We learn from the geographers that even onder the Roman Einpire several of the wild tribes in the interior of the island retained their distinctive appellations; but these are very variously given, and were probably subjert to much fluctuation. Thus Strabo gives the names of four mountain tribes, whom he calls Parati, Sossinati, Balari and Aconites (Strab. v. p. 225), all of which, with the exception of the Balari, are otherwise entirely unkoown. Pling meutions only three, the llienses, Balari, and Corsi, which be calls "celeberrimi in ea populorum" (Plin. iii. 12. s. 17), and which are in fact all three well known names. The existence of the Ilienses under the Empire is also distinctly attested by Pausanias (x. 17. § 7): yet neither their name nor that of the Balari is noticed by Ptolemy, though he gives those of no less than eighteen tribes as existing in his time. These are, beginning at the N . point of the island and proceeding from N. to S.: " the Tibulatii and Corsi, the Coracenses; then the Careases and Cunusitanae; Dext to these the Salcitani and Luquidonenses; then the Aesaronenses; after them the Cornenses (called also Aechilenses); then the Racenses; next to whom follow the Celsitani and Corpicenses; after them the Scapitani and Siculenses; next to these the Neapolitani and Valentini, and furthest to the S. the Sulcitani and Noritani." (Ptol. iii. 3. § 6). Of these the Corsi are otherwise well known [see above, pp. 908,909]; the four last rames, as well as the Tibalates and Cornenses, are evidently derived from the names of towns, and are probably the iuhabitaots of districts municipally dependeot upon them, ratber than tribes in the proper sense of the term. The other names are wholly unknown, After the fall of the Western Empire we find for the first time the name of Barbaricini (Bap6apıkivoz, Procop. B. V. ii. 13) applied to the mountaineers of the interior. This appellation, which appears to be merely a corroption of "Barbari vicini," was retained throughout the middle ages, and is still preserved in the name of Barbargia, given to the wild mountain tract which extends from the neighbourhood of Cagliari towards the sources of the Tirso. These monntaineers were not converted to Christianity till the close of the sixth centory, and even at the present day retain many curious traces of paganism in their customs and superstitious usages. (De la Marmora, vol. i. p. 30.)
IV. Natural Productions, etc.

The chief produce of Sardinia in ancient times was, as already mentioned, its corn, which it pruduced in large quantities for exportation even befire the perind of the Roman conquest. Its mountain tracts were also well adapted for pasturage, and the native tribes subsisted mainly on the produce of their flocks and berds (Dior, v. 15), while they eluthed thenselves with the skins, whence they were sometimes called " pelliti Surdi." The island ulso posseised mines both of silver and iron, of which the first are said to have been considerable. (Solin, 4. \$ 4.) They were undoubtedly worked by the Rumaos, as we learn from existing traces, and from the name of Metalld given to a place in the SW: of the island, between Neapolis and Sulci. (Itin.

## SARDINIA.

S.ARDINIA.

Ant. p. 84; De la Marmora, vol. ii. p. 453.) It had also extensive fisheries, especially of tunny; and of the murex, or shell-fish which produced the parple dye (Suid. s. v.). But its most peculiar natural prodnctions were tha wild sheep, or moufflon, called by the Greeks $\mu 0 v \sigma \mu \alpha{ }^{\nu}($ Ovis A mmon Linn.), which is still found in large herds in the more unfreqnented parts of the island (Strab. v. p, 225 ; Pans. x. 17. § 12; Aelian, H. A. xvi. 34), and a herb, called Herba Sardoa, the bitterness of which was siad to produce a kind of convalsive grin on the countenances of those that tasted it, whioh was generally considered as the origin of the phrase, a Sardonic smile (risns Sardonicus ; ミapṓutos $\gamma \dot{\epsilon} \lambda \omega$ cus, Paus. x. 17. § 13; Suid. s. v. Sapóúvtos; Serv, ad lïg. Ecl. vii. 41; Solin. 4. § 4.) But the etymology and origin of this phrase are exceedingly dubious, and the peculiar herb alluded to by the ancients oannot be now identified. The bitterness of the Sardinian honey (Hor. A. P. 375 ), which w. s supposed to result from the same herb, is, bowever, a fact still observable at the present day. (Smyth's Sardinia, p. 104.) Pausanias mentions that the inland was free from wolves, as well as from vipers and other venomons serpents, an adrantage that it still enjoys (Pans, x. 17. § 12 ; Solio. 4. § 3 ; De la Marnora, vol. i. pp. 173, 177); but it contained a venomous spider, apparently a kind of tarantula, called Sulifuga, which was peculiar to the island. (Solin. l.c.)

The native population of Sardinia seem to have enjoyed a very evil reputation among the Romans. The harsh expressions of Cicero ( pro Scaur. 9 . §§ 15,42 , \&e.) mast, indeed, be received with considerable allowance, as it was his object in those passages to depreciate the value of their testimony; but the proverbial expression of "Sardi venales" was generally understood as applying to the worthlessness of the individuals, as well as to the cheapness and abundance of slaves from that conntry. ("Habes Sardos venales, alium alio nequiorem," Cio. ad Fam, rii. 94.) The praetors, even in the days of Augustus, seem to have beeo continually making inroads into the monntain territories for the purpose of carrying off slaves (Strab. v. p. 255); but as these monntaineers according to Strabo and Diodorus, lived in caves and holes in the groond, and were unacquainted with agriculture (Strab. l. c.; Diod. iv. 30), it is no wonder that they did not make useful slaves.

Of the antiquities found in Sardinia, by far the mast remarkable are the singular structures called by the inhabitants Naraghe or Nuraggis, which are almost entirely peenliar to the island. They are a
sind of towers, in the form of a truncated cone strongly built of massive stones, arranged in layers, but not of such massive blocks, or fitted with such skill and care, as those of the Cyclopean structures of Greece or Italy. The interior is occopied with one or more vaulted chambers, the upper cone (where there are two, one over the other, as is frequently the case) being approached by a winding stair or ramp, constructed in the thickness of the walls. In some cases there is a more extensiva basement, or solid substruction, containing several lateral chambers, all constracted in the same manner, with rudely pointed vaultings, showing no knowledge of the principle of the arch. The number of these singular stractures scattered over the island is prodigious; above 1200 have been noticed and recorded, and in many cases as many as twenty or thirty are found in the same neigbourhood: they are naturally found in very different degrees of prenervation, and many varieties of arrangement and construction are observed among them; but their purpose and destinstion are still unknown. Nor can we determine to what people they are to be ascribed. They are certainly more ancient than either the Roman or Carthaginian dominion in the island, and are evidently the structures alluded to by the anthor of the treatise de Mirabilious, which he describes as ódot, or vaulted chambers, the construction of which he ascrihes to Iolaus. (Psend. Arist. de Mirab. 104.) Diodorus also speaks of great works constructed by Daedalus for Iolans, which must evideotly refer to the same class of monuments. (Diod. iv. 30.) Both traditions are valuable at least as evidence of their repated high antiquity; but whether they are to le ascribed to the Phoenicians or to the native inhabitants of the island, is a point on wbich it is very difficult to form an opinion. They are folly de scribed by De la Marmora in bis Voyage en Sardaigne, vol. ii. (from which work the annesed figure is taken), and more briefly hy Capt. Smyth (Sardinia, pp. 4-7) and Valéry (Foy. en Sardaigne).

The work of De la Marmora, above cited, contains a most complete and accurate accuunt of all the antiquities of Sardinia, as well as the natural history, physical geography, and present state of the island. Its authority has been generally fullowed throughout the preceding article, in the determination of ancient names and localities. The works of Captain Smyth (Present State of Sardinia, 8 vo . London, 1828), Valéry ( Voyage en Corse et en Sardaigne, 2 vols. 8vo. Paris, 1838), and Tyndale (Island of ${ }^{\circ}$ Sardinia, 3 vols. 8vo. London, 1849 ), though of macla interest, are of inferior value.

NTEIEAKE IN SMKDINL.
Vol̃ II.

SARDONES. [Sompones.]
SARDO'NYX ( $\left.\sum a p \delta \dot{\omega} \nu \nu \xi\right)$, a mountain or chain of mountains in Hinulostan, noticed by I'tolemy (vii. 1. $\S \S 20$ and 65 ). It would seem to have been part of the range nuw known by the name of the Vindhya Mountains. Lassen, in his map, las identified them with the Pdigapippali Mountains on the right bank of the Narmada (Nerbudda), and Forbiger has supposed them to be the Satpura Mountains, a continuation of the same chain.
[V.]
SARDO'UM or SARDO'NHUM MARE (т $\overline{\text { E }}$ ªp-
 ros, Herod. i. 166), was the name given by the ancients to the part of the Mlediterranean sea adjoining the island of Sardivia on the W. and S. Like all similar appellations it was need with considerable vagueness and laxity; there being no natural limit to separate it from the other parts of the Mediterranean. Eratosthenes seems to have applied the name to the whole of the sea westward of Sardinia to the coast of Spain (ap. Plin. iii. 5. s. 10), so as to inclnde the whole of what was termed by other autbors the Mare Hispanum or Balearicum; but this extension does oot seem to have been generally adopted. It was, on the other hand, clearly distingnished from the Tyrrbenian sea, which lay to the E. of the two great islands of Sardinia and Corsica, between them and Italy, and from the Libyan sea (Mare Libyeum), from which it was separated by the kind of strait formed by the Lilybaean promontory of Sicily, and the opposite point (Cape Bon) on the coast of Africs. (Pol. i. 42; Strab. ii. pp. 105, 122; Agathem. ii. 14; Dwnys. Per. 82.) Ptolemy, however, gives the name of the Libyan sea to that immediately to the S. of Sardinia, restrieting that of Sardoum Mare to the W., which is certainly oppused to the usage of the other geographers. (Ptol. iii. 3. § 1.) Strabo speaks of the Sardician sea as the deepest part of the Mediterramean; its greatest depth was said by Posidonius to be not less than 1000 fathoms. (Strab. ii. pp. 50, 54.) It is in fact quite untathomable, and the above estimate is obviously a mere guess.
[Е. Н. B.]
SAREPTA ( $\Sigma \alpha ́ \rho \epsilon \phi \theta a)$, the " Zarephath, a city of Sidon " of the Old Testament ( 1 Kings, xvii. 9 , 10; comp. St. Luke, iv. 26), apparently at the most extreme north (Obad. 20), celebrated in the history of Elijab the prophet. It is said by Josephus to be not far from Tyre and Sidun, lying between the two. (Ant. viii, 13. § 2.) Pliny places it between Tyre and Ornithon, on the road to Sidon (v. 19. § 17). In the Ltinerarium Hierosolymitanum the name does not occur, but it is deseribed by a peripbraxis and placed viii. M. 1. from Sidon (p. 583). The Arabian geographer Sherif Ibn Idris, quoted by Reland, places Zaraphand 20 miles from T'yre, 10 from sidon. (Palaestina, p. 985.) It was formerly celebrated for its wine, and is suppesed to be intended by Pliny under the name of Tyrian, which he eommends with that of Tripolis and Berytus (siv. 7). Several of the later Latin poets lave also sung the praises of the "duleia Bacchi munera, quae Sarepta ferax, quae Gaza crearet," the quantity of the first syllable being common (ap. Reland, p. 986). The place in netieed by modern travellers. Dr. Robinson found "a large village bearing the dame of Surapend," five hours north of Tyre, three aouth of Sidon, near the sea-shore, where is a saint's tomb called El-Khüdr ( $=$ St. (ieorge), which he imagined to mark the site of a

SARMATIA.
Christian chapel mentioned by travellers in the middle ages. ( Bibl. Res. vol. iii. Pp. 412, 413.)
[G. W.]
sargantha [Serguntia.]
SAllidARAUSE ${ }^{\prime}$ NE ( $\left.\Sigma \alpha \rho \gamma \alpha p a \nu \sigma \eta \nu \dot{\prime}\right)$, a district of Cappadocia, on the east of Commagene and near the froatiens of Pontus, containing, according to Ptolemy (v.6. §13), the towns of Phiara, Sadagena, Gauraena, Sabalassus, Ariaratbira, and Maroga. (Strab, xii. pp. 534,537 ; Plin. vi. 3.) [L.S.]

SARGE'TlA (EapyєTia, Dien Cass. lxviii. 14; ミapyevria, Tzetz. Chil. ii. 61; Zapүévtios, Tzetz. Chil. vi. 53), a river of Dacia, upon which stood the royal palace of Decebalus. This river must bo identified with the Strel or Strey, a tributary of the Maroseh, since we know that Sarmizegethusa was the residence of Decebalas. [Sarmizegethisa.] (Ukert, vol. iii. pt. ii. p. 603.)

SARIPHI MONTES ( tà さápıфa ŏpq), a chain of monntains, extending, according to P'tolemy, between Margiana and Ariana, and the watershed of several small streams. They are probably thone now ealled the Huzairas. Mannert (v. 2. p. 65), has supposed them the same as the $\Sigma a \pi \phi$ tipol (sec Dion. Perieg. v. 1099), but this is contrary to ull probability.
[V.]
SARMA'LIUS ( It, Ant. p. 203) or SAPMA'LIA ( (apmaiia, Ptol, v. 4. § 8), a town in Galatia, on the road from Ancyra to Tavia or Tavimm, is supposed by some to be the modern Karadjeleh. [L. S.] SARMATIA (इарнátia: Eth. इappaitai), the name of a eountry in Europe and Asia. For the carlier and Greek forms of the word see Saunomatak.

That $S-r m$ is the same root as $S$-rb, so that Sarmatae and Serbi, Servi, Sorabi, Srb, \&ce, may be, not only the name for the same populations, but also the same name, has been surmised, and that apon not unreasonable grounds. The name seens to have first reacbed the Greeks through the Scytbians of the lower Dnieper avd Don, who applied it to a non-Scytbic population. Whether this noo-Scytbic population used it themselves, and whether it was limited to them by the Scythians, is uncertais. It was a name, too, which the Getae used ; also ove nsed by some of the Pannonian populations. It was, prubably, the one which the Sarmatians themselves used partially, their neighbours generally, just like Galli, Graeci, and nany otbers.

More important than the origis of the name are the questiona concerning (1) the area, (2) the population to which it applied. Our chief authority on this puint is I'toleny; Strabo's notices are iucidental and fragmentary.

The ares given by Strabo to the Galatae and Germani, exteods as far as the Borystheaes, or even the Don, the Tyrigetae being the most western of the non-German countries of the southeast, and the Bastarnae being doubtful, -though, perlaps, German (vii. p. 289). Of a few particular nations, such as the Jazyges, Hamaxubii, and Ruxolani, a brief notice ia given, without, however, any special statement as to their Sarnatian or nun-Surmatian affinities. In Asia, the condtry of the Sauromatae is called the plains of the Sarnatae, as opposed to the mountains of Caucasns. The inordinate size given to Germany by Strabo well nigh obliterates, not only Surmatia, but Scythia in Europe as well.

Pliny's notices are as incidental as Strabo's, and nearly as brief,-the development of Germany east-
wards being also inordinate. He carries it as far as the country of the Bastarnae.

The Germany of Tacitua is bounded on the east by the Sarmatae and Daci. The Sarmatae here are the population of a comparatively small area between the Daube and Theiss, and on the bonodaries of Hungary, Moldavia, and Gallicia. But they are something more. They are the type of a large class widely spread both eastward and northward; a class of equal value with that of the Germani. This, obviously, subtracts something from the vast extent of the Germania of Strabo (which nearly meant Northern Europe); but not exough. The position of the Bastarnae, Peucini, Venedi, and Finui, is still an open question. [Scrthia.]
This prepares ns for something more systematic, and it is in Ptolemy that we find it. The Sarmathae of Ptoleny fall into (1) the Eurorean, and (2) the Astatic.

## I. SARMATIA EUROPAEA.

The western boundary is the I'istula; the northero the Baltic, as far as the Venedic gulf and a tract of unknown country; the southern, the couatry of the Jazyges Metanastae and Dacia; the eastern, the isthmus of the Crimea, and the Don. This gives us parts of Poland aod Gallicia, Lithuania, Esthonia, and Western Russia. It includes the Finai (probahliy a part only), and the Alandi, who are Scythians eo nomine ('Alaîvot Exúgar). It includes the Brstaraae, the Peucini, and more especially the Venedi. It also inclades the simple Jazyges, as opposed to the Jazyges Metanastae, who form a small section by themselves. All these, with the exception of the Finni, are especially stated to be the great nationa of Sarmatia (to which add the Roxolani and Hamaxobii), as opposed to the smaller ones.
Of the greater nations of Samatia Earopaea, the Peucini and Bastarnae of Ptolemy are placed farther north than the Peaciai and Bastarnae of his predecessors. By later writers they are rarely meationed. [VENEDI.] Neither are the Jazyges, who are the Jazyges Sarmatae of Strabo These, along with the Roxolani, lay along the whole side ( $\delta \lambda \eta \nu$ Tìv $\pi \lambda$ кopà $\nu$ ) of the Maentis, say in Kherson, Tauris and Ekaterinoslav. [RoxOlani.] Hamaxohii is merely a descriptive term. It probably was applied to some Scythian population. Plioy writes Hamaxobii ant Aorsi, a fact of which farther notice is taken below. The Alauni, notwithntanding an 'A入aüvor ópos, and other complicatiens, caa scarcely be other than the Alani of Cascasus; the $\dot{\alpha} \lambda \kappa \hat{h} \in \nu \tau \epsilon s$ "A入aovoz of the Periegesis (1. 302) are undoubted Scythians. Nestor, indeed, has a population otherwise anknown, called Uliczi, the czi beiag non-radical, which is placed on the Dniester. It does not, however, remove the difficalty.

The Peucini were best known as the occupants of ene of the islands at the mouth of the Dannbe. They may also, however, have extended far into Bessarabia. So manifold are the changes that a word with Sarmatian or Scythian inflexion can nodergo, that it is not improbable that Peuc-ini may be the modern words Budjack and Bess, in Bess-arabia. The following are the actual forms which the name of the Patz-inacks, exactly in the country of the Peuc-ini, undergoes in the mediaeval and Byzantine writers. Пaт̧ivakiтal, Pecenatici, Pizenaci, Pincenates, Postinagi, Peczenjezi (in Slavonic), Petinei, Pecinei (the nearest approach to

Pencini.) Then, in the direction of Budziak and Bessi, Behnakije, Petschnakije, Pezina-völlr (in Norse), Bisseni and Bessi, (Zenss, Die Deutschen, sic. 3. ve. Pecinaci and Cumani). The Patzinaks were Scythians, whe cannot be shown to be of receat origin in Earope. They may, then, bave heen the actual descendaots of the Peacini ; though this is not necessary, for they may bave been a foreign people who, on reaching the country of the Perwini, took the name; in such a case being Peuc-ini in the way that an Englishman is a Briton, i. e, not at all. The difference betucen the Peacini and Bastarnae was nomisal. Perhaps the latter were Moldavian rather than Bessarabian. The Atmoni and Siaones of Strabo were Bastarnae.

The geograply of the minor natinns is mere obscure, the arrangement of Ptolemy heing somewhat artificial. He traces them in two parallel colamss, from north to south, beginaing, in both cases with the country of the Venedi, and taking the eastern bank of the Vistula first, The first name on this list is that of the Gythones, soath of the Venedi. It is not to he anderstood by this that the Venedi lay between the Gythones and the Baltic, so as to make the latter an ialaad people, but simply that the Veaedi of the parts about Memel lay north of the Gythones of the parts ahout Elbing. Neither can this people be separated from the Gattones and Aestyii, i. e. the populations of the amber country, or East Prussia.
The Finni succeed (rbowves eīra Фívpor). It is not likely that these Finns (if Finns of Finland) can have laid due south of East Prussia ; though not impossible. They were, prohably, on the east.
The Balanes (Sulones?), with the Plaragondiones to the south, and the Avareni at the head of the Vistula, bring us to the Dacian frontier. The details here are all conjectural. Zeass has identified the Bulanes with the Borani of Zosimns, who, along with the Goths, the Carpi, and the Uragundi, attacked the empire under Gallus. In Nestor a population called Sul-iczi occapies a locality betweea the Dnieper and Dniester: but this is too far east. In Livonia, Heary the Lett gives prominence to the nation of the Selones, a likelier identification.
For Bulanes (snpposing this to be the truer reading) the word Polyane gives us the most plausible signification. Nestor nses it frequently. It is Pole, primarily meaning occupants of plains. Wherever, then, there were plains they might he Polyane; and Nestor actually meations two divisions of them; the Lekhs, or Poles of the Vistula, and the Polyane of the Dnieper.

The Phrugundiones of Ptolemy bave always been a crux geographica. Name for name, they are so like Bargundiones as to have suggested the idea of a migration from Poland to Burgundy. Then there are the Urugundi and Burguadi of the Byzantine writers (see Zenss, s.vv. Borazi, Urugundi), with whom the Ptolemaean popalation is, probalily, iventical. The writer who is unwilling to assume migrations unnecessarily will ask whether the several Burgundys may not be explained on the principle suggested by the word Polyane, i. e. whether the word may not be the name of more than one locality of the same physical conditions. Probably, this is the case. In the German, and also in the Slavonic langnages, the word Fairguni, Fergund, l'ergunt, Virgunda, Jirgunndia, and Firaunuia, mean hill range, forest, elerated tract.

Of these there might be any amount,- their eccurrence in different and distant parts by no means implying migrations.

The Avareni may be placed in Gallicia.
South of them come the Ombrones, and the Anarto-phracti. Are these tbe Arnartes of Caesar? The Anartes of Caesar were on the eastern confines of the Hercynian forest (Bell. Gall. vi. 24, 25), coutermineus with the Daci, a fact which, taken along with the physical cenditions of the country, gives us H'estern Gallicia, or Austrian Silesia, for the Anar-tor-phracti. Then come the Burgiones, then the Arsi:uetae (compare with Aorsi'), then the Saboki, then the Piengitae, and then the Bessi, along the Carpathian Mountains. Gallicia, with parts of 1 olhynia, and Podolia give us ample room for these obscure, थud otherwise unnamed, populations.

The populations of the second column lie to the east of those just enumerated, hegioning again with the Venedi ( $\dot{v} \pi \delta$ тoûs Oúevé̃as mávav). Vilha, Grodno, with parts of Minsk; Volhynia, Podolia, and Kiev give us an area over which we have six names to distribnte. Its southern houndary are the Peucinian mountains (Bukhovinia ?).
(i.) The Galindae. - These are carried too far east, i.e. if we are right in identifying them with the Galinditae of the Galandia and Golenz of the middle ages, who are East Prussians on the Spirding Lake.
(2.) The Sudeni. - These, again, seem to be the Surdo-vitae (the termination is non-radical in several Prossian names) conterminous with the Galinditae, but to the nerth-east of them. Their district is called Sudovia.
(3.) The Stavani - Concerning these, we have the startling statement, that they extend as far as the Alauni ( $\mu \dot{\epsilon} \chi \rho \epsilon \tau \hat{\omega} \nu$ 'A $\lambda \alpha \dot{v} \nu \omega \nu$ ). Is dot "A $\alpha a v \nu o t$ an erroneous name developed out of some form of Faגiv-סo،? The extension of either the Stavani to Caucasus, or of tha Alani to Prussia, is ont of the question.
(4.) The Igylliones, - Zenss has allewed himself (s.v. Jazwingi) to hold that the true form of this word is 'Irvy name that appears in so many forms as to make almost any conjecture excusable, - Jazwingi, Jacwingi, Jaczwingi, Jecwesin, Getuinzitae, Getwoesitue, Jentuisiones, Jentuosi, Jacintiones, Jatujazi, Jatwjezi, or Getwesia, and Gotwezia, all actual forms. The area of the population, which was one of the most powerful branches of the Lithuanisn stock in the 13th centory, was part of Grodno, Minsk, and Tolhynia, a locality that certainly suits the IgylJiones.
(5.) The Costeboci in Podolia.
(6.) The Transmootani. - This is a name from the Latin of the Dacians,-perhaps, hewever, a transJation of the common Slavodic Za-volonskaje, i. e. over-the-watershed. It was applied, perhaps, to the pupulation on the northern froatier of Dacia in gederal.

The third list, beginning also with the Venedi, follows the hie of the Baltic from Filna and Courland towards Finlanl, and then strikes inland, eastwards and southwards. Immediately on the Venedic gulf lie the
(1) Veltae (OǗ入tai). Word for word, this is the Vylte and W'ilzi of the middle ages ; a form which appears as early as Alfred. It was German, i. e. applied by the liranks to certain Slavonic population. It was also native, its plural being H'eletabi. Few
nations stand eut mere promineatly than these Hilts of the Carlovingian period. They lie, however, to the west of Prussia, and indeed of Pomerania, from which the Oder divided them. In short, they were in Mecklenburg, rather than in Livonia or Esthonia, like the Veltae of Tacitus. Word for word, however, the names are the same. The synonym for these western Wiltae or Welatabi was Liut-ici (Luticai). This we know from special evidence. A probable synenym for the Veltae of Tacitus was also some form of Lit-. This we infer frem their lecality being part of the present Lith-wania and Lett-land. Ald to this that one writer at least (Adam of Bremen) places Wilzi in the country of Ptolemy's Veltae. The exact explanation of this denble sppearance of a pair of names is onknown. It is safe, however, to place the Veltac in Lett-land, i. e. in the southern parts of Lironia, and probably in parts of Lithwania Proper and Courland. Censtantine Porphyrogeneta mentions them as Veltioi. North of the Veltae -
(2.) The Osii (Ossii), probably in the isle of Oesel. It should be added, however, the root ves-, wes, appears frequently in the geography of Prusitia. Osilii, as a name for the occopants of Oesel, uppears early in mediaeval history.
(3.) The Carbones, north of the Osii. This is a name of many explanations. It may be the Finn word for forest $=$ Carbo. It may be the root Cur(or $K \cdot r$ ), which appears in a great namber of Fins words, - Coralli (Karelian), Cur- (in Cur-land), Kur- (in Kur-sk), \&c. The forms Curones and Curonia (Courland) approach it, but the locality is south instead of north. It more probably = Kareelia. It almost certainly shows that we lase passed from the country of the Slavonians and Lithusoiaus to that of the Esthonians, Iogriass, and Finlanders, Then, to the east, -
(4.) The Kar-cotae. - Here the Kar- is the common Finn root as before. Any part of the governmeot of Novogorod or Olonetz might have supplied the name, the present Finns of both belonging to the Karelian division of the name (the eel-being non-radical). Thez -
$(5,6,7,8,9,10,11$, sec.) The Sali, south of whom the Agathyrsi, then the Aorsi and Pagyritae, south of whom the Sivari, and Bornsci as far as the Rhipaean mountaios, Then the Akibi and Naski, seuth of whom the Vibiones and Idrue, and sonth of the Vibiones, as far as the Alauni, the Sturni. Between the Alauni and Hamaxobii the Karyones and Sargatii. At tha bend of the Tanais the Ophlones and Tanaitae.

There are few points in this list which are fixed. The beod of the Taosis ( $=$ Don) would place the Ophlones in Ekaterinoslav. The Burusci, if they reached the Rhipacan mountains, and if these were the Uralian ratber than the Vallai range, must have extended far beyond both European and Asiatic Sarmatia. The Savari bear a name very like one in Nestor - the Sjecera, on the Desna, Sem, and Sula,- a word that may merely mean northerw. It is a name that renppears in Cancasns - Sabeiri.

The Aorsi may be the Ersad (the $d$ is intlexional), a branch of the Mordvins, occupant at the present time of a tract on the OKa. The Pa-gyritae may have been the tribes on ( $p 0=o n$ ) the Gierrbus, such compounds being common is Slarooic, e. g-Po-labi (on the Elbe), Po-morania (on the sed), \&cc The whole geography, however, is indefinite and uncertain.

For Agathyrsi, see Hunni. The Sargatii are mentioned in Ptolemy.

Snath of the Tanaitae came the Osoli (? Sul-iczi of Nestor), reaching as far as the Roxolani, i. e. occupying parts of Cherson and Ekaterinoslav.

Between the Roxolani and Ifamaxobii the Rhakalani and Exobugitae. The statement of Pliny that the Hamaxobii were Aorsi, combined with simiJarity of name between Aorsi and Ersad, will not belp us here. The Ersad are in the governments of Penza and Tamlov; the direction of the Hamaxobii is more westward. Rhakalani seems but another form of Roxolani. In Exo-bug-itae the middle syllable may give us the root Bug, the modern name of the Hypanis. It has been surmised that this is the case with Sa-bok-ae, and Costo-boc-i. The locality would snit.

Between the Peacini and Basternae (this differeace between two nations otherwise identified creates a complication) lie the Carpiani, above whom the Gevini and Budini.

The Carpi must have been near or on the Corpathian Mountains. They appear as a substantive nation in the later history of Rome, in alliance with the Sarmatae, \&c, of the Dacisn frontier. We have a Victoria Carpica Arpi; Carpiani and Kapmodáwal (which Zeuss renders Carpathian Dacians) are several forms of this name [CARH'1]. They, along with the Costoboci, Armadoci, and Astingi, appear as the most important frontagers of Northern Dacia.

Between the Basternae and Roxolani the Choni,
 the Amadoci and Navari, and along the lake (marsh) of Byke the Torekkadae, and along the
 scythae, and sonth of the Bastarnae in the directiva of Dacia the Tagri, and sonth of them the Tyrangetae.

For Tauroscythae and Tyrangetae, see s. vv. and Scythia.

Tagri looks like a modified form of Zagora (tramontane), a common Slavonic geographical name, applicable to many localities.

The Amadoci ocenpied isia óp $\quad$, or the Mons Amadocus of Ptolemy. There was also a $\lambda / \mu \nu \eta$ 'A $\mu a \bar{\delta} \delta \kappa \eta$. This juxta-position of a mountain and lake (pool, or swamp, or fen) should fix their locality more closely than it does. Their history connects them with the Costoboci. (Zeuss, s. vv. Costoboci, Amadoci.) The physical conditions, however, come out less clearly than our present topo, graphical knowledge of Porlolia, Minsk, \&c. explaios. Fur the Navari see Neuri.

The name Chani is important. [See Hunnr.]
In Torek-kad-ae and Exo-bug-itae we bave two elements of an apparent compound that frequently occurs in Scytho-Sarmatian geograpby-Tyn-get-ac, \&rc, Costo-bok-i. Sa-boc-i. The geography is quite compatible in the presence of these elements.

Rivens.-From the Vistula eastwards, the Chronus, the Rhubon, the Turantas, the Chersinos,-the order of the modern names being the Pregel, Memel, Thuna, $A a$, and Neva. For the drainage of the Black Sea, see Scythit.
Mountains-Peuce, the Montes Amadoci, the Mona Budinas, the Mons Alannns, the Mous Carpathus, the Venedic monntains, the Rhipsean mouotains. None of these are definitely identified. It is difficult to say how Ptolemy named the most imlortant range of so flat a traet as Russia, viz., the Valdai Mountains. On the other hand, the oames of
his text imply more monntains than really exist. All his mountaios were, probably, spurs of the Carpathians, just as in Sarnatia Asiatica they were of Caucasus.

Towns.-See Scythia.

## Il. SARMATIA ASIATICA.

The bonodaries are-the Tanais, from its sonrees to its mouth, European Sarmatia from the sources of the Tanais northwards, the Maeotis and Cimmerian Bosporns, the Euxine as tar as the river Corax, the range of Caucasus, the Caspian as far as the river Soana, the Volga as far as its bend (Scythia being on the east of that river), - and on the north an Unknown Land. Without knowing the point at which this terra incognita begins, it is impossible to give the northern linits of Sarmatia Asiatica. It is included, however, in the governments of Caucusus, Circassia, Astrakhan, Dons Kosaks, Saratov, Simbirsk, Kazan, Fiatka, Kustroma, Iladimir (?), Nizhni Novogorod, Riazan (?), Tambov, and Pensa; all the governments, in short, on the water systein of the Volga; a view which makes the watershed betwcen the rivers that empty themselves into the White Sea and the rivers that fall inte the Caspian and Euxine a convenient provisional boundary.

For the obscure gengraphy of Asiatic Sarmatia, the bend of the Tanais is our best starting point. To the north of it dwelt the Perierbidi, a great nation; to the south the laxamatae, the former in Don Kosaks, Ioronesh, and Tambov, Sarator, the latter in Astrakham. North of the Perierbidi come the Asaei, the Suardeni, the Zacatae, the Hippophagi Sarnatae, the Modocae, the Royal Sarmatians, the Hyperborean Sarmatians, the Unknown Land. In Kazan and Simbirsk we may place the Chaenides, and on the east of the Vulgo the Phtbeirophagi and Materi. The N Nowî̃ıs $\chi$ ćpa must be at the month of the Jolgo. If so, the order in which the names have been given is from north to sonth, and the Phtheirophagi are in Eastern Kozan, the Materi in Saratov.

The remaining populations are all (or nearly all) in the governments of Caucusus and Circassia, in the northern spurs of the Caucasian range. They are the Siraceni, the Psessii, the Thymeotae, the Turambae, tbe Asturicani, the Arichi, the Zicchi, the Conapoeni, the Mcteibi, the Agoritae, the Melanchlaeni, the Sapothrmeni, the Scymnitae, the Amazones, the Sunani, the Sacani, the Orioaei, the Vali, the Servi, the Tusci, the Didari, the Vodae, the Olondae, the Isondae, the Gerrbi. The Achaei, Kerketi, Heniochi, Suanocolchi, and Sanaraei are truly Caucasian, and belong to the geography of the mountain range rather than the Sarmatian plains and steppes - for such they are in physical geography, and such was the view of Straho, so far as be noticed Sarmatia at all.

It is difficult to deternine the source of Ptolemy's information, difficalt to say in what language we are to seek for the meaning of his names. The real populations, as they actually existed, were not very different from those of the Herodotean Scythi:; yet the Herodotean names are wanting. These were, probably, Scythian, - the northern populations to which they applied being Ugrian. Are the names native? For the parts oune north of Cancasus they may be so; indeed it is possible that the greater nusober of them may be duc to a Caucasian source. At the present time, when we are fairly supplied with
deta bath ns to the names by which the popolations of the parts in ques ion designato themselves, as well as those by which they are designated by their neighbours, there are no satisfactory identifications at all. There are some that we may arrive nt by a certain amount of assumption; but it is doubtful whether this is legitimate. In the names, for instance, beginning with sa- (Sa-boci, \&c.) we may see the Slavonic for trans ; in those with pothe Slavonic ad, - both of which are common in the geographical terminology of the Russians, \&c. But these are uncertain, as are the generality of the other coincidences.

In Niberia, for instance, a Samoyed tribe is named Motor-zi : name for name, this may be Materi ; whether, however, it denote the same population is another question.

Are the Sarmatiae of Ptolemy natural divisions? Subject to an hypothesis, which will be just stated in the present article, but which will be exhibited in full is Scritis, the Sarmatiae of Ptolemy are objectionable, both for what it contains and what it omits. The whole of Asiatio Sarmatia is, more or less, arbitrary. It seems to be a development of the area of the IIerodetean Sauromatae. In the north it comprised Find or Ugrian, in the sonth Circassian and Georgian, populations. 'I he Alanni were Scythian, as were several other tribes. It is therefore no ethnological term. Neither are its boundaries natural, if we look at the physical conditions of the country. It was defined upon varying and different principles, - sometimes with a view to physical, sometimes to ethmological, sometimes to political geography. It contains more tban a natural Narmatia.

On the other hand, the Vistula was noetlinalogical line of demarcation. The western half of Poland was Sarnatian, in respect to its climate, surface, and the manners of its inhabitants. The Lygii, however, laving been made part of Germania, remained so in the eyes of Ptolemy. That the popnlations on each side of the Lower Vistula, i. e. of West and East Prussia, were the same, is certain; it is certain, at least, that they were so at the beginning of the historical period, and all infereace leads us to hold that they were so before. The Vistula, however, like the Rhine, was a good natural boundary.

The Jazyges Metanastae were most probably Sarmatian also. Pliny calls them Jazyges Surmatae (iv. 25 ); the name Detanastae being generally interpreted remover. It is, however, quite as likely to be some native adjunct anisubderstood, and adapted to the Greek language.

The other Jazyges (i. e. of the Maeotis) snggested the doctrine af a misration. Yef, if the current interpretation be right, there might be any amount of Jazyges in any put of Sumatia. It is the Slavonie for language, and, by extension, for the people who speak a language:-"a po Orje rjeje, gle wteczet" w Welgu, jazyk swoj Murmma, i Czeremisi swoj jazyk, e Murdwa swoj jazyk; "—translated, "On the Oks river, where it falls into the Volga, a particnlar people, the Muroma, and the Tsheremis, a peculiar people, and the Mordwins, a penliar peopple." (Zenss, r. v. Ostfinnmen). Hence it has at least a Slavonic floss. On the other haad, it has a meaning in the Magyar languige, where Jasmag $=$ bowman, a fact which has induced many schelars to believe that there were Magyars in Mnagary before the great Magyar invasion, indeed before the Hun. Be this as it may, the district of the Jayyges Me-
tanastae is called the Jassay district at the present momeat.

Whre than one of the Dacian popnlations were Sarmatian,-the difference between Dacia, the name of the Roman Province, and Sarmatia, the country of an independent and hostila population, being merely political. Indeed, if we louk to tha distribution of the Sarmatae, their south-eastern limit must have the parts about Tormi. [See Sauromatas.] Here, however, they were intrusive.

Ethnology. - The doctrine upon this point is merely stated in the present notice. It is developed in the article on Scymus. It is to the effect that, in its proper application, Sarmatian meant one, many, or all of the north-eastern members of the Slavonic family, prohably, with some members of the Lithuanic, ineluded.

Historx. - The early Sarmatian history is Scythian as well [ScyTuIA], and it is not until Pannonia becomes a Roman province that the Sarmatian tribes become prominent in listory, snd, even then, the distribution of the several wars and allinnces between the several nations who came under the general denomination is obscure. In doing this there is much that in a notice like the present may be eliminated. The relations of the Greeks and esrlier Romans with Sarmatia were with Scythia and the Getae as well, the relations of the latter being with the provincials of Panneaia, with the Marconnanoi, and Quadi, \&c. Beth are neighbours to a tribs of Jazyges.

The great Mithridatic Empire, or, at any rate, the Mithridatic Confederacy, contaised Sarmatians co nomine, descendadta of the Herodotean Sanromatae. Nembers of this division it innst have been whom the Marcus, the brother of Laciue Lacallus, chastised and drove beyond the Dannbe, in his march through Muesia Those, too, it was with whom the Cis-Danobian nations is general were oftedest in contact,-Jazyges, Rosolani, Costoboci, \&c., who though (almost certainly) Sarmatim io their etbnological affinities, are not, eo nomine, Sarmatian, but, on the contrary, populations with more or less of an independent listory of their own. Thirdly, the sirmatians, who, in conjunction with Getae, Daci, Moesians, Thracians, \&c., may hare been found in the districts south of the Danabe, must be looked upon as intrusive and foreign to the soil on which they are fonnd.

On the other hand, it must be remembered that the Surmatae eo nomine fall into two divisions, divided from each other by the whole extent of the Roman province of Dacia, the area of those of the east being the parts between the Danabe and the Don, the area of thuse of the west being the parts between the Dannbe and Theies. The relatiens of the former are with the Scythians, Roxoloni, the kings of P'ontus, \&c., over whom, some ygars later, M. Crassus triumphed. His actions, however, as well as those of M. Luenilus, so far as they were against the Sammatne, were only accidental details in the campaigns by which Moesis was reduced. The whole of the Trans-Dannbion frontier of Muesia, east of Viminiacum, was formed by Dacia.

The point at which the Romans and Sarmatians would more especially come in contact was the country about Sirmium, where the thres provinces of Pannonia, Illyricuns, and Muesia joined, nod where the pre-eminently Sarmatian distriets of the zations between the Danube and Theiss lay northwards -pre-eminently Sarmatian as epposed to the Dacians,
on one side, and the Quadi, \&c., of the Regrum Vannianum, on the other. In the general Pannonian and Dalnatian outbreak of A. D. 6, the Surinatias of these parts took a share (Vell. Pat. ii. 110), as they, donitelessly, did in the immediately previous war of the Marcomanni, under Maroboduue; the Marcomanni, Quadi, Jauyges, and western Daci, and Sarmatae being generally united, and, to all appearances, the members of a definite confederacy.

The Regnum Vannianum gives us the continuation of the history of these populations (A. D. 19-50). It is broken np; Vannius (? the Ban) himself dizplaced, and Vangio and Sido, strongly in the interest of Rome, made kings of the parts between the Marus and Cusus (Moracia) instead. To the Iannian confederacy (a Ban-at) the Sarmatae and Jazyges steply the cavalry, the occupants of the Banat itself the infantry (Tac. Annal. xii. 29).
For A. D. 35, we find an interesting notice in Tacitus, which gives definitude to the Sarmatia Asiatica of Ptolemy. It is to the effect tbat, in a war with Partbia, Pharasmanes entered into an alliance with the Albanians of the coast of the Caspian and the Sarmatae Sceptuchi (? Ba $\sigma$ (A $\epsilon 10$ ). (Тис. Ann. vi. 33.)
A. D. 69. Two pregnant sentences tell ns the state of the Sarmatian frontier at the accession of Galbs: "Coortae io nos Surmaturune ac Suevorum gentes; nobilitatus cladibus mntuis Dacus" (Hist. i. 2). The Suevi (who bere mean the Quadi and Marcomanni) and Sarmatae (foot and horse) are uaited. Dacia is paving the way to its final subjection. The Jazyges seem to fall off from the alliance; inasmuch as they offer their services to Bone, which are refused. The colleague of Sido is now Italicus, equally faitlful to Rome. (Hist iii. 5.) In the following year it is Sarmatae and Daci who act together, threatening the fortressea of Muesia and Pannonia (iv. 54).

Ao invasion of Moesis by the Roxolani took place A.D. 69. This is a detail in the history of the Eastern branch.
Tbe conquest of Dacia now draws near. When this has taken place, the character of the Sarmatian area becomes peculiar. It consists of an independent atrip of land between the Roman Province and Quado-Marcomannic kingdom (Banat); its political relations fluctuating. When Tacitus wrote the Germania, the Gothini paid tribute to both the Quadi and Sarmatae; a fact which gives us s political difference between the two, and also a line of separation. The text of Tacitus is ambiguous: "Partem tributorum Sarmatae, partem Quadi, ut alienigenis imp nonut" (Germ, 43). Were the Sarmatae and Quasi, or the Quadi alone, of a different family from that of the Gothini? This is doubtfal. The difference itseif, however, is important.

There were Sarmatians amongst the subjecta as well as the allies of Decebalus; their share in the Dacian War (A. D. 106) being details of that everit. They were left, however, in possession of a large portion of their country, i. e. the parts between the Vallum Romanum and the frontier of the Suevi, Quad, or occupants of Regnum Vannianum; the reiations of this to the Roman and non-Roman areas in its aeighbourhood being anaiogous to that of the Decumates Agri, between the Rbive and Upper Dsaube.

Io the Marcomannic War (under M. Antoninus) the Sarmatae are as prominent as any members of the confederacy: indeed it is probable that some of
the Marcomanni may lave been Sarmatae, under another name. This is not only emmpatible with the andoubtedly German origin of the name Marcomanni (Marchmen), but is a probable interpretation of it. German ax was the term, it might be and very likely was, applied to a non German pupulation. There were two Marches: one held by Germans for Fome and against the Sarmatians, the other held by the Sarmatians for themselves. The former would be a March, the other an UKraine. In the eyes of the Gennaos, however, the men of the latter would just as much be Marchmen as themselves. What the Germana in the Roman service called a neighbouring population the Ronana would call it also. We shall soon hear of certain Borderers, Marchmen, or men of the Ukraine, under the name of Limigantes (a semi-barbarous form from Limes); but they will not be. on the strength of their Latin names, Latins. The Solitudnes Sarmatarum of the Roman maps was more or less of a Sarmatian March. The Jazygea and Quadi are (as usual) important members of the confederacy.
A. p. 270. Aurelian resigus the province of Dacia to the Barlarians; a fact wbicb witbdraws the acene of many a Sarmatian inroad from the field of observations, -the attacks of the Barbarians upon each other being unreeorded. Both before and after this event, bowever, Larmatian inroads along the whole line of the Danube, were frequent. Sarmatians, too, as well as Daci (Getae) were comprebended under the general name of Goth in the reigns of Decius, Claudiue, \&c. Add to this that the name of Vandal is now becoming conspicuous, and that under the name of Vandal history we have a great deal that is Sarmatian.

The most important effect of the cession of Dacia was to do away with the great block of Roman, Romanising, or Rumanised territory which lay between the Surmatians of Pannonia and the Sarmatians of Scythia. It broaght the latter within the range of the former, both being, then, the frontagers of Moesia. Add to this the tact of a great change in the nomenclature being effected. The German portion of the Marcomanni (Thervings and Grutungs) has occupied parts of Dacia. The members of this section of the German name would only know the Sarmatae as Vandals. Again, the Hub power is developing itself; so that great material, as well as nominal, clanges are in the process of development. Finally, when the point from which the Sarmatae come to be viewed has become Greek and Constantioopolitan, rather than Latin aod Roman, the names Slaveni and Servi will take prominence. However, there is a great slaughter of the Sarmatians by Carus, on his way eastwards. Then there is the war, under Constantine, of the Sarmatae of the Border,-the Sarmatae Limigantes, - a Servile War. [See Limgastes.] The authors who tell na of this are the writers of the Historia Ausgusta aod Ammianns; after whose time the name is either rarely mentioned, or, if mentioned, mentioned on the authority of older writers. The history is specific to certain divisions of the Sarroatian population. This was, in its several divisiona, hostile to Rome, and independent; still, there were Sarmatian conquests, and colonies effected by the transplantation of Sarmatae. One lay so far east as Gaul.
"Arvaque Sauromatum nuper metata coloni"
(Auson. Mosclla)
appilies to one of these．There were more of them． The general rule，however，is，that some particular division of the mame takes historical prominence， and that the general name of Sarmatia，as well as the particular Sarmatae of the parts between Dacia and l＇annoria，and those between Scythia and Persia，disappears．［See Vandali；Thafa－ LAE．］
［R．G．L．］
SARMA＇TICA I＇NSULA，an island at that mouth of the Danube called Kalonstoma（ $\tau \delta$ кал $\delta \nu$ बтóua）．（Plin．iv．24．s．24．）
［T．H．D．］
SARMA＇TICAE PORTAE（ai इapuatıкal $\pi i ́$－ $\lambda a t$ ，Ptol v． $9 . \S 今 11,15$ ），a narrow pass of the Cancasns，whence it is also called Caucusiae Portae． （Plin．vi．11．s．12，15，a．15．）From its vicinity to the Caspian seat，it was also ealled by some of the ancients Portace Caspiae（Suet．Nero，19），Clanstra Caspiarum（Tac．II．i．6），and Via Caspia（Id．Ann， vi．33）；bat Pliny（l．c．）notes this as an error；and the proper Portae Caspiae were in the Tauras （Forbiger，Geogr．vol．ii．p．47，note 92）．The Sar－ maticae Portae formed the only road between Sar－ matia and Iberia．Ptolemy（ $l$ ．c．）distinguishes from this pass another in the same monotain，which he calls ai＇Axbaiviat Пú入at（Portae Albaniae），and places the latter in the same latitude as the former， namely the 47 th degree，but makes its longitude 3 degrees more to the E．The Albanise Portae are those on the Alazon，leading over the monntain from Derbend to Berdan．At both spots there are still traces of leng walls 120 feet in height；and on this circumstance seems to have been founded a legend， prevalent in that neighbourbood，of the Black See aud the Caspian having been at one time connected by such a wall．（Forbiger，Ibid．p．55，note 13，b．； comp．Ritter，Erdlunde ii．p．837．）［T．H．D．］

SARMA＇TICL MONTES（इариatiкà úpף），a range of mountains on the eastern frontier of Ger－ many，mentioned only hy Ptolemy（ii．11．§ 6，viii． 10．§ 2），according to whom it appears to have ex－ tended north of the Danube as far as the sourees of the Vistula，and therefore consisted of the mountains in Morovia and a part of the Car－ pathians．
［L．S．］
SARMA＇TICUM MARF（ $\delta$ इ $\alpha \rho \mu a \tau \iota \kappa \partial{ }_{s} \dot{\omega} \kappa \in a \nu o ́ s$, P＇ol．vii．5．§§ 2，6），a sea in the N．of Europe， washing the coast of Sarmatia，and which putht thus have been the Ballic（Tac．Germ．45）．But sometimes the Black $S_{e a}$ is designated by the prets under this name，as by Ovid（ex Pont．iv，10．38） and by Valerius Flawcus（Sarmaticus Pontus，vini． 207）
［T．H．D．］
SARMATINA，a town of Arisna，mentioned by Ammisuu（xxiii，6）．It is probably the same as the Surougana of Ptolenay（vi．17．§ 4），as both he and Ammianus place it next to Bitasa，in the same provine e．
［V．］
 iii．8．§9：Zepur（єүєЄoúrn，Bion Cass．1viii．9），oue of the mose considerable torms of Dacia，and the revidence of the D．ccian kingn（Baai入etov，Ptol．l．c．） It is called Sarmategte in the Tabula Peut．．and Sar－ mazege by the Geogr．Rav．（iv．7）．It is incontes－ tably the same plave as that ealled $\tau \dot{a} B a \sigma$ ineia $\Delta a c \bar{\omega} \nu$ by Ihon Cassins（1xvii．10）1xviii．8），who places it on the river Sargetia（fh．c．14）；a sitnation which is also testified ly ruins and inscriptions．At a later period a Roman culony was founded here by Trajan，after he had expelled and killed Decebalns king of the Dacians；as is testified by its name of Colonia Ulpia Trajana Augusta，and may bo iuferred
from Ulpian（Dig．50．tit．15．1．1．），from whom we also learn that it possessed the Jus Italienm，It was the head－quarters of the Legio xiII．Gemina （Dion Cass．Iv．23），and at first probably there was only a Roman encampment Lere（ld．Iviii．9；Aur． Vict．Caes．xiii．4）．Hadrian conferred an aqueduct upon it，as appears from an inscription（Gruter，p． 177．3；（relli，No．812），and that emperor seems to have retained the colony，on account of its nume－ rous Roman inhabitants，when be resolved to ahaodon the rest of Dacia to the barbarians．From an inscription to Trajan and his sister Marciana， there would appear to have been hatha bere（Orell． 791）．Sarmizegethusa occupied the site of the pre－ sent Jorhely（called also Grodischte），on the rivir Strel or Strey，abont 5 Roman miles from the Porta Ferrea，or Vulcan Pass．（Comp．Inscr．Gruter，p－ 272 ；Orelli，Nos． $83 t, 3234,3433,3441,3527,3686$ ， 4552 ；Zatnose．Ann．Pp．40， 74 ；Marsili，Danub． tab．24，55，\＆c．：Ukert，iii．2．p．616，seq．；Zumpt， is Rhein．Mus．1843，p．253－259．）［T．H．D．］

SARNEIUS（इápveios），a small stream of Hyr－ cania mentioned by Strabo（x．p．511），which，after rising in M．Corenus，flowed in a westerly direction into the Carpian．Professor Wilsen considers that it must be either the Atrek or the Gurgan．［V．］

SARNIA or SARMIA，is named in the Maritime Itin．among the islands of the Ocean between Gallia and Britannia．Supposed to be Guernsey．［G．L．］

SARNUS（ $\delta$ इapyós：Sarno），a river of Cam－ pania，flowing into the Bay of Naples．It has its sources in the Apennines，above Nuceria（Nocera）， near which city it emerges into the plain，and，after traversing this，falls into the sea a short distance S．of Pompeii．Its present mouth is about 2 miles distant from that city，but we know that in ancient times it flowed under the walls of Pompeii，and entered the sea close to its gates．［Pompeil．］The change in ito course is doubtless ewing to the great catastrophe of A．d．79，which buried Pompeii and Herculaneum． Virgil speaks of the Sarnus as flowing through a plain（quae rigat aequora Sarnus，Aen．vii．738）； and both silius Italicus and Statius allude to it as a placid and sluggish stream．（Sil．Ital．viii．538； Stat．Silv．i．2．265；Lucao，ii．422．）According to Strabo it wats navigable，and aerved both for the export and import of the produce of the interior to and from Pompeii．（Strab，v．p．247；Plia，iii． 5. s． 9 ；Ptol，iii． 1. § 7 ：Suet．Clar．Rhet．4．）Vibius Sequester tells us（p．18）that it derived its name as well as its sources from a meuntain called Sarus，or Sarnus，evidently the same which rises above the modern town of Sarno，and is still called Monte Saro or Sarno．One of the principal sources of tbe Surno does，in fact，rise at the foot of this mountain， which is joined shortly after by several confluents， the most considerable of these being the ono which－ flows，as above described，from the valley beyood Nuceria．

According to a tradition allnded to by Virgil （l．c．），the banks of the Sarnus and the plain through which it flowed，were inhabited in ancient times by a people called Sarkastes，whose name is evidently conneeted with that of the river．They are representel as a Pelavgian tribe，who settled in this part of Italy，where they founded Nuceria，as well as several other cities．（Conon，ap．Serv．ad Aen．l．c．；Sil．Ital．viii．537．）But their name seems to have quite disappeared in the historical period； and we find Nuceria occupied by the Alfaterni，who were ata Uscan or Sabellian race．［Nuceria．］

No frace is fonod in ancient authors of a town of the name of Sarmus；but it is mentioned by the Geugrapher of Ravenoa（iv．32），and seems，there－ fore，to have grown up soon atter the fall of the Iuman Einpire．

 aкdेs кúNтоs，Strab．viii．p．335：Gulf af Egina），a gulf of the Aegraean sea，exteoding from the pro－ montories of Sunium in Attica and Scyllaenm in Troezenia up to the isthmus of Corinth．The length of the gulf，according to Scylax（p．20， Hudson），is 740 stadia．It washes the coasts of Attica，Megaris，Corinth，Epidaurus and Troezen， and contains the islaods of Aegina and Salamis．It was said to have derived its name from Saron，a king of Troezen，who was drowned wbile bunting in a lagoon upon the Troezenian coast called Phoebaea and afterwarda Saronis．（Paus．ii．30．§ 7；Etym． 11．p．708．52；Leake，Morea，vol．ii．p．448．）A Troezenian river Saron is also mentioned（Eustath． ad Lionys．Per．422），and likewise a town of the same name．（Steph．B．s．v．）Some derived the name of the gulf from $\sigma$ apwvis，＂an oak．＂（Plin． iv．5．s．18．）
 a promontory on the coast of Cilicia， 80 stadia to the west of the month of tbe Calycadnus，and 120 from Seleuceia．In the peace between the Romans and Antiochus the Great this promontory and Cape Calycadous were made the froatier between the kingdom of Syria and the free countries of Asia Mioor．（Strab．xiv．p． 670 ；Ptol．v．8．§ 3 ；Ap－ pian，Syr． 39 ；Pomp．Mela，i． 13 ；Liv．xxuviii． 38 ；Plin．v． 22 ；Stadiasm．Mar．Magni，§ 163．） It now bears the name of Lissan－el－Kahpe．（Leake， Asia Minor，p．203．）
［L．S．］
SARPEDONIUM PROML．（ $\Sigma_{\alpha \rho \pi \eta \delta o \nu i ́ \eta ~ K \kappa \kappa \eta, ~}^{\text {K }}$ Herod，vii．58），the NW．extremity of the gulf of Melas，and due north of the eastern end of the island of Imlmos，now Cape Poxi．
［J．R．］

## SARRASTES．［Sarnus． 7

SARRUM，in Gallia，is placed by the Table be－ tween Condate（Cognac）［Condite，No．5］and Vesunoa（Perigueux）．It is sappased to be Char－ mans，but the real distances do not agree with the numbers in the table．
［G．L．］
SARS，a river on the W．coast of Hispania Tar－ raconensis，betweet the Prom．Nerinm and the Minins．（Mela，iii．1．）Incontestably the modern Sar，which does not reach the sea，but falls ioto the ancient Ulla at Turris Augustı（Torres de Este）． （Comp．Florez，Ezp．Sagr．xv．p．41．）［T．H．D．］
 sina），a city of Umbria，situated is the Apenaines， on the left bank of the river Sapis（Savio），abont 16 miles above Caesena．It seems to bave leeen in very early times a powerfol and important city，as it gave onme to the tribe of the Sarsinates（ （apot－ várot，Pol．），who were one of the most considerable of the Umbrian tribes．Indeed some authors speak of them as if they were not includel in tbe Um－ brian nation at all，but formed a separate tribe with an independent aational character．Thus Polybius， in enumerating the forces of the Italian nations， speaks of the Umbrians and Sarsinates，and Plautus，
in one passage，makea a similar distinction．（Pol，ii． 24 ；Plaut．Mostell．iii．2．83．）The Fasti Capito－ lini，also，in recording the conquest of the Sarsinates， speak of the two consuls as triumpling＂de Sarsi－ natibus，＂withont any mention of the Umbrians； but the Epitome of Livy，in relating the same event， classes them generally among the Umbrians，（Liv． Epit．xv．；Fast．Capit．）The probable conclasion is that they were a tribe of the Umbrian race；bat with a separate pulitical organisation．We have no particulars of the war which ended in their subjec－ tion，which did not take place till B．c． 266 ，so that they were one of the last of the Italian states thant submitted to the Roman yoke．From this time Sarsina was certainly included in Umbria in the Roman sense of the term，and became an ordinary mnnicipal town，apparently not of much importance． （Strab．v．p．227；Plin．iii．14．s．19．）It derived its chief celebrity from its being the birthplace of the celebrated comic poet Pladtus，who was born there about B．C． 254 ，very shortly after the Roman conquest．（Hieron．Chron．ad Ol． 145 ；Fest．s．$v$ ． Plotus，p．238．）Its territory contained extensive monotain pastnres，－whence it is called by Silios Italicus＂dives lactis＂（Sil．Ital，viii．461），－as well as forests，which abounded in dormice，so much prized by the Romans．（Martial，iii．58．35．）Va－ rious inscriptions attest the municipal rank of Sar－ sina under the Roman Empire（O，ell．Inscr． 4404 ； Gruter，Inser．p． 322.8 ，p．1095．2）：bat its anme is not again found in listory．In the middle ages it sunk into complete decay，but was revived in the I3th century，and is now a kmall town of 3000 in － habitants，which retains the ancient site as well as name．
［E．H．B．］
SARTA（इápтŋ，Herod．vii． 122 ；Steph．B．s．v．）， a maritime town on the Singitic gulf between Singas and Ampelus Prom；now Kartali．（Leake， North．Greece，vol．iii．p．154．）
［E．B．J．］
SARUE＇NA（ （Lapoúnva），a town of Cappadocia， in the district Chamane or Cbamanene，on the north－ eastern alope of Mount Argaens，celebrated for its hot springs（Ptol．v．6．§ 12 ；Tab．Peut．，where it is called Arauena，whence Aquae Arauenae；It． Ant．p．202，where its name is Sacoena）．It is by some believed to be the modern Baslyan．［L．S．］
SARUNE＇TES，the name of an Alpme people（Plin． iii．20．s．24）in the valley near the sources of the Rline．There seems no reason to donbt the correct－ ness of the name，and it may be preserved in Sorgans， which is north of Chur，and between Chur and the Lake of Constanz．In a passage of Caesar（B．G．iv． 10）be mentions the Nantuates as a people in the npper part of the Rhise，above the Helvetii．The name Nantuates［Nantuates］is corrupt；and it is possible that the name Sarunetes should be in its place．
［G．L．］
SARUS（ ミápos），one of the principal rivers in the south－east of Asia Minor，baving its sources in Mount Taurus in Cataonia．It first flows in a south－ easters direction throogh Cappadocia by the town of Comana；it then passes through Cilicia in a south－ western direction，and，after flowing by the town of Adana，empties itself into the Cilician sea，on the south of Tarsus，after dividing itself into several branches．（Liv．xxxiii．41．）According to Xenophon （Anab．i．4．§1）its breadth at its nooth was 3 plethri or 300 feet；and Procopius（de Aedif．r．4）says it was a nnvigable river．（Comp．Strab，sii．p． 535 ； Ptol．v．8．§ 4 ；Appian，Syr． 4 ；I＇lin．vi．3；Eu－ stath．ad Dion．Per． 867 ，who erroneously calls it

Sinarus.) The modern name of the Sarus is Sihun or Seithan.
[L.S.]
AARXA, a station on the road from Philippi to Ileracleia (Peut. Tab.), to the N. of the Lake Cercinites, between Strymon and Scotnssa. Now Zikhna. (Leake, North. Greece, vol. iii. p. 227.) [E. B.J.]
 Roman miles to the south of Nazianzus; the place contained the first church to which Gregory of Nazianzus was appointed, and he descrilies it as a most iniserable town. (It. Ant. p. 144; It. Hieros. p. 577 ; Hieracl. p. 700, with Wesseling's note.) Sone look for its site near the modern Babloma.
[L.S.]
SASO ( $\Sigma \alpha \sigma \dot{\omega}, \mathrm{Ptol}, \mathrm{iii} .13 . \S 47$; इ $\alpha \sigma \omega \bar{\omega}$. Strab. vi. p. 281 ), a small, rocky island, lying off the coast of Grecian Illyrin, N. of the Acroceraunian promontory, and possessing a landing-place which served as a station for pirates. (Comp. Polyb. v. 110 ; Mela, it. if Plin. iji. 26. s. 30 ; Itin. Ant. p. 489.) It is still called Saseno, Sassono, or Sassa. [T. H. D.]

SASPI'RES, or SASPIRI (इáantepes, इa$\sigma \pi$ thpai, Herol. i. 104, iv. 37, 40, vii. 79: Apoll. Rhod, ii. 397, 1242; Steph. B. e. v.: cf. Amm. Marc. $x$ xii. 8. § 21), a Scythian people, dwelling to the S. of Colchis and N. of Media. According to Herodotus and Stephanus ( $l L$ cc.) they were an inland people, but A pollonius places them on the seacoast. They belonged to the 15 th satrapy of the persian kingdom (Herod. iii. 94), and were armed in the same manner as the Colchians, that is, with wooden helmets, small shields of untanned hide, short lauces, and swords ( Ib . vii. 79). The Parisian scholiast on Apollonius derives their name from the abuadance of supplies found in their country. The Saspeires appear to have iohabited that district of Georgia lying on the upper course of the river Cyrus, in which Tiflis lies, which is still called Tschin Kartuel ; and as the distriet contains several other places, the names of which begin with the syllable Tschin, Ritter conjectures that the Saspeires were identical with the eastern Iberians, respecting whom the Greeks invented so many fables. (lenaell, Geogr. of Herod. p. 503: Ritter, Erdkunde, ii. p. 922; Bahr, ad Ilerod. i. 104.) [T. H. D.]

SA'SSULA, a town of Latinm, situated in the neighbunrbood of Tibur, of which city it was a dependency. It is meationed onls by Livy (vii. 19) among the towns taken from the Tburtines in B.c. 354, sod was probably always a small place. The site has heen identified by Gell and Nibby with the ruins of an ancient town, at the foot of the hill of Sicilinno, between 7 and 8 miles from Tivoli (Tibur). The ruins in question, consisting of a line of walls of polygonal construction, surrounding a hill of small extent, unquestionably indicate the site of an ancient town; but as we know that the Tiburtine territory contained several other towns besides Empulum and Sassula, the only two whose nanes are known to us, the identilication of the latter is wholly arbitrary. (Gell, Top. of home, p. 394. Nibhy. Dintorni, vol. iii. ]. 63.) [E.H. B.]

SATAClITHA ( $\Sigma a \tau \alpha x \theta a$, or $\Sigma a \tau \alpha \chi \theta a b, 1$ 'tol, iv. 7. § 17), a place in Acthiopia, ont the left bank of the Nile, probably near the present Korti, or else somewhat more to the S., near the half-testroyed village of Ambucote.
[T. 11. D.]
SA'liALA (之átala), an important town of Armenia Minor, as may be inferred from the anmerous routes which branched off from thence to Pontus and Cappudocia. Its distance from Caesurcia was 325 miles, and 124 or 135 from Trapezus. The
town was situated in a valley sarrounded by mountains, a little to the north of the Euphrates, and was of importance, being the key to the mountain passes leading into Pontos; whence we find that in later times the Legio xv. Apollinaris was stationed there, In the time of Justinian its walls had fallen into decay, but that emperor restored them. (Ptol, i. 15. § 9, v. 7. § 3, viii. 17. § 41 ; Dion Cass. Ixriti. 18 ; Procop, de Aed. iv. 3 ; It. Ant. pp. 181, 183, 206, 207,216, 217; Notit. Imp.; Tab. Pext.) The site of this town has not yot been discovered with certainty, though ruins found in varioas parts of the conntry bave heen identified with it by conjecture. (Tournefort, Voyages, Letter 21, c. 2. p. 17 ; Rennell, Asia Minor, ii. p. 219 ; Cramer, Asia Miner, it, p. 152, foll.)
[L. S.]
SATARCHAL. a Scythian people on the E. coast of the Tauric Chersonesus, who dwelt in caves and holes in the ground, and in order to avoid the rigour of winter, even clothed their faces, leaving only two small holes for their eyes. (Mela, ii. 1.) They wero unacquainted with the use of gotd and silver, and carried on their traffic by means of barter. They are mentioned by Pliny under the name of Scythi Sntarchi (iv. 26). According to Ptolemy (iii. 6. § 6) there was a town in the Tauric peninsula called Satarche ( $\Sigma a \tau \dot{p} \chi \eta$ ), which the scholiast ( $a d$ loc.) says was subsequently called Matarcha (Mátapđa); tut the account of the Satarchae living in caverns seems inconsistent with the idea of their having a town. Yet Valerius Flacens also mentions a town -or perhaps a district-called Satarche, which, from his expression, " ditant sua mulctra Satarchen," we may conclude to have been rich in herds of cattle, (Argon. vi. 145.) The same poet describes the Satarchae as a yellow-haired race. (Ib.) [T.H.D.]

