre, Sidon, and Aradus [Pioenicra, Vol. II. p. 606]. Each of those cities had here its peculiar quarter, separatol from the rest by a wall. Tripalis possessed a good harbore, and, like the rest of the Phoenician towns, had a large maritime commerce. (Cf. Joannes lhocas, c. 4 ; Wesseling, ad Jin. Aut. p. 149.) Respecting the mudern Tripoli (Tarablus or Tripoli di Soria); see Pococke, vol. ii. p. 146, seq.; Maundrell, p. 26; Bureklardt, p. 163, seq. \&c.; cf. Scylax, p. 42; Mela, i. 12 : Plin. v. 20. s. 17 ; Diok. xvi. 41 ; Steph. B. s. ci; Eckhel, vol, iii. 1. 372.)
[T. II. D.]

coins of tripolis in phoenicia.
 town of I'liryga, on the northern tank of the upper course of the Maeander, and on the road leading from Nardes by thiladelphia to Laoliceia. (It. Ant. p. 336; Tab. Ieut.) It was situated 12 miles to the north-west of Hierapulis, and is not mentioned by any writer before the time of Plitiy (v. 30), who treats it as a lydian town, and says that it was washed by the Mlacander. l'tolemy (v. 2. § 18) and Stephanus B. describe it as at Carian town, and the latter (s.v.) adils that in liis tine it was called Nrapolis. Hierocles (p. 669) likewise calls it a 1.ydian town. Ruins of it still exist near L'emiji or

Kıash Ieuïi. (Arundell, Secen Churches, p. 245; Hamilton, Researches, i. p. 525; Fellows, dsuic Ninor, p. 287.)
2. A fortiess in Pontus Polemoniacus, on a river of the same name, and with a tolernbly good harbour. It was situated at a distance of 90 stadia from Cape Zephyrimm. (Arrian, Peripl. P. E. p. 1\%; Anon. P'eripl. P.E. p. 13; Ilin. vi. 4.) The place still exists under the name of Tireboli, and is situated on a rocky headlaod. (Hamilton, Researches, i. p. 257.)
[I. S.]
TRI'POLIS (Tpimodis). 1. A district in Areadia. [Vol. I. p. 193, No. 12.]
2. A district in Laconia. [Vol. II. p. 113, b.]
3. A district of Perrhaebia in Thessaly, containing the towns Azorus, Pythinm, and Doliche. (Liv, xlii. 53.) [Azonus.]

TRIPOLITA'NA REGIO. [SyRTICA.]
TRPO'NTIUM, a town of Britannia Romana, apparently in the territory of the Coritani. (Itin. Ant. p. 477.) Variously identified with Lilbourn, Calthorpe, and Rugby.
[T. H. D.]
TRIP'RGIA. [AEGINA, p. 34, b., p. 35, n.]
TRINANTON (Tptadut $\omega \nu$, Ptol, ii. 3. § 4), a river on the S. const of Britamia Romana; according to Caunden (p. 137) the river Test, which runs into, Southampton Water; according to others the river Arun.
[T. II. D.]
TRISCIANA (Tpırкiava, Procop. de Aed. iv. 4, p. 282), a place in Moesia Superior, perhaps the present Firistina or Pristina.
[T. H. I.]
TRIASUll (Tpiaбóv, P'tol. iii. 7.§ 2), a place in the comntry of the Jazyges Jetanastac. [Cf. JazyGes, Vol. 11. p. 7.]
[T. H1. D.]
TRITAEA. 1. (Tpitala: Eth. Tpiraieús ; in Herod. i. 145, Tpita: $\dot{\epsilon} \in s$ is the name of the people), a town in Achaia, and the most inland of the 12 Achaean cities, was distant 120 stadia from Pharae. It was one of tho four cities, which took the lead in reviving the Achaean League in B. C. 280. In the Social War (B. c. 220 , seq.) it suffered from the attacks of the Aetolians and Eleians. Its territory was annexed to Patrae by Augustus, when he nade the latter city a colony after the hattle of Actinm. Ins site is probably represonted by the remains at Kastrita, on the Selinus, near the frontiers of Arcadia. (Ilcrol. i. 145 ; Yol. ii. 41, iv. 6, 59, 60 ; Strab. vint. p. 386 ; Patus. vii. 22. § 6. seq.; Stepth. B. s. v.; Leake, Morea, vol. ii. p. 117.)
2. (Tritea, Plin. iv. 3. s. 4. Eth. Tpirées, Herok. viii. 3i3), one of the tumns of Phocis, burnt sy Xerxes, of which the position is uncertain. (Leake, Northern Greece, vol. ii. p. 89.)
3. (Tpitela, Steph. B. s. v. : Eth. Tputaites, Thuc. iii. 101), a town of the Lacri Ozolae, described by Stephanus B. as Iyigg between Phocis and the Locri Ozolae. Hence it is placed hy Leake not far from Delphi and Amphissa, on the edge, purhaps, of the plain of Silond. (Leake, Northern Greece, vol. ii. p. 621.)

TRI'TIUNI, a town of the Autrigones, in Ilispanis Tarracouensis, in the jurisdiction of Clunia. (Plin. iii. 3. s. 4; Itin. Ant. pp. 450, 454.) Variously identified with Carceda, Rodilla, and a place near Monasterio.
[1, 11, D.]
TRI'TIUM MbTALLUM (Tpition MétarAoy, Ptol, ii. 6. § 55), a town of the Berones, in 1 lispania Tarracubensis, now ealled Tricio, near Nijjera, (Florez, Cantabr, p. 182. )
[T. H. I.]
Tli'TIUM TUBO'litCUM (Toifiay Toubónikov, Ptol. ii. 6. §66), a town of the Barduli, in Hispa-
nia Tarracenensis, on the river Deva or Devales. (Jela, iii. 1.) It is commonly identified with Motrico, which, however, does not lie on the Deva; and Mannert (i. p. 365) seeks it near Mondrayon, in Guipuscor.
[T. H. D.]
TRITON ( $\delta$ Tpít $\omega \nu$ потаuús, Ptol. iv. 3. §§ 19, \&ce.), a river of Libya, forming, according to Ptolemy, the boundary of the Regio Syrtica towards the W. It rose in Mount Vasalaetus, aml, flowing in a northerly direction, passed through three lakes, the Libya Palus, the lake Pallas, and the lake Tritonitis ( $\eta$
 sen in the innermost part of the Syrtis Minor betiseen Macomada and Tacape, but nearer to the latter.

The lake Tritonitis of Ptolemy is called, bowever, by other writers Tritonis ( $\eta$ Tpitwvis $\lambda_{i}^{\prime} \mu \nu \eta$, Herod. iv. 179). Herodotos seems to confound it with the Lesser Syrtis itself; but Scylax (p. 49), who gives it a circamference of 1000 stadia. describes it as connected with the Syrtis by a narrew opening, and as surrounding a small island,-that called by Herodotus (ib. 178) Phla ( $\Phi \lambda{ }^{d}$ ), which is also mentioned by Strabo (xvii. p. 836), as containing a temple of Aphrodite, and by Dionysins, (Perieg. 267.) This lake Tritonis is undoubtedly the present Schibkoh-el-Lovdjah, of which, according to Shaw (Travels, i. p. 237), the other two lakes are merely parts; whilst the river Triton is the present El-Hammah. This river, indeed, is no Ionger connected with the lake (Shaw, $1 b$.); a circumstance, however, which affords no essential ground for denbting the identity of the two streams; since in those regions even larger rivers are sometimes cempelled hy the quicksands to alter their conrse. (Cf. Ritter, ErdKunde, i. p. 1017). Scylax (l. c.) mentions also another island called Tritonos (Tpitavos) in the Syrtis Minor, which last itself is, according to him, only part of a large Sinus Tri-

Some writers confound the lake Tritonis with the lake of the Hesperides, and seek it in other districts of Libya ; sometimes in Manretania, in the neighboorhood of Munnt Atlas and the Atlantic Ocean, sometimes in Cyrenaica near Berenice and the river Lathon or Lethon. The latter bypothesis is adopted by Lucan (ix. 346, seq.), the tormer by Diodorus Siculus (iii. 53), who also attributes to it an island inhabited by the Amazons. But Strabo (l. c.) especially distinguishes the lake of the Hesperides from the lake Tritonis.

With this lake is connected the question of the epithet Tritogeneio, applied to Pallas as early as the days of Homer and Hesiod. But though the Libyan river and lake were much renowned in ancient times (cf. Aeschyl. Eum. 293; Eurip. Ion, 872 , seq.; Pind. Pyth. iv. $36, \& \mathrm{c}$ ), and the application of the name of Pallas to the lake connected with the Tritonis seems to point to thesc African waters as having given origin to the epitbet, it is nevertheless most probable that the brook Triton near Alalcomense in Boeotia has the best pretensions to that distinction. (Cf. Pausan. ix, 33. § 5 ; Schol. ad Apollon. Rhod i. 109, iv. 1315; Mither, Orchomenos, P. 355 ; Leake, Northern Greece, val. ii. p. 136, seq. ; Kruse, Hellas, vol. ii. pt. 1 p. 475 .
[T. II. D]
ThTON (Tpitav, Died. v. 72), a river of Crete at the source of which Athene was said to have been isorn. From its cennection with the Omphalian plain, it is identified with the river discharging vol. II.
itself is... the spa on the N . const ef the island which is called Platyperama, but clanges its name to Ghinfiro as it appraaches the share. (Pashley, Trarels, vol. i. p. 225.)
[E. B. 3.]
TRITON (Tpit $\omega \nu$ ), a river of Beotia. [Voi. I. p. 413, a.]

TRITURRITA. [Ptsae.]
TRIVICED (Trerico), a town of Samuiem, in the conntry of the Ilirpini, not far from the fromtiers of Apulia. Its name is known to ns orily from Horace, who slept there (or at least at a villa in its immediste neighbourhood) on his well-known journey to Brundusium. (IIo:. Sot. i. 5. 79.) It appears therefore that it was situatel on the Vin Apria, or the line of snad then frequented from Rome to Brundusinm. But this was mot the same which was followed in later times, and is given in the Itineraries under that name, a circamstance which has given rise to much confinion in the topography of this part of Italy. [Vin Appla.] There can be no dombt that Trivicum ocenpied nearly, if not exactly, the same site with the modern Trerica: the ancient road appears to have passel along the valley at the foot of the bill on which it was situated. It was here that stond the villa to which Horace alludes, and some remains of Roman buildings, as well ns of the pavement of the ancient road, still visible in the time of Pratilli, served to mark the site more aceurately. (Pratilli, Via Appia, iv. 10. r. 507; Romanelli, val, ii. p. 350.) It prolably never was a municipal town, as its name is not mentioned ly any of the geagraphers.
[E. II. B.]
TRIUMPILI'NI, an Alpine people of Northern Italy, who are mentioned by Angustns in, the inscription in which be recorded tho final subjugation of the Alrine tribes (ap. Plin, iii, 20, s, 24). It appears from Pliny that the whole people was reduced to slavery and soll together with their lands. According to Cato they were of Eugaoean race, as well as their ncighbours the Camoni, with whom they are repeatedly mentioned in common. (Plin. l.c.) Hence there is little doubt that they wero the inhabitants of the district still called Val Trompia, the upper valley of the Mella, and separated only by an intervening ridge of montains from the Val Cumonica, the land of the Camani.
[E. H. B.]
TRUAS (Tpwás, Tpoin, Tpoia, or 'İıàs $\bar{\eta}$ ), the territory ruled ever by the ancient kings of Trey or Llimm, which retained its ancient and venerable name even at a time when the kingdom to which it had originaily belonged had long reased to exist. Homer himself nerrhere describes the extent of Troas or its frontiers, and even leaves us in the dark as to how far the neiglthouring allies of the Trojans, such as the Dardamians, who were governed by princes of their own, of the family of l'rism, were true allies or subjects of the king of Ilium. In later times, Troas was a part of Mysia, comprising the ccast distriet on the Argean from Cape Lectnm to the neightourhood of Dardanns and Ahydus on the IIellespent; while inland it extended about 8 geographical miles, that is, as far as Mount Ida, so as in embrace the smath enast of Mysia oppocite the ivland of Lesbos, together with thie towns of Assus anil Antandrus. (IIom, /l. xxiv, 544: Herod. vii. 42) Strabo, from his well-known itclimation to magnity the empire of Troy, describes it as estending from the Aesepns to the Caicns, and his view is allopted by the Scholiast on Aprollanius Rhodius (i. 1115). In ita

4 K
proper aed more limited sense, however, Troas was an undulating plain, traversed by the terminal branches of lua ruaning ent in a north-western direction, and by the small rivers Satnots, Scambinder, Simots, and Timmerius. This plain gradnally rises towards Monnt lda, and contnined, at least in later times, several flourishing towns. In the lliad we hear indeed of several towns, and Achilles baasts ( $I /$. ix. 328 ) of having destroyed eleven in the territory of Trey; but they cin at hest only have been very small places, perlinps only open villages. That Hlinm itself must bave been far superior in strength and population is evident from the whole course of events; it was protected by strong walls, and had its acropolis. [lırem.]

The inhabitants of Troas, called Troes (Tpêes), and by Roman prase-writers Trojuni or Tencri, were in all probability a l'elusgian race, and seem to have consisted of two branches, one of which, the Tencri, had emigrated from Thrace, and become analgamated with the Phrygian or native population of the conntry. Hence the Trojans are sometimes callel Teucri and sometimes Plaryges. (Herod. v. 122 , vii. 43 ; Strab. i. p. 62, xili. p. 604: Virg. Aen. i. 33,248, ii. 252,571, \&c.) The poet of the lliad in several points treats the Trojans as inferior in civilisation to his own ceantrymen; but it is impussible to say whether in such cases he describes the real state of things, or whether he does so only from a natural partiality for lis owa countrymen.

Accurding to the common legend, the kingdom of Troy was overturned at the capture and burning of Ilimm in E. c. 1184 ; but it is attested en pretty grod autherity that a Trojan state survived the catastrophe of its chief city, and that the kingdem was finally destroyed by an invasion of Phryginas who crosved ever from Enrope into A ith. (Xantbus, ap. Stred. xiv. p. 680, xii. p. 57 . .) This fact is indinectly confirmed by the testimuny of Homer hinnselt, who makes Puseidon predict that the $1^{\text {nosterity }}$ of Aeneas should long contiune to reign wiver the Trujans, after the race of Prinm should be extinct.

Charax is Stephanus" authority. This hrief notice ardds one mere to the list of Masalintic setthments on the coast of the Meditermane.un : hut we know nothiug of Froczen. [G. L.]

TROEEZEN (Tporsny ; also Tporşnm, 1'tol. iii. 16. § 12: Eth. Tporşुuas: the territory $\gamma \hat{\eta}$ TpatSquia, Eurip. Med. ©83; iो Tpousquis $\gamma \hat{\eta}$. Thue. ii. 56), a city of l'elppommsts, shuse territory fomed the south-eastern curner on the district to which the mane of Argulis was given at a later time. It stood ant the dartance of 15 studia from the coast, in a fer-
tile plain, which is described below. (Strab, viii. p. 373.) Few cities of Pelopomsesus boasted of so remote an antignity : and many of its legends are closely connected with those of Athens, and provo that its original population was of the lonic race. According to the Troezenians themselves, their country was first called Oraea frem the Ezyptian Orus, and was next named Althepia from Alhepus, the son of Poseidon and Leis, who was the danghter of Orns. In the reign of this king, Poseidon and Athena contended, as at Athens, for the land of the Troezenians, but, through the mediation of Zens, they became the joint goardians of the country. Hence, says Pansanias, a trident and the head of Athena are represented on the ancient coins of Truezen. (Comp. Mionnet, Suppl. iv. p. 267. § 189.) Althepas was succeeded by Saron, who bnilt a temple of the Saronian Artemis in a marshy place near the sea, which was hence called the Phuebaean unarsh (\$orGaia $\lambda i \mu \nu \eta$ ), but was afterwards named Saronis, becanse Suron was baried in the gronnd belongiog to the temple. The next kings meationed are Hyperes and Anthas, who founded two cities, named IIypereia and Antheia. Aictius, the sun of Hyperes, unherited the kingdem of his father and uncle, and called one of the cities Peseidonias. In his reign, Troezen and Pitthens, who are called the sons of Pelops, and may be regarded as Achaean princes, settled in the country, and divided the power with Auttius. But the l'elopidae soon supplanted the earlier dynasty ; and on the death of Troezen, Pittheos united tbe two lonic settlements inte one city, which he called Troezen after his brother. 1'itthens was the groudfather of Theseus by his daughter Acthra; and the great oational hero of the Athenians was born and edacated at Treezen. The close connection between the two states is also intimated by the legend that two important demi of Attica, Anaphlystus and Sphettus, derived their names from two sons of Troezen. (Paus. ii. 30. §§ 5-9.) Besides the amcient names of Treezen already specified, Stephanns B. (s.v. Tporšiv) mentions Aphrodisias, Saronia, Poseidenias, Apollonias and Authanis, Strabo likerwise says (ix. p. 373) that Troezeu was called Poseidonia from its being sacred to Posejdon.

At the time of the Trojin War Troezen was snlbject to Argos (Hom, Il. it. 561) ; and upen the cunquest of the Peloponnesus by the Dorians, it received a Dorinn colony from Argos. (Paus, ii. 30. § 10.) The Dorian settlers appear to linve been received on friendly terms by the ancient inhabitants, who continned to form the majority of the population ; and aithough Troezen became a Boric city, it still retained its lonic sympathies and traditions. At an eanly period Troezen was a powerfol maritine state, as is shern by its founding the cities of Halicarnassus and Myndus in Caria. (Paus, ii. 30. §8; Herod. sii. 99 ; Strah. viii. p. 374.) The Truezeniaus also took part with the Ackacaus in the foundation of Sybaris, but they were eventually driven out by the Achaeans. (Aristot. Pol. v. 3.) It bas been conjectared with much probability that the expelleal Troezenians may have been the chief founders of Poseidonia (Paestom), which Solimes calls a Doric coluny, and to which they gave the ancient name of their own city in Feloponnesas. [Paestim.]

In the I'ersian War the Troezeniars took an active part. After the battle of Thermopylae, the larbune of Troezen was appointed ns the place of rendezvins for the Grecian fleet (Herod, vin. 42) ; and when the Athenians were obliged to quit Attica upon the
approach of Xerzes, the majerity of them took refuge at Troezen, where they were received with the grentest kindness by the semi-Innic popalation. (Herod. viii. 41 ; Plut. Them. 10.) The Troezenians sent 5 ships to Artemisinm nnd Salamis, and 1000 men to Plataeas and they also fought at the hattle of Mycale. (Hered. viii. 1, ix. 28, 102.) After the Persian war the friendly comnection between Athens and Troezen appears to have continued ; and during the greatness of the Athenian empire before the thirty years' peace (B. c. 455) Treezen was an ally of Athens, and was apparently garisoned by Athenian troops ; but by this peace the Athenians were compelled to relinquish Troezen. (Thuc. i. 115, iv. 45.) Before the P'eloponnesian War the two states became estranged from one another ; and the Troezenians, probably from hostility to Argos, entered into close alliance with the Lacedaemouians. In the Peloponnesian War the Troezenians remained the firm allies of Sjarta, although their country, from its maritime sitnation and its proximity to Atticn, was especially exposed to the rarages of the Atlienian fleet. (Thuc, ii. 56, ir. 45.) In the Corinthian War, B. c. 394 , the Troezenians fought upon the side of the Lacedaemomians (Xen. Hell. iv. Q. § 16); and again in B. c. 373 they are numbered among the allies of Sparta against Athens. (Xen. Hell. vi. 2. § 3.) In the Macedonian period Troezen passed alternately into the hands of the centending powers. In r.. C. 303 it was delivered, along with Argos, from the Macedenian yoke, by Demetrius Puliorcetes; hut it soon became subject to Macedonia, and remained so till it was taken by the Spartan Cleonymus in E. c. 278. (Polyaen. Strat. ii. 29. § 1 ; Frontin. Strat. iii. 6. \$7.) Shortly afterwards it again became a Macedonian dependency ; but it was united to the Achaean League by Aratus after he bad liberated Corinth. (Paus. ii. 8. § 5.) In the war between the Achaean League and the Spartans, it was taken by Cleomenes, in B. c. 223 (Polyb. ii. 52 ; Plut. Cleom. 19 ) ; lut after the defeat of this monareh at Sellasia in b. c. 221, it was doubtless restered to the Achaeaus. Of its subsequent history we lave no information. It was a place of importance in the time of Strabo (viii. p. 373), and in the second centary of the Christian era it continued to possess a large number of publis buidlings, of which Pansanias has given a detailed account. (P’aus. ii. 31, 32.)

According to the description of Pausmias, the monuments of Troezen may be divided into three classes, those in the Agora and its neighbourhoud, tiuse in the sacred inclosure of Hippolytus, and those upen the Acropolis. The Agora seeios to have been surrounded with staae or colonnades, in which stood marble statues of the wemen and children who fled for refuge to Treezen at the time of the Persian invasion. In the centre of the Agura was a temple of Artemis Suteira, said to have been dedicated by Theseus, which contained altars of the infernal gods. Behind the temple stood the monnment of Pitthens, the founder of the city, surmounted by three chairs of white marble, upon which he and two assessors are said to have administered justice. Not far from thence was the temple of the Muses, founded by Ardalus, a son of Hephaestus, where Pitheus himself was said to have learnt the art of discourse: and before the temple was an altar where sacrifices were offered to the Muses and to Slecp, the deity whom the Truezenians consitered the most friendly to these goultesoes:

Near the theatre was the temple of Artemis

Lyceia, founded by Hippolytus. Before the temyur there was the rery stone upon which Orestes wat purified by wine Troezenians. The so-called ten: of Orestes, in which he took refuge before his expiation, stood in front of the temple of Apollo Thearius, which was the most ancient temple that Pausanias knew. The water used in the puitication of Orestes was dramn from the saered fountain Hippocrene, struck by the hoof of Pegnsns. In the neighbourbooil was a statue of Hermes Pelygios, with a wild olive tree, and a temple of Zens Siter, said to have beea erected ly Aistins, one of the mythical kings of Trwezen.

The sacred enchosure of Hippolytus compined a large space, and was a mest conspicuons olje t in the city. The Troezenians denied the truth of the ordinary story of bis being dragged to death ly lis horses, but worshipyed him as the constellation Anriga, and dedicated to him a spacious sanctuary, the foundation of which was ascribed to Diomede. H: was worshipped with the greatest honours; and each virgin, befure her marriage, dedicated a lock of her hair to him. (Eurip. Mippol. 1424; 1'aus. ii 32. § 1.) The sacred enclosure contained, besides the tenj ic of Hippolytus, one of Apoilo Epilmateriux, also dedicated by Dimede. On one site of the enclosure was the stadiam of Hippolytus, and above it the temple of Aphrodite Calascopia, so called because Phaectra beheld from this spot Hippolytus as he exercised in the stadimn. In the neighbourheod was shown the temb of Phacdra, the monument of Mippolytus, and the house of the hero, with the fountain called the Herculean in frout of it.

The Acropolis was crowned with the temple of Atlena Polias or Sthenias; and upon the slupe of the mountain was a sanctuary of Pan Lyterins, so called because lie puta stup to the plague. Lower down was the temple of 1sis, built by the Hulicarnassians, and also one of Aphrodite Ascraea.

Tbe ruins of Troezen lie west of the village of Dlamalá. They consist only of picees of wall of Hellenic masonry or of Kon an brickwork, dispened over the lower slopes of the height, upon which stond the Acropulis, and over the plain at its tout. The Acropolis ocenpied a rugged and lofty hill, coinmanding the plain lielow, and presenting one of the most extensive and striking prespects in Greece. There are in the plain several ruined chmrelus, which probably mark the site of ancient temples: and several travellers have noticed the remains of the temple of Aplorodite Calascopia, overlooking the cavity formerly eccupied by the stadium. The chief river of the plain flows by the ruins of Troezen, and is now called Potimi. it is the ancient Taurius. afterwards calied IIyllicus (Paus, ii, 32. §7), fel by several streams, of which the most important was the Clirysorrhas, flowing through the city, nat which still preserveld its water, when all the other streams had been dried up by a nime years drusght (1'aus, ii. 31.§ 10 )

The territory of Troezen was bounded on the W. by that of Epidurus, on the SII: by that of IVernime, and was surrounded on every other side by the seas. The moat important part of the territory was the fertile maritime plain, in which Troem slood, and which was bounded on the sonth If a range of mountains, terminating in the $\mathrm{P}^{\text {r }}$ in whies Scyllaeum and Bucephata, the most casterly F ists of the l'elopomenus. [Solmakiss.] Alowe it promontors Scyllemm, and nearly dae F. of Truezen, was a laige bay, protected ly the island of

4 K ?

Calaureia, named Pogen, where the Grecian fleet was ordered to assemble before the battle of Salamis (Herod. viii. 42 ; Strab. viii. p. 373.) The porttown, which was named Celenderis (Paus. ii. 32. § 9), appears to have stood at the western extremity of the bay of Pogen, where some ancient remains are found. The high rooky peninsula of Methaua, which belonged to the territory of Troezen and is united to the mainland by a narrow isthmus, is described in a separate article. [Metmina.] There were fermerly twe islands off the coast of Troezen, named Calaureia and Sphaeria (atterwards Hicra), which are now united by a narrow sandbank. (Leake, Morea, vol. ii. p. 442, sed.; Boblaye, Recherches, 9c. p. 56; Curtius, Peloponnesos, vel. ii. p. 431 , seq.)

TROGIILIUM (Tpoyidtov), a promontory formed by the western termination of Mount Mycale, opposite the island of Sumos. Clase to this promontory there was an island bearing the same name. (Strab. xiv. p. 636 ; Steph. B. s. v. Tp $\omega^{\prime}$ inos, according to whom it was also called Trogilia; Act. -Apost. xs. 15, where its name is Trogyllion.) Pliny (v.31.s.37) speaks of three islands being called Trokiliae, their separate names being Philion, Argennon, and Sandalion.
[L. S.]
TROGI'LIUM, a town of Lusitania, according to Luitprand (Adversiriu, § 30, ap. Wessel. ad Itin. p. 438), the same place which Iliny (iv. 35) calls Castra Julia. It is incontestably the Turcalion of the Geogr. Lav. (iv. 35 ) and the modern Truxillo. (Cf. Florez, Esp. Sugr. siii. p. 114, and Ukert, ii. pt. i. p. 395. )
[T. II. D.]
TROGI'TIS (Tpwyīts), a stnall lake in Lycaouia, mentioned only by Strabo (xiie p. 568), and prebably the same as the one now called Ilghom.
TROGLO'DYTAE (T $\rho \omega \gamma \lambda$ nodútat, Ptol iiil. $10 . \mathrm{S}_{8} 9$; Diodur. iii. 14; Strab. xvii. pp, 2 s 6.819 ; Agatharchid. ap. Phot. p. 454, ed. Bekker; Mlin. ii. 70. s. 71
 $\chi \omega$ мa, Diodor. i. 30 ; Ptol. iv. 7, 27.) Under the tern Troglodytae the ancients appear to have ineluded various races of men. For we meet with them in Mauretania (Strab. xvii. p. 828 ) ; in the interior of Libya east of the Garamantes, along the Arabian shore of the Red Sea, as well as on the opposite ceast of Aethiepia and Aegrpt, and on buth in such numbers that the districts were each of them named "Regio Troglodytica;" and even on the northern side of the Caucasus (Strab. xi. p. 506). The Caucasian Troglodytse were in a ligher state of civilisation than their easteru namesakes, since they cultivated corn.

Fut the race mast commonly known as Troglodytae iuhabited either shore of the Red Sea, and were probably a misture of Arabian and Aethiopian Llowl. 'Their name, as its composition imports ( $\tau \rho \dot{\sim} \gamma \lambda \eta$, ôvo $w$ ), was assigned to them because they either dug for themselves cabins in the lime and samdstone hills of tbat region, or availed themrelves of its nutural caverns. Even in the latter cate, the tillages of the Troglodytae were partly formed by art, ince long tannels, for the frasstye or statling of their herds, were cut between village and village, ard the rocks were honeyeoubbed thy their Jwollings. Bruce saw at Gojam in Nutia a series of such caverns, juhabited by berdsmen, and witnessed the periodical pawage of the cattle in Scnnaar from the lowlands to the hills. The same cause led to similar nigrations in
ancient times, viz., the appearance of the gadfly in the marshes, immediately after the cessation of the periodical rains.

The accounts of the Regio Troglodytica that extended from the Sinus Arsinoites to Berenice may be assumed as applicable to the Troglodytae generally. The catacombs of Naples will perlaps give the most accurate image of their dwellings. The Ababdeh, who now inhabit this region, exhibit many of their peculiar manners and customs. Their language was described by the Greeks as a shriek or whistle, rather than as articulate speech; a portion at least of them were serpent-eaters. (Herod. iv. 183.) But their general occupation was that of herdsmen.

Agatharchides of Cnidos is the earliest writer who mentions the Troglodytae (op. Photium, p. 45t, ed. Bekker). According to him and Strabo (xvii. p. 786) animal food was their staple diet; and they eat not only the flesh but also the bones and hides of their cattle. Their drink was a misture of milk and blood. Siuce, bowever, only the older and sicklier beasts were slaughtered for food, it may be presumed that the better animals were reserved for the Aegyptian and Aethiopian markets. The bides supplied their only article of raiment; but many of them went naked, and the women tattooed their bodies, and wore necklaces of sheils. The pastoral habits of the Troglodytae rendered them so swift of foot as to be alle to run down the wild beasta which they bunted; and they must have been acquainted with the use of weapons, since they were not only hanters, but robbers, against whom the caravana passing from the interior of Libya to Berenice on the Red Sea were obliged to emplay a guard of sol-
 Peut.), about 25 miles from Berenice. Troglodytas also served among the light troops in the army of Xerses, B. c. 480, anI acted as guides to the caravans, since the Ichthyoplaugi whom Cambyses employed as explorers of Jeroe were a tribe of Troglodytae. (Herod. iii. 19.) Among the common people a community of women existed : the chiefs alone, who may have been of a superior race, baving wives appropriated. For the abstraction or seduction of a chieftain's wife an ox was the penalty. During their retirement in caverns they seen to have lived peaceably together, but as soon as they sallied forth with their berds into tho pastures they were incessantly at war with one another, on wbich occasions the women were wont to act as mediators. They practised the rite of circumcision, like the Arabians and Acthiopians generally. According to Agatharchides the Troglodytae differed as much from the rest of mankind in tbeir sepulehral customs as in their liabitations. They bound the corpse neck and heels together, affised it to a stake, pelted it with stones amid shouts of laughter, and when it was quite covered with stones, placed a horn upon the mound, and went their ways. But they did not nlways wait for natural death to perform this ceremony, since, accounting inability to procure a livelihoud among intolerable evils, they strangled the aged and infirm with an ex-tail. Their civilisation appeared so low to Aristotle (Hist. Anim. viii. 12) that he describes the Troglodytne as pigmies who, mounted on tiny horses, waged incessant wars with the cranes in the Aethiopian marshes. A tribe on the frontiers of Abyssinta, called Barnagus by the natives, correspends, according to modern accounts, with the
aneient Troglodytae．（Vincent，Commerce and Na－ eigation of the Ancients，vol．ii．p．89．）［W．B．D．］ TROLCES MONS（Tpwuc̀v öpos，Strab，xvii．p． 809 ；Steph．B．s．v．；Tpwikoû 入（ $\theta$ ou úpos，Ptol．iv． 5．§ 27），was a long range of hills east of the Nile， which threw out several abrupt spurs into the Hep－ tanomis of Aegypt．It stood in the paraliel of Heracleopolis，i．e．in Lat， $31^{\circ} \mathrm{N}$ ．From this calcareons range was quarried，according to strabo，the stone used in the construction of the Pyramilus．［W．B．D．］

TUCCA（Тоикка，Ptol．iซ．2．§ 28）．1．A town of Mauretania Caesariensis．Ptolemy places it in the interior；bot according to Pliny（v．2．s． 1）it was on the sea，at the mouth of the river Ampsaga．（Cf．Tab．Pent．）

2．A town in the district of Byzacium in Africa Proper：（Ptol，iv，3．\＆32．）From inscriptions found in a village still called Dugga it may be in－ ferred that the place should be more correctly called Tugga．According to the Itin．Ant．（pp．4i，49，51） it lay 50 miles N．of Sufetula，the mindern Sbaithut or Sfailla，and also bore the name of Terebentina or Terebintbina，probably from its being situated in a neighbourhood abounding with the Terebinth tree． Tucea was a fortified town．（Procop，de Aed ri．5．） It is probably the same place called Tuccabori by St．Augustin（adv．Donat．ri．24）（Cf．Wessel．ud Itin．p． 48 ．）

3．A town of Numidia．（Ptol，iv．3．§ 29．）
［T．H．D．］
TUCCI（Taûkst，Ptol．ii． 4 § 11 ），a town of His－ pania Buetica，between Ilipla and Italiea（Itin． Anl．p．432．）According to Iliny（iii．3．s．3）is

## TULLONIUM．

Lati thi Luname of Augusta Gemella．Cenmonly 4 thentsed with Tejada．（Cf．Flores，Esp．Sagr．xii， 1． 3.5 s.$)$
［1．1l．b． 1
TLCRIS（Tookpis，Ptul．ii 6．Ş 56），a tuwn of the Arevaci in Hispania Tarraconellsis［1，II．D．］

TUDE（Tû̂ōat and Toûvōal，l＇tol ii．6．§ 45），a lust or castle of the Gruii or Gravii，in Hispania Tarraconemsix，E．of Limia，and on the road from 13racara to Asturica．（Itin，Aut．p．429．）it is called Tyde by Pliny（iv．20．s．34），and accordine to an ancient tradition it was the seat of an Actulian whiny under Diomel；a tale probably occasioned by the sinilarity of its name to that of Tydeus．（Sis）． Itai．iii．367，ari．369；Plin．l．c．；Avien．Deser． （Orb．6．50．）It is the modern Tay．［T．H．1）．］

TUDER（Toūठ $¢$ ：Eth．Tudertinus：Todi），one of the most considerable cities of Unbria，situated ini a lofty Lill，rising above the lelt bank of the Thes ahout 26 miles S of l＇ensia and 18 W ．of Spuivtum．There is oo doubt that it was au ancient Unbrian city，but no mention of the mame occurs in listory previnus to the Romnn conquest．Silius Italicus tells us that it was celebrated for the worship of Mars（Sil．Ital．iv．222，viii．462），and notices its position on a lufty lill．（Id．vi，G45．）The tirst notice oll it in history is on occasion of a pro－ ulgy which occurred there at the time of the inva－ sion of the Cimhri and Teutones（Plut．Mor．17； Plin．i．57．s．58）；and shortly after we learn that it was taken by Crassur，as the lieutenant of Sulla， laring the wans of the latter with the partisaos of Marius．（Flut．Cruss．6．）It receired a colony un ler Ausu－tus，and assumed the title of＂Colonia Fida Tuder，＂probably in consequence of some ser－ vices rendered during the Perusian War，though its name is put mentioned by Appian．（1＇lin．iii．14．s． 19 ； Lib．Colon．1．214；Murat．Inser．pp．1111．4，1120． 3；Orell．Iuscr．3726．）It appesrs foum inscriptions to have been a flourishing and important town under the Roman Empire，and is mentomed by all the geo－ eraphers among the chief towns of L＇mbria．（Strab． v．1． 227 ；Iliin．l．c：Ptol．iii．1．Ş 54．）It was not situated an the Flaminian Way，but the Tabula cives a line ol road，which led from Ameria to Tuder，and thence to Perusia．（Tab．Peut．）lts ervat strength as a fortress，arising from its clevated forition，is already alluded to by Strabo（l．c），and in tered it a place of importance during the（iothic W．ins，after the fall of the Western Empire．（Procop． D．（f．ii．10，13）it is again mentioned as a city under the Lombards（P．Diac．iv．8）；aod there can he po doubt that it continued througbont the midule ares to be a considerable city．It is now much de－ （nyel，and las only about 2500 inhabitants，but still retains the title of a city．

Con－ikerable aocieot remains still attest its furmer ransidetation．Anoug these the most remarkable an．He walls of the efty，some purtions of which are If purently of great antuquity，resembling those of lem wis，Volateme，and other Etrusenu cities，but thi＇y are in gencral move remular and less rode． ther puts of at walls，of which three distinct cir－ －wits mary lne trwed，are of regular masuary aod baile of tavertice．These are certainly of Roman tate．There are aloo the remains of an ancient ＋at lis，calkel ty local ；urtiguarrams the templo of Firr，hat more probably a basitioa of Koman date． Nomerms eni－and other small ubjects trave been f． 1 at Tud＇：amust the latter the fil 1 interesting
 sertane it It me．The coins of Titiler，whads are
namerons，belong to the class called Aes Grave， being of brass and of large sizc，resembling the earliest coinage of Volaterrae，Iguvium，\＆c．They all have the name written in Etruscan characters tvtere，which we thus learn to bave boen the native form of the name．
［E．H．B．］
TLE＇ROBIS（Tooépobis，l＇tol ii．3．§ 11），a river on the W．coast of Britanvia Romana，now the Tiry．
［T．H．D．］
TUFICUM（Tó́фікау：Eth．Tuficanus），a muni－ eipal town of Umbria，mentioned buth by Pliny and 1＇tolemy，as well as in an inscription，which confirms its municipal rank；but its site is wholly uncertain． （Plin．iii．14．s．19；l＇tol．iii．1．§ 53；Orell．Inser． 87．）
［E．H．B．］
TU＇GENI（Twïyevoi）．［Helvetif，Vol． 1. p．1041．］

TUGiA，a town of the Oretani，in Hispania Tar－ raconensis．（Plin，iii．3．s．4；Itin．Ant．p．404．） Its site is markel by some ruins at Toya，near Quesada，at the sources of the Guadalquioir．（Cf． Florez，Esp．Sagr：v．pp．24，34；D＇Anville，Geogr． Anc．i．p．34．）
［T．H．D．］
TUGIENsIS SALTUS，a part of the chain of Mount Orospela，which derived its name from the town of Tugia，and in which，according to Pliny （iir 1．s．3），the Bretis bad its source，whence it would appear to be the same branch called by others Mons Argentarius．［Ci．Orospeda．］［T．H．D．］

TULCIAE or TERICIAE，as some read it，in Gallia Narbonensis，between Glanum［Glaxuxt］ and Aquare Sextiae（Aix）．It is placed in the Table between Glanum and Pisavac，xi，from Glanum and $x v$ ：from Pisavae．D＇Anville fixes Tuiciae or Tericize，as he reads the name，about Aiquieres or Aureillc．This sccond name，as he ob－ serves，seems to have some relationship to that of the Foman roal described in the Amtonine 1 tin．under the name of Tia Aurclia as far as Arelate（Arles）．It is said that there are many remains at a place named Jean－Jean about a mile from Aiquieres．［G．L．］

TULCLS，a small river on the E．coast of His－ panis，near Tarraco．（Mela，ii．6．）It is probably the modero Gaya．
［T．H．D．］
TULiNG1．［Hflvetir，Vol．I．p．1042．］
TULII＇HURDUNX（Tou入í申oopסov），a place in Germany，probably in the cumtry of the Chanci Minores，on the right bank of the Visurgis．（Ptol． ii．11．§28．）Wilbelm（Germanien，p．161）iden－ tifies it with the modera Verden；but this is a mere conjecture．
［L．S．］
TULISURGILM（Tood aroúpyiov），a town in Germany，probably belonging to the country of tho Dulgibici．（1＇tol．ii． $11 . \$ 28$ ．）Not to meotion ether conjectures as to its modern representative，Zeass （Die Deulscken，p．7）and Willselm（Germanien， p．46）are of opinion that the reading in Ptolemy is wroug，and that we should read Teotcoovpriop， mhich they rectard as the place from which the Teutoburgiensis Siltus derived its name：and it is accordingly believed that the remains of an ancient wail，now called the Itinenring，on Mount Groten－ bury，near Metmold，marks the site of the ancient Teutuburgium．But all this is no more than a plancible conjecture．
［L．S．］
TULLLICA（Tou入入ika，Ptol．ii．6．§ 64），a town of the Caristi in Hispauia Tarraconensis．［T．M．1）．］ ＇TLLLU＇NILA（Tou入 Grov，1＇tul．تii．G．§ 66i），a town of the Bardnli in Hispania Tarraconensis，on the roal from Poupelo to Asturica．（ltin，Ant．p． 40J．）Probably the inutern Akeyria．［T．H．D．］

## TULLUM．

TLKIA．
$12 .$.
TULLUM（Toú入入av），in Gallia Belgica，is one of the cities of the Leuci，who bordered on the Ne－ dimatrici．（Ptol，ji．9．§ 13．）Nasium is the other city［N．istion］．The Notitia of the Provinces of Gallia mentions Tullum thus：＂Civitas Len－ corum Tollo．＂Toul，which is Tullum，has pre－ served its name instead of taking the name of the people，like most other capital towns．Toul is in the department of the Wearthe．
［G．L．］
TUNES（Túrons，Polyb，i．30；Toúves，or Túvis， Strab．svii．p．834，\＆ec．），a strongly fortified town， once of some inportance，in the Roman province of Africa．According to Polybius（xir．20），who is followed by Livy（sex．9），it was 120 stadia or 15 miles from Carthage，from which it lay in a SW． direction；but the Tab．Pent．，in which it is witten Thunis．places it more correetly at a distnnce of only 10 miles from that city．It is said tu hare been situated at the mouth of a little river called Catada． in the bay of Carthage，but there are now no traces of any such river．On the present state of Tumis， see Blaquiere，Lell．i．p．161，seq．；Ritter Erd－ lounde，i．p．914．seq．
［T．H．D．］
TUNGRI（Toi $\gamma \gamma p o s$ ），are placed by Ptolemy （ii． $9 . \S 9$ ）east of the Tabullas river，and their chief place is Atuacutum，which is Aduntuea or Tongern［Advatics］．Tacitus（German，c．2） says，＂Those who first crossed the Rhine and ex－ pelled the Galli，are now called Tungri，but were then named Germani．＂Tacitus speaks of the Tungri in two other passages（Hist．iv．55．79）； and in one of them he appears to place the Tungri next to the Nervii．The name of the Eburones，whom Caesar attempted to annihilate［Enuroses］，dis－ appears in the later geography，and the Tungri take their place．（Plin．iv．31．）D＇Anville observes （Notice，gre．）that the name of the Tungri extended over a large tract of country，and comprehended several peoples；for in the Notit．of the Prorinces of Gallia，the Tungri divide with the Agrippinenses nll Germania Sucunda ：and there is some evideoce that the bishups of Tongern had once a territory which bordered on that of Reims．

Ammianus（ xv .11 ）gives the name of the people， Tungri，to one of the chief cities of Germania Secunda；the other is Agrippina（Cologne）．This shows that Tongera under the Later Empire was a large place．Many Ronan remains lave been Jug uip there；and it is said that the old Roman road nay still be traced through the town．［G．L．］

TUNNOGELUM，aceording to the Notitia Imp． a place on the coast of Britannia liomana，at the end of the wall of Hadrian，the station of the Cohors I．Aelia Classica．Horsley（p．91）and nthers place it at Boulness，on Solucay Frith；Cam－ den，with less probability，seeks it at Tynemotrth， on the E．coast．
［T．H．D．］
TUNTOBRIGA（Touvtospira，Ptol．ii．6．§ 39），a town of the Callaici in Hispania Tarraco－ nensis．
［T．H．D．］
TURANIANA，a place in Hispania Baetica，not far from the coast，between Murgis and Urci．（Itin． Ant．p．405．）Varinusly identified with Torque， Torbiscon，and Tabernas．
［T．H．D．］
TURBA，a town of the Eletadi in Hispania Tarraconensis．（Liv．axxiii．44．）Perhaps the modern Tuejar on the Guudalaviar．［T．H．D．］
TURBA．［Bgerrtones．］
TURBULA（Toúpfouna，Ptol．ii．6．§ 61），a town of the Bastetani in Hispania Tartaconensis． DAnville（Gcoyr．An．i．p．28）and Mentelle（Esp．

Anc．p．17\％）identify it with Tervect if It Then：－15． pt．i．p． 40 ）more currectly declares it t be 7 i i $\sim$ ，in in Iturcia．The inbabitants are called Topbunfirue by App．Hisp． 10.
［T．H．D．
TUBCAE（Toîpкoц，Suid．\＆r．），a Scybian people of Asiatic Asumatia，dwelling on the Yalas Macotis，which appears to be identical with the ＇Iûpkat of IJenxlotus（iv．22，\＆c．）．The var＇uns hypotheses that have been started respecting the Tureac only slow that nothing certain is known re－ specting them．（Cf，Mannert，iv．p．130：Heeter， Jdeen，i．2，1p．189，2s1，307；Schaffintik，Shax．Al－ terth．i．p． 318, \＆ec．）Humbuldt（Central－Asich． i．p． $245, \mathrm{~cd}$ ．Mahlinamn）opposes the notion that these Tureae or Jyrcae were the ancestors of the preseut Turks．
［T，I，D．］
TURCILINGI，a tribe in northern Germans which is not notiecd before thic fith contury of onr cra，and then is occasionally mentioned alma with the Rugii．（Jormand．Get． 15 ；Paul．Dine． i．1．）
［l．S．］
TURDETA＇NJ（Toupōntavol，Ptol．ii．4．§5，Sc．）． the prineipal people of Ilispania Baetica；whente we find the name of Turdetania（Toupôtravia or Touptutavia）used by Strabo（iii．p．136）nnil Ste－ phanus Byz．（p．661）as identical with Buetien． Their terxitory lay to the W．of the river Singul＇s （now （enit），on both sides of the Baetis as far as Lusituria on the W．The Turdetani were the most civili－ed and polished of all the Spanish tritios． They cultivated the sciences；they had their poets and historians，and a code of written laws，drawn up in a metrical form（Strab．iii．PT．139，151，167； Polyb，xxxiv．9）．Hence they were readily disposed to ailopt the manners and customs of their con－ querors，and became nt length almost entirely Romans；but with these characteristics we are not surprised to find that they are at the same time represented br Livy（xxxiv，17）as the most non－ warlike of alf the Spani－h। races．They possessed the Jus Latii．Some traits in their fianners ane noted by Diodorns Sic．（r．33）．Silins Italicus（iii． $340, \mathrm{~s} q$ q．），and Strabo（iii．164）．Their superior cirilisation was no doubt derived from their inter－ course with the Phonicians whose colony of Tartessus lay in their neighbourhood．［1．11．D．］
TURDUL1（Toupסov̄入ot，Ptol，ii．4．§ 10），tu people in Hispania Bnetica，very nearly cumected with the Turletani，and ultimately not to be di－－ tingnished from them．（Strab．iii．p．139；Polyl． xxsiv．9）．They dwelt to the E and S of the Turdetani，dorsi to the shores of the Fretum lier－ enleum．A branch of them called the Tur $\ln \mathrm{i}$ Veteres appears to hare migrated into Lusilania， and to have kettled to the S of the Durius：where it is probable that in process of time they be－ cane amalgamated with the Lusitamians（Strab．i i p． 151 ；Mela，iii．1．§ 7 ：Plin．iii．1．s．3，iv，21．s． 35；cf．Florez，Esp．Sagr，ix．p．7）．［T．H．1．］
TURECIONICUY or TLRECIONNCH，in Gal－ lia Narbonensis，is placel in the Table on a road between Vienna（＇ienne）nnd Gularo（Grenoble）． Turecionicum is between Vienna and Mrrimus at （1foirms）The site is unknown．
［G．L．］
TLELA or TITRIUM，a river in the territory of the Edetani in Hispania Tarraconemis，wifle mieen the sca in the neighthonthod of Valentia（M．la．ii． 6 ： Plin．iif．3．5． 4 ：Vib．Seq．P．227，ed．Bip．）It was famed for the prodium Turiense betwent Pomper nul Sertorins（i＇hut．Pomp，18，Sott，19：Fie．$p^{\text {，}}$ Bulb．2）．Now the Guadelaviar．［T．11．D．］
 § 58 : Turiasson, Geogr. Rav, iv, 43: Eth. Tariasunensis, Plin. iii. 3. 8. 4), a town of the Celtiberi in Hispania Tarraconensis, on the road from Caesaraugusta to Numantia (ltir. Aut. 13p. 442, 443). Aecording to Pliny (l. c.) it was a civitas Romana in the jurisdiction of Caesuraugusta. A fonntaio in its neighbonthood was said to lave the quality of hardening iron (Id. xxsiv, 14. 8. 41). The town is now called Tarrazona. F'or coins see Florez, Med i. p. 690 , iii. p. 124: Mionuct, i. p. 53 , and Suppl. 2. 1. 167 ; Sestini p. 207.
[I. H. D.]
TURICUM. [HeLvethi, Vol. 1. 1. 1041.]
TURIGA. [CuRgia.]
TURLSSA (called by P'toleny 'Iroúptoa, ïi. 6. § 67), a town of the Vascones in Ilispania Tarraconensis, on the ruad from Pompelo to Burdigala (Itin. Ant. p. 455.) Variously identified with Ituren and (1steriz.
[T. I. D.]

## TLRMO'DIGI. [Muthugi.]

TU'RNOGU31 (Tuópuoyov, l'tul. ii. 5. § 8), is town in the interior of Lusitamia. [T. H. D.]

TURMULL, a towu of Lusitania on the Tagus, and ot the road from Emerita to Caesuraugusta. (Itin. Ant. p. 433.) Variously identified with Alconetrar and Puente de Alcuñete: [T. II. D.]

TURNACUN or TORNACUM, a city of North Gallia, is first mentioned in the Roman Itins. In the Notit. lonp. mention is mate of a military force under the nane of Numerus Turnacensinm ; and of a "Procurator Gynaecii Tornaceosis Belgicae Secundae." This procurator is explained to be a superintendent of some number of women who were employed in making clotbing for the soldiers. Hieronymus about A. b. 407 speaks of Turnaenm as one of the ehief towns of Gallia ; and Audoeous, in lis life of S. Eligius (St. Eloi) in the seventh century, says of it, "quae quondam regalis extitit civitas." Turnacum was within the linits of the ancient territory of the Nervii. The Flemish name is Doomick, which the French hwe corrupted into Tournai. Tomrnai is on the Schelde, in the province of Hainault, io the kiogdom of Belgium.

There are silver corns of Turnacnna, with the legend dyrmacos and phrasacys. On one side there is the head of an armed man, and on the wher a horseman armed. On some there is said to be the legend dybno rex. Numerous Roman medals have been funnd at Tournut, some of the time of Augustus and others as late as Claudius Gothicus and Tetricus, and eved of a later date. The tomh of Childeric 1., wio died A. D. 481 , was uiscerered at Tourrui in the seventeenth century, and at vast quantity of gold and silver medals, and other curcous things; anung which was the goldeo ring of Childeric, with his name on it, childinici 1mikns. Such disenteries as these, which have been made in sarious places in Belgium, show how little we know of the liuman history of this country. (D.Ansille, Notice, 9 c. ; Wkert, Gallien ; Kecueil I'Antinkiti's Romaines el Gutluises truuvées dans le Fhinhe proprement dite, par D1. J. de liast.) [G.L.]

TLROBRICA, a town of Alispania Buetica io the iurindiction of Hispalis (1Plin. iii. 1.s. 3). [T.11.1).]

TU'RO1)1 (Toupodot, I'wlii. 6. § 40), a people in Ilspania Tarraconensis, probably at subdiviston of the Callaiii Bracarii, in whuse territury were the baths called "Toata raiá.
[i. II. 1).
TL'RONES, TLRONH, TURO'NH. Sume of Cacsar's tropps wintened in the country of the Turones after the campaign of $\mathrm{u}, \mathrm{L} .37$ ( $B . \dot{6} . \mathrm{ji} .35$ ). The

Turones are mentioned again (B. G. viii. 46), wher" we learn that they bordered on the Carnutes; and in another place (vii. 4) theyare meotioned with the Pictones, Cadurci, Aulerci, and uther states of Western Gallia. When Vercingetorix (D. C. 52) was rousing all Gallia against Caesar, he ordered the Torones to join hiin. Tbe contingent which they were called on to furnish against Caesar, during the siege of Alesia was 8000 men (vii. 7.5). But the Turones never gave Caesar much trooble, though Lucan calls them " instabiles" (i. 437), if the verse is genuine.

In Ptoleury (ii. 8. § 14), the name is Toopoyieis, and the capital is Caesarodunum or Tours on the Loire. In the insurrection of Sacrovir in the time of Tiberius, the Turonii, as Tacitus calls them (Ann. iii. 41, 46), rose against the Romans, but they were soon put down. They are in the Lugdunensis of Ptoleny. The chief part of the territory of the Turooes was south of the Loire, and their name is the origit of the provineial name Touraine. Ukert (Gallien, p. 329) mentions a silver coin of the Turoni. On one side there is a female head with the legend "Turonos," and on the other "Cantorix" with the figure of a galloping horse.
[G. L.]
TURO'AI (Toópwyou), a German tribe. described as occupying a district on the south of the country once ioliatited by the Chatti, perhaps on the northerin bank of the Moenus. (Ptol, ii. 31. § 22.) [L.. S.]
turoqua (in the Geogr. Rav, iv. 43, TuraQUA), a toma of the Callaici in Hispania Tarraconensis on the road from Bracara to Lueus Angnsti (Itin. Ant. p. 430.) Variously identified with Touren (or Turon) and Rilbovalia. [T. H. D.]

TURRES a place in the interior of Muesia Superior. (Itin. Ant. p. 135; Itin. Wieros. p. 566 ; Geogr. Rav. iv. 7.) Procupius (de Aed. iv. 4. p. 285) calls it Touppifas, which is intended for Turribus. Variously ideatified with Szarköi and Tchardah.
[T. H. D.]
TLRRES (AD). 1. A town of the Oretani in Hispania Tarraconensis (Itin. Ant. p. 445). Variously identified with Calatrava and Oreto.
2. A town in the territory of the Contestani in the same province (Itin. Ant, p. 400). Ileotifice either with Castrolla or Olleria. [T.H. 1).]

TURRES ALBAE (Húpyoi $\lambda$ eukoí, Ptol. ii. 5. § 6), a place of the Celtici in Lasitania. [T. 1H. D.]

TLRRIGA (Touipplya or Toúpyiva, Ptul. ii. 6. § 23), a tumb of the Callaici Luceoses in Hispania Turraconensis.
[T. H. D.]
TURIIII, AD, in Gallia Narbonensis, east of Aquae Sextiae (Air), is placed in the Antonine Itin. between Matavoninm and Tegulata [Tegrinata]. The aame Turris is preserved io that of Tourves, which is written Torrevez and Torvis in some muddle age ducnments. (D'Anville, Notice, g'c.) [G. L.]

TLRR1S. 1. Turets Caesaris, a place in Ninmidia, whence there was a road through Signs to Cirta. (Itin. Ant. p. 34.) Usually identified with Twill, bnt by Lapie with Djebel Guerionu.
2. [Euphkanta Tumms.]
3. Tumis Hinxibalas, a strong fortress in the territory of Carthage, where Hannibal took ship when flying to king Autiochus. (Lis: xxxiii. 44.) Justin culls it the lius urbamm llannibalis ( Exal. 2). It seems to lave been situated between Acholia and Thapsus, at the spot where the Tab. I'rit. places Sallectis.
4. Tumes Thanallane, in Africa Pruper, on tie road trom Tacape to Leptis Magua. (Itin. Aut. He 73, 74.) Now Telemin.
[T. H. D.]

TURRIS LIBYSSONIS (Húpyos ABúvownos, Ptol.: Porto Torres), a town of Surdinia, and apparentiy one of the most considerable in the island. It is sitaated on the N. coast about 15 miles E. of the Gorditanian promontory (the Capo del Falcone), and on the spaciousbay now called Golfo dell' Asinarca. Pliny tells us it was a Roman colony, and we may probably infer from its name that there was previously no town on the spot, but merely a fort or castellium. (Plin. iit. 12, s. 17.) It is noticed also by Ptolemy and in the Itineraries, but without any indication that it was a place of any importance. (Ptol. iii. 3. §5; Itin. Ant. p. 83.) But the ancient remains still existing prove that it minst have been a considerable town under the Roman Empire; and we learn from the inscriptions on ancient milestones that the principal road tbrough the island ran directly from Caralis to Turris, a sufficient proof that the latter was a place much frequented. It was also an episcopal see doring the early part of the middle ages. The existing port at Porto Torres, which is almost wholly artificial, is based in great part on Roman foundations; and there exist also the remains of a temple (which, as we learn from an inscription, was dedicated to Fortune, and restored in the rcign of Philip), of thermae, of a basilica and an aqueduct, as well as a bridge over the adjoining sonall river, still called the Fiume Turritano. The ancient city centioued to be inhabited till the 11 th century, when the greater part of the population migrated to Sassari, about 10 miles inland, and situated on a hill. This is still the second city of the island. (De la Marmora, Joy. en Sardaigne, vol. ii. pp. 363, 4634i2: Smyth's Sardinia, pp. 263-266.) [E.H.B.]

TURRIS STRATO'NIS. [CAESAREIA, p. 470, a.]
TURRUS FLUViUS. [Aquilem.]
TURULIS (Toúpou入ıs, Ptol. ii. 6. § 15), a river in the territory of tbe Edetani in Hispania Tarraconeasis, between the Iberus and the Fretum Herculis. Ukert (ii. pt. i. p. 293) thinks that it is probably identical with the Saetabis of Mela (ii. 6) and the Uduba of Pliny (iii. 3. s. 4), the present Mijares or Myares.
[T. H. D.]
TURUM (Eth. Turinus: Turi), a town of Apulia inentioned only by Pliny, who enumerates the Turini among the towns of that province. (Plin. iii. 11.s. 16.) The name is written Totini in our present text of Pling; but it is probable that we should read Turini, and that the site is marked by the present village of Turi, near Conversano, about 6 miles W. of Polignano. (Romanelli, vol. ii. P. 180.)

TURUNTUS (Toupoûvzos, Ptol. iih. 5. §̧ 2), a river of Earopean Sarmatia which fell into the Northers Ocean, and which, according to Marcian (p. 55), had its source in the Phipaean mountains, but Pwemy seems to place it in Mount Alaunus or Alanus. Mlandert (iv, p. 258) takes it to be the 1 Viadav.
[T. H. D.]
TUREPTIA'NA (Tuupountiava, Ptol. ii. 6. § 23), a town of the Callaici Lucenses in Hispania Tarraconensis.
[T. H. D.]
TUSCA, a river forming the W. boundary of the Roman prevince of Africa, which, after a short course to the N ., fell jato the sea near Tabraca. (Plin. v. ss. 2, 3.)
[T. H. D.]
TUSCA'NIA (Eth. Tuscaniensis: Toscanella). a city of Southern Etruria, situated about 12 miles NE. of Tarquinii. It is mentioned only by Pliny, who enumerates the Tuscanienses among the municipal communities of Etruria, and in the Tabula,
which places it on the Via Clodia, between Blera and Saturnia, but in a manuer that would affird little clue to its true position were it not identilied by the resemblanec of mame with the modern Toscanella. (Pliin, iii. 5. s. 8 ; Tab. Peut.) The name is found in an inscription, which confirms its municipal rank. (Murat. Inscr. P. 32 s .) But it appears to have been in Koman times an obscure towo, and we find no allusion to it as of ancient Etruscao origin. Yet that it was so is rendered probable by the tombs that bave been discorered on the site, and some of which contain sarcophagi nud other relics of considerable interest; though none of these sppear to be of very early date. The tomus have been carefully examined, and the antiquities preserved by a resident antiquary, Sig. Campanari, a circumstance which has given sone celebrity to the name of Toscanella, and led to a very exaggerated estimate of the importance of Tuseanis, which was apparently in ancient times never a place of any consideration. It was prubably daring the period of Etruscan independence a dependency of Tarquinii. The only remains of ancient buildings aro some fragoneuts of reticalated masonry, undoubtedly of the Roman period. (Denuis's E'trurin, vol. i. pp-440-460.)
[E. H. B.]
TUSC' (Tovorot, Ptol, v. 9. § 22), a people of Asiatic Sarmatia between the Caucasus und the Slontes Ceraunii.
[T. H. D.]
TU'sCla. [Etremas]
TUSCULA'NUM. [Tusculdma, p. 1243, b.]
TU'SCULUM (Toúqкоu入ov, 1'tol, iii. 1. § 61;
 673: Eth. Tusculanus, Cic. Balb. 20; Liv. iii. 7, \&c.: Adj. Tusculus, Tib. i. 7. 57; Stat. Silv. iv: 4. 16; Tusculanensis, Cic. Fam. ix. 6: Frascati and Il Tuscolo), a strong and ancient city of Latium, lying on the bills which form a continuation of Mount Albanus on the W. When Dionysins of Halicarnassus (x. 20) places it at a distance of 100 stadia, or $12 \frac{1}{2}$ miles, from Rome, he does not speak with bis accustomed accuracy, since it was 120 stadia, or 15 miles, from that city by the Via Latina. Jusephus (Aut. xviii. 7. : 6) places the imperial villa of Tiberins at Tusculum at 100 statlia from Rome, which, however, lay at some distance to the W. of the town. Festus (s.v. Tuscos) makes Tusculum a diminutive of Tuscus, but there is but slight authority to comect the town with the Etruscans. According ta common tradition, it was founded by Telegonns, the son of Ulysses and Ciree; and hence we find its name paraphrased in the Latin poets is "Telegoni mocnia" (Ov, Fast. iii. 91, iv. 71 ; Prop iii. 30.4 ; Stl. It. xii. 535) and "Circase moet is" (Hor. Epod. i. 30); and the lill on which it stuod called "Telegoni juga parricidae" (Id. Od. iii. 29. 8). "Circaeum dorsum" (Sil. 1t. vii. 691), and "Teleroni jagera" (Stat. Silv. i. 3. 83). Thus Tusculum did not clam so remote an origio as many otber Latin cities; and, as being founded at generation after the Trojan War, Virgil, a learned antiquary, consistently onits all notice of it in liis Aeneid. The autbor of the treatise entitled Origo Gentis Romanae mentions that it was made a dependency or colony of Alba by Latious Silvios (c. 17 § 6). After the destruction of Alba by Tullas Hustilius it appears to have recovered its independence, and to have become a republic nuder the government of a dictator.

But to descend from these remote perinds to the more historical times. In the reign of Tarquinius

Superbus, who courted the friendship of the Latin cities, Octavins Mamilins of Tasculum was the foremost man of all the race, tracing his descent from Ulysses and Circe. Him Tarquin conciliated by the gift of his danghter in marrage, snd thus obtained the powerful alliance of lis family and connections. (Liv. i. 49; Dionys. iv. 45.) The geacalogical pretensions of the gens Manilia are stall to be seen on tbeir coins, which bear on the wherse the head of Dlercary, and on the reverse Tlysses in his travelling dress and with his dog. 'The alliance of Mamilns with Tarquin, however, was the main cause of the Latin Wiar. After lis expubion from Roune, and unsuccessful attempt to regain his crowa by means of the Jitruscans, Tarquin took refuge with his son-in-law at Tusculun (Liv, ii. 15), and by his assistance formed an alliance with the confedrracy of the thirty Latiu cities. (1b, 18). The confederate army took up a position near Lake Regillas, a small sheet of water, now dry, which lay at the foot of the hill on which Tusenlum is seated. This was the scene of the famous battle so fatal to the Latins, in B. C. 497. Namilius, who commanded the Latio army, was killed by the land of Titus Merminins; Targuinius Superbas hisuself, who, though now advanced in years, took a part in the combat, was wounded; and the whole Latin army sustaned an irretrievable defest (ib. 19, 20; Dionys, vi. 4, seq.).

After the peace which casued, the Tusculans remained for a long while the fathful allies of Rome; an atfachment which drew down on their teritory the incursions of the VJsci and Aequi, 13. C. 461 , -160. (Liv, iii. 7. 8.) In B. C. 4.58 , when the Itoman capital was seized by the sabine Appius Herdonius, the Pusculans gave a signal proof of their love and fidelity towards Rome. On the next moraing after the arrival of the news, a large body of them marched to that city and assisted the Itomans in recovering the capitol; an act for which they received the pablic thanks of that people (ib. 18; Dionys. x. 16); and soon afterwards, Lucius Mamilius, the Tusculan dictator was rewarded with the gift of Roman citizenship. (Liv. ib. 29.) In the fillowing year tle Romans hai an opportunity of repaying the obligation. The Aequi had seized the citalel of Tusculum by a nocturnal assault. At that tine, Fabius with a Homan army was encamped before Antinm; but, on hearing of the misfortune of the Tusculans, he immediately broke up lis camp and flew to their assistance. The enterprise, however, was wot of sucb casy execution as the expulsion of Herdonius, and several montlis were spent in combats in the neighbourhoul of Tusculum. At langth the Tusculans succeeded in recapturing their citadel by roducung the Acqui to a state of tamine, whom they dismised after compelling then to pass unarmed muler the yoke. But as they were flyiug homewards the Roman vonsul overtook them on Mount Algidus, and slew them to a man. ( $I b .23$; Dionys. x. 20.)

In the fulluwing year, the Aequi, under the conduct of (iracelas, rawaged the Labican and Tusvulan territories, and encamped on the Algidus with their booty. The Lionsan ambresadors seat to expantulate with then wore treated with insolence and contengt. Then 「it. (Uuinctius Cincinnatus was chusen dictator, who defeated the Aequi, and caused them, with their conmander Gracchus, to pass isnotniniously under the yoke. (liv. is. 2j-2s.) Algilus became the scene of a straggle between the liomans and Aequi on two or three subsequent ocea-
sions, as in B.C. 452 and 447 . (fh. 31, 42.) In the latter battle the Romans sustsined s serere defeat, being obliged to abandon their camp and take refuge in Tusculum. After this, we do not again hear of the Tusculans till B. ©. 416 . At that pernod, the Romans, suspecting the Labicans of having entered into a league with the Aequi, charged the Tusculans to keep a wsteh upon them. These sus. picions were justified in the following year, when the Labicans, in conjunction with the Aequi, ravaged the territory of Tusculum and encamped upon the Algidus. The Roman arzoy despatehed against then was defeated and dispersed, owing to the dtssensions among its chiefo. Many of these, however, tugether with the clite of the army, took refoge at Tusculum; and Q. servilius I'iscus, being chosen dictator, clanged the face of affairs in eight days, by routing the eneny and capturiog Labicnm. (Id. iv. $45-47$.

This steady friendship between Tusculum and Rome, anarked for so many years by the strongest tokens of mutual goodwill. was at lengtl interrapted by an occurrenee which took place in B. c. 379 . In that year the Tusculans, in conjunction with the G.ubinians and Laoicans, accused the Praenestines betore the Roman senate of making ioroads on their lands; but the senate gave no lieed to their conplaints. Next year Camillus, after defeating the Tolscians, was surprised to find a number of Tusculans aunong the prisoners whom he lasd maid, and, still mure so when, on questioning them, he found that they had taken op arms by public consent. These prisoners he introdaced before the Noman senate, in order to prove Low the Tusculans had abanduned the ancient alliance. So war was declared against Tusculum, and the conduct of it entrusted to Cumillus. But the Tuscnlans would not accept this declaration of lastilities, and oppused the Roman arms in a manner that lins scarcely been paralleled before or since. When Camillus entered their territory lie found the peasants engaged in their usual wrocations; provisions of all sorts were offered to his army; the gates of the town were standiag open; and as the legions defiled throngh the streets in all the panoply of war, the citivens within, hkethe countrymen without, were seen intent upon their daily business, the schools resounded witl the hum of pupils, and not the slightest token of loostile prejaration conld be discerned. Then Camillas invited the Tusculan dictator to Rome. When be appeared before the senate in the Curis Hostilia, not only were the existing treaties with Tusculuin confirmed, but the Ronsn franchise nlon was shortly afterwards hestowed upon it, a privilege at that time hut rarely conferred.

It was this last circumstance, however, together with their unshaken fidelity towards Rome, that drew down upon the Tusculans the hatred and vergeance of the Latius; who, in the year 1s. C. 374 , having burnt Satricum, with the exception of the temple of Matuta, directed their amms against Tisculuni. By an anexpected attack, they obtained possession of the city ; but the inlabitants retired to the citadel with their wires and children, and despatched messengers to Rome with news of the invision. An army was sent to their relief, and the Latins in turn became the besieged instead of the besiegers; for whilst the Romans eneompassed the walls of the city, the Tusculans made sortics upan the enemy from the arx. In a short time the liumans took the town by assault and slew all the

Latins. (Ib. 33.) Servias Sulpicins and L. Quinctius, both military tribunes, were the Roman commanders on this occasion: and on some rare gold coins, still extant, of the former fanily, are suen on the obverse the heads of Castor and Pollux, deities peculiarly worshipped at Tusculum (Cic. Div, i. 43; ef. Festos, s.v. Stroppess), and on the reverse the image of a city with the letters TVseve on the gate.

From this period till the time of the great Latin war we have little to record of Tusculum exeept the frastrated attempt of the Veliterni on its territory (Liv. iv. 36) and the horrible devastations committed on it by the Gauls, when in alliance with the Tiburtines, in B. c. 357 . (Id, vii. 11.) After their long attachment to Rome we are totally at a loss to conjecture the motives of the Tusculans in joining the Latin cities against ber. The war which ensued is marked by the weil-known anecdute of Titus Manlius, who, being challenged hy (ieminns Mettius, the commander of the Tusculan cavalry, attacked and killed him, against strict orders to the contrary; for whicb breach of military dil.cipline he was put to death by his father. (Id. viii. 7.) The war ended with the complete sulijngation of the Latins ; and by the famous senatuscomsultum regulating the settlement of Latiom, the Tusculans were treated with great indulgence. Their defection was ascribed to the intrigues of a few, and their right of citizenship was preserved to them. (Ib, 14.) This settlement took place in E. C. 335. In 321 the Tusculans were accused by the tribune, M. Flavins, of having supplied the Veliterni aud Privernates with the means of caurying oo war against Rome. There does not appear to have been any foundation for this charge; it seems to have been a mere calumny; nevertheless the Tusculans, with their wives and children, laving put on mourning habits, went in a body to Rome, and implored the tribes to acquit them of so udions an imputation. This spectacle moved the compassion of the Romans, who, without further inquiry, acquitted them uaanimonsly; with the exception of the tribe Pollia, which voted that the men of Tusculum should be scourged and put to death, and the women and children sold, agrecably to the laws of war. This vote remained indelibly imprinted on the memory of the Tasculans to the very latest period of the Roman Republic; and it was found that scarce one of the tribe Papiria, to which the Tuscalans belonged, ever roted in favonr of a candidate of the tribe Pollia. (Ib. 37.)

Tusculom always remained a municipiom, and some of its families were distinguished at Rome. (1d. vi. 21-26; Orell. Inscr. 775, 1368, 3042.) Among them may be mentioned the gens Mamilia, the Porcia, which produced the two Catos, the Fulvia, Coruncania, Juventia, Fonteia, \&c. (Cic. p. Planc. 8, p. Font. 14; Corn. Nep. Cat. 1; Val. Max. iii. 4. § 6.)

Hannibal appears to have made an unsuccessful attempt apon, or perhaps rather a mere demonstratinn agninst, Tusculum in E. c. 212. (Liv, xxvi. 9 ; cf. Sil. It. xii. 534.) In the civil wars of Marius and Sulla, its territory seems to have been distributed by the latter. (Anct. de Coloniis.) Its walls were also restored, as well as during the wars of Pomper. We have no notices of Tusculum under the Empire. After the war of Justinian and the inroads of the Lombards, Tusculam regained even more than its ancient splendour. For several cen-
turies during the middle ages the counts of Tusculum were supreme in home, and could almost dispose of the papal chair. The aucient city remained entire till near the end of the 12th centory. At that period there were eonstant nars between the Tusculans and Fimans, the former of whoin were supported by the Gernan emperors and protected by the popes. According to liomualdus, archbishop of Salerno (apud Buronium, vol, xix. p. 340), the walls of Tusculum were razed in the pontificate of Alexander 111. in the year 1168; but. perhaps a more probable account liy lichard de S. Germano (ap. M/uratori, Script, t. vii. p. 972) ascrikes the destruction of the city to the pernission of the German emperor in the year 1191.

Towards the end of the Republic and begimning of the Empire, Tnsculum was one of the favourite resorts of the wealthy Romans. Strabo (v. p. 239) describes the hill on which it was built as adorned with many villas nad plautations, eapecially on tho side that lookod towards lome But though the nir was salubrious and the country fine, it does not: appear, like Tibur, to have been a favourite resort of the Roman prets, wor do they speak of it much in their verses. The Anio, with its fall, besides of her natmal benuties, lent a charm to Tibur which wonld bave been sought in vain at Tusculum. Lucullus seems to have been one of the first who bnitt a villa there, which seems to have been on a magnificent scale, but with little arable land attactied to it. (Plin. xviii. 7.s. 1.) His parks and gardens, however, which were adorned with aviaries and fishponds, extended to the Anio, a distance of several miles; whence he was noted in the report of the censors as making more use of the broom than the plough. (Ib, and Varr. R. R. i. 13, iii. 3, seq.; Culumella, i. 4.) On the road towards Rome, in the I'igna Angelotti, is the ruin of a large circular mausoleum, 90 feet in diameter inside, aod very much resembling the comb of Caecilia Metclia on the Via Appia. It evidently belongs to the last perind of the Republic; and Nibby (Ifintorni, p. 344) is inclined to regard it as the sepulehre of Lucullus, mentioned by Plutarch ( $1^{\prime \prime} t, L u c .43$ ), thongh that is commonly identified with a smaller mausoleum between Frascati and the Villa Kufinella. Besides the vinla of Luenllus, we hear of those of Cato, of Cicero and his brother Quintus, of Marcus Brutus, of Q. Hurtensins, of T. Anicius, of Balbus, of Caesar, of L. Crassus, of Q. Metellus, \&c. It would now be vain to seek for the sites of mast of these ; thongh it may perliaps be conjectured that Cato's stood on the hill to the NE. of the town, which seems to have been called Mons Porcius from it, and still bears the name of Monte Porcio. So much interest, however. is attaclied to the villa of Cicero (Tusculanoum), as the favourite retirement in which the probathly composed a great portion of his philosophical works, and expecially the Disputations which take their name from it, that we shall here present the reader with the chief jarticulars that can be collected on the sulject. Respecting tbe site of the villa there have been great disputes, one school of topocraphens seeking it at Grotta Ferrata, another at the Villa Kiufinelln. Both these places lie to the W. nf Tusculum, but the latter nearer to it, and on an eminence, whilst. Grotta Ferratet is in the plain. We have seen from Strabo that the Roman villas lay chiefly on the W. side of the town; and it will be found further on that Cicero's aljoined those of Lucutlus and Gabinius, which were the most splendid and remarkable,
and mast therefore have belonged to those noticed by strabo. The scholiast on llorace (lipod. i. 30) describes Cicero's as being "ad latera superiora" of the Tuscolan hill; and if this anthority may be relied on, it disposes of the claims of Grotta Ferrata. The plural " hatera " also determines us in favour of the W. side of the town, or Villa Rufinella, where the hill lias two ridges. At this spot some raluable remains were discovered in $1 ; 41$, especially a beantiful mosnic, now in the Museo Pio Clementino. The rilla belonged originally to Snlla (Plin. xxii. 6. 8. 6). It was, as we have said, close to that of $\mathrm{Lu}-$ cullus, from which, in neighbourly fashion, Cicero was accustomed to fetch books with his own hand. (I) Fin, iii. 2.) It was likewise near that of the ronsal Gabinius (pro Dom. 24, post Red. 7), which also stoud on the Tusculan hill (in Pis. 21), probably on the site of the Villa Falconieri. In his oration pro Sistio (43), Cicero says that his own villa was a mere cottage in comparison with that of Giabinins, though the latter, when tribune, bad described it as "pictam," in order to excite envy against its owner. Yet from the particulars which we learn from Cicero himself, bis retirement must lave been far from deficient in splendour. The money which he lavished on it and on his villa at Pompeii brought him deeply into debt. (Epp, ad Att. ii. 1.) And in another letter (Ib. iv. 2) he complains that the consuls salued that at Tuscalum at oaly quingentis millibus, or between 4000 l . and $5 \% 00$. This would be indeed a very small sum, to judge by the description of it which we may collect from his own writings. Thus we learn that it contained two gymnasia (/hiv. i. 5), an upper obe called Lyceum, in which, like Aristotle, he was accustomed to walk and dispute in the morniog (Tusc. Disp. ii. 3), and to which a library was attached (Div, ii. 3), and a lower one, with shady walks like Plato's garden, to which he gave the name of the Academy. (Tusc. Disp. ii. 3.) The latter was purhaps on the spot now occupied by the Casino of the rilla Rufinella. Buth were adorned with beantiful statues in marble and bromze. (Ep. ad Att. i. 1, $8,9,10$.) The rilla likewise cootaned a little atrium (atriulum, Ib. i. 10, ad Quint. Fr. iii. 1), a small portico with exedria (ad Fam, vii. 23), a trath (ID. xiv. 20), a covered promerade ("tecta ambulatiuncula," ad Att. xiii. 29), aud an horologium (anl Fam. ari. 18). In the excarations made in the time of Zuzzeri, n sum-dial was discovered bere, atd placed in the Collegio Romano. The villa, like the town and neigbbourhood, was supplied with water by the Aqua Crabra. (De Leg. Agr. iii. 31.) But of nll this magnificence scarce a vestige reinatins, unless we may regard as such the rains now called Scuole di Cicerone, close to the ancient walls. These consist of a long corridor with eight chambers, forming appareatly the ground floor of an upper building, and if they belonged to the villa they were prubably granaries, as there is not the least truce of decoration.

We will now proceed to consider the remnins at Frascati. Strabi (v, p. 239) indicates where we mast look for 'Tusculun, when be describes it as situated on the high ridge connected with Munnt Allanns, and serving to form with it the deep valley which stretches out towards Mount Algidus. This ridice was known by the name of the Tusculani Coulles. We have already seen that Tusculum was composed of two distinct parts, the town itself and the arx or citadel, which was isolated from it, and
sented on a higher point; so elevated, indeed, that when the Aequi bad possession of it, as before narrated, they conld descry the Poman army defiling out of the gates of Rome. (Dinnys, x, 20.) It was indeed on the very nut, or pinnacle, of the ridge, a point isolated by eliffs of great elevation, and approachable only by a very steep ascent. According to Sir W. Gell (Topogr, gce p. 429) it is 2079 French feet nbove the level of the sea. Here a few traces of the walls of the citadel remain, from which, and from the shape of the rock on which the town stond, we may see that it formed an irregular oblong, about 2700 feet in circamference. There most have been a gate towards the town, where the ascent is less steep; and there are slso vestiges of another gate on the E. side, towards La Molara, and of a rond which ran into the Via Latina. Under the rock are caves, which probably served for sepulchres. The city lay immediately under the arx, on the W. side. Its form was a darrow oblong approaching to a triangle, about 3000 feet in length, and varying in breadth from ahout $? 0000$ to 500 feet. Thus it is represented of a triangular slape on the cains of the gens Sulpicia. Sonue vestiges of the walls remain, especially on the N . and S , sides. Of these the nncient parts consist of large qualrilateral pieces of local tufo, some of them being 4 to 5 feet long. They are repaired in places with opas incertum, of the age of Sulla, nnd with opus reticulatum. Including the arx, Tusculum was about $1 \frac{1}{2}$ mile in circunference. Between the town and the citadel is a large quadrilateral piscina, 86 feet long hy $67_{2}^{t}$ broad, divided into three compartments, probably intended to collect the rain water, und to serve as a public wasbingplace. One of the theatres lies immediately under this cistern, and is more perfect than any in the vicinity of Fome. The scena, indeed is partly destroyed and cuvered with earth; hat the beuches or rows of seats in the cavea, of which there are nine, are still mearly eutire, as well as the steps cut in them for the purpose of commodious descent. There are three flights of these steps, which consequently divide the cavea into four compartments, or cumai. The spectators faced the W., and thas enjoyed the magniticent prospect over the Allan valley and the plains of Latium, with Rome and the sea in the distance. Abeken (Mittel-Italien, p. 200), considers this theatre to belong to the early times of the Empire. Sir W. Gell, on the other hand, prononnces it to be earlier. (Topogr. of Rome, p. 429.) Near this edafice were discovered in 1818, by Lucien Buonaparte, the beautiful bronze statue of Apollo and thrise of the two Rutiliae. The last are now in the Vatican, in the corridor of the M/useo Chiaramonti. At the back of this strnctore are restiges of another theatre, or odeam; and at its side two parallel walls, which bounded the street leading to the citadel. On the W. of the theatre is an ancient mad in good preservation, leading to one of the gates of the city, where it is joined by anotlier road. Close to the walls near the piscina is an ancient cistern, and at its side a small fomntnin with min inseription; a little further is a Roman anilestone, recording the distance of 15 miles. Besides these objects, there are also remains of a colombarium and of an auphitheatre, but the latter is small and not of high antiquity. Many fragments of architecture of an extremely ancient style are strewed around. Within the walls of the tuwn, in what appears to have been the principal street, several inscriptions
still remain, the cliief of which is one on a kind of pelestal, recording that the object to which it belonged was sacred to Jupiter and Liberty. Other inscriptions found at Tusculum are preserved in the Silla Rufinello. One of them relntes to N1. Fulvius Nobilior, the conqueror of Actolia; another to the poet Diphilos, mentioned by Cicere in his letters to Atticus (ii. 19).

Near the hermitage at Camaldeli was discovered in 1667 a very ancient tomb of the Furii, as recorded by Falconieri, in his Inscrr. Athleticoe, p. 143, seq. It was cut in the rock, and in the middie of it was a sarcopbagus, about 5 feet Iong, with a pedimentshaped cover. Round it were twelve ums placed in loculi, or coffins. The inscriptions on these arns were in so ancient a character that it bore a great resemhlarice to the Etruscan and Pelasgic. The form of the P resembled that in the sepulchral inscriptions of the Scipios, as well as that of the 2. The diphthong OV was used for V , and P for F . The inscriptions on the urns related to the Furii, that on the sarcophagus to Luc. Turpilius. There were also fragments of fictile vases, commonly called Etruscan, and of an elegant cornice of terra cotta, painted with various colours. (Nibby, Dintorri, iii. p. 360.)

We sball only add that the ager Tusculanus, though now but scantily supplied with water, formerly contributed to furnish Rome with that element by means of the Aqua Tepula and Aqua Virgo. (Front. Aq. 8, seq.)

Respecting Tusculnm the reader may consolt Cania, Descrizione dell antico Tusculo; Nibby, Dintorni di Roma, vol. iii.; Gell, Topography of Rome and its Vicinity, ed. Bunbury; Ateken, Mit-tel-Italien; Compagnoni, Mem. istoriche dell' antico Tusculo. On Cicerv's villa, Cardoni, De Tuscul. If. T. Ciceronis ; Zuzzeri, Sopra de una antica Filla scopertasul Dorso del Tusculo. [T. H. D.]

TUSCUM MARE. [Tyrrhenum Make.]
TUTA'TIO, a place in Noricum of uncertain site (It. Ant. p. 277 ; Tab. Peut., where it is catled Tutastio.)
[L. S.]
TU'THOA (Tou日óa), a river of western Arcadia, flowing into the Ladon, on the confines of Thelpusa and Heraea. It is now called Languidhia, and joins the Ladon opposite to the small village of Renesi. (Paus, viii. 25.§ 12 ; Leake, Morea, vol. ii. p. 95 , Peloponnesiaca, p. 223.)

TU'TLA, a small stream in the veighbourhood of Rome, mentioned only by Livy and Silius Italicus, who inform us that Hannibal encamped on its banks, when he was commencing his retreat from liefore the walls of Rome. (Liv. ssvi. 11; Sil. ltah. siii. 5.) Livy places it 6 miles from the city, and it is probable that it was on the Salarian Way, by which Hannibal subsequently commenced his retreat: in this case it may probably be the stream now called the Fiume di Conca, which crosses that rond between 6 and 7 miles from Rome, and has been aupposed by Gell and Nibby to be the Allia. [Alela.] Silius Italicus expressly tells us that it was a very small stream, and little known to fame. The name is written Turia in many editions of that poet, but it appears that the best MSS. both of Silius and of Livy have the form Tutia. [E. Il. B.]