SATICULA (इatíкоגa, Diod.: Eth. इatuкaגavós, Steph. B.; Saticulanus, Liv.; hut Saticulus, Virg.) a town of Samnium, nearly on the frontiers of Campania. It is first mentioned at the ontbreals of the First Samnite War (n, c, 343), when the consul Cornelius established his camp there, apparently to watch the movements of the Samnites in that quarter, and from thence subsequeatly advaocing into their territory, was drawo into a defile, where be narrawly escaped the loss of his whole army, but was saved by the courage and ability of Decius. (Liv. vii. 32, 34.) Agnio, in n.c. 315, during the Second Samnite War, it was besieged by the Roman dictator L. Aemilius, and was considered of sufficieat importance to engage a Roman army for nearly a year, when it was taken by Q. Fabios. The Samnites made a vigorons attempt to relieve it. hut without effect, and it fell into the hands of the liomans. (Id. ix. 21, 22; Diod. xix. 72.) From this time it coutinued in their power; and befure the close of the war it was one of the places which they determined to occupy with a colony, which was established there in 1s. c. 313. (Yell. Pat. i. 14; Fent. s. v. Saticula, p. 340, ML) Livy does not notice the estabishment of a colony there on this occasion, but he afterwards mentions it ns one of the "coloniae Latime," which distinguished themselres in the Second Punic War by their zeal and fidelity. (Liv, xavii. 10.) It is remarkable, however, that a few years before the name of Saticula is found among the towns that had revolted to Hannibal, and were recovered by Fabios in 13. C. 215. (Liv, xxiii, 39.) But it appears that all the Msis. have "Austicula" (Alschefski, ad loc.); and though this name is otherwise quite unknown, it is certainly not safe to slut
it, when, by so doing, we involve ourselves in a great historical difficulty; for the revolt of one of the Latin colonies is in itself most improbable, and was certainly not an event to be passed over with such slight notice. The territory of Saticulum ("ager Saticulanus ") is again noticed during the same war in conjunction with that of Trebula (Liv. xxiii. 14); but from the end of the Second Iunic War all trace of it disappears. The name is not found in any of the geographers, and itg site is extremely uncertain. But the passages in Livy (ix. 21, 22) seem to point to its being situated not far from Plistia, which may very probably be placed at Prestia near Sta Agata dei Goti; while the description of the march of Marcellus in B. C. 216 , shows clearly that it must have been situated S. of the Vultnrnus, and probably in the valley at the back of Mount Tifata, between that ridge and the underfalls of Mount Taburnus. It may be added that sucb a position would be a very natural one for the Roman consnl to occupy at the first outbreak of the Samnite wars, from its prosimity to Capua.
[E. H. B.]
SATloN. [Dassaretae, Vol. 1. p. 756, a.]
SATNLOEIS (之arvióes: Tuzla or Tusla), a small river in the southern part of Troas, having its sonrces in Munnt Ida, and flowing in a western direction between Hamaxitus and Larissa, discharges itself into the Aegean. It owes its celebrity entirely to the Homeric poems. (II. vi. 34, xiv. 445, xxi. 87 ; Strab. xiii. pp. 605, 606, who states that at a later time it was called इaфvióts.)
[L. S.]
SATRAE ( Kátpai, Herod. vii. 110-112), a Thracian people who occupied a portion of the range of the Pangaeus, between the Nestus and the Strymon. Herodotus states that they were the only Tbraciau tribe who bad always preserved their freedom; a fact for which he accounts by the vature of their country, -a monntainous region, covered with foresta and snow - and ly their great hravery. They alone of the Thracians did not follow in the train of Xerzes, when marching towards Greece. The Satrae were in possession of an oracle of Dionysus, situated among the luftiest mountain peaks, and the interpreters of which were taken from among the Bessi,a circumstanice which has suggested the conjecture that the Satrae were merely a clan of the Bessi, a notion which is rendered more probable by the fact that Herodotus is the only ancient writer who mentions them; whereas the Bessi are repeatedly spoken of. We may infer from Pliny's expression, "Bessorum multa nomins" (iv. 11. s. 18), that the Bessi were divided into many distinct clans. Herodotus says that to the Satrae belonged the principal part of the gold and silver mines which then existed in the Pangaens.
[J. R.]
SA'TRICUM (Eth. Уatpıкavós, Satricanns: Casale di Conca), an ancient city of Latinm, situated on the frontier of the Volscian territory, between the Alban bills and the sea. This position rendered it a place of importance during the wars between the Romans and Volscians, and it is freqnently mentioned in bistory at that period. It appears to have been originally a Latin city, as Diodorus mentioos its name among the repnted colonies of Alba, and Dionysius also inclndes it in the list of the thirty cities of the Latin League (Diod. vii. Fr. 3; Dionys. v. 61.) But when it first appears in bistory it is as a Volscian town, apparently a dependency of Antium. It had, however, been wrested from that people by the Romans at the same time with Corioli, Pollusca, \&c ; and bence it is one of
the towns the recovery of which by the Volscians is ascribed to Corinlanus. (Liv. ii. 39.) It seems to have continued in their power from this time till after the Gaulish invasion, as in n.c. 386 it was made the head-quarters of the Volscians and their allies in the outbreak of a war with Kntne, and, after their defeat by Camillus, was assauited and taken by that general. (1d. vi. 7, 8.) It would appear that it must on this occasion have for the first time received a Roman colony, as a few years later (B. C. 381 ) it is styled a "colnuia populi Romani." In that year it was attacked by the Volscians in concert with the Praenestines, and, after an obstinate defence, was carried by assanlt, and the garrison put to the sword. (Id. vi. 22.) It is subsequently mentioned on two occasions as affording shelter to the Volscian armies after their defeat by the Romans (1d. vi. 22, 32); after the last of these (b. C. 377) it was burnt by the Latins, who considered themselves betrayed by their Volscian allies. ( $I b$. 33.) It was not till B. c. 348 that the city was rebuilt by the Antiates, who establisbed a colony there; but two years later it was again taken by the Romans under M. Valerius Corrus. The garrison, to the number of 4000 men, were made prisoners, and the town burnt and destroyed, with the exception of a temple of Mater Matuta. (Id. vii. 27; Fast. Capit.) A few years later it was the scene of a victory of the Romans, under C. Plautios, over the Antiates (id. viii. I), and seems to have been soon after restored, and received a fresb colony, as it was certainly again inhabited at the commencement of the Second Samnite War. In e.c. 320 , after the disaster of the Candine Forks, the Satricans revolted from Rome and declared in favour of the Samnites; but they were soon punished for their defection, their city being taken by the consul Papirins, and the Samnite garrison put to the sword. (Liv. ix. 12, 16; Oros, iii. 15.) From this time it seems to have continued subject to Rome; but its name disappears from history, and it probably sunk rapidly into decay. It is incidentally mentioned during the Second Punic War (b. c. 206) on occasion of a prodigy which occurred in the temple of Mater Matuta, already noticed (Liv. xxriii. 11); bnt it seems certain that it ceased to exist before the close of the Republic. Cicuro indeed alludes incidentally to the nume in a manner that shows that the site at least was well known in his time (ad Q. Fr. iii. 1.§ 4); but Pliny reckons it among the celebrated towns of Latium, of which, in his days, no vestige remained (Plin. iii. 5. s.9); and none of the other gengraphers allude to its name. The aite, like tbat of most of the Latin cities which disappeared at an early period, is a matter of much doubt; but several passages in Livy tend to prove that it must have been sitnated between Antium and Velitrae, and its site lias been fixed with much prabability by Nibby at the farm or casale, now called Conca, about half way between Anza and Velletri. The site is an isolated hill of tufo, of somewhat qnadrangular form, and about 2500 feet in circnit, with precipitous sides, and presents portions of the ancient walls, constructed in much the same style as those of Ardea. of irregular square blocks of tufo. The sites of two gates, ono on the E. the other to the W., may also be distinctly traced. There is therefore no doubt that the site in qnestion is that of an ancient city, and the position would well accord with the supposition that it is that of Satricum. (Nibby, Dintorni di Roma, vol. iii. p. 64, a.)
[E. II. B.]
sa＇ttala．［Setav．］

SATULAN PROMONTORILM，a headland in Hispania Tarracoaensis，not far from Carthago Nova．（Plin．iii．3．s．4．）It must be the same promontory called 玉конбрашia Ḱкра by Ptolemy （ii．6．§ 14）．Now Cabo de l＇alos．［T．H．D．］
SATURNIA（乏aroupvia：Saturnia），an ancient city of Etruria，sitaated in the valley of the Albinia （Allegna），about 24 miles from its month．There is no doubt that it was an ancient Etruscan city； and as Pliny tells us that it was previously called Aurinia（iii．5．s．8），it is probable that this was its Etrnscan name，and that it first receired that of Saturnia at the time of the Ruman celony．But no mention of it is found in history doring the period of Etrasean independence；and there is certainly no ground for the supposition of Miiller that it was one of the twelve cities of the Etruscan League．（Miil－ ler，Etrusker，vol．i．p．350．）Dionysius indeed mentions it as one of the cities founded by the Pe－ lasgians，and suhsequently taken from them by the Tyrrhenians and Etruscans（Dionys．i．20）；but though this is strong evidence for the antiquity of the city，there is no proof that it was over a place of imprortance under the Etruscans；and it even seems probable that before the close of their rule，Saturnia liad sunk into the condition of a subordinate town， and a mere dependency of Caletra．At least it is remarkable that Livy，in speaking of the establish－ ment of the Roman colony there，says that it was settled＂in agro Caletrano．＂（Liv．xxxix．55．） The foundation of this coluny，which was established in n．c．183，is the only historical fact recorded to us concerning Saturnia；it was a＂colonia civium，＂ and therefore would natorally retain its colonial rank eren at a late period．Pliny，however，calls it only an ordinary municipal towa，but P＇olemy goves it the rank of a colony，and it is meationed as such in an inscription of lmperial times．（Plin．iii． 5．5．8：Ptol．iii．1．§ 49 ；Gruter．Inser．p． 1093. s．）It is probable therefore that it received a fresh colvay under the Roman Empire，though we have no account of the circurnstance．But it seems not to lave been a place of any importance，and the ex－ isting retnains which belong to this period are of little interest．
The modern totrn of Saturnia，which retains the ancient site as well as name，is but a very poor place；but its mediaeval walls are based on those of the ancient city，and the curcuit of the latter may he distinctly traced．It occupied the summit of a conical hill，surrounded by steep eliffs，ahout 2 miles in circuit．Considerable portions of the walls re－ unain in several places：these are constructed of phlygenal masonry，resembling that of Cosa，but t，uilt of travertino；they are supposed by Miatili to belong to the Roman colony，though other writers would assign them to the l＇elasgians，the earliest inbabitauts of Suturnia．（Nicali，Ant．Pop，Ital． vol，i．pp．154，210；Dentis，Etrurica，vol．ii．Pp． $308-310$ ．）Numerous tombs are also found in the neighbourhood of the town，but which more 1a－ semble the cromlechs of northern Furope than the mare regular repulcheres of other Etrusan cities． （Benuis，l．c．pp．314－316．）

SALLOE PARTHAYNISA（ミ̌au入ún Пapoavi－ $\left.\nu_{\nu} \sigma a\right)$ ，this curiously mised name which has passed into treatiscs of geography from the editions of lsidorus in the Geagraphi Graeci Minores of Hudson and Muller，appears to have rested on a bad reading of the Greek text．The amended test of the passare
 （1sidor．Stath．Parth．c．12），which is probably correct （see Geog．Graec．ed．Mitler，Paris，1855．）［K．］

SAUNARIA（ Eavvapia），a town of anknown site in Pontus Polemoniacas，is mentioned only by l＇to－ lemy（v．6．§ 10）．
［LS． S ］
SAUNIUM，a little river on the N．coast of His－ pania Tarraconensis，in the territory of the Concani and Saleni；now Saja，（Nela，iii．I．）［T．II．1）．］ savo．［Vada sabuata．］．
SAV＇O（Sarone），a small river of Campanis； which appears to have formed the boundary betwern that country and Latium，in the most extended sense of the term．It is a small and sluggish stresm （＂piter Save，＂Stat．Silv．iv．3．66），flowing into the sea between Smuessa and the mouth of the Vul－
tornus (Plin. iii. 5. s. 9), and was crossed by the Appian Way, a few miles from its mouth, by a bridge called the Pons Campanans, from its forming the frontier of that coustry.
[E. H. B.]
SAURO'MATAE ( ミavpo $\mu a ́ r a l$ ), probably the form which the root Sarmat-took in the langnages from which the information of the Greeks of the parts abont Olbiopolis was derived. It is the only form fonod in Herodotus, who knows nothing of the later name Sarmatae. When this latter term, however, oame into use, Sanromatae, especially with the Roman writers, became archaic and poetical, or exotic. This is the case in the line -

## " Ultra Sauromatas, fugere hinc libet," \&c.

(Juv. Sat. ii. 1),
snil elsewhere.
The Greeks of the Black Sea would take the name from either the Scythiaus or the Getae; and it is probably to the language of the latter, that the form belonged. Heoce, it is a form of Samartae, taken from one of the eastern dialects of Dacia by the Greeks (possibly having passed througb a Scythian medimn as well) as opposed to Sarmstae, which is from the westeru parts of the Dacian area, and adopted by the Romans. Its first ani most convenient application is to the Asiatic branch of the Sarmatians. These inay be called Sarmatians as well, as they are by Ptolemy. On the eontrary, it is rare, even ia a Greek author, to apply Sauromatae to the Sarmatians of the Pannonian frontier. The evidence as to the identity of the words is superabundaot. Besides the internal probsbility, there is the statement of Pliny - "Sarmatae, Graecis Sauromatae" (iv. 25).
With the writers of the Augustan age the use of the two formis fluctuates. It is exceptional, however, for a Greek to write Sarınatae, or a Roman Sauromatae. Exceptional, however, as it is, the change is frequent. Diodorus writes Sauromat:e (ii. 44), speaking of the Astatic branch; Strabo writes Sauromatae under the same circumstances; also when following Greek anthorities. For the western tribes he writes Sarmatae.
Ovid uses the term that best suits his metre, giving Sarmatae the preference, caeteris paribus.
"Sarmaticae major Geticaeque frequentia gentes."
(Trist. v. 7. 13.)
"Jam didici Getice Sarmaticeque Joqui."
(Ibid. v. 12. 58.)
"Stridula Sauromates panstra bnbulcus agit."
(Ibid. iii. 12. 30.)
The Sanromatae of Herodotus were the occupants of a $\Lambda \alpha \hat{\xi} \stackrel{s}{ }$, a word evidently used in a technical sense, and perbaps the term by which his informants trans lated the Scythian or Sarmatian equivalents to our word March; or it may $=$ street. The Bashkir country, at the present moment, is divided iato four strents, roads, or ways, according to the conntries to which they lead. The number of these Aágics were two; the first being that of the Sauromatae, bounded on the south and west by the Tanais and Maeotis, and extending nortbwards fifteen days' journey. The country was treeless. The second Aáásu, that of the Budini, followed. This was a wooded country. There is no necessity for connecting the Budini with Sarmatae, on the strength of their both being occupants of a $\Lambda \alpha \xi_{i s}$. All that comes out of the text of Herodotus is, that the

Scythians near Olbiopolis knew of a תákis of the Suuronatae and a $\Lambda \dot{\xi} \xi \sqrt{5}$ of the Budini. The former seems to have been the vorth-eastern part of the Don Kozak conntry, with a portion of Saratov (iv. 21).

When Darius invaded Scythia, the Sauromatae, GeJoni, and Budini acted together, and in opposition to the Agathyrsi, Neuri, Androphagi, Melanchlaeni, and Tauri; the former agreeing to help the Scythians, the latter to leave them to their fate. This suggests the probability that, politically, the $\Lambda \dot{\alpha} \xi$ ics were confederate districts (Herod. iv. 119).

The language of the Sauromatae was Scythian with solecisms, a statement which leads to the strange story of the Amazons (iv. 110-116), with whom the Sauromatae were most especially connected (iv, 117). The women amorigst them remained unmarried antil they had slain an enemy.

The account of Hippocrates is substantially that of Herodotus, except that be especially calls the Sanromatae European and Scythian; tboagh, at the same time, differeat from other nations. He makes the number, too, of enemies that the virgins must slay before they can marry, three.

For further details, see Sarmitia. [R. G. L.]
SAVUS (इáos or ミáovos: Save), a great and navigable tributary of the Danube; it has its sources in the Carnian Alps (Plin. iii. 28; Jornand. de Reb. Get. 56), and, flowing in an eastern direction alnost parallel with the more northern Dravus, reaches the Dannue at Singidunam. A portion of its upper conarse forms the boundary between Noricum and Pannotia, but the whole of the lower part of the river belongs to the southern part of Pannonia, and some of the most important towns of that country, as Siscia, Servitiom, and Sirmium, were situated on its hanks, (Strah. iv. p. 207, vii. p. 314 ; Appian, iii. 22 ; Ptol. ii. 16. § 1, iii. $9 . \$ 1$; Justio, xxxii. 3, 8, 16; Cland. de Laud. Stilich. ii. 192.)
[L. S.]
SAXA RUBRA (Prima Porta), a village and station on the Flatninian Way, 9 miles from Rome It evidently derived its name from the redness of the tufo rocks, which is still conspicuous in the neigbbourhood of Prima Porta. The name is writtea " Ad Rubras" in the Tabula, while Martial calls the place simply "Rubrae;" and this forto is found also in the Jerusalem Itinerary. (Martial, iv. 64. 15; Itin. Hier. p. 612.) But the proper form of it seems to bave been Saxa Rubra, which is used both by Livy and Cicero. The formermentions it during the wars of the Romans with the Veientes, in connection with the operations on the Cremera (Liv, ii. 49); and Cicero notices it as a place in the itnmediate vicinity of Rome, where M. Antonius halted before entering the city. (Cic. Phil. ii. 31.) It was there also that Antonins, the general of Vespasian, arrived on his mareb opon Rome, when he learnt the successes of the Vitellians and the death of Sabinas. (Tac. Hist. iii. 79.) At a much later perind also (8. c. 32) it was the point to which Maxentibs advanced to meet Constantine previous to the battle at the Milvian bridge. (Vict. Caes. 40. § 23.) We learn from Martial (l.c.), that a village had grown $n \mathrm{p}$ on the spot, as would naturaily be the case with a station so immediately in the neighbourhood of the city.

On a hill on the right of the Via Flaminia, a little beyond P'rima Porta, are considerable rvins, which are believed to be those of the villa of Livia, known by the name of "Ad Gallinas," which was
situated 9 miles from Rome，on the Via Flaminia． （Plin．xr．30．s．40；Suct．Galb．1．）［E．H．B．］ S．AXETANUM，a place in Hispania Baetica （Itin．Ant．p．405），called Su（sek）by P＇tolemy （ii．4．§ 7），Hexi by Mela（ii．6），and by Pliny（iii． 3）Sexti Firmum Julium．It is the＇E $\xi_{\imath} \tau a \nu \hat{\omega} \nu$ $\pi \delta$ dis of Strabo（iii．p．156）．On the name see Casaubon（al Strab．i．p．50），and Tzseluck（ad Melam，vol．ii．pt．2．p．447）．It was renowned for its salt－fisb．（Strab，iii．p．156：Athen．iii．p． 121 ； Plin．xxxii．11．s． 53 ；Mart．vii．78，\＆c．）Now most probably Motril．（Cf．Florez，Esp．Sagr．xii． p．101．）
［T．H．D．］
SA＇XONES（Eágoves：Saxons），a German tribe， which，though it acted a very prominent part aloot the beginning and during the early part of the middle ages，yet is not even mentioned in ancient history previous to A．D．287．In that year，we are told by Eutropins（vii． 13 ；comp．Oros．vii．25），the Saxons and Franks infested the coasts of Armorica nnd Belgica，the protection of which was intrusted to Caransius．The fact that Pliny and Tacitus do not mention them in the country in which we after－ wards find them，does not prove that they did not exist there in the time of those writers．For the inlabitants of the Cimbrian Chersonesus，where sulsequently we find the Saxons，are mentioned lyy those writers only under the general appellation of the Cimbri，without noticing any special tribes under separate names．Ptolemy（ii．11．§11；comp．Steph． B．s．v．）is the first authority describing the La－ bitations of the Saxons，and according to him they occupied the narrow neck of the Cimbrian Cherso－ nesus，between the river Albis（Elbe）and Chalusus （Trare），that is，the country now called Holstein． Their neighbours on the sonth of the Albis were the Cbauci，in the east the Suardones，and in the north the Singulones．Angli，and other smaller tribes of the peninsula．But besides this portion of the continent，the Sasuns also occupied three islands， called＂Saxon islands，＂off the coast of Molstein （ Eagóvwy vij $\sigma o$ ，Ptol，ii．11．§ 31），one of which was no doubt the modern Helgoland；the two others must either be supposed to have been swallowed up by the sea，or be identified with the islands of Dychsand and Vielschovel，which are nearer the coast than Helgoletred．

The name Lasones is commonly derived from Sahs or Sachs，a battle knife，but others connect it with seax（earth）or seat，according to which Saxons would describe the people as living in fixed seats or habitations，as opposed to the free or wandering Franks．The former，however，is the more probable origin of the name；for the living in fised habitations was ceitainly not a characteristic mark of the ancient Saxons，

They appear to have gradually spread along the north－western cuast of Germany，and to have gained ponsession of a large extent of country，which the favemat Gengrapher（iv．17，18，23）calls by the name of Suxonia，but which was certainly not in－ habited by suxous exclusively In A．D． 37 I the Saxons，in ono of their usual ravaging excursions on the coasts of caaul，were sorrounded and cut to pieces by the lhman army under Valentimian（Oros． vii． 32 ；Armm．Mare．xsviii．2，5；comp．x vi．4， xxvii．8；Losim．iii．1，6）；sud about the middle of the fifth centary a bard of Saxons led by Hengist and Hor：a crossed over into Britam，which had been completely given up by the Romans，and now fell iuto the hands of the roving Saxums，who in con－
nection with other German tribes permanently esta－ bhished themselves in Britain，and there developed the great features of their national character．（Beda， Hist．Eccles，i．12）．As the Romans never invaded the original country of the Suxons，we know of no towns or places in it，with the exception perlaps of the town of Treva（Tpioua）mentioned by Ptalemy （ii．11．§27）．Besides those alrealy mentioned，there are but few passages in ancient writers in which the Saxorts are mentioned，such as Marcian，p． 53 ；Claud． de Lavd．Stil．ii． 255 ；Sidon．Apoll．vii．90， 369. Among modern writers the reader may consult Kufahl， De Saxonum Origive，Berlin，1830， 8 vo．，and the best works on the early bistory of England and Ger－ many．
［L．S．］
SA＇XONUM I＇NSULAE．［SAXoNEs．］
SCAIDA＇VA，a town in Moesia Iuferior，between Novae and Trimamminm．Itin．Ant．p．222．）It is called S＇cedeba（ $\Sigma_{\kappa \in \delta \in \delta d}$ ）by Procopius（de Aed． iv．11）．Variously identified with Ratomou and Rustschuck．
［T．H．D．］
SCA＇LABIS，a lown of Lusitania，on the road from Olisipo to Emerita and Bracara．（Itis．Ant． pp．420，421．）Pliny（iv．21．s．35）calls it a Ro－ man colony，with the surname Praesidium Julium， and the seat of one of the three＂conventus jnri－ dici＂of Lusitania，It is undoubtedly the same place which Ptolemy（ii．5．§ 7）erroneously calls ミка入abionos，which is probably a corraption of玉ка入а6is ко入．（колагia）The modern Santarem， （Cf．Wesseling，ad Itim．l．c．；Isidor，de Vir．Ill．c． 44；Florez，Esp．Sagr．xiii．p．69．）［T．H．D．］

SCALDIS（Schelde，Escaut）a river in North Gallia．Cresar（B．G．vi．33），the first writer who mentions the Scaldis，says，when he was parsning Ambioris，that be determined to go＂as far as the Scaldis which flows into the Mosa（Maos）and the estremity of the Arduenna＂（Ardenues）．All the MISS．quoted by Schneider（B．G．vi．38）bave the reading＂Scalden，＂＂＂Schaldem，＂＂Scaldim，＂and otber tiffling varieties，except one DIS．which has ＂Sambim ；＂so that，as Schneider concludes，we cannot doubt that Caesar wrote＂Scaldis＂in this passage．Pliny（ir．17）describes the Scaldis as the boundary between the Gallic and Germanic nations，and says nuthing of its union with the Mosa：＂A Scalde ad Sequanam Belgica；＂and＂a Scaldi incolunt extera Toxandri pluribns nominibus．＂ Some geographers snypose that the Tabnda of Itoleny is the Schelde．［Tablida．］

The passage of Caesar is most easily explained by supprising that he knew nothing of the lower course of the Schelle，and only reported what he heard．It is possible that the East Schelde was once the chief outlet of the Schelde，and it may have had some commanication with the channels about the islands between the East Schelde and the lower course of the Musa，which communication no longer exists．There is at least no reason for taking，in place of＂Scaldim＂or＂Scaldem，＂the reading ＂Sain＂（ $\Sigma \alpha \alpha^{6} w$ ），from the Greek version of the Commentaries．

The Schehie rises in France，in the department of Aisne，Below Antuerp it enters the sea by two aestuaries，the Hond or West Schelde and the East Schelde．
［G．L．］
SCAMANDER（ミハ́uavסpos：Mendere Su，or the river of Bunarbaschi），a famons little streant in the phain of Troy，whach atcording to Homer （Il．xx．74）was called Xanthus by the gods and Scamander by men；though it probably owed the
name Xanthus to the yellow or brownish colour of its water (comp. Il. vi. 4, xxi. 8). Notwithstanding this distinct declaration of the poet that the two pames belonged to the eame river, I'liny (v. 33) mentions the Xanthus and scamander as two distiact rivers, and describes the former as flowing into the I'ortus Achaeorum, after having joided the Simoeis. In regard to the colour of the water, it was believed to have even the power of dyeing the wool of sbeep which drank of it. (Aristot. Hist. Anim. iii. 12; Aelian, Hist. Anim. viii. 21; Plin. ii. 106; Vitruv. viii. 3,14.) Homer (Il. xxii.147, \&c.) states that the river had two sources close to the city of Ilion, one seading forth bot water and the other cold, and that near these springs the Trojan women used to wash their clothes. Strabo (xiii. p. 602) remarks that in his time no bot spring existed in those districts; he further asserts that the river had only one source; that this was far away from Troy in Mount Ida; and lastly that the notion of its rising near Troy arose from the circumstance of its flowing for some time nader ground and reappearing in the neighbourhood of Iliod. Homer describes the Scamander as a large and deep river (Il. xx. 73, xxi. 15, zxii. 148 ), and states that the simoeis flowed into the Scamander, whichafter the junction still retained the usue of Scamander (Il. v. 774, xxi. 124; comp. Plin. ii. 106; Herod, v. 65; Strab. xiii. p. 595). Although Homer describes the river as large and deep, Herodotus (vii. 42 ) states that its waters were dot sufficient to afford drink to the army of Xerxes. The Scamander after being joined by the Simoeis has still a coarse of about 20 stadia eastward, before it reaches the sea, on the east of Cape Sigeum, the modern Kum Kale. Ptolemy (v. 2. § 3), and apparently Pomp. Mela (i. 18), assiga to each river ita own month, the Simocis discharging itself into the sea at a point north of the mouth of the Scamander. To account for these discrepaucies, it must be assomed that even at that time the physical changes in the aspect of the country arising from the muddy deposits of the Scamander had produced these effects, or else that Ptolemy mistcok a canal for the Scamander. Even in the time of Strabo the Scamander reached the sea only at those seasons when it was swollen byrains, and at other times it was lost in marshes aod sand. It was from this circumstance, that, even before its junction with the Sinoeis, a canal was dug, which flowed in a western direction into the sea, south of Sigeum, so that the two rivers joined each other only at times when their waters were bigh. Pliny, who calla the Scamander a navigabie river, is in all probability thioking of the same canal, which is still navigable for small barges. The point at which the two rivers reach the sea is now greatly changed, for owiog to the deposits at the mouth, the coast has made great advances ioto the sea, and the Portus Acbaeoram, probably a considerable bay, has altogether disappeared. (Comp. Leake, A sia Minor, p. 289, foll., and the various works and treatises on the site and plain of ancient Troy.)
[L.S.]
SCAMANDRIA, a small town of Mysia, no doubt aituated on the river Scamander io the plaio of Troy (Plin. v. 33; Hieroci. p. 662, where it is called Scamandros). Leake (Asia Minor, p. 276) conjectures that it stood on a hill rising below Bunarbasche. An inscription referring to this town is preserved io the museum at Paris (Choiseul-Gouffier, loyage Pittoresque, tom. ii. p. 288.) [L. S.]
SCAMBO NID.AE. [Athenae, p. 302, a.]

SCAMPAE. [Illymicum, Vol. 11. p. 36, b.] SCANDARIUM. [Cos.]
SCANDELA. [Cythers.]
SCA'NDIA (Ekavסia) or SCANDINA'VIA. Until aboat the reiga of Aogustas the countries north of the Cimbrian Chersonesus were unknowa to the ancients, uoless we assume with some modern writers that the island of Thule, of which Pytheas of Massilia spoke, was the western part of what is now sometimes called Scandinavia, that is Sweden and Norway. The first ancient writer who alludes to these parts of Europe, Yomp. Mela, io the reign of Clandius, states (iii. 3) that north of the Albis there was an immense bay, full of large and small islands, between which the sea flowed in naurow chanoels. No name of any of these islands is mentioned, and Mela oaly states that they were iohahited by the Hermiones, the northernmost of the German tribes. In anotber passage (iii. 6) the same geographer speaks of an island in the Sinus Codanus, whicb, according to the common reading, is called Codanonia, or Candanovia, for which some bave emended Scandinavia. This island is described by him as surpassing all others in that sea both in size and fertility. But to say the least it is very doubtful as to whether he alludes to the island afterwards called Scandia or Scandinavia, especially as Mela describes bis island as inhabited by the Tentones. The first writer who mentions Scandia and Scandinavia is Pliny, who, io one passage (iv. 27), bkewise speaks of the Sinus Codanus and its nomerous islands, and adds that the Jargest of them was called Scandinavia; its size, he continues, is unknown, but it is inhabited by 500 pagi of Helleviones, who regard their island as a distinct part of the world (ulter terrazum orbis). In adother passage (iii. 30) be mentions several islands to the east of Britannia, to one of which be gives the name of Scandia. From the manner in which be speaks in this latter passage we might be ioclined to iofer that be regarded Scandioavia and Scandia as two different islands; but this appearance may arise from the fact that in each of the passages referred to he fullowed different authorities, who called the same island by the two names Scandia and Scandinavia. Ptolemy (ii. 11. §\$ 33, 34, 35) speaks of a proup of four islands on the east of the Cimbrian Chersonesus, which he calls the Scandiae Insulae (ミ and of which the Largest and most eastern one is called Scandia, exterding as far as the mouth of the Vistula. In all these accounts there is the fundamental mistake of regarding Scaodinavia as an island, for in reality it is connected on the northeast with the rest of Europe. Pliny speaks of an immense mountain, Sevo, in Scandinavia, whieb may possibly be Mount Kjulen, which divides Sweden from Norway, and as southern branch of which still bears the name of Sece-Kyggen. The different tribes mentioned by P'toleny as inhaliting Scandia are the Chaedini (Xaióewoi), Phavonae ( $\Phi$ aubvai), Phiraesi (\$tpaïoot), Gutae (「oûtas), Dauciones ( $\triangle$ aukiaves), and Levoni ( $\Lambda \in v \hat{\omega} \nu \mathrm{O}$ ). At a later time, Jurnadea (de Keb. Get. p. 81, \&c.) evumerates no less than twenty-eight different tribes in Scandinavia. Tacitua does not indeed mention Scandia, but the Sitooes and Suiones (wheoce the modern name Swedes) must unquestionably be conceived as the most northero among the German tribes and as inhabiting Scandia (Germ. 44, 45). It is well known that according to Jurbandes the Goths, and according to Panlus Diaconus (v, 2) the

## SCARPME．

Longobardi，originally caune from Scandinavia．It deserves to be noticed that the sonthern part of the supposed island of Scaodia，the modern Sureden，still bears the name Scasia，Scone，or Schonen．Pliny （viii．16）mentiens a peculiar animal called achlis， ned resembling the alcis，which was fonnd only in Scadinavia．For further discussions about the va－ rions tribes of Scandinavia，which all the ancients treat as a part of Germanin Magna，see Wilhelm， Germanien，p．343，\＆c．；Zenss，Die Deutschen，ؤc． Pp．77，156，\＆c．
［L．S．］
SCA＇NDILA，a small island in the northern part of the Aegaean sea，between Peparethus and Scyros， now Skandole．（Plin．iv．12．s．23；Mela，ii． 7. §8．）

SCANDINAVIA．［Scandla．］
SCAPTE HYLE（ミкалтोे ర̈入ๆ，Plat．Cim．4， de Exilio，p．605；Marcellin．Vit．Thucyd．§ 19）， or the＂foss wood，＂situated on the contines of Mace－ donia and Thrace，is the auriferous district of Mt． Pangaeum，to which Thncydides was exiled，and where he composid his great legacy for all ages－ the hintory of the war in which he had served as keneral．
［E．B．J．］
SCA＇PTIA（Eth．ミкantท́vzos，Scaptiensis：Pas－ serano），an ancient city of Latiun，which appears to have ceased to exist at a very early period．Its name is fonnd in Dionysins among the thirty cities of the Latin League（Dionys．v．61）；and it therefore seems prebable that it was at that time a considerable， or at all events an independent，town．No mention of it is subsequently found in history，bat after the great Latin War it was included in oue of the new Romad tribes created on that occasion（B．C．332）， to which it gave the name of Scaptian．（Fest．s．$v$ ． Sroptia，p． 343 ；Liv，viii．17．）No subsequent mention is found of the town，and it is only noticed by 1 lliny among the＂clark oppida＂of Latium， which in his time had ntterly disappeared（Plin，iii 5．s．9）．Silins Italicus also alludes to the＂Scaptia pubes，＂but in a passage from which ne inference can be derived（viii．395）．The Scaptienses no－ ticed by Suetonius（Aug．40）and elsewhere were the members of the Scaptian tribe．There is $n 0$ real clue to its position；that derived from the passage of Festus，from which it has been com－ monly inferred that it was in the neighbourhood of Pedum，being of no value．The words＂quam Pe－ dani incolebant，＂found in all the ordinary editions of that author，are in fact merely a supplement of Ursinus，founded on an inference from Lixy（viii． 14，17），which is by no means conclusive．（See Atilller＇s Dote．）But suppasing that we are justified in placing Scaptia in this neighbourheod，the site suggested by Nibby，on the bill now eccupied by a farm or casale called Passerano，is at least probable enough；the position is a strong one，on the point of one of those narrow ridges with precipitous sides between two ravines，which abound in this part of the Campegna．It is abont 3 miles NV．of Galli－ cano，the presumed site of T＇edum；and the exist－ ence of an ancient town on the spot is sttested by the fragments of ancient walls，the larce，roughly－ hewn matses of which are fuund worked op into mere recent buildings．Its situation closely resem－ bles that of Gallicara itself，as well as that of Zagarolo，about 3 miles further N ．（where there are alse indications of ancient habitation）；and the iden－ tification of any of the three can be little more than conjectural．（Nibby，Dintorni，vol．iii．pp．70， 71．）

SCARABA＇NTLA（ ̇кap\＆avtia，Ptol．ii．15．§ 5），a town on the western bank of Lake Pelso in Upper Pannobia，on the road leading from Carnnntum te Subaria．（Plin．iii．27；It．Ant．pp．233，261， 262，266；Tab．Peut．）According to coins and inscriptions fonad at the place，it was a mnoicipiam with the surname of Flavia Augusta．Hence it ap－ pears that the reading in Pliny，＂Scarahantia Julia，＂ is net correct，and that we must read either Scara－ bantia Flavia，or Scarabantia et Julia．Its site is now occapied by the tewn of Oedenburg，in Hun－ garian Soprony or Sopron．（Cemp．Muchar，Nori－ kum，i．p．168；Schönwisner，Antiquitates Sabu－ riae，p． 31 ；Orelli，Inscript．n．4992．）［L．S．］
SCARBlA，a town in Rhaetia，between Par－ tenum and Veldidena，on the road leading from Augusta Vindelicornm into Italy，occupied the site of the modern Scharnitz．（Tabula Peutinge－ riana．）

SCARDO＇NA（之̌capồva，Ptol．ii．17．§ 3；Pro cop．B．G．i．7．16，ir． 23 ；Plin．iii． 26 ；Geogr． Rar．v． 14 ；ミкd́pס $\omega \nu$ ，Strab，vii．p． 315 ；Sardona， Peut．Tab．）a town io the territery of the Libornii on the Titius， $12 \mathrm{M} . \mathrm{P}$ ．from where that river meets the sea．From the circumstance of its having been one of the three＂conventus＂of Dalmatia，it must have been a place of importance，and was used from early times as a depôt for the goods which were transported by the Titius to the inland Dalmatians．（Strab．Lc．） The modern Scardóna is Illyric Scardin or Scradim， retains the uame of the old city，though it does Dot occupy the site，which was probably further to the W．（Wilkinson，Dalmatia，vol．i．p．191．）Pto－ lemy（ii．17．§ 13）has an island of the same name off the Liburnian coast，－perhaps the rocky and cu－ riously－shaped island of Pago．
［E．B．J．］
SCARDUS，SCODRUS，SCORDUS MONS（rd ミ̌ápōar üpos，Polyb．«xviii． 8 ；Ptol．ii．16．§ 1）， the desolate heights which are mentioned inci－ dentally by Livy（xliii．20，xliv．31）as lying in the way from Stymbara to Scodra，and as giving rise to the Oriuns．They seem to have cempre－ bended the great summits on either side of the Drilo，where its course is from E．to W．（Leake， Northern Greece vol，iii．p．477．）In Kiepert＇s map（Europaīschen Turkei）Scardus（Schar－Dagk） extends from the Ljubatrin to Shalesh；over thia there is a＂cel＂from Kalkandele to Prisdren not less than 5000 feet above the level of the ser．Ac－ cording to the nomenclature of Grisebach，Scardos reaches from the Ljubatrin at its NE．extremity to the SW．and S．as far as the Klissoura of Devol；S． of that point Pindus commences in a contiouation of the same axis．
［E．B．J．］
SCARNIUNGA，a river of Pannonia，mentioned enly by Jornandes（de Reb．Get．52），which it is impossible to identify from the rague manner in which it is spoken of．
［L．S．］
SCARPHE（ $\Sigma \kappa \alpha \rho \phi \eta$ ），in Boeotia．［ETEONus．］
SCARPHE or SCARPHELA（Žкappm，Hom．； ミка́рфєta，Strab．，Paus．，Steph．B．：Eth．乏карфєús， ミKapфateús），a town of the Locri Epicnemidii，men－ tioned by IIomer．（Il．ii．532．）According to Strabo it was 10 stadia from the sea， 30 stalia from Thronium，and a little less from some other place of which the name is lest，prolably Nicaea （Strab．ix．p．426．）It nppears from Pausanias that it lay on the direct road from Blateia to Thermopylae by Threnium（viii．15．§ 3），and likewise from Livy，who states that Quintius Fla－ mininus marched from Elateia by Thronium and

Scarpheia to Heracleia (xxxiii. 3). Hence the town may be placed between the modern villages of 'Andera and Molo. (Leake, Northern Greece, vol. ii. p. 178.) Scarpheia is said by Strabo to have been destroyed by an inundation of the sea caused by an earthqqake (i. p. 60), but it mnst have been afterwards rebnilt, as it is mentioned by subsequent writers down to a hate period. (Plin. iv. 7. s, 12; Ptol. iii. 15. § 11 ; Hierocl. p. 643; Geog. Rav. iv. 10; Const. Porphyr. de Them. ii. 5. p. 51, Bonn.) Scarpheia is also mentioned by Lycopbr. 1147; Appian, Syr. 19; Paus, ii. 29. § 3, x. 1. § 2.

SCARPO'NA or SCARPONNA, in Galia, is placed in the Aotooine Itin. and in the Table on a road between Tullam (Toul) and Divodurom (Metz). The two authorities agree in placing it at the distance of x. from Tullum; but the Itin. makes the distance from Scarpona to Divodurum sii., and the Table makes it xiiii. The larger number comes nearer to the truth, for the place is Charpogne, on the Mosel. An inscription has been fond at Charpagne, which is as follows: " nirvir viarum curand. Sabell. V. S. P. M. Scarp. Civit. Leuc." Scarpona was in the territory of the Leuci. [Lever.] Jorints, Eqnitum Magister, defeated the Alemanni near Scarponna in A. D. 366 . in the reign of Valentimian and Valens. (Amm. Marc. xxvii. 2; D'Anville, Notice, to.; Ukert, Gallien, p. 506.) [G. L.]
SCENAE (ミкnvai). 1. A town of Mesopotamia on a canal from the Euphrates, and on the borders of Babylonia, 18 schoeni from Sclencia, and 25 days' jobmey from the passage of the Enphrates at Zeugma. (Strab. xri. p. 748.) It belonged to the peacefol and nomadic trihe of the Scenitae, and therefore, though called by Strabo $\hat{\alpha} \xi t \delta \lambda o y o s ~ \pi \delta \dot{\lambda} t s$, was probably only a city of tents, as, indeed, its name implies.
2. Scenae Mandrae, a place in Middle Egypt, on the right bank of the Nile, between Aphroditopolis and Bahylon, a little SE. of Memphis. (ltin. Ant. p. 169.) It had a Roman garrison, and in later times became the see of a Christian bishop. (Not. Imp.; comp. Wesseling, ad Itin. l. c.)
3. Scenae Veteranorum, a place in Lower Egypt, onan arm of the Nile, and on the road from Heliupolis to Vicus Judaeornm. (Itin. Ant. pp. 163, 169.) It lay SW. of Bubastus.
[T. H. D.]
SCENI'TAE ( $\Sigma_{\text {m } \eta \text { vitai }) \text {, a general name for }}$ varions Arab tribes in Pliny, often distinguished by some ot ber appellation. Thns, towards the lower part of the Euphrates, beyond the "Attali latrones, Arabuin gens," he places the Scenitae (vi. 26), whom be mentions again more fully (c. 28), "Nomadas inde infestatoresque Chaldacorum Scenitae, ut diximus cludunt, et ipsi vagi, sed a tabernacnlis cognominati, quae ciliciis metantur, ubi libnit. Deinde Nabataei," \&c. Then again below the confluence of the Enphrates and Tigris he places the Nomades Scenitae on the right bank of the river, the Chaldaei on the left. He speaks also of the Scenitae Sahaei. Strabo also nses the name in the same latitude of application of many various tribes of Aralia, Syria, and Nesopotamia (see Index, s. v.) ; but Ptolemy assigns them a definite seat near the monatains which stretch along the north of the peninsula, north of the Thaditae (al, Oaditac) and Saraceni (vi. 7. § 21); and in this vicinity, towards the Red Sea, it is that Ammianns Marcellinus places the Scenite Arabs, whom posterity called Saracens (xxiii. 6.) [SaRackal.] The remark of Bochart is therefure borue out by authorities: "Ubi som-
nitas Eratasthenes, ibi Saracenos pormnt Procopius et Marcianus. Saraceni nimirum a Scenitis hoc solum differunt, quod Scenitarum nomen est vetustins." (Geogr. Sacr. iv. 2. p. 213.) [G.W.]

SCEPSIS ( $\Sigma \kappa \hat{\eta} \psi t s:$ Eth. इкरi* 10 ) , a town in the SE. of Mysia, on the river Aesepns, 150 stadia to the SE, of Alexandria Troas, and not far from Dicte, once of the lighest points of Monnt Ida. It was apparently a place of the bighest antiquity; for it was believed to have been founded immediately after the time of the Trojan War, and Demetrius, a native of the place, considered it to lave been the capital of the dominions of Aeneas, (Strab, xiii. p. 607). The same anthor stated that the inhabitants were transferred by Scamandrius, the son of Hector, and Ascanius, the son of Aeneas, to another site, lower down the Aesepus, about 60 stadia from the old place, and that there a new town of the same name was founded. The old town after this was distingnisbed from the new one by the name of Palaescepsis. For two generations the princes of the bonse of Aeneas maintained themselves in the new town ; but the form of government then became an oligarchy. During this period, colonists from Miletus joined the Scepsians, and institated a democratic form of government. The descendants of the royal family, however, still continned to enjoy the regal title and some other distinctions. (Strab. l. c. comp. siii. p. 603; siv. p. 635 ; Plin. v. 2; Steph. B. s. v.) In the time of Xeuophon (IIell. iii. 1. § 15), Scepsis belonged to Mania, a Dardanian princess ; and after ber death it was seized by Meidias, who bad married her danghter; bot Dercyllidas, who hal obtained admission into the town under some pretext, expelled Meidias, and restored the sovereign power to the citizens. After this we hear no more of Scepsis until the time of the Macedonian supremacy, when Antigonus transferred its inbabitants to Alexandria Troas, on account of their constant quarrels with the town of Cebrene in their neighbourhood. Lysimacbas afterwards allowed them to return to their ancient home, which at a later time became subject to the kings of Pergamum. (Strab. xiii. p. 597.) This new city became an important seat of learning and philosophy, and is celebrated in the bistory of the Works of Aristotle. Strabo (xiii. p. 608) relates that Neleus of Scepsis, a pupil of Aristotle and friend of Theopbrastus, ioherited the library of the latter, which also contained that of Aristotle. After Neleus' death the library came into the hands of persons wbo, nut koowing its valne, and being unvilling to give them np to tie library which the Pergamenisn kings were collecting, concealed these literary treasures in a pit, where they were exposed to injury from damp and worms. At length, however, they were rescued from this place and sold to Apellicon of Teos. The books, in a very mutilated condition, were conveyed to Athens, and thence they were carried by Sulla to Rome. It is singular that Scylax (p. 36) ennmerates Scepsis among the Acoliun coast-towns; for it is evident from Strabo (comp). Demosth. c. Aristocr. p. 671) that it stood at a considerable distance from the sca. The town of Palacscepsis seems to have been abandoned entirely, for in Pliny's time (v.33) not a restige of it existed, while Scepsis is mentioned by Hierocles (p. 664) and the ecclesiostical notices of bishoprics. In the neighbourbood of Scepsis there existed very productive silver mines. It was the birthplace of 1)emetrius and Metrodorus. The forncer, who liestowesl much labour on the tojwigraphy of Troas, spuke of
a disttict，Corybissa，near Scepsis，if which other－ wise nothing is known．Extensive ruins of Scepsis are believed to exist on an eminence near the village of Eskiupshi．These ruins are about 3 miles in circumference，and 8 gates can be traced in its walls． （Forbiger，Handbuch der Alt．Geogr．vol．ii．p． 147．）
［L．S．］
SCHE＇D1A（ $\Sigma \chi \in \delta i ́ a$ ，Strah．xvii．pp， 800,803 ），a large town－like village of Lower Egypt，situated on the great canal which connected Alexandria with the Canopie arm of the Nile，near Andropolis．At Schedia was the general custom－house for goods， ascending or descending the river，and also the station for the splendid vessels in whieh the prefects visited the upper comntry；whence it is singular that it is not mentioned hy any later writer than Strabo．Mannert（ $x$ ．pt i．p．601）seeks it on the lake of Aboukir；whilst Reichardt，from the simi－ larity of the name，takes it to have been the modera Dsjedie．
［T．H．D．］
SCHE＇RIA．［Concyina．］
SCHINUSSA，is small island in the Aegaean sea， one of the Sporades，S．of Naxas．（Plin．iv．12．s．68．）

SCHISTE（ $\bar{\eta} \sigma \chi \sigma \tau \dot{\eta}^{\prime} \delta \delta \dot{u} s$ ），the name of the road leading from Delphi into Central Greece，was more particularly applied to the spot where the road di－ vided into two，and which was called тpeis $\kappa \in ́ \lambda \in \cup \theta \circ$ ， reckoning the road to Delphi as one of the three． Of the other two roads．the NE．led to Daulis；the SE．parted into two，one leading to Trachis and Lebadeia，the other to Ambrysus and Stiris．At the spot where the three roads met was the tomb of Lains and his servant，who were here slan by Oedipus．It must linve stuod at the entrance of the Zimend Derveni，or opening between the moun－ tains Cirphis and Parnassns，which leads to Delphi． The road from this point becomes very steep and rugged towards Delphi，as Pausanias has described it．（Aesthyl．Oed．Tyr．733；Eulip．Phoen． 38 ； Paus．ix．2．§ 4，x．5．§3；Leake，Northern Greece， vol．ii．p．105．）

SCHOENUS（ $\Sigma$ Xowoûs），the name of several towa；，from the reeds or rushes growing in their neighbourhood．1．（usually 玉xowos），a town in Boeotia，mentioned by Homer（ 11. ii．497），and placed by Stabo upon a river of the same name in the teritory of Thehes，upon the road to Anthedon， and at the distance of 50 stadia from Thebes． （Strab．ix．p． 408 ；Eustath．ad loc．；Steph．B．8．v．； Nicander，Theriac． 887 ；Plin，iv，7．8．12．）This river is probably the stream flowing into the lake of Hylica from the valley of Moriki，and which near its mouth is covered with rushes．Nioander is clearly wrong，who makes（l．c．）the Schoenus flow into the lake Copais．（Ulrichs．Reisen，p． 258 ； Leake，Northern Greece，vol．ii．p．320．）Kichoentus was the birtbplace of the celebrated Atalanta，the daughter of Schrenus（Pams．viii． $35 . \$ 10$ ）；and lience Statius gives to Kchoenus the epithet of ＂Atalautaers．＂（Stat．Theb．vii．267．）

2．A town in the centre of Arcadia near Me－ thydrum，which was said to bave derived its name from the Boentian Schoenns．（Jaus．viii．35．\＄10； Steph．B．s．0．；Leake，Peloponnesinct，1．240．）

3．A barbonr in the Corinthia．［Comstuus， p． 683 ，a．］

4．A river near Maroncia in Tlurace，mentioned only by Mels（ii．2．§ 8）．

SCllOENU＇S，a bay on the west coast of Caria， on the suntheeast of the Cnidian Chersonesas，and op＇josite the island of Syme．（l＇omp，Melit，i． 16 ；

Plin．v．29．）It should he observed，however，that this description of the bay of Schoenus is only con－ jectural，and based upon the order in which Pliny mentions the places in that locality．
［I．S．］
SCLA（ 氵̌ia：Éth．Skieús），a small town in En－ boest（Steph．B．s．v．ミkrás），probably in the terri－ tory of Eretria，since J＇aunanas（iv．2．§ 3）men－ tions Scium as a district helonging to Eretria．

SClAS．［MegAlopolis，p，309，b．］
SCIATHIS．［Puenevs，p．595，a．］
SCl＇ATHUS（ ミxiafos：Éth．ミxıdelos：Skiatho）， a small island in the Aegaean sea，N．of Euboea，and a little E．of the Magnesian coast of Thessaly，is described by Pliny as 15 miles in circnmference （iv．12．s．23）．It is said to have been originally colonised by Pelasgians from Thrace，who were sneceeded by Chaleidians from Luboea．（Scymn． Ch．584．）It possessed two towns，one of which was also called Sciathus，but the name of the other is unknown．（Scylax，p．23，Hudson；Strab．ix． p． 436 ；Ptol．iii．13．§ 47．）It is frequently men－ tioned in the history of the invasion of Greece by Xerxes，since the Persian and Grecian fleets were stationed near its coasts．（Heroc，vii．176，179， 182,183 ，viii．7．）It afterwards became one of the subject allies of Athens，but was so insignificant that it had to pay only the small tribute of 200 drachmae yearly．（Franz，Elem．Epigr．52．）The town of Sciathus was destroyed by the last Philip of Macedonia，B．C． 200 ，to prevent its falling into the hands of Attalus and the Romans．（Liv．axxi． 28，45．）In the Mithridatic War it was one of the haunts of pirates．（Appian，Mithr．29．）It was subsequently gived by Antony to the Athenians， （Appian，B．C．v．7．）Sciathus was celebrated for its wine（Athen．i．p．30，f．），and for a species of fish found off its coasts and called кeGт $\rho \in$ ús． （Athen．i．p．4，c．：Pollus，vi．63．）The moderu town lies in the SE．part of the island，and pos－ sesses an excellent harbour．The inhabitants have only been settled here since 1829 ，previons to which time their town stood in the NE．part of the island upon a rock projecting into the sea，and accessible only apon one side，as more secure against the pi－ rates．Ross says that the new town stands upon the site of the ancient city，but the latter was not the homonymous capital of the island，which ocou－ pied the site of the old town in the NE．part of the island，as appears from an inscription found there by Leake．The ancient city in the sE．of the island，upon which the modern town now stands，is probiably the second city mentioned by Scylax，but without a name．（Ross，II anderungen in Giriechen－ land，rol．ii．p． 50 ；Leake，Northern Greece，vul． iii．p．111．）

SClDRU＇S（ $\Sigma$ кiopos：Eth．$\Sigma_{k i \delta p \alpha v o ́ s, ~ S t e p h . ~ D .: ~}^{\text {sin }}$ Sopri），a（ireek city on the coast of Lucania，on the Tyrrhenian sea，between Pyxus（Buxentum） and Laïs．It is mentioned only by Herodotus（vi． 21），from whom we learn that it was，as well as Lains，a colnny of Sybaris，and was one of the places to which the surviving iuhabitants of that city retired，after its destruction by the Crotoniats．It does not appear from his expressions whether tlese towns were then first founded by the fugitives， or had been previously settled as regular colunies； but the latter supposition is much the more prol：i－ ble．It is singnlar that no subsequent trace is found of Scidrus；its name is never sgain men－ tioned in history，aor alluled to by the geographers， with the exception of Stephamus of Byzatutitus
(s. r.), who calls it merely a "city of Italy." We have therefore no clue to its pasition; for even its sitnation on the Tyrrherian sea is a mere inference from the manner in which it is mentioned by Herodotus in conjunction with Laiis. Bnt there exist at Sapri, on the Gulf of Policastro, extensive remains of an ancient city, which are generally considered, and apparently not withont reason, as indicating the site of Scidrus. They are said to consist of the remains of a theatre and other public buildings of the ancient walls, and constructions around the port. (Antonini, Luccuia, part ii. c. 11 ; Romanelli, vol. i. p. 377.) This last is a remarkable landlocked basin, though of small extent; and it is singular that, even if the tomn had ceased to exist, no allusion shonld be found to the existence of this secure port, on a coast almost wholly destitute of natural harbours. But the high monotains which shnt it in and debar it from all communication with the interior probably prevented it from ever attaining to any importance. Sapri is at the present day a mere fishing village, abont 6 miles E. of Policastio.
[E. H. B.]
 town of Triphylia, a district of Elis, sitnated 20 stadia south of Olympia. In b.c. 572 the Scilluntians assisted Pyrrhus, king of Pisa, in making war apon the Eleians; but they were cumpletely conquered by the latter, and both Pisa and Scillus were razed to the ground. (Paus. v. 6. § t, vi. 22. § 4.) Scillus remained desolate till about в. c. 392, when the Lacedaemonians, who had a few years previously compelled the Eleians to renounce their supremacy over their dependent cities, colonised Scillus and gave it to Xenophon, then an exile from Athens. Xenophon resided here more than twenty rears, but was expelled from it by the Eleians soon aiter the battle of Lenctra, в.c. 371. He has left ns a description of the place, which he says was situated 20 stadia from the Sacred Grove of Zeas, on the road to Olympia from Sparta. It stood upon the river Selinus, which was also the name of the river flowing by the temple of Artemis at Ephesus, and like the latter it abounded in tish and shell-fish. Here Xenopboo, from a tenth of tbe spoils acquired in the Asiatic campaign, dedicated a temple to Artemis, in imitation of the celebrated temple at Ephesus, and institnted a festival to the goddess. Scillus stood amidst woods and meadows, and afforded abmidant pasture for cattle; while the neighbonring mountains supplied wild hogs, roebucks. and stags. (Xen. Anab. v. 3. §§ 7-13.) When Pausanias visited Scillas five centuries afterwards the temple of Artemis still remained, and a statue of Xenophoo, made of Pentelic marble. (Pans. v. 6. § 5, seq.; comp. Strab. viii. pp. 344, 387 ; Plut. de Exsil. p. 603.) There are no remains to identify Scillus, but there can be no doubt that it stood in the woody vale, in which is a small village called Rasa, and throngh which flows a river falling into the Alpheius nearly oppasite the Cladens. (Leake, Mforea, vol. ii. p. 213, seq., Peloponnesiaca, p. 9; Bohlaye, Recherches, gc. p. 133: Curtins, Peloponnesas, vol. ii. p. 91.)
scinconagus ( $\Sigma \kappa \imath \gamma \gamma \delta \mu \mathrm{c} \mathrm{\gamma os}$ ). This place is first meationed by stiabo (iv. p. 179), who says, when he is speaking of one of the passes of the Alps, that from Ebrodunum (Embrun) on the Gallic side throngh Brigantium (Briongon) and Scincomagus and the pass of the Alps to Ocelum, the limit of the land of Cottius is 99 miles; and at Scincomagus laly begins: and the distance from

Scincomagus to Ocelum is 27 miles. (See Groskurds: note on the passake, Transl. Strab. i. p. 309.) Pliny also (ii. 108) makes ltaly extend to the Alps at Scincomagus, and then he gives the breadth of Gallia from Scincomagus to the Pyrenees and 1lliberis. (See the nates and emendations in Ilarduin's edition.) It appears then that Scincomagns was at the foot of the Alps on the Italian side: and if the position of Ocelum were certain, we might probably determine that of Scincomagns, which must be on the line of the passage over the Alps by the Mont Genierre. It was a great mistake of Bouche and Hardvin to suppose that Scincomagus was the same as Segusio or Susa. D'Anville guesses that Scincomagns may be a place which he calls "Chamkat de Siguin, at the entrance of the Col de Cestrieres, which leads from the valley of Sézane (Ceaano) into that of Pra-gelas." As usual. he relies on the resemblance of the ancient anul modern names, which is often usefnl evidence; for "magus" in Scincomacus is merely a common Gallic name for tomn. D'Anville also sapposes that this position of Scincomngns is confrumed by the site of Ocelum, as he has fixed it. [Ocelums.] But all this is vagne.
[G. L.]
SC1O'NE (ミкiúvク,Herod. vii. 123, viii. 128 ; Thur. iv. 120-123. 133, v. 32; Strab. vii. p. 330 ; Ponp. Mela, ii. 2. § 11; Plin. iv. 17: Eih. Ekiavaios. Herod.; इnowvés, Steph. B. a. v.), the chief town on the istbmus of Pallene in Macedonia. Although it called itself Achaean, like many other colooial towns, in defanit of any acknowledged mother-city. it tracel its origin to warriors retorning from Troy. Under concert with Brasidas the Sciona ans proclaimed their revolt from Athens, two days after the truce was sworn, March, B.c. 421. Brasidas, by a speect which appealed to Grecian feeling, woand up the citizens to the highest pitch of enthusiasm. The Athenian:, furions at the refusal of the Lacedaemonians to give up this prize, which they had gained after the truce, passed a resolution, under the instigation of Cleon to kill all the grown-ap male inhabitants of the place, and strictly besieged the town, which Brasidas was unable to relicre, though he had previously conveyed away the women and cliildren to a place of safety. After a long blockade Scione surrendered to the Atheniass, who put all the men of military age to death, and sold the women and children to slavery. The site of this ill-fated city mnst be songht for between the capes Palcuri and Posidhi. (Leake, Northerm Grece, vol, iii. p. 157.)
[E. B. J.]
scifadiud. [Silamis.]
SCIMI or SCIRMI, a population varionsly plasel by varions authors. The first who mentions them is Pliny (iv. 13. s. 27), who fixes them in Eningia, i. e. in the parts to the NE. of the extreme frontier of what he and his contemporayies call Gerinania, i. e. East Prussia, Courland, Liemia, Esthonia, and part of Fimland, "quidam haec habitari ad \intulam usque funviom a Sarmatis, Venedis, Sciris, Hirris, tradunt." Xo other autbor either mentions the Hiuri or places the Sciri thus far northward.

The most interesting notice of them is in the socalled Olbian inscription (Bückh, Inscr. no. 2058). wherein they are mentioned as dangerous neiglbbours to the town of Olbia along with the Galatae, the Thisamatae, the Scythae, and the Saudaratae (Zens, Die Deutschen, gc., s.v. Galatne); and, doubtless. the neighbouring town of Olbia was their true locality.

The evidence of Jornandes makes them Alans （＂Sciri et Satagariiet ceteri Alanerum，＂Reb．Get．49）， exidence which is important，since Peria，the notary of the Alan king Candax，was the writer＇s grandfatber． They are made by Sidonius（Carm．vii．322）part of Attila＇s army，by Jornandes subjects of Odoacer， by Precopius members of the Goth and Alan alii－ ance．They were，alnost certainly，a Scythian tribe of Kherson，who during the peried of the Greek settlements harassed Olbia，and，during the Byzantine period，joined with tbe other barbarians of the Lower Damuhe againts Rome．Of these， the chief cenfederates were the Hernli and Turci－ Jiagi；with whem they found their way as far west as Bararia．The present country of Styria（Styer－ mark）＝the March of the Stiri or Sciri，the change from Sc te St being justified by the Bavarian Count Von Schiern in one part of a document of the 10th century being made a Comes de Stira in anether． Add to this the existence of a Nemus Scirorum in Bararia．（See Zeuss，s．v．Sciri）．

The Sciri of the later writers were prebably a pertion of the Scythians of the parts between the Danube and Ion，under a newer and more spe－ cific name．The transplantation into Styria along with an inread of Uldis，king of the Huns，seems to have broken up the name and nation．Sozemenes saw the remants of them labonring as slaves in the mines of Monnt Olympus in Bithynia（ix．5）．［R．G．L．］

SCIRITLS（ $\grave{\eta}$ ミкıpitis：Eth．Excioitクs，fem． Sicticits），a ragged and barreu mountaineus dis－ trict，in the north of Lacenia，between the upper Eurotas on the west and the Oepus on the east，and extendigg north of the bighest ridge of the moun－ tains，which were the natural boundary between Laconia and Arcadia．The name probably expressed the wild and rugged nature of the country，for the word siguified hard and rugged（ $\sigma \kappa i p o \nu, \sigma \kappa \in i \rho o \nu$, бк $\lambda \eta \rho \frac{1}{\nu}$ ，Hesycb．）．It was bounded by the Mae－ nalians on tbe north，and by the Parrhasians on the west，and was eriginally part of Arcadia，but was conquered at an early period，and its inhabitants reduced to the cendition of Laceduemenian Perieeci． （Steph．B．s．v．ミkipos；Thuc．v．33．）Accerding to Xenophon they were subjected to Sparta even befere the time of Lycurgus．（De Rep．Lac，c．12．） They were distinguished ahove all the other Periocci for their bravery；and their centingent，called the
 the extreme left of the Lacedaemonian wieg．（Thuc． r．67，68．）They were frequently placed in the post of danger，and sametimes remained with the king as a buly of reserve．（Xed．Cyr．iv．2．§ 1， Ifell．v．2．§ 24，v．4．§ 52；Diod．xv．32．）On the fint invasion of Laconia by the Thebans the Seiritac， tugetber with the Perioeci of Caryae and Sellasia， revalted fiom Sparta，in consequence of which their country was subsequently ravaged by the Lacedae－ manims．（Xen．Hell．vii．24．§ 1．）The only towns in the sixitis appear to have been Scmess and Ona＇m，called Ium by Xenophon．The latter is the whly place in the district mentioned in histerical times［Oerm］．Scirus may perlaps have been the same as ixirtunium（ $\Sigma$ киpт ${ }^{\prime} w_{s} o \nu$ ），in the distrist of Aegytis．（Pans，viii．27．\＆ 4 ；Steph．B．s．v．）

The road from Sparta to Tege，which is the same as the present rond from sparta to Tripolited， led through the Sciritis．（Leake，Morea，val．ii． p．28；Boblaye，Recherchors，g＇c．p．75；Ross，Reisen im I＇clononnes，p．178；Curtius，Peloponnesos，vol． ii．p．263．）

SCIRO＇NIA SAXA．［Mggara，p．3IG，b．］ SCIRRI，［Sciri．］
SCIRTIA＇NA，a station on the Egnatian road， between Brucida（Presba）and Castra or Paremhole， The name is ne deubt connected with that of the Scirtones（ミkíptoves），whem I＇tolemy（iii．17．§8） couplea with the Dassaretian Pirustae as Illyrian tribes near Macedonia．
［E．B．J．］

## SCI＇RTONES．［Scmtiana．］

SCIRTO＇NIUML［SctnItIS．］
SCIRTUS（ミкiptos，Procap．de Aed．ii．7），a river of Mesopetamia，a western tributary of the Chaboras（Chabur）．It flowed frem 25 sources， and ran past Edessa．（Chron．Edess．in Asseman， Bibl．Or．i．p．388．）Its name，which signifies the skipping or jumping（from $\sigma \kappa \iota \rho \tau \alpha \omega$ ），ia said to have been derived from its rapid course and its frequent everflowiags；and its present name of Duisan means the same thing．
［T．H．D．］
SCIRUMI．［ATticA，p．326，a．］
sCISSUSI．［CISSA．］
SCI＇TTIUM．［SOTIATES．］
SCODRA（方 乏iróspa，Plel，ii．16．（17．）§ 12；玉кóठpat，Hierocl．p．656：Eth．Scedreeses，Liv．slv． 26），one of the mere important towns ef Roman Illyricum（Montenegro），the capital of the Labeates， seated at the southern extremity of the lake La－ beatis，between two rivers，the Clausnla on the E．， and the Barbana on the W．（Liv，sliv．31），and at a distance of 17 miles frem the sea－coast（Plin．iii． 22．s．26）．It was a very strong place，aed Gen－ tius，king of the Illyrians，attempted to defend it against the Romans，b．c． 168 ，but was defeated in a hattle under the walls．Pliny erreneously places it on the Drilo（l．c．）．At a later peried it becnme the chief city of the proviece Praevalitana．It is the present Scutari，which is also the name of the lake Labeatis．（Wilkinson，Dalmatia and Monte－ negro，vol．i．p．476．）
［T．H．D．］
SCOLLIS（¿̇кóд入1s），a meuntain between Elis and Achaia，now called Sandanmeriotiko， 3333 feet high，frem which the river Larisus rises，that ferms the boundary between Achsia and Elis． Strabo describes it as adjacent to Mount Lampeia， which was connected with the range of Eirman－ thus．（Strab．viii．p．341．）Strabo also identifies it with the＂Olenian Rock＂of Homer．（Il．ii． 617 ；Strab．viii．p． 387 ；Leake，Morea，vol．ii． pp．184，230；Peloponneviaca．p．203．）

SCOLOTI．［Scytha．］
SCOLU＇S（玉̇̈̀k p． 408 ），a tewn of Chalcidice near Olynthus，men－ tinned tegetber with Spartolus，in the treaty between Athens and Sparta in the tenth year of the Pelo－ punnesian War．
［E．B．J．］
 town of Boentia，mentioned by llomer（11．ii．497）， and described by Strabo as a village of the Para－ sopia below Cithacron（ix．p．408）．P＇ausanias，in his description of the route from I＇lataea to Thobes， kays，that if the traveller were，instead of crosuing tho Asopus，to fellow that river for about 40 stadia， be would arrive at the ruins of Scelus，where there was an unfinislied temple of Demeter and Core（ix． 4．§ 4）．Mardonius in his march from Tanngra to Plataea passed through Scolus．（Herod，ix．15．） When the Lacedaemoninns were prepariug to invado Bocotia，B．c． 377 ，the Thebans threw up an in－ trenchment in front of Scolus，which probably ex－ tended from Mt．Cithacron to the Asppes．（Xen． Hell．r．4．§ 49，Agesil．2）Strabo says that

Sonlus was so disagreeable and rugged（ $\tau \rho a \chi$ ús） that it gave rise to the proverb，＂never let us go to Scolus，nor follow any one there＂（ix．p．408）． leake places Scolus just below the projection of Cithaeron，on a little rocky table－height，overlook－ ing the river，where stands a metok－lii depeadent on a convent in the Eleutheris，called St．Meletius， （Northern Greece，vol．ii．p．330．）

SCOMBRA＇RLA（ $\Sigma_{\text {ко }}$ враріа，Strab，iii．p．159）， an island on the S．coast of Spain．in front of the bay which formed the harbour of Carthago Nova， and 24 stadia，or 3 miles，distant from the ceast． It derived its name from the scombei，tunny－fish，or mackarel，which were found here in great quan－ tities，and from which the Romans prepared their garum．（Plin．xxxi．8．s．43．）It was also called Herculis Insula，Now Islote．
SCOMBRA＇Sla．［Saturni Prom．］
SCOMBRUS，SCO＇MIUS（ $\Sigma \kappa o ́ \mu \varepsilon \rho o s, ~ a l . ~ \Sigma к б ́-~$ $\mu \mathrm{mos}$, Thuc．ii． 96 ；Aristot．Meteor．i． 13 ；Scopius， Plin．iv． 17 ：Eth．ミкó $\mathrm{S}_{\mathrm{Spoc}}$ ，Hesych．），an out－ lying mountsin of the chain of Haemus，or that clnster of great summits between Ghiustendil and Snfia，which sends tributaries to all the great rivers of the N．of European Turkey．As the most central point，and nearly equidistant from the Euxine，the Aegean，the Adriatic，and the Danube，it is probably the Hamns of the traveller＇s tale in Livy（xl．21）， to which Pbilip，son of Demetrius，king of Mace－ donia，made a fruitless excursiou with the expec－ tation of beholding from thence at once the Adriatic and the Euxioe（Black Sea），the Dambe and the Alps． （Leake．Northern Grecce，vol，ini．p．474．）［E．B．J．］ SCOM1US，［DCombres．］
SLOPAS（ ¿кómas），au eastern tributary of the Sungarius in Galatia，which according to Procopius （de Aed．v．4）juined the Stngarius， 10 miles east of the town of Juliopolis．Pliny（v．43）calls it Scopins，and according to Procopius this river fre－ quently overflowed the country，which is perhaps alluded to in the Jerusalem Itinerary（ p .574 ），where a station called Hycranpotamum（i．e．ט́ रpò mота－ $\mu \dot{0}$ ）is mentioned about 13 miles to the east of Juliopolis．The modern name of the river is Aladan， （Comp．Leake，Asia Minor，p．79；Eckhel，Doctr． Num．iii．p．101．）
［L．S．］

## sCO＇PELUS．［Halonnesus．］

SCOPI．［ScUPI．］
SCO＇PIA（ ミколia áкра），a headland on the west coast of Caria，to the west of Myndus，and opposite the island of Cos．（Ptol，v．2．§ 10．）strabo（xiv． p．658）mentions two headlands in the same vicinity， Astypalsea and Zephyrium，one of which may pos－ sibly be the same as Scopia．
［L．S．］
SCORDISCI（さкирбібкои）a powerful Celtic tribe，in the zouthern part of Lower Pamnonia，be－ tween the rivers Sivus，Dravus，and Danubius． They and the Boii were overpowered by the Dacians． （Strab．vii．pp．293，313．）Some call them an Hlyrian tribe，because，living on the borders of Illy－ ricum，they were much mised up with them．They were in the end greatly reduced hy their struggles with the Dacians and the Triballi，so that when tbey came in contact with the Romans they were tasily subdued．（Appian，Illyr．3；Liv．xli．23； Justio，xxxii．3；Plin．iii．28；P＇tol．ii．16．§ 3．） In Pannonia they seem to have gradually hecome ussimilated to the Pannonians，whence in later tumes they disappear trom histong as a distinct na－ tion or tribe．

SCORDISCUS．［SCYDISES．］
［L．S．］

Supli．The city was abont two or three miles in circumference；but of the walls muly a few courses of masonry have been preserved．The acropolis stond at the south－western end of the site，below which，on the east and north，the ground is coverest with foundations of buildings，heaps of stones，and fragments of tiles and pottery．（Leake，Northern Grecce，vol．iv．p． 454 ，seq．）

SCULTENNA（ $\mathbf{\Sigma}$ кой入тavya，Strab）：Panaro）， a river of Gallia Cispadana，and one of the prin－ cipal of the sonthern tributaries of the Padus． （Plin．iii．16．s． $20 ;$ P．Diac．Hist．Lang．iv．47．） It crosses the Aemilian Way about 5 miles E．of Matina（Modena），and falls into the Po a little be－ Jow Bondeno，being the last of the tributaries of that river which nos flow into its main stream． In the lower part of its course it now bears the name of Panaro，but in the upper part，before it leaves the valleys of the Apennines，it is still known as the Scolienne．It has its sources in one of the loftiest and most rugged groups of the Apen－ nines，at the foot of the Monte Cimone，and from thence flows for many miles through a deep and winding valley，which appears to bave been the abode of the Ligurian tribe of the Friniates．The district still bears on old maps the title of Frignano．（Ma－ gıni，Carte d＇Italia，tav．16．）In B．c． 177 the banks of the Scultenna were the scene of a decisive conflict between the Ligurians and the Roman con－ sul C．Clavdias，in which the former were defeated with great slanghter（Liv．xli．12，18）；but the site of the battle is not more exactly ind．cated． Strabo speaks of the plains on the banks of the Scultenna，probably in the lower part of its course， as producing wool of the finest quality．（Strab．$v$ ． p． 218 ）
［E．H．B．］
SCUPI（ミкои̂тot，Ptol．iii 9．§ 6，viii．11．§5； Hierocl．；Niceph．Bryenn．iv．18；Geog．Jav．iv．
 Prucop．de Aed．iv． 4 ；Orelli，Inscr．1790：Uschkik）， at town which，from its important position at the debouche from the Illyrian into the plains of Paeonia and the Upper Axins，was in all ages the frontier town of Illyricum towards Macedonia．There is no evidence of its ever having been prosessed by the kings of Macedonia or Paconia．Under the Rumans it was ascribed to Dardania，as well in the time of Ptoleny as in the fifth century，when it was the capital of the new diocese of Dardania（Marquardt， in Pecker＇s Rom．Alt．iii．pt．i．p．110）．The loman road from Stobi to Naissus passed by Scupi，which was thas brought into connection with the great NE． ronte from Viminacium on the Danube to Byzantium． It was probaibly seldom under the complete authority of Constantinople，though after the memorable vic－ tory in which，under its walls，Basil．the＂Slayer of the Bulgarians＂，in the beginning of the eleventh century，avenged the defeat he had suffiered from Sanuel，king of Bulgaria，twenty－one years before， in the passes of Mt．Haemus，this city surrendered to the Byzantine army（Cedren．p．694）．In the reign of Michael l＇alacolngus it was wrested from the emperor by the Servians，and became the residence of the Kral（Cantacuzenus，p．7\％8．） Finally，under Sultan Mayezid，Scupi，mr the＂Bride of Puamili，＂received a colony of Ottoman Turks （Chalcondyles，p．31）．（Leake，Northern Greece， vol．iii．p．478．）
［E．B．J．］
SCURGUN（ミKoupqoy），a town in the north of Gormany，in the territory of the Ilelvecones，be－ tween the Viadus and the Vistula，the exact site of
which is unknown．（Ptol．ii．11．§ 27 ；comp．Wil－ heln，Germanien，p．253．）
［1．．S．］
SCYDISES（ミ̇Kvסiनクs），a chain of rugged monntains in the east of Pontus，which was con－ nected in the north with the Maschici Montes on the east，and with Mons Paryadres on the north－west， while in the sonth－west it was connected with Auti－ tuarus．（Strab．xi．p．497，xii．p．548；Ptol．v． 6. § 8，where it is catled ミкорסírкоs．）Moderu tra－ vellers identify it with the Tshambiu Bel（IWiener Jahrbïcher，vol．cv．p．21．）
［L．S．］
SCYDRA（ $\Sigma \kappa \dot{\bar{v} \delta p a: ~ E t h . ~ \Sigma к v \delta р a i ̂ o s), ~ a ~ t o w n ~ o f ~}$ Emathi：in Macedonia，which Ptolemy places be－ tween Tyrissa and Mieza．（Steph．B．s．v．；1＇tol．iii． 13．$\S 39$ ；Plin．iv．10．s．17．）It is perhaps the Same as the station Scurio in the Jerusalem Itinerary （p．606），where it is placed between Edessa and Pella，at the distance of 15 miles from either． （Cramer，Ancient Greece，vol．i．p．228．）

SCYLACE（ミкu入ákך），an ancient Pelasgian town of Mysia，on the coast of the Propontis，east of Cyzicus．（Steph．B．s．v．）In this place and the neighbouring Placia，the Pelasgians，according to Herodotus（i．57），had preserved their ancient lan－ guage down to his time．Scylax（ p ．35）mentions only Placia，but Mela（i．19）and Pliny（v．40） speak of both as still existing．These towns seem never to bave been of any importance，and to have decayed at an early period．
［L．S．］
SCYLACIUM or SCYLLE＇TIUM（ тıov，Steph．B．，Strab．；ミ̌кu入áktov，Ptol．：Eth． ミки入入艻тюкos：Squillace），a town on the E．cosst of Brattium，situated on the shores of an extensive bay，to which it gave the nane of Scylleticts Sines．（Strab．vi．P．261．）It is this bay，still known as the Gulf of Squillace，which indents the const of Bruttinm on the E．as deeply as that of Hipponium or Terina（the Gulf of St．Eufemia）does on the W．，so that they leave but a comparatively narrow isthmus hetween them．（Strab．l．c．；Plin． iii．10．s．15．）［Beutrius．］According to a tra－ dition generally received in ancient times，Scylletium was founded by an Athenian colony，a part of the followers who bad accompanied Menesthens to the Trojan War．（Strab．l．c．；Plin．l．c．；Serv．ad Aen． iii．553．）Anutber tradition was，however，extant， which ascribed its foundation to Ulysses．（Cassiod． Var：xii．15；Serv．l．e．）But no historical value can be attached to such statements，and there is no trace in historical times of Scylletinm lhaving been a Greek colony，still less an Athenian one．Its name is nut mentioned either by Scylax or Scymnus Chius in enumerating the Greek cities in this part of Italy，nor is there any allusion to its Athenian origin in Thu－ cydudes at the time of the Athenian expedition to Sicily．We learn from Diodorus（xiii．3）that it certainly did not display any friendly feeling towards the Athenians．It appears，indeed，during the his－ torical period of the Greek colonies to have been a place of inferint consideration，nad a mere depen－ dency of Crotona，to which city it continned subject till it was wrested from its power by the elder Diuny－ sius，who assigned it with its territory to the Locrians． （Strab．vi．p．26i．）It is evident that it was still a sinall and unimportant place at the time of tho Sicond Prnic Wrar，as no mention is found of its name during the operations of Hannibal in Brut－ tium，though he appears to lave for some time had his hend quarters in its immediate neighbourhood， and the place colled Castra Jlannibalis must have been very near to seylacium．［Castra llan－
xidalis．］In r．c． 124 the Romans，at the insti－ gation of C．Gracchus，sent a colony to Scylacium， which appears to have assumed the name of Miner－ vium or Colonia Jinervia．（Vell．Pat．i． 15 ；Monm－ sen，in Berichte der Süchsischen Gesellschaft der Wissenschoften，1849，pp．49－51．）The name is written by Velleins＂Scolatinm；＂and the form＂Sco－ lacium＂is found also in an inscription of the reign of Antoninns Pins，from which it appears that the place must have received a fresls colony under Nerra．（Orell Inscr．136；Monmsen，l．c．）．Scylacium appears to have become a considerable town after it received the Roman colony，and continued such thronghout the Roman Einpire．（Mel．ii．4．§ 8 ；Plin．iii． 10. s．15；Ptol．iii．1．§11．）Towards the close of this period it was distinguished as the birthplace of Cassiodurus，who has left ns a detailed but rhetorical description of the beauty of its sitnation，aod fertility of its territory．（Cassiod．Var．xii．15．）

The modern city of Squillace is a poor place，with ooly about 4000 inhabitonts，thongh retaining its episcopal see．It stands upon a hill about 3 miles from the sea，a position according with the descrip－ tion given by Cassiodorus of the ancient city，but it is probable that this occupied a site nearer the sea， where considerable ruins are said still to exist， thongh they have not been described by any modern traveller．

Tbe S＇cylleticus Sinus（ $\Sigma k v \lambda \lambda \eta \tau u \kappa d s ~ \kappa \delta \lambda \pi o s)$ ， or Gulf of Squillace，wns always regarded as dan－ gerons to mariners ；hence Virgil calls it＂navifra－ gum Scylacenm．＂（Aen．iii．553．）There is no nataral port throughout its whole extent，and it still bears an evil reputation for shipwrecks．The name is found in Aristotle ：ss well as Antiochns of Syracuse，but wonld seem to have been unknown to Thneydides；at least it is difficult to explain other－ wise the peculiar mamer in which be speaks of the Terinacan gulf，while relating the voyage of Gy－ lippus along the E．coast of Bruttinm．（Thuc，vi． 104；Arist．Pol．vii．10；Autioch．ap．Strab．vi． p．254．）
［E．H．B．］
SCILAX（シкv́גa૬），the chief tributary of the lris in Pontus；it had its sources in the east of Galatia，and flowing in a worth－western direction， emptied itself into the Iris near Enpatoria or Mag－ nopolis．（Strah．xii．p．547．）Its modern name is Tchoterlek Irmak．（Hamlton，Researches，vol．i． Pp．365．374．）［L．S．］
SCILLAE（Tab．Peut．；Geogr．Rav．jv．6，v．12）， a town of Thrace，on the Euxine，where the long wall，erected by the emperor Anastasius Dicorns for the defence of Constantinople，terminated．This wall commenced at Selymbria，on the Propontis， and was carried across the narrow part of Tbrace， at the distance of about 40 miles from Constan－ tinople，its length being 2 days＇journey（Pro－ cop．de Aed．iv． 9 ；Gibbon，Decline and Fall，c． 40．）
［J．R．］
SCYLLAEUM（ $\tau \grave{2}$ ミки̇入aiov：Scilla），a pro－ montory，and town or furtress，on the W ．caast of Bruttium，abont 15 miles N．of Rhegium，and almost exactly at the entrance of the Sicilian strait． The promontory is well described by Strabo（vi． p． 257 ）as a projecting rocky beadland，jutting ont boldly into the sea，and united to the mainiand by a oarrow neck or isthmus，so as to form two small bat well sheltered bays，one on each side．There can be no donbt that this rocky promontury was the one which became the aubject of so many fables，and which was represented ly $1 l o m e r$ and other poets as
the abode of the monster Scylla．（Ilom．Od，xii． $73,8 \mathrm{c} ., 235$, \＆c．；Biogr．Diet．art．Scytit．．）But the dangers of the rock of Scylla were far more fabulous than those of its neighbour Charybdis，and it is difficult to noderstand how，even in the infancy of navigation，it could have offered any obstacle more formidable than a hondred other headlands whose names are unknown to fame．（Senec．Ep，79； Smyth＇s Sicily，p．107．）At a later period Anaxi－ las，the despot of Rheginm，being strack with the natural strength of the pisition，fortified the rock， and established a naval station there，for the pur－ pose of checking the incursions of the Tyrrherian pirates．（Strab．vi．p．257．）In consequence of this a small town grew up on the spot；and hence Pliny speaks of an＂oppidum Scyliaeum：＂but it was pro－ brbly always a small place，and other writers speak only of the promontory．（Plin．iii．5．a．10；Mel，ii． 4．§ 8 ；Ptol，iii．1．§ 9．；Steph．Byz．s．v．）At the present day the rock is still occupied by a fort， which is a post of considerabie strength，while a small town stretches down the slopes towards the two hays．The distance from the castle to the op－ posite point of the Sicilinn const，marked by the Torre del Fara，is stated by Capt．Smyth at 6047 yards，or rather less than $3 \frac{1}{2}$ Eng miles，but the strait afterwards contracts considerably，so that its width between the Punta del Pezzo（Caenys Prum．） and the nearest point of Sicily does not exceed 3971 yards．（Smyth＇s Sicily，p．108．）
［E．H．B．］
SCYLLAEUM（ $\Sigma \kappa u \lambda \lambda a \hat{o v})$ ，a promontory of Troezenia，and the most easterly point of the Pelo－ ponnesus，is said to have derived its name from Scylla，the daughter of Nisus，who，after betraying Megara and Nissea to Minos，was thrown by the latter into the sea，and was wasbed ashore on this promontory．Scyllaenm formed，along with the opposite promontory of Sunium in Attica，the en－ trance to the Suronic gulf．It is now called Kavo－ Skyli；but as Pausamias，in the paraplus from Scyl－ laenm to Hermione，pames Scyllaeum first，and then Bucephala，with three adjacent islands，it is neces－ sary，as Leake has observed，to divide the extremity now known as Kavo－Skyli into two parts；the bold round promontory to the N ，being the true Scyl－ laeam，nad the acute cape a mile to the S．of it Bucephala，since the three islands are adjacent to the latter．（Paus．ii．34．$\S \S 7,8$ ；Scylax，p．20， Hedson；Strab．viii．p． 373 ；Thuc．v．53；Plin．iv． 5．s． 9 ；Mela，ii．3；Leake，Morea，vol．ii．p． 462 ， Peloponnesiaca，p． 282 ；Boblaye，Recherches，p． 59 ； Curtins，Peloponnesos，vol．ii．p．452．）

SCYLLE＇TICUS sINUS．［Scyiacium．］
SCYRAS．［Laconia，p．114，b．］
SCYROS or SCYRUS（ミки̂pos：Eth．ミкúpros： Shyro），an island in the Acgaean sea，and one of the northern Sporades，was so culled from its rugged－ ness．It lay east of Euboea，and contained a town of the same name（Strah．ix．p．436；Scylax，p．23； Ptol．iii．13．§47），and a river called Cepbissus． （Strab．ix．p．424．）Scyros is frequently mentioned in the stories of the mythical period．Here Thetis concealed her son Achilles in woman＇s nttire among the danghters of Lycomedes，in order to save him from the fate which awaited him nuder the walls of Troy．（Apollod．iii．13．§8；Paus．i．22．§ 6： Strab．ix．p．436．）It was here nlso that lyyrrhus， the son of Deidamia by Achilles，was brought $n \mathrm{p}$ ， and was fitched from thence by Ulysses to the Trojan War．（Hom．Il．xix．326，Od．xi．507； Soph．Phil．239，seq．）According to another tradi－

304
tion Scyros was conquered by Achilles (Hum, Il. i. 668 ; Paus. i. 22. § 6); and this conquest was cinnecterl in the Attic legends with tho death of Thesens. After Thescus had been driven out of Athens he retired to Scyros, where he was first huspitably received by Lycomedes, but was afterwards treacheronsly lhurled into the sea frem one of the rocks in the island. It was to revenge his death that Pelens sent Achilles to couquer the islanl. (Plut. Thes. 35; P'us, i. 22. §6; Philostr. Ileroic. 19) Scyros is saith to have been eriginally iuhabiten by Peliogians, Carians, and Dolopians; and we know from Tincydides that the island was still inhahithed by Dolupians, when it was conquered by Cimon after the Persian wars. (Nicolans Damase. ap. Steph. B. s. v.; Scymn. Cb. 5s0, seq.; Thac, i. 98 ; Diod. xi. 60.) In B. C. 476 an oracle had directed the Athenians to bring home the bones of Thesens; lut it was not till B. c. 469 that the island was conqnered, and the bones conveyed to Athens, where they were preserved in the Theseinm. Cimon expelled the Dulopians from the island, and peopled it with Athenian settlers. (Thuc. Died. ll.ce.; Plat. Thes. 36, Cim. 8; on the date of the conquest of Scyros, which Clinton erreneonsly places in B. C. 476, see Grote, History of Grecee, vol. v. p. 409.) From this time Scyres was sulject to Atheus, and was regarded even at a later period, along with Lemnos and Imbres, as a possession to which the Atbenians had special claims. Thns the peace of Autalcidas, which declared the independence of all the Girecian states, nevertheless allowed the Athenians to retain possession of Scyros, Lemnos, and Imbros (Xen. Hell. iv. 8. § 15, v. 1. §31); and thongh the Macedonians subseqnently ebtained possession of these islands, the Romans compelled Philip, in the peace conchuled in B. C. 196, to restere them to the Athenians. (Liv, xxxiii. 30.) The soil of Scyros was unprodnctive (1)em. c. Callip. p. 1238; Enstath. ad Hom. Il. ii. p. 782 ; Suidas, s. v. à $\chi$ خे इкоріа); but it was celebrated for its breed of goats, and for its quarries of variegated mavile. (Strab. ix. p. 437 ; Athen. i. p. 28 , xii. p. 540 ; Zenob. ii. 18 ; Plin. xxxvi. 16. s. 26.)

Seyros is divided into two parts by a narrow isthrmus, of which the southern half consists of high rugged mountains. The northern half is not so mountainons. The modern town of St. George, on the eastern side of the island, stands upon the site of the ancient town. It covers the northern and western sides of a high rocky peak, which to the eastward falls steeply to the sea; and hence Homer correctly describes the ancient city as the lofty Scyrus (Eкûpop aimeiav, Il. i. 664). The Hellenic walls are still traceable in many parts. The city was barsly 2 miles in circumference. On the isthmus sutulh of Scyros a deep bay still retains the uame of Achilll ('Axi入 $\lambda_{1}$ ), which is doubtless the site of the Achilleion, or sanctuary of Achilles, mentioned by Enstathius (ad Il. ix. 662). Athena was the divinity cliefly worslipped at Scyros. Her temple stood opon the shore close to the town. (Stat. Achill. i. 285, ii. 21.) Tournefort says that he satw sone renains of columns and cornices of white marble, close by a fursiken chapel, on the left hand going into the fort of St. Gicorge; these are probalily remains of the temple of Athema. (Tournefort, Jogage, vol. i. p. 334, trans; Leake, Northern Greece, vol. iii. p. 106, seq.; Fiedler, Reise, vol, ii. p. 66 ; lioss, Wanderungen in (iriechentand, rol. ii. p. 32, seq )

SCYRUS ( $2 k i \hat{p} p o s$ ), a tributary of the Alpheins, in sonthern Arcadia. [Migalorolis, p. 309, b.]
 Scytha), the country of the Scythae, a vast area in the enstero half of Northern Europe, and in Western and Central Asia. 1ts limits varied with the differences of date, place, and epportunities of information on the part of its geographers. Indeed, to a great extent, the history of Scythia is the history of a
Name.-It is obvious that the term came from the Greeks to the Romans; in this respect onlike Sarmatia, Dacin, and others, which, in form at least, are Roman rather than Greek. But whence did the Greeks get it? for it is by no means either significant in their tongue, or a Greek word at all. They took it frem one or more of the popalations interjacent between themselves and the Sicythae; these being Thracians, Surmatians, and Getae. Probably all three ased it; at any rate, it seems to have been used by the neighbours of the Greeks of Olbiopoiis, and by the Thracians on the frontiers of the Greeks of Macedonia. This is in favour of its having been a term common to all the forms of speech between Mrcedenia and the Borysthenes. Scyth-, then, is a Sarmatian, Tbracian, and Getic term in respect to its introduction into the Greek language. Was it so in its origin? The presumption as well as the evideace is in favour of its having been so. There is the express evidence of Herodotus (iv. 6) that the prpulation which the Greeks called Scythae called themselves Scoloti. There is the fact that the Persian eqnivalent to Scythae was Sakae. Thirdly, there is the fact that in the most gennine-looking of the Scythic mytbs there is no such eponymns as Scytha or Scythes, which wenld scarcely have been the case bad the name been native. Scyth-, then, was a word like German or Allemand, as applied to the Deutsche, a word strange to the langnage of the popalation designated by it, but not strange to the language of the neighbouring conntries. To whom was it applied? To the tribes who called themselves Scoloti.

What was the extent of the term? Did it apply not only to the Scoloti, but to the whole of the class to which the Sceloti belenged? It is safe to say that, at first, at least, there were many congeners of the Scoloti whom no one calicil Scythae. The number, however, increased as the term became general. Did the name denote any popnations of a different fanily from the Scoloti? Rarely, at first; ofterwards, frequently. If the populations designated by their neighbears as Scythae called themselves by some other name, what was that name? Scoluti applied obly to a part of them. Had the word Scyth-a meauing in any language? if so, what was it, and in what tongues? Both these points will be noticed in the sequel, the questions involved in them being at present prematnre, though by no means mimportant.

The knowledge of the Scythian family dates from the beginning of Greek literature.
Scytmans of Hysson, bTC. - Popalations belonging to the Scythian family are noticed by Homer ander the names of Abii, Glactophagi, and Hippemulgi, the hahit of milking their mares being as definite a characteristic of a Seythian as anything in the way of manners and enstoms can he. Hesiod gives us Scy thae under that name, noting them also as Ilippemolgi. The Scythians of Homer and Ilesiod are poetical rather than historical nations. They are associated with the Mysi of Bulgaria (not of Asiin),
a point npon which Strabo enlarges (vii. 3. §s 7,8 ).
 àjaṽo. Aeschylus mentions them as EEvyouor. The apparent simplicity of their milk-drinking habits got them the credit of being men of mild and innocent appetites with Ephorus (Strab. vii. p. 302), who contrasts them with the cannibal Sarmatae. There was also an npparent confosion arisiug out of the likeness of Nópaסes to $\mathrm{N} \delta \mu \mathrm{ol}$ (from $\nu \dot{\rho} \mu \mathrm{os}=l a v$ ). The Prometheus of Aeschylus is bound to one of the rocks of Caucasus, on the distant border of the earth, and the inaccessible desert of the Scythians.

Such are the Scythae of Aeschylus and Hesiod. The writers of the interval, who knew them as the jovaders of Asia, and as historical agents, must have had a very different motion of them. Fragmentary allusions to the evils inflicted during their ioroads are to found in Callinus, Archilochus, \&re. The notice of them, however, belengs to the criticism of the historical portion of the account of

Tkins-Danubian Scythians of Herodotus: Scoloti: Scythlans of Hifpocrates.-Much of the Herodotean bistory is simple legend. The strange story of an intermarriage of the females sho, whilst their husbands were in Asia, were left behind with the slaves, and of the rebellion therein originating having lieen put down by the exhibition, on the part of the returniog masters, of the whips with which the backs of the rebels lad been previously but too familiar, belongs to the Herodotean Seythians (iv. 1-6). So do the myths conceraing the origin of the nation, fuur in number, which may be desiguated as follows:-

1. The Account of the Scythions themselves.This is to the effect that Targitaus, the son of Zeus by a daugliter of the river Borysthenes, was the father of Leipoxais, Arpoxais, and Culaxais. In their reign, there fell from heaven a yoke, an axe ( $\sigma$ d́rapis), a plough -share, and a cup, uli of gold. The two elder failed in taking them up; for they burnt when they approached them. But the younger did not fail ; and ruled accordingly. From Leiposais descended the Auchaetae ( $\gamma$ évos); from Arporais the Catiuri and Traspies; from Colaxais the Paralatai. The general name for a!! is "Scoloti, whom the Greeks call Scythae." This was exactly 1000 years before the invasion of Darius. The gold was sacred; the country large. It extended se far north that the continual fall of feathers (snow) prevented things from being seen. The namber of the kingdoms was three, the greatest of which had charge of the gold. Of this legend, the elements seem partly scythian, and partly due to the conntry in which the Scythians settled. The descent from the Borysthenes helongs to this latter class. The story of the sons of Targitans is foond, in its main features, amongst the present Tartars. In Targitaus more than one commentator has found the root Turk. The threefold division reminds us to the Great, Middle, and Little Hordes of the Kirghiz; and it must be observed that the words greatest and middle ( $\mu \in \gamma i \sigma \tau \eta$ and $\mu \epsilon \sigma \eta$ ) are found in the Herodotean scceunt. They mny be more technical and defitite than is generally inngined. In the account there is no Eponymus, no Scytha, or even Scolotos. There is also the statement that the Scythians are the youngest of all nations. This they might be, as immigrants.
2. The Account of the Pontic Greeks.-This is to the effect that Agathyrsus, Gclonns, and Scythes (the youngest) were the sons of Hercules and

Echidna, the place where they met being the HylaeaThe soe that could draw the bow was to rule. This was Seytbes, owing to manoeuvres of his mother. He stayed in the land: the others went ont. The cup uppears here as an emblem of authority.
3. The Second Greek Account.-This is historical rather than mythological. The Massagetae press the Scythians upon the Cimmerii, the latter flying Lefore them inte Asia. This comects the bistory of the parts about the Bosporns with Media. Thie inference from the distribution of the signs of Cimsmerian occupancy confirms this accunot. There tere the burial-places of the Cinmerii on the Tyras; there was the Cimmerian Pesporus, and between
 This is strong evidence in favour of Scythian extension and Cimmerian preoccupancy.
4. The Acoont of Aristeas of Proconnesus.This is a speculation rather than either a lecend or a piece of history. Aristeas (Mure, History of Greek Literature, vol. ii. 469 , seq.) visited the country of the Issedones. North of these lay the Arimaspi ; borth of the Arimaspi the Monoplthalmi; north of the Monophthalmi the Gold-gnarding Griffins ( Грínts $\chi$ рибофа入ákot); and north of these, the Hyperberei. The Hyperborei made no inovements; but the Grifins druve the Monophthalmi, the Monophthalmi the Arimaspi, the Arimaspi the lssedones, the Issedones the Scythians, the Scythiaus the Cimmerians, the Cimmerians having to leave their land; but they, as we learn elsewhere, attack the Medes. (Hcrod, iv. 5-16). No one had ever been further north than Aristeas, an unsufe authority. The ioformation of Iferodotus himself is chiefly that of the Greeks of the Borysthenes. He mentiuns, however, conversations with the steward of one of the Scythian kings.

The Emporium of the Burysthencitae was central to the Scytbia of the sea-coust. In the direction of the Hypanis, i. e. west and north-west, the order of the popnlation was as follows: the Cullipidae and Alazones ( ${ }^{\text {a }}$ E $\lambda \lambda \eta \nu$ es Z $_{\text {кuvai) }}$, sowers and consumers of corn; to the north of whom lay the Scythae Aroteres, not only sowers of corn, but sellers of it; to the north of these the Nenri; to the porth of the Neuri either a desert or a terra incogoita (iv. 17, 18.) The physical geography helps us here. The nearer we approach the most fertile province of Modern Russia, Podolia, whetein we place the Scythae Aroteres, the more the Scythian character becomes ngricultural. The Hellenes Scythae (Callipidae and Alazones) belong more to Kherson. That the Hellenes Scythae were either a mised race, or Scythicised Greeks, is unlikely. The doctrine of the preseat writer is as follows: secing that they appear in two localities (viz. the Governments of Kherson aud Caucasus); seeng that in each of these the populations of the luter and more historical periods ate Alani (Ptolemy's form) for those of Kherson is Alaumi); seeing that evea the Alani of Caucasus are by one writer at least called $\dot{\alpha} \lambda \kappa \dot{\eta} \dot{I}_{-}$ evtes 'Alaûyot; seeing that the root Ahav might have two plurals, one in -0t and one in - -5 , he ends in seeing in the Hellenic Scythians simply certnin Scythinas of the Alan name. Neither does be doubt ubout Geloni beiog the same word,-forms like Chani and Hunni, Arpi and Carpi being found for theso parts. At any rate, the locality tor the Callipidac and Alazones suits that of Ptolemy's Alaum, whilst that of the Sicythias Greeks and Geloni of Cancasus suits that of the Alans of the fourth and fitll, centuries.

The Scythian affinities of the Neuri are implied rather thau eategorically stated; indeed, in another part there is the special statement that the Tyras rises out of a great lake which separates the Seythian
 pi $\delta a \gamma \hat{\eta} \nu$ ). This, hawever, must not be male to prove too much; since the Scythians that were conterminous with the Neuri were known by no opecial name, but simply by the descriptive term Sythae Aroteres. [Exampaets; Neuni.] In Siberian gengraphy Narym $=$ marsh. Hence Neuri may be a Scythion gluss. There may also have been more Neari tban onc, e. g. on the Narym of the headwaters of the Dnieper, i. e. of Pinsl:. A fact in favour of the Neuri being Neythian is the following. The occupants of Folhymia, when its history commences, which is as late as the 13th century, are of the same stock with the Scytbians, i. e. Comanian Turks. Not only is there no evidence of their introduction being recent, hut the name Omani (Lygii Omani) appears about the same parts in Ptolemy.

East of the Borysthenes the Acricultural Scythae ocenpy the country as far as the Panticapes, 3 days distant. Nortbwards they extend 11 days up the Burysthenes, where they are sttcceeded by a desert; the desert by the Androphagi, a nation peculiar and by no means Scythian (c. 19). Above the Androptazi is a desert.

The bend of the Dnipper complicates the geography here. It is safe, however, to make Ekaterinoslav the chief Georgic area, and to add to it parts of Kier, Kherson, and Poltaca, the agriculfural conditions increasing as we move northwards. The two deserts ( $\epsilon p \hat{j} \mu o r$ ) command nutice. The first is, prohably, a March or political frontier, such as the old Suevi used to have between themselves and neighbours; at least, there is nuthing in the conditions of the soil to make it a natural one. It i. described as épinjos émi ma入入óv. The other is $\dot{\epsilon} \rho \eta \eta_{\mu}{ }^{\text {a }}$ d̀ $\eta \theta^{\prime} \dot{\epsilon} \omega s$, - a distinction, apparently, of some value. To be natural, however, it must be interpreted forest rather than steppe. Kursk and Tshernigoo give us the area of the Androphagi; Kursk hasing a slight amount of separate evidence in favour of its hatring beetr "by no means Scythian" (c. 18).

The Ilylaia, or woodel district of the Lower Dhieper, seems to have been common ground to the Scythae Georgi and Scythae Numades: cr, perlaops, it was uninladnted. The latter extend 14 diys eastward, i.e. over Taurida, part of Ekaterinoslow, aud Dun Kiusak's, to the Gerrhus.
 their ucempants being the Royal Scythians, the best atud most mumerous of the name, who look upon the others as their slaves. They extend, southwards, into the Crimea ( $\tau \hat{\eta} \nu$ Tavpıкīv), and, eastwards, as far ts the ditch dug by the offipmug of the blind shaves (the statenent that the Scythians blinded their slaves on account of the milk being one of the elenents of the strange Servile legend previounly noticed), and the Maeotic Emporium called Kremni. Sume touch the Tamais.

Nurth of the Royal Scythians lie the Melanchlaeni (a probable tramsation of Karalalpak $=$ black bonnet). a different nation and not Sy ythian (c. 20), with marslues, and either a desent or a terra incog. nita abore them. Ihis distuction is, almest certainly, real. At the preseut moment a population, to all appearaness aboriginal, and neither Slavonic nor Scythian (but Ligrian or Firin), occupies parts of

Penza and Tambow having, originally, extended both furtier west and further south. To the north the forest districts attain their maximum development. [Melanchlavixi.] The Royal Seytbians may have occupied parts of Voronezh.

East of the Tanais it was no longer Scythia, but the $\Lambda \dot{\alpha} \xi$ ges of the Sumromatae. [See Saubomitak; Budini; Geloni; Thyssaoetae; lurcae.] The waut of definite boundaries makes it difficult to say where the Iurcae end. Beyond them to the east lay other Scythians, who, having revolted from the Royal, settled there. Up to their districts the soil was level and deep, beyond it rough and stony, with monntains beyond. These are occupied by a nation of Bald-heads, flat-nosed and bearded, scythians in dress, peculiar in language, collectors of a
 (c.23). Their flocks and herds are few; tbeirmanners so simple that no one injures them, \&c. [Argippaei; Issedones; Hypemboker ; Amalaspl.] In the parts about the mountains of the Argipprei trade was carried on by means of seven interpreters. Let this he the caravan trade of Orenburg, near its terminus on the Volga, and we shall find that seven is abount the number of languages that could at the present moment be brought together at it fair in the centre of Orenburg. For the modern Russian take the language of the Sauromatae; for the Scytlian that of the modern Tartars. To these we can add four Ugrian forms of speech,- the Tshuwash, the Mordwin, the Tsheremiss, and the Votiak, with the two forms of speech akin to the Ostiak and Permian to choose the fifth from. The Tshuwash of Kuzan and the Bashkirs of Orenburg bave mixed characters at the present time,-Turk and Ugrian.

Rivers. - The chief river of the Herodetean Scythia was the Ister [Daxubies], with its five mouths; and then the Tyras (Dmiester), the Hypanis (Bog), the Borysthenes (Inieper), the Panticapes [see s. v.], the Hypacyris [see Carclisa], the Gerrlins [see s.v.]. and the Tanais ( $D \circ n$ ); the feeders of the Ister (i.c. the rivers of the present Danubian Principalities) being the Porata (Scythic, in Grcek Puretus), the Tharantos, the Araros, the Naparis, and the Ordessus (cc, 47,48). To these add, from the country of the Aquathyrsi, the Maris (c. 49), or modern Maros of Tiansyltania. The difference between the ancient and nodern names of rivers is nowhere greater than here,- the Maros being the only name nows in use which represents the original one; unless we choose to hold that, word for word, Alutt = Ararms. H'ord for word, indeed, Naparis is Dnieper; but then the rivers are different. This creates a prave difficulty in the determination of the language to which the names of the Scythian rivers should be referred. Yet the question is important, inasmuch $2 s$, in the names, as they come down to us, we have so many glosses of some language or other. Upon the whole, however, the circumstances under which they reached Herodetus suggest the notion that they aro Scythian: c. g. the express statement that Porats is a Scythian form. Again; Ilypanis is, word for word, Kaben,-a word of which the sppearance in Ioth Asia and Europe is hest explained by supposing it to be Seythian. On the other hand, they are as little significant in the language which, anonest thase at prescnt existing, best explains the undoubted Scythian glosses, us they are in the Slavonic, Latin, or (ireck.

The physical geugraplyy of Herodotean Scythin mas a steppe, with occasional districts (chiefly along
the conrses of the rivers and at their bead-waters) of a more practicable character.

Mountaiss. - These were the eastern continnation of the Carpathians, and the hills of the Crimea or Tauris. These were but imperfectly known to Herodutus.

Lakes. [See Exampaeds and Buce.]
Towns, exclosively Greek colonies. [See Olimiopolis: Panticapaeum.]

Beyond the Sanromatae (s.v.) lay "other Scytbians, who, having revolted from the Ruyal, reached this conntry," i.e. some part of Orenburg (c. 22).

Thirdly, there were the Sicae, whom we may call the Scythians of the Persian frontier. Their occupancy was the parts conterminous with Bactria, ard it was under Darins, the son of Hystaspes, that they, along with the Bactrians, joined in the invasion of Greece. Their dress was other than Bactrian, consisting of a pointed turban, a bonnet, legpings, native bows, daggers, and the axe called oajoaps -a word which is probably technicsl. There were Scythao Amyrgii, truly, however, Scythae, ioasmuch as the Persians called all the Scythians by the name Sicae. Under the reign of Cyrns they were independent. Under Darius, they, along with the Caspii, formed the 15th satrajy (iii. 93). This connects them with their frontagers on the west, rather than the east.

There is no difficulty, bowever, in fixing them. From Asterabad to Balk they extended along the northern fromtier of Persia, in the area, and probably is the ancestors, of the present Turcomans and Uzbeks. The name Amyrgii will be noticed in the sequel.

The Sacae, if not separated from the "other Scythians" by the greater part of Independent Tartary, were, at any rate, a popnlation that presented itself to the informants of Herndotus under a different aspect. The Sacae were what the Persians fund on their northern frontier. The eastern Scythae were the Scythians beyond the Sanromatae, as they appeared to the ocenpants of the parts abont the Tanais.

It is not difficnit to sec the effect of these three points of view npon futnre geographers. With Scythians in Transylvania, Scythians in Orenburg, with Scythians (even thongh called Sacae) in Khorasan and Turcomania, and with a terra incognita between, the name cannot but fail to take npon itself an inordinate amount of geverality. The three isolated areas will be connected; and the historical or ethnological unity will give way to a geographical. At present, however, there is a true unity over the whole of Scytbia in the way both of

Physiognomy and Manners.-The physical conformation of the Scythians is not only mentioned incidentally by Herodotus, but in a more special madner by Hippocrates: "The Sesthian خévos is widely different from the rest of mankind, and is like to nothing but itself, even as is the Aegrptian. Their bodies are thick and fleshy, and their limbs loose, without toae, and their bellies the smootbest (?), softest (?), moistest (?) (koin iai íyótaral) of all bellies as to their iower parts ( $\pi a \sigma \dot{\epsilon} \omega \nu \nu$ коı $\lambda \epsilon \omega \nu$ aí кá $\tau \omega$ ); for it is not possible for the belly to be dried in such a country, both from the soil and climate, but on acconnt of the fat and the smoothuess of their flesh, they are all like each other, the men like the men, the women like the women." (Ilippocr. de Aere, \&c. pp. 291, 292.)

Coming as this notice docs from a physician, it hass commanded considerable attention; it has, however, no pretensions to be called a description, though this has often been done. In the hands of later writers its leading features become exaygerated, nutil at length the description of a scythian becomes an absolute caricatnre. We may see this hy reference to Arnmianns Marcellinus and Jornandes, in their acconuts of the Hons. The real fact inferred from the text of Hippocrates is, that the Seythians had a pecnliar physiognomy, a physiognomy which the modern ethnologizt binds in the population of Northern and Central Asia, as opposed to those of Persia, Cancasus, Western and Suthern Europe.

Their general habits were cssentially nomadic, pastoral, and migratory; the commonest epithets or
 'Iттото́goral, and the like.

Concerning their lelitozos, we have something more tban a mere cursory notice (iv. 59). (i.) Tatiti (Tabiti): This was the Scythian name tor the nearest equiralent to the Greek IIistia (Vesta), the divinity whom they most especially worshipped. (ii.) Papaeus : "Most properly, in my mind, is Zeus thas called." So writes Herodotus, thioking of the ideas engendered by such exclamations ns Пamâs. (iii.) A pia: This is the name for earth: as (iv.) Oetosyrus (Oiró $\sigma v p o s$ ) is for A pollo, and (v.) Artimpasia for Aphrodite, and (vi.) Thamimasada tor Poseidon, the God of the Royal Scythians must especially. To Oestosyrus we have the following remarkable inscription (Gul. Inscrip. Antiq. p. 56. 2; see Zenss, s. $r$. Skythen): ӨEA. इEAOITOEKTPA (? इEA$\eta \nu \eta$ ) KAI APOLL $\Omega N \Omega$. OITOミKTPת. MIOPA. M. OTAMIOS. ПAOKAMOZ. NEתKOPOE. ANE ( $\eta \kappa \epsilon$ ). Here the cotnection is with the Persian god Mithras.

The Scoloti sacrificed to all their gods, but to Mars the most especially; fur, besides the deities which have been mentioned nuder their several Scythian names, Nlars and Heracles were objects of particular adoration. The Scythian Venns, too, was the 'Aфpoठím oupavin. To Ares, however, they sacrified most especially and most generally ; for there was a place of worship to him in every vópos (mark the nse of this word, which is applied to the divisions of the Persinn empire as well), where horses, sheep, and captives were sacrificed, and where the emhlem of the god was an iron sword,-evell as it was with the Alani of Ammianns and the Huns of Priscus.

Human beings were sacrificed, but no swine. Neither were swine eatel, nor were they tolerated in the conatry. This is noticell, thecanse io many of the nations of Northern Asia, e. g. the Wotinks and others, the hog, even now, is held in abomination, and that hy Pagan tribes nntinctured with Nahometanism.

Notwithstanding the praises of the earlier pnets, the wars of the "just and illustrions" Scythians were of a piece with the worship of their war-god. They scalped their enemies, and they used their skulls as dritiking cups (cc. 64-65). Once a year the monarch of each nome filled a vast vat with wine and apportioned it to the warriors who had killed most coenies during the year. Those whose hands were unstained got none, and were dispraced; those who had killed many took a donble alluwance (c. 66).

Their snothsayers, amongst other superstitions, practised rhabdomaney, amongst whom the Enarces

## SCYTIIIA．

（à $\nu \delta$ póqavot）are the most fianous．They got their art from Aphrodite，as they got their ailment． During the Scythian invasion of Asia，a portion of the conquerors plundered the temple of the Aphro－ dite Uramia in Ascalon，for which sacrilege they and their children were afficted with Sifincia vov̂aos，the numes of the sufferers being＇Evápees（i．105，106）． The nature of this N戶斤入eia voûaos lias yet to be satisfactorily explained．

The sacerdotal and regal relations are curious． When the king ails he calls his priests，who tell him that his ailment comes from some one having fore－ sworu himself in the greatest oath a Scythian can take．This is＂by the hearth of the king．＂Take it falsely，and the king will sicken．Upoo sickening， however，he sends for the offender，whom the priests have indicated．The charge is idenied．Other priests are sent for．If their vaticinations confirm the earlier ones，death and confiscation are the fate of the perjorer．Otherwise，a third set is called． It，these agree in the condemontion of the first，a load of faggots，drawn by ballecks，is brought in， the lying priests hare their hands bound behind them，the faggots are set a－light to，the beasts are goaded into a gallop，the flames catch the wiod，the men are burnt to death，and the bullocks scorched， singed，or burnt to death also．The sons of the of－ fending perjurer are killed，his ouaghters left muhurt．

Their oaths were made over a misture of wine and blood．The swearers to them punctured them－ selves，let their blood fall into a vat of wine，drank the mixture，and dipped in it their daggers，arrows， javelin，and oárapıs．

The ferocity exhibited in their burials was of the same kind．The tombs of the kings wero on the Gerrhus．Thither they were bronght to be buried， wherever they might die．They were entombed with sacrifices both of beasts and men，Hippo－ thusia，Anthropothysia，and Suttec－all these cha－ racterised the funeral rites of the Scsthians סккаиóta－ тol à $\nu \theta \rho \dot{\pi} \pi \omega \nu$ ．

Language．－The specimens of this fall into two divisions，the Proper and the Common Names．The lormer are the names of geographical localities and individuals．In one way or the other，they are nu－ merous；at least they appear so at first．But we ravely are sure that the fact itseif＇coincides with the first presumptions．The names of the rivers lave been noticed．Of those of the gods，none have been delinitely traced to any known language in re－ spect to their meaning．Neither have they been traced to any known mythology as Proper Names． Next come the names of certain kings and other historical individuals，none of which have given any very satisfictory place for the old scythim．

With the Cotmmon Names（and under the class of Cemmon Names we may place such Iroper Niunes as are capable of being translated）the results im－ prove，though only slightly．Of these terms the chief are the following：－
（i．）＇E乡auтaios＝Sucred H＇ayls＝＂1pau＂Oōut，the name of a well－head．［Soos．v．］（ii．）Ohípтата＝ $\alpha v \delta \rho o k т \dot{v} 0 t=$ Men－killers，a wame applied by the Scythians to the Amazons．Ilve oidp $=$ man， тaгà－kill（iv，110）．（iii）Temerinda $=$ M／ater Maris，applied to the Enxme．This is not from Ilcrodotus，but from Pliny（vi．7）．（iv．）Arimaspi
 eye．（Herod．iv，27）These will be considered under the head of Ethnolugy．

History：－The Herodetean view of the Scythians is incomplete without a notice of the historical portion of his account；not that the two parts are，by any means，on the same level in the way of trustwerthy infurmation．The geography and descriptions are from contomporary sources．The history is more or Iess traditional．Taking it，however，as we find it， it falls into two divisions：－1，The Invasion of Asia by the Scythians；and 2，The Invasion of ScytLia by Darius．

1．Invasion of Asia by the Scythians．－In the reigos of Cyasares king of Medias and of Sadyattes king of Lydia，the scythians invade Asia，bodily and directly．They had previously invaded the country of the Cimmerians，whom they had driven from their own districts on the Mseotis，and wha were thos thrown somthwards．The Scythians pressed the Cim－ merians，the Massagetae the Scythians．Chains of cause and effect of this kind are much loved by historians．It is only，however，in the obscure por－ tions of history that they can pass unchalleogel． The Cimmerians take Sardis during the last yeqs of the reign of Ardys（n．c．629．）They are ex－ pelled by Alyattes，his son．（Ilerod．i．15，16．） It scems that the Cimmerians were followed up by their ejectors；inasmuch as five years afterwards （a．c．624）the Scythians themselves are in Media； Cyaxares，who was engaged upon the siege of Nine－ veh（Ninus），being called back to oppose them．He is defeated；and the Scythians occupy Asia for 28 years，Cyaxares surviving their departnre．From Media they direct their coeurs towards Egypt；fron the iurasion of which they are diverted by Psam－ mitichus．Their attack upon the temple of the Venus Urania，in Ascalon，during their passage though Palestine，along with its mysterions sequelue， has been already noticed．The king who led them was named Madyes．（Her．i．105．）They were ejected B．c． 596.

There was a band of Seythians，however，in Media， in the reign of Croesns，B．c． 585 ，the occount of which is as follows．Cyaxares，still reigning，re－ ceives a company（ $\epsilon / \lambda \eta$ ）of scythians，as sup－ pliants，who escape（ $\hat{v} \epsilon \epsilon \bar{\xi} \boldsymbol{\eta} \lambda \theta \epsilon$ ）from Lydia into Media．He treats then well，nnd seads bis son to them to learn the use of the bow，along with the Scythian language，until he finds that their babits of hunting and robbing are intolerable．This，along with a particular act of atrocity，determines Cy－ axares to eject them．They fly back to Alyattes， who refuses to give them up．But Alyattes dies， and the quarrel is entailed upon his son，Croesus． The battle that it led to was fonght May 28，B．C． 585，when the eclipse predicted by Thales inter－ rupted it．

The Scythian invasion might easily be known in its general features to both the Greeks of Asis and the Jews；and，accordingly，we find sufficient allusions to am invasion of northern barbarians，hoth in the Scriptures and in the fragments of the early Greek poets，to justify us in treating it as a real fact，however destituto of confirmation some of the Herodotean details may have been．（See Mure＇s Critieal History，y＇c．vol．iii．p．133，seq．）Though further removed from lis time than

2．Invasion of Scythia by Parius．－It is，probabls， a more accurate piece of history．Darius invadrs Scythia for the sake of inflicting a chastisement for the previous invasion of Asia．This had been followed，aut by any settlement of the Scythians elsewhere，but by a return home．The strangu
story of the Servile War of Whips belongs to this period.

When the approach of Darins becomes threatening, the Gcloni, Budini, and Kauromatae join with the Scythians in resisting it; the Agathyrsi, Neuri, Androphagi, Melanchlaeni, and Tauri reserving themselves for the defence of their own territory if attacked (iv. 119). To the three constituents of the confederacy there are three kings, Scopasis, Ianthyrsus, and Taxacis, each with an alloted district to defend. This was done hy destroying the grass and tillage, driving off the flocks and herds, and corrupting (we can scarcely translate $\sigma v \gamma \chi \varrho \bar{v}$ by poisoning) the wells. The points whereon attack was anticipated were the frontiers of the Danube and the Don. These they lnid waste, having sent their own wives and children northwards. The first brunt of the war fell upon the Budini, whose Wioden City was bornt. Darius then moved southward and westward, pressing the other two divisions upon the countries of the Melanchlaeni, Neuri, and Agathyrsi. The latter warn the Medes against encroatching on the frontier. Idanthyrsus answers coigmatically to a defiance of Darius. Scopasis tampers with the Ionizns who have the custody of the bridge over the Danule. The Medes suffer from dearth, and determine to retreat across the Danube. The Scythians reach the passage before them, and require the Ionians to give it up. And now appears, for the first time, the great name of Miltiades, who is one of the commanders of the guard of the bridge. He advises that the Scythians should be conciliated, Darins weakened. A half-measure is adopted, by which the Scythians are taught to distrust the lonians, and the Medes cscape into Thrace -so ending the Scythian invasion of Darius. (Herod.
iv. 120-142.)

Criticism of the Herodotean Accounts. - The notices of Herodotus upon the Scythae, though foll, are excnrsive rather than systematic. Part of their history appears as Lydian, part as Scythian Proper. There is much legend in his accounts ; bnt the chief obscurities are in the geography. Even here the details are irregular. One notice arises out of the name Scythae, another out of the geography of their rivers, a third out of the sketch of Tauris. [See Tankes and Tauroscythae.] In this we hear that Scythia is bounded first by the Agathyrsi, next by the Neuri, then by the Androphagi, and lastly by the Melanchlaeni. The area is fourcornered ; the longest sides being the prolongations along the coast and towards the interior. From the Ister to the Borysthenes is 10 days: 10 days more to the Maeotis ; from the coast to the Melanchlaeni, 20 days ; -200 stadia to each day's journey. If this measurement be exact, it would bring Tuda, Tambov, Riazan, Scc, within the Scythian area,which is going too far. The days' journeys inland were probably shorter than those along the coast.

The Agathỵrsi were in Transyleania, on the Maros. The evidence, or want of evidence, as far as the text of Herodotus goes, is the same as it is with the Neuri. Their frontagers were known as Scythae Aruteres, i.e., the generic name was with then specific. Hence any Scythians whatever with a specific name must have been contrasted with them; and this seems to have been the case with the Agathyrsi. [Henns, p. 1097.] Assuming, however, the Agathyrsi to have been Scythian, and to have lain on the Maros, we carry the Herodutean Suthae as far west as the Theiss; nor can we cx-
clude them from any part of Wallachia nud Mot. davia. Yct these are only known to lierodotus as the country of the Sioyniss. The fromtier, then, between the Scythae and Getae is dificicuit to draw. Herodotus has no Getae, eo nomine, north of the Danube: yet such there must have lieen. Upon the whole, we may look upon the Darubian l'rincipalities as a tract scarcely known to Herodotus, and make it Scythian, or Getic, or mised, according to the evidence of other writers, as applicable at the time under consideration. It was probably Getic in the East, Sarmatian in the Wert, and Scythian in respect to certain districts occupied by intrasive populations.

Thucydides mentions the Getae and Scythians but once (ii. 96 ), and that together. The great alliance that Sitalces, king of Thrace, effects against Perdiccas of Macedon includes the Getae beyond Dlount Haemus, and, in the direction of the Eusine sea, the Getae who were conterminous ( ${ }^{5} \mu \mathrm{Lopot}$ ) with the Scythiaos, and whose armour was Scythian ( $\delta \mu \dot{\sigma \sigma \kappa \epsilon \nu o u) . ~ T h e y ~ w e r e ~ e a c h ~ a r c h e r s ~ a n d ~ h o r s e-~}$ men (imпото६órat); whereas the Dii and the mountaineers of Rhodope wore daggers. According to Ovid (Trist. v. 7. 19), the occupants of the level cuuntry do so too:-

## " Dextera non segnis fixo dare vulnera cultro, Quem vinctum lateri bartara ommis habet."

The Scythians of the Macedonian Period. - Passing oser the notices of Xenophon, which apply to Thrace Proper rather than to the parts north of Mount Haemus, and which tell ns nothing concerning the countries beyond the Daoube,passing, also, over the notices of a war in which Philip king of Macedon was engaged against Atheas, and in which he crossed Mount Haemus into the country of the Trilalli, where he received a wound, - we come to the passage of the Danube by Alexander. In the face of an enemy, and withont a bridge, did the future conqueror of Persia cross the river, defeat the Getae on its northern bank, destroy a town, and return. (Arrian, Anab. i. 2-7.) This was an invasion of Scythia in a geographical sense only ; still it was a passage of the Dunube. The fictae of Alexander may have been descendants of the Sigynnes of Herodotus. They were not, eo nomine, Scythians.

When Alexander was on the Danube the famous embassy of the Galatae reached him. They had heard of his fame, and came to visit him. They were men of enormous stature, and feared only that the heavens should fall. This disappointed Alexander, who expected that they would fear him. Duch has been written concerning the embassy as if it came from Gaul. Yet this is by no means necessary. Wherever there is a Halicz or Galacz in modern geography, there may have been a Galat-ian locality in ancient ; just as, wherever there is a Kerman or Carman-in, there may have been a German one, and that without any connection with the Galli or Germani of the West. The roots G.l-t and $K$-ron-n, are simply significant gengraphical terms in the Sarmatian and Turk tongues - tongues to which the Getic and Scythian may most probably be referred.

Such is the present writer's opinion respecting the origin of the statements that carry certain Galatae as far as the Lower Danube, and make the Basternae, and even the occupants of the Tanais, Germans - not to mention the Caramamians of Asia Dinor and Carmamians of Persis. In the present
instance, however, the statement of Strabo is very specific. It is to the effect that the ambassadors to Alexander were Ké $\lambda \tau 0 九 \pi \epsilon \rho \grave{\imath} \tau \grave{\nu}$ 'A $8 \rho l a \nu$ (vii. p. 301 ), and that Ptolemy was the authority. Nevertheless, P'tolemy may have written Гaiditat, and such (ialatae may have been the Galatae of the Olibian luseription. [Sce infra and somst.]

The nest Macedonian who crossed the Danube was Iysimachus, who crossed it only to re-crons it in his retreat, and whon owed his life to the generosity of a Getic prince Dromichaetes. This was about 13. t: 312 .

Our next authorities (fragmentary and insufficient) for the descendants of the Herodotean Scythians are the occupants of the Greek towns of the Euxine. Even those to the sooth of the Danube, Callatis, Apollonis, Sc., had some Scythiass in the neighhood. sometimes as enernies, sometimes as protec-tors--sometines as protectors against other barbarians, sometimes as protectors of Greeks against Grecks, as was the case during the Scythian and Thracian wars of Lysimachus. The chief frontagers, Jowever, were Getae. Berween Olbia, to the north of the Danube ( $=$ Olbiapolis of Herolotus), and the native tribes of its neighbourhood, the relations are illustrated by the inscription already noticed. (Bickh, Inscr. Graec. no. 2058.) It records a vote of public gratitude to Protogenes, and indicates the troubles in which he helped his fellow-citizens. The chief of those arose from the pressure of the barbarians around, by name Saudaratae, Thi-ametae, Siciri [see Scini], Galatae, and Scythae. The date of this inscription is uncertain; but we may see the import of the observations on the word Galatae when we find the assuustion that they were Gaals of Gallia used as an instrument of criticism:-" The date of the above inscription is not speeifed; the terror inspired by the Ganls, even to other barbarians, seens to suit the second century ib. c. better than it stuits a later period." (Grote, Ilist. of Grefce, vol. xii. p. 644, note.) What, however, if the Galatae of Hallochia were as Jittle Galli as the Cermanians of l'ersia are Germans, or as Galocz is the same as Calais? The present writer wholly disconnects them, and ignores the whole system of hypothetical migrations by which the ideutity is supported.

A second Olbia in respect to its Jelleno-Scythic relations, was Busporus, or Panticapaeun, a (ircek settlement which listed from n.e. 4 so till the reign of Mithridates. [Panticapasum.]
From Bosporas there was a great trade with Athens in corn, hides, and Scythiun slaves,-Scythes, ats the name of a slave, orcorring as early th the tome of Theognis, and earlier in the Athenian drama than those of Davus and Geta (Dacian and (intic) which helong to the New Comedy,-Scythes and Scythaena being foond in the old.

The political relations were those of independent municijalities; sometimes sovereign, sometimes protected. The archons of Bosporus paid tribute to the serthian princes of their neighbourhood, when they were powerful and united; touk it, when the Scythians were weak and disanited. Under this latter catemony cante the detads of the division of the Maeotae, viz., Sondi. Toranti, Dandarii, Thetes, \&ic. Of these, Parysules 1. (a Scevthic rather tban a (ireck :anne) was king, being only archun of his mative town. In the ewal wars. ton, of Busporns, the Sisthians took a part; nor were there wating exauithes of Scythian uanners eren in the case of the

Panticapacan potentates. Eomelus lost bis life by heing thrown out of a four-wheeled wagon-and-four with a tent on it.

Scythans of the Mitimidatic Penion, etc. - The Neythians pressed on Parysades IV., who ealled in Mithridates, who was conquered by Rome. The name now becomes of rare occurrence, subardinate to that of the Surmatae, Daci, Thracians, \&c. In fact, iristeal of being the nearest neighboora to Greece, the sirythac were now the most distant encmies of Rome.

In the confederacy of the Dacian Boerebistes, it the reign of Augustus, there were Scythian elements. So there were in the wars against the Thracian Phescoporis and the Rozolani. So there were in the war conducted by J. Plautins in the reign of Viespasian, as shown by the following inscription: meghus basternarcm et khoxolanOrva fllios dacolem . . . EREPTOS hemisit . . . scythanca qunque rege a chersonest qua EST ULTRA BORYSTHENEA OBSIDIONE SEMMOTO. (Grut. p. 4.53 ; Bückh, vol. ii. pt. 1. p. 82 ; Zeuss, s. r. Skiythen.)

Though the history of the Scythians, eo nomine, he frammentary, the history of more than one scythian population under a change of name is both prominent and important. In the article Huswr reasons are given for beliering that the descendants of the Herodotean Agathyrsi, of Scythian blood, were no unimportant element in the Dacias nationality.

After the foundation of Constantinople the Scythian nations appear with specific histories and names, Hun, Avar, \&ic.

The continuity of the listory of the name of the Herodotean Scythiaus within the Herodotean area is of great importance; a: is the explanation of nators like Galatse and Germani; as also is the considerstion of the sources whence the nomenclatore and information of the different autborities is derived. It is important, hecause, when we find ene name disappearing from bistors, and another appearing, there is (according to, at least, the current criticism) a presumption in favour of a change of population. Sometimes this presomption is heightened into what is called a proof; yet the presumption itself is unreal. For one real change of name referrible to an actual change of population there are ten where the change has been merely one in respect to the soarces whence the infornation was derived, and the channels throngla which it cane. This is what oceurs when the s:ture country of Deutsclland is called Giermany by an Englishman, Allemagne in France, Lamagnat in Italy. This we know to be nominal. We ought at least to ask whether it may not be so in ancient hist:ry - and that not once or twice, but atwoys-before we assume bypothetical movements and migrations.

Now in the case of Scythia we can see our way to great nominal and but alight real changes. We see the sources of information changed from Greek to Latin, and the channels from Getic and Macedonian to Dacian.

If so, the occupants of Fungary, the Principalities, and South-western hussia under the Chesars may be the deacendants of the occopants of the same districts in the time of Herodotus. That there are some differences is not only likely but admitted,-diffurences in the way of admixture of blood, modification of nationality, changes of frontier, differences of the kind that time ulways effects, even in a stationay condition of nations. It is only denied that

## SCYTHIA.

any wholesale change can be proved, or even reasenably supposed. Who can be shown to have eliminated noy definite Scythian population from any definite Scythiao occupancy? With the Greeks and Romaos the negative evidence is nearly conclasive to the fact that no such elimination ever took place. That the Barbarians might have displaced each other is admitted; but there is no trustworthy evidence to their having done so in any single instance. All opinions in favour of such changes rest upon either the loose statements of insufficiently-informed writers, or the sapposed necessity of accounting for the appearance and change of certain names by means of certain appearance and changes of population.

The bearings of this will appear in the notice of the Ëthnology of Scythia. They appear also under Hexxi.

Of the Sacae, co noniae, the histery is obscure. In one sense, jodeed, it is a nonentity. There is no classical historian of the Sacae. How far the ethnologist ean infer them is a question which will be treated in the sequel.

Of the history of the populations akin to the Sacae, the details are important; hut then it is a history of the Massagetae, Parthi, \&cc., a histery full of critical prelinicaries aod poiuts of inference rather than testimony.

The Scythia of all the authors between Herodotus and Ptolemy means merely the country of the Scythae, the Scythae heing such northern nations as, without being, co nomine, Sarmatian, were Hamasolii and Hippemolgi; their hahits of milking their mares and travelling in tented wagons being their most genuiae characteristic. These it was which determined the views of even Strabo, whose esteasiou of Germania and Galatia (already nuticed) left him no room for a Scythia or even a Sarnatia; Sarmatia, which is to Ptolemy as Germania was to Strabo: for the Sarmatia of Ptolemy leaves no room in Europe for a Scythia; indeed, it cuts deeply inte Asiatic Scythia, the only
Scythli of Ptolemis:-The Scythia of Ptolemy is exciusively Asiatic, falling inte, 1. The Scythia within the Inans. 2. The Scythia beyond the Imaus.

This is a gengraphical division, not an ethnological ove. Scythae Alauni are especially recognised as a population of European Sarmatia.

As Ptolemy's Sarmatia seems to have been formed out of an extension of the area of the Herodotean suuromatae, his Scythia seems to have grown out of the eastern Scythae of the Herodotean Scythia, i.e. the Scythae of Orenburg. It did not grow out of the country of the Sacae, inasmuch as they are nentioued separately; eren as the Jazyges of the Theiss were separated from the Sarmatians. The :ootiouator, however, of the Herodotean accombt nust make the Sacae Scythians. They may be tisposed of first.

The Sacae of Ptolemy were bounded by the jogdiaus on the west, the Scythians on the north, and the Seres on the east. Tbey were nomads, sithout towns, and resident in woods and caves. The moantain-range of the Comedi ( $\bar{\eta} \mathrm{K} \omega \mu \boldsymbol{\eta} \delta \bar{\omega} \nu$ ipeivh) was in their coontry ; so was the Stone fower (Aíowos Mipyos). The populations were: 1, 2. The Caratae and Comari along the Jaxartes. 3. The Comedae, on the Comedian mountain, 4 . lise Massagetae along the range of the Ascatancas 'локатáyкas). 5. In the interjacent country, the

Grynaei Scythae; and, 6, the Toornae; south of whem, along the Invaus, 7, the Byltae. (I'tel vi. 13.)

Scythia intra Imaijr.-Beunded on the s. and E. by Sugdiana, Margiana, and the Kacae ; on the W. by the Caspian and Sarmatin Asiatica ; on the N. by a terra incognita; and on the 1. by the northern prelongation of the Imaus. (Ptol, vi. 14.)

Rivers.- The lihymmus, the Daix, the Jasartes, the Iastus, and the Polytimetus.

Mountuins.- The eastern part of the Montes Hyperborei, the Montes Alani (observe the reappearaace of this name), the Montes Nibymmici, the Jons Nornssus, the MMI. Aspisii, Tapyri, Syebi, Anarei,all W, of the Imaus.

Populations,-The Alaai Scythae (on the confines of the terris inengnita), the Suabeni, the Alunorsi, S. of whom the Saetiami, and Massaei, and Syebi; and (aloog the Imaras) the Tectosaces and (on the eastern head-waters of the Fina) the Khobosci, S. of whom the Asmani ; and then the Paniardi, S of whom, along the river, the district called Canodipsas, S. of which the Corasi; then the Orgasi, after whom, as far as the sea (i.e. the Caspian, in this chapter called Hyrcanian), the Erymmi, with the Asiotae on the E. of them, succeeded by the Aorsi ; after whom the Jaxartae, a great nation along the river of the same name ; then S. of the Saetiani, the Mologeni and Samoitae, as far as the M131. Rhymmici. Then, S. of the Massnei and MM. Alani, the Zaratae and Sasones ; and further W . and as far as the MMI. Rhymmici, the Tybiacae, succeeded by the Tabieni, S. of the Zaratae, and the Iastae ani Machnetegi along the Mons Norossus; S. of whom the Norosbes and Norossi, and the Cachagae Scythae along the Jasartae. On the W. of the MM. Aspisii, the Aspisii Scythae; on the E. the Galactophagi Scythae; E. of the MMS. Tapuri and the Suebi, the Tapuret ; and above the MNI. Anarei and the Mons Ascatancas, the Scythae Anarei, and the Ascatancae and Aliacae along the Jasartes, S . of whom the Namastae ; then the Sagaraucae, and, along the Osus, the Ihibii, with their town Davaba.

Scythia extea lafaum was bounded by Scythia intra Inaum, the Sacae, the Terrat In:ugnita, and the Seres. It contained the western part of NM. Ausacii, Casii and Emodi, with the source of the river Oechardus. (Ptol, vi. 15:)

Jts Populations were the Abii Scythae, the Ilippophagi Scythac, the Chatae Scythae, the Charaunaei Scythae ; the designation Sicythae being applied to each.

Districts.-The Auxacitis, the Casia (it Karia

Towns.-Ausacia, Issedon, Scythica, Chaurana, S.eta.

The remarks that applicel to the Sarmatia Asiatica of Ptolemy apply here. Few names cas be safely identified. Neither is it safe to say through what languages the information came. Some words suggest a Persian, some a Turk source, sume are Mongol. Then the geography is obscure. That the range of Pamer was unduly prolonged northwards is evident [Imaus]; this being an error of the geograpber. The coarses, however. of the Oxus and Jaxartes may themselves have changed.

The prolongation of the Pamer range being cartied in a northero and nerth-eastern direction, so as to include not ouly the drainares of the $O$ sus and Jaxartes, but that of the Balkuzh Lake as we'l, gnes us the line of the Iuraus ; the terra meogenta to the
N. being supposed to begin with the watershed of the Irtish, Obi, and other rivers falling itoto the Aretic Occan. Within the fimits thus describel we may place the Nor-osbi and Nor-ossi, on the eastern edge, i. e. in the parts where at the present moment the lakes distinguished by the name Nor ocenr. It should be added, however, that the syllable is Eenerally fioal, as in Koko-nor, \&c. Still it is a prominent element in componnd names, and indicates Mongol occupancy. The Byitae may be placed in Bulti-stan, i. e. the country of the Bulti= Little Tibet, the gloss being Persian.

In Ascatancas (the Greek spelling is the more convenient A $\sigma \kappa \alpha-\tau \alpha \gamma \kappa$-as), we have the Turkish - tagh $=$ mountrin just as it actually occurs in numberless compounds.

K:rait is a name of common application, chiefly to members of the Mongol family.

Mass-agetae is a term full of difficuly. Can it have arisen out of tbe common name Mus-tag?

In Scythin extra Imaum, the Casia and Achassa ( $\chi \hat{\omega} \rho a u$ ) may be made noe and identified with the Cesii of Pliny. The most reasonable explanations of these names is to be found in the suguestion of Major Cuoninglam's valuable work on Ladak (p. 4), where the Achassa Regio=Ladakik, and the Chatae, and Chauronae Scythae $=$ Chang-thang and Kher respectively.

Rongbly speaking, we may say that the country of the Sacae was formed by an irregular tract of land on the bead-waters of the Oxus aod the watershed between it and the Jaxartes, a tract which included a portion of the drainage of the Indus. It is only a portion of this that conld give the recognised conditions of Scythian life, viz. steppes and pasturages. These might be founded on the great table land of Pomer, but not in the momntain districts. These, however, were necessary for "residences in woods and caves "; at the same time, the population that occupied thean might be pastoral rather than agricultural. Still they would not be of the Scythian type. Nor is it likely that the Sacae of Ptolemy were so. They were not, indeed, the Sacae of Herodotus, except in part, i. e. on tho desert of the Persian frontier. They were rather the mountaineers of Kufferistan, Wakhan, Shugnan, Roshan, Astor, Hunz-Nagor, and Little Tibet, partly P'ersian, partly Bhot (or Tibetan), in respect to their ethnology.

The Scytbians heyond the limaus.-These must be divided betweeo Laulakh, Tibet, Chituese Tartary, and Mongolia in respect to their kengraphy. Plyysically they come within the conditions of a Scythian nccupancy; except where they are true mountaineers. Ethnologically they may be distributed between the Mungol, Bhot, and Turk families - the Turks being those of Chinese Tartary.

The Turcoman districts of the Oxus, Khiva, the Kirghiz country, Ferghana, Tashkend, with the parts aboat the Balloash, give us the Scythia whin the hoaus. It coincides chiefly with Indepemedent Tartary, with the addition of a small porHom of Mongolia and southarn Siberia. Its conditions are generally Seythian. In the upper part, however, of the Jowartes, the districts are agricultural at present; nine-tenths of this ares is Turk, jart of the population being Nomades, part industraal and agricutural.

The Sotrma or the Byzintint AuthotsThis means nut only Itunus, Avars, Alans, and Sirmutians, but cven Germans, Githe and Vindals.

## SCYTHIA.

It is used, however, but rarely. It really existed only in books of geography. Every division of tho Scythian name was known under its specific designation.

Ethnology.-If uny name of ratiqnity be an ethnological, rather thap a geographical, term, that name is Seythia. Ptolemy alone applies it to an area, irrespective of the races of its ocenpants. With every earlier writer it means a number of papulstions connected by certain ethnological characteristics. These were physical and moral-physical, as when Hippocrates describes the Scythian physingnomy; moral, as when their nomadic habits, is Hamaxubii and Hippemolgi, are put forward as dis. tinctive. Of language as a test less notice is taken; though (by Herodotus at least) it is by no means overlooked. The division between Scythian and non-Scythian is almays kept in view by him. Of the non-Scythic populations, the Sauromatae were one; hence tbe etholology of Scythia involves that of Sarmatia, both being here treated together.

In respect to them, there is no little diserepaney of opinion amongst modern investigators. The fint question respecting them, however, has beeu answered unanimonsly.

Are they represented by any of the existing divisions of mankind, or are they estinct? It is not likely that such vast families as each is admitted to have been has died out. Assuming, then, the present existence of the congeners of both the Sarmatae and the Scytiae, in what family or class are they to be found? The Scythae were of the Turk, the Sarmatae of the Slavono-Lithuanic stock.

The evideoce of this, along with an exposition of the chief differences of opinion, will now be given, Scythia being dealt with first. Premising that Turk means all the populations whose language is akin to that of the Ottomans of Constantioople, and that it comprises the Turcomans, the Independent Tartars, the Uzbeks, the Turks of Chinese Tartary, and even the Yakuts of the Lena, along with several other tribes of less importance, we may examine the i priori probabilities of the Seythae having been, in this extended sense, Turks.

The situs of the nations of South-western Russia, \&.c., at the beginniog of the proper historical period, is a presumption in farour of their being so. Of these the best to begin with are the Cumanians (12th century) of Volhynia. That they were Turk we know from special statements, and from sampler of their language compared with that of the Kirghis of Independent Turtary. There is no proof of thicir being new comers, however mach the doctrine of their recent emigration may have been gratuitously assumed. The Uzes were what the Cumanians were; and before the Uzes, the Patzinaks (10th century) of Bessarabir and the Dusubian Principalities were what the Uzes were. Earlier than tho Patzinaks, the Chazars ruled in Kherson and Taurida ( 7 th and 8 th centuries) like the Patzioaks, in the same category witb definitely known Cumanians and Utes. These fonr papulations aro all described by writers who knew the true Turks accurately, and, knowing them, may be relied on. This knowledge, however, dates only from tho reign of Justinian [Tuscas]. From the reign, then, of Justivian to the loth century (the date of the break-uI of the Cumanians), the Herodotean Scythia was Turk-Turk wathout evidence of the occupation beine recent.

I ie Avars precede the Chazars, the Iluns the

Avars, the Alani the Huns. [Hexni; Avares]. The migratiens that make the latter, at least, recent occnpants being entirely hypothetical. The evidence of the Huns being in the same category as the Avars, and the Avars being Turk, is cunclusive. The same applies to the Alani - a population which brings ns to the period of the later classics.
The conditions of a population which shculd, at ene and the same time, front Persia and send an offset round the Caspian into Southern Russia, \&c., are best satisfied by the present exclusively Turk area of Independent Tartary.
Passing from the presumptuous to the special evidence, we find that the few facts of which we are in possessien all point in the same direction.
Physical Appearance. - This is that of the Kirghiz and U'zbeks exactly, though not that of the Ottenans of Rumelia, who are of mixed hlood. Allowing for the change effected by Mabomet, the same remark applies to their
Marners, which are those of the Kirghiz and Turcomans.
Language.-The Scythian glosses have not been satisfactorily explainel, i. e. Temerinda, Arimaspi, and Exampaeus have yet to receive a derivation that any one but the inventor of it will admit. The ourr-, however, in Oior pata is exactly the er, aer $r_{1}=m u m$, \&c., a term foum through all the Turk dialects. It should be ulded, however, that it is Latin and Keltic as well (vir, feerr, gwr). Still it is Turk, and that unequivocally.
The evidence, tben, of the Scythae being Turk consists in a series of small particulars agreeing with the $\dot{a}$ priori probabilities rather thao in any definite point of evidence. Ald to this the fact that no other class gives us the same result with an equally small ameunt of liypothesis in the way of migration and change. This will be seen in a review of the opposite doctrines, all of which imply an umecessary amount of unpriven changes.
The Mongol Hypothesis.-This is Niebuhr's, developed in lis Researches into the History of the Scythians, fcc.; and aloo Neumann's, in his Ifellenen im Skythenlande. It acconnts for the mansuers aod physingnomy, as well as the present doctrine; but net for anything else. It violates the rule against the unnecessary multiplication of caases, by bringing from a distant area, like Mongolia, what lies nearer, i.e. in Tartary. With Niebuhr the doctrine of fre-h migrations to account for the Turks of the Byzantine period, and of the extirpation of the older Scythians, takes its maximum development, the least allowance being made for changes of name. "This" (the time of Lysimachus) "is the last mention of the Scythian nation in the region of the Ister; and, at this time, there could only be a remnant of it in Budzack" (p, 63).
The Fim Hypothesis. - This is got at by making the Scythians what the Huns were, and the Huns what the Magyars were-the Magyars being Finn. It arises out of a wrong notion of the name, Hungary, and fails te account for the difference between the Scythians and the nations to their nerth.
The Circassion Hypathesis.-This assmmes an exteision of the more limited area of the northern occupaats of Caucasus in the direction of Russia and Hungary. Such an extension is, in itself, probable. It fails, however, to explain any one fact in the descriptions of Scytbia, though valid for some of the older populations.
The Indo-European Iypothesis. - This dectrine takes many forms, and rests on wanny, bases. The vol. II.
-get- in werds like Massa-get-ae, \&c., is supposed to $=G o t h=$ Germann. Then there are certuin manncs which are Scythian and I'ersian, the Persian being Indo-European. In the extreme form of this hypothesis the Sucae $=$ Saxons, and the Yuche of the Chinese authors $=$ Goths.

If the Scythians were intrulers from Independent Tartary, whom did they di-place? Not the Saronatians, who wire themselves intruders. Tho earlier occupants were in part congeuers of tho Northern Cawrasians. They were chiefly, however, Ligrians or Finns; conyeners of the Mortvins, Tsheremess, and Tsliuwa-hes of Penza, Saratov, Kazan, \&c.: Dacia, Thrace, and Sarmatia being the original occupancies of the Sarmatae.

If :o, the ethnographical history of the IIerodotean Scythia runs thus:-there was an oricinal occupancy of Ugrians ; there was an intrusion from the NE. by the Scythians of Iodependent Tartary, and there was intrision from the SW. by the Sarmatians of Dacia. The duration of the Scythian or Tuk ocenpancy was from the times anterior to Herolotus to the extinction of the Curanlians in the 1th century. Of internal changes there was plenty; but of any secund migration fiom Asia (with the exception of that of the Asars) there is no evidence.

Such is the listory of the Scythae.
The Sacae were, perhaps, less exclusively Turk, though Turk in the main. Some of them were, prubably, Mongols. The Sacae Amyrgii may have been Ugrians ; the researches of Norris upon the second of the arrow-headed alplabets baving led him to the opinion that there was at least one invasion of Persia aralogous to the Magyar invasion of Hungary, i. e. effected ly members of the Leqrian stock, probably frun Orenibarg or Kozan. With them the ront $m-r d=$ man. History gives us no time when the Turks of the Persiun frontier, tbe Sicae, were not pressing sontliwarls. Sacastene ( $=$ Segestun) was one of thcir occupancies ; Carmania probably another. The Pathiams wele of tba Scyth an stock ; and it is difficult to believe that, word for worl, Persia is not the same as Parthia. The history, lowever, of the Turk stock is one thing; the history of the Sicythian name another. It is submitted, however, that the two should be connected. This being done, the doctrine of the recent diffusion of the Turks is a doctrine that applies to the name only. There were Turk invasions of Hungary, Turk invasions of Persia, Turk invasions of China, Assyria, Asia Minor, and even nurth-eastern Africa, from the earliest period of history. And there were Sarmatian invasions in the opposite direction, invasions which hare ended in making Seythia Slavonic, and which (in the mind of the present writer) began by making parts of Asia Median. Lest this be taken for an exaygeration of the Turk influence in the world's history, let it be remembered that it is only a question of date, and that the present view ouly claims for the Turk conquests the place in the antehistorical that they are known to have had in the historical peiod. With the exception of the Mongol invasions of the 13th century and the Magyar occupancy of Hungary, every conqurst in Loulbern Asia and Europe, from the North, has been effected by menbers of the stock under natice. [Sie Suishatia; Tenedi ; Fensi ; Stones; Turcae.] [R. G. L.]

 an Asiatic people dwelling on the burders of Armenia, betreen the rivers Harpasus on the $E$. and my Millorosoft $\ddagger$

Asparus on the W., and bounded by the mountains of the Cbalybes on the S. The Ten Thousand Greeks, in their retreat under Xenophon, were compelled to march four days throuch their territory. Rennell (Geogr. of Herod. p. 243) seeks them in the province of Kars (comp. Ritter, Erdkunde, vol. i. p. 7(4).
[T. H. D.]