TU'TIA (Tourtia, Plut. Sert. 19), a place in the territory of the Edetani in Hispania Tarraconensis not far from Sucro, the sceve of a battle between Pompey and Serterius (Plut. l. c.; Florus, iii. 22.) It is thought to be the modern Tous. But perhaps
the cenjecture of Ukert (ii. pt. i. p. 413) is correct that in both these passages we shonld read Turia.
[T. H. D.]
TUTICLM. [Eques Tutices.]
TUTZIS (It. Anton. p. 162), 3 small furtified town in Aethopia, aitaated 12 milea N . of Tachompse, ypon the western side of the Nite. The ruins of Tutzis are supposed to be near, and NW. of the present village of Gyrbeh. (Belzoni, Travels, vel. i. p. 112.)
[W. B. D.]
TY'ANA ( $\tau$ à Túave: Eth. Tuaveís or Tvaplivs), also called Thyana or Thiana, and originally Thoana, from Thcas, a Thracian king, who was believed to have pursued Orestes and Pylades thus far, and to have founded the town (Arrian, Peripl. P. E. p. 6; Steph. B. s. e.). Report said that it was built, like Zela in Pontus, on a causeway of Semiramis; bnt it is certain that it was situated in Cappudocia at the foot of Mount Taurus, near the Cilician gates, and on a small tributary of the Lamus (Strab. sii. p. 537, xiii. p. 587.) It stood on the bighroad to Cilicia and Syria at a distance of 300 stadia from Cybistra, and 400 stadia (according to the Peut. Table 73 miles) from Jlazaca (Strab. l. c. ; Ptol. v. 6. § 18 ; comp. Plin. vi. 3 ; Il. Ant. p. 145). Its situation on tbat road and close to so important a pass mnst have rendered Tyana a place of great consequence, buth in a cornmercial and a military point of view. The plain aronnd it, moreover, was extensive and fertile, and the whole district received from the town of Tyana the name of Tyanitis (Tvañ̈ts, Strah. l.c.). From its coins we learn that in the reign of Carncalla the city became a Reman colony; afterwards, having fur a time belonged to the empire of Palmyra, it was conquered by Anrelian, in A.D. 272 (Vopisc. Aurel. 22, foli.), and Valens raised it to the rank of the capital of Cappadocia Secunda (Basil. Magn. Epist. 74, 75; Hierocl. p. 700 ; Malais, Chron.; Not. Imp.) Its capture by the Turks is related by Cedrenus ( p . 47i). Tyana is celebrated in history as the nativo place of the famous impostor Apollonius, of whons we have a detailed biography by lhilostratus. In the ricinity of the town there was a teniple of Zcuss on the borders of a lake in a marslyy plain. The water of the lake itself was cold, but a but well, sacred to Zeus, issned from it (Pbilostr. I'it. Apoll. i. 4; Amm. Marc. $x$ xiii. 6 ; Aristot. Mir. Ausc. 163.) Tbis well was called Asmabueon, and from it Zeus himself was surnamed Asnablacos. These details abont the locality of Tyana have lext in modern times to the discovery of the true site of the aucient city. It was fornierly believed that Kara Hissar marked the site of Tyana; for in that district many ruins exist, and its ir habitants still maintain that their town once wus the capital of Cappradocia. But this place is too far north to be identified with Tyana; and Ilamilton (Researches, ii. p. 302, full.) has shown most satisfactorily, what others had conjectured befure him, that the true site of Tyana is at a place now called Kis Ilissur, sonth-west of Nigdeh, and between this place and Erehli. The ruins of Tyana are considerable, but the most conspicuous is an aqueduct of granite, extending seven or cight miles to the foot of the mountains. There are also massy foundations of several large buildings, shafts, pillars, and one handsome column still standing. Two miles south of these ruins, the hot spring also still bubbles forth in a culd swamp or lake. (l.eake, Asia Minor, 61; Eckhel, iii. p. 195; Sestini, p. 60.) [L. S.]

TYBlACAE (Tvsiakai, I'tol, vi. 14. § 11), a
people of Scythia intra Imaum, on the banks of the 1tha.
[T. H. D.]
TYDE [TUDE.]
TYLE (TúN $\eta$, Polyb. iv. 46), a town of Thrace, on the coast of the Euxine, where the Gauls estahishel a seat of government (Barinetov). and which Reichard identifies with Killus. Steph. B. (p. 670) calls it Túass, and places it on the Hamus. [J. R.]

TYLINsils, a town of Crete (Plin. iv. 20), the position of which can only be conjectured. On its ancient coins are frond on the reverse a young man holding in lis right hand the head of an ibex or wild goat, and in his left a bow. These types on the coins of Tylissus led the most distinguished marmismatist of the last century (Eekhel, vol. ii. p. 321) to fix its situation somewhere between Cydonia and Elyrus, the bow being common on the coins of the one, and the iber's head on those of the other, of these two cities. Höck (Kreto, vol, j. p. 433) and Torres 1. libera (Periplus Covtae, p. 324) adopt this suggeation of Eckhel, and place Tylissus on the S. coast at the W. extremity of the island near the modern Silino-Kastili. (Pashley, Travels, vol. i. p. 162.)
[E. B. J.]
TYLU'S or TYRUS (TúNos, Ptol. vi. 7. § 47 ; Túpos, Strab. xvi. p. 766 ; Steph. 1. s. थ.), an island in the Persian gulf, off the coust of Arabia. It has been atready mentioned that according to some tralitions, this island was the original seat of the Phoeoicians, who named the city of Tyre after it when they hat settled on the cuasts of the Mediterranean. [Phoenicla, p. 607.] Pliny describes the joland as abounding in pearls. (Plin. vi. 28, s. 32 , sii. 10. s. 21, svi. 41. s, 80; Arriam, Anab. vii. 20 ; Theopbr. Hist. Plunt. iv. 9. v. 6)
[T. H. D.]
TYMANDU'S (T'úuavõas: Eth. Tvんavסףvós), a place in Phrygia, between Philonelium and Sozopolis. (Conc. Chalced. JT, 244, and 247: in this passage the reading Mavonywn modes is corrut; IFirond. 1. 673, where the name is miswritten Túpavopos.) It is passible that Tymandas may be the saune as the Dywas mentioned by livy (xxxyiii. 15), for which some MSS, have Dimas or $\mathrm{D}_{1}$ nias.
[L. S.]
TYMBRES, a tibntary of the Samgrins, in the north of Phrygia (Liv, xxxviii. 18), is in all prohability the same river as the one called by Pliny (vi. 1) Tembrngius, which joined the Sangarius, as Liry says, on the borders of Mhrygia ami Galatia, and. flowing in the plain of Dorylaeum, separated I'hrgeia Epictetus from Ploryeia Solutaris. It semos alco to be the same river as the Thyaris and Bathys mentioned in Buzatine writers. (Cumamus, v. I. p. 111 : Richter, IV allfaherten, p. 54.2, fill.) [L. S.]

TYMPIIAEA, TYMH'ILAEL. [TYMPHE.]
TYMPHE (Tuифй), a momutain un the confines of Macerlonia, Epeirns, and Thessaly, a part of the range of limilus, whirh gave its name to the district TvMriden (Tupqaia), and to the people, the Tramamat (Tvupaiou, Steph. B. s. v.). As it is stated that the river Antachus rose in Mt. Tymphe, and that Accininn was a tuwn of the Tymplaci (Strab. rii. pp, 325,327 ). . It. Tyupho may be identified with the summuts near Mit aro, and the Tymphaci may be reganted as the inhalitants of the whole of the npper valley of the Peneins from Metsore or Kithrbikik. The name is written in same editions of Straho, stymphe and stymblami, mul the fom Stymphaes also occurs in Arian (i. 7 ); but the orthograply withont the $s$ is perlups to be preferred. The
question whether Stymphatis or Stymphnlia is the same district as Tymphae: has been diseussed elsewhere. [stympilinis.] Pliny in one passage calls the Tymphaei an Aetolian people (iv. 2. 5. 3), and in another a Macelomian (iv. 10, s, 17), while Stephanns B. describes the mountain is Thesprotim, and Straloo (l. c.) the people as an E.pirotic race.

Stephanus B. mentions a town Tymphasa, which is prohably the same place called Trampya (Tpau$\pi \dot{v} a)$ by others, where Polysperchon, who was a native of this district, murdered Hercules, the soll of Alexander the Gieat. (J.ycophr. 795; Diodor. xx. 28, with Wesseling's note ; Steph. B. s. v. Tpaumia.) (Leake, Northern Gircece, vol. i. p. 422, vol. ii. pp. 275, 276.)

TYMPHRESTUS. [Pindes.]
TY'NDARIS (Tunסapis, Strab.; Tuvóápsov, Ptol. Eth. Turôapíqns, Tyndaritanus: Tivdaro), a city on the N. ceast of Sicily, between Mylae (Milazzo) and Agatbyrna. It was situated on a bold and lofty bill standing out as a promontory into the spacions bay bounded by the Punta di Mitazzo on the E., and the Capo Calavit on the W., and was distant according to the lineraries 36 miles from Messama. (It. Ant. p. 90 ; Tab. Peut.) It was a Greek city, and one of the latest of all the cities in Sieily that could claim a purely Greek origin, having been founded by the elder Dionysius in b. c 39.5. The erigioal settlers were the remains of tbe Messenian exiles, who had been drixen from Naupactns, Zacynthus, and the Peloponnese by the Spastans after the close of the Peloponnesian War. These had at first been established by Dionysius at Messann, when he repeopled that city [Messinsa] ; hut the spartans having taken umbrage at this, be transferred them to the site of Tyndaris, which had previously been included in the territory of Abaeaenurn. The colonists themselves gave to their new city the name of Tyndaris, from their native divinities, the Tyndaridae or Dioscuri, and reatily admitting fresb citizens from other quarters, sums raived their whule popnlation to the number of 5000 citizens. (Diod. xiv, ت8.) The new city thus rose at once to be a place of considerable importance, It is next mentioned in R. c. 344, when it was ene of the first cities that declared in favour of Timoleon after his landing in Sicily. (Id. xvi, 69.) At a later periol we find it mentiened as espousing the canse of Hicron, and supporting him during his war against the Mamertines, B. c. 269. On that occasion he rested his position upon Tyndaris on the left, and on Tauromenium on the right. (Diokl. xxii. E.rc. If. p. 499.) Indeed the strung position of Tyndaris renderel it in a strategic point of view as important it post upon the Tyrrhenian, as Tauromenium was upon the Sicilian sea, and lence we finl it frequently mentiuned in sulsequent war*. In the First I'unic War it was at first dependent upou Carthage; and thongh the citizens, alarmed at the progress of the liman arms, were at one time on the puint of ruvolting to lame, they were restrained by the Carthagimians, who carried off all the chiof citizens as homtages. (Diod. xxiii. p. 502.) In is. c. 257, a sen-fight took place off Tyndaris, between that eity and the Liparaem islands, in which a Roman fleet under C. Atilins obtained somo aulvantage over the Carthaginian dlect, but withont any decisive result. (1'oly. i. 25 ; Zonar. viii. 12.) The Roman fleet is described on that occasion as tonching at the promontory of Tyndaris, but the city hail unt yet tallen into their bands, and it was not thll after the fall of D'anormus, in B. C. 254, that

Tyndaris expelled the Carthaginian garmson, amb joined the Roman alliance. (Diod. xxiii. p, 505.) We bear but little of Tyndaris under the Roman government, but it appears to have been a flourishing and corssiderable city. Cicero calls it "nobilissima civitas" (Verr. iii. 43), and we learn from him that the inhabitmnts had displayed their zeal and tidelity towards the Romans upon many cecusions. Among others they supplied naval furces to the armanent of Seipio Airieanus the Younger, a servico for which be requited them by restoring them a statue of Mercury which bud been carried off hy the Carthaginiians, and which continued an object of great veneration in the city, till it was again enrried off by the rapacious Verres. (Cic. Verr. iv. 39-42, v. 47.) Tyndaris was also one of seventeen cities which had been selected by thie Runan senate, apparently as an honorary distiaction, to contribate to certain offerings to the temple of Venus at Eryx. (Ib, v, 47 ; Zumpt, ad Wec.; Diod. iv. 83.) In other respects it had no peculiar privileges, and was in the condition of an ordinary muaicipal town, with its own magistrates, local senate, \&c., bat was cortainly in the time of Cicero one of the most cunsiderable places in the island. It, however, suffered severely from the exactions of Verres (Cic. J erv. ll. cc.), sud the inhabitants, to reveage themselves on their oppressor, publiely demolished his statue as soon as he bad quitted the island. (Ib. ii. 66.)

Tyndaris again bore a considerable part in the war between Sextus Pompeius and Octavian (B. c. 36). It was one of the points occupied and fortified by the former, when preparing for the defence of the Sicilian straits, but was taken by Agrippa after his naval victory at Mylac, and became one of his chief posts, from which he carried on offensive warfare against Pompey. (Appian, B. C. v. 105, 109, 116.) Subsequently to this we hear nothing more of Tyndaris in histery ; but there is no doubt of its having continued to subsist throughont the period of the Roman Empire. Strabo speaks of it as one of the places on the N. coast of Sicily which, in his time, still deserved the name of cities; and Pliny gives it tbe title of a Colonis. It is prohable that it received a culony under Augustus, rs we fiud it bearing in an inscription the titles of "Colonia Augusta Tyndaritanormu." (Strab. vi. p. 272 ; Plin. ini. 8. s. 14 ; Ptol. iii. 4. § 2 ; Orell. Inscr. 955.) Pliny indeed meutions a great calamity which the city bad sustained, when (he tells us) bulf of it was swallowed up by the sea, probably from an eatthquake haviog caused the fall of part of the hill on which it stands, but we have no clue to the date of this event; (Plin. ii. 92. s. 94.) The Itineraries attest the existence of Tyndaris, apparently still as a considerable place, in the fourth ceotury. (Itin. dut. pp. 90, 93; Tab. I'eut.)

The site of Tyndaris is new wholly deserted, but the name is retained hy a church, which crowns the most elevated point of the hill on which the city formerly stood, and is still ealled the Madonna di Tindaro. It is 650 feet above the sca-level, and forms a conspicnous landmark to sailors. Ceosiderable ruins of the ancient city are also visible. It ocenpied the whole platean or summit of the hill, and the remains of the ancient walls may be traced, st intervals, all round the brew of the cliffs, escept in one part, facing the sea, where the cliff is now quite precipitous. It is not improbable that it is here that a part of the cliff fell in, in the matiner recorded by I'liny (ii. 92. s. 94). Two gates of the city are also
still distinetly to be tracel. The chief monuments, of which the ruias are still extant within the circoit of the walls, are: the theatre, of thich the romains are in imperfect condition, but sufficient toshow that it was not of large size, and apparently of Romaun construction, or at least, like that of Taurumenium, rebuilt in Roman times upon the Greek fundations; a large edifice with two handsome stone arcbes, commonly callod a Gymnasium, but the real purpuse of which is very difficnlt to determino; several other edifices of Romuan times, but of wholly uncertain character, a mosaic prvement, and some Roman tombs. (Serra di Falco, Antichitáa della Sicilia, vole v. part vi.; Smyth's Sicily, p. 101: Hoare's Clussical Tuur, vul. ii. p. $217, \& \mathrm{c}$. ) Numerons inscriptions, fragments of sculpture, and arehitecturul decorations, as well as coius, vases, \&o. bave also been discovered ou the site.
[E. 11 H.$]$
TYNDIS (Túw 15, Ptol. vii. 1. § 16), a river of India intra Gaugem, which flowed into the Bay of Bengal. There is great doubt which of two rivers, the Munades (Mahanaida) or the Muesolus (Godavery), represents this stream. According to Banaert it was the suuthern branch of the furmer river (r. I. p. 173). But, on the whole, it is more likely that it is another name for the Godavery.
[V.]
TYNIDRUMENSE OH'P. [ThUNUDRomos.]
TMNNA (Tivva), a place in Catuonia or the southern part of Cappadocia, in the aeighbourbond of Fanstinopolis, is mentioned only by l'olenny (v. 7. § 7).
[L. S.]
TYPAEUS, [OLYMPL.]
TYPA'NEAE (Totavéas, Polyb. Steph. B, Tou-
 a torn of Triphylia in Elis, mentionod by Strabo along with Hypana, It was taken by Philip in the Social War. It was sitnated in the mountains in the interior of the country, but its exact site is uncertaid. Leake supposes it to bo represented by the ruins near Platian $\dot{\alpha}$; but Boblaye supposes these to be the remains of Aepy or Aepinm [Akry], and that Typanese stood on the hill of Makrysia. (Strab. viii. P. 343 ; Polyb. iv. 7i-79; Steph. B. s. $v$; Ptol. iii. 16. § 18 ; Leake, Morea, vol. ii. p. 82; Bublaye, Recherches, jc. p. 133; Ross, Reisen im Peluponnes, p. 105 ; Curtius, Peloponnesus, vol. ii. p. 89.)

TYRA'CIA or TYRACl'NA (Topakivar. Steph. B : Eth. Tyraciensis, Illin.), a city of Sicily, of which very littie is knowu. It is noticed by Stephanus as "a small but flourishing city;" and the Tyracienses are meotioned by Pliny anong the municipal commanitics of the interior of Sicily. (Steph. B. s. v.; Mlin. iii. 8. s. 14.) it is doubtrul whether the "Tyracinus, prineeps civitatis," neentioned by Cicero (1-err. iii. 56) is a citizen of Tyracia or one of Helorus who bore the proper name of Tyraciaus. In either case the name was probably derived from the city: but though the existence of this is clearly extablished, we are wholly without nuy clene to its position.
Soveral writers would identify the Tnisacis (Tpivania) of Dhodorus (xii. 29), which that writor deseribes as having been one of the cluef turwos of the Siculi, until it was taken and deatroyed by the Syracusans in ह. ©. 439 , with the Tyracinae of Siephanus and Tyracis of Pliny. Buth names being otherwise uriknown, the readings are in both cased macertain: but Drodorus scems to represent Trinacia as having been totally destroyed, which would sufficiently account for its not being agoin

## TYRALLIS.

mentioned in listory: and there is no other reason for assuming the tho places to be identical. (Clnver. Sicil. p. 38s; llolsten Not. ad Steph. B. s. v.; Werseling, ad Diod. l. c.)
[E. 11. B.]
TYRALLIS (Tupa入入is), a place in Cappadocia, on the sonth-west of Cabassus, on the river Cydnus. (Ptol. v. 7. § 7.)
[L. S.]
TYRAMBAE (TvpáuBai, Ptol. v. 9. § 17), a people of Asiatic Sarmatia, whase chief city was Tyrambe (Tvpáubŋ, ib. § 4 \&c.; Strab. xi. p. 491), in the aeigboorlicoll of the river Rhombites Minor.
[T, H. D.]
TYRANGI'TAE (TvparyEîtal, Tupayүє̇тal, or Tupeүє́тal, Strab. vii. p. 2s9, \&c.; Ptol. iii. 5. § 25), literally, the Getae of the Tyras, an immizrant tribe of European Samatia dwelling E. of the river Tyras, near the Marpii and Tagri, and, accorling to I'tolemy, the nor:hern neighbours of Lower Muenin. 1'liny (v. 12. s. 26) calls them, with more correct orthorrapliy, Tyragetae, and reptesents them as dwelling on a large island in the 'lyras. [T. H.D.]

TYIIANNOBOAS (TupavvoBoas), an emporium on the western coast of Bengal between Mandagara and Byzantium, noticed by the author of the Periplus (p.30.) It cannut now be identified with any place.
[ V.$]$
TYRAS (8 Túpas, Strah. ii. p. 107), one of the principal rivers of European Sarmatia. According to Herodutus (iv. 51) it ruse in a large lake, whilst Itolemy (iii. 5. § $17,8, \$ 1$, \&ec.) phaces its sources in Mount Carpates, and Strabo (l. c) says that they are unknown. The account of llermlotus, however, is correct, as it rises in a lake in Gallicia. (Georgii, Alte-Geogr: p. 269.) It ran in an easterly direction parallel with the Ister, and formed part of the boundary between Dacia and Sarmatia. It fell into the Pontus Fusians to the NE. of the month of the Ister; the distance between them being, according to Strabo, 900 stadia (Strab. vil. p. 305, zeq.), and. according to Pliny (iv. 12. s. 26), 130 miles (trom the Psendostoma). Scyumus ( $F i+51$ ) describes it as of easy navigation, and abonuling in fish. Ovid (ex Pont. iv. 10.50) speaks of its rapid course. At a later period it obtaised the name of Danastris or Danastus (Amm. Mare. sxxi. 3. §§ 3; Jornand, fiet. 5; Const. Purplayr. de Adm. $\operatorname{Imp}$, 8), whence its mudern name of Dniester (Veister), though the Turks still call it Tural. (Cf. Merod, iv. 11,47, 82; seybax. p. 29; S:rab. i. 1. 14; Mela, u. 1, \&e.; also Schaffaik, Slar. Alterth. i. p. 505.) The form Tupes is sometimes found. (Steph. B. p. 671;

TYRAS (Túpas, I'tol. iii. 10. §16), a town of European Sarmatia, situated at the month of the uree just deseribed. (Ilerod. iv. 51 ; Mela, ii. 1.) It was originaliy a Milesian colony (Scymm. Fr. 5s); Anon. Peripl. P. Eux. p. 9); although Ammianus Alarcellinus ( $5 x i i .8, \S+1$ ), apparently from the simularity of the name, which he writes "Tyros," ascribes its foundation to the l'hoenicians from Tyre. 1liny (iv. 12. s. 2ti ; of. Steph. B. p. 671) identifies it with an older town named Opinimsa ("gelidis pollens Ophiusa venenis," Val. Flace. vi. S4). Ptolemy, however (I.c.), maknes them two ditlerent towns; and places Ophiusa somewhat more N., and towards the interior. Scylas knows only Ophinsa, whilst the tater writers, on the othor hand, knew only Tyras. (Cf. Neunann, Die Hillenen im skythenlunde, p. 357 , seq.) It probiblly laty on the site of the present Ackermann. (Clarke, Travels. ii. p. 12.1; Koll, Reisen in Sudrussland, i. I67.) [T. II. 1).]

## TYRUS.

TYRIAEUM (Tvpıâov: Eth. Tyrienses), a town of Lycaonia, which according to Xenophon (Anab. i. 2. § 24) was 20 parasangs west of lconium, and according to Strabe (xiv. p. 66.3) on the eastern trontier of Phrygia, and probably on the road from Synnada to Laoliceia, and between the latter and Philomelium. Near this town Cyrus the Younger reviewed his forces when he marched against his brother. (Comp. Plin. v. 25 ; Hierocl. p. 672 ; and Conc. Chalced. p. 401, where the narne is written Tupaiov.) It is possible that Tyriacum may be the same town as the Totarion or Tetradion of Ptolemy (v. 4. § 10), the Tyrasion in the Conc. Chalced. ( p .669 ), and the Tyganion of Anna Comnena (xv. 7,13). Its site seems to be marked by the modern Ilgun or Ilghun. (Hamilton, Researches, ii. p. 200; Kiepert in Franz, Fuinf Inschriflen, p. 36.) [L. S.]

TYRICTACA (Tvрıктák $\eta$ or Twpıták $\eta$, Ptol. iii. 6. § 4). a town in the Chersonesns Taurica. (Cf. Anon. Peripl. P. Fux. p. 4., where it is written Tupıaтd́kๆ.) Dubois de Montperrenx identities it with some ruins found on lake Thurbach. (Ioy. autour du Caucase, v. p. 247.) [T. H. D.]

TYRissa (Tupıara, Ptol. iii. 13. § 39 : Eth. Tyrissaeus, Plin. iv. 10. s. 17), a town of Emathia in Macedonia, placed by Ptolemy next to Europus.

TYRI"TAE (Tvpīal, Herol. iv. 51), certain Greeks settled at the mouth of the Tyras, probably Mllesians who bnile the town of that name. [T. H. D.] TMIRHE'NIA, TYRRHENI. [Emmerla.]
 (os), was the name given in ancient times to the part of the Mediterrancan sea which adjoins the W. coast of ltaly. It is evident from the name itself that it was nriginally employed by the Greeks, who umrersally called the people of Etruria Tyrrhenians, and was merely adopted from them by the Romans. The latter perple indeed frequently used the terms Tiscum Mare (Liv. v. 33; Mel. ii. 4. § 9), but still more otten designated the sea on the W . of Italy simply as " the lower sea," Maze laferbem, just as they terned the Adriatic the theper sea" or Mare Supfrus. (Mel. ii. 4. § 1 ; Ilin. iii. 5. s. 10; Liv. l. c.) The name of Tyrrhemm Mare was indeed in all probability never in use among the Romans, otherwise than as a mere geographical term; but with the Greeks it was certainly the halitnal designation of that portion of the Mediterranean which extended from the coast of Liguria to the N. coast of Sicily, and from the mainland of Italy to the islands of Sardinia and Corsica on the W: (I'olyb. i. 10, 14, Sc.; Strab. ii. p. 122, v. P. 211, \&c. ; Dionys. Per. 83; Scyl. §s 15, 17; Agathem. in. 14.) The period at which it came into use is uncertain; it is not fonnd in Herodotus or Thucydides, and Scylax is the earliest author now estant by whom the name is mentioned. [E. II. B.]

TYRRHINE. [OgyRIs.]
TYRSUS, [THYRSEs.]
TYRUS (Túpos, Herol. ii. 44, \&c. : Eth. Típios, Tyrius), the most celebrated and impurtant city of Phoenicia. By the Israelites it was called Tror (Josh. xix. 29, \&c.), which means a rock but by the Tyrians themselves. Sor or Sur (Throdoret. in Fisek, xxvi.), which appellation it still retains. For the initial letter $t$ was anbstitutel by the (irceks, and from them sdopted by the Romans; but the latter also used the form Sara or Sarm, saill to be derived from the Phoenician name of the purple fish; whence also the adjective Surra-

## TYRUS.

nus. (Plaut. Truc. 2, 6, 58; Virg. Georg. ii. 506; Juv. x. 38; Gell. xiv. 6, \&c.) The former of these etymolegies is the preferable one. (Shaw, Tracels, ii. p. 31.) The question of the origio of Tyre has been already discussed, its commerce, mamufactures and colonies described, and the principal events of its history narrated at some length [Phoenicia, p. 608 , seq.], and this article will therefore be more particularly devoted to the topography, and to what may be called the material history, of the city.

Strabo (xri. p. 756) places Tyre at a distance of 200 stadia from Silon, which pretty nearly agrees with the distance of 24 miles arsigned by the Itin. Ant. (p. 149) and the Tab. I'euting. It was built partly on an island and partly on the maimland. According to Pliny (v. 19. s. 17) the island was 22 stadia, or $2 \frac{\mathrm{~s}}{4}$ miles, in circnuference, and was origiaally separated from the continent by a deep channel $\frac{7}{10}$ ths of a mile in breadth. In his time, however, as well as leng previously (cf. Strab. l. c.), it was connected with the mainland by an isthmus formed by the mole or causeway constracted hy Alexander when he was besieging Tyre, and by subsequent accumulations of sand. Some authorities state the channel to have been only 3 stadia (Scylax, p. 42) or 4 stadia broad (Diodor. Sic. xxii. 60 Curt. iv. 2); and Arrian (Anab. ii, 18 ) describes it as shallow near the contineut and only 6 fathoms in depth at its deepest part near the island. The accretion of the isthmus must have been considerable in the course of ages. William of Tyre describes it in the time of the Crusades as a bow-shot acruss (xiii. 4); the Pere Roger makes it only 50 paces (Terre Sainte, p. 41); but at present it is ahont $\frac{1}{3}$ of a mile broad at its uarrorrest part, near the island.

That part of the city which lay on the mainland was called Palae-Tyrus, or Old Tyre; an appellation from which we necessarily infer that it existed previously to the city on the island; and this inference is confirmed by Ezekiel's prophetical description of the siege of Tyre by Nebuchadnezzar, king of Babylon, the particulars of which are not suitable to an island city. Palae-Tyrus extended along the shore from the river Leontes on the N ., to the fountain of Ras-el-Ain on the S., a space of 7 miles; which, however, must have included the suburbs. When Strabo says (xvi. p. 758) that Palae-Tyrus was 30 stadia, or 33 miles, distant from Tyre, he is probably considering the southern estremity of the former. Pliny ( $l, c$.) assigns a circumference of 19 miles to the two cities. The plain in which Palae-Tyrus was situated was one of the broadest and most fertile in Phoenicia. The fountain above mentioned afforded a constant supply of pure spring water, which was received into an octagon reservoir, 60 feet in diameter and 18 feet deep. Into this reservoir the water gushes to within 3 feet of the top. (Maundrell, Journey, p. 67.) Heace it was distributed through the town by means of an aquedact, all trace of which has now disappeared (Robinson, Palest. iii. p. 684.) The unusual contrast between the bustle of a great seaport and the more tranquil operations of rural life in the fertile fields which surrounded the town, presented a striking scene which is deseribed with much felicity in the Dionysiaca of Nomnus $(40,327$, sqq.).

The island on which the new city was built is the largest rock of a belt that runs along this part of the coast. We have no means of deterninitg the origin of the island city; but it must of course latre
arisen in the period between Nebuchadnezzar and Alexander the Great. The alterations wlich the coast has undergone at this part reader it difficult to deternine the original size of the ioland. Manadrell (p, fi6) estimated it at only 40 acres; but be was quided solely by his cye. The city was surrounded with a wall, the lieight of which. where it faced the mainland, was 150 feet. (Arrian, Anab, ii. 18.) The foundations of this wall, which must have marked the limits of the island as well as of the city, may still be discerned, but have not been accurately traced. The ineasurement of Pliny before cited must doubtless include the subsequent aceretions, both natural and artificial. The smallness of the area was. however, compensated by the great height of the houses of Tyre, whi th were pot built after the eastern fasbion, but story upon story, like those of Aradus, another Phoenician island city (Mels, ii. 7), or like the iusulae of Rome. (Strab. l. c.) Thus a mucb larger population might be accommodated than the area seems to promise. Bertou, calculating from the latter slone, estionates the inhabitants of insular Tyre at between 22,000 and 23,000. (Topogr. de Tyr, p. 17.) But the accounts of the captare of Tyre by Alexander, as will appear in the sequel, show a population of at least donble that number; and it should be recollected that, from the maitime pursuits of the Tyrians, a large portion of them must have been constantly at sea. Moreover, part of the western side of the island is now submerged, to the extent of more than a mile; and that this was once occapiec by the city is shown by the tases of columns which may still be discerned. These remains were much more considerable in the time of Benjamin of Tudela, in the latter part of the 12 th century, who mentions that towers, markets, streets, nud halls might he observed at the bottom of the sea ( p .62 , ed. Asher).

Insular Tyre was much improved by king Hiram, whe in this respect was the Augustus of the city. He added to it one of the islands lying to the N., by filling up the intervening space. This island, the outline of which can no longer be traced, previously contained a temple of Baal, or, according to the Greek way of speaking, of the Olympian Jopiter. (Joseph. c. Apion, i. 17.) It was by the space tbns gained, as well as by substructions on the castern side of the island, that Hiram was enabled to enlarge and beautify Tyre, and to form an extensive public place. which the Greeks called Eurychorus. The artificial ground which liiram formed for this purpose may still be traced by the lonse rubbish of wbieh it consists. The frequent earthquakes with which Tyre has been visited (See. Q. N. ii. 26) have rendered it difficult to trace its ancient configuration; and alterations have been observed even since the recent one of 1837 (Kenrick, Phoenicia, p. 353, \&c.).

The powerful navies of Tyre were received anl skeltered in two roadsteads and two harbours, one on tbe $\mathbb{N}_{\text {., }}$ the other on the S . side of the island. The northern, or Sidonian rodstead, so called because it looked towarls Sidon (Alrian, ii. 20), was protected by the chain of small islands already mentioned. The harbour which adjoined it wats formed by a natural inlet on the NE, side of the island. On the N., from which quarter alone it was exposed to the wind, it was rendered secure by two sea-walls ruming parallel to each other, nt a distance of 100 feet apsurt, as shown in the numexed jlan. Portioms of theee walls may still be traced. The eastern sine 11.

Vol. II.
of the harbonr was enclosed by two ledges of rock, with the assistance of walle, having a passage between them about $\mathbf{j} 40$ feet wide, whicb fornsed the muyth of the harbour. In case of need this entrance could be closed mith a boom or chain. At present this harbour is almost cboked with sand, and only a

## TYRUS.

small basin, of about 40 yards in diameter, can he traced (Shaw, Travels, vol. ii. p. 30); but io its origioal state it was about 300 yards loug, and frem 230 to 240 yards wide. I'art of the inodera towu of Sur, or Sour, is built over its soutbern portion, and only vessels of V ry shallow draught can enter.

TLAN OF TVAE.

## (From Kenrick's " Ploenicia.")

A. Northern harhonr.
R. Suppo-ed limit of ancient harhour
C. Teact of lonse sand.
1). Southern, or Esyptian, harbour.
F. Southern, or Feyptim, roadstead.

FF. Isthmus formed by Alexander's mole.
GG. Depression in the sand.
11. Northern, or Sidonian, rtaadstead.
af. Portions of inner sea-wall, visible above water.
bh. Ancient canal.

1. Fonrance of northern harbour.
$\because 2$. Original lime of spas wall.
3, 3. Outer wall, now below water.
4, 4, 4, 4. Line of rorks, burdered on the E. by a wall, not of ancient constraction.
2. Ledge of rocks projecting 90 feet into the sea.
3. Columns united to the rock.
4. Rock, below 5 fret of rubibish.
5. Ledge of rocks extendiug 200 feet into the sea.
6. Remains of a wall, with irons for mooring.
7. Mtisonry, showing the entrance of the camal.
$11,21,11,11$. Walls of the Cothon or harbour, about 25 feet broad.
12, 12. Portions nf wall overturned in the harbuur.
8. Rocky islets.
9. Supposed submarine dyke or break water.
10. Commencement of the isthmns, covering several yards of the harbour wall.
11. Angle of the ancient wall of circumvallation, and probable limit of the island on the $\mathbb{E}$.

The sonthern roadstead was called the Egyptian, from its lying towaris that country, and is described by Strabo (l. c.) as unebchosed. If, however, the researches of Bertou may be relied upon (Topogr, de Ty/r. p. 14), a stupendons sea-wall, or breakwater, 35 feet thick. and rubaing straight in a SW. direetion, for a distabce of 2 milex, may still be traced. The wall is said to be covered with 2 or 3 fathoms of water, whilst withio it the depth is from 6 to 8 fathoms. Bertou almits, bowever, that this wail has never been carefully examined; and if it had existed in abcient times, it is impossible to conceive foow so stuprodous a work should have escaped the notice of all the writers of antiquity. According to the sane authority, the whole sonthern part
of the island was occupied by a cothon, or dock, separated from the roadstead by a wall, the remains of which are still visible. This harbour, like the northern one, could be closed with a boom; whence Chariton (vii. 2. p. 126. Reiske) takes occasion to compare the sceurity of Tyre to that of a house with bolted doors. At present, howerer, there is nothing to serve for a harbour, and even the roadstead is not secure in all widds. (Shaw, ii. p. 30.) The northern and southern barbonrs were connected together by means of a canal, so that ships conld pass from one to the other. This canal may still be traced by the loose sand with which it is filled.

We have already adverted to the sieges sustained by Tyre at the hands of Shalmaneser, Nebuchaduez-
zar, Alexander, and Antigonus. [Proexicla, pp. 610-613]. That by Alexander was so romarkable, and had so mucb influence on the topography of Tyre, that we reserved the details of it for this place, as they may be collected from the narratives of Arrian (Anab. ii. 17-26), Diodorus Siculus (xrii. 40-45), and Q Curtius (iv. 4-27). The insular situation of Tyre, the height and strength of its walls, and the command which it possessed of the sea, seemed to render it iorpreguable; and hence the Tyrians, when summoned by Alexander tn surrender, prepared for an obstinate resistance. The only method which occarred to the mind of that conqueror of overcoming the difficulties presented to his arms by the site of Tyre, was to connect it with the mainland by means of a mole. The materisls for such a structure were at band in abundance. The deserted buildings of Palac-Tyros afforded plenty of stone, the mountains of Lebanon an inexbaustible supply of timber. For a certain distance, the mole, which was 200 feet in breadth, proceeded rapidly and snccessfully, tbough Alexander's workmen were often barassed by parties of Tyrian troops, who landed in boato, as well as by the Arabs of the Syrian desert. But as the work approsched the island, the difficulties increased in a progressive ratio. Not only was it threatened with destruction from the depth and force of the current, often increased to violence by a southerly wind, but the workmen were also exposed to the missiles of the Tyrian slingers and bowmen, aimed both from vessels and from the battlements of the city. To guard themselves from these attacks, the Macedonians erected two lofty wooden towers at the extremity of the mole, and covered then with bides as a protection against fire. The soldiers placed on these towers occasioned the Tyrians considerable annoyance. At length, however, the latter succeeded is setting fire to the towers by means of a fire-sbip filled with combustibles; and afterwards, making a sortie in their boats, pulled up the stakes which protected rhe mole, and destroyed the machines which the fire bad not reached. To complete the discomfiture of the Macedonians, a great storm arose and carried away the whole of the work which had been thus loosened.

This misfortune, which would have damped the ardour of an ordinary man, only iscited Alexander to renew bis efforts with greater vigour and on a surer plan. He ordered a new mole to be constructed, broader tban the former one; and in order to obviate the danger of destruction by the waves, be caused it to incline towards the SW., and thus to cross the chanzel diagonally, instead of in a straight line. At the same time be collected a large fleet from Sidon, whither be went in person, from Soli, Mallus, and other places; for, with the exception of Tyre, all Phoenicia was already in the hands of Alesander. He then made an incursion into Coelesyria, and clased away the Arabs who annoyed his workmen employed in cuttiog timber in Antilibanus. When he again returned to Tyre with bis fleet, which be had joined at Sidon, the new mole bad already made great progress. It was formed of whole trees with their branches, covered with layers of stope, on which other trees were heaped. The Tyrian divers, indeed, sometimes succeeded in loosening the structare by pulling out the trees; but, in spite of these efforts, the work proceeded steadily towards completion.

The large fleet wbich Alexander had assembled
struck terror inlo the Tyrians, whn now confined themselves to defensive measures. They sent away the old men, women, and children to Carthage, and closed the moaths of their liarbours with a line of triremes. It is unnecessary to recount all the iucidents which followed, and we shall therefore confine ourselves to the most important. Alexunder hawl caused a number of new machines to be prepared, under thie direction of the ablest engineers of Ploenicia and Cyprus. Some of these were plantel un the mole, which now very nearly approacbed the city; other were placed on board large vessels, in order to batter the walls on other sides. Various were the devices resoited to by the Tyrians to frustrate these attempts. They cut the cables of the vessels bearing the fattering rams, and thus sent them adrift: but this mode of defence was met by the use of iron mooring cbains. To deaden thic Llows of the battering engines, leathern lags filled with sea-weed were suspended from the walls, whilst on their summit were erected large wheel-like machines filled with soft materials, which being set in rapid motiod, either averted or intercepted the missiles burled by the Macedonians. A second wall also was commenced within the first. On the other hand, the Macedoaiass, baving now carried the molo as far as the island, erected towers upon it equal in height to the walls of the town, from whicb bridges were projected towards the lattlements, in order to take the city by escalale. Yet, after all the labour bestowed upon the mole, Tyre was not captured by means of it. The Tyrians annoyed the soldiers who manoed the towers by throwing out grappling hooks attached to lines, and thus dragging them down. Nets were employed to entangle the lands of the assailants; mases of red-bot metal were burled amongst the:n, and quantities of heated sand, which, getting beiween the interstices of the armour, caused idtolerable pain. An attempted assault from the bridges of the torrers was repulsed, and does not appear to have been renewed. But a breach was made in the walls by battering raus fized on ressels; and whilst this was assuulted by means of ships provided with bridges, simultaneous attacks were directed against both the liarbours. The lhoenician feet burst the boom of the Egyptian barbour, and touk or destroyed the ships within it. The northern harbour, the entrance of which was undefended, was easily taken by the Cyprian flect. Meanwlite Alexander had entered with bis troops through the breach. Provoked by the long resistance of the Tyrians and the obstinate defence still mautained from the roofs of the bouses, the Macedonian solidiery set fire to the city, and massacred 8000 of the inhabitants. The remainder, except those who found shelter on bourd the Sidonian tleet, were sold into slavery, to the number of 30,000 ; and 2000 were cracified is expiation of the murders of certain Macedonians during the cuurse of the siege. The lives of the king and chief magistrates were spared.

Thus was Tyre captured, after a siege of seven months, in July of the jear B. C. 332 . Alczander then ordered sucrifices and games in bonour of the Tyrian Ilercules, and consecrated to himi the battering ram which had made the first breach in the walls. The population, which bad been alinost destroyed, was replaced by new colonists, of whom a cousiderable portion seen to bave been Carimns, The sulsequent fortunes of Tyre have aiready beeu recorded. [1'hoesicta, p, 613.]
For the coins of Tyre see Echbel, Doctr. Num

TYSANUSA.
P. i. vol. iii. pp. 379-393, and 408 , seq. Respecting its history and the present state of its remains, the following works may be adrantageously consuhted: Hengstenberg, De Rebrs Tyrionum; Kenrick, Phoenicia; Pococke, Description of the East; Volney, 1'oyoge en Syrie; Richter, Wallfahrt; Berton, Topographie de Tyr; Mandrell, Journey from Alrppo to Dumascus; Shaw's Travels; Kobinson, Biblical Researches, \&c.

It has retained its name with little change to tbe present day, being the modern Tchorlu or Tchurlu.
[J. R.]

## U, V.

VABAR, a river of Manretania Caesariensis, which fell into the sea a little to the W . of Saldae. Ptolemy (iv. 2. §9) mentions it under the name of Orabap as if it had been a town; and Maffei (Mus. Fer. p. 463) thought that he had discuvered such a place in the name of Batvares, in an Atrican inscription (cf. Orelli, Inser. ns. 529). In Pliny (v. 2, s. 1) and Mela (i. 6) the name is erroneously written Nabar. It is probably the present Buberak:
[T. I. D.]
VAC'ALU'S. [BATANI.]
VACCA. 1. (Sill. J. 29, \&e.) or VAGA (Sil. It. iii. 259 ; Oúárs, Ptol. iv. 3. § 28 ; Bá $\mathbf{\gamma}$, Procop. de Aed. vi. 5), an important town and place of considerahle commerce in the iuterior of Numida, lying a long day's journy SW, of Utica. Pliny (v, 4) calls it V.unpme Opprlum. It was destroyed by Metellua (Sill. J. 69); but afterwards restored and inhabited by the Romants. Justinian surrounded it with a wall, and named it Theodoria, in honour of his consort. (Procip. l.c. if. Strab, svii. p. 831 ; Sill. J. 47, 68 : Mit. Mar. 8, p. 4n9) Now Baujiah (Begiu, Beggiu, Brdsju) in Tunis, on the borders of Alyiers. (Ct. sliaw, Travels, i. 1. 183.) Vaga is mentioned by the Geogr. Nub. (Clim. iii. 1. p. 88) under the name of Ba_ra, and by Leo Atric. (p. 406, Lorstrach) turder that of Beggia, as a place of considerable ( ontuerce.
2. A town in Byzacium in Africa Proper, lying to the S , of ltuspinum (Hirt. B. Afr. 74). This is

## VADA SABBATA.

## probably the "aliud Vagense oppidum" of ['liny

 (l c.).[T. H. D.]
VACCAEI (Ó̇аккaiou, Ptol, ii. 6 § 50), an important people in the interior of Hiapania Tarraconensis, bounded on the IV. by the Astures, on the N. by the Cantabri, on the E. by the Celtiberi (to whom Appian. IIsp. 51, attributes them), and on the S. by the Vettones and the river Darins. Hence their district may be considered as narked by the modern towns of Zumora, Toro, Pulencia. Burgns, and Valladelich. Their chief cities were Pallantia (Palencia) and Intercatia. According to Diodurus (v. 34) they yearly divided their land for tillage ainong themselves, and regarded the produce as common property, so that whoever kept back any part fur binself was capitally punished. (Cf. Jiv. xxx. 7, xl. 47; Polyb. iii. 14; Strab. iii. pp. 152, 162: Plin. iii. 3. s. 4 ; Plut. Sert. 21.) [T. I1. D.]

VACOMAGl (Óvoкouá子or, P'tol, ii. 3. §8 13), a people in Britannis Barbara, near the Taezali, never subdued by the Romans. Canden (p. 1217) seeks them on the borders of Loch Lomond. Ptwiemy (l.c.) ascribes four towns to them. [T. H1. 1).]

VACUA (Oíanoúa, Strab. iii. p. 153; Oйaкos, Ptol. ii. 5. § 4), a river in Lusitania, which entered the Atlantic ocean between the Durius and Muna, in the neighbuurhood of Talabrica. Pliny (iv. 21. s. 35.) calls it Vacca. The present Vouga. [T.H. D.]

VACUATAE (Oйакойara: or Bakovaraı, Ptol. iv. (6. § 10 ), a people in the S. of Mauretaria Tincitama, extending as far as the Little Atlas. [T.H D.]

YADA, a place on or near the Rhine, in North Gallia. Tacitus (Hist. v. 21) in his history of the war of Civilis speaks of Civilis attacking on one day with lis troups in four divisions, Arenachm, Batavodurmm, Grimuts, and Vada. The history shows that Grinnes and Vada were south or on the south side of the stream which Tacitus calls the Rhemas. [Gminves.]
[G. L.]
VADA SABBATA (さa6áray Oüaঠ̃a, Strab.; इábsata, Ptol.: Fado), a town and port on the seacoost of Liguria, about 30 miles W. of Genua. It was situated on a bay which affords one of the best roadsteads along this line of coast, and seems to have been in consequence much frequented by the Ruman fleets. [a B, c, 43 it was the first point at which M. Antonius lalted after his defeat at Mutina, and where he effected his junction with Ventidius, who had a considerable force under his command. (Cic. ad Fam. xi. 10, 13.) D. Brutus, in his letter to Ciceto, sppaks of it as "inter Apemninum et Alpes," a phrase which abvionsly refers to the notion commonly entertained that this was the point of demarcation between the two chains of mountains, a view sdupted ulso by Strabo (iv. p. 202). A jass led into the interior across the Apemines from Vada to Aquase Statiellae which was probably that followed by Antony. Brutus spraks in strong terms of the rugged and difficult nature of the roads in all directions liom this point, ( 16 .) : but at a later period a regular road was constructed across the mountuins frems Vatis to Aquar Statiellue, as well as in both directions along the cuast. (Itin. Ant. p. 295 ; T'ab. P'eut.) Under the Roman Empire we learn that Vada contimued to be a place of considerable trade (Jul. Capit. Pert. 9,13); and it is still mentioned as a port in the Maritime linerary (p. 502). Some doubt has arisen with regard to its precise position, though the name of Jodo would seem to be ubviously derived from it; but that of Subbata or Sabatia, on the other hand, is apparently connected with that of Sarona, a
town with a small but secure port abont 4 miles N . of Vado. Livy indecd mentions Savo (nndoultedly the same with Savona) as a sea-port town of the Ligurians, where Mago established himself during the Second Panic War (Liv. xxviii. 46) ; bat the name does not occur again in any writer, and hence Cluverius supposed that this was the place afterwards called Sabhata. There seems, however, no donbt that Sabbata or Sabatia, Vada Sabbata, or Fada Sabatia, and Vada simply (as the nane is written by Cicero), are all only different forms of the same name, and that the Roman town of Vada was situated on, or very near, the same site as the present Jado, a long straggling fishing village, the bay of which still affords an excellent roadstead. The distinctive epithet of Sabbata or Sabatia was eridently derived from its proxinity to the original Ligurian town of Savo.
[E. H. B.]
VADAVERO, a monntain near Bilbilis in the territory of the Celtiberi, in Hispania Tarraconensis. It appears to be mentioned only by Martial (i. 50.6), who eharacterises it by the epithet of "sacred," and adverts to its rugged character.
[T. H. D.]
VADA VOLATERRANA. [Volaterrae].
VADICASSII (Oúcঠisḱ $\sigma \sigma t o \iota$ ), a people of Gallia Lagdnnensis, whou Ptolemy (ii. 8. § 16) places on the burders of Belgica, and next to the Meldae. He avsigns to the Vadicassii a city Noeomagus. D'Anville concludes that following Ptolemy's data we may place his Vadicassii in Tolois, which is hetween Meatre and Soissons. He remarks that Yalois is Vadisus in the capitularies of Charles the Bald, and Vadensis in the later acts. Other geographers have different opinions. In many of the editions of Pliny (iv. 18) wc find enumerated " Andegavi, Viducasses, Vadiocasses, Unelli;" but only one DIS. has "Vadiocasses," and the rest have Bodiocasses or Bodicasses, which we mast take to be the true reading, and they seem to be the same as the Barocasses. (D'Anville, Notice, ¢c.; Ukert, Gallien.) [G. L.]

VADIMO'NIS LACUS ( $\eta$ Oúád $\mu \omega \nu$ di $\mu \nu \eta$, Polyb.: Laghetto di Bassano), a small lake of Etruria, between the Ciminian bills and the Tiber, celebrated in history as the scene of two successive defeats of the combined Etruscan forces by the Romans. In the first of these battles, which was fought in n. c. 309, the Etruscans had raised a chosen army, enrolled with pecnliar solemnity (lege sacrata); but though they fonght with the ntmost valour and obstinacy, they sustained so severe a defeat at the hands of the Roman Cunsul Q. Fabins Maximns, that, as Livy remarks, this disastrous day first broke the power of Etruria (Liv. ix. 39). The second battie was fought near 30 years later (n. c. 283), in which the allied forces of the Etruscans and Gauls were totally defeated by the consul P. Cornelins Dolabella. (Polyb. ii. 20 ; Eutrop. ii. 10 ; Flor. i. 13.) But thougb thus celelrated in bistory, the Vadimonian lake is a very trifling sheet of water, in fact, a mere pool or stagnant pond, now almost overgrown with reeds and bulrnsbes. It was donbtless more extensive in ancient times, though it conld never bave bees of any importance, and searcely deserves the name of a lake. But it is remarkable that the younger Pliny in one of his epistles describes it as a circular basin sbounding in floating islands, wbich have now all disappeared, and probably have contributed to fill ap the ancient basin. Its waters are whitish and highly suipbureous, resembling, in this respect, the Aquae Albnlae near Tibnr, where the phenomenon of floating islands still occasionally occurs. (Plin. Ep. viii.
20.) It enjojed the reputation, probably on acconnt of this jeculiar character, of being a sucred lake. But the apparent singularity of its baving been twice the scene of decisive conflicts is sufficiently expluined ly its situation just in a natural pasy between the Tiber and the wooded heights of the Ciminian forest, which (as observed by Mr. Dennis) mnst always have constituted a nataral pass into the plains of Central Etruria. The lake itself, which is now called the Laghetto di Bossano from a neichhouring villnge of that name, is only a very short distance from the Tiber, and about 4 milea above Orte, the nncient Horta. (Denois's Etruria, vol. i. pp. 167170.)
[E. 11. B.]
YAGA, a town of the Cantii in Britannia Romana (Not. Imp.)
[T.H.D]
VAGA. [Yacca.]
VAGEDRUSA, the nnme of a river in Sicily, mentioned by Silius Ituliens (xiv. 229), according to the old editions of that author; hat there can be no doubt that the true reading is that restored by $\mathrm{Rn}-$ perti, "vage Chrysa," and that the river Chrysas is the one meant. (Ruperti, ad l. c.) [E. H. B.]

VAGIENNI (Bayevvoi), a Ligurian tribe, who iuhabited the region N. of the Maritime Alps, and S. of the territory of the Taurini. According to Pliny they extedded as far to the W. as the Mons Vesulns or A/onte Viso, in the main chain of the Alps (Plin. iii. 16. s. 20), while their chief town or capital under the Roman rule, called Augusta Vagiennorum, was situated at Bene, hetween the rivers Stura and Tanaro, so that they mast have occupied an extensive territory. Bnt it seems impassible to receive as correct the statement of Velleius (i. 15) that the Roman colony of Eporedia (Icrea) was included within their limits. [Eporedia.] It is singular that Pliny more than once speaks of them as being descended from the Caturiges, while at the same time he distinctly calls them a Ligurian tribe, and the Catanges are commonly reckoted a Ganlish one. It seems prooable, however, that many of the races which inhabited the mountain valleys of the Alps were of Ligurian origin; and thas the Caturiges and Segusiani may very possibly have been of a Ligurian stock like their neigbbours the Tanrini, thongh subsequently confounded with the Gauls. We bave no account of the period at which the Vagienni were reduced under the Roman yoke, and their name is not fonnd in history as an independent tribe. But Pliny notices them as one of the Ligarian tribes still existing in his time, and their chief town, Augnsta, seems to have been : flourishing place under the Roman Empire. Their name is sometimes written Bagienni (Orell. Inser. 76), and is found in the Tabula ander the currupt form Bagitenni. (Tab. Pcut.) [E. H. B.]

VAGNIACAE, a town of the Cantii in Britannia Romana, between Noviomagus and Durubrivae. Camden (p. 226) identifies it with M/aidstone, Horsley ( $\mu .424$ ), with more probability, with Ninthfleet. Others have sought it near Lonufield, and at Wrotham.

Vailalis. [Batayi; Ritexis.]
VALCUM, a place near the contines of Upper and Luwer Pannonia, not far from Lake Peiro (Itin. Aut. p. 233), but its exact site is nncertain. [L. S.]

VALDASUS, a sonthern tribnfary of the Sarus, flowing from the monntains of Illyricum, and join-

## VALLUM ROMANLM

## VALENTIA, in Brottium. [litproxivm.]

VALEPONGA or VALEBONGA, a town of the Celtiberi in Ilispania Tarraconensis, on the roal from Laninium to Caesaraugusts. (Itin. Ant. p. 477.) Variously identified with Vol de Meca and Valsalobre.
[T. H. D.]
VALERIA, tho name of tho NE. part of Lower Iannonia, which was constituted as a separate province by the emperor Galerius, and named Visleria in honour of his wife. (Aurel. Vict. de Caes. 40; Amm. svi. 10, xxviii. 3.) This province was bounded on the E. and N. by the Danabius, on the S. hy the Sayus, and on the W. by Lake Peisn. (Comp. Pannowha, p. 531, and Muchar, Norikum, vol. i. p.3.)
[L.S.]
VALE'RIA (Ovia $\lambda \in \rho l a$, Ptol. ii. 6. § 58), a town of the Celtiberi in Hispania Tarracenensis, on the Sucro. At a later period it became a Roman colony in the jurisdiction of Carthago Nova. (Plin. iii. 3. s. 4.) Now Valera la Vieja, with ruins. (Cf. Florez, Esp. Sagr. viii. p. 198, with v. p. 19, and vii. p. 59.)
[T. H. D.]
Valeriana (Baxepiáva, Procop. de Aed. iv. 6), a place in Moesia Inferior. (Itin. Ant. p. 220.) Prohably near Ostova.
[T. H. D.]
VALl (Óvá $\lambda o \iota$, P'tol. v. 9. § 21), a people of Asiatic Sarmatia, between Mount Cerannus and tho river Rha. (Plin. vi. 7. s. 7.) [T. H. D.]

VALINA (Oúá入etva or Ba入íva), a place in Upper Pannonia, commonly identified with the molern Valbach. (I'tol. ii. 15. § 6.)
[L. S.]
VALLA. [Balla.]
VAllata, a town of the Astares in Hispania Tarracenensis, between Asturica and Interamnium. (Itin. Ant. pp. 448, 453.). Variously identified with Bañeza, Puente de Orvijo, S. Martin de Camino, and Villar de Majardin.
[T. H. D.]
VALLATUM, a town in Vindelicia, not far from the S. bank of the Daoubins, on the road from Reginum to Augusta Viodelicorum; it was the station of the staff of the third legion and the second Valerian squadron of cavalry. (It. Ant. p. $250 ;$ Not. Imp.) It occupied, in all probability, the same site as the modern Wahl, on the little river Jln. [L. S.]

VALLIS PENNINA, or POENINA, as the name is written in some inscriptions, is the long valley down which the Rhone flows into the Lake of Genera. In the Notitia of the Gallic Provinces all the inhabitants of this vallcy are included in the name Vallenses, for we rend "Civitas Vallensium, hoc est, Octedarum." [Octodurus.] But there were four peoples in the Lellais, as it seems, Nantuates, Verigri, Sedunf, and Vibrim. The name Vallis Pennina went out of ume, and it was called Pagns Vallensis. The name Vallis is preserved in that of the canton Wallis or Vellais, which is the largest valley in Switzerland. [Galhita Transalerina, Vol. 1. p. 950; Ruodanus.] [g. L.]

VALLUM ROMANUM. Under this title we propose to give a short account of the remarkable work constructed by the Romans across our island, from near the mouth of the Tyne on the E. to the Solvoay Frith on the W., and of which considerable remains still exist. The history of the formation of this line of fertification is involved in a good deal of obscurity, and very different opinions have been entertained respecting its authors; and neither the Latin writers nor the inscriptions hitherto found among the ruins of the wall and its subsidiary works are snfficient to settle the disputed points, though they suggest conjectures more or less probable.

The origin of the barrier may have heen the forts and stationary camps which Agricola (A. D. 79) caused to be erected in Britain (Tac. Agr. 20); but the account which Tacitus gives of this measure is so vague that it is quite impossible to fonad any certain conclusion on bis words. In A. D. 120, Hadrian visited Britain, where he determined on fixing the boundary of the Roman Empire considerably to the S. of the most N. conquests of Agricola. He chose this boundary well, as it coincides with a natural one. The Tyne flows almost due E., just $\mathrm{S}_{\text {, }}$ and nearly paraliel to the $55^{\circ} \mathrm{N}$. lat., for more than two thirds of the breadth of the island. The valley of the Tyne is separated from that of the Irthing, a branch of the Eden, by the N. extremity of the great chain of hills sometimes called the Backbone of England; and the Irthing, with the Eden, completes the bonodary to the Solivay Frith. In order to strengthen this patural frontier, Hairian, as we are informed by Spartianns, "drew a wall (murus) 80.000 paces in length, to divide the barbarians from the Romans;" which wail followed the same general direction as the line above indicated.
Eutropins (viii. 19) states that the Emperor Septianins Severus, who was in Britain during A. D. 208-211, constructed a rampart (vollum) from sca to sea, for the protection of the Roman provinces in the S. of the island.
Now, as will be seen from the following description, the lines of works designated by the general naine, Roman Wall, consist of two main parts, a stone wall and an earthen rampart; and most writers on the subject bave regarded these as two distinct, though connected, works, and belonging to two different periods; the earthwork has generally been ascribed to Hadrian, the stone wall to Sererus. Such is the opinion of Horsley, whose judgment, as Mr. Brnce emphatically adonits, is always deserving of the bighest consideration. Mr. Brace bimself ex. presses an opinion, founded on repeated and carefal examination of all the remsins of the wall, "that the lioes of the barrier are the scheme of one great military engineer.

The wall of Hadrian was not a lence such as that by which we prevent the straying of cattle; it was a line of military operation, similar in its nature to the works which Wellington raised at Torres Vedros. A broad belt of country was firmly secured. Walls of stone and earth crossed it. Camps to the north and south of them broke the force of an enemy in both directions; or, in the event of their passing the onter line, enabled the Romans to close upon them both in front and rear. Look-out stations revealed to them the movements of their foes; beacons enabled them to communicate with neightonring garrisons; and the roads, which they always maintaioed, assisted them in concentrating their forces upon the points where it might be done with the best effect. Such, 1 an persuaded, was the intention of the Roman wall, though some still maintain that the muras and vallom are incependent stractures, the prolactions of differeat periods" (pp. ix. x. Pref. 2nd ed.)
We confess that the reasoning bere does not seem to us to be very conclasive. Gradt that the system of defence has consistency and nnity, yet it by no means follows that the whole was executed at one time. The earliest works were probably detached stationary camps; the next step would naturally be to comnect them together by a wall, whether of earth or stone and if experience should afterwards prove that this barrier was insufficient, it would be an obvions pro-
ceeding to strengthen it by a parallel fortification. The common opinion, therefore, that Agricola commenced the defensive lipe, Hadrian strengthened it, and Severas completed it, appears to be probable in itself, and is supported by the little that we find apon the subject in the classical writers. If we may assume that the words murus and vallum were nsed by Spartianus and Eutropias in their strict sigaitications, it would seem that the stone wall was the work of Hodriad, the earthen rampart of Scverus. That some portion of the barrier was executed under the direction of the latter, is rendered still more probable by the fact that the Britona called the wall gual Sever, gal Sever, or mur Sever, as Camden states. It has been designated by rarions names in later times; as the Picts' H'all, the Thirl Wall, the Kepe Wall; but is now generally called the Roman Ifall.

The following description is taken almost entirely from Mr. Bruce's exceilent work, mentioned at the end of this article.

The barrier consists of three parts: (i.) a stono wall or murus, strengthened by a ditch on ita northern side; (ii.) an eartheu wall or vallum, sonth of the stone wall; (iii.) stations, castles, watchtowers, and roads: thesc lie for the most part between the stone wall and the earthen rampart.

The whole of the works extend from one side of the islaod to the other, in a nearly straight line, and comparatively close to one another. The wall and rampart are generally within 60 or 70 yards of each other, thongh the distance of course varies according to the nature of the country. Sometimes they aro so close as barely to adnit of the passage of the military way between them; while in one or two instances they are upwards of balf a mile apart. It is in the high grounds of the central region that they are most widely saparated. Here the wall is carried over the highest ridges, while the rampart rnns along the adjacent valley. Botb works, however, are so arranged as to affurd each other the greatest amount of support which the nature of the country allows.

The stone wall extends from Wallsend ou the Tyne to Bowness on the Suluray, a distance which Horsley estimates at 68 miles 3 furlongs, a measurement which almost exactly coincides with that of General Roy, who gives the length of the wall at $68 \frac{1}{2}$ miles. The vallum falls short of this length by about 3 milies at each end, terminating at Newcastle on the E. side, and at Drumburgh on the W.

For 19 miles ont of Newcastle, the present highroad to Carlisle rons upon the fuwadations of the wall, which parsues a straight course wherever it is at all possible, and is never curved, but always bends at an angle.

In no part is the wall perfect, so that it is difficult to ascertain what its original height may have beea. Bede, whose monastery of Jarrow was near its eastern extremity, and who is the earliest authority respecting its dimensions, states that in his time it was 8 feet thick and 12 high. Sir Christ. Kidley, writing in 1572 , describes it as 3 yards broad, and in some places 7 yards high. Samson Erdeswick, a well-known antiquary, visited the wall in 1574 , when he ascertained its height at the IV . end to be 16 fiet. Camden, who saw the wall in 1599, found a part of it on a hill, near Corvoran, to be 15 feet high and 9 broad. Allowiog for a battlement, which would probably soon be destroyed, we may coaclude that the average height was from 18 to 19 feet. The thickness varies from 6 to 9 ! feet.

The wall was everywhere accompanied on its morthern side by a broad and deep fusse, which may still be traced, with trifling interruptions, from sea to sea, even where the wall has quite disappeared. It traverses indifferently alluvial soil and rocks of sandstone, limestone, and basalt. Thus, on Tapper Moor, enormous blecks of whinstone lie just as they were lifted out of the fosse. East of Meddon on the Wall, thie fosse is 34 feet wide at the top, 14 at the bottom, and abont 9 deep. In some places it is 40 feet wide at the top, and in others 20 feet derp.

Hodesen, in his Mistory of Northumberland (iii. p. 276), states a fact curious if true: "A little W. of Portgate, the earth taken ont of the fusse lies spread aibroad to the N . iu lines, just as the worknen wheeled it out and left it. The tracks of their barrows, with a slight mound on each side, remain unaltered in form." It is scarcely credible, however, that sliglit elevations of earth, and superficial traces in it, should, for move than a thousand years, have successfully resisted the constant operation of the natural agencies which are sufficient to disintegrate the hardest rocks.

The Valum, or earth wall, is unformly S. of the stene wall. It consists of three ramparts and a fosse. One rampart is close to the S. edge of the thitch. Of the ether two, which are considerally larger, one is situated N., the other S. of the ditch, it the distance of about 24 feet from it. These larger ramparts are even now, in some places, 6 or 7 feet ligh. They are composed of earth, in which masses of stone are often imbedded, for the sake of which they are semetimes quarried. The fusse of the vallum was probably smaller than that of the murus.

No outlets through the S . lines of fortification have been discovered; so that the gaterrays of the stations appear to have originally been the only means of communication with the country.

At distances averaging nearly 4 miles, stationary eamps were erected along the line. Some of these, though connected with the wall, were evidently built before it.

The stations are four-sided and nearly square, but somerrlat rounded at the corners, and contain an area averaging from 3 to 6 acres, though some of them are considerably larger. A stone wall, about 5 feet thick, encloses them, aud was probably in every instance strengthened by a fosse and one or more earthen ramparts. The stations usually stand upon kround with a soutbern inclination.

The great wall either falls in with the N. wall of the stations, or else asually comes up to the N . cheek of their E. and W. gateways. The vallum in like manner generally approaches close to the S. wall of the stations, or comes up to the S . side of the E . and W. purtals. At least three of the stations, however, are quite detached from both lines of furtification, being to the S . of them. These may liave been erected by Agricula.
Narrow streets intersecting one atother at right angles traverse the interior of the stations; and abundant ruins eutside the walls indicate that extersive suburbs were required for the accommodation of thase connected with the soldiers stationed in the cannps. The stations were evidently constructed with exclusive reference to defence; and hence ne traces of tesselated pavements or ofher indications of luxury and refinement lave been discovered in the mural region.

According to 11 orsley, there were 18 stations on the line of the wall, besides some in its immediate vicinity;

## Vallum romanum.

but IIodgson redoces the number to 17 , believing that in one instance Horsley mistook a mere tempurary encampment fur a station.

In ascertaining the number and names of the stations, our principal literary authority is the Notitia Imperii, supposed to have been compiled abont the end of the reign of the emperor Theedosius the younger. The 69th section of this document contains a list of the prefeets and tribunes under the Duke of Britain: the portion relating to our subject is lieaded, "Item per linean Valli," and contains the names of 23 stations, evidently arranged in their order from E., to W. The heading, bewever, manifestly implies, not, as it seems sometimes to have been interpreted, that all the stations were actually on the line of the wall, but that they were along it, that is, parallel to, or at no great distance from it. It is clear, therefore, that as remains of stations exist both to the N . and to the S. of the wall, as well as actually on its line, nothing but the remains thenselres can enable us to name the stations with certainty.
Nuw the first 12 statiens mentioned in the Notitia have been accurately identified by means of inscriptions found in the ruins of the stations. Of these we subjoin a list, with the ancient and modern names, taken chiefly from the plan prefixed to Mr. Bruce's work:-

| Segedunnm | Hallsend |
| :---: | :---: |
| Pons Aelii | Neweastle. |
| Condercum | Bencell. |
| Viedobala | Rutchester. |
| Hutnum - | Halton Chesters. |
| Cilornum - | W'aluick Chesters. |
| Procolitia - | Carrauburgh. |
| Boreovicns | Housesteads. |
| Viudolana | Little Chesters, or Chesterholm. |
| Aesica | Great Chesters. |
| Magna (Magnae) | Carvoran. |
| Amboglanna | Birdoswald. |

All these are on the actual line of the wall, except Vindolana and Magna, which are a little to the $s$. of it .

West of Ambeglanna no evidence has yet been discovered to identify any of the stations; and it is to be feared that many autiquities which might lave enabled us to de so have been destroyed; for it appears that the ceuntry people, even quite recently, regarded stones bearing inseriptions as "unlucky," calling them "witch-stenes," the evil influence of which was to be extirpated by pounding them to powder. Besides this, stone is scarce in that part of the country ; and hence the materials of the wall and stations have heen extensively employed in the construction of dikes and other erections iu the neigLbourhook.

It appears from the plan already referred to that there were stations at the places now called Cambeek Fort, Stanwix, Burgh, Drumburgh, and Bonchess; the first a littie to the S ., all the rest on the line of the wall.

Of the remaining cleven stations mentioned in the Notitia, the plan identifies Alienis with Whitley Castlc, some miles S. of the wall. Mr. Brace places Bremetenracum a little W. of the village of Brampton; l'etriam, be thinks, is probably the same as Cambeck Fort.

It is possible that something may yet be done to elucidate what is atill obscure in connection with these most interesting mounments of Koman Britain ; and the Duke of Northumberland Lad, in 1853, given
directions to competent persons to make nn aceurate and complete survey of the whole line of the barrier, from sea to sea. Whether any results of this investigation have yet been published, we are not aware.

Of the identified stations the most extensive and important are Vindobala, Cilurnam, Procolitia, and Burcoviens. At the first, great numbers of coins and other antiquities have been found. The scoond has an area of 8 acres, and is crowded with ruins of stone buildings. A great part of the rampurt of Procelitia is ontire, and its nortbern face, which is formed of the main lino of wall, is in excelleat preserration. Boroovicus, however, surpasses all the other stations in magnitude and in the interest which attacbes to its remains. It is 15 acres in extent, besides a large suburb on the S . Within it no less tban 20 strects may be traced ; and it seems to have centained a Doric temple, part of a Doric capital and fragments of the shafts of columns having been discovered in it, besides a great namber of altars, inscriptions, and other antiquities.

The remaining portions of this great fortification may be briefly described.

The Castella, or mile-eastles as they are called, on account of being usaally a Roman mile from one another, are buildings about 60 or 70 feet squarc. With two exceptions, they are placed against the S. face of the wall ; the oxceptions, at Portgate and near Aesica, seem to have projected equally N. and S. of the wall. The castella have usually only ene entrance, of very substantial masonry, io the centre of the S. wall ; but the mest perfect specincs of them new existing has a N. as well as a S. gate.

Betwees each twe castella there were fonr smaller huildings, called turrets or watch-tewers, which were little mere thaa stone sentry-boses, abont 3 feet thick, and from 8 to 10 feet square in tho inside.

The line of the wall was completed by military mads, keeping op the communications with all its parts and with the senthern distriets of the island. A these were similar in their construction to other Roman roads, it is not necessary to say more respectiog them in this place.

The following works contain detailed information of every kind connected with the Roman Wall :Horsley's Britannia Romana; Warbarten'a J'allum Romanum, 4to. Lond. 1753; W. Hutton's History of the Rnman Wall, 1801 ; Rey's Military Astiquities nf the Romans in Britain; the 3rd vol. of Hotssona's History of Northumberland; and lastly, The Roman 11 'all; an Historical and Topogrophical Description of the Barrier of the lower 1sthmus, if c Deduced from numerous personal Surveys. By the Rev. J. C. Brace, M. A., 2nd edit. Lond. 1853, 4tn. This work contains full descriptions of all the antiquities hitherto discovered along the line of the wall, and great nombers of well executed engravings of the mest interesting objects, besides maps and plans of the works.
[J. R.]
VALVA (Oviárova, Ptol. iv. 2. § 16), a mountaia in Mauretania Caesariensis. [T. H. D.]

VAMA (Oüaua, Ptol. ii. 4. § 15), a town of the Celtici in Hispania Baetica.
[T.H.D.]
VANCIANIS, [Batiana.]
VANDABANDA (Oźavōabávōa, Ptol. ri. 12. § 4), a district of Sogdiana, between the Nons Caucasss (Hindi-Kish) and the Imaus (IIimileh). It is probably nearly the same as the present Badakhshán (Wilson, Ariana, p. 164).

VANDALI, VANDALII, VINDILI, or VAN:

branch of the Germnn nation, which, according to Procopius (Bell. (ioth. i. 3). wrikinnlly necupied tha conntry about the Palus Macotis, but afterwards inbabited an extensivo travt of country in the senth ooast of the Bultic, between the rivers Vistula and Yiadrus, where Pliny (iv, 28) mentions the 13urguadiones as a tribo of the Vindili. At a somicwhat later period wo fiod them in the country nurth of Bohernia, about the Riesengebirge. Which derived from them the name of Vandalici Montes (Ouvarסaגıкd üp力; Dion Cass. 1v. 1.) Ia the great Marcomamian war, they were allied with tho Maren manni, their southern neighbours, and in enojunction with them and the Quadi attacked Panonnia. (.Ju). Capitol. M. Aurel. 17; Eutrap. viii. 13; Vinise. Irob. 18 ; Dexirpas, Exc. de Leg. p. 12.) In the reign of Constantue they agnin appear in a different country, having established themselves in Moravia, whence the eonperor transplanted them into Ponnonia (Jornand. Get. 22), and is the reign of Probus they alse appear in Dacia. (Vopisc. Prob. 38.) In A. 13. 406, when most of the Roman troops liad been withdrawn from Gaul, the Vandals, in ennjunction with other German tribes, orossed the Lhire and ravaged Gaul in all directions ; and their devastations in that country and afterwards in Spain Lave made their name synonymoas with that of savage destroyers of what is beautiful and reaerable. Three years later they established themselves in Spain under their chief Golligisclus. Hero again they plundered and ravaged, among many other places, Nova Carthago and Hispalis, tugetber with the Balearian islands. At last, in A. D. 429, the whole nation, under king Genscric, crossed over into Africa, wbither they bad been invited by Benifacius, who hoped to avail himaself of their assistance against bis calumniaters. But when they were once in Afriea, they refosed to quit it. They not only defeated Bonifacios, but made tbemselres masters of the wbole province of Africa. This involved them in war with the Empire, daring which Sicily and the ceasts of Italy were at times fearfully ravaged. On orie ocoasion, A. D. 455, Genseric and bis bordes touk possession of Iiome, which they plandered and sacked for fourteen days. And not anly Rome, but other cities also, such as Capua and Nola, were visited in a similar way by these barbarians. Afterwards varions attempts were made to subdoe or expel thern, bat withont saccess, nod the kingdorn of the liadals maintained iteelf in Africa for a period of 105 years, that is, down to A. D. 534 , when Belissrias, the general of the Eastern Empire, sncceeded in destroying their power, and recovered Africa for the Empire. As to the nationality of the Vaodals, met German writers claim them for their oation (Zeuss, Ihie Deutschen, p. 57 ; Wilhehm, Germanien, p. 85): bot Dr. Latham (on Tac. Epileg. p. Ixxxvini. fill.) and others prefer regarding them as a Slavumic people, though ticir arguments are chiefly of an etymological nature, which is nut always a safe guide in bistorical inquiries. (Papencorit, Cesch. der Vandal. Iferrschaft in Africa, Berlin. 1837 ; Hansen, Wer veranlasste die Bertfong der L'andal n nach Africa? Dirpat, 1843 ; Friedlinder. Ihis Hünzen der J'andaleo, Leipzig. 1849.) [L. S.]

VaNDALICI MONTES [Vandad.]
VANDUARA, or VANDOGAliA (Oúanסoviapa, Ptel. ii. 3. § 9), a town of the Dammonii in Britannia Barbara. Now Paisley. (Cf. Camden, p. 1214.)
[T. 11. D.]

VANESIA, a place in Gallia Aquitanica, fixed by the Jerusalem Itin, hetween Eluss (Eause) and Auscius, the capital of the Ausci, xii. from Elusa and viii. from Auscius. The place is supposed by D'Aoville to be the passage of the Baise, a branch of the Garonne which comes from the Pyrenees. [G. L.]

VANGIONES (Oviaryioves). There were Vangiones in the army of Ariovistus when Caesar defeated bim. (B. G. i. 5I.) Caesar means to say that they were Germans, but he does not say whether they were settled in Gallia. Pliny and Tacitus (Ann. xii. 27, Germ. c. 28) also describe the Vangiones as Germans and settled on the left bank of the Rhine, where they are placed by Ptolemy (ii, $9 . \S 17$ ); but Ptolemy makes a mistake in placing the Nemetes north of the Vangiones, nod making the Vangiones the neighbours of the Tribocci, from whom in fact the Vangiooes were separated by the Nemetes. Is the war of Civilis (Tacit. Hist. iv. 70), Tutor streagthened the force of the Treviri by levies raised among the Vangiones, Caracates [Calisacates], and Tribocci. The territory of the Vangiones seems to have been taken from that of the Mediomatrici. Their chief town was Borbetomagus (Worms). [Borbetomagus.]
[G. L.]
VA'NNIA (Oiavvia, Ptol. iii. 1.§32), according to Ptolemy a tomn of the Bechani in Caraia or Carniola (cf. Plin. iii. 19. s. 23). Varioasly ideotified with Tenzone and Cividato. [T. H. D.]

VAPINCLM, in Gallia Narbonensie, is not meotioned by any aatbority earlier than the Antonine and Jerusalem Itins. In the Notitia of the Gallic Provinces it is styled "Civitas Vapiocensium." Tbe initial letter of the name bas been changed to G , ss in many other instances io the French laoguage, and the modern name is Gap, which is the capital of the department of Houtes-Alpes, and on a small strean which flows into the Durance. [G. L.]

VARA, or VARAE, a towo is Britannia Romana, between Conorinm and Deva. (Itin. Ant. p. 482 .) Variously identified with St. Asoph, Rudland, and Bodvary.
[T. H. D.]
VARADA (Oíápaōa, Ptol. ii. 6.§ 57 ), a town of the Carpetani io Hispania Tarracooensis. [T.H.D.]

VARADETUM, in Gallia, is placed by the Table on a road from Divona (Cahors) to Segodunum (Rodez) : and the distance from Divoos is xv . D'Anville places Varadetom at Varaie, which is on the road between Cahors and Redez; but the distances do not agree. Others fix the site at Puijourdes. [G. L.]

VaraE. [Vara.]

## VARAGRI [Veragri.]

Valdar (Oicápap, Ptol. ii. 6. § 5), an estaary on the E. coast of Britadoia Barbara, very probably the present Frith of Cromarty.
[T. H. D.]
VABCLANI (Ovंаккiavoi), a tribe in Upper Pannonia, which is meotioned by hoth lliny (iii. 28) and Ptolemy (ii. 15. § 2), but of which nothing is koown, except that it probably occupied the westerv portion of Slavonia.
[L. S.]
VARCILENSES, the inhabitants of a town of the Carpetani in Hispania Tarraconensis, (Inser. is Morales, Ant. pp. 17, 26, 28.) The modern Farciles still contains some ruins of the old town.
[T.H. D.]
VARDAEI (Oúapóaiot, Ptol. ii. 17. § 8), an Illyrian tribe dwelling opposite to the island of Pharos (cf. Plin. iii. 23. 5. 26). By Strabe they are called Ardiaci ('Aposaiot, vii. p. 315). In the Epitome of Liry (Ivi.) they are snid to have been subdued by the consul Fulvius Flaccus. [T.11.D.]

VARDANES (Oivapóáms, Ptol. v. 9 §§ 5 and 28), a river of Asiatic Sarmatia, represented as falling into the Euxine to the SW. of the Atticitus. Probably, horrever, it was only the southern arm of the latter, the preseot $K u b a n$. (Cf. Ukert, iii. pt. ii. p. 202.) [ATticirts.] [T. H. D.]

VARDO, a tributary of the Rhene, which rises in the Cérennes, aod is formed by two branches named respectively Gardon dA lais and Gardon d Anduze, from the names of these twa towns. The Vardo flows in a deep valley, and passes under the great Roman aqueduct now named Pont du Gard, below which it eoters the Rhone on the west bank, near a place named Cons. The name Vardo occurs in Sidonias Apollinaris; and in a Latin poem of three or four centuries' later date the name is Wardo, from which the modern name Gardon is formed, according to a common change of V ioto G. [ViFINCEM.]
[G. L.]
VARDULI (Oüapōounoĺ, Ptol. ii. 6. §§ 9, 66; Bápooviat, Strab. iii. p. 162; where we also learn that at an earlier period they were called Bapōñтau), a people in Hispania Tarraconensis, whe dwelt westward of the Vascones, as far as the N. coast (in the present Guipuscoo and Alava). (Mela, iii. 1; Plin. iii. 3. s. 4. iv. 20. s. 34.) [T. II. D.]

VARGIO'NES (Oüapríwves), a German tribe, hetween the eastern bank of the Rhenus and Mons Abooba, that is, perhaps between the Ruhir aod the Rauhe Alp. (Ptol. ii. 11. § 9.) [L, S.]

VARIA. 1. (OÚapia: Vicovaro), a town of the Sabines, situateo io the valley of the Anio, on the right bank of the river, about 8 aniles above Tibur. The name is corroptly written in most editions of Strabo Valeria (Oià $\operatorname{poia}$ ), for which there is no doubt that we should read Varia (Oíapía, Strab, v, p. 237 ; Kramer, ad loc.). Strabo there calls it a Latin city, as well as Carseoli and Alba, both of which were certainly Aequian towns, and sabsequently incladed in Latium. But Harace speaks of it as the town to which the peasantry from his Sabine farm and the neighoouring villases used to resort (Hor. Ep. i. 14. 3 ), in a manner that certaioly seems to imply that it was the municipal centre of that district, and if se, it must bave thea been reckoned a Sabine town. It is not meationed by Plioy, but according to his limitation was certainly included among the sabines, and not in Latiom. It was probably never a large place, thoagh the remains of the ancient walls still extant prove that it must at one time have heen a fortified towa. But it early sank into 3 mere village; the old commentator on Horace calls it "Oppidum in Sabinis olim, nane vicas " (Schol. Craq. oif l. c.): and heoce in the middle ages it came to be called Vicus Varia, whence its modern appellation of Iicovaro. It is still a considerable village of above 1000 inhabitants, standing on a bill to the left of tbe Via Vialeria, and a short distance above the Anio, which flows in a deep valley beneath. The Tabula and the old commentary on Horace both place it 8 miles above Tibar, which is very nearly exact. (Tab. Peut. Comm. Cruq. l.c.)
2. Pliny mentions among the cities of Calnbria a place called Varia, " coi cognomen Apolae" (iii. 11. s. 16) ; but the oame is otherwise anknewn, and it is probable that we should read "Uria :" the place moant being apparently the same that is called by other writers Hyria or Uria [HyriA]. [E. 11 B.]

VA'RIA (Oviapia, Strab. iii. p. 162 : Oúápeıa, Ptol. ii. 6. §55), a town of the Berones in Hispania Tarraconcosis, situated on the lberus, which here be-
gan to be navigable (Plin. ii. 3. s. 4), nnd where also the main road through Spsin crossed the river, between Calagurra and Tritium. (Itin. Ant. p. 393, where, under the name of Verclia, the same town is ondoubtedly meant.) Usually identified with Varea (cf. Florez, Cantabr. p. 198), though some hare sought it at Logroño, and others at Murillo de Rio Leza.
[T. H. D.]
VAR1A'NA (Bapıáva), a town in Lower Mnesia on the Danube, was the garrison of n portion of the tifth legion and of a squadron of horse. (it. Ant. p. 220; Procop. de Aed. iv. 6 ; Notit. Imp., where it is called Variniana and Varina.) Its site is marked by the town of Oranja or Orcava. [1. S.]

VARIANAE, a place in l'annonia, on the road running along the left bank of the Sarus from Siscia to Sirmium. (It. Ant. pp. 260, 265.) Its evact site is only matter of conjecture.
[L. S.]
VARI'NI, a German tribe mentioned by Pliny (iv. 28) as a branch of the Vindili or Vandali, while Tacitus (Germ. 40) speaks of them as belonging to the Suevi. But they must bave occupied a district in the north of Germany, not far from the coast of the Baltic, and are probably the same as the Pharodini ( $\$ a \rho o \delta \in \omega \nu$ ) of Ptolenny (ii. 11. § 13), in the covntry between the Cbalusus and Suebus ; it is highly probable, also, that the Varni (Oúápyou) of Pricopius (B. Goth. ii. 15, iii. 35, iv. $20, \mathrm{\& c}$.) are the same people as the Varini. The Viruni (Oitipauvoi) of 1'tolemy (ii. 11. § 17), who dwelt north of the Albis, seen to have been a branch of the Varini. (Comp. Cassiod, Var. iii. 3, where they are called Gnarni; Wersebe, Beschreib. der Gau zwischen Elbe, Saale, gic. p. 70.) [L. S.]

VARISTI. [Nariscl.]
VARUS (OÜapos), a river which the ancient geographers make the boundary of Gallia and Italia, as it is now the boundary of France and Italy. (Mela, ii. 4 ; Ptol. ii. 10. § I.) It is only the lower part of the Jar which forms the boundary between Italy and France. The river gives its name to the French department of I'ar, the eastern limit of which is the lower conrse of the river Var. The larger part of the Var is in the Sardinian territory. It is only the mouth of the Var which I'tolemy names when he fixes the limit between Italy and Gallia Narbonensis. D'Anville remarks on the line of Lucan (i. 404) -
"Finis et Hesperiae promoto limite Varus"-
that lue alludes to the extension of the boundary of Italy westward from the summit of the Alpis Maritima, which is Italy's natural boundary. He adds that the dependencies of the province of the Alpes Maritimae comprehended Cemenelium (Cimiez) and its district, which are on the Italian side of the Var and east of Nicaea (Nizza). [Cemeneliumi]. But D'Anville may bave mistaken Lucan's meaniog, who seems to allude to the extension of the beundary of Italy from the llubicon to the Varus, as Vibius Sequester says: " Varus nunc Galliam dividit, ante Rubicen" (ed. Oberl.). However, the critics are not agreed about this pasxage. (D'Anville, Notice, foc.; Ukert, Gallien, p. 81.)
[G. L.]
 little to the south-west of Laodiceia (Ptol. r. 4. § 10 ; Hierocl. p. 675 ; Conc. Chatced. p. 674, where it is miswritten Oǒa $\delta \alpha$; Conc. Const. iii. p. $6: 5$, where it bears the name of 'A $\dot{\sigma} \sigma a \delta \alpha$ ). Its site is probably marked hy the ruins near Chonnur Chanah, between Ilgun and Ladik: (Hamilton,

Rescarches, ii. p. 190, in the Juarn. of the Roy. Geogr. Soc. viii. p. 144 ; Kiepert, is Framz, FiunJ Inschriften, p. 36.)
[l. S.]
 ópos, l'tol. iv. 3. §§ 18, 26), a mountain at the S. boundary of the Regio Syrtica. [T.H. D.]

VASATAE. [Cessio or Cossius.]
VASATES. It is probable that the name Vasarii in P'tolemy (ii. 7. § 15) sbould be Visatii, as D'Anville says, and so it is printed io some Greek texts. But l'toleny makes them border on the Gisbali and places them liarther north than Bordrauc, though he names their chief tomn Cossinm. The Vocates aro enumerated by Caesar (B. G. iii. 23, 27) arnong the Aquitauian perples who submitted to P . Crassus in B. C. 56. [Cossio or Cossiom.] [G.L.]

VA'SCONES (Ováakwves, Strab. iii. MP. 155, 116; Oúáonaves, Ptol. ii. 8. §§ 10,67 ), a people in the NE. part of Ilispania Tarraconensis, between the lberus and the Pyrenees, and stretching as far as the N. coast, in the present Navarrc and Guipuscoa. Tbeir name is preserved in the modern one of the Basques; although that people do not call themselves by tbat appellation, but Euscaldunac, their conntry Euscaleria, and their language Euscara. (Ford's Handbook of Spain, p. 557; cf. W. r. Hamboldt, Untersuch. \&.c. p. 54.) They went into battle bareheaded. (Sil. Ital. iii. 358.) They passed among the Romaus for skilful soothsayers. (Lamp. Alex. Sev. 27.) Their principal town was Pompelo (Pamplona). (Ce. Malte-brun, Moeurs et Usuges des anciens Habitans d'Espagne, p. 309.) [T.H. D.]

VA'SCONUA SALTUS, the W. offithoot of the Pyrenees, running nong the Mlare Cantabricom, and named after the Vascones, in whose territory it was. (Plin. iv. 20. s. 34; Auson. Ep. 15.) It may bo more precisely defined as that portion of the chain now calied Sierra de Orcamo, S. de Augana, and S. Sejos, forming the E. part of the Cantabrian chain.
[T.H. D.]
VAS10 (Oivaatóv: Eth. Vasiensis), a town ef the Vocontii in Gallia Narbonensis, and the ooly town which P'tolemy (ii. 10. § 17) assigns to them. Vasio is mentionell by Mela (ii. 5) as one of the richest towns of the Narbnncnsis ; and Pliny (iii. 4) names Vasio and Lucus Augusti as the two chief towns of the Vocuntii. The ethnic name Vasiensis appears in the Notitia of the Gullic Provincea (Civitas Vasiensium), and in inseriptions. The place is Vaison in the department of liaucluse, on the Ouvize, a branch of the Rhone. It is now a small, decayed place ; but there are remains which show that it may have been what Mela describes it to have been. The ancient remains are spread over a considerable surface. There is a Roman bridge of a single arch over the Ouveze, which still fonns the only communication between the town and the faubourg. The bridge is built on two rocks at that part of the river whace the monntains which sbut in the bed of the river approach nearest. There are also the remains of a theatre: the semicircle of the cavea is clearly traced, and the live of the proscmiom is indicated by some stones which rise above the earth. There aro also the remains of a quay on the hanks of the river which was destroyed by an inundation in 1616. The quay was pierced at considerable intervals by sewers which carried to the river the water and filth of the town: these sewers are large enough for a man to stand in upright. There are also traces of the nqueducts whieb bronght to the town the waters of the great spring of Grosean.
(Breton, Mém. de la Société Royale des Antiquaires de France, tom. xvi., quoted by Richard et Hoequart, Guide du Voyageur.)
[G. L.]
VATEDO, in Gallia, mentioned in the Table, is a place east of Bordeaux, supposed to be Vaires on the left bank of the Dordugne, a branch of the faronne.
[G. L.]
VATRENUS (Santerno), a river of Gallia Cispadana, one of the sonthern tributaries of the Padus. It bad its sonrces in the Apennines, flowed onder the walls of Forum Cornelii (Imola), and joined the southern branch of the Padns (the Spineticum Ostium) not fur from its mouth, for which reasen the port at the entrance of that arm of the river was called the Portus Vatreni. (Plin. iii. 16. s. 20.) The Santerno now flows inte the Po di Primaro (the modern representative of the Spinetic branch), above 16 miles from its mouth: but the chanuels of beth are in this part artificial. In this lower part of its conrse it must always have been mere of a canal than a river, whence Martial uses its name as typical of a sluggish stream. (Martial, iii. 67. 2.)
[E. H. B.]
UBERAE, a nation in India extra Gangem, mentioned by Pliny (vi. 19, s. 22). It possessed a large tnwn of the same name. It is not possible to determine its exact position: but, from the names of otber nations mentioned by Plioy in connection with the Uherae, it is probable that this people lived near the mouths of the Brahmapitra.
[V.]
U'BII (OÚstot), a German people whe in Caesar's time lived on the east bank of the Rbine and opposite to the Treviri, for Caesar having made his bridge in the country of the Treviri passed over into the country of the Ubii. Owing to their proximity to the Rhine they were somewhat more civilised than the other Germans, being much visited by mercbants and accustomed to Gallice manners (B. G. iv. 3,18 , vi. 29,35 ). The Sigambri were the neighbours of the Ubii on the north. The Suevi were pressing the Ubii hard, when the Ubii applied to Caesar for belp: they gave him hostages, and offered to supply him with a large number of boats to cross the river, from which we may infer that they were accustomed to navigate the Rhine. (B.G. iv, 16.) In the time of Augustus (Strab. iv. p. 194), the nation crossed the Filime, and Agrippa assigned them lands oa the west bank of the river, the policy of the Romans being to streugthen the Rheuish frontier against the rest of the Germans. (Tacit. (iirm. c. 28. Aunal. xii. 27; Sueton. Aug. c. 21.) In the new territory of the Ubii was Colonia Agrip$1^{\prime \prime \mu}$ ( Coln), and hence the people lad the mame of Acrippinenses, which was one of the causes why the Gernans east of the Rhine hated them. They were cotsidered as traitors to their country, who had assumed a new name. (Tacit. Hist. iv. 28.) Nurth of the Ubii on the west side of the Rhine were the Gagertii [Gugerni]; and south of them were the Trevini. [Colonla Aghimina; Aba [bronem.]
[G. L.]
UBto'RUM ARA. [Ara Ubonem.]
UBISCL. [Bitiniges Vivisci.]
U'CENA (Oठ̋кeva), a town of the tribe of the Trocmi in Galatia. (Ptol. v. 4. § 9.) [L. S.]

UCENI, a people of Gallia Narbonensis, whe are mentioned in the trophy of the Alps queted by $\mathbf{w}^{\prime}$ liny (iii. 20), and placed between the Meduli and Caturiges. The site of these people is nncertain. D'Anville supposes that they were in that part of the mountain region of the $\mathrm{Alps}^{\text {p }}$ which con-
tains the bourg dOisans. But other gengraphers place them in the district of Oze, or near Mrez, buth of which places are on the right bank of the river Romanche, which flows into the Drac, a branch of the Isire. (Ukert, Gallien, p. 317.) [G. L.]

UCETIA, in Gallia Narbonensis, north of Nimes. This place is known only from the Roman remains which bave been discovered there, and from the imscription vertiae on a stene found at Nimes. The place is Ures, nerth of the river Gurdon, from which place the water was brought to Nimes by the aqueduct over the Gardon. [Nematisus] Ucetia appears in the Notitia of the Previnces of Gallia under the name of Castrum Uceciense. Ucetia was a bishopric as early as the middle of the fifth century.
[G. L.]
UCHALICCENSES (Oủza入ıккeîs, Ptol. it. 6. § 20), an Aethiopian tribe in the interior of Li bya.
[T. H. D.]
UCHEINERICMI (Oìx $\epsilon \mu \epsilon \in \rho \cdot a v$, Procop. B. Goth. iv. 14), a mountain fortress in the Regio Lazica, in Colchis.
[T. H. D.]
UCIA (Oй́нıa, Ptol. ii. 4. § 13), a town of the Turdetani in Lusitania. [T. H. D.]

UCIENSE, a town in Hispania Baetica, on the road from Cordnba to Castulo. (Itin. Ant. p. 403.) Varionsly identified witb Marmokjo, Andujar, and S. Julian.
[T. H. D.]
UCUBIS, a place in Hispania Baetica, in the neighbeurbend of Corduba and the Flumen Sulsum. (Hirt. B. H. 7.) Accerding to Ukert (ii. pt. i. p. 361) between Osuña and Antequera. [T. H. D]

UCULTUNIACUM. [CURGiA.]
UDAE (Oठ́ódut, Ptol. v. 9. § 23), a people of Asiatic Sarmatia on the Caspian sea. They are prelably the people mentioned under the mame of Udini by Pliny (vi. 12. s. 15). They appear to have derived their name from the river Udon. [T. H. D.]

UDON (Oó̃ouv, Ptol. v. 9. § 12), a river of Asiatic Surmatia, which rises in the Caucasus and falls into the Caspian sea between the Rha and the Alonta. Most prohably the nodern Kuma. [J. R.]
vDUBA. [Turulis.]
UDURA (Ozoóoupa. Ptol. ii 6. § 72), a town of the Jaccetani in Hispania Tarracenensis, probably the modern Cardona.
[T. H. D.]
VECTA or VECTIS (Oink an island on the S. coast of Britannia Romana, Jying opposite to the Portus Magnus (Portsmouth). It was known to the Romans before their conquest of Britain, througb the Mlassiliots, who bad here a station for their tin trade. (Diod. v. 22, 38.) At that time the channel between the island and the mainland become almost dry at ebb tide, so that the Britons carried their tin in carts to the island. It was first conquered by Vespasian, in the reign of Claudius. (Suet. Vesp.4.) Now the Isle of IVight. (Cf. Itin. Ant. p. 509 ; Eum. Pan. Const. 15; Mela, iii. 6: Plin. iv. 16. s. 30.)
[I. H. D.]
VECTURIONES, a subdivision of the Picts in Britannia Barbara, according to Ammishus (xxvii. 8).
[T. II. D.]
VEDIANTII (OỦe $\delta$ ávetol, Ptol. iii. 1. § 41), a Ligurian tribe, whe inhabited the fout of the Maritume Alps near the mouth of the Var. Both Plomy (iii. 5. s. 7) and I'tolemy assign to them the town of Cemenel um or Cimiez near Nice: the latter also inchules in their territory Sanitium; but this must certainly be a mistake, that town, which answers to the mondern Senez, being far off to the NW: (D'Anville, Giengr. des Gaules, p. 682.)
[E. H. B.]

VEDINUM (Uline), a city of Venctia, mentioned only by Pliny (iii. 19. 8. 23) among the municipalities of that conotry. It was sitoated in the plain of the Carni, 11 miles W. of Cividale (Forum Julii), and 22 NNIW. of Aquileia. In Pliay's time it was apparently an inconsiderable place, bot rose into importance in the middle ages, and is now a flourishing and populous city, and the capital of the whole proviuce of the Friuli. Many MSS. of Pliny write the name Nedinates, which has been adopted hoth by Harduin and sillig, but it is probable that the old reading Vedinates is correct. [E. H. B.]

IEDRA (Oùíopa, Ptol. ii. 3. § 6), a river in the N. part of the E. coast of Britannia. The name would lead us to the conclusion that it is the Wear (Camden, p. 944), yet Horsley (p. 103) and others have taken it to he the Tyne.
[T. H. D.]
IEGIA (Oúeqia or Ouetia), or Vegies (Plin. iii. 2t. s. 25), a town of Liburuia, the present Vezzo.
[T. H. D.]
VEGISTUM (Ov̌' $\gamma$ IJTov), or, as some read, Vetestum (Oievequov), a tuwn of Gidatia, in the territory of the Tolistohogi, between Mounts Didymus aud Celaenus (PtoL v. 4. § 7), is perhaps the same place as the Vetissum of the Peutinger Table. [L. S.]
VEII (Oimiou, Strab. v. p. 226; Oúsoi, Dionys. H. ii. 54 : Eth. Veientes, Cic. Div. i. 44 ; Liv. i. 15 , \&c.s: Adj. Veius (trisyl.), Propert. iv. 10. 31), an ancient and purely Tuscan city of Etruria. According to Festus (ap. P. Diac.s.v.) Veia was an Oscan word, and signutied a waggon (plaustrum); but there is nothing to show that this was the etyinology of the name of the town.

Among the earlier Italian topographers, a great diversity of opinion presailed respecting the site of Veii. Nardini was the first writer who placed it at the present Isola Farnese, the correctness of which view is now usiversally admitted. The distance of that spot nurthwards from Rome sgrees with the distance assigned by Dionysius of Hahcarnassus (l, c.) to Veii, namely, "abuut 100 stadia," which is confirmed by the Tabula Peut., where it is set down at 12 miles. In Livy, indeed ( $v, 4$ ), it is mentioned as being " within the 20th milestone;" but this is io a speech of App. Claudins, when the orator is using round numbers, and not solicitous about strict accuracy; whilst the two writers before cited are professedly giving the exact distance. Nor can the authority of Lutropius (i. 4), who places Veii at 18 miles from Rome, be admitted to inralidate the testimony of these authors, since Eutropius is notoriously incorrect in particulars of this descriptiun. There are other circumstances which tend to show that Isola Farnese is the site of ancient Veii. Thus the Tab. Peuting. further indicates that the city lay on the Via Cassia. Nuw following that road for a distance of about 12 miles from Rome, the locality not ooly exactly corresponds with the description of Dionysius, but also the remains of city walls and sepulchres, and trsces of roads in various directions, have been found there. Moreover at the same spot were discovered, in the year 18 t0, stones bearing inscriptions which related exclusirely to Veii and the Veientines.

We know little of the histury of Veii but what concerns the wars it waged with the Bomans. It is called by Eutropius (i. 20), "civitas antiquissima Jtaliae atque ditissima," and there can be no doubt that it was in a flourishing state st the time of the foundation of Rome. At that period the Etruscan, or Veientine, territory was separated from the Latin by the riser Albula, afterwards called Tiberis ; and
consequently neither the Muns Vaticanus nor Janiculensis then belonged to the Romans. (Liv, i. 3.) To the SW. of Rome it extended along the right bank of the Tiber down to the sea, where it contained some Salinae, or sult-works, at the mouth of the river, (Dionys. ii. 55.) The district immediately opposite to Rome seems to have been called Septem Pagi ( 16 .). On the N. of Rome the territory of Veii must at ose time bave extended as far as Mount Soracte, since the ager Capenatis belonged to it, Capena being a colony of Veii (Cato, ap. Serv. Aen. vii. 697); though in the history of the wars between Rome and Veii, Capena appears as an independent city. [Capexa, Vol. I. p. 504.] On the NW. it may probably bave stretched as far as the Mons Cimious ; but here, as well as more to the S., its limits are uncertain, and all we know is that in the latter direction it must have been bounded by the territory of Caere. (Cf. Müller, Etrusker, ii. 2. p. 1, \&c.) The ager Veiens is stiymatised by Horace and others as producing an execrable sort of red wine (Sat. ii. 3. 143; cf. Pers. v. 147 ; Mart. i. 103. 9, ii. $53.4, \& \mathrm{c}$.). We learn from Dionysius (ii. 54) that the city was of about the same size as Athens, and therefore vearly as large as Rome withiu the walls of Servius. [Roms, Vol. 11. p. 756.]

The political constitation of Veii, like that of the other Etruscan cities, seems originally to bave beeu republican, thoogh probably aristocratically republican, with magistrates annually elected. It was perbups their vicinity to ambitious and aspiring Rome, and the constant wars which they bad to wage with that city, that indaced the Veientines to adopt the form of an elective monarchy, in order to avoid the dissensions occasioned by the election of annual magistrates under their original constitution, and thus to be enabled, under a single leader, to act with inore vigour abroad; but this step procured them the illwill of the rest of the Etruscan confederacy (Liv, v. 1, cf. iv. 17). Monarchy, however, does not appear to bive been permanent smong them; and we only know the names of two or three of their kings, as Tolumnius (ib.), Propertius (Serv. Aen. vii. 697), and Morrius (lb. viii. 285).

The first time that the Veientes appear in history is in the war which they waged with Romulus in order to avenge the capture of their colony, Fidenac. According to the narrative of Livy, this war was terminated by one decisive battle in which Romolus was victorious (i. 15); but Dionysius (ii. 54 , sel.) speaks of two engagements, and represents the Niomans as gaining the second by a stratagem. Both these writers, however, agrce with regard to the results of the campaign. The loss of the Veientines was so terrible, both in the battle and in the subsequent flight, in which numbers of them were drowued in attempting to swim the Tiber, that they were constrained to sue for peace. The terms imposed upon them by Romulus show the decisive nature of his rictory. They were compelled to surrender that part of their territory in the neighbourhood of Rome called Septem Pagi, probably from its containing seven villages; to give up the salt-works which they possessed is the mouth of the Tiber; and to provide 50 hostages as security for the due execution of the treaty. On these conditions they obtained a peace for 100 years, with the resturation of their prisoners ; though sucb of the latter as preferred to remuin at Rume were presented with the freedom of the city and lands on the left bank of the Tiber. The district of Septem Pagi thus acquired
probably comprehended the Vatican and Janiculan hills, and became the seat of the 5 th Roman trihe, the Romilia or Ronulia. (Y̌arr. L. L. v. 9. §65, Müll.; Paul. ap. Fest. s. v. Romulia Trib.)

This peace scerns to hare lasted about 60 or 70 years, when war again broke out between the Veientines and Romans in the reign of Tollas Hostilins, and this time also on account of Fidenae, which appears to have become a Roman colony after its capture by Romulus. The cause of the war was the treacherous conduct of the Fidenates daring the Roman struggle with Alba. When called to account, they refused to give any explanation of their condnet, and procured the assistance of the Veientines. Tallas crossed the Anio (Teverone) with a large army, and the battle which took place at a spot between that river and the town of Fidenae was the most obstinate and bloody which had yet heen recorded in the Roman annals. Tullus, bowever, gained a signal victory over the Fidenates and their allies the Veieatines. The battle is remarkable for the vows made by Tullus, of twelve Salian priests, and of temples to Pavor a ad Pallor. These were the recond set of Salinns, or those attached to the worship of Quirinus [cf. Roma, p. 829]; and the appropriateness of the vorv will be perceived when we consider that the Fidenates, in their answer to the Romans, had asserted that all their engagements towards Rome had expired on the death of that deified hero. (Liv. i. 27 ; Dionys. iii. 23, sqq.)

The war was renewed onder Ancus Marcius by forays on both sides, which, bowever, seen to have been begun by the Veientines. Ancus overthrew them ia two pitched battles, the last of which was decisive. The Veientines were obliged to surreader all the tract on the right bank of the Tiber called the Silva Maesia. The Roman dominion was now extended as far as the ses; and in order to secore these conquests, Ancns founded the colony of Ostia at the mouth of the Tiber. (Lir. i. 33; Dionys. iii. 41.)

The next time that we find the Veientines in collision with Rome, they had to contend with a leader of their own nation. L. Tarquinius, an emigrant from Tarquinii to Rome, Lad distingnished himself in the wars of Apens Marcius against Veii, and was now in possession of the Roman suvereigaty. The Veientines, however, on this occasion did not stand nlone, but were assisted by the other Etruscan cities, who complaned of insnlts and injuries received from Tarqnin. The Veientines, as asual, were disconfited, and so thorougbly, that they did nut dare to leave their city, but were the belpless spectators of the devastation committed on their lands by the Romans. The war was terminated by Tarquin's brilliant sictory at Eretus, which cuabled him to claim the sovereignty of all Etruria, leaving, however, the different cities in the enjoyment of their own rights and privileges. It was on this occasion that Tarquin is said to have introdnced at Jome the institution ol the twelve lictors and their fasces, ennlems of the servitude of the twelve Etruscan cities, as well as the other litruscan insignia of royalty. (Diongs. iii. 57 : Flor. i. 5.) It should be observed that on this subject the acconots are very various ; and some have even doubted the whole story of this Etrascan conquest, beanse Livy dues nut mention it. That histurian, however, when he speaks of the resumption of the war under Serviss Tullins, iucludes the other Jitruscans with the Veientines, as parties to the truce which had expired ("bellnm cum Veientibns (jam
enim indutiae exierant) aliisque Etruscis sumptum," i. 42), although the Etruscans had not beea concerned in the last Veientine war he had recorded. (Cf. Dionys. iv. 27.) This war under Servias Tollius was the last waged with the Veieatines daring the regal period of Rome.

When the eecond Tarqnio was expelled from Rome, the Etruscaus endeavoured to restore him, Veii and Tarquinii were the two most forward cities in the league formed for this parpose. The first battle, which took place near the Silvia Arsia, was bloody but indecisive, though the Romans claimed a dubious victory. But the Etrnscans having obtained the assistunce of Porsena, Lars of Clusium, the Romans were completely worsted, and, at the peace which enssed, were compelled to restore to the Veientines all the territory which had been wrested from them by Romulus and Ancus Marcins. This, however, Porsena shortly afterwards restored to the Romans, out of gratitnde for the hospitality which they had displayed towards the remanat of the Etruscan army after the defeat of his son Aruns at Aricia. (Liv, ii. $6-15$; Dionys. v. 14, sqq.; Plut. Publ. 19.)

The Veientines could ill brook being deprived of this territory; but, whilst the inflnence of Porseas and his family prevailed in the Etruscan League, they remained quiet. After his death the war again broke out, B. c. 483. For a year or two it was a kind of border warfare characterised by mutual depredations. But in B.c. 481, after a general congress of the Etruscaos, a great number of volnateers joined the Veientioes, and matters began to assume a more serions aspect. In the first encouaters the Romaus were unsuccessful, chiefly through a matiny of the soldiers. They seem to have been disheartened by their ill success ; their army was inferior in number to that of the Veientines, and they endeavonred to decline an engagement. But the insults of the enemy incensed the Roman soldiery to such a degree that they insisted on being led to battle. The contest was long and hloody. The Etruscans at one time were in possession of the Ivoman camp; but it was recovered by the valonr of Titus Siccius. The Romans lost $n$ vast uumber of officers, amongst whom were the consul Manlins, Q. Fabius, who had been twice consul, together with many tribunes and centarions. It was a drawa battle; yet the Romans claimed the victory, becanse during the night the Etrnscans abandoned their camp, which was sacked by the Romans on the following day. But the surviviag consnl, M. Fabius Vibulauus, on his return to Rome, refused a trinuph, and abdicated his office, the daties of which he was prevented from discharging by the severity of his wounds. (Dionys. ix. 5, sqq.; Liv. ii. 42-47.)

Shortly after this, the Veientines, finding that they were onalle to cope with the Jomans in the open field, adopted a most nonoying system of wartare. When the Roman army appeared, they shat themselves up within their walls; bnt no sounter had the legions retired, than they came forth and scoured the country up to the very gates of Rome. The Fabian family, which had given so many consuls to lione, and which had taken so prominent a part in the lute war, now came forward and offered to relieve the commonwesith from this harassing annoyance. The whole family appeared before the senate, and by the mouth of their chief, Caeso Fabins, then consul for the third time, declared, that, as a continual rather than a large guard was required for the Veientine war, they were willing to undertake the duty and to maintain the majesty of the loman
name, withont calling upon the state for either soldiers or money. The senate thankfully aecepted the offer. On the following merning 306 Fabii met in the vestibule of the consul's house. As they passed through the city to the place of their destination, they stopped at the capitol and offered up vows to the geds for the success of their enterprise. Then they passed ont of Rome by the right arch of the Porta Carmentalis, and proceeded straight to the river Cremera, where there was a spot that seemed adapted by nature as a fortress for their little garrison. It appears, however, that the Fabii were accompanied by their clients and adherents, and the whole band probably amounted to 3000 or 4000 . (Dionys. is. 15; P. Diac. s. v. Scelerata Porta.) The place which they chose as the station of their garrison was a precipitous hill which seemed to have been cut and isolated by art; and they further strengtheeed it with entrenchments and towers. The spot has been identified with great prohability by Nardini, and sulsequently by other topographers, with a precipitous hill about 6 miles from Rome, on the left of the Via Flaminia, where it is traversed by the Cremera (now the J'clcha), and on the right hank of that stream. It is the beight which commands the present Osteria della Valchetta. (Nibby, Dintorni di Roma, vol. iii. p. 399; Dennis, Etruria, vol. i. p. 43.)

The position here taken up by the Fabii not only eoabled them to put a complete stop to the marauding expeditions of the Veientines, but even to commit depredations themselves on the territory of Veii. The Veientioes having made many vain attempts to dislodge them, at length implored the succour of the Etruscans; but the Fabii on their side were snpported by a consular army ander Aemilins, and the Veientines and their allies were defeated. This success reodered the Fabii still more enterprising. After occupying their fortress two years with impunity they began to extend their excursions; and the Veientines on their side sought to draw them obwards, in which they at length sacceeded. By a feigned flight, they eaticed the Fahii into an ambuscade and slew them, 13th Feb. B. c. 476 . (Or. Fast. ii. 195, sqq.; Liv. ii. $48-50$; Dionys. ix. 16-19; Florus, i. 12, \&c.)

Elated with this success, the Veientives, united with the Etruscans, now marelied towards Rome and pitched their camp on the Janiculan hill, at a distance of mly 6 stadia from the city. Thence passing the Tiber, they penetrated as far as the adcient temple of Hope, which stood near the modern Porta Maggiore. Here an indecisive action took place, which was renewed at the Porta Collina with the same result; but two engagements of a more decisive character on the Jaoiculan hill obliged the allied army to retreat. In the following year the Veientines allied themselves with the Salines, bat were completely defeated under the walls of their own city by the consul Pub. Valerius. The war was brought to a termination in the following year: in the consulship of C. Manlins, who concluded with them a truce of 40 years, the Veientines engaging to pay a tribute in corn and money. (Liv. ii. 51-54; Dionya ix. 23, sqq.)

But such terms were merely rominal, and in a few years hostilities were renewed. We hear of some ferays made by the Veientines in B. C. 442 (Liv. iv. 1); but there was no regular war till seven years later, when the Veientines, who were at that time governed by Lars, or King, Foluranins,
excited the Roman colony Fidenae to rebel; and in order completely to compromiso the Fidenates, Tolumnins ordered them to slay the Roman ambussaders whe had been despatched to demaod an explanation. Both sides flew to arms; ode or two obstinate engagements ensned; but the alliea who had been joined by the Falisci also, were overthrown in a decisive battle noder the walls of Fidenae, in which Tolumuiue was killed by the Roman military tribune, A. Cornelins Cossus. (Liv. iv. 17-19; cf. Propert. iv. 10. 22, 8qq.)

Three years afterwards, Rome being afflicted with a severe pestilence, the Veientines and Fidenates were cmboldened to march upos it, and eacamped before the I'orta Collina; but on the appearance of a Romad army under the dictator Aulus Servilius, they retreated. Servilius having pursued and routed them near Nomentnm, marelhed to Fidenae, which he at length succeeded in taking by means of a cuniculus or mine. (Liv. iv. 22.)

Although the Veientines obtained a truce after this event, yet they soon violated it, and began to commit depredations in the Roman territory, B, C. 427 ; and even defeated a Roman army whose operations had been paralysed through the dissensions of the three military tribunes who commanded it. The Fidenates now rose and massacred all the Roman colonists, and again allied themselves with the Veientioes, who had also eolisted a great number of Etrnscan volunteers io their service. These events occasioned grcat alarm at Rome. Mamereus Aemilins was ereated dictator, and, marching against the enemy, coeamped in the peninsula formed ly the confluepce of the Anio and the Tiber. Between this spot and Fidenae a desperate battle was fought: stratagems were empleged on both sides; but at length the allies were completely defeated, and the Romans entered the gates of Fidenae along with the flying enemy. The city was sacked and destroyed and the inhabitants sold as slaves; but oo the other band the Romana granted the Veientines a truce of 20 years. (Liv. iv. 31-35.)

At the expiration of this truce, the Romans resolved to subdue Veii, as they had done Fidenae, and it was besieged by an army commanded by six military tribunes. At thia news the national assembly of the Etruscans met at the fase of Voltumua, to consider what cenrse they should pursue. The Veientines had again resorted to the regal form of goverament; but unfortunately the person whom they elected for their king, thaugh rich and powerful, had incurred the hatred of the whola Etruscan nation by his eppressions and imperious manners, but especially by his having hindered the performance of certain sacred games. The Etruscans consequently declared that, usless he was deposed, they ghonid afford the Teientines no assistance. But the latter were afraid to adopt this resolution, and thus they were abandoned to their fate. Nevertheless, they contrived to prolong the siege for a period of ten years, during which the loimans were sereral times discumfited. It is worthy of remark that it was during this siege that the loman soldiers, being obliged to pass the winter out of Rone, first received a fised regular stipend. The Capenates, the Falisci, and the Tarquinienses in vain endeavoured to relieve the beleaguered city.

The length of the siege had begon to weary the Romans, when, necordiog to the legend, the means of its capture was suggested by an extraordinary portent. The waters of Lakc Albanus swelled
to such an extent that they threatened to inundate the surrounding country. The oracle of Delphi was consulted on the oecasion, and the response involved not ouly the immediate subject of the spplientina, but also the remoter one of the capture of Veii. According to the voice from the sacred tripod, that city would be taken when the waters of the lake were made to flow off without rumning directly into the sea; aod the prophecy was confirmed by the revelation of a Voientine haruspex made during the interval of the embassy to Delphi. All that we can infer from this darrative is that the formation of the emissary for draining the Alban lake was contemporary with the siege of Veii [cf. Albanes LaCUS, Vol. 1. p. 29]: the rest must be referred to the propensity of the ancients to ascribe every great event to the intervention of the gods; for we have already seen that Fidenae was captured by means of a cuniculns, a fact which there does not appear to be any valid reason to doubt, and therefore the emissary of the lake cannot be regarded as having first surgested to the Romans the method of takiog a city by mine.

The honour of executing this project was reserved for the dictator M. Furius Camillus. Fortune seemed to have entirely deserted the Veientines: for thongh the pleading of the Capeoates and Falisci on their hehalf had made some inpression on the national assembly of the Etruscans, their attention was diverted in another direction by a sudden irruption of the Cisalpine Ganls. Meanwhile Canillus, having defeated some bodies of troops who endeavoured to relieve Veii, erected a line of forts around it, to cut off all communication with the surrounding country, and appointed some corps of miners to work continually at the cunicuJus. When the mine was completed, he ordered a picked body of his most valiant soldiers to penetrate through it, whilst he himself diverted the attention of the inhabitants by feigned attacks in different quarters. So skilfully had the mine been directed that the troops who entered it emerged in the temple of Juno itself, in the bighest part of the citadel. The soldiers who guarded the walls were thus taken in the rear; the gates were thrown open, and the city soon filled with Romans. A drealful massacre cusued; the town was sacked, and those citizens who lade eseaped the sword were sold into slavery. The image of Juno, tbe tutelary deity of Veii, was carried to Rome and pompously installed on Mount Aveatine, where a magnificent temple was erected to her, which lasted till the abolition of paganism. (Liv. v. 8, 12, 13, 15-22; Cic. Div. i. 44, ii. 32; Pint. Cam. 5, sq.; Fler. i. 12.)

Yeii was eaptured in the year $396 \mathrm{n} . \mathrm{c}$. Its territory was divided among the citizens of Rome at the rate of seven jugera per head. A great debate arose between the senate and the people whether Veii should be repopulated by Roman citizens, and thus made as it were a second capital; but at the persuasion of Camillus the project was abandoned. But though the city was deserted, its buildings were not destroyed, as is shown by several facts. Thus, after the battle of the Allia and the taking of lome by the Gauls, the greater part of the Romans retired to Veii and fortified themselves there; and when the Gauls were expelled, the question was mooted whether Rome, which had been rednced to ashes, should be abandoned, and Veii converted into a new capital. But the eloquence of Camillas again decided the Lomans for the negutive, and the question
was set at rest for ever. This took place in B. C. 389. Some refractory citizens, howcver, who disliked the trouble of rebuilding their own houses at Rome, took refuge in the empty ones of Veii, and set at nought a senatusconsultum ordering them to return; but they were at length compelled to come back by a decree of capital punishment against those who remained at Veii beyond a day prescribed. (Liv. v. 49, sqq., vi. 4.)

From this time Veï was completely deserted and went gradually to decay. Cicero (ad Fam, xvi. 9) speaks of the measuring of the Veientine territory for distribution; and it was probably divided by Cassar among his soldiers in b. c. 45. (Plut. Crecs. 57.) Iropertius also describes its walls as existing in his time; but the space within consisted of fields where the shepherd fed his flock, and which were then under the operation of the decempeda (iv, 10.29). It is, however, rather difficult to reconcile this chronology, unless there were two distributions. Caesar also appears to have planted a colony at the ancient city, and thus arose the second, or Roman, Veii, which seems to have been considerable enough to sustain an assault during the wars of the trinmvirs. The inhabitants were again dispersed, and the colony was not re-erected till towards the end of the reign of Augnstus, when it assumed the name of monicipiun Augustum Veiens, as appears from inseriptious. (Cf. Auct. de Colomïs.) When Florns, who flourished in the reign of Hadrian, asserts (i. 12) that searcely a restige remained to mark the sput where Veil ooce stood, be eithcr writes with great carelessness or is alluding to the ancient and Etruscan Veii, The existence of the municipinm in the reigos of Augustus and Tiberius is attested by several monuments discovered in its ruins; and some inseriptions also fonud there show that it was in existence at least as late as the reign of Constantius Chlorus. The monuments allnded to consist partly of sculptures relating to those emperors and their families, and partly of inscriptions. Amongst the latter the most important is now preserved in the Capitoline Muscum at Rome, recording the admission of Caius Jalins Gelutes, a freedman of Angustus, to the office of an Augustalis, by the centumviri of Veii. It is dated in the consulship of Gatulicus and Calvisius Sabinus, A. U. c. $779=$ B. c. 26 , or the 13th year of the reign of Tiherius. It is published hy Fubretti (Inscr. p. 170), but more correctly from the oricinal by Nibly in his Dintorni di Roma (vol. iii. p. 409). The accents are worthy of note. Among the centunvirs whose names are subscribed to this decree are those of two of the Tarquitian family, namely, M. Tarquitius Saturoinus and T. Turqnitius Rufus. This family, whieh produced a celeorated writer no Etruscan divination (Macrob. Sat. iii. 7), seems to have belonged to Veii and to bave enjoyed considerable importance there, as two other inseriptions relating to it have been discovered. One of these records the restoration of a statue erected in honour of M. Tarquitius Saturninus hy the 22nd Lecion; the other is a tablet of Tarquitin Prisea dedicated to her husband M. Suenius Marcellus. (Nibby, 16. p. 410, sq.) The family of Priscus is the most celebrated of the Gens Tarquitia. One of these was the necnser of Statilius Taurus in the reign of Claudius, and was himself condemned under the law of repelundae in the reign of Nero. (Tac. Ann. xii. 59, xiv. 44.) There are various coins of the Tarquitii. (Bekhel, D. N. 1. p. 322.) After the era of Constantine
we bare no notices of Veii except in the Tab. Pentingeriana and the Gcographer of Ravema. It was probably destroyed by the Lombards. At the beginning of the 11th century a castle was erected on the precipitous and isolated hill on the S . side of Veii, which was called la Isola, and is now known by the name of the Isola Farnese.

Sir William Gell was the first who gave an exact plan of Veii in the Memorie dell Istituto (Fasc. i.), and afterwards in his Topography of Rome and its Vicinity. He traced the vestiges of the ancient walls, which were composed of irregular quadrilateral masses of the local tufa, same of which were from 9 to 11 feet in length. Mr. Dennis, however, failed to discover any traces of them (Etruria, vol. i. p. I5), and describes the stone used in the fortifications of Veii, as being ent into smaller pieces than usoal in other Etruscan cities. These remains, which are principally to be traced in the N. and E., as well as the streams and the outline of the cliffs, determine the extent of the city in a manner that cannot be mistaken. They give a circumference of about 7 miles, which agrees with the account of Dionysius, before referred to, when he compares the size of Veii with that of Athens. It has been debated whether the isolated rock, called the Isola Farnese, formed part of the city. Nibly (Dintorni, vol. iii. p. 424) and others are of opinion that it was the ars or citadel. On the other hand Sir William Gell and Mr. Dennis hold that this could not have been the case; and it must be confessed that the reasons advanced by the Latter (vol. i. p. 42, note 5 ) appear decisive ; namely, 1, the Isola is separated from the city by a deep glen, so that, had it been the citadel, Camillus by its capture would not bave obtained immediate possession of the tomn, as we learn from Livy's narrative, before referred to, that he did : 2, the remains of Etruscan tombs on the Isola show that it must bave been a cemetery, and consequently without the walls. The two autborities last cited identify the citadel with the hill now called the Piazza $d^{\prime}$. Srmi at the SE. extremity of the town, in the angle formed by the junetion of the strean called Fosso de' due Fussi with that called Fosso di Formello. These two streams traverse the southern and eastern boundaries of ancient Veii, The Iatter of these streams, or Fosso di Formello, is thought to be the ancieot Cremera. The other rivnlet rises at La Torretta, about 12 miles from Rome. Near Veii it forms a fine cataract, precipitating itself over a rock about 80 feet high. From this spot it runs in a deep channel among precipices, and separates the Isola from the rest of Veii. It then receives the Rivo del Pino or della Storta, whence its name of Fosso de' due Fossi. After joiming the Fusso di Formello, or Cremera, the united stream is now called La lalca, and falls into the Tiber about 6 miles from Rome, near the Via Flaminia.

Topngraphers have discovered 9 gates, to which they have assigned imaginary names from local circumstances. It would be impossible to explain the exact sites of these gates withont the assistance of a plan, and we shall therefore content ourselves with enumerating them in the order in which they occur, premising only that all writers do not call them alike. The westernmost gate, called the P'orto de' Sette Pagi, from its being supposed to bare led to the district called the Septem Pagi, is situated near the Ponte dell Isola. Then proceeding round the S. side of the city, the next gate occars near the Fosso dell' Isola; and, from its leading to the rock of Isola, which,
as we have seen, was thought by some topographers to be the ancient citadel, has been called the Porla dell' Arce. The next gate on the E. is the Porta Campana; and after that, by the Piazza d' Armi, is the Perta Fidenate. Near this spotwas discovered, in 1840, the curious staircase called La Scaletta. Only eight steps of uncemented masoury, seated bigh in the cliff, renain, the lower part having fallen with the cliff. After passing the Pinzza d Armi, in traversing the northern side of the city by the valley of the Cremera, the gates occur in the following order: the Porta di Pietra Pertusa; the Porta delle Are Musie; the Porta Capenate; the Porta del Colombario, so named from the columbariumi near it ; and lastly the Porta Sutrina, not far from the Ponte di Furmello.

The Municipium Veiens, which succeeded the ancient town, was undoubtedly smaller ; for Roman sepulchres and colnmbaria, which must bive been outside the Municipium, havo been discovered within the walls of Etruscan Veii. It was perbaps not more than 2 miles in eircamference. On the spot probably occupied by the Formo, were diseovered the colussal beads of Augustus and Tiberius, and the colussal statue of the latter, crowned with oak and in a sitting posture, which are now in the Vatican, in the corridor of the Museo Chiaramonte. Several other framents of statues liave been found, as well as 24 marble columns, 12 of which notr adorn the Pia $=\sim c$ Culonna at Rome, and the rest are employed in the Chapel of the Sacrament in the nem Basilica of St. Paul.

Tbe remains of Etruscan Veii are portions of the walls, the bridge near the Porta di Pietra Pertusa, the bridge, or tumnel, called Ponte Sodo, and the tombs and sepulchral grottoes. Of the waills we have already spoken. The remains of the bridge consist of a piece of wall about 20 feet wide on the bank of the strean, which scems to bave formed the pier from which the arch sprung, and some large blocks of hewn tufo which lie in the water. The piers of the bridge called Punte Formello are also possibly Etruscan, but the arch is of Ruman brickwork. Thie Ponte Sodo is a tunuel in the rock through which the stream flows. Nibby (Ihintorni, vol iii. p. 433), describes it as 70 feet long, 20 wide, and 15 high: but Mr. Dennis, who waded tbrough it, says that it is 240 feet long, 12 to 15 wide aod nearly 20 high (Etruriu, vol. i, p. 14). It is in all probability an Etruscan excaration, or has at all events been enlarged by art. An ancient road ran over it ; and from above it is scarcely visible. No trace remaina of the cuniculus of Camulus. The vicinity of Veii abounds with tombs excavated in the ruck, and sepulchral tumuli, sume of which are Koman. Among the tombs is a very remarkable one, discovered in the winter of 1842, and still open to inspection. It consists of a long passage in the tumulus, or muund, catied Poggio Michele, leading to a door in the middle of the mound, and guarded at each end by sculptured lions. Thes is the entrance to a low dark chamber, hewn out of the rock, the walls of which are covered with paintings of the imost grotesque character, consisting of hurses, men, sphinxes, dugs, leopards, \&e. On either side a beteh of rock, about $2_{2}^{2}$ feet ligh, projects from the wall, on each of which, when the tomb was first opened, a skeleton reposed; but these soon crumbled into dust. One of them, from the arms lying near, was the remains of a warrior ; the other skeleton was probably that of lis wife. Ont the floor were large jars c intaining
human ashes, and also scveral small vases of the most arclaaic Etruscan pottery. Witbin was another smaller chamber also containing cinerary ums. A complete description of this remarkable sepulchre will be found in Mr. Demnis's Etruria (vol. i. ch. 2).

For the history and antiquities of Veii the following works may be consulted; Nibly, Dintorni di Roma, vol. iii, and Jiaggio Antiquario, vol. i. ; Canina, Lantica Cittit di l'eji descritta; Abeken, Mittelitalien; Miiller, Etrusker; Sir W. Gell, Topography of Rome and its I'icinity; Dernis, Cities and Cemeteries of Etruria.
[T. H. D.]
VELATODURUM, in Gallia, is placed by the Antonine Itin. on the road from Vesontio (Besançon) to Epamanduodurum (Mandeure) xxii. from Besancon and sii. from Mandeure. But these two numbers esceed the distance between $B$ esançon and Mondeure. The termination durum seems to show that Velatolurum was on a strean ; and D'Anville conjectures that it is near Clereval on the Doubs, where there is a place named Pont-pierre. But this is merely a guess. [Epandinduontrum.]
[G. L.]
VELAUNI, a people mentioned in the Troply of the Alps (Plin. iii, 20), between the Nerusil and Suetri. If the geographical pasition of zhese people corresponds to their position in Pliny's list of tribes, we know in a general way where to place them. [Nervsif ; Suetri.]
[G. L.]
IELDIDENA, one of the most important towns of Phaetia, on the sonthern bank of the river Oenus, and on the road leading from Tridentum to Auguta Vindelicorum. (It. Ant. pp. 258, 259, 275, 280.) According to coins which have been found on its site, it was made a Roman colony with the swmame Augusta. Its site is now occupied by the convent of IIilden in the neighbourhood of Insprack, on the little river Sihl. (See Roselmann, Felilitena Urts antiquissima Angusti Colonia, UIm, 1744, 4to.)
[I. S.]
VELELA (Eth. Velcias, ātis: Ru, near Montepultu), a town of Liguris, situated on the frontiers of Gallia Cisalpina, about 20 miles S. of Placentia (Piacenza), in the hills which form the lower slopes of the Apennincs. The Veleiates are mentioned by Pliny among the Ligurian tribes; and in anuther passage be speaks of "oppidum Velciatium," which was renarkable for the longevity of some of its inlabitants (vii. 49. s. 50). He there describes it as situated " circa Placentian in cullibus," but its precise site was muknown until its remains were discorered in 1760. From the mode in which these are buried, it seems certain that the town was overwhelmed by a vast landslip from the neighbouring mountain, Systematic excavations on the spot, which bave heen carried on since 1760 , have brount to light severad buidings of the ancient city, including the amplitheatre, a basilica, the formm, and several temples: and the great number of bronze ornaments and implements of a domertic kind, as woll as statues, busts, \&e., which have been diseovered on the spot. have given celetsity t, Veleia ts the Pompeii of Northern Italy. Unformately the great weight of the superineumbent mats has crushed in the buildinus, so that all the upper part of them is destroyed, and the larger statues have suffered severely from the same cause. The inscriptions found there attest that Velcin was a flomishing municijal town in the first eruturies of the Roman Empire. One of these is of peculiar interest as containing a detailed accosnt of the investment of a large suin of money by the en-
peror Trajan in the purchase of lands for the main tenance of a number of poor children of both sexes. This remarkable document contains the names of numerous farms and villages in the neighbourhood of Yeleia, and shows that that town was the capital of an extensive territory (probably the same once held by the Licurian tribe of the Velciates) which was divided into a number of Pagi, or rural districts. The names both of these and of the warious "fundi" or farms noticed are almost unifommly of Roman origin, - thos affording a remarkable proof how completely this district had been Romanised before the periud in question. The Tabula Alimentaria Trajana, as it is commonly called, las been repeatedly published, and illustrated with a profusion of learning, especially by De Lama. (Tavola Alimentaria Veleate detta Trojana, 4to. Parma, 1819.) A description of the rains and antiquities has been published by Antolini (Le Rovine di Vel-ja, Milano, 1819). The coins found at Veleia are very numerons, but none of them later than the time of Probas: whence it is reasonably inferred that the catastrople which buried the city occurred in the reign of that empeyor.
[E. H. B.]
VELIA (Oủé $\lambda ı a$ or Obé $\lambda \in l a$, Ptel, ii. 6. § 65), a town of the Caristi in Hispauia Tarraconensis, on the road from Pompelo to Asturica (Itin. Ant. p. 454, where it is called Belein). (Cf. Jlin. iii. 3. s. 4: (ieogr. Rav. iv. 43.) Variously identified with Jǐina, Eernedo, and Lruña. [T. H. D.]
 E $\lambda \in a ́ \tau \eta s$, Veliensis: Castcll' a Mare della Brucca), one of the principal of the Greek colonies in Southern Italy, situated on the shores of the Tyrrhenian sea, about midway between Posidonia and Pyxas. There is some uncertainty respecting the correct form of the name. Strabo tells us that it was originally called IJyele ( $\mathrm{r} \epsilon \lambda \eta$ ), but was in his day called Elea ( ${ }^{\prime} \mathbf{E} \lambda(\alpha)$ ), and Diugenes Laertius also says that it was at frot called Hyele and afterwards Elea, (Strab, vi. p. 252; Diog. Laert. ix. 5. § 28; Steph, B. s.v.) But it is certain from the evidence of its coins, which uniformly bear the legends ' $\mathrm{XE} \triangle \mathrm{H}$ and 'YEAHT』N, that the name of Hyele continued in use among the people themselves as long as the city continued ; while,on the other hand, the name of 'EA\& $\alpha$ is already found in Scylax (p. 4. § 12), and seems to have been certainly that in use among Attic writers from an early period, where the Eleatic school of philosophy rendered the name familiar. Strabo aiso tells as that some authors wrote the name Ele ( ${ }^{*} E \lambda \eta$ ), from a fountain of that name; and this form, compared with 'Yé $\lambda \eta$ and the Latin form Velia, seems to show clearly that the diversity of names arose from the Acolic Disamma, which was probably oricinally prefixed to the name, and was retained in the native usage and in that of the Romans, while it was altorether dropped by the Attics. (Minter, Yclia, p.21.) It is not improbable that the name was derived from that of the neighlouing river, ti:e Ilales of Cicero (Alento), of which the name is written 'Enéns by Strabo and Bèéa by Stephanus of Byzantimm. (Cic. ad Fam, vii. 20; Strab, vi. p. 254.) Others, however, derived it from the marshes ( $\overline{\text { ( }} \lambda \eta$ ) at the mouth of the same river.

There is no trace of the existence of any town on the site of Telia before the establislment of the Greck colony there, and it is probable that this, like most of the Greek culonies in Southeru Italy, was founded on a wholly new site. It was a colony from Pbocaes in Ionia, and derived its origin from the voluntary ex-
patriation of the inhabitants of that city in order to avoid falling under the Persian yoke, at the time of the conquest of Ionia by Harpagus, B. c. 544 . The Phocaean emigranta proceeded in a body to Corsica, where they had already fonnded the colony of Alalia about 20 years before; and in the first instance established themselves in that island, but, having provoked the enmity of the Tyrrhenians and Carthaginians by their piracies, they snstained such severe loss in a paval action with the conbined fleets of these two powers, that they found themselves compelled to abandon the colony. A part of the emigrants then repaired to Massilia (which was also a Phocaean colony), while the remainder, after a temporary halt at Rheginm, procceded to fonnd the new colony of Hyele or Velia on the coast of Lucania. This is the account given, by Herodotus (i. 164167), with which that cited by Strabo from Antiocbus of Syracuse suhstantially agrees. (Strab. vi. p. 254.) Later writers have somewhat confused the narrative, and bave represented the foundation of Massilia and Velia as contemporaneons (Hygio. ap. A. Gell. x. 16; Ammian. Mare. xv. 9. § 7); but there is no doabt that the account above given is the correct one. Scylax alone represents Velia as a colony of Thurii. (Scyl. p. 4. §§ 12.) If this be not altogether a mistake it must refer to the admission at a later period of a body of fresh colonists from that city; but of this we find no trace in any other anthor. The exact date of the foundation of Velia cannot be determined, as we do not know bow long the Phocaeans remained in Corsica, bnt it may be placed approximately ut about 540 B . с.

There is no donbt that the settlers at Velia, like those of the sister colony of Massilia, followed the example of their parent city, and devoted themselves assiduonsly to the cultivation of commerce; nor that the city itself quickly becanne a prosperous and flourishing place. The great abundance of the silver coins of Velia still in existeace, and which are found tbroughout the S. of Italy, is in itself sufficient evidence of this fact; while the circumstance that it became the seat of a celebrated school of philosophy, the leaders of which continued through successive generations to reside at Velia, proves that it must have been a place of much intellectual refinement and cultivation. Bnt of ita history we may be said to know absolutely nothing. Strabo tells us that it was remarkable for its good government, an advantage for which it was partly indebted to Parmenides, who gave his fellow-citizens a code of laws which the magistrates from year to year took an oath to obey. (Sirab. ri. p. 254 ; Diog. Laert. ix. 3. § 23.) But the obscure story concerning the death of Zeno, the disciple of Parmenides, who was put to death by a tyrant named Nearchus or Diomedon, would seem to show that it was not free from the same kind of violent interraptions by the rise of despotisms as were common to mast of the Greek cities. (Diog. Laert. ix. 5; Cic. Tusc. ii. 22.) Strabo also tells as that the Eleans came off victorious in a contest with the Posidonians, but of the time and circumstances of this we are wholly ignorant; and he adds that they maintained their ground against tbe Lucanians also, (Strab. l.c.) If this is correct they would have been one of the few Greek cities which preserved tbeir national existence against those barbarians, but their name is not found in the scanty bistorical notices that we possess of the wars between the Lacanians and the eities of Magna Graecia. But the statement of Strabo is in some
degree confirmed by the fact that Velia was certainly admitted at an early period (though on what occasion we know not) to the alliance of Rome, and appears to have maintained very friendly relations with that city. It was from thence, in common with Neapolis, that the Romans habitually derived the priestesses of Ceres, whose worship was of Greek origin. (Cic, pro Balb. 24: Val. Max. i. 1. § 1.) Cicero speaks of Velia as a well-known instance of a "foederata civitas," and we find it meotioned in the Second Punic War as one of those which were bound by treaty to contribute their quota of ships to the Roman fleet. (Cic. l. c.; Liv. xxvi, 39.) It eventually received the Roman franchise, apparently in virtne of the Lex Julia, в. c. 90. (Cic. l. c) Under the Roman government Velia continued to be a tolerably flourishing town, and seems to have been from an early period noted for its mild and salubrious climate. Thus we are told that P. Aemilius was ordered to go there by his physicians for the benefit of his bealth, and we find Horace making inquiries about it as a substitute for Baise. (Plut. Acmil. 39; Hor. Ep. i. 15. 1.) Cicero's friend Trebatius had a villa there, and the great orator himself repeatedly touched there on his voyages along the coast of Italy. (Cic. Verr. ii. 40, v. 17, ad Fam. vii. 19, 20, ad Att. xvi. 6, 7.) It appears to have been at this period still a place of some trade, and Strabo tells us that the poverty of the suil compelled the inhabitants to turo their attention to maritime affairs and fisheries. (Strab. vi. p. 254.) It is probable that the same cause had in early times co-operated with the natiooal disposition of the Phocaean settlers to direct their attention especially to maritime commerce. We bear nothing more of Velia under the Roman Empire. Its name is fuond in Pliny and Ptolemy, but not in the Itineraries, which may, however, probably proceed from its secladed position. It is mentioned in the Liber Coloniarum ( $\mathrm{p}, 209$ ) anoong the Praefecturae of Lucania; and its continned existence as a municipal town is proved by inseriptions, (Mommsen, Inscrip. R. N. 190, App. p. 2.) It became an episcopal see in the early ages of Christianity, and still retained that dignity as late as the time of Gregory the Great (A. D. 599). It is probable that the final decay of Velia, like that of Paestum, was owing to the ravages of the Saraceas in the Sth and 9 th centuries. The bishopric was united with that of Capaceio, which had succerded to that of Paestum. (Miunter, Velia, pp. 69-73.) During the middle ages there grew up on the spat a fortress which was called Castell' a Mare della Brucca, and which still serves to mark the site of the ancient city.

The ruins of Velia are situated on a low ridge of hill, which rises about a mile and a half from the mouth of the river Alento (the ancient Hales), and half a mile from the coast, which here forms a shallow but spacious bay, between the beadland formed by the Monte della Stella and the rocky point of Porticello near Ascea. The mediaeval castle and village of Castell a Mare della Brucca occupy the puint of this hill nearest the sea. The outline of the ancient walls may be traced at intervals round the hill for their whole extent. Their circuit is not above two miles, and it is most likely that this was the old city or acropolis, and that in the days of its prosperity it had considerable suburbs, especially in the direction of its port. It is probable that this was an artificial basio, like that of Metapontum, and its site is in all probability marked by
a marsly ponl which still exists between the ruins of the ancient city and the month of the Alento. This river itself, hewever, was sufficient to afford a shelter and place of anchorage fer shipping in ancient times (Cic. ad Att. xvi. 7), and is still resorted to for the same purpose by the light vessels of the country. No other ruins exist on the site of the ancient city except some masses of buildings, which, being in the reticulated style, are unquestionably of Roman date: portions of aqueducts, reservoirs for water, \&c. are also visible. (The site and existing remains of Velia are described by Minter, Velia in Lacmien, 8vo. Altona, 1818 , pp. 15-20, and by the Duc de Luynes, in the Annali dell Instituto, 1829, Pp. 381-386.)

It is certain that as a Greek colony Velia never rase to a par with the more opulent and flourishing cities of Magna Graeeia. Its chief celebrity in ancient times was derived from its celebrated school of philosophy, which was universally known as the Eleatic school. Its founder Xenophanes was indeed a native of Colophen, but had established himself at Velia, and wrote a long poenn, in which he celebrated the foundation of that city. (Diog. Laert. ix. 2. § 20.) His distinguished successors Parmenides and Zene were Leth of them born at Velia, and the same thing is asserted by some writers of Levcippus, the founder of the atomic theory, theugh others represent bin as a native of Abdera or Melos. Hence Diogenes Laertius terms Velia "an inconsiderable city, but capable of producing great men" (ix. 5. § 28).
[E. H. B.]

COIN OF VELIA.
VELINUS (İelino), a consilerable river of Central Italy, which has its sources in the lofty group of the Aphnines between Nursia (Nureia) and Interecrea (Antrodoco). Its actual suurce is in the immediate neighbourhond of the ancient Falaryinum, the birthplace of Vespasion, where an old church still lunars the name of Sta Maria di Fonte Velino. The upper, Irart of its course is from N. to $太$; but near Antroduco it turns abruptly to the W., pursues that direction as far as Riett, and thence flows about NNW. till it discharges its waters inte the Nar (Neru) abont 3 miles above Tirni (ioteramna). Just before reaching that river it finms the celebrated cascade now known as the Falls of Terni or Cascata delle Varmore. This watertall is in its present form wholly artificial. It was first formed by M1. Curims I entatus, who opened an artificial channel for the waters of the Velinus, and thus carried off a comsiderable part of the Lacus Velimas, which prexionsly oecupied a great part of the valley below lieate. There atill remained, how-ver, as there does to this day, a con-ifimathle lake, called the Lacus Villinus, and now known as the Lago di Pï di Lugo. It was on the banks of this lake that the villa of Axius, the friend of Cicero and Varro, was sit aated. (Cic. ad Att. iv. 15; Yarro, R.R. ii. 1, 8.) Several smatler lakes still exist a little higher up the valley: bence we find 1'liny speaking in the plaral
of the Velint Lacus (Plin. iii. 12. s. 17; Tae, Aun. i. 79; Vib. Seq. p. 24.) The character and conformation of the lower valley of the Velinus are fully described in the article Rwatz. Pliny has made a complete confusion in lis description of the Nar and Velinus. [Nar.] The latter river receives near licti two considerable streams, the Salto and the Turano: the ancient name of the first is tuknown to us, but the second is prubahly tho Tolenus of Ovid. (Fast. vi. 565.) It flows from the menntain district unce occupied by the Aequiculi, and which still retains the name of Ciculano. [Tolents.]
[E. H1. B.]
VELITHAE (OÜénstpas: Eith. Oùe入ıtpayós, Veliternus: Velletri), a city of Latium situated on the southern slope of the Alban hills, looking over the Pomptine Marshes, and on the left of the Via Appia. There can be no doubt that it was included within the limits of Latium, as that name was usnally understood, at least in later times : but there is great mencertainty as to whetber it was originally a Latin or a Volsrian city. On the one hand Dienysius includes the Veliterni in his list ef the thirty citics of the Latin Leagne, a document probably derived from grond authority (Dionys. v. 61). On the other band both Dinasins himself and Livy represent Velitrae as a Volscian city at the earliest period when it came into collision with Rome. Thus Dienysius, in relating the wars of Ancus Marcins with the Volacians, speaks ef Velitrae as a city of that people which was besieged by the Foman king, but submitted, and was received te an alliance en favourable terms. (Id. iii. 41.) Again in n. c. 494, just about the peried when its name figures in Dionysius as one of the Latin cities, it is mentioned beth by that auther and by Livy as a Volscian city, whicb was wrested from that people by the consul P. Virginius (Id. vi. 42 ; Liv. ii. 30 ). Accerding to Livy a Roman colony was sent there the same year, whicb was again recruited with fresh celonists two years aflerwards. (Liv. ii. 31, 34.) Dionysius, on the contrary, makes no mention of the first celony, and represents that sent in B C. 492 as designed to supply the exbausted pepulation of Velitrae, whicb had heen reduced to a low state by a pestilence. (Dionys. vii. 13, 14.) It appears certain at all events that Velitrae received a Roman colony at this period ; but it had apparently agnin fallen into decay, as it received a secend budy of colonists in 1s. C. 404 . (Diod. xiv. 34.) Even this did not suffice to secure its allegiance to Rome : shortly after the Gaulish war, the Ruman colonists of Velitrae joined with the Volscians in their hostuluties, and after a short time broke out into open revolt. (Liv. vi. 13, 21.) They were indeed defeated in B. C. 381 , together with the I'raenestives and Volscians, whe snpported them, and their city was taken the nest year (ib. 22, 29); but their history from this time is a continued succession of outbreaks and hustile enterprises against Rome, alternating with interyals of dubious peace. It seems clear that they had really assumed the position of an independent city. like thase of the neigbbouring Volscians, and though the Romans are said to bave more than once taken this city, they did not again restare it to the pasition of a Ruman colony. Thus notwithstanding its capture in 1. C. 380 , the citizens were again in arms in 370 , and not only ravaged tho territories of the Latins in alliance with Rome, but even laid siege to Tusculam. They were quickly defeated in the lield, and Velitrac itself in its turn was besieged by a loman arny ; but the siege
was protracted for more than two years，and it is not quite clear whether the city was taken in the end． （Liv．vi．36，37，38，42．）In B．c． 358 they again broke out，and ravared the Roman territories，but we hear nothing of their punishment（Liv．vii．15）：and in B．C．340，on the outbreak of the great Latin War， they are represented as among the first to join in the defection．It is evident indeed that they were at this time still a powerful people ：their troops bore an important part in two successive campaigns， but shared in the general defeat of the Latins on the hanks of the Astura，B．c． 338 ．（Liv．viii．3，12， 13 ； Fast．Capit．）After the close of the war they were selected for the severest punishment，on the especial ground of their having been originally Roman citizens． Their walls were destroyed，and their local senators transported beyond the Tiber，under a severe pe－ nalty in case of their return．Their place was，bow－ ever，supplied by a body of fresh colonists，so that the city continued to be not less populous than be－ fore．（Liv，viii．14．）

From this time Velitrae sauk into the condition of an ordinary municipal town，and we hear little of it in listory．It is mentioned incidentally on occasion of some prodigies that occurred there（Liv． xxx .38 ， xxxii．1，9），but with this exception its name is not again mentioned till the close of the Republic．We hear，however，that it was a flourishing municipal town，and it derived some celebrity at the commence－ ment of the Empire from the circumstance of its having been the native place of the Octavian family， from which the emperor Augustus was descended． The Octavii indeed claimed to be descended from the ancient Roman family of the same name；but it is certain that botb the grandfather and great－grand－ father of Augustus were merely men of equestrian rank，tho beld monicipal magistracies in their native town．（Suet．Aug．1， 2 ；Dion Cass．xly．1．）Ac－ cording to the Liber Colonianum，Velitrae had received a fresb body of colonists in the time of the Gracebi ；but it contimued to retain its municipal rank until the reign of Claudius，wben it receired a military colony，and from this time assumed the title of a Colonia，which we fird it bearing in inscrip－ tions（Lib．Colon．p． 238 ；Zumpt，de Col．p． 383 ； Orell．Inser．1740，3652）．No mention of the city occurs in bistory under the Ruman Empire，but its name is found in the gengraphers，and inscriptions testify that it contimed to exist as a flourishing town down to near the close of the Empire．（Strab． v．p． 23 ；Plin．iii．5．s． 9 ；Sil．Ital，viii． 376 ； Nibby，Dintorni，vel．iii．p．450．）It appears to have subsequently suffered severely from the ravages of the barbarians，but continued to subsist through－ out the middle ages：and the mollern city of Velletri still occupies the site of the ancient one，though it has no remains of antiqnity．Its position is very similar to that of Lannvium（Civita Lavinitu）， on a projecting rock or spur of bill，standing out from the more elevated group of the Alban hills，and rising like a headland above the plain of the Pomp－ tine Marshes，which lie stretched out beneath it． The inseriptions which have been di－covered there have been published by Cardinali（Inscrizioni Anticke Veliterne， 4 to．Roma，1823）．From one of these we learn that the ancient city possessed an amplitheatre， which was repaired as late as the reign of Valen－ tinian，but no traces of it are notr risible．It had also temples of Apolio，Hereules and Mars，as well as of the Sabine divinity Sancus．（Liv，$x x$ xii．1．）

Pliny notices the territary of Velitrae as produciag
a wine of great excellence，inferior only to the Faler－ nian（Plin，xiv，6，s．8）．
［E．H．B．］
VELLAVI or VELAUNT，a people of Gallia． In the passage of Caesar（B．G．vii，75）some editions bave Velauni，but it is certain that what－ ever is the true form of the name，these Velauni are the Vellaioi（OU̇e入入aiot）of Strabo（p．190）．The Gabali and Velauni in Caesar＇s time were subject to the Arverni．In 1＇tolemy（ii．7．§ 20）the name is Velauni（Oúeiaovot），but he puts them next to the Anscii，which is a great mistake．D＇Anville says that the diocese of $P u i$ represents their ter－ ritory ；but that this cannot be said of the small province of Vellay，which was annexed to Languedoc in the aute－revolutionary division of France．In the Notit．of the Provinces of Gallia，the capital of the Vellavi is Civitas Vellavorum［lievessto］．［G．L．］

VElLaUNI．［Yelauni．］
Vellaunodunun，in Gallia．In e．c． 52 Caesar，leaving two legions and all the baggage at Agedincum（Sens），mirches on Genabum（Orleans）． On the second day be reaches Vellaunodunum． （B．G．vii．1I．）In two days Caesar made a vallum round Vellanoodunum，and on the third day the place surrendered，and the people gave up their arms．There is no evidence about the site of Vel－ launodunum，except that it was on the roal from Sens to Orléans，and was reached in the second day＇s march from Sens，and that Caesar reached Orleans in two days from Vellaunodunum．Caesar was marching quick．D＇Auville conjectures that Vellaunodunum may be Beaune，in the old province of Gatinois；for Beaune is about 40 Roman miles from Sens，and the Roman army would march that distance in tro days．Beaune is named Belna in the Pagus Vastineosis（Gütinois，Gastinois，Vas－ tinois；Vapincum），in the acts of a council held at Soissons in 862，and D＇Auville thinks that Belna may be a corruption of Vellanna，which is the name of Vellanaodunum，if we cut off the termination dunum．（D＇Anville，Notice，¢c．）
［G．L．］
VElleta［Veleia］．
VE＇LliCA（Ovéллика，Ptol．ii．6．§51），a town of the Cantabri in IIispania Tarraconensis．Ulsert （ii．pt．i．p．144）places it in the neighbourhood of Villelba，to the N．of Aquilar de Campo．［T．H．D．］

VELLOCASSES．［Velocasses．］
VELOCAssES，as Caesar（B．G．ii．4）writes the name，Vellocasses in Pliny（iv．18），and in Ptolemy Óveve入toкá $\sigma$ tot（ii．8，§ 8）．Caesar places them in the country of the Belgae，and consequently north of the Seine．The number of fighting men tbat they could muster in B．C． 57 was estimated at to，000，unless Caesar means that they and the Veromandui together had this nomber．In the di－ vision of Gallia by Augustus，the Velocasses were included in Lugdunensis．Their chief town was Rotomagus（Rozen）on the north bank of the Seine． West of the Velocasses were the Caleti，whose country extended along the coast Dorth of the Seine． That part of the country of the Velocasses which is between the rivers Audelle and Oise，became in modern times Vexin Normand and Vexin Fronçais， the little river Ejpte forming the boundary between the two l＇exins．
［G．L．］
VELPI MONTES（ 〒à Oй́ § 8），a range of mountains on the W．borders of Cyrenaica，in which were the sources of the river Lathon．
［T．H．D］
VELTAE（Ov̉é $\lambda$ taц，Ptol，iii．5．§ 22），a peoplo of European Sarmatia，dweling on both banks of 4 M 3
the river Rhubon, identical, according to Ukert (iii. pt. ii. p. 435), with the Sclavonian Velcti, or Lutizi, who dwelt on the Oder.
[T, II, D.]
VEMA NIA, a town of Vindelicia, on the road between Angusta Vindelicorum and Brigantium (It.Ant. Pp. 237, 251, 259; Tab. Peut.). seens to have been a place of sonve importance, as it was the station of the 1refect of the third legion, who lad to guard the frontier from this town to Campodunum. (Vot. Imp.) The place now occupying the site is called H angen. [L. S.]

VENAFILDM (OÚévaфpov: Eth. Venafranus : Venafro), an iuland city of Campania, situated a the upper valley of the Vulturnus, and on the Via Latina, 16 miles from Casiumn and 18 from Teanum. (Itin. Aut. p. 303.) It was the last city of Campania towards the N., its territory adjuining on the W., that of Casinum (S. Germano), which was incladed in Latium, in the more extended sense of that name, and that of Aeserma on the NE., which formed part of Samnium. It stond on a hill rising above the valley of the Vulturnus, at a short distance from the right bank of that river. (Strab. v. j. 238.) No mention is found in history of Venafrum before the Roman conquest of this part of Italy, and it is uncertain to what people it originally belonged; but it is probable that it had fallen into the hands of the Samnites before that people came into collision with Rome. Under the Roman government it appars as a flourishing municipal town: Cato, the most ancient author by whom it is mentioned, notices it as having manufuctures of spades, tiles, and ropes (Cato, $R . R$. 135) : at a later period it was more noted for its tiil, wbich was celebrated as the best in Italy, and supplied the choicest tables of the great at Rome under the Empire. (Hur. Carm, ii. 6. 16, Sat. ii. 4. 69 : Juv. v. 86 : Martisl, xili. 98 ; Strab. v. pp. 238, 242: Varr. R. R. i. !. §̇ 6; Plin. xr. 2. s. 3.)

The only occasion on which Venafrum: figures in history is during the Social War. R. c. 88 , when it w:as betrayed into the bands of the Samnite leader Marius Egnatius, and two Roman cohorts that formed the garrisan were put to the sword. (Appian, B. C. i. 41.) Ciceromore than once alludes to the great fertility of its territury (Cic. de Leeg. Agr. it. 25, pro Planc. 9), which was une of those that the tribnne Rulus proposed by his agrarian law to divide amone the koman citizens. This project proved abortive, but a colony was planted at Venafrum under Aucustus, and the city comimued henceforth to lear the title of a Colouis, which is found both in 1'liny and in inseriptions. (Plin. iii. 5. s. 9 ; Litb. (wl. p. 233; Zumpt, de Colon. p. 347; Mommsen. Inser. K.N. 4643.4 Tu3.) These last, which are very mumeroms, sulticiently attest the flourishing condition of Venafrum under the Koman Einpire : it continued to subsint thronghout the middie ages, and is still a tawn of about 4000 inhabitants. It retains the nncient site as woll as name, but has few vestiges of autiquity, except the iuscriptions above mentioned and some shapeless fratments of an elifice supposed (1) bave been an anplitheatre. The inscrpitions are published by Nummsen. (Iuser. R. N., pp. 243-243.)
[ह. H. B.]
VENANFODCNDM, apparently a torn of the Catyeuchlani in Britanuia Romana, perhnps Luuntinglon. The name appears in the Not linp.; thungh Camden (p. 502) notes it as coined by J, tland.
[T. H. D.]
TENASA (Ovinva\%a), a raher important town in the district of Morimene in Cappalncia, pussessing a celebrated temple of $\angle \mathrm{c} u$, to whech no lyss than

3000 slaves belonged. The high priest enjoyed ant annual ineome of fifteen talents, arising from the produce of the lands belonging to the temple. This sacerdotal dignity was held for life, and the priest was next in rank to the high priest of Comana. (Strab. xii. p. 537.)
[L. S.$]$
TENDUM (OUG $\begin{aligned} & \text { Oov, Strab. iii. P. 207, vii. p. }\end{aligned}$ 314), a town of the Iapodes in M11yria, and on the borders of Pannonia It is probably the modern Hindisch-Grätz; but some have identified it with Brindjel.
[T. H. D.]
VE'NEDAE (Oúev' $\delta$ ou, Ptol. iii. 5. § 19), or VEXED1 (Tac. Germ. 46; Plin. iv. 13. s. 27), a considerable people of European Sarmatia, situated on the $N$. declivity of the mountains named after them, and along the Sinus Venedicus abont the river Clironos, and as far as the E. bank of the Vistula. They were the northern neighbowrs of the Galindac and Gythones; but Tacitus was doubtful wbether he should call then Germans or Summatians, though they more resembled the former than the latter in some of their customs, as the building of houses, the carrying of shields, and the lyabit of going on foot, whilst the Sarmatians travelled on lrorseback or in waggons. They sought a precarions livelihood by scouring the woods and mountains which lay between the Peucini and the Fenni. Whether they were the forefathers of the Wends is very problematical. (Cf. Schaffarik, Slaw. Altherth. i. p. 75, seq.. p. 151, seq. \&e., Ueber dic Abkunft der Slanen, p. 24.)
[T. H. D.]
 iii. 5. § 15), certain mountains of European Surnatia, bounding the territory of the Venedne on the S. They were probably the low chain of hills which sejarates Fast Prassia froni Polmed. [T. II. D.]
 iii. 5. § 1), a bay of the Sarmatian ocean, or Baltic, named after the Venedue who dwelt upon it. It lay to the E. of the Vistula, and was in all probability the Gulf of Riga; a viow which is strengthened by the name of J"indau belonging to a river and town in Courland.

VE'NERIS PHOM. [Hispania, Vol. I. p. 1084.]
VE"NEIL (Oí'vethi), a Celtic people, whose country Cacsar names Venetia (B. G. iii. 9). The Veneti lived on the const of the Atlantic (B. G. ii. 34), surd were one of the Armoric or Maritime states of Celtica. On the sunth they burdered on the Namnetes or Nannetes, on the east they had the Redones, and on the nortb the Osisnsii, who occnpied the most, western part of Bretagne. Strabo (iv. p. 195) made a great mistake in supposing the Yeneti to be Belgac. He also supposes then to be the progenitors of the Veneti on the coast of the Hadriatic, whom others supposed to be Paphlagonians ; however, he gives all this only as conjecture. The chief town of tho Yencti was Dariorizum, afterwards Veneti, now 1'anzes [Dsisonbevm.] The river V'ilaine may have been the southern boumlary of the Veneti.

Ciesar (II. G. ïi. 9) describes the coast of Venetia as cut up by aestuaries, which interrapted the commanication by land along the shore Most of the towns (Ib. 12) were situated at the extremity of tongues of land or peninsulas, so that when tbe tide was up the towns could not be reached on foot, मor could ships reach them during the ebb, for tha rater was then too shallow. This is the cbaracter
of the coast of the French department of Morbilhan, which corresponds pretty nearly to Caesar's Venetia. On this coast there are many bays and many "lingulae " as Caesar calls them (Fointes). The most remarkable peoiusula is Quiberon, which runs out into the sea near 10 miles, and is insulated at high water. The Veneti commanded the sea in these parts, and as the necessities of navigation often drove vessels to their ports, they made them pay for the shelter. The Veneti had trade with Britain, with Devonshire and Cornvall, the parts of the island which were nearest to them. They were the most powerful maritime state on the Atlantic.
Their vessels were made nearly flat-bottomed, in order that they might the better take the ground when they were left dry by the ebb. The heads were very high, and the sterns strong built, to stand the violence of their seas. The material was oak. Instead of ropes they had chain cables, the use of which has been revived in the present century. Strabo (iv. p. 195) writes as if the ropes of the rigging were chains, which is very absurd, and is contradicted by Caesar, who says that the yards were fastened to the masts by ropes, which the Romans cut asunder in the sea-fight with the Veneti (iii. 14). Instead of sails they used skins and leather worked thin, either becanse they had no flax and did not know its use, or, as Caesar supposes it to be more likely, becanse flaxen sails were not suited for the tempests of that coast.
The Veneti rose against the Romans in the winter of e.c. 57, and induced many otber neighbouring states to join them, even the Murini and Menapii. They also sent to Britain fur help. Caesar, who was absent in Italy during the winter (n.c. $57-$ 56), sent orders to bnild ships on the Loire, probably in the territory of the Andes, Turones and Carnutes, where his legions were quartered, and the ships were floated down to the Ocean. He got his rowers from the Provincia. In the meantime he came himself into Galli.i. He protected his rear acainst attack by sending Labienns to the country of the Treviri, to keep the Belgae quiet and to stop the Germans from crossing the Rhine. He sent 1'. Crassus with twelve colorts and a large body of cavalry ioto Aquitania to prevent the Celtae from receiving any aid from these parts; and he kept the Unelli [Uvelis], Curissolites and Lexovii in check by sending Q. Titurias Sabinus into those parts with three legions. D. Brutus commanded Cacsar's fleet and the Gallic ships fornisted by the Pictones and Santones, and other states that had been rednced to obedience.

Caesar began the campaign by besieging the Venetian towns that were situated on the extremities of the tongues of land; but as the Veneti had abundance of ships, they removed themselves by water from one town to another, when they could no longer resist the besieger. They did this during a great part of the summer, and Caesar could not prevent it, for he bad not yet got together all liis ships. After taking several of their towns he waited for the remainder of his fleet. The Veneti with about 220 of their best equipped ships came out of port to meet the Romans. The Roman ships conld not do the Gallic ships any damage by driving the heads of their ressels against them, for the Gallic slips were too high at the prow and too strong; nor could the Romans bave attacked them by raising wooden frameworks on their đeecks, for the Gallic ships were too high. The only advantage
that the Roman ships had was in the oars, which the Gaillic ships had not. They could only trust to their sails. The Romans at last fixed sharp hooks at the end of long poles, and laying hold of the enemy's rigging with them, and thea putting their own vessels in motion by the oars, they cut the ropes asunder, and the yards and sails falling down, the Venetian slips were useless. Everything now depended on courage, in which the Romans liad the advantage; and the men were encouraced by the presence of Caesar and the army, which occopied all the hills and higher ground which commanded a view of the sea. The Roman ships got round the Venetian, two or three about each, for they had the advantage in number of vessels, and the meo began to board the eneny. Some ships were taken and the rest tried to sail away, but a dead calm came on and they conld not stir. A very feer ships escaped to the land at nightfall. The battle lasted from the fourth hoor in the morning to sunset. Thus was destroyed the first naval power that was formed on the coast of the Atlantic. The Veneti lost their ships, all their young men of fighting are, and most of their mea of mature age and of rank. They surrendered unconditionally. Caesar put to death all the members of the Venetian state assembly, on the ground that they had violated the law of nations by imprisoning Q. Velanins and T. Silius, who had heen sent into their country in the previous winter to get sapplies for the Roman troops who were quartered along the Loire (B.G. ïi. 7, 8). The rest of the people were sold by auction; all, we must suppose, that Caesar could lay hold of. Thus the territury of the Veneti was nearly depopulated, and an active commercial people was swept from the earth. The Veneti never appear again as a powerful state. When Vercingetorix was ronsing all Gallia to come aguinst Caesar at Alesia (8.c. 52), the contingent of all the Armoric states, seven or eight in number, was only 6000 men (B.G. vii. 75).
Dion Cassius (xxxis. 40-43) has four chapters on the history of this Venetian war, which, as ustal with him, he puts in confusion, by misunderstandiog Caessr and making his omu silly additions. [G. L.]
VENETIA (OUuevetia: Eth. Oúéve oos or ${ }^{\circ}$ Evévos, Venetus), a province or regiun of Northern ltaly, at the head of the Adriatic sea, estending from thie foot of the Alps, where those mountains descend to the Adriatic, to the mouthis of the Padus, and westward as far as the river Athesis (Adlige), or the lake Benacus. But the boundaries of the district seem to have varied at different times, and there is some difficalty in determining them with accuracy. In early times, indeed, before the Roman conquest, we have no account of the exact line of demarcation between the Veneti and the Cenomani, who adjoined them on the W., though according to Livy, Verona was a city of the latter people (v. 35). After the Roman conquest, the whole of Veretia was at first included as a part of Cisalpine Ganl, and was not separated from it till the time of Augustus, who constituted his Tenth Region of Venetia and 1.tria, but including within its limits not only Verona, bnt Brixia and Cremona also (Plin. iii. 18. s. 22, 19. s. 23), both of which were certainly cities of the Cenomani, and seem to have continued to be commonly considered as belonging to Cisalpine Gaul. (Itol. iii. 1. § 31.) Soine authors, however, extended the appellation of Venetia still further to the W., so as to inclade not only Brisia and Cremona, but Bergomum also, and regarded the Addua as the boundary
(P. Diac. Ilist, Lang. ii. 14). But in the later period of the Roman Vimpire the Athesis seems to have been generalls recugnised as the W. boundary of Venctia, though oot so strictly as to exclude Veroua, the greater part of which was situated on the right bank of the river. Towards the N . the boundary was equally indefnite: the valleys and southern slopes of the Alps were occupied by Rlisetian and Euganean tribes; and it is probable that the limit between these and the Veneth, on thieir S . frontier, was always vague and arbitrary, or at least determined merely by nationality. oot by any geograpbical boundary, as is the case at the present day with the German and Italian races in the same recion. Thus Tridentum, Feltria, and Beluoum, were all of them properly Rhaetian towns (Plin. iii. 19. s. 23), though included io the Tenth Region of Augustns, and for that reason often considered as belonging to Venetia.

On the E. the limits of Venetia were more definite. Tbe land of the Carni, wbo occupied the grenter part of the modern Frioul, was generally considered as comprised within it, while the little river Formio (Risano), a few miles S. of Tergeste, separated it frum Istria. (Plin. iii. 18. s. 22.) Seseral authors, however, regard Tergeste as an Istrian city [TERgeste ]. and must therefore bave placed the bonodary either at the Timarus, or where the Alps come down so close to the sea, between that river and Tergeste, as to prevent the road being continued along the coast. There can be no doubt that this point forms the nataral boundary of Venetia on the E, although the Formio continued under the Roman Empire to constitute its political limit.

The physical peculianities of the region thus limited are very remarkalle. Tbe greater part of Venetia is, like the neighbouring tract of Cisslpiue Gaul, a broad and level plain, extending, without interruption, to the very font of the Alps, and farrowed by numerous streams, which descend from those mountains with great rapidity and violence. These streans, swollen by the melting of the Alpine snows, or by the torrents of rain which descend upon the mountains, as soon as they reach the plain spread themselves neer the country, forming broad beds of sand and pebbles, or inundating the fertile tract on each side of their banks. Continually stagnating more and more, as they flow through an almost perfectly level tract, they form, before reachiog the sea, considerable sheets of water; and the action of the tides (which is much more perceptible at the head of the AIristic than in any oflher part of that sea or of the Jlediterranean) combining to check the outflow of their waters, causes the formation of extensive s.ilt-water lagunes, communicating with the sea only tbrough narrow gaps or openings in the long line of sandy barriers that bounds then. Such lagunes, which verupy a great extent of ground S . of the present mouth of the Po [PaDes], are continued on from its N. bank to the neighbourhood of Altinum; and from thence, with some interruptions, to the month of the Isonso, at the headur inmost bight of the Alriatic, so exten-ive were they in ancient times that there was an uninterrupted line of inlaul navigation by these lagunes, which were known as the Septem Maria, from Ravenua to Altinum, a distance of ab, we s0 miles. (ftin, Aut. p. 126.) (ireat physical chances have naturally taken place in the conse of azee in a country so coustituted. On the one band there is a ronstant tendency to the filling up of the lagunes with the silt and mud brought
down by the rivers, which converts them first into marshes, and eventually into firm land. Oa the other hand the rivers, which have for ages beea confined within artificial banks, keep poshing on their months into the sea, and thus creating backwaters which give rise to fresh lagunes. At the same time. the rivers thos confined, from time to time hreak through their artificial barriers and force new channels fir themselves; or it is found necessary to carry them off hy new and artificial nutlets. Thus all the priucipal streams of Venetia, from the Adige to the Piave, are at the present day carried to the sea by artificial canals; and it is doabtful whether any of them have now the same outlet as in ancient times.

In the eastern partion of Venetia, from the Fiave to the foot of the Alps near Aquileia, these plyssical characters are less marked. The coast is indeed bordered by a belt of marshes and lagunes, but of no great extent: and within this, the rivers that descend from the Alps have been for the most part left to wander onrestrained througb the plain, and have io consequence formed for thenselves broad beds of stone and shingle, sometimes of surprising extent, through which the streams in their ordinary condition roll their diminished waters, the trifling volume of which contrasts strangely with the breadth and extent of their deposits. Such is the cbaracter especially of the Tagliamento, the largest river of this part of Italy, as well as of the Torre, the Natisone, and other minor streams. The irregularity of their channels, resulting from this state of things, is sufficiently shown by the fact that the rivers Turrus and Natiso, which formerly flowed under the walls of Aquileia, have now changed their course, and join the Isonso at a distance of more than 4 miles from that city. [Aqtinfia.]

Of the history of Venetia previous to the Roman conquest we know almost nothing. It was orcupied at that time by two principal nations, the Vexete from whom it derived its name, in the W., and the Cabar in the E.; the fommer extending from the Athesis to the Plaris, or perhaps to the Tilavemptus, the latter from thence to the borders of Istria. But the origin and affinities of the Veneti themselves are extremely obscure. Ascient writers represent them as a very ancient peuple (Polyb, ii. 17), but at the same time are generally agreed that they were not the origiral inhalitants of the tract that they occupied. This was reported by tradition to lave been held in the earliest ages by the Euganeans (Lir i. 1), a people whom we still fod lingering in the valleys anid un. derfalls of the Alps withiri the historical period, but of whuse orivin and affinities we know absolutely nothing. [EvGaner.] In regard to the Veneti themselves it cannot fail to be remarked that we meet with three tribes or nations of this name in other parts of the world, besides those of Italy, siz. the Gaulish tibe of the Veneti on the ccast of Armorica; the Venedi or Veneti of Tacitus, a Sarmatian or Slavonian tribe on the sluwes of the Baltic: and the Heneti or Eneti, who are mentioned as existing in Paphlagonia in the time of Ifomer. (Ilicul, ii. 85.) The name of this last people does not subsequently appear in history, and we are tl:erffore wholly at a loss as to their ethnical affinities, but it is not improinable that it was the rescmllance or rather ilentity of their name with that of the Italian Veneti (according to the Greck form of the latter) that gave rise to the strange story of Anteoor having migrated to Venetia after
the siege of Troy, and there founded the city of Patavium. (Liv. i. 1; Virg. Aen. i. 242 ; Sers. ad loc.) This legend, so generally adopted by the Romans and later Greeks, seems to bave been curreat as early as the time of Sophocles. (Strab. xiii. p. 608.) Some writers, bowever, omitted all mention of Antenor, and merely represented the tribe of the Heneti, after having lost their leader P'ylaemenes in the Trojan War, as wandering through Thrace to the head of the Adriatic, where they ultimately established themselves. (Id. xii. p. 543 ; Scymn. Ch. 389.) Whether there be any foundation for this story or not, it is evident that it throws no light upon the national affinities of the Italian Veneti. The other two tribes of the same oame would seem to lead our coajectures in two different directions. From the occurrence of a tribe of Veneti among the Transalpine Gauls, just as we find among that people a tribe of Cenomani and of Senones, corresponding to the two tribes of that name on the Italian side of the Alps, it would seem a very natural inference that the Veneti also were a Gaulish race, who had migrated from beyond the Alps. To this must be opposed the fact that, while a distinct historical tradition of the successive migrations of the Gaulish tribes in the N. of Italy bas been preserved and transmitted to us (Liv. v. 34. 35). no trace is recorded of a similar migration of the Veneti; hut, on the contrary, that people is uniformly distinguished from the Gauls: Livy expressly speaks of them as occupying the same tract which they did in his time not ouly befure the first Gaulish migration, but before the plains of Northern Italy were occupied by the Etruscans (Ib.33); and Polybius emphatically, though briefly, describes them as a different people from the Gauls their neighbours, and using a different language, though resembling them mnch in their manners and habits (ii. 17). Strabo also speaks of them as a distinct people from the Gauls, though he tells ns that one account of their origin derived them from the Gaulish people of the same name that dwelt on the shores of the ocean. (Strab. iv. p. 195, v. p. 212.) But there is certaiuly no ground for rejecting the distioct statement of Polybius, and we may safely acquicsce in the conclusion that they were not of Celtic or Gaulish origin.

On the other band the existence of a tribe or people on the southern shores of the Baltic, who were known to the Romans (through their German neighbours) as Venedi or Veneti, a name evidently identical with tbat of the IVenden or Hends, by which the Slavonian race in general is still known to the Germans, would lead us to regard the Italian Veneti also as probably a Slavonian tribe : and this seems on the whole the most plausible bypothesis. There is nothing improbable in the circumstance that the Slavonians may at an early period have extended their migrations as far as the head of tbe Adriatic, and left there a detached branch or offshout of their main stock. The commercial intercourse of the Veneti with the shores of the Baltic, a traffic which we find already established at a very early period, may he the more readily explained if we suppose it to have been carried on by tribes of the same origin. Herodotus indeed represents the Teneti as an Illyrian tribe (i. 196, v. 9) ; but it seems prubable that the name of Illyrians was applied in a vague sense to all the mountaineers that occupied the eastern coasts of the Adriatic, and some of these may in ancient times have been of Slavonian origin, though the true

Illyrians (the ancestors of the present Albanians) were undoubtedly a distinct people.