## SCYTHO'POLIS. [BETHSNX]. <br> SCYTHOTAURE. [TavRoscymhae.]

SEBAGE'NA ( $\boldsymbol{S}_{6} \in \dot{\alpha} \gamma \eta v a$, or, as others read, 'E6cirnva), a town in Cappadocia, of uncertain site. (Ptol. r. 6. § 15.)
[L. S.]
SEBASTE ( $\Sigma \in 5 \alpha a \tau \eta$ ). I. A town in a small island off the coast of Cilicia, buile by Archelans king of Cappadocia, to whom the Romans had given Cilicia Aspera, (Strab. xiv. p. 671.) It seems to have received its name Sebaste in honour of Augustus; for, until his time, both the island and the town were called Eleusa, Elaeusa, or Elaeussa (Joseph. Ant. xvi. 4. § 6, Bell. i. 23. § 4 ; comp. Ptol. v. 8. § 4 ; llierocl. p. 704 : Stadiasm. Mar. Magn. $\S 172$, where it is called 'Eleous ; Steph. B.
 Pliny (v. 22) still applies to the town, though he erroneously places it in the interior of Caria. Stephanus, in one of the passages above referred to, calls Sebaste or Elaeussa an island, and in the other a peninsula, which may be accounted for by the fact that the narrow channel between the island and the mainland was at an early period filled up with sand, as it is at the present,- for the place no longer exists as an island. Sebaste was sitnated between Coryeus and the mouth of the river Lamus, from which it was only a few miles distant. Some interesting remains of the town of Sebaste still exist on the peninsula near Ay/ash, consisting of a temple of the composite order, which appears to have been overthrowo by an earthquake, a theatre, and three aqueducts, one of which conveyed water into the town from a coosiderable distance. (Comp. Beaufort. Karamania, p. 250, toll.; Leake, Asia Minor. p. 213.)
2. A town in Phrygia Pacatiana, between Alydda and Eumenia, is noticed only by Hierocles, (p. 667) and in the Acts of the Council of Constantinople (iii. p. 6\%t); but its site has been identified with that of the modern Segikler, where inseriptions and coins of the town have been found. The ancient name of the place is still preserved in that of the neighbouring stream, Sebesli Su. (Comp. Hanilton's Reseurches, i. F. 121, \&c.; Arundell, Discoveries, i. P. 136, who erroneonsly takes the remains at Segikler for those of the ancient Eucarpia.)
3. [Cabika, Vol. I. p. 462. ]

SEBASTE [SAMABLL]
SEBASTEIA ( $\Sigma$ ebáareia), a town in the sonth of Pontus, on the north bank of the Upper Halys. As it was near the frontier, lliny (vi. 3) regards it as not belonging to l'ontus, but to Colopene in Cappadocia. (Ptol. v. 6. § 10 ; Ilierocl. P. 702 ; It. Ant. ITP. 204, 205.) The town existed as a sma!l place before the domanions of the Ronaans in those parts, but its ancient name is unknown. Pompey increased the town, and gave it the name of Megalopolis (Strab, xii. p. 560). The name Sibnstia must have been given to it before the time of Dliny, he being the first to use it. During the imperial period it appears to have risen to considerable importance, so that in the later division of the Empire it was made the capital of Armenia Mlinor. The identity of Scbastia with the modern Siwas in established partly by the resemblance of the wayres and iartly by the a"recpent
of the site of Siveas with the description of Gregory of Nyssa, who states that the town was situated in the valley of the Halys. A small stream, moreover, flowed through the town, and fell into a neighbouring lake, which communicsted with the Halys (Orat.I.in XL. Mart. p. 501, Orat. I/. p. 510; comp. Basil. M. Epist. viii.). In the time of the Byzantio empire Sebasteia is mentioned as a large and flourishing twwn of Cappadocia (Nicet. Ann. p. 76; Ducas, p. 31); while stephanus 13. (s. v.) and some ecelesiastical writers reter it to Armenia. (Sozom. Hist. Ecel. jv. 24 ; Theodoret. Hist. Ecel. ii. 24.) In the ltizerary its name appears in the furm of Sevastia, and in Abulteda it is actually written Simas. The emperor Justinian restored its decayed walls. (Procop. de Aed, iii. 4.) The town of Sirces is still large and populous, and in its vicinity some, though not very important, renains of antiquity are seen. (Fontanier, Loyages en Orient. i. p. 179 , £lll.) [L.S.] SEBASTO'PULIS ( $\Sigma$ faacóno入ts.) 1. A town io Pontus Cappudocicus (Ytol. r, 6. § 7 ), which, accordiog to the Antonine 1tinerary (p. 205), was situated on a route leading from Tivvium to Sebastia, and was connected by a road with Caesareia (p, 214). Pliny (vi. 3) places it in the district of Colopene, and agrees wirl other authorities in describing it as a smaill town. (Hierucl. p. 703; Norell. 31; Gregur. Nyssen. in Mucrin. p. 202.) The site of this plane is still uncertain, some identifying the town with Cabora, which is impossible, unless we assume Sebastopolis to be the same town as Sebaste, and others believing that it occupied the site of the mudern Turchal or Turkhal.
2. A town in Podtus, of unknown site (Ptol, v. 6. §9), thongh, from the place it occupies in the list of Ptolcmy, it must have been situated in the somith of Themiscyra.
3. About Sebastopolis on the east coast of the Eusine see Drosctrins, and about that in Myais, see Myrina.
[L. S.]
SEBASIUPOLIS (Hierocl. p. 638), a place in the interior of Thrace, near Platippopolis. [J. R.] SEBATCDI, a town situated either in the southwestern part of Noricum, or in the east of Rhaetia, on the road from Aemona to Veldidel.a (It. Ant. p. 280 ), seems to be the modera Sachbs. (Comp. Muchar, Norikum, i. p. 250.)
[L. S.]
 a tuwa of the Castellani in Hispania Tarraconeusis. There is a coin of it in SestiDi (p. 164). [T.H.D.]

 1. 802: Eth. $\sum \in B_{\epsilon v v i r n s), ~ t h e ~ c h i e f ~ t o w n ~ o f ~ t h e ~}^{\text {a }}$ Sebennytic nome in the Egrptian Delta, situated on the Scbemutic arm of the Nile, nearly dne E. of Sais, in lat. $31^{\circ} \mathrm{N}$. The modern hamlet of Semenhoul, where some ruins bave been discovered, occupies a portion of its site. Sebennytus was anciently a place of some importance, and standing on a peainsula, between a lake ( $\lambda i \mu \nu \eta$ ミebevvutikn: Burlos) and the Nile, was favourably seated for trade and intercuarse with Lower Aegypt and Mem. phis. The neglect of the canals, however, and the elevation of the alluvial soil lave Dearly obliterated its site. (Clampullion, l'Eyypte, vol. ii. p. 191 seq.)
[W. B. D.]
SEBE'TIIUS (Fiume della Maddalena), 3 smal river of Campania, flowing into the Bry of Noples immediately to the E., of the eity of Neapolis. It i alluded to by several ancient writers in connection with that city (shat sizv, i. 2. 263; Colum. x. 134

Vib．Seqnest．p．18），and is generally considered to be the same with the stream which now falls into the sea a little to the E．of Naples，and is commonly called the Fiume della Uaddalena．This rivalet， which rises in a fountain or basin called La Bolla， abont 5 miles from Naples，is now a rery trifting stream，bnt may have been more considerable in an－ cient times．The expressions of puets，however，are not to be taken literally，and none of the geogra－ phers deem the Sebethus worthy of mention．Virgil， however，alludes to a nymph Sebethis，and an inscrip－ tion attests the local worsthip of the river－god，who had a chapel（aedicula）erected to him at Neapolis． （Grater，Inser．p．94．9．）
［E．H．B．］
SEBI＇NUS LACUS（Lago d Iseo），a large lake in the N．of Italy，at the foot of the Alps，formed by the waters of the river Ollius（Oglio），which after flowing through the land of the Camuni（the Val Camonica），are arrested at their exit from the mountains and form the extensive lake in question． It is not less than 18 miles in length by 2 or 3 in breadth，so that it is joferior in magnitude only to the three great lakes of Northero Italy；but its name is mentioned only by Pliny（ii．103．s．106，iii． 19. s．23），and seems to have been little known in antiquity，as indeed is the case with the Lago od Iseo at the present day．It is probable that it derived its name from a town called Sebum，on the site of the modern Iseo，at its SE．extremity，but no mention of this name is found in ancient writers． （Claver，Ital．p． 412. ）
［E．H．B．］
SEBRIDAE（ $£ 6$ efidat，Ptol，iv．7．§ 33），or SOBORIDAE（ Aethiopian race，situated between the Astaboras （Tacazze）and the Red Sea．They probably cor－ respond with the modern Samhar，or the people of the＂maritime tract．＂There is some likelihood that the Sembritae，Sebridae，and Suboridae are but various names，or corrupted forms of the name of one tribe of Aethiopians dwelling between the upper arms of the Nile and the Red Sea．［W．B．D．］
SEBIIRRI（ $\Sigma$ EGouppó and $\Sigma$ ©ovppoí，Ptol，ii． 6. $\S 27$ ），a people in the NW．of Hispania Tarraco－ nensis，on both banks of the Minius，probably a sub－ division of the Callaici Bracarii．
［T．H．D．］
SECELA or SECELLA．［Zuklag．］
SECERRAE，called by the Geogr．Rav．（iv．42） and in a Cod．Paris，of the Itin．Ant．（p．398）SE－ rerrae，a town of the Laeëtani in Hispania Tarra－ conensis，on the road from the Summum Pyrenaeum and Juncaria to Tarraco．Variously identified with S．Pere de Sercada，Arbucias，and San Seloni （properly Santa Colonia Sejerra）．The last identi－ fication seems the most probable．
［T．H．D．］
SE＇CLA（Secchia），a river of Gallia Cispadana， one of the sonthern tributaries of the Padus，which crosses the Via Aemilia a few miles W．of Modena． It is evidently the same stream which is called by Pliny the Gabelins；bat the name of Secia，corre－ spooding to its modern appellation of Secchia，is fonnd in the Jerusalem Itinerary，which marks a station called Pons Secies，at a distance of 5 miles from Mutina．（Itin，Mier．p．606．）The same bridge is called in an inscription which records its restoration by Valeriad，in A．D．259，Pons Seculse． （Murat．Inser．p．460．5；Orell．Inscr．1002．）The Secchia is a considerable stream，having the cha－ racter，like most of its neighbours，of a mountain torrent．
［E．H．B．］
SECOANUS（ $\Sigma \eta \kappa \alpha a v o ́ s, ~ S t e p h, s . v$.$) ，a river of$ the Massaliots，according to one reading，but accord－
ing to another reading，a city of the Massaliots， ＂from which comes the ethmic tame Kequani，as Artemiderns says in his first book．＂Nuthing can be made of this fragment further than this；the name Sequanns belonged both to the basin of the Rhone and of the Seine．
［G．L．］
 port which Ptoleny（ii．7．§ 2）places on the west coast of Gallia，between the Pectoninm or Pictonium Promontorinm and the mouth of the Ligeris（Loire）． The name also occurs in Marcianus．The latitudes of Ptolemy cannot be trusted，and we have no other means of fixing the place except by a guess．Ac－ cordingly D＇Anville supposes that Secor may be the port of the Sables d＇Olome；and otber conjectures have been made．
［G．L．．］．
SECURISCA（亡єкои́pioкa，Procop．de Aed．iv． 7．p．292，ed．Bonn．），a town in Mloesia Inferior， lying S．of the Dannbe，between Oescus and Norae． （Itin．Ant．p．221；comp．Geogr．Pav．iv．7；Theo－ phyl．vii．2．）Yarionsly identified with Sohegurlh， Sistov，and Tcherezelan．
［T．H．D．］
SEDELAUCUS．［Sidoloces．］
SEDETANI．［EDETANi．］
SEDIBONIA＇TES，are placed by Pliny in Aqui－ tania（iv．c．19）．He says，＂Aquitani，unde nomen provinciue，Sediboniates．Mox in oppidum contri－ buti Convenae，Begerri．＂The Begerri are the Bi－ gerriones of Caear．［Bigennoxes．］We have no means of judging of the position of the Sediboniates except from what Pliny says，who seems to place them near the Bigerriones and Conveone．［Con－ venae．］
［G．I．］
SEDU＇NI，a people in the valley of the Upper Rhone，whom Caesar（B．G．iii．1，7）mentions： ＂Nantuates Sedunos Veragrosque．＂They are also mentioned in the trophy of the Alps（Plin．iui．20） in the same order．Thicy are east of the Veragri， and in the l＂alais．Their chief town had the same name as the people．The French call it Sion，and the Germans name it Sitten，which is the ancient name，for it was called Selunum io the middle ages．An inscription has been found at Sion： ＂Civitas Sedunorum Patrono．＂Silten is on the right bank of the Rhone，and crossed by a stream called Sionne．The town－hall is said to contain several Roman inscriptions．［Nantuates；Octo－ DURUs．］
［G．L．］
SEDU＇SII，a German tribe mentioned by Caesar （B．G．i．51）as serving under Arioristus；but as no particulars are stated about them，and as they are not spoken of by any subsequent writer，it is impossible to say to what part of Germany they helonged． Some regard them as the same as the Edusones mentioned by Tacitus（Germ．40），and others iden－ tify them with the Phundusi whom Ptolemy（ii． 11．§ 12）places in the Cimbrian Chersonestus； but both conjectures are mere fancies，based on nothing hat a taint resemblance of names．［L．S．］

SEGALLAUN1（Eeva入入avyoi，Ptol．ij．10．§ 11 ）． Ptolemy places them west of the Allubroges，and he names as their town Valentia Colonia（Holence），near the Rhooe．Pliny（iii．4）names them Segovellauni， and places them between the Vocontii and the Allobroges；hut he makes Valentia a town of the Cavares．［Catares．］［G．L．］

SEGASAMUNCLUM（ $\Sigma \in \gamma / \sigma a \mu \delta \gamma \kappa o u \lambda o \nu$ ，P＇tol． ii．6．§53），a town of the Autrigones in Hispania Tarraconensis．（Itin Ant．p．394．）Variously identifed with S．Maria de Ribaredonda，Cumeno， and Balluercanes．
［T．H．D．］

SE'GEDA AU'GURI'NA, an important forsn of Hispania Bactica, between the Baetis and the coast. (Plin. iii. 1. s. 3.) Commonly supposed to be $S$. Iago della Iliguera near Jaen.
[T.H.D.]
SEGELOCEM (Itin. Ant. p. 47.5, called also Agelocum, Ib. p. 478), a town in Britamia Romana, on the road from Lindun to Eboracum, according to Canden (p. 582) Littleborough in Vottinghamshire.
[T. H. D.]
SEGE'SAMA (さ̇ধєєráua, Strab. iii. p. 162), or Segesino and Segisino (Itin. Ant. pp. 394. 449, 454: Orell. Inscr. no. 4719), and Segas.mosexses of the inhabitants (Plin. iin. 3. s. 4), a town of the Murbogi or Turmodigi in Hispania Tarraconensis, on the road from Tarraco to A turica, now called Sasama, to the W of Briviesca. (Florez, Esp. Sagr. vi. p. 419. xr. p. 59.) [T. H. D.]

SEGERSERA, in Gallia, is placed in the Table betreen Corobilium (Corbeil) and Andomatunum (Langres), and the distance of Segessera from each place is marked xxi. The site of Segessera is not certain. Some fix it at a place named Suzannecourt. [Cononnarm.]
[G. L..]
sEGEsTA ( tanns: Ru. near Calatafimi), a city of Sicily in the NW. part of the islatu, about 6 miles distant from the sea, and 34 W . of Panormus. It name is always written ly the Attic alm other contemporary Gireek writers Eigesth ("E $\gamma \in \sigma \tau \alpha$ : Eth. 'Eyeotaios, Thuc. \&c.), and it has hence been frequently asserted that it was first chanced to Segesta by the Romans, for the purpose of avoiding the ill omen of the name of Egesta in Latin. (Fest. s.v. Scgesta, p. 340) This stury is, however, dispruvel by its coins, which prove that considerably before the time of Thuydides it was called by the inhabitants themselves Segesta, though this form seems to have been softened by the Greeks into Esecta. The origin and foundation of Segesta is estremely obscure. The tradition current among the Greeks and adopted by Thuerdides (Thuc. vi. 2; Dionys. i. 52: Strab, siii. p. 60 s ), ascribed its fuundation to a band of Trojan settlerx, fugitives from the destruction of their city; and this tradition was readily welcomed by the Romans, who in corsequeuce claimed a kindred origin with the Segestans. Thucydides seems to bave con-idered the Elymi, a barbarian tribe in the neighbourhood of Eryx and Sergesta, as descended fiom the Trojans in question ; but aunther account represents the Elymi us a distinct people, already existing in this part of Sicily when the Tiojans arrived there and founded the two cities. [Eryme.] A different story seens also to have been ettreent, arcording to whirlt Segesta uwed its oricin to a b.ind of Phocians, who had been among the followers of Philoctetes: and, as usnal, later whiters sought to reconcile the two accounts. (Strab. vi. p. 272; Thuc. l.c.) Another version of the Trojan story, which would seem to have been that adopted by the inhalitants themselves, asrribed the foundation of the city to Espaths or Aegestus (the Accotes of Virgil), who was said to be the offypring of a Tingan damsel mamed Seresta by the river gol Chimis.rs. (Sorv. ad Aen. i. 550, v. 30.) We are told also that the names of Amuis and Scamander were given by the Trojan colmists to two small streams which flowed beneath the town (Strab, siii. p. 608); and the latter mame is mentioned by Dindoras as one still in use at a much later period. (1)iond, xx. 71.)

It is ecrtain that we cannot receive the statement of the Trojan origin of Segenta as bistorical; but what
ever be the wifin of the tradition, there seemis no doubt on the one hand that the city was occupied by a people distinct from the Sieanians, the native race of this part of Sicily, and on the other that it was not a Greek colony. Thucydides, in enumerating the allies of the Athenians at the time of the Peloponnesian War, distinctly calls the Segestans barbnrians; and the history of the Greek colonies in Sicily was eridently recorded with sufficient care and accuracy for us to rely upon his authority when he promounces any people to be non-Hellenic. (Thac, vii. 57.) At the same time they appear to have been, from a very early period, in close connection with the Greek cities of Sicily, and entering into relations both of hostility and alliance with the Hellenic states, wholly different from the other barbarians in the island. The early inflaence of Greek civilisation is shown alsn by their coins, which are inscribed with Greek claracters, and bear the anquestionable impress of Greek art.

The first historical notice of the Segestans transmitted to us represents them as already engated (as early ns r. c. 580) in hostilities with the Selinnotines, which would appear to prove that both cities had already extended their territories so far as to come into contact with each other. By the timely assistance of a berdy of Cnidian and Khodian emigrants under Pentathlus, the Segestans at this time obtained the advantage over their adversaries. (Diod. 8. 9.) A more obscure statement of Diodorus relates that again in B. C. 454 , the Kegestans were engaged in hostilities with the Lilybaeans for the piwession of the territory on the river Mazaras. (11. si. 86.) The name of the Lilybaeans is here certainly erroneous, as no town of that name existed till long afterwards [Lhipeaerm] ; but we know not what people is really meant, though the presumption is that it is the Selinuntines, with whom the Segestans seem to have been engaged in almost perpetual disputes. It was doubtless with a viev to strengthen thenselves against these neighbours that the Segestans took adrantage of the first Athenian expedition to Sicily under Laches (B. C. 426), and concluded a treaty of alliance with Athens. (Thuc. vi. 6.) This, however, seems to have led to no result, and shortly after. hestilities having ayain broken out, the Selinuntines called in the aid of the Syracusans, with whose assistance they obtained great adrantayes, and were able to press Segesta closely buth by land and sea. In this extremity the Socestans, having in vain applied for assistance to Agrigentum, and even to Carthage, again had recourse to the Athenians, who were, without much difficulty, persuaded to espouse their cause, and send a fieet to sicily, e. ©. 416. (Thruc. vi. 6; Diod. xii. \&2.) It is said that this result was in part attained by fiand, the Segestans having deceived the Athenian envoys by a fallacious di-play of wealth, and led them to conceive a grestly exa.gerated notion of their resources. They, harever. actually furnished 60 talents in ready money, and 30 more after the arrival of the Athenian armament. (Thuc. si. 8,46 ; 1)iod. xii. 83, xiii. 6)

But though the relief of Segesta was th us the orivinal object of the great Athenian expedition to Sicily, that city bears little part in the subsequent eperations of the war. Nicias, indeed, on arniving in the island. proprosed to proceed at once to Sclinus, and compel that perple to submission by the display of their formidable armament. But this advice wns overryled: the Athenians turned their
arms against Syracuse, and the contest betireen Sugesta and Selinus was almost forgotten in the more important struggle between those two great powers. In the summer of B. C. 415 an Athenian fleet, proceeding along the coust, twok the snall town of Hyccara, on the coast, near Segesta, and made it over to the Segestans. (Thuc. vi. 62; Diod. siii. 6.) The latter people are again mentioned on more than one occasion as sending auxiliary troops to assist their Athenian allies (Thnc. vii. 57 ; Dind. xiii. 7): but no other notice occurs of them. The final defeat of the Athenians left the Segestans arain exposed to the attacks of their neighbours the Selinuutines; and feeling themselves unable to cope with them, they again had recourse to the Carthagiuians, who determined to espouse their cause, and sent them, in the first instance, an auxiliary force of 5000 Alricaus and 800 Campanian merceaaries, which sufficed to ensure them the victory over their rivals, B. c. 410. (Diod. xiii. 43, 44.) But this was followed the next year by a vast armament under Hannibal, who landed at Lilybueum, and, proceeding direct to Selinus, took and destroyed the city. (Ib. 54-58.) This was followed by the destruction of Himera; and the Carthacinian power now became firmly established in the western portion of Sicily. Se-esta, surrounded on all sides by this formidable neighbour, naturally fell gradually into the position of a dependent ally of Carthage. It was one of the few cities that remained taithful to this alliance even in B. c. 397, when the great espedition of Dionysius to the W. of Siesly and the siege of Motya seemed altogether to shake the power of Carthage. Dionysius in consequence laid siege to Segesta, and pressed it with the utmost rigour, especially after the fall of Motya; but the city wan able to defy lis efforts, until the landing of Hi milco with a formidable Carthaginian force chaoged the aspect of affairs, and compelled Dionysius to raise the siege. (ld. yiv. 48, 53-55.) From this time we bear little more of Segesta till the time of Agathocles, under whom it suffered a great calamity. The despot having landed in the W. of Sicily on his return from Africa ( E. C. 307), and being received into the city as a friend and ally, suddenly turned upon the inhabitants on a preterice of disaffection, and put the whole of the citizens (s:idd to amonnt to 10,000 in number) to the sword, plandered their wealth, and sold the women and children into slavery. He then changed the name of the city to Dicaeopolis, and assigned it as a residence to the fugitives and deserters that had gathered around bim. (Diod. $x x .71$.)

It is probable that Segesta neveraltogether recovered this blow; but it soon resnmed its original name, and again appears in listory as an independent city. Thus it is meationed in B. c. 276 , as one of the cities which juined Pyrrhus during bis expedition into the W. of sicily. (Diod. xxii. 10. Exc. /1. p. 498.) It, however, soon after fell again under the power of the Cartbaginians ; and it was probably on this oceasion that the city was taken and plundered by them, as alluded to by Cicero (lerr. iv. 33) : a circumstance of which we have no other acconnt. It continued suhject to, or at least dependent on that people, till the First Punic War. In the first year of that war (b c.264) it was attacked by the consul Appius Claudius, but without success (Diod. xxiii. 3. p. 501); but shortly after the inhabitants put the Carthagimian garrison to the sword, and declared for the alliance of Fome. (lb. 5. p. 502 ; Zonar. viii. 9.) They rere in con.

Diagifize ined
sequence besieged by a Carthaginian force, and were at one time reduced to great straits, but were relieved by the arrival of Duilius, after lis naval victory, B. c. 260. (Pol. i. 24.) Segesta seems to have been one of the first of the Sicilian cities to set the example of defection from Carthage ; on which accome, as well as of their pretended Trojan descent, the inhabitants were treated with great distinction hy the Romans. They were exempted from all public burdens, and even as late as the time of Cicero continued to be "sine foedere immunes ac liberi." (Cic. Verr. iii. 6, iv. 33.) After the destruction of Carthage, Scipio Africamos restored to the Segestans a statue of Diana which bad been carried off by the Carthaginians, probably when they obtained possession of the city after the departure of I'yrrhus. (Cic. l'err. iv. 33.) During the Servile War also, in B. c. 102, the territory of Segesta is again mentioned as one of those where the insurrection broke out with the greatest fury. (Diod. xxxvi. 5, Exc. Phot.p. 534.) But with the exception of these incidental notices we hear little of it under the Roman government. It seems to lave been still a considerable town in the time of Cicero, and had a port or emporium of its own on the bay about 6 miles distant ( $\tau \delta \tau \hat{\nu} \nu$ Ai $\gamma \in \sigma$ -
 $\epsilon \not \mu \pi \dot{\rho} \rho \circ o \nu$, Ptol. iii. 4. § 4). This emporium seems to have grown up in the days of Strabo to be a more important place than Segesta itself: but the contimued existence of the ancient city is attested both by Pliny and Ptolemy; and we learn from the former that the inhatitants, thougb they no longer retained their position of nominal indepeadence, enjoyed the privileges of the Latin citizenship. (Strab. l.c.; Plin. iii. 8. s. 14 ; Ptol, iii. 4. § 15.) It seems, bowerer, to bave been a decaying place, and no trace of it is subsequently found in listury. The site is said to have been finally abandoned, in consequence of the ravages of the Saracens, in A. D. 900 (Amico, ad Fazell. Sic. vii. 4. not. 9), and is now wholly desolate ; but the town of Castell a Mare, about 6 miles distant, occupies nearly, if not precisely, the same site as the ancient emporium or port of Segesta.

The site of the ancient ciry is still marked by the ruins of a temple and theatre, the former of which is one of the mast jerfect and striking rains in Sicily. It stands on a hill, about 3 miles NW. of Calatafimi, in a very barren and open situation. It is of the Doric order, with six columas in front and fourteen on each side (all, cxcept one, quire perfect, and that only damaged), forming a parallelogram of 162 feet by 66. From the colmmns not being fluted, they have rather a heavy aspect ; but if due allowance be made for this circumstance, the arcbitecture is on the whole a light order of Duric ; and it is probable, therefure, that the temple is not of very easly date. From the absence of fluting, as well as other details of the architecture, there can be no doubt that it never was finislied, - the work probably being interrupted by some poltical catustrophe, This temple appears to have stood, as was often the case, outside the walls of the city, at a short distance to the W: of it. The latter oceupied the stummit of a hill of small extent, at the foot of which flows, in a deep valley or ravine, the torrent now called the Fiume Gaggera, a confluent of the Fiume di S. Bastoloweo, whicls flows about 5 miles E of Segesta. The latter is probably the ancient Crimisus [Cramsus], celebrated for the great victory of Timoleon over the Carthaginians, while the Gaggera must probably be

Twe other streams are mentiened by Aclian (V.II. ii. 33) in connection with Segesta, the Telmessus and the Porpax ; but we are wholly at a loss to determine them. Some restiges of the ancient walls may still be traced; but almost the only ruins which remain within the circuit of the ancient city are those of the theatre. These have been lately cleared out, and exhihit the praccinctio and sixteen rews of seats, great part in good preservation. The general form and arrangement are purely Greek ; and the building rests at the back on the steep rocky slope of the hill, eut of which a considerable part of it has beeo excavated. It is turned towards the N. and commands a fine view of the broad bay of Castell 'a Mare. (For a more detailed account of the antiquities of Segesta, see Swinburne's Travels, vol. ii. pp. 231235 ; Smyth's Sicily, pp. 67, 68; and especially Serra di Falco, Antichitía della Sicilia, vol. i. pt. ii.) Ancient writers mention the existence in the territory of Segesta of thermal springs or waters, which seem to have eijoyed considerable reputation ( $\tau \grave{a}$ Ateppà viठaтa Airє тà 'E $\gamma \in \sigma \tau a i ́ a$, Diod, iv, 23). These are apparently the sulphureous springs at a spot called Calametti, about a mile to the N . of the site of the ancient city. (Fazcll. Sic. vii. 4.) They are mentioned in the Itinerary as "Aquae Segestanae sive Pincianae" (Itin. Ant. p. 91 ); but the origin of the latter name is wholly unknown.

The coins of Segesta have the figure of a dog on the reverse, which evilently alludes to the fable of the river-god Crimisus, the mythical parent of Apgestus, having assumed that firm. (Serv, ad Aen. i. 550. v. 30; Eckbel, vol. i. 234.) The older ceins (as already observed) uniformly write the name IELESTA, as on the one annesed: those of later date, which are of copper only, bear the legend ETESTAIתN (Eckhel, l.c. p. 236). [E. H. B]

## COIN OF SEGESTA.

SEGESTA (Sestri), a town on the coast of Liguria, mentioned by Pliny, in describing the coast of that country from Genua to the Macra. (Plin. iii. 5. s. 7.) IIe calls it Sugesta Tigulliorum; so that it seems to lave belonged to a tribe of the name of the Tignilii, and a town named Tigullia is mentioned by him just before. Segesta is commonly identified with Sestri (called Nestri di Levante to distinguish it from another place of the name), a considerable town ahout 30 miles from Genoa, while Tigullia is probably represented by Tregoso, a village about 2 miles further inland, where there are considerable Roman remains. Some of the MSS, of Pliny, indeed, have "Tigullia intus, et Negesta Tigulliorum," which would seem to point clearly to this position of the two places. (sillig, ad loc.) It is probable, also, that the Tegulata of the Itineraries (Itin. Ant. p. 293) is identical with the Tigullia of Pliny:

SEGESTA, or SE(iESTICA. [Siscma.]

town of the Arevaci in Hispania Tarraconensis, According to Appian, who calls it $\Sigma \in \gamma \dot{j} \delta \eta$ (vi, 44), it belonged to the tribe of the Belli, and was 40 stadia in circumference. Stephanus B. (s. v.) calls it $\Sigma \in \gamma i \delta \eta$, and makes it a town of the Celtiberisns, of whom indeed the Arevaci and Belli were only suberdinate tribes. Segida was the occasion of the first Celtiberian War (Appian, l. c.), and was probably the same place called Segestica by Livy (xxxiv. 17).
2. A town of Hispania Baetica, with the surname Restituta Julia. (Plin. iii. 1.s. 3.) [T. HI. D.]

SEGINA (E'riga. Ptel. ii. 6. §61), a town of the Bastitani in Hispania Tarraconensis, perheps the modern Sehegin.
[T.H.D.]
SEGJ'SAMA and SEGISAMA JU'LIA ( $\Sigma \in-$ خi $\sigma \alpha \mu \alpha$ 'Iov入l $\alpha$, Ptol. ii. 6. $\$ 50$ ), a town of Hispavia Tarraconensis. We find the lubabitants mentioned by Pliny as Segisamajulienses (iii. 3, s. 4). Ptolemy ascribes the town to the Vaccaei, but Pliny to the Turmodigi, whence we may probably conclude that it lay on the borders of both those tribes. The latter author expressly distinguishes it from Segisamo.
[T. H. D.]
skgisamo. [Segesama.]

## aEGISAMUNCLUM. [SEGAsamunclum.]

SEGNI, a German tribe in Belgium, mentioned by Caesar (B. G. vi. 32) with the Condrusi, aod placed between the Eburones and the Treviri. In B. G. ii. 4 Caesar speaks of the Condrusi, Eburenes, Caeraesi, and Paemani, "qui uno nomine Germani appellantur;" but he does not name the Segni in that passage. There is still a place named Sinei or Signei near Condroz, on the borders of Namur; and this may indicate the position of the Segoi. [G. L.]

SEGOBO'DJUME in Gallia, placed in the Table on a road from Andematunum (Langres) to Vesontio (Besançon). The Itin. gives the same road, hat ornits Segobodium. D'Anville supposes Segobodiom to be Seveux, which is on the Saine, and in the direction hetween Besancon and Langres. [G. L.]

SEGOBRI'GA ( $\Sigma \in \gamma \delta \delta \rho t \gamma a$ Ptol. ii. 6. § 58). 1. The capital of the Celtiberi in Hispania Tarraconensis. (Plin. iii. 3. s. 4.) It lay SW. of Caesarangnsta, and in the jurisdiction of Carthage Nura. (Plin. l. c.) The surrounding district was celebrated for its talc or selenite. (Id. xxxvi. 22. s. 45 .) It must have been in the neighbourhood of Priego, where, near Pennaescrite, considerable ruins are still to be found. (Florez, Esp. Sagr. vii. p. 61.) For coins see Sestini, i. p. 193. (Cf, Strab. iii. p. $162{ }_{\text {i }}$ Front. Strat. iii. 10.6.)
2. A town of the Edetani in Hispania Tarraconensis, known only from inscriptions and coins, the modern Segorbe. (Florez, Esp. Sagr. v. p. 21, viii. p. 97, and Med.pp. 573,650 ; Mionnet, i. p. 50, and Supp. i. p. 102.)
[T. H. D.]

coln of segobrica.
SEGOBRI'GII. [Massilid. p. 290.]

SEGODU'NUM ( $\left.\Sigma^{\prime} \in \gamma \delta \delta o u v o \nu\right)$. Ptolemy (ii. 7. § 21) calls Segodunum the chief town of the Ruteni [Rutesi], a Gallic people west of the Rhone, in the Aquitania of Ptolemy. In some editions of Ptolemy the reading is Segodunum or Etodunum. In the Table the name is Segodum, which is probably a corrupt form; and it has the mark of a chief town. It was afterwards called Civitas Rutenorum, whence the modern name Rodez, on the Aveyron, in the department of Aveyron, of which it is the chief town.
[G. L.]
SEGODU'NUM ( $\Sigma \subset \gamma \delta \delta$ סovvo $)$, a town of southern Germany, probably in the country of the Hermunduri, is, according to some, the modern Würzburg. (1'tol. ii. 11. § 29 ; comp. Wilbelm, Germanien, p. 209.)
[L.S.]
SEGO'NTIA. 1. A town of the Celtiberi in Hispania Tarraconensis, 16 miles from Caesaraugusta. (Itin. Ant. pp 437, 439.) Nost probably identical with the Seguntin of Livy (xxxiv. 19). Tbe modern Rueda, according to Lapie.
2. ( (̌єүортіа Пара́ццка, Ptol.ii. 6.§66), a town of the Barduli in HispaniaTarraconensis. [T. H. D.]

SEGONTIACI, a people in the S. part of Britamnia, in Hampshire. (Camden, pp. 84, 146; Caes. B. G. v. 2 I ; Orelli, Inser. 2013.) [T. H. D.]

SEGO'NTIUM, a city in the NW. part of Britanmia Secunda, whence there was a road to Deva. (Itin. Ant. p. 482.) It is the modern Caernarton, the little river by which is still called Sejont. (Camden, p. 798.) It is called Seguntio by the Geogr. Rav. (v. 31).
[T. H. D.]
SEGORA, in Gallia, appears in the Table on a read from Portus Namnetum (Nantes) to Limunum, or Limonum (Poitiers). D'Anville supposes that Segora is Bressuire, which is on the rond from Nantes to Poitiers.
[G. L.]
SLGOSA, in Gallia, is placed by the Antonine Itin. on a road from Aquae Tarbellicae ( $\operatorname{Dax}$ ) to Burdigala (Bordeauc). The first station from Aquase Tarbellicae is Moscennum, or Mostomium, the site of which is unknown. The next is Segosa, which D'Ancille fixes at a place named Escousse or Escoursé. But he observes that the distance, 28 Gallic leagues, between Aquare and Segesa is less than the distance in the Itin.
[G. L.]
SEGOVEILAUNI. [Segallaidi.]
SEGO'VIA ( $\Sigma$ ¢ $\gamma 0 \cup s i a$, Ptol. ii. 6. §56). 1. A town of the Arevaci in Hispania Tarraconensis, on the road from Emerita to Caesaraugnsta. (Itin. Ant. p. 435 ; Plin. iii. 3. s. 4 ; Flor. iii. 22.) It still exists under the ancient name. For coins see Florez (Med. ii. P. 577), Nionnet (i. p. 51, and Suppl. i. p. 104), and Sestini (p. 196).
2. A town of Hispania Baetica, on the river Si license. (Hirt. B. A. 5\%.) In the neighbourhood of Nacili or the modern Perabiad. [T. H. D.]
SEGUSIA'NI ( $\Sigma$ ejootavoi or $\Sigma_{\text {E }}$ [ovalavoi), a Gallic people. When Caevar (b, c. 58) was leading against the Helvetii the troops which he bad raised in North Italy, he crossed the Alps and reacbed the territery of the Allobroges. From the territory of the Allobrages he crossed the Rhone into the country of the Segusiani: "Hi sunt extra Prorinciam trans Rhodanum primi." (B. G. i. 10.) He therefore places them in the angle between the Rhone and the Snome, for he was following the Helvetii, who hind not yet crossed the Saone. In another place (vii. 64) he speaks of the Aedui and Segusiani as hordering on tbe Previncia, and the Segusiani were dependents of the Aelui (vii. 75). Strabo (iv. p. 186) places the

Segusiani betwecn the Rhodanus and the Dubis (Doubs), on which D'Anville remarks that ho ought to have placed them between the Rhone and the Loirc. But part of the Segusizni at least were west of the Ithome in Caesar's time, as he plainly tells us, and therefore some of them were between the Rhone and the Doubs, though this is a very inaccurate way of fixing thcir position, for the Doubs ran through the territory of the Sequani. Lugdunum was in the country of the Segusiani. [Lugdunum.] Iliny gives to the Segusiani the name of Liberi (iv. 18).

In Cicero's oration Pro P. Quintio (c. 25), a Gallic people named Sebaguinos, Sebagirnos, with several other variatiens, is mentioned. The reading "Sebusianos" is a correction of Lambinus. Baiter (Orelli's Cicero, 2nd ed.) has written "Segusiavos" in this passage of Cicero on his own authority; but there is no name Segnsiavi in Gallia. It is probable that the true reading is "Necusianos." Ptolemy (ii. 8. § 14) names Rodumna (Rornne) and Forum Segasianorum as the towns of the Segusiani, which shows that the Sugusiani in his time extended to the Loire [Rodemsi]; and the greater part of their territory was probably west of the Rhone and Saóne. Nionnet, quoted by Ukert (Gallien, p. 320), has a medal wbich be supposes to belong to the Segusiani.
[G. L.]
 guainus : Susa), a city of Gallia Trnnspadana, sitnated at the fuot of the Cottian Alps, in the valley of the Duria (Dora Riparia), at the distance of 35 miles from Augusta Taurinorum (Turin). It was the capital of the Gaulish king or chieftain Cottius, from whom the Alpes Cottiae derived their name, and who became, in the reign of Augustus, a tributary or dependent ally of the Roman Empire. Hence, when the other Alpine tribes were reduced to subjection by Augustns, Cottius retained the government of bis territories, with the title of Praefectus, and was able to transmit them to his son, M, Julius Cettius, upon whom the emperor Claudius even conferred the title of king. It was not till after the death of the younger Cottius, in the reign of Nero, that this district was incorporated into the Roman Empire, and Segusio became a Roman municipal town. (Strab. iv. pp. 179, 204; Plin. iii. 20. s. 24; Amm. Marc, xv. 10.)

It was probably from an early period the chief town in this part of the Alps and the capital of the sarrounding district. It is sitated just at the junction of the route leading from the Mont Geniere down the valley of the Dora with that which crosses the Mont Cenis; buth these passages were among the natural passes of the Alps, and were donbtless in use from a very early petiod, though the latter seems to have been unaceomntably neglected by the Romans. The road also that'was in most fremuent use in the latter ages of the Republic and the early days of the Empire to arrive at the pass of the Cottian Alps or Mont Generre, was not that by Scgusio up the valley of the Duria, but one which ascended the valley of Fenestrelles to Ocrlum (Uxeau), and from thence crossed the Col de Sestrieres to Scingomagus (at or near Cesanne), at the foot of the actual pass of the Generre. This was the route taken by Caesar in B. C. 58 , nad appears to have still been the one most usual in the days of Strabo (Caes, B. G. i. 10; Strab. iv. p. 179); but at a later period the road by Segusio seems to have come into general ure, und is that given in the Itineraries. (Itin. Ant. pp. 341,

3 P 4
357.) Ot Sectuit as a municipal town we hear little; but it is mentioned as such buth by Pliny and Ptoleny, and its continued existence is proved by inseriptions as well as the Itineraries: and we learn that it coutinned to be a considerable town, and a military post of importance, as commanding the passes of the Alps, until lung after the fall of the Western Emiare. (Plin, iii. 17. s. 21; l'tol, iii. 1. § 40; Gruter, Inser. p. 111. 1: Orell. Inser. 1690, 3803 ; Atnun. Marc. Er. 10; Atin. Hier. p. 556 ; 1. Dise. Hist. Lang. iii. 8; (ires. Tur, iv. 39.)

Atmuinuns tells us that the tomb of Cottius was still visible at Srgusio in his time, and was the object of much honour and veneration among the inhabitants (Amm. l.c.). A trimmplal areh erected by him in honour of Augustus is still extant at Susa; it enumerates the names of the "Civitates" which were subject to his rule, and which were fcurteen in number, though Pliny speaks of the "Cotrianae civitates sii." (Plin. ii. 20. \&. 24; Orell. Inser. 626.) All these are, howerer, mere obscure mountain tribes, and the names of most of them entirely noknown. His dominions extended, acc reling to Strabu, across the mountains as far as Ebrodunam in the land of the Caturiges (Strab, ir. p. 179); and this is confirmed by the inseription which enamerates the Ca turig's and Medulli among the tribes subject to his authority. These are probably the two omitted by ${ }^{1}$ 'ling. O eluin, in the valley of the Clusone, wais comprised in the territory of Cottins, while its limit towards the Taurini was marked by the station Ad Fines, placeit by the lineraries on the road to Anguata Tarfiuram. But the distances given in the Itineraties mac incurrect, and at variance with one another. Ad Fines may probably be placed at or near Avigtiana, 15 miles from Turin, and 20 from Susa. The in antain tribes called by Pliny the "Cuttianae civitates," when united with the Roman government, at first received only the Latin tranchise (Plin. l. c.); but as Serusiu became a Romanmunicipium, it must have receired the full franchise.
[E. H. B.]
SEGCSTERO, a name which occurs in the Antonine ltin. and in the lable, is a tomm of Gallia Narbonemsis, and the name is preserved in Sisteron, the chief town of am arrondissemest in the department of Basses A/pes, on the right bank of the Durance. Roman remains have been found at Sisteron. The name in the Nutit. Prow, Galline is Civitas Segenteriurum. It was afterward called Seceoterium, and Sistericum, whence the modern name cones. (D'Anwille, Nutice. ge.)
[G. L.]
 Joneph1). "The land of Seir" is equivalent to "the mountry of Edom." (Gear. xxxii. 3.) Monnt Seir was the dwel ing of Eana and his pasterity (xxxvi. 8, 9 ; Dcut.ii. 4,5). in the presessiun of which they were nut to be disturbel. (Jush, xxiv. 4.) It, guneral sitnation is de fued in Dcuteronnmy (i, 2) between Horeb at I Kituesh Bameat The district must tate teen ex'ensive fir in their retrostade movement fiom Kade-h, whal was in Sor (i. 44), the Isram. in compasued 1 unt heir many days (ii. 1,3). The - cinal inhatitan's of N-unt Neir were the Ilorims; "hat the clubdren of Exon succerded them, whe they had do-tryed them trom bofore them, and diwet in their steal" (ii. 12. 22: cmmp. Gen. siv: 6). It obsouly dirmet its name form" "Seir the Hurite" (xxari, 20, 21), anl tht, in Jonephus

© tus. (Aut.i.20.§3) The ratse brluin; Wady $\Delta$ rabu is marked iV. Stelur in some m in in maps,
lut withont sufficient authority for the name. Dr. Wilson confines the name to the eastern side of the Araba, from a little notth of l'etra to the Gulf of Akabah, which range he names Jebel-esh-Slierah (Lands of the Bible, vol. i. pp. 289, 290, 337, 340); but since Kadesh was in Seir, it is ulvious that this name must have extenued much more widely, and on both silies the Araba. Mr. Rowlands heard the name Es-Serr given to an elevated plain to the east of Kidesh, which puast, he thinks, be the Scir alluded to in Deut. i. 44, where the Israehtes were claved before the Amalehites. (Williams's Moly City, vol. i. appendix, p. 465.)
[G. W.]

## SEIRAE. [I'sornis]

SELACHLBA, an islaod lying off the Argolic promontory of speiraeum, mentioned only by Pliny (iv. 12, s. 57 ).
sELAh. [Petra.]
SELAMBINA ( $\sum \eta$ 人á $\mu$ \&iva, Ptol. ii. 4. § 7 ), a town on the cast of Hispania Baetica between Sex and Ablerat. (Plin. iii. 1. s. 3.) Florez (Esp. Sagr. xii. pp, 3.6) identifies it with Culabreña, but, accorling to Ckert (ii. p. i. p. 351), it is to be sought in the neighboarhood of Sirbitan. [T. H. D.]

## SELAS. [Messexid, p. 342, b.] <br> sELASIA. [SElLASLA] <br> SELEMNUS. [Achlila, p. 13, b. No. 10.]

 тis) a district in the sonth-west part of Cilicia, extending along the coast, but also some distance in the interior; it derived its name from the town of Sclinus. (Ptol. v. 8. §§ 2, 5.)
 two lakes formed by the sea, north of the month of the Caystrus, and not far from the temple of the Ephesian Artemis. These two lakes, wbich comnovicated with each other, were extremely rich in fish, and formed part of the revcnue of the temple of Artemis, though they were on sereral occasions wrested from it. (Strab. siv. p. 642 ; Plin. v. 31.) The name of the lake,, derived from Selene, the m on-goddess, or Artemis, probably arose from their connection with the great goduless of Ephesus. (Comp. Chaudler's Tracels in Asict Minor, vol. i. p. 162.) [L. S.]

SELELCEIA or SELECCIA, two towns in Syris.
 called Selvercobeles, situated in the district of Cassiotis, placed by l'tolemy in long. $69^{\circ} 30^{\prime}$, lat, 34.45 . The Belus was a tributary of the Oruntes, running into it from the $\mathrm{W}_{\mathrm{c}}$, and since, as Pococke remarks, Seleucia was exactiy in the same latitude as Paltus, it nust have been due E. of it. Now Bohlo, the ancient Paltos, lies two hours S . of Jebilee, ancient Galala, on the coast. Seleucia ad Belun must be looked for $1^{\circ} 10^{\prime}$ to the E., according to I'tulemy's reckoning, who places $l^{2}$ altos in long. $63^{\circ} \quad 20^{\prime}$, lat. $34^{\circ} 43^{\prime}$. Mudern conjecture has ideatified it with Shugh and Divertigi, which is placed 30 miles E. of Autioch. (P'ol. v. $15 . \S 16$; Pocucke, Syria. wh. ii. 1. 199.) I'liny mentions it with another not pisewhere recotnised, in the interior of Syria: "Soleucias praeter faun dictam (i. e. Pioria), duas, quae ad Euphratem, et quase al Belam vocantur " (v. 23. § 19).
 a maritime city of Syria, placed by l'tolemy in long. $68^{\circ} 36^{\circ}$, lat. $35^{\circ}-26^{\circ}$, between thossus and the muths of the Orontes, Its ancient name, according
 $\mu(1)$, a strong city, called Free by lompey (Strab, xvo. 2. §8). Its position is fully described by I'olybius.
it was situated on the sea between Cilicia and Phoenice, over against a large mountain called Coryphaeum, the base of which was washed on its W. side by the sea, towards the E. it dominated the districts of Antioch and Seleucis. Selencia lay on the S . of this mountain, separated from it by a deep and rugged valley. The city extended to the sea through broken ground, but was surrounded for the nost part by precipitous and abropt rocks. On the side towards the sea lay the factory ( $\tau \alpha \dot{\prime} \dot{\epsilon} \mu \pi о \rho \in \bar{\alpha} \alpha$ ) and snburb, on the level ground, strongly fortified. The whole bollow (nías) of the city was likewise strongly fortified with fine walls, and temples, and buildiags. It had one approach on the sea side, by an artificial road in steps ( $\left.\kappa \lambda_{1} \mu \alpha \kappa \omega+\eta \nu\right)$, distributed into frequent and continuous slopes (cuttings? - غं $\boldsymbol{\pi} \lambda i \mu a \sigma_{1}$ ) and curves (tunnels?- $\kappa \kappa a \dot{\omega} \mu a \sigma t$ ). The embouchure of the Orontes was not far distant-40 stadia, according to Strabo (svi. p. 750). It was built by Seleucus Nicator (died B. c. 280), and was of great importance, in a military view, during the wars between the Seleucidae and the Ptolemies. It was taken by Ptolemy Euergetes on his expedition into Syira, and beld by in Egyptian garrison until the time of Antiochus he Great, who, at the instigation of Apollophanes, - Seleucian, resolved to recover it from Ptolemy Philopator (cir. B. c. 220), in order to remove the lisgrace of an Egyptian garrison in the heart of Syria, and to obviate the danger which it threatened 0 his operations in Coele-Syria, being, as it was, a rincipal city, and well nigh, so to speak, the proper nome of the Syrian power. Having sent the fleet against it, under the admiral Diognetus, be himself marched with his army from Apameia, and encamped near the Hippodrome, 5 stadia from the city. Having in vain attempted to win it by bribery, he livided his forces into three parts, of which one under Zeuxis made the assault near the gate of Antioch, I second under Hermogenes near the temple of the Hioscuri, the third under Ardys and Diognetus by he arsenal and suburb, which wa- first carried, wherepon the garrison capitulated (Polyb. s. 58-60). It was afterwards a place of arms in the further prusecution of the war acainst Ptoleny (66). The Munt Cory phaeum of Polybins is the 1ieria of Ptolemy and Strabo, from which the town derived its distinaishing appellation. Sirabo mentions, from Posidonius, that a kind of asphaltic soil was quarried in this place, which, when spread over the roots of the vine, acted as a preservative against blight (vii. p. 316.) He calls it the first city of the syriaus, from Cilicia, and states its distance from Soli, in a straight course, a little less than 1000 stadia (xiv, p. 676). It was one of the four cities of the Tetrapolis, which was a synonym for the district of Seleucis, the others being Antioch, Apameia, and Landiceia, which were called sister cities, being all founded by Selencos Nicator, and called by the names respectively of himvelf, his f.ather, his wife, and his mother-in-law; that bearng his father's name being the largest, that bearing his own, the strongest. (Strab. xri. p. 749.) The anguries attending its foundation are mentioned by Juhn Nalalas (Cheronographia, lib. viii. p. 254). It became the port of Antioch, and there it was that St. Paul and Barnabas embarked for Cyprus, on their first mission to Asia Minor (Acts, xiii. 4), the Oruntes never laving been navigable even as fur as Antioch for any but vessels of light dranght. Pliny calls it "Seleucia libera Pieria," and describes it as situated on a promontory (v. 21) claxv. M. P. distaut from Zeugma on the Euphrates (12). He de
signales the Coryphacum of Polybins, the Pieria of Strabo, Monnt Crsius, a name also extended by Strabo to the monntains about Selencia, where le speaks of the Antiocheans celebrating a feast to Triptolemus as a denigod, in Monut Cassius around Seleucia ( $\mathrm{x} v \mathrm{i}$. p. 750). The ruins of the sitc have been fully explored and described in modern times, first by Pococke (Observations on Syria, chap. xxii. p. 182, \&c.), who identified many points noticed by lolybius, and subsequently by Col. Chesney (Journal of the R. Geog. Society, vol. viii. p. 228, \&c.). The mountain range noticed by Polybius is now called Jebel Musa; and the hill on which the city stood appears to be the "low mountain, called Bin-Kiliseh," or the 1000 churches. Part of the site of the town was occupied, according to Pococke, by the village of Kepse, situated about a mile from the sea. The masomry of the once magnificent port of Seleucia is still in so good a state that it merely regoires tritling repairs in some places, and to be cleaned ont; a project contemplated, but not executed, by one Ali Pasha, when governor of Aleppo. The plan of the port, with its walls and basins, its piers, floodgates, and defences, can be distinctly traced. The walls of the suburb, with its agora, the double line of defence of the inner city, comprehending in their circumference about 4 miles, which is filled with rums of bunsis ; its castellated citadel on the summit of the hill, the gate of Antioch on the SE. of the cite. with its pilasters and towers, near which is a double row of inarble columns; large remains of two temples, one of which was of the Corinthian order; the amphitheatre, near which Antiochus encamped, before bis assault upon the city, with twenty-four tiers of benches still to be traced; the numerons rocky excavations of the necropolis, with the sarcophagi, always of good workmanship, now broken and scattered about in all directions, all attest the ancient impurtance of the city, and the fidelity of the historian who has described it. Nost remarkable of all in this riew is the important engineering work, to which Pulybins allodes as the only conmunication between the city and sea, fully described by Col. Chesney, as the most striking of the interesting remains of Seleucia. It is a very extensive escava~ tion, cut through the solid rock from the NE. extremity of the town almost to the sea, part of which is a deep hollow way, and the remainder regular tunnels, between 20 and 30 feet wide, and as many high, esecuted with great skill and considerable labour. From its eastern to its western extremity is a total leugth of 1088 yards, the greater part of which is traversed by an aqueduct carried along the face of the rock, considerably ubove the level of the road. Its termination is rongh and very imperfect, about 30 feet above the level of the sea; and while the bottom of the rest of the excavation is tulerably regular, in this portion it is iupeded by large masses of rock lying across it at intervals: which would imply either that it was never completed, or that it was fimished in this part with masonry, which may lave been carried off for building purposes. It is, perhaps, in this part that the stairs mentioned by Polybins may have been situated. in order to form a commonication nith the sea. There can be no doubt whatever that this excavation is the passage mentioned hy him as the sole communication between the city and the sea; and it is strange that any question should have arisen concerning its design. A rough plan of the site is given by Pococke (p. 183); but a much more
carefully executed plan, with drawiugs and sections of the tunnels, \&c., has lately been published by Captain Allen, who surveyed the site of the harbunr, but not of the town, in 1850. (The Dend Sea, fre, Map at end of vol. i., and vol. ii. pp. 208-230.) [G. W.]

COIN OF SELEUCEIA IN SYRIA.
SELEUCEIA or SELEUC1A (Ze入eúкela.) 1. A town near the northern frontier of Pisidia, snrnamed sidera ( $\grave{\eta}$ 玉 $\delta \bar{\eta} p \bar{\alpha}$, Ptol. v. $5 . \S 4$; Hieroel. p. 673), probably on acconnt of iron-works in its vicinity. There are some coins of this place with the image of the Aviatie divinity Mea, who was worshipped at Antioch, and bearing the inseription K $\lambda$ au$\delta \iota \sigma \sigma \in \lambda \in u k$ écov, which might lead to the idea that the place was restored by the emperor Claudins, (Siestini, Mon. Vet. p. 96.) 1ts site is now occupied by the town of Ejectir.
2. A town in Pamphylia between Side and the month of the river Eurymedon, at a distance of 80 stadia from Nide, and at some distance from the sea. (Stadinsm, Mar. Mag. § 216.)
3. An important town of Cilicia, in a fertile plain on the western bank of the Calycadnus, a few miles above its mouth, was founded by Seleucus I., surnamed Nicator. A town or towns, however, had previonsly existed on the spot under the names of Olbia and Hyria, and Selencus seems to have only extended and united them in one town under the name Seleucia. The inhabitants of the neighbouring Holmi were at the same time transferred to the new town, which was wel! built, and in a style very different from that of other Ciliciao and Pamphylian cities. (Steph. B. s. v.; Strab. xiv. p. 670.) In situation, climate, and the richness of its productions, it rivalled the neighbouring Tarsus, and it was much frequented on account of the annual celebration of the Olympia and on account of the oracle of Apollo. (Zosim. i. 57 ; Basil. I The S. Theclae, i. p. 275 , Orat. xxvii. p. 148.) Pliny (v. 27) states that it was sumamed Tracheotis; and some ecclesiastical historians, speaking of a council beid tijere, call the town simply Trachea (Sozotn. iv. 16; Socrat. ii. 39 ; emp. Itul. v. 8 . § 5 ; Amm. Marc. xiv. 2.5 ; (ros. vii. 12.) The town still exists under the name of Silefkieh, and its ancient remains nre seattered over a large extent of ground on the west side of the Calycudnns. The chief remains are those of a theatie, in the front of which there are considerable rnins, with porticoes and other large buildings: farther on are the ruins of a tenuple, which had been converted into a Cluristian chureh, and several large Corinthian columns. Arcient Seleuceia, which appears to have remained a free city ever siuce the time of Augustus, remained in the same condition even after a great portion of Cilicia was given to Are helaus of Cappadocia, whence both imperial and autonomons coins of the place are found. Soleuccia was the birthplace of several men of eminence, such as the peripateties Athenaeus and Xenarchns, who flowrished in the
reign of Augnstus, and the sophist Alexander, who taught at Antioch, and was private secretary to thio emperor M. Aurelius (Philostr, 1 it. Soph. ii. 5.) According to some authorities, lastly, the emperor Trajan died at Seleuceia (Eutrop, viii. 2, 16; Oros. l. c.), though others state that he died at Selinus.

COIN OF SELECCEIA IN CILICRA.

## 4. Soleucia in Caria [Tralles.] [L. S.]

SELELCEIA or NELEUCIA ( $\bar{\Sigma} \in \lambda \epsilon \dot{\prime} \kappa \in \epsilon a$, Prlyb. v. 48 ; Strab. xi. p. 521 ; Ptol. v. 18. § 8), a large city near the right bank of the Tigris, which, to distinguish it from several other towns of the same name, is generally known in history by the title of
 Appian, Syr. 57.) It was built by Selencus Nicator (ntrab. l. c.; Plin. vi. 26. s. 30; Tacit. Ann. vi. 42; Joseph. Ant. Jud. xviii. 9. §8; Amm. Marc. xxiii. 20), and appears to have been placed near the junction with the Tigris, of the great dyke which was carried across Mesopotamia from the Euphrates to the Tigris, and which bure the name of Nahar Malcha (the royal river). (Plin. l. c., and Isid. Char. p. 5.) l'tolemy states that the artificial river divided it into two parts ( $\mathrm{v}, 18, \S 8$ ). On the other liand, Theophylact states that botb rivers, the Tigris and Euplarates, surrounded it like a rampart -by the latter, in all probability, meaning the Nahar Malcha (v. 6). It was situated abont 40 miles NE. of Babylon (according to Strabo, 300 stadia, and to the Tab, Peatinger., $44 \mathrm{M} . \mathrm{P}$.). In form, its original structure is said to bave resembled an cagle with its wings outspread. (Plin. l. c.) It was mainly constructed of materials bruught from Bahylon, and was one principal cause of the rain of the elder city, as Ctesiphon was (some centuries later) of Seleuceia itself. (Strab. xri. p. 738.) It was placed in a district of great fertility, and is said, in its best days, to have had a population of 600,600 persons. (Plin. l.e.) Strabo adds, that it was even larger than Antiocheia Syriae,-at his time prokably the greatest commercial entrepot in the Wast, with the exception ol'Alexandreid (xvi. p. 750). Even so late as the perind of its destruction its population is still stated to have amounted to half a million. (Eutrop. v. 8; comp. Oros, riii. 5.) To its commercial importance it doubtless owed the free character of its lucal government, which appears to have been administered by means of a seuate of 300 eitizens. P'olybins states that, on the overthrow of Molon, the Median rebels Antiochus and IIrmeias descended on Seleuceia, which had beep previonsly taken by Molon, and, after punishing the people by toutnre and the infliction of a heavy fine, exiled the local magistracy, who were called Adeiganae. ('Aōer ravat, Polyb. v. 54.) Their love of freedom and nf independent government was, however, of longer duration. (1'lin. l. c.; Tacit. Ann, vi, 42.) Seleuceia owed its min to the wars of the Komans with the 1'anthians and other eastern nations. It is first noticed in that between Crassus and Orodes (Dion Cass. x1. 20); but it would seem
that Crassus did not himself reach Seleuceia．On the advance of Trajan from Asia Minor，Seleuceia was taken by Erucins Clarus and Julius Alexander， and partially burnt to the gronnd（Dion Cass．lxviii． 30 ）；and a few years later it was still more com－ pletely destroyed by Cassius，the general of Lucins Verus，during the war with Vologeses．（Dion Cass． 1xxi． 2 ；Eutrop．v．8；Capitol．Verus，c．8．）When Severus，during the Parthian War，descended the Euphrates，be appears to bave found Seleuceia and Babyloo equally abandoned and desolate．（Dion Cass．lxxv．9．）Still later，in his expedition to the East，Julian fonnd the whole conntry round Seleu－ ceia one vast marsh full of wild game，which his soldiers hunted．（Amm．Marc．xxiv．5．）It would seem from the indistinct notices of some anthors， that Seleuceia once bore the name of Coche． ［Coche．］
［V．］
SELEUCIS（ $\Sigma \in \lambda \in v k i s)$ ，a district of Syria，men－ tioned by Ptolemy，as containing the cities of Gephura， Gindarus，and Imma（v．15．§ 15）．Strabo calls it the best of all the districts：it was also called Tetrapolis，on account of its four most important cities，for it had many．These four were，Antioch， Selenceia in Pieria，Apameia，and Laodiceia（xvi． p．749）．It also comprehended，accordiog to Strabo， four satrapies ；and it is clear that he uses the name in a much wider seose than Ptolemy，who places the four cities of the tetrapolis of Strabo＇s Seleucis in so many separate districts ；Antioch in Cassiotis， Apameia in Apamene，Laodiceia in Laodicene，while he only implies，but does not state，that Selenceia lies in Seleucis．
［G．W．］
SELGE（ $\Sigma$ é $\lambda \gamma \eta$ ：Eth．ミ ミe入 $\gamma \epsilon$ és），an important city in Pisidia，on the sonthern slope of Mount Taurus，at the part where the river Eurymedon forces its way through the mountains towards the south．The town was believed to be a Greek colony， for Strabo（xii，F．520）states that it was founded by Lacedaemonians，but adds the somewhat unio－ telligible remark that previously it had been founded by Calchas（Comp．Polyb．v． 76 ；Steph．B．s．v．； Dioo．Per．858）．The acropolis of Selge bore the name of Cesbedium（Keनठもहठoov；Polyb．l．c．）The district in which the town was sitnated was ex－ tremely fertile，producing abundance of oil and wine， but the town itself was difficult of access，being surrounded by precipices and beds of torrents flowing towards the Eurymedon and Cestrus，and requiring bridges to make them passable．In consequence of its excellent laws and political constitution，Selge rose to the rank of the most powerful and populous city of Pisidia，and at one time was able to sead an army of 20,000 men into the field．Oxing to these circumstances，and the valour of its iohabitants， for which they were regarded as worthy kinsmen of the Lacedaemonians，the Selgians were uever subject to any foreign power，but remained in the enjoyment of their own freedom and iodependence．When Alexander the Great passed through Pisidia，the Selgians sent an embassy to him and gained his favour and friendship．（Arrian，Anab．i．28．）At that time they were at war with the Telmissians．At the period when Achaens had made himself master of Western Asia，the Selgians were at war with Pedoelissus，which was besieged by them；and Achaeus，on the invitation of Pednelissus，sent a large force açainst Selge．After a long and vigorons siege，the Selgians，being betrayed and despairing of resisting Achaens any longer，sent deputies to sue for peace，which was granted to them on the fol－
lowing terms：they agreed to pay immediately 400 talents，to restore the prisoners of Pednelissus， and after a time to pay 300 talents in addition． （Polyb，v．72－77．）We now have for a long time no particnlars abont the history of Selge：in the fifth century of our era Zosimns（v．15）calls it iodeed a little town，but it was still strong enongh to repel a body of Goths．It is strange that Pliny does not notice Selge，for we know from its coins that it was still a flourishing town in the time of Hadrian；and it is also mentioned in Ptolemy（v． 5. $\S 8$ ）and Hierocles（p．681）．Independently of wine and oil，the country about Selge was rich in timber， and a variety of trees，among which the storax was much valued from its yielding a strong perfume． Selge was also celebrated for an ointment prepared from the iris root．（Strab．l．c．；Plin．xii．55，xxi． 19：comp．Liv．xxxv．13．）Sir C．Fellows（Azin Minor，p．171，foll．）thinks that he has discovered the ruins of Selge abont 10 miles to the north－east of the village of Boojick．They are seen on a lofty promontory＂now presenting magnificent wrecks of grandeur．＂＂I rode，＂says Sir Charles，＂at least 3 miles through a part of the city，which was one pile of temples，theatres，and buildings，rying with each other in splendour．．．．．The material of these ruiss had suffered much from the exposure to the elements，being grey with a lichen which has eaten into the marble，and entirely destroyed the surface and inscriptiods；but the scale，the simple grandeur， and the nniform beauty of style bespoke its date to be the early Greek．The scnlptured connices fre－ quently contaio groups of figures fightiog，wearing helmets and body－armonr，with shields and long spears；from the ill－proportioned figures and general a ppearance，they must rank in date with the Aegina marbles．The ruins are so thickly strewn，that little cultivation is practicable；but in the areas of theatres， cellas of temples，and any space where a plongh can be used，the wheat is springiog op．The general style of the temples is Corinthian，but not so florid as in less ancient towns．The tombs are scattered for a mile from the town，and are of many kirds， some cut in chanibers in face of the rock，others sarcophagi of the beaviest form：they have had in－ scriptions，and the ornaments are almost all martial； several seats remain among the tombs．I can scarcely gness the number of temples or columned buildings in the town，but I certainly traced fifty or sixty．．．．Although apparently unbecessary for de－ fence，the town has bad strong walls，partly built with large stones in the Cyclopean mode．．．．I never conceived so high an idea of the works of the ancients as from my visit to this place，standing as it does in a sitnation，as it were，above the world．＂It is to be regretted that it was impossible by means of idscriptions or coins to identify this place with the ancient Selge more sstisfactorily．（Comp．Von Hammer，in the 11 iener Jahrbücher，vol．cvi．p． 92．）
［L．S．］

COIN OF SELGE．
 people on the SW. coast of Buitamiai Barbara, in the E.. part of Gallnzay and in Dumfries-shire. Cand tn ( $p$. 1194) derives the wane of Soluray from them.
[T.11. D.]
SEL1NLS (Exivoûs) 1. A village in tike north of Laconia, deevribed by Patananias as 20 stadia from Geronthrac: but as Pausa ia scems not to have visited this part of lac nia, the distances yna not bo correct Leake, therefore, places Selinus at the village of Kosmuts, which lies further north of Geruthrie than 20 stadin, but where there are remains of aucient tombs. (Paus. iii. 22. § 8 ; Leakr. Peloponnesium, p. 3fi3: Boblaye, Recherches, 9r: p. 97 ; Clurtius, Pethponnesos, vol. ii. p. 304.)
2. A river in the Triphylian Elis, near Scillus. [scilt.ts.]
3. A river in Achaia. [Acmali, p. 13, b, No. G.] SELI'NU's ( $\Sigma$ entroûs: Eth. $\Sigma \in \lambda a r v i ́ v t i o s, ~ s e l i-~$ nuntius: Ru. at Torre dei l'ulci), one of the most inportant of the Greek colonies in Sicily, situated on the SW. coast of that island, at the inouth of the small river of the same name, and 4 miles $W$. of that of the Hypsas (Belici). It was founded, as we learn from Thucydides, by a colony from the sicilian city of Megara, or Megara Hyblaea, under the conduct of a leader named Pamnilus, about 100 years after the settlement of that city, with the addition of a fresh body of colonists from the parent city of Megara in Greece. (Throc. vi. 4, vii. 57 ; Scymn. Ch. 292 ; Strab. vi. p. 272 .) 'The date of its foundation cannet be precisely fixed, as Thueydiles indicates it ouly by reference to that of the sicilian Merara, which is itself not accurately known, but it onay be placed abont B. C. 628 . Diudorus indeed would place it 22 years earlier, or 8. C. 6.50, and Hipronymus still further back, n. C. 6.54; but the date given by Thucydides, which is prolably eutitled to the mont conifience, is incompatible with thin carlier epoch. (Thuc, si, 4; Dind. xiii. 59; Hieron. Cluron, ad ann. 1362 : Clinton, Fust. Hell. vol. i. P. 208.) The name is surpoed to have been derived fo mo the quantities of wild parsiey ( $\sigma \in \lambda$ wods) whicl grew on the spet; and for the same teason a leaf of thes pa:sley was adopted as the symbol of their evins.
Sclinus was the most wecterly of the fireck colunifes in Sivily, and for this r ahon was early bronght mita contact and collsion with the Carthagimians and the barbarians in the W. and NW. of the inlam. The former pentle, however, do not at first see a to have offered any obstacle to their prozress; but as eariy as B. с. 5 sio we find the Selinutines engared in hootilities wit, the people of Segerta (a mon-11-Henic eity), whose territemy bordered on their own. (Dind. v. 9). The arrival of a body of enigrants from Findes and Ci itus who subsequently fonoded Lijara, and who but their asvistance to the Segestans, for a time securn ${ }^{2}$ the vietory to thist perple; but disputes an l lowthties reem to have bren of frequent wecurrence betwern the two cities, and it is probable that in B. C. 454, when Dadurns speaks of the Segestans as being at wor with the Lityberet os (xi. 86). that the silmatines are the people ratly meant. [Lutymarrme] The river Mazarus, which at that time aypurs to bave formed the bun dary betwe $n$ the twin states, was only abont 15 trile W. of Sclinns: and it is certain that at a sumeshat later period the teritury of Selome extended to its banks, and that that cily had a fort
and empor.an at its mouth. (Dixl. xini. 54.) On the other side its territory certainly extended as far as the Halycus or Sulso, at the mouth of which it land fonnded the culny of Minoa, or Heracleia, as it was afterwards tenned. (Herod, v. 46.) it is eridet, therefore, that Selinus had early attained to great fower and pro-perity; hut we have very little ifformation as to jts history, We learn, however, that, the most of the Sicilian cities, it had passed from an oligarchy to a despotim, and about B. c. 510 was sulbject to a despot named Peithagoras, from whom the citizens were freed by the assistance of the Spartan Earyleon, one of the companims of Dorieus: and therenjon Euryleon bimself, for a short time, seized on the vacant sovereignty, but was speedily overthrown and put to death by the Selhmuntines. (Herod. 5. 46.) We are ignorant of the causes which led the Nelinumines to abandon the cause of the ether (ireeks, and take part with the Carthaginians daring the great expedition of Hanillcar, 1. C. 480 ; but we learn that they had even promised to send a contmgent to the Carthaginian army, which, however did not arrive till after its defeat. (Diod. xi. 21, xiii. 55.) The Selinuntines are next mentioned in B. c. 466, as co-operating with the other free cities of Sicily in assisting the Syracu-ans to expel Thrasybulus (1d. xi. 68) ; and there is every reason to suppose that they fully shared in the prosjerity of the half century that followed, a period of tranquillity and opulence for most of the Greek eities in sicily. Thucydides speaks of Selinas just before the Athenian expedition as a powerful and wealthy city, possessing great resources for war both by land and sea, and having larice stores of wealth accumulated ia its temples. (Threc, vi. 20.) Diolorns also represents it at the time of the Carthaginian invasion, as having enjoged a long period of tranquillity, and possessing a numerous population. (Diod, xiii. 55.)

In n. C. 416 , a renewal of the old disputes between Selimus and Sigesta became the occasion of the sprat Athenian expedition to Sieily. The Selinuntmes wer the first to call in the powerful aid of Syracuse, and thus for a time obtained the complete arlvautaze over their enemies, whom they were able to blockade both by ses and laud; but in this estren ity the Segestans had recourse to the d-sis:ance of Athens. (Thuc. vi. 6; Diod. xii. 82) Though the Athenfins do nit appear to live taken any measures for the immediste relief of Segesta, it is probable that the Selinuntines and Syracusans withdrew their furces at once, us we bear no more of their operations against Segesta. Nor does Selinus bear any important pait in the war of which it was the immediate vecasinu. Nicias indeed proposed, whea the expedition first arrived in Sicily (B, c. 415), that they should proceed at once to Selinus and compel that city to submit on moderate terms (Thue, vi. 47 ); but this advice being overruled, the eflionts of the armament were directed against Syraconse, and the Selinuntines in consecpacnce bore but a seeondary part in the subsequent uperations. They are, however, mentioned on several oceasiurs as furtiishing ausiliaries to the Syracusans; and it was at Selinus that the large Veloponnesian force sent to the support of Gylippus landed in the spring of 413, having been drivels weer to the crast of Africa by as tempest. (Thue, vii. 50, 58: Diod. xiii. 12.)