Of the bistory of the Vuacti is an independent people we know almost notlung ; but what little we do learn indicates a marked difference between them and their neighbours the Gauls on one side, and the Liburnians and 1llyrians on the other. They appear to have been a commercial, rather than a warlike, people: and from the very earliest dawn of history carried on a trade in amber, which was brought overland from the shores of the Baltic, and exchanged by them with Phoenician and Greek merchants. Hence arose the fables which ascribed the production of that substance to the land of the Veneti, and ultimately led to the identification of the Eridanns of Northern Europe with the Padus of Northern ltaly. [Emidaxes.] Herodotus meations a yeculiar custom as existing among the Veneti in his day, that they sold their daughters by anction to the highest bidder, as a mode of disposing of them in marriage (i. 196). We learn also that they labitually wore black garments, a taste which may be said to be retained by the Venetians down to the present day, but was connected by the poets and mythographers with the fables concerning the fall of Phaïton. (Scymn. Ch. 396.) Another circumstance for which they were distinguished mas the excellence of their borses, and the care they bestowed on hreeding and training them, a fact which was appealed to by many as a proof of their descent from Antenor and "the horsetraining Trojans." (Strab. v. pp. 212,215.) It is clear that they were a people considerably more advanced in civilisation than either the Gatuls or the Ligurians, and the account given hy Livy (x. 2) of the landing of Cleonymus in the territory of Patavium (B.C.302) proves that at that period Pataviam at least was a powerful and well organised city. Livy indeed expressly contrasts the Veneti with the Illyrians, Liburnians, and Istrians, "gentes ferae et magna ex parte latrociniis maritimis infames." (Ib.) On this occasion we are told that the citizeos of Patavium were kept in continual alarm on account of their Gaulish veighbours, with whom they seem to have been generally on unfriendly terms. Thus at a still earlier period we are infurmed by Polyhius that the retreat of the Senonian Gauls, who had taken the city of Rume, was caused by an irruption of the Venetians into the Gaulish territory (ii. 18). It was doubtless this state of hostility that inluced them, as snon as the Roman arms hegan to make theaselves felt in Northern ltaly, to conclude an alliance with Rome against the Gauls (n.c. 2t5), to which they appear to have subsequently adhered with unshaken fidelity. (Polyb. ii. 23, 24.) Hence while we afterwards find the Rumans gradually carrying their arms beyond the Veneti, and engaged in frequent hostilities with the Carni and Istrians on the extreme verge of Italy, no trace is foond of any collision with the Venetiaas. Nor have we any account of the steps by which the latter passed from the condition of independent allies to that of subjects of the Roman Republic. But it is probable that the process was a gradual one. and grew out of the mere necessity of the case, when the Rumans had conquered Istria and the land of the Carni, in which last they had established, in n. c. 18t, the porerful colony of Aquileia. It is certain that before the close of the Republic the Veneti had ceased to have any independent existence, and were comprised, tike the Gaulish tribes, in the province of Gallia Cisalpina, which was placed under the anthority of Caesar, B. C.

## 1274

## VENETIA.

59. The period at which the Veneti acopured the loman franchise is uncertain : we are only left to infer that they obtained it at the same time as the Iranspadane Gauls, in B. c. 49 . (Dion Cass. xli. 56.)

Under the Roman Empire, Venetia (as already mentioned) was included, together with Istria, in the Tenth Region of Angustas. The land of the Carni (Carnorum regio, 1 lin. iii. 18, s. 22.2) was at this time considered, for administrative purposes, as a part of Yenetia; thumgh it is still described as distinct by Ptolemy (iii. 1. §§ 25, 26): and there is no doubt that the two nations were originally separate. But as the population of buth districts became thoroughly Romanised, all traces of this distinction were lost, and the names of Venctia and Istria alone remained in use. These two continued to form ane province, and we meet with mention, both in inseriptions and in the Notitia, of a " Corrector Venetiae et Histriae," down to the close of the Rmman Empire. (.Votit. Dign. ii. p. 65 ; Bücking, ad loc. p. $4+1$; Orell. Inscr. 1050, 3191.) The capital of the united provinces was Aqnileia, which ruse under the Roman Empire to be one of the most flumrishing cities of 1taly. Its importance was derived, not fromits wealth and commercial prosperity only, but from its situation at the very entrance of laly, on the hichroad which became the great means of conmunication between the Eastern and Western Empires. The same circumstance led to this part of Venetia becoming the scene of repeated contents for power between rival emperors. Tlins it was before Aquileia that the Eimperor Maximin perished in A.1. 238 ; it was on the banks of the river Alsa (Ausa) that the younger Constantine was defeated and slain, in A.D. 340 ; again, in 388 , the contest between Maximus and Theodosius the Great was deeided in the same neighbourbood ; and in 425 , that between the usurper Joannes and the generals of Tbeodosius 11. [Iquilema.] Finally, in A. D. 489, it was on the river Suntius (Isonzo) that Odoacer was defeated by the Gothic king Theudoric, (Hist, Miscell. xvi. p. 561.)

It seems certain that Venetia had become under the Roman Empire a very opulent and flourishing province: besides Aquileia, Pataviom and Verona were provincial cities of the first chass; and many other torns such as Concordis, Altinum, Forum Julii, \&c., whose names are little known in histury, were nevertheless opalent and considerable municipal towns. But it suffered with peculiar severity from the inroads of the barbarians before the close of the Empire. The passage across the Julian A|ps from the valley of the Sace to the plains of Aqpileia, which presents few natural difficulties, became the highway by which all the barbarian nations in succession descended into the plains of 1taly; and heuce it was Vinetias that felt the first brmit of their fury. This was especially the case with the invasion of Attila in A. D. 452, who, baving at length reduced Ayuileia after a long siges, razel it to the ground; and then, advancing with feartal rapidity, desamtated in like manner the cities of Concordia, Altimum, Patavium, Vicentia, Verona, Brisia, and Bergonum, nut one of which was able to uppso any efliectual resistance. (Hist. Miscell. xv. p. 549.) The expression of the cbronicler that he levelled these cities with the ground is probably exaggerated; but there can be no doubt that they suffered a blow from which three of them at least, Concordia, Altinum, and Aquileia, never recorered. In the midst of this devastation

## VEAFTIA.

many fugitives from the ruined citics took refuge in the extensive lagunes that bordered the coasts of Venetia, and establisbed themselves on some small islanls in the midst of the waters, which had previously been inhabited only by fishermen. It was thus that the refogees from Aqnileia gave origin to the episcopal city of Grado, while thuse from Pataviam settled on a spot then known as Rivus Altus, in the midst of the lagnnes formed by the Meduacus, where the new colony gradually grews up iuto a wealthy city and a powerful republic, which retained the ancient name of the prosince in that of Venceia or Venice. "This emigration (observes Gibum) is not attested by any contemporary ovidence ; but the finct is proved by the event, and the circumstances might be preserved by trallition." (I)ecl. and Fall, ch. 35, note 55.) A curions letter of Cassiodorns (I'ar. sii. 24), written in A. D. 523, describes the islands of Venetia as inhabited by a population whose sole occupation and resource was derived from their fisheries : and it is remarkable, that he already appears to confine the appellation of Venetia to these islands, an usage which had certainly become prevalent in the time of Paulus Diaconus, who says, in speaking of the anci-nt prorince, "Venetia enim non solum in paucis insulis, fuas nunc $1^{\prime \prime}$ netias dicimus, constat" (ii. 14). It is clear, therefore, that the transfer the name of the province to the island city, which has continued ever since, was established as early as the eighth century.

The original land of the Veneti, as alrendy observed, was almost entirely a plain. The underfalls of the Alps, and the hills that skirt the foot of that rance, were for the must jart inhabited by tribes of mountaineers, who were of the same race with the Rhaetians and Euganeans, with whom, so far as we can discover, the Veneti tbemselves had nothing in common. But a portion of this district was comprised within the limits of the province of Venetia, as this came to be marked out ander Augustus; so that the boandary line between Venetia and Phaetia was carried apparently from the head of the Lake Benacus (Lago di Garda) across the valley of the Athesis (Addige) to the ridge which separates the valley of the Plavis from that of the Meduaens, so as to exclude the Val Sugana, while it included the whole valley of the Pace (Plavis), with the towns of Feltria and Belunum, buth of which are expressly ascribed by lliny to the Tenth Region. Thence the boundary scems to have followed the 1ilge which dixides the waters that fall into the Adriatic from the valleys of the Drave and Gail, both of which streams flow eastward towards the Danube, and afterwards swept round in a semicircle, till it nearly touched the Adriatic near Trieste (Tergeste).

Witlin these limits, besides the underfalls of the A pis that are thrust forward towards the plain, there were comprised two distinct groups of lnlls, now known as the Colli Euganei and Monti Berici, both of them wholly isolated from the neighbouring ranges of the $\mathrm{Al}_{\mathrm{p}}$ s, and, in a geelogical sense, unconnected with them, being both clearly of voleanic oricin. The name of the Euganean bills, applied to the more southerly of the two groups, which approaches within a fer miles of Patavium (Padora), is evidently a relic of the period when that people possessed the greater fart of this country, and is doubtless derived from a very early time. The appellation is not ruticed by any ancient geographer, but the name of Euganeus Collis is given by Lucan
to the hill above the baths of Aponns, one of the group in question; and Martial gives the name of "Euganeae Orae" to the hills near the town of Atcste (Este), at the southern extremity of the same range. (Lucan. vii. 192; Martial. x. 93). There can, therefore, be no doubt that this beantiful range of hills was known in ancient times as the Euganei Colles.

The rivers of Venetia are numerous, but, for the reasons already mentioned, not always easy to identify. Nuch the largest and most important is the Athesss (Adige), which at one period formed the boundary of the province, and which, emerging from the Alps, near Verona, sweeps round in a great curve till it pours its waters into the Adriatic only a few miles N. of the mouths of the Padns. The next river of any magnitude is the Meduacus or Brenta, which flows under the walls of Patavium, and receivea as a tributary the Bacclaiglione, apparently the Meduacus Minor of I'liny. After this (proceeding eastwards) comes the Silis (Sele), a small stream flowing by the town of Altinum: nest, the Playis (Piave), a much more important river, which rises in the Alps above Belunum (Belluno), flows past that eity and Feltria ( $F$ eltre), and enters the sea a few milea E. of Altiaum: then the Liquextra (Lirenza), and the Romatisus (Lemene), a small river flowing muder the walls of Concordia. Next to this comes the Tilavemptus (Tagliamento), the most importaut of the rivers of the E. portion of Venetia, having its sources in the high ranges of the Alps above Julium Carnicum, whence it traverses the whole plain of the Carni, nearly in a direct line from N. to S. Beyond this come seseral minor streams, which it is not easy to identify with certainty: such are the Varanus and Anassus of Pliny, probably the Stella and the torrent of Cormor; and the Alsa, which still bears the name of Ausa. E. of these, again, come three considerable streans, the Turrus, Natiso, and Soxties, which still preserve their ancient names, as the Torre, Nutisone, and Isonzo, but have undergone considerable changes in the lower part of their course, the Natiso having formerly flowed under the walls of Afuileia, about 4 miles W. of its present channel, while the Isonzo, which now unites with it, origiaally followed an independent channel to the sea, near Monfalcone. The Isonzo receives a considerable tributary from the E., the Wippach or Iipao, which descends from the elevated table-land of the Korst, and was known in ancient times as the Fluvies Fnigides. It was by the valley of this river that the great highroad from the banks of the Danube, after crossing the dreary highands of Carniole, descended to Aquileia and the plaios of Venetia. On the ext cme confines of the province the little river Timaves must be mentioned, on account of its classical celebrity, though of no geugraphical importance ; and the Formo (Risano), a few miles S. of Tergeste, which, from the time of Pliny, emstituted the limit between Venetia and Istria. (Plin, iii. 18. s. 22.)

The cities and towns of Yenetia may now be enumerated in geographical order. Farthest to the W., and situated on the Athesis, was the important eity of Verona. Considerably to the E. of this was Vicentia, and beyoud that again, Pitiviem. S. of Vicentia, at the southern extremity of the Euganean hills, was Ateste (Este). On the border of the lagunes, at their N. extremity, was Altisum, and 30 milea farther to the E., Coxcondia. Inland from these lay Opitergiem and Tarvisium,
both of them considerable towns; and on the slopes of the hills forming the lowest muderfalls of the Alps, the smaller towns of Acelum (Asolo) and Ceneta (Ceneda), the name of which is found in Agathias and Iaulus Diacorus (Agath. Iist. Goth. ii. 8 ; P. Diac. ii. 13), and was in all probability a Roman town, though not mentioned by any earlier writer. Still farther iuland, in the valley of the Placis, were Feltria and Belunum. E. of the Tilavemptas, and therefore included in the teritory of the Cami, were Aqtileia, near the sea-coast; Fortma Juln, N. of the preceding; Venmula (Udine), farther to the W.; and Juluar Carmicua, in the apper valley of the Tilavemptus, and in the midst of the Alps. Tergeste, on the E. side of the bay to which it gave its name, was the last city of Venetia, and was indecd by many writers considered as belonging to lotria. [Tergeste].

Besides these, there were in the land of the Carni several smaller towns, the names of which are mentioned by Pliny (iii. 19. s. 23.), or are found for the first time in Patulus Diaconns and the Geographer of Ravenna, but were in all probability Roman towns, which had grown up under the Empire. Of these, Flamonia (Plin.) is probably Flagogna, in the valley of the Tagliamento ; Osopum (P. Diac. iv. 38) is still called Osopo, and Gilemona, Gemona, higher up in the same valley; and Artemia, Artegnc, a few miles SE . of the preceding. Cormones (ib.) is still called Cormons, a small town between Cividale and Gradisca ; and Pucinvm (Plin., Ptol.) is Duino, near the sources of the Timarus.
The other obscure names mentioned by Pliny (l.c.), and of which he himself says, "quos scrupulose dicere non attineat," were apparently for the mest part mountain tribes or communities, and caanot be determined with any approach to certainty.

Venetia was traversed by a great line of highroad, which procecded from Aquileia to Verona, and thence to Mediolanum, and formed the great highway of communication from the latter city to the Daunbe and the provinces of the Eastern Empire. It passed tlirough Coneordia, Altinum, Patavinm, Viceutia, and Verona. From Pataviom a branch struck off through Ateste and Anneianum (probably Legnago on the Adige) to join the Aemilian Way at Mutina. A still more direct line of communication was establisled from Altinum to Ravenna by water, through the lagunes and artificial canals which communicated from one to another of these sheets of water. This line of route (if such it can be called) is briefly indicated by the Antonine Itinerary ("inde [a Ravenna] navigantur Septem Maria Altinum usque," p. 126) ; while the stations are giren in detail by the Tabnla; but from the fluctuations that the lagunes bave undergone, few of them can be identified with any certainty.
[E. H. B.]
VEnetia, in Gaui. [ Tenetr.]
veneticae insulae, in Gallia, mentioned by Pliny (iv. 19), are the aumerous small islands along the coast of Venetia, or the modern department of Morbikan. The largest is Belle-ile. The others are Houat, Hedic, Groain, and some others. Perbaps the peninsula of Quiberon may be included [Vexeti; Vindils].
[G.L.]
venetus lacus. [Brigantinus Lacus.]
VENiA'TIA, a place in Gallaeeia in Hispanaa Tarraconensis, on the road from Bracara to Asturica. (Itin. Ant. p. 423.) Varionsly identified with Vinhaes, I Iarzana, and Requejo. [T. H. D.]

peeple on the F. cnast of Britannia Barbarn, S. of the estuary of the Tuacsis (Murroy Frith), in Forforshire and Aberdenshire. [T. II. D.]

VENNENSES, a tribe of the Cantabri in Ilispania Tarraconensis. (Plin. iii, 3. s. 4.) [T.H.D.]

VENNI'CNII (Ovievviknot, Ptol. i. 2. § 3) a people in the NW. part of Ilibernia, between the promontories Borenm and Vemicniun. [T. II. D.]
 Ptol, ii, 2, § 2), the most northerly healland of Hibernia, usually identified with Malin Ileud; but Camden (p. 1411) takes it to have been Rirme's Head.
[T. H. D.]
VE'NNONES (Oviénoves or Oùivyover), a tribe of Ehaetia (1'tol. ii. 12. § 3), or according to Strabo (iv. pp. 204. 206), of Vindelicin. They are deseribed as the wildest among the Rbaetian tribes, and are ne doubt the same as the Vennenetes who, accerding to Pliny (iii. 24), were mentioned among the nations of the Alpine Trophy. They seem to have inlabited the district about the sources of the Athesis, which bore the name of Venonesgowe or Finesgowe as late as the eleventh century. (Von Mormayr, Gesch. Tirols, i. 1. p. 35.)
[L. S.]
VENONAE, a town in Britannia Romana apparently belenging to the Coritavi, at which the road from London to the NW. part of Britain separated, one branch proceeling towards Deva, the other taking a NE. direction towards Lindum and Eboraenm. There was also another branch to the SW. towards Venta silurum, so that the two main reads which traversed the whole island mnst have crossed here. (Itin. Ant. pp. $470,47 \pi, 479$ ) Varionsly identified with Highcross, Claybrook, and Higston Parva.
[T. H. D.]
VENOSTES, probably a biznch of the Vennones, a Rhaetian tribe, were mentioned in the Alpine Trophy, of which the inscription is quoted by Iliny (iii. 24). In the middle ages their district bore the name of Venusta Vallis. (Zeuss, Die Deutschen, p. 237.)
[L. S.]
IENTA. the name of several torns in Britamia Ronana. 1. Tenta Belgaram (Oй́v $\alpha$, Ptol. it. 3. § 28 ), in the SW. of Britain, on the road from Limdinium to Calleva and Isca Dumnonierum. (Itin. Ant. p. $478, \& \mathrm{c}$ : Geogr. Ray. r. 31.) Now Winchester, where there are some loman remains. (Camden, p. 138.)
2. Venta Siluram on the W. enast of Britannia Romana, on the road from Londivium to Isca Silu. rom, and near the estuary of the Sibrinat. (Itin. Ant. p. 485.) Now ('iter IV ent in Monmouthshire, where there are traces of the ancient watls, and where Roman antiquities are (or were) occasionally fonnd. (Canulen, 1, 713.)
3. Venta Icenoram, a town of the Iceni, on the E. coast of Britamnat Romana (Itol. ii. 3. § 21), to which there was a roul from London. (Itin. Aut. p. 479.) Mast probably Caistor, on the river 1 F : $n$ sum, a little S. of Nomuich, which probably rise from the ruins of Cinisfor. Here are trnece of Roman remains. (C:amlert, 1. 460.) [T. II. 1).]

VE'NTLA (Oúevtia), in Gallia Narbonensis, a town of the Allahroges, mentionell only by Dion Cassins (xxxvii. 4\%) in his history of the war between the Allohroges and C. Pomptinus the governor of Gallia Provincia (is. c. 62). Manlius Lentinus, a legatus of Pomptinus, came upon this tuwn, but was driven from it. The place appears to be near the Isara (Isire) from Dion's narrative, and D'Auville following De Valois supposes it to be

Vinai, between Moircnc and S. Marcellin, at some distance from the hank of the Isere. As Ventia is unknown otherwise, it may be a blunder of Dion, and the place may be Vienna.
[G. L.]
VENTISPOANE, a town in Llispama Baetica (Hirt. B. II isp. 27), which appears from still extant ilseriptions to bave leen not far from l'uente de Ion Gonzalo. (Ukert, ii. pt. i. p. 368.) It appears on coins under the vame of Ventipo, (Florez, Med, ii. p. 617 ; E.ckhel, i. p. 31 ; Moonet, i. p. 27 ; Sestini, p. 92.)
[T. LI. D.]

com of ventisponte or ventipo.
VENUSLA (Oủevovaía: Eth. Venusinus: Venosa), a city of Apulia, situated on the Appian Way, about 10 miles S. of the river Aufidns. It nearly adjoined the frontiers of Lucania, so that, according to Horace, himself a native of the place, it was doubtful whether it belonged properly to Lucania or to Apulia, and the territory of the city, as assigned to the Roman colony, included a portion of that of beth nations. (Hor. Sat. ii. 1. 34, 35.) Tlis statement of Horace leaves it dnubtfnl to what people Vennsia originally belonged, though it is more probable that it was an Apulian city, and that it received only an accession of territory from Lucunia. Later writers, indeed, distinetly assigned it to Apulia. (Plin. iii. 11.s. 16; Ptol. iii. 1. §73; Lib. Colon. p. 210) But no mention of it is found in listory till the occasion of its capture hy the Roman consul L. Postumius, in B. C. 262 (Dionys. Exc. Vales. p. 2335), when we are told that it was a popnlous and important town. A large part of the inhabitants was put to the sword, and, shortly afterwards, a Toman colony was established there by order of the senate. (Dio. nys. l. c. : Vell. i. 14 ; Ilor. l. c.) The colonists are said to have heen 20,000 in number, which must be either a mistake or an exagecration; but there seems no doubt that the new colony became a populons and flourishing place, and was able te render important services to the Roman state during the Second Punic War. It was at Venusia that the consul Terentius Varro took refuge with 700 horse after the great defeat at Cannae (в. C. 216), and where he was gradually able to gather areund him a force of about 4000 horse and foot. The Vennsians vied with one another in showing them the utmost attention, and furnished them with colothine, arms, and other necessaries. (Liv xxii. 49, 54: Polyh. iii. 116, 117.) Again, nt a later period of the war, when so many of the Roman ealonies proved nuable to satisfy the repeated demands of the senate, the Temmsians were among those who continted steadfast, and declared themselves ready to furnish the troops and supplies required of them, (Liv, axvii. 10.) It was after this, threugh several suceessive campaigas, the hend-quarters of the Roman commanders in Apulia. (Ib, 20, 41; Appian, Annih. 50.) But the colony suffered severely from ail these exertions, and, in B. C. 200 , after the close of the war, it was found necessary to recruit its ex-
hansted strength with a fresh body of colonists. (Liv, xxxi. 49.) From this time Venusia seems to have always cootipued to be a flourishing town and one of the most considerable places in this part of Italy. It bore an important part in the Sucial War, having early joined in the outbreak, and became one of the priacipal strongholds of the allies in the south of Italy. (Appian, B. C. i. 39, 42.) In the second year of the war its territory was ravaged by the Roman praetor Cosconius, but we do not learn that the city itsclf fell into bis hands. (Ib. 52.) At all events it did not suffer severely, as it is nfterwards mentioned by Appian as one of the most flourishing cities of Italy (IJ. iv. 3) ; and Strabo also botices it as one of the few cities in this region which retained their consideration in lis time (v. p. 250). It received a colony of veterans under the Triumvirate (Appiao, B. C. iv. 3; Zumpt, de Colon. p. 332), and seems to have retained the rank of a Colonia under the Empire, as we find it bearing that designation botb io Pliny and in inscriptions, (Plin. iii. 11. s. 16 ; Orell. Inscr. 867 ; Mummeen, Inser. R. N. 735, 745.) Its position on the Appian Way doubtless contributed to its prosperity, and it is mentioned more than once by Cicero as a castomary halting-place in proceeding from Rome to Brundusium. (Cic. $a d$ Att. v. 5, xvi. 5.) It appears iadeed that the great orator bad bimself a villa there, as one of his letters is dated "de Venusino" (ad Fam. xiv. 20). But the chief interest of Venusia is undoubtedly derived from its having been the birthplace of Horace, who was born there in the consulship of L. Manlins Torquatus and L. Aurelius Cotta, 1. c. 65. (Hor. Carm. iii, 21. 1.) The works of the poet abound in allusions to the neighbourbood of his native city, the fountain of Bandusia, the forests of Monnt Vultur, Sce. But it does not appear that he ever resided there in the latter years of his life, having lost his paternal estate, which was confiscated in the civil wars. (Id. Ep, ii. 2.)

We hear nothing of Venusia onder the Roman Empire, but it is certain from the Liber Colouiarum, which mentions it among the Civitates Apnliae, and from the Itineraries, that it continned to exist as a city, aod apparently one of the most considerable in this part of Italy. (Ptol, iii. 1. § 73 ; Lib. Colon. pp. 210, 261; Itin. Ant. pp. 104, 113, 121 ; Tab. Peut.) This is further confirmed by inscriptions, in one of which it is called "splendida civitas Venusinorum." (Momrusen, I. R. N. 706.) It retained the same consideration throughont the middle ages, and is still an episcopal city with about 6000 inbabitants. Its antiquities have been illustrated with a profusion of erudition by talian writers, but it has few ancient remaios of much interest ; though fragments of ancient edifices, mosaic pavements, \&c. bave heea found on the site, as well as numerous inscriptions. These last have been collected and publisbed by Mons. Lupoli, in his Marmora Venusina

coin of venusia.
(added as an appendis to the Iter Tenusinum, 4 to Neapoli, 1797), and more recently by Mommsen, in his Inseriptiones Regni Neapolitani (pp. 39-48). Concerning the antiquities of Venusis in general, see the work of Lapoli above quoted, and that of Cimaglia (Antiquitates Venusinae, 4 to. Neapol. 1757.)
[E. H. B.]
VEPITENU3 or VIPITENUM, a place in the district occupied by the Venostes in Mhaetia, between Veldidena and Tridentum. (It. Ant. pp. 275, 280; Tab. Peut.) Its modern representative is, in all probability, the town of Sterzing on the Eisach, at the foot of the Brenner.
[L. S.]
VERAGRI (Oúáparpoı). The Veragri are placed by Caesar (B.G. iii. 1, 6) in the Valais of Switzerland between the Naituates and the Seduoi, [Nantuates; Seduxi]. Their tuwn was Octodurus (Martigny), whedce the Veragri are called Octoinrenses by Pliny [Octodurus]. Dion Cassins ( $x \times x i x .5$ ), using Caesur as he generally used bibi, says that the Veragif extended from the territory of the Allobroges and the Leman lake to the Alps; which is not true. Strabo (iv. p. 204) mentions the Varagri, as he calls them, between the Caturiges and the Nantuatae ; and Pliny (iii. 20) between the Seduni and the Sulissi: the Sulassi are on the ltalian side of the Alps in the V'al chAusta. Livy (xxi. 38) places the Veragri among the Alps and on the ruad to the pass of the Pernine Alps, or the Great St. Bernard, which is correct. He says that the pass was occupied by half German tribes. [G. L.]

VERBANUS LACUS (í OU̇epbavós $\lambda i \mu \nu \eta$ : Lago Maggiore), one of the principal lakes of Nurthern Italy, formed by the river Ticinns, where it first issues from the valleys of the Alps. (Plin. iii. 19. s. 24.) It is the largest of the three great lakes of Northern Italy, whence its modern hame of Lago Maggiore; thungh Virgil appears to have considered the Larius as the largest, as be calls it, "Te, Lari maxime," and singularly enough does not mention the Verbanus at all. (Georg. ii. 159.) Strabo, by a strange mistake, describes the river Addna aa flowing from the Lake Verbanus, and the Ticinua from the Larius (iv. p. 209): this may, perbaps, he an error of the copyists, but is more prubably an accidental blunder of the anthor. He gives the length of the lake at 400 stadia, or 40 geog. miles, which is somewhat beluw the truth, the actnal length being 46 geog. miles: its breadth does nat exceed 4 or 5 triles, except io one part, where it expands to a width of from 8 to 10 miles. [E. H. B.]

VERBICAE or VERBICES (Оvífptiкa or Oviép6ikes, Ptol. iv. 1. § 10), a people of Mauretania Tingitana.
[T. H. D.]
VERBIGENUS PAGUS. [Helvetit, Vol. I. p. 1041.]

VERBINUM, in Gallia, is placed by the Itins. on a road from Bagacum (Bavai) to Durocortorum (Reims). Daronam is between Bagacnm and Verbinum [Dcroscm]. All the several distances between Bagacuan and Durocortorum do not agree in the Antouine Itin. and the Table. Tbe sum total of these distances in the Table is $53 \mathrm{M} . \mathrm{P}$., and the Itin., though it makes the several distances amount to $63 \mathrm{ML} . \mathrm{P}$., still gives the sum total at $53 \mathrm{M} . \mathrm{P}$. But these must le Gallic leagnes, as DAnville shows. He supposes Verbinam to be Jerrins, which in fact is the same name as Verbidum. The table writes it Vironum. Jervins is is the department of Aisne, abont 20 miles NE. of Laon. [G. L.]

VERCELLAE (Óv́єкé $\lambda \lambda a \downarrow$, Ptol. iii. 1. § 36 ;

Oиєекке́ $\lambda \lambda$ оr, Strab, v. p. 218 ; Bєєкє́л入ar, Plut. Mar. 25 : Vercelli), the chief city of the Libici, in Gallia Cisalpina. It lay on the W: bank of the Sessites (Sesiu); but perhaps the ancient town should be sought at Borgo Vercelli, about 2 miles from the modern city. In the time of Strabo it was an unfortified village (l.c.), but subsequently became a strong and not unimportant Roman municipium. (Tac. Itist. i. 70 ; cf. De clar. Orator. 8 ; also Orell. Inscr. 3044, 3945.) Here the bighroad from Ticinum to Augusta Jraetoria was crossed by a road running westwarls frem Mediolanum. (Itin. Ant. pp. 282, 344, 347, 350.) At the beginning of the 5 th century it was rapidly falling to decay. (Hieron. Epist. J7.) There were some gold mines at a place called Ictimuli, or Vicus Ictimulorum, in the district of Vercellac (Stral. l. c.; Plin. xxxiii. 4. s. 21), which must have been of considerable inportance, as the last cited authority mentions a larr forbidding that more than 5000 men should be employed in them. The true position of these mines has, however, been the subject of some dispute. The question is fully discussed by Durandi in his treatise Dell' antica Condizione del J'ercellese. The city was distinguished for its worship of Apollo, whence it is called Apollineae Vercellae by Martial (x. 12. 1 ); and there was in its vicinity a grove, and perLaps a temple stared to that deity (s'at. Silv, i. 4. 59), which is probably to be sought at a small Ylace calied Pollone, at the foot of the Alps. (Ct. Cic. Fam. si. 19; Plin. iji. 17. s. 21 ; Belinini, Autichitid di lercelli.)
[T. H. D.]
VEREASUECA, a harbour belonging to the town of Argeaomescum. in the territory of the Cantabri, in Hispania Tarracomensis. (Plin. iv, 20. s. 34.) Probably Puerto de S. Martin. (Cf. Mlurez, Esp. Sagr. xxiv. p. 44.)
[T. H. D]
VERELA. [Yapla.]
VERETCM (Óveputóv, Strab., Ptol. : Eth. Veretinus: Sta Maria di Jereto), a town of Calabria, in the district or territory of the Sallentines, and within a few miles of the lapygian promontory. Strabo tells us that it was formerly called Baris, and describes it as if it were a seaport town; but buth Pliny and Ptolemy rank it anong the mand towus of the Sallentines; and there seems no doubt that its site is marked by the old church of Sta Maria di l'ereto, the name of which is found on old maps, between the villames of Sttlee and Royyiano, about 6 miles from the Capo di Leuca, and 10 from Ugento, the correct distance given in the Tabula from Usentam to Veretum. (Strab, vi. p. 281; Plin. iii. 11. s. $16 ;$ Ptol, iii. 1. § $76 ; T a b$. Peut.; (ialateo, de Sit. lapyg. p. 99; Molsten. ad Cluver. p. 283 ; Komamelli, vol, ii. p. 35.) The "ager Veretinus" is mentioned also in the Liber Coloniarum (p. 262) amone the " civitates Calabrine," and doubtless comprised the whole district as far us the Iapygian promodory.
[E. H. B.]
VEhGAE: [BitctTI.]
VERGELLLT, a rivalet or torment, which erossed the field of battle of Camare. It is not indeed mentioned by either Livy or 1rolybins in their cireturstantial accounts of the battle, hat it is noticed by both Florus and Valerins: Maximus in connection with a story that seems to have been current among the Romans, that its course was choked up by the dead bodies of the slain, to such an extent that the C'arthaginian troops crossed over them as a bridge. (Flor, ii. 6. § 18; Vial. Max. ix. 2, Ext. § 2.) The same incident is alluded to by other writers, but
without mentioning the name of the stream. (Sil. Ital. viii. 668; Lucian, Dial. Mort. 12. § 2.) The stream meant is probably a rivulet which falls into the Aufidus on its right bank between Cannae and Canusium, and is wholly dry in summer.
[E. H. B.]
VElGGENTUM, a place in Hispania Baetica, with the sumane of Julii Genius. (Plin. iii. 1.s. 3.) Now Giclres or Gines.
[T. II. D.]
VERGI'LIA (Oúepyinia, Ptol, ii. 6. §6I: Eth. Vergilienses, Plin. iii. 3. s. 4), a town of the Bastetani, in Hispania Tarraconensis. It has been identified by some writers with M/urcia. (1'Anville, Geogr. Auc. i. p. 31 ; Dentelle, Esp. Auc. p. 186.)
[T. H. 1.]
VERGIUM, a fortress in Hispania Tarraconensis (Liv. xxxiv. 21). Reichard, but perhaps without adequate grourds, identifies it witb the present Berga.
[T. H. D.]
VERGOANCM. [LEmiNa.]
V1FRGUNNI, the name of an Alpine people mentioned in the Truphy of the Alps (Ilin. iii. 20). They nre sapposed to be represented by the name Vergons or lergon, between Senez [Saxitios ] and Glandives, and about half-way between these two places.
[G. L.]
VERISA (Briphaa), a town in the interior of Pontus, on the road from Sebastopolis to Sebastia. (It. Aut. pp. 205. 214; Bavil. Magn. Epist. ult.) Its site is yet uncertain, sume identifying it with Cora, others with Baulus.
[L. S.]
VERLU'C10, a place in Britannia Rumana, on the road from Isca Silurun to Calleva (Itin. Ant. p. 486), and apparently in the territory of the Dobuni. It has been variomsly identified with the village of Leckham on the Aron, with Hestbury. Spy Park, and Whetham.
[T. H. D.]
VEliNEA, a fort in Rlaetia, on a steep height ahove the banks of the river Atliesis, nut far from Tridentum, where its site is still marked by the Dos di Trent. (Cassiod. Var. iii. 48; Paul. Diac. iii. 31, where it is called Ferruge: Pallhausen, Beschreib. der Rön. Heerstrasse ron Verona nach Augsburg, p. 28.)
[L. S.]
VIBRODEBRCM, a river of Gallia Narbonensis mentioned by Pliny (iii. 4) after the Tecam, which is the Tichis [Trents] of Mela. Pliny does not mention the Telis or Tetis ( $T e t$ ), and it has been conjectured that he gives the name of Vernodubrain to the Telis. But there is a river Gly or Agly, porth of the Tet and nut far from it, which flows into the Mediterranean past Riresaltes, and a branch of the Gily is still named Verdouble or Verdoubre, which is certainly the Vernodubrum. (D'Anville, Notice, cie.)
[G. L.]
VERNOSOL, in Aquitania, is placed in the Antonine linn on a road from Beneharoum [BenfitirNUM ] to Tolosa (Toulouse). This circuitous road ran throurl Lugdanum Convenarum and Calagorris. Vernosol is between Calagorris (Cazères) and Toulouse. Veroosol is $\mathbf{J}$ cmiose.
[G. L.]
VERODUNENSES. This name does not occur in any document earlier than the Notitia of the Gallic Provinces, which was probahly drawn up at the cotumencement of the fifth century of our cra. Critas Veredunensium in the Notitia is the capital of a people, and is named last in the first of the two Belgicae. The name Virodunum occurs in the Antonine Itin. and so the name is written on some medals. It is pliced on a route from Durocortorum (Ruims) to Divodurum (Melz). In the uniddle age
writings it is Viredunam, Viridunum, and Virdunum, which last abbreviated form comes nearest to Verdun, which is the capital of the Verodunenses. Verdun is west of Metz, in the department of Meuse, and on the Meuse or Maas. There was a place named Fines [Fises, No. 13] between Virodunum and Divodurum, which probably marked the limit between the Vergodunenses and the Mediomatrici.
[G. L.]
Serodunul. [Veronunexses.]
VEROLA'MLS and VERULA'MUM (Oípo入áviov, Ptol. ii. 3. § 21), the capital of the Catyeuchlani in Britannia Romana, on the road from Londinium to Lindum and Eboracum. (Itin. Ant. pp.471, 476, 479.) It was probably the residence of Cassivellaunus, which was taken by Caesar (B. Gall. v. 21), and subsequently becume a considcrable Roman municipium, (Tac. Ann. xiv. 33.) It is Ohl Terulam, near St. Alban's, in Hertfordshire, which latter town rose from its ruins; and its celebrated abbey church is said to be built in great part of Roman bricks. (Camden, p. 350, seq.) [T. H. D.]

VEROMANDUI (Ö́efouávōues, P'tol. iii. 9. §̧ 11), n Belgic people, who in B.c. 57 were supposed to be able to raise 10,000 fighting men (Cacsar, $B$. G. ii. 4); unless Cresar's text means that they and the Velicasses together mustered this number (VElocasses]. They juined the Nervii and the Atrebates in the attack on Caesar's army on the Sabis (Sumbre). The Veromandni attacked the eleventh and eighth legioas, which were in Caesar's centre, and they were driven back to the river. They are not mentioned arain in the Commentaries.

The Veromandui had the Ambiani and the Atrebates on the west, and the Suessinnes on the south. On the north they were neighbours of the Nervii. Their chief town was afterwards Angusta Veromanduorum, St. Quentin, on the Sonme, in the department of Aisne, and in the old division of France named Vermandois. The name Civitas Veromanduorum oecurs in the Notitia of the Gallic Provinces. [Avgesta Veromanduonim.] [G.L.]
VEROMETUS, as town of the Coritani in Britannia Romana, between Ratae and Margidunum. (Itin. Aut. pp. 477, 479, where it is also called Vernometum.) Camden (p. 575) places it at Burrough IIIl, near Willoughby on the Wold, in the S. part of Nottinghamshire.
[T. H. D.]
 Strab. iv. p. 206, v. p. 213 ; B $\rho$ ávๆ, Procop. B.G. ii. 29, iii. 3, Sce.; and Bєрáva, Ib. iv. 33 : Eth. Veronensis: Verona), an important town in Gallia Transpadana, seated on the river Athesis ("Verona Athesi circuniflus," Sil. It. viii. 595), and chiefly on its W. bank. There is some difficulty in determining whether Verona was a city of the Enganei or of the Cenmmani, from the little knowledge which we possess of the respective bonadaries of those peoples, and from the confusion wiich prevails upon the subject in ancient authors. By 「twiemy ( l c. .), who does not mention the Euganei, it is ascribed to the Cenomani; and Catullus (Ixvii. 34), in a passage, hosever, which las been banished by some editors as not genuiue, Brixia, which undoubtedly belonged to the Cenomani, is styled the mother city of Verona. Pliny, on the other hand (iii. 19. s. 23), gives Verona partly to the Rhaeti and partly to the Euganei, and Strabo (l. c.) nttributes it to the former. Some have sought a solution of this difficulty by assuming that the city belonged originally to the Euganei, but was subsequently occupied ly the Conomani, referring to

Livy, v. 35. (Cf. Justin, xx. 5.) We know little or nothing of the early history of Verona. Under the Roman dominion it became a colony with the surname of Augusta, and one of the finest and most flourishing cities in that part of ltaly (Tac. II. iii. 8; Itin. Ant. p. 128 ; Strab. v. p. 213; Grut. Inscr. p. 166. 2.) The surrounding contutry was exceedingly fruitful, producing good wine, excellent apples, and abundance of spelt (alica, Plin. sviii. 11 s. 29, xis. 1. s. 3, xv. 14. s. 14; Cassiod. Var. xii. 4). The Rhaetian wine also is praised by Virgil. (G. ii. 94; ef. Strab. iv. 206; Suet. Oct. 77.) The situation of Verona rendered it a great thoroughare and the centre of several highroads (Itin. Aut. pp. 128, 174, 275, 282; Itin. Ilier: p. 558.)
Verona was celebrated in history for the battle fought by Marius in the Campi Randii, in its neighhourlhood, againt the Cimbri. (Vell. Pat. ii. 12; Florus, iii. 3.) From an inscription still extast on one of its gates, now called the Porta de' Borsari, the walls of Verona appear to have been newly erected in the reinn of the emperor Gallienus, A. D. 265. It was besieged by Constantine on lis march from Gaul to Rome, and, though obstinately defended by Ruricius Pompeianous, obliged to surrender at discretion. (Paneg. Vet. ix. 9, sqq.) It was likewise the scene of the victory of Theodoric over Odoace. (Jormand. Get. 57.) Theodoric made it one of his residences, and often beld his court there: a representation of his palace is still extant upon a seal. (Gibbon, Decl. and Fall, vol. v. p. 22, ed. Smitb.) It was at Verona that the splendid wedding took place between king Autharis and Thendelinda. (Procop. B. G. iii. 5 ; Paul. Diac. iii. 29.) But, more than by all these events, Verom is illustrious as baving been the birthplace of Catullus (Ovid. Amor. iii. 15. 7; Bart. x. 103; Plin. xxxvi. 6. s. 7); though it is exceedingly donotful whether the remasins of a villa on the Lago di Garda, commonly called the villa of Catullus, conld really have belonged to him. The honour sometimes claimed for Veroma of having given birth to the arehitect Vitruvius Pollio arises from a mistaken interpretation of the inscription on the arch of the Gavii, fornerly existing at Veroma, bnt pulled down in the year I805. The inscription related to the great architect's less celebrated namesake, Vitruvius Cerdo. (Descriz. $d \boldsymbol{i}$ Verona, pt. i. p. 86.) Sume are of opinion that the elder Pliny nlso was borv at Yerona, but it is more probable that be was a native of Comum. In the life of him ascribed to the pen of Suetonius, be is styled Novocomensis ; and when be calls himself in his Preface the conterraneus of Catullus, that epithet by no means necessarily inplies that be was the fellow-citizen of the poet, but rather that he mas merely his fellow-countryman, or from the same province.
The amplitheatre at Verona is a very striking monument of antiquity. Although not nearly so large as the Colosseum, it is in a much better stato of preservation, owing to the pains which have always been taken to keep it in repair. It is also of a more costly material than the Roman amphitheatre; for whilst the latter is built of travertino, that at Verona is of marble, from some quarries in the neighbourhood. The substructions are of Roman brickwork. Thic date of its exection cannot be ascertained, but it must ondonbtediy have been posterior to the time of Augustus. A great part of the external arcade was thrown down by an earthquake in the year 1184. 1ts form is elliptical, the larger
dinmeter being 513 feet externnlly and 248 internally ; the smaller one, 410 feet externally and 147 feet internally. The banks or rows of sents are at present 45 in number, but, from the repairs and alterations which the building has nndergone, it is not certain whether this was the original number. It is estimated that it would afford seats for about 22,000 persons.

There are also o few remains of a Roman theatre, on the left bank of the Astige, at the foot of the hill immediately under the sastle of $S$. P'uetro It apjears from two decrees of king Berengavins, dated in 895 and 913 , that the theatre was then regarded as of the highest antiquity, and had in great fart gone to ruin ; on which account its destruction was allowed. (Descriz, di lerona, pt. ii. p. 108, sqq.)

We have already alluded to the ancient gate called the Porta de Jorsarti. It is evidently older than the walls of Gallienus, the eleration of which in the space of 8 montls is recorded upon it; since a previons inscription has been erased in onder to make room for the new one. It is a double gate, of a very florid style of architecture, concerning the merits of which architects have held widely different opinions. The walls of Gallienns, to judge of them from the restiges which still remain, were of a construction sufficiently solid, notwithstanding the shortness of the time in which they were erected. The other remains of antignity at Veroat, as the Porta de' Leoni, the baths, \&e., do not require any particular description in this place.

The chief works on Verona and its antiquities are the splendid ones of Count Scip. Matfei, entitled İerona Illustrata, and Musewm I'eronense. Onuplurius Panvinins also deseribed its remains (Autig. Jeron. lib. viii. Pat. 1668 ). Some acconnt of them will likewise be found in the Descrizione di lerona e delle sua Provincia, by Giorambatista da Pertico. 8vo. Yerana, 1820.
[T. H. D.]
V1RONES. [BErones.]
VERLUCIN1, a Gallic people near the Alps in the Provincia. Pliny (iii. 4) says: " levio Camatullicurum, dein Suelteri, supraque Vermeini." [Chmatuldici; Sueliferi.] There is nothing to guide us in fising the position of the Verrucini, except their position with respect to these two other tribes, and the fact that there is a place named Verignon, between Dragaignam and Ries. Iragrignan is in the department of Sar, and Kiez is on the site of Reii [Ren Apolisinares]. [(i. L.]

VERRUGO or VERRUCA ("E $\rho$ pouka, 1)iod.: Colle Firro?), a town or fortress in the territory of the Volsci, which is repeatedly mentioned daring the wars of the Iomans with that people. The name first oceurs in B. C. 445 , when we are told that the place had been recently ocenpied and fortified by the Romans, evidently ns a post of offence ngainst the Volscians; a proceriling which that people resented so much that it became the accasion of a fresh war. (Liv, iv. 1.) We do net know at what proriol it fell arsin into the hands of the Volacians, but in B. f. 409 it was reeovered and urain garrisoned by the konaus. (16. $5.5,56 ;$ Diod. xiv: 11.) 1t, however, fell once more into the hands of the Vulscians in 1s. c. 407 (I.iv. iv. 58), and npparently continued in their passession till B. A. 394 , when it was again occupied with a garrison by the military tribunc C. Acmilius, but kost roon after in consequence of the defeat of lis colleague Sp, Postumias. (Liv, v. 28; Diod. xiv. 98.) From this time it wholly disappears from listory. It is very doubtiul whether it ever wus a
town, the mnnner in which it is mentioned by Liry, in connection with the Arx Cnrventana, seemiog to prove that it was a mere fort or stronghold, garrisoned and fortified, on account of its natural strength and advantageous position. Its site cannot be determined with any'certainty, bnt from the name itself there cao be no doubt that it was situated on a projecting knall or peak ; hewe its site bas been *aught by Nibby (followed by Abeken) at Colle Ferro, near Signi; Colle Sacco, in the same neighbourhood, lias as plansible a claim. (Nibby, Dintorni, vol. iii. p. 473 ; Gell. Top. of Rome, p. 458; Abeken, Mittel-Italien, p. 75.) [E. H. B.]

VERTACOMICORI, a pagns of the Vocontii in Gallia l'rovincia, to whom I'liny (iii. 17) attribntes the fonndation of Novaria in Gallia Cisalpina [Novirma]. The name seems to be preserved in Vercors, a district in the old conntry of the Vocontii, in the northern part of the diocesc of Die [11F.L Vocostionuy ]. In some middle age documents the name appears in the abbreviated form Vercorinm, which is the next step to Vercors ( $D^{\prime}$ Anville, Notice, fc.).
[G. L.]
VERTERAK, a town of the Brigantes in Britannia Rumans. (Itin. Ant. pp. 467,476 .) Variously identified with Brough in Hestmoreland and Bomes.
[T. H. D.]
VEliTINAE (Ov̀eptivat: Verzino), a small town of Bruttium, mentioned only by Strabo (vi. p. 254), who places it in the interior of that country. Its מume is still retained by the village of Verzino, abont 7 miles NW. of Strongoli, the ancient Pe telia.
[E. II. B.]
VERUBIIM (Oíєpov6iou, Ptol. ii. 3. § 5), а promontory on the N. coast of Britamia Barbara, most probably Noss Head. [T. H. D.]

VERVES ( $\Theta$ úgouveis, I'tol. iv. 1. § 10), a feople of Manretania Tingitana.
[T, H. D.]
VERULAE (Eth. Verulanus: Ieroli), a city of the Hernici, but included in Latium in the more extensive sense of that name, sitaated in the Apennines N. of the valley of the Sacco, between Alatrimm and the valley of the Liris. It was upparently one of the chief cities of the Hernici, and was certainly a member of the Hernican League: but its name is not mentioned separately in bistory till the final war of that people with Fome, in 13. c. 306. On that nccasion the citizens of Verulne, together with those of Alatrium and Ferentinum, took part against the Anagnians, and refused to join in the hostilities against Rome. For this reason they were rewarded after the temmination of the war by being left in pussession of their own laws and magistates, which they preferred to receiving the Ruman "civitas." (Liv. ix. 42, 43.) The perionl at which they ultimately became Roman citizens is uncertain. Florus vagnely asserts that a triumph had been celebrated over the people of Verulae (1/lor, i. 11. § 6), but this is probably a mere thetorical fluprish: there is no occasion known in history to which it can be referred. Under the Roman dominion Verulae became a quiet and somewhat abscure conntry town. According to the Liber Coloniarmm it received a body of colonists in tha time of the Graceli, and regain under the reign of Nerva. But it is probable that it always retained its municipal rank. It is menfioned by Pliny among the municipal towns of the Fifth liegion (Plin. iii. 5. s. 9), but is not again noticed in thistory. Its secluded position probably rendered it a place of small importance. The
ancient site is still occupied by the modern town of Ieroli, which retains also some portions of the ancient walls in the polygonal or Cyclopean style. (Westphal, Rüm. Kamp. p. 87 ; Abeken, NittelItalien, p. 147.)

Verulamium. [Verolamitm.]
 town in the N. part of Lusitania, perhaps $S$. Vincent de Beira.
[T. H. D.]
VESASPE (Oviead $\sigma \pi \eta$, Ptol. vi. 2. § 12), a town in Media Atropatene, perhaps the same as the present Cashin.

VESCELIA, a town of the Oretani in Hispania Tarraconensis (Liv. xxxv. 22), perhaps hilches. (Ukert, ii. pt. i. p. 413.)
[T. H. D.]
VESCELLIUM or VERCELLIUM, a town of the Hirpini, of uncertain site. 1ts name is mentioned by Livy (xxiii. 37) as having been recorered by the praetor M. Valerins, after it had revoited to the Carthaginians. The reading in Livy is very uncertain, but Pliny also meatioas the Vescellani among the maoicipal commanities of the Hirpini. (Plin. iii. 11.s. 16. )
[E. H. B.]
Vesci faventia (Oűeokıs, Ptol. ii. 4. § i1), a town in Hispania Baetica, between Singili and Astigi. (Plin. iii. 1. s. 3.)
[T. H. D.]
VEscla (Eth. Vescinus), a city of Latium, in the most extended sense of that name, but origiaally a city of the Ausones, situated in a plain to the S. of the Liris (Garigliano). Livy in one passage tells us distinctly that the Ausones had three cities, Ausona, Minturnae, and Vescia, all of which were betrayed into the haads of the Romans by a party within their walls, aod the inhabitants put to the sword in E. c. 314. (Liv. ix. 25.) The name of Vescia is mentioned also about 25 years before as affording shelter to the remains of the Latio army defeated by the consuls Manlius aud Decius in B.c. 340 . (ld. viii. 11.) But after the capture of the city in 314, no mention of it again occars, and it is probable that it never recovered fron that calamity. Minturnae indeed is the only one of these three cities which again appears in history; but the "ager Vescinns" is repeatedly mentioned (Liv. x. 20, 2I, 31), and would seem to have extended from the banks of the Liris as far as the extreme point of the ridge of Monnt Massiens. The Romatu colony of Sinuessa, which was situated just where that ridge abuts upon the sea, is expressly said to bave been planted "in salto Vescino." (Liv. x. 21.) But all trace of the city seems to have been lost. Pliny does not even notice the name among the extinct cities of Latinm and Campania, and we are wholly without a clae to its precise situation.
[E. H. B.]
IEsCITANIA, a district in Spain mentioned only by Pling (iii. 3. s. 4). [Osc.] [T. H. D.]
Vesdiantil. [Vediantil]
VESERIS, a river of Campania, the name of which is known only in connection with the great battle fought with the Latins by T. Manlins Torquatns and P. Decius Mus, n. c. 340 . That hattle is described by Liry as baving been fought "haud procul radieibus Vesaviï montis, qua via ad Viserim ferebat" (viii. 8), an expression which would leave ns in doult whether Veseris was the name of a town or of a river. In another passage he refers to the same hattle as having been fought "ad Veserim" (x. 28); and Cicero also twice notices it as "pugna ad Veserim" or "apud Vescrim." (Cic. de Fin. i. 7, de Off: iii. 31.) Valerios Masimus nses the latter
phasase (vi. 4. § 1). The only author whose expressions are free from ambiguity is Aurelias Victor, who distinctly speaks of that celebrated battle as having beeo fought "apod Veserim fluvium" (de Vir. Ill. 28), and adds that the Romans had pitched their camp on its banks (" positis apud Veserim fluvium castris," $I$ b. 26). The authority of Victor is not indeed worth mach on poiuts of detail, but there is no reason to reject it in this instance, as it is certainly not at variance with the phrases of Livy aud Cicero. The Veseris was probabily a small stream, and is not mentioned on any other occasion, or by any geographer, so that it is wholly impossible now to identify it.
[E. H. B.]
VESIO'NICA, a town of Umbria mentioned oniy by Pliny, who names the Vesionicates smong the municipal commonities of that country. (Plin. iii. 14. s. 19.) It is supposed to be represented by Civitella di Benezzone, in the apper valliey of the Tiber, 7 miles SE. of Perugia. (Claver. Ital. p. 627.)
[E. H. B.]
VEsóntio (Oѝıбסvтiov, Ptol. ii. 9. § 21 : Besancon), in Gallia, the chief city of the Sequani. The paine occurs in Dion Cassius (xxxviii. 34, Ixiii. 24), where Reimaras has written $B \in \sigma \sigma \nu \tau i(i v a$ for the MSS. reading Ov̀ecovti(wva, without any reason. In Ansonius (Gratiarrum Act.) the form Visontio occars, and he speaks of a "municipalis schola" in the place. The orthograplyy of the word varied, as we might expect; and otlier forms occur in Ammianns. D'Anville says that the name is Vesant on a milestone which bears the name of Trajan, and was foond at Mandeure [Epamaxduodurum, in which article the name is incorrectly printed Vesoot].

When Caesar ( (. c. 58) was marching through the country of the Sequani towards the German king Arioxistus, he heard that the Germaa was intending to occupy Vesontio, hat Caesar got there before him (B. G. i. 38.) He describes the town as nearly surrounded by the Doubs [Dubis], and he says that the part which was not surrounded by the river was only 600 Roloan feet wide. This neck of land was filled by an emioence, the hase of which on each side was washed by the river. There was a wall along this neck of land, which made it a strong fortress, and the wall connected the heights with the town. Caesar's description is exact except as to the width of the neck of laod, which D'Aaville says is abcut 1500 Roman feet; aad accordingly either Caesar was mistaken, or there is an error in bis test in the nqmerals, which is always a possible thing. Vesontio when Caesar took it was well supplied with everything for war, and its position made it a strong place. Caesar set out from Vesontio to fight the Gierman king, whom he defeated in the plain between the losges and the Rhine. The battle-field was only 5 miles from the Rhine (B.G. i. 53 , in which passage the troe reading is " milia pasuun ...circiter quinque," not "quinquagiata.") In the winter of a. C . $58-57$ Cacsar quartered bis men among the Sequani, and we may assume that Vesontio was one of the places where he fixed bis troops.

Vesoatio has been several times sacked and destroyed by Alemanni, by Huns, and others. It is a town built on the ruins of former towns. The gronad has been raised above 20 feet, and where it has been dug ioto, liuman remains, medals, and other aatiquities have beea discorered.

The modern town of Besançon consists of two parts. The npper town, once called $L a$ lille, is boilt on the peninsula, and the citadel stands on the steep

## Vestini.

$r_{\text {ock which }}$ Caesar describes as occupying the neck of land, where the river does not flow. The lower town is on the other side of the river opposite to the peainsula, with which it is cennected by a stone bridge, the foundationa of which are Roman.

There is a Roman triumphal areh witha single passace. The date of its construction does not appear. This arch which was nearly hidden by rubbish and bnildings has beeo partially uncovered and restored within the present centmry. It is decorated with sculptures. Tbere are some remains of the aquednct which supplied Vesontio with water from a distant source. It was constructed of a soft stone. It terminated in the town in a vast reserveir of an oval form, which was covered by a roof supported by columns. The water was distributed from the reservoir all througb the town: and in many parts of Besancon there have been found traces of the conduits which conveyed the water to the private bouses. (Penny Cyclopaediu, art. Besancon; Kichard et Hocquart, Gruide dut Voyageur.) [G.L.]

VESPA'SIAE. [Nursia.]
VEsPERIES, a tewn of the Varduli in Hispania Tarraconensis. (Plin. iii. 20. s. 34.) It is identified with the preseat Bermeo. (Cf. Meatelle, Esp. Mod. p. 37.)
[T. H. D.]
VESTIN] (Oünotivot), a people of Central Italy, who occupied a mountainous tract estending from the coast of the Adriatic to the lofty mountaius near the sources of the Aternus. Here they met the Sabines, whose territory bonnded them on the W. ; thence they were bounded by the bigh mountain range which forms the southern barrier of the valley of the Aternus, and separated them from the Aequi and Marsi; while towards the S. and E. the river Aternus itself, from the point where it takes the sudden bend towards the NE., became the limit of their territory, and their frontier towards the PeJigni and Marrucioi. Along the coast of the Adriatic they held oaly the narrow space between the meuth of the Aternos and that of the Natrious, a distance of about 6 milea; the latter river apparently formed the northero limit of their territory from its mouth to its sonrce, and thence to the high ridge of the Central Apennines their exact froutier cannot be traced. But it is almost immediately after passing the point where the Vestioi adjoined the Practutiif on the one hand and the Sabines on the other, that the chain of the Apennines rises abruptly into the lofty group or mass, of which the Monte Corno (commenly called the Gran Siasso or Italia) is the highest summit. Tbis mountain is the mast elevated in the whole range of the Apennines, attaining to a height of 9500 feet; and those immediately adjoiving it are but little inferier, forming a rugged and irregular mass of mountains, which is continued without interruption by a range of inferior but still very considerable clevation, io a SE. directien. This range is almost contiouous with the equally lofty ridge of the Monte Morrone, the two being separated only by the deep and narrow gorge below Popoli, through which the Aternus finds its way to the sea. Heace the tenitory of the Vestioi is naturally divided into two distinct regions, the one consisting of the upper valley of the Aternus, W. of the lofty mountain range above described, the other of the tract on the $\mathbf{l}$. of the same mountains, sloping gradually thence to the ses. This last district is sery hilly and rugged, but las the adrantage ofa far milder climate than that of the basin of the Aternus, which is a bieak and cold upland region, having much analogy
with the valley of the Peligni (of which it may be considered in some degree as a continuation), but from its considerable elevation above the sea ( 2380 fect io its upper part) suffering still more severely from cold in winter. The Vestini, however, did not occupy the whole of the valley of the Aternus; Amiteroum, near the scurces of that river, which was one of the oldest abodes of the Sabines, having contiuned, even in the days of Pliny, to beleng to that pecple, and thongh Ptolemy assigns it to the Vestini, it is probable that in this, as in many similar casea, he was guided by geographical views rather than the real ethnical distribution of the tribes. (Strab. v. p. 228 ; Plin. iii. 12. s. 17; Ptel. iii. 1. § 59.) But the precise line of demarcation between the Vestivi and the Sabines, camnot now be determined.

No auther has left to us any distinct statement concerning the origin and affinities of the Vestini, but there seems to be vo reason to doubt that they were, in common with the other tribea by which they were surrounded, a Sabine race. It would indced have been almost impassible for that people to have extended themselves to the $S$., and sent forth their namerous colonies, the Peligni, the Samnites, \&c., had not the valley of the Aternus been already occupied by a kindred and friendly race. The close convection which we fiod subsisting between the four tribes of the Vestini, Marrucini, Peligni, and Marsi, may be alse taken as a strong presumption of their common origin, and there seem good reasons for suppesing them all to have been derived from a Sabine stock. The first mention of the Vestini in history occurs in B. c. 324, when they coocluded an alliance with the Samnites against Reme. It was feared that their example would be speedily followed by the Marrucini, Peligni, and Marsi, but this was not the case, and the Vestini, unsupported by their allies, were uaable to resist the Roman arms: they were defeated and dispersed by the consul D. Juaius Brutns, and took refuge in their fortified towns, of which Cutina and Cingilia were successively taken by assault. (Liv. viii. 29.) From this time we hear nothing more of the Vcstini till e. c. 301 , when they concluded a treaty with the Remans, which appears to have been an alliance on favonrable terms (Id. x. 3); aod from this time the Vestini became the faithful allies of the rising republic. In the enumeration of the forces of the ltalian allies in B. c. 225 , Polybins mentions the Vestini, together with the Marsi, Marrucioi, and Freataui (the Peligni being omitted), and estimates their joint contingent at 20,000 foot and 4000 horse soldiers (ii. 24); but we have no means of judging of the proportion farnished by each nation.

No cther mention is found in history of the Vestimi, with the cxception of casual netices of their troops serving as auxiliaries in the Roman armies (Emius, Ann. Fr. viii. 6 ; Liv. xliv. 40), until the outbreak of the Social War, is B. c. 90 . On this occasion they followed the example of the Marsi and Peligni, as well as of their more immediate neighbours the Picentines, and were among the first to declare themselves in irsurrection agaiast Rome. Liv. Hpit. Ixxii.; Oras. v. 18; Appian, B. C. i. 39.) There can be no doubt that throughont that contest they furnished their contingent to the armies of the Marsi; but their name is not specially mentioned till towards the close of the war, when we learn that they were defeated and reduced to submission, apparently somewhat somer than the other confede-
rales. (Liv. Epit. 1xav, 1xxvi; Appian, B. C. i. 52; Oros. v. 18.) There is no dunbt that they at this time received the Lionan franchise, and henceforth became merged in the ordinary condition of Romau citizens. Hence we lear nothing more of them in history, though it is evident that they retained their existence as a separate tribe, which is recognised by all the geographers, as well as by inscriptions. (Strab. v. p. 241 ; Plin. iii. 12. s. 17 ; Ptol. iii. 1 . § 59; Orell. Inscr. 4036.) From the last source we learo that they were enrolled io the Quirinian tribe. Their territory was included in the lourth Region of Augustus (Plin. L. c.), bat in the later division of 1taly it was separated into two, the maritime district being united with Picenum, while the inland portion or valley of the Atermus was inclnded (together with the Sabines and Peligni) in the province of Valeria. (Lib. Colon. pp. 227, 228; Bingham's Eccles. Antiq. ix. ch. 5, sect. 3.) We learn frum Juvenal that they continued to retain their primitive simplicity and rustic babits of life even under the Roman Empire. (Juv. xiv. 181.) Silius Italicus speaks of them as a race, hardy and warlike, and habituated to the chase: their ruggel mountaias were doubtless still the refuge of many wild animals. (Sil. ltal. viii. 513.) The more inland parts of their territory abounded in excelleut upland pastures, which produced a kind of cheese that was highly esteemed at Rome. (Plin. si. 42. s. 97 ; Martial, xiii. 31.)

The most important physical feature of the territory of the Vestini is the Moate Corno or Gran Sasso d' Italia, which, as already observed, is the highest summit of the Apeanines. This was identified by Cluver, who has been followed hy most liter writers, with the Cunarus Mons of Servius (ad Aen. x. 185). But Silius Italicus (viii. 517) places the Mons Fisceluus, a name much better known, among the Vestini; aod though this is opposed to the statement of Pliny that that mouotain contains the sources of the Nar, there seems much reason to believe that Pliny has here confounded the Nar with its tributary the Velinus [ $\mathrm{NAR}^{2}$ ], which really rises io a group closely connected with the Gran Sasso, and that it was therefore that remarkable mountain range whicls was known to the ancients as the Mlons Fissellus.

The following towns are noticed by ancient writers as belonging to the Vestini. Pinva, now called Civita di Penne, appears to hare been the chief of those which were situated on the eastern slope of the mountains. Lower down, and only a few miles from the sea, was Angulus, now Civita S. Angelo. Aternum, at the mouth of the river of the same name, now Pescara, was the seaport of the Vestini, and, being the only one along this line of coast for some distance, served also as that of the Marrucioi. In the valley of the Aternus were: Peltuisuas (Ansedonia), about 14 miles S. of Aquilc; Aresa, the remains of which are still visible at Fossa, abont 6 miles S. of Aquila; and Pitivest, still called Torre di Pitino, about 2 miles E. of the same city, which must have inmediately adjoined the territory of Amiternum. Furconiost, the ruios of which are still visible at Civita di Bagno, a little to the S. of Aquila, though an important place in the early part of the middle ages, is not mentioned hy any writer before Paulas Diaconns (Hist. Lang. ii. 20), and was certainly not a municipal town in the time of the Romans. Prifenvum (mentioned only in the Tab. Peut.) is of very uncertain site, but is suppasel to have been near 4 so
sergio. Aquila, the present capital of this district, is a wholly molern city, liaving been founded by the emperor Frederic 11. in the 13th century, when its population was gathercd together from the surrounding towns of Amiternum, Aveia, Furconium, \&.c., the complete desolation of which appurently dates from this period. AuriNA, which according to Pliny (iii. 12. s. 1i) was in his time united for municipal purposes with Peltuinum, still retains the naine of Ofena. Cutiva and Cingilu, two towos of the lestini mentioned by Liry (viii. 29), are wholly unknown, and the sites assigned to them by Romanelli, at Civita Aquana and Civita Retenga respectively, are merely conjectural.

The topography of the Vestini is specially illnstrated in the work of Giovenazzi (Della Citta $d^{r}$ Aveja nei Testini, 4to. Roma, 1773), as well as by Romanelli (vol. iii. pp. 241-284). [E. H. B.]
VESUBIA'NI, a people mentioned in the inscription of the arch of Susa. The resemblance of name has led geographers to place the Vesubiani in a valley through which runs a torrent called Vesubia, which falls into the Var. The Esubiani, who are mentioned io the inscription of the Trophy of the Alps (Pliny, iii. 211) seem to be the saine as the Vesnbiani, for the only difference is a V. But D'Anville places the Estubiani on the Ubaye and the Ubayette, which two streams unite above Barcelonette in the department of Basses-Alpes. [G. L.]
VEsULUS MONS (Monte Fiso), ooe of the mast lofty summits of the Alps, which, from its prominent position near the plains of Italy, and its great superiority in beight over any of the neighbouring peaks, is one of the moct conspicuons mountains of the whole Alpioe range as viewed from the Italian side. Hence it is one of the very few individual summits of the Alps of which the ancient oame can be identified with certainty. It is meationed by both Pliny and Mela as containing the sources of the Padus; and the former adds that it was the highest summit of the Alps, which is a mistake, but not an unnatural one, considering its really great elevation ( 12,580 feet) and its comparatively isolated positioo. (Plin. iii. 16. s. 20: Mela, ii. 4. § 4.) Virgil also mentions the forests of "the pine-clad Vesalus ${ }^{n}$ as affording shelter to numerous wild boars of the largest size. (Virg. Aen. x. 708 ; Serv. ad hec.)
[E. H. B.]
VESUNNA (O (ii. 7. §12) the capital of the Petrocorii, a people of Aquitania. In inscriptions the name is written Vesunna. The place occurs in the 1 tins., and its position is Perigueux, in the old province of Perigord, which name as well as Périguerte is a memorial of the name of the people, Petrocorii. But it is said that the remains of the old town are still called $L_{a}$ Fesone. I'rigueux is on the Ille, a branch of the Dordogne, and it is the capital of the department of Dordogne.

There is no Roman city in France of which we know so little that contains so many remains as Périguezx. Foundations of ancient baildings, mosaics, statues, and ruins of edilices show its former magnitude. The tour de Jésone, a round building constructed of small stones and of rough materials, is supposed to have been the cella of a temple, or a tomb, as some conjecture. it is about 200 feet in circumference. There were seven bridges at Vesunna, four of which bave been repaired or rebuilt. There are some remains of an amphitheatre
town with water. There are also remains of a Roman citalel. On a hill which commands Vesunna, and is separated from it by the river Ille, there are the remains of a Roman camp, which is called Camp do Císar, though Caesar never was there; but some of his successors may bave been. There are several other Loman camps about Perigueux. Soveral Romao rosuls have boen traced leading to Périgueuz. Vesunaa seems to have been an important position in Ajpuitania during the imperial goveroment of Rome. There is a French werk on the antiquities of V'esone by M. Wlgrin de Tailleffer, 2 vols. 4to. 1821. Périgueux.
[G. L.]
VESUTIU'S MONS (OU̇ecoúkos, or Oủe oovibios: Monte Fesuvio), sometimes also called by Latin writers Veseves, and Vesvius or Vespans (BéaGios, Dion Cass.), a celebrated volcanic mountain of Campania, situated on the shore of the gulf called the Crater or Bay of Naples, from which it rises directly in an isolated conical mass, separated on all sides from the ranges of the Apemines by a broad tract of intervening plain. It rises to the height of 4020 feet, and its base is mearly 30 miles in circumference.

Thongh anw celehrated for the freqnency as well as violence of its eruptions, Vesuvius had in ancient times been so long in a quiescent state that all tradition of its having ever been an active volcano was lost, and until after the Christian era it was noted chiefly for the great fertility of the tract that extended around its base and up its sloping sides (Virg. Georg. ii. 227; Strab v. p. 247), a fertility which was in great measure owing to the deposits of fine volcanic sand and asles that had been thrown out from the mountain. There were not indeed wanting appearances that proved to the accurate observer the volcanic origin and natare of Vesuvius: bence Diodorus speaks of it as "beariag many signs of its having been a burning moantain in times long past " (Diod. iv. 21); but though be coasiders it as having on this account given name to the Phlegraean plains, he does not allude to any historical or traditional evidence of its former activity. Strabo in like manner describes it as "surrounded by fields of the greatest fertility, with the exception of the summit, which was for the most part level, and wbolly barren, covered with ashes, and containing clefts and hollows, formed among rucks of a burnt aspect, as if they lhat beco eaten away by fire; so that a person would be led to the conclusion that the spot had formerly been in a state of conflagration, and bad craters from which fire had burst forth, but that these bad been extinguished for want of fuel " (v. p. 247). IIe adds that the grent fertility of the neighbourhood was very probably owing to this cause, as that of Catana was produced by Mount Aetua. In consequence of this fertility, as well as of the beauty of the adjoining bay, the line of coast at the foet of Vesurius mas occupied by sereral flourisbing towns, and by numbers of villas belonging to wealthy Ioman nobles.

The name of Jesuvius is twice mentioned in history before the Christime era. In n. C. 340 it was at the foot of this mountain that was fougbt the great battle between the Lomans and the Latins, in which P. Docius devoted himself to death for bis conntry. (Liv, viii. 8.) The precise scene of the action is iuded uncertain, though it was probably in the plain on the N. side. Livy describes it as "haud procal radicibus Vesuvii montis, qua ria ad Vescrim fercbat;" but the situation of the Yeseris is
wholly uncertaio. [Veserts.] Again, at a later period (a, c. 73) we are told that Spartacus, with the fugitive slaves and gladiatora under his command, took refuge on Mount Vesuvius as a stronghold, and by a sudden sally from it defeated the Roman general Claudius Pulcher, who had been sent against him. (Flor. iii. 20. § 4; Plut. Crass. 9 ; Appian, B. C. i. 116 ; Yell. Pat. ii. 30; Oros. v. 24; Frontin. Strat. i. 5. § 21.)

But it was the fearful eruption of the 24th of Augnst, A. D. 79 , that first gave to Vesuvius the celebrity that it has ever since enjoyed. That great catastrophe is described in detail in a well-known letter of the younger Pliny to the historian Tacitus; and more briely, but with the addition of some fabulous circumstances, by Dion Cassius. (Plin. Ep. vi. 16, 20; Dion Cass. Ixvi. 21-23; Vict. Epit. 10.) It is remarkable that in recording thia, the earliest eruption of the monntain, Pliny particularly notices the form assumed by the cloud of ashes that, rising from the crater in a regular column to a considerable beight, afterwards spread out laterally so as to form a bead like that of a stone-pine: an appearance which has been obscrsed in many subsequent eruptions. The other phenomena described are very much the same as are common to all similar eruptions: but the mass of ashes, sand, and pumice thrown out was so vast as not only to bury the cities of Herculaneum and Pompeii at the foot of the volcano under an accumulation many feet in depth, but to overwhelm the more distant town of Stabiue, where the elder Pliny perisbed by suffication, and to overspread the whole bay with a cloud of ashes such as to cause a darkness more profound than that of night even at Mlisenum, 15 miles distant from thie foot of the motuntain. (Pliu. l.c.) On the other hand the outflow of lava was inconsiderable, and if any streams of that kind broke out at this time they probably did not descend to the inhabited regions: at least we hear nothing of them, and the popular notion that Herculaneum was overwhelmed by a current of lava is certainly a mistake. [HzneuLaNELM.] So great and unexpected a calamity naturally excited the greatest sensation, and both the poets and the prose writers of Rome for more than a century after the event abound with allusions to it. Tacitus speaks of the Bay of Naples as "pulcerrimus sinus, ante quam Vesuvios mons ardescens faciem loci verteret." (Ann. iv. 67.) Martial, after descanting on the bcanty of the scenc when the mountain and its neighbourhood were covered with the green shade of vines, adds:-
"Cuncta jacent flarnmis et tristi mersa favilla"
(iv. 44);
and Statius describes Vesuvius as
"Aemula Trinaeriis volvens incendia flammis."
(Silv. iv. 4. 80.)
(Sce also Val. Flacc. iii. 208, iv. 507 ; Sil. Ital. xvii. 594; Flor. i. 16. § 5.)

A long iuterval again clapsed before any similar outbreak. It is probable indeed that the mountain continued for some time at least after this first eruption to give signs of activity by sending forth smoke and sulphurous vapours from its crater, to which Statius probably alludes when he speaks of its summit still threatening destraction (" necdum lethale minari cessat apex," Silv. iv. 4. 85). But the next recerded eruption, and probably the next of any magnilnde, occursed in A. D. 203, and is noticed by Dion Cassius (1xxvi, 2). This is pro-
bably the one alluded to by Galen (de Meth. v. 12), and it seems certain from the description given by Dion Cassius of the state of the moantain when he wrote (under Alexander Severus) that it was then in a state of occasionsl, but irregular, activity, much resembling that which exists at the present day. (Dion Cass. Isvi. 21.) The only other eruption that we find mentioned under the Roman Empire occurred in A. D. 472 ander the reign of Anthemius. (Marcellin. Chron. ad nnn.) A fourth, which took place in the reign of Theodoric king of the Gotlis (s. D. 512), is noticed by both Cassiodorns and Procopius, who describe in considerable detail the Ibenomena of the mountaid. It appears certain that these later eruptions were accompanied by the discharge of streams of lava, which cansed great mischief to the surrounding country. (Cassiod. Ep. ir. 50; Procop, B. G. ii. 4, iv. 35.)

It would be foreign to onr subject to trace the history of the mountain through the middle ages, but it may be mentioned tbat its eruptions seem to bave been far more rare and separated by longer intervals than they have been for more than two centuries past; and in some instances at least these intervals were periods of perfect quiescence, during which the mountain was rapidly losing its peculiar aspect. Even as late as 1611 , after an interval of little more than a century, the sides of the mountain were covered with forests, and the crater itself was overgrown with shrubs and rich herbage. (Daubeny on Volcanoes, p. 225.)

At the present day Vesnvius consists of two dislinct portions: the central cone, which is now the most elevated part of the mountain; and a ridge which encircles this on three sides at some distance, and is separated from it by a level valley or hollow called the Atrio del Cavallo. This outer ridge, of which the lighest point, near its N. extremity, is called Monte Somme, was probably at one time contiouous on all sides of the circle, but is now broken down on the S. and W. faces: bence the appearance of Vesuvius as viewed from Naples or from the W. is that of a mountain having two peaks separated by a deep depression. This character is whoily at variance with the description given by Strabo, who tells us that the summit was nearly level, but with clefts and fissures in it, from which fire appeared to have formerly issued (v. p. 247). Hence it is probable that the mountain was then a single trancated cone, and that the vast crater-like hollow of which the Atrio del Cavallo forms part, was first created by the great eruption of A.D. 79, which blew into the air the whole mass of the then existing sommit of the mountain, leaving the present ridge of Monte Somma standing, eoclosing a vast crater, within which the present cone has gradually formed. (Danbeny on Tolcanoes, p. 215; Lyell's Principles of Gcology, p. 365,8 th edit.) It has indeed been frequently assumed from the accounts of the operations of Spartacus already mentioned (Flor. iii. 20; Plat. Crass.9) that the mountain bad even then a crater, within which that leader and his band were enclosed by the Boman general: but it is rery doubtful whether the passages in question bear out thisinterpretation, which seems at variance with the account given by Strabo, whose description has every appenrance of being derived from personal observation.
(Conceruing the history of the different eruptions of Vesurius see Della Torre, Storia del F'esurion, 4to., Napoli, 1755; and the geological mork of Dr. Daubeny, ch. xii.)

Vetera. [Castra Vetera.]
VETTONA (Eth. Vettonensis: Bettona) a municipal town of Umbria, situated about 5 miles E. of the Tiber, between Perusia and Mevania. It is mentioned by Pliny among the municipalities of Umbria, and its name is found also io an inscription among the "xv Populi Umbriae;" wbile another mentions it in connection with Perusia, from which it was only about 10 miles distant, as measured on the map, though the Tabola calls it 14 mites from that city and 20 from Tuder. (Plin. iii. 34. s. 19; Orell. Inscr. 95, 98: Tab. Peut.) Vettona continued in the middle ages to be a city of considerable importance, but it was destroyed by the Perugians in 1352. The ancient site is, however, still marked by the village of Bettona, about a mile from the left bank of the Tinia. [E. H. B.]

VETTONES (OUé $\tau \tau \omega \downarrow \in s$, Strab. iii. p. 152; Ovétтoves, Ptol. ii. 5. §9), one of the principal peoples of Lusitania. (Caes, B, C. i. 38 ; Plin. iv. 21. s. 38 ; Grat. Inser. p. 383. 7.) Strabo alone (l. c.) assigns them to Hither Iberia, or the Provincia Tarraconensis. We find their conatry called Vettouia by Prudentius ( $I_{y y m n, ~ i n ~ E u l a l . ~ v . ~ 186) ~ a n d ~}^{\text {a }}$ in an inscription. (Orclli, no, 3664.) It was watered by the Tagus, and separated by the Dorius from Astaria on the N. On the W., where their boundary corresponded very nearly with that of modern Portugal, they adjoined the proper Lusitani. On the E. they neighbonred on the Carpetani in Hispania Tarraconensis, and their boundary would be described by a line drawn from the modern Simancas in a SW. direction over Puente del Arzobispo to Truxillo. On the S. they were bounded by the province of Baetica, so that their country compreliended a part of Estremadura and Leon. Their principal towos were Salmantica (Salamanca), Cecilionicum (Baños?), Capara (las l'entas de Capara), Sentice (in the neigbbourliood of Los Santos), Cottaeohriga (Almeida), Augustobriga (Ciudod Rodrigo?), \&c. In their conntry grew the herba Vettonica (Plid. xxv. 7. s. 46), still known noder the name of betony; an account of which is given in the treatise De Herba Betonica, ascribed to Antonius Musa.
[T. H. D.]
VETULO'NIA or VETULO'NIUM (Oietou入́wyov, Ptol. iii. 1. § 49: Eth. Vetulonienses), one of the twelve priscipal cities of the Etruscad confederation (Dionys. iii. 51 ; Plid. iii. 5. 8. 8). Yet we hear nothing of its political history; and all we know respecting it is, that it was reputed to be the town in which the Etruscan iosignia of magistracy, afterwards adopted by the Romans, sacb as the lictors, fasces, sella curolis, toga praetexta, \&c., as well as the trumpet, were first used. (Sil. It, viii. 483 , sqq. ; cf. Dionys. iii. 61 ; Strab. v. p. 220 ; Macr. S. i. 6 ; Flor. i. 5 ; \&c.)

Tbe destruction of Vetulonia, and the silence of bistory respecting it, have caused even its site to be a matter of doaht. Thus it has been snught at or near Viterbo (Annio, Antiqq. Var. Volum.), at Massa Marittima, the ancieot Massa Veternensis (Amm. Marc. xiv, 11. § 25), or in a dense wool 5 miles to the W. of that town (Ximenes, ap. Irghirami, Ricerche di V'etulonia, p. 62; cf. Targioni-Tozzetti, Viaggi in Toscana, iv. p. 116) ; on the site of Tulci (Lnc. Boomparte, Ann. Inst. 1829, p. 188, sqq.; and Valeriani, Mus. Chius. i. p. 68); on the hill of Castiglione Bemardi, near Monte Notondo (lnghirami, Ricerche di l'etulonia, Ambrosch), and at

Reg．ii．56）．But till very recently the opioinn most commonly adopted was that of Leandro Alberti， an antiquary of the 16 th ecntury，who placed it on Nomte Calci（Descriz，at Italia，p．27），is a wood called Selva di lietleta；and who has been followed by Cluverius（ItaL Ant．ii．2．p．472），by Mialler （Etrusker，i．P．211），\＆．C．It is now，howeter， generally admitted that Vetnlonia is to be identified with the remains of a city，discovered in 1842 by Sig．Pasquinelli，an Italiad engineer，at Magliano， a village betmeen the Osa and the Albegna，and 8 or 10 miles to the N．of Orbetello．To Mr．Dennis （Cities and Sepulchres of Etruria，vol．ii．ch．48）， however，is to be assigned the credit of first identi－ fying these remains as those of the lost Etruscan city．Their site agrees with what we learn respecting that of Vetalonia．Plioy and Ptolemy（ll．cc．）agree in placing the latter among the inland colonies of Etruria；yet 1Pliny（ii．103．s．106）also describes it as being not far from the sea，and as having hot springs， the Aquae Vetuloniae，in its neigbboorhood．Now， all the necessary conditions are fulfilled by the re－ mains alluded to．The circuit of the walls，about $4 \frac{1}{2}$ miles，shows it to have been an important city；its sitnation with regard to the sea agrees with the account of Pliny；and near Telamonaccio，at a distance of only 200 or 300 yards from the caast， and in the vicinity of the newly fonnd city，warm spriogs still exist．For other reasoas which led Mr． Dennis to the opinion which he formed，the reader is referred to his work before cited，and to his paper in the Classical Museum，vol．ï．p．229，seq．For coins of Vetulonia，see Eckhel，vol．i．pt．i．p．94．［T．H．D．］

VETU＇RII．［Genua．］
VEXALLA AEST．（Où $\xi$ द́d入入a ero $\chi$ vots，Ptol． ii．3．§ 3），a bay on the W．coast of Britamnia Ro－ mana，near the nouth of the riter Sabrina，now Brilgewoter Bay．
［T．H．D．］
LFENS（ $[$ fente），a river of Latinm，rising at the foot of the Volscian mountains，and flowing throngh the Pontine Marshes，whence its course is slow and stagnant，and it is described by both Virgil and Silias Italicus，as a sluggish and muddy stream． （Virg．Aen．vii． 801 ；Stl．Ital．viii．382．）Claudian also calls it＂tardatus suis erroribas l＇fetis．＂（Prob． et OL．Cons．237．）It joins the Amasenas（still called Anaseno）during its course through the marohes to the seat at Terracina，but the present channels of both rivers are artificial，and it is un－ certaio whether they onited their streams in ancient times or not．The name is corrupted by Strabo into Aufidns（Aúpiסos，v．p．233），bnt he correctly describes it as one of the chief agents in the forma－ tion of the Pontinc Marshes．The ancient form of the name was Oufens，whence the Roman tribe Onfentina derived its name，being composed ori－ ginally of citizens settled in the territory and neighbourhood of Privernum（Fest．s．v．Oufentina， p．194）．

UFFUG1 M［Bnettil］．
UGERNDM（Oür $\in \rho^{2} \nu_{0}$ ），a town of Gallia Nar－ honensis．on the road from Nemansus through Ugemum and Tarascon to Aquac Sixtiae（Aix）． Strabo（iv．p．178）has described this roul．The geni－ tive veennt occurs in an inscription found at Nimes． $\mathrm{L}_{\mathrm{tg}}$ ernmin is represcoted by Beaucaire．The Table marks the distance from Nemansas（Nimes）to Ugernum xv．，which is near the truth．In the last rentury the Roman ruad between Nematisus and 1 gernum was discovered with several milestones on it in their original position，and nombered，as it
seems，from Nemausns the ancient capital of the district．These milestones gave the opportunity of asrertaining the length of the Roman mile．The name of Beaucuire is a corroption of the middle－ age name of Bellom－quadrorn．If any trace of the name Ugeroum exists，it is in the name of Gernegue， the lower part of Tarascon，which is on the oppo－ site side of the river，for Beaucaire and Tarascon stand face to face．But in order to admit this，we must suppose that Gernegue represents an island Gernica，which，according to a middle－age docn－ ment，was between Bearcaire and Tarason，and that by some change in the river the island has hecome part of the mainland on the east side of the river；and it is said that this fact about the island is certain．（D＇Anville，Notice，eje．；Penny Cyclo－ paedia，art．Beoncaire．）
［G．L．］
UGilA（Ö́ria，Ptol．ii．4．§ 12），a town of the Turdetani in Hispania Baetica，on the road from Cades to Corduba．（Itin．Ant．p．410．）It is probably the town called Urgia by Pliny（iii． 1．s．3），with the surnames of Castrom Julium or Caesaris Salutariensis，and possessing the Jus Latii． Now I．as Cabezas，where there are some antiquities． （Ct．Ukert，ii．pt．i．p． 356 ．）
［T．H．D．］
VIA AEJILLIA（ì Aipi入ía ódós），one of the most celebrated and important of the Roman bigh－ ways，and the first that was constructed by them in Northern Italy．The period of its first construction is clearly marked by Liry，who tells us that MI． Aemilius Lepidus，the consul of B．C．18\％，after haviog effectually subdued the Ligurians，carried a highroad from Placentin to Ariminum，that it might there join the Flaminian Way（＂Viam ab Placentia， ut Flaminiae committeret，Ariminnm perdnsit，＂Liv． axxix．2）．Strabo indeed gives a different view of the case，and speaks of the Amilian Way as con－ structed in the first instance only from Ariminum to Booonia，and thence sweeping ronod the marshes， and skirting the roots of the Alps to Aquileia（v． p．217）．But there is every reason to suppose that this last branch of the road was not constructed till long afterwards；and there is no doubt of the cor－ rectness of Liry＇s statement that the original Via Aemilia，aod the only one that was generally recing－ nived as such，was the line of road from Ariminum to Placentis．It was this celebrated highway－which is still in use at the present day，and，being carried the whole way through a level plain．preserves almost a straight line during a course of 180 miles－t that be－ came the means of carrying Roman civilisation into the beart of Cisalpine Gaul；and so great was its in－ fluence upon the population that it traversed，that the whole district between the Apennines and the Padns，constituting the Eighth Region of Augustus， and commonly called by gengraphers GalliaCispadana， came to be known as Acmilia，and was eventually corstituted into a province ander that name．The period at which this took place is uncertain，but the appellation was doubtless in popular use long before it became an official designation；and as early as the first century we find Martial employing the ex． pressions，＂Acmilise de regione riae，＂and even ＂tota in Aemilia＂（Martial．jii．4．2，vi．85．6）． As muled all the principal towos of the district （with the single exception of Raveona）were situated on the Via Aemilia，the use of this designation secms extremely natural．

We have no account of the period at which the Via Aemilia was coutinued from Placentia to Medio－ lanum，thoogh there is little doubt that it would take
place soon after the camplete subjugation of the Transpadaue Gauls. Nor do we know with any certainty whether the name of Via Aemilia was ever applied in common usage to this portion of the road, or to the branches that led from Mediolanum to the foot of the Alps, as well as from that city by Verona to Patavium. But as Strabo distinctly applies the name to the branch that led by Patavium to Aquileia, we may here most conveniently include all the priocipal highroads of the N. of Italy under one view in the present article.

1. The main or trunk line of the Via Aemilia from Ariminum to Placentia. The stations on this road are thus given in the Antonine Itinerary, where they are repeated more than once (pp. 99, 126, 287); and, from the direct line of the road, the distances are subject to no doubt :
From Ariminum (Rimini) to

Placentia (Piacenza) - - - xxiv.
The same line is given more in detail in the Jerusalem Itinerary (p. 615, \&c.), with which the Tabula substantially agrees; but the distances are more correctly given in the latter.

The stations enumerated are:Competu (I, H.) Ad Comfluentes ( $T a b$.)
Caesena (Cesena)
Forum Populii (Forlimpopoli) vii.
Forum Livii (Forli) - . - vii.
Farentia (Faenza) - - x.
Forum Cornelii (Imola) - - x.
Claterna (Quaderna) _ . xiv.
Bononia (Bologna) - - . x.
Forum Gallorum - - - - xvii.
Mutina (Modena) - - - viii.
Reginm (Reggio) - - - xvii.
Tannetum (Taneto) - - - xi.
Parma (Purma) - - - vii.
Fidentia (Borgo S. Donino) xv.
Florentia (Firenzuola) - - $\mathbf{x}$.
Placentia (Piacenaa) - - - xv.
The general agreement in the distances above given (which are those of the Tabula) with those of the Antonine limerary, though the division is different, sufficiently shows the accuracy of the two. The distances in the Jerusalem Itinerary are, for this line of roate, generally less accarate. Some nbscure Mutationes mentioned in the one document, and not in the other, have been omitted in the above list.
2. Continuation of the Via Aemilia from Placentia to Mediolanum. This line is summarily given in the Antonine Itinerary thus:-

From Placentia to Laus
Pompeia (Lodi Vecchio) - xxiv. m.f.
Thence to Mediolanum (Milan) xvi.
The same distances are thus divided in the Jerusalem Itinerary:-

The intermediate stations are unknown, and are
cxpressly called mere Mntationes, or places for changing horses.
3. From Mediolanum to Augusta Praetoria, at the foot of the Alps, the distances, as given in the Antonine Itinerary, are :-

From Mediolanum to
Novaria (Novara) - . Exxiii. 31. P.
Vercellae (Vercelli) - - - svi.
Eporedia (Iurea) - - xxxiii.
Vitricinm (Verres) - - - sxi.
Angusta Practoria (Aosta) - xxv.
The same authority gives a circuitoos line of route from Mediolanum to Vercellae (where it rejoins the preceding) by

$$
\begin{aligned}
& \text { Ticiaum (Pavia) - - xxï. M.P. } \\
& \text { Laumellum (Lomello) - - xxii. } \\
& \text { Vercellae (Vercelli) }-\quad \text { xxvi. }
\end{aligned}
$$

4. From Nediolanum to Aquileia. The stations given in the Itineraries are as fullows:-

Med. to Argentia - - - x. m. m.
Pons Aureoli (Pontirolo) x.
Bergamum (Bergamo) - xiii.
Brixia (Brescia) - - xxxviii. (xxxii)
Sirmio (Sermione) - xxii.
Verona (Verona) - - zxii.
Vicentia (Vicenza) - - xxxiii.
Patavium (Padova) - xxvii. (xxii.)
Altinum (Altino) - - xxxiii.
Concordia (Concordia) - xxxi.
Aquileia (Aquileia) - xxxi.
(In the above line of route the minor stations (Mutationes) given in the Jerusalem Itinerary are omitted. For an examination of them, and a careful comparison of all the Roman roads through Cisalpine Ganl, see Walckenser, Géographie des Goules, vol. iii. pp. 2-13.)
5. From Bononia to Aquileia. This is the road of which Strabo expressly speaks as a continuation of the Via Aemilia (v. p. 217), but it is probable that he did not mean to say that it branched off directly from Bonouia; at least the only line given in the Itineraries turns off from the main line of the Via Aemilia at Mutina, and thence proceeds to

Vicus Serninus (?) _ - xxiii. M. p.
Vicas Varianus (Bariano, on the N. bank of the $P o$ ) -xx .
Anneianum (Legnago?) - xyii.
Ateste (Este) - - - - xx.
Patavium (Podova) - - - xxv.
whence it followed the same line to Aquileia as that given above. Another line of road, which though more circuitous was probably more frequented, led from Mutina by Colicaria (an uncertain station) to Hostilia (Ostiglia), where it crossed the Padus, and thence direct to Verona (xxs. M. P.). (Itin. Ant. p. 282.)
6. From Placentia to Dertona, where it communicated with the road constructed by Aemilius Scaurus across the Apennines to Vada Sabata. (Strab. v. p. 217.) The stations on this short line were:-

From Placentia to

$$
\begin{aligned}
& \text { Comillomagus - - - - xxv. 3r. P. } \\
& \text { Iria (Voghera) - - - xvi. } \\
& \text { Dertona (Tortona) - - - X. ... }
\end{aligned}
$$

The first station, Comillomagus, or Camiliomagus, as the name is written in the Tabula, is unknown, but must have been situated a short distance to the W. of Broni.
7. Lastly, a branch of the Via Aemilia led from Placentia to Ticinum (Paria), whence it was carried westwards to Augusta Taurinorum (Turin) and

## VIA APPIA.

the foot of the Cottian Alps. This was there fore nne of the great highronds leading to Gaul. But the stations on it, as givea in the Tabula, are rery confused, and can only partially be restored by the assistance of the Antonine Itinerary, which aowhere gives this road in its entirety. At Ticinum it was joined by another road leadiag from Mediolanum to that city. The stations, as given in the Jerusalem 1 inerary (p. 556), are as follows :-

Ticinum
Durii (Dorno) - - - Eii. m. P.
Laumellum (Lomello) ix.

Ad Cottias (Cozzo) - - - xii.
Ad Medias - - - - - xiii.
Rigomagus (Trino l'ecchio) - x.
Cente (?) - - . . - viii. Quadratae (near Londaglio) - xi.
Ad Decianm - - - - xii.
Taurini (Turin) - - - x.
Ad Fines (Avigliano) - - xvi.
Ad Ditelecinum - . - - xii.
Segusio (Susa) - . . - xii.
The rest of the ronte over the Cottian Alps is giren in the article Alres. [E. H. B.]
V1A AEMILIA SCAURI, is the oame given, for the sake of distinction, to a road which was constructed by Aemilins Scaurus long after the more celebrated V'ia Aenilia above described. Strabo, the only author who distinetly mentions the two, says that Aemilins Seaurus, after baving drained the marshes on the S. side of the Padus, constructed the Aemiliat Way through Pisse and Luna as far as Sabata, and thence throngh Dertona. (Strab. v.p. 217.) Wbether "the other Aemilian Way," as Strabo calls it, had been already continued from Placentia to Dertona, or this also was first effected by Scaurus, we kaor not ; but it is clear that the two were thus brought into coanectioo. The construction of this great work must he assigned to the ceasorship of M. A milios Scaurus, in B.c. 109, as we leara from Aurelius Victor(I'ir. Ill. 72), who, however, probably confontrds it with the more celebrated Via Aemilia from Placentia to Ariminum. But a comparison of the two autbors leaves no doubt as to the road really meant. The name seems to have gradually fallen into disuse, probably oa account of the ambiguity arising betweea the two Viae of the same name; and we find both the coast-road from Pisae to Vada Sabata, and that across the mountains from the latter place by Aquae Statiellae to Dertena, inchuded by the Itineramies as a part of the Via Aurelia, of wbicb the former at least tras in fact a mere continuation. Hence it will be convenient to diseuss the stations and distances along these lines, under the general head of Via Aurelia.
[E. II. B.]
I1A AMEMNA, is the name piren in an inseription of the time of Hadrian (Orell. Inser. 3306) to a line of road, which must obrionsly be tbat leading direct from Rome to Aıneria. This, as we learn from the Tabula, branclued off from the Via Cassia at Baccanae (Baccono), aod proceeded through Nepete and Falcrin to Ameria. The stations and distances as there given are:-

Home to Baccanap x mi. M. P.
Nipete (Nepi)

- Falerii (She Maria di Falleri) Castellum Atnerinnm Anierid (Amelia) -
r.
xii.
ix.

The sum of these distances ( 56 miles) acrees precisely with the statement of Ciccro, whu, in the
oration Pro Sexto Roscio Amerino (c. 7. § 18), ohserves that it was 56 miles from Ameria to Rome

Aecording to the Tabula a prolongation of the same ruad led from Ameria to Tuder, and thence by a circuitous route through Vettona and Pernsia to Chasium, where it rejoined the Via Cassia. The first station to Ameria is onntted : thence to

$$
\begin{aligned}
& \text { Tuder (Todi), was } \\
& \text { Vettona (Bettona) - - . . Ix. } \\
& \text { Perusia (Perugia) - - xiv. }
\end{aligned}
$$

The distance from that city to Clusium is again omitted.
[E. H. B.]
VIA APP1A ( $\bar{\eta}$ 'A $\pi \pi i a$ o $\delta 0^{\prime} s$ ), thie greatest and most celebrated of all the Roman highways in Italy, which led from Rome direct to Bruadusium, and thus became the principal line of commnaication with Greece, Macedonia and the East. Hence it became, in the flourishing times of the Roman Empire, the most frequented and important of the Roman roads, and is called by Statins "regina viarum." (Silv. ï. 2. 12.) Mlartial al-o calls it "Appia . . . Ausoniae maxima fanna viate" (is. 102). The former author terms it " annosa Appia," is reference to its great antiquity (Ib. iv. 3. 163.) It was indeed the earliest of all the Roman bighways, of the construction of which we bave aoy definite account, aod rery prohably the first of all that was regularly made as a great public work; the Via Salaria, Tiburtina, \&e., having doubtless long been in use as nuere natural roads, before they were converted into solidly constructed Viae. There mnst in like inanner have always been some kind of road communicating from Rome with Alla and Aricia: bat it is erident, from the perfectly straight line followed by the Via Appia from a point very little without the gates of Rome to Aricia, that this taust have been a new work, laid ont and pxecuted at once. The sriginal construction of the Via Appia was undoubtedly due to the censor Appius Claudias Caecus, who commeaced it in u. c. 312, and completed it as far as Capua tefore the elose of his censorship. (Liv, ix. 29 ; Dind, $\mathbf{x x} .36$; Frontio. de Aquaed. 5; Orell. Inser. 539.) From Capua it was undoubtedly earried on to Beneventum, and agaia at a subsequent period to Brundasium; but the date of these coatinoations is uaknown. It is evideat that the last at least could oot bave taken place till after the complete subjugation of the south of Italy io B.c. 266, and probably not till after the establishment of the Fomao colony at Bruadusium, B.C. 244. Heace it is certainly a mistake when Aurelius Victor speaks of Appius Claudius Cacous as having carried the Appian Way to Brundasium. (Viet. Vir. Ill. 34.) The continuation and completion of this great work has beeo assigned to various members of the Clandan family; but this is entirely without authroity.

Strabo distinctly speaks of the Appian Way as extending, in his time, from Rome to Brundusium; and his description of its course and condition is important. After stating that almost all travellers from Greece and the East used to land at Brundusiun, he adds: "From thence there are two ways to Rome, the one adapted only for mules, through the country of the Pencetians, Daunians, and Samnites, to Beaeventum, on which are the cilies of Egnatia, Caelia, Canusium, and Ilerdonia; the other through Tarentum, deviating a little to the left, and going round about a day's journey, which is culled the Appian, and is better adapted for carriages. On this are sitnsted Uria (between Brundusium and Tarentum) and Venusin, on the contines of the Saunites and Lucauians. Both these roads,
starting from Brundusimm, meet at Beneventnm. Thence to Rome the road is called the Appian, passing tbrongh Caudium, Calatia, Capua, and Casilinum, to Sinnessa. The whole distance from Rotne to Brundnsium is 360 miles. There is yet a third road, from Rhegium, through the Bruttians and Lucanians, and the lands of the Samnites to Campania, where it joins the Appian; this passes through the Apennine mountains, and is tbree or four days" journey longer than that from Brundnsium." (Strab. v. p. 283.) It is not improbable that the first of these branches, which Strabo distinctly distinguishes from the true Appian Way, is the Via Numicia or Minucia (the reading is uncertain), mentioned by Horace as the alternative way by which it was customary to proceed to Brundusinm. (Hor, Ep. i. 18. 20.) But Strabo gives ns no ioformation as to how it proceeded from Herdonia, in the plains of A pulia, tbrongh the mountains to Beneventum. It is, however, probable that it followed nearly the same line as the bigh road afterwards constructed by Trajan, throngh Aecae and Equus Tuticus. This is indeed one of the principal natural passes through this part of the Apenvines, and is still followed, with little deviation, by the modern highroad from Naples to Brindisi and Taranto. Bot it is worthy of remark, that Horace and his companions in their journey to Brundusium, of which he has left ns the poetical itinerary (Sat. i. 5), appear not to have followed this course, bnt to bave taken a somewhat more direct route throngh Trivicum, and a small town not named (" oppidulom quod versu dicere non est"), to Canusium. This route, which does not sgree with either of those mentioned by Strabo, or with those given in the Itineraries, was probably disused after that constructed by Trajan, through Equus Tuticus and Aecae, had lecome the frequented line. It was to that emperor that the Appian Way was indebted for many improvements. He restored, if he was not the first to construct, the higbroad through the Pontine Marshes from Forum Appii to Tarracina (Dion Cass. lxviii. 15; Hoare, Class. Tour, vol. i. p. 28) ; aod he at the same time constructed, at his own expense, a new line of highroad from Beneventum to Brundusium (Grater, Inser. p. 151. 2), which is undoubtedly the Via Trajana celebrated by cons. (Eckliel, vol. iv. p. 421.) It is probable (as already pointed out) that he did no more than render practicable for carriages a line of route previously existing, but accessible only to mules; and that the Tia Trajana coincided nearly with the road described by Strabo. But from the time that this road was laid open to general traffic, the proper Via Appia throngh Venusia to Tarentum, which traversed a wild and thinly-peopled country, seems to have fallen much into disuse. It is, however, still given in the Antonine Itinerary ( p .120 ) tbough not as the main line of the Appian Way. The latter appellation seems indeed to have been somewhat vaguely used under the Empire, and the same Itinerary bestows the name on the line, already indicated by Strabo ( $l$. c.), that proceeded S. through Lucania and Bruttium to Rhegium, on the Sicilian Strait, a route which never weat near Beneventum or Brondusium at all.

The Appian Way long sarvived the fall of the Western Empire. That portion of it which passed through the Pontine Marshes, which was always the most liable to suffer from neglect, was restored ty Thendoric (Gruter. Inscr. p. 152. 8); and Irocopius, who travelled over it 40 years later,
speaks with admiration of the solidity and perfection of its construction. "The Appian Way (says he) extends from Rome to Capua, a journey of five days for an active traveller. Its width is such as to admit of the passage of two waggons in contrary directions. The road itself is worthy of the bighest admiration, for the stone of which it is composed, a kiod of mill-stone, and by nature very hard, was brought by Appias from some distant region, siace none sucb is found in this part of the country. He then, after having smoothed and levelled the stones, and cut them into angular forms, fitted tbem closely togetber, without inserting either bronze or any other substance. But they are so accurately fitted and joined together, as to present the appearance of one compact mass naturally united, and not composed of many parts. And notwithstanding tbe long period of time that has elapsed, during which they have been worn by the continnal passage of so many carriages and beasts of borden, they bave neither been at all displaced from their original position, nor bave any of them been worn down, or even lost their polish." (Procop. B. G. i. 14.) The above description conveys an accurate impression of the appearance which the Appian Way mnst bave presented io its most perfect state. The extraordinary care and accuracy with which the blocks that composed the pavement of the Roman roads were fitted togetber, when first laid down, is well seen in the so-called Via Triumphalis, which led to the Temple of Jupiter, on DIons Albadus. [ALbanus Moxs.] Bnt it is evident from many other examples, that they became mnch worn down with time; and the pavement seen by Procopius had doubtless been frequently restored. He is also mistaken in snpposing that the hard basaltic lava (silex) with which it was paved, had to be brought from a distance: it is found in the immediate neigbbourhood, and, in fact, the Appian Way itself, from the Capo di Bove to the foot of the Alban Hills, runs along a bank or ridge composed of this lava. Procopins also falls into the common mistake of supposing that the road was originally constructed hy Appius Claudius such as be beheld it. But during the long interval it had been the object of perpetual care and restoration; and it is very donbtful how far any of the great works along its lice, which excited the admiration of the Romans in later sges, were due to its original antbor. Caius Gracchas in particular had bestowed great pains upon the iouprovement of the Roman roads; and there is mucb reason to believe that it was in bis time that they first assnmed the finished appearance which they ever afterwards bore, (Plut. C. Gracch. 7.) Caesar also, when a young man, was appointed "Curator Viae Appiae," which had become a regular office, and laid out large sums of money upon its improvement. (Plut. Caes. 5.) The care bestowed on it by successive emperors, and especially by Trajan, is attested by numerous inscriptions.

It is very donbtful, indeed, whether the original Via Appia, as constrncted by the censor Appius, was carried throogb the Pontine Marshes at all. No mention is fonnd of his draining those marshes, without which such a work would have been impossible; and it is mnch more probable that the road was originally carried along the hills by Cors, Norba, and Setia, by the same line which was again in use in the last centory, befure the Pontine Marshes had been draincd for the last time by Pius VI. This conjecture is confirmed by the circumstance that Lucilius, in
describing his journey from Rome to Capaa, complains of the extremely hilly character of the road in approaching Setia (Lucil. Fragm, iii. 6, ed. Gerlach.) Even in the time of Horace, as we learn from his well-known description of the journey to Brundusium, it was customary for travellers to continue their route from Formm Appii by water, embarking at that point on the canal throngh the Pontine Marshes (1lor. Sot. i. 5. 11, \&c.). But the very existence of this canal renders it probable that there was at that time a road by the side of it, as we know was the case in Strabo's time, notwithstanding which he tells us that the canal was much used by travellers, who made the voyaze in the night, and thus gained time. (Strab. v. p. 233.)
It will be convenient to divide the description of the Appian Way, as it existed under the Roman Empire, and is given in the Itineraries, into several portions. The first of these from Rome to Capoa was the main trunk line, upon which all its branchos and extensions depended. This will require to be described in more detail, as the most celebrated and trequented of all the Roman bighways.

1. From Rome to Capua.

The stations given in the Antonine Itinerary are:From Rome to Aricia (Lariccia) - - - xvi. м.p. Tres Tabernae - - - xvii. Appii Forum - - - x. Tarracina (Terracina) - svuii. Fundi (Fondi) - - - xvi. (xiii.) Formiae (Mola di Gaïta) xiii. Minturnae(nearTragletto) is. Sinnessa (Mondragone) - ix. Capua (Sta Maria) - - svi.(xxvi.)
The above stations are for the most part well known, and admit of no doubt. Those in the neighbourbood of the Pontine Marshes bave indeed given rise to much confusion, but are in fact to be easily determined. Indeed, the line of the road being almost perfectly straight from Rome to Tarracioa renders the investigation of the distances a matter of little difficulty.

The Jerusalem Itinerary (p.611) subdivides the same distance as follows:
Rome to Ad Nonum (mutatio) - - is. M.P.
Aricia (civitas) - - - vii.
Sponsaeor Ad Sponsas (mutatio) xis.
Appii Fornm (do.) - . . - vii. (xii.?)
Ad Melias (do.) - - - ix.
Tarracina (civitas) - - - x.
Fundi (do.) - - - xiii.
Formiae (ilo.) - - - - xii.
Minturnac (do.) - - - ix.
Sinuessa (do.) - - - - ix.
Pons Campanns (mutatio) - ix.
Ad Octarum (do.) - - - is.
Capua (civitas) - - - viii.
The intermectiate stations were (as they are expressly called in the ltinerary itself) mere Mhitationes, or 1 wsthonses, where relays of hones were kept. The deternination of ther position is therefore of no interest, except in conne tion with the distances given, which vary materially from those of the other Itinerary, though the total distance from Rome to Capua ( 12.5 miles) is the same in both.

The Appian Way issmed from the Porta Capena, in the Servian walls of Rome, abont half a mile outside of which it separated from the 'iva Latina, sn that the two roads passed through different gates in the walls of Aurelian. That by which the Via Appia finally quitted Rome was known as the Porta Appia;
it is now called the P'orta S. Sebastiuno. The first milestone on the road stond abont 120 yards ontside this gate; the distances always continuing to be mieasured from the old l'orta Capena. The buildings and tombs which bordered the Via Appia in that portion of it which lay between the two gates, are described in the article Roma, p. 821. It was apparently in this part of its course, just outside the original city, that it was spanned by three triumphal arches, erected in honour of Drusus (the father of the ennperor Claudias), Trajan, and I.. Verus. One only of these still remains, just within the Porta S. Sebastiano, which, from its plain and unadorned style of arehitecture, is probably that of Drusus. Outsido the Porta Appia the road descends to a small stream or brook, now called Acquataccia, which it crosses by a bridge less than half a mile from the gate: this trifling stream is identified, on good grounds, with the river Almo, celebrated for the peculiar sacred rites with which it was connected [ALmo]. A short distance beyond this the road makes a considerable bend, and ascends a bank or ridge before it reaches the second milestone. From that point it is carried in a straight line direct to the remains of Bovillae at the foot of the Alban Hills, running the whole way along a slightly elevated bank or ridge, formed in all probability by a very ancient current of lasa from the Alban Monnt. This long, straight line of road, stretching across tho Campagna, and burdered throughout by the remains of tombs and ruins of other buildings, is, even at the present day, one of the most striking fratures in the neighbourbood of Rome, and, when the edifices which bordered it were still perfect, must bave constituted a marnificent approach to the Inperial City. The whole line bas been recently cleared and carefully examined. It is described in detail by the Car. Canina (in the $A n$ nali dell' Instituto di Comrispondenza Archeologica for 1852 and 1853 ; and more briefly by Desjardins, Essai sur la Topographie du Latium, 4to. Paris, 1854, pp. 92-130. We can bere mention only some of the most interesting of the numerous monuments that bave been thus brought to liglit, as well as those previously known and celebrated.

On the right of the road, shortly after crossing the Almo, are the remains of a vast scpulchre, which now serve to support the tavern or Osteria dell. I cquatarcio: this is clearly identified by the inscriptions discovered there in 1773, as the monument of Abascantius, a freedman of Domitian, and of his wifo Priscilla, of which Statins bas left us in one of his poems a detailed description (Stat. Silv. v. 1). On the left of the road, almost exactly 3 miles from Rome, is the most celebrated of all the mounments of this kind, the massive sepalchre of Caecilia Metella, the daughter of Q Metellus Creticus, and wife of Crassus the triumvir. Converted into a fortress in the middle ares, this tower-like monument is still in remarkable preservation, and, from its commanding Position, is a conspicnous object from all points of the surrounding country. It is popularly known as tho Capo di Bore, from the bncranium which appeans as an ornament in the frieze. (A view of this remarkable nonument ia given in the articlo Joma, p. 822.) Before reaching the Capo di Bore, the road passes some extensive remains of buildings on the left, whicb appear to bave furmed part of an imperial villa constrocted by the emperor Maxentios, attached to which are the remains of a circos, also the work of the same emperor, and which, from their remarkably perfect coudition, have thrown much light
on the general plan of these edifices. [Ronsa, p. $844]$

Proceeding onwards from the tomb of Caecilia Metella, the road ia bordered throughont by numerous sepulchres, the most remarkable of which is the tomb of Servilius Quartus, on the left, ahout $3 \frac{\pi}{4}$ miles from Rome. The remarkable preservation of the ancient road in this part of its cuarse, shows the accuracy of the description above cited from Procopius ; but it is remarkable that this, the greatest and most frequented highway of the Roman empire, was only just wide enough to admit of the passage of two carriages abreast, being only 15 feet broad between the raised crepidines which bordered it. After passiog a number of obscure tombs on both sides of the way, there occurs, just beyond the fifth mile from Rome, a remarkable enclosure, of quadraogular form, surrounded by a low wall of Alban stone. This has frequently been supposed to be the Campus Sacer Horatiorum, alluded to by Martial (iii. 47) as existing on the Appian Way, and which preserved the memory of the celehrated combat between the Horatii and Curiatii. This was believed to have been fought just about 5 miles from Rome (Liv. i. 23), which would accord well with the position of the enclosure in question; but it is maintained by modern antiquaries that this, which was certainly of a sacred character, more probably served the purposes of an Ustrinum, or place where the bodies of the dead were burned, previously to their being deposited in the numerons sepulchres that lined hoth sides of the Appian Way. These still form a continuous cemetery for above two miles farther. The most massive of them all, which must, when entire, have greatly exceeded even that of Caecilia Metella in magnitude, and from its circular form is known as the Casal Rotondo, occurs vear the 6th mile from Rome, on the left of the Via Appia. From a fragment of an inscription found here, it is probable tbat this is the tomb of Messala Corvinus, the friead of Augustus and patron of Tibullus, and is the very monument, the massive solidity of which is more than once referred to by Martial ("Messalae saxa," viii. 3. 5; "marmora Messalae," x. 2.9). Somewhat nearer Rome, on the same side of the road, are extensive ruins of a different description, which are ascertained to be those of a villa of the Quintilii, two brothers celebrated for their wealth, who were pat to death by Commodus (Dion Cass. lxxii. 5), after which the villa in question probably became an imperial residence.

Some remains of a small temple, just 8 miles from Romse, have been smpposed to be those of a temple of Hercules, consecrated or restored by Domitian at that distance from the city (Martial, iii. 47. 4, ix. 65. 4, 102. 12); but though the site of the temple in question is clearly indicated, it appears that the existing remains belong to an edifice of earlier date. Exactly 9 miles from Rome are the ruins of a villa of imperial date, within which is a large circular monument of brick, supposed with good reason to be the tomb of Gallienus, in which the emperor Flavius Severus also was buried. (Vict. Fpit. 1x.) Close to thia spot must have been the station Ad Nonum mentioned in the Jerusalem Itinerary (l. c.). The road is still bordered on both sides by tombs; but oone of these are of any special interest. At the Osteriue delle Fratocchie (between 11 and 12 miles from Rome) the ancient Via is joined by the modern road to Albana: it lere commences the ascent of the Alban Hills, which continues (thongh at first very gradually) for above 3
miles, A little farther on are the remains of Bovillae; the principal ruirs of wbich lie a short distance to the rigbt of the ruad. [Bovillae.] The Tabula marks that place as a station on the Via Appia, but erroneously places it 10 miles from Rome, while the real distance is 12 miles. Thence the road (still retaining its straight line) ascended the hill to *Albano, vearly on the site of the Albanum of Domitian, which, as we learn from Martial, was just 14 miles from Rome. (Martial, ix. 65. 4, 102. 12.) The remains of the imperial villa border the road ou the left for some distadce before reaching the modern town. Two miles farther was Aricia, which is correctly placed by both the Itineranies 16 miles from Rome. The station was probably below the town, outside of the walls, as the Via Appia here deviates from the straight liae which it has pursued so long, and descends into the hollow below the city by a steep slope known as the Clivus Aricinus. A little farther on it is carried over the lowest part of the valley by a causeway or substruction of massive masonry, one of the most remarkable works of the kind now estant. [Aricia.]

The remainder of the road will not require to be described in such detail. From Aricia it was continued, with a slight deviation from the direct line, avoiding the hills of Genzano and those which bound the Lake of Nami, on the left, and leaving Laouvium at some distance on the right, till it descended againintothe plain beyoud the Aiban Hills and reached the station of Tres Tabernae. An intermediate station, Sub Lanuvio, iodicated only in the Tabula, must have been situated where a branch road struck off to the city of Lanuvium. The position of Tres Tabernae has been much disputed, but without any good reason. That of Forum Appii, the nest stage, is clearly established [Foeum Appil], and the 43rd milestone of the ancient road still exists on the spot; thus showing that the distances given in the Antonine Itinerary are perfectly correct. This being established, it is clear that Tres Tabernae is to be placed at a spot: 10 miles nearer Rome, and about 3 miles beyond the modern Cisterna, where there aro still ruios of ancient buildings, pear a mediaeval tower called the Torre d'Annibale. The ancient pavement is still visible in many places between Aricia and Tres Tabernae, and no doubt can exist as to the course of the road. This was indeed carried io a perfectly straight line from the point where it descended into the plain, through the Pontine Marshes to within a few miles of Terracina. The position of the station Ad Sponsas, mentioned in the Jerusalem Itinerary, cannot be determined, as the distances there given are incorrect. We should perhaps read xii. for vii. as the distance from Forum Appii, in which case it must be placed 2 miles nearer Rome than Tres Tabernae. Between the latter station and Forum Appii was ThiroxTIUM, at which commenced the canal navigation called Decennovium from its being 19 miles in length. The site of this is clearly marked by a tower still called Torre di Tre Ponti, and the 19 miles measured thence along the canal would terminate at a point 3 miles from Terracina, where travellers quitted the canal for that city. An inscription records the paving of this part of the road by Trajan. The solitary posthouse of Mesa

[^42]is evidently the station Ad Medias of the Jerusalem Itinerary. A shert distance from Terracina the Via Appia at length deviated from the direction it bad so long pursued, and turning to the left ascended the steep bill on which the ancient city stood [Tamacina], while the modern road is carried round the foot of this hill, close to the sea. The distance of Tarracina from Rome is cerrectly given at 61 miles in the Antonine Itinerary.

From Terracinet the line of the ancient rand may still be traced distinctly all the way to Fondi, and is flanked by ruios of villas, dilapidated tombs, \&c., through a great part of its course. It first ascended the hill above the city as far as the convent of San Francesco, and afterwards descended into the valley beneath, joining the modern lighonad from Rome to Naples about 3 miles from Terracina, just before crossing the frontier of the Papal States. The narrow pass at the foet of the mountains, which the road here follows, between the rocks and the marsly lake of Fondi, is the celebrated defile of Liutulie, or Ad Lautulas, which more than once hears a conspicuous part in Roman history. [Lautulae.] The distance from Tarracina to Fundi is overstated in the Antonine Itinerary: the trae distance does not exceed 13 miles, as correctly given in the Jerusalem Itinerary. Frem Fundi to Formise (Mola di Gaëtu), a distance of 13 miles, the road passed through a rugged and mountainous conntry, crossing a cemplete mountain jass: the substractions of the adcient way are in many places still visible, as well as portions of the pavement, and onmerous ruins of buildings, for the mest part of little interest. The bridges alse are in several instances the ancient ones, or at least rest upon ancient substractions. The ruins of Formiae and of the numerous villas with which it was adorned line the shores at Mola di Gacita, and bound the rand fir a space of more than 2 miles: other ruins, priocipally sepulchral, are scattered along its line almost all the way thence to Mrsmunae. The ruins of this latter city stand on the right bunk of the Liris (Garigliano), a short distance from its month, and about a mile and a half below the village of Traghetto. The lise of the ancient road frum Hola thither is clearly traced and susceptible of no doubt: the distance is correctly given as 9 miles. Here the Via Appia crossed the Liris, and was continued nearly in a straigbt line through a level and marsliy district along the sea-coast to Sinuessa, the ruins of which are found near the village of Momdragone. The distance of 9 miles between the two (given in both Itineraries) is somewhat less than the ruth. It was at Siuuessa that the Appian Way finally quitted the coast of the Tyruthenian sea (strab. v. p. 233), and struck inland towards Capana, jassing by the stations of Pons Campanus and Ad Octavum. But this part of its course has not been very distiuctly traced, and there is some difficulty as to the distances given. The three subdivisions of the Jerusalem Jtinerary would give 26 miles for the total di tance from Sinuessn to ctapua; and the coincidence of this sum with the statement of the Antonine Itiderary, as given by Wesseling, is a strong argument in favour of the reading axvi. M. P. instead of xvi, adopted by l'inder. The latter number is certainly too small, for the divect distance between the two points is not less than 21 miles, and the road must liave deviated from the straight fine on account of the occurrence of the mar:hes of he Suvo, as well as of the river V"ulturaus. It is
probable, therefore, that it made a considerable bend, and that the distance was thus prolonged: but the question cannot be settled until this part of the road has been more accurakly traced than has hitherto been done. The distances giren in the Tabula are too inaccurate to be of any use; but it appears probable from that docment that the Poos Campanus was a bridge over the little river Savo, and not, as might have been suspected, over the Vulturnus, which the Appian Way did not cross till it arrived at Casilinum, 3 miles from Сариа. It was here that it united with the Via Latina. (Strab. v. p. 237 ; Tab. Peut.)

The total distance from lome to Capua (if we adopt 26 miles as that from Sinuessa) was therefore 131 miles. This portion of the Via Appia as far as Minturnae lias been traced with much care by Westphal (Römische Kampagne, pp. 22-70), as well as by Chaupy (Maison dHorace, vol. iii. pp. 365-461) and Sir R. Hoare (Classical Tour, vol. i. pp. 81-148); but all these accounts are deficient in regard to the portion between Minturnae and Capua.

Several minor branches or cross lines parted from the Via Appia during this first portion of its ceurse. Of these it diay suffice to mention: 1. The Via Ampeatina, which quitted the Via Appia at a sbort distance beyend the Almo, just after passing the Osteria dell Acquataccio: it proceeded in a nearly straight line to Ardea, 23 miles from Kome. [ARdes.] 2. The Via Axtiatina, which bradelied off from the Appian Way just before reaching Bovillae, and proceeded direct to Antium, 38 milea from Rome. It probably follotred nearly the same line as the modern road, but its precise ceurse has not been traced. 3. The Vhis Serina quitted the Appian Way, sbortly after passiag Trepontium, and procceded in a direct line to Setia (Sezze) : considerable purtions of the ancient pavement still remain. 4. A branch road, the name of whicb is unKoumn, diverged from the Via Appia at Mintarnae, and proceeded to Teanum ( 18 miles distant) on the Via Latina, whence it was centinued through Allifie and Telesia to Beneventum. [Tia Lativa.] 3. The Via Domitiana, constructed by the emperor of that name, of which Statius has left us a poinpous description. (Silv, iv. 3.) It was a continuation of the cnast-road from Sinuessa, being carred across the Vulturnus close to its mouth by a bridge which must really bave beea a work of great difficulty: theace it followed closely the line of coast as far as Cumae, whence it struck across to Puteoli. The road communicating between that city and Neapolis was previonsly in existence. The distances on this read, as given in the Autonine Itinerary (p. 122), are:-
From Sinnessa to Liternum axiv, M. P. (this must be a mistake for xiv.)
thence to Cumae - vi.
Puteoli - iii.
Neapolis - x.
There was also a direct road frem Capua to Neapolis (Tab. Pert.), passing tlurongh Atella, which waa midsay between the two cities.
2. Frem Capua to Beneventum.

This portion of the road may he rery briefly disposed of. From Capua it was continued alung in the plain as fiar as Calatia, the site of which is fixed at Le Galazze, near Maddaloni; it then entered the Apennines, and, passing through the valley of Arienzo, commonly supposed to be the celebrated
valley of the Caudine Forks, reached Caudium, which must have been situated ahont 4 miles beyond Arpaja, on the road to Beneventum. The distances giveo along this line are :-

From Capua to Calatia - - vi. M. p. Ad Novas - - - vi.
Caudium - - ix. Beneventum - - xi.
(Itin. Ant. p. 111; Itin. Hier. p. 6I0; Tab. Pcut.) It was at Bencrentum, as above shown, that the two mais braoches of the Appian Way separated : the one proceeding by Venusia and Tarentum to Brundusium; the other by Equus Tuticus and Canusiam to Barium, and thence along the coast of the Adriatic. We proceed to give these two brabches separately.
3. From Beneventum to Bruadusium, through Venusia and Tarentum.

The line of this road is given in the Antonine Itiserary (p.120) as well as in the Tabula; but in this last it appears in so broken and confused a form that it woald be unintelligible without the aid of the other anthority. But that this line was the original Via Appia is proved not only by the distinct testimony of Strabo, and by incidental notices which show that it was the frequented and customary route in the time of Cicero (Cic. ad Att. v. 5, 7), but still more clearly by an inscription of the time of Hadrian, in which the road from Beneventum to Aecolauam is distinctly called the Via Appia. The greater part of the line from Benerentum to Venusia, and thence to Tarentom, was carried througb a wild and mountainons country; and it is highly proballe that it was in great measure abandoned after the more convenient line of the Via Trajana was opeoed. It appears that Hadrian restored the portion from Beneventum to Aeculaoum, but it is doubtful whether he did so farther on. Nevertheless the general course of the road can be traced, though many of the stations cannot be fixed with certainty. The latter are thus given in the Antooine Itincrary :-

## From Beneventuin to

| Aeculanum | 3. P. |
| :---: | :---: |
| Sub Romulea | xs |
| Pons Aufidi - | xxii. |
| Venusia (Fenosa) - | xviii. |
| Silvium (Garagnone) | xx. |
| Blera (Gravina) | xiii. |
| Sub Lupatia | siv. |
| Canales - - | - xiii. |
| Torentum (Taranto) | - | Aeculanum, or Eclanum as the name is written in the Itineraries, is fixed beyond a doubt at Le Grotte, near Mirabella, just 15 miles from Beneventum, where a town grew up on its ruins in the middle ages with the name of Quintodecimum. [Aeculanum.] The site of Romnlea is much less certain, but may perhaps be placed at Bisaccia, and the station Sub Romulea in the valley below it. The Pons Aufidi is the Ponte Sta Venere, on the road from Lacedogna to Venosa, which is unquestiodably an ancient bridge, and the distance from Venusia agrees with that in the Itinerary, which is confirmed olso in this instance by the Tabula. The latter authority gives as an intermediate station betreen Sub Romulea and the Pons Aafidi, Aquilonia, which is probably Lacedogna; but the distances given are certainly incorrect. In this wild and mountaioous country it is obviously impossible at present to determine these with any accuracy. From Venusia again the Via Appia appears to harc Iassed, in as direct

a line ss the nature of the conntry will allow, to Tareatum; the first station, Silvium, may probably be placed at Garagnone, and the scond, Plera, or Blera, at or near Gravina; but both determinations are very uncertain. Those of Sub Lupatia and Canales are still more rague, and, until the course of the ancient road shall lave been traced upon the spot by some traveller, it is idle to maltiply conjectures.

From Tarentum to Brundasium the Aotonine Itinerary gives $44 \mathrm{M} . \mathrm{P}$. , which is nearly correct; bat the intermediate stations mentioned in the Tabula, Mesochoron, Urbius, and Scamnam, cannot be identified. Urbias may perhaps be a corruption of Urium or Hyrium, the modern Oria, which is nearly midway between the two cities.

Besides the main line of the Via Appia, as above described, the Itineraries mention several branches, one of which appears to have struck off from Ve nusia to Potentia, and thence to have joined the highroad to Rhegiam, while another descended from Venusia to Heraclea on the gulf of Tarentum, and thence fullowed the E. coast of the Bruttian peoinsula. These lines are briefly noticed in the articles Lucavia and Bruttil, but they are very confosed and uocertain.
4. From Beoeventum by Canusium and Barinm to Brundusium.

It was this line of road, first constructed by Trajum, and which was originally distinguished as the Ina Trajana, that became after the time of that emperor the frequented and ordinary route to Brundusium, and thus came to be commonly coosidered as the Via Appia, of which it had io fact taken the place. Its line is in consequence given in all the Itineraries, and can be traced with little difficalty. It passed at first through a rugged and mountainous country, as far as Aecae in Apulia, from which place it was carried through the plains of Apulia to Barium, and afterwards along the sea-coast to Brundusium: a line offering no natural difficulties, and which had the advantage of passing through a number of considerable towns. Even before the construction of the Via Trajana it was not uncommon (as we learn from the journey of Horace) for travellers to deviate from the Appian Way, and gain the plairs of Apulia as speedily as possible.

The first fart of this road from Benerentum to Aecae may be traced by the assistance of ancient milestones, bridges, \&c. (Mommsen, Topogr. degli Irpini, in the Bullet. dell Inst. Arch. for $\mathbf{J} 48$, pp. 6, 7.) It proceeded by the villages of Paduli, Buonalbergo, and Casalbure, to a place called $S$. Eleuterio, about 2 miles S. of Castelfranco, which was undoubtedly the site of Equus Tuticus, a much dispated point with Italian topographers. [Eque's Tuticus.] This is correctly placed ly the Antonine Itinerary 21 miles from Beneventum ; the Jerusalem Itinerary, which makes it 22 miles, divides the distance at a station called Forum Novum, which must have been situated at or very near Buonalberyo. From Equas Tuticus, the road followed a NE. direction to Aecae (the site of which is clearly knuwn as that of the modern Troja), and thence turned in a direction nearly due E. to Herdonia (Ordona). The object of this great bend was probably to open a conmunication with Luceria and the other towns of Northern Apulia, as well as perhaps to avoid the defile of the Cervaro, above Bovino, through which the modern road passes. At Aecae the Via Trajana descended into the great plain of Apulia, across which it was carried in a nearly
straight line to Barium ( $\mathrm{Bar}^{2}$ ). The remainder of its course presents no difficulties, and tho stations are, for the most part, well-koown towns. The whule line is thas given in the Antonine Itincrary (pp. 112, 116):-

From Beneventum to

The two stations of Turres between Barium and Egbatia, and Speluncae between Egnatia and Brandusium, cannot be identifed; it is cvident from the names themselves that they were nut tomus, but merely small jlaces on the coast so called. The Jernsalem Itinerary has two stations, Turres Aurelianae, add Turres Juliae, between Egnatia and Barium, but, from the distances given, neitber of these can be identified with the Turres of the Antonine ltinerary. The other intermediate stations mentioned by the same authority are unimportant Mutationes, which can be identined only by a carefut survey on the spot.

The Tabula gires (though in a very confused manner) an intermediate line of route, which appears to have been the same as that indicated by Strabo (v. p. 283), which quitted the coast at Egnatia, and proceeded throngh Caelia to Brundusium. The stations given are :-

Carusiutn to Rudiae - - - xii. m.r.

It is certain that the Via Trajana was contioned, probably by Trajan himself, from Bruadusium to Ilydruntum (Otranto), and was thence carried all roand the Calabriab peninsula to Tarentum. The road from Brundusium to Hydruntum passed through Lupiae (Lecce), in the interior of tbe peainsula, which is correctly placed 25 miles from each of the above cities. (Itin. Ant. p. I1s.) The stations on the other line, which is given ouly in the Tabula, are as follow:-
M. P .

Hydruatum to Castrum Minervae (Custro) viii. Veretum (Sla Maria di Vereto)
Uxentum (E゙gento) - - x. Baletium (Aletium) - - X. Nieretum (Nardó) - - x. Manduria (Mandurite) - xxis. Tarentum (Taranto) - xx.
The above distances appear to be correct.
Lastly, a branch struck off from the Via Trajana at Barinn which proceeded direct to Tarentum. It is probable that this came to be adopted as the most convenient mode of reaching the latter city when

* This distance must be alove the truth; the direct distance is not more than 8 miles.
the oricinal Via Appaa had fallen into disnse. The distance is correctly given as 60 miles. (Itin. Ant. p. 119.)

Besides the above, which may be considered as all in some degree branches of the Via Trajana, there was another line, probably constructed at a late period, which struck across from Equus Tuticus to Venusia, so as to form a cross communication between the Via Trajana and the old Via Appia. This is set down in the Antonine Itinerary (p. 103) as part of a long line proceeding from the N. of Italy to the S: but the intermediate stations between Equus Tutius and Venusia cannot be determined.
5. From Capuas by Nuceria to Rhergium.

This line of road is indicated by Strabo in the passage above cited (v. p. 283) as existing in lis time, bat he certainly did not include it under the name of the Via Appia. It seems, however, to have subsequently come to be regarded is such, as the Antonine Itioerary puts it under the heading, " Ab Urbe Appia via recto itinere ad Columnam " (/tin. Aut. p. 106.)*, and iossmuch as it was a continuation of the original Appian Way, it was, strictly speaking, as much eatitled to bear the name as the Via Trajana. Strabo does not tell us whether it was passable in Lis day for carriages or not, and we have no account in any ancient author of its construction. But we learn the period at which it was first opened frum a remarkable inscription discovered at $L a I$ Iolla, in the ralley of Diano, which commemorates the construction of the road from Rhegium to Cappa, and adds the distances of the principal towns along its course: unfortunately the first line, coataining the name of the magistrate lyy whom it was opened, is wanting; and the name of M. Aquilias Gallus, inserted by Gruter and others, is a mere conjecture. There is little doubt that the true restoration is the name of P. Popilius Laenas, who was practor in B.c. 134, and who,after clearing the mountains of Lucania and Bruttium of the fugitive slaves who had taken refuge in them, appears to bave first constructed this lighroad through that rugged and mountainous country. (Mommsen, fuscr. R. N. 6276; Kitschl. Mon. Epigr. pp. 11, 12.) There is, therefore, no foudation whatever for the name of Via Aquilia, which has been given by some modern witers (Romamelli, Cramer, \&c.) to this line of road: it was probably at first called Via Pormina, after its author, who, as was usual in similar cases, founded at the same time a towo which bore the aane of Forum 1'opilii, and occupied the site of La P'olla [Forum l'opllit]; but no mention of this mame is found in anyancient anthor, and it secms to have been unknown to Strabo. The distances given in the inscription above mentioned (whicb are of the greatest ralue, from their undoubted authenticity), are: -

## M. P.

From Capua to Nuceria - - exxiii.
[Furnm l'opilii] - - li,
Muranun -

- lxxiv.
Cunsentia - - - xlix.

Valenta - - Ivii.
Ad Statuam - - li.
liluegium vi.

The peint designated as "Ad Fretum ad Statuan" is evadently the same as the Columna of the ltine1aries, which murked the spot from which it was

[^43]usual to cross the Sicilian straits. The total distauce from Capna to Rhegium, according to the above description, is 321 miles. The Antonine 1 tinerary makes it 337 miles. It is diffienlt to judge how far this discrepaocy is owing to errors io the distances as given in our MISS., or to alterations in the line of road; for though it is evident that the road given io the Itinerary followed generally the same line as that originally constructed by Popilius, it is probable that many alterations had taken place iu particnlar parts; and in the wild and mountainous tracts throngh which the greater part of it was carried, such alterations must frequently have been rendered necessary. The determination of the particular distances is, for the same reason, almost impossible, withent being able to trace the precise course of the ancient road, which has not yet heen nccomplished. The stations and distances, as given in the Antovine Itinerary, are as follow:-

## M. P.

From Capna to Nola - . . - xxi. (xis.)* Nuceria (Nocera) - svi.*(xiv.)
Ad Tanarum - - xxv.
Ad Calorem - - - xxiv.
ln Marcelliana - - xxv.
Caesariana - - - xxi.
Nernlum (LaRotonda) axiii. Snh Murano (near Murano) - - . xiv. Caprasiae (Tarsia) - xxi. Consentia (Cosenza) xxvili. Ad Sabatum flavium sviii. Ad Turres - - - sviii. Vibona (Monte Leone) xxi. Nicotera (Nicotera) - aviii. Ad Mallias - - xxiv. Ad Colnmnam - - xis.
The stations between Nuceria and Nerolum cannot he determined. Indeed the only points that can be looked apon as certain, in the whole line from Naceria to Rbegium, are Sub Mlurano, at the foot of the bill on which stands the town of Murano, Consentia (Cosenza), Vibo Valentia (Monte Leone), and Nicotera, which retains its ancient name. Nerulum nod Caprasiae may be fixed with tolerable certainty by reference to these known stations, and the distances in this part of the route appear to be correct. The others mast remain uncertain, uotil the conrse of the road has been accurately traced.

At Nerulum the ahove line of road was joined by one which struck across from Venusia tbrough Potentia (Potenza) to that place. It was a continuation of the cross-road already noticed from Equas Taticus to Venusia; this lioe, which is given in the Autonine Itinerary (p. 104), was called, as we learn from the iascriptions on milestones still extant, the In Hercules, and was therefore in all probability the work of the Emperor Masimianns. (Mummsen, I. R. N. p. 348.) The stations mentioned in the Itinerary (l. c.) are : -

From Veansia to Opiaum - - xv. M. P. Ad fluv. Bradadum xxix.

[^44]
## From Venusia to Potentia (Potenza) sxiv. Acidii (?) - - xxiv. Grmmentum (Saponara) - - xscriii. Semancla (?) - xxvii. Nerulum xvi.

None of the above stations can be identified, except Potentia and Grumentnm, and the distances are in some cases certaioly erroneous. The same line of route is given in the Tabula, hut in a very confused and corrupt manner. The stations there set down are wholly different from thase in the ltinerary, but equal!y uncertaio. Anxia (Jnzi), hetween Potentia and Grumentum, is the only one that can be identified.

The principal work on the Via Appia is that of Pratilli (Della Via Appia, fol. Napoli, 1745); but, unfortunately, little dependence can be placed upon it. Parts of the ronte have been carefully and acenrately examined by Westphal, Cbanpy, and other writers already cited, but many portions still remain to be explored; and accurate measnrements are geverally wanting. Nor does there exist any map of the kingdom of Naples on which dependence can be placed in this respect.
[E. H. B.]
VIA AQUILIA. [Via Appia, No. 5.]
VIA ARDEATINA. [Ardea.]
VIA AURELIA, one of the principal highways of Italy, which led from Rome to l'isae in Etruria, and thence along the coast of Liguria to the Maritime Alps. It was throughout almost its whole extent a maritime road, proceeding, in the first iostance, from Rome to Alsinm on the Tyrrhenian sea, wheace it followed the coast-line of Etruria, with only a few trifling deviations, the whole way to Pisae. The period of its construction is quite macertaid. Its name sufficiently indicates that it was the work of some magistrate of the name of Aurelius; but which of the many illustrious men who bore this name in the latter ages of the Republic was the anthor of it, we are eutirely unioformed. We know with certainty that it was in use as a well-known and frequented highway in the time of Cicero, who mentions it as one of the three roads by which be might proceed to Cisalpine Ganl (" ah infero mari Aurelia," Phä. xii. 9). It may also be probably inferred that it was in existence as far as Pisne, when the road was carried from that city to Vada Sabata and Dertuna, the coustruction of which is ascribed by Strabo to Aemilius Scaurus, in B.c. 109 (Strab. v. p. 217). [Tia Aemila Scaurl.] This contionation of the Anrelian Way seems to have been commonly included under the same general name as the original road; though, according to Strabo, it was properly called the Aenilian Way, like its more celebrated namesake in Cisalpine Gaul. It was apparently not till the reign of Augustus that the line of road was carried along the foot of the Maritime Alps, from Vada Sabata to Cemenelium, and thence into Ganl. It is certaio, at least, that the ancient road, of which the traces are still visible, was the work of that emperor; and we knorr also that the Ligurian tribes who inhabited the Maritime Alps were not completely reduced to subjection till that period. [Liguria.] The ltineraries, however, give the name of Via Aurelia to the whole line of road from Rome to Arelate in Gaul ; and thongh little value can be attached to their authority on this point, it is not improbable that the pame was frequently ased in this more extended sense; just as that of the Via Appia was applied to the whole live from Rome to Brundusinm, though originally carried only as far as Capua.

The stations from Rome, as far as Luna in Etruria, are thus given in the Antouise Itinerary (p,290, \& . . ) : Lorimm (near Ciastel (iuilo) - xii, M.r.
Ad Tures (Monteroni)) - - x.
Pyrgi (Sta Severa) - - xii.
Castrum Novam (T.di Chiaruecia) tiii.
Centum Cellae (Civitt Vecchiut)
Martha (Ad Martan fi.) -
Foruin Aurelii (Montulto? ) - xxiv.
Cosa (Ansedonia) - - - xxv.
Ad lacum Aprilem (Prilem) - xxii.
Salebro (?) - - - xii.
Manliana (?) - - - ix.
1'opuloniam (Rur. of Populonia)
Vada Volaterrana (V'ukte) - xxv.
Ad IIerculem (near Livorno) - xviii.
lisac (I'isa) - - - xii.
l'apitiana (Iiareggio?) - - xi.
Luma (Luni) - - xxiv.
The stations thence along the coast of Liguris as far as the river Varus have been mentioned in the article Lecteria; and the distancos along this part of the line, in both the Autonine Itinerary and the Tabula, are so confused and corrupt that it is useless to attompt their cerrection, Biven of that part of the V'ia Aurelia above gived, along the coast of Etruria, several of the stations are very uncertain. and some of the distances aro probably corrapt. From Rome to Centum Cellite, indecs, the roal has been carefully examinel and the distances verified (Westphal, Kom. Kamp. Pp. 162-169); but this has not been done farther on: and as the rond traversed the Maremma, which was certainly in the latter ages of the Roman Empire, as at the prescnt day, a thinlypeopled and unhealthy district, several of the stations were probably even then obscure and unimpertant Ilaces. The Tabula, as unual, gives a greater number of suoh stations, several of which may be ileotified as the poirts where tbe road crossed rivers and streauns whose names are known. But the route is givea very cenfusedly, and the distances are often incorrect, while in some cases they are omitted altogether.

## VLA CASSIA. <br> TA CASsI..

The distances between I'opuloninu and Pisne, as well as thoso between Centum Cellae and Cusa, are in many cases unintellipible; and it is often impossible to say to which of the stages thoy are meant to refer.

The Via Aurelia (in the more extended sense of the term, as ased in the Itineraries) communicated with Cisalpine Gaul and the Via Aemilia by two different routes; the eae, which according to Strabo was constructed by Aemilius Scaurus at the same time that he continued the Via Aurelia to Vada Sabata, led frem that place across the Apennines to A puae Statiellae, and thence to Dertona, to which place the Via Aemilia had probably already been prolonged. (Strab. v. p. 217.) The other, which was known as the Via Postumia, and was therefore probably constructed at a different period, led from Dertona across the monntains direet to Genua. Both these lines ure given in the Antonine Itinerary and in the Tabula; though in the former they are confused and mixed up with the direct line of the ceast-road. [LicuRLL. ]

1. From Gonua to Dertona the stations were Libarnum (Rn, between Arquata and Serrucalle)

[E. II. B.]
Via Canda'tia. [Via Egnatia.]
VIA CASSIA, was the name given to one of the priscipal highreads of Italy which led from Rome through the heart of Etruria to Arrietum, and thence by Florentia to Luci. The period of its construction, as well as the origin of its name, is uxilnown. We learn only from a passage of Cicere that it was a well-known and frequented highway in lis time, as that erator mentions it as one of the three roals hy which he could proceed to Cisalpiae Gaul. (Cic. Phil. xii. 9.) la the same passage, after speaking of the Flaninian Way as passing alung the Upper Sea, and the Aurelian along the Lower, he adds : "Etruriam discriminat Cassia." Hence it is clear that it was the prineipal road through the centre of that province, and is evidently the same given in the Antonine Itinerary (p. 285), theugh it is there erroneonsly called the Via Clodia. But indeed the occurrence of the Forum Cnssii upon this line is in itself a sufficient proof that it was the Cassian and not the Clodian Way. The statiens there set down, with their distances, are as follow:- M. P. From lione to Baccanae (Baccano) - . xxi.

Sutium (Sutri) - - - xil.
Forum Cusii (near ${ }^{\text {Ve- }}$
tralla) -- - Yolsinii (Bolsena) - - xxviii. Clusium (Chiusi) - - $\quad \mathrm{xxx}$. Ad Statuas - - - xii. Arretium (Arezzo) - - xxv. Ad Fínes - - - - xxv. Florentia (Firenze) - - xxv. 1'istoria (Pistioja) - - x x V . Luca (Luccu) - . . $\quad$ xxv.

The Via Cassia branched off from the Via Flaminia just after crossiog the Tiber by the Milvian Bridge, 3 miles from Rome. It then ascended the table-land, and proceeded over a dreary and monotonous plain to Baccanne (Baccano), situated in the basin or crater of an extidet volcano. Twn intermediate small stations are given in the Tabula : Ad Sextum, which, as its name imports, was situated 6 miles from Rome, and therefore 3 from the Pons Milvius ; and Veii, 6 miles farther : but it is probatle that the ancient Via Cassia, like the modern bighroad, passed by, but not through, the ancient city ; so that the station indicated was probably that where the road turned off to Veii, near the Isola Farmese. The Via Clodia separated from the Cassia about 3 miles beyond the station Ad Sextum, and struck off through Careiae (Galera) and Sabate (Bracciano) to Forum Clodii. The Tabula again gives as iatermediate station, betwees Sutrium and Forum Cassii, called Vicus Matrini, the ruios of which are still visible 7 miles beyond Sutri; and that of the Aquae Passeris, now ealled the Bagni di Serpa, 12 miles beyond Forum Cassii. The stations given in that document can thus be identified as far as Clusium. They are :-

| Ad Sextum | i. st. P. |
| :---: | :---: |
| Yeii (near Isola Farnese) | - vi. |
| Baccanae (Baccano) | ix. |
| Sutrimm (Sutri) | xii |

Vicns Matrini

- (omitted, but should be vii.)
Forum Cassii (Vetralla)
Aquae Passeris (Bagni di Serpa) xi. Volsinii (Bolsena)
Ad Palliam Fluviam (R. Paglia) Clusium (Chizusi) - - ix.
But from Clusium to Florentia the names of the stations are wholly unknown, and camnot be identified, with the exception of Arretiam; and the entire route is given in so confused a mamer tbat it is impossible to make anything of it.

Livy tells us that C. Flaminius, the colleague of M. Aemilius Lepidus in b. c. 187, after having effectually reduced the Lignrian tribes that had infested the territory of Bononia, constructed a road from Bononia to Arretium (Liv. xxxix. 2). But it is remarkable that we never hear anything more of this line of road, which would seem to bave fallen into disuse; though this pass across the Apennines, which is still traversed by the modern highroad from Florence to Bologna, is one of the easiest of all. Cicero indeed might be thought to allude to this route when he spealis of proceeding into Cisalpine Gaul by the Via Cassia (l.c.) ; but the absence of any allusion to its existence during the military operations at that period, or on any other occasion, seems to prove conclusively that it had not continned in use as a military highway.
(For a careful examination and description of the portion of the Via Cassia near Rome, see Westphal, Röm. Kamp. pp. 147-153; Nibby, Iie deyli Antichi, pp. 75-82.)
[E. H. B.]
VIA CIMIINIA, a name known only from an inseription of the time of Hadrian (Orell. Inscr. 3306), was prohably a short eut constructed across the range of the Ciminian hills, leaving the Via Cassia to the left, and following nearly the same line as the modern road over the same hills. (Hulsten, Not. ad Cluv. p. 67.) [Cimunus Mons.] [E. H. B.]

VIA CLODIA, was the name of a highroad that branched off from the Via Cassia, to the left, about

10 miles from Rome, near the inn of La Storta, where remains of the ancient pavement, indicating its direction, may still be seen. The name of the Via Clodia is known to us only from the Itineraries, and from inscriptions of imperial date (Ocell. Inscr. 822, 3143 ); but from the form of the name there can be no doubt that it dates from the republican period, though we have no account when or by whom this line of road was constructed. The l tineraries indeed seem to have regarded the Via Clodia as the main line, of which the Via Cassia was only a branch, or rather altogether coafounded the two ; but it is evident from the passage of Cicero abose quoted, that the Via Cussia was, properly speaking, the main line, and the Clodia merely a branch of it. At the same time, the occurrence of a Forum Clodii on the one branch, as well as a Fornm Cassii on the other, leave no donbt which were the true lines designated by these names. The course of the Tia Clodia as far as Sabate (Bracciano) admits of no doubt, though the distances gives in the Tabula are corrupt and uncertaia; but the pasition of Forum Clodii is uncertain, and the continuation of the line is very obscure. It appears indeed to have held a coarse nearly parallel with that of the Yia Cassia, through Blera, Tuscania, and Saturnia; but from the latter place the Tabula represents it as procecding to Succosa (Sub Cosa), which would be an abrupt turn at right angles, and could never have been the direction of the principal line of road. It is probable that this was either carried up the valley of the Ombrone to Siena (Sena Julia), or proceeded across the marshy plains of that river to juin the Via Aurelia. But this is mere conjecture. The stations, as given in the Tabula (tbe only one of the Itineraries in which the true Via Clodia is found), are as follow: 一

$$
\begin{array}{cl}
\text { From Rome to Ad Sextum } & \text { vi. M.P. } \\

\end{array}
$$

The Antonine Itinerary, withont giving the ronte in detail, says simply -

A Roma Foro Clodii, m. p. xxxii.
If this distance be correct, Foram Clodii must be placed either at or a little beyond Orimulo, which is 6 miles beyond Sabate (Brocciano). The distance of Orizolo from Rome by the line of the Via Clodia (as measured on Gell's map), somewhat exceeds 31 niles. But the distance from Blera mast, in that case, be greatly overstated ; the uctual distance froun Oriuolo to Biede being scarcely mure than 10 miles. (Westplaal, Röm. Kampagne, pp 154-158; Dennis's Etruria, vol. i. p. 273: but the distances there cited, in the note from the Tabula, are incorrect.)
[E. H. B.]
Via domitiana. [Via Apria, No. 1.]
VIA EGNA'TLA ( $\grave{\eta}$ 'Evvatia $\delta \delta o$ ós, Strab, vii. p. 322 , seq.), a Roman military road, which connected Illyria, Macedonia, and Thrace. We are alnost totally in the dark with regard to the origin of this road. The assumption that it was constructed by a certnin person named Egnatins, who was likewise the founder of the town Egnatia, or Gnatia, between Barium and Brondasium, on the coast of Applia, is
a mere conjectare, which cannot be supported by any nuthority. We may, however, make some approximation towards ascertaining the date of its construction, or, at all events, that of a portion of it. Strabo, in the passage cited at the head of this article, savs that Polybios estimated the length of the via, between the coast of the Adriatic and the city of Thessalonica, at 267 Roman miles; whence it nppears that this portion of it at least was extant in the time of Polybins. Consequently, as that historian floorished in the first half of the 2nd century B. C., we may infer with tolerable certainty that the road must have been commenced shortly after the reduction of Macedonia by the Romans in m.c. 168. Whether the eastern portion of the road, namely, that between Thessalonica and Cypsela, a town 10 miles beyond the left, or E., bank of the Hebrus, was also completed in the time of Polybius, is a point which cannot be so satisfactorily ascertained. For although Strabo, io the same passage, after mentioning the length of the raad, from its commencement to its termination at Cypseia, proceeds to say tbat, if we follow Polybius, we must add 178 stadia to make up the nnmber of Foman miles, because that writer computed 8 stadia and 2 plethra, or 8$\}$ stadia, to the Roman mile, instead of the usual computation of exactly 8 ; yet Strabo may then be speakiog only of the bistorian's general practice, without any reference to this particular road. And, on the whole, it may perhaps be the more probable conclusion that the eastern portion of the road was not constructed till some time after the Romans bad been in possession of Macedonia.

According to the same geographer, who is the chief suthority with regard to this via, its whole Jength was 535 1homan miles, or 4280 stadia; and although the hirst portion of it bad two brancles, namely, one from Epidamnus or Dyrrachinm and another from Apollonia, yet, from whichever of those towns the traveller might start, the length of the roal was the same. Into the accuracy of this statement we shall inquire further on. Strabo also mentions that the first part of the road was called in Candavium ( $\mathrm{e} \pi!$ • Kavoaovias), and this name frequently occurs in the Roman writers. Thus Cicero (ad Att. iii. 7) speaks of travelling "per Candaviam," and Caesar (B.C. iii. 79) mentions it as the direct route into Macedonia. It does not, however, very clearly appear to how much of the roal this name was applicable. Tafel, who has written a work on the Via Eqnatia, is of opinion that the appellation of Candavia may be consilered to extend from the commencement of the via, incloding the two brasches from Dyrrachium and Apillonia, to the town of Lychnidus. (IJe I'ia mil. Rom. Egnatia, Proleg. p. xu ix. Tubing. 1842.) But this limitation is entively arbitrary, and unsapported by any suthority; and it would perhaps be a juster inference from the words of strako to assume that the name "Candavia" was applicable to the road as far as Thessalonica, as Col. Leake appears to bave done. (Worthern Greece. vol. iii. p. 311.) The point to be determined is, what does Strabo menn by "the first part?" The road in its whole extent he says is called "Via Equatia," and the first part "in

 from what follows it is erident that he contemplated the division of the jarts at Thessalonica, since he gives the separate measurement as far as that town, which is jnst half the whole length of the road.

We will consider the road as far as Thessalonicn, or the Via Candavia, first, and then proceed to the remainder of the Egnatian Way. Strabo (l.c. and p. 326) lays down the general direction of the road as follows: After passing Mount Candavia, it ran to the towns of Lychnidus and Pylon; which last, as its name implies, was the border town between Illyria and Macedonia. Hence it proceeded by Barnus to Heracleia, and on through the territory of the Lyncestae and Eordaci throngh Edessa and Pella to Thessalonica. The whole extent of this line, as we have already seen, was 267 Roman miles; and this computation will be fonnd to agree pretty accurately with the distance between Dyrrachium and Thessalorica as laid down in the Antonine Itinerary. According to that work, as edited by Parthey and Pioder (Berlin, 1848), wbo have paid great attention to the nombers, the stations and distances between thase two places, starting from Dyrachinm, were as follow ( p .151 ).-

The difference of 2 miles prolably arises from some variation in the MSS, of the Itinerary. It should be observed, however, that, according to Wesseling's edition (p. 318, seq) , the distance is 11 miles more, or 280 miles, owing to variations in the text. According to the Tab. Peut, the whole distance was 279 miles, or 10 more than that given in the Itiverary; hat there aro great discrepancies in the distances between the places.

The last-named work gives 307 miles as the sum of the distances between Apollonia and Thessalonica; or 38 miles more than the roate between Dyrrachium and the latter town. Both these routes united, according to the Itinerary, at Clodiana; and the distance from Apollonia to Clodiana was 49 miles, while that from Dyrrachium to the same place was only 33. This accounts for 16 miles of the difference, and the remainder, therefore, must be sought in that part of the road which lay oetreen Clodiana and Thessalonica, Ilere the stations are the same as those given in the ronte from Dyrrachiam, with the exception of the portion between Lychnidus and Heracleia; where, instead of the single station of Nicias, we have two, viz., Scirtiana, 27 miles from Lychnidus, and Castra, 15 miles from Scirtiana. And as the distance between Castra and Heracleia is stated at 12 miles, it follows that it was 11 miles farther from Lychnidus to Heracleia by this route than by that through Nicias. Tlis, added to the 16 miles extra length to Clodiana, accounts for 27 miles of the difference; but there still remain 11 miles to make up the discrepancy of 18 ; and, as the stations are the same, this difference arises in all probability from variations in the MsS.

According to the 1tin. Mierosol. (p. 285, seq., Berlin ed.), which names all the places where the horses were clanged, as well as the chief tomns, the total distance between Apollonia and Thessalonica was 300 miles; which differs very slightly from that
of the Itinerary, though there are several variations in the route.

Now, if we apply what has been said to the renark of Strabo, that the distance from Thessalonica was the same whether the traveller started from Epidamnus (Dyrrachium) or from Apollonia, it is difficult to perceise how such could have been the case if the junction of the two hranches existed in his time also at Clodiana; since, as we have already seen, it was 16 miles farther to that place from Apollonia than from Dyrrachium according to the Itin: Ant.; and the Itin. Hierosol. makes it 24 miles farther. Indeed the maps would seem to show that if the two branches were of equal length their junction must have taken phace to the E. of Lake Lychnitis; the branch from Dyrrachium passing to the N. of that lake, and that from Apollonia to the S. But, although Burmeister, in his review of Tafel's work (in Zimmerman's Zeitschrift für die Alterthumswissensehaft, 1840, p. 1148): adopted such an hypothesis, and placed the junction at Heracleia, it does not appear that the assumptivo can be supported by any authority.

Clodiana, where the two branches of the Via Egnatia, or Candavia, united, was seated on the river Genusus (the Tjerma or Skumbi). From this point the valley of the river naturally indicated the course of the road to the E. (Leake, Northern Greece, vol. iii. p. 312.)

We will now proceed to consider the second, or eastern, portion of the Egnatian Way, viz., that between Thessalonica and Cypsela.

The whole length of this route, according to Strabo, was 268 Ruman miles; and the distances set down in the Itid. Ant, amount very nearly to that sum, or to 265, as follows. (Pind. and Parth. p. 157; Wess. p. 330, seq.)

| Apolionia - | - | - | - | 36 |
| :--- | :--- | :--- | :--- | :--- |
| miles. |  |  |  |  |
| Amphipolis | - | - | - | 32 |

## 265

Another route given in the same Itinerary (Wess. p. 320, seq.) does not greatly vary from the above, hut is not carried on to Cypsela. This adds the following stations:-Melissurgis, hetween Thessalonica and Apollonia, Neapulis, hetween Philippi and Acontisma, Cosintas, which according to Tafel (pars ii. p. 21) is meant for the river Cossinites, betwcen Topirus and Maximianopolis, and Milolitum and Tempyra, between Breadice and Trajanopolis. The Itin. Hierosol, makes the distance only 250 miles.

Many remains of the Egnatian Way are said to be still traceable, especially in the neighbourhow of Thessalonica. (Beaujour, Voy. militaive dans l' Empire Othoman, vol. i. p. 205.)
[T. H.D.]
VIA FLAMINIA ( $\bar{\eta}$ фладıvia $\delta \delta \dot{\sigma} s$ ), one of the most ancient and important of the highroads of Italy, which led from Rome direct to Ariminnm, and may be considered as the Great North Road of the Romans, heing the principal and most frequented line of communication with the whole of the north of Italy. It was also one of the first of the great
highways of which we know with certainty the period of constraction, having Deen made by C. Flaninius during his censorship (B. c. 220), with the express purpose of opening a free communication with the Gaulish territory, which he had himself reduced to subjection a fow years before. (Liv. Epit. xx.) It is therefore certainly a mistake. when Straho ascribes it to C. Flaminius (the son of the preceding), who was consul together with M. Aemilias Lepidus, the author of the Aemilian Way, in B. c. 187, and himself constructed a road from Bononia to Arretiom. (Liv. xxxix. 2 ; Strah. v. p. 217.) It is certain that the Flaminian Way was in existence long before, and its military importance was already felt and known in the Second Punic War, when the consal Sempronius proceeded by it to Ariminum, to watch the movements and oppose the advance of Hannibal. (Liv, xxii. 11.) Throughout the period of the Republic, as well as under the Empire, it was one of the best knows and most frequented of the highways of Italy. Cicero, in one of the Philippics, says there were three ways which led from Rome to Cisalpine Gaul: the Flamivian by the Upper Sca (the Adriatic), the Aurelian by the Lower, and the Cassian through the midst of Etruria (Phil. xii. 9). During the centest between the generals of Vespasian and Vitellius (A. D. 69) the military importance of the Flamidian Way was fully brought out, and it was feit that its possession would be almost decisise of the vietory. (Tac. Hist. i. 86, jii. 52, \&c.) Tacitus alludes to the extent to which this great highway was at this period frequented, and the consequent bustle and crowding of the towns on its course (Ib. ii. 64). Most of these, indeed, seem to have grown up into flourishing and populous places, mainly in consequence of the traffic along the line of road.

So important a highway was naturally the object of much attention, and great pains were taken not only to maintain, but to restore and improve it. Thus, in B.c. 27 , when Augustus assigned the care of the other highways to different persoas of consular dignity, he reserved for himself that of the Via Flaminin, and completely restored it throughout its whale length from Rome to Ariminum, a service which was acknowledged by the erection of tro triumphal arches in his honour, one at Rome, the other at Ariminum, the latter of which is still standiog. [Ariminem.] Again, at a later period, Vespasian added materially to the convenience of the road by constructing a tunnel through the rock at a place called Intercis:, now known as $I l$ Furlo, a work which still subsists in its integrity. [1nterctsa.] This remarkable passage is particularly noticed by the poet Claudian, who has left us a general description of the Flaminian Way, by which the emperor Honarius proceeded, in A. D. 404, from Ravenna to Rome. (Clandian, de VI. Cons. Ilon. 494-522.) Indeed, it is evident that in the latter ages of the Empire, when the emperors for the most part took op their residence at Mediolanum or Ravenna, the Flaminian Way, which constituted the direct line of communication between those cities and Rome, must have become of still greater importance than hefore.

One proof of the important influence exercised by this great line of highway, is afforded by the circumstance that, like the Aemilian Way, it gave name to one of the provinces of Italy is the later division of that country under the Einpire; though, by a strange confusion or perverseness, the name of Flaminia was given, not to the part of Umbria which was actually traversed by the Via Flaminia, but to the eastern
portion of Gallia Cispadana, which should naturally have been incladed in Aemilia. [It.alis, p. 93.]

There is no doubt, from the description of Clandian above cited, compared witb the narrative in Tacitus of the movements of the Vitellian and Vespasian armies in A. D. 69, that the main line of the Via Flaminia continued the same throughont the Roman Empire, but we find it given in the Itineraries with some deviations. The principal of these was between Narnia and Fornm Flaminii, where the original road ran direct from Narnia to Mevania, while a branch or loop made a circuit by Interamna and Spoletium, which appears to have come to be as moch frequented as the main line, so that in both the Antonine and Jerusalem Itineraries this branch is given, instead of the direct line. Another route given in the Antonine Itinerary (p. 311) follows the line of the old Flamioian Way as far as Nuceria, bot thence turns abruptly to the right across the main ridge of the Apennines, and descends the valley of the Potentia to Ancona. Though given in the Itinerary under the name of the Via Flaminia, it may well be doubted whether this route was ever properly so called. Before enumerating the stations and distances along this celebrated line of road, as recorded in the different 1tineraries, it will be well to give a brief geaeral description of its course, especially of that part of it neavest to Rome.

The Via Flaminia issued from the gate of the same name, the Porta Flaminia, which was situated nearly on the same site as the modern Porta del Popolo, but a little farther from the Tiber, and was carried thence in a direct line to the Pons Milvius (Ponte Molle), where it crossed the Tiber. This celebrated bridge, which so often figures in Roman history, was reckoned to be 3 miles from Rome, though only 2 from the Porta Flanioia, the distances being as osual computed from the ancient gate, the Porta Ratumena. After crossing the Tiber, the Flaminian Way turned to the right, keeping pretty close to the river, while the Via Cassia, which diverged from it at this point, ascended the table-land and proceeded nearly due N. The line of the Via Flaminia is bere distinctly marked by the remains of several ancient sepulchres, with which its course was stulded on both sides, like the Via Appia and Latina, for some miles from the gates of Rome. The namber of such sepulchres on the line of the Via Flaminia is particularly noticed by Juvenal (i. 17 I ). One of these, which was discovered in the 17th ceotury at a place called Grotta Rossa, obtained much celebrity from being supposed to be that of the family of Ovid, though in reality it belonged to a fanily of the mame of Nasonius, which could have no connection with the poet, whose cognomen only was Naso.

Six miles from the Milvian Bridge (at a place now called Prina Porta) was the station of Saxa Rubra, or Ad Rubras as it is called in the Itineraries, which, from its proximity to Rome, and its position on the great northern highway, is repeatedly mentioned in history. [Saxi Ruma.] It was here that the Via Tiaemina parted from the Flaminia, and, turning off to the right. followed closely the valley of the river, while the main line of the more important highway ascended the table-land, and held nearly a straight course to the station of Rustrata Yilla, which is placed by the Antonine Itinerary 24 miles from Rome. The exact site of this cannot be identified, but it must have been a little short of Rignano. It is not mentioned in the Tabula or Je-
rusalem Itinerary, both of which, on the contrary, give another station, Ad Vicesimnm, which, as its name imports, was situated 20 miles from Rome, and, therefore, 11 from Ad Rubras. It must therefore have been sitnated a little beyond the Monte di Guardia, but was evidently a mere Mutatio, or station for changing horses, and no ruins mark the site. Bnt the course of the Via Flaminia can be traced with certainty across this table-land to the foot of Soracte, by portions of the aacient pavement still existing, and ruined tombs by the roadside. The nest station set down in the Jerusalem Itinerary and the Tabula is Aqua Vira, 12 miles beyond Ad Vicesimum, and this is identified beyond a doubt with the Osteria dell' Acqua Viva, which is just at the required distance ( 32 miles) from Rome. Thence the ancient road proceeded direct to the Tiber, leaving Civita Castellana (the ancient Fescennium) on the left, and crossed the Tiber a little above Borghetto, where the remains of the ancient bridge are still visible, and still knownas the Pile di Augusto. Thence it proceeded in a straight line to Ocriculum, the ruins of which are situated below the modern town of Otricoli. Ocriculum was $12 \mathrm{M} . \mathrm{P}$. from Aqua Viva, or 44 from Rome, according to the detailed distances of the Jerusalem ltinerary, which are exactly correct. The Antonine Itinerary makes the distance in one place 45 , in another 47 miles. (Itin. Ant. pp. 125, 311 ; Itin. Hier. p. 613. For a detailed examination of this first portion of the Via Flaminia, see Westphal, Römische Kampagne, pp. 133-145; Nibby, Vie degli Antichi, pp. 5774.)

The remainder of the route must be more briefly described. From Ocriculum it led direct to Narnis ( 12 miles), where it crosserl the Nar by the famous bridge, the ruins of which are still the admiration of travellers, and, quitting altogether the valley of the Nar, crossed the bills nearly in a straight line due N. to Devania (Bevagna), passing by a station Ad Martis ( 16 M. P.), and thence to Mevania (16 31.P.): whence it proceeded to Forum Flaminii, at the foot of the Apennines. But the distances here have not been examined in detail, and most of the Itineraries (as already mentioned) give the circuitons or loop line (nearly coinciding with the modern road) by Interamna and Spuletium to Forum Flaminii. The stations on this road were, according to the Itin. Ant.:-
Intermana (Terni) - - viii, M. F.
Spoletium (Spoleto) - - xviii.
Forum Flaminii - - - xviii. but the Jerusalem Itinerary, which gives them in greater detail, makes the total distance somewhat greater. The stations as there set down are :-
$\left.\begin{array}{l}\text { Interamna (Terni) } \\ \text { Tres Tabernae } \\ \text { Fanum Fugitivi } \\ \text { F }\end{array}\right)$

The position of Forum Flaminii is well ascertained at a place called S. Giovanni in Forifiamma, where its ruins are still visible. This is, however, little more than 2 miles from Foligno, but is correctly placed by the Itineraries 12 miles from Nuceria (Nocera). There can be no doubt that the foundation of the town of Forum Flaminii was contempo-
rary with the constraction of the highroad itself: it was judicionsly placed just at the entrance of the Apeonines, where the passage of those mountains may be considered to have commenced. Thence the highway followed nearly the same line as the modern road from Foligno to Fano, skirting the main ridge of the Apennines, and the principal stations can be identified without difficulty. It passed by Helvillum (Sigillo), crossed the central ridge of the Apennines at La Schieggia (probably Ad Ensem of the Tabula), and descended into the valley of the Cantiano, a tributary of the Metaurus, passing by Cales or Calles (Cagli), Intercisa (the Passo del Furlo), and emerging into the valley of the Metaurus at Forum Sernpronii (Fossombrone), whence it descended the course of that river to Fanum Fortmnae ( $F$ ano) on the Adriatic, and thence along the coast to Ariminum (Rimini), where it joined the Via Aemilia.
We may now recapitulate the distances as given, first, in the Antonine Itinerary (p. 125):-
From Rome to

These distances are all approximately correct. The stations are given more in detail io the Jerosalem Itiverary (p. 613), as follow:-

From Rome to

The whole distance from Rome to Ariminum ac. cording to this Itinerary is therefore 222 miles, while the Antonine (following the more direct line) makes it 210 miles. The Tahola adds nothing to cor knowledge of this ronte; and the distances are much less correct than in the other two Itineraries.

The branch of the Flaminian Way which struck off from the main line at Nuceria and crossed the

Apennines direct to Ancona, is thas given in the Antonine Itinerary (p. 311):-
 Thence a road was carried along the coast by Sena Gallica to Fanum Fortunse, where it rejoined the main line of the Via Flaminia. The stations were:-

| Ad Aesim fl. (R. Esinn) | - |
| :---: | :---: |
| Sena Gallica (Sinignglia) | - |
| Ad Pirum (?) | - |
| Fanum Fortunae (Fano) | - |

All the above distances appear to be at least approsimately correct. (For a foll and careful exmination of the line of the Via Flaminia, and the distances of the stations upon it, see D'Anville, Analyse Geographique de 1Italie, pp. 147162.) [E. H. B.]
 the highroads that issued from the Porta Esquilioa at Rome. It was evidently originally nothing more than a road that led to the ancieot city of Labicum (16 miles from Rome), but was subsequently continued in the same direction, and, after sweeping round the E. foot of the Albao hills, it joined the Via Latioa at the station Ad Pictas, in the plain between them and the Volscian mountains. (Strab, v. p. 23i.) This ronte was in many respects more convenient than the proper Via Latina, as it avoided the ascent and descent of the Alban hills: aad hence it appears to have become, in the later ages of the Empire, the more frequented road of the two; so that the Antonine 1tinerary gives the Via Labicana as the regular highroad from Rome to Beneventum, and afterwards gives the Via Latina as falling into it. (Itin. Ant. pp. 304, 306.) But this is decidedly opposed to the testimony of Strabo (l.e.), and the usage of the Angustan age, which is generaily followed by modern writers. Hence the Via Labicana will be bere giveo only as far as the point where it joins the Latina.
The stations set down in the Antonine Itinerary are merely -

From Rome to Ad Quintanas - - xv. m. p.
Ad I'ictas - . . $\quad$.
The Tabula suhdivides the latter stage into two; viz., Ad Statuas, iii. M. P., and thence to Ad Pictas, vii. ; thos confirming the distance in the Itinerary. The station Ad Quintanas was undoultedly situated at the foot of the hill on which stads the village of La Colonna, occopying the site of the ancient Labicum. The line of the ancient road from Rome thither followed nearly the same course, though with fewer wiodings, as the modern road to Palestrina and Valmontone. It is described in the article Lamcus.
[E. H. B.]
VIA LATINA ( $\dot{\eta}$ Aativin $\delta \delta \dot{\sigma}$ ) was one of the principal of the numerous highroads that issued from the gates of Rome, and probatly one of the most ancient of them. Hence we have no account of the time of its construction, and it was doubtless long in nise as a means of commonication before it was paved and converted into a regular highroad. Some road or other must always have existed between Rome and Tuscnlnm; while again heyoud the Alban hills the valley of the Saceo (Trerus) is one of the
natoral lines of communication that must have been in use from the carliest times. But it is not probable that the line of the Via Latina was completed as a regular road till after the complete reduction of both the Latins and Volscians under the Roman :anthority. It is true that Livy speaks of the Via l.atina as if it already existed in the time of Coriolanus (ii. 39), but he in fact uses the name only as a geographical description, both in this passage and again in the history B.C. 296, when be speals of Interamna as a colony "quae via Latinn est" (x.36). Nuither passage affurds any proof that the rood was thea in existence; though there is no doubt that there was already a way or line of communication. The course of the Vis Latina is, indeed, more natural for such a line of way than that of the more celebrated Via $A_{1}$ pia, and mnst bave offered less difficulties before the constraction of an artificial road. Nur did it present any such formidable passes io a military print of view as that of Lautulae on the Appian Way, for which reason it was the route chosea both by Pyrrhus when he advanced towards Rome in n. c. 280, and by Hannibal in n. c. 211. (Liv, sxri. 8, 9.) On the latter eccasion the Carthagioian general seems certainly to bave followed the true Via Latina across Monnt Algidus and by Tusculum (Liv. l. c.) ; Pyrrhus, oo the contrary, turned aside from it as he approached Praeneste, which was the farthest point that he reached io his a dvance tomards Rome.

Whatever may bave been the date of the construction of the Via Latina, it is certain that lorg before the close of the Republic it was one of the best known and most frequented highways in ltaly, Strabo speaks of it as one of the most important of the many roads that issued from the gates of Rome (v. p. 237), and takes it as one of the leading and most familiar lines of demarcation io describing the cities of Latiam. (lb.) It was, however, in ope respect very inferior to its neighbour the Via Appia, that it was not capable of any considerable extension, but terminated at Casilinum, where it joined the Via Appia. (Strab. l. c.) There was, iodeed, a branch road that was continued from Teanum by Allifae and Telesia to Beseventum; but thongh this is given in the ltineraries in connection with the Via Latina (Ilin. Ant. pp. 122, 304), it certainly was not generally considered as forming a part of that ruad, and was merely a cross line from it to the Appian. On the other hand, the main line of the Via Latina, which descended the valley of the Sacco, received on its way the two subordinate lines of road called the Via Lidicana and Via Praenestina, which issued from Rome by a different gate, but both ultimately joined the Via Latina, and became merged in it. (Strab. l.c.) Such at least is Strabo's statement, and doubtless was the ordinary view of the case in his time. But it would seem as if at a later period the Via Labicana came to be the more frequented read of the two, so that the Antonine linerary represents the Via Latina as joining the Labicant, instead of the converse. (Itin. Ant. p. 306.)