The defeat of the Athenian armament left the Sequatans apparently at the mercy of their rivals; they in rain attempted to disarm the hostility of the

Selinantines by ceding without further contest the frontier district which had been the original subject of dispute. But the Selinuatines were not satisfied with this concession, and continued to press thea with fresh aggressions, for protection against which they sought assistance from Carthage. This was, after some hesitation, accorded them, and a small force seat over at once, with the assistance of which the Segestans were able todefeat the Selinuntines in a hattle. (Diod. xiii. 43, 44.) But not coatent with this, the Carthagiaias in the following spring (в. C. 409) seat over a vast army amounting, accordiag to the lowest estimate, to 100,000 men, with which Hannibal (the graadson of Hamilcar that was killed at Himera) landed at Lilybaeum, and from thence marehed direct to Seliaus. The Selinuntines were wholly unprepared to resist snch a force; so little indeed had they expected it that the fortifications of their city were in many places out of repair, and the auxiliary force which had been promised by Syracuse as well as hy Agrigentam and Gela, was not yet ready, and did not arrive in time. The Selinnatines, indeed, defended themselves with the courage of despair, and even after the walls were carried, continued the contest from house to house; but the overwhelming numbers of the enemy rendered all resistance hopeless: and after a siege of only ten days the city was taken, and the greater part of the defenders put to the sword. Of the citizens of Selinns we are told that 16,000 were slain, 5000 made prisoners, and 2600 under the command of Empedion escaped to Agrigeatum. (Diod. xiii, 54-59.) Shortly after Hannibal destroyed the walls of the city, but gave pernission to the surviving iahabitants to return and ocenpy it, as tributaries of Carthage, an arrangement which was ennfirmed by the treaty subsequently concluded between Dionysius and the Carthaginiaas, in в. c. 405. (1d. xiii. 59, 114.) In the interval a conviderable number of the survivors and fugitives had been brought together by Ilermocrates, and established within its walls. (Ib. 63.)

There can be no doubt that a considerable part of the citizens of Selinus availed themselves of this permission, and that the city continned to subsist under the Carthaginian dominion; but a fatal blow had been givea to its prosperity, which it undonbtedly never recovered. The Selinnntines are again mentioned in B. C. 397 as declaring in favour of Dionysius daring his war with Carthage (Diod, siv. 47); but both the city and territory were again given up to the Carthaginiars by the peace of 383 (Id. xv. 17); and though Dionysins recovered possession of it by arms shortly betore his death (Id. xv. 73), it is prohable that it soon again lapsed under the dominion of Carthage. The HaJycus, which was established as the eastern boundary of the Carthaginian dominion in Sicily by the treaty of 383 , seems to have generally continned to be so recognised, notwithstanding temporary interruptions; and was again fixed as their limit by the treaty with Agathocles in b. c. 314 . (Id. xix. 71.) This last treaty expressly stipulated that Selinus, as well as Heracleia and Himera, shonld continue subject to Carthage, as before. In B. c. 276, however, duriag the expedition of Pyrrhus to Sicily, the Selinuntines roluntarily submitted to that monarch, after the capture of Heracleia. (Id. sxii. 10. Exc. II. p. 498.) During the First Punic War we again find Selinus subject to Carthage, and
its territory was repeatedly the theatre of military operations between the contending powers. (Id. xxiii. 1, 21; Pol. i. 39.) Bat before the close of the war (about B. C. 250), when the Carthaginians were begianing to contract their operations, and confine themselves to the defence of as few points as possible, they removed all the inhabitants of Selians to Lilyhaeum and destroyed the city. (Diod. xxiv. 1. Exc. П. p. 506.)

It seems certain that it was never rebuilt. Pliny indced, meutions its name ("Selinus oppidum," iii. 8. 5 14), as if it was still existing as a town in bis time, but Strabo distiactly elasses it with the cities which were wholly extinet; and Ptolemy, though he mentions the river Seliaus, has no notice of a towa of the name. (Strab. vi. p. 272; Ptol. iii. 4. § 5.) The Thermae Selinuntiae, which derived their name from the ancient city, and seen to have been much fiequented in the time of the Romans, were situated at a consideable distance from Selians, being undoubtedly the same as those now existing at Sciacca: they are sulphureous springs, still much valued for their nedical properties, and dedicated, like most thermal waters in Sicily, to St. Calogero. At a later period they were called the Aqure Labodes or Larodes, under which name they appear in the Itineraries. (Itin. Ant. p. 89 ; Tab. Peut.) They are there placed 40 miles W. of Agrigentam, and 46 from Lilybatun; distances which agree well with the position of Sciacea. This is distant about 20 miles to the E. of the rnias of Selinus.

The site of the ancieat city is nuw wholly desolate, with the exception of a solitary gnardhonse, and the ground is for the most part thickly overgrown with shrubs and low brnshwood: but the reaains of the walls can be distinctly traced throughout a great part of their circnit. They oceupied the summit of a low hill, directly alutting on the sea, and boundel on the $W$. by the marshy valley through which flows the river Madiuni, the ancient Selinus; on the E. by a smaller valley or depression, also traversed by a small marshy stream, which separates it from a hill of similar character, where the remains of the principal temples are still visible. The space eaclosed by the existing walls is of small extent, so that it is probable the city in the days of its greatness must have covered a considerable area without them: and it has been'supposel by some writers that the present line of walls is that erected by Hermocrates when be restored the city after its destruction by the Carthaginians. (Dral. xiii, 63.) No trace is, however, fuuad of a more extensive circuit, though the remains of two lines of wall, evidently connected with the port, are fousd in the small valley E. of the city. Within the area sarrounded by the walls are the remains of three temples, all of the Dorie order, and of an ancient style; none of them are standiag, but the foundations of them all reuain, together with numerous portions of colomns and other architectural fragments, sufficient to eaable us to restore the plan and desigu of all three without difficnity. The largent of them (marked C. on the plan) is 230 feet long by 85 feet broad, and has 6 columns in front and 18 in length, a very unusnal proportion. All these are hexastyle and peripteral. Besides these three temples there is a small temple or Aedicula (marked B.), of a different plan, but also of the Doric order. No uther remaias of buildings, beyoud mere frag. ments and foundations, can be traced within the
walls; bat the outlines of two large edifices, built of squared stones and in a massive style, are distinctly traceable oatside the walls, near the NE. and

NW. angles of the city, though tre have no cloe to their nature or purpose.

But much the most remarkable of the ruins at

PLAX OF SELINUS.

A C D. Temples within the city.
B. Small temple or aedicula in the city.

EF G. Great temples without the city.
Selinns are those of three temples on the hill to the E., which do not appear to have boen included in the eity, but, as was alten the case, were built on this neighbouting eminence, so as to front the city itself. All these temples are cunsiderably laryer than any of the threeabove described; and the most northerly of them is one of the largest of which we have any remains. It had 8 columus in front and 17 in the sides, and was of the kind called preadodijteral. Its length was 359 feet, and its breadth 162 , so that it was actually longer than the great temaple of Jnpiter Olympias at Arrigentum, though not equal to it ia brealth. From the columas being ouly partially fluted, as well as from other signs, it is clear that it never was completed; but all the more imprrtant parts of the structure were finished, and it mont bave certaialy been one of the most imposing fabrics in antiquity. Only three of the columins are now standing, and these imperfect; but the whele area is filled $n$ p with a heap of fallen masses, portims of columns, capitals, \&c., and other buge architectural fragments, all of the mist massive character, and forming, as ubserved by Switharne, "one of the most gigantic and sublime ruins jmagiaable." The $t$ wo other $t$ 'aples are also prostrate, but the ruins have fallen with such regularity that the portions of almost every column lie on the ground as they have fallen; and it is not unly easy to restore the phan and design of the two edifiess, but it appears as if they ceald be rebuilt with little difficulty. These temples, thongh greatly inferior to their gigantic ueighhoar, were still larger tian that at Segesta, and even exceed the great temple of Neptane at l'aestum; so that the three, when standing, must have presented a spectacle unrisalled in antiguity. All these build. ings may be safely referred to a period anterior to

H M. Remains of edifices nutside the walls.
N. Iiver Selinas, Duw the Madiuni.
the Carthagiaian conquest (B. c. 409), theugh the tbree temples last described appear to have been all of then of later date than those within the walls of the city. This is proved, among other circumstances, by the sculptured metopes, several of which bave been discovered and extricated from among the fallem fragments. Of these sculptures, those which belonged to the temples within the walls, preseat a very peculiar and archaic style of art, and are universally recoguised as amoag the earliest extant specimens of Greek sculptare. (They are figured by Möller, Denkmüter, pl. 4,5, as well as in many other works, aad casts of them are in the British Museam.) Those, on the cantrary, which have beea found among the ruins of the temple marked E. on the opposite hill, are of a later and more advanced style, though stil! retainiag cunsiderable remaias of the stifliness of the earliest art. Besides the interest attached to these Selinuntine metopes from their important bearing on the history of Greek sculpture, the remains of these teimples are of value as affording the most unequirocal testimony to the use of painting, beth for the architectural decoration of the temples, and ns apphed to the sculptures with which they were adorned. A very foll and detailed account of the rains at Selinus is, given in the Duke of Serra di Falco's Antichitic Siciliune, vel. ii., from which the preceding pian is derived. A more general description of them will be fonad in Swinburne's Travels, vol. ii. Pp. 242-245; Smyth's Sicily, Pp. 219221; and other works on Sicily in general.

The coins of Sclinus are numereas and rarious. The carliest, as alreatly mentioned, bear menely the firure of a parsley-leaf on the obverse. These of somewhat later date (iacluding the one figared below) represent a figure sacrificing ou an altar,
which is consecrated to Aescalapins, as indicated by the cock which stands below it. The suhject of this type evidently refers to a story related by Diogenes Laertius (viii. 2. § 11) that the Selinuntines were afflicted with a pestilence from the marshy character of the lands adjoining the neighbouriog river, hut that this was cured by works of drainage, suggested by Empedocles. The figure standing on the coin is the river-god Selinus, which was thus made coaducive to the salubrity of the city.
[E. H. B.]

## coin of selincs

SELI'NUS ( $\Sigma \in \lambda$ ivoûs : Eth. $\Sigma \in \lambda_{i v o v ́ v t i o s ~ o r ~} \Sigma_{\epsilon-}$ גıvoviatos: Selenti), a port-towo on the west coast of Cibicia, at the mouth of a small river of the same name, which is now called Selenti. (Scylax, p. 40 ; Liv. xxxiii. 20; Strab. xiv. p. 682; Ptol. v. 8. § 2, viii. $17 . \S 42$; Plin, v. 22.) This town is memorable in history as the place where, in A. D. 117, the emperor Trajan is said by some authors to have died (Dion Cass.lxviii. 33). After this event the place for a time bore the name of Trajanopolis; but its bishops afterwards are called bishops of Selinos. (Hierocl. p. 709.) Basil of Selencia (Vita S. Theclae, ii. 17) describes the place as reduced to a state of insigoificance in his time, though it had ooce beeo a great commercial town. (Comp. Stadiasm. Mar. Mag. §§ 203,204; Lucan, viii.260; Chron. Paschale, p. 253.) Selinus was situated on a precipitons rock, surrounded on almost every side by the sea, by which position it was rendered almost impregnable. The whole of the rock, however, was not included in the ancient line of fortifications; inside the walls there still are many traces of houses, but on the outside, and between the foot of the hill and the river, the remains of some large buildings are yet standing, which appear to be a mausoleum, an agora, a theatre, an aqueduct, and some tombs (Beaufort, Karamunia, p. 186, full.)

Respectiog the small river Selious, flowing by Pergamum, see Pergamum, p. 575 . [L.S.]
SELLA'SIA ( $\Sigma \in \lambda \lambda a \sigma i a$, Xen. Pulyb. Diod.; $\Sigma_{\epsilon-}$ $\lambda a \sigma!a$, Steph. B., Hesych. s. v.; the latter is perhaps the correct form, and may come from oèias; the name is connected by Hesychins with Artemis
 Laconia, situated in the valley of the Oenus, on the road leading from Tegea and Argos, and one of the bulwarks of sparta against an iovading army. Its distance from Sparta is nowhere mentioned; but from the description which Polybits gives of the celebrated battle fought in its neighcoorhood between Antigonns and Cleomenes, it is probable that the plain of Krevati was the site of the battle. We learn from Polybins that this battle took place in a narrow opening of the vale of the Oenus, between two hills named Evas and Olympus, and that the river Gorgylus flowed acruss the plain into the Evenus. Soath of the Khan of

Krerata is a small plain, the only one in the valley of the Oenus, about ten minutes in width and a quarter of ao hour in length, at the end of which the rucks again approach so close as barely to leave room for the passage of the river. The mountain, which hounds this plain on the east, is Olympus, a contimation of the mountain of Vresthena: it rises very steep on the left hank of the Oenus. The monotain on the westero side is Evas, now Tuirlaes, which, though not so steep, is still iaaccessible to cavalry. Towards the north the plain is shut io by a monntain, orer which the road leads to Tegea, and towards the sonth by a still higher mountain. The Oenus, which flors near the eastern elge of the plain, can be crossed at any point withont difficolty. It receives on its right side a small brook, the Gorgylus, which descends from a ravine on the northern side of Mt. Evas. On the sammit of the hill, more than 2800 feet above the sea, which shuts in the plain on the sonth, and over which the road leads to Sparta, are the ruins of Sellasia, described beluw.
The battle of Sellasia, of which Polybius gives a detailed accouot, requires a few words of explanation. In B. C. 221, Cleomenes, the Spartan kiog, expecting that Antigonus, the Macedooian king, and the Achaeans, would invale Laconia, fortified the other passes which led into the country, and took up his own position with the main borly of his forces io the plain of Sellasia, since the roads to Sparta from Argos and Tegea united at this point. His army amountel to 20,000 men, and consisted of Lacedaemonians, Periveci, allies, and merceaaries. His left wing, containing the Periveci and allies, was stationed on M t. Evas under the command of his brother Eucleidas; his right wing, consisting of the Lacedaemonians and mercenaries, encamped opon Mt. Olympus uoder his own conmand; while his cavalry and a part of the mercenaries occupied the small plain between the hills. The whole line was protected by a ditch and a palisade. Antigonus marched into Laconia from Argos with an army of 30,000 men, bat found Cleomenes so strongly iotrenched in this position. that he did not renture to attack him, but encamped behind the small streain Gorgylus. At length, after several days' hesitation, both sides determined to joio battle. Antigonus placed 5000 Macedonian peltasts, with the greater part of his ausiliary troops, on his right wing to oppose Eucleidas ; his cavalry with 1000 Achaeans and the same numher of Megalopolitans in the small plain; while he hinself with the Macedonian phalanx and 3000 mercenaries occupied the left wiog, in order to attack Cleumenes and the Lacedaemonians on Mt. Olympus. The battle begau on the side of Mt. Evas. Eucleidas committed the error of awaiting the attack of the enemy upon the brow of the hill, instead of arailing himself of his superior position to charge dowa upon them; but while they were climbing the hill they were attacked upoo the rear by son:e light truops of Cleomenes, who were stationed io the centre with the Lacedaemonian cavalry. At this critical momeat, Philopoemen, who was in the centre with the Megalopolitan horse, diverted the attack of the light infantry by charging without orders the Lacedaemonian centre. The right wing of the Macedonians then renewed their attack, defeated the left wing of the Lacedaemonians, and drove them over the steep precipices on the opposite side of Mt. Evas. Cleomenes, perceiring that the only hope of retrieving the day was by the defeat
of the Macedenians oppesed to lim，led his men out of the intreaehments and eliarged the Macedomian phalank．The Lacodacmunians fought with great bravery；but atter many vain attenuts to break through the impenetrable mass of the phalanx，they were entirely defeated，and of 6000 men only 200 are said to have eseated from the field of battle． Cleomenes，perceiving all was lest，escaped with a
fetv horsemen to Sparta，and from thence procceded to Gythinm，where he embarked for degypt．An－ tigonus，thus master of the passes，marehed directly to Sellasia，which he plundered and destroyed，and then to Sparta，which submitted to him after a slight revistanee．（Polyb，ii，65－70；Plut．Cleom． 27，28．I＇hilop．6；l＇ans．ii．9．§ 2，iii．10．§ 7 ，iv， 29．§ 9，vii． $7 . \S 4$ ，viii． 49. \＆ 5 ．）

SELLUS，according to Avienus（Ora Marit． 507）a high mountain in Hispania Tarraconensis， on which the city of Lebedontia once stood．Ukert （ii．pt．i．p． 484 ）identifies it with C．Salon．［T．H．D．］
 Spla，Nen．Auab．vii． 2. § 15，\＆c．；Strab．vii．p． 319 ； Itol．iii．11．§ $6 ;$ ミ $\eta \lambda v \mu$ Spia，Dem．de Rhod．lib． p．198，Reiske），a Thracian town on the Propontis， 22 miles east from Perinthus，and 44 miles west from Constantinople（Itin．Hier．p．570，where it is called Salamembria），near the southern end of the wall，built by Anastasius Dicorus for the protection of bis capital．（Procop．de Aed．iv．9；see Scyl－ LAE）．

According to Strabo（l．c．），its name signi－ fies＂the town of Selys；＂from which it has been inferred that Selys was the name of its founder，or of the leader of the colony from Megara，which fonoded it at an earlier period than the establish－ ment of Byzantium，another colony of the same Grecian state．（Scymn．714．）In honour of Eu－ doxia，the wife of the emperor Arcadius，its name was changed to Eudoxiupolis（Hierocl．p．632）， which it bore for a considerable time；but its modern name，Silizri，shows that it subsequently resumed its original designation．

Respecting the history of Selymbria，only detached and fragmentary notices occur in the Greek writers． In Latin authors，it is merely named（Nela，ii．2．§ 6 ；Plin．iv．11．s． 18 ，xxix．1．s． 1 ；in the latter passage it is said to have been the birthplace of Pro－ diens，a disciple of Hippocrates）．It was here that Xeuophon met Medosades，the envoy of Seuthes （Anab．vii．2．§28），whose forces afterwards en－ carped in its ncighboarhood（Ib，5．§ 15）．When

Alcibiades was commanding for the Athenians in the Propontis（B．C．410），the people of Selymbria refused to admit his army into the town，but gave him money，probably in order to induce him to ab－ stain from forcing an entrance．（Xeo．Hell．i． 1. § 21．）．Some time after this，however，he gained possession of the place through the treachery of some of the townspeople，and，laving levied a con－ tribution upon its inhabitants，left a garrison in it． （Ib．3．§ 10 ；Plut．Alcib．30．）Selymbria is men－ tioned by Demosthenes（l．c．）in B．c． 351 ，as in alli－ ance with the Athenians；and it was no doubt at that time a member of the Byzantine confederacy． According to a letter of Philip，quoted io the ora－ tion de Corona（p．251，R．），it was blockaded by him about b．c． 343 ；but Professor Newman considers that this mention of Selymbria is one of the numerous proofs that the documents inserted in that speech are not authentic．（Class，Mus，vol．i．pp．153， 154．）
［J．R．］
SEMACHIDAE．［ATTICA，p．330，b．］

SEMBRI＇TAE（ $\Sigma \in \mu$ ®ןital，Strab．xvi．pp． 770 － 786 ；Sembkrritae，Plin．vi．30．s．35），a peo－ ple inhabiting the district of Tenesis in Aethiopia，al－ though they seem to have heen of Aegyptisu origin． The first mention of the Sembritae occurs in Erato－ sthenes（ap．Strab．xvii．p．786），who says that they occupied an istand above Meroë；that their name implies＂immigrants；＂that they descended from the Aegyptian war－caste，who，in the reign of Psam－ mitichus（n．c．658），abandoned their native land； and that they were governed by a queen，although they were also dependent on the sovereigns of Meroe．． Artemidorus，also quoted by strabo（xvi．p．770）， says on the contrary，that they were the ruling order in Meroë：these accounts，however，may be recon－ ciled by the supposition that Eratosthenes nnd Arte－ midorus described them at different periods．If the Sembritae were the Aegyptian refugees，they were also the Autombloi（＇A $\sigma \mu a ́ \chi$ ）noticed by Herodotus （ii．30）．Pliny（l．c．）speaks of four islands of thee Sembritae，each containing one or more towns．These were therefore not islands in the Nile，or in any of its principal tributaries，the Astapus，or Astaboras， but tracts between rivers，mesopotamian districts like Meroe itself，which in the language of Nubia are still denominated＂islands．＂The capital of the Sembritae was，according to Pliny，Sembobis．It stood on the left bank of the river， 20 days＇jour－ ney above Meroï．Pliny names also，among other of their principal towns，Sai in Arabia，－i．e．on the right bank of the Nile，for lie assumes that river as the boundary between Lybia and Arabia，－Esar or

## SENA.

Sape (Sobah), on the left hank, 17 days' journey above Ilerö, and Daron aqain on the Arabian side.

Without heing able to define the pasition of this tribe, or to state their relations to the Acthiopians of Meroe, we shall perhaps not err in placing them on the Blue Nile [Astapus], and in the neighbourhood of Axume. The geographers (Heeren, \&c.) who describe the Senibritae as dwelling near the White Nile, have forgotten both their vicinity to Arabiat-i.e. the castero portion of Meroit - and the character of the regions which the Astapus and Astaboras re-pectively water. The White Nile flows through lagoons and morasses unsuited for towns and permaneut settlements ; while the Blue Nile has dways had on its banks a numerous population, dwelling in large villages and towns. Along the Blue Nile ran the principal highways of the trade of Acgypt mitli Sunthern Aethiopia, while the White Nile led off to the uncivilised and scattered tribes of the Libyans. The Sembritae, if seated on the Jatter river, would probably have eluded observation altogether; whereas on the former tbey would be as well known to the caravans and their guides as any other of the Aethiopian races. Mureoser, the mesoputamian districts suited to towns lie to the east of Aethiopia Proper, and would afford a secure retreat to the refugees from Acrypt in search of a new hahitativo. (See Couley's Cinulius I'tolemy and the Nile, pp. 7-27.) The present Senaar correspoads nearly with the territury of the Sembritac. [W.B.D.]
 remarkable circular mountain on the N. side of the Persian galf, and the eastern limit of Caramania. It is muticed buth by Arrian (Peripl. M. E. p. 20, el. Huls.) and by Marcian (Peripl. M. Fext. c. 27, el. Miller, 1855), who states that it was opposite to Mt. Pasabo, in Arabia, and that these two mountains, with their promontories, form the straits at the entrance of the gulf of Pursia. Ptolemy speaks of it, and states that it was also called Strongylus, probably from its firm (vi. 8, \$ 11). Its modern name appears to be Elbourz. (Vincent, Joyage of Neurchus, i. p. 319-321.)
[V.]
 haps more correctly Semnotes, are described as the most ancient and iliustrous among the Suevi in the north of Germany. They dwelt between the Albis and Viadus, being surrounded on the west by the Cherusci, on the south by the Silingi, on the east by the Manimi and Bargundiunes, and on the north-west ly the Longrobardi. (Tac. Germ. 39; Ptol. ii. 11. Ss 15, 17 ; Vell. P'at. ii. 106.) Thioir country acordingly extealed from the hills of Lusutia in the south, as far as Potsdom in the north, and in it they formed 100 commumities (pagi), which gave them such strength that they regarded themselves as the head of the Suevi. Their country contained an ancient forest (Scmonum Silva), hallowed hy awful superstition and sacrifi ia! rites; at statel seasons deputies from atl tine kimired tribes met in it, and commenced their proceedings with a human sacrifice. No one, noreover, was alluwed to enter this forest except be was bound in chains, a mank of humiliation in the presence of the god; and if any one stumbled he was not permitted to rise, but had to crawl along. As to the history of the Semmones, we learn from Tacitus (Aun. ii. 4.5) and Strabon (vii. p. 290) that in the time of Augustus they were united with the Marcomanni under Marobolaus. In the Monumentum Ancyranum the Semnoncs, are mentioned
among the German tribes which sought the friendship of the emperor and the Romans. They appear to bave been governed by kings, one of whom bore the name of Masyus, and reigned in the time of Domitian, (Dion Cass. 1xvii. 5, comp. 1xxi. 20.) After the reign of MI. Aurelius they are no longer mentioned in history, from which circamstance some have urnecessarily inferred that the Semnones were not a distinct tribe, but only a general name for several kindred tribes. As to the Silva Semnonum, it is generally supposed to have existed near Finsterwalde or Sonnenwalde, between the rivers Elster and Spree, where three large places have heen discovered, which were evidently intended as a sort of altars, (Kruse, Deutsche Alterth. vol. ii. part 2, p. 132; Zeuss, Die Deutschen, p. 130.) [L. S.]
 called also for distinction's sake Sriva Gallica ( $\Sigma_{\text {evajáldıка, Ptol.: Sinigaglia), a city of Umbria, }}$ but situated in the district known as the Gallicus Ager, on the coast of the Adriatic, at the mouth of a small river of the same name. The district in which it was situated had previonsly belonged to the Galli Senones, and there can be no doubt that both the river and town derived their name from that of this people. (Sil. Ital. viii. 453 ; Pol. ii 19.) It is therefore probable that there was a Gaudish town of the name before the Roman conquest, but we lave no account of it until the establisbment of a Roman colooy there, which seems to have taken place immediately after the final subjection of the Smones in B. c. 289. (Pol, ii. 19; Liv, Epui. xi.) The colony must have been a "colonia civiam," as its name is not mentioned by Livy among the Latin colonies in the Second Punic War. It was at Sena that the two consuls Livius and Nero united their forces befure the battle of the Metaurus, B. c. 207 ( Liv. xxvii. 46 ; Appian, Azurib. 52 ; Vict. Vir. Ill. 48 ), on which account that battle is described by some authors as being fought " ad Senam," and even Cicero alludes to it as the "Senense praelium." (Cic. Brut. 18: Eutrop. iii. 18; Oros. iv. 18.) Its name is not again mentioned in Jistory till the Civil Wars between Marius and Sulla, when it was taken and plundered by Pompeius, the lieutenant of Sulla, B. C. 82. (Appian, $B$. C. i. 88.) It seems to have always continaed to be a flourishing and considerable town, and under the Trimuvirate received a fresb accessiun of colonists. (Lib. Cul. pp. 226, 258.) Its name is mentioned by all the geographers, as well as in the ltineraries. It was situated on the line of road which led along the coast from Ancona to Fanum Fortunae, where it joined the Flaminiun Wiay, pro* perly so called. (Strab. v. p. 227; Plin. iii. J4. s 19; Ptol. iii. 1. § 22 ; Itin. Ant. pp. 100, 316; Tub. Peut.) The name was early corrupted from Sent Gallica into the cootracted form Senogallia, which is already found in Pliny, and appears aiso in the 1 tineranirs. The Geograplier of Ravenna las Snegallia, thus approaching still more closely to the modern form of Sinigaylia. The city is mentioned as still in existence during the Gothic Wars, after the fall of the Western Eimpire, and again under the Lombards (1'rocop. B. G. is. 23; 1'. Diac. Ilist Lasg. ii. 22); it was for some time also one of the cities of the Pentapolis under the exarchs of Ravenna, but fell into decay in the middle ages, and is alluded to by Dante in the 14th century as verging rapidly to extinction. (Dante, Par. xvi, 75.) It, however, revived again, and is now a flourishing town, with a considerable trade, but has no ancient remaies.

The riverSena, alluded to by Silius Italicns and $\mathrm{Lu}-$ can, must be the small stream now called the Nevola or Nigola, which falls into the sea at Sinigaglia. (Sil. Ital. viii. 453; Lucan, ii. 407.)
[E. H. B.]
SENA ( Eaiva, Ptol.: Eth. Senensis: Siena), a city of Etruria, sometimes called Sena Julia, to distinguish it from the city of the same name on the Adriatic. It was situated nearly in the heart of Etruria, about 28 miles E. of Volaterrae and 40 S. of Florentia. There is no reason whatever to suppose that there was an Etrusean city on the site, and no allusion to its existence occurs before the establishment of the Roman colony. Even the date of this is not accurately known; but it is probable from the epithet of Julia that it was founded either by Caesar himself or by the Triumvirate in bis honowr. It is singular that its name is not fonnd in the Liber Coloniarum; but its colonial rank is attested by Pliny, who calls it "colonia Senensis," as well as by Tacitus. (Plin. iii. 5. s. 8; Tac. Hist. iv, 45.) It is subsequently mentioned by Ptolemy, as well as in the Tabula, which places it on a line of road from Florentia to Clusium. (Ptol. iii. 1. § $49 ;$ Tab. Peut.) But it seems never to have been a place of much importance in aneient times, and it was not till the middle ages that it rose to be one of the first cities of Tuscany. It has no remains of antiquity. (Dennis's Etruria, vol. ii. p. 135.)
[E. H. B.]
SENA INSULA, in Gallia. On this island, which was opposite to the coast of the Osismii, was an oracle of a Gallic goddess. Nine virgins named Gallicenae (Barrigenae, ed. I. Vossius) had the care of the oracle. They could raise storms by their verses, change themselves into beasts, heal diseases, and foretell the future, but they were only propitious to seamen who came to consult them. (Mela, iii. 6.) This is the island of Sein, incorrectly called on the maps Isle des Saints, which is at the entrance of the bay of Douarnenez, and separated from a point of land on the coast of Britany (Pointe Raz) by a narrow channel. D'Anville supposes that this may be the island which strabo places opposite the mouth of the Loire. This island was inhabited only by wamen who were possessed by Dionysus. They sllowed no man to enter their island; but so far from keeping their virginity, they used to visit the men on the mainland. These two stories are very different. Strabo names his island that of the Namnites, as Groskurd (Strab. Transl, i. p. 198) has it; but the name is Samnites in the common texts of Strabo. This seems to be the same island that Dionysius speaks of (Perieg. 571) as being visited by the women of the Amnitae tor the purpose of performing the rites of Baechus. D'Auville further thioks that Pliny (iv. 16) way be speaking of Sena when he mentions after the islands which are near to Britain, Siambis, or Ampis, as some MSS. have it, and Axantos, which is eridently Uxantis or Ouessart. Sina, as the Maritime Itin, uames it, is mentioned there with Uxantis.
[G. L.]
SENIA ( ¿evia, Ptol, ii. 16. (17.) § 2), a Ruman colouy on the coast of Liburnia ("Colonia Senensis," Tae, II. iv. 45), and on the road from Aquileia to Siscia. (Itin. Aut. p. 273.) It had a harbour. (Comp. Plin. iii. 21. s. 25; Geogr. Rav. iv. 31 ; Tab. Peut.) Variously identified with Zeng or Senga.

## [T. H. D.]

SENOMAGUS, in Gallia Narbonensis, is menioned in the Table, and placed north of Avenio Avignon), on a road along the east side of the

Phone. Some geographers guess that it may be near the Pont St. Esprit.
[G. L.]
SE'NONES ( ¿évodes, इévvoves, Steph. B. s. v.). Polybius (ii. 17) nanes the ltalian Senones, इin $\nu \omega \nu \epsilon s$. The Roman puets make the peuultima short:-
"Ut Braccatorum pueri Senonumque minores."
(Juv. viii. 234.)
An ahsurd explavation of the name is quoted by Festus (s.v. Senones) and by Servius (ad Aen, viii. 656).

The Senones were one of the great Celtic nations who bordered on the Belgae. (Caes, B. G. ii. 2.) They were north-west of the Acdui and bordered on them. Their capital was Agedincum (Sens), on the right bank of the Yonne, which is a branch of the Seine. (Ptol, ii. 8. § 12.) The Senones are in the Lugdunensis of I'toleuy and I'liny. Besides Agedineum there were in the country of the Senones, Autissiodurum (Auxerre) and Delodunum (Melun) on the Seine not far from Paris, which slows that their territory extended from the neighbourhood of Paris along the Seine and along the Yonne to the borders of the small nation of the Maudubii [MANdubir], whose town was Alesia, and to the borders of the Lingones. The railroad from Paris to Dijon, which passes near Melun, Fintainebleau, Sens, Joigny, St. Florentin, Tonnerve on the Armangon, a branch of the Yonne, runs through the conntry of the Senones. Betweeu St. Florentin and Flogny, which is about half-way between St. Florentin and Tonnerre, extends a vast plain, level as the sea, fertile, and in summer covered with wheat. A large part of the territory of the Senones is a fertile country. In seems to bave compreiended the dioceses of Sens and Auxerre. Besides Melodunum and Agedincum, Caesar mentions Vellaunolunum as a tuwn of the Senones (vii. 11), on the side towards the Carnutes.

The Senones were at first well disposed to Caesar (B. G.ii. 2), probably through fear of their neighbours, the Belgae and the German people north of the Marne. Caesar had given them Cavarinus for a king, but the Senones expelled him (v.54); and when the Roman proconsul ordered the senate of the Senones to come to lim, they refused, In the spring of b. c. 53 Caesar sammoned the states of Gallia to a meeting, but the Senones, Carnutes, and Treviri wonld not come (vi. 3), upou which he transferred the meeting of the states to Latetia Parisiorum. He says that the Parisii bordered on the Senones, and "within the memory of their fathers they had united their state with that of the Senones; "but he dues not explain the nature of this union. He marehed from Lutetia (Paris) into the country of the Senones, which presents no difficulties for an ariny. The Senones yielded in spite of Acco, who was the leader in the revolt; and Caesar took with bim Cavarinos and the cavalry of the Senones, in which force it is probable that they were strong, as their cuantry is well adapted for grazing and corn. At the close of the year Caesar whipped Acco to death, anil quartered six of his legions at Sens for the widter (vi. 44). In m. c. 52 the Senones sent 12,000 men with the rest of the Gailic forces to attack Caesar before Alesia (vii. 75). The Senones seem to have given Caesar no more trouble; but in B. c. 51 Drappes, a Senon, at the head of a number of de-perate men, was threatening the [rowincis. Drappes was eaught and starved himself to death. (B. G. viil. 30,44 ) [G.L.]

SENONES (之íy $\nu \omega \overline{\text { L }}$ ), a nation of Gaulish origin, which was settled in ltaly, on the coast of tbe Adriatic, extending from the river Acsis (Esino),

SEPONTIA PARAMICA（ミerovría Mapáuиха Ptol．ii．6．§50）．a town of the Viscasei in His pania Tarraconensis lying to the W．of Lacobriga （cr the modern Lobera）．
［T．H．D．］
 $\mathbf{\Sigma}$ ：Tфupitns），a town of Tpper Galilee，not meo－ tioned onder this name in scriptare，bot freqnently by Jusephas．It was garrisoned by Antigonas，in his war with Herod the Great，until the latter tolk it，early in bis Galileean campoien（Ant．siv． 15. § 4．）It seems to have beed a place of arms．and to have bees occasionally the royal residence．for in the troubles which arose in the country ouring the presidency of Varus，the robber－chief Judas，son of Ezekias，seized the palace of Nepphoris，and carried off the arms and treasore which it contained （xvii．12．§ 5）．It was subveqpently taken and lurned by Varus（§9）．Herod the tetrarch（An－ tipas）afterwards rebuilt and fortified it，and made it the glory of all Gasilee，and gave it independence （xviii．2．§ 1）：althongh，according to the statement of Justus the sod of Pistus，he still maintained the soperiority of his nemly fonoded city Titierias：and it was not until Nero had assigned Tiberias to Agripps the Younger that Sepphoris established its sopremacy．and became the royal residence and depository of the archives．It is termed the struagest city of Gahlee，and was parly taken by Gallus，the general of Cestius．（B．J．ii．18．§ 11．）It mxin－ tained its allegiance to the Romans after the peneral revolt of Galilee（Ib．iii．2．§ 4．4．§ 1），but did not break with the Jewish leaders．（I＇ita，8，9．）Its early importance as a Jewish town，attested by the fact that it was one of the fire cities in which district sanhedrims were instituted by Gabinius （B．J．i．8．§ 5）．was forther confirmed by the destruction of Jerusalem，after which catastruphe it became for some years the seat of the Great Sunbe－ drim，until it was transferred to Tiberias．（liebinson， Bibl．Res．vol．iii．p．202．）It was subsequeatly called Dincaesareia，which is its more common aypellation in the ecclesiastical annals；while Ept－ planius and S．Jerome recugnise both names．A revolt of the Jewish inhabitants，in the reign of Constantios（ ．．D．339），led to the destruction of the city by Censtantius Gallus Caesar．（Nicrates， 11．E．ii． 33 ；Sozomen，H．E．iv．7．）This tawn， once the most considerable city of Gallee，wha situated according to $\therefore$ Jerome 10 miles west of Mount Tabor．（Onomast．s．c．Өa56́p：Procopius Gazaens，Comment，in Lib．Judicum．）It was moch celebrated in the history of the Crosaders，for its fountaill－a favourite camping place of the Cbristians．It is stil 1 represented by a p or ri lage bearing the name Sepharieh，distant akout 5 milm to the D rth of Xazareth，retairing no restiges of it－ former grea：ness，bot conspicouns with a ruines tower and charch，both of the middle aces：th latter professing to mark the site of the birthplac
of the Virgin Mary，assigned by a late tradition to this locality．It became the see of a suffragan bishop，under the metropolitan of Scythopolis（Le Quien，Oriens Christianus，vol．iii．pp．713，714）， and there are coins still extant of the reigns of Domitian，Tıajan，\＆c．（Reland，Palaestina，pp． 199 －1003；Eckhel，Doct．Vet．Num．vol．iii．pp．425， 426．）
［G．W．］
SEPTEM AQUAE．［Reate．］
SEPTEM ARAE，a place in Lusitania（Itin． Ant．pp．419，420）．Varionsly identifed with Code－ sera and Aronches．
［T．H．D．］
SEPTEM FRATRES（＇EnTáde入фot ópos，Pıol．iv． 1．§ 5）．a group of mountains in the nortbernmost part of Mauritania Tingitans，connected by a tongue of land with the promontory of Abyla（now Ximiera near Cezta）．and thus on the narrowest part of the Fretum Gaditannm（Plin．v．1．s． 1 ；Solin．c．28； Strab．xvii．p．827．）One of these mountains，now called the Ape Mountains（Graberg Von Hemsö， Empire of Morocco，Germ．Tr．p．24），bore，ac－ curding to Strabo（l．c．）the name of the Elephant （＇Eגéфas），probably from the number of elephants which were to be found there．（Plin．l．c．；Mart． Cap．vi．p．216．）The Geogr．Rar．（iii．11）also mentions in this neighbourbood a town called Septem Pratres，which is perhaps the same place mentioned in the Itin．Ant．（ $\mathrm{p}, 9$ ）as a station between Tingis and Abyle．Procopius also（B．Vand．i．1；comp． ii．5，and de Aed．vi．7）mentions here a castle or fortress called Séntà；and lisidore（Orig．xy． 1）a castle and town called Septa，perhaps the modern Ceuta．（Comp．Mela，i．5．§ 5，et ibi Tzschucke）
［T．H．D．］
SEPTEM MARIA（＇E $\pi \tau \alpha ̀ ~ \pi \in \lambda \alpha{ }^{\prime} \gamma \eta$ ），was the name commonly given to the extensive lagunes at the month of the Padus，and the adjoining rivers， and which extend along a considerable part of the shores of the Adriatic from the mouths of the Padus to Altinum．Pliny indeed seems to use the term in a more restricted sense，as he speaks of＂Atri－ anorom paludes，quae Septem Maria appellantur＂ （iii．16．s．20）；but the Itinerary distiactly applies the name to the whole extent of the lagunes from Ravenna to Altinum（Itin．Ant．p．126）；and Hero－ dian，who notices them particularly（viii．7），clearly uses the term in the same sense．
［E．H．B．］
SEPTEM PAG1（＇En $\quad$ à Пárol），was the name given to a district close to Rome，but on the right bank of the Tiber，which according to tradition bad originally formed part of the territory of the Veientes， but was ceded by them to the Romans as early as the reign of Romulus．（Dionys．ii．55；Plut．Rom．25．） According to the anthorities followed by Dionysius it was again surrendered to the Etruscans by the treaty concluded with Porsena，but was shortly after restored by that monarch to the Romans．（Dionys． т．31，36．）Liry mentions the same circumstaaces， bot withont giring the name of the district．（Liv， ii．13，15．）It is evident，however，that this was a well－known appellation，but we are urable to fix its boundaries more definitely．
［E．H．B．］
SEPTE＇NPEDA（ $\Sigma \in \pi \tau є \mu \pi \in \delta a$ ，Strab．，Ptol ：Eth． Septempedanus：San Severino），a town of Picenum， is the apper valley of the Potentia， 9 miles above Treia．It is mentioned by all the geographers，and the＂ager Septempedanus＂is noticed in the Liber Coloniarum．（Plin，iii．13．s．18；Strab．v．p．241； Ptol．iii．1．§ 52 ；Lib．Col．p．258．）Pliny assigns it the rank of a municipal town，and this is confirmed by inscriptions，one of which is of the age of Aurelian．
（Orell．Inscr． 1026 ；Gruter，Inscr．p．308．3．）It is placed by the ltinernuy of Antoninus on that branch of the Flaminian Way which，quitting the main high road at Nuceria，crossed the Apendines to Prolaqueum and thence descended the valley of the Potentia by Septempeda and Treia to Auximum and Ancona． （ftin．Ant．p．312．）It early became an episcopal see，and derives its modern name of San Severino from one of its bishops who flourished in the middle ages．It still retains its rank as an episcopal city， and is the capital of the surrounding city，though it has not more than 3000 inhabitants．（Rampoldi， Dizion．Corogr．vol．iii．p．837．）［E．H．B．］
SEPTIMANCA，a town of the Vaccael in His－ pania Tarraconensis（Itin．Ant．p．435）．Now Si－ muncas．
［T．H．D．］
SEPULCHRUM EURIPIDIS（Amm．Mare． xxvii．4．§ 8 ；comp．Gell．xv．20；Plut．Lycurg． 36 ；Vitruv．viii． 3 ；Plin．xxxi．19；Itin．Hierosol．）， the remarkable monament erected to Euripides in Dacedonia，at the narrow gorge of Aulon or Are－ thnsa（Besikia or Rumili Boghazi），where the monntains close apon the ruad．The ancients （Vitruvias，l．c．；Plin．l．c．）placed it at the con－ fluence of two streams，of which the water of one was poisonous，the other so sweet and health－giving that travellers were wont $t_{0}$ halt and take their meals by its currents．In the Jerusalem Itinerary， a document as late as the 13tis century，it occurs as a station between Pennana and Apollonia．（Comp． Clarke＇s Travels，vol，viii．pp．9－13．）［E．B．J．］

SE＇QUANA（ミఇrkovávas，さqkoávas，Ptol．ii． 8. § 2），the Seine，one of the large rivers of Gallia． The Seine rises in the highlands south of Langres， but in the department of Cote $\bar{d} O r$ ，and flows in a northwest direction past Chitillon－sur－Seine，Troyes， Melun，Paris，Mantes，Elboeuf，Rouen，and Le Harre．It enters the Atlantic below Le Havre． The course of the Seine is about 470 miles，and the area of its basin is about 26，000 English square miles，which is orly one half of the area of the basin of the Loire．The chief brancbes of the Seine which join it on the right bank are the Aube，the Marne， and the Oise；on the left bank，the Fonne，the Loing， and the Eure．None of the hills which bond the basin of the Seine，or are contained within it，have a great elcyation，and a large part of the country included within this basin is level．

Cacsar（B．G．．．1）makes the Sequana and the Matrona（Marne）the buundary between the Celtae and the Belgae．Strabo（iv．p．192）says that the Sequana rises in the AIps，a statement which me must not altogether impute to an erroneous notion of the position of the river＇s source，though his knowledge of Gallia was in many respects inaccnrate， but to the fact that be extended the name of Alps far beyond the proper limits of those monotains． But his inaccuracy is proved by his saying that the Sequana flows parallel to the lithine，and through the country of the Sequani．He is more correct in fixing its outlet in the country of the Caleti and the Lexovii．The Scine was navigated in the time of Strabo and much carlier．［Gallus Thansalplisa， Vol．I．］
The Nátrona，as Ausonius names it（Mosella， v． 462 ），
＂Matrona non Gallos Belgasque intersita fines，＂－ joins the Seine a few miles above Paris；it is the largest of the affluents of the Scine．

Amminus Marcellinus（xy．11）says that the
united streains of the Sequana and Matrona entered the seat near Castra Constantia (Coutances), which is a great mistake. In the cosmography of Aethiens the Sequana is named Geon or (reobonna. [G. L.]

SE'QUANI ( $\Sigma$ qnouquol), a Celtic nation in the upper valley of the Arar or Saone. Lacan (i. 425) follews the quantity of the Greek form: -
"Optima gens flezis in gyrum Seqnana fraenis."
Caesar fixes the position of the sequani. Their territory extended to the Rhine. (B.G. i. I.) The Jura separated them on the cast from the Helvetii; and the narrow pass between the Jura and the Rhone at Fort lEcluse was in the possession of the Sequani (B. G. i. 6, 8). The southern houndary of their territory from Fort TEcluse was the Rhene; but they did not possess all the country in the angle between the Khone and the Saine, for part of it was held by the Allobroges (B. G. i. 12), and part by the Segusiani (B. G. i. 10) and by the Ambarri, who were dependent on the Aedui (B. G. i. 11). When Caesar describes the march of the Helvetii from Fort lEcluse to the Saone, be says that the Helvetii first passed through the territory of the Sequani, and then entered the territory of the Aedni, which they plundered. But they had not yet reached the Suone, as Casar's narrative shows, and it is clear from this passaue (B. G. i. 11) and those already cited, that a large tract of country between the Rhone and Saone did not belong to the Sequani, for the line of march of the Helvetii from Fort lEcluse to the Saône wonld probably bring them to the Saine at a puint not much lower down than Micon. The western boundary of the Sequani was the Arar, also called the Sanconna, a name which appears to be the same as the name of the Kequani. Their neighbours on the west sile of the Saône were the Aedui, with whon the Sequani had disputes abont the river tulls (Strab, iv. p. 192). On the north theirneighbours were the Lenei and Lingones. Strabo (ir. p. 186) deseribes the Arar and Dubis (Doubs) as flowing throngh the country of the Sequani. D'Anville has an argument to show that the part of the dioceses of Chidon-ser-Saune and Micon which is east of the Suduse belonged to the old territory of the Sequani, which may be true; but the towns Matisce (Mácon) and Cabillonnm (Chilon) were on the west side of the Saine and in the territory of the Aedui (B. G. vii. 90).

In another passaye besides that already referred to, Caesar slows that the Sequani extended to the Ithine, for in describing the course of this river from south to north, he says that it passes by the territury of the IIelvetii, Sequani, Mediomatrici and Trilneed. (B. G. iv. 10.)

The sequani belonged to the dixision of Belvica under the Fimpire (Plin. iv. 17; 1'tol. ii. 9. § 2t). The territory of the siquani contained mnch good land, some u' the best in Gallia. 'Their chied town was Tesomtio (Besangon) on the Dondse, and they laad other tuwns aloo. They fed hogs, and their hams and bucon were expurted to I in the as Sitrabo (iv. p. 192) says; and V.arro (de K.R. i1. 4) may m man to say the same, whon he sjeaks of Gallic bacon.

The soyuani haul kings, sometimes at least; for Gallic kings were not perpetnal. (B. G. i. 3.) Before Caesar went into Gralla, the Arverni and Aelui had been the two most jowerful perples. The Sequani were in league with the Arverni, who oceapied the contre of all Gallia, but hustile to their neighbours the Aclui. To mintariothergeches apaingh the

Acdui, the Arverni and Sequani hired Germens to come over the Rbine. The Germans came in great numbers, and in Caesar's time it was computed that there were 120,000 of them in Gallia. This is the first historical notice of a permanent settlement of Gernans in these parts. The Nequani with the assistance of their ailies defeated and hambled the Acdui, bnt they gained nothing by this victory. Ariovistus, the king of these German mercenaries, took from the Sequani a third part of their lands, and was threatening to take a second third, when Caesar drove the Germans into the Rbine, after defeating them near that river. If the Germans were all destroyed or driven away from the territory of the sequani by Caesar, they came again, for the ceuntry on the west bank of the Rhine, which belonged to the Sequani, the $U_{\text {Pper }}$ Alsace, has been Gentuan for many centuries.

In E. C. 52, the Sequani were among the nations who sent their contingent to attack Caesar befure Alesia.
[G. L.]
SERA (¿îpa, Ptol. i. 11. § 1, 17.§ 5, vi. 13. § 1 , 16. §8, viii. 24. §8), the capital of the country of Serica, and one of the chief cemmercial towns of the Seres. It is the remotest point of Eastern Asia with which the ancients had any commerce, or of which they possessed any knowledge. If was situated on the mountain Ottorocorras at the eastern sonrce of the Bautisus. Mannert (iv. p. 50t) identifies it either with Singan in the provinee of Schensi, or with Honan on the Hoang-ho; but according to Heeren (Lueer, i. 2. p. 668) it is Pekin itself.
[T. H.D.]
SERACA ( ¿єрáка, Ptol. v. 9. § 28), a tewn in the S. of Asiatic Suruatia.
[T. H.D.]
SERANLSA, perbaps more cerrectly Seramusa, a town of the interior of Pontus Polemoniacus, on the south-east of Comana Pontica. (Tab. Peut.; Ptel. v. 6. § 9 , where it is written $\Sigma$ i $\mu \nu$ oura or之е́риоиүа.)
[L.s]
SERAl'IUM (It. Anton. p. 170; Serapiu, Tab. Peut.), a large village seated near the junction of the canal of the P'olemies with the Bitter Lakes, east of the Deita. Kerapium was 18 miles distant from Heronpolis and 50 from Clysma, at the top of the Sinus Heroopolites. Its temple of Serapis, and its position on the canal that connected the Nile with the Red sea, rendered it a place of considerable traffie. It was probably founded, or at least enlarged, by the P'tolemies after Philadelphus (B. c. 2:4) lad extended the canal to the Bitter Lakes.
[W. B. D.]
 a small river on the N. coast of Manritania, winch frll into the sea to the W. of Iasuceuram; either the present Massafran, or, mere probally, the Isser.
[T H. D.]
SERBI or SIRBI ( $\Sigma \in p$ got or $\Sigma$ Épsol, I'tol, v. 9. S21), a prople in Asiatic Sarmatia, according to Potemy (l.c.) between the Cerannian mountains and the river Rha, ahove the Diduri and below the Vati. Pliny, however (vi. 7. s. 7), places them on the E. shoie of the Maeotis, between the Vali and the Arrechi. (Comp. Schaffarik, Slar, Alterth, i. p. 165.)
[T. H1. D.]
SERBONIS LACUS [Smmonis Laces.]
SE'RDICA or SA RDICA ( $\Sigma a p \delta s e c \eta$, I'tol. ii. 11. § 12) (the first of these forms is the more usnal with the Romans, the latter with the Grecks), a considerable town of Upper Moesia, which in carlier times was regarded as belonging to Thrace ( 1 'tol. the) but which ing the (hayd centary was altribated
to Dacia Interior，and made its capital．（Theodoret． Ilist．Eccl．ii．4．）It lay in a frnitful plain，at the spot where the sources of the Oescus united，and on the high－road from Naissus to Philippopolis，be－ tween Meldia and Borburaca．（Itin．Ant．p．135； Tiin．Hierosol．p．567．）From the time of Aurelian it bore on its coins the surname of Ulpia；probably because，when Dacia was relinquished，the name of that Dacian town was transferred to it，and its in－ habitants，perhaps，located there．The emperor Maximian was born in its neighbourhood．（Eutrop． ix．14，22．）It was destroyed by Attila（Priscus， de Legat．p．49），but shortly afterwards restored．In the middle ages it ocenrs under the name of Triad－ itza（Tpıáóı $\langle\alpha$ ，Niceph．Chron．Ann．Is．Angeli，iii．p． 214 ；Aposp．Geogr．in Hudson，iv，p．43），which was perhaps its original Thracian appellation，and which is still retained in the dialect of the inhabitants． （See Wesseling，ad Itin．Ant．l．c．）1ts extensive ruins lie to the S．of Sophia．（Comp．Procop．de Aed．iv．1．p．267，4．p．282；Hierocl．p． 654 ；Amm． Marc．exxi．16；Grater，Inscr．p． 540.2 ；Orelli， nos． 3548,5013 ．）The Geogr．Rav．（iv．7）incor－ rectly writes the name Sertica，since it was derived from the Tbracian tribe of the Serdi．It is called by Athanasins（Apol．contra Arianos，p．154） $\Sigma a \rho \delta \omega \bar{\nu} \pi$ пódıs．
［T．H．D．］
SERE＇NA，a town in Lower Pannonia，on the sonth bank of the Danube，on the road from Poeto－ vinm to Mursa．（It．Hieros．p．562；Geog．Rav．iv． 19，where it is called Serenis；Tab．Peut．，where its name is Serona．）It is thought to have occupied the site of the modern Moszlavina．
［L．S．］
SFRES，［SERIC 1．］
SERE TIUM（ $\Sigma$ £pétiov，Dion Cass．Ivi．12），a fortified town of Dalmatia，which with Rhaetimus was captured by Germanicus in the campaign of A．D． 7.
［E．B．J．］
SERGU＇NTIA（ $\Sigma \rho \gamma \gamma^{\prime} u v \tau i a$, Strab．iii．p．162）， a small town of the Arevaci on the Durins，in Mispania Tarraconensis，Ukert（ii．pt．i．p．455）takes it to have been the $\Sigma$ Sáp $\gamma \alpha \nu \theta$ of Stephanus B． （s．v．）
［T．H．D．］
SE＇RIA（ ¿épta，Ptol．ii，4．§ 12），a town of the Turdetani in Hispania Baetica，with the surname of Fama Julia．（Plin，iii．子．s．3．）It lay E．of the month of the Anas，and N．of Batis．［T．H．D．］

SERIA＇NE，a city of Syria mentioned in the Itinerary of Antoninus as xviii．M1．P．distant from Audrona，which was xxvii．M．P．from Calcis，cxxxviii． M．P．from Dolicha，now Doluc．（Itin．Ant．pp．194， 195．）Mannert thinks that it corresponds in sitnation with the Chalybon（Xa入u®＇山⿱⿻土㇒日\zh20））of Ptolemy（v． 15. §17），which gave its name to a district of Syria Chalybonitis．It is certainly identical with the modern Siria， 2 long days SE．of Aleppo，in the desert，the ruins of which were discovered and de－ scribed by Pietro della Valle．（Mannert，Geographie， part vi．vol．i．p． 411 ．）
［G．W．］
SE＇RICA（方 ミทрики́，Ptol．vi．16．§§ 1，3 4，6， vii．2．§ 1，3．§ $1,5 . \S 1$ ，viii． 24 ．§§ $1,5,27 . \S 2$ ． \＆c．），a tract of country in the E．part of Asia，in－ habited by the people called Seres．According to the description of Ptolemy，it was bounded on the W．by Scythia extra Imaum，on the NE．by an un－ known land，on the E．by Sinae，and on the S．by India．Pliny on the contrary（vi．13．s．15）seems to extend it on the E．as far as the coast of Asia， as be mentions an Oceanns Sericus，and in another place（ $I$ l．17．s．20）speaks of a promontory and bey．Mlodern opinions vary respecting its site；but
the best geographers，as Rennell，D＇Anville，and Heeren，concur in placing it at the NW．angle of the present empire of China．（See Yates，Tex－ trinum Antiq．p．232，note）．The name of Serica， as a country，was not known before the first century of our era，though there are earlier accounts of the people called Seres．It seems highly improbable， however，that they were known to Hifeataeus，and the passage on which that assumption is founded occnrs only in one MS．of Photius．They are first mentioned by Ctesias（p．371，n．22，ed．Bähr）； lut according to Mela（iii．7）th：ey were in lis time known to all the world by means of their commerce． On the nothern borders of tbeir territories were the more eastern skirts of the mountains Annibi and Anxacii（the Altai），which stretched as far as here from Scythia．1n the interior of the country were the Montes Asmiraei，the western part of the Ma－Uri chain；and towards the sonthern borders the Casii Montes（now Khara，in the desert of Gobi），together with a sonthern branch called Thagurus，which trended towards the river Bautisns（Ivang－ho．）On the farther side of that river lay the Ottorocorras， the most eastern branch of the Emodi mountains， called by Ptolemy（vi．16．§ 5）tà ミipoká b̌pך． Aruong the rivers of the comntry，the same author （Ib．§3）names，in its northern part，the Occhardes （probably the Selengr），and，in the S．，the Bautes or Bantisus（lloang－ho），which flowed towards the land of Sinae．Pliny，however（l．c．），mentions se－ veral other rivers，which seem to have been coast ones，as the Pitaras，Cambari，Lanos，and Atianos， as well as the promontory of Chryse and the bay of Cyrnaba．Serica enjoyed a serene and excellent climate，and possessed an abundance of cattle，trees， and fruits of all kinds（Amm．Marc．sxxiii． 6. § 64；Plin．l．c．）．Its chief product，however，was silk，with which the inhabitants carried on a very profitable and most extensive commeroe（Strab， xv ． p． 693 ；Arist．Hist．Nat．v．19；Virg．Georg．ii． 121 ； Plin．and Amm．ll．cc．\＆e．）．Pliny records（xi． 22. s．26），that a Greek woman of Cos，named Pam－ phila，first invented the expedient of splitting these substantial silkenstuffs，and of manufacturing those very fine and veil－like dresses which became so cele－ brated under the narae of Coae vestes．Both Serica and its iuhabitants are thought to have derived their name from their staple product，since，as we learn from Hesychins（s．v ミinpes），the insect，from the web of which the brilliant stuff called holosericon was prepared，was named Ser（ $\dot{n} \hat{\eta} \rho$ ）．（Comp．Klaproth， Sur les Noms de la Chine in the Mém．rel．à l＇Asie， iii．p． 264 ；and Tableaux Hist．de l＇Asie，pp． 57 and 68．）It has been doubted，however，from the appa－ rent improbability that any people shonld call them－ selves Seres，or silkworms，whether the name of Seres was ever really borne by any nation；and it has been conjectared that it was merely a mercantile appella－ tion by which the natives of the silk district were known．（Latbam，in Cliss，1／us，vol．jii．p． 43 ，seq．） Lassen（Ind．Alt．i．p．321）has prodnced from the Mahabharata，ii．50，as the real names of the Seres， those of Caka，Tukhara，and Kanka，who are re－ presented as buinging just the same gouds to market as are ascribed by Pliny（xxaiv，14．s．41）to the Seres，namely，wool，skins，and silk．Yet，thongh it may be allowed to be improbable that a people should have called themselves＂Silkworms，＂yet it seems hardly less so that such an appellation shonld bave heen given them by foreigners，and that they should have been known by it and no other for a
perind of sevcral centuries．On the other hand， may it not be possible that the product was called after the perple，instead of the people after the pro－ duet？We are not without examples of an analo－ gous procedure；as，for instance，the name of the phasis，or pheasant，from the river Phasis；of our own word currants，nnciently and properly Corinths， from the place whence that small species of grape was originally brought，\＆c．However this may be， we may refer the reader who is desirons of a further account of the origin and manufacture of silk，to an excellent dissertation iu the Textrinum Antiquarum． of Mr．Yates（part i．p． 160, seq．），where be will find all the passages in ancient authors that bear upon the subject carefully collected and discussed．

Besides its staple article，Scrica also produced a vast quantity of precious stones of every kind（ $E x$ ． pos．tot．Mundi，ap．Hudson，iii．p．1，seq．），as well as iron，which was esteemed of a better quality even than the I＇arthian（Plin．l．c．）and skins（Per．M． Erythr．p．22；Amm．l．c．）

According to Pansanias（vi．22．§ 2）the Seres were a misture of Scythians and lndians．They are mentioned by Strabo（xv．p．701），but only in a eursory manner．It appears from Mela（iii．7）and Irom I＇liny（vi．17．s．24），compared with Ensta－ thius（ad Dionys．Per．v．753，seq．），and Ammianus Mareellinus（ $l$ ．c．），that they were a just and gentle people，loving tranquillity and comfort．Although addicted to commeree，they were completely isolated from the rest of the world，and carefnlly avoided all intercourse with strangers．From these habits，they were obliged to earry on their commercial transac－ tions in a very singular manner．They inscribed the prices of their goods upon the bales in which they were packed，and then deposited them in a solitary huilding called the Stone Tower；perbajs the same place mentioned by I＇tolemy（vi． $15 . \S 3$ ） under the name of Hormeterion，situated in a valley on the upper course of the Jaxartes，and in the Acythian district of Casia．The Scytbian merehants then alproached，and having deposited what they deemed a just price for the goods，retired．After their departare，the Seres examined the sum de－ josited，and if they thought it sufficient touk it away，leaving the goods；bat if not enough was found，they removel the latter instead of the money． In the description of this mode of traffic we still recognise the characteristics of the modern Chinese． The Parthians also traded with the Neres，and it was probably throngh the former that the Romans at a later perion procused most of their silk staffs； though the Partlians passed them of as Assyrian goods，which seems to have been believed by the Lumans（1＇lin．xi，22．s．25）．After the overthrow of the Parthian empire by the Persians，the silk trade maturally fell into the hands of the latter． （Vopisc，Aurel．c． 45 ；Procup．B．Pers．i．20，\＆e．） With regard to their persons，the Seces are de－ scribed as being of unusual size，with blue eyes，red hair，and a rough voice（ 1 lin．vi．22．s．24），almost totally anaequainted with diseases and bexhly infir－ mities（Expos．tot．Mundi，l．e．），and consequently reacling is very great age（Ctes．l．c．；Strab．x： p．701；Lucian，Macrob．5）．They were armed with bows and arrows（IIor．Od．i，29，9；Charie． vi．3）．I＇tolemy（ $l l$ ．ce：）enumerates several dis－ tinet tribes of them，as the Amuibi，in the extreme N．，on the mountains named after them；the Zizyges， between them and the Aosacian monutains；the Damuac，to the S ．of these；and still further S ．，
down to the river Oechardes，the Pialae；the Oechardae，who dwelt about the river of the same name；and the Garenaei and Nabannae，to the E．of the Annibi．To the S．of these again was the dis－ trict of Asmiraea．near the mountains of the same name，and still further in the same direction the Issedones；to the E．of whom were the Throani． To the S．of the Issedones were the Asparacae，and S．of the Throani the Ethaguri．Lastly，on the extreme southern borders were seated the Batae and the Ottorocorrae，－the latter，who must doubtlees be the same people called by Pliny Attacori，on the like－named mountain．To the southern district must also be ascribed the Sesatae mentioned in Arrian＇s Peripl．M．Erythr．（p．37），small men with broad foreheads and flat noses，aud，from the de－ scription of them，evidently a Mongol race．They migrated yearly with their wives and children to the borders of sinae，in order to celebrate their festivals there；and when they had returned to the interior of their country，the reeds which they left behind them，and which bad served them for straw， were carefully gathered up by the Sinese，in order to prepare from it the Malabatbron，a species of ointment which they sold in India．（Comp．Ritter， Erdkunde，ii．p．179，v．p．443，2nd ed．；Buhlen， das Altc Indien，ii．p．173；Heeren＇s，Ideen，i． 2. p．494）．According to Ammianus（l．c．）the towns of Serica were few in number，but large and wealthy． Ptulemy，in the places cited at the head of this article，names fifteen of them，of which the most important reem to have been，Sera，the capital of the nation；Issedon；Throana，on the E．declivity of tho Asmiraei mountains，and on the eavternmost source of the Gechardes；Asmiraea，on the same stream， but soniewhat to the NW．of the preceding town； Aspacara，on the left bank of the Bautisus，not far from its most western aource；and Ottoro－ corra．
［T．H．D．］
SERLMUM（ $£ \rho_{1} \mu 0 v$, Itnl，iii． $5 . \S 28$ ），a town on the Borystbenes，in the interior of European Surmatia．
［T．H D．］
SERIPHOS nr SERIPHUS（さépıфos：E゙th．玉 ipi申wus：Serpho），an inland in the Aegaean sea，and one of the Cyclades，lying between Cythmos and Siphnos．According to Pliny（iv．12．s．22）it is 12 miles in circumference．It possessed a town of the same name，with a harbour．（Scylax，p．22； Ptol，iii．15．§ 31．）It is celebrated in mythology as the place where Dansëe and Perseus were driven to shore in the chest in which they had been exposed by Acrisins，where P＇erseus was brought up，and where he afterwards turned the inhabitants into stone with the Gorgon＇s head．（Apollod．ii．4．§ 3； Pind．Pyth．ェ．72，sii．18；Strab．x．p． 487 ；Ov， Met．v．242．）Seriphos was colonised by Iunians from Athens，nad it was one of the few islands which refnsed submission to Xerxes．（Herod．viii．46，48．） By subsequent writers seciphos is almost always mentioned with contempt on account of its poverty and insignificance（Aristoph．Achurn．542；Plat． Kep．i．p． 329 ；Plut．de Eirsil．7．p．602；Cic．de Nut．Dear．i．31，de Senect．3）；and it was for this reaton employed by the lioman emperors as a place of banishment for state criminals．（Tac，Ann．ii，85， iv． 21 ；Juv．vi．564，x． 170 ；Senee，ad Consol．6．） It is curious that the ancient writers make no men－ tion of the iron and copper mines of Seriphos，which were，however，worked in antiquity，as is evident from existing traces，and which，one might have supposed， would have bestowed some prostrerity upon the island．

But though the ancient writers are silent about the mines, they are careful to relate that the frogs of Seriphos differ from the rest of their fraternity by being dumb. (Plin. viii. 58. s. 83; Arist. Mir. Ausc. 70; Aelian, Hist. An. iii. 37 ; Suidas, s. v. Bátpaxos éк $\Sigma \in p i \not(o 0$.$) The modern towa stands$ upon the site of the ancient city, on the eastern side of the island, and contaios upwards of 2000 in habitants. It is built upon a steep rock, about 800 feet above the sea. There are only a few remains of the ancient city. (Ross, Reisen auf den Griech. Inseln, vol. i. p. 134, ser. ; Fiedler, Reise, yc. vol. ii. p. I06, seq.)

## COIN OF SEnIPIIOS.

SERMIO, a town of the Celtiberi in Hispania Tarraconensis. (Itin. Ant. p. 447.) Variously identified with Muel and Mezalocha.
[T. H. D.]
SERMILLE ( $\Sigma \in \rho \mu \Delta ̃ \lambda \eta$. Herod. vii. 122; Thuc. v. 18; $\Sigma_{\in \rho \mu 0 \lambda i ́ a, ~ S e y l . ~ p . ~}^{26}$; Hecataens, op. Steph. B. s. v.; Böckh, Inscr. Graec. vol. i. p. 304 : Eth. $\Sigma_{\text {Eppuintor }) \text {, a town of Chalcidice, between Galepsus }}$ and Mecsberna, whicl gave its name to the Toronaic gulf, which was also called Sermilicus Sinus
 Ormylia, between Molyvo and Derna, is identitied from its name, which differs little from the ancient form, with the site of Sermyle. (Leake, Northern Greece, vol. iii. p. 155 .)
[E. B. J.]
SERMM'LICUS SINUS. [Sermyle.]
SEROTA, a town on the frontier between Upper and Lower Pannonia, on the right bank of the river Dravus. (It. Ant. p. 130 ; It. Ifieros. p. 562 ; Geog. Rav. iv. 19, where it is called Sirore, wnile the Table calls it Sirota.) It is possible that this town may bave belonged to the tribe of the Serretes mentioned by Pliny (iii. 28) ns inhabiting a part of Pamnonia. The town of Serota is commonly identified with the modern Verücze or Ierovits. [L.S.]

SERPA, a place in Hispania Baetica, on the Aoas, and in the territory of the Turdetani. (Itin. Ant. p. 426.) It still bears its ancient name. See Revendi Aut. Lusit. p. 194.
[T. H. D.]
 § 4), a village on the coast of Cilicia, lying between Jallus and Aegae (Ayaz).

SERRAPILLI, a tribe mentioned by Pliny (iii. 28), as dwelling on the river Drarus in Pannonia. The resemblance of name has indnced some geographers to assume that they dwelt about the modern town of Pilisch; but this is a mere conjecture.
[L. S.]
SERRETES, [SERota.]
SERRHAE. [sints.]
SERRHEUM or SERRHIUM ( $\Sigma e^{p} p \rho_{t o y}$, Dem. p.
 promontory and town on the southern coast of Thrace, now Cape Mohri. It lay to the west of Maroneia, and apposite to the island of Samothrace. It is repeatedly mentioned by Demosthenes (pp. 85, 114, 133, R.), as having been taken by I'hilip, contrary to his engagements with the Athenians; and Livy (xxxi. 16) states that it wais one of the Thracian towns captured by Philip V. in the
year s. C. 200. (I'lin. iv. 11. s. 18; Mela, it. 2.) According to Stephanus Byz. ( $l$ c.) a town on the island of sumothrace bore the same name.
[J. R.]
SERRI, a people of the Asiatic Sarmatis, on the Enxine. (Plin. vi. 5. s. 5.) Mela (i. 19) places them between the Meianchlaevi and Siraces. [T. H. D.]

SERRIUM. [Sernhecm.]
SERVIODU'RUSI, a town in the nortb-east of Vindelicia on the Daunbe, on the road from Reginum to Boiodurnm, near Augustana Castra. (Tab. Peut.; Not. Imp.) It mast have occupied the site of the modern Straubing, or some place in the neighbourhood, such as dzelburg, where aucient remains still exist.
[L. S.]
SERVI'TIUM, a town in the southern part of Upper Pannonia, on the river Drarus, on the road from Siscia to Sirmium. (It. Ant. p. 268; Geng. Ruv. iv. 19, where it is called Serbetium ; Tub. Peut.) Its site has beea identified with severaI modern places; but the most probable conjecture is that it occupied the place of the modern Sieverozczi, the point at which the roads leading from Sirmimen and Siscia to Salona met.
[L. S.]
SESAIIUS ( $\sum \eta \sigma a \mu \dot{s}$ ), a small river on the coast of Paphlagonia, flowing into the Euxine near the tuwn of Amastris, whence in later times the river itself was called Anastris. (Anonym. Peripl. P. E. p. 5 ; Marcian. p. 71 ; Amastris.) [L.S.]

## SESARETHUS. [TACLINti.]

SESATAE. [SEMCA.]
 Peripl. M. Erythr. p. 30), a group of islands opposite to the S. coast of India intra Gangem, and piobably in the Sious Colchicns - where I'tuleny (vii. I. § 10) places a town with the somewhat similar name of $\mathbf{\Sigma}$ woikoupon. It must have been in the neighbourhool of Taprobane, since the l'eriplus mentions the Aifi$\delta i \omega \nu$ vi, oos as close to the Sesecrienae, whilst l'tolemy (vii. 4. \$ 11) places the same island amongst a number of others lying before Taprobane, many of which must uadoubtedly have belonged to the Sesecrienate.
[T. H. D.]
SESSITES (Sesio), a river of Gallia Transpadana, and one of the most impurtant of the northera tributaries of the Padus. It flows beneath the walls of Vercellae (Vercelli), and joios the Padus about 16 miles below that city. Its name is noticed anly by Pliny (iii. 16.s. 20) and the Geographer of Ravemnat (iv. 36), wha writes the name Sisidus. [E. H. B.]