The stations, as given in the Itinernry just cited, are as fullow:-

Casilinam (Capora) - - vii.
Capra (Sta Maria) - - iii.
(The four last stages are snpplied from the Tabula. The Antonine 1 tinerary gives only the braoch of the road that led, as above noticed, to Beneventum.)

It will be observed that, in its coorse, as above set down, from Rome to Ferentinuin, the Via Latina did not pass through any town of importance, the stations given being mere Mutationes, or places for changing horses. But, on account of the importance of this line of road, it will be necessary to describe it somewhat more in detail.

The Via Latina issmed from the Porta Capena together with the Via Appia. It was net till abont half-way between that gate and the later Porta Appia (Porta di S. Sebastiano), that the two separated, and the Via Latina pursned its owo course through the gate iu the walls of Aurelian that derived from it the name of l'orta Latina. From this gate (now long closed) to a point 2 miles from the Porta Latina, where it crosses the modern road from Rome to Albano, tbe line of the ancient road may be readily traced by portions of the pavement, and ruins of sepulchres, with which the Latin Way. as well asthe Flaminian and Appinn (Juv. Sat. i. 171), was bordered. From that point the road may be seen procceding in a perfectly straight line, which is marked from distance to distance by tombs and other ruins, to the foot of the Tusculan hills. The only one of these ruins which deserves any netice is that commenly called the temple of Fortuna Muliebris, which is in reality a sepulchre of imperial times. About 9 miles from the Perta Capena is a farm or bamlet called Morrena, near which are the estensive remains of a Roman villa, supposed to be that of Lucullos; and abont a mile farther must be placed the station Ad Decimum, the 10 miles being undoubtedly reckoned from the Porta Capena. Almost immediately from this point began the ascent of the Tusculan hitls: the rend still preserved nearly its former direction, learing Grotta Ferrata on the right, and the citadel of Tusculum on the left; it then passed, as it is described by Strabo (v. p. 237), between Tusculum and the Alban Mount, following the line of a deep valley or depression between them, till it reached the fuot of Mount Algidus, and, passing through a kind of notch in the ridge of that mountain, at a place now called La Cata, descended to the station Ad Pictas in the plain below. The course of the ancient read may be distinctly traced by remains of the pavement still risible at interrals; the second station, Ruboraria (if the distance of six miles given in some MSS. be correct), must have stond near the ruins of a mediaeval castle called Molara. Thence to Ad Pictas the distance is stated at 17 miles, which is certainly greatly abore the truth. It was at this station that the Via Labicana joined the Latina; and from this circumstance, compared with the distances given thence to Fereatinum, we may place the site of Ad l'ictns semewhere near the Osteria di Mezara Selva, about 10 miles beyond Reboraria. strabe calls it 210 stadia $26!$ miles)
from Rome, but it is not clear whether he measured the distance by the Via Latina or the Labicana (v. p. 237). The actual distance of Ferentinum (concerning which there is no doubt) from Rome is 49 miles; and the Compitum Anagninom is correctly placed 8 miles nearer the city, which would exactly agree with the point on the present highroad where the branch to Anagnia still turns off. Both the Itinerary and the Tabula place Ad Pictas 15 miles from the Compitum Anagninum, and this distance would fix it 10 miles from Roboraria, or 26 from Rome, thus agreeing closely with the statement of Strabo. We may, therefore, feel sure that the position above assigned to Ad Pictas, a point of importance, as that where the two roads joined, is at least approximately correct.

The next stations admit of no doubt, and the distances are correct. It was at the Compitum Anagnionm, 15 miles beyond Ad Pictas, that the Via Praenestina joined the Latina, which was carried thence down the valley of the Sacco, nearly io the line of the present highroad, by Ferentinom and Frusino, both of which still retain their ancient names, to Fregellanun (Ceprano) on the Liris, whence it turned S. to Fabrateria Nova (the ruins of which are still visible at $S$. Giovanni in Carico), oo the right bank of the Liris, Here it crossed that river by a bridge, of which the ruins are still extant, whence the course of the ancient road may be traced withont difficulty throngh Aquinum, Casionm, Tcanum, and Cales to Casilinum on the Volturnus, where it fell into the Via Appia. Portions of the ancient pavement, sepulchres, and other ruins mark the line of the ancient way throughout the latter part of its course. At a station given in the Tabola noder the name of Ad Flexum ( 9 miles from Casinum) a braach road tarned off to Venafrum, whence it ascended the valley of the Vultorous to Aesernia, and thence into the heart of Samnium. The Antonine Itinerary represents the Via Latina as following this cross-road, and making a bend round by Venafrum, but there can be no donbt that the regular highroad proceeded direct to Teanum. The remains of the ancient road may be distinctly traced, proceeding from Teanom nearly due N. through Cojanello and Tora to S. Pietro in Fine, which was probably the site of the station Ad Flexam. This would be 18 miles from Teanum. The Tabula gives the distance as viii., for which there is no doubt we should read sviii.

The branch of the Via Latioa, already alluded to, which was carried to Beneventuin, quitted the main road at Teanum, crossed the Vulturnus to Allifae, and thence was carried up the valley of the Calor hy Telesia to Beneventum. The distances are thus given in the Antonine Itinerary (p. 304):-

Teanum to Allifae (Alife) - - svii. м.p. Telesia (Telese) - - xxv. Beaeventum - - xvii.
(The first part of the Vis Latina from Rome to the valley of the Liris is examined and discussed in detail by Westphal, Röm. Kamp. pp. 78-97; and Nibby, Tie degli Antichi, pp. $110-119$. ) [E.H.B.]

Via LaURENTINA. [LaUnentum.]
VIA NOMENTANA. [Nomentum.]
VIA OSTIENSIS, was, as its name imports, the road leading from Rome to Ostia, which must naturally have been an extremely frequented route when the city was at the height of its prosperity. It followed in its general direction the left hank of the Tiber, but cutting off the more considerable bends
and windings of the river. It issucd from the Porta Ostiensis, now called the Porta S. Paolo, from the celebrated basilica of St. Paul, about $1 \frac{1}{2}$ mile outside the gate, and situated on the line of the ancient road. Three miles from Rome it passed through a village, or suburb, known as the Vieus Alexandri (Ammian. xvii. 4. § 14): it was at this point that the Via Laurentina struck off direct to Lanrentum, 16 miles distant from Rome [Laurextum]; while the Via Ostiensis, turning a little to the right, parsued thenceforth nearly a straight course all the way to Ostia. On this line, 11 miles from Rome, is the Osteria di Mala Fede, where a road branches off to Porcigliano, which undoubtedly follows the same line as that mentioned by the younger Pliny, by which his Laurentine villa could be approached as conveniently as by the Via Laurentioa. (Plin. Ep. ii. 17.) Five miles farther the bighroad reached Ostia, which was 16 miles from Rome. (Itin. Aut. p. 301.) [OstLic].
[E. H. B.]
V1A POP1L1A. [Via Appia, No. 5.]
V1A PORTUENSIS, was the road that led from Rome to the Portus Trajani, or the new port of the city constructed under the Einpire on the right baok of the Tiber. [Ostia.] The name conld not, of course, have come into use antil after the constrnction of this great artificial port to replace the natural harbour of Ostia, and is ouly found in the enumeration of the Viae in the Curiosum Urbis and Notitia (pp. 28, 29, ed. Preller). But the line of the road itself may still be traced withont difficulty. It issued from the Porta Portuensis, io the walls of Aurelian, and followed, with little deviation, the right bank of the Tiber, only cutting off the minor windings of that river. The Antonioe Itinerary places the city of Portus 19 miles from Rome (p. 300); but this is certainly a mistake, the real distance being just about the same as that of Ostia, or 16 miles. (Nibby, Dintorni, vol. iii. p. 624.) From Purtus a road was carried along the coast by Fregenae ( 9 miles) to Alsiom ( 9 miles), where it joined the Vla Aurella. (ltin. Ant. p. 300.)
[E. H. B.]
VIA POSTUM1A, was, as we learn from an inscription (Orell. Inser. 3121), the proper name of the road that crossed the Apenoines direct from Dertona to Genua. But it appears to have lallea into disuse ; at least we do not find it mentioned by any ancient writer, and the road itself is included by the Itioeraries nnder the general name of the Via Aurelia. It bas therefore been considered more convenient to describe it in that article. [E. H. B.]

VIA PRAENESTINA ( $\grave{\eta}$ Прauva $\tau u \nu \dot{\eta}$ ósós, Strab.), was the name of one of the bighroads that issued from the Porta Esquilina at Rome, and led (as its nane implies) direct to Praeneste. The period of its construction is anknown; but it is evideot that there must have been from a very early period a highway, or line of communication from Rome to Praeneste, long before there was a regolar paved road, such as the Via Praenestina nltimately became. The first part of it indeed, as far as the city of Gabii, 13 miles from Rome, was originally known as the ViA Gabens, a name which is used by Livy in the history of the early ages of the Republic (Liv. ii. 11), but would seem to have afterwards fallen into disuse, so that both Strabo and the Itineraries give the name of Via Praenestinn to the whole line. (Strab. v. p. 288 ; Itin. Ant. p. 302.) In the latter period of the Repuhlic, indeed, Gabii had falleo very much into decay, while Praeneste was still an important and flourisiing town, which will suf-
ficiently account for the one appellation having be－ come merged in the other．A continuation of the sane roal，which was also included under the name of the Via Praenestina，was carricd from the foot of the hill at Praeneste，through the subjacent plain，till it fell into the Via Latins，just below Anasmia．

The stations on it mentioned in the Antonine Itine－ rary（ $\mathrm{p}, 302$ ）arc：－

From Rome to Gabii－－－－xii．m．P．

> Praeneste $-\quad$ - xi. Sub Anagnia - $-x i v . ~$

The Tabula gives the same distances as far as Praeneste，which are very nearly correct．Strabo reckons it 100 stadia（ $12 \frac{1}{2}$ miles）from Rome to Gabii，and the same distance theace to Praeneste． The continuation from Praeneste to Sub Anagnia is given only in the Antoaine Itinerary，but the dis－ tance is overstated；it does not really exceed 18 miles．

Tbe Via Preenestina issued from the Porta Esqui－ lina at Rume，together with the Via Labicana（Strab． v．P．237）：it passed through the Porta Praenestina in the later cireuit of the walls，now called Porta Maggiore；and separated from the Via Labicans im－ mediately afterwards，striking off in a nearly direct line tuwards Gabii．About 3 miles froun Rome it passed the imperial villa of the Gordians，the mag－ mificence of which is extolled by Julius Capitolinus （fordim．32），and is still in some degree attested by the imposing and picturesque ruins at a spot called Torre dei Schiavi．（Nilby，Dintormi，vol．jii． pp． $707-710$ ．）Nine miles from Rome the road is earried over the valley of a small stream by a viaduet of the most massive construction，still known as the Ponte di Nona：and 3 miles farther it passes the still existing rains of the city of Gabii． Thence to Prseneste tbe line of the road was not so direct ：this part of the Campagna being in－ tersected by deep gollies and ravines，which necessi－ tated some deviations from the straight line．The road is bowever clearly marked，and in many places retains its ancient pavement of basaltic lara， It is carried nearly straight as far as a point about 5 miles beyond Gatbii，where it passes through a deep cutting in the tufo rock，which has given to the spot the name of Cawamonte：shortly afterwards it turns abruptly to the right，leaving the village of Gallicano （the probable site of PEDUs ）on the left，and thence follows the line of a long narrow ridge be－ $t$ ween two ravines，till it approaclies the city of Praeneste．The bighroad donbtless passed ooly through the lower part of that city．Portions of the ancient pavement may be seen shortly after quitting the southern gate（Porta del Sole），and show that the old ruad followed the samie direction as the mosern one，which leads through Cari and Paliano， to an inn oo the highroad below Anagni，aplarently on the very same site us the station Sub Anagnia （or Compitum Anagnitum，as it is called in another route）of the Itinerary．
（Westphal，Kím．Ǩunp．pp．97－107：Nibby， Dintorni di Romz，pp．62．j－630．）［E．11．B．］

VIA SALARIA（ $\eta$ Za入apía ¿ঠós，Strab．），one of the most ancient and well－known of the highroads of Italy，which led from lome up the valley of the Thber，and through the land of the Sabines to Reate， athd thence across the Apennines into Picenum， and to the shores of the Adriatic．We have no account of the period of its construction as a regular road，hut there cun be little doubt that it was a fre－
quented route of communication long before it was laid down as a regular highway ：and the tradition that its name was derived from its being used hy the Sabines to carry into their own country the salt that they obtained from the Noman salt－works at the mouth of the Tiber，in itself seems to point to an early age．（Fest．s．v．Sclaria．）It was indeed，with the exception of the Via Latina，the only one of the great Roman highways，the name of which was not derived from that of its first constructor．But it cannot be inferred from the ex－ pressions of Livy that the battle of the Allia was fought＂ad undecimum lapidem，＂and that the Ganls on a subsequent occasion encamped＂ad tertium lapidem via Salaria trans pontem Anienis＂（Liv．v． 37 ，vii． 9 ），that the regular road was then in ex－ istence，though there is no donbt that there was a much frequented line of communication with the land of the Sabines．We learo from the latter passage that a bridge had been already constracted over the Anio；aod it is probable tbat the Via Salaria was coostructed in the first iastance only as far as Reate， and was aot carried across the monatains till long afterwards．Eren in the time of Strabe there is no evidence that it reached to the Adriatic：that author speaks of it merely as extending through the land of the Sabines，but as not of great extent（ou mo入入iे 0 z $\sigma \alpha$ ，Strab．v．p．2थ8），which readers it improbable that it had then been carried to the Upper Ses．But the Itineraries give the name of Salaria to the whole line of road from Rome to Castrum Trueatinum on the Adriatic，and thence to Adria．

The Salarian Way issued from the Porta Collina of the ancient eity together with the Via Nomentans （Strab．l．c．；Fest．\＆．v．Salaria）；but they di－ verged immediately afterwards，so that the one quitted the outer circuit of the city（as bounded by the walls of Aurclian）through the Porta Saluria，the other through the Porta Nomentana． Between 2 and 3 miles from Rome the Via Salaria crossed the Anio by a bridge，ealled the Pons Salarius，which was the scene of the memorable combat of Manlins Torquatus with the Gaul． （Liv．vii．9．）The present bridge is ancieat，though not strictly of Roman date，having been constructed by Narses，to replace the more anejent one which was destroyed by Totila．On a hill to the left of the road，just before it descends to the river，is the site of the ancient city of Antemanar，and a hill to the right of the rand immediately after crossing the river is worthy of notice，ns the spot where the Gauls encanped in B．C． 361 （Liv，l．c．），and where Hanaibal pitched his camp when he rode up to reconnoitre the walls of Rome．（Id．xxvi． 10．）Between 5 and 6 miles from Rome，after passing the Filla spada，the road passes close to Castel Giubileo，a fortress of the middle ages，which serves to mark the site of the ancient FidEnak． From this point the road is carried through the low grounds near the Tiber，skirting the foot of the Crustomian hills，which border it on the right． Several sinall streams descead from these hills，and， after crossing the rowd，discharge themsclves into the Tiber ；and there can be no doubt that one of these is the far－famed Allia，though which of them is en－ titled to clain that celebrated appellation is still a very disputed pomt．［Allis．］The road continued to follow the valley of the＇Tiber till，after passing Monte Rotondo，it turned inland to Eretum，the site of which is probably to be fixed at Grotta Marozia，
and is marked in the ltineraries as 18 miles from Rome. Here the Via Nonientana ngaio fell into the Salaria. (Strab. v. p. 228.) Hence to Reate the latter road traversed a billy conntry, but of no great interest, following Dearly the same line as the modern road from Rome to Rieti. The intermediate station of Ad Noras or Vicus Novus, as it is called in the Antooine ltioerary is still marked by ruins near the Osteria Nuova, 32 miles from Rome, and 16 from Rieti. Here an old charch still bore at a late period the pame of Tico Nuozo.

The stations on the criginal Via Salaria, from Rome to Reate, are correctly given, and can clearly be identified.
From Rome to
Eretom (Grotta Marozza)

Vicus Nopus (Ost. Nizora)

## Reate (Rieti)

xviii. m. r

From Reate the Via Salaria (or the continnation of it as giren in the Itineraries) proceeded nearly due E. by Catiliae, which is identified by its celebrated lake, or rather mineral springs, to Interocrea (Antrodoco), situated at the junction of two natural passes or lines of commuzication tbrough the central Apeunines. The one of these leads from Interocrea to Amiternum, in the opper valley of the Aternus, and was followed by a cross-road given in the Tabula, bat of which both the stations and the distances are extremely confused : the other, which is the main valley of the Yelinus, and bears nearly due N., was asceoded ty the Tia Salaria as far as Fulacrioum, 16 miles from Interocrea, and near the sources of the Velinus. Thence that road crossed the ridge of the Apennines and descended into the valley of the Tronto (Truentus), which river it followed to its monthat Castrum Truentioum, passing on the way by the strongly sitnated city of Asculum (Ascoli). The distances on this line of route are thus correctly given is the Antomine ltinerary (p. 307):

## From Reate to

From this last poiot two roads branched off, the one turning N , and proceeding along the coast of the Adriatic to Ancona; the other proceeding s. along the same coust to Castrom Norum (near Giulia Nuova), and thence to Adria (Atri). The latter hranch is giveo io the Itiverary as a part of the Via Salaria; but it is clear that neither of them properly belooged to that highway, both being in fact only portions of the long line of road which followed the coast of the Adriatic continuously from Ancooato Brundasium, and which is given in the Antonine Itinerary in comnection with the Via Flaninia (Itin. Ant. pp. 313-316). (The course of the Via

[^45]Digitized by

Salaria is examined, and the distances discussed in detail by D'Anville, Analyse Geographique de I Italie pp. 163-169.)
[E. H. B.]
via sublacensis. [lia Valerli.]
VIA TIBERINA, a name found in inscriptions, and noticed by the Notitia and Curionm among the roads that issued from the gates of Rome, was in all probability the road that quitted the Via Flaminia at Sasa Rubra, and followed the right bank of the Tiber until it rejoieed the Via Flaminia, between Acqua Iiva and Borghetto. The existence of such a road is known from remains of it still visible; and it is the only one to which the name of Via Tiberina can well be applied. (Westphal, Röm. Kamp. pp. 134, 138)
[E. H. B.]
Via itburtina. [Vla Yaleraa.]
via trajana. [Yita Appia, No. 4.]
VIA VALER1A ( $\bar{\eta}$ Oủa入epia $\delta \overline{\delta o ́ s}$, Strab.), one of the most celebrated and important of the Roman highways, which led from Rome, or, mure strictly speakiog, from Tibur, to the lake Fucinus and the laod of the Marsi, and thence was subsequently contioued to the Adriatic, at the month of the Aternus. The period of its construction is uncertain. It has indeed been frequently supposed to liave derived its name from, and to have been the work of, M. Valerius Maximus, wha was censor with C. Jonius Bubulcus in B.c. 307 ; but the expression of Livy, that the two constructed roads "per agros," would certainly seem to refer to cross-roads in the neighbonrhood of Rome ; and it is very improbable that the cunstruction of so celebrated a highray as the Via Valeria should not bave been more distinctly stated. (Liv. ix. 43.) The Via Valeria, indeed, was properly only a continuation of the Via Tiburtina, which led from Rome to Tibur ; and thongh the Itineraries include the whole line of ronte under the name of the Via Valeria, it appears that the distinction was still kept up in the time of Strabo, who distinctly speaks of the Talerian Way as beginning from Tibur, and leading to the Marsi, and to Corfinium, the metropolis of the Peligni (Strab. v. p. 238). The expressions of the geographer would naturally lead us to conclude that the Via Valeria was in bis time carried as a regular bighway as far as Corfinium ; but we learn from an inseription, that this was not the case, and that the regularly constructed road stopped short at Cerfennia, at the foot of the Mons Imeus or Forca di Caruso, a steep and difficolt pass, over which the bighway was not carried till the reign of Claudius, who at the same time contioued it to the month of the Aternus. (Orell. Inscr. 711.) It appears tbat the portion thus added at first bore the Dame of the Via Claudia Valeria (Inser. l.c.); but the distinction was soon lost sight of, and the whole line of route from Rome to the Adriatic was cormmonly knowa as the Via Valenia. (Itin. Ant. p. 308.) It will be convenient here to adeppt the satne usage, and consider the whele conrse of the road under one head.

The Via Tiburtina, as the road fron Rome to Tibur was properly called, must ondonbtedly bave been of very ancient origin. There must indecd have existed from the earliest ages of Nome a frequented highway or commanication between the two cities; hut we are wholly ignorant as to the time wheo a regularly made road, with its solid pavemeot and all the other accessories of a Roman via, was constructed from the one city to the other. Tbe road as it existed in the time of the Roman Empire may be distinctly traced by portions still remainiog of the
pavement, or by sepulchres and fragments of ancient buildings, so that no doubt can exist as to its precise course. It quitted the original city by the I'orta Esquilina, passed throught the Porta Tiburtina (now Porta S. Lorenzo) in the walls of Aurelian, and then proceeded nearly in a straight line to the Anio, which it crossed by a bridge about 4 miles from Lome. This bridge, now called the I'onte Mammolo, is in its present state the work of Narses, having bien restored at the same time as those on the Sia Salaria and Nomentana, after their destruction liv Totila, A. D. 549 . From this bridge the ancient road followed very nearly the same line as the modern one as far as the Logo di Tartaro, a small lake or pool of sulphureous waters, similar in character to the more considerable pool called the Solfatara or Aquae Albulae, about 2 miles farther on, and a mile to the left of the highroad. Leaving this on the left, the Via T'iburtina proceeded almost perfectly straight to the Ponte Lucuno, at the foot of the hill of Tivoli, where it recrossed the Anio. There can be no donbt that this bridge retains its ancient nane of Pons Lucanus, though this is not mentioned by any ancient author: but the origin of the name is evident from the massive sepulchre of the Plantian family (a structure not unlike the celebrated tomb of Caecilia Metella on the Appian Way), which stands close to the bridge, and which was constructed by M. Plautius Lucanus, who was censor together with Tiberius in the reign of Augustus. From the inscription on an ancient milestone it appears that this part of the ruad was constructed by him at the same time; and it is probable that the original Via Tiburtina was carried from the Lago di Tartaro in a different direction, bearing away wore to the leit, so as to leave the Aquae Albulae on the right ; while the road constructed by I'luatius, like the modern highoad, passed between that lake and Tibur. The 14th milestone was found near the spot where the road crosses the artificial channel that carries off the waters of the lake. From the Ponte Lucano the ancient road ascended the hill of Tibur by a very steep and straight ascent, passing throuch or under a portion of the vaulted snbstructions of the so-called villa of Mzecenas. [T'mur.]

The Itineraries all agree in stating the distance of Tibur from Rome at 20 miles; but it in reality little exccets 18 by the direct road, which rrossed the I'onte Lucano, as above described. The Tabula trives the Aquae Alhulae as an intermediate station, Int places it 16 M. P. from Fome, though the true distance is only 14 .

From Tibur the Via Valeria ascended the vailey of the Anio, passing by the town of Varia (İcovaro), 8 miles from Tabur, to a point marked by an inn, now called Ostwria Ferrata, 5 miles beyond Iïcovaro and 13 from Tivoli. This point, where the Anio makes a sudten bend, is evidently the site of the station Ad Lamias of the 'Tabula, whence a side roal struck ofl to the right, ascenltur the upper valley of the Anio to Sublayuenm (Subiaco), whence the road derised the name of Vin sombi-- assis, by which it is mentimed by Fromtinus (de Ayuctuct, 15). The road is given in thie Tabula, but in so cenfusce a manner that it is impossible to make it out. Sublaqueum was in reality 48 miles from Rouse by this ronte, or 28 from Tibur.

The Via Valeris, on the other hand, turned to the 1-ft at the Osteria Ferrata, and croesed the hills to Carscoli, the ruius of which are still visible at some distamce nearer Rome than the mokern village of

Carsoli. Thence it ascended a steep mountainpass, where portions of the ancient road, with its pavement and substructions, are still visible, and descended again into the basin of the Lake Fucinus. After passing by, rather than through, Alba Fucensis, it was carried along the N. shore of the lake to Cerfemmia, the site of which is clearly identified at a spot just below the village of Coll' Armeno. [Cemfennia.] Here, as already mentioned, the original Via Vaieria terminated; but the continuation of it, as constructed by Claudius, and given in the Itineraries, ascended the steep mountain-pass of the Moss Mrecs, and thence dexcended into the valley of the Aternus, on the banks of which, Dear its confluence with the Gizio, stood the city of Corfinium. Three miles from that city was a bridge over the Aternus (bear the site of the present town of Popoli), which constituted an important military position. [Aternus.] Below this point the river flows through a narrow pass or defile, through which the Via Valeria also was carried. The station Interprominm, marked in the Itineraries as 12 miles from Corfinium, must be placed at the Osteria di $S$. Valentino, below the village of the same name. Thence the road descended the valley of the Aternus to its mouth, which is correctly placed by the Itneraries 21 miles from Interpromium, and 9 bey ond Teate (Chieti).

The distances given in the Antonine linerary from Rome to this point are as follow :-

Home to Tibar (Tivoli) - $\quad$ xx. M. P. Carseoli (Ru. near Carsoli) xxii. Alba Fucentia (Alba) - xxv. (xxii) Cerfemia (Sta Felicita) xxiii. (xiii.) Corfinium (S. Pelino) - xvi. (xvii.) Interpromium (Ost. di S.

Valentino)
xi. (xii.) Teate (Chieti) - - xvï. (xui.)
The distances stated in parentheses are the corrections suggested by D'Anville, who examired the whole of this line of ronte with much care, and are confirmed by the discorery of ancient milestones, which leave no doubt as to the actual distances. The general correctness of the result thus oltaned is confirmed by a statement of Pling (iii. 5. 8.6), in which he estimates the breadth of Jtaly in its central part, as measured from the months of the Tiver to that of the Aternus at 136 miles. Here the mention of the Aternus leaves little doubt that the measurement was tal:en along the Via Valeria. Now the corrected distances above given amount to 118 miles from Rome to Teate, or 125 miles to the mouth of the Atermus; and if to this be added 16 miles from Rome to Ostia, the result is 141 miles, agreeing, within 5 miles, with the statement of Pliny.
(For a full examination of this whole line of route, see 1)Auville, A nalyse Gieogr. de litalie, pp. J70182, and Kramer, Jer Fuciner See, pp. 59-62. The Vaa Thburtina and the first part of the Valeria are also described and examined by West $\dagger$ hal, Röm. Kump. pp. 10s-121, and Nibby, Fie degli Antichi, pp. 96-104)

The proper termination of the Via Valeria, as continued by Clandins, was undoubtedly at the mouth of the Aternus. But the Antonine Itinerary contimus it on to Hadria, whieh it places at 14 M.P. from Tuate; but this distance is much below the truth: we should perhaps read 24 M.P. The probablity is, that at the mouth of the Aternus it fell into the line of road previonsly existing along the coast of the Adriatic, and which, without belonging properly to any of the three highways that procecded
from Rome fo that sea, served to connect the Valerian, Salarian, and Flaminian Ways. For this reason it may be useful to set down here the stations and distances along this line of coast, from the month of the Aternus to Ancona. They are thus given in the Antonine Itinerary (p. 313):-

$$
\begin{aligned}
& \text { From the Ostia Aterni (Pescara) to } \\
& \text { Hadria (Atri) } \\
& \text { Castrum Normm (near Giulia } \\
& \text { xv. } \\
& \text { Castrum Truentium (at the month } \\
& \text { of the Troato) - - - xii } \\
& \text { Castellum Firmanum (Porto } d i \\
& \text { Fermo) } \\
& \text { xxiv. } \\
& \text { Potentia (Potenza) - . - xxii. } \\
& \text { Numana (Humana) - - } \mathrm{s} \text {. } \\
& \text { Ancona - } \\
& \text { viii. }
\end{aligned}
$$

Here the coast-road joined one branch of the Via Flaminia ; and the distances from Ancona to Ariminum will be fonod in the article on that road. [Vis Flaminia.]
The Via Valeria, like the Aemilia and Flaminia, gave name to one of the later divisions or provinces of Italy ander the Roman Empire, which was called Valeria, It comprised the land of the Marsi, Peligni, nnd Vestini, through which the road really passed, as well as the land of the Sabines, which was traversed by the Via Salaria. [Italla, p. 93.] [E. H. B.]

MADUS (Oviaōos), a river of Germany, west of the Vistula, inentioned by both Ptolemy (ii. 11. § 2) and Marcianus (p.53) as flowing into the Mare Suevicum or Baltic. Neither of these authors mentions either its sonaree or its course, but it is generally assumed to be the Oder. Ptolemy in another passage (ii. 11. § 15) mentions, according to the common reading, a river 'Iaסov́a, which some regard as a tributary of the Viadus, and others as a name of the npper Viados; but Wilberg, the latest editor of Ptolemy, treating 'Iaסovia as a corrupt reading, has altered it to Ovíaסos.
[L. S.]
VLANA (Oviava), a place in Rhaetia, on the road from Vemania to Augusta Vindelicorum (Ptol. ii. 12. §4) ; it is marked in the Peutinger Table as Viaca, and its site is now occupied by a place called Wageck.
[L. S.]
ilatia. [Beatia.]
VIbI FORUM. [Forvm Vimi.]
VIBINUA, or VBBONIUM ('I6wviov: Bovino), a town of Apulia, in the interior of that conntry, 7 miles S. of Aecae (Troja) and 15 from Luceria. Its correct name is given by Pliny, who enumerates the Vibinates among the municipal communities of Apalia, and by inscriptions which are still extant at Bovino, an episcopal town situated on one of the lower slopes of the Apennines, on the right of the river Cervaro (Cerbalus). (Plin. iii. 11. s. 16; Holsten, Not. ad Cluver. p. 272.) There is no durbt that it is the place of which the name is corruptly written in Ptolemy, Vibarnum (OйiGapvov, iii. 1. § 72), and which is called by Polybius Vbonium ('16ävov, for which we should probably read Oüt\&ळ́voy, Schmeigh, ad loc.). The latter author distinctly places it among the Daunian Apulians, and mentions that Hannibal established his camp there, and thence laid waste the territory of Arpi and other neighbouring cities. (Polyb. iii. 88.)
[E. H. B.]
VIBIONES (OútGíwves or 'IG' $\omega v$ ves, Ptol. iii. 5. §23), a people of European Sarmatia, on the N. side of Monnt Bodinus, probably on the river Iuca or Jeviza in lolhynia.

VlCUS AQUARILS.
1307
VIBO, VIBO VALENTIA. [Hipronium.] VIBONENSIS SINUS, another name of the Hipponiates Sinus. [Hipposium.]

VICENTIA or VICETIA (OÜ̃̃ $\quad$ tía: Eth. Vicentinus: I'ieenza), a city of Venetia in the N. of Italy, situated between Patavium and Verona, and distant 22 miles from the former and 33 from the latter city (Itin. Ant. p. I28; Itin. Hier. p. 559). No mention is found of Vicentia before the Roman conquest of this part of Italy, and the earliest record of its existence is an inscription of the republican period which informs us that the limits between its territory and that of the Atestini were fised and determined by the proconsul Ses. Atilins Saranus io s.c. 136. (Orell. Inscr. 3110.) It is also incidentally mentioned as one of the mnnicipal towns in the N. of Italy, in b.c. 43. (Cic. ad Fam. si. 19.) Strabo notices it as one of the minor towns of Venetia, and Tacitus tells us that it was taken by Antonins, the general of Vespasian, on his advance from Patavium to Verona, in a manner that sufficiently proves it not to have been a town of any great importance. (Tac. Hist. iii. 8 ; Strab. v. p. 214.) But it always continued to be a municipal town, and the jounger Pliny mentions a canse in which the Vicentini were engaged before the Roman Senate in defence of their muoicipal rights. (Plin. Ep, v. 4, 14.) We learn also from Suetonius that it was the birthplace of the grammariau Retnmius Palaemon. (Suet. Gramm. 23.) It is noticed also by both Pliny and Ptolemy, as well as in the Itineraries, and evidently continued till rear the close of the Roman Empire, to be a municipal town of some consideration, though very inferior to its opulent neighbours, Verona and Patavium. (Plin. iii. 19. s. 23 ; Ptol. iii. 1. § 30 ; Orell. Inscr. 3219). It suffered severely in comnoon with most of the cities of Venetia from the invasion of Atrila (A.D. 452), by whom it was laid waste with fire and sword (Hist. Miscell. xv. p. 549), but it recosered from this catastroplie, and appears again ander the Lombards as a considerable city of Venctia (P. Diac. ii. I4, r. 39). During the middle ages it became for some time an independent repablic, and is still a popalons city with ahout 30,000 inhabitants, but has no remains of antiquity.

The name is written in inscriptions Vicetia, which has been restored by recent editors as the true reading both in Pliny and in Tacitus, but it is certain that before the close of the Roman Empire the name Vicentia (which has been retained in the modern Vieenza) was already in use. [E. H. B.]

VICIANUD, a place io Mesia (Tab. Peut.), probably the Bep̧ava of Procopins (de Aed. iv, 4. p. 281), and the present Nova Berda. [T. H. D.]

VICTO'R1A (Oúncoopía, l'tol. ii. 3. § 9), the most eastern place belonging to the Damnonii in Britannia Barbara. Camden (p. 1190) thinks that it is Bede's Cuer Guidi, and that it stood on Inchkeith Island, in the Frith of Fortl; but Horsley is of opinion that it is Abernethy, near Perth. [T.H.D.]

VICTORIAE MONS, a mountain in Hispamia Citerior, תear the Iberus, (Liv. xxiv. 41.) [T. H. D.]

VICTO'RIAE PORTUS, a haven belonging to Juliebriga, a town of the Cantabri in Hispania Tarraconensis. (Plio. iv. 20. s. 34.) Now Santonna. (Cf. Florez, Esp. Sagr. xxiv. p. 9.) [T. H. D.]

VICTUMILIAE. [Ticinus].
VICUS ALEXANDRI. [Via Ostiexsis.]
VlCUS AMBIATINUS. [Ambiatints.]
VICUS AQUA'RIUS, a place in the territory of the Vaccaei in Hispadia Tarraconensis (Itin. Aut. Wicrosott ( -
p. 439.) Varionsly identified with Villafafila and Villasecco.
[T. II. D]
VICU'S AQUENSIS. [Aquaf Connexabua.]
V1CUS CAECI'LIUS, a place in Lusitania belonging to the Vettones, on the road from Angusta Emerita to Caessraugusta. (Itin. Ant. p. 434.) Variously identified with Naralconcejo and S. Es tevan.
[T, II. D.]
VICUS CUMINA'RIUS, a place of the Carpetani in Hispania Tarraconensis, somewhat S . of the Tagus, and E. of Tuletum. Probably the modern St. Cruz de la Zaraa, which is still renowned for its cumin. (Morales, Antig. p. 77; Florez, Esp. Sagr. v. p. 22.) Others have identified it with Ocaña and Bayona.
[T. H. D.]
VICUS DOLUCENSIS, in Gallia. The name occors uoly on an ioseription found at Ualinghen, near Boulogne, the ancient Gesoriacum 「Gesomiscum]. Viens Dolucensis may be the old name of Halinghen. (Ukert, Gallien.)
[G. L.]
VICUS HE'LENAE, in Gailia, mentioned by Sidonins Apollinaris (Najor. Carm. 5. 216), in the conotry of the Atrebates; but geographers disagree abont the site. Sume place it at Hedin or IIesdin, on the Canche, but that river is in the country of the Morini. Others fis it at a place called Lens, and others in other places. (Ukert, Gallien.) [G. L.]

VICUS ICTIMULORUM. [ICTimule.]
VICUS JULII or ATURES, in Aqquitania. The name Civitas Aturensium oceurs in the Notitia of the Gallic Prorinces. The name Atures also wecurs in Sidonius Apollicaris (ii. ep. 1). In the passage of Tibullus, cited under Arurus [Vol. I. p. 336] "Atnr " is said to be a correction of Scaliger, the MSS, having Atax : -
"Quem tremeret forti milite victus Atur;"
but the great critic is prohably right.
At the councll of Agde (Asatha), A. D. 506, there is a subscription by a bishop "de civitate Vico Juhi," and the same name occurs in (iregory of Tours. DAnville affirms that Atures and Vicus Julii are the same place, relying on a Notico, where we read "Civitas Adtorensium Vico Juli." The name of the river Atur was also given to a people Atures, who bave given their name to the town of Aire, which is on the Adour. (DAnville, No(icc, Pc.)
[G. L.]
VICUS JULIUS, in Gallia, is mentioned only in the Nutitia of the Empire as a post under the orders of the general residing at Mogontiacum (Mainz). It is placed between Taberase (Khein-Zabern) and Nemetes (Speier). D'Anville supperses Vicus Julius to be Germersheim, at the place where the Queich enters the Rhise.
[G. L.]
YCUS MATRINL [Tin Cassha.]
Vicus Noyts. [Yia Salima.]
V10Us spacordil. [spaconem Vices]
VICUS VARIANUS. [Via Armilia, No. 5. ]
VIDRUS (Ouispos), a small coast river in the west of Germany, between the Rhenns and the Amisia (Ptul, ii. 11. § 1 : Marcian. p. 51), is prolably the same as the Hecht.
[L. S.]
VIDUA (Oüıóov́a. I'tul. ii. 2. § 2), a river on the N. coast of Hibernia; according to Camden (p. 1411), the Crodagh. Others identify it with the Culmore.
[T. H. D.]
VIDUB1A or VIDCB10, in (iallia, appears in the Table on a road from Andeanatunum (Langres) tu Cabillio, which is Cabullouwu (Chilon sur-Saine). The road passes through File or Tile [Tine] to Vi-
dubia. The disfance in the Table between Tile and Chilon, 39 leagnes, is correct: and it is 19 from Tile to Vidubia. D'Ansille fixes Vidubia at St. Bernard, on the little river Jouge, a branch of tbe Saine. (D'Anville, Notice, gre.)
[G. L.]
VIDUCASSES, a Celtic peoplo in Gallia Lugdunensis. Pliny (iv. 18) mentions them before the Bodiocasses, who are supposed to be the Baiucassea [Burocasses]. Ptolemy (ii. 8, § 5) writes the name Oíiסoukaínot or Oviठaukáनбtol, for we must assume them to be the Viducasses, though loo places the Viducassii next to the Osismii, and the Teneti between the Vidncassii and the Lexovii. But the Viducasses are between the Baiocasses and the Lexovii. The boundary between the Viducasses and the Baiocasses is indicated by a name Fins (Fines), which often occura in French geography.

There is a place named tieux SW. of Caen, in the department of Calvados, some distance from the left bank of the river Orne. This place is mentioned in the titles or maniments of the neighbouring abbey of Foutenai, on the other side of the Orne, under the name of Videocae or Veocae, of which V'teux is a manifest corruption, as D'Anville shows, like Tricasses, Trecae, Troies, and Durocasses, Drocae, Dreux. There is or was a stone preserved in the chicteau of Torigni, in the arrondissement of Saint Ló, in the department of Manche, whith contains the inscription ordo cuvitatis vidycas. This marble, which was found at l'ieux in 1580 , is said to be the pedestal of a statue placed in the third century of our aera in henour of T. Sennius Solemois. In the excavations made at Vieux in 1705 were found remains of public baths, of an aqueduct, a gymuasium, fragments of columus, of statues, and a great number of medals of the imperial period, besides other remains. Inscriptions, of the date A.D 238, found on the spot show that this city had temples and altars crected to Dinna, to Mars, and to Mercury. (Youveaux Essais sur la I'ille de Caen, par M. L'Abbé Delarue, 2 vols. Caen, 1842, cited by Fichard et Hocquart, Guide du - 'oyageur.)

The name of this old town is unknown, bat the remains show that it was a Roman city, probably built on a Celtic site; and several Romas roads branch off from it. Sume geographers suppose it to be tbe Araegenus or Araegenue of the Table, which D'Anville would fix at Bayeux. But the aite of Araegenus is donbtful. [Avgustonurus.] [G. L.]

VIENNA (Oúièz, Oüievva: Eth. Viemnensis: Fienne), a city of the Allobroges (Ptol. ii. 10. § I1) in Gallia Narbonensis, on the east bank of the Whome; and the only town which Ptolemy assigns to the Allobroges. Stephanus (s.v. Beevyos) gives this form of the word and an lithoic name Biévios, and he suggests also Btevvíftos and Brevvaios from a form Bievuj. He has preserved a tradition about Viemna being a Cretan colony from Biennus in Crete ; and accordingly, if this were true, its origin is Ifelleuic. Dion Cassius (xlvi. 50) has a story ahout some people being expelled from Vienna Ly the Allubroges, but he does nut say who they were. [Lugnexem.]
The pusition of Vienna is casily fixed by the name and by its being on the Roman road along the east side of the Rhone. There is a difficulty, however, as DAtuville observes, in the Antonitie Itinerary, which makes Vienna xxiii. from Lusdumum, and adids the remark that by the shorter cut it is svi. The number xvi. occurs also in the

Table. It is remarked, too, that Seneca (De Morte Claudiu, c. 6) says that Claudius was born at Lugdunnm (Lyon), "ad sextum decimum lapidem a Vienna." The real distance from Vienna to the Rhone at Lyon is about $17 \mathrm{M} . \mathrm{P}$. ; but 1'Anville suggests that the territory of Lugdanum may hare liad a narrow strip on the sonth side of the Rhone. There can be no road of 23 M . P. from Lugdunum to Vienna, unless it be one on the west bank of the Rhône. Strabo (iv. pp. 184, 186) makes the distance between Lugdunum and Vienna 200 stadia or 20 MI . P., which is too much.
Vienua is first mentioned by Caesar (B. G. vii. 9), and only once mentioned. He had crossed the $C \dot{\epsilon}-$ vennes into the Auvergne in the depth of winter, and he went again over the mountains to Vienna to meet a newly-leried cavairy force, which some time before he had sent on thither. Under the Empire Vienna was a great city, and there was rivalry and enmity between it and Lugdnnum. (Tacit. Hist. j. 65.) Mela speaks of it as a flonrishing place ; and under the Empire it was a Colonia (Plin, iï. 4 ; Tacit. Hist. j. 66), before the time of Clandins, who speaks of it in his Oratio (super Civitate Gallis danda) ; "Orratissima ecce Colonia valentissimaque Viennensium, qnam longo jam tempore senatores huic curiae coufert." (J. Lipsius, Excurs. ad Tacit. Ann. jib. xi.) This passage shows that Vienna had already supplied members to the Roman senate, and it must have been a Romana Colodia. Martial (vii. 88) calls it "pulcra":

## "Fertur habere meos, si vera est fama, lihellos, Inter delicias pulcra Vienna suas."

So Pliny says that his works were in the booksellers' shops at Lugdunam. [Legdunum.] These facts present a curious contrast between the book trade in a French provincial town under the Empire and at the present day, when a man would not find much. Viema was also noted for the wioe (Martial, xiii. 107) that grew in the neighbourhood; and some of the best wines of the Rhône are still made about Vienne. This town afterwards gave name to the subdivision of Narbonensis named Vieanensis.

The modern town of Fienne is in the department of Isere, on the little river Gere, which flows through Vienne to the Rhone. The modern town is in the narrow valley of the Gère, and extends to the banks of the Rhone. The Roman town was placed on two terraces in the form of amphitheatres. There still exist the foundations of the massive Roman walls above 19,000 feet in circuit which enclosed Vienna. These walls, even in the weakest parts, were about 20 feet thick; and it appears that there were round towers at intervals. There are at Tienne the remains of some arcades, which are supposed to have formed the entrance to the Thermae. They are commonly called triumphal arches, hut there is no reason for this appellation. One of the arcades bears the name of the emperor Gratian. There is a temple which M. Schneider has conjectured to have been dedicated to Augustas and Livia, if lis deciphering of the inscription may be trasted. This is one of the best preserved Roman monaments of its kind in France after the Maison Carrée of Nimes [Nemanses]. It is now a Museum, and contaios some valuable ancient remains and inscriptions. This building is of the Corinthian order, with six columns in front and eight on each side; the columns are above 3 feet in diameter, and 35 feet high, including the base of the capitals.

There is a singular monument near lienne, sometimes called Pontius Pilate's tomb, there being a tradition that Pilate was badished to Vienna. But even if Pilate was sent to Viemua, that fact will not prove that this is his monument. It is a pyramid supported on a quadrangular construction, on the sides of which there are four arcades with semicircolar arches at the top; and there are columns at each of the angles of the construction. Each side of the square of this basement is about 21 feet long, and the lieight to the top of the entablature of the basement is dearly 22 feet. The pyramid with its smaller base rests on the central part of the quadrangular constraction ; it is about 30 feet high, and the whole is consequently about 52 feet high. The edifice is not finished. It has on the whole a very fine appearance. There is a drawing of it io the Penny Cyclopaedia (art. J"ienne), made on the sput in 1838 by W. B. Clarke, architect.

The remains of the amphitheatre have been foand only by excavation. It was a builditrg of great maroitude, the Jong diameter being above 500 feet and the smaller above 400 feet, which dimensions are about the same as those of the amphitheatre of Verona. It has been used as a quarry to boild the modern town out of. Three aqueducts sapplied Vienna with water during the Roman period. These aqueducts ron one above another on the side of the bill which borilers the left bank of the Gere, and they are nearly parallel to one another, bat at different elevations. The bighest was intended to sapply the amphitheatre when a naumachia was exbibited. There are also remains of a fourth aqueduct large enough for four persons to walk in upright and abreast. These aqueducts were almost entirely constructed under groand, with a fall of about one in a thonsand, and for the most part lined inside with a red cement as high up as the spring of the arches.

The Roman road, sometimes called the Via Domitia, ran from Arelate (Arles) along the E. side of the river to Lugdunam (Lyon). Where it enters Vienne, it is now more than 3 feet below the surface of the ground, and this depth increases as it goes farther into the town. It is constructed of large blocks of stone. Another road went from Vienna to the Alpis Graia (Little St. Bernard) through Bergistrua; and it is an interesting fact to find that several villages on this road retain names given to them in respect of the distance from Yienne: thus Septème is 7 miles, Oytier 8 miles, and Diemoz 10 Roman miles from Jienne. Another road led from Vienne throngh Cularo (Grenoble) to the Alpis Cottia (Mont St. Genèrre). (See Ricbard et Hocquart, Guide du Joyageur, for refereoces to modern works on the antiqnities of Iienne, and particularly M. Mermet's work, 8vo. Viedne, 1829, which contains the answers to a series of questions proposed hy the Académie des Inscriptions et Belles Lettres ; also the references in Ukert, Gallien, p. 453.)
[G. L.]
VIGESIMCSL, AD. 1. A station in Gallia Narbonensis, the distance of which from a given point determined its name, as we see in the case of other names of places derived from numerals. [Dcodecimum, An; Vienna.] The place is $\mathrm{xx} . \mathrm{M} . \mathrm{P}$. from Narbo (Varbonne) on the road to Spain, and may be at or near a place called La Palme.
2. There is another Ad Vigesimum which occurs in the Itid. of Bordeaux to Jerusalem, on the roal from Toulouse. These numerals show that such cities

VILLA FAUSTINI.
had the privilege of reckoning their roads from the arpital to the limit of their territorios, where a Fines often occurs. [Fines.] (D'Anville, Notice, gc.)
[G. L.]
VILLA FAUSTINI, a place of the Iceni in Britannia Romana, on the road from Londinium to the northern boundary wall. (Itin. Ant. p. 474.) Camden (p. 438) identifies it with St. Edmund's Bury; but others have placed it near Thetford, at IWulpit, nud at Tornham Parva.
[T. H. D.]
VIMINA'ClUM (Oúsplváktov, Ptol. iii. 9. § 3), an important town of Moesia superior, lying somewhat E. of the month of the Margns, and connected with Constantinople by a highrosd which passed through Naissus. (Itin. Ant. p. 133 ; Itin. Hierosol. p. 564.) It was the head-quarters of the Legio vir. Claudia. (Ib.; ef. Eutrop. ix. 13 ; Procop. de Aed. iv. 6. p. 287 ; Theophyl. i. 5, viii. 12, \&c.) By the later Greeks the name is written Buıvákiov. Variously identified with Ram or Rama, and Kostolace. (Cf. Marsili, Danub. ii. p. 10 ; Mannert, vii. p. 78.)
[T. H. D.]
VIMINA'CIUM (Oициขákıov, Ptol. ii. 6. § 50), a town of the Vaccaei in Hispania Tarraconensis, to the E. of Pallancia. (Itin. Ant. pp. 449, 453.) lidentified with I alderaduci or Beceril. [T. H. D.]

VINCE1A, a town of Mloesia Superior, between Muns Aureus and Margum, and 6 miles from the former. (Itin. Aut. p. 132) In the Itin. Ilierosol. (p. 564) it is called Vingeius or Vingeium. Lapie identifies it with Semendria. [T. H. D.]

VINCUML [Bingium.]
VINDA (Oừvסia, Ptol. v. 4. § 7), a place in Galatia, between Pessinus and Ancyra, near the modern Ilidja. (It. Ant. pp. 201, 202) [L. S.]

VINDALUM, or VINDALIUM (Oivivoanov), in Gallia Narbonensis, a place where Domitius Alienobarbus defeated the Allobroges, B. c. 121. [G.allas Thansalpina, Vol. I. p. 954.] Strabo (iv. p. 185) says that Vindalum is at the confluence of the Sulgas [Sulgas] and the Rhơne. Florus (iii. 2) names this river Vindalicus or Vindelicus. The Sulgas is the Sorgue. D'Anville, relying, as he often does, on a mere resemblance of name, wonld place Vindalinm at l'edene, which is about a mile from the junction of the Sorgue and the Rhone. Others wonld place Vindalinm at Port de la Traille, the place where the Sorgue joins the Rhone. [G. L.]

VINDANA 1’ORTUS (Oúívõava $\lambda \iota \mu \hat{\eta} \nu)$, a bay on the north-west coast of Gallia (P'tol. ii. 8. § 1), and placed by Ptulemy between the mouth of the Herius [Herius] and the Promontorium G ubaenm. D'Anville supposes the Vindana to be the bay of Morbilan, at the botton of which was the eapital of the Veneti, now Vamues. Other geographurs have made other guesses : the bay of Dozarnez, the month of the Blavet, and others still.
[G. L.]
VINDELELA (Ov̇є $\overline{\delta \in \lambda \in \iota \alpha, \text { Ptol. ii. 6. § 53), a }}$ town of the Autrigotes in Hispania Tarraconensis, hetween Virovesca and Deobriga. (Itin. Ant. p. 454.) Irobably Pancorbo.
[T. H D.]
 most western of the forr Danubian provinces of the Toman empire. In the time of Augustus, it formed a distinct province by itself, but towards the end of the first century after Clurist it was onited with Thaetia. At a still later jeriod the two countries were again separated, and Rhaetia Proper appeary muder the name Rhactia Prima, and Vindelicia under that of Ihaetia Secunda. We have here to speak only of the latter or Vindelicia, as it nppears
in the time of Angastos, when it was bounded on the north by Germania Magna, that is, by the Danube and tho Vallum Hadriani or Limes, on the west by the territory of the Helvetii, on the south by Rhaetia, and on the east by Noricum, from which it was separated by the river Oenas (Inn). The line of demareation between Vindelicia and Rhaetia is not mentioned anywhere, but was in all probability formed by the rilge of the Ihaetian Alps. Vindelicia aceordingly embraced the northeastern parts of Switzerland, the south-eastern part of Baden, the sonthern part of Wiurtemberg and Bavaria, and the nortbern part of Tirol. (Ptol. ii. 12. § 1, 13. § 1 , viii. 7 . § 1 ; Sext. Ruf, 8; Agathem. ii. 4.) The country is for the most part flat, and only its sonthern parts are traversed by offshoots of the Rhaetian Alps. As to the products of Vindelicia in ancient times, we have searcely any information, thongh we are told by Dion Cassius (liv. 22) that its inhabitants carried on agriculture, and by other authors that the country was very fertile. (Solin. 21 ; lsid. Orig. i. 4.) The chief rivers of Vindelicia are : the Danube, the apper part of wbich flowed throngh the country, and farther down formed its boundary. All the others are Alpine rivers and tributaries of the Danube, such as the Ilarges, Guxtla, Licus, Virdo, Is.abes, and the Oexvs, which separated Vindelicia from Noricum. The Laens Brigantinus in the southwest also belonged to Vindelicia.

The inhabitants of Vindelicia, the Vindelici, were a kindred race of the Rhaeti, and in the time of Augustus certainly Celts, not Germans, as some have supposed. Their name contains the Celtic root I"ind, which also occurs in several other Celtic names, sncb as Vindobona, Vindomagus, Viodonissa, and others. (Zeuss, Die Deutschen, p. 228, foll. ; Diefenbach, Celtica, ii. 1. p. 134, foll.) Others, without assoming that the Vindelicians were Germans, believe that their name is conoected with the German Fenden, and that it was used as a general designation for nations or tribes that were not Germans, whence the modern Wend and also the name of the Vandali or Vindili. (Comp. Horat. Carm. iv. 4. 18; Strab. iv. Pp. 193, 207, vii. pp. 293, 313: Tae. Ann. ii, 17, Hist. iii. 5 ; Suet. Aug. 21 ; Vell. Pat. ii. 39 ; Plin. iii. 24.) After their subjugation by Tiberius, many of them were transplanted into other countries. (Strab. vii. p. 207; Dion Cass, liv. 22.) The principal tribes into which, according to Strabo, I'liny, and Ptolemy, the Vindelici were divided, were: the Briganti, Runicatae, leuni, Consuantae, Benlauni, Breuni, and Licatif. Their more important towns were : Angusta Vindelicorum, their capital, Reginum, Arbor Felis, Brigantium, Vemania, Campodunum, Abodiacum, Abusina, Quintiana Castra, Batava Castra, Vallatum, lsinisca, Pons Oeni, and a few others, which are treated of iu separate articles. (Comp. Rayser, Der Oberdonauhreis Bayerns unter den Römern, Augsburg. 1830 ; J. Becker, Drusus und die Iindelicier, in Schteidewin's Philologus, v. p. 119, foll.)
[L. S.]
VINIENAE, a place in Upper Moesia. on the rad from Naissus to Scodra, (Tab. Pert.) [T. H. D.]

ii. 2. §8), a little river on the E. coast of Hibernia, perhaps that which falls into Strangford Buy; but Camden (p. 1403) places it more to the N . near Carrickfergus.
[T. H. D.]
VINDHLI. [Vinmati.]
VINDILIS INSULA, on the Allantic coast of

Gallis, is mentioned in the Maritime Itin. after Uxantis and Sina or Sena. Middle age documents prove that the island of Belle-ile was once named Guedel, and this is the name Vindilis, the interchange of Gu or G and W or V being common. [Varincum.] Though this is the only evidence, it is sufficient, for the names agree, and Belle-ile is not likely to bave been omitted in the Itin., when smaller islands along the coast are mentioned.
[G.L.]
VINDINUM. [SUINDinum.]
VINDIUS MONS (Oйıд̃̃ıà ŏpos, Ptol. vii. 1. § 28), a cbain of monntains in Hindostán, extending NE. and SW. nearly, along the N. bank of the Namadus (now Nerbudda), in lat. $21^{\circ}$, long. $117^{\circ}$ $30^{\prime}$. They are now known by the name of the I'indhya Ms., and form the principal watershed of the Nerbudia and Tapti, which flow into the Indian Ocean, a little to the N. of Bombay, and of the Soane and $A n$ domati, which are great tributaries of the Ganges. [V.]

VI'NDIUS or VINNIUS (Ó̀íl סıov Zoos, Ptol. ii. 6. § 21), a motntain in Hispania Tarraconensis, which ran in a W. direction from the Saltus Vas. conum and formed the boundary between the Cantabri and the Astures. It formed, tberfore, the W. portion of the Cantabrian chain. The Iberus hal its source in it.
[T.H. D.]
VINDOBALA, a station on the wall of Hadrian in Britain, which was garrisoned by the Cohors 1. Frixngorum. Camden (p. 1090) identifies it with WallsEnd; whilst Horsley (p. 105) and others take it to be Rutchester. (Not. Imp.; Geo. Rav. v. 31.) [Vallum Romanum.]
[T. H. D.]
VINDOBO'NA or VENDOBONA (Ouvaס́óbouva: Vienna), a town on the Danube in Upper Pannonia, was originally a Celtic place, but afterwards became a Roman municipium, as we learn from inscriptions. (Gruter, Inscript. p. 4.) This town, which according to Ptolemy (ii. 15. §3) for some time bore the name of Juliobona ('lou入tóbova), was situated at the foot of Mons Cetius, on the road running along the right bank of the river, and in the conrse of time became one of the most important military stations on the Dunube; for after the decay of Carnuntum it was not only the station of the principal part of the Danubian fleet, but also of the Legio X. Gemina. (It. Ant. pp. 233, 248, 261, 266 ; Tab. Peut. ; Aurel. Vict. de Caes. 16 ; Agathem. ii. 4 ; Jomand. Gct. 50, where it is called Vindomina.) Vindobona suffered severely during the invasion of the Huns under Attila, yet continued to be a flourishing place, especially under the dominion of the Longobards. (Jornand. l. c.) It is well known that the emperor M. Aurelius died at Vindobona. (Aurel. Vict. de Caes. 16, Epit. I8; comp. Fischer, Brevis Notitia Urbis I'indobonae, Vindobonae, 1767; Von Hormayr, Gescluchte Wiens, i. p. 43, full.; Muchar, Norikum, vol. i. p. 166, foll.) [L. S.]

VINDOGLA'DIA, a place in Britannia Romana, probably in the territory of the Belgae on the road from Venta Belgaram to Isca Dumnoniorum. (Itin. Ant. pp. 483, 486.) The Geogr. Rav. (v. 31 ) calls it Bindngladia. Some place it at Pentridge, near Old Sarum, where are remains of Roman furtifications. Camden, however (p.61), identifies it with Winburn, and Horsley (p. 472) with Cranburn. [T. H. D.]

VINDOLANA, a station on Hadrian's boundary wall in Britain, where the Cohors iv. Gallorum lay in garrison. (Not. Imp.) By the Geo. Rav. (v. 31 ) it is called Vindolanda. Camden (p. 1087) identifies it with Ohe IJinchester, Horsley (p. 89, \&c.) with Little Chesters. [Vallum Romanum.] [T.H.D.]

YINDOMAGUS (Ov̉เขסóucyos), in Gallia Narhonensis, one of the two cities which I'tolemy (ii. 10. § 10) assigns to the Volcse Arecomici. There is nothing to determine the pasition of Vindomarus, except the fact that there is a town Vigan, where some remains have been found. Le Jigan is NW. of Nismes, and on the soutlern border of the $C \dot{C}$ vennes.
[G. L.]
VINDOMIS or VINDOMUM, a place belonging probably to the Belgae in Britannia Romana on the road from Venta Belgarum to Calleva. (Itin. Ant. pp. 483, 486.) Horsley (p. 459) identifies it with Farnham; others have sought it at E. Sherborne, and nt Whitchurch.
[T. H. D.]
VINDOMORA, a town of the Brigantes in the N. part of Britannia Romana. (Itin. Ant. p. 464.) It is commonly identified with Ebchester at the NW. boundary of Durbam (Horsley, p. 398), where there are remains of a fort, and where Roman antiqnities have been discosered. (Cf. Camden, p. 1086; Philos. Trans, No. 278.)
[T. H. D.]
VINDONISSA, in Gallia, is mentioned by Tacitus (Hist. iv, 61, 70). It was the station of the twentyfirst legion, A.D. 71, which entered Rhaetia from Vindonissa. The place is Windisch, in the Swiss canton of Aargau, near the junction of the Aur, Reuss, and Limmath. Vindonissa was once a large place, and many Roman remains and coins have been found there. In the Birrlisgrube there are traces of an amphitheatre, and on the road from Brauneckberg to Königsfelden the remains of an aqueduct The name of the xxr. Legion bas been discovered in inscriptions found at Windisch. Near Windisch is the former convent and monastery of Köuigsfellen, where some of the members of the Habsburg family are buried. Several Roman roads help to fix the pasition of Vindonissa. The Table places it at the distance of xxii. from Augusta Rauracorum (Augst) [Avgusta Ranbaconum]; and another road went from Vindonissa past Vitodurum [Vitodurust to Arbor Felix in Rhaetia. Vindonissa is named Vindo in a Panegyric of Constantine by Eumenius, and Castrum Vindonissense in Naxima Sequanorum in the Notitia of the Gallic Provinces. When Cbristianity was established in these parts, Vindonissa was the see of the first bishopric, which was afterwards remosed ta Constomz. In the third and fourth centuries Vandals and Alemanni damaged the town. The Huns afterwards ravaged Vindonissa, and Childebert king of the Franks destroyed it in the sixth century. (D'Anville, Notice, gc.; Ernesti, Note on Tacit. Hist. iv. 70; Neigebaur, Neuestes Gemälde der Schweiz.) [G. L.]

V1NIOLAE, a place of the Oretani in Hispania Tarraconensis, between Acatucci and Mentesa Bastia, (Itin, Ant, p. 402.) Variously identified with Hinojares and as a place on the river Borosa. [T.H.I.]

VINNIUS. [Vindies.]
VINO'VIA (in Ptol. Oúavoútov, ii. 3. § 16) , a town of the Brigantes in the N. of Britamiat Romana. (Itin. Ant. p. 465.) Now Binchesternear Bishop Auckland, with remains of Roman walls and other antiquities. (Camden, p. 945.) In the Not. Imp. and by the Geogr. Rav. (v. 31) it is called Vinonia.
[T. H. D.]
VI'NTIUM (Oúivtsoy: Tence), in Gallia Narbonensis, the chief town of the Nerusii. [Nertsir.] Inscriptions have been found at Vence with the words civit. vist. ; and in the Notitia of the Gallic Provinces it is placed in the Alpes Maritimae under the name of Civitas Vintionsium or

## VISURGIS．

Venciensium．Vonce is in the department of Var， near the river Tar．（1）＇Anville，Notice，dc．）［G．L．］

ITNZELA（Ovivjeגa），a town of Galatia，in the territory of the Tectosages．（1＇tol．v．4．§s．s．）A se－ cond town of the same name is mentioned by Ptolemy （ $\mathrm{v}, 5 . \S 8$ ）in the south－east of P＇isilia．［L．S．］

VIPITENUS，a town in Rhactia belonging to the Venostes，situated hetween Veldidena and Tri－ dentum．（Itin．Ant．pp．275，280．）Some place it in the Ober－11ipthal；others identify it with Sterzing on the Eisuch，at the foot of the Bren－ ner：
［T．H．D．］
VIPOSCIANA，a place in Mauretania Tingitana， on the road from Tocolosida to Tingis．（Itin，Ant． p．23．）Jammert（x．pt．ii．p．487）supposes that it is the place called Prisciana by Mela（iii． 10. sub fin．），and Птьซкiava or Пıaкiava by I＇tolemy （iv．1．§ 14）．The same author identifies it with Mergo，whilst Lapie takes it to be Sue－el－Arba，and Graberg di Hemso，Dar－el－Hhamara．［T．H．D．］

VIRACELLUA（Bipák $\in \lambda \lambda o v$, P＇tol．），a town of Etruria，mentioned only by Ptolemy（iii．1．§ 47）， who places it among the inland towns in the NW： corner of that country．It is supposed by Cluverius to be represented by $\mathcal{V}$ errucola or Verrucchia in the mountains between the Serchio and the Magra （Cluver．Ital．p．75），but the identification is very doubtful．
［E．H，B．］
VIRDO（the Hertach），a small liver in the ter－ ritory of the Licatii in Vindelicia，a tributary of the Licus，which it joins a Jittle below Angusta Vin－ delicorum．（Faul．Diac．Langob．ii． 13 ；Venant． Fort．Vita S．Mart．iv 646，where it is less cor－ rectly called Vindo or Vinda）．
［L．S．］
VIrgulae．［Bergaule，Vol．1．p．393，a．］
Viriballum．［Corsica，Vol．I．p．691，a．］
VIRITIUM（Oùpítov），a place in northern Ger－ many，mentioned only by Ptolemy（ii．11．§ 27 ）， was probably in the territory of the Sidini，on the site of the modern town of Wrietzen on the Oder． （Wilhelm，Germanien，p．275．）
［L，S．］
VIROCONIUA（Oúrpoк $\delta \nu_{10}$, Ptol．ii．3．§ 19）， a town of the Cornavii in Bitannia Romana，on the road Irom Deva to Londinium，with a by－road from Maridunum．（Itin．Ant．pp．482，484．）It is the town called Urinconium in another route of the Itinerary（p．469）．Now Hroreter，with ruins and antiquities．（Camden，p．652．）［T．H．D．］

VIRODUNUS1．［Verodenenses．］
VIRomagt＇s．［Bromagus．］
Virosidum（ Not．Imp．），a fort or castle at the N．boundary of Britamia Homana and in the terri－ tory of the Brigantes，the station of the Coliors vx． Nersiorum．Canden（p．1022）places it near Warcik Cumbertand：whilst others seek it on the S．coast of Soliray Frith，and at I＇reston．［T．II．D．］

V1Ri）J＇Esca（Oútpoúєoкa，I＇tol．ii．6．§̧53），a Lown of the Autrigomes in IIispania Tarraconensis， on the ruad from Ponpelo to Asturica（Itin．Ant． Ip．394，450． 454 ；Ilin．ii．3．s．4）．It is the modern Briciescr．（Cf．Fluez，Esp．Sugr．xxiv，p． 10, xxvii．p．13．）Coins in Sustini（p．211）．［T．II．D．］
VIl：OV1JCUM，in Gallis，in the Table．Virovinum， is placed on a routefrom Castellom（Cassel）to Turna－ cu＇n（Tournay）．The Antonine Itinerary fixes it xvi． from each place．The distances in the Table do not agree；but the site is cortain．It is Hevaic or F＇erwick，a large village on the Lyss， 3 leagues from I．ille in the Frunch department of Nord．In 1514 a medal of C．Julius Caesar was dug up at Werwic，
and some time afterwards other medals of the time of the Antonini．There is a tradition also of the remains of an ancient edifice having been seen here， and a fragment of a statue（Bast，Recueil dAnti－ quite＇s Romaines et Gauloises tronvées dans la Flandre proprement dite，Gand，1804．）［G．L．］ Vhatedndy（Óvipaveঠpoù $\mu$ ăィpov，Ptol．ii． 3. §5），a promontory on the N．coast of Britannia Barbara，and the most N．point of the island．It is apparently the present Dungsby IIead．（Carnden， p． 1280 ．）
［T．II．D．］
VIRUXI．［Varini．］
Vhlu＇NUM（Oüipovvay）：1．One of the most important towns in the interior of Noricum，south of Noreia，and on the road from Aquileia to Latriacum． （Plin．iii． 27 ；Ptol ii．14．§ 3 ；Steph．Byz，s．v． Bépouvos ；Suid．s．v．Bnooúnov；It．Ant．p． 276 ； Tab．Peut．，where it is called Vayunum．）But not－ withstanding its iniportance，which is attested by its widely scattered remains nout the village of Ma－ riasaal near Klagenfiart，no details about it are known，except，from inscriptions，the fact that it was a Roman colony，with the surname of Claudia． （Grmer，Inscript．p．569；Orelli，Inscript．no．1317， 5074 ；comp．Muchar，Norikum，vol．i．p．271．）

2．A town in the country of the Sidini in Ger－ mania，of unknown site，and mentioned only by I＇tolemy（ii．11．§ 27）．
［L．S．］
IIRUS（OUlipou En\＆o入ai，Itol．ii．6．§3），a river in the N．part of the W．coast of Hispania Tarra－ conensis．Variously identified with the Landrove and the Allones．
［T．H．D．］
VISBU＇RG11（Oủrofoúpyot），a tribe in the south－ east of Germany，about the sources of the Vistula， and placed by Ptolemy（ii．11，§ 21）near the Quadi，in the district to which Tacitus（Germ． 43）assigns the Gothini．
［L．S．］
Yiso＇NTILM（Ov́ı的vtıov，Ptol．ii．6．§ 54），a town of the Pelendones in Hispania Tarraconensis， perhaps I＇inneza or Binoesca．［T．H．D．］

TISII（Ovianoi），a tribe in the sonth－west of Germany，is mentioned only by Ptolemy（ii．11．§ 10）；nuthing certain can be sald as to the preciso district they inhabited．
［L．S．］
 тoúdas：Vistula or Weichsel），one of the great rivers of Germany，separating，according to Ptolemy （viii．10．§ 2 ；comp，ii． $11 . \S 4$ ，iii．5．§ 5）．Ger－ many from Sarmatia，while Pomp．Mela（iii．4）， who calls the river Visula，describes it as forming the boundary between Scythia and Sarmatia．It cannot be expected that either Greeks or Nomana should bave possessed much information about this distant river．Ptolemy says that it had its origin in the IIercynia silva，and discharged itself into the Sarmatian oceam（the Bultic），and Marcianus（p．53） ascribes to it a course of from 1850 to 2000 stadia in length．This is all the infurmation to be gathered from the ancient authors．（Comp．1＇lin．iv．27．s． 28 ； Solin． 20 ；Geogr．Rav，iv． 4 ；Amm．Marc，xxii．8， where it is called Bisula ；Jornand．Get．3．）Jor－ nandes in two passages（Get． 5 and II）speaks of a river Visela，which some geographers regard as identical with the medenn Wisloka，a tributary of the Vistula，but it is probnbly no other than the Vistula itself，whose modern Gerunan name II＇cichsel seens to be formed from Viscla．
［L．．．．］

 rivers in north－western（iermany，which was tole－ rably well known to the Romans，since during their

Wars in Germany they often adranced ns far as its banks，and at one time even crossed it；but they seem to have been unacquainted with its southern course，and with its renl origin；for it is formed by the confluence of the Werra and the Fulda，while Ptulemy（ii．11．§ 1）imagined that it had its sources in Mons Melibocus．Marciams（1．51） states that its length amounted to from 1600 to 1780 stadia．The Visorgis flowed into the German Ocean in the country of the Chanci．（Comp．Pomp． Mela，iii． 4 ；Plin．iv． 27 ；Tac．Ann．i． 70. ii． 9 ； Vell．Pat．ii． 105 ；Sidon．Apoll．Carm．xxiii． 243 ； Strab．vii．p． 291 ；Dion Cass．xliv．33，lv．］，2， 8 ， lvi．18．）
［L．S．］
VITE＇LLIA（Bitє入入ia，Steph．B．：Eth．Bi $\quad$ © גîvos，Vitelliensis），an ancient town of Latium， which was，however，apparently situated in the territory of the Aequi，or at least on their imme－ diate frontiers，so that it is hard to determine whether it was properly a Latin or an Aequian town．But the circumstance that its name is not found in the list of the cities of the Latin League given by Dionysius（v．61）is strongly in favour of the latter supposition．Its name is first mentioned by Livy（ii．39）in the account of the celebrated campaign of Coriolanus，whom he represents as taking Vitellia at the same time as Corbio，La－ bicum，and Pedam：bat in the more detailed nar－ ratives of the same campaign by Dionysios and Plutarch，no notice is found of Vitellia．The name is again mentioned by Livy in s．C． 393 ，when the city fell into the bands of the Aeqni，who surprised it by a night attack（Liv．v．29．）He there calls it＂Coloniam Romanam，＂and says it had been settled by them in the territory of the Aequi；but we have no previous account of this circumstance； nor is there any statement of its recovery by the Romans．A tradition preserved to us by Suetonius recorded that the Roman colony was at one time entrusted to the sole clarge of the family of the Vitellii for its defence（Suet．Vitell．1）；but there can be little doubt that this is a mere family legend．All trace of Vitellia，as well as Tolerium and other tewns in the same neighbourhood，dis－ appears after the Gaulish invasion，and the only subsequent mention of the name occurs in the list given by Pliny（iii．5．s．9）of the ciries of Latiom which were in his time utterly extinct．The site is wholly uncertain，though it seems probable that it may be placed in the same part of Latium as Tolerium，Bola，Labieum，and otber towns on the frontiers of the Aequian territory．It has been placed by Gell at Valmontone，a place which in all probability occupies an ancient site，and this would do very well for Vitellia，but that it is equally suitable for Tolerium，which must be placed some－ where in the same neighbourhood，and is accord－ ingly fised by Nibby at l＇almonfone［Tolericm．］ The latter writer would transfor Vitellia to Civitella （called also Cavitella d＇Otevano），situated in the monntains between Olevano and Subiaco；but this seems decidedly too far distant from the other cities with which Vitellia is connected．It would be munch more plausible to place Vitellia at l＇almontone and Tolerium at Lugnano，about 3 miles NW．of it， but that Lugnano again would suit very well for the site of Bola，which we are at a loss to fix elsewhere［BoLA］．The fact is that the deter－ mination of the position of these cities，which dis－ appeared in sach early times，and of which no re－ cord is preserved by inscriptions or other ancient mono－
voL，II．

COIN OF CLIA．
Microsoft ©

ULIARUS INsula (Eth. Olarionensis, Sidonius Apullinaris), is placed by Pliny in the Aquitanicas Sious (iv. 19). It is the Ile d'Oléron, which belongs to the department of Charente Inférieure, and is separated from the mainlani by a narrow strait.
[G. L.]
 iv. 3. § 37), the Ulisubritamin of Pliny ( F .4 4. s. 4), a town of Byzacium in Africa Proper, S. of 11adrumetum.
[T. H. D.]
ULLA (called by Ptolemy Oita, ii. 6. § 2), a river on the W. coast of Hispania Tarraconensis, which enters the sea between the Minius and the promontory of Nerium. (Mela, iii. 1.) It is still called Clla.
[T. II. D.]
ULMANETES. [Nilvanectes.]
ULA11 or ULAUSS, a plare frequently mentioned in the ltineraries as situated in the interior of lower Pannonia on the road leading from Siccia to Cibalae and Sirmiam (It. Ant. pp. 131, 232, 261, 267 ; It. Nieros. p. 563 ; Tab. Peut.); but its exact site is uncertain.
[L. S.]
ULAIUS, a place in Upper Moesia, between Naissus and Remesiana. (Itin. Hieros. p. 566.) According to Lapie near Ponelitz.
[T. H. D.]
 called also Ulpiana (OU̇入л(avá, 1lierocl. p. 656). a town of Upper Moesia on the sonthern declivity of Mt. Scomius. It was enlarged and alorned by Justinian, whence it obtained the name of Justimiana Seeunda, (1'rocop, de Aed. iv. 1, Goth. iv. 25.) It is commoniy identified with the present Giustendil; but Leake (Jorthern Greece, iii. p. 475) takes that town to represent the ancient Pantalia or Pautalia in Turace.
2. A place in Dacia, apparently in the neichbourhood of Klausenburg. (Ptol. iii. 8. § 7.) [T. H. D.]

ULTERIOR PORTUS: [ITLS Portus.]
ULUBRAE (Eth. Ulubrensis), a small town of Latium on the borders of the Pontine Marshes. It is not mentioned in history previous to the establishment of the Roman dominion, but is nuticed repeatedly by Latin writers of the best period, though almays as a poor and decayed town, a condition which appears to have resulted from its marshy and unhealthy position. Hence Cicero jestingly terms its eitizens little frogs (ranunculi, Ep. al Fam, vii. 18), and both Horace and Juvenal select it as an almost proverbial example of a deserted and melancholy place. (Hor. Ep. i. 11. 30 ; Juv. x. 101.) Still it appears from the expressions of the latter, that it still retained the rank of a municipal town, and had its own local magistrates ; and in accordance with this, we find the Ulabrenses enumerated by Pliny among the municipa! towns of the First Region. (Plin. iii. 5. s. 9.) The same thing is attested by inscriptions (Orell. Inscr. 123-123), and the discovery of these at the place nuw called Cisterna, about eight miles from Velletri, and 35 from Rome, immediately at the entrame of the l'ontine Jarshes, leaves no dombt that Ulubrae was sitnated somewhere in that neighbourhoud. But the village of (isterm (called in the mihlio ages Cisterna Neronis), does not appear th oscupy an ameient site, and the exact position of Uiutrae is still undetermined. (Nibly, Dinturni di Romat, vol. i. p. 463.) [E.II.B.]

CMBENNUM, in Gallin Narbanensis, is placed in the Jerusalem Itin. between Batiana [B.atinsa] and Vakentin (Valence).
[(i. L..]
UWBKRAE, one of many tribes placel by l'liny near the mouth of the Indus, adjoinug, perhays
within, the larger district of Pattalene (vi. 20. s. 23).
[V.]
CMIBRANICE, a people of Gallia Narbonensis, who had the Jus Latii. (Plin. iii. 4.) There is no further notice of these people who had this political privilege, except the occurrence of the name Umbranica or Umbranicia in the Table. [G. L.]
 Gpıkás), was one of the principal divisions of Central Italy, sitnated to the E. of Etrurin, and extending from the valley of the Tiber to the shores of the Adriatic. The name was, however, at different periods applied within very different limits. Umbria, properly so called, may be considered as extending only from the Tiber, which formed its W. limit throngh the greater part of its course, and separated Umbria from Etruria, to the great central range of the A pennines from the sonrees of the Tiber in the N. to the Bonti della Sibilla in the S. But on the other side of this range, sloping down to the Adriatic, was an extensive and fertile district extending from the frontiers of Piceanm to the neighbourhood of Arimirum, which had probably been at one time also occupied by the Umbrians, but, before it appears in Roman history, had been conquered by the Gunlish tribe of the Senones. Hence, after the expulsion of these invaders, it became known to the limans as "Gallicus acer," and is always so termed by historians in reference to the earlier period of Roman history. (1ir. xxili. 14, xxxix. 44: Cic. Brut. 14, \&..) On the division of Italy into regions by Augustus, this district was again united with Umbria, both being included in the Sixtls Region. (Plin. iii. 14. s. 19.) But even Pliny, in deseribing this union, distinguishes the "ager Gallieus" from Umbria Proper ("Jungitur bis sexta regio Cmbriam complexa agrumque Gallicum cirea Ariminum," 7 b.): it is evident therefore that the name of Umbria did not at that time in common usage include the territory on the shores of the Adriatic. In like manner Ptolemy designates the coast from Ancona to Arimimum (termed by Pliny the "Galliea ora") as "the land of the Senones " (1'tol. iii. 1. § 22), a term which had certainly become inappropriate long before his time, It was according to Pliny (l.c.) this portion of the Gaulish territory which was properly designated as Gallia Togata, a name afterwards extended and applied to the whole of Cisalpine Gaul. (Hirt. B. G. viii. 24; Cic. Phil. viii. 9, \&ce.) It was not, therefore, till in late period that the oume of Umbria came into general use as including the whole of the Sisth Region of Augustus, or the land from the Tiber to the Adriatic.

Umbria, in this more extended sense of the name, was bounded on the W. ly the Tiber, from a point near its source to a little below Ucriculum, which was the most southern city included within the province. Thence the E. frontier ascended the ralley of the Nar, which separated Umbria from the land of the Sabines, almost to the sources of that river in the great central chain of the Apennines. Thence it followed a line vearly parallel with the nain ridge of those mountains, but snmewhat farther to the E. (as Camerinum, Matilica, and other towns situated on the E. slopes of the Apeonines were inciuded in Ünbria), as fir as the sources of the Aesis (Esino), and then descended that river to its mouth. We know that on the coast the Aesis was the recognisod boundary between Limbria and Picenum on the S., as the little river Rubicon wis between Umbria and Gallia Cisalpina on the $\mathbf{N}$.

From the month of the latter stream the frontier must have followed an irregular line extending to the central range of the Apennines, so as to inclade the upper valleys of the Sapis and Bedesis; thence it rejoined the line already traced fron the sources of the Tiber.

All ancient authors agree in representing the Umbrians as the most ancient people of Italy (Plin. iii. 14. s. 19; Flor. i. 17; Dionys. i. 19), and the traditions generally received described them as originally spread over a much more extensive region than that which ultimately retained their name, and occupying the whole tract from sea to sta, including the territories subsequently wrested from them by the Etruscans. That people, indeed, was represented as gaining possession of its new settlements step by step, and as laving taken not less than 300 towns from the Umbrians. (Plin. l.c.) This number is doobtless fabulous, but there seems to be good reason for regarding the fact of the conquest as historical. Herodotus, in relating the Lydian tradition concerning the emigration of the Tyrrhenians, represents the land as ocoupied, at the time of their arrival, by the Umbrians. (Herod. i. 94.) The traditions reported by Dionysius concerning the settlements of the Pelasgians in Italy, all print to the same result, and represent the Umbrians as extending at one period to the neighbourhond of Spina on the Adriatic, and to the months of the Padus. (Dionys. i. 16-20.) In accordance with this we learn incidentally from Pliny that Butrium, a town not far from Ravenna, was of Umbrian orgin. (Plin. iii. 15. s. 20.) The name of the river Umbro (Ombrone), on the coast of Etruria, was also in all probability a relic of their dominion in that part of ltaly. On the whole we may fairly assume as a historical fact, the existence of the Umbrims at a very early period as a great and puwerful uation in the northern lalf of Central Italy, whose dominion extended from sea to sea, and comprised the fertile districts on both sides of the Apennines, as well as the monntains themselves. According to Zenodotus of Truezen (ap. Dionys. ii. 49), the powerful race of the Sabines itself was only a branch or offshoot of the Umbrians ; and this statement is to a great extent confirmed by the result of recent philological researches. [Samini.]

If the Umbrians are thus to be regarded as one of the most ancient of the races established in Italy, the question as to their ethnological affinities becomes of peculiar interest and importance. Unfortunately it is one which we can answer but very imperfectly. The ancient authorities upon this point are of little value. Most writers, indeed, content themselves with stating that they were the most uncient people of ltaly, and apparently consider them as Aborigines. This was distinctly stated by Zenodotus of Troezen, who had written a special history of the Umbrian people (Dionys. ii. 49); and the same idea was probably conveyed by the fanciful Greek etymology that they were called Ombricans or Ombrians, because they had survived the deluge caused by floods of rain ( $6 \mu 6 \rho o i ;$ Plin. iii. 14. s. 19). Sune writers, however, of whom the earliest seems to have been one Bocchus, frequently quoted by So linus, represented the Umbriaus as of Gaulish origin (Solin. 2. § 11 ; Serv. ad Aen. sii. 753; lsidor. Orig.ix.2); and the same view has been maintained by several modern writers, as the result of phizological inquiries. Researches of this latter kind bave indeed of late years thrown much light upon the affinities of the Umbrian languige, of which we
possess an important monument in the celebrated tables of Iguxium. [Iguvium.] They have clearly establisbed, on the one hand its distinctoess from the language of the neighbouring Eiruscaas, on the other its close affinity with the Oscan, as spoken by the Sabeilian tribes, and with the old Latin, so that the three may fairly be considered as only dialects of one and the same funily of languages. [Italaa, p. 86.] The same researches tend to prove that the Umbrian is the most ancient of these cogmate dialects, thus confirming the assertions of ancient writers concerning the great antiquity of the nation. But, while they prove beyond a doubt that the Umbrian, as well as the nearly related Oscan and Latin, was a branch of the great Indo-Tentonic family, they show also that the three formed to a great extent a distinet branch of that family or an independent group of languages, which cannot with propriety be assigned to the Celtic gronp, any more than to the Teutonic or Slavonic.

The history of the Umbrians is very imperfectly known to ns. The traditions of their power and greatness all point to a very early*period; and it is certain that atter the occupation of Etruria as well as of the plains of the Padus by the Etruscans, the Umbrians sbruuk up into a comparatively obscure monntain people. Their own descendants the Sibines also oceupied the fertile districts abont Reate and the valley of the Velinus, which, according to the traditions reported by Dionysius, had originally been held by the Umbrians, but had been wrested from them by the Pelasgians (Dionys. ii. 49.) At a much later period, but still before the name of the Umbrians appears in Euman history, they had been expelled by the Semonian Gauls from the region on the shores of the Adriatic. Livy indeed represents them as having previously held also a part of the territory which was subsequently oceupied by the Buians, and from which they were driven by the invasion of that people (Liv. v. 35).

It whs not till the liomans had carried their arms beyond the immediate neighbourhood of the city, and penetrated beyond the barrier of the Ciminian forest, that they came into contact with the Umbrians. Their first relations were of a friendly nature. The consul Fabins having sent secret envoys through the land of the neighbouring Etruscans into Umbria, received from the tribe of the Camertes promises of support and assistance if he should reach their country. (Liv. ix. 36.) But the Umbrian people seem to have been divided into different tribes, which owned no common govermment and took different lines of policy. Some of these tribes made common canse with the Etrnscans and slared in their defeat by Fabius. (Ib.37.) This disaster was followed by two other defeats, which were sastained by the Utmbrians alone, and the second of these, in which their combined forces were overthrown by the consul Fabins near Mevania (b. c. 308), appears to have been a decisive blow. It was followed, we are told, by the submission of all the Umbrian tribes, of whom the people of Ocricnlum were received into the Roman alliance on peculiarly favourable terms. (Liv, ix. 39, 41.)