SESTIA'NAE ARAE (callel by Ptoleny Einotioo $\mathrm{B} \omega \mu \mathrm{ol}$ ákpov, ii. 5. § 3), the W. promontory of the N. coast of Gallaecia in Hispania Tarraconensis. It bad three altars dedicated to Augustus, whence its name. (Plin. ir. 20. s. 34 ; Mela, iii. 1.) It is the present Cabo Villano (Florez, Esp. Sugr, xx. p. 44 : Sistini, Med. /sp. p. 103.) [T. H. D.]

SESTIA'liLA I'RON. (Enotıapia ăkpa, Ptol. iv. 1. § 7 ), a headland on the N. coast of Mauritania Tingitaon, between capes Itussadir and Abyla. It is probably the same that is called Cannarnm Promontorium in the ltin. Ant. (p. 11), Jying at a distance of 50 miles from liussadir, or the present Cubo Quilates.
[T. H. D.]
SESTINUM (Eth. Sestinas: Sestino), a town in the interior of Uubria, mentioned only by Pliny, who enumerates the Sestinates among the towns of that region (Plin. iii. I4. s. 19 ; Gruter, Inser. p. 108. 7 ), hut which still retains its ancient nanc. It is sitnated among the Ajennines, at the source of the river Foylia ( P isanrus).
[E. II. B.]

SESTUS（ミทotós：Eth．ミinctios），the principal town of the Thracian Chersonesus，and opposite to Abydus，its distance from which is variously stated by ancient writers，probably because their measurements were made in different ways；some speaking of the mere breadth of the Hellespont where it is narrowest； others of the distance from one city to the other； which，again，might be reckoned either as an imagi－ nary straight line，or as the space traversed by a vessel in crossing from either side to the other， and this，owing to the current，depended to some extent upon which shore was the starting point． Strabo（siii．p．591）states that the strait is 7 stadia across near Abydus；but that from the harbour of Abydus to that of Sestus，the distance is 30 stadia．＊（On this point the following references may be corsulted：Herod，vii．34；Xen．Hell．iv． 8. 5 ；Polyb，xxi．29；Scyl．p．28；1＇lin．iv．11．s． 18. Ukert（iii．2．§ 137，note 41）has collected the vari－ ous statements made by the moderns respecting this subject．）

Owing to its position，Sestus was for a long period the unnal point of departure for those crossing over from Europe to Asia；but subsequently the Romans selected Callipolis as the harbour for that purpose， and thus，no doubt，hastened the decay of Sestus， which，though never a very large town，was in earlier times a place of great importance．According to Theopompus（ap．Strab．l．c），it was a well－fortified town，and connected with its port by a wall 200 feet in length（ $\sigma \kappa$ é $\lambda \in i \delta t \pi \lambda \epsilon \in p \psi$ ）．Dercyllidas，alsu，in a speech attributed to him by Xenophon（IIell．iv． 8．§ 5），describes it as extremely strong．

Sestus derives its chief celebrity from two cirenm－ stances，－the nne poetical the other historical．The former is its connection with the romantic story of Hero and Leander，too well known to render it neces－ sary to to more than merely refer to it in this place （Ov．Iler．xviii．127；Stat．Silr．i．3．27．\＆c．）；the latter is the formation（B．C．480）of the bridge of hoats across the Hellespont，for the passage of the army of Nerses into Europe；the western end of which bridge was a little to the south of Sestus （Herod．vii．33）．After the battle of Myeale，the Athenians seized the opportunity of recovering the Chersonesus，and with that object laid siege to Ses－ tus，into which a great many Perians lad hastily retired on their approach，and which was very in－ sufficiently prepared for defence．Notwithstanding this，the garrison held out bravely during many months；and it was not till the sputog of B．C． 478 that it was so much reduced by famine as to have become mutinus．Tise governor，Artayctes，and other Persians，then fled from the town in the night； nut on this being diseorered，the inlnaitants opened their gates to the Athenians．（1Ferod．ix．115，seq．； Thuc．i．89．）It remained in their possession till after the battle of Aegospotami，and used to be called by them the corn－chest of the Pirapeus，from its giving them the command of the trade of the Eusine．（Arist．Rhet．iii．10．§ 7．）At the clase

[^27]of the Peloponnesian War（b．c．404），Sestus，with most of the other possessions of Athens in the caune quarter，fell into the hands of the Lacedaemoniano and their Persian allies．During the war which soon afterwards broke ont between Sparta and Persia， Sestus adbered to the former，and refused to oley the command of Pharnabazus to expel the Lacelae－ monian garrison；in consequence of which it was blockaded by Conon（b，c．394），but without much result，as it appears．（Xen．Hell．iv．8．§ 6．）Some time after this，probably in consequence of the peaco of Autaleidas（B．c．387），Sestus regained its in－ dejendence，though only for a time，and perhaps in name merely；for on the next occasion when it is mentioned，it is as belonging to the l＇ersiau satrap， Ariobarzanes，from whom Cotys，a Thracian king， was endeavouring to take it by arms（B．C． 362 ？）． He was，however，compelled to raise the siege，pro－ bably by the united forees of Timotheus and Agesi－ Laus（Xen．Ages．ii．26；Nep．Timoth．1）；the latter authority states that Ariobarzanes，in return for the services of Timotheus in this war，gave Sestus and another town to the Athenians＊，from whom it is said to have soon afterwards revolted，when it submitted to Cotys．But his successor，Cersobleptes，surren－ dered the whole Cliersonesus，inchuding Sestus，to the Athenians（B．c． 357 ），who，on the contirued refusal of Sestus to yield to them，sent Clares，in B．C． 353 ，to reduce it to obedience．After a short resistance it was taken by assanlt，and all the male inhabitants capable of bearing arms were，by Chares＇ orders，barbarously massacred．（Diod．avi．34．）

After this time we have little information resjecting Sestus．It appears to lawe fallen under the power of the Macedonians，and the army of Alexander the Great assembled there（ $\mathrm{m} . \mathrm{C} .334$ ），to be conveyed from its harbour in a Grecian fleet，from Europe tothe shores of Asia．By the terms of the peace concluded （E．C．19\％）between the Rornans and Pbilip，the latter was required to withdraw his garrisons from many places both in Europe and in Asia；and on the demand of the Rhodians，actuated no doubt by a desire for free trade with the Euxine，Sestus was included in the number．（Liv，xxxii．33．）During the war with Antiochus，the Romans were about to lay siege to the town（8．C．190）；but it at once surrendered． （Liv．xxxvii．9．）Strabo mentions Sestns as a place of some commercial importance in his time；but history is silent respecting its subsequent destinies． According to D＇Anville its site is occupied by a ruined place called Zemenic ；but more recent authorities name it Jalowa（Mannert，vii．p．193）．（IIerod．is． 143；Thuc．viii．62；1＇olyb．iv．44；Diod．xi．37； Arrian，Anab．i．11．§§ 5，6；1＇tol，iii．12．§ t．viii． 11．§ 10；Steph．B．s．v．；Scymn．708；Lucan，ii． 6．4．）
［J．1．］

## SESUVH［Esstr］．

SETAB1S．［SMETABIS．］
SETAE，SETTAE，or SAETTAE（さíai，ฐí－ Tat，or Eaítrat），a town in Lydia，near the sources of the river llermus，whiell is not mentioned by any of the earlier writers．（Hieroel．p． 669 ；1＇tol．x． 2. § 21；Concil．Comstant．iii．p．502；Concil．Nicaen．
＊There is much obscurity in this part of Grecian history，and the statement of Nepos las been con－ sidered inconsistent with several passages in Greck authorities，who are undoubtedly of incomparably greater weight than the unknown compiler of the biographical notices which pass under the name of Nepos．（See Dict．Biugr．Vol．HI．p． 1146 ，a．）
ii．p． 591 ；comp．Sestini，Geog．Num．p．55．）It is commumly supposed to have occupied the site of the modern Sidas Kaleh．
［L．S．］
SETA＇NTII（之єт\＆utiol，Ptol，ii．3．§ 2），a tribe probably belonging to the Brigantes on the W．coast of Britannia Romana，and pussessing a harbour （ $\Sigma \in \tau a v \tau i \omega \nu \lambda \mu \eta \nu$, Ptol．l．c．），commonly thought to lave been at the month of the river Ribble． Reichard，however，places it on the S．coast of the Solway Frith，while Camden（p．793）would read， with one of the MSS．of Ptofemy，＂Seqontioram Portns，＂and seeks it near Caernarvon．［T．H．D．］ SETANTIORUM＇PORTUS．［SETASth．］
 § 2），an estuary on the W．coast of Britannia Ro－ mana，opposite the isle of Mona，into which the Hee discharges itself．
［T．H．D．］
SETELSIS（ $\Sigma_{e \tau \in \lambda \sigma i s ~ o r ~} \Sigma_{\in \lambda \in \nu \sigma i ́ s, ~ P t o l . ~ i i . ~ 6 . ~ § ~}^{\text {S }}$ 72），a town of the Jaccetani in Hispania Tarra－ conensis，now Solsona．See a coin in Nestini，p． 189.
［T．H．D．］
SETHERIES，a river of Asiatic Sarmatia，on the E．coast of the Pontas Euxinus，and in the territory of the Sindi．（Plin．vi．5．s．5．）
［T．H．D．］
SE＇T1A（之 $\eta$ ria：Eth．Setinus：Sezze），an ancient city of Latiom，situated on the S．slope of the Vol－ scian muuntains，between Norba and Privernum， looking over the Pontine Marshes．It is probable that it was originally a Latin city，as its name is found in the list given by Dionysius of the thirty cities of the Latin League．（Dionys．v．61．）But it must have fallen into the bands of the Volscians， at the time their power was at its heigbt．No mention of it is，however，fonnd during the wars of the Romans with that people until after the Gaulish invasion，when a Roman colony was established there in B．c．392，and recruited with an additional body of colonists a few years afterwards．（Vell．Pat．i． 14；Liv．vi．30．）At this time Setia must have been the most advanced point of the Roman dominion in this direction，and immediately adjoined the ter－ ritory of the Privernates，who were still an inde－ pendent and powerful people．［Priverves．］This exposed the new colonists to the incursions of that people．who，in E．C．342，laid waste their territory， as well as that of Norba．（Liv．vii．42，viii．1．） The Privernates were，however，severcly punisbed for this aggression，and from this time the Setini seem to have enjoyed tranquillity．But it is re－ markable that a few years later L．Annins of Setin appears as one of the leaders of the Latins in their great war against Roone，B．c． 340 ．（Liv．viii．3．） Setia was a Colonia Latina，and was one of those which，during the pressure of the Second Punic War（n．с．209），declared its inability to furnish any further supplies either of men or money．（Liv． xxvii．9．）It was，nt a later period of the war， severely punisbed for this by the imposition of much heavier contributions．（Id．xxix．15．）From its strong and somewhat secluded position，Setia was sclected as the place where the Carthaginian hos－ tages，given at the close of the war，were detained in cnstody，and in r．c． 198 became in consequence the scene of a very dangerous conspiracy among the slaves of that and the adjoining districts，which was suppressed by the energy of the praetor L．Cor－ nelins Mernla．（1d．xxxii．26．）From this time we hear no more of Setia till the Civil Wars of Mlarius and Sulla，when it was taken by the latter after a regular siege，n．c． $8 \%$ ．（Appian，B．C．i． 8i．）It appears therefore to have been at this
period a strong fortress，an admantage which it owed to its position on a hill ns well as to its forti－ fications，the remains of which are still visible． Under the Empire Setia seems to have continued to be a flourishing municipal town，but was chicfly celebrated for its wine，which in the days of Martial and Juvenal seems to have been esteemed one of the choicest and most valuable kinds：according to Pliny it was Augustus who first brought it into vogue．（Plin．xiv．6．s．8；Martial，x．36．6， xiii．112；Juv．x． 27 ；Strab．v．pp．234， 237 ；Sil． Ital．viii．379．）We learn from the Liber Colouiarum that Setia received a colony under the Triumsirate； and it is probable that it subsequently bore the title of a Colonia，thongh it is not mentioned as such hy Pliny．（Plin．iii．5．s．9；Lib．Culen．p．237； Orell．Inser．2246；Zumpt，de Colon．p．338．）

The position of Setia on a lofty hill，looking down upon the Pontine Marshes and the Appian Way，is alluded to by several writers（Strab．v．p．237； Martial，x．74．11，siii．112），among others in a fragment of Lucilius（ap．A．Gell．xvi．9），in whose time it is probable that the highroad，of the ex－ treme hilliness of which he complains，passed by Setia itself．It was，however，ahont 5 miles distant from the Appian Way，on the left band．There can be no donbt that the modern town of Sezze occupies the same site with the ancieot one，as ex－ tensive remains of its walls are still visible．They are constructed of large polygonal or rudely squared blocks of limestone，in the same style as those of Norba and Cora．The substructions of several edifices（probably temples）of a similar style of construction，also remaiu，as well as some incon－ siderable ruins of an amphitheatre．（Westphal， Rom．Kamp．p．53；Dudwell＇s Pelasgic Remains， pp．115－120．）
［E．H．B．］
SE＇TIA（之étia，Ptol．ii．4．§9）．1．A town of the Turduli in Hispania Baetica，between the Baetis and Monnt Hlipula．

2．A town of the Vascones in IIispania Tarra－ conensis．（Itol，ii．6．§ 67．）［T．H．D．］

SE＇TIDA（ Turdetani in the W．of Hispania Baetica．［T．H．D．］

SEIIDA＇TA（ $\Sigma \in \tau i \delta a v a)$ ，a town in the north－ east of nncient Germany，on the north of the sources of the Vistula，so that it belonged either to the Omani or to the Burgundiones．（Ptol，ii．11．§28．） Its exact site is not known，though it is commonly assumed to have oceupied the place of the modern Zydowo on the soath of Gnesen．（Wilhelm，Ger－ manien，p．253．）
［L．S．］
SEIISACLDN（ミetioakov，Ptul．ii．6．§ 52），a town of the Murbogi in the N．of Ilispania Tatra－ conensis．
［T．H．D． 7
sETIUS MONS or l＇ROM．［Blascon；Fecti JvaUN．］

SETOTRIALLACTA（इєтотpia入入ákтa，Ptol． ii．6．§ 56），a town of the Arevaci in Hıspania Tar－ raconensis．
［T．H．D．］
SETO VIA（氵eqovia，Appian，Illyr．27），a town of Dalmatia，situated in a well－wooded valley，which was besieged by Octavius in the campaign of $\mathrm{x} . \mathrm{c}$ ． 34．It has been identified with Sign，situated in the rich valley of the Cettina，and bounded by mountains to the right and left．
［E．B．J．］
 a town in the south of Germany between the upper part of the Danube and the Silva Gabreti，perhaps belonging to the territory of the Narisei（Ptol．ii． 11. § 30）；but its site is quite unknown．［L．s．］

SETUIA（Sietovia），a town of the Quadi，in the south－east of Ciermany，apparently near the sonrees of the river Aucha，a tribntary of the lambe，in the Carpathian mountains．（P＇tol．ii．11．§ 29．） Its identification is only matter of conjecture．［L．S．］

SEVACES（ Ieovanes），is tribe in the western $^{\text {a }}$ part of Noricmm，is mentioned only by I＇tolemy（ii． 14．§ 2．）
［1．S．］
SEVE＇RI MURUS．［Vallem．］
SEVE＇RUS MOXS，a mountain of Central Italy mentioned only by Virgil（Aen，vii．713），who places it among the Galines，and associates it with the Mons Tetrica．It therefore evidently belonged to the lofty central ranges of the Apenuines，in that part of Italy，but cannot be identified with more accuracy．［Arexninus．］
［E．11．B．］
SEUMARA or SEUSAMORA（ $\Sigma$ ©́papa and $\Sigma \in U-$ $\sigma$ ámopa，Strab．xi．p．501），a town in the Caucasian Iberia．
［T．H．D．］
SEYO，a lofty monntain in the extreme north of ancient Germany，in the island of Ncandia，in the tervitory of the Ingaevones．It was belicved to equal in extent and magnitnde the Ripaei Montes．（Plin． iv． 27 ；Sulin，20．）There can be no dombt that this mountain is the same as Mount Kjölen which at present separates Sweden from Noruxy，and the southern branch of which still bears the name of Seve－ Ryggen．［Scandia．］
［L．S．］
SEURRI．［svatrRr］
SEX．［Sixetinum．］
SESANTAPR1sTA（＇Ȩavtámpı $\sigma \tau \alpha$ ，Procop．de Aed．iv．11．p．307），a town of Moesia Inferior，on the Danube，on the great high－road between Tri－ mamnium and Tigra．（Itin，Ant．p．222．）Ac－ cording to the Notit．lmp．．（where it is called Sexagintaprista），the 5th cohort of the 1st Legio Ital．， together with a squadron of cavalry，lay in garrison here．Some identify it with Rustschuk，whilst others place it further to the E．，near Lipmik：［T．H．D．］
sextantio，in Gallia Narbonensis．The true name of this place is preserved in an inseription found at Nomausus（Nimes），and published by Menard．The name is written Sextatio in the An－ tonine Itin ；and Sostantio in the Jerusalem Itin． The remains of Sestantio are supposed to be thuse which are ：about 3 miles north of Montpellier，on the banks of the Ledus（Lez）．
［G．L．］
SHAALABB1N（ $x \pi \lambda a \mu i y, ~ L X X$.$) ，a city of the$ tribe of Dan（Josh．xix． 42 ）joined with Ajalon （＇Iaa入 ${ }^{\prime} \nu$ ），and mentioned in the LXX．（not in the Hebrew）as one of the cities in which the Anorites sontinued to dwell，after the occuoation of Camana by the lsraclites（six．48）．This last fitct identifies it with the Shaalbim（LXX．Ga入aBiv）of the book of Judges（i．35），which is also joined with Aijahn， and of which the same fact is related．It is there flaced in Nount lleres Ensebius mentions a village named Salaha（ $\Sigma \alpha \lambda \alpha S^{\prime}$ ），in the borders of Selbaste（Omomast．s．r．），wheh conld not be in Dad：but S．Jumse（Comment．in Ezech．xlsiii．） mentions three towns in the tribe of Dan，Ailou， Selebi and Emans．It is joined wilh Nakaz and leeth－shemesh in 1 Kiugs iv，9，which also indicates a situation in or near the plain of Sharon．In Mr． Smith＇s list of plaees in the district of Ramleh，is a village mamed Sclbit，containing all the radials of the soripture name，and probably identical with Selcbi of Jusephans，as the modern lalo is with Ajalum and＇Ameris with Vmomats，Its place is not definitely fixed．（Robinson，Bibl，Res．sol，iii． 2ad appendix，1．120．）［G．II．］

SIIALISIIA（LAX．Alex．इainı $\sigma \sigma a$, Vnt．$\Sigma \in \lambda \not \subset a ́)$ a district of l＇alestine，in or near Monut Ephraim（1 Sam．ix．4），in which was probably sitnated Baal Shalisha．［B．asl Shatishi．］
［G．W．］
SHARON（さapóv：Fith．さapwvitns）．1．Iart of the great western plain of Palestine，distingnished for its fertility，mentioned by the prophet Isaiah with＂the glory of Lebanon，and the excelleucy of Carmel and Sharon．＂（1saiah，xxxv．2．）＂The rose of Sharon＂is used proverbially in the Canticles （ii．1．）It is remarkable that the name does nut occur in either of these passages in the LXX．，but in the latter is translated by ävoos roû $\pi \in \delta i o u$ ，by which appellative Syimmachus translates it in the former passage，while Theodotion and Aquila retain the proper name．Its richness as a pasture land is intimated in 1 Chronicles（ $x \times$ vii．29），where we read that＂Sbitrai the Sharouite＂was overseer of David＇s ＂herds that fed in Sharon．＂it douotless derived its name from a village mentioned only in the New Testament（Acts，ix．35）in comection with Lydda， in a manner that intimates its ricinity to that town．Its site has not been recovered in modern times，but it occurred to the writer，on the spot， that it may possibly be represented by the village of Butus（ $=$ P＇eter），on the north of the road betwern Lydda and Bethoron，and may have changed its name in honour of the Apostle，and in commemora－ tion of the miracle wrought by him．S．Jerome in his commentaries limits the name to the district abut Juppa，I．ydda，and Iamnia（ad Ies，xxsiii．Ixv．） Ensebius calls the district Saromas（ （apoudás），and extends it from Juppa to Caesareia（of Palestioe） while other writers reckon to it the whole of the coast north of Caesareia，as far as Carmel．（Ono－ mast．sub．roce．）The width of the plain abont $J$ affa is little less than 18 miles，and the luxuriaoco of its suil is still attested by the numerous wild flowers with which it is carpeted in the spring， roses，lilies，tnlips，narcissus，anemones，carmations， and a thonsand others，no less tban by the aban－ dant vegetation and iocrease where the land is cul． tivated as garden or corn land．（Ritter，Palistina， \＆c．vol．iii．part i．pp．25，586－588．）Reland has shown that the classical name for this fruitful dis－ trict was $\delta \rho 0 \mu$ ós，which Strabo joins with Carnel， as then in the power of the pirates who had Joppa for their port（xvi．2．§ 28，p．759）．Reland sug－ gests an iagenions account of this synonym，which appears also in Josephus（who does not nse the Suriptnre name）in conncetion with Carmel，in a man－ ner that clearly points to the district described by Suabo under the same name．In one passage the name is used in the plaral（ $\Delta$ pupoil $\delta$ e $\tau \grave{ }$ रwpion калєital，Aut．xiv．13．§ 3）；in the parallel pas－
 Bell．Juh．i．13．§ 2）．Now opuuós，accordmg to ancient etymologists，signified any kind of wood， and，as Jitter remarks，the traces of the forests of Sharon are still to be discovered in the vicinity of Carmel；but according to Pliny the Sinns Laromicus derived its name from an oak grove，＂ita Graecia antiqual appellatate quercum．＂（II．．1．iv．5．s．9．） The very probable conjecture of lieland therefore is that $\Delta$ poubs is simply a translation of Naron or Saront，for according to the Etymologicom Magnum ミapoviठes ai koīスai סpúes（ad voc．ミapoúuevos）．
2．Ensebins and St．Jerome recognise anuther Sharon，to which they apply the prophecy of Isaiuh （xxxiii．9），＂Sharon is like a wilderness＂（＊$\lambda \eta$ éүevero o Sápav，LNX．），which they refer to the
conntry between Tabor and the sea of Tiberias （Onomast．s．v．）But as the name is bere intro－ dnced in connection with Lebanon and Carmel，－ Bashan being also introduced，－and as no other notice of a Galilaean Sharon is to be met with，it seems more reasonable to refer the notice in Isaiah to the plain of Sharon on the west coast．
3．There was certainly another Sharon beyond Jor－ dan，apparently near the recrion of Gilead，for the chil－ dren of Abihail，of the tribe of Gad，are said to have ＂dwelt in Gilead in Bisban，and in her towns，and in all the suburbs of Sharon＂（1 Chron．v．16）；and it is possible that＂the herds that fed in Sbaron，＂ under charge of David＇s cbief herdsman，Shitrai the Sharonite，may have pastured in this trans－Jordanic district，not in the plain of the Mediterranean． Reland indeed maintains that the mention of the suburbs of Sharen in consection with the Gadites，is no proof of the existence of a trans－Jordanic Sbaron， for that，as the tribe of Gad was specially addicted to pastoral pursuits，they may have pastored their flocks in the suburbs of the towns of other and dis－ tant tribes．But this hypothesis seems much more forced tban the very natural theory of a second Sharon in the tribe of Gad properly so called． （Palaestina，pp．370，371，988．）
［G．W．］
 इavń）．＂The valley of Sliavel，which is the king＇s dale，＂where Melchizedek met Abrahaun returning from the slanghter of the kings．（Gen．xiv．17．）The learned are not agreed concerning the city of Melchi－ zedck．They who regard his Salem as identical with Jernsalem，naturally identify＂the king＇s dale，＂eqni－ valent to＂the valley of Sibaveh，＂with＂the king＇s dale＂where Absalom erected his monument（2 Sam． xviii．18），and place it in the vicinity of＂the king＂s gardens，＂in the valley of the Kedron，where tradition points ont＂Absalom＇s band＂or place．［Jeresaleas Vol．1I．p．17，a．and p．23，b．］

SIATA，an island on the Gallic coast，which is mentioned in the Maritime ltin．after Vindilis，or Belle Isle．D＇Anviile conjectures Siata to be the Isle de Ilouat，which is off the coast of the depart－ ment of Morbihan，and between Belle Isle and the mainland．
［G．J．．］
SIATUTANDA（ミıatoútavסa），is mentioned by Ptolemy（ii．11．§27）as a town of Germany；but had probably no existence at all，the geographer inagining that in the words of Tacitns（Snn．is． 73），＂ad sua tutanda digressis rebellibus＂the name of some town was contained．Notwithstanding this evident origin of the name，some modern geographers still persist in assuming a town Siatntanda．［L．S．］

Al＇BAE（Eíbat，Arrian，Ind．c．5；Dinul．xvii． 96 ； Strab．xv．p．688），a nation of the Panjub，beluw
the junction of the Hydaspes and Acesines, encountered by Alexander in his attempt to invade 1odia. They are described as a rude, warlike people, armed only with clubs for defensive weapons. The Greeks noticed this use of the club, and that the people were in the habit of branding the representation of a club on the backs of their cattle, and that they were clothed in the skins of wild animals. From these facts they inferred that they must be descendants of Hercules. There can be doubt that they are the same race as are called Sobii in Curtins (ix. 4. § 2). A tribe of similar charaeter, called Siapul or Siapuch, still exists in that conntry, who use the club, and wear the skins of goats for clothing. (litter, vii. p. 279. v. p. 467 : Bohlen, Alte-Indien, i. p. 205.) It is possible that they have derived their name from the god Sira. [V.]

SIBA'R1A, a town of the Tettones in Hispania Tarraconensis, N . of Salmantica, and on the read from Emerita to Caesaraugusta. (Itin. Ant. p. 434.) Variously identified with Santiz, Fuente de Saburra, I'eñausende, and Zamocina. [T. H. D.]

SIBDA ( place in Caria, and one of the six towns which were given by Alexander the Great to Ada, a danghter of king Hecatomnus of Halicarnassus, and thus became subject to Halicarnassus. (Stejh. B. s. v.; Plin. v. 29.) Its exact site caunot be ascertained. [L. S.]

SIBERE'NA ( $\Sigma$ : $6 \in \rho \neq \eta \nu \eta$ : Sta Severina), a town of Bruttium situated in the monntains about 15 miles NW. of Crotuna. The name is mentioned only by Stephanus of Byzantium (s. v.), who calls it an Oenotrian city, but it is probable that it is the same place which is now called Sauta Sererina, an appellation that is already noticed by Constantine Porphyrogenitus in the tenth centory. It was at that time apparently a place of importance, but is now nuch decaved. (Const. Porph. de $\boldsymbol{I d m . \text { Inup. ii. 10; }}$ Holsten. Obs. in S(eph. Byz. s. n.) [E. H. B.]

Sl'BERIS (इifepis), a river of Galatia, a tributary of the singarins; it flowed in a sonthwestern direction, and joined the main river near the little town of Syceon, not far from Juliopolis. (l'rocop. de Aded. v. 4.) Procopius alvo mentions that this river frequently overflowed its banks, a fact which is perhaps alluded to in the nane of a station called Hycrov Potamon, about 13 miles east of Juliopulis (It. Hieros. p. 574); thongh it is pussible also that the name may be misspelt for Hieron Potamon, which is only another name for the Hieras of Pliny (v. 43), and unquestionably identical with the Siberis which now bears the name of Kirmir. [L.S.]
sIBUZATES, an Apuitanian people, who subnuitted to P. Crasus, Caesar's legatus in B. c. 56 . ( $B .1$, iii. 27.) There are many varicties in the mannseript realings of this name. It is merely by conjecture founded on reamblauce of name, that they have been placed about Sonhousse or Sobnsse, on the Adoar, between Aquae Tarbelliese ( $D_{\text {ax }}$ ) and Bopornue.
[(i. L.]
SlBYMLAIEC, one of the Aquitanian tribes mentioned by Pliny (iv. 19). D Anville conjectures that the name is preserved in that of the Vallis Snbola, mentioned by Frelegarius. He argues thait they camot be the same people as the Sibuzates who submitted to 1'. Crassus, because Caesar speaks of a lew of the remotest A quitanian tribes which did nut submit to the Roman general, trusting to the approaching winter neason (B.G. ni, 27); from which remark we may infer that these remotest tribes were in the valleys of the l'yronees. "The people of the
valley of Soule might derive this adrantage from their situation, which is shut in between Low Nararre and the high part of Beiarn." (D'Aoville.) [G. L.] SLBYRTUS [sibmita.]
ACAMBRI, SYCAMRRT, SYGAMBRI, SUGAMBRI, or SUCAMBRI (ミírau6pot, ミov́үauspot, or $\sum$ ov́каu $6 \rho o$ ), a powerful German tribe, occupying in the time of Caesar the eastern bank of the Rhine, and extending from the Sieg to the Lippe. It is generally assumed that this tribe derived its name from the little river Sieg, which falls inte the lhnine a little below Bonn, and during the middle ages was called Sura, segaha, but is not mentioned by any ancient writer; this assumption, however, is at least only a probable cenjecture, though it mast be admitted that in the time of Caear they inhabited the country north and south of the Sieg, and to the north of the Ubiii. (Caes, B. G. iv. 16, foll., vi. 35 ; strab, vii. p1. 290, 291: Dion Cass. sxxix. 48, xl. 32, liv. 20, 32, 33, 36.) When the Usipetes and Tencteri were defeated by Caesar, the remnants of these tribes took refuge in the country of the Sicambri, who took them under their protection. Caesar then demanded their surrender: and this boing refused, he built his famous bridge across the Rline to strike terror into the Germans. The Sicambri, however, did nut wait for bis arrival, but, on the advice of the U:ipetes and Tencteri, qnittel their own ceuntry and vithdrew into forests and uninhabited districts, whither Caesar neither wonld nor could follow them. A few years Jater, B. c. 5J, during the war against the Eburones, we find Sicambri fighting against the arny of Caesar on the left bank of the Rhine, and nearly defeating the lomans; Caesar's arrival, who had been in another part of Gaul, alone saved his legions. The Ficambri were then obliged to return across the Rhine. In B. c. 16 the Nicambri, with the Usipetes and Tencteri, again invaded Gallia Belgica, and 21. Lollins, who had provoked the barbarians, sustained a serious defeat. A similar attack which was made a few years later, was repelled by Drusus, who pursued the Germans into their own country. After the withdrawal of the Romans, the Sicambri formed a confederation among their countrymen against the commen enemy, and as the Chatti who had received the conntry of the Ubii on the right bank of the Rhine, refused to join them, the Sicambri made war upon them; and as they left their own tervitory unprotected, Drusus penetrated throngh it into the interior of Germany. After the death of Drusus, Tiberius undertuok the completion of his plans agsinst Germany. None of the tribes offered a unore vigorous resistance than the Sicambri; but in the end they were obliged to submit, and $\$(0,000$ Sicambri and Suevi were transplanted into Gaul, where as subjects of Rome they received settlements between the lower course of the Meuse and the Ihine. In that country they subsequently formed an important part of the nation or coufeteracy of the Franks. Those Sigambri who were not tramsplanted into Gaul seem to lave withdrawn into the hills of Mons letico, and for a long time they are not mentioned in history; they reappear in the time of l'tolemy (ii. 11. § 8), when they are spoken of as neighbours of the Bructeri Minores. The Sicanibri are described as bold, brave, and cruel, and we hear nothing of towns in their conntry; they seem in fact to have lived in villages and isolated farms. (Cues. B. G. iv. 19; comp. Tac. Ann. ii. 26, iv. 47, xii. 39; Suct. Aug. 21, Tib. 9; Eutrup. vii. 9 ; Uros. vi. 21 ; Ilorat. Carm. iv. 2. 36, 14.

[L. S.]
SICANI. [Siccll.]
SICCA VENERIA (ฐікка or इik O Oủevepia, Ptol. iv. 3. § 30, viii. 2. § 9), a considerable town of Numidia on the river Bagradas, and on the road from Carthago to Hippo Regius, and from Musti to Cirta. (Itin. Ant. pp. 41, 45.) It was built on a hill, and, aecording to Pliny (v. 3. s. 2), was a Roman colony. We learn from Valerius Maximus (ii. 6. § I5) that it derived its surname from a temple of Venus which existed there, in which, agreeably to a Phocoician custom, the maidens of the town, including even those of good family, publicly prostituted themselves, in order to collect a marriage portion; a circumstance which shows that the town was originally a Phoeaician settlement, devoted to the worship of Astarte. (Comp. Sall. Jug. 56 ; Polyb. i. 66, 67.) Shaw (Tracels, p. 87) takes it to be the modern Keff, where a statue of Venus has been found, and an inscription, with the words Ordo Siceensium. (Comp. Donati, Suppl. Thes. Murat. ii. pp. 266. 6; Orelli, Inser. no. 3733.)
[T. H. D.]
SICELLA. [Ziklag.]
sichemi. [Neapolis 11.]
 Sicily), one of the largest and most important islands in the Mediterranean. It was indeed generally reckuned the largest of all; though some ancient writers considered Sirdinia as exceeding it in size, a view which, according to the researches of modern geographers, turns out to be correct. [Sakinisi].

## 1. General Descriftion.

The general form of Sieily is that of a triangle, having its shortest side or base turned to the E., and separated at its NE. angle from the adjoining coast of Italy only by a narrow strait, ealled in ancient times the Fretuan Siculum or Sicilian Strait, but now more commonly known as the Straits of Messina. It was generally believed in antiquity that Sicily had once been joined to the continent of ltaly, and severed from it by some natural convulsion. (Strab. vi. p. 258 ; Plin. iii. 8. s. 14; Virg. Aen. iii. 414.) But though this is probably true in a geological sense, it is certain that the separation must have taken place at a very early period, not only long before the historical age, but before the first dawn of tradition. On the other side, the W. extremity of Sieily stretches out far towards the coast of Afriea, so that the westernmost point of the island, the headland of Lilybaeum, is separated only by an: interval of 80 geogr. miles from the Hermaean Promontory, or Cape Bon in Africa.

The general triangular form of Sicily was early recognised, and is described by all the atteient geographers. The three promontories that may be considered as furming the angles of the triangle, viz. Cape Pelorus to the NE., Cape Pachynus to the SE., and Lilybaeum on the W., were also generally known and received (Pol. i. 42; Strab. vi. Pp. 265, 266; Plin. iii. 8. s. I4; Ptol. iii. 4 ; MeJ. ii. 714). Its dimensions are variously given: Strabo, on the authority of Posidonius, estimates the side from Pelorus to Lily baenm, which he reckons the longest, at 1700 stadia (or 170 geogr. miles); and that from lachynus to Pelorus, the shortest of the three, at 1130 stadia. Pliny on the contrary reckons 186

Roman nuiles ( 149 geogr.) from Pelorus to Pachynus, 200 M.P. ( 160 geogr. miles) from Pachynus to Lilybaeum, and 170 M.P. (136 gengr.) frons Lilybaeurn to Pelorus: thus making the northern side the shortest instead of the longest. But Strabo's views of the proportion of the three sides are entirely correct; and his distances but little exceed the truth, if some allowance be made for the windings of the coast. Later geographers, from the time of Ptolemy onwards, erroneonsly conceived the position of Sicily as tending a great deal more to the SW. tban it really does, at the same time that they gave it a much more regular triangular form; and this error was perpetmated by modern geographers down to the time of D'Anville, and was indeed not altogether removed till the publication of the valuable coast survey of the island by Captain Sinyth. (See the map published by Magini in 1620, and that of D'Anville in his Analyse Géographique de Ittalie, Paris 1744.)

A considerable part of Sieily is of a mountainous character. A range of mountains, which are geologically of the same charaeter as those in the soutbern portion of Bruttium (the group of Aspromonte), and may be considered almost as a continuation of the same chain, interrupted only by the intervening strait, rises near Cape Pelorus, and extends at first in a SW. direction to the neighbourhood of Taormina (Tauromenium) from whence it turns nearly due W. and continues to hold this course, ruaning parallel with the N . coast of the island till it rises into the elevated gromp of the Monte Madonia, a little to the S. of Cefaliu (Cephaloedium.) From thence it breaks op into more irregular masses of limestone mountains, which form the central nucleus of the W. portion of the island, while their arms extending down to the sea encirele the Bay of Palermo, as well as the more extensive Gulf of Castellamare, with bold and almost isolated beadlands. The detached mass of Mount Erix (Monte di S. Gintuino) rises near $T_{\text {ropani almost at the }} \mathbf{W}$. extremity of the island, but with this exception the W, and SW, coast round to Sciacca, 20 miles beyond the site of Selinus, is comparatively low and shelving, and presents no bold features. Another range or mass of mountains branehes off from that of the Monte Madonia near Polizzi, and trends in a SE. direction through the heart of the island, forming the huge hills, rather that mountains, on one of which Enua was built, and which extend from thence to the neighbourhood of Piazza ard Aulone. The whole of the SE. corner of the island is uccupied by a mass of limestone hills, never rising to the diguity nor assuming the forias of mountains, but forming a kind of table-land, with a general but very gradual slope towards the S. and SE.; broken up, bowever, when viewed in detail, into very irregular masses, being traversed by deep valleys and ravines, and presenting steep escarpments of limestone rock, so as to constitute a rugged and difficult comntry.

None of the mountains above described attain to any great eleration. The loftiest group, that of the Monte Madonia, does not exceed 3765 feet, while the average beight of the range which extends from thence to Cape Pelorus, is little, if at all, above 3000 feet bigh. Montc S. Giuliuno, the ancient Eryx, erroneously considered in ancient times as the highest mountain in Sieily after Aetna [Kuyx], is in reality only 2184 feet in height (Smyth's Sicily, p. 242). The ancient appellations gisen to these
mountains seem to lave been somewhat vague and fluctuating; but we may assign the mame of Neptrames Mons to the chain which rises at Cape Pelorus, and extends from thence to the neighbourhood of Tauromenium; wbile that of Mons Nebrohes seems to have been applied in a more general sense to the whole northerly range catending from near Tauronenium to the neighbourhod of Panormus; and the Heraei Hostes of Diodorus can be no otbers than a part of the same range. (See the respective articles.) But incomparably the most important of the monntains of Sicily, and the most striking physical feature of the whole island, is the great velcanic mountain of AETN.A, Whach rises on the E. coast of the island, and attains an elevation of 10.874 feet, while its base is nut less thau 90 miles in cireumference. It is wholly detached from the mountains and hills which surround it, beiog bounded ou the N. by the river Acesitues or Alcantara, and the valley through which it fluws, and on the W. and S. by the symaethus, while on the E. its streams of lava descend completely into the sea, and constitnte the line of ceast for a distance of near 30 miles. The rivers already mentioned constitute (with trifling exceptions) the limits of the vileanic district of Aetna, but volcanic formations of older date, including beds of lava, scoriae, \&c., are seattered over a considerable extent of the SE. portim of the island, extendigg from the neighbourhood of Palagonia to that of Palazolo, and even to Syracuse. These indeed belong to a much more ancient epoch of volcanic action, and can never have been in operation since the existence of man upon the islant. The extensive action of volcanic fires upon Sicily was, bowerer, observed by the ancieots, and is noticed by several writers. The apprarent combection between Aetna and the volcanoes of the Acolian INands is meotioned by Strabu, and the same authir justly appeals to the craters of the Palici, and to the numerons themal springs thronghout the ishme, as proofs that the sabterramean agencies were widely diffused beneath its surface (Strab, vi. pp. 274, 275).

Fers countries in Europe surpiss Sicily in general productiveness and fertility. Its advantages io this respect are extolled by many ancient writers. Strabo tells us (vi. p. 273) that it was not inferior to It:tly in any kind of produce, and even surpasset it in many. It was generally believed to be the native country of wheat (Diol. v. 2), and it is certain tlat it was not surpassed by atuy country either in the abutudance or quality of this production. It was equally celebrated for the excellence of its honey and its saffron, both of which were extensively exported to Rome; as well as for its sheep and cattle, and exerlhent breeds of hories, among which those of Asrigentum scen to lave been the most celebrated (Strab. 1. c; Sil. Ital. xiv. 23: Virg. Acn. iii. 7(14). There were indeed no extensive plains, like thase of Campania or Cisahpine chaul; the largest being that now whled the Piano di Catania, extending slong the banks of the symactlins, and known in ancient thanes as the Lasontist's or Labathecosurs Comues. But the whole island was intursectel by numerous streams, and beautiful valleys; and though a consi lesable part of its surface (as already observed) was ocenpial either by monntains or rocky hills, the slopes and anderfalls of these athounded in scenery of the most clarming descriptims, and were adapted for the growth of vines, olines, and truits of every description.

The clinate of Sicily may be considered as intermediate between those of Sonthem Italy and Africa. The northern part of the island, indeed, closely resembles the portion of Italy with which it is more immediately in contatt; but the southern and southwestern parts present strong ivdications of their more soutberly latitude, and have a parclied and aril appearance (at least to the eyes of northern travellers), except in winter and spring. The abundance also of the dwarf palm (Chamaerops humilis Limn.), a plant unknown to other parts of Europe, tenls to give a peeculiar aspect to these districts of Sicily. The climate of the island in general was certainly nut considered unhealthy in ancient times; and though at the present day many districts of it suffer severely from malaria, there is good reason to believe that this weuld be greatly diminished by an iocreased population and more extensive cultivation. It is remarkable, indeed, in Sicily, as in the south of Italy, that frequently the very sites which are now considered the most unhealthy were in ancient times occupied by flontishing and populons cities. In many cases the mal:uria is undonbtedly owing to local causes, which might be readily obviated by draining marshes or affording a free outlet to stagnant waters.

## II. History.

The accounts of the early population of Sicily are more rational and consistent than is generally the case with such traditions. Its name was obrionsly derived from that of the people who continoed in listorical times to be its chief inhabitants, the Siclili or Sicels ( $\Sigma$ ice八oi); and the tradition universally received represented these as crossing over from the mainland, where they bad formerly dwelt, in the extreme sonthern partion of Italy. The traditions and notices of this people in other parts of Italy, and of their previous wanderings and migrations, are, indeed, extremely obscure, and will be discussed elsewhere [SICULI] ; but the fact that they were at one time settled in the Bruttian peninsula, and from thence passed over into Sicily, nuay be safely received as historical. There is every promability also that they were not a people distinct in their origin from the races whom we subsequently find in that part of Italy, but were closely connected with the Oenutrians and their kindred tribes. Indeed, the names of $\Sigma$. $\kappa$ ह $\lambda$ ós and 'Ita入ós are considered by many pinilologers as of common origiu. There scems, therefore, little donbt that the Siccls, or Siculi, may be regarded as one of the brumches of the great Pelasgic race, which we find in the earliest times occupying the southern portion of Italy: and this kindred origin will account for the facility with which we find the Sicels subsequently adopting the language and cirilisation of the Greek colonists in the island, at the same time that there reman alundant traces of their common descent with the people of Italy.

But the sicels, who occupied in the histarical periud the greater jart of the interior of the island, were not, accorling to the Greck writers, its earliest inhabitants. Thucydides indeed assigns their in inigration to a period only three centuries before the settlement of the first Greek colonies (Thuc. vi. 2); and Diodorus, withont assigniug any date, agrees in representing them as the latest comers among the nalive population of the island (Diud, v. 6). The first notices of Sicily allude to the existence of races of gigantic ment, of sarage manners, under the
names of Laestrygones and Cyclopes ; but these fabulous tales, preserved only by the early poets io a mamer that renders it impussible to separate truth from falsehood, are justly discarded by lhncydides as unwortliy of serious consideration (Thuc. vi. 2). It may suffice to remark, that Homer (of course, the earliest authority on the sulject) says nothing directly to prove that he conceived either the Cy clopes or Laestrygones as dwelling in Sicily; and this is in buth cases a mere inference of later writers, or of some tradition now anknown to us. Humer indeed, in one passage, mentions (but not in comnection with either of these savage races), " the island of Thinakia" (Odyss, xii. 127), and this was generally identified with Sicily, though there is certainly nothing in the Odyssey that would naturally lead to such a conclusion. But it was a tradition generally received that Sicily had previonsly been called Tarvicria, from its triangular form and the three promontories that formed its extremities (Thuc. vi. 2 ; Diud. v. 2 ; Strab. vi. p 265), and this name was connected with the Homeric Thrinakia. It is olvious that such a name could only have been given by Greek navigators, and argues a cousiderable amount of acquaintance with the configoration of its shores. It could not, therefore, bave been (as supposed even by Thucydides) the original or aative name of the island, nor conld it have been in use even annong the Greeks at a very early period. But we canot discard the general testimony of ancient writers, that this was the earliest appellation by which Sicily was known to the Greeks.

Another people whom Thucydides, apparently with good reason, regards as more ancient than the Sicels, were the Sicini, whom we find in histurical times occupying the westera aod north-western parts of the island, whither, according to their own tradition, they had been driven by the invading Sicels, when these crossed the straits, thongh aoother tradition ascribed their removal to the terror and devastation cansed by the eruptions of Aetna (Thoc.vi.2; Diod. v. 6). The Sicanians claimed the honoor of being autochthons, or the origual inhabitants of the island, and this view was followed by Timaeus; but Thucydides, as well as Philistus, adopted another tradition, according to which they, were of Iberiam extraction (Thuc, l. c.; Diod. l. c.). What the arguments were which he regards as conclusive, we are unfortunately wholly igoorant; but the ricw is in itself probable enough, and nutwithstanding the close resemblance of name, it is certain that thronghout the historical period the Sicani and Siculi are unifurmly treated as distinct races. Hence it is improbalile that they were merely tribes of a kiodred origin, as we should otherwise have been led to iofer from the fact that the two names are evidently only two forms of the same appellation.

A thind race which is found in Sicily within the bistorical period, and which is regarded by ancient writers as distiact from the two preceding ones, is that of Elymi, who inhabited the extreme northwestern corner of the island, about Eryx and Segesta. Tradition ascribed to them a Trojan origin (Thuc. vi. 2 ; Dionys. i. 52), and thongh this story is probably worth do more than the numerous similar tales of Trojan settlements on the coast of Italy, there mast probably bave been some foundation for regarding them as a distinct people from their neighbours, the Sicani. Buth Thacydides and Scylax specially mention them as such (Thuc. l. c.; Scyl. p. 4. § 13): but at a later period, they seem to
have gradnally disappeared or been merged into the snrrounding tribes, and their name is not again found in history.

Such were the indigeous races by which Sicily was peopled when its coasts were first visited, and colonies established there, by the Phoenicians and the Greeks. Of the colonies of the former people we have little information, but we are told in general by Thacydides that they occupied numerous points aronad the cousts of the island, establishing themselves in preference, as was their wont, on projecting headlands or small islands adjoining the shore. (Thuc, ri, 2). But these settlements were apparently, for the most part, mere trading stations, and as the Greeks cane to establish themselves permanently and in still increasing nombers io Sicily, the Phoenicians gradually withdrew to the NW, comer of the island, where they retained three peronaneat settlements, Motya, Panormus, and Solueis or Soluntum. Here they were supported by the alliance of the neighbouring Elymi, and had also the advantage of the proximity of Carthage, upon which they all became eventually dependent. (Thuc. $l$. c.)

The settlement of the Greek colonies in Sicily began about the middle of the eighth centnry B. c., and was continued for ahove a centary and a half. Their dates and origin are known to us with much more certainty than those which took place during the corresponding periud in the sunth of ltaly. The earliest were estallished on the E. coast of the ishand, where the Chalcidic coluny of Naxos was founded in b. c. 735 , and that of Syracuse the following year (B. c. 734), by a body of Curinthian settlers under Archias. Thus the division between the Chalcidic and Doric culonies in Sicily, which bears so prominent a part in their political history, became marked from the very outset. The Chalcidians were the first to extead their settlements, having founded within a few years of the parent colony (about a.c. 730) the two cities of Leontini and Catana, hoth of them destined to bear an impurtant part in the affairs of sicily. Abont the same time, or shortly after (probally about B. c. 728 ), a fresh body of colonists from Megara founded the city of the same name, called, fur distinction's sake, Mrgana HybLaEA, on the E. coast, between Syracnse and Catana. The first colony on the S . coast of the island was that of Geca, funnded in в. c. 690, by a budy of emigrants from Phodes and Crete; it was, therefore, a Duric colony. On the other hand, the Chalcidians founded, at what precise period we know not, the colony of Zancle (afterwards called Messaxa), in a position of the utaost importance, as commanding the sicilian Straits. The rapid rise and prosperity of these first settlements are shown by their having become in their turn the parents of other cities, which soon vied with them, and, in some cases, surpassed them in inportance. Thus we find Syracuse extending its power by establishing in succession the colonies of Acrae in b. c. 664 , Casmbana in b. c. 644 , add Camarina in в. C. 599. Or these, the last alone rose to be a flourishing city and the rival of the neighbouring Gela. The latter city in its turo founded the colony of Aghigentica, in $\mathrm{B} . \mathrm{c}$. 580 , which, though one of the latest of the Greek culonies in the island, was destined to become one of the most powerful and flowrishing of them all. Still further to the W., the colony of Selint's, planted as early as B.c. 628 , by a lody of settlers from the Hyblaean Megara, reinforced with emigrants from the parent city in Greece, rose to a state of power
and prosperity far surpassing that of either of its mother cities. Selinus was the most westerly of the Greek colonies, and immediately bordered on the territory of the Elymi and the Phoenician or Carthaginian settlements. On the N. coast of the island, the only independent Greek colony was Himeres, founded about a. c. 648 by the Zanclaeans; Mylae, another colony of the same prople, having apparently contiuued, from its proximity, to be a mere dependency of Zancle. Tu the above list of Greek colowies must be adued Callifolis and Euboea, buth of them colonies of Naxos, but which never seem to have attained to consideration, and disappear from bistory at an early period.*

Our accounts of the early history of these numerous Greek colonies in Sicily are unfortunately very scanty and fragmentary. We learn indeed in eneral terins that they rose to considerable power and importance, and enjoyed a high degree of wealth and prosperity, owing as well to the fertility and naturat advantages of the island, as to their foreign comnerce. It is evident also that at an early period they extended their dominion uver a considerable part of the adjoiaing country, so that each city had its district or territory, often of coasiderable extent, and comprising a subject prpulation of native origin. At the same time the Sicels of the interior, in the central and northern parts of the inland, and the Sicanians and Elymi in the W., maintained their independence, though they seem to have given but little trouble to their Greek neighbours. During the sixth century b. c. the two most powerful cities in the island appear to have been Agrigentum and Gela, Syracuse not laving yet attained to that predominance which it subsequently enjoyed. Agrigentum, though one of the latest of the Greek colvnies in Sieily, seems to have risen rapidly to prosperity, and under the able, though tyramical government of the despot Phalaris (b. c. 570-554) became apparently for a time the most powerful city in the island. But we know very little about his real history, and with the exception of a few scattered and isolated notices we have hardly any acconnt of the affairs of the Greek cities before B. C. 500 . At or before that periond we find that a pulitical chauge had taken place in most of these communities, and that their governments, which had originally been oligarchical, had passed into the hands of desputs or tyrants, who ruled with uncontrolled power. Such were Panaetius at Leontini, C'leander at Gela. Terillus at limera, and Scythes at Zancle (Arist. Pol. v. 12; 11erud. vi. 23, vii. 154). Of these Cleander seems to have been the most able, and laid the foundation of a power which enisbled his brother and successor Hippocrates to extend his dominion over a great part of the island. Callipolis, Leontini, Nasos, Zancle, and Camarina successively fell under the arms of IIippocrates, and Syracuse itself only escaped subjection by the intervention of the Corinthians (Herod. vii. 154). But what Hippocrates had failed to effect was accomplished by Gelon, who succeeded him as despot of Gela, and by interposing in the civil dissensions of the Syracusans ultimately succeeded in making

* The above summary of the progress of Greek culonisation in Sicily is taken almost wholly from Thucydides (vi. 3-5). Sce, howerer, Scymnus Chius (270-299) anif Strabo (ri. 1p). 267-272). The dates are fully discussed by Clintou (Fasti IIelLenici, vol. i.)
himself master of that city also, B. c. 485. From this tise Gelon neglected his former government of Gela, and directed all tis efforts to the aggrandizement of his new acquisition. He destroyed Camarina, and removed all the inhabitants to Syracuse, together with a large part of those of Gela itself, and all the principal citizens of Megara 11 yblaca and Enboen (Herod, vii. 156).

Syracuse was thus raised to the rank of the first city in Sicily, which it retained for many centuries afterwards. A few years before (b. C. 488), Therun had established bimself in the possession of the sovereign power at Agrigentum, and subsequently extended his dominion over llimera also, from whence he expelled Terillus, a. c. 481. About the sam:e time also Anaxilaus, despot of lhegium, on the other side of the straits, had established a footing in Sicily, where he became master of Zancle, to which he gave the name of Messana, by which it was ever afterwards known [Mkssiva]. All three rulers appear to have been mea of ability and enlightened and liberal views, and the eities under their immediate government apparently made great progress in power and prosperity. Gelon especially undoubtedly possessed at this period an amount of power of which no other Greek state could boast, as was suftieicatly shown by the emhassy sent to him from Sparta and Athens to invoke his assistance against the threatened invasion of Xerxes (Herod. vii. 145, 157). But bis attention was called off to a danger more immedistely at hand. Terillus, the expelled despot of Himera, had called in the assistance of the Carthaginians, and that people sent a vast fleet and army under a general named Hamilcar, who laid siege to Himera, в. c. 480 . Theron, however, was able to maintain possession of that city uatil the arrival of Gelon with an arnyy of 50,000 foot and 5000 hurse to his relief, with wlich, though vastly inferior to the Carthaginian forces, he attacked and totally defeated the army of Hamilcar. This great victory, which was contemporancous with the battle of Sulamis, raised Gelon to the highest pitch of reputation, and became not less celebrated among the Sicilian Greeks than those of Salamis and Plataea among their eontinental brethren. The vast number of prisoners taken at Himera and distributed as slares among the cities of Sicily added greatly to their wealth and resources, and the opportunity was taken by many of them to erect great public works, which continued to adorn them dows to a late perived (Diond. xi. 25).

Gelon did not long survive his great vietory at Himera : but he transmitted his power unimpaired to his brother Hieros. The latter, indeed, thuuph greatly inferior to Gelon in character, was is some respects even superior to him in power: and the great naval victory by which be relieved the $\mathrm{Cu}-$ maeans in Italy from the attacks of the Carthagnians and Tyrrhenians (B. c. $4 \overline{7} 4$ ) earned him a wellmerited reputation throughoat the Grecian world. At the sane time the rule of Hieron was extretnely oppressive to the Chalcidic cities of Sicily, the power of which he broke by expelling all the citizens of Naxos and Catana, whom he compelled to remore to Leontini, while he repeopled Catana with a large hody of now inlabitants, at the same time that he changed its name to Aetna. Theron had continued to reign at Agrigentum until his death in n. c. 472 , but his son Thrasydaens, who succeeded bim, quickly incurred the enmity of the citizens, who were epabled by the assistance of Ilieron to expel him,
and were thus restored to at least nominal freedom. A similar revolution occurred a few years later at Syracuse, where, on the death of Hieron (д. c. 467), the power passed into the hands of Thrasybulus, whose violent and tyramical proceedings quickly excited an insurrection annong the Syracnsans. This became the signal for a general revolt of all the cities of Sicily, who united their forces with those of the Syracusans, and sncceeded in expelling Thrasybulus from his strongholds of Ortygia and Achradina (Diud. xi. 67, 68), and thus driving him from sicily.

The fall of the Gelonian dynasty at Syracnse (B. c. 466 ) became for a time the occation of violeot internal dissensions io most of the Sicilian cities, which in many cases broke out into actual warfare. But after a few years these were terminated by a general congress and compromise, B. c. 461 ; the exiles were allowed to return to their respective cities: Camarina, which had been destroyed by Gelon, was repeopled and became once more a flourishing city; while Catana was restored to its origioal Chalcidic citizens, and resumed its ancient name (Diod. xi. 76). The tranquillity thus reestablished was of unnsnal permanence and duration; and the half century that followed was a period of the greatest prosperity for all the Greek cities in the island, and was doubtless that when they attained (with the exception of Syracose) their highest degree of opulence and power. This is distinctly stated by Diodorus (l. c.) and is remarkably confirmed by the still existing monaments,-all the greatest architectural works being referable to this period. Of the form of government established in the Sicilian cities at this time we have little information, but it seems certain that a democratic constitotion was in almost all instances substituted for the original oligarchies.

But prosperous as this period (n. c. 461-409) undoubtedly was, it was by no means one of unbroken tranquillity. It was distarbed io the first instance by the ambitious schemes of Ducetius, a Sicnlian chief, who endeavoured to organise all the Sicels of the interior into one confederacy, which should be able to make head against the Greek cities. He at the same time founded a new city, to which he gave the name of Palice, near the sacred fountain of the Palici. But these attempts of Ducetius, remarkable as the only instance in the whole bistary of the island in which we find the Sicels attempting to establish a political power of their own, were frustrated by his defeat and banishment by the Syracusans io B. c. 451 ; and though he once more returned to Sicily and endeavoured to establish himself on the N. coast of the island, his projects were interrupted by his death, B. C. 445. (Diod. xi. 88, 90-92, xii. 8, 29.) He found no successor; and the Sicels of the interior ceased to be formidable to the Greek cities. Many of their towns were actually reduced to subjection by the Syracusans, while others retained their independent position; but the operation of Hellenic influences was gradually diffusiag itself throughont the whole island.

The next important event in the bistory of Sicily is the great Athenian expedition in B. C. 415. Already, at an earlier period, soon after the outhreak of the Peloponnesian War, the Athemians had interfered in the affairs of Sicily, and, in B. c. 427 , bad sent a squadrou under Laches and Charoeades to support the Ionic or Chalcidic cities in the island,
which were threatened by their more powerful Doric neighbours. But the operations of these commanders, as well as of Eurymedon and Suphocles, who followed them in B. c. 425 with a large force, were of an unimportant character, and in B. c. 424 a general pacification of the Greek cities in Sicily was brought about by a congress held at Gela (Thuc, iv. 58, 65). But the peace thas concluded did not remain long unbroken. The Syracusans took advantage of the intestine dissensions at Leontini to expel the democratic party from that city: while the Selinuntines were engaged in war with their non-Hellenic neighbours the Segestans, whom they pressed so bard that the latter were forced to apply for assistance to Atbens. The Leontine exiles also sued for aid in the same quarter, and the Athenians, who were at this time at the height of their power, sent ont an expedition on the largest scale, nomioally for the protection of their allies in Sicily, but in reality, as Thucydides observes, in hopes of making themselves masters of the whole island (Thuc, vi. 6). It is impossible bere to relate in detail the proceedings of that celebrated expedition, which will be more fully noticed in the article Sypacusae, and are admirably related in Grote's History of Greece, vol. viii, ch. 58-60. Its failure may be attributed in great measure to the delays and inactivity of Nicias, who lingered at Catana, instead of proceeding at once to besiege Syracuse itself, and thus gave the Syracusans time to strengthen and enlarge their fortifications, at the same time that they rexived the courage of their allies. The siege of Syracuse was not actually commenced till the spring of $414 \mathrm{~B} . \mathrm{c}$., and it was contioued till the month of Septemher, $413 \mathrm{~B} . \mathrm{c}$., with the most unremitting exertions on both sides. The Syracusans were supported by the chief Durian cities in the island, with the exception of Agrigentum, which stoud aloof from the contest, as well as lyy a portion of the Sicel tribes : bot the greater part of those barbarians, as well as the Cbalcidic cities of Naxos and Catana and the Segestans, furnished assistaace to the Athenians (Thnc. vii. 57,58 ).

The total defcat of the Athenian armament (by far the most formidable that lad been seen in Sicily since that of the Carthaginians noder Hamilcar), seemed to give an irresistible predominance to the Durian cities in the island, and to Syracuse especially. But it was not long before they again found themselves threatened by a still more powerful invader. The Selinuntines immediately took advantage of the failure of the Athenians to renew their attacks upon their neighbours of Segesta, and the latter, feeling their inability to cope with them, now applied for protection to Carthage. It is remarkable that we hear nothing of Carthaginian intervention in the affairs of Sicily from the time of the battle of Himera until this occasion, and they seen to have abandoned all ambitions projects connected with the island, though they still maintained a footing there by means of their subject or dependent towns of Panormus, Motya, and Soluntum. But they now determined to avail themselves of the opportanity offered them, and sent an armament to Sicily, which seemed like that of the Athenians, calculated not so much for the relief of Segesta as for the conquest of the whole island. Hannibal, the grandson of Hamilcar who bad been slain at Himera, landed at Lilybaeam, in B. C. 409 , with an ariny estimated at $100,000 \mathrm{mt} 0$ and marching straight upon Selinus, laid siege a nce to the city. Selinus was at this
time, next to Agrigentum and Syracnse, probably the most flourishing city in Sicily, but it was wholly unprepared for defence, and was taken after a siege of only a few days, the inlabitants put to the sword or made prisoners, and the walls and public buildings razed to the ground (Diod. xiti. 54-58). From thence Hannibal turned his arms against Hi mera, which was able to protract its resistance somewhat longer, but eventually fell also into his power, when in order to arenge himself for hisgrandfather's defeat, he put the whole male population to the sword, and so utterly destroyed the city that it was never again inhabited (1d. xiii. 59-62).

After these exploits Hanoibal returned to Carthage with his flect and army. But his successes lad now awakened the ambition of the Carthaginian people, who determined upon a second invasion of Sicily, and in B. C. 406 sent thither an arny still larger than the preceding, ander the command of Hannibal. Agrigentum, at this time at the very bighest point of its power and opulence, was on this occasion the first object of the Carthaginian arms, and though the citizens had made every preparation for defence, and in fact were enabled to prolong their resistance for a period of eight months they were at length compelled by famine to surrender. The greater part of the inbabitants evacuated the city, which shared the fate of Selinus and Hinara (Diod. xiii. 81, 91 ).
Three of the principal Greek cities in Sicily bad thus already fallen, and in the spring of B. c. 405 , Himilco, wbo had succeeded Hannibal in the command, advanced to the attack of Gela. Meanwhile the power of Syracuse. npon which the other cities had in a great degree relied for their protection, had been in great measure paralysed by internal dissensions : and Dionysius now availed himself of these to raise himself to the possession of despotic power. But his first operations were not more successfal than thowe of the generals be replaced, and after an ineffectual uttempt to relieve Gela, he abandoned both that city and Camarina to their fate, the ininabitants of buth emigrating to Leontini. Dionysius was able to fortify himself in the supreme power at Syracuse, and bastencd to conclude peace with Hi nilico upon terms which left the Carthaginians undisputed masters of nearly half of Sicily. In addition to their former possessiuns, Selinns, Himera, and Agricentum were to be subject to Carthage, while the iahabitants of Gela and Caurarina were to be allowed to return to their native cities on condation of becoming tributary to Carthage (Diod. xil. 114.)

From this time Dionysius reigned with andisputed nuthority at syracuse for a period of 38 years (B. C. $405-367$ ), and was able at his death to transmit his power unimpaired to his son. But though he raised Syracuse to a state of great power ant prosperity, and extended his dominion over a lare part of si ily, as well as of the aljoining part of laly, his reign was narked by great and sudden changes of furtune. Though he had dexterously availed himself of the Carthaginian invasion to establish his power at syracuse, he had no sooner cumsolidated his own authority than he began to turn his thonglits to the expulsion of the Carthaginians from the ivand. His arms were, however, directed in the first instance $a_{c}$ ainst the chalcidic citios of Sicily, Naxos, Catana, and Leontini, all of which successively fell into his power, while lie extenad his sminimin Dightized toyral
commumities of the interior. It was not till he had effected these conquests, as well as maile vast preparations for war, by enlarging and strengtbeuing the fortifications of Syracuse and building an enormous fleet, that he proceeded to declare war rgainst Carthage, B. C. 397. His first successes were rapid and sudden : almost all the cities that had recently been added to the Carthaginian dominion declared in his favour, and be carried his victorinus arms to the extreme W. point of Sicily, where Motya, one of the chief strongholds of the Carthaginian power, fell into lis hands after a long siege. But the next year (a. c. 396) the state of affiurs changed. Hinulen, who lauded in Sicily with a large army, not only recovered Motya and other towns that had been taken by Dionysius, but advanced along the N . eazst of the island to Messana, which he touk by assanlt and utterly destroyed. Dionysius was even compelled to shat himself ap within the walls of Syracuse, where he was clostly besieged by Himilco, but a sudden pestilence that broke out in the Carthaginian camp reduced tbem in their torn to such straits that Himilco was glad to conclude a secret capitalation and retire to Africa (Diod. xir. 47 -76). Hostilities with Carthage were renewed in B. c. 393 , but with no very decisive result, and the peace concluded in the following year ( $\mathrm{n} . \mathrm{C}$. 392) seems to have left matters in much the same state as before. In E. c. 383 war again broke ont between Dionysius and the Carthaginians, but after two great battles, with alternate success on both sides, a fresh treaty was concluded by which the river Halycos wats established as the boundary between the two powers. The limit thas fixed, though often infringed, continued to be recognised by sereral successive treaties, and may be considered as forming from lienceforth the permanent line of demarcation between the Carthaginias and the Greek puwer in Sicily (Diod. xv. 17).
(For a more detailed account of the reign of Dionssius and his wars with the Carthaginians, see thie article Drosystes in the Biagr. Dict. Vol.1. p. 1033. The same events are fully narrated by Mr. Grute, vol. x. ch. 81,82 , and vol xi. ch. 83.)

Several important towns in Sicily derived their origin from the reign of the elder lionysius and tho revolutions which then took place in the island. Among these were Tapromexica, which arose in the place and not far from the site of the ancient Nuxos, which had been finally destroyed by lionysius : Tindaris, founded by the Syracusan despot on the N. coast of the island, with a body of colonista principally of Mussenian origin; Alaesa, in the same part of Sicily, foundel by the Sicel chief Archonides; and Lilibariva, whicb grew ap adjoining the port and promontory of that name, a few miles S. of Motya, the place of which it took as one of the principal Carthaginian ports and strongholds in the island.

The power of Syracuse over the whole of the eastera half of sicily appeared to be effectaally consolidated by the elder Dionysius, but it was soun broken up by the feeble and incompetent government, of his son. Only ten years after the death of the father (n.c. 357), Dion landed in Sicily at the head of only a few hundred mercenary troops, and raised the standard of revolt: all the depeodent suljects of Syracuse soon flocked around it, and Dion was welcomed into the city itself by the acelamations of the citizens. Diunysius himself was absent at the fip ehrity inhoftciatl of Ortygin was held by
his garrison, and still secured him a froting in Sicily. It was not till after a lung blockade that his sen A pollocrates was compelled to surrender it into the bands of Dion, who thus became master of Syracuse, B.c. 356 . But the success of Dion was far from restoring liberty to Sicily, or even to the Syracusans: the despotic proceelings of Dion excited universal discontent, and be was at length assassinated by Callippus, one of bis own officers, B. C. 353. The period that followed was one of great confusion, but with which we are very imperfectly acquainted. Successive revolutions occurred at Syracuse, during which the younger Dionysius found ineans to effect his return, and hecame once more master of Ortygia. But the rest of the city was still held by a leader named Hicetas, who called in the assistance of the Carthaginians. Ortygia was now besieged both by sea and land by a Carthaginan fleet and army. It was in this state of things tbat a party at Syracuse, equally opposed to Hicetas and Dionysius, had recoarse to the pareot city of Corinth, and a small force of 1200 soldiers was sent to their assistance under Timoleon, B. c. 344 . His successes were rapid and brilliant; and within less than two months from his landing in Sicily, he found himself unexpectedly in the possession of Ortypia, which was voluntarily surrendered to him by Dionysius. Hicetas and the Carthaginians were, however, still masters of the rest of the city; but mistrust and disunion enfeebled their defence: the Carthaginian general Magon suideoly withdrew his forces, and Timoleon easily wrested the city from the bands of Hicetas, в. c. 343.

Syracuse was now restored to liberty and a democratic form of government; and the same change was quickly extended to the other Greek cities of Sicily. These had thrown off the yoke of Syracuse during the disturbed period throngh which they had recently passed, but bad, with few exceptions, fallen into the hands of local despots, who had established themselves in the possession of absolnte power. Sucb were, Hicetas hinself at Leontioi, Mamercus at Catana, and Hippon at Messana, while minor despots, also of Greek origin, had obtained in like manner the chief power in the Sicnlian cities of Apollonia, Centaripa and Aggrium. Timoleon now turned bis arms in succession against all these petty rulers, and overthrew them one after another, restoring the city in each case to the possession of independent and free self-government. Meanwhile the Greeks had been threatened with a more general danger from a fresh Carthaginian invasion ; but the total defeat of their generals Hasdrubal and Hamilcar at the river Crimisus (B.c.340), one of the most brilliant and decisive victories ever gained by the Greeks over the Carthaginians, put an eml to all fears from that quarter: aod the peace that followed once more established the Halycus as the boundary between the troo nations (Diod. st. 1i).

The restoration of the Sicilian Greeks to liberty by Timoleon, was folluwed by a period of great prosperity. Many of the cities had suffered severely, either from the exactions of their despotic rulers, or from the troubles and revolutions that bad taken place, but these were now recruited witb fresh colonists from Corinth. and other cities of Greece, who poured into the island in vast nombers ; the exiles were everywhere restored, and a fresh impulse seemed to be given to the development of Hellenic influences in the islanil. Unfortunately this period of reviving prosperity was of short duration. Only
twenty three years after the battle of the Crimisns, a despotism was again established at Syracuse by Agathocles (8.c. 317), an adventurer n bo raised himself to power by very mucb the san:e means as the elder Dionysius, whom he resembled in energy and ability, while be even surpassed bin in sanguinary and unsparing severity. The reign of Agathocles (B. c. 317 289) was undoubtedly a period that exercised the moat disastrons influence over Sicily; it was occupied in great part with internal dissensions and civil wars, as well as by long contioued strusgles between the Greeks and Carthaginiaos. Like Dionysius, Agathocles had, in the first instance, made use of Carthaginian support, to estabiish himself in the possession of despotic power, but as be gradually extended his aggressions, and reduced one Greek city after another under his antbority, he in his turn came into fresh collision with Carthage. In s.c. 310 , he was defeated at the river Himera, near the hill of Eenomus, hy the Carthaginian general Hamilear, in so decisise a battle that it seemed to extinguish all his bopes: his allies aod dependent cities quickly threw off his yoke, and Syracuse itself was once nore blockaded by a Carthaginian fleet. In this extremity Agathocles adopted the daring resolution of transporting bis army to Africa. and carrying on the war at the very gates of Carthage. During his absence (which was protracted for nearly four years, B. C. 310-307) Hanilear had bronght a hrge part of Sicily under the dominion of Carthage, but was foiled in all his attempts upon Syracuse, and at length was himself taken prisoner in a night attack, and put to death. The Agrigentines, whove vame had been scarcely mentioned for a long period, hut whose city appears to bave been revived noder Tinnolenn, and now again appears as one of the most considerable in Sicily, made a fruitless attempt to raise the banner of freedom and independence, while the Syracusan exile Deinocrates, at the head of a large army of exiles and mercenaries, maintained a sort of indepeodent position, aloof from all parties. But Agathocies, on his returo from Africa, conclnded peace with Carthage, and entered into a compromise with Deinocrates, while be established his own power at Syracuse by a fearful massacre of all that were opposed to him. For the last twelve years of his reign (B.c. 301-289), bis dominion seems to have been firnly established over Syracuse and a great part of Sicily, so that he was at liberty to follow out bis ambitious schemes in the south of ltaly and elsewhere.