From this time we hear no more of liostilities with the Umbrians, with the exception of an expedition against a mere marauding tribe of mountaineers (Liv. x. 1), till в. c. 296, when the Samite leader Gellius Ernatius succeeded in urganising a general confeleraty agailust Rome, in which the Umbitians and Suquian Gauls took part, as well as the Etrus-
cans and Samnites. (Liv, x. 21.) Their combined furces were, however, overthrown in the great battle of Sentinum (Ib. 26, 27; Polyb. ii. 19); and this is the last time that the Umbrians, as a people, appear in arms against the Roman porer. We are indeed told in the epitome of Livy that the Umbrians were again defeated, and reduced to submission at the same time as the Sullentines, in B.c. 266 (Liv. Epit. xv.); bat therc seems no doubt that this refers only to the outlying tribe er people of the Sursinates (on the N. of the Apennines, and adjoining the Boian (Gauls), as the Fasti, in recording the events of the year, tuention both consuls as triumphing enly "de Sarsinatibas" (Fast. Capit.) We have no account of the terms on which the Umbrians were received into sulmission, or of the mauner in which they passed, like their neigbbeurs the Etrnseans, into the condition of dependent allies of Rome : it is certain only that the different tribes and cities were, according to the usnal Roman policy, admitted on very different terms. Ocricalum, as already mentioned, enjoved special privileges ; and the same was the case with the Camertes, who, even in the days of Cicera, retained a pecaliarly favoured position, and had a treaty which secured them a nominal independence and equality. (Liv. xxviii. 45 ; Cic. pro Balb. 20.) The fertile district of the "Gallicos ager" was in great part occupied by Roman colonies, of which Sena Gallica was founded as early as B. c. 289, Ariminum in в. с. 268 , and Pisaurum in b.c. 183. But be-ides these, a considerable part of that teraitory was divided among Roman citizens, by a law of the tribune, C. Flaminius, in e. c. 232. (Cic. Brat. 14.) The ather Untrians continued in the pasition of dependent allies of Rome, and appear to have remained uniformly faithful to the powerful republic. Thus, in B. c. 282 , we are told that they were solicited by the envoys of the Tarentines (Dion Cass. Fr. 144), bnt apparently withont effect : nor does it appear that their constancy was for a mument sbaken by the successes of Hannibal: and before the clase of the Second Punic War we find then coming forward with the offer of volunteers for the army of Scipio. (Liv, xxviii. 45.) In the Social War they are said to have for a time broken out into revolt, and were defeated in a battle by the legate C. Plotins ; bnt it is probable that the defection was a very partial one, and the Ronans wisely secured the fidelity of the Umbrians as well as of the Etrnscans by bestowing on them the Ruman franchise, B. c. 90. (Liv. Epit. Ixxiv.: Oros. v. 18: Applan, B. C. i. 49.)

Frum this time the name of the Umbrians as a nation disappears from history, thongh it continued, as alrealy mentioned, to be well known as one of the territorial divisions of laly. (Tac. Hist. iii. 41, 42: Jul. Capit. Gordiani, 4: Sc.) In the early ages of the empire it was still one of the districts which supplied the most numerons recruits to the praetorian colorts. (Tae. Ann. iv. 5.) As leng as the division of Italy inte regions subsisted, the name of Uinbria continuel to be applied to the sixth region: but from an eariy periox, certainly long before the time of Constamtine, it was united for administrative purpases with Eiruria, and its name seems to lave become gralually merged in that of the more important province. Thus Servins tells us that I'ubria was a part of Tuscia (nerr. atl Aen. xii. 753), and the Liber Coloniarum includes the ancient Umbrian cities of Hisppelnm, Tuder, Ameria, \&c, annoug thi "Civitates Tusciax." (Lib. Colon. p. 224.) On the other hand, the district $E$. of thie

Apennines, the ancient Ager Gallicns, was now again separated from Umbria, and became known by the name of Picenum Annonarium. (Memmsen, de Li3. Col. p. 211.)
Of the Umbrians as a nation during their perind of independence we know almost nothing. We learn anly that they enjoved the reputation of brave and harily warriors; and the slight resistance that they opposed to the Roman arms was probably owing io their watit of pelitical organisation. So far as we learn, they appear to have been divided into sereral tribes or "populi." such as the Camertes. Sarsinates, \&c., each of which filliowed its own line of poliey without any reference to a commen autherity. No trace is fonnd in bistory of the existence among them of any national league or council such as existed among the Etrnscans and Latins; and even where the Umbrians are spoken of in zeneral terms, it is ofteu doubtful whetber the whole nation is really meant,

The plysical characters of Umbria are almost whally determined by the chain of the Apernines, which, as already described, enters the province near the sonrces of the Tiber, and extends thence without interruption to the lufty group of the Monti della Sizilla (the ancient Mons Fiscellus) at the sources of the Nar, and on the confines of Picennm and the land of the Sabines. The Apennines de mat rise in this part of the chain to so great an elesation as they attain farther south, lut their principal summits within the U'mbrian territory range from 4000 to 5500 feet in beight; while their numerons ramifications fill up a space rarging from 30 to 50 miles in breadth. A very large portion of Umbria is therefore a mountain conntry (whence it is termed "montana Umhria" by Martial. iv. 10), though less ragged and difficult of access than the central regions of laly farther to the S . On the W . the mountain district terminates abruptly on the edge of a broad valley or plain which extends from near Spoleto to the neigbbourhend of Perugia, and is thence continued up the valley of the Tiber as far as Cittu di Castello. But heyond this plain rises another gronp of hills, connected with the main clain of the Apennines by a ridge which separates Spoleto from Terni, and which spreads ont throuch almost the whole extent of country from the valley of the Nar to that of the Tiber. It is on the outlying hills or underfalls of this range that the ancient Cimbrian cities of Tuder and Ameria were placed. The braad valley between this group and the maio mass of the central Apennines is a fertile and delightful district, and was renosrned in ancient times for the richness and lnxuriance of its pastures, which were watered by the streams of the Tinia and Clitomnus. Here we find within a short distance of one anather the towns of Treba, Hispellum, Mevania, and Assisinm. This district may accordingly be looked on as the heart of Umbria properly so called.

On the E. of the central chain the Apeonines descend more gradually to the sea by successive stages, throwing off like arms long ranges of monntains, siuking into hills as they approach the Adriatic. The valleys between them are furrowed by numerous streams, which pursue nearly parallel courses from SW, to NE. The most considerable of these are the Akess (Esino), which formed the established limit between Uimbria and Picenom: the Sexa, which flowed under the walls of Sena Galliea (Sinigaglia): the far more celebrated Mexackers, which entered the sea at Fanum Fortunae (Fano); the Pisacrus, which gave name to the city of Pi-
saurum (Pesaro); the Crustumies, now called the Conca; and the Armmnus (Marecchia), which gave its name to the celebrated city of Ariminum, and seems to have been regarded by Pliny as the northern bonndary of Umbria, though that limit was certainly marked at an earlier period by the farfamed though triffing stream of the Rubicos. The river Sarts also flowed throngh the Umbrian territory in the upper part of its course, and gave narne to the Sapinia Tribus, mentioned by Livy as one of the divisions of the Umbrian nation.

All the waters which descend on the W. of the Umbrian Apennines discharge themselves into the Tiber. None of them are considerable streams, and the Tinia and Cutumics are the only two the ancient uames of which have been preserved to us. The Nar, a much more important river, the sources of which are in the Sabine territory, seems to have formed the boundary between Umbria and the land of the Sabides, through a cansiderable part of its course; but it entered the Uinbrian territory near Interamna ( Terni), and traversed it thence to its junction with the Tiber.

Two principal passes crossed the main chain of the Apennines within the limits of Umbria, and served to maintain the communication between the two portions of that conntry. The one of these was followed by the main line of the Flaminian Way, which proceeded almost due N. from Forum Flaminï, where it quitted the valley of the Clitumans, and passed by Nuceria, Tadinum, and Helvillum, to the crest of the mountain chain, which it crossed between the last place and Cales (Cagli), and desceoded by the narrow ravine of the Furlo (Intercisa) into the valley of the Metaurus, which it then followed to the Adriatic at Fano (Fanum Fortunae). This celebrated road continued throngbout the period of the Roman Empire to be the main line of communication, not only from the plains of Umbria to the Adriatic, but from Rome itself to Arininum and Clsalpine Ganl. Its military importance is sufficiently apparent in the civil war between Vitellius and Vespasiad. (Tac. Hist. i. 86, iii. 50, 52, \&cc.) Another line of road given in the Antonine ltinerary, quitted this main line at Nuceria, and, turning abruptly to the E., crossed a mountain pass to Prolaqueun (Pioraco), in the valley of the Potenza, and descended that valley to Septempeda in Picenum (S. Severino), and thence to Ancona. This pass bas been in modern times wholly abandoned. The present road from Rome to Ancona turns to the E. from Foligno (Fulginium) and crosses the mountain ridge between that place and Camerino, descending to Tolentino in the valley of the Chienti (Flusur).

The towns of Umbria were numerous, though few of them were of any great importance. 1. On the W. of the Apenaines, and beginning with those nearest to Rome, were: Ocriculum, near the left bank of the Tiber; Nammia and Lnteramina, on the banks of the Nar; Aberia and Carsulae, a ferv miles to the N. of Narnia; Tuder, on a hill oo the left bank of the Tiber; Spoletium, in the hills which separate the valley of the Maroggia from that of the Nar; Trebi, Mevaiia, Hispellua, Fulginium, and Assisium, all situated io or bordering on the broad valley above mentioned; Arna and Tifernum Tiberinum in the upper valley of the Tiber, and lauvies in the mountains at a short distance from it. Vestonica was prubably situated at Civitellat di Benezrone, also in the valley of the Tiber. On the Flaminian Way, exactly at the entrance of $\mathrm{tb}_{\mathrm{e}}$
mountains, stood Fordm Flaminif, and higher up, on the same line of road, Nuceria, Tadisum, and Helvillem.
2. On the E. of the central ridge of the Apennines, but still high upamong the mountains, were situated Camerincm, near the sources of the Flusor; Prolaqueum ( Pioraco), near those of the Potentia; Pitulem (Piolo), in the same valley; Matilica and Axtidium, both in the upper valley of the Aesis; Sextinum, in a lateral branch of the same valley; Tuficum and Suasa, both of them in the ralley of the Cesano; C.alles (Cagli), on the Flaminian Way; Tifernum Metauhexse and Ubbinum Metaurense, both of them in the apper valley of the Metaurus ; Forem Semprosil (Fossombrone), lower down in the same valley; Urisnum Hortexse ( Urbino), between the valleys of the Dletaurns and the Pisaurus; Sestivija (Sestino), near the sources of the latter river: Pitinvm PIsacrenser, probably at Piagnino in the same valley; Sarsina, in the upper valley of the Sapis ; and Mevaniola, which is fixed by Cluverins, on the faith of inscriptions discovered there, at Galeata, in the upper valley of the Bedesis or Ronco (Cluver. Ital. p. 623), and is therefore the most northerly town that was iacluded in Umbria.
3. Along the coast of the Adriatic were the important towns of Sexa Gallica, Fancu Fortuxae, Pisaurus, and Ariminum. To the above must be added Aesis or Aesium (Jesi), on the left bank of the river of the same name, and Ostra, the ruins of which are said to exist between the rivers Cesano and Nigolo. (Abeken, Mittel-1talien. p. 41.)

In addition to the above long list of towns, the position of which can be assigned with tolerable certainty, the following obscure names are enumerated by Pliny ameng the towns or communities of Umbria still existing in his time : the Casueatillani, Dolates surnamed Salentini, Forojulienses snrnamed Concubienses, Forubrentaai, Pelestini, Vindiaates, and Tiventani. The above towas being totally unknown, the correct form and orthography of the names is for the most part uncertain. The same is the ease with several otbers which the same writer enumerates as having in his day ceased to exist. (Plin. iii. 14. s. 19.) Strabo also mentions a place called Larolum as being situated on the Flaminian Way, in the neighboarhood of Narnia and Ocriculum (v. p. 227), which is otherwise wholly noknown, and the name is probably corrupt.

Of the natural productions of Uinbria the most celebrated were its cattle, especially those of the valley of the Clitumnus [Clitumnus] ; but its mountain tracts afforded also pasturage to flocks of sheep, whicb were driven southwards as far as Metapontum and Heraclea. (Varr. R.R. ii. 9. § 6.) The lower portions of the country abounded in fruit-trees, vines, and olives; but when Propertius terms his native Umbria "terris fertilis uberibus," this can be understood only of the tracts on the W. of the Apennines, of which be is there speaking (Propert. i. 22. 9), not of the more extensive monntain regions.

The name of Umbria is still giren to one of the provinces of the Papal States, of which Spoleto is the capital ; but this is merely an official designation, the name having been wholly lost in the middie ages, and being no longer in use as a popnlar appellation.
[E. H. B.]
UMBRO (Ombrone), a river of Etruria, and nest to the Arnus the most considerahle in that country. It rises in the bills between Siena and Arezzo, and
hats a conarse of above 50 nilies in a SSW. direction till it flows into the Tyrrhentan sea, about 16 miles N. of the promontory of Monte Argentaro. Pliny terms it a navigable river (" navigiorum capax"), and Rntilius describes it as forming at its mouth a trangul and secure port. (Plin.iii. 5. s. 8 ; Rutil. Itin. i. 337 -340.) It flows near the modern city of Cirosseto, and within a tew miles of the ruins of Fusellae. The name of l'mbro is considered to be connected with the Umbrians, who held this part of Italy previous to its conquest by the Etruscans : and according to [ling, the const district extending from its mouth to Telamon, was still known as the " tractus Umliriae." (Plin. l. c.) [E. H. B.]

UNELLI or VENELI (O $\dot{v} \in \nu \in \lambda o t$ ), one of the Armoric or maritime states of Gallia. (B. G. ii. 34, iii. 11.) Caesar mentions them with the Veneti, Osismi, Curiosolitae, and other maritime states. The Unelli and the rest submitted to P. Crassus in b.c. 57 ; but in B.C. 56 it was nece-sary tu send a force acain into the country of the Enelli, Curiosolitae, and Lexovii. Q. Titurius Sabinus had the command of the three legions who were to keep the Unelli and their neiuhbours quiet. The commander of the Unelli was Viridoris, and he was also at the lhead of all the forces of the states which had joined the Uoelli, among whom were the Aulerci Eburorices and the Lexovii. The force of Viridovix was very large, and he was joined by desperate men from all parts of Gallia, robbers and those who were too iulle to till the ground. The Roman general entrencbed himself in his camp, and made the Galli believe that he was afraid and was intending to slip away by night. The trick deceived the Galli, and they attacked the Roman camp, which was well placed on an eminence with a sloping ascent to it aburut a mile in length. On the Gaili reaching the Roman camp exhausted by a rapid march op the hill and encumbered with the fiscenes which they carried for filling up the ditch, the Rumans sallied out by two gates aod purished the enemy well fur their temerity. They slaugbtered an immense number of the Galli, and the cavalry pursuing the remainder let ferr escape. This clever feat of arms is told clearly in the Commentaries.

The liuelli sent a contiugent of 6000 men to attack Caesar at the siege of Alesia. (B. G. vii. 75.)

Itolemy (ii. 8. § 2) mames Crociatonum the expital of the Veneli. [Croxtatosiss.] The prople oceupied the peninsula of Cotantin or Cotentin, which is now comprehended in the department of L. a Manche, except a small part which is included in the department of Culvadus.
[G. L.]
UN N NG Gl , according to a reading in Tacitus (Ann. i. 70), a river in the north-west of Gernany; but the correct readiog in that passuge in ad A misiam, as Ritter has shown in his note upon it, Unsimgin being only a conjecture of Altmg mannfactured out of the molern name of a river called Unse or IIunse.

YOBABNA [Bmawa].
VOCANUS AGER, a district in Africa I'ropria, between Carthage and Thapsus. (Liv, xxxiii. 48.)
[J. R.]
SOCARIUM or VACORILAI (Ovacóptov), a place in Norionm, on the great road leading from Augusta Vindelicorum to Aemona. (I'tol. ii. 14. § 3 ; Tab. Peut.) Its exact site is matter of conjecture onily.

VOCATES [VAsates.]
VOCE'TIUS MONS. This name occurs in

Tacitos (IIist i. 68), and nowhere else. The history shows that Tacitus is speaking of the country of the Helvetii. The Vocetins is conjectnred to be that part of the Jura which is named Boetzberg. The read from Bitle runs through the Frickthal over the Bötzberg to Buden and Zürich. The Ilelvetii fled from Caecina (A. D. 70) into the Vocetius, where many were caught and massacred. Aventicum, the chief city (caput gentis), surrendered to Caecina. [Aventicunt.] It has buen proposed to write Vogesus fur Vocetius in the passage of Tacitus; but there is no reavon for the alteration,
[G. L.]
Voconll FordM. [Forunt Vocosir.]
VOCO'NTII (Oи̇ки́vтiot), a people of Gallia Narbonensis, between the Rhome and the Alps. The only city whicls Itolemy (ii. 10. § 17) assigns to them is Vasio [Visio]. On the north they bordered on the Aliotroges, as we learn from Caesar's march (B. G. i. 10). Strabo places the Cavares west of the Vocontii, but he has not fixed the position of the Cavares well [Cavares]. The position of the Vocontii, and the extent of their country, are hest shown by looking at the position of Vasio, which was in the south part of their territory, and of Dea [DFA], which is in the north part, and Lucus Augusti, which lies between them [Luces Augusti].

In the Notitia of the Gallic Provinces we find both Civitas Deentiun and Civitas Vasiensiom or Vasionensium.

The Vocontii were between the Isere and tho Durance, their southern limit being probably a little sonth of Vaison. D'Anville supposes that tho Vocontii uccupied the dioceses of Vaism and Lhe, and also a part of the country comprised in the diocese of Gap [Vapincum], and a part of the diacese of Sisteron, which borders on Vaison. Pliny (iii. 4) calls the Vocontii a "Civitas foederata," a picople who bad a "foedus" with Rome; and besides the chief places, Visio and Lucus Augusti, he says they have nideteen small towns. Pliny (in. 58) mentions that be had been in the country of the Vocontii, where he saw an aerolita which had lately fallen ("delatum" should perhaps be "delapsum"). The Vocontii occupied the eastern purt of thie department of Drôme, which is a momntainous country, being filled with the lower offsets of the Alps, and containing numerous valleys drained by mountain streams. Part of the country is fitted for pasture. Silius Ital. (iii. 466) has:-
" Tum faciles campos, jam ruma Vocontia carpit;"
for he makes Hannibal pass through the Vocontii to the Alps, as Livy (xxi. 31) does, [G. L.]

VODGORIACUII, in Gallia, is the first place in the Itins. on the road from Bagatum (Barai) to Adnatuca (Tongern). This remarkable Lomao road is calfed the Chaussee de Brunchaut, or the Haut Chemin. The distance of Vodgoriacum from Bugacum is xii., and the place is supposed to be Voudrei or I'audre. (D'Auville, Aotice, yc.) [G.L.] VOGESL'S. [Vosegus.]
VOLANA. [SAminicm]
VOLANDUM, a castle in Armenia Major, lying a day's journey W. of Artaxata. (Tac. Ann. xiii. 39.)
[T. H. D.]
VOLATERRAE (Oúo入atéppar: Eth. Volaterranus: lolterra), one of the must iuportant aod powerful of all the Etruscan cities. It was situated on a lofty bril, rising abuve the valley of the Cecina, abont 5 mites N. of that river and 15 from the sea. Strabo has well described its remark-
able situation on the summit of a hill, which required a steep ascent of 15 stadia from whatever side it was approached, while the summit itself presented a level surface of considerable extent, bounded on all sides by precipices, and crowned by the walls of the ancient city. (Strab, v. p. 223.) The hill on which it stands is, according to modern measurements, more than 1700 English feet in height above the sea, and completely nverlooks all the surrounding heights, so that the position of the city is extremely commanding. It is indeed the most striking instance of the kind of position which the Etruseans seem to have generally preferred for their cities.

There can be no doubt of the great antiqnity of Volaterrae, nor that it was, from the earliest perood of Etruscan history with which we have any acquaintance, one of the twelve principal cities of the Etruscan confederation: this conclusion, to which we should be irresistibly led by the still existing proofs of its ancient greatness, is confirmed by the earliest notice of it that we find in history, where it appears as one of the five Etruscan cities which furnished support to the Latius in their war with Tarquinius Priseus. (Dionys. iii. 51.) Bnt from this time we find no subsequent mention of Volaterrae in history till a much later period. Its remoteness from Rome will indeed sufficiently account for the fact that its name never figures in the long protracted wars of the Romans with the snuthern Etruscans ; but even after the Roman arms had been carried into the heart of Etruria, and the cities of Jerusia and Arretium tonk active part in the wars, we find no mention of Velaterrae. In b c. 298. however, we are told that the Roman consul L. Scipio was encountered near Volaterrae by the combined forces of the Etruscans (Liv. x. 12), among which there is little doubt that those of the Volaterrans themselves were included, thongh this is not expressly stated. But we do not acain find their name noticed in the extant acconnts of these wars, and the terms on which they were fina!ly reduced to submission by the Romans are unknown to ns. We learn only that in common with most of the Etruscans they were received on the footing of dependent allies, and they appear among the "socii" who in the Second Punic War came forward to furnish supplies for the fleet of Scipio, B. C. 205. On that occasion the Volaterrans provided materials for shiphuilding as well as emrn. (Liv, xxviii. 45.) From this time we hear no more of Volaterrae till the civil wars between Marius and Sulla, when the city espoused the cause of the former, and from its great natural strength became the last stronghold of the Marian party in Etruria, and indeed in Italy. It was besieged by Sulla himself long after every other city in Italy had submitted, and did not snrrender till after a siege or rather blockade of two years' duration. (Strab, v. p. 223; Liv. Epit. Ixxxix.; Cic. pro Rosc. Amer. 7, pro Caec. 7.) As a punishment for its obstinacy, its territory was contiscated by the conqueror; but it appears that it was never actually divided, and the citizens who had survived the calanities of the war remained in possession of their lands, as well as of the rights of Roman citizens, which had been doubtless conferred upon them in commou with the other Etruscans by the Lex Julia in B. c. 89. (Cic. pro Dom. 30, ad Fam. xiii. 4, 5, ad Att. i. 19.) It appears that another attempt was made to dispnssess them by an agrarian law in the consulship of Cicero, but this calamity was averted from them by the efforts of the great
orator, to whom the citizens in consequence became warmly attached (ld. ad Fam. xiii. 4), and it appears probable that Caesar subsequently confirmed them in the passession both of their lands and manicipal privileges. (Ib.)

Volaterrae, however, certainly received a colony under the Triumvirate (Lib. Col. p. 214), but dues not appear to have retained the title of a Colonia: it is expressly included by Pliny among the mnnicipal towns of Etraria. (Plin, iii. 5. s. 8; Ptol. iii. 1. § 48.) We find no mention of the name in history under the Roman Empire; but it is certain that the city continued to exist ; and it appears again, after the fall of the Western Empire, as a place of impartance durine the wars of the Goths with Narses (Agath. B. G. i. 11). It continued to subsist throughout the middle ages, and still retains the title of a city and its episcopal see; though it has little more than 4000 inhabitants, and occupies only a small portion of the area of the ancient city. The latter is clearly marked out, having comprised the whole level surface of the hill, a very irregular space, above a mile and a half in length and more than 1000 yards in its greatest breadth: the whole circuit of the ancient walls is above three miles and a quarter. Very large portions of these walls are still visible, and these massive fortifications are incontestably the finest specimens of the kind now existing in Etruria: they resemble in their general style of construction those of Faesulae and Cortona, but are composed of a different material, a soft, arenaceons limestobe, which composes the whole summit of the hill on which Volterra stands. This stone, howerer, like the mocigno of Fresole and Cortona, lends itself readily to the horizontal structure, and is wholly distinct from the hard Apennine limestone of which the polygonal walls of Cusa and other cities are composed. These walls may be traced, at intervals, all round the brow of the hill, following the broken and irregular outlines of its summit, and frequently taking advantage of projecting points to form bold salient ancles and outworks. Two of the ancient gates are still preserved ; of which the one called the Porta all' Arco still serves as the principal entrance to the city. It is of very massive construction, bot regnlarly built, and surmounted liy an arch of yerfectly regular form and structure, adorned with three sculptured heads, projecting in relicf from the keystone and two of the principal voussoirs. The antiquity of this arch has been a snbject of much dispute among antiquarians; some maintaining it to be a specimen of genuine Etrusean architecture, others ascribing it to the Roman period. The arguments in favour of the latter view seem on the whole to preponderate; though there is no reason to doubt that the Etrascans were acquainted with the true principles of the construction of the arch. (Dennis's Etruria, vol. ii. pp. 146-150; Micali, Antichi Popoli Italiani, vol. ifi. Pp. 4, 5.*) The other gate, on the N. side of the Etruscan walls, now known as the Porta di Diana or Portone, is of similar plan and construction to the Porta all Arco; but the arch is wanting.

No other remains of ancient edifices ale now extant on the site of Volaterrae, except some portions of Thermae, of Roman date and little interest ; but the sepulchres which have heen excavated on all sides of the city, but particulally on the N. slope of the bill, bave yielded a rich harvest of Etruscan antiqui-

* The gate itself is figured by Micali, pl. 7,8; and by Abeken, Mittel-Italien, pl. 2, fig. 4.
and by Abeken, Mittel-Italien, pl. 2, nig. 4.
ties, Among these the most conspicaons are the sepulchral urns, or rather chests, for ashes, re:embling small sarcophagi, and generally formed of alabaster, a material which is quarried in the immediate neighbourhoud. Many of them are adorned with seulptures and bas-reliefs, some of them purely Etruscan in character, others taken from the Greck mythology, and there is no doubt that many of them belong to a period long after the fall of Etruscan independence. The inscriptions are for the must part merely sepulchral.and of little interest ; hut those of one family are remarkable as preserving to us the original Etruscan form (Ceiena) of the well-known fanily of the Caecinae, who figure frequently in Roman history [C.aEcin.ı, Biogr. Dict.]. Indeed, the first of this family of whom we have any knowledge - the Aulus Caecina defended by Cicero in D.c. 69 - was himmelf a native of Volaterrae (Cic. pro Cace. 7). His son was the anthor of a work on the "Etruscan discipline," which is frequently referred to as a valuable source of information in regard to that department of antiquities (Cic. ad Fam. vi. 6 ; Plin, i. Arg. Lib. ii ; Senec. Nat. Quaest. ii. 39).
There is no doubt that Volaterrae in the days of its independence possessed an extensive territory. Straho distinctly tells us (v. p. 223) that its territory extended down to the sea-cnast, where the town of Vads, or as it was called for distinction's sake, Vada Voliterrina, constituted its sea-port. It was not indeed a harbour or port in the strict sense of the word; but a mere roadstead, where the shoals, from which it derived its name, afforded a good anchorage and some shelter to shipping. Hence it was, in the Foman times, a frequeuted station for vessels proceeding along the coast of Etruria (Cic. pro Quinct. 6: Plin. iii. 5. s 8; Jin. Marit. p. 501); and Rntilius, in particular, has left us an exact description of the locality (Rutil. Itin, i. 453-462). The site is still marked by a mediaeval tower on the cuast, called Tome di Vada.
The coins of Volaterrae are numerous, and belong to the class called Aes Grave, from their large size and weight; but they are distinguished from all other Etruscsa coins of this class by their having the name of the city in full; whence we learn that the Etruscan form of the name was Felathei, or Velathar, as on the one of which a figure is annesed.
[E. H. B.]

COIN OF VOI ATEMRAE.
YOLCAE, a people of South Gallia, divided into Volcae Arecomici and Volcae Tectosages (Ovö̀kau
 Oйஸ́лкає ’Арьки́ииккот, Nitrebo).
Ptotemy says that the Trectosages occupied the mont western parts of the Narbonensis, and that these are their cities: Mlliberis, Ruscino, Tolosa Colonia, Cessero, Carcaso, Bueterrse, and Narbo Colonia. Next to them and extending to the Whine he places the Arecomici, or Aricomii, as the nane is in I'toleny's text; and he asoigns, to the Arecomii
only Vindomagus [Visbomagcs] and Nemausus Colonia (Nismes). These two nations occupied all the Provincia from the Rhone to its western limits; and if Livy is not mistaken (xxi. 26), at the time of Ilannibal's invasion of Itnly, the Volcae lad also possestions east of the Rhoine.

The Cebenna (Cévennes) formed a natural boundary between the Volcae Arecomici and the Gabali and Ruteni. As to the limits between the Tectosages and the Arecomici there is great difliculty; for while Ptolemy assigns Narbo to the Tectosages, Strabo (iv. p. 203) says that Narbo is the port of the Arecomici; and it is clear that he supposed the Arecomici to have possessed the greater part of the Provincia. which is west of the Rhone, and that he limited the country of the Tectosages to the part which is in the basin of the Garamne. He makes the Tectosiges estend also northwards to the Cévennes, in the western prolongation of this range. The chiet city of the Arecumici was Nemansus [Nemausus]; and the chief city of the Tectosages was Tolosa; and if Narbo beionged to the Arecomici, we must limit the Tolosates, as already observed, to the basin of the Garonne. [Nabbo; Tolosa.]

There is some resemblance between the names Vulcae and Belgae, and there is some little evidence that the Volcae were once named Belcae or Belgae. But it would be a hasty conclusion from this rcsemblance to assume a relationship or identity between these Volcae and the Belgae of the north of Gallia. There was a tradition that some of the Voleae Tectosages had once settled in Germany about the Hercynia Silva; and Caesar (B.G. vi. 24) aftirns, but ooly from hearsay, that these Volcae in his time still maintained themselves in those parts of Germany, and that they had an honourable character and great military reputation. IIe adds that they lived like the other Germans. The Tectosages also were a part of the Gallic invaders who entered Macedonia and Greece, and finally fixed themselves in Asia Minor in Galatia [Galatia]. With the Roman conquest of Tolosa ended the fame of the Volcae Tectosages in Enrope. [G. L.]

VOLCARUM STAGNA. [Stagna Volcanews.]

VOLCEIUM or VOLCENTUM (Eth. Volcentanns, Plu.; Volcelanns, Inscr.: Buccino), a municipal town of Lucania, situated in the mountaios W. of Potentia, a few miles frous the valley of the Tanager. The name is rariously written by ancient authors. Livy mentions the Volcentes as a people who in the Second Punic War revolted to Hannibal and received a Carthaginian garrison into their town, but. in B. c. 209, returned to the Roman alliance. (Liv. xxvii. 15.) There can be no doubt that these are the same people as the Volcentani of Pliny, who are enumerated by that author among the municipal communities of the interior of Lucania (Plin. iii. 10. s. 15), and it is certain that the Ulei or Volci of Ptolenny ( $\mathrm{O} \tilde{v} \lambda \kappa 06, \mathrm{P}$ tol, iii, 1. § 70 ) refers to the same place, the correct name of which, as we learn from inscriptions, was Volceii or V'ulceii, and the people Volcetani. (Mommsen, Inscr. R. N. pp. 15, 16.) The disconvery of these inscriptions at Buccina leaves no duubt that thas town occupies the site of the Lucmian city of Volceii. (Romanelli, vol. i. p. 422 ; Holsten. Not. ad Cluver; p. 290.) It appears to luve been a considerable manicipal town under the Itoman Empire, and is one of the " l'raefecturae Lucanize" mentioned in the Liber
[E. H. B.]

VOLCI (Oủó̀кot, Ptol.: Eth. Vulciens : Ru. near Ponte della Badiu), a city of Etruria, situated io the plain on the right bank of the river Armina ( Fiora), ahout 8 miles trom its mouth. Very little mention is found of it in history. The name of the city is known fiom Ptolemy as well as from Pliny, who enumerates, among the municipal town of Etraria, the "Volcentini cogaomine Etrusci," an appellation evidently used to distioguish them from the people of Volcentum in Lacania. (Plin. iii. 5. s. 8; P wol. iii. 1. § 49.) The name is quoted aloo by Stephanus of Byzantium, who writes it 'O^кiav, from Polybius. (Steph. B. s. v.) But the ooly indication that they had once been a powerfol people, and their city a place of impurtance, is found in the Fasti Capitulini, which record a triumph in the year B.c. 280 over the Volsitienses and Volcientes (Fast. Capit. ad ann. $4 \overline{73}$ ). This was ooe of the last struggles of the Etruscans for independence, and it was duabtless in consequence of the spirit showa on this occasion by the Volcientes that the Ronans shortly alterwards (in B. c. 273 ) established a colony at Cosa, in their territory. (Vell. Pat. i. 14; Plin. iii. 5. s. 8.) It is expressly stated on this occasion by Pliny, that Cosa was a dependency of Volci (Cosa Volcientiom), a statenent which has been ignored by those modern writers who have represented Cosa as an independeat and important Etruscan city. But while this is very doubtiul in the case of Cosa, the evidence, though scanty, is conclasive that Volci was such; and there is even reason to suppose, from a monument discovered at: Cercetri, that it was at one time reckuned one of the twelve chief cities of the Etruscan League. (Ann. d. Inst. Arch. 1842, pp. 37-40.)

But notwithstanding these obscure hints of its greatness, the name of Volci was almost forgotten, and its site noknowa, or at least regarded as ancertain, when the first discovery of its necropolis in 1828 led to subsequent researches on the spot. which have brought to light a number of painted vases greatly exceeding that which has been discovered on any other Etroscan site. The unprecedented nomber, beauty, and variety of these works of art have given a celcbrity in modern times to the name of Volci which is probably as much in excess of its real importance io ancient times as in the somewhat parallel case of Pompeii. It is impossible here to enter iato any detailed account of the resalt of these excarations. it is calcolated that above 6000 tombs in all have been opened, and the contents bave been of the most varied kind, belonging to different periods and ages, and varying from the coarsest and rudest puttery to the finest painted vases. The same tumbs bave also yielded very nnmerous objects and works of art in bronze, as well as delicate works in gold and jewellery; and atter making every allowance for the circumastance that the cemetery at Volci appears to bave enjuged the rare advantage of remaining uadistarbed through ages, it affords incontestable proof that it must have belonged to a wealthy and populons eity. The necropolis and its contents are fully described by Mr. Dennis (Etruria, vol. i. pp. 397-427). The results of the excavations, in regard to the painted visses discovered, are given by Gerhard in his Rap. porto su i lasi Voluenti, published in the Annuti dell' Instituto for 1831. it is remarkable that only one of the thousands of tombs opened was adorned with paintings similar to those fuond at Tarquinii, and, in this instance, they are obviously of late date.

The site of the city itself has been carefully ex-
plored since these discoveries have attracted so much interest to the spot. It stood on the right bank of the river Armina, just below the point where that stream is spanned by a noble bridge, now called the Ponte della Badia, undoubtedly a work of Foman times, tbough the foundations moy be Etruscan. The few remsining relies of antiquity still visible on the site of the city, which occupied a plateau of about 2 miles in circomference, are also of Roman date, and mostly belong to a late period. Inscriptions also have been discovered, which prove it to have continned to exist under the Roman Empire; and the series of coins found there shows that it was still in existence, at least as late as the fonrth centary of the Christian era. In the middle ages it seems to have totally disappeared, though the plain ia which it stocd continued to be knowu as the Pian di Voci, whence Holstenins correctly inferred that this must lave been the site of Volci. (Holsten. Not. ad Clucer. p. 40.) The necropolis was, for the most part, on the other side of the river; and it is here that the excarations have been carried on most diligently. The site of Volci (which is now wholly uninhabited) is about 8 miles from Montalto, a small town at the mouth of the Fiora, where that river was crossed by the Via Aurelia. (Dennis, l.e.)

Vologatis, in Gallia Narbonen is, is placed by the Jerusalem Itin. after Lucus ( $\quad$ uc), on the read to Vapincuns (Gap) past Mons Salencas. The distance from Luces is ix.; and D'Anville supposes that Vologatis may be a place named Leches, but the distance ix. is too mucb. Others fix the place at Beaurière; and others propose Lethes or Beaumont. All this is uncertain. [G. L.]

YOLOGE'SIA (Oúa $\gamma \epsilon \sigma$ ía, Ptol. v. 20. § 6), a city built by and named after Vologeses, one of the Arsacidan kings of Parthia, in the inmediate neighbuarhood of Selenceia upon the Tigris. It is called by Pliny, Vulogesocerta (vi. 26. s. 30), the latter portion of the name implying the "city of." The extensive rains, still existing, oo both sides of the Tigris, are probably those of the two great cities of Selenceia and Vologesia.
[V.]
 bay on the W. coast of Britain, probably Loch Brey. (Horsley, p. 378.)
[T. H. D.]
VOLSCl (1)úóл an ancient people of Central Italy, who bear a prominent part in early Roman history. Their territory was comprised within the limits of Latium as that name was employed at a late period, and under the Roman Empire ; but there is no doubt that the Volscians were originally a distinct people from the Latins, with whom, indeed, they were almost always on terms of hostility. On the other band they appear as constantly in alliance with the Aequi; and
there is little douht that these two nations were kindred races, though always distinguished from ench another as two separate peoples. We have mo statement io any nacient writer as to the ethnic origin or nffinities of the Volscians, and are left almost wholly to conjecture on the subject. But the remains of the language, few and scanty as they are, afford nevertheless the safest foundation on which to rest ourtheories: and these lead us to regard the Volscians as a branch of the same family with the Cimbians and Oscans, who formed the aboriginal population of the mountain tracts of Central Italy. It would apprar, indeed, as if they were more closely connected with the Umbrians than either the Sabines and their Sabellian offshoots, or the Oscans properly so ealled ; it is proballe, therefore, that the Volscians had spparated at a still earlier period from the main strock of the Unbrian race. (Mlommsen, L'nter-Ital. Dintekt. pp. 319-326 ; Schwegler, liom. (iesch. vol. i. p. 178.) The only notice of their language that occurs in Roman authors, also points to it distinctly as different from Oscan (Titinius, ap. Fest. v. Obscum, p. 189). though the difference was undoubtedly that of two cugnate dialects, not of two radically distinct langunges.

When the Volscians first appear in Roman history, it is as a powerful and warlike nation, who were alrealy established in the possession of the greater pat at least of the territury which they subsequently occupied. Their exact limits are not, indeed, to be determined with accurary; and it is probable that they underwent considerable fluctustions during their long wars with the Latins and Romans. But there seems no doubt that from a very early period they held the whole of the detached mountain group S , of the Tolerus (Sirera), termed ly modern teographers the Monti Lepini, together with the valley of the Liris, and the mountain di-trict of Arpinum, Sora, and Atina. Besides this they were certainly masters at one time of the plains extending from the Volscian Apennines to the sea, inclading the Pomptine Marslies and the fertile tract that borders on them. This tract they had, accorling to Cato, wrested from the Abrigines, who were its earlest possessors (Cato ap. Priscian. v. p. 668).

The first mention of the Volscions in Roman history is in the reign of the second Targuin, when they appaar as a numerous and warlike penple. It is elear that it was the great extension of the Roman power under its last kirg (which must undoubtedly be aumitted as a historical fact), and the supremacy which he had assumed over the Latin Leagne, that first brought bim into cullision with the Volscians. According to the received history he marched into their country and took their capital city, Suewa Ponetia, by assault. (Liv. i. 53 ; Dionys. iv. 50 ; (ic. de Rep. ii. 24.) The tradition that it was the spuils there obtained which enabled hin to ruild tiee Capitul at liome, sufficiently proves the heluef in the great power and wealth of the Volscians at this early period ; and the fuundation of the two colonies of C'irceii and Signia, both of which are expressly ascribed to Taryuin, was doubtless intended to secure iin recent conuluests, and to impose a permanent check on the extension of the Volscian power. It is evident, moreover, from the first treay with (:arthage, preserved to us by lolytius (iii. 22), that the important cities of Antium and Tarracina, as well as Circeii, were at this time suliject to Airquin, and could nut, therefore, have been in the hands of the Volscians.

But the dissolution of the power of Tarqnin, and the loss of the supremacy of Fome over the Latins, seem to have nllowed the Volscians to regain their former superiority ; and though the chronology of the earliest years of the Republic is hopelessly confused, we seem to discern clearly that it was the increasing pressure of the Volscians and their allies the Aequians upon the Latins that caused the latter people to conclude the celelrated treaty with Rune under $S_{p}$. Cassius, n. c. 493, which became the fanndation of the permanent relation between the two states. (Liv. ii. 33 ; Dionys. vi. 95.) According to the received amals, the wars with the Valscians had already recommenced prior to this period; but almost immediately nfterwards occurs the great and sudden development of their power which is represented in a legenilary form in the history of Coriolanus. Whatever may have been the origin of that lecrend, and however inpossible it is to receive it as historically true, there is no doubt that it bas a historical formation in the fact that many of the Latin cities at this period fell successively into the power of the Volscians and their allies the Aequians; and the two lines of advance, so singularly mixed up in the received narrative of the war, which represents all these conquests as made in a single campaign, appear to represent distinctly the two separate series of conquests by which the two nations would respectively press on towards Fome. (Niebuhr, vol. ii. pp. 95, 259: Schwegler, Rom Gesch. vol, ii. pp. 274, 275.)*

1 t is impossible here to give ntere than a very brief ontline of the long series of wars with the Volscians which secupy so prominent a place in the early history of Rome for a period of nearly two centuries. Little historical value can be attached to the details of those wars as they were jreserved by the annalists who were copied by Liry and Dionysins ; and it belongs to the historian of Rome to endeavour to dispel their confusion and reconcile their diserepancies. But in a cencral print of view they may be divided (as remarked by Nichulir), into fuur periods. The first of these would comprise the wars down to B. C. 459 a fow years preceding the Decemvirate, inchadiug the conquests ascribed to Coriolanns, and would seem to have heen the period when the Volscians were at the hepight of their power. The second pxtends from e. C. 459 to 43 t , when the dictator A. Postumins Tubertus is represented us gaining a victory over the allied forces of the Volscians and Acquians ( Liv. iv. 26-29), which appeurs to have been really m important success, and proved in a manner the turning point in the long struggle between the two nations. Firom this time till the capture of kome by the Ganals (乃. c. 390) the wars with the Volxcimns and Acyuians assmme a new character ; the tide had turned, and we find the Romans and their allies recovering one after another the towns which land fallen into the luands of their enemies. Thus Labicum and Bola were regained in B. c. 418 and 414, and Ferentimm, a Ilernican city, but which lad been taken by the Volacians, was nenin wrested from them in 1s. c. 413 . (Liv. iv. $47,49,51$.) The frontier fortresses of Verruge and Carventum were indeed taken and retaken; but the eapture of Anxur or Tamacina in B. C. 399, which from that period

[^46]continued constantly in the hands of the Romans. must have been a severe blow to the power of the Volscians, and may be considered as narking an era in their decline. Throughout this period it is remarkable that Antium, one of the most powerful cities of the Volscians, continued to be on peaceful terms with Rome; the war was carried on almost exclusively upon the NE frontier of the Volscians, where they were supported by the Aequians, and Ecetra was the city which appears to bave taken the lead in it.

The capture of Rome by the Gauls marks the commencement of the fourth period of the Volscian Wars. It is probable that their Aequian allies suffered severely from the same invasion of the barbarians that had so mearly proved the destruction of Rome [Ageut], and the Volscians who aljoined their frontier, may lave shared in the same disaster. But on the other hand, Antuum, which was evidently at this period a powerful city, suddenly broke off its friendly relations with Rome; and duriog a period of nenrly 13 years (b. c. 386-374), we find the Volscians engaged in slmost perpetual hostilities with Rome, in which the Antiates uniformly took the leal. The seat of war was now transferred from the Aequian frontier to the southern foot of the Alban hills: and the towns of Velitrae and Satricum were taken and retaken hy the Volscians and Romans. Son after the conclusion of peace with the Antiates we hear for the first time of Privernum, as engaging in bostilities with Rome, B. c. 358 , and it is remarkable that it comes formard single-handed. Indeed, it there had ever been any political league or bond of union among the Volscian cities, it would seem to have been by this time completely broken up. The Antiates again appear repeatedly in arms ; and when at length the general defection of the Latios and Campanians broke out in B. C. 340 , they were among the first to join the enemies of Rome, and laid waste the whole sea-coast of Latium almost to the wallsot Ostia. But they shared in the defeal of the Latin armies, buth at Pedom and on the Astura: Antiom itself was taken, and received a colony of Romans within its walls, but at the same time the citizens themselves were admitted to the Roman franchise. (Liv. viii. 14.) The people of Fundi and Formiae, both of thern prolably Volscian cities, received the Roman franchise at the same time, and Tarracina was soon after occupied with a Roman colony. The Privernates alone ventured once more to provuke the hostility of the Romans in B. C. 327, but were severely punished, and their city was taken by the consul C. Plautius. Nevertheless, the inhabitants were admitted to the Ruman Civitas ; at first, indeed, without the right of suffrage, but they soon afterwards obtained the full franchise, and were enrolled in the Ufentine tribe. The greater part of the Yolscians, bowever, was included in the Pomptine tribe.

Of the fate of the enties that were situated on the borders of the valley of the Trerns, or in that of the Liris, we bave scarcely any information ; but there is reason to suppose that while the Autiates and their neighbours were engaged in bostilities with Ronue, the Volscians of the interior were on their side fully uccupied with opproing the advance of the Samnites. Nor were their efforts in all cases successtul. We know that buth Arpinom and Fregellue bad been wrested from the Volscians by the Samnites, before the lomans made their appearance in the contest (Liv. viii. 23, ix. 44), and it is probable that the other cities of the Volscians readily took shelter
under the protection of Rome, for security against their common cnemy. It seems certain, at all events, that betore the close of the Second Sammite War (B. c. 304), the whole of the Volscian people had submitted to the anthority of Rome, and been admitted to the privileges of Roman citizens.

From this time their name disappears from history. Their territory was comprised under the general appellation of Latium, and the Volscian people were merged in the great mass of the Roman citizens. (Strab, v. pp. 228, 231 ; Plin. ini. 5. s. 9 ; Cic. pro Ball. 13.) But a rude and simple mountaiapeople would be naturaily tenacious of their customs and traditions; and it is clear, from the manner in which Juvenal incidentally alludes to it, that even under the Roman Emfire, the name of the Volscians was by no means extinct or forgutlen in the portion of Central Italy which was still occopied by their descendants. (Juv. Sat. viii. 245.)

The physical geograpby of the land of the Volscians will be fouod described in the article Laticm. Of the peculiar characters of the people thenselves, or of any national customs or institutions that distinguished them from their Latin neighbours, we know absolutely nothing. Their histury is a recurd only of the long struggle which they maintained aganst the Roman power, and of the stepo which Jed to their ultimate subjugation. This is the only memory that has been transmitted to us, of a people that was for so long a period the most formidable rival of the Roman Repablic.
[E. H. B.]
入í $\mu \nu \eta$, Strab. v. p. 226: Lago di Bolsena), a considerable lake of Etruria, scarcely inferior in size to that of Trasimene. It took its panie from the town of Volsinii, which stood ou its NE. shore; but it was also sometimes called Lacus Tarquiniensis, as its western side adjoined the territory of Tarquimi. (Plin. ii. 96.) Notwithstanding its great size, it is probable, from the natore of the surrounding hills and rocks, that it is the crater of an extinct volcano (Dendis. Etruria, vol. i. p. 514). In this lake the river Mlarta has its source. It abouoded in fisb, and its sedgy shores barboored large quantities of water-fowl, with which articles it supplied the Roman markets. (Strab. l. c.; Colum. vii. 16.) It contained two islands, of which, as well as of the lake itself, wouderful stories were related by the ancients. They were remarked to be ever changing their forms ( P lin. $l . \mathrm{c}$. ), and on one occasion during the Second Pumic War its waters are said to have flowed with blood. (Liv, xxvii. 23.) The shores of the Jake were noted for their quarries, (Plon. xxxri. 22. a. 49.) Ia a castle on one of the islands queen Amalasontha was murdered by order of her husband Theudatus. (1'rocop. B. Goth. i. c. 4, p. 23, ed. Bumn.)
[T. H. D.]
VULSIN11 or VULSINII (Oúonoivot, Strab. v. p. 226; Oüo入 $\operatorname{civtov,~Ptol,~iii.~1.~§~50:~Bolsena),~an~}$ ancient city of Etroria, situated on the shore of a lake of the same name (Lacus Volsiniensis), and on the Via Clodia, between Clusium and Forunt Cassii. (Itin. Ant. p. $286 ;$ Tab. Peut.) But in treating of Volsinii we must distinguish between the Etruscan and the Roman city. We know that the ancient town lay on a steep height (Konaras, $A n n$, vii. 7 ; ct. Aristot. Mir.Ause. 96); while Bolsena, the representative of the Roman Volsini, is sitnated in the plain. There is considerable difference of opinion as to where this height should be sought. Abeken (Mittelitalien, p. 34, seq.) looks for it at Monte Fiascone,
at the southern extremity of the lake; whilst Ditler (Etrusker, i. p. 451) seeks it at Orvieto, and adduces the nome of that place= Urbs Vetos, "the old city," as an argument in favour of his view : but Mr. Dennis (Etruria, vol. i. p. 508) is of opinion that there is no reason to believe that it was so far from the Roman town, aud that it ky on the summit of the bill, above the anphitheatre at Bolsena, at a spot called Il liazzano. He adduces in support of this hypothesis the existence of a good deal of broken pottery there, and of a lew caves in the cliffs below.

Volsinii appears to lave been one of the most powerful citics of Etruria, and was doubtless one of the 12 which formed the Etruscan confederation, as Volsinii is d-signated by Livy (x. 37) and Valerius Maximns (is. 1. extern. 2) as one of the "capita Etruriae." It is described by Juvenal (iii. 191) as seated among well-wooded bills.

We do not hear of Volsinii in history till after the fall of Veii. It is possible that the success of the Koman arms may have excited the alaron and jealousy of the Vulsinienses, as their situation might render them the next victims of Roman ambition. At all events, the Volsinienses, in conjunction with the Salpinates, taking advantage of a famine and pestilence which had desolated Rome, made incursions into the Roman territory in n.c. 391 . But they were easily beaten: 8000 of them were made prisoners; and they were glad to parchase a twenty years' trace on conditiun of restoring the booty they bad taken, and furnishing the pay of the Roman army for a twelvemonth. (Liv, v. 31, 32.)

We do not again hear of Volsinii till the year r. c. 310 , when, in common with the rest of the Etruscan cities, except Arretium, they took part in the siege of Sutrium, a city in alliance with Rome. (Liv. ix. 32.) This war was terminated by the defeat of the Etruscans at lake Vadimo, the first fatal shock to their power. (Ib.39.) Three years afterwards we tind the consul P. Decius Dlus capturing several of the Volsinian fortresses. (16.41.) In 295, L. Postumins Megellus ravaged their territory and defeated then under the walls of their own city, slaying 2800 of them; in consequence of which they, together with I'erusia and Arretium, were glad to purchase a forty years' peace by the payment of a heavy fine. (Id. x. 37.) Not more than fourtcen years, however, had elapsed, when, with their allies the Vulcientes, they again took up arms against Rome. But this attempt endel apparently in their final subjugation in B. C. 280. (Liv. Ep. xi.; Fast. Cons.) Pliny (xxaiv. 7. a. 16) retails an absurd story, taken from a Greek writer called Metrodorus Scepsius, that the object of the Romans in capturing Volsinii was to make themselves masters of 2000 statues which it contained. Tiie story, however, sulfices to show that the Volsinians had attained to a great pitch of wealth, luxury, and art. This is coufirmed by Valcrius Maximus (l. c.), who also adds that this luxury was the cause of their ruin, hy making then so indolent and effennate that they at length suffered the mamazement of their conmonwealth to be asurped by slaves. From this decrading tyramy they were rescued by the Roנnans. (Hlor. i. 2ै1 ; Zonaras, l. c.; A. Victor, l'ir. Illustr. 36 ; Oros. iv. 5.)

The Romans, when they tonk Volsinii, razed the town, and compelled the inhabitants, as we have already intimated, to migrate to another sput. (\%onaras, l. c.) This second, or Roman, Volsinii con-
tinued to exist under the Empire. It was the birthplace of sejanus, the ninister and favourite of Tiberius. (Tac. Ann. jv. 1, vi. 8.) Juvenal (x. 74) alludes to this circumstance when he considers the fortunes of Srjanus as dependent on the favour of Nursia, or Norsia, an Etrnscan goddess much worshipped at Volsinii, into whose temple there, as in that of Jupiter Capitolinus at Rome, a nail was annually driven to mark the years. (Liv. vii. 3; Tertull. Apol. 24.) According to Pliny, Vulsinii was the scene of some supernatural occurrences. He records (ii. 54) that lightuing was drawn down from heaven by king Porsenna to destroy a monster called Volta that was ravaging its territory. Even the commonjlace invention of hand-mills, ascribed to this city, is embellished with the traditional prodigy that some of them turned of themselves ! (ld. xxxvi. 18. s. 29.) Indeed, in the whole intercourse of the Romans with the Etruscans, wo see the ignorant wonder excited hy a cultivated peuple in their semi-barbaroas conquerors.

From what has been already said it may be inferred that we should look in vain for any traces of the Etruscan Volsinii. Of the Roman city, however, some remains are still extant at Bolsena. The must remarkable are those of a temple near the Floreuce gate, vulgarly called Tempio di Norzia. But the remains are of Roman work; snd the real temple of that goddess most probably stood in the Etruscan city. The amphitheatre is small and a complete ruin. Besides these there are the remains of some baths, cippi, sepulchral tablets, a sarcophagus with reliefs representing the triumph of Bacchus, \&c.

For the coins of Volsioii, see Muller, Etrusker, sol. i. pp. 324, 333: for its history, \&c, Adami, Storia di Volseno ; Dennis, Etruria, vol. i.; Abeken, Sittelitalien.
[T. H. D.]
VoL'UMNaE FANUM [Fanua Voltumnae].
VOLUBILIANI. [Volunilis.]
VULUBILIS (Ośoגoubthis, Ptol. iv, 1. § 14), a town of Mauretania Tiugitana, seated on the river Subur, and on the road from Toculosida to Tingis, from the former of which places it was only 4 milea distant. (Itin. Ant. p. 23.) It lay 35 miles SE. trom Banasa, and the same distance from the cosst. (Plin. v. 1. s. 1; Mela, iii. 10.) It was a Roman colony (Itin. Ant. l. c.) and a place of some importance. P'tolemy calls the inhabitants of the surrounding district, Vohabiliani (Oúndoubinalado iv. 1. $\$ 10$ ). In the time of Leo Africants (p.279, ed. Lorsbach2) it was a deserted town between Fez and Mequinez, bearing the name of Valili or Gualili, the walls of which were 6 Italian miles in circtunference. That prosition is now occupied by the town of Zanitut-Mula-Lhiss, on mount Zarhon. At some distance to the NIW. are the splendid ruins of Kicsse Faraun (l'haraol's castle), with Roman inscriptions: but to what ancient city they belong is unknown. (Cf. Mantert, x. pt. ii. p. 486 ; Graberg di Hemsï, p. 28 ; Wummer, Gemülde von Afrika, i. p. 439.)
[T. H. D.]
VOLUCE (probably the OU̇é入ouka of I'tol. ii. 6. § 56), a town of the Pelendones in Hispania Tarriconensis, on the road from Asturica to Caesaraugusta, and 25 iniles W. of Numantia. (Itin. Ant. p. 442.) Variously identified with Velucha (I'elachie), Valecha, nud Calatañazor. [T. II. D.]

VOLUNT11 (Óvo入aúvtioh, P'tol. ii. 2. § 9), a people on the E. coast of Hibernia. [T. 11. D.]

Volusta'Na. [Camhusit Mostes.]

VOMANUS (Vomano), a river of Picenum, which rises in the lofty group of the Apennines now known as the Gran Sasso drtalie, and flows into the Adriatic, after passing within a few miles to the N . of the city of Adria (Atri). Its Dame is mentioned by Pliny only (iii. 13, § 18).
[E. H. B.]
VORDENSES, in Gallia Narbonensis, an ethnic name which occurs in an inscription foond at Apt, the site of Apta Julia [Arta Jcha]. The inscription states that the "Vordenses pagani" dedicute this monument to their patronus, who is designated "inivir" of the Colonia Aptia. The place is supposed to be Gordes, which is cuntigunus to the diocese of $A p t$, and in that of Cavaillon. The change of Vord into Gord is easily explained. [VArincum.] (D'Anville Notice, $q$ ge)
[G. L.]
VOREDA, a town of the Brigantes in Britamia Rommen, on the road from Cataracton to Luguvallium. (Itin. Ant. p. 467.) It is varionsly identified with Old Penrith, II help Castle, and Coal Hills. By the Geogr. Rav. (v. 31) it is called Bereda.
[T. H. D.]
VORGA'NIUM (Ơoopávıov), in Gallia Lugdunensis, the capital of the Osismii [Osismin], a Celtic people in the north-west part of Bretagne (Ptol. ii. 8. § 5). This seems to be the same place as the Vorginum of the Table; and it appears on a route which leads from the capital of the Namnetes through the capital of the Veneti, and ends on the coast at Gesocribate, or Gesobrivate, ns some would write it. Between the capital of the Veneti and Vorgionm is Sulis, supposed to be at the junction of the Suel and the Blavet [Sulis]. From Sulis tu Vorginum the distance is marked xxiiii., and this brings us to a place named Karhez (D'Anville). But all this is very uncertain. Others fix Vorginum at a place named Guemené
[G. L..]
VORO'GIUM, in Gallia, is placed in the table on a road from Augustnnemetum (Clermont Ferrand) through Aquae Calidae (Vichy) to Ariolica (Avrilli). The distance is marked viii, from Aquae Calidae, and xiiii. from Vorogium to Ariolica. There is a place named Vouroux, which is the same name as Vorogium. Vouroux is near the small town of Varennes, and somewhat nearer to the banks of the Allier. The direct distance from the springs of Vichy to Varennes is somewhat less than the Itin. distance of viii. Gailic leagues, but the 8 leagues are not more than we may assign to the distance from Vichy to Varennes along the river. But the Itin. distance from Vorogium to Ariolica is somewhat too larce compared with the real distance. (D'Anville, Notice, \&.c.)

## Vosalia. [Vosava.]

VOSAVA or VOSAVIA, in North Gallia, is placed by the Table on the Roman road along the west bank of the Rhine, and between Buntobric or Bandobrica (Boppart) [Baudobrica] and Biugium (Bingen). It stands halt-way between these places and at the distance of viiii. Vosava is Oberwesel on the Rhine, north of Bingen; and it is almost certain, as D'Anville sugges's, that the name is erroneously written in the Table, and that it should be Vosalia.
[G. L.]
VO'SEGUS (Vogesen, Vasgau, Vasges). The form Vosegus has better authority than Vogesus (Schneider's Caesar, B. G.iv. 10); and the modern name also is in favour of the form Vosegus. Luean is sometimes quoted as authority for the form Vogesus:
"Castraqne quae Vogesi curvam super ardua ropem Pugnaces pictis cohibebant Lingonas armis."
(Pharsal. i. 397.)
The name is Bornjkav in the Greek version of the Cammentaries.
Caesar says that the Mnsa (Maus) rises in the Vosegus, by which he means that the lills in which the Murs rises belong to the Vosges. But he says no more of this range. The battle with Ariovistus, B. C. 58 . Was fought between the southern extremity of the Vosges and the Rhine, but Caesar (B. G. i. $\mathbf{4 3}, \mathbf{4 8}$ ) gives no name to the range under which Ariovistus encamped in the great plain between the Vosges and the Rhine. D'Anville observes that an inscription in honour of the god Vosegus was found at Berg-Zabern on the confines of Alsace and the Palatinate, which proves that the name Vosegus extended as far as that place. It seems likely that the name was given to the whole range now called Vosges, which may be considered as extending from the depression in which is formed the canal of the Rhone and Rhine, between Befort and Althirch, to the bend of the Rhine between Mainz and Bingen, a distance of above 170 miles, The rance of the Vosges is parallel to the Rhine. The hilly country of the Faucilles in which the Maas rises is west of the range to which the name of Vosges is now given. The Yosges are partly in France, and partly in Rhenish Bavaria and IFesse Darmstadt.

The territory of the Sequani originally extended to the Rhine, and the southern part of the Vosges was therefore included in their limits. North of the Sequani and west of the $V$ osges were the Leuci and Mediomatrici; and east of the Vosges and between the Vosges and the Rhine were the Rauraci, Triboci, Nemetes, Vangiones, and Caracates.

In the Table the Silva Vosagus is marked as a Iong forest on the west side of the Rline. Pliny (xvi. 39) also speaks of the range of the Vosegus as containing timber.
[G. L.]
UR, a castle of the Persians mentioned by Ammianus Marcellinus (xxv. 8), in his account of the war between Jnlian and the Persians. It mast have been situated in Mesopotamia, at no great distance from Hatra (Al-Hathr). It has been generally supposed that Ur is the ssme place as that mentioned in Genesis (xi. 28); but the recent researches of Colonel Rawlinson have demonstrated that the Ur whence Abraham started was situated in the S. part of Babylonia, at a place now called Muqeher. (Journ. Roy. As. Soc. 1855.)

URANO'POLIS (Oúpavósoגıs), a town in the peninsula Acte of Chalcidice in Macedonia, of which we know nothing, except that it was founded by Alexarchus, the brother of Cassander, king of Macedoni: (Athen. iii. p. 98; Plin. iv. 10. s. 17), As Pliny does not mention Sane in his list of the towns of Acte, it has been conjectured by Leake that Ursnopolis occupied the site of Sane. (Northern Greece, vol. iii. p. 149.)

URANO'POLIS (Oípavónoגts), a town of Pisidia, in the district of Cabalia, to the north-west of Termessus, and south-east of Isionda. (Ptol. v. 5. § 6.)
[L. S.]
URBA, a town of Gallia, in the territory of the Helvetii. It is placed in the Antonine Itin. between Lacus Lausonins and Ariolica [Artolica], xxiii. from Larus Lausonius and xxiiii. from Ariolica. Urba is Orbe in the Swiss Canton Waadt or Pays de Vaud, on the road from the Lake of Neuf-
chatel to the Lake of Genera, and on a bill nearly surrounded by the river Orbe.

URBANA COLONJA, mentioned by Pliny only (xiv, 6. s. 8), was a colony founded by Sulla in a part of the torritory of Capaa, aljoining the Falernus arer. From its name it would appear probable that it was a colony of citizens from lome itsdf, who were settled by the dictator in this fertile district. It is doubtrini whether there cver was a town of the name, as no allusion is found to it as such, and the district itself was remnited to that of Capua before the time of Pliny. (Plin. $l$. c.; Zumpt, de Col. p. 252.)
[E. H. B.]
URBATE, a place in Lower I'amonia, on the road from Siscia to Sirmiam (It. Ant. p. 268 ; Tab. Peut.) ; its exict site is mknown. [L. S.]

URBIACA, a town of the Celtiberi, in Llispania Tarraconensis. (Itin. Ant. p. 447.) l'robably the Urbicua of Livy (xl. 16). Variously jdentified with Alburoches, Checa, and Molina [T. H. D.]

Uliblgenus l'AgUs. [Helvetit, Vol. I. p. 1041.]

URBINUX (Oipgivov), was the name of two cities or municipal towns of Unabria, situated within a short distance of each other, which were distinguished by the epithets Hortense and Metanrense. ( Plin. iii. 14. s. J9.)

1. Uhbinum Hortense (Urbino), apparently the more considerable of the two, and for that reason frequently called simply Urbinum, was situated on a hill between the valleys of the Metaurus and the Pisaurus (Foglia), rather more than 20 miles from the Adriatic. It is mentioned by Pliny among the municipal towns of Uuhria, and is incidentally notioed by Tacitus as the place where Fabius Valens, the general of Vitellius, was put to death, in A.D. 69, after he had fallen into the hands of the generals of Vespasiun. (Tac, Hist, iii. 62.) 1ts municipal rank is confirmed by anmerous inscriptions, which prove it to have been a torn of some importance. (Orell. Inscr: 3714 ; Gruter, Inscr. p. 387. 8, p. 392. 1. \&c.) 1'rocopins also notices it during the Gothic Wars, and correctly describes it as situated on a steep and lofty hill; it was at that time a strong fortress, but was besieged and taken by Bulisarius in A. D. 538. (Procop. B. G. ii. 19.) From this time it seems to have continued to be a place of consideration, and in the middle ages became the seat of goverument of a race of independent dukes. It is still a considerable city, and one of the capitals of the delegation of Crbino and Pesaro, bat has no remains of antiquity, except the inseriptions abuve noticed.
2. Ubminem Metaurense (Urbakit), was situated, as its name imports, in the valley of the Metaurus. on the raght bank of the river, about 6 miles below $S$. Angelo in Vade (Tifernum Detaurense), and 9 from $U$ 'bino. Its manicipal rank is attested by an inseription, in which the inhabitants are termed Urvinates ALatimenses, as well as by Pliny (Gruter, Inser. p. 463. 4; 1lin, iii. 14. s. 19); but it seems never to have been a place of much importance. In the middle ares it fell into complete decay; and was replaced by a village catled Castel Durante, which, in 1625, was enlarzed and raised to the dignity of a city by Urban V11I., from whon it derives its present name of L'rbania. (Claver. Ital. p. 620; Rampoldi, Diz. Top, vol. iii. p. 1278.) [E. 11. 13.]

URiBS SALY'A (Obpga इaxovia, Ptol. in. 1. § 52: Eth. Uruis Salviensis or Urbisatviensis: Lrbisagliut), a town of licenum, mentioned by Pliny amung the municipal towns of that district. (1'lin. iii. 13.
s. 18.) It was situated on a hill above the valley of the Flusor (Chienti), sbont 2 miles from the right bank of that river, and 7 miles E. of Toleutinum. The testimony of Mliny to its municipal rank is confirmed by the Liber Coloniaram, which mentions the "ager Urbis Salviensis," as well as by an inscription (Lib. Col. p. 226 ; Orell. Inscr. 1870); and it seems to have been a flourishing town until it was taken and destroyed by Alaric, a calamity from which it never recovered, so that it still lay in ruins in the time of Procopius. (1'rocop. B. G. ii. 16.) Dante also aotices it in the 13th centory as in complete ruins (Par. xvi. 73); but the name has always survived, and is still attached to the modern Urbisaglit, which is, however, a mere village, dependent on Macerata. The Itineraries give two lines of crossroads which passed through Urbs Salvia, the one from Septempeda (S. Severino) to Firmum (Fermo), the other from Anximum throngh Hieina and Urbs Salvin to Asculum. (Itin. Ant. p. 316; Tab. I'eut.)
[E. H. B.]
URBS VETUS (Orvieto) , a city of Etraria mentioned by Paulus Diaconus (IIst. Lang, iv. 33) together with Balneun liegis (Bagnaréa) in the same neighbourhood. No mention of either name occurs in any writer before the Fall of the Koman Empire, but it is probable that the Urbiventum (OípGibevtov) of Procopius, which lignres in the Gothic Wars as a fortress of some importance, is the same place as the Urus Vetas of P. Diacunus. (Procop.B.G. ii. 20.) There is no doubt that the modern name of Orvieto is derived from Urbs Vetus; but the latter is evidently an appellation given in late times, and it is donbtful what was the original name of the city thus designated. Niebuhr supposes it to be Salpinum, noticed by Livy in B. C. 389 (Liv. v. 31 ; Niebuhr, vol. ii. p. 493) [Salpinum], while Italian antiquarics in general identify it with Herbanom. [IIerbantm.] But both snggestions are mere conjectures. [E. H. B.]

URCESA (Oйркепа or Oйркаıनа, Ptwl. ii. 6 § 58), a town of the Celtiberi in Hispania Tarraconensis. According to some, the nowern Fequena, whilst others identify it with Veles or Orgas. (Coins in Sestini p. 212.)
[T. H. D.]
$\mathrm{LRCl}(1 \mathrm{lin}$. iii. 3. s. 4 ; Oथ้рк $\eta$, Ptol. ii. 6. § 14), a town of the Bastetmi in Hispania Tarraconensis, on the borders of Baetica, or according to another boundary line, which makes the latter reach as far as Barca, in Baetica itself, on a bay mamed after it, and on the road from Castalo to Malaca. (Mela, ii. 6, where the editions incorrectly have Ur.i and Virgi ; Itin. Ant. p 404.) Variously identified with Abrucễa, Puerto de Aguilas, and Alsoduz. Ukert, however (ii. pt. i. p. 352), would seck it in the neighbourhood of Alineria.
[T.H.D.]
URCITANUS SINUSA, n small bay either on the S. coast of Ilispania Tarraconensis or in Bactica, named after the town of lirci. It was separated by the Momontorium Charidemi from the Sinus Massienus on the E. (Mela, ii. 6.) Now the bay of Alncria.
[T.H.D]
UIR $i A 0$, a town in Hispania Bactica, on the road from Corduba to Castulo (Itin. Ant. p. 403), with the smrmame of Alba (Plin. iii. 1. s. 3.) Ia the editions of the Itinerary it is called Urcao and Vircoo; and according to inscriptions in Gruter (cexlix. 3, cexliii. 6), it was a manicipium, with the name of Albense E'rgavonensc. Most probably Arjona. (CF. Morules, Ant. p. 74: Florez, Esp: Sityr, xii. p. 379.)

URSO（Oひ̈ $\mu \omega \omega v$, Strab，iii．p．14I），a strong mountain town in Hispania Baetica，the last refuge of the Pompeians．It was a Roman colony，with the surname of Genua Urbanorum，and was ander the jurisdiction of Astigi．（Plin．iii．1．s 3；Hirt． B．H．26．41，65；Appian，B．H．16．）It is the modern Osuña，where some iascriptions and rains have been found．（Cf．Maratori，p．1095；Florez， Esp．Sagr．x．p．77．）For coins of Urso，see Florez， Med．ii．p． 62 t，iii．p．130；Mionnet，i．p．28，Suppl． i．p． $47 ;$ Sestini，p． 94.
［T．H．D．］

COIN OF URSO．
URSOLAE or URSOLL，a place in Gallia Nar－ bonensis，fixed by the Antoniue Itin，on the road between Valentia（Valence）and Vienna（I＇ienne）， xxii．from Valentia，and xxvi．from Vienua．This agrees pretty well with the whole distance betweeu Falence and Fienne．There are no means of de－ termining the site of Ursoli except the distances ； and D＇Aaville fixes on S．Talier，a place on the right bank of the Galaure near the place where it enters the Rhone．
［G．L．］
URUNCI，a place io Gallia betreen the Vosges and the Rhine．It occars twice in the Antoniae Itin．，and in both cases the road from Urunci runs to Mons Brisiacus．［Mons Brishacus．］In one route it is placed between Larga（Largizzen）and Mons Brisiacas，xsiii．from Larga，and xxiiii．from Brisiacus．This route is from south to north－east． The other route is from Arialbinnum，supposed to be Binning near Basle，to Mons Brisiacus，from south to north，and Urunci is xxiii．M．P．or 15 leugae from Muns Brisiacus．D＇Anville suppases that Urunci may be a place named Rucsen or Ricsen， on the line of the road from Larga to Mons Bri－ siacus or Breisach．
［G．L．］
USAR．the most easterly river of Mauretania．（Plin． v．2．s．1．）It seems to be the river called Eioap by Ptolenny（iv．2．§10），and is probably the Ajebby， which falls into the gulf of Bugie．

USARGALA（Ov̉ $\alpha \alpha \rho_{\gamma} \gamma \lambda \alpha, \mathrm{Pt} 0$ ）．iv．6．§ 7， \＆c．），a very extensive monatain chain in the coun－ try of the Garamantale on the N．border of Li－ bya Interior，and S．of Numidia and Mauretania， stretching in a NW．direction as far as Atlas．It is in this mountain that the river Bagradas has its source．
［T．H．D．］
U＇SBIUM（Oй́rfiov），a town mentioned by Pto－ lemy（ii．11．\＄30）in the south－east of Germania， prohably in the territory of the Marcomanni，seems to be identical with the modern Ispern，on a rivalet of the same name．
［L．S．］
US＇CANA，the chief town of the Perestae，a peo－ ple of Illyricnm，which contained 10,00 i inhabitauts at the time of the Loman war with Perseas．At the commencement of this war it appears to have been in the hands of Perseus，and the first attempt of the Roman conmander，App．Claudius，to obtain pos－ session of the place proved nasuccessful，B．c． 170. （Liv．sliii．10．）It would seem，however，to have been afterwards taken by the Romans，since we read that Perseus in the fullowing year surprised Uscana， marching thither in three days from Stubera．（Liv． xliii．17，18．）Shortly afterwards L．Coelius．the Roman commander in IIlyricum，made an unsuccessful attack ypon Uscana．（Ib．21．）The site of this town is nncertain．
 § 2），a towa of the Jazyges Metanastae．［T．H．D．］

USCUDAMA，a town belonging to the Bessi， near Mount Haemus，which M．Lucullus took by assault．（Eutr．vi．10．）
［J．R．］
USELL1s（Oひ̈の Sardinia，situated in the interior of the island，about 16 miles from the Gulf of Oristano on the W．coast， and the same distance S．of Forum Trajani．Its name is not found in the Itineraries，and the only anthor who mentioas it is Ptolemy（iii．3．§ 2），who erroneonsly places it on the W．coast of the island： but the existing ruins，together with the name of U＇sellus，still borne by a village on the site，leave no doabt of its true situation．it is about 3 miles NE． of the modern town of Ales．Ptolemy styles it a colonia，and this ia confirmed by an inseription in which it bears the title of＂Colonia Julia Aagusta．＂ It would hence appear probable that tbe colony must have been founded under Augustus，though Pliny tells us distinctly that Turris Libyssonis was the only colony existing in Sardinia in his time．（De la Marmura，Voy．en Sardaigne，vol．ii．pp．367， 466．）
［E．H．B．］
USILLA（Ov̄ $\ddagger \lambda \lambda \alpha$, Ptol．iv．3．§ 10），a place in Byzacium in Africa Proper．It is the Usula of the Jtin．Ant．（p．59），Jying between Thrsdrus and Thenae．Variously identified with Inchillo or Sidi Makelouf．and Inshillah．
［T．H．D．］
 German tribe，mostly mentioned in conjunction with the Tencteri，with whom they fur a long time shared the same fate，until in the end，having crossed the lower Rhine，they were treacherously attacked and defeated by Julus Caesar．（Caes．B．G．iv．4， \＆c．；Appian，de Reb．Gall． 18 ；comp．Texcteri．） After this calamity，the Usipetes returued across the Rhine，and were received by the Sigambri，who as－ signed to them the district on the northern bank of the Loppia，which had previously been inhabited by the Cbamavi and Tubantes，and in which we hence－ forth find the Usipetes as late as the time of Tacitus． （Ann．xiii．55，Hist．iv．37，Germ．32；Dion Cass， liv． 32 ，foll．）Atterwards the Usipetes are met with

## UTICA.

farther south, opposing Germanicns on his retum from the country of the Marsi. (Tac, Ann. i. 50, 51 ; comp. Dion Cass. xxxix. 47 ; Plut. Caes. 22.) lı Strabo (vii. p. 292) they appear under the name of Oürıтоц, and Ptolemy (ii. 11. § 10) mentions a tribe of the name of Oviaroi, whom some believe to be the same as the Usipetes ; bot if this be correct, it would follow that the Usipetes migrated still farther south, as Ptolemy places these Vispi on the apper Rhine; but as no other authority places them so far south, the question is nltogether uncertain. About the year A. D. 70, the Usipetes tonk pat in the siege of Mognntiacum (Tac. Ann. xiii. 54), and in A.D. 83 a detachment of them is mentioned as serving in the Roman army in Britain. (ld. Agric. 27.) Afterwards they disappear from history. (Comp. Zeuss, Die Deutschen, p. 88 ; Wilhelm, Germanien, p. 139.)
[L.S.]
UsPE, a town of the Siraci in Sarmatia, lying E. of the Tanais. It lay on a height, and was fortified with a diteh and walls; but the latter were composed only of mud confined in hurdles. (Tac. Ann. xii. 16.)
[T. H. D.]
 Ptol. iv. 1. $\$ \S 4$ and 12), a promontory of Maretania Tingitana, lying SIN, of the promontory of Hercules, Now Cape Osem.
[T. H. D.]
USTICA. [OstEODES.]
USUERNA or USUERVA. [Hosuembas.]
UTHINA (Oživa, l'tul. iv. 3. § 34), a town of Zeugitana, in Africa Propria, between Tabraca and the river Bagradas, (Cf. 1d. viii. 14 \$ 11 ; Plin. v. 4. s. 4.) Erroneously written Uthica in Tab Peut. Now $I$ dine.
[T. H. D.]
UTICA ( $\eta^{\prime}$ 'Iтv́ルク, Polyb, i. 75 ; I'tol, iv. 3. § 6 ; Oviтiky, Dion Cass. sli. 41 ; Eth. Uticensis; Liv. xxix. 35 ; Caes. B. C. ii. 36), a colony founded by the Tyrians on the N. coast of Zeugitana in Africa. (Vell. Pat. i. $2 ;$ Mela, i. 7 ; Justin. xviii. 4. \&c.) The date of its fourdation is sail to have been a few yenrs after that of Gades, and 287 years before that of Cartbage. (Vell. Pat. l. c.; Arist, M, Mirab. Ausc. 146 ; Gesenius, Monum. Script. Linguaeque Phoenic. p. 291 ; Sil. 1tal. Pan. iii. 241, sqq. \&e.) Its uame signified in Phoerician, "ancient," or "noble" (קיתע, Gesen. ib. p. 420, and Thes. Ling. IIcb. p. 1085). Utica was sitnated near the mouth of the river Bagradas, or rather that of its western arm, in the Bay of Carthage, and not far from the promontory of Apollo, which forms the western houndary of the bay, (Strab. avii. p. 832; liv. l. c.; Ptol. l. c.; Appian, B. C. ii. 44, seq.; Procop. $B$. J. ii. $15, \& \mathrm{\& e}$.) It lay 27 miles NW, of Carthage. (ltin. Ant. p. 22.) The distance is given as 60 stadia in Appian (Pun. 75), which is probably an error for 160 ; snd as a day's suil by sea. (Scylax, Geogr. Min. i. p. 50, ed. Hads.) Both Utica and Tanes might be descried from Carthage. (Strab. l. c.; Polyb. i. 73 ; Liv, xxx. 9.) Utien possessed a good harhour, or rather harbours, made by art, with excellent mohorage and numerous landing places. (Appian, l. c.; ef. Barth, Handerungen durch die Kustonländer des Mittelmeers, pp. 111. 125.) On the land side it was protected by steep hills, which, tugether with the sea and its artificial defences, which were earefolly kept up, rendered it a very strong place. (Liv. xxix. 35; App. Pun. 16, 30, 75; Diod.xx. 54 ; Plut.Cat. Min. 58.) The surrounding eountry was exceedingly fertile and well cultivatel, and produced abandance of corn, of which there was a great export trade to Roruc, ( $\mathrm{Liv}, \mathrm{xxr} 31$. )

The hills behind the town, as well as the disirict near the present Porto Farina, contained rich veins of varions metals; and the coast was celebrated for producing rast quantities of salt of a very peculiar quality. (Plin. sxsi. 7. s. 39 ; Caes, B. C. ii. 37 ; Polyb, xii. 3, seq. ; Wiod. xx. 8, \&c.) Among the buildings of the town, we hear of a temple ol Jupiter (Plut. Cat. Min. 5) and of one of Apollo, with its planks of Numididn celar near twelve centaries old (Plin. xvi. 40. s. 79); of a forum of Trajan, and a theatre ontwide the city. (Tiro Prosper, ap. Morcelli, Afr. Christ. iii. p. 40: Caes. B. C. ii, 25.) The tomb and statue of Cato on the seasshore were extant in the time of Platareh (tb, 79). Shaw (Travels, vol. i. p. 160, seq.) has the merit of having first pointed out the true situation of this celebrated city, the most important in N. Africn after Carthage. Before the time of Shaw, it was sought sometimes at Biserta, semetines at Porto Farina; but that learned traveller fixed it near the little miserable Duar, which has a holy tomb called Boo-shatter; and with this view many writers have ngreed (Falbe, Recherches sur TEmplacement de Carthoge, p. 66: Barth, Wanderungen, ¢ैe. p. 109 ; Semilasso, pp. 39, 46; Ritter, Afrika, p. 913. \&c.) Since the Roman times the muddy stream of the Bagralas has deposited at its mouth a delta of from 3 to 4 miles in extent, so that the innermnst recess of the Bay of Carthage, on which ancient Utiea was situated, as well as the eastern arn of the river itself, have been conserted into a broad morass, in which traces are still visible of the quays whieh formerly lined the shore, and of the northern mole which enclosed the harbour. More towards the E., at the margin of the chain of hills which at an carlier period descended to the sea, may be discerned blocks of masonry belonging to the ancient town wall. On the declivity of the hills towards the SE. are the remains of six cisterns, or reservoirs, 136 feet long. 15 to 19 feet broad, and 20 to 30 feet deep, covered with a remarkably thin arelsed roof. These are connected with an aqueduct, which may be traced several miles from Boo-shatter, in the direction of the hills: bat its most remarkable remains are a treble row of arches by which it was carried over a ravine. These reservoirs may probably have served to furnish water for a namachia in the neighbouring amphitheatre, which is hollowed out of the hills, and is capable of containing about 20,000 persons. The ancient site of the eity is covered with ruins. Near its centre rises the highest summit of the chain of hills on which stood the citadel and, probably, also the ancient temple of Apollo. The ruins of other temples and eastles have been discovered, as well as the site of the senate honse (Plat. Cat. 1/in. 67), which has been thought to be determined by the excavation of n number of statues. These are now preserved in the muscum at Leyden.

In the course of time, as is usual with such connections, Utica became severed from the mother-city, and first appears in history as independent of it. In the first commercial treaty between Rome nad Carthage, in the year 509 в. c., Utica was probably included in it mmong the allies of the Carthaginians (Polyb. iii. 22 ) : in the second, in er. c. 348 , it is expressly named (ib. 24 ; Diodor. xvi. 69, who however confounds the two treaties), as well as in the alliance concluded by Ilamnibal with Philip of Macedon in the Sceond Panic War, B. c. 215 (Polyb, viii. 9). Nubsequently, however, Utiea appears to have thrown oft her dependence upon, or perhaps we should mather
call it her alliance with, Carthage, and, with other cities of N. Africa, to have joined the Sicilian Agathocles, the opponent of Carthage; to have afterwards revolted from that conqueror, but to have been again reduced to ohedience(Diod. xx. I7, 54 : cf. Polyb. i. 82). In the First Punic War, Utica remained faithful to Carthage; afterwards it joined the Libyans, but was compelled to subunit by the victorious Carthaginians (Polyt, ib. 88 : Diod. Fr. xxr.). In the Second Punic War also we find it in firm alliance with Carthage, to whose fleets the excellent harbour of Utica was very serviceable. But this exposed it to many attacks from the Romana, whose freebooting excursions were frequently directed against it from Lilybaem, as well as to a more regular, but fruitless siege by Scipio himself (Liv. xxv. 31, xxvii. 5, sviii. 4, xxix. 35, xxx. 3, \&c. ; Pulyb. xiv. 2 ; Appian, Punic. 16, 25, 30). In the third war, howerer, the situation of Carthage being now bopeless, the Uticenses indulged their ancient grudge against that city, and nade their subinission to Rome by a separate embassy (Polyb. xxxvi. 1 ; Appian, Pun. 75, 110, 113). This step greatly increased the material prosperity of Utica. After the destruction of Cartbage, the Romans presented Utica with the fertile district lying between that eity and Hippo Diarrhytus. It became the chief town of the province, the residence of the Roman governor, the principal emporium for the Roman commerce, and the port of debarcation for the Roman armaments destined to act in the interior of Africa, Owing tothis intimate connection with Rome, the name of Utica appears very frequently in the later histury of the republic, as in the accounts of the Jugurthioe War, of the war carried on by Pompey at the head of Sulla's faction, against the Marian party under Domitius and his ally the Numidian king larbas, and in the struggle between Caesar and the Pompeians, with their ally Juba. It is unnecessary to quote the numerous passages in which the name of Utica occurs in relation to these events. In the last of these wars, Utica was the scene of the celebrated death of the younger Cato, so often related or adverted to by the ancients. (Plut. Cat. Min. 58, seq.: Dion Cass. zluii. 10, sqq.; Val. Max. nii. 2. § 14; Cic. pro Ligar. 1, \&c. ; cf. Dict. of Biogr. Vol. I. p. 649). Augustus presented the Uticenses with the Roman civitas, partly as a reward for the inclination which they bad manifested for the party of his uncle, and partly also to indemnify them for the rebuilding of Carthage (Dion Cass. xlix. 16 ; ef. Sext. Rufus, Brev. 4). We know nothing more of Utiea till the time of Hadrian, who visited N. Africa in his extensive travels, and at whose desire the city changed its ancient constitution for that of a Roman colony (Spartian. Hadr. 13; Gell. N. Att. xvi. 13). Thus it appears in the Tab. Peut. with the appellation of Colonia, as well as in an inscription preserved in the museum of Leyden (Col. Jul. Ael. Hodr. Etic., ap. Janssen, Mus. Lugd. Batov. Inscr. Gr. et Lat.). Septimius Severus, an Afriean by birth, endowed it, as well as Carthage and his birthplace Leptis Magna, with the Jus Italicum. We find the hishops of Utica frequently meationed in the Christian period from the time of the great Synod under Cyprian of Carthage in 256, down to 684, when a bishop of Utica appeared io the Council of Toledo. The city is said to have witnessed the martyrdom of 300 persons at one time (cf. Morcelli, Afr. Christ. i. p. 362, ii. p. 150 ; Munter, Primod. Ecel. Afr. p. 32 ; Augustin, c. Donat. vii. 8). Utica probably fell with Carthage, into the hands of the Vandals under

Genseric in 439. Subsequently it was recovered by the Byzantine emperors, but in the reign of the Chalif Abdelmalek was ennquered by the Arabians under Hassan ; and though it appears to have been agaio recovered by Juhn the prefect or patrician, it finally sank under the power of the Saracens during the reign of the same Chalif, and on its second capture was destroyed (cf. Papencordt, die I'andal Herrschaft in Afr. p. 72, sq., 151, sq. ; Weil, Gesch. der Chalifer, i. p. 473, sq4. ; Gibbon, Decl. and Fall, vi. 350 , sqq. ed. Smith). The remains of its marbles and columns were carried away in the preceding ceutury, to serve as materials for the great mosque of Tunis (Semilasso, p. 43.)
Several coins of Utica are extant bearing the heads of Tiberius or Livia ; a testimony perhaps of the gratitude of the city for the rights bestowed upon it by Augustus (cf. Mionnet, Med. Ant. vi. p. 589 ; Supp. viii. p 208).
[T. H. D.]
UTIDAVA (Oútibava, Ptol. viii. 8. § 7), a town in Dacia, E. of the Aluta. Identified with the ruins at Kosmin, near the confluence of the Kutschur and the Pruth (ct. Lkert, iii. pt. ii. p. 620.) [T. H. D.]
UTII (Oथ̈тıot), one of the nations belonging to thie fourteenth satrapy of the Persian empire (Herod. iii. 93), which was armed in the same manner as the Pactyes (Id. vii. 68), and, according to Bobrik's emjecture, perhaps ixwelt in Pactyica. (Geog. des Merod. p. 181 .)
[J. R.]
UTIS or VITIS (Montone), a river of Gallia Cisalpina, which rises in the Apennines, flowa under the walls of Forli (Forum Livii), and subsequently by the city of Ravenna, and enters the Adriatic about 5 miles from that city. At the present day it juins the Ronco (the Bedesis of Pliny), before reachiag the latter city, but in ancient times it probably discharged its waters by a separate cbannel into the lagunes which at that time surronnded Ravenna. The name is written Vitis by Pliny (iii. 14. s. 19), but it is probable that Utis or Utens is the more correct form, which is found in Livy. According to that author it at one time formed the boundary betweeo the Buian and Seoonian Gauls. (Liv. v. 35.)
[E. H. B.]
UTTARIS, a town of the Callaici in the NW. of Hispania Tarraconensis, on the road from Lucus Augusti to Asturica, between Pons Neviae and Bergidum. (Itirs. Ant, pp. 425, 430.) Variunsly identified with Cerredo, Doncos, snd Castro de la Tentosa.
[T.H.D.]
UTUS, an affluent of the Danube in Moesia. The Utus had its suurces in Mount Haemus, and formed the E. boundary of Dacia Ripensis (Plin. iii. 26. s. 29). Now the lid.
[T. H. D.]
UTUS (Oйтws, Procop. de ded. iv. 1), a town of Moesia Inferior, a little to the S . of the confluence of the like-named river with the Danube, and between Oescns and Securisca (Itin. Ant. p. 221). Variously identified witls Staroselitzi, Hutalidsch, and a place near Brestoratz.
[T. H. L.]
VULCANI FORUM. [PUTEOLI]
VUleaNiaE INsULAE. [AechaeInsulae.]
VLLCH $A$ LO is mentioned by Cicero (pro Fonteio, 9) as a place in the west part of Gallia Narbonensis, but nothing more is known of it. [G. L..]