After the death of Agathocles (8. C. 289), Sicily seems to bave fallen into a state of great confusion; Syracuse apparently still retained its predominant position among the Greek cities, ander a despot named Hicetas: bnt Agrigentum, which had also fallen into the hands of a despot named Phintias, was raised to a position that almost enabled it to dispote the supremacy. Phintias extended his dominion over several otber cities, and having maie himself master of Gcla, utterly destroyed it, in order to found and people a new city at the month of the river Himera, to which be gave the name of Pbintias. This was the last Greek city foonded in Sicily. Meanwhile the Carthaginians were becoming more and more preponderant in the island, and the Greeks were at lengtb led to invoke the assistance of Pyrrhus, kiog of Epirus, who was at this time carrying on war in ltaly against the Romans. He readily listened to their overtures, and landed in
the island in the autumn of e.c. 278 . Phintias was at this time dead, and Hicetas had not long before been expelled from Syracuse. I'yrrhus therefore had no Greek adversaries to contend with, and was able to turn all his efforts against the Carthaginians. His successes were at first rapid and decisive : he wrested one town after another from the dominion of Carthage, took lanormus, which lad long been the metropolis of their Sicilian possessions, and bad never before fallen into the hands of a Greek invader, and carried by assault the strong fortresses of Erete and Eryx: but he was foiled in an attack on Lilybaenm ; jealousies and dissensions now arose between him and his Sicilian allies, and after little more than two years he was fain to return to ltaly (B.C. 276), abandoning all his projects upon Sicily (Diod. Exc. Hoesch. xsii. 10, pp. 497-493).

The departure of Pyrrhus left the Sicilian Greeks withont a leader, but Hieron, who was chasen general by the Syracusans, proved himself worthy of the occasion. Meanwhile a new and formidable enenty had arisen in the Dlamertines, a band of Campanian mercenaries, who had possessed themselves by treacbery of the important city of Nessana, and f. an thence carried their arms over a considerable part of Sicily, and conquered or plundered many of its principal towns. Hieron waged war with them for a considerable period, and at length obtained so decisive a victory over them, in the immediate neighbourhood of Messana, that the city itself mu-t have fallen, bad it not been savcd by the intervention of the Carthaginian general Hannibal. Heron ras now raised to the supreme power at Syracuse, and even assumed the title of king, b. c. 270 . A few years after this we find him joining his arms with the Cartbaginians, to effect the expulsion of the Mamertiues, an object which they would doubtless have accomplished had nut that people appealed to the protection of Rome. The Romans, who had recently completed the conquest of Italy, gladly seized the pretest for interfering in the affairs of Sicily, and esponsed the canse of the Mamertines Thns began the First Punic War, b. c. 264.

It is impossible here to relate in detail the events of tbat long-protraeted struggle, during which Sicily became for twenty-three years the field of battle between the Romans and Carthagioians. Hieron, who bad found himself at the begiming engaged in active hostilities with Rome, after sustaining several defeats, and losing many of his sulject towns, wisely withdrew from the contest, and concluded in н. с. 263 a separate peace with Rome, by which he retained possession in full sovereignty of Syraense and its territory, iocluding the depentlent towns of Acrae, Ilelorus, Netum, Megara, and Leontini, together with Tauromenium (Diod. Exiii. Fixc. II. p. 502). From this time to the day of his death Ilieron remained the faithful ally of the Romans, and retained the susereign power at Syracuse undisturbed. In the rest of Sirily all trace of independent action on the part of the several (ireck cities disappears: Agrigentum was indeed the only one of these cities in the inland which appuars to have retained ang considerable importance: it was not taken by the loman consuls till after a long and obstinate sicge, n. c. 262, and was severdly pmished for its protracted resistance, the inhahitants being sold as slaves. Agrigentum indeed at a later perfiod fell again into the hands of the Carthayinians, 1s. c. 255, but ou the other hand the lomams made themselves mas-
ters of Panormus, for a long time the capital of the Carthagimian dominion in the island, which was thenceforth occupied by a strong Roman garrison, and never again fell into the lands of its former masters. Fur several years before the conclusion of the war, the possessions of the Carthaginians in sicily were confined to the mountain of Eryx, occupied by Hamilear Barca, and to the two strungly fortified seaports of Lilybueum and Drepanum, the former of which defied all the attacks of the Romans, as it had previously done those of Pyrrhus. The siege, or rather blockade, of Lilybaeum was continued for nearly tea years, until the destraction of the Cartbaginian fleet off the islands of the Aegates, B. C. 241, compelled that people to purchase peace by the surrender of all their remainiog possessions in Sicily.

The whole island was now reduced into the condition of a Roman province, with the exception of the territory still govenned by Hieron as an allied, but independent sovereign. The province thus constituted was the first that had ever borve that pame (Cic. Ferr. ii. 1): it was placed under the government of a praetor, who was sent annually from liome (Appian, Sic. 2). On the first outbreak of the Second Punic War (n. c. 218), the consul Sempronius was at first sent to Sicily as his province, to guard against any threatened invasion from Africa; but he was soon recalled to oppose Hannibal in Italy, and for some years sicily bure but an unimportant part in the war. A great change, however, occurred in the fourth year of the war (b, c. 215), in consequence of the defection of Hieronyonus, the grandson and snccessor of Hieron at Syracuse, who abandoned the alliance of Rome to which Hieron bad contioued constant throughout his lung reign, and espoused the Cartbaginian cause. Ilieronymus indeed was socn after assassinated, but the Cartbaginian party at Syracuse, beaded by Hippocrates and Epicydes, still maintained the ascendency, and Marcellus, who had been sent in haste to sicily to put down the threatened revolt, was compelled to form the siege of Syracuse, n. c. 214. But so vigorous was the resistance offered to lim that be soon found himself obliged to convert the siege into a blockade, nor was it till the autumn of B. C. 212 that the city finally fell into his hands. Meanwhile the war bad extended itself to all parts of Sicily: many cities of the Eoman province had followed the example of Syracuse, and joined the alliance of Cartbage, while that power spared no exertions for their support. Even after the fall of Syracuse, the war was still contioued; the Carthaginian general Mutines, who had made himself master of Agrigentum, carried on a desultory warfare from thence, and extended his ravages over the whule island. It was not till Mutines had been induced to desert the Carthaginian cause, and betray Agrigentum into the hands of the Romans, that the consul Laevions was ahle to reduce the revolted cities to submission, and thus accumplished the final conquest of Sicily, B. c. 210 (Liv. xxvi. 40 ; xxvii. 5).

From this time the whole of sicily became mited as a Roman province, and its administration was in most respects similar to that of the other prorinces. But its lot was angtbing but a fortunate one. Its great natural fertility, and eapecially its productiveness in corn, caused it, indeed, to be a possession of the uttnust importance to Rome; but these very circumstances seem to bave made it a faveurite field for
speculators, who bought ap large tracts of land, which they cultivated solely by means of slaves, so that the free population of the island became materially diminished. The more mountaineus portions of the island were given up to shepherds and lierdsnen, all likewise slaves, and accustomed to habits of rapine and plunder, in which they were encouraged by their masters. At the same time the number of wealthy proprietors, and the extensive export trade of some of the towns, maintained a delusive appearance of prosperity. It was net till the outbreak of the Servile War in B. c. 135 that the full extent of these evils became apparent, but the frightful state of things then revealed sufficiently shows that the causes which bad produced it must have been long at work. That great outbreak, which commenced with a local insurrection of the slaves of a great proprietor at Enna, named Damophilus, and was headed by a Syrian slave of the name of Eunus, quickly spread throughout the whole island, so that the slaves are said to have mustered 200,000 armed men. With this formidable force they defeated in auccession the armies of several Roman praetors, so that in B.C. 134, it wae thought mecessary to send agaiost them the consul Fulvins Flaccus, and it was not till the year B. C. 132 that their strongholds of Tauromenium and Enna were taken by the consul P. Rupilius (Diod. xxxiv. Exc. Phot., Exc, Vales.) The insurrection was now finally quelled, but the state of Sicily had undergone a severe shock, and the settlement of its affairs was confided to P. Rupilius, together with teu commissioners, who laid down a code of laws and rules for its internal government which continued to be observed in the days of Cicero (Cic. Verr. ii. I6).

But the outbreak of the second Servile War, ander Salvius and Athenion, less than thirty years after the termination of the former one (B. C. 103), and the fact that the slaves were again able to maintain the contest against three successive consuls till they were finally vanquished by MI. Aquilius, in E. C. 100 , sufficiently proves that the evils in the state of society had been but imperfectly remedied by Rupilius; nor can we believe that the condition of the island was in reality altogetber so flourishing as it is represented by Cicero during the interval which elapsed between this Servile War and the practorship of Verres, B. c. 73 . But the great natural resonrces of Sicily and its important position as the granary of Rome undoubtedly enabled it to recover with rapidity from all its disasters. The elder Cato liad called it the store-room (cella peoaria) of the Roman state, and Cicero observes that in the great Sucial War (b. C. 90-88) it supplied the Roman armies oot only with fond, but with clothing aad arms alse (Cic. Verr. ii. 2). But the praetorship of Verres (B. c. $73-70$ ) inflicted a calamity upen Sicily scarcely inferior to the Servile wars that had so recently devastated it. The rhetorical expressions of Cicero must net indeed be always understood literally; but with every allowance for exaggeration, there can no doubt that the evils resulting from such a government as that of Verres were enormous; and Sicily was just in such a state as to suffer from them most severely.

The orations of Cicero against Verres convey to us much curious and valuable information as to the candition of Sicily under the Boman republic as well as to the administration and system of goverament of the Roman provinces generally. Sicily at that time formed but one proviuce, nader the governmeat
of a praetor or pro-praetor, but it had always two quaestors, one of whom sesided at Syracuse, the other at Lilybaeum. This anomaly (for such it appears to have been) prebably arose from the different parts of the ishand having been reduced into the form of a province at different periods. The island contained in all above sixty towns which enjoyed municipal rights: of these, three only, Mlessana, Tauromenium, and Netum, were allied cities (civitates foederatate), and thus enjoyed a position of nominal independence; five were exempt from all fiscal burdens and from the ordinary jurisdiction of the Roman magistrates (civitates immunes et liberac): the rest were in the ordinary position of provincial towns, but retained theirownmagistrates and muoicijal rights, as well as the possession of their respective territuries, subject to the payment of a tenth of their produce to the Ronms state. These tenths, which were paid in kind, were habitually farmed out, according to principles and regulations laid down in the first instance by Hieron, king of Syracuse, and which therefore continued to be knowu as the Lex Hieronica. For judicial purposes, the island appeara to bave been divided into districts or connentus, but the number of them is not stated; those of Syracuse, Agrigeotum, Lilybaeum, and Panormus are the only ones mentioned.

Sicily took little part in the Civil War between Caesar and Pompey. It was at first held by M. Cate on behalf of the latter, but abandoned by him when Pompey limself had quitted Italy, and was then occupied by Curio, as pro-praetor, with four levions (Caes. B. C. i. 30, 31). Caesar himself visited it previous to his African war, and it was from Lilybaem that be crossed over with bis army into Africa (Hirt. B. A fr. 1.) After the death of Caesar, it fell into the hands of Sextus Pempeius, whose powerful fleet enabled him to defy all the efforts of Octavian to recover it, and was at length secured to him by the peace of Misenum, B. c. 39, together with Sardinia and Corsica. But Octavian soon renewed his attempts to dispossess hion, and theugh he sustained repeated defeats at sea, and lost a great part of his fleet by a storm, the energy and ability of Agrippa enabled him to triumph over all obstacles; and the final defeat of his fleet at Naulochus compelled Pompeius to abandou Sicily, and take refuge in the east (Appiao, B. C. v. 77-129; Dion Cass xlix. 1-1\%). There seema no doubt that the island suffered severely from this contest, and from the rapacity or exactions of Sextus Pompeius: Strabo distinctly ascribes its decayed condition in his time principally to this cause (Strab. vi. pp. 270, 272). Augustus made some attempts to relieve it by sending colonies to a few cities, among which were Tauromenium, Catana, Syracuse, Thermae, and Tymdaris (Strab. vi. P. 272; Plin. iii. 8. s. 14); but the effect thus produced was comparatively small, and Strabo describes the whele island as in his time, with few exceptions, in a state of decay, many of its ancient cities having altogether disappeared, while others were in a declinitg condition, and the ioterior was for the most part given up to pasturage, aad inhabited only by herdsmen (Strab. l. c.)

Augustus appears to bave greatly remodelled the internal administration of Sicily: so that the condition of most of the towns had undergone a claange between the time of Cicero and that of Pliny. Caesar bad indeed proposed to give Latin rights to all the Sicilians, and 11. Antonius even brought
forward a law to admit them withont distinction to the Roman franchise (Cic. ad Att. xiv. 2), but neither of these measures was accomplished; and we learn from Pliny that Messana was in his day the only city in the island of which the inlabitants passessed the Roman citizenhip: three others, Centaripa, Netum, and Segesta enjoyed the Jus Latii, while all the others (except the colonies already mentioned) were in the ordinary condition of "civitates stipendiariae" (Plin, iii. S, s. 14). We hear very little of Sicily under the Empire; but it is probable that it never really recovered from the state of decay into which it had fallen in Strabo's time. Almost the only mentim of it in history is that of an outbreak of slaves and banditti in the reign of Gallienus whicb seems to have resembled on a smaller scale the Servile wars that had formerly derastated it (Treb. Poll. Gallien, 4). The increasing importance of the supply of coro from Africa and Eerpt renders it pribable that that from Sicily bad fallen off, and the small number of romains of the imperial period still existing in the island, though so many are preserved from a much earlier date, seems to prove that it could not then have been very flourishing. At a late period of the Empire, also, we find very few Danes of towns in the Itineraries, the lines of road being carried through stations or "mansiones" otherwise wholly unknown, a sufficient pronf that the neightuuring towns had fallen into decay. (Itin. Ant. pp. 86-98.) In the division of the provinces under Augustus, Sicily was assigned to the senate, and was governed by a proconsul ; at a later period it was considered as a part of Italy, and was governed by a macistrate named a Consularis, sulject to the authority of the Vicarius Drhis Romae. (Notit. Dign. ii. p. 64 ; and Bücking, ad loc.)

Its insular pasition must have for a considerai le time preserved Sicily from the ravages of the barbarians who derastated Italy towards the close of the Western Empire. Alaric indeed attempted to crnss over the straits, but was foiled hy a tempest. (Hist. Miscell. xiii. p. 535.) But Genseric, being master of a powerful fleet, made himself master of the whole island, which wats beld by the Vandals for a time, but subsequently passed into the hands of the Ginths, and coutimed attached to the Gothic kingdom of Italy till it was conquered by Belisarius in A. D. 535. It was then united to the Eastern Empire, and continued to be governed as a dependency by the Byzantine emperors till the ninth century, wben it fell into the hands of the saracens or Arabs. That people first landed at Mazara, in the W. of the island in A. D. 827, and made thomelres masters of Agrigentum; but their progress was vigorously opposerl. They took Dlewama in 831, and Panormus in $8: 35$, but it was not till 878 that Syracuse, the last fortress in the island, fell into their hands. The island continued in the possession of the Sa racens till the middle of the eleventh century, when it was partially recovered by the Byzantine emperors with the assistance of the Normans. But in 1061 the Xi man Kingur Guiseard invaded Sicily on his own account, and, after a lone struggle, wholy reduced the inkand under his dominion. It has since remained attached, with brief exceptions, to the crowa of Naples, the monarch of which bears the title of King of the Two Sicilies.

The extant ren nins of antignity in Sicily fully confirm the inference which we should draw from the stateme ts of ancient lioturians, as to the
prosperity and opulence of the island under the Greeks, and its comparatively decayed condition under the Romans. The ruins of the latter period are few, and for the most part unimportant, tho exceptions being confined to the thre or four cities which we know to have received Roman colonies: while the temples, theatres, and other edifices frum the Greck perind are numerons and of the most striking character. No city of Greece, with the exception of Athens, can produce structures that vie with thnse of which the remains are still visilile at Agrigentum, Selinus and Segesta. At the same time the existing relics of antiquity, especially coins and inscriptions, strongly confirm the fact that almost the whole population of the island had been gradually Hellenised. It is evident that the strong line of demarcation which existed in the days of Thucydides between the Greek cities and those of non-Hellenic or barbarian origin had been to a great degree efficed before the island passed muder the dominion of Rome. The names of Sicilian citizens mentioned by Cicero in his Verrioe orations are as purely Greek where they belong to cities of Siculian origin, such as Centuripa and Agsrium, or even to Carthasinian cities like Padormus and Lilybseum, as are thase of Syracuse or Agrigentum. In like manner we find coins with Greek legeods struck by numerous cities which nndoubtedly never received a Greek colony, such as Alacsa, Menaenuun, and many others. It is probable indeed that doring the Roman Republic the language of the whole island (at least the written and cultivated language) was Greek, which must, however, have gradually given way to Latin under the Empine, as the Sicilan dislect of the present day is one of purely Latin origin, and differs but slighttly from that of the south of Italy. Of the language of the ancient Sicels we have no trace at all, and it is highly probable that it was never used as a written language.

## III. Topograpity

The senernl description of the phrsical featrres of Sicily has been alreaily given. But it will be necessary here to describe its coasts in somewhat more detail. The E. coast extending from Cape Pelorus to Pachynus, consists of three portions of a very different character. From Pelorus to Tauromenium, a distance of abont 40 miles, it is closely borderel by the chain of mountains called the Mons Nepturius, the slopes of which descend steeply to the sca, forming a very uniform line of coast, furmimed by numernus small torrents. Two of the small headlands between these valleys appear to have borne the names of Drepanum (Plin.) and Argeanm ( $\Gamma$ tol ). hut their identification is quite uncertain. S. of Tauromeniam, from the mouth of the Acesines to that of the Symacthos, tho whole coast is formel by beds of lava and other volcanic matters, which have flowed down from Aetna. Off this coast, abiut midway between Acium and Catana are some rocky islets of vuleanic origin, called by Pliny the Cycloprom Scopuli: the name of Portus Ulysuis is given by the same author to a port in this neighbourbood, but it is impossible so sny which of the many small sheltered cotes on this line of coast he means to designate. S. of the Symacthus the coast is much varied, being indented by several deep baye and inlets, separated by projecting rocky headlands. The principal of thece is the buy of Megara (Sir us M -garensi:) so called from the Greek city of that nane; it was bounded on the N. by the diphonian
promontory, now Capo di Sta Croce ( $\Xi i \phi a v i ́ a s$ árputhpiov, Strab. ri. p. 267), within which was
 4), evidently the harbour of Augnsta, one of the tinest natural barbours in the island. Between this and Syracuse is the remarknble peninsular promontory of Tharsus (1/agnisi), while immediately S . of Syracuse occurs the retonrkuble landlocked bay called the Great Harbour of that city, and the rocky headland of Plemmyriem which bounds it on the S. From this point to Cape Paclynns no ancient names have been preserved to us of the beadlands or harbours. From Cape Pachynas to the site of Gela the coast is low but rocky. Along this line must be placed the port of Ulysses (Portus Odysseae) mentioned by Cicero, and the promostory of Ulysses of Ptolemy, both apparently in the inmmediate neigbbrorhood of Cape Pachynus [Pachinus.] The Bacra promoatory (Boúkpa ăkpa) of Ptolemy, which be places furtber W., is wholly unknown, as is also the port of Cancans of the same author (Kaukdra $\lambda_{(\mu i) \nu,}$ Ptol. iii. 4. § 7). The remainder of the S. const of Sicily from Gela to Lilybaeum presents on the whole a very unifurm character; it bas few or no natural ports, and no remarkahle headlands. It is bounded for the most part by bills of clay or soft limestone, generally sloping gradually to the sea, but sometimes forming clifs of no great eleration. The celebrated promontory of Lilybsevas is a low rocky point, and its famous port, though secure, is of small extent. N. of Lilybaeum was the promontory of Aegitilillus, with the aljacent low islands, on one of which the city Motya was built; while the more considerable islands of the Aegates lay a few miles further to the W., and the promontory of Drepanuma adjoiniog the city of the same name formed the NW. point of Sicily. It is remarkable that no ancient name is preserved to us for the deep gulf of Castellamare whicb oecurs oo the coast between Trupani and Palermo, thongh it is one of the most remarkible features of the N . coast of sicily; nor are the two striking beadlands tbat bound the Bay of Palermo itself known to us by their ancient names. The bold and insolated hill of Monte Sta Rosalia is, bowever, the ancient Ercte. The northern coast of sicily is bold and varied, formed by offshoots and ridges of the nortbern chain of mountains descending abruptly to the sea; hence it was always a rugged and difficult line of commanication. But none of the rocky headlands that interrupt it are mentioned to us by their ancient names, till we come to that of Mylae adjoining the town of the same name (Milaza), and the Phalachan Probontony (P'ol. iii. 4. § 2), apparently the Capo di Rasocolmo within a few miles of Cape Pelorus.
From the triangular form of Sicily and the confgoration of the mouutain chains which traverse it, it is erident that it could not have any rivers of importance. Most of them indeed are little more than mere mountain torrents, swelling with great rapidity after viclent storns or daring the winter rains, but nearly, if not wholly, dry during the summer months. The most important rivers of the island are: 1. The Srmaerhus (Simeto or Giarretta), wbicb rises in the northern chain of mountains (the Mons Nebrodes), and flows to the S. and SE. round the foot of Aetna, falling into the sea abont 6 miles $S$. of Catanin. It receives several tributaries, of which the Dittaino is certainly the ancient Chrrsas, that flowed near the city of Assorus, while the Ambint's of Stephames can
be no other than the northern or main branch of the Symaethus itself. The Cyanosorns (Kuaubowpos) of Polybius, which appears to lave been in the neighboniliood of Centurija, must prolably be the branch now called Fixame Salso, which joins the Simeto just below Centorbi. 2. The Acealses or Assmes ( $F$. Cantara), which rises very near the Symaethus, but flows along the northern foot of Aetna, and falls into the sea just below Tauromenium. 3. The Hinera ( $F$. Salso), the most cunsiderable of two rivers which bore the same name, rising in the Monte Madonia (Mons Nebrodes) only about 15 miles from the N . coast, and flowing due $\mathrm{S}_{\text {; ; so }}$ so that it traverses nearly the wbole breadth of Sicily, and falls into the sea at Alicata (Phiotias). 4. The Haliots (Plutami), so long the boundary hetween the Carthaginian and Greek territories in the island, is also a considerable stream; it rises not far from the Himera, but flows to the SW., and enters the sea between Agrigentum and Selinns, close to the site of Heraclea Minoa. 5. The HypSAs (Belici), falling into the sea on the S. coast, a few niles E. of Selinus; and 6, the Axapes (Anapo), which flows onder the walls of Syracuse and falls into the great barbour of that city. It is unlike most of the rivers of Sicily, being a full clear stream, supplied from subterranean sources. The same character belongs still more strongly to its tributary the Cxane, which has a considerable volume of water, though its whole course dues not exceed two miles in length.

The minor rivers of Scily which are mentioned either in history or by the geograpbers are nomerous, but in many cases are very dificalt to identify. Beginning at Cape Pachynus and proceeding along the coast westward, we find: 1, the Motychanus (Motúxavos, Ptol. iii. 4. § 7), eridently so called from its flowing near Motycn, and therefore probably the stream now called Fiume di Scicli; 2. the Hirminius of Pliny, probably the Fiume di Ragusa, very near the preceding; 3, the Hipparis; and 4, the Oasus, two small streams which flowed under the walls of Camarina, now called the $F$. $d i$ Camarana and Frascolari; 5, the Gela or Gelas, which gave name to the city of Gela, and must therefore be the Finme di Terranora; 6, the Acr.aGAs, a small stream flowing under the walls of Agrigentum, to wbich it gave name, and receiving a tributary called the Hyps.ss (Drago), which must not be confousded with the more inpurtant river of the same name already mentioned; 7 , the Camicus, probably the Fiume delle Canne, about 10 miles W. of Girgenti; 8 , the Selluves, flowing hy the city of that name, now the Madiuni; 9, the Mazari or Mazarus, flowing by the town of the sane name, and still called Fiume di Mazzara. Besides the-e Ptolemy mentions the lisburus and Sasias or Sossius, two names otherwise wholly anknown, and which cannot be placed with any approacb to certanty. Equally uncertain is the more noted river Achatiza, which is placed by Pliny in the same part of Sieily with the Mazara and Hypas; but there is great confusion in bis enumeration as well as that of Ptoleny. It is generally identified with the Dirillo, but this is situated in quite a different part of Sicily. The Acithius of Ptoleny, which he places hetween Lilybaeun and Selinus, may be the Fiume di Mursala.

Along the N. coast, proceeding from Lilybaeum to Cape Pelorus, we meet with a number of smail streams, having tor the most ${ }^{\text {cout }}$ a short torrent
like course, from the mountains to the sea. Their identification is for the most part very obscure and uncertain. Thus we find three rivers mentioned in comection with Segeta, and all of them probably fluwing through its territory, the l'orpax, Teinessus, and Crimessts or Cutmais. The last of these is prohably the Fiume di S. Bartolomeo, abont 5 miles E. of Segesta: the other two, which are mentioned only by Aelian ( $I$. II. ii. 33), cannot be identified, though one of them is probably the Fiume Gaggera, which flows beneath Segesta it:elf, and falls into the $F$. di $S$. Bartolomeo near its mouth. But, to complicate the question still more, we are told that the names of Scamander and Simois were given by the Trojan colonists to two rivers near Segesta; and the furmer name at least seems to have been really in tuse. (Strab, xiii. p. 608; Diod. xx. 71.) Proceeding eattward we find: 1, the Orethns (Vib. Sequest. p. 15), still called the Oreto, a small stream flowing under the walls of Panormus; 2, the Eleutherus ('E入eúقfpus, Ptrl. iii. 4. § 3), placed by l'tolemy between Panormus and Soluntum, and which must therefore be the Finme di Bagaria; 3, the northern Himera, commonly identified with the Fiume di S. Leonardo, near Termini, but more probably the Fiume Girande, alout 8 miles further E. [Hmera]; 4, the Monalus (Movaras, Ptol.), between Cephatuedium and Alaesa, now the Pollina; 5, the Halesus or Alaesus, flowing beneath the city of Alaesa, now the Pettineo; 6, the Chydas (Xísas, Ptol.), between Alaesa and Aluntium; 7, the Timethus (Ti $\mu \boldsymbol{\eta} \theta$ os, Id.), between Agathyrna and Tyndaris; 8 , the Helicon ('Exikúv, ld.). between Tyndaris and Mylae; 9 , the Phacelinus (Vib. Sequest.). which was near Mylae, or between that city and Messana (the nearer deternination of these four last is wholly uncertain); 10, the Melas of Ovil (Fast. iv, 476) is generally placed in the same neighbourhood, thougb without any obvious teasm.

Along the E. coast the names may be more clearly identified. 1. The Oxobalas of Appian (B. C. v. 109) is probahly identical with the Ace. sines already noticed; 2, the Acıs, a very small stream, is the Fiume di Jaci; 3, the Amexaners, flowing through the city of Catana, is the Giudicello; 4, the Terlas is the Fiume di $S$. Leonarlo, whicb flows from the Lake of Lentini; 5, the Pastaglas is the Porcari; 6, the Alabus is the Cantaro, a small stream flowing into the bay of Aupusta. The Anapus and its confluent the Crane bave been already mentioned. S. of Syraruse occur three small rivers, memorable in the retreat of the Athenians: these are, 1, the Cactrakis (Cassibili); 2, the Erixets (Fiume dii Avola); and 3, the Aslsames (Falconara). A few miles S. of this was the Helores, now called the Abisso, flowing by the city of the same name. No other stream occurs between this and Cape Pachynum.

Sicily contuins no lakes that deserve the name; but there are a few perds or marshy lagoons, of which the names lave been preserved to ns. Of the latter description were the f.xsimelia Pades near Syracase, and the Camarisa Pales adjoining the eity of the same name. The Lacrs Palicomas, on the contrary, was a deep prol or basin of volcanic origun: while the small lake called by the poets J'ergus or Pergusa is still extant in the neighbourhood of Enna. The Lago di Lentini, though much the most considerable acenumulation of waters in Sicily, is not mentimed by asy ancient author.

The towns and cities of Sicily were very numerous.

The Greek ecllonies and their offhoots or dependencies have been already mentimned in relating the histo $y$ of their settlement; but the names of all the towns so far as they can be ascertained will be here enumerated in geographical order, without reference to their nrigin, omitting only the places mentioned in the Itineraries, which were probably mere villages or stations. 1. Beginning from Cape Pelorus and proceeding along the E. coast towards Cape Pachynus, were: Messasi, Tauromenies, Naxos, Actes, Catana and Syracuse. Trotilum, destroyed at an early period, as well as Megaba Hyblaka, weresituated between Catana and Syracuse. The Chalcidic colonies of Callifolls and Euboea, both of which disappeared at an early period, must have been situated on or near the E. coast of the island, and to the N. of Syracuse, but we have no furtber clue to their situation. S. of Syracuse, between it and Cape Pachynns, was Heiores, at the mouth of the river of the same name. 2. W. of Cape Pachynus, proceeding along tbe S.enast, were Camarina, Gela, Phintlas, Agrigextem, Heraclea Minoa, Thermae Selinuxtiae, Selines, Mazara, and Lilybaecar. Besides these the more obsenre towns of Camicus, Caena, and Inyccar, the two furmer dependencies of Agrigentum, the latter of Selinus, must be placed on or near the S. coast of the island. 3. N. of Lilybaeum was Motys, which ceased to exist at a comparativelyearly period, and Drepanest (Trapani) at the NII. angle of the island. Between this and Panormus, were Eryx at the foot of the mountain of the same name, and a short distance from the coast, the Eimporium of Segesta, Hrccara, and Cetaras. Proceeding eastisard from Fanormus, along the N. coast of the island, were solentum, Thermaf, Himera, Cephaloedius, Alaesa, Calacta, Agathyris, Alentius, Tyxparas, and Mylae.
The towns in the interior are more difficult to enumerate: with regard to some of them indeed we are at a loss to determine, even in what region of the island they were situated. For the parpose of enumeration it will be convenient to divide the island into three portions; the first comprising the western half of Sicily as far as the river Himera, and a line drawn from its sources to the N. coast: the other two, the NE. and SE. portions, being separated by the course of the river Dittaino and that of the Symaethus to the sea. 1. In the western district were segesta and Halicyae, the must westerly of the inland cities; Entella, on the river Hypass, about midway between the two seas: lakra and Macella, both of which may probably be placed in the mountainous district between Eintella and Panormns; Triocals, ncar Colatabellotta, in the mountains inlaud from the Thermae Selinuntiae; Schesa, of very uncertain site, but probably situated in the same part of Sicily; IIeruesses, in the neighbourhoud of Agrigentom; Perrs, ncar the sources of the W. branch of the llimera in the Madonia monttains; and Exaybu (Gangi), at the head of the Fiunue Grande, the E. bianch of the same river. Pazores must apparently be phaced on the northern declivity of the same mountains, but further to the $W$.
A little to the E. of the Himera nnd as nearly as posible in the centre of the island, was situated the firtress of Exxa (Castro Gioranni), so that the boundary line between the NE. and NW. regions may be conveniently drawn from thence. 2. In the NE. region were: Assorls and Agymis,

NE. of Enna, hut W. of the valley of the Symaethus; Centuripa (Centurbi), nearly due E. of Enna; Adranum (Adernó), on the E. bank of the Symaethus, at the foot of Mount Aetra; Hybla Majors (which must not be confuunded with the city of the same name near Syracuse), and Aetwa, previously called Inessa, both situated on the southern slope of the same mountain. N. of Agyrium, on the southern slopes of thie Mons Nebrodes were situated Hereita, Capitium, and probably also Galama : while on the morthem declivities of the same mountains, fronting the sea, but at some distance inland, were placed Arollonia (prubably Pollina), Amestratus (Mistretta), Abacaenumi, a few miles inland from Tyndaris, and Nose, probably Nuara. Three other towns, Imachara, Ichana, and Tissa, may probably be assigned to this same region of Sicily, though their exact position cannot be determined. 3. In the SE. portion of Sicily, S. of the Symaethus and its tributary tbe Chrysas or Dittaino, were situated Ergetium, Morgantia, Leontini, and Hybla: as well as Menaenum and Herbessus: but of all these дames Leontini (Lentini) and Menaenum (Mineo) are the only ones that can be identified with anything like certainty. In the hills W . of Syracuse were Acrate (Paluzzolo), Bidis (S. Gio. di Bidino), and Cacyrum (Cassaro); and W. of these again, in the direction towards Gela, must be placed the Heraean Hyula, as well as Echetla, ia the neighbourhood of Gran Michele. SW. of Syracuse, in the interior, were Netum or Neetua (Noto Iecchio), and Motyca (Modica), boti of which are well known. The Syracusan colony of Casmenae must probably have been situated in the same district but its site has never been identified.

After going through this long list of Sicilian towas, there remain the following, noticed either by Cicero or Pliny, as municipal towns, to the position of which we have no means of even approximating. The Acherini (Cic.), Tyracini (Cic.; Tyracienses, Plin.), Acestaei (Plin.), Etini (Id.), Herbulenses (Id.), Scmellitani (Id.), Talarenses (Id.). Many of the above names are probably corrupt and merely false readings, but we are at a loss what to substitute. On the other hand, the existence of a town called Mutistratum or Mytistratum is attested by both Cicero and Pliny, and there seems no sufficient reasoa for rejecting it as identical with Amestratus, as has been done by many modera geographers, though its site is wholly uncertain. Equally unkoown are the following names given by Ptoleny among the inland towns of the island: Aleta ("Al $\eta \tau \alpha$ ), Hydra or Lydia ( ${ }^{\prime} \Upsilon \delta \rho \alpha$ or Au $\delta i u$ ), Patyorus (Hatiopos), Coturga or Curtuga (Kótup̧̌a or Kópruүa), Legum or Letum ( $\Lambda \hat{\eta} \gamma o \nu$ or $\Lambda \bar{\eta} \tau 0 \nu$ ), Ancrina ("A $\gamma \kappa \rho i v a$ ), Ina or Eoa ("I $\nu \alpha$ or "H $\nu \alpha$ ), and Elcethium ('Encé日iov). It would be a waste of time to discuss these names, most of which are prohably in their present form corrupt, and are all of them otherwise wholly unknown. On the other hand the existence of Nicosa, mentioned by Stephanus of Byzantium, but not noticed by any other writer, is coofirmed by coins.

The topography of Sicily is still very imperfectly known. The ruins of its more celebrated cities are indeed well known, and have been often described; especially in the valuable work of the Duke of Serra di Falco (Antichità della Sicilia, 5 vuls, fol. Palermo, 1834-I839), as well as in the well-known travels of Swinhurne, Sir If Hoare, \&c. (Swinburse's

Travels in the Two Sicilies, 2 vols. 4 to. Lond. 1783 ; Sir R. Hoare's Classical Tour through Italy and Sicily, 2 vuls 8 vo. Lond. 1819 ; St. Nun, Foyage Pittoresque de Naples et de la Sicile, 5 vols. fol. Paris, 1781 ; Biscari, Principe di, Viaggio per le Antichitù della Sicilía, 8vo. Palermo, 1817, \&c.): but the i-land has never been thoroughly explored by an antiquarian traveller, like thuse to whom we are indebted for our knowledge of Greece and Asia Minor: The valnable work of Cluverius (Sicilius Antiqua, fol. Lugd. Bat. 1619) must here, as well as for Italy, be made the fonndation of all suhsequent researches. But much valuable intormation is found in the more ancient work of Fazello, a Sicilian monk of the sixteenth century, as well as of his commentator Amico, and in the Topographical Dictionary of the latter author. (Thomae Fazelli de Rebus Siculis Decades Luo, first edit. in fol. P'anormi, 1558, republished with copious notes by Auico, 3 vols. fol. Catanae, 1749-1753; Amico, Lexicon Topographicum Siculum, 3 vols. 4to. Catanse, 1759). Mucb, however, still remains to be done. Many localities indicated by Fazello in the sixteenth century as presenting ancient remains have never (so far as we are aware) been visited by any modern traveller: no good map of the island exists, which can be trusted for topographical details, and there can be little doubt that a minute and careful examination of the whole country, such as has been made of the neighbouring island of Sardinia by the Chev. De la Marmora, would well reward the latours of the explorer. Even the ruins described by Sir R. Hoare as existing in the neighbourhood of Sta Croce, or those situated near Vindicari, a few miles N. of Cape Pachymns and commonly ascribed to Imachara, have never been examined in detail, nor has any clue been ohtained to their ilentification.

The ltineraries give several lines of route through the island, but many of the stations neentioned are wholly uncertain, and were probably never more than obscure villages or mere solitary posthouses. The first line of route (Itin. Ant. pp. 86-89) proceeds from Messana along the E. coast by Tauromenimm and Acium to Catana, and from thence strikes inland across the centre of the island to Agrigentum; the course of this inland route is wholly uncertain and the names of the three stations upon it, Capitoniana, Gelasium I'hilosophiana and Petiliana, are entirely unknown. From Agrigentum it followed the line of coast to Lilybaeum; the stations given are Cena [Ciena], Allava, Ad Aquas (i. e. the Aquae Labodes or Therinae Selinnntiae), Ad fluvium Lanarium, and Mazara; all except the 3rd and 5th of very uncertain site. A second route (Itin. Aut. pp. 89, 90) proceeds in the inverse direction from Liiybaeum to Agrigentum, and thetice by a more southerly line, through Calvisiana, Hybla, and Acrae (Palazzolo) to Syracuse, and from thence as before along the E. coast to Messana. A third line follows the N . cuast of the island from Lilybaeun by Panormus to Messana. The stations on this line are better known and can for the most part be determined: they are, Drepana, Aquae Segestanae (near Segesta), Parthenium (Partinicu), Hyccaa (Muro di Carinis), Panormus, Soluntom, Thernae, Cephaloedium, Halesus (Alaesa), Calacte, Agatinnum, (Agathymum), Tyndaris, and Messana. A fourth route (Itin. Ant. p. 93) crossed the interior of the island from Thermae, where it branched off from the preceding. passing through Enna, Aqyrimm, Centuripa and Aetna to Catana. A firth gives us a line
of strictly maritime ronte around the smathern es－ tremity of the island from Arrigentum to Syracuse； but with the exception of lintis，which is probably Phintias（Alicuta），none of the stations can be identified．Lastly，a line of road was in use which erossed the island from Acrigentum direct to Pa－ narmus（Itin．Ant．p．96），but none of its stations are known，and we are therefore unable to determine even its general conrse．The other routes given in the Itinerary of Antominus are only unimportant variations of the preceding ones．The Tabula gives ouly the one general line around the inland（crussing， however，from Calvisiana on the S．coast direct to Syracuse），and the cross line a3ready mentioned from Thermae to Catana．All discussion of distances alone the above routes must be rejected us useless， until the routes themselves can bo more accurately determined，which is extremely difficult in so hilly nnd broken a country as the greater part of the interior of Sicily．The similarity of names，which in ltaly is so often a sure guide where all other in－ dications are wanting，is of far less assistance in Sicily，where the long period of Arabic dominion has thrown the nomenclature of the island into great confusion．

Sl＇COR1S（ ミikopts，Dion Cas＊．xli．20），is tri－ butary river of the 1lwrus in 1hispania Tarramensis． It rose in the 1＇yrences in the territory of the Cer－
retani，and separated the countries of the llergetes and Lacetani．It flowed past Ilerdn，and according to Vibins Sequester（p．224，ed．Bipont）bore the name of that town．A little af erwards it received the Cinga，and then flowed into the Iberos near Octogesa．（Caes，B．C．i． 40,48 ；Plin．iii．3．s． 4 ； Lucan．iv．13，seq．）Ausonius describes it as flus． ing impetuously（＂torrentem，＂Epist．xxr．59）． Now the Segre．
［T．H．D．］
SI＇CULI（ writers to an ancient race or people that formed one of the elements in the primitive population of Italy， as trell as sicily．But the accounts given of them are very confused and uncertain．We find the Siculi mentioned：1，as among the early inhabitants of Latium ；2，in the extreme S ．of Italy ；3，in Sicily ；4，on the shores of the Adriatic．It will be convenient to examine these notices separately．

1．The Siculi are represented by Dionysius as the earliest inhabitants of $t$ lie country subsequently called Latimm（i．9），as well as of the soutbern part of Etrurin；they were an indigenous race，i．e．one of whose tranderings and origin be had no account． They held the whole country till they were expelled from it by the people whom be calls Aborigines， descending from the mountains of Central Italy ［Anorigives］．who made war upon them，in con－ junction with the l＇elasgians；and after a long pro－ tracted strnggle，wrested from them one town after another（Id．i．9，16）．Anoong the cities that aro expressly mentioned by him as having once been occupied by the Siculi，are Tibur，where a part of the city was still called in the days of Dionysius $\mathbf{\Sigma} \iota \kappa \in \lambda t \dot{\omega} \nu$ ．Ficulea，Antemnae，and Tellenae，as well as Falerii and Fescennium，in the country after－ wards called Etruria（Id．i．16，20，21）．The Siculi being thas finally expelled from their passes－ sions in this part of Italy，were reported to have migrated in a body to the southern extremity of the peninsula，from whence they crossed over the straits， and established themselves in the island of sicily， to which they gave the name it has ever since borne．［Siciliti．］（1d．i．22．）Dionysius is the only author who bas left us a detailed account of the couquest and expulsion of the Siculi，but they aro mentioned by Pliny among the races that hat successively occupied Latium（Plin，iii．5．s．9）； and this seems to have been an cstablished and reccived tradition．

2．We find the Siculi frequently mentioned in the southernmost portion of the Italian peninsala，where they appear in close connection with the benotriass， Morgetes，and Itali，nll of them kindred tribes，which there are good reasons for assigniag to the Pelaspic race．［OvNotmia．］1t is probable，as suggested by Straba，that the siculi，more than once，mentioned by llomer（Odyss．xx．383，xxiv．211，\＆c．），were thic inhabitants of the coast of Italy opposite to Ithaca：and the traditions of the Epizephyrian Lo－ crians，reported by Polybius，apoke of the Siculi as the perple in whose territory they settled，and with whom they first found themselves engaged in war．（l＇ulyb． xii． 5,6 ）Numerous traditions also，reported by Dionysins（i．22， 73 ）from Antivehus，Hella－ micus，and others，concur in bringing the siculi and their cponymons leader Sictulus（ $\Sigma$ ase $\lambda$ ós）into cloce connection with Italus and the Itali：und this is confirmed by the linguistic relation which may fairly be almitted to exist between इike入ós and＇Ita入ós （Niebulhr，val．i．p．4i）themgh this is not．close enough to be ia itself conclusive．no far as
our scanty knowledge goes，therefore，we must conclude that the two shores of the Sicilian strait were at one period peopled by the samo trike，who were known to the Greeks by the name of Sicels or Siculi；and that this tribe was probably a branch of the Oenotrian or Pelasgic race．The legends which connected these Siculi with those who were expelled from Latium srem to lave been a late invention，as we may infer from the circumstance that Sicelus， who is represented by Antiochus as taking refuge with Morges，king of Italia，was called a fugitive from Rome．（Dionys，i．73．）

3．The Siculi or Siceli were the people who oc－ cipied the greater part of the island of Nicily when the Greek colonies were first established there，and continned throughoat the period of the Greek domi－ nation to occopy the greater part of the idterior， especially the more rugged and mountainous tracts of the island．［Sicilia．］The more westerly portions were，however，occupied by a people called Sicani，whom the Greek writers uoiformly distinguisls from the Niculi，notwitlistanding the resemblance of the two names．These indeed would seem to have been in their origin identical，and we find Roman writers using them as such；so that Virgil more than once employs the name of Sicani，where he can only mean the ancient Latin people called by Dionysius Siculi．（Virg．Aen．viii．795，xi．317．）

4．The traces of the Siculi on the western shores of the Adriatic are more uncertain．Pliny iodeed tells us distinctly that Numana and Ancona were founded by the Siculi（Plia．iii．13．s．18）；but it is by uo means improbable that this is a mere con－ fusion，as we know that the latter city at least was really fuunded by Sicilian Greelss，as late as the time of Dionysius of Syracuse［Ancona］．When， however，he tells us that a considerable part of this coast of Italy was beld hy the Siculians and Libur－ nians，before it was conquered by the Umbrians（ 16 ． 14．s．19），it seems probable that be must have some other authority for this statement；Pliny is， huwever，the only author who mentions the Siculi in this part of Italy．

From these statements it is very difficult to arrive at any definite conclusion with regard to the ethno－ graphic affinities of the Siculi．On the one hand， the notices of them in Southern Italy，as already observed，seem to bring them into close connection with the Itali and other Oenotrian tribes，and would lead us to assign them to a Pelasgic stock：but on the other it must be almitted that Dionysius dis－ tinctly separates them from the Pelasgi in Latium， and represents them as expelled from that country by the Pelasgi，in conjunction with the so－called Aborigines．Hence the opinions of mudern schotars have been divided：Niebuhr distiuctly receives the Siculi as a Pelasgic race，and as forming the Pclas－ gic or Greek element of the Latin people；the same view is adopted by O．Miller（Etrusker，pp．10－ 16，\＆．c．）and by Abeken（Mittel Italien，p．5）； while Grotefend（Alt Italien，vol．iv．pp．4－6），ful－ lowed by Forbiger and others，regards the Siculi as a Gavish or Celtic race，who had gradnally wandered southwards through the peninsula of Italy，till they finally crassed over and established themselves in the island of Sicily．This last hypothesis is，however， purely conjectural．We have at least some foun－ dation for supposing the Siculi as well as the Oeno－ trians to be of Pelasgic origin ：if this be rejected， we are wholly in the dark as to their origin or aifinities．
 Strab．\＆c．），was the name given in aocient times to that portion of the Mediterraeean sea which bathed the eastern shores of Sicily．But like all similar appellations，the name was uscd in a somewhat sazue aud fluctuating manuer，so that it is dulficult． to fix its precise geographical iimits．Thus btrabo describes it as extending along the eastern shore of Sicily，from the Straits to Cape Pachynus，with the sonthern shore of Italy as far as Locri，and again to the eastward as far as Crete and the l＇elopumese； and as filling the Corimthian Gulf，and extending northwards to the lapygian promontory and the mouth of the Ionian gulf．（Strat．ii．p．123．）It is clear，therefore，that he included under the name the whole of the sea between the Pelupunnese and Sicily，which is more conmonly known as the ludian sea［Ioxicm Mane］，but was termed by later writers the Adriatic［Admaticim Mare］．Puly－ bius，who in one passage empluys the name of lonian sea in this more extensive sease，elsewhere uses that of the Sicilian sea in the same general manner as Strabo，since he speaks of the island of Cephallenia as extending out towards the Sicilian sea（v．3）；and even describes the Ambracian gulf as an inlet or arm of the Sicilia：sea（iv．63，v．5）． Eratosthenes also，it would appear from Pliny，al－－ plied the name of Siculum Mare to the whole extent from Sicily to Crete．（Plin．iii．5．s．10．）The usage of Pliny himself is obseure；but Dela distin－ guislies the Sicilizo sea from the lonisn，applying the foromer name to the western part of the brvad sea， nearest to Sicily，and the latter to its more easterly portion，nearest to Greece．（Mel．ii．4．§ 1．）But this distinction does not seen to have beeb generally adopted or continued long in use．Indeed the name of the Siciliad sea seems to have fallen much into disuse．Ptoleny speaks of sicily it．elf as bounded on the N ．by the Tyribenian sea，oo the S ．by the African，and on the E．by the Adriatic；thus omit－ ting the Siciliun sea altogether（1＇tol．iii．4．§ 1）； and this seems to have continued under the Roman Einpire to be the received nomedclature．

Strabo tells us that the Sicilian sea was the same which had previously been called the Ausonian （Strab．ii．p．133，v．1．233）；but it is probable that that name was never apphed in the more extended sense in which he nses the Sicilian sea，but was cun－ fined to the portion more immediately adjui：sing th：e sunthern cuasts of ltaly，from Sicily to the Iapygian promontory．It is in this sense that it is employed by l＇liny，as well as by l＇olybius，whom he cites as his authority．（Plin．l．c．）
［E．H．B．］
SICUM（इぃко̂̀，Ptul．ii．16．§ 4 ；llin．iii． 22 ； Siclis，Peut．Tab．），a town of Dalmatia，to the E．of Tragurium，on the road to Salona，where Claudins is said to have quartered the veterans．（Plin．l．c．） From its position it cannot be Sebenico，with which it has been identified，but may be represented by the vestiges of a Roman station to the NW．of Castel Settiri，on the Riviere dei Castelli，where a column with a dedicatory inscription to M．Julius Philippus has been lately found，as well as much pottery and Roman tiles．（Wilkinson，Dulnatia，vol．i．p． 176．）

SI＇CYON（ $\delta$ and $\dot{\eta}$ ミıкиш́य，also ミєкváv，Bekker， Anecd．p． 555 ：Eth．玉icuóvios：the territory $\mathbf{\Sigma i}_{i-}$ кvшขia：Vasiliki．）

1．Situation．－Sieyon was an important city of Pelopunnesus，situated upon a table－height of no great elevation，at the distance of about 2 miles from the

Corinthian gulf．Strabo（viii．p．382）correctly de－ scribes it as occopying a strong hill distant 20 stadia from the sea，though he ails that othens made the distance 12 stadia，which may，howeser，have refer－ ence to the lower town built at the foom of the table－ height．Upon this height the modern vilage of Vasi－ liki now stands．It is defended on every side by a natural wall of precipice，which e in be ascended only by＇one or two narrow passaces from the plain．A river flows upun either site of the beight，the one on the eastern side being the Asnyas，and that on the western side the IIelisson．When L çson was at the height of its power，the city consisted of three parts，the Acropulis on the hill of Vasitika，the lower town at its foot，and a purt－town upon the coast．The port－town was well fortified．（ $\Sigma$ oku－
 Paus．ii．12．§ 2：Strah，l．c．）

II．History．－Sicyon tas une of the most an－ cient cities of Greece，and is said to have existed under the name of Ayglilesia（Aiरiá入eia，Paus．ii． 5．§ 6）or Aeglali（Aiyta入oí，Strab．viii．p．382） long befure the arrival of Pelops in Greece．It was
 rently its sacerdotal namie，and under which it is celebrated as the＂dwelling－place of the blessed．＂ and as the spot where IPrometheos instituted the Ifel－ lenic sacrifices and deceivel Zeus．（Steph．B．s．v． ミ．киáv；Strab．viii．p．3世2：Cal im．Fragm．195，p． 513．ed．Ernesti；Hesiod．Theon．535．）Its name Tes， cminis（ $\mathrm{T} \in \lambda \chi$ Ivia）lias reforence to its being one of the earliest seats of the workers in metal．（Steph．B． s．t．ミikuáv）．Its name Acrialcia was derived from a mythical autochthon Aegialeus，and points to the time when it was the chief city er n the touthern coast of the Corinthian gulf，the whole of which was called by the same name．Its later name of scyun was said to have been derived from an Athenian of this name，who beca：ne king of the i＇$y$ ．and who is represented as a son of either Ma－ rathon or Aletion．（Paus，ii．6．§ 5．）This legend point to the fact that the early inhabitants of Sicyon were Ionians．Aegialeas is said，in some tralitions，to have been the son of Inachus，the first king of Argos，and the brother of Phoronens． A long series of the successors of A －ialrus is given． among whom one of the most celebrated was the Argive Alrastus，who，being expelled from his own dominiors，fled to Polybas，then king of Sicyon，and afterwards succeeded him on the throne．（Euseb． Chron．p． 11 ．seq．；Aagost．Cir．Dei，xviii．2；P．us． ii．6．§§ 6．7．）Homer indeed calls Adrastus first k ing of Sicyon（15om，Il，ii．5i－2）；and we know that in historical times this hero was worshipped in the city．（Herod．v．67．）Sicyon was subse－ qoently chinquered by Agamemnon，who，howeser． left Hippulytus on the throne；but Sicyon became a tributary city to Mycenae．（Pans．ii．6．SS 6，7． Hom．Il．ii． $57 \cdot 2$ ，xxiii．299．）Hippolytus was the granulson of Pharstas，who was a son of Hercules ； and in consequence of this connection，the inhabit－ ants were not expel lel ir redaced to subjection upon the eonquest if the city hy the Dorians under Phalces，the son of Tementus；for while the Dorian conquerors，as in all other Doric states，were di－ viled into three tribes under the names of IIylleis， Damphyli，and Dymanatae，the original Sicyonians were turmed into a fourth tribe，under the pame of A－gialeis，which possessed the same pulitical rights as the other three．（Daus．i．6．§ 7 ；Strab．viii． p．389；Herod．v．68．）Sicyurs wa vors a Durias
state；and fro：a this time its real history begins． It was at first dependent upun Argos（Paus．L．c．）， which was for smine time the most powerful state in the l＇eloponnesns，Sfarta being second to it．In the First Messenian War the Sicyomians fought on the sile of the Messenians along with the Argives and Arcadians．（Pans．iv．11．§ 1．）In the Second Messenian War，about B．c．676，Sicyon became subject to the tyranny of the Orthagoridae，who governed the city for more than 100 Jears，and whuse rule is praised by Aristotle（ $I$ ol，v．9．§ 21） for its milduess．The family of the Orthagoridae belonged to the non－Dorian tribe，and the con－ tinuance of their power is to be accounted fur by the fact of their being supported by the original population azainst the Dorian conquerors．Ortha－ Horas，the founder of the dynasty，is said to have been originally a cook．（Aristot．l．c．；Hellad．ap， Phut．cod． 279, p． 530 ：Liban．vol．iii．p．251，ed． Reiske）In other arcounts Andreas is mentioned as the first of the Sicyonian tyrants（IIerod．vi． 126：Diod．Fragm．Fat．14）：and it is probable that he is the same person as Orthagoras，as the two names do mut occur in the same author．He was succeeded by his son Dlyron，who gained a cha－ riot victory at Olympia in B．c． 648 ；Myrun hy Aristongmus；and A istonymus by Cleistbenes （Ilerod，vi．126；l＇ans．ii．8．§ 1，vi．19．§ 1．）The Latter was celebrated for his wealth and maguifi－ cence，and was also distingnisbed by his bitter hatred against Argos，and his systematic endeavour to depress and dishonour the Dorian tribes．He chamged the ancjent and venerable names of the three Dorian tribes into the insulting names of Hy － atae，Oneatae，and Choereatae，from the three Greek words signifying the sow，the ass，and the pig； while he declared the superiority of his own tribe by giving it the designation of Archelai，or lords of the people．Cleisthenes appears to lave continued despot till his death，which platy be placed about b．c． 560 ．The dynasty perished with him．He left no son；but bis daughter Agariste，whom so many suitors wooed，was married to the Athenian Jecaule，of the great family of the Alcmaeonidae， and became the mother of Cleisthenes，the founder of the Athenian democracy after the expulsion of the Peisistratidae．The names given to the tribes by Cleisthenes continued in tuse for sixty years after the death of the tyrunt，whed by mutnal agreement the ancient names were restored．（Herod．vi． 126 －13］；Grote，IIist．of Greece，vol．iii．p．43，zeq．； Dict of Biogr．art．Cleistinsifs．）

A Dorian reaction appears now to hase taken place，for during a long time afterwards the Sicyonians were the steady allies of the Spartans． In the invasion of Greece by Xeracs（B．C．480）， the Sicgonians sent a squadron of 15 shipo to Salamis（llerod．viii．43），and a body of 3000 hoplites to Plataca．（Herod．ix．28．）In the mutirval between the P＇ersian and Peluponnesian wars the territory wals twice invaded and lad waste hy the Achenians，first under Tultrides in B．C． 456 （Thuc．i．108；Paus．i． 27. § 5），and a second time under Pericles，b．C． 454 （Thuc．i．111；Diod si． 88）．A few years later（B．C．445）the bicyonians sopported the Megarians in their revolt from Athens， （Tluce i．114．）ln the Peloponnesian War they sided with Sparta，and sent a contingent of shipe to the Pelopounesian fleet．（Thuc，ii．9，80，83．）In B．C． 424 the Sicyonians assisted Mrasidas in his operations against the Athenians in the Jlegarid
(Thac. iv. 70 ), and in the same year they repulsed a descent of the Athenians nnder Demosthenes upon their territory. (Thnc. iv. 101.) In n.c. 419 they united with the Coriuthiams in preventing Alcibiades from crecting a fortress upon the Aclaean promontory of Rhium. (Thac. v. 52.) Abont this time a democratical revolation appears to have taken place, since we find the Lacedaemonians establishing un oligarchical government in Sicyon in B.c. 417. (Thuc. v. 82.) In the wars of Lacedaemon against Cerinth, B. c. 394 , and against Thebes, e. c. 371 , the Sicyonians erpoused the side of the Lacednemonians. (Xen. Hell. iv. 2.§ 14, iv. 4. § 7 , seq. vi. 4. § 18.) But in B.c. 368 Sicyon was compelled by Epaminondas to join the Spartan alliance, and to admit a Theban harnost and garrison into the citadel. Euphron, a leading citizen of Sicyon, taking advantage of these circumstances, and supported by the Arcadians and Argives. sncceeded in establishing a democracy, and shortly atterwards made himelf tyrant of the city. But being expelled by the Arcadians and Thebans, he retired to the harbour, which he sarrendered to Sparta. By the assistance of the Athenians he returned to Sicyon ; but finding himself onable to dislodge the Theban garrison from the Acropolis, he repaired ts Thebes, in hupes of obtaining, by corruption and intrigue, the banislmment of his opponents and the restoration of his own power. Here, however, he was murdered by some of his enemies. (Xen. Hell. vii. 1-3; Disod. $\mathbf{x v}$. 69, 70 ; Dict. of Biogr. art. Evpinox.) Sicyon seems, however, to have been favorable to tyrants ; for, after a short time, we again find the city in their power. The facility with which ambitious citizens obtained the sapreine power was probably owing to the autagonism between the Dorian and old Iorian inbabitants. Demosthenes mentions two Sicyonian tyrants, Aristratus and Epichares, in the pay of Plitip (de Cor. pp. 242, 324). In the Lamian war, after the death of Alexander the Great, B.c. 323, the Sicyonians joined the other Grecks agaiast the Macedoaians. (Dind. xviii. 11.) The city subsequently fell into the hands of Alexander, the son of Polysperchon; and after his mnrder in B. C. 314, his wife Crutesipolis continued to hold the town for Cassander till B.c. 308 , when she was indnced to betray it to Ptolemy. (Diod. xix. 67, xx.37.) In B. c. 303, Sicyon passed out of the hands of Ptolemy, being surprised by Denetrius Poliorectes in the night. It appears that at this time Sicyon consisted of three distinct parts, as already mentioned, the Acropolis, on the hill of Yasiliki, the lower city at its foot, and the port-town. It is probable that furmerly the Acropolis and the lower city were united with the port-town, by walls extending to the sea; but the three quarters were now separated from one another, and there was even a vacaat space between the lower tuwn and the citadel. Seeing the difficulty of defending so extensive a space with the diminished resources and population of the city, and anxious to secure a strongly fortified place, Demetrius campelled the iahabitants to remave to the site of the ancient Acropolia, which Diodorns describes as "a site very preferable to that of the former city, the inclosed space being an extensive plain, surrounded en every side by precipices, and so difficalt of access that it would not be possible to attack the walls with machines." This new city was called Demetrias. (Diod. xx. 102; Plut. Demetr. 25 ; Pans. ii. 7. § 1 ; Strab. viii. p. 382.) The name Demetrias
soon disappeared; but the city continued to remain upon its lofty site, which was better alapted than most mountain beights in Greece for a permancent population, since it contained a good supply of water and cultivable land. Pansimias (l. c.) represents the lower town as the original city of Aegialens ; but Col. Leake justly remarks, it is mote naturul to conclade that the first establishment was made apon the hill lusilike, which, by its strenyth and its secare distance from the sea, pussesses attrihates similar to those of the other clinef cities of Greece. Indecd, Pausanias himself coafirms the antiquity of the occupation of the bill of Vasiliku, by describing all the most ancient momuments oftle Sicyuniars as standing upon it. (Leake, Morea, vol. iii. p. 367.)

After Demetrius quitted Nicyon, it aqain became sulject to a successiun of tyrants, who quickly displaced one another. Cleon was succeeded in the tyranny by Euthydemas and Timocleides; but they were expelled by the people, who placed Cleinias, the father of Aratns, at the head of the government. Cleinias was soon afterwards mardered by Abantidas, who seized the tyranny, u.c. 264 . Abautidas was murdered in his turn, and was succeeded by his father Paseas; but he ugnin was mardered by Nicocles, who bad held the sovercign power only foar moaths, when the young Aratus surprised the citadel of Sicyon, and delivered his native city from the tyrant, B. C. 251. (Pans. ii. 8. §§ 1-3; Plut. Arat. 2.) Through the influence of Aratns, Sicyon now juined the Achaean League, and was one of the most important cities of the confederacy. (Paus. ii. 8. § 3; Plut. Arat. 9; Polyb. ii. 43.) In consequence of its being a member of the league, its territory was devastated, beth by Cleomenes, \&. c. 233 (Plut. Arat. 41, Cleom. 19 : Polyb. ii. 52), and by the Aetulians, B.c. 221. (Pulyb. iv. 13.) In the Roman wars in Greece, sicyon was faronred by Attalus, who bestowed handsome presents upon in. (Polyb, xvii. 16; Liv. xxxii. 40.) The conquest of Corintu by the Romans, b. c. 146 , was to the advantage of Sicyon, for it obtained the greater part of the neighbouring territory and the adnuinistration of the lethunian ganies. (Piuus, ii. 2. § 2.). But evea before Corinth was rebuilt, Sicyon again declined, and appears in an impoverished state towards the end of the Repullic. (Cie. ad Att. i. 19, 20, ii. 1.) After the restoration of Corinti, it still further declined, and its ruin was completed by an earthquake, which destroyed a great part of the city, so that Pausumias fonnd it almoot depopulated (ii. 7. § 1). The city, however, still continued to exist in the sixth century of the Christian era; for Hierocles (p. 646, Wess.) mentions Ners Sicyon (Nea Eitкvouv) amung the chief cities of Achaia. The maritime town was prohahly Old Sicyon. Under the Byzantine empire Sicyon was called Hellas, and the inhabitants Helladici, probably in contradistinction to the surrounding Slavonic inlalitants.

 reference to the ruins of the temples and other pablic buildings.
III. Art, fe.-Sicyon is more renowsed in the artistic than in the political history of Greece. For a long time it was one of the chief seats of Grecian art, and w.is celebrated alike for its painters and sculptors. According to one tradition painting was invented at Sicyon, where Telephanes was the first to practise the monogram, or drawing in ontline by Microsoft ${ }^{(8)}$
（Plio．xxxv．3．s．15）；and the city long remained the bome of painting（＂diuilla fut patria picturae，＂ Plin．xxxv．11．s．40）．Sicyon gave its name to one of the great schnols of painting，which was founded by Enpompus，and which proluced Jim－ philus and Apelles．（1＇lis．sxxy．10．s．36．）Sicyon was likewise the earliest school of statuary in Greece，which was introdnced into the eity by Dipoonus and syllis from Crete about b．C． 560 （Plm．xxxvi，4）；but its varliest mative statuary of celebrity was Canachus．Lysippos was also a mative of Sicyon．（Dict，of Bingr，s．vv．）The city wats thus rich in works of art；but its most valuable Iaintings，which the Sicyonians had been obliged to give in pledge on account of their debts，were removed to Rome io the aedileship of M．Scaurus，to adorn his theatre．（Plid．xxav．11．s．40．）

Sicyon was likewise celebrated for the taste and skill displayed in the various articles of dress made by its inlabitants，among which we find mention of a particular kind of shoe，which was much prized in all parts of Greece．（Athen．iv．p．155；Pollux， vii． 93 ；Hesych．s．v．ミıкиavia；Auctor，ad Heremn． iv．3，de Orut．i．54；Lucret．iv．1t2］；Fwt．s．$火$ ． Sicyonia．）

1V．Topography of the City．－Few cities in Greece were more finely situated thato Sicgon．The hill on which it stood commands a most splendid view． Towards the west is seen the phinio so celebrated for its fertility；towards the east the prospect is bounded by the lofty bill of the Acrocorinthus；while in frout lies the sea，with the noble monntains of Pamassus，Helicon，and Cithaeron rising from the opposite cuast，the whole forming a charming prospect，which cannot have been without influence in cultivating the love for the fine arts，for which the city was distinguished．The hill of Sicyon is a tabular stmmit of a triangular shape，and is divided into an upher aud a lower level by a low ridge of rocks stretehing right across it，and furm－ ing an abropt separation between the two levels． The upper level，which occuphes the southern point of the triaugle，and is about a third of the whole， was the Acropulis in the time of Pausanias（ $\hat{\eta}$ viv Акро́тодіs，ii．7．§ 5）．

MAP OF THE SHE OF SICYON（from Leake）．
A．Vastiha．$\quad$ bbb．Kemains of ancient walls．
Pausamias came to Sicron from Corinth．After crossuy the Asopus，he noticed the Olympicium on the right，and a little farther on the left of the road
the tomb of Eupolis of Athens，the comie poet， After passing some other sepulchral momnments，he entered the city by the Conuthian gate，where was a fountain dropping down fiom the overhanging rocks，which was therefore called Stazusa（ $\Sigma$ rd－ （ovaa），or the dropping fountain．This fountain las now disippeared in consequeuce of the falling in of the rocks．Upon entering the city Pausauias first crossed the ledge of rocks dividing the upper from the lower level，and passed into the Acropolis． Here he noticed temples of Tyche and the Dioscuri， of which there are still some traces．Below the Acropolis was the theatre，the remains of which are found，in conformity with the description of Pau－ sanias，in the ledge of rocks separating the two levels．On the stage of the theatre stood the statue of a than with a shield，said to have been that of Alatus．Near the theatre was the temple of Dio－ nysus，from which a road led past the ruined tem－ ple of Artemis Limnaca to the Agora．At the en－ trance of the Agora was the temple of Peitho or Persuasion：and in the Agora the temple of Apollo， which appears to have been the chief sanctuary in Sicyon．The festival of Apollo at Sicyon is cele－ brated in the minth Nemean ode of Pindar；and Aratus，when lie delivered his native city from its tyrant，gave as the watebword＇A $\delta \delta \lambda \lambda \omega \nu \quad \dot{v} \pi \in \rho-$ סikios．（Plut．Arat．7．）In the time of Polybius （xvii．16）a brazen culussal statue of king Atta－ lus 1．， 10 cubits high，stoud in the Agora near the temple of Apollo；but this statue is not mentioned by lamsanias，and had therefore probably dis－ appared．（1’aus．ii．7．Ss 2－9．）Near the temple of l＇eitho was a sanctuary consecrated to the Roman emperors，and tomerly the honse of the tyrant Cleon．Before it stood the heroum of Aratus （Paths，ii．8，§ 8），sud wear it an altar of the Inthmian Pusetdon，and statues of Zeus Meilichins and of Artemis Patroa，the former resembling a pyra－ mid，the latter a column．In the Agora were also the council－house（Bou入єuтípov），and a stoa buit by Cleisthenes out of the spoils of Cirrla；；like－ wise a brazeo statue of Zeus，the work of Lysippus， a gilded statue of Artemis，a ruined temple of Apollo Lycejus，and statnes of the danghters of Proetus，of llercules，and of Hermes Agoraeus．（Pias．ii．9．§§ 6，7．）The Poecile Stoa or painted stoa，was probably in the Agora，but is nut mentioned by Prusanias．It was adorned with numerous paintiogs，wbich furned the subject of a work of Polemuo．（Athen xiii．p． $5: \overline{7}$ ）．

Pausanias then proceeded to the Gymbasinm， which the describes as not far from the Agora．The Gymuasium contained a marble statue of Hercules by Scopas；and in another part a temple of Hercules in a sacred inclosure，named l＇aedize．From thence a road led to two large inclosures，saered to Asclepius and Aphrodite，both of which were adorned with several statues and buildings．From the Aphrodi－ sium Puasanias went jast the temple of Artemis Itheraea to the gymmasium of Cleiuias，which was used for the training of the Ephebi，and which con－ tained statues of Artemis and Hercules．（Paus．ii． 10．） lt is evident that this gymnasium was different from the oue alrealy described，as Pausanias con－ tinues his comrse towards the sea－side．Fiom thence he turns towards the gate of the city called the Sacred，near which there formerly stood a celebrated temple of Athena，built by Epopeus，one of the mythical kings of Sicyon，but which had been burut by lightning，and of which nothing then remained but the altar：this temple may perhaps have been
the one sacred to Athena Colocasia, mentioned by Athenaeas (iii. p. 72). There were two adjoining temples, one sacred to Artemis and Apollo, built by Epopeus, and the other sacred to Hera, erected by Adrastus, who was himself worshipped by the people of Sicyon (Herod. v. 68; l'ind, Nem, ix. 20). There can be little doubt that these aoeient temples stood in the origioal Acropolis of Sicyon; and indeed l'ausanias elsewhere (ii. $5 . \S$ ) expressly states that the ancient Acropolis oecupied the site of the temple of Atheus. We may place these temples near the northern edge of the hill upon the site of the modern village of Yasilika; and accordingly the
remarkable opening in the rocks near the village may be regarded as the position of the Sacred Gate, leading ioto the ancient Acropolis. (Leake, Morea, vol. iii. p. 372.)

In descending from the Heraeam, on the road to the plain, was a temple of Demeter; and close to the Heraeom were the rains of the temple of Apollo Carneius and Hera I'rodromia, of which the latter was founded by Phalces, the son of Temenus. (Paus, ii. 11. §s 1, 2.)

The walls of Sicyon followed the edge of the whole hill, and may still be traced in many parts. The direction of the aocient streets may also still be

follorsed by the existing foundations of the houses: they run with mathematical precision from NE. to SW., and foom NW. to SE., thas following the rule of Vitravius. Few of the ruins rise above the ground; hut there is a Roman building better preserved, and containing several chambers, which lies near the sidge separating the $t$ wo levels of the hill. Leake supposes that this building was probably the fractoriun of the Roman governor during the periow between the destruction of Corinth by Mummius and its restoration by Jalins Caesar, when Sicyon was the capital of the surromediag country; but more recent observers are inclined to think that the ruins are those of baths. West of this building are the theatre and the stadium; and the modern road which leads from V'asilitid to Stymphalus runs between this Roman buildng and the theatre, and then through a purtion of the stadium. The theatre was cut out of the rock, separating the two levels of the hill, as already described; its total diameter was about 400 feet, and that of the orehestra 100 . Each wing was supported by a mass of masonry, penetrated by an arched passage. To the NW. of the theatre are the remains of the stadium, of which the total length, including the seats at the circular end, is about 680 feet. Col. Leake remarks that "the stadium resembles that of Messene, in having had seats which were not continued through the whole length of the sides. About 80 feet of the rectilinear extremity bad no seats; and this part, instead of being excarated oat of the hill like the rest, is formed of factitious ground, supported at the end by a wall of pulygonal masoary, which still exists." There are also, in various parts of the hill, remains of several subterraneous aquedncts, which supplied The towa with water. The opening of one of them is seen on the SE. side of the theatre; and there is :nother opening nuw walled np W. of the modern village. The tyrant Nieocles escaped through these subterrameous passuges when Sicyon was taken by Aratus. (Plut. Arut. 9.)
V. Topograpky of the Sicyonia. - The territory of Sicyon was very small, and, in fact, was little more than the valley of the Avopus. In the apper jart of its course the valley of the Asopus is confined between mountains, but near the sea it opens ont into a wide plaia, which was called Asolita. ('Accria, Strab. viii. p. 382, ix. p. 408 ; P'ans. ii. 1. § 1.) This plain was celebrated for its fertility
 Lucian, Icroom. c. 18), and was especially adapted fur the cultivation of the olive. ("Sicyon a bacea," Virg. Gearg. ii. 519; (or. Ep, ex Pont. iv. 15. 10; Stat. Theb. iv. 50.) The neighbouring sea supplied stu abundance of excellent fish. (Athen. i. p. 27.) It was separated from the Corinthia on the E. by the river Nimea, and from the territory of Pellene (w) the W. by the Sythas; and on the S. it was lounded by the territonies of Plilius and Cleonae. A: one time the territory of sicyon must have exthaled even beyond the Sythas, since Goxtssa or Donressa, whith lay W. of this river, is deseribed by J'ausanias as belonging to the Sicyonians. [loz. b,ENk, p. 571, a.] Between the llelison and the Sythas was probably the river Sullecis, with the arehgbouring village of Jphyra, mentioned by Girabo (viii p. 338). [Er-मyka. No. 3.] Sixty statias. of Sucyom, and near the fiontiers of Philasia, was Thitane or 'Titama, the most important ot' the depondencies of Siryon. [Timask.] Furty stadia bey and Titane was Phlins: but this rual, which
was too narrow for carriages, was not the direct road from Sieyon to Phlius. The direct road was to the right of thie Asopns; and the circuitous road throngh Titase to the left of that river. Between these two roads, at the distance of 20 stadia from Sicyon, was a snered grove, containing a temple of the Eumenides. (P'aus, ii. $1 \mathrm{~J} . \S 3$, seq.) East of Sicyon was Epieicia, on the river Nemea. [Fipueicia.] In the same direction was the fortress Drkak. ( $\Delta$ épau, Xen. Ilell. vii. 1. § 22.) ''liere was also a furtress Phnebia, taken by Epaminondas in his march through the valley of the Asopus: it is probably the same place as Buphia. [Buphia.] Strabo (ix. p. 412) mentions a demus Plataeae in the Sicyonia. (Hayen, Sicyonia, legimont. 1831; Gampf, Sicyoniacorum Spee. Бerol. 1832, Torg* 1834. Bubrik, De Sicyoniae Topographia, Recimont. 1839; Leake, Morea, vol. iii. p. 35I, seq. ; Boblare, Recherches, कc. p. 30, seq.; Russ, Reisen im Pelo. ponnes, p. 39, seq.; Curtius, Peloponnesas, vol. ii. p. 482 , seq.- Benle, Etules sur le Péloponese, p. 343, seq.)