VULGIENTES. [Afta Julia.]
VULSINHI. [Volanin.]
VULTUR MONS (Monte Voltore), one of the most celebrated mountains of Southera ltaly, situated on the confines of Ayulia, Lncauia, and the country of the Hirpini, It cumuences about 5 miles Vol. II.
to the S . of the modern city of Melfi, and nearly due W. of Tenosa (Vennsia), and attains an elevation of 4433 feet above the lerel of the sea. Its regular conical form and isolated position, as well as the crater-like basin near its sumnit, at once mark it as of volcanic origin; and this is contirmed by the nature of the rocks of which it is composel. Hence it cannot be considered as properly belonging to the range of the Apennines, from which it is separated by a tract of billy country, forming as it were the base from which the detached cone of Monte Volture rises. No ancient author alludes to the voleanic claracter of Mount Yultur; bat the mountain itself is noticed, in a well known passage, by Horace, who mnst have been very familiar with its a pect, as it is a prominent object in the view from bis natire city of Vennsia. (Carm. iii. 4. 9-16.) He there terms it " Vultur Apalus," though he adds, singuJarly enough, that be was without the limits of Apulia (" altricis extra limen Apulise ") when he was wandering in its woods. This can only be explained ty the circumstance that the mountain stood (as above stated) on the confines of three provinces. Lucan also ineidentally dotices Mt. Vultur as one of the monatains that directly fruted the plains of Apulia. (Lucan, ix. 185.)

The physical and geolugical characters of Mount Vultur are noticed by Romanelli (vol. ii. p. 233), and more fully by Daubeny (Description of Volcanoes, chap. 11).
[E. H. B.]
VULTURNLM (Ov̉ou入tov̂ppov: Castel I iolturno), a town of Campania, situated on the sea-coast at the mouth of the river of the same name, and on its S . bank. There is no trace of the existence of any town on the site previous to the Second Punic War, when the Romans constructed a fortress (castellum) at the mouth of the river with the object of securing their possession of it, and of establishing a magazine of corn for the use of the army that was beieging Capua. (Liv. xxv. 20, 22.) It is probable that this continued to exist and gradually grew into a town; but in B. c. 194, a colony of Poman citizens was established there, at the same time with Liternum and Puteoli. (1d. xxxiv. 45; Yarr. L. L. v. 5.) The number of colonists was in each case but small, and Voltoroun does not appear to bave ever risen into a place of mucb importance. But it is noticel by Livy as existing as a town in his time ("ad Vulturni ostium, ubi nunc urbs est." xxv. 20), and is mentioned by all the geographers. (Strab, r. p. 238 : Plin. iii. 5. s. 9: Mel. ii. 4. § 9: Ptol. iii. 1. § 6.) We learn also that it received a fresh colony under Augussus (Lib. Colon. p. 239), and retained its colonial rank down to a late period. It became an episcopal see before the close of the Roman Einfire, und appears to have continued to snbsist down to the 9th century, when it was destroyed by the Saracens. In the 17 th century a new fortress was built nearly on the ancient site, which is called Custel Voturno or Castelf a Mare di Volturno. But from the remains of the ancient city still visible it appears that this ocecupied a site somewhat nearer the seat than the modern fortress. Several inseripthins hive been found on the spot, wiich sttest the colonial rank of Xulturnum as late as the age of the Antonines. (Munnsen, I. R. A. 35353539.)
[E. H. B.]
VLLTLRNT'S (Oosoodzov̂pvos: Tolturno), the minst considerable river of Campania, which has its arves in the Apennines of Satnoium, about 5 miles S . of Aufidena flows within a fer miles of

Aesermia on its left bank. and of Venafrum on its right, thence pursues a SE. course for ahont 35 miles, till it receives the waters of the Calor (Calore), after which it turns abruptly to the W:IF., passes under the walls of Casilinum (Capoua), and tinally discharges itself into the Tyrthenian sea about 20 miles below that city. Its mouth was marked in ancient times by the town of the same name (Valturnum), the site of which is still occupied by the modern fortress of Castel Volturno [Vulturncm]. (Strab. v. pp. 238, 249; Plin. iii. 5. s. 9; Mel. ii. 4. § 9.) The Vulturnus is a deep and rapid, but turbid stream, to which cbaracter we find many allusions in the Roman poets. (Virg. Aen. vii. i29; Ovid. Met. xv. 714; Lucan. ii. 423; Claudian. Paneg. Prob. et Ol, 256; Sil. Ital. viii. 530.) A bridge was thrown over it close to its mouth by Domitian, when be constructed the Via Domitia that led from Sinuessa direct to Cumae. (Stat. Sillv. iv. 3. 67, \&e.) From the important pusition that the Vulturnus occupies in Campania, the fertile plains of which it traverses in their whole extent from the foot of the Apennines to the sea, its name is frequently mentioned in history, especially during the wars of the Romans with the Campanians and Sanmites, and again during the Second Punic War. (Liv. viii. 11, x. 20, 31, axii. 14, \&c.; Polyb. iii. 92.) Previous to the construction of the bridge above mentioned (tha remains of which are still wisible near the modern Castel Volturno), there was no bridge over it below Casilinum, where it was crossed by the Tia $A_{1}$ pia. It appears to have been in ancient times navizable for small vessels at least as far as that city. (Liv. xsvi. 9; Stat. Silv, iv. 3. 77.)
its only considerable tributury is the CaLor, which brings with it the waters of several other streams, of which the most important are the T.imazes and Sanates. These conbined streams bring down to the Vulturnus almost the whole waters of the land of the Hirpini; and hence the Calor is at the print of junction nearly equal in macnitude to the Valturnus itelf. [E. H. B.]

Vungus, ITCUS, in Nurth Gallia, is placed by the Antonine Itin. on the road from Durucortoram (Reins) to Angusta Trevirorum (Trier). Vungus is between Durocortorum and Elxissum (Iplsch, Ivois), or Epusum [Eroissum], and marked xxii. leugae from eacb place. The direetion of this road from Reims is to the passare of the Mous or Meuse at Mouson; and before it reacles Irois it brings us to a place uamed Vonc, near the river Aisne, a little above Attigni This is a good example, and tbere are many in France, of the old Gailic names continuing nuclanged. Flodaard, in his history of Reims, spraks of "Municipium Vongum,", and the "Pagus Vongensis cirea Axounae ripas." The Axomna is the Aisne. The Roman road may be traced in several places between Reims and $V o n c$; and there is an indication of this road in the place named Vau d'Etré (de strata), at tha passage of the river Suippe.
[G. L.]
UXACONA, a town belonging apparently to tho Cornavii in Britannia Romana, on the road from Dera to Londinium, and between Urioconium and Pennocrucium. Camden (p. 653) and others identify it with Okenyate, a villigge in Shropshire; Horsley (p.419) and others with Sheriff IIales.
[T. H. D.]
 A town of the Areyaci in Ili.pania Tarraconehsis, on
the road from Asturica to Caesaraugusta, 50 miles W. of Numantia, and in the neighbourhood of Clnnia (Itin. Ant. p. 441), where, however, the more recent editions read Vasama. (Plin. iii. 3. s. 4 ; Flur. iii. 22; Sil. Ital. iii. 384.) It is called Uxuma in the Geogr. Rav. (iv. 43); aud according to Ukert (ii. pt. i. p. 455), is probably the 'A $\xi$ eiviov of Appiad (vi. 47). Now Osma.
[T. H. D.]
UXAMABARCA (Oísqua\&ápкa, Ptol. ii. 6. § 53), a town of the Autrigones in Hispania Tarraconensis. (Murat. Inser. p. 1095. 8.) Ukert (ii. pt. i. p. 446) identifies it with Osma in Biscaya. [T. H. D.]

UXANIIS INSULA, for so the name should be read in the Maritime Itin., is I'liny's Axantos (iv. 30 ), an island off the Atlantic coast of Gallia. Uxantis is Ouessant, or Ushant, as the English ofteu write it, a small island belonging to the department of Finistire, and ncarly in the latitnde of Brest.
[G. L.]
 by the Geogr. Rav. (v. 30) Uxeli, a city of the Dumnonii in Britannia Romana. Camden (p. IS) identifies it with the little town of Lostwithiel in Cornwall ; whilst Horsley (p. 378) and others take it to be Exeter.
[T. H. D.]
UXELLODU'NUM, in Gallia. In n. c. 51 Drappes a Senon and Lncterins a Cadurcan, who had given the Romans mnch tronble, being pursned by C. Caninins Rebilus, one of Caesar's legates, took refuge in Uxellodunnm, a town of the Cadnrei (B. G. viii. 32-44): Uxellodunum was in a pasition naturally strong, protected by rocks so steep that an armed man conld hardly climb ap, even if no resiatance were made. A deep ralley surronaded nearly the whule elevation on which the town stood, and a river flowed at the bottom of the valley. The iaterval where the river did not flow round the steep sides of this natural fortress was only 300 feet wide, and along this part ran the town wall. Close to the wall was a large spring, which supplied the town during the siege, for the inhabitants conld not get down the rocks to the river for water withont risk of their lives from the Roman missiles. Caninius began his blockade of Uxellodunum by making three camps on very high ground, with the intention of gradually drawing a vallum from each camp, and surrounding the place. On the river side his camps were of conrse separated from the town by the deep valley in which the river flowed; he may have planted two carops here and one on the land side of Uxellodunnm.

The townsmen remembering what had happened at Alesia the year before, sent ont Lucterius and Drappes to loring supplies into the place. Lucterins and Drappes took all the fighting men for this parpose except 2000, and they collected a large quantity of corn; hat as Lucterins was attempting to carry it into the town by night, the Romans surprised him, and ent his men to pieces. The other part of the force which had gone ont was with Drappes about 12 miles off. Caninios sent his cavalry and light German troops against Drappes to surprise him, and he followed with a legion. H:s success was most complete. Druppes was taken prisoner and his force destroyed or captnred. Caninius was now enabled to go on with bis circumvallation withont fear of interruption from without, and C. Fabins arriving the next day with his troops undertuak the blackade of part of the town.

Caesar hearing the news abont Uxellodnnom and resolving to check all further risings in Gallia by
one signal example more, hurried to the place with all his cavalry, ordering C. Calenus and two legions to follow him by regular marches. He fonnd the place shnt in, but it was well supplied with provisions, as the deserters told him; and there remained nothing to do but to cnt off the towasmen from the water. By his archers and slingers, and by his engines for discharging missiles (tormenta) placed opposite those parts of the town where the descent to the river was easiest, he attempted to prevent the enemy from coming down to the river to get water. His next uperation was to cut them off from the spring, and this was the great operation of the slege on which depended the capture of the town. Caesar dealt with his enemies as a doctor with a disease - he cut off the supplies. (Frontious, Strat. iv. 7. 1.) He moved his vinese towards that part of the town where the spring lay under the wall, and this was the isthmus which connected the hill fort with the open country. He also began to cunstruct mounds of earth, while the townsmen from the higher ground annoyed the Romans with missiles. Still the Romans pushed on their vineae and their earthworks, and at the same time began to form mines (cunicnli) to reach the source of water and draw it off. A mound of earth 9 feet high was constrncted, and a tower of ten stories was placed upon it, not high enongh to be on a level with the top of the wall, but high enough to command the snmmit level of the spring. Thus they prevented the enemy from reaching the spring, and a great number of cattle, horses, and men died of thirst. The townsmen now tumbled damu blazing barrels filled with fat, pitch, and chips of wood, and began a vigorous onset to prevent the Romans from quenching the flames; for the burning materials being stopped in their descent hy the vineae and mounds, set the Roman works on fire. On this Caesar ordered his men to scale the heights on all sides and to dirert the defendants from the land side by a feint of attacking the walls. This drew the enemy from the fire; and all their force was employed in manoing the walls. In the meantime the Romans put ont the fire or cut it off. The obstidate resistance of the enemy was terminated by the spring being completely dried up by the diversion of the water through the subterraneons passages which the Romans had constructed; and they surrendered after many of them had died of thirst. To terrify the Galli by a signal examjle, Caesar cut off the hands of all the tighting men who remained alire.

The attack and defence of Uxellodunnm contain a full description of the site. This hill-fort was surrounded by a river on all sides except one, and on this side also the approach to it was steep. It is agreed that Usellodunum was somewhere either on the Oltis (Lot) or on the Daranius (Dordogne). D'Anville places it at Puech dIssolu, on a small stream named the Tourmente, which fors into the Dordogne after passing Prech d'Issolu. He was informed by some person acquainted with the locality that the spring still exists, and we may assume that to be trie, for Caesar could not destroy the source: he only drew off the water, so that the be-ieged conld not get at it. D'Anville adds that what appeared to be the entrance of the place is called in the country le portail de Rome, and that a hill which is close to the Puech, is named Bel-Castel. But this distingnished geographer had no exact plan of the place, and had not seen it. Wakkenaer (Géog. des Ciaules, i. p: 353) athims that the plan of Puech
qaule, i. p: 353) athims that the plan of
d'Issolu made by M. Cormunn, at the request of Tingot does not eorrespond to the description in the Gallic War, for the river Tourmente washes only one of the four sides of this bill; he also says, that nothing appears casier than to turn the river towards the west on the north side of the town, and to prevent its course being continued to the south. But the author of the eightb book of the Gallic War says that Caesar could not deprive the defenders of Uxellodunum of the water of the river by diverting its course, "for the river flowed at the very foot of the beigbts of Uxellodunum, and could not be drawn off in any direction by sinking ditches." There is a plan of Capdenac in Caylus' Antiquités (tom, v. pl. 100, p. 280), and Walckenaer observes that this also corresponds very imperfectly with the description. The researches of Champollion (Nouvelles Recherches sur Uxellodunuin), which are cited by Walckenaer, appeared in 1820 . Walckenaer makes some objection to Capdenac, on grounds which are not very strong. He says that the Lot is above 300 feet wide where it surrounds Capdenuc, and one cannot conceive how archers placed on one bank could have prevented the besieged from getting water on the otber side. If the archers and slingers were on the river in boats or rafts, which is likely enougb, this objection is answered, even if it be true that an a cher or slinger cunld nut kill a man at the distance of 300 feet. Walckenaer makes some other objections to Capdenac, but they are mainly founded ofl a misunderstanding or a perversion of the Latio text.

It is possible that we have not yet found Uxellodunum, but a journey along the banks of the Lut, for that is more probably the river, might lead to the discosery of this interesting site of Caesar's last great military operation in Gallia. The position of the place, the attack, and the defence, are well described; and it cannot be difficult to recognise the site, if a man shonld see it before his eyes. Nothing cuuld be easier to recognise than Alesia. It is impossible for any man to doubt about the site of Alesia who has seen Alise [Manveris]. In the case of Uxellodunum, we have not the help of a corresponding modern name, unless it be a place not yet divcovered. [ $\mathrm{C}, 1$. ]
UXELLODUNDM, a station on the wall of Madrian in Bitannia Romana, where the Cuthors 1. Romanornu was in garrison (Not. Imp.). Probatly Brough.
[T. H. D.]
UXELLTM (Oй $\in \lambda \lambda a v$, Ptol. ii. 3.88 ), a town of the Selgovae in Britannia Barbara. Canden (p. 1193) tukes it to have been on the river liuse in Fusedale; whilst Horsley (p.366) identifies it with Cacrlarerock near Dumfries.
[T.H. D.]
UXENTUM (OÜGevTuv, Ptol.: Eth. Uxentimns: Ugento), a town of Calabria, in the territory of the Sallentines, situated about 5 miles from the seacoast, and 16 from the lapygian Promontory (Capo di Leuca). It is mentioned by both Pliny and Ptoleny among the inland towns which they assign to the Sallentines, and is placed hy the Tabnla on the road from Tarentum to the extrenity of the jeninsula. (Plin. iii. 11. s. 16; P'ol. iii. 1. § 76 ; Tab. Peat.). The name is corruptly written in the Tabula Ubintum, and in Pliny the Mss, give Ulentini, for which the older editors had substitnted Valentini. Ilence Ptoleny is the only anthority for the form of the name (though there is no doubt that the place meant is in all cases the same); and as cuins lave the Greeli- lerend OZAN, it in doulthul
whether Uxentum or Uzentum is the more correct torm. The site is clearly marked by the modern town of Ugento, and the ruins of the ancient city were still risible in the duys of Galateo at the foot of the hill on which it stands. (Galateo, de Sit. Iapyg. p. 100; Romanelli, vol. ii. p. 43.) Many tombs also have been found there, in which coins, vases, and inscriptions in the Dessapian dialect have been discovered.
[E. H. B.]

COIN OF UXENTEM.
UXENTUS ( $\tau \delta$ O $\ddot{\xi} \epsilon \nu \tau 0 \nu, \mathrm{Ptol}$. vii. 1. §§ 24,76), a chain of mountains in the Deccan of India, between lat. $22^{\circ}$ and $24^{\circ}$ and long. $136^{\circ}$ and $143^{\circ}$, probably those called Gondrounc. They formed the watershed of several rivers which flowed into the Bay of Bengal, us the Adamas, Dusaron and Tyndis. [V.]

U'Xll (Oügtot, Arrian, Anab. iii. 17; Strab. xi. p. 524, sv. Pp. 729, 744), a tribe of ancient Persis, who lived on the nortbern borders of that province between Persis and Snsiana, to the E. of the Pasitigris and to the $W$. of the Oroatis. They were visited by Alexander the Great on his way from Susa; and their capital town, Uxia (Strab. Xv. p. 744 , was the scene of a celebrated siege, the details of which are given by Arrian nnd Curtius. It has been a matter of considerable discussion where this city was situated. The whule question has been carefully examined by the Baron de Bode, who has personally visited the localities lie describes. (Geogr. Journ. xiii. pp. 108-110.) He thinks Uxia is at present represented by the ruins near ShikaftoliSulciman in the Bakhtyari Mountains, to the E. of Shuster.
[V.]
UL, a district of Western Asia, to which the prophet Job belonged. (Jub, i. 1.) It cannot be certainly determined where it was; hence, learned men bave placed it in very different localities. Wimer, who has examined the question, iuclines to place it in the neighbourhoud of Edum, adjoining Arabia and Chaldaea. (Biblisch. Realwörterb. \&. r. L'z.) The people are perlaps represelited in classiral geography by the Aojoĩat or Aioita, of Ptolemy (v. 19. § 2), a tribe who lived on the borders of Babylonia. In Genesis x. 23, Uzz is called the son of Aram : hence Josephus bays, Oひ̋oos ктi§ft
 but there is no sufficient evidence to show that the "land of $\mathrm{Uz}^{\text {" }}$ of Job is connected with Northerv Mesupotamia.
[V.]
UZill ( Oü̧ita, or Oü乌uka, Ptol. iv. 3. §37), a town of Byzacium in Africa Propria, lying S. of Hladrumetum and Raspina, and W. of Thysdus. (Cf. Hirt. B. Afr. 41, 51.)
[T. H. D.]

## X.

XANTHUS ( $\Xi \alpha \nu \theta 0 s: E t h, ~ \Xi \alpha \nu \theta$ ios), the greatest and most celebrated city of Lycia, was situated according to Strabo (xix. p. 666) at a distance of 70 stadia from the mouth of the river Xanthus, and according to the Stadiasmus ( $\$ 247$ ) only 60 stadia. Iliny (v. 28) states the distance at 15 Roman u iles,
which is much too great. (Comp. Steph. B. s. r.; Ptol. v. 3. § 5 ; Mela, i. 15 ; Polyb. xxvi. 7.) This famons city was twice destroyed, on each of which nccasions its inluabitants defended themselves with undaunted ralour. The first catastrophe befell the city in the reign of Cyrus, when Harpagus besieged it with a Persian army. On that occasion the Xanthians buried thenselves, with all they possessed, under the rains of their city. (Herod, i. 176.) After this eveat the city must have been rebuilt ; for during the Roman civil wars coasequent upon the murder of Caesar, Xanthus was invested by the army of Bratus, as its inhabitants refused to open their gates to him. Brutus, after a desperate struggle, took the city by assanit. The Xanthiaes continued the fight in the streets, and perished with their wives and children in the flames, rather than submit to the Romans. (Dion Cass. xlvii. 34; Appian, B. C. iv. 18, foll.) After this catastrophe, the city never recovered. The chief buildings at Xanthus were temples of Sarpedon (Appian, l. c.), and of the Lycian Apolla (Diod, v. 77.) At a distance of 60 stadia down the river aad 10 stadia from its mouth, there was a saactuary of Leto on the bank of the Xanthus. (Strab, l, c.) The site of Xanthus and its mngnificent ruins were first discovered and described by Sir C. Fellows in his Excursion in Asia Minor, p. 225, foll. (comp. his Lycia, p. 164, foll.) These roins stand near the village of Koonik, and consist of temples, tombs, triumphal arches, walls, and a theatre. The site, says Sir Charles, is extremely romantic, upon beautiful bills, some crowned with rocks, others rising perpendicularly from the river. The city does not appear to have been very large, but its remains show that it was highly ornameated, particularly the tombs. The architecture and senlptures of the place, of which many specimens are in an excellent state of preservation, and the inseriptions in a peculiar alplabet, have opened up a page in the history of Asia Minor previonsly quite nnknowa. The engravings in Fellows' works furnish a clear idea of the high perfection which the arts must have attained at Xanthos. (See also Spratt and Forbes, Travels in Lycia, i. p. 5, and ii., which contains an excellent plan of the site and remains of Xanthus; F. Brann, Dic Marmorwerke von Xunthos in Lykia, Rhein. Mus. Neue Folge, vol. iii. p. 481, foll.)

A large collection of marbles, chiefly sepulcbral, discovered at Xanthas by Sir C. Fellows, and brought to England in 1842 and 1843, has been arranged in the British Museum. Of these a full account is given in the Supplement to the Penny Cyclopaedia, vol. ii. p. 713, foll.
[L. S.]
XANTHUS ( $\Xi a ́ v \theta o s$ ), an important river in the W. of Lycia, which is mentioned even in Homer (Il. ii. 877, r. 479), and which, according to Strabo (xiv. p. 665), was anciently called Sirbes, that is in Phoenieian and Arabic "reddish yellow." so that the Greek name Xanthus is only a translation of the Semitic Sirbes or Zirba. The Xanthus bas its sources in Mlount Tanras, on the frootiers between Lycia and Pisidia, and flows as a navigable river in a SW. direction through an extensive plain ( $\quad$ ELDOo $\pi \in \bar{\delta} i o v$, Herod. i. 176), having Mount Bragns on the W. and Massicytes on the E., towards the sea, into which it discharges itself abont 70 stadia S. of the city of Xanthus, and a little to the NW. of Piaara. (Herod. l. c.; Ptol. v. 3. § 2; Dion. Per. 848 ; Ov. Met. ix. 645 ; Mela, i. 15 ; Plin. v. 28.) Now the Etshen or Essenide. (Fellows, Lycia, pp. 123, 278.)

Respecting Xaathos as a name of the Trojan river Scamander, see Scamander.

XANTHUS, [BuTh notum.]
XATHR1 ( Edepot, Arrian, Anab. vi. 15), a tribe $^{\text {a }}$ of free Indians mentioned by Arrian as dwelling along the banks of the Hydraotes (Iravati) in the Panjab. There can be little doubt that they derive their name from the Indian caste of the Kshatriyas. [V.]

XENAGORAE INSULAE (Zevaर́pou vî̃ot), acoording to Pliny (v. 35), a gronp of eight small islands off the coast of Lycia, which the Stadiasmus ( $\S 218$ ) states were situated 60 stadia to the east of Patara. They are cormmonly identitied with a group of islands in the bay of Kalamaki.
[L. S.]
XEN1PPA, a small place in the NE. part of Sogdiana, neticed by Curtius (viii. 2. § 14); perhaps the present Urtippa.
[V.]
XEROGYPSUS ( $\exists \eta \rho \rho ́ \gamma v \psi a s$, Anna Comn. vii. 11, p. 378, Bonn), a small river in the SE. of Thrace, which falls into the Propontis, nut far from Perinthus. In some maps it is called the Erginus, upon the authority of Mela (ii. 2).
[J. R.]
NERXE'NE ( $\Xi \in \rho \xi \eta \nu \eta$, Strab. xi. p. 528 ), a district on the Euphrates, in the NW. part of Armenia, more properly, lowever, belonging to Cappadoeia, It is called Derxene by Pliny (v. 24. s. 20), and this perbaps is the more correct name. (Cf. Ritter, Erdk. x. p. 769.)
[T. H. D.]
XIME'NE ( $(\not \subset \dot{\eta} \nu \eta)$, a district in the most southern part of Poatus, on the Halys, and near the frontiers of Cappadocia, was celebrated for its salt-works. (Strab. sii. p. 561. )
[L. S.]
XION ( $\Xi(\omega \hat{p}$, Scylax, p. 53), a river on the W. coast of Libya Interior.
[T. II. D.]
XIPHONIUS PORTUS ( $\Xi i \phi \dot{\nu} v \in i o s \lambda_{1} \mu \hat{\eta} \nu$, Scyl.
p. 4: Bay of Augusta), a spacious harbour on the E. coast of Sicily, betweea Catana and Syracuse. It is remarkable that this, though one of the largest and most importaat natural harbours on the coasts of Sicily, is ravely mentioned by ancient authors. Scylax, indeed, is the only writer who has preserved to us its name as that of a port. Strabo speaks of the Xiphonian Promontory ( $\tau \delta \tau \hat{\eta} s$ छ$\grave{\phi \omega}$ vias àkpштйpoov, vi. p. 267), by wlich he evidently meaas the projecting headland near its entrance, now called the Capo di Santa Croce. Diodorns also mentions that the Carthaginian fleet, in n. c. 263 touched at Xiphonia on its way to Syracuse (eis $\tau \grave{\eta} \nu$, छゅфuviav, xxiii. 4. p. 502). None of these authors allade to the existence of a town of this name, and it is prohsbly a mistake of Stephanus of Byzantium, who speaks of Xiphonia as a city (s. v.). The harbour or bay of dugusta is a spacions gulf, considerably larger than the Great Harbour of Syraeuse, and extending from the Capo di Santa Croce to the low peninsula or promontury of Magnisi (the aneient Thapsus). But it is probable that the pert designated by Scylax was a much smaller one, clese to the modern city of Augusta, which occupies a low peninsular point or tungue of land that projects from near the N. extremity of the bay, and strongly resembles the position of the island of Ortygia, at Syracuse, except that it is not quite separated from the mainland. It is very singular that se remarkable and advantageous a situation should not have been taken advantage of by the Greek coloaists in Sicily; but we have nu trace of any ancient town on the spot, onless it were the site of the ancient Megara. [Megara.] The modern town of A ugusta, or Agosta, was fuuuded in the 13th ceatary by Frederic 11.
[E. H. B.]

XOIS（弓6ıs，Strab．xvii．p． 802 ；Ptol．iv．5．§ 50 ； Zons．Steph．B．s．v．），a town of great antiquity and considerahle size，was situated nearly in the centre of the Delta，upon an island formed by the Sebennytic nnd Phatnitic branches of the Nile．It belonged to the Sebennytic Nome．The 14 th dyoasty，accord－ ing to Manetho，consisted of 76 Xoite kings．This dynasty immediately preceded that of the shepherd kings of Acgypt．It seems probable，therefore，that X nis，from its strong position among the marsbes formed by the intersecting branches of the river， held out doring the occupation of the Delta by the Hyksos，or at least compromised with the invaders by paying them trilute．By some geographers it is supposed to be the Papremis of Herodotus（ii．59， iii．I2）．Champollion（l＇Egypte sous les Pharaons， vol．ii．p．214）believes its site to have been at Sakkra，which is the Arabian synonyme of the Cuptic Yeos and of the old Aegyptian Sh／hoo（Niebuhr： Travels，vol．i．p．75．）The road from Tamiathis to Memphis passed through Xois．
［W．B．D．］
NYLENO＇POLIS，a town said by Pliny，on the authority it would seem of Onesicritas or Nearchus， to have been founded hy Alexander the Great（vi． 23．s．26）．It must have been in the sonthern part of Sinde；but its position cannot be recognised，as Pliny himself states that the authors to whom he refers did not say on what river it was situated．［V．］

XYLICCENSES（oi छu入ıккeis Aibiotes，Ptol．iv． 6．§ 23），an Aethiopian people in Libya Interior，be－ tween the mountains Arangas and Arualtes．［T．H．D．］

XYLINE COME，a village in Pisidia，between Corbasa and Termessus，is mentioned only by Livy （ssxviii．15）．A place called Xyline，in the country of the Cissians in Pontus，is noticed by Ptolemy （v．6．§6）．
［L．S．］
MYLO＇POLIS（ $\Xi v \lambda d \sigma_{\pi 0 \lambda 1 s), ~ a ~ t o w n ~ o f ~ M y g d o n i a ~}^{\text {a }}$ in Macedonia（Ptol．iii．13．§ 36），whose inhabitants， the Nylopolitae，are mentioned by Pliny also（iv．I0． s．17）．

XY＇N1A or XY＇NIAE（ $\Xi u v i a: ~ E t h . ~ \Xi v v e v ́ s), ~ a ~$ town near the southern confines of Thessaly，and the district of the Aenianes（Liv．xxxiii．3），which gave its name to the lake Xynias（ $\Xi v y i a s)$ ，which Ste－ phanus confounds with the Boebeis（Apollon．Rhod． i． 67 ；Catull．1xiii． 287 ；Steph．B．s．v．Euvía）． Xynia，baving been deserted by its inhahitants，was Ihundered by the Aetolians in r．c． 198 （Liv．xxxii． 13）．In the following year Flamininus arrived at this place io three days＇march from Heraclea（Liv． sxsiii．3；comp．Liv，xxsix．26）．The lake of Ny－ nias is now called Tankli，and is described as 6 miles in circumference．The site of the ancient city is marked by some remaios of ruined edifices upon a promontory or peninsula in the lake．（Leake，North． ern Greece，vol．i．p．460，rol．iv．p． 517 ．）

XY＇PETE．［ATTICA，p．325，a．］

## Z．

7．ABA（Zd́6a），a small place on the northern coast of Taprobane or Ceylon，noticed by Ptolemy （vii．4．§ 13）．It has not been identified with any modern site．

Z．ABAE（Zá6at，Ptol．i．I4．§§ 1，4，6，$\overline{7}$ ，vii． 2．§ 6 ，viii． $27 . \S 4$ ），a town of some importance in India intra Gangem，on the sinus Gangeticus， perhaps the modern Ligor．

ZA＇BATUS（Zábatos），a river of Assyria，first noticed by Xemophon（Anab．ii．5．§ 1，iii．3．§ 6）， and the same as the Lycus of Polybins（v．51），

Arrian（Anab．iii．I5），and Strabo（ii．p．79，xvi． p．737）．It is called Zabas by Ammianus（xviii．14） and Zerbis by Pliny（vi．26，a．30）．There can be no doubt that it is now represented by the Greater $Z a b$ ，a river of considerable size，which，rising in the mountains on the confines of Armenia and Kurdistán， flows into the Tigris a little to the S ．of the great mound of Nimruid（Tavernier，ii．c．7；Layard， Nineveh and its Remains，i．p．192．）
［V．］
ZABF．［Berzabda．］
ZABE（Zá8 $\eta$ ，Procop．B．Vand．ii．20，p．501， ed．Boon），a district in Mauretania Sitifensis．Ac－ cording to the Not．Imp．it contained a town of the same name，which must be that called Zabi in the Itin．Ant．（p，30）．Lapie identifies it with the present Msilah．
［T．H．D．］
ZACATAE（Zakáral，Ptol．v．9．§ 16），a people of Asiatic Sarniatia．
［T．II．D．］
ZACYNTHUS（Záкvvөos：Eth，Zaкvvөıos： Zante），an island in the Sicilian sea，lying off the western coast of Peloponnesus，opposite the promon－ tory Chelonatas in Elis，and to the S．of the island of Cephallenia，trom which it was distant 25 miles， according to Pliny，（iv，12．s．19）but according to Strabo，only 60 stadia（s．p．458）．The latter ia very nearly correct，the real distance being 8 Eo－ glish miles．Its ciroumference is stated by Pliny at 36 M. p．，by Strabo at I 60 stadia ；but the island is at least 50 miles round，its greatest length being 23 English miles．The island is said to have been originally called Hyrie（Plio．l．c．），and to bave been colonized by Zacyathos，the son of Dardanus，from Psophis in Arcadia，whence the acropolis of the city of Zacynthus was named Psophis．（Paus．viii． 24. $\S 3$ ；Steph．B．s．v．）We hare the express state－ ment of Thucydides that the Zacynthians were a colony of Achaeans from Peloponnesus（ii．66）．In Horner，who gives the island the epithet of＂woody＂ （v́入ńers and $\dot{v} \lambda \eta \in \sigma \sigma \alpha$ ），Zacynthus furms part of the domiaions of Clysses．（Il．ii．634，Od．i．246，ix． 24，xvi．123， 250 ；Strab．x．p．457．）It appears to have attaioed considerable importance at an early period；for according to a very aocient tradition Saguntum in Spaiu was founded by the Zacyntbians， in conjunction with the Rutuli of Ardea．（Liv，xxi． 7 ；Plin．xvi．40．s． 79 ；Strab．iii．p．I59．）Bocchus stated that Saguntum was founded by the Zacyn－ thians 200 years befure the Trojan War（ap．Plin． l．c．）In consequence probably of their Acbaean origin，the Zacynthians were hostile to the Lacedac－ monians，and bence we find that fugitives from Sparta fled tor refuge to this istand．（Herod．vi．70，is．37．） In the Peloponnesian War the Zacynthians sided with Athens（Tbuc．ii．7，9）；and in B．c． 430 the Lacedaemonians made an unsuccessful attack upon their city．（Ib．66．）The Athedians in their ex－ pedition against l＇ylus found Zacynthus a conve－ nient station for their fleet．（ld．iv．8，13．）The Zacynthians are enumerated among the antonomous alles of Athens in the Sicilian expedition．（Id．vii． 57．）After the Peloponnesian War，Zacynthus seems to have passed under the supremacy of Sparta ：for in n．C．374，Timotheus，the Athenian commander， on his return from Corcyra，landed some Zacynthian exiles on the island，and assisted them in establishing a fortified post．These must have belonged to the anti－ Spartan party ；for the Zacyathian governmeot ap－ plied for belp to the Spartans，who sent a fleet of 25 sail to Zacynthns．（Xed．Hell．vi．2．§ 3 ；Diodor．xy， 45，seq．；as to the statements of Dindorus，see Grote， IIst．of Greece，sol．x．p．192．）The Zanynthians
assisled Dion in his expedition to Syracuse with the view of expelling the tyrant Dionysius, e.c. 357. (Diod. xvi. 6, seq.; Plut. Dion, 22, seq.) At the time of the Roman wars in Greece we find Zacynthns in the possession of Philip of Mlacedon. (Polyb. r. I02.) In n.c. 211 the Roman praetor M. Valerius Laevinus, took the city of Zacynthus, with the exception of the citadel. (Liv. xxvi. 24.) It was afterwards restored to Philip, hy whom it was finally surrendered to the Romans in B. C. 191 . (Id. xsxvi. 32.) In the Mithridatic War it was attacked by Archelaus, the general of Mithridates, but he was repulsed. (Appian, Mithr. 45.) Zacynthus subsequently shared the fate of the other lonian islands, and is now snbject to Great Britain.

The chief town of the island, also named Zacynthus (Liv. xxvi. 14 ; Strab. x. p. 458 ; Ptol. iii. 14. § 13), was situated opon the eastern shore. It site is occupied by the modern capital, Zante, bat nothing remains of the ancient city, except a few columns and inscriptions. The situation of the town upon the margio of a semi-cirenlar bay is very picturesque. The citadel probably occupied the site of the modern castle. The beantiful situation of the city and the fertility of the island bave been celebrated in all ages ( $\kappa \alpha \alpha^{\prime} \pi \delta \dot{\lambda} \lambda i s$ à
 It no longer deserves the epithet of "woody," given to it by Homer ( $l$. c.) and Virgil ("nemorosa Zacynthos," Aen. iii. 270) ; but its beautiful olivegardens, vineyards, and gardens, justify the Italian proverb, which calls Zante the "flower of the Levant."

The most remarkable natural phemomenon in Zonte is the celebrated pitch-wells, which are acenrately described by Herodotus (iv. 195), and are mentioned by Pliny (xxxv. 15. s. 51). They are sitnated about 12 miles from the city, in a small marsliy valley near the shore of the Bay of Chieri, on the SW. coast. A recent observer has given the following account of them: "There are two springs, the priacipal surrounded by a low wall ; here the pitch is seen hubbling up under the clesr water, which is about a foot deep over the pitch itself, with which it comes out of the earth. The pitch-bubbles rise with the appearance of an Iodia-ruhber bottle until the air within bursts, and the pitch falls back and runs off. It produces about three barrels a day, and can be used when mised with pine-pitch, thongh in a pure state it is comparatively of no ralue. The other spring is in an adjoining vineyard; but the pitch dues not bubble up, and is in fact only discernible by the ground having a burnt appearance, and by the feet adhering to the smiface as one walks over it. The demand for the pitch of $Z$ ante is now very small, vegetable pitch being preferable." (Bowen, in Murray's Handlook for Greece, p. 93.)

The existence of these pitch-wells, as well as of numerous hot springs, is a proof of the volcanic

coin of zacystues.
agency at work in the island ; to which it may be added that earthquakes are frequent.

Pliny mentions Mt. Elatus in Zacynthns (" Mons Elatus iki nobilis," Plin. l. c.), prubably Mt. Skopo, which raises its curiously jagged summit to the beight of 1300 feet above the eastern extremity of the bay of Zante. (Dodwell, Tour through Greece, vol. i. p. 83, seq.)

## ZADRACARTA. [TAGAE.]

ZAGATIS (Záyatis), a coast river in the E. part of Pontus, discharging itself into the Euxine about 7 stadia to the east of Athenae; probably the same river as the modern Sucha Dere. (Arrian, Peripl. P. E. p. 17; Anon. Peripl. P. E. 1. 15.) [L. S.]

ZAGO'RUS, or ZAGO'RUM (Zá $\gamma \omega \rho o s$, or Zá $\gamma \omega$ pov, Marcian. p. 73: Záyetpa, Ptol. v. 4. § 5; Záरapa, Arrian, Peripl. I. E. p. 15 ; Zacoria, Tab. Peut.), a town of Paphlagonis, on the coast of the Euxine, between Sinope and the mouth of the Halys, from the latter of which it was distant about 400 stadia.
[L.S.]
ZAGRUS MONS (ঠ Záypos, t̀̀ Zárpò $5 p o s$, Polyb. v. 44 ; Ptol. vi. 2. § 4 ; Strab. xi. p. 522), the central portion of the great chain of mountains which, extending in a direction nearly N. and S. with an ioclination to the W. at the upper end, connects the mountains of Armenia and the Cancasus with those of Sasiana and Persis. It separates Assyria from Media, and is now represented by the middle and sonthern portion of the inountains of Kurdistan, the higbest of which is the well known Rovandiz. Near this latter mountain was the great bighroad which led from Assyria and its capital Nineveh into Media, and, at its base, was in all probability the site of the pass through the mountains, called by Ptolemy ai $\tau u \hat{v}$ Zárpov mú入aı (vi. 2. § 7), and by Strabo, ì M $\eta \delta \iota \kappa\rangle$ пй $\lambda \eta$ (xi. p. 525). Polybius notices the difficulty and danger of this pass (v.44), which, from Colonel Rawlinson's narrative, would seem to have lost none of its dangers (Rawlinson, in Trans. Geogr. Soc. vol. x., Pass and Pillar of KeliShin).
[V.]
ZAITHA or ZAUTHA (ZavӨá, Zosim. iii. 14), a small town or fortified place in Mesopotamia, on the Euphrates, to the SE, of Circesium. It is said by Ammianns to have been called Zaitha (or more properly Zaita) from the olive trees (xxiii. 5. § 7), which we mnst suppose grew there, though the climate is very hot for that tree. He adds that it was celebrated for the monument erected by the soldiers to the emperor Gurdianns. Zosimns, on the other hand, places this monmment at Dara (l. c.), in which Entropins agrees with him (ix. 2). Ptolemy calls it Zeitha (Zeiea, v. 18. § 2). [Dura.] [V.]

ZALACUS ( $\tau \grave{\text { Z Zádaкov б́pos, Ptol. iv. 2. §§ 14, }}$ 19), a monntain claain of Mauretania near the river Chinalaph, the lighest and most rugged branch of the Atlas in this neighbourhood. Now the Han-nash-reese or Gueneseris. (Cf. Shaw, Travels, i. p. 74.)
[T. H. D.]
ZALDAPA (Zá ${ }^{\prime} \delta \overline{a \pi a}$, Procop. de Aed. iv. 11. p. 308), a town in the interior of Lower Moesia. It is called Saldapa by Theophylact ( $\Sigma^{\prime} \lambda \delta \alpha \pi a$, i. 8), and Zeldepa by Hierocles. (Z $\in \lambda \delta \in \pi a$, p. 637).
[T. H. D.]
 § 3), a small river on the coast of Paphlagonia, discharging itself into the Enxine at a distance of 210 stadia west of the Halys. (Marcian. p. 73.) At its mouth there was a small town of the same name, about 90 stadia from Zagorus, or Zagorum (Anon. Microsoft (1)

Peripl. P. E. p. 9) ; and this place seems to be the same as the one mentioned in the Peut. Table under the corrupt mame of Halega, at a distance of 25 Roman miles from Zacoria, 1Iamilton (Researches, i. p. 298) identifies the site of Zalecus with the modern Alutcham, where some ruius and massive walls are still scen.
[L. S.]
ZALICHES (ZaNf×ns), a town in the interior of Paphlagonia, or what, at a late period, was called Hell-1upontus, probably near some mountain forest, as Iliprocies (p.701) call it इádtos Zanixךs (Nuvell. 28 ; Conc. Nicapn. ii. p. 355 , where a bishop of Zaliches is mentioned, and p. 163, from which it would seen that at one time the phace bore the name of Lentonpolis.)
[1. S.]
ZAMA (Zaua $\mu$ eí§ $\omega v$, Ptol. iv. 3. § 33), a town of Numidia, stuated five days' journey to the SW: of Carthage. (Polyb. xv. 5; Liv, $x x x .29$.) It lay between Síces Veneria and Suffetula, and bore the mame of "Recia;" whence we find it erroneou-ly writren Zamareigia in the Tab. Peut. Zama is particularly renorned as the scene of Scipio's victory over Hamibal in $201 \mathrm{~B} . \mathrm{C}$. It was a very strong place, and hence adopted as a residence by Juha, who bronght his barem and his treasure bither, as to a place of safety. (Hirt. B. Afr. 91; Vitrav. viii. 3. (or 4.) § 24.) Strabo represents it as destroyed by the Romans, and as being in a rainous state in bis time ( $x$ vii. pp. 829,831 ). But it must liave been subsequently restored, since Pliny (r. 4. s. 4) mentions the Zanense oppidum as a free city. It also appears in the Tab. Peut,, and a bishop of Zama is mentioned by St. Augustine. (De C'iv. Dei. rii. 16 ) In an inscription in Gruter (364. 1) Zama Regia appears with the title of a colony (Col. Aelia Hadriana); though it is not mentioned as a coluny in any of the ancient writurs. It is the present Jama. SE. of Kess. (Cf. Dion Cass, xlviii. 23: 太.ll. J. 60, 61.)
[T. H. D.]
ZAMA (Z $i \mu a)$, a town of the district of Chammanene, in Cappadocia, on the borders of Galatia (Ptul. r. 18. § 12 ; Tab. Peut.) [L. S.]

ZAMAE FONS, a spring in Africa, probably near the town of Zama, which had the property of rendering the voice clear and strong. (Plin. xxxi. 2. s. 12.)
[1. H. D.]
Z.1MAZII (Zapásim, Ptol iv. 6 § 18), a people of Libva lnterwor.
[T, H. D.]
ZAMENSE OPPIDUME. [ZAMA.]
ZANIES (Záuns, Ytol. vi. 7. §§ 20, 21), a mountain chain in the interior of Arabia Felix, which stretched as far as the borders of Arabia Deserta. It is prubably the preseut Jabel Aared, or Imaryeh.
[T. H. D.]
ZANCLE. [Messina.]
ZAO PROMONTORIUN, a headland on the coast of Gallia Narbonensis, and east of Massilia (Marscille). Plity (iii. 4), after mentioning Massilia says, "Promontorium Kan, Citharista Portus. Regio Camatullicoram. Dein Suelteri." It is not eany to identity /ans. Ckert conjectures that it may he Bec de Sormion. In the Statistique du Dép. des Bouches clu Khoine, it is suppused to be Cap de la Croisette. This is a rocky coast, which has andergone little change for many centuries. (Ukert, Gallien, p. 120.)
[G. L.]
ZAPAORTENL. [Apavabcticene.]
ZARA (Zópa), a town in the northern part of Armenia Minor, or perhaps more correctly in l'ontus, on the road from Casearea to Sitala, and at the the time on that from Aralissas to Nicopolis. It
still bears the name of Zara or Sara. (It. Ant. pp. 182, 207, 213.)
[L. S.]
ZARADliUS (Zapáópos, Ptol. vii. 1. §27). the apper portion of the Hyphasis, the most eastern of the five rivers of the Panjab, now the Sutledge. There is some doubt about the orthography of this name, which in some editions is written Ladrades. There can be no doubt that in either cave it is derived from the Sunscrit name Satodru, and that it is the same as the Hesydrus of Pliny (vi. 17. s. 21).
[V.]
ZARAI, a tomn in the interior of Numidia, on the roall from Lamasba to Sitifis. (Itin. Ant. p. 35.) In the Tab. Peut. it is called Zaras. Variomsly identified with Jigbah, Ngaous, and Zeryah. [T. H. D.]

ZARANGI. [Drasgak.]
ZARATAE, or ZARETAE (Zapátat, Ptol. vi. 14. § 11), a people of Scythia on the lmaus. [T.H.D.] ZAlRAX (Zápa̧, Paus., I'olyb.; Záp $\eta \xi$, P'tol. : Eth. Zapipsos, Steph. B.), a town on the eastern cuast of Laconia, with a good harbour, situated npon a promontury, which is a projection of Mt. Zarax. [ Vol. 11. p. 109, b.] Like Prasiae and some other places on this part of the Laconian coast, it passed into the hands of the Argives in tie time of the Macedonian sapremacy; and this was apparently the reason why it was destroyed by Cleoaymus, the son of Cleomenes. From this disaster it never recevered. Augustus made it one of the Eleuthero-Laconian towns ; but Pausanias found in it nothing to mention but a temple of Apmllo at the end of the harbour. It is now called Hieraka, which is evidently a corruption of Zarax, and there are still ruins of the aocient town. The promostory bears the same name, and the port, which is on its northern side, is described as suall but well sbeltered. Pansanias says that Zarax was 100 stadia from Epidaurus Limera, but this distance is too great. (Paus. iii. 24. § 1 ; comp. i. 38. § 4, iii. 21. § 7 ; Pulyb. iv. 36 ; Ptol. iii. 15. § 10 ; Plin. iv. 5. s. 17 ; Steph. B. s. v.; Leake, Murea, vol. j. p. 219 ; Boblaye, Recherches, gc. p. 101; Curtius, Pelopornesos, vol. ii. p. 291.) ZARAX M1ONS. [Liconia, p. 109, b.]
ZARGIDAVA (Zap $\gamma i \delta \bar{a} v a$, Ptol. iii. 10. § 15). a town of Moesia Inferior, on the Danube. [T. H. D.]

ZARIASPA. [Bactra.]
ZARIASPAE. [BActRA.]
ZARIASPIS. [Bactres.]
Zatimlegeethusa. [Sabanzegethe ${ }^{2}$.]
ZAUE'CES (Zavŷkes, Herod. iv. 193), a people of Libya, dwelling in a woody and mountainous country abounding in wild beasts, to the S . of the snbsequent loman province of Africa, and near the tribe of the Maxyes. A custom prevailed among them for the women to drive the chariots in war; which Hecren conjectures may bave oceasioned the placing of the Amazons in this neichbourhood. (Ideen, ji. 1. p. 41.)
[T. H. D.]
ZAUTHA. [ZAITHA.]
ZEA PORTUS. [ATHENAE, p. 304, seq.]
\%EBULON. [PALAEstixa.]
ZEGRENSLI (Ze people of Mauretania Tingitana. $\quad[\mathrm{T} . \mathrm{H} . \mathrm{D}]$

ZEITHA (Zeita, Ptol. iv. 3. § 12), a promontory of the Regio Syrtica forming the E. point of the Syrtis Ninor.
[T. H. D.]
ZFLLA ( $\tau \dot{\alpha}$ Z $\hat{j} \lambda \alpha$ ), a town in the interiur of Poutus, on the left bank of the Iris, towards the Galatian fromtier, was believed to lave been erected on a mound constructed by Senniramis. (Strab, xii. p. 561, comp. Pp. 512, 559.) It seems to have originally been a
place consecrated to the worship of the goddess Anaitis, to whom a temple was built there by the Persians in commemoration of a victory over the Sacae. The chief priest of this temple was regarded as the sovereigu of Zela and its territory ( $Z_{\eta} \lambda \hat{\eta} \tau t s$ ). Notwithstanding this, however, it remained a small place until Pompey, alter his victory over Mithridates, raised it to the rank of a city by increasing its population and extending its walls. Zela is ceIebrated in history for a victory obtained in its vicinity by Nithridates over the Romans under Triains, and still more for the defeat of Pharnaces, about which Caesar sent to llome the fanous report "Veni, Vidi, Vici." (Plin. vi. 3 ; Appian, Mithrid. 89 ; Plut. Caes. 50 ; Dion Cass, slii. 47 , where the place is erronennsly called Zè $\in i a$; Hirt. Bell. Alez. 73 , where it is called Zielir; Ptol. v. 6. § 10 ; Hierocl. p. 701 ; Steph. B. s. v.) Zela was situated at a distance of four days' journey (according to the Peut. Table 80 miles) from Tavium, and south-east of Amasia. The elevated ground on which the town was situated, and which Strabo calls the mound of Semiramis, was, according to Hirtius, a natural hill, but so shaped that it might seem to be the work of buman hands. Accoroing to Hamilton (Researches, i. p. 306), is a black-coloured isolated hill rising out of the plain, and is now crowned with a Turkish fortress, which still bears the name of Zilleh.
[L. S.]

## ZELA'SIUM. [Posidum, p. 662, No. 4]

ZELDEPA. [Zilldapa.]
ZELE1A (Zè $\epsilon i a$ ), n town of Troas, at the foot. of Mount Ida and on the banks of the river Aesepus, at a distance of 80 stadia from its month. It is mentioned by Homer (1l. ii. 824, iii. 103), who calls it a boly town. (Comp. Strab. xii. p. 565, xiii. pp. $585,587,603$; Steph. B. s. v.) Arrian (Anab. i. 13) mentions it as the head-quarters of the Persian army before the battle of the Granicns: it existed in the time of Strabo; but afterwards it disappears. Some travellers bave identified it with the modern Biga, between Bozaegee and Sorricui. [L. S.]

ZELETIS. [ZELA]
ZENOBIL INSULAAE (Zqvo\&iov v $\eta \sigma i a$, Ptol. vi. 7. $\S 47$ ), seven small islands lying in the Sinus Sachalites, at the entrance of the Arabian Gulf. (Cf. Arrian. Per. M. Eiryth. p. 19.)

ZENODO'TIUM (Zqyō̊́rtoy, Dion Cass, xl. 12 ; Steph. B. s. v.), a strong castle in the upper part of Mesopotamia, which was held by the Parthians during the war between them and the Romans under Crassus. It is called by Plutarch, Zenodotia (Crass. c. 17). It cannot be identified with any modern site, but it was, probably, not far distant from Edessa.
[ V .]
ZENO'NIS CIIERSONESUS (Zívaros Xepoóvnoos, Ptol. iii. 6. § 4), a point of land on the N. coast of the Chersouesus Taurica in European Sarmatia, probably the narrow tongue of Arabat, between the Sea of Azof and the Putrid Sea. [T.H.D.]

ZE'PHYRE, a small island off the promontory Sammonium in Crete. (Plin. iv. 12. s. 20.)

ZEPHY'RIA. [Halicarnassus.]
ZEPHY'RIUM (Zeфט́ptov), the oame of a great number of promontories, as 1. At the western extremity of the peninsula of Myndus in Caria, now called Gumichle or Angeli. (Strab. xiv. p.658.)
2. On the coast of Cilicia, between Cilicia Tracheia and Pedias, a little to the west of the town of Anchiale. (Strath. xiv. p. 671.) It contained a fort of the same name, and wats 120 stadia from Tarsus,
and 13 miles cast of Soli. (Stadiasm. § 157 ; Tab. Peut. ; comp. Scyl. p. 40 ; Ptol. v. 8. § 4 ; Liv. sxxiii. 20 ; Plin. v. 22 ; Hierocl. p. 704.) When Pliny (xxsiv. 50) states that the best molybdaena was prepared at Zephyrium, he no doubt alludes to this place, since we know from Dinscorides (v. 100) tbat this mineral was obtained in the neighhouring hill of Coryens, and that there it was of excellent quality. Leake (Asia Minor, p. 214) looks for it near the mnnth of the river Mertin.
3. On the coast of Cilicia, near the mouth of the river Calycadnus. (Strab. xiv. p. 670 ; Ptol. v. 8. § 3.)
4. A town on the coast of Paphlagonia, 60 stadia to the west of Cape Carambis. (Arrian, Peripl. P. E. p. 15 ; Anon. Peripl. P. E. p. 6 ; Ptol. v. 4. § 2.)
5. A town and promontory on the coast of Pontus, in the country of the Musynueci, 90 stadia to the west of Tripolis. (I'tol, r. 6. § 11 ; Arrian, Perij). P. E. p. 17 ; Scylax, p. 33 ; Anon. Peripl. P. E. p. 13; Tab. Peut.). The cape still bears the name of Zafra or Zefreh, and Hamilton (Researches, i. p. 261) regards the modern Kaik Liman as oceupying the site of the ancient Zephyrinm. [L. S.]

ZEPHYRIUM PROMONTORIUM ( $\tau \grave{\text { Zon Zeфúpoon: }}$ Capo di Bruzzano), a promontory on the E. coast of the Bruttian peninsula, between Locri and the SE. corner of Bruttium. It is mentioned principally in connection with the settlement of the Locrian colonists in this part of Italy, whose city thence derived the name of Locri Epizephyrit. According to Strabo, indeed, these colonists settled in the first instance on the headland itself, which had a small port contiguons to it, but after a short time removed to the site of their permaneot city, about 15 miles farther N. (Strab. ri. pp. 259, 270.) The Zephyrian Promontory is mentioned by all the geographers in describing the coast of Bruttiom, and is undoubtedly the same now called the Capo di Bruzzano, a low bnt marked lieadland, about 10 miles N. of Cape Spartivento, which forms the SE. extremity of the Bruttian peninsula. (Strab. l. c.; Plin. iii. 5. 8. 10 ; Mel. ii. 4. § 8 ; Ptol, iii. 1. § 10 ; Steph. Byz. s. v.)
[E. H. B.]
ZEPHYRIUM (Zєфи́рiov そ́кроу, Ptol, iii. 17. § 5). 1. A promontory on the E. part of the N. coast of Crete, near the town of Apollonia. Now Ponta di Tigani.
2. A promontory on the W. coast of Cyprns, near Paphos, probably the cape which closes the bay of Baffo to the W. (Ptol. v. 14. § 1 ; Strab. siv. p. 683.)
3. A promontory in the E. part of Cyrenaica, 150 stadia to the W. of Darnis. (Strab. xxii. p. 799 , who attribntes it to Marmarica; Ptol, iv. 4. § 5; Stadias. M1. Magni, $\S \varsigma 47,48$.) Now Cape Derne.
4. Another promontory of Cyrenaica, with a harbour. (Strab, xvii. p. 838 .)
5. A promontory near Little Taposiris in Lower Aegypt, having a temple of Arsinoë-Aphrodite. (Strab. xrii. p. 800.) Hence that goddens denired the epithet of Zepharitis (Zeфupitis, Athen, vii. p. 318, D.; Callim. Ep. 31; Steph. B. s. v.).
6. A town of the Cbersonesus Taurica, mentioned only by Pliny (iv. 12. s. 26).
[T. H. D.]
ZERNES (Z $¢ \rho \nu \eta s$, Procop, de Aed.iv. 6. p. 288), a furtress in Upper Moesin, apparently the present Old Orsozva, at the mouth of the Tzarma. [T.H.D.]

ZERYNTHUS (Zitpuveos, Lycophr. 75; Steph. B. s. v.), s town of Thrace not far from the borders of the Aenianes. It contained a cave of Hecate, a tens-
ple of Apollo，and another of Apbrodite，which two deities lience derived the epithet of Zerynthian． （Cf．Liv．xxxviii．41；Ov．Trist．i．10．19；Tzetz． ad Lycophr．449，958．）
［T．H．D．］
ZESUTERA（1t．Hier．p．602），a town in the SE．of Thrace，on the Egnatian Way，between Apri and Siracellae，which Lapie identifies with Kekhra－ man．
［J．R．］
ZEUGITANA REGIO，the more northern part of the Roman province of Africa．Pliny seems to be the earliest writer who mentions the name of Zengitana（v．4．s．3）．A town of Zeugis is mentioned by Aethicus（Cosmogr，p．63），and a Zengitanns，ap－ parently a mountain，by Solinas（＂a pede Zeagi－ tano，＂c．27），which is perhaps the same as the Mons Ziguensis of Victor（de Persec．Vandal．iii．）， the present Zow－rcan；and according to Shaw （Travels，i．p．191，sq．），if the existeoce of a town or monntain so named is not alugetber problema－ tical，the province probably derived its name from either one or the other．The district was bounded on the S．by Byzacium，on the W．by Nunidia，from which it was divided by the river Tnsca（now Zaine）， and on the N．and E．by the Mare Internum．After the time of Caesar it appears to bave been called Provincia Vetas，or Africa Propria，as oppused to the later acquired Numidia．（Dion Cass．xhii．10； Plin．L．c．；Mela，i．7．）Strabo mentions it only as § Kap $\chi \eta \delta \begin{aligned} & \text { ovia，or the province of Carthage（vi．p．}\end{aligned}$ 267, \＆c．）．It embraced the modern Frigeah（which is donbtless a corruption of the ancient name of Af－ rica）or northern part of the kingdom of Tanis． Zeugitana was watered by the Bagradas，and was a very fertile conntry．There were no tawns of im－ portance in the interior，but on the coast we find Siagnl，Neapolis，Caruhis，Aspis or Clupea，Carpis， Tupes，Carthago，Castra Cornelia，Utica，and Hippo Diarrhytus．For further particulars concerning this prorince see Aprica．［T．H．D．］

ZEUGMA．1．（ฐeī $\mu \alpha$, Ptol．v．15．§ 14），a town fuunded by Selencns Nicator，in the provace of Cyrrhestica，in Syria．It derived its name from a bridge of boats which was here laid across the Euplrates，and which in the conrse of time became the sole passage o er the river，when the older one at Thapsacus， 2000 stadia to the S．，had become impracticable，or at all events very dangerous，owing to the spreading of the Arabian hordes．（Plin．v．24． s． 21 ；Strab．xvi．p．746；Steph．B．s．v．）Zengna lay on the right bank of the Enplarates，opposite to Apanea， 72 miles 516 ．of Samosata， 175 miles NE． of the maritime Selencia，and 36 miles N．of Hiera－ polis．（Plin．l c．，and v．12．s． 13 ；Strab．xvi．p． 749 ；Tah．Peut．）It was therefore opposite to the modern Bir or Biredsjik，which ocenpies the site of the aocient Apamea．（Cf．Ritter，Erdkunde，x．p． 944，seq．）In the time of Jnstiniau，Zengna had fallen into decay，but was restored by that emperor． I＇rucup．de Act．ii．9，p．237，ed．Boom．）（Cf．

Polyb．v． 43 ；Dion Cass，xl．17，xlix． 19 ；Lucan， viii． 236 ；Itin．Aut．pp．184，185，\＆c．）

2．A place in Dacia．（I＇tol．iii．8．§ 10），Man－ nert（iv．p．210）identifies it with the Pons Augusti of the Geogr．Kav．（iv．14）and Tab．Yeut．；con－ cerning which see above，p． 656 ）．［T．H．D．］

ZICCH1（Zıкхoi，Arrian，l＇erip．P．Eux．p．19）， ZINCHI（Zir $\chi 0 i$, Ptol．v．9．§ 18），or ZINGI（Plin． vi 7．s．7），a savage piratical tribe of Asiatic Sar－ inatia，on the coast of the Puntus Finxinns，between Sanigae and Achaei They are called hy Procopins Z $\hat{\eta} \chi o t$ and $\mathrm{Z} \tilde{\eta} \kappa \chi o t$（B．Goth．iv，4，B．Pers．ii．29）， and by Strabo，Zuyoi（i．p．129，xi．pp．492，495），if， indeed，he means the same people，as he places them in the interior on the Caucasns．
［T．H．D．］
ZIGAE，a people of Sarmatia，on the Tanais （Plin，vi．7．s．7）．
［T．H．D．］
ZIGERE，a place in Lower Moesia，in the neigh－ benrhood of Axiopolis（ Plin ，iv．11．s．18）．［T．H．D．］

ZlGUENSIS MONS．［Zevgitana．］
ZIKLAG，a town in the tribe of Simeon（Jos． xix．5），which at first belonged to the Philistine city of Gath（ 1 Sam．xxvii．5），but was annexed to the kingdom of Istael by David．（1 Chron．xii．1．） It appears to be the same as that called $\Sigma$ éceл入入 $\alpha$ by Josephus（Ant．vi．14）and इéкe入の by Stephanus B． It is now entirely destroyed．（Robinson，Travels， ii．p．424．）
［V．］
ol．iv． 1.
ZILLAA（Mel．iii． 10 ；Zineli or Aı $\xi \in i \alpha$, Ptol，ir． 1 ． § 2），a river on the W．ccast of Mametania Tingi－ tana，which fell into the sea near the town of the same name，N．of the Lisins．It is still called $A r$－ Zila．
［T．H．D．］
ZILIA（Mel．iii． 10 ：Z Ztiia，Zineíaı，and ZeiAía， Ptol．iv．1．§ 13，viii．13．§ $4 ; \mathrm{Z} \eta \mathrm{j} \lambda \mathrm{s}$ and Zèns，Strab． xvil．p． 827 ，iii．p．141），a town of some importance on the W．coast of DIawretania Tingitana，at the month of the like－named river，and on the road from Lis to Tingis，from which latter place it was 24 miles distant（Itin．Ant．p．8，where，and in Plin．v．1．s．1， it is called Zilis）．It was founded by the Cartha－ ginians，and made a colony by the Romans，with the snrname of Jula Constantia．（ $l^{\prime}$ lin．l．c．）Ac－ cording to Strabo（iiii．p．140），the Romans trams－ planted the inhabitants，as well as some of the citi－ zens of Tingis，to Julia Joza in Spain．The place is still called Azzila，Azila，Ar－Zila．［T．H．D．］

ZIMARA（Zimapa），a town in Armeoia Minor， on the road from Sitala to Melitena，between Ana－ tiba and Tencira（It．Ant．p．208；Ptol．v．7．§2； Tab．Peut．）The exact site is still matter of uncer－ tainty，some finding traces of it near Pashash，others near Dirriki，and others near Kemakh．（Kitter， Erdkunde，x．p．800．）
［L．S ］
ZING1S I＇RONONTORIUM（Zíros Prol，i． 17. $\S 9$ iv． $7 . \$ 11$ ）．probably the Modern Maroc，was a headland on the eastern coast of Africa abont lat． $10^{\circ} \mathrm{N}$ ．It was conspicnons from its forked head and its elevation ahove a level shore of nearly 400 miles in extent．
［W．B．D．］
ZIOBERIS，a small river of Parthia mentioned by Cartins（vi．4．§ 4）．It is probably the same as the Stiboites（ $\Sigma \tau$ tGoirms）of Diodoras（xvii．75），which flowed ander the earth in somo places，and at length fell into the Rhidagns（Curt，vi．4．§ 6）．［V．］

ZI（＇N．［Sion．］
711＇H．［SIPH．］
ZIPIIA（Zi申 $\alpha$, Zú $\phi \alpha$ ，or Zí $\phi a \rho$, Ptol．iv．8．§ 6），
a mountain in the interior of Libya．［T．H．D．］
ZIP＇HE＇NE（Zเфñク，Joseph．Antiq．vi．13），a district of Palaestina，in the neighbonrhood of $3 t$ ．

Carmel, which probably took its name from Ziph. (Josh. xv. 14.) Steph. Byz, notices it, quoting from Josephus. [Sipir.]
[V.]
ZIRIDAVA (Zıpiסava, Ptol, iii. 8. § 8), a town in Dacia, most probably Szereka on the Brooseh (cf. Katanesich, Istri Accolae, ii. p. 296). [T.H.D.] ZIRINAE (Tab. Peut.; Zeipivia, Steph. B. p. 287; Zernae, with various readings, in It. Ant. p. 322), a town in Thrace, on the Hebrus, between Trajanopolis and Plotinopolis. Reichard places it on the site of Zernits ; but Lapie identifies it with Termalitza.
[J. R.]
ZITHA, or ZEITHA (Zeí的, Ptol. v. 18. § 6), a small place in Mesopotamia near the Enphrates, noticed by Ptolemy. It is io all probability the same as the Sitha of Zosimus (iii. 15).
[V.]
ZITHA (Zeïoc, Ptol. iv. 3. § 12), a promontory in Africa Propria between the two Syrtes and W. of Sabathra. On it lay the place called Pons Zitha.
[T. H. D.]
ZOARA (Zod́pa, Steph. B. s. v.), a small town at the southern end of the Lacns Asphaltites in Judaea, to which Lot escaped from the burning of Sodom. (Gen. xiv. 2, 8, xix. 22.) Josephus, in describing the same lake, states that it extends $\mu$ é $\chi$ pt Zoópw 'Apasias (iv. c. 27). Daring the latter times of the Roman Empire, there was a gnard maintained in that part of the country, a corps of native mounted bowmen ("Equites sagittarii Indigenae Zoarae"), who were under the command of the Iux Palaestinae. (Notit. Imper.)
[V.]
ZOELAE, a town of the Astures in Hispania Tarraconensis, not far from the sea, and noted for the cultivation of flax. (Plin. iii. 3. s. 4, xix. 1. s. 2; comp. Florez, Esp. Sagr. xvi. p. 17; Inser, in Spon. Wisc. p. 278.3 ; Orelli, no. 156.) [T.H.D.]

ZOE'TIA. [Megalopolis, p. 309, h.]
ZOMBIS (Zoubis, Stepb. B. s. v.), a small place in Upper Media, noticed by Ammianus ( $x$ xiii. 6). [V.]

ZONE (Plin. iv. 11. s. 18 ; Mela, ii. 2. § 8 ; Zóvŋn. Herodot. vii. 59 ; Scyl. p. 27 ; Steph. B. p. 291 ; Schol. Nicand. Ther. 462 ; Schol. Apoll. Rhod. i. 29), a town on the S. cosst of Thrace, on a promontory of the same name, a short distance to the W. of the entrance of the Lacus Stentoris. According to Apollonius and Mela (ll. cc.) it was to this place that the woods followed Orpheus, when set in motion by his wondrous music.
[J. R.]
ZORAMBUS ( $2 \omega \rho \alpha \mu 60 s$ ), a small stream on the coast of Gedrosia, mentioned by Marcian (Peripl. c. 29, ed. Müller), called Zorambes by Ptolemy (vi. 8. § 9 ).
[V.]
ZORLANAE (Tab. Peut. ; in Geog. Rav. v. 12, Strolanae), a place in Thrace, on the road from Siracellae to Aenus.
[1. R.]
ZOROANDA (Plin. vi. 27. s. 31), a place on the range of Mount Taurus, where the Tigris fell into a cavern, and reappeared on the other side of the mountain; perhaps the spot discovered by Rich, 1 I leagues from Julamerik, where an eastern tributary of the Tigris soddenly falls into a chasm in the mountain. (Riel, Koordistan, i. p. 378; cf. Ritter, Erdl: x. p. 86, seq.; D'Anville, l'Euphr, et le Tigre, p. 74.)
[J. R.]
ZOSTER. [Attica, p. 330, b.]
ZUCHABBARI (Zovðá6fapl, Ptol. iv. 3. § 20), a mountain at the S. borders of the Regio Syrtica.
[T. H. D.]

ZUCIIABBARI. [Succabar.]
ZUCHIS (Zuv̂̌ıs, Strab. xrii. p. 835), a lake 400 stadia long, with a town of the same name upon it, in Libya, not far from the Lesser Syrtis, Stephaus B. (p. 290) mentions only the town, which, accotding to Strabo, was noted for its purple dyes and salt fish. It seems to be the place called Xoǔ̌is by Ptolemy (iv. 3. § 41.)
[T. H. D.]
ZUGAR (Zuivap, Ptol. iv. 3. § 40), a town of Africa Propria, between the rivers Bagradas and Triton.
[T. H. D.]
ZUMI (Zô̂mot), a German tribe occupying a district in the neighbourhood of the Lugii, are mentioned by Strabo (vii. p. 209), the only author that notices them, as having been subdued by Maroboduus.
[L. S.]
ZUPHONES(Zov́фwves,Diod. xx.38), a Numidian tribe in the vicinity of Carthage. [T. H. D.]

ZURNENTUM (Zoúpuevtov, Ptol. iv. 3. § 37), a town of Byzacium, io Africa Propria, lying to the S. of Hadrometum.
[T. H. D.]
ZUROBARA (ZoupóEapa, Ptol.iii. 8. § 9), a town of Dacia, sitnated where the Marosch falls into the Theiss.
[T. H. D.]
ZUSIDAVA (Zovoiסava, Ptol. iii. 8. § 8), a town of Dacia, probably on the site of the ruins called Tschetatie de Poomunt, below Burlau (cf. Ukert, iii. pt. ii. p. 621).
[T. H. D.]
ZYDRE'TAE (Zvסpv̂tal or Zvópeital, Arrian, Peripl. Pont. Eux. p. 11), a people of Colchis, on the coast of the Pontus Euxinus, on the S. side of the Pbasis, and between the Machelones and the Lazi.
[T. H. D.]
ZYGANTIS (Zvravris, Hecat. Fr. ap. Steph. B. p. 290), a town of Lihya, whose inhabitants werc noted for their preparation of honey. Hence Klausen (ad Hecat. p. 134) identifies them with the Gyzantes of Herodotus (iv. 194), on the W. side of the lake Tritonis, of whom that historian relates the sane thing.
[T. H. D.]
ZIGENSES (Zvyeis, Ptol. ir. 5. § 22), a people on the coast of the Libyan Nomos in Marmarica
[T. H. D.]
ZYGI (Zvyui, Strah. xi. p. 496), a wild and savage people on the Pontus Euxinus in Asiatic Sarmatia, and on the heights stretching from the Cancasus to the Cimmerian Bosporns. They were partly nomad shepherds, partly hrigands and pirates, for which latter vocation they had ships specially adapted (cf. Id. ii. 129, xi. 492, xvii. 839). Stephanus B. (p. 290) says that they also bore the name of Zuypiavoi; and we find the form Zygii (Zúriot) in Dionysius (Perieg. 687) and Avienus (Descrip. Orb. 871 ).
[T. H. D.]
ZIGOPOLIS (ミvүómoגts, Strab. xii. p. 548), a town in Pontus, in the neighbourbood of Colchis. Stephanus B. (p. 290) conjectures that it was in the territory of the Zygi, which, bowever, does not agree with Strabo's description.
[T. H. D.]
ZYGRIS (Zvypis, Ptol. iv. 5. § 4), a village on the coast of the Libyan Nomos in Marmarica, which seems to have given name to the people called Zygritae dwelling there (Zurpitai, Ptol. ib. § 22.)
[T. H. D.]
ZYGRITAE. [Zxgris.]
 in the intertior of Cyrenaica.
[T. H. D.]

[^0]:    ＊t．means from the top；b．from the bottom，of the colume．

[^1]:    * See also Mommsen, Oskisclie Studien, 8vo. Berlin, 1845, and Nachträge, Berl. 1846, and his Cnter Italischen Dialekte, Leipzig, 1850, pp. 99316 ; Klenze, Philologische Abhandlungen, 8vo. Berlin, 1839.

[^2]:    ＊The different positions that have been assigned to the island of Calypso，and the degree of pro－ bability of their clainis，will be discussed urder the

[^3]:    * In the Fasti Capitolini (ad ann. cdxv.; Grnter, p. 297) the consnl C. Maenins is represented as celebrating a trimmpls orer the Lavinians, together with the Antiates and Veliterni, where it appears certain from Livy's narrative that the Lantuvians are the people really meant: a remarkable instance at how early a period the confusion between the two names had arisen.

[^4]:    * Proleny (v. 2. § 18) and Philostratus (1"\% S phh i. 2. 25) call it a town of Caria, while Stephanus B. (s. v.) describes it as belonging to L.ydia; which arizes fiom the uncertain frontiers of these countries.

[^5]:    * Polybins uses the fuller phriase in tîv $\Lambda$ eovт!'wy $\pi \dot{u} \lambda i s(v i i, 6)$.

[^6]:    * Derived from a Phomician word signifying a naral station.

[^7]:    * The same thing is the case with the names of tliree Ligurian tribes, cited by stephanus of Byzamtium ( $s, r$.) from Theophrastus,-the Arbasaai, Fubii, and Ipsicuri. Of these we do not know even whether they dwelt in Italy or ou the southern coust of Giaul.

[^8]:    * The mame is written in many Mss. Lentersum, and it is diflicult, in the absence of inscriptiom, to say which form is really the more correct: hut 1.rrekivias scems to be sapported, on the whole. by the best MSS., as well as by the (irewk form of the matne as found both in Strabo and I'toleny: (Tzschucke, ad Mel. ii. 4. §9.)

[^9]:    * The discrepancies amung the ancient writers respecting the names of the rivers between the Thens and the Minius have been noticed under Galliabeta : the following conspectus, by Gruskurd, of their vaijons statements, may be useful.

[^10]:    * The numbers on all the roads from Emerita to Olisipo are very corrupt : they do not agree with the totals given at the head of each ronte; and many of them are evidently too short.

[^11]:    ＊This ditth must lave terminated in a kata－ $r$＊thra，probably in one of the katavithra on the W． Nh．of the plain at the font of the Macnalan mown－ tams．（on the other side of these monntains is the villase and riser manted Ih lisonn；and as the Elim－ phasii are not mentioned in any other passage，it hais been proposel！to read＇Exaбourtion instad of ＇Eגıaфa⿱iwr．（lkuss，1．127．）Leake has con－ jo－tured，with some probatili＇y，that Flisphasii may Li：the corrupt ethaie of Fitivia（Eגvuia），a Thee culy mentinsed by Xenophom（Hfell．ri． 5. § 1：3），who phaces it on the confines of Uratumenus sad Mantinein．Althom－h I，eake plawe Elywa at Levidhli，on the NW frontier of Mlantinice he con－ jeetures that the whole phain of Alcimedon may have belonged to it．（Leake，Peloprounsiaca，D． 380．）
    $\dagger$ Leake imagines that Phoezon was situated on a cide road，leating from the tombs of the daughters of Pelias，But Ris mantains that Pherenn Mas on the high－rual to Teren，and t1 at I＇a amias has only mentioned by anticipation，in viil．11．Si 1，the altar formins the boundary lectween Mantinice and Tugeatis，the more proper place for it being at the clese of \＄ 4 ．

[^12]:    * The modern city of this name dates ooly from the thirteenth century, being founded in 1229 by the emperor Frederic II., from whom it derives its наие.

[^13]:    * On this occasion Thucydides (iv, 66) calls Megara iे K.vis $\pi \dot{\delta} \lambda \iota s$, in contradistinction to the port-town. This expression cannot refer to the acropolis of Megara, as some critics interpret it.

[^14]:    * Of the other tour parts Strabo mentions Pylus, Rhium, and Hyameitis; but the passage is corrupt, and the name of Nesola should probably be added to complete the number. (Miller, Dorians, vol. i. p. 111, transl.) Stephanns B. calls Mesola, a city of Messene, one of the five ( $s, v, \mathrm{M} \in \sigma o ́ \lambda a$ ); and Strabo in another passage (viii. p. 361) describes it as lying towards the gulf between Taygetus and Messenia; and as the latter name can only apply to the western part of the country, Mesola was probably the district between Taygetus and the Pamisus. Pylns apparently compreliended the whole western coast. Khium is the southern peninsula, opposite Taenarum. (Strab. viii. p. 360.) The position of Hyameitis, of which the city was called Hyameia ('ráuela, Steph. B. s. v.), is quite uncertain.

[^15]:    ＊Strabo says（viii．p．374），＂that in some copies of Thucydides it was written Me日 $\omega \nu \eta$ ，bike the town

[^16]:    * Hence Virgil uses the expression "descendens arce Shnoeci" (Acn. vi. 830) by a peetical figme for the Mantine Alv in general.

[^17]:    ＊It has been suggested that we should read Katavaios for Kapapavaious：hut the error is mare probably in the other and lessaknown name．l＇er－ haps we should read Moqukaviny for Mopyavtivt，y lia the district of Motyca immediately adjoined that

[^18]:    * The MSS. of Strabo have Aivaia, which Leake was the first to point out must be changed into Oivaia. Kramer, the latest editor of Strabo, has inserted Leake's correction in the text.

[^19]:    ＊Argos probably means a plain，see Kruse＇s Heclas（vil．i．p．404）．

[^20]:    PHAEA'CES. [Corcyra.]
    PHAEDRIADES, [DELPHI, p. 764.]
    PHAEDRIAS. [MEgalorolis, p. 309, b.]
    PHAENIA'NA (\$aiviava), a town in Rlactia

[^21]:    ＊Must editors of Pausamias have substituted Kapual for Kapvai；but the latter is the reading in all the MSS．，and Caplyae is in another direction， to the E．of Orchomenus．

[^22]:    * The cor was equal to 75 mallons, or 32 pecks.

[^23]:    f. Timplam Jan if. Acsles Persathim. b. Columnal 1'horac i. Vquit Jomitnail f. Mąustra Julia. k. Iostra Julia.

    1. Fornix Fabii.
    m. Nchola Santha.
[^24]:    "Quae superimposito moles geminata colosso Stat Latium complexa forum? coelone peractum

[^25]:    ＊Lycophron，on the other hand，seems to assign it a Trojan origin；though the passage，as usual，is somewhat opscure．（Lycoplor．Allex．1129．）

[^26]:    ＊In this fassace the poet，strangely enourh． flaces Salorydmas in Asia Miner，near the Ther－ musfon．Virgil makes a mistake the conserse of this in calling the Themodom a Thracian river：－
    > ＂Threici．u flumua Themndentis，＂
    > （Aen．xi．659）；

    mulmis，inteed，as is $\mathrm{p}^{\text {msill }}$ 年，the epithet is intended Whmate mure y thesulp ood origilal abode of the Amazant in T Irice．

[^27]:    ＊Lurd Byrun，in a note referring to his feat of swimming across from Sostus to Abydus，says：－ ＂The whole distance frum the place whence we started to nar landing on the other side，fucluding the length we were carried by the current，was com－ futed by those on board the frigate at upwards of 4 Euglish miles，though the art mal breadth is harely one．＂This corresponds remarkably well with the measurenents given by strabo，as abuve．

[^28]:    * The annexed figure is taken from that given hy Abeken (. /itw' Italien, pl. 2).

[^29]:    * So called, because óntidoo was the Lacedaemu-
    nian form for $\dot{\circ} \phi \ell a \lambda \mu \dot{\prime}$, Plut. $L y c, 11$.
    3 v2

[^30]:    ＊There was also a small town，Apelaums，which is mentioned by Lisy as the place where the Acbae－ ans uader Nicostratus gained a victory over the Jacedonians under Androsthenes，B．c．197．（Liv． xxxiii．14．）

[^31]:    * These still abound in the wild pear-trees (àppáסes), from which the name, as suggested by Leake, was probably derived.
    $\dagger$ The argunent against this, urged by Cavallari, and derived from the existerice of numerons tombs, especially the great necropolis of the catacombs, in this part of the city, which, as he contends, must have been witheut the walls, would prove too much, as it is certain that these tombs were ultimately included in the city; and if the ordinary custom of the Greeks was deviated from at all, it may bave been so at an earlier period. In fact we know that in other cases also, as at Agrigentum and Tarentum, the custom was violated, and persons habitually buried within the walls.

[^32]:    * This must have been the fort on Epipolae taken by Dion, which was then evidently held by a separate garrison. (Plut. Dion. 29.)

[^33]:    ＊The western division contains two coninences， and the question as to whicn of them was the Cad－ meia will be discussed below．

[^34]:    * Even one of the latest travellers there, M. Viquesule, commissioned by the Fiench government, and countenawed by the Torkish authorities, found it impossible to induce his guides to condnet him to a certain district which he wished to visit, although he offered to take ins numerous an eveort as thry pleased. (See Archives des Missions scient. It litt. v.1. i. p. 210.)

[^35]:    * M. Viquesnel states, on two occasions, that he was compellid to clange lis route in consequenee of heavy and continuous snow-storms, in the montls of Nuvember (pp. 213, 312). The mind also was catremely violent.

[^36]:    * On theso mines, see Niebuhr, Lect. Ethnog. and Gcog. i. pp, 285, 295, Eing, trams.

[^37]:    * Instances occur in later times of the intermarriage of Greeks with Thracians: thus the wife of Sitalces was a daughter of E'ythes, a citizen of Abdera (Thucyd. ii. 29); and 1phierates married a daugbter of the Thraciae king Cotys. (Nep. Iph. 3.)

[^38]:    ＊This is the form universally fonnd in the best MLSS of Latin writers；there is no ghoud ancient authority for the orthagraply of Tmbinmexts or Thrasyisenus，so generaliy adopted ly modern writers．

[^39]:    * The name of Ossaja, a village on tha road from Cortona to the lake, has been thoughts to be also connected with the alangbter of the battle, but this is very improbable. Ossaja is soveral miles distant from the lake, and on the other side of the hills, (Hobbouse, l. c.) It is probablo moreover that the modern name is only a corraption of Orsaja or Orsaria. (Niebuhr, Lectures, vol. ii. p. 102.)

[^40]:    * Mela has followed Herodotus very closely in the following passage (ii. 2): "Lugeotur apud quosdam puerperia, batique deflentur: funera contra festa sunt, et veluti sacra, cantu lusuque celebrantur."

[^41]:    * The reading in the text is $\dot{v} \pi\rangle$ Maívos toü $\tau \bar{\omega} \nu$ Kıupepiov Baбl $\lambda \in \cos$; but as just before we
    

[^42]:    * It was probably this long ascent that was known as the Cliyus Virbir, mentioned by Persius (vi. 55).

[^43]:    *Tbe words "Appia via" may, however, refer only to the first part of this route, which certaioly followed the true Appian llay as far as Capua.

[^44]:    * Both these distances are overstated, and should probably be corrected as suggested by the numbers in parentheses. The same distances are given in the Tab. Peut, thus:-

    Capas to Suessula - - ix. ar. P.
    Nola - - - . - - ix.
    Ad Teglanum - - - - $\quad$.
    Nuceria - . . . - ix,

[^45]:    * It is clear from the wame that this station was distant 100 miles from Rome, while the distances above given would make up ooly 97 miles : but it is uncertain at what precise point the deficiency occurs. The Tabula gives 9 miles from Reate to Cutiliae, and 7 thence to Interocrea : if these diatances be adopted the result is 99 miles, leaving a discrepancy of only one mile. In either case the approximation is sufficient to show the general correctness of the Itineraries.

[^46]:    * It is worthy of notice that Antimm, which at the commencement of the Republic appears as a Latin city, or at least as subject to the supremacy of lome, is found at the very outbreak of these wars already in the hands of the Volscians.