COLN OF SICYON.
SIDAE ( $\mathrm{\Sigma} i \delta \alpha_{i}$ ), a place in Boeotia, celebrated for its jomegranates. Hence the Boeotians called this froit oiō7, though the more nsual nane was pord́. As the Athenians are said to have contended with the Bueotians fur the possession of the place, it must have been upon the borders of Attica, but its exact site is unknown. (Athen. xiv. Pp. 650, 651.)
 harbour on the coast of l'amplaylia, 50 stadia to the west of the river Melas, and 350 east of Attaleia. (Siud. Mar. Mag. § 2J4. foll.) The town was founded by Cumae in Aeolis. (Scylax, Peripl. p. 40 ; Strab. xiv. p. 667, comp. p. 664 . Steph. B. s. v.; Pomp. Nela, i. 15.) Arian (Anab, i. 26), who admits the Cumaean origin of the place, relates a tradition eurrent at side itself, according to which the Sidetae were the must ancient colonists sent out from Cumae, but soon after their establishment in their new home forgot the Greek language, and formed a peenliar idion for themselves, which was not understuod even by the neighbouring barbarians. When Alexander appeared before side, it survendered and received a Alacedonian garrison, In the time of Artiochus the Great, a naval engarement took place off Sule between the fleet of Antuchus, commanded by llannibal, and that of the Rhodians, in whicht the former was defeated. (Liv, xssw. 13, 18, xxavii. 23, 24.) 1'olybius (v. 7.3) states that there exinted great eamity between the people of Side and Asspendus. At the time when the pirates had ywached their highest power in the Mediterratean, they made Side their frimipal port, and used it as a market to dispose of their prisoners and bonty by auction. (Strab, xiv. p. 664.) Side continned to be a town of considerable insportance on ler the liman chrperms, and in the ultimate disision of the provine it

p. 682 ; Concil. Const. ii. p. 240.) The chief divinity of this city was Athena, who is therefore seen represented on its coins, holding a pomegranate ( $\sigma \mathrm{i} \delta \eta$ ) in her land. (Sestini, Num. Tet. p. 392, foll.; comp. Xenoph. Anab. i. 2. § 12; Cicero, ad Fam. iii. 6; Athen. viii. p. 350; Paus. viii. 28. § 2; Itol. v. 5. § 2, viii. 17. § 31.) The exact site of ancient Side, which is now called Esky Adalia, as well as its remains, have been described by modern travellers. Beabfort (Karamania, p. 146, foll), who gives an excellent plan of the present condition of the place, states that the city stood on a low peninsula, and was surrounded by walls; the part facing the land was of excellent workmanship, and moch of it is still perfect. There were four gates, one from the country and three from the sea. The agora, 180 feet in diameter, was surrounded by a double row of columns. One side of the square is at present occopied by the ruins of a temple and portico. The theatre appears like a lofty acropolis rising from the centre of the town, and is by far the lirgest and best preserved of any seen in Asia Minor. The barbour consisted of two small moles, connected with the quay and principal sea gate. At the extremity of the peninsula were two artificial harbours for larger vessels. Both are now almost filled with sand and stones, whicb have been borne in by the swell. The earliest coins of Side are ex. tremely ancient; the inscriptions are in very barbarons characters, resembling the Phoeuician, and the imperial coins eshibit the prond titles of $\lambda a \mu \pi \rho o \tau \alpha \dot{\tau} \eta$ and évoogos. (Eckhel, vol. iii. pp. 44. 161 ; Spanleim, De C'su et Praest. Num. p. 879 ; Fellows, Asia Minor, p. 201; Leake, Asia Minor, p. 195, foll.)

Respecting Side, the ancient name of Polemoninm see Polemonium.
[L. S.]
SIDE ( $\Sigma i \delta \eta$ ), a town on the eastern coast of Laconis, a little N. of the promontory Malea. It was said to have existed before the Doriau codquest, and to have derived its name from a daughter of Danaus. The inbabitants were removed by the Durian conquerors to the neighbouring town of Boeae. It probably occupied the site of the monastery of St. George, where there is a port. (Scylax, p. 17 ; Paus. iii. 22. § 11 : Boblaye, Recherches, foc. p. 99: Curtins, Peloponnesos, vol. ii. p. 297.)

SIDE'NE ( $\Sigma i \delta \delta \eta \nu \eta$ ). 1. A town of Mysia, on the river Granicus, which was destroyed by Croesus, and was never rebuilt, in consequence of a curse pronounced on the site by the destroyer. (Strab. xiii. pp. 587, 601.)
2. A town in Lycia, mentioned only by Stephanus B. (s.v.) on the authority of the Lydiaca of Xathinus.
3. A district on the coast of Pontus, about the mouth of the river Sidenus, which derived its name from the town of Side, afterwards called Polemonimm. The greater part of the district was formed by the depasits of the river (Strab. i. p. 52, ii. p. 126, xii. Y1. $547,548,556$; Plio. vi. 4.)
[L. S.]
SIDE'N1 ( $\Sigma, \delta \eta \nu 0 i$ ), a people of Arabia Felix, placed by Ptoleny between the Thamyditae on the north, and the Darrae on the south, on the Elanitic gulf (vi. 7. § 4). Mr. Forster identifies them with the IJjeheyne tribe of Burckhardt, in the north of the Hedjaz, extending along the coast from Jebel Hassane (certaimly identical with the Hippos Mons -both meaning Horse-mountain - of Ptolemy), to Yembo. "All the circumstances, of name, lucality, and neighbomrhood," he says, "concur to prove their identity." (.Arabia, rol. i. p. 126.)

Digitized by
 tribe on the coast of the Baltic, between the mouth of the river Suebus and that of the Viadus. (Ptol, ii. 11. § 14.) It is possible that Sibini ( $\left.\sum, 6, v o i\right)$ is only a corrupt form of the name of this same tribe. (Zenss, Die Deutschen, p. 154.)
[L. S.]
SIDE'NUS, a small river of Pontus, having its sources in Mount Paryadres, and flowing through the district of Sidene into the Eusine; at its mouth was the town of Side or Polenonium (Plin. vi. 4), from which the river is now called Pouteman Chai. (Comp. Hanilton, Researches, i. p. 270.) [L. S.]

SIDERLS, a river of Hyreania, mentioned by Pliny (vi. 16. s. 18), which fluwed into the Caspian sea. It cannot be now determined to which river he refers, but he states from it the Caspian sea was called the Hyrcanian.
[V.]
SIDE'RCS ( a promontory and a port-town on the coast of Lycia. The same place seems to be meant in Stephanus B. (s. v. $\Sigma i \delta \alpha \rho o \hat{s} s$ ), wheo he calls Sidarus a town and harbour. Col. Leake (Asia Minor, p. 189) has shown that the town of Siderus is in all probability no other than Olympas, on the south of Phaselis.
[L. S.]
SIDICI'NI (之iס̌kivor), a people of Central Italy bordering on the Samnites and Campanians. In the time of the geographers they had disappeared as a people, or become absurbed into the general appellation of Campanians (Strab. v. p. 237), but at an earlier period they appear as a wholly independent people. Their clief city was Teanmm, on the E. slope of the volcanic mountain groop of Rocca Monfina: but they had at one time extended their power considerably further to the N. and up the valley of the Liris, as the territury of Fregeliae is said to have been snbject to them, before they were dispassessed of it by the Volscians (Liv. riii. 22). It is clear however that this extension of their limits was of short duration, or at all events had ceased before they first appear in listory. Strabo tells ua expressly tbat they were an Oscan tribe ( $l . c$. .), and this is confirmed by the coins of Teanum still extant, which have Osean inscriptions. They were therefore closely allied to the neighbouring tribes of the Campaniatis on the S. and the Aurunci and Ausones on the W. Henee Virgi! associates the inhabitants of the Sudiciuian plains (" Sidicina aequora," Aen. vii. 727) with the Auruncans and the intabitants of Cales. The last city is assigned by Silius Italicus to the Sidicini, but this is opposed to all other authorities (Sil. Ital. viii. 511). The name of the Sidicini is first mentioned in history in B. c. 343, when they were attacked by the Samiites, who lud been long pressing upon their neighbours the Vulscians. Unable to contend with these formidable assailants, the Sidicini had recourse to the Campanians, who sent an army to their assistance, but were easily defeated (Liv. rii. 29, 30), and being in their turn threatened by the whole poser of the Samnites, invoked the assistance of liome. During the war which followed (the First Sannite War), we lose sight altogether of the Sidicini, but by the treaty which put an end to it (in n. c. 341) it was particularly stipulated that the Samnites should be at liberty to pursue their ambitious desigus against that people (Id. viii. 1, 2). Thus abandoned by the Romans to their fate the Sidicini bad recourse to the Latins (whe were Dow openly slaking off their connection with Rome) and the Campanians : and the Samnites were a second time drawn off frour
their special aftack on this petty people to oppose a more powerful coalition ( $16.2,4,5$ ). It is clrar that the Sidicini took part as allies of the Latins and Campanians in the war that fullowed: but we have no account of the terms they obtained in the general settlement of the peace in 1. C. 338. It is certain, however, that they retained their independence, as immediately afterwards we find them engaging in a war on their own account with their neighbours the Auruncans. The Romans espoused the defence of the latter people, but before they ware nble to take the field, the Auruncans were compelled to abandon their ancient eity, which was destruyed by the Sidicini, and withdraw to Suessa. (Liv. viii. 15.) The Ausonians of Cales had on this occasion been induced to make common canse with the Sidicini, but their conbined forces were easily deteated by the Loman consuls. Cales soon after fell into the hands of the Romans ; but though the territory of the Sidieini was overron by the consols of 1. c. 332 , who established their winter-quarters there to watch the movements of the sammites, their city of Teanum still held ont (I6. 16. 17). Nor do we know at what time it fell into the jower of the Komans, or on what terms the Sidicini were ulemately received to sobmission. But it is probable that this took place bufore n. c. 297 , when we are told that the consul Jeceins Mus advanced to attack the Samnites "per Sidicimum agrum " in a manner that certainly implies the district to have been at that time friendly, if not sabject, to lime (liv. x. 14).

After this the tame of the Sidicini never appears in history as that of a poople, but their territory (the "Sidicinus ager") is mentional daring the Second Ponic War, when it was traversed and ravaged by Hamital on his march from Capua to Kome (Liv. xxvi, 9). The Sila ini seem to have groulually come tos be restarded as a mere portion of the Campanian people, in conmon with the Ausonians of Cales and the Auroncans of Suessa, and the name still eweors oceasionally as a monicipal designation oquivalont to the Teanenam (Liv. xavi. 15: Cic. I'ikl, ii. 41). Strabon speaks of then in his time as an extinct tribe of Oscan race: and under the: Roman Empire the only trace of them preserved wals in the epithet of Sidicinm, which still contmaed to he applied to the city of Teatram, (Strab, v, p. 237; Mlim, iii. 5. s. 9 ; Ptol. iii. 1. § 68 ; Sil. Ital. v. 5.51 , xii. 524.) [Tmanum.]
[F..II. B.]
 c. 37), a suatl jhace on the cuast of Carmania, noticed by Arrian in Nearchus's voyase. Kempthorae thinks that it is represented by a small fishing villaze ealled Mogou; but Mtiller suggests, what seems more probable, that is the present Jisan. (Grogr. Grace Minor. p. 359, ell, Miller. Paris, 1855.)
sHogloCUS or SHOLDEUCUS, in Gallia, is mentioned by Ammians Marcellimas when he is spaking of Jolution march from Augustodumm to Autissiodarum, Situlocum is supposed to be Saulicu [Cmoms.]
[6.1.]
 and important mariti ne city of Phoenicia, which, acomrding to Joseplas, derived its atigin and name from Sidom, the firsthorn sim of Canain (Giv. x. 15: Jusichh. Aut. i. 6. § 2), and is mentioned by Moses as the northern extremity of the Canaanitish mettloments, as Gaza was the southernmost (Gen. x. 19); and in the blessing of Jacob it is said of Zebutun " his border strall be unto Sidon" (xlix.
13). At the time of the Eisodus of the children of Israel, it was already distingaished by the appellation of "the Great" (Josh. xi. 8; compare in LXX. ver. 2), and was in the extreme north border which was drawn from Mount Hermon (ealled Mlount Hur in Num, xxxiv. 7) on the east to Great Sidon, where it is mentioned in the border of the tribe of Asher, as also is "the strong city of Tyre." (Josh. xix. 28, 29.) It was one of beveral citirs from which the loraclites did not disprosses the old inlabitants. (Judg. i. 31.)

As the origin of this ancient city, and the vexed question of its priority and precedency of Tyre, its commercial importance, even in the Ilomeric age, its pulitical guvernment, its religious and civil history, and its manufactures, have all been noticed onder I'sorsicis, it only remains in this place to speak of its geographical position and relations 60 far as they either serve to illustrate, or are illustrated by, its history.

It is stafed by Jusephus to have been a day's joarney from the site of Dan, afterwards Paneas (Ant, v, 3. § 1). Strabo places it 400 stadia S. of Berytur, 200 N . of Tyre, and descrilies it as situated on a fair haven of the continent. He dues not attempt to settle the questions between the rival cities, but remarks that while Sidon is most celebrated by the pocts (of whom Homer does not so mach as name Tyre), the colonists in Afriea and Spain, even beyond the Pillars of Hercales, showed more honour to Tyre (xvi. 2. \$8 22, 24). Herodotns's acenunt of the origin of the race has been given under Poornicia [p. 607, b.], and is shown to) be in accordance with that of other writers. Justin follows it, but gives a different etymology of the name: "Condita urbe, quam a piscium uberitate Siduna appellaverunt, nam jiscem Phoenices Sidon vocant; " hut this is an error corrected by Michaehs and Gesenius (Lex, s. v. . 7is. "to hunt or हnare" game, birds, fish, \&ce, indtlerently, so that the town must have derived itn name from the occupation of the inhabitants as fishers, and not from the abundance of fish; and Kitter refors to the parallel case of Beth-waida on the sen of Tibcrias. (Erdkunde, Syrien, vol. iv, p. 43.) I'liny, who mentions it as " artifex vitri Thebarumque Boeutiarum parns.". places "Sarepta et Ornithon oppida " between it and 'tyre (v. 19). It is reekoned xax. m. 1. from Berytos, xxiv. from Tyre, in the Itinerary of Antoninus (p. 149). But the Itinerarium Hierosolymitunom reckuns it xxviii. from Berytu:, placing Ileduat and Parphirion between ( 1 P. S84). Scylax mentions the chased harbour of Sidon ( $\lambda, \mu$ inv $\kappa$ גeitós, $\mu .42$, ed. गudson), which is more fully described by a later writer, Achilles Tatius (circ. A. D. 500), who reprexents Sidon as situated on the Assyrian sea, itself the metropolis of the Phoce nicians, whose citizens were the ancestors of the 'Thebans. A double harthour shelters the sea in a wide gulf; for where the bay is covered on the right land side, a second mouth hasbeen formed, throuph which the water again enters, opening into what may be regarded as a hartiour of the harbomr. In this inner basin, the vessels could lie securely during the winter, while the sutter one served for the summer. (Cited hy keland, Iralaes. p. 1012). This inner port Relntid ranjectares, wifh great probability, is the closed purt of Scylax, and to be identified with the second larhoar described by Stmbo nt Tyre, where he says there was one closed and another open Matbour, called the Figyptian. The best account of
the site is given by Pococke. "It was situated," he says, "on a rising ground, defended by the sea on the north and west. The present city is mostly on the north side of the hill. The old city seems to have extended further east, as may be judged from the foundations of a thick wall, that extends from the sea to the east; on the south it was prohably bounded by a rivulet, the large bed of which might serve for a natural fosse ; as another might which is on the north side, if the city extended so far, as some seen to think it did, and that it stretched to the east as far as the ligh hill, which is about three quarters of a mile from the present town. . . . On the north side of the town, there are great ruins of a fine fort, the walls of which were built with very large stones, 12 feet in length, which is the thickness of the wall; and some are 11 feet broad, and 5 deep. The barbour is now choked up.... This harbour seems to be the minor port meotioned by Stuabe (xvi. p. 756) for the winter; the outer one probably being to the north in the open sea between Sidon and Tyre (?), where the shipping rides in safety during the summer season." (Observations Palestine, p. 86.) The sepulebral grots are cut in the rock at the foot of the hills; and sone of them are adorned with jilasters, and handsomely painted.

The territory of the Sidonians, originally circunscribed towards the north by the proximity of the hostile Gibbites, extended southwards to the tribe of Zebulon, and Mount Carmel; but was afterwards limited in this direction also by the growing power of their rivals the Tyriatis. (Ritter, l. c. p. 43, \& c. )

The coins of Sidon are very numerous, belonging to two epochs: the former that of the Seleucidae, from Antivchus IV. and onwards; the latter commencing with A. U. c. 643, which is found on coins of Trajan and Hadrian. They commonly represent a ship, the most ancient emblem of the maritime pre-eminence of Sidon, sometimes an eagle, sometimes Astarte with a crown, spear, \&c., with the legend $\Sigma 1 \triangle \Omega N O \Sigma$ OEA乏. (Eckhel, vol. iii. pp. $364-372$.)
[G. W.]
SIDO'NES ( $\Sigma / \delta \omega \nu \in S$ ), a tribe in the extreme east of Germany, about the sources of the Vistula (Ptol. ii. $11 . \S 21$ ), and no doubt the same which appears in Strabo (vii, p. 306) under the name of $\mathbf{\Sigma}$ i $\delta 0 \nu \in S_{,}$ as a branch of the Bastarnae.
[L. S.]
SIDO'NIA. [Pedonia.]
 इiobuvetos), a village in the Corinthia, on the Saronic gulf, between Crommyon and Schoenus. It was taken by the Lacedaemonians along with Cron1myon in the Corinthian War, but was recovered by Iphicrates. (Xeu. Hell. iv. 4. § 13, iv, 5. § 19.) It probably stood in the plain of Susaki. (Scylax; Steph. B. s. v.; Plin. iv. 7. s. 11 ; Boblaye, Recherches, gc. p. 35. ; Leake, Peloponnesiaca, p. 397: Curtius, Peloponnesos, vol. ii. p. 555.)

SIDUSSA ( belonging to the territory of Erythrae. (Thucyd. viii. 24; Steph. B. s.v.) Pliny (v. 38) erroneously describes it as an island off the coast of Erythrae. It is probable tbat the place also bore the name of Sidus ( $\Sigma$ © $\delta o \hat{s}$ ), as Steplanns B. (s. v.) mentions a town of this name in the territory of Erythrac.
[L.S.]
 Lycia, on the southern slope of Mount Cragus, to the north-west of the mouth of the Xanthus. (Plin. v. 28 ; Steph. B. s.v.; Ptol. v. 3. § 5; Hicrocles, p.

684; Cedrenus, p. 344.) The rnins of this city, on a lofty beight of Mount Cragns, liave first been discovered and described by Sir C. Fellows. (Lycia, p. 151, foll.) They are at the village of Tortoorcar. Hissá, and consist chiefly of splendidly built tombs, abounding in Greek inscriptions. The town itself appears to have been very small, and the theatre, agora, and temples, are of diminutive size, but of great beauty.
[L. S.]
SIELEDIVA. [TAPROBANE.]
SIGA ( $\mathbf{\Sigma}$ i $\gamma \alpha$, Ptol. iv. 2. § 2), a commercial towo of Mauritania Casariensis, seated near the mouth of a river of the same name in a large bay. The mouth of the river formed tbe port of the city, at a distance of 3 miles from it (Sigensis Portus, Itin. Ant. p. 13), opposite to the island of Acra, on the highroad, and near Cirta, the residence of Syphax. (Strah. xvii. p. 829 ; Plin. v. 2. s. 1.) In Stiabo's time it was in ruins, but must have been subsequently restored, since it is mentioned in the Itinerary (1.12) as a Roman municipium. (Comp. Ptol. l. c.; Mela, i. 5; Seylax, 51, 52.) Aecording to Shaw (Travels, p. 12), who, however, did not visit the place, its ruins are still to be seen by the present Tucumbrit; others identify it with the Areschkul of the Arabs, at the mouth of the Tafna, near Rasgun.
[T. H. D.]
sIGA ( $\Sigma i \gamma \alpha$, Ptol. iv. 2. § 2), a river of Mauritanin Caesariensis, falling into a bay of the sea opposite to the island of Acra (now Caracoles). Scylas (p. 51 ) calls it さíyou. Probably the present Tafna.
[T. H. D.]
 montory in Troas, forming the north-western extremity of Asia Minor, at the entrance of the Hellespont, and opposite the town of Elaens, in the Tbracian Chersonesus. Near it the naval camp of the Greeks was said to bave been formed during the Trojan War. (Herod. v. 65, 94; Thucyd. riii. 101; Strab. xiii. pp. 595 , 603; Ponp. Mela, i. 18; Plin. v. 33 ; Ptol. v. 2. § 3; Serv. ad Aen. ii. 312.) This promontory is now called Yenisheri.

Near the promontory was sitnated the town of Sigeum, whieh is said to bave been an Aeolian colony, fonnded onder the gnidance of Arcbaeanax of Mytilene, who used the stones of ancient Troy in building this new place. But some years later the Athenians sent troops under Pbryoon and expelled the Mytileneans; and this act of violence led to a war between the two cities, which lasted for a long time, and was conducted with varying snecess. Pittaens, the wise Mytilenean, is said to bave slain Phrynon in single combart. The poct Alcaens also was engaged in one of the actions. The dispute was at length referred to Periander, of Corinth, who decided in favour of the Athenians, (Strab. xiii. p. 599 ; Herod. v. 95 ; Steph. B. s. v.; Diog. Laïrt. i. 74.) Henceforth we find the Pisistratidue in possession of Sigeun, and Hippias, after being expelled from Athens, is known to have retired there with his family. (Herod. v. 65). Tbe town of Sigeum was destroyed by the inhabitants of llium soon after the overthrow of the Persian empire, so that in Strabo's time it no longer existed. (Strab. xiii. p. 600 ; Ilin. v. 33.) A bill near Sigeum, forming a part of the promontory, was believed in antiquity to contain the remains of Acbilles, which was looked upon with such veneration that gradually a small town seems to bave risen around it, under the name of Achilleum [Achilletm]. This tomb, which was visited by Alexander the Great, Julius

Cacsur, and Gemmanicus, is still risible in tho form of a mound or tumulus.
[L.S.]
SIGMAN ( Sí $\mu a y$ ), a river in Crallia. I'tolemy (ii. 7. § 2) places the month of the Siginan between the Aturis (. A dour) and the Garonne; and between the Sigman and the Garonne lie places $\mathrm{Cu}-$ riannm Promontorium. [Cuknint:m.] Darcianus (Peripl.), who b:s the name signatius, gives two distances between the mouth of the $A$ clour and that of the Sigman, one of wbich is 500 and the other 450 stadia. We cannot trust either the latitudes of P'tolengy or the distances of Marcian along this coast. There is no river betweea the Adowr and the Garonne that we can suppose to have been marked down by the ancient cuasting ships to the exclusion of the Leyre, which flows into the Bassin if Areachon. But Gosselin supposes the Sigman to be the Mimisan, which is about balf-way between the $A$ dour and the Bassin d.Arcachon.
[G. L.]
SI'GIIA ( $\Sigma$ ivpia: Eth. Signinus: Segni), an ancient city of Lutium, situated on a lotty hill at the NW. angle of the Volscian mountains, looking down upon the valley of the Succo. It is represented by ancient authors as a Roman colony founded by Tarquinius Superbus, at the same time with Circeii. (Liv. i. 55 ; Dionyr. iv. 63) No trace of it is found betore this; its name does not figure among the cities of the Latin League or those of which the foundation was ascribed to Alba; and the story told by Dionysius (l. c.), that it originated at first in a fortuitons settlensent of some Roman troops encamped in the neighbourhood, which was afterwards eularged and strengthened by Tarpuin, certainly points to the fact of its being a new town, and not, like so many of the Roman colonies, a new settlement in a previsusly existiog city. It passed, after the expulsion of Tarquin, into the hands of the Roman Republic, as it was attacked in B. c. 497 by Sextus Tarquinius, who in vain eadeavoured to make himselt inaster of it (Dionys. v. 58). A few years later, it received a fresh colony, to recruit is exinusted population (Liv. ii. 21). From this time it appears to lave continued a dependency of Rome, and never, so far as we learn, fell into the power of the Volscians, though that people beld all the neighbouring mountain country. Signia must indeed, from its strong and commanding position, overlooking all the valley of the Trerus and the brond plain between it and Praeneste, have been a point of the utmost importance for the Romans and Latins, especially as securing their communications with their alles the Hernicans. In b, c. 340 the Nignians shared in the general defection of the Latins (Liv. viii. 3) ; but we have no account of the part they took in the war that fillowed, or of the terms on which they were received to submission. We know only that "ignia lecame arain (as it had probably been before) a Colonia Latina, and is mentioned as such during the Second l’unic War. On that occasion it was one of those whicls continued fathful to lome at the most trying perisl of the war (Liv. xxyii. ]0), and must therefore lave been still in a flourishing condition. On account of its strong and sechuded position we find it selected as one of the places whare the CarthaEinian hostages were depasited for safety (ld. xxxii. $\underline{2}$ ): but this is the last mention of it that occurs in history, execpt that the battle of Aacriportus is described hy Plutarch as taking place near signia (Plut. Sull. 28). That decisive action was fohght in the plain between Signia and Prawneste [SicmsronTl's]. It, hweser, cortai ily courinuml diming
the later ages of the Republic and under the Einpire to be a coasiderable municipal town. It received a fresh body of colonists under the Tinmvirate, but it is doubtful whether it retained the rank of a Colonia. Pliny dues not reckon it as such, and though it is termed "Colonia Signina " in some inscription $\times$, these are of doubtful authenticity. (Stral. v. p. 237 ; Plin. iii. 5. s. 9 ; Sil. Ital. viii. 378 ; Lib. Colon. p. 237 ; Zumpt, de Col. p. 338; (iruter, Inscr. p. 490. 5, \&c.)

Signia was chiefly noted nnder the Roman Empire for its wine, which, though harsh and astringent, was valned for its medical qualities, and seems to have been extensifely used at Rome (Strab. F. p. 237 ; Plin. xiv. 6. 8, 8; Athen, i, p. 27; Sil. Ital. l. c.; Martial, xiii. 116 ; Cels de $\mathbf{J}$ ed. iv. 5). Its territory produced als 0 pears of a celebrated quality (Juv. xi. 73 ; Mlin. xv. 15. s. 16 ; Colum. v. 10. § 18: Macrob. Sut. ii. 15), as well as excellent vegetitbles, which were sent in large quantities to Rome (Colum. x. 131). These last were grown on a hill near the city, called by Columella Mons Lepinus, apparently one of the underfalls of the Volscian mountains; but there is no authority for applying the name (as modern writers lave frequently done) to the whole of that mass of mountains [LEI2se's Mons]. Signia also gave aame to a particular kind of cement known as "opus Signioum," and extensively employed both for pavements and reservoirs of water (1lin. xxxv. 12. s. 46 ; Colum, i. 6. § 12 , viii. 15. § 3 ; Vitruv, viii. 7. § 14).

The modern town of Segni (a poor place, with about 3500 inhabitants) occupies a part unly of the site of the ancient city. The latter embraced within the circuit of its walls the whole summit of the bill, which stands boldly out from the Volscian mountains, with wbich it is connected only by a narrow neck or isthmus. The line of the ancient walls may be traced throughont its whole extent; they are constructed of large masses of stone (the hard limestone of which the hill itself consists), of polygonal or rudely squared form, and aflord eertainly one of the most remarkable specimens of the style of construction commonly known as Cyclopean or Pelasgic, of which striking instances are found also in other cities in this part of Latium. The city had in all five gates, two of which still retain their prinitive construction; and one of these, koown as the Porta Saracinesca, presents a remarkahle instance of the rudest and most massive Cyclopean construction. The architrave is formed of single masses of stone not less than 12 feet in length, laid acruss from one impost to the other. This gate has been repeatenly figured*; another, less celebrated but scarcely less remarkuble, is found on the SE. side of the town, and is constracted in a style precisely similar. The age of these walls and gates has buen a subject of much controversy; on the one hand the rude and massive style of their construction, and the absence of all traces of the arch in tho gateways, would seem to assign them to a remute and indctinite antiquity; on the other land, the historical notices that we possess concerning Signia all tend to prove that it was not one of the most ancient cities of Jatium, and that there could not have existed a city of such magnitude previous to the settlement of the Roman colony under Tarquin. (For the discussion of this question as well as for

[^28]the description of the remains themselves，see the Annali dell＇Instituto Archeologico for 1829，pp． 78－87，357－360；Classical Museum，vol．ii．pp． 167－170；Abeken，Mittel Italien，p．140，\＆c．） The only other remains within the circuit of the walls are a temple（now converted into the church of $S$ ．Pietro）of Roman date，and built of regularly squared blocks of tnfo；and nearly adjcining it a circular reservoir for water，of considerable size and lined with the＂opus Signinum．＂（Annali，l．c．p． 82．）Several inscriptions of imperial date are also preserved in the modern towa．
［E．H．B．］

GALE OF SIGNIA．
 district of Media Atropatene，near the Caspian Gates．Ptolemy calls it ミiypiavikخ̀（vii．2．§ 6 ）．
SI＇GRIUM（ Ei＇$^{\prime}$ poov），the westernmost promontory of the island of Lesbos，which now bears the name of Sigri（Strab．xiii．Pp．616，618．）Stephanus B． （s．v．）calls sigrium a barbour of Lesbos．［L．S．］
SIGULO＇NES（ $\Sigma$ i $\gamma o u ́ \lambda \omega \nu \epsilon s$ ），a German tribe mentioned by Ptolemy（ii．11．§ 11）as inhabiting the Cimbrian Chersonesns，to the north of the Saxones，but is otherwise unknown．
［L．S．］
SIGYNNES（ $\Sigma$ rioivves，Herod．v． 9 ；ミ̌hovou， Apoll．Rhod．iv．320；Orph．Arg．759；氵 ifivvor， Strah．xi．p．520）．The only nane of any Trans－ Danubian population，other than Scythinn，koown to Herodetus was tha：of the Sigynnes，whom he seems to have described as the Thracians described them to either himself or his informants．The Thracian ootion of one of these Sigynnes was that he wore a Median dress，and considered himself a descendant of the Medes；thongh how this could be was more than Herodotus conld say．Any－ thing，however，is possible in a long space of time．The herses of the Sigynnes were undersized －ponies，indeed，rather than borses．They were flatnosed and long－haired ；their coat being five fiagers deep．They were too weak to carry a man on their back；but not too weak for harness．In chariots they were light and quick；and in the drawing of chariots the Sigynnes took great delight．
We must look on Sigymnes as a general and col－ lective name for a large assemblage of pupulations； iasstonch as their country is said to extend as far westwards as the Heneti on the Adriatic．Say that it reached what wats afterwards the frontier of Pan－
nonia．On the north it must really have been bounded by some of the Scythian districts．In the language of the Ligyans above Massilia，the wurd Sigynna means a merchant，or retail－dcaler，or car－ rier．In Cyprus they call spears by the name Sigynna．The resemblance of this word to the name Zigeur $=$ Gipsy has often been noticed．Wurd for word，it may be the same．It may also have been applied to the gipsies with the meaning it has in Ligyan．It does dot，however，follow that the Sigymmes were gipsies．
［R．G．L．］
SIHOR（ $\mathrm{\Sigma} i \dot{\omega} p$ ）．1．The torrent more commonly known as＂the River of Egypt，＂the southern boundary of the Promised Land，identified by the LXX．with Rhinocornra，the modern Wady－el－ Arish．Rhisocoruma（Joshua，siii．3； 1 Chron． xiii．5；Jeremiah，ii．18），in the first cited pasisne，
 поу Aiyúntoo；in the second，àǹ ठрiav Aiyúntou， and only in the last is a proper name retained，and there it is changed tu $\Gamma \eta \hat{\omega} \nu$ ．St．Jerome（Onomast． s．v．），following Eusebius，describes it as before Egypt，and speaks of a village of the name between Aelia and Eleutheropolis，which it is difficult to imagine that they could have identified with the Sihor abore named．St．Jerome says that he bas said nore nn the subject＂in libri Hebraicornu quaestionum，＂but the passage is not to be found there．In his＂Epitaphium Paulac＂be writes， ＂venian ad Aegypti flomen Sior，qui interpretatur turbidns＂（p．677）；but he here probably means the Nile，which is sometimes supposed to be called Sihor，as in the passate of Jeremiah above referred to．The village named by Eusebius aod St．Jerome doubtless marked the site of the city of the tribe of Judah，situated in the monntains，and written Zin in the authorised version，hut $\begin{gathered}\text { in } \\ \text { in } \\ \text { in }\end{gathered}$ ginal（Joshra，xy．54），and in the LXN．Eicop， （al．$\left.\sum \omega \rho a i \theta\right)$ ．

2．Sihor or Shihor Libnatii（LXX．इièv kal AaBavd $\theta$ ），perhaps to be takea as two names，as hy the LXX．，Eusebins，and St．Jerome，who name ＂Sior in tribu Aser，＂withont the addition of Libnath．It is mentioned only in the border of Asher．（Joshua，xix．26．）The various conjec－ tures concerning the place or places are stated by Bonfrerins（Comment．in loc．），but none are satis－ factory，and the site or sites have still to be re－ covered．
［G．W．］
SILA（ $\delta$ I $(\lambda a$ ：Sila）was the name given in ancient times to a part of the Apennines in the N ． of Bruttinm，which were clothed with dense forests， and furnished abundance of pitch，as well as timber for ship－building：Strabo tells as it was 700 stadia （70 geng．miles）in length，and places its commence－ ment in the neighbourhood of Locri．（Sitrah，vi．P． 261．）It is evident，therefore，that be，as well as Pliny（iii．5．s．10），who notices it in connection with Rhegion and Lencopetra，assigned the name to the sonthernmost group of the Apenoines（the ravge it Aspromonte）， S ．of the isthmns which separates the Terinaean and Scylletic gulfs．At the present day the name of Sila is given only to the detached and ontlying mountain gronp N ．of that isthmus，and E．of Cosenza（Consentia．）It is probable that the name，which evidently means only＂the forest，＂and is connected with the Latis silva，and the Greek vi $\lambda \eta$ ，was originally applied in a more general setre to all the forest－covered monotains of this part of Calabria，though now restricted to the group in question．
［E．H．B．］
$3 \mathrm{~s}+$

SlLACE＇NAE，a place in Lower Pannonia，on the south of Lake Peiso．（It．Aut．p．233，where it appears in the ablat．form silacenis）．Its exact site is unknown．
［L．S．］
SILANA，a town in the NW．of Thessaly，near the frontiers of Athamania，mentioned alone with Gomphi and Trica by Livy．Leake conjectures that it occupied the site of Poliina，near which are several squared blocks of ancient workmanship． （Liv，axxvi．13；Leake，Vorthern Greece，vol．iv． p．529．）
s1＇LARUS（ E＇i גapos，Ptol，；Einapis，Strab．：Sele）， a considerable river of Southern ltaly，flowing into the gulf of Posidooia，and forming the bonndary between Campania and Lucania．It rises in the mountains near Temra，on the confines of the Hir－ pini，and not far from the sources of the Aufidus： thence flows for some distance in a southerly direction till it receives the waters of the Tanager（Tanagra）， a considerable stream，which joins it from the SE．； it then turns to the SW，and pursues that direction to the sea，which it enters about 5 miles to the N ． of the city of Paestum．About 5 miles from its month it receives another important tributary in the Calor（Calore），which joins it from the S ．Between the Calor and Tanager，on the S，bank of the Silarus rises the mountain group of Mount Alburnus，men－ tioned by Virgil in connection with that river．The ＂luci Silari＂of the same author are evidently the same with the extensive woods which still clothe the valley of the Sele from its confluence with the Tanagro to within a few miles of the sea．（Virg． （reang，iii．146．）The Silarus was in the days of Strabo and Pliny the recognised boundary between Campania（including under that mame the land of the Piceatini）and Lacania；but this applies only to its course oear its mouth，as Ebnri（Eboli），though sitaated to the N ．of it，is included by Pliny among the towns of Lucania．（Stral．v．p．251，vi．p．252； Plin．iii．5．ss．9，10， 11. s． 15 ；Ptol．iii．1．§ S；Mel． ii．4．§ 9；Tab．Peut．．；Dionys．Per．361．）A pecu－ liarity of its waters，mentioned by several ancient writers，is that they bad the power of petrifying sticks，leaves，and nther substances inmersed in them．（Strab，v．p． 251 ；Plin．ii．103．s． 106 ；Sil． Ital．viii．582．）

The uame is written by Lacan and Columella Siler，and the same form is found in Vibius Sequester， indicating an approach to the modern name of Sele． （Lucan，ii． 426 ；Colum．x．136；Vib．Seq．p． 18．）
［E．H．B．］
SlLAS（Eı入ńs，Arrian，Ind．c．6；Strab．xv．p． 703 ；Diod．ii． 37 ），a river of the Upper Parjaib， the story of which，as told by ancient writers，is clearly fabulous．According to Arrian and others， the water of this river was so light that nothing could swim in it．Lassen，who bas exanined this story with his usual acnteness，has shown from the Mahubluirata that there was a stream in the nor－ thern part of India called the Sila，the water of which wace endowed with a bighly petrifying power， from which circmostance the river obtained its sig－ nification，Silu meaning in Sunscrit a stone． （Keilschr．f．Kormde des Morgenlards，ii．p．63．） It may be remarked that the nome occurs differently written．Thus Diddorus writes ミíл入av потauóv； Antigonus Eí̀av кри́pqy．（Mivab．c．161．）Pliny evidently refers to the same story，but calls the river Side in his quotation from Ctesias（sxxi． 2 ． s． 18 ）．

Sl＇LBICM（玉íhGov：E゙th．Silbimut），a sinall
town of Phrygia，on the east of Apamea and Celaenae，and beyond the source of the Maenader （Ptol．v． $2 . \S 25$ ；Plin．v．29）．In tbe Byzatine writers it is sometimes mentioned under corrupt forms of its name，such as Silbia（Hierocl p．667）， Sublas（Cinnamus，vi．15），or Sublium and Syblaea （Oriens Christ．p．809）．This place，which was the see of i bishop，belonged to the conventus of Apamea．Modera travellers seek its site in the neighhourhood of Sandukli．（Kiepert，in Frantis Funf Inschriften，p．37．）
［L．S．］
SILI or SiMl（ ミi入ot or Stuol，Strab，xvi．p．7／2）， a tribe of Aethiopians，who used the horns of the oryx，a species of gazelle，as weapons．Some have considered them to be the same as the Aiblores $\mathbf{\Sigma}$ iuof of Agatharchus，p．42．（Comp．Dindor，iii． 8．）
［T．H．D．］
SILICENSE FLUMEN，a river in Hispania Bactica，in the neighbourhood of Corluba，probably the Guadajoz，or one of its tributars．（Hirt． B．A．57．）
［T．H．D．］
SILINDIUM（乏i $\lambda i \not v o ̄ t o \nu)$ ，a small town of Troas at the foot of Mount lda，is mentioned only by Stephanus B．（s．v．）on the authority of Demetrius of Scepsis．
［L．S．］
SILINGAE（ $\Sigma t \lambda\left(\gamma \alpha_{t}\right.$ ），a tribe of Germany，on the south of the Semnones，between the western slopes of Mons Asciburgins and the river Albis， （Ptol，ii．11．§ 18．）It is generally supposed that this name is the one from which the modern Silesia or Schlesien is formed．（Latham，Tacit．Germ． p．138；Palacky，Gesch．von Böhmen，vol．i． p．6s．）
［L．S．］
SILIS（Sele），a small river of Venetia，in the N ．of Italy，which rises in－the mountains above Treriso（Tarvisium），and flows into the lagunes at Altinom（Altino）．It is still called the Sele．（Plin． iii．18．s．2．2．）
［E．H．B．］
SILLA（ ভi入入a．1sid．Charax．§2，ed．Mïller，1855）， a river of Apolloniatis，a district of Assyria，which， according to Isidorns，flows through the centre of the town of Aitemita．［Artemith．］There can be little donbt that this is the river now called the Diyaleh． It is also，in all probability，the same as that called by Steph．B．（s，v．＇A ${ }^{\prime} \alpha$ кeta）the Delas．Forbiger imagines that the Diabus of Ammianus（xxiii．6）， the Derus of Zosimus（iii．25），and the Gorgos of Ptolemy（iv．1．§ 7），reter to the same river．It is， however，more likely that the first of these streams is the same as that elsewhere called the Zaba－ ths．
［ V.$]$
SILO or SHILOII（ $\Sigma \eta \lambda \dot{\epsilon} \mu:$ Eth．$\Sigma \eta \lambda \omega \nu i \tau \eta s)$ ，a towe of Palestinc，in the tribe of Ephraim，in the mountain region according to Josephos（Ant．v．1）， where the ark and the tabernacle were first established by Joshua on the settlement of the laad by the tribes of Isracl．There also were assembled the national convocations for the division of the land and the trans－ untion of other public business affecting the whole Union．（Joshua，xviii．1，10，xix．51．xxi．2，xxii． 9．）There Samuel ministered before the Lord in the days of Eli the high－priest（1 Sans，i．－iii．）． There was the seat of the Divue morship until the disastrous battle of Aphek，from which period the decline of Shiloh mast be dated（ch．iv．）until its desolation became proverbial in Israel．（Psalm Ixxviii． 60 ；Jeremiah，vii， 12, xxvi．6，9．）Its situation is very partienlarly described in the bonk of Julges（xxi．19），as＂on the north side of Bethel， on the east side of the highway that goeth up from Bethel to Shechem，and on the south of Lebonah．＂

St. Jerome places it xii. M. P. from Neapolis ( $=$ Shechem $=$ Nabliss), in the toparchy of Acrabattena. (Onomast. s. v.) lits ruins were shown, and the remains of the altar amone them, in his day. (Comment. in Sophon. i. 14, Epitaph. Paulae.) From these notes the site is easily identified with the modern Silün, on the east of the Noblus road, about four bours south of that town, situated over against a village named El-Lebban (Lebonah), which lends its name also to a Khan on the road-side. Situn is merely a heap of ruins lying on a hill of moderate eleration at the south-eastern extremity of a valley through which passes the great north road from Judaea to Galilee. "Among the ruins of modern bouses are traces of buildings of greater antiquity, and at some distance, towards the east, is a well of good water, and in the valleys many tombs excavated in the rock." (Robinson, Bibl. Res. vol. iii. pp. 86-89.) Among the tombs of Stiloh, if Reland's conjecture is correct, is to be sought the very slender authority on which the pagans rested their assertion that their demigod Silenus was buried in the couatry of the Hebrews; and the fact of the effigy of this deity being found on the coins of Flavia Neapolis, certainly lends countenaace to his ingeoious hypothesis that the fable originated in the imaginary correspondence between this name and the town of Ephraim. (Palaestina, p. 1017.) But the error which he has copied from Benjamin of Tudela, of placing the tomb of Samuel in Shiloh, is obviously attributable to a lapse of memory on the part of that writer, as no one has ever identified Shiloh with the modern Nebi Samwil. The error is corrected by Asher. (Itizerary of R. Benjamin of Turdela, ed. A. Asher, vol. i. p. 78, vol. ii. p. 95.)
[G. W.]
Siloan. [Jerusalem, p. 28, b.]
SILP1A, a town in Hispania Baetica, N. of the Baetis, and apparently in the Sierra Morena. (Liv. axviii. 12.) Probably Linares.
[T. H. D.]
Sl'LSILIS (Not. Imp.), a fort situated on the richt bank of the Nile, between Ombos and Apollinopolis Magna in Upper Aegypt. The original name of this place is nearly preserved in the modern Siliti. The fort of Silsilis stood at the foot of the mountain now called Gebel Selsilek, or "hill of the clain," and was one of the points which cormmanded the passage of the river. For at this spot the Arabian and Libyan hills approach each other so nearly that the Nile, contracted to about half its ordinary width, seems to flow between two perpendicular walls of sandstone. Silsilis was one of the principal seats for the worship of the Nile itself, and Rameses 11. consecrated a temple to it, where it was worshipped under the emblem of a crocodile and the appellation of Hapimoou. The stone quarries of Silsilis were also celebrated for their durable and beautiful stone, of which the great temples and monuments of the Thebaid were for the most part built. (Wilkinson, Mod. Egypt and Thebes, vol. ii. p. 283.)
[W. B. D.]
SILVANECTES. This name occurs in the Notitia of the Provinces of Gallia, where the chief town is called Civitas Silvanectium. In the Notit. Imp. the Silvanectes are placed in Belgica Secuoda, but the name there denotes a town, according to the usage then established of giving to the capital towns the names of their people. It appears almost certain that the Subanecti of Ptolemy (ii. 9.§ 1I) is the same name as Silvanectae or Silvanectes. Ptolemy places the Subarecti east of the Seine, and makes

Ratomagus their capital. But this Ratomagus is conjectured to be the same as the Augustomarus of the ltin. and of the Table, which is Senlis [Auoustomages].

Pliny (iv. c. 17) mentions the Ulmanctes in Gallia Belgica: "Suessiones liberi, Ulmanetes liberi, Tungri." It is possible that this too may be a corrupted form of Silvanectes, for the modern name Sentis confirms the form silranectes, and the name Ulmanetes is otherwise upknown.
[G. L.]
SllLVA, a place in Illyria, on the road from Sirmium to Salona. (Itin. Ant. p. 269.) It is probably the same town as the Salvia of Ptolemy [Salvia]. It is ideatified with Keupris by Lapie.
[1. 1I. D.]
SILVIUM (ミinov́ov: Eth. Silvinus: Garagnone), a town of Apulia in the interior of the country. It is noticed by Strabo (vi. p. 283) as the frontier town of the l'eucetii, and its name is noticed by Pliny among the manicipal towns of Apulia ( 1 lin. iii. 11 . s. 16). But at a much earlier period it is mentioned by Dindorus as an Apulian town, which was wrested from the Samnites by the Romans in F. C. 306 (Diod. xx. 80). Our only clue to its position is derived from the Itineraries, which place it 20 miles from Vennsia, on the branch of the Appian Way which led direct to Tarentum. This distanco coincides with the site of a town (now destroyed) called Garagnone, situated about midway between Spinaszolo and Poggio Orrino, and nearly due E. of Venose (Pratilli, Via Appia, iv. 6. p. 478 ; Romanelli, vol, ii p. 188).
[E.H.B.]
SILURA, an island of Britain, separated only by a narrow strait from the coast of the Dumnonii, who inbabited the most SW. point of Britannia. (Solin. c. 22.) It is probably the same island which Sulpicius Severus (ii. 51) calls Sylina, and seems to mean the Scilly Islands.
[T. H. D.]
Sl'LURES ( and warlike people in the W. part of Britanvia Romana, whose territory was bounded on the S. by the estuary of the Sabrina. The important towns of Isca and Venta belonged to them. Tacitus (Agr. 11) calls them descendants of the Iberi of Spain, and states that they had emigrated from Ireland into Britain; but there seems to be no foundation for this opinion. (Cf. Zeuss, Die Deutschen, p. 202.) Although subjugated by the Romans, they caused them continual slarm; and they were the only people of Britain who, at a later period, maintained their independence against the Saxons. (Beda, Hist. Ecc. i. 12, seq.; cf. Tac. Ann. xii. 2, 31 ; Plin. iv. 16. s. 30.)
[T. II. D.]
SIME'NA ( $\Sigma i \mu \eta \nu a:$ E'th. $\Sigma(\mu \eta \in u ́ s)$, a town on the coast of Lycia, 60 stadia from Aperlae (1'lin. v. 27 ; Steph. B. s. v.; Stadiusm, Mar. Mag. \$\$ 239, 240, where it is called Somena, इi $\mu \eta \nu a$; comp. Leake Asia Minor, p. 188; Spratt and Forbes, Trocels in Lycia, vol. i. p. 137, vol. ii. pp. 86, 274.) [L. S.] Sl'MEN1. [ICENr.]
SIMEON. [PalaEstina, p. 529, b.]
NBIITTU ( $\Sigma \mu\left\{\sigma \theta_{0}\right.$, Ptol. iv. 3. § 29), called by Pliny (v. 4. § 4) Simittuense Oppidum, a Roman enlony in the interior of Numidia, on the road from Cirta to Carthago, 7 miles to the W. of Bulla Reçia. (Itin. Ant. p. 43.) There were some mineral waters 5 miles E. of the town (Ib.). It lay on the site of the present A in Semit, on the Qued-el-Bull, 2 leagues to the W. of B:all.
[T. 11. D.]
 its source in Mount Ida, or more accurately in Mount

Cotylus，and passing by Ilion，joined the Scatoander below that city．This river is frequently spoken of in the Iliad，and described as a rapid mountain torrent． （Il．iv．475， 8.774 ．xii．22，xxi．308；comp． Aeschyl．Agam．692：Strab．siii．p． 597 ；Ptol．v． 2．§ 3；Steph．B．s．v．；Pomp．Melı，j， 18 ；Plin．v． 33 ：and scamonder．）Its present name is Lhum－ brek．Chai，and at present its course is so altered tbat it is no longer a tributary of the scamander，but flows directly into the Hellespont．

SIMUNDE．［TAprobane．］
SIMYLLA（乏iuv́ $\lambda \lambda a$, P＇ol．vii．1．§ 6），a com－ mercial entrepôt on the western coast of Hindostan， in the district called＇Aptaкà $\Sigma \alpha^{\delta} \omega \nu \bar{\omega} \nu$ ．It is noticed in the Periplos by the name of Shuu入ha，and was prohably at or near Bassein，a little N．of Bom－ bay．
［V．］
Sl＇MYRA（ mentioned by Pliny in connection with Marathus and Antaradus，N．of Tripolis，Orthosia，and the river Eleutherus（v．20）．It is placed by Ptolemy between the month of the Eleutherns and Orthosia， and，if the figures can be trusted， $10^{\prime}$ west of the former，14＇borth；in the same latitude with Or－ thosia（i．e． $34^{\circ} 40^{\prime}$ ），hut $40^{\prime}$ east of it，which would seem either to imply an ignorance of the coast，or to intimate that Simyra lay at some dis－ tance from the shore，and that the Eleutherns ran southward to the sed．Strabo says that it was oc－ eupied by the Aradians，to ether with the neish－ bouring Marathus（xvi．p． 753 ），apparently placing it north of the Eleutheras．In addition to what has been said under Manathes，and in confirmation of the identification there attem！ted，the following may be cited from Shaw，and will serve to illustrate the situation of Simyra：＂The ancient Marathas may be fixed at sonre ruins near the Sorpent Fountain． which make，with Rou－uculde and Tortosa，almost an equilateral triangle．Abont 5 miles from the river $A k k e r$ ，and 24 to the SSE of Tortosa，there are other considerable rains known by the name of Sumrah，with several rich plantations of mulberry and other fruit trees growing in and round about them．These，from the rery name and situation， can be no other than the remains of the ancient Simyra ．．．the seat formerly of the Zemarites．Pliny v．20）makes Simyra a city of Coelesyria，and ac－ quaints us that Mount Libanus ended there to the nortbward；but as Sumrah lies in the Jeune（i．e． the great plain）， 2 leagues distant from that mountain．this circumstance will better fall in with Arca，where Muant Libanus is remarkably broken off and discontinued．＂（Tracels．pp．268．269．）The ruins of Arca are 5 miles E．of Sumrah，and 2 leagues WsW．of Area is the Nahr－el－Berd，the Culd River，which Slaw and others identify with the Elen－ therus．It is manifest how irreconcilable all thas is with Ptolemy and other ancient gengraphers． ［Eifithenes；Orthosha；M．snatht＇s．］［（i．W．］ SINA．［siva］
SINAE（oi Sirai，Ptul．vii．3，Sr．），the ancient nation of the Chastas，whose land is first descrihed ly I＇tolemy（l．c．）and Marcianus（p．29，seq．），but in an unsatisfactory manner．Indeed，the whok knowledge of it possersed by the（ireeks and Romans unsted on the reports of individual merchants who had succeeded in gaining admittance anoong a people who then，as in modern times，ishlated themselves as mueh as pasible from the sest of the world．For the assumption which Deguisnes sought to es－ tablish，that a political allituce was formed betreen

Rome and China，and that the emperor M．Aturelius Antoninus sent a formal embasuy thither in the year 166 ，rests solely on the name of Yan－Tun， which that writer discovered in some ancient Chi－ nese annals，and must therefore be regarded with great suspicion．（See Bohlen，das Alle Indien，i． 1．71．）According to the description of Ptolemy， the country of the simoe extended very far to the S. ， and was connected with the E．coast of Africa by an unknown land，so that the Indian Ocean formed a large mediterranean sea．He does not venture to define its eastern boundary，but finishes bis acrount of the known earth with the 180 th degree of longi－ tude，without，bowever，denyiog that there were tracts of unknown land still fiuther to the F．But Cosmas Indicopleastes（ap．Montfancon，N．Cull． Patrum，ii．p．337），who calls the country of the Sinae TCivit $\bar{c}$ ，was the first who laid duwn its correct boundary by the ocean on the E．On thie N．it was bounded by Serica，and on the S．and W： by India extra Gangem，from which it was divided by the river Aspithra（probably the Bangpa－Kung） and the Semanthine mountains．Thos it embraced the southern balf of China，and the eastern part of Furtber India，as Tongquin，Cochin－China，Cann－ boja，\＆c．Ptolemy mentions seteral large bays and promontories on the coast．At the extreme XE．of the Indian Ocean，where the laud of the Sinac abntted on Furthe：India，was the great gnif （of Siam），xhich on the coast of the Sinae was formed by the south Cape（（т̀ Nótoy ăkpov） （probably Cape Cambaja），and on the side of India by another large promontory（perbaps Cape Ru－ maria）．To the S，of south Cape，and between it and the Cape of the Natyrs（ミarúpod Kopoy）， Ptolemy and Marcianus（ $\mathrm{p}, 30$ ）place another large
 the S．of the Cape of Satyrs，again，and between it and the moath of the river Cottiaris，the Bay of the Sinae（ $\Sigma v \bar{\omega} \nu$ кó $\lambda \pi \sigma s$ ）．Tbese very vague and in－ correct accounts du not permit us to decide with any confidence respecting the places indicated by Ptolemy；but it has been conjectured that the Cape of the Satyrs may lave been Cape St．Janes，the Theriodes sinus the bay between it and the month of the river Cambaja or Maykiang，and the Bay of the sinae the gulf of Tongquin．Among the monntains of the country Ptoleny names only th： Montes Semantbini（ $\Sigma \eta \mu a \nu \theta$ ivo o ópos），which formed its NW．boondary．Among the rivers indicated are the Aspitbra（＇Aonsepa），rising in the moun－ tains just mentioned，to which we bare already al－ Inded；the Ambastus（＇Apraatos），probatily the Cambrina，which fell into the Great Bay between the town of Bramma and Rhabana；the Senos or Sainus（ミívos or इaivos）more to the S．；nud fur－ ther still in the same direction the Cottiaris（Kot－ riaprs），which emptied itself into the bay of the Sinae to the N．of the turno of Cattigara．The last may perhatps be the Si Kiong，which discharges it－ selt at Canton．Respecting the nation of the Siras themselves，we hatre no information，though l＇toleny mentions several subdivisions of thenn；as in the X ． the Semanthini，on the like named mountains ；$\Sigma$ ． of them the Acadurae，with a tumn called Acadra， and again to the S．the Aspitbrae，on the Aspithrs， and having a city of the same name as the river． SE．of the latter，on the Great Bay，and dwelling on the river Ambastus，were the Ambastae．L．astly， in a still more snathern district between the bay of Thernudes and that of the Sinae，were the Aethiopes

Ichithyophagi and the Sinae Ichthyoplagi. Among the 8 cities mentioned by Ptolemy, namely, Bramma, Rhabans, Cattigara, Acadra, Aspithra, Coccollagra, Sarata, ad Thinae or Sinae, the last was undoubtedly the most important, and was regarded by him and others as the capital of the nation. It has been conjectured to be Thsin, io the prorince of Chensi, or even Nankin itself. It may be remarked that the Sinae were anciently called Thinae ( $\begin{aligned} & \text { ivas) ; }\end{aligned}$ though it is said that this form of their name only arose from the Arabic prouunciation of Sinae. (See Sickler, ï. p. 518 ; Gesenius, Heb. Lex. p. 788.) The next town in point of importance was Calligara, which both Ptoleny and Marcianns regard as the ehief place of trade. [C.itrigara.] [T.H.D.]

SINAI ( $\Sigma i v a ̂$ úpos), the celebrated mountain of Arabia Petraea. It, however, lent its name to the whole peninsula in which it was situated, which must therefore first be described. It is furmed by the bifnreation of the Red Sea at its northern extremity, and is hounded by the Heroopoliticns Sinus (or Sea of Suez) on the west, and the Aelaniticus Sinus (the Gulfof Akaba) on the east, ending in the Posidinm Promontorium (Ras Mohammed). At the northern extremity of the Sea of Suez stood Arsinoe (Suez), and Aelana (Akaba), at the extremity of the gulf that hears its name. The caravan road of the great $H a j$, which joins these two towns, traverses a high table-land of desert, now called Et-Tih=" the Wilderness of the Wandering," part of ancient Idumaea. To the south of this road, the plateau of chalk formation is continned to Jebel Tih, the $\mu e ́ \lambda a v \in s$ ö $p \eta$ of Ptolemy, extending from the eastern to the western gulf, in a line slightly corved to the sonth, and bonnded in that direction by a belt of sundstone, consisting of arid plaios, almost without water or signs of vegetation. To this succeeds the district of primitive granite formation, which extends quite to the sonthern cape, and runs into the Gulf of Akaba on the east, but is separated by a narrow strip of allovial soil called El-Käa from the Sea of Suez. The northern part of the Tih is called in Scripture "the wilderness of Paran" (Numb. xii. 16, xiii. 3 , xxxii. 8, \&c.), in which the Israelites abode or wandered dnring great part of the forty years; although Eusebins and St. Jerume, as will be presently seen, identify this last with the wilderness of Sin. This wilderness of Sin is commonly sapposed to be connected, in name and situation, with Mount Sinai ; but as the Israelites entered on the wilderness of Sin oo leaving their eneampment by the Red Sea, the next station to Elim (Exod. xvi. 1; Numb. xxxiii. 10, 11): and traversed it between Elim and Rephidim, where they had apparently left it (Exod. xvii. 1),-for Duphkah and Alnsh are inserted between the two in Numbers axxiii. 12-14,- and yet had not arrived at Sinai (ver. 15; Exod. xvi. 1), it may be questioned whether the identification rests on solid ground. Eusebins and St. Jerome, who distingnish between the deserts of Sim and Sinai, yet appear to extend the former too far eastward. "The desert of $\operatorname{Sin}$," they say, " exteads between the Red Sea and the desert of Sina; for they came from the desert of Sin to Rephidim, and thence to the desert of Sinui, near Monnt Sina, where Moses received the dispensation of the Law; but this desert is the same as that of Kaddes according to the Hebrew, but not according to the LXX." The confusion indicated by this last renark may be explained by the observations, 1st, that Zin , which is a synonym ${ }^{\text {" }}$ for the wilderness of

Kadesh" (Vumb, xx. 1, xxxiii. 36), is identical in Greek with the Siu (i. e. $\Sigma$ iv); the $\Sigma$ representing both the $S$ (tsadi) of is aod the $D$ (samech) of $Y$; and, 2dly, that instead of making Zin identical with Kadesh, as it is in the Hebrew, the L.XX. read so as to make "the desert of Paran," which they identify with " the desert of Kadesh," an intermediate station between Sin and Monnt Hor. (Numb. xxxiii. 36, in LXX.)

The wilderness of Sin, then, mast be fixed to the northwest part of the granite district of the peninsula between Serbal and the Red Sea, while Zin is north of Ezion Geber, between it and Mount Hor,the southern extremity in fact of Wady Musa, or the Arabah, north of Akaba.

With respect to Sinai, it is difficult to decide between the rival claims of the two mountaias, which, in modern as in aacient times, have been regarded as the Mountain of the Law. The one is Serbal above-mentioned, sitnated towards the NW. extremity of the granite district, towering with its five sharp-pointed granite peaks above the fruitful and agreeable oasis of Wady Pharan, still marked by extensive ruins of the churches, convents, and buildings of the old episcopal town of Paran; the other between 30 and 40 miles sonth-east of Serbal, in the heart of the granite district, where native traditions, of whatever value, have affixed to the mountains and valleys oames conoected with the inspired narrative of the giving of the Law, and where the scenery is entirely in unison with the events recorded. Emerging from the steep and narrow valley Nakba Hawa, whose precipitous sides rise to the perpendicular lieight of 1000 feet, into the wide plain called Wady Miusa, at the nortbern hase of the Iraditionary Horeb, Rossegger descrilics the scene as graad io the extreme. "Bare granite mountains, whose summits reach to a height of more than 7000 Paris feet above the level of the sea; wonderful, I might say fabulons, forms encompass as plain more than a mile in length, in the background of which lies the convent of St. Catharine, at the foot of Jebel Miisa, between the holy Horeb on the west, and Ebestimmi oo the east." In this valley, then, furmed at the base of Horeb by what may be called a junction of the Wady-er-Raháh and JF udy-esh-Sheikh, but which, according to Russegger's express testimony, bears in this place the native name of Wady Musa, must the children of Israel have eacamped before Jebel Müsa, whose rugged northern termination, projected boldly into the plain, hear; the distinctive name of Ras Sasajfah. Jebel Müsa rises to the height of 5956 Paris feet above the sea, but is far from being the highest of the group. Towering high above it, on the south, is seen the summit of Horeb, having an elevation of 7097 Paris feet, and south of that again Jebel Katherina, more thao 1000 feet higher still (viz. 8168 Paris feet), all onttopped by Jebel-om-Shomer, the tighest of this remarkable group, which attains an altitude of 8300 Paris feet. Over against Jebel Mísa on the north, and confining the valley in that direction, is the spur of a mountain which retains in its name, Jebel Sena, a memorial of the ancient Scripture appellation of the Mountaiu of the Law. To attem, anything like a full discassion of the questions th issue between the advocates of the conflicting traditions or hypotheses, would be as iaconsistent with the character of snch an article as this, as with thic limits which must be assigned it: a very few retnarhs
must suffice. There seems, theo, to be no questime that the site of llureb was traditionally known to the 1-vatelites for mimy reoturjes after the Exodun (1 Kings, xix. 8) : and if so, it is improbable that it wa subsequently lost, since its proximity to Elath and Eaion Geber, which were long in their possession, wonld verve to edsure the propututy of the tradition. It is worthy of remark that Jenephus nowhere uses the name lloreh, but in the passage partlel to that ahove cited from the 1st book of Kings, as unifurmly throurhout his history, substitutes $\tau \delta$ 玉 (vaion ö, os, - so far contirnmig the identity of locality indicated by the two names, learnedly mintained by Dr. Lapvius, who holds Moreb to be ao Analekite appellative erpuivalent in simnification with Sin, both signifyinu "earth mate dry by drating off the water," which earth he finds in the large monnds of allavial deposit in the bed of II ady Foroun, at the northern base of Serbal, his Sinai. Buxtorf, however, cites rabbinical authorities for another etymolozy of Sinai, derivel from the mature of the rock in the vicinity. (See Shaw's Tratels, 4to. 1. 443 , and note 7.) Josephus dom mot in any way identify the site; but Eusehins and St. Jerome lave bern erroneonsly understood to describe Serbal under the nane Sina, when they say that Pharan was Sonth of Arabia, next to the desert of the Saracens, through which the children of lsrael joumeyed when they decamped from Nina (Onomast. s. r. Phavean.); for they obviously confonod the city of laran with the wilderness mentioned in Numbers (xii. 16, xiii. 3): and the deseription is so vagne as to prove ouly their jomorance, if not of the true site of the city Pharan (which they place 3 days east of Aila), at least of the utter want of all conocetion between this and the desert of Kin, which is Paran; and in this, as in other fassages, on which much reliame has been phaced in this disenssion, it is clear that they are not writing foom any local kowlelge, but simply drawing dednetions from the Scripture narrative--(See e. R. Onomast. s. N. Raphnitim), which we ate perhatps equally competent to do. The carlieat Chisistian writer, then, who cao be guoted as a witness to the true site of the "Mountain of the Law" is Chenma linlieqplenstes (eirc. A. D. 530), who undumbedly dearribes Mount Choreb, in the Sinaic (lenert?), as near to Plamam, athout 6 miles di-tant; and this Pharan must be the Pharan of the cotesiastical ammals, whose ruios at the fint of Mount Sirthal have been noticed athove. This then is direct lintorical testimeny in fivour of a hypthesis first started by Burekhardt in modern times, alvocated Ly Dr. Lelnins, and allopted by Mr. Forster and nturs. But then it appaars tis be the only clear lusturical cwileme, and must therefore be emmared with that in fovour of the existing trablitim, which, as it is acerpten I in its main fratures by Drs. Lobin. son and Wilsm, Kitter, Mr. Stanley, and other emimont scholarz, is obviously not anworthy of regard. That the prowit convent of St. Catharioe was oriainally foum hod by the emperor Justimian (about 1. 13. $555^{\circ}$ ), is as cortain as any fact in history; and it is equally diflt oft to imagine that, at su short an uterval atter the gumey of Conthas, the remembrane of the tras. Sinai could have heoe lost, and that the emperor the the mioks wonld have aequieserd in what they knew to be a fictutions site; for the

 hefore this time, lont dwelt in the momitains and ralle!s abosat the 1, h $h$ in which God appeared to

Moses. (Eutychii Annales, tom. ii. p. 163; comp. 1'rocopius, De Aedificiis Justiniani, v. 8) ; so that when their monasteries are meationed in earlier times, it is clear that the monastic eells only are to be minderstooxd. On the whole, then, the testimony of Cosmas can hardly avail ueainst a tradition which was not originated, but only perpetuated, by the erection of Justinian's munastery. Te this historieal argurnent in favour of the existing traditions a topographical one may be added. If Rephidins is correctly placed by Dr. Lepsius and others at H'ady Faran, at the foot of Serbal, it seems to follow incontestably that Serberl camot be Sinai; for what occasion could there be for the people to decamp from Lephinlim, and journey to Simai, if Kephidim were at the very base of the mount? (E.rod. xix. 1, 2). Dr. Lepsins feels the difficulty, and attempts to remove it by insimuating that the sacred narrative is not to be implicitly trusted. That lloreb is mentioned in connection with Rephidim is certainly a palquale difficulty (Esod. xviii. 1-6), but in a whice of difliculties it is safer to adopt that which dows least viblence to the saered text.

By far the stramgest argumeat in favour of the ilentity of serbal with Simai is to be found in tho relebrated inscriptions with which the rocks on that mopotaia and in the surrounding valleys are covered. Nut that anything ean be certainly determined from these mysterious records, while the art of deeiphering them is still in its infancy. The varions theorics respeeting them cannot here be discassed; the works containing them are referred to at the end of the article : but it maty be well to put on record the whole of the earliest testimony concerning them, and to offer for their clucidation an observation suggested by an early writer which has been strangely overlooked in this disenssion. It is an interesting theory of Cosmas lndicoplenstes, that the Israelites, baving been instructed in written characters in the Decalogue given in Horeb, were practised in writing, as in a quiet school, in the dusert for forty years: " from whence it comes to pass," he proceeds, "that you may see in the desert of Mount Sinai, and in all the stations of the Ilebrews, all the rocks in those parts, which have rolied down from the mountains, angraven with Hebrew inseriptions, as 1 my self, who journeyed in those parts, testify; which certain Jews also having read, interpreted to us, saying that they were written thas. "The pilgrimage (ăдлерots) of such an one, of such a tribe, in such a year, and such a month,' as is frequently written in our hostelries. For they, having newly acquired the art, practised it by multiplying writiog, so that all thase places are full of Hebrew ioscriptions, preserved evell wato this time, on account of the unbelievers, as I think; and any one whe wishes vad visit thuse places and see them, or they ean inquire and lemro concerning it that I have spoken the truth." (Cimmas lindicuplenstes, de 1 fundo, lib. v. apud Montanow, Collectio . Vasa Patrum, tom. ni. p. 205.) On this it maty sutfice to remark, that while it is certain that the characters are neither the origioal nor later Hebrew:- i.e. neither Phoenician nor Chaldaic, - still the Jews in Cusmas's company could decipher them. We know that they are for the most part similar to the ancient Arabian (the Hamyaritic or 17adramtitic) character, with whith the whole rection in the south of the Arabint peninsula terms. If, then, Mr. Forster's jugetiohs and very probable conjectuce of the identity of the rock-hewn iuscription of Hissn Ghorab with that
copied by Abderakhman from the sonthern coast of Arabia, preserved and translated by Schultens, be correct, it will follow that the old Adite character was decipherable even two centuries later than the date assigned to Cosmas, who could scarcely have failed to discover the Christian origin of these inscriptions, if they had been really Cliristian. Indeed it may well be questioned whether any Christians could lave been sufficiently conversant with this ancient cbaracter to use it as freely as it is used on the rocks of the peninsula. Certainly if the hypothesis of this place having been resorted to as a place of pilgrimage by the pagan tribes of Arabia, and so having acquired a sanctity in the very earliest times, could the established, the fact might furnish a elue to the future investigation of this deeply interesting sulject, and, as Ritter has snggested, might serve to remove some difficulties in the Sacred Narrative. Now the journal of Antoninns Plucentinus does in fact supply so precisely what was wanting, that it is singular that his statement has attracted so little notice in connection with the Sinsitic inscriptions; which, however, he does not expressly mention or even allude to. But what we do learn from him is not unimportant, viz., that before the time of lslam, in "the ages of ignorance," as the Mohammedans call them, the peninsula of Mount Sinai was a principal seat of the idolatrous superstition of the Arabians; and that a feast was beld there in honour of their miraculous jdol, which was resorted to by Islimaelites, as be calls them, from all parts; the memorial of which feast seems still to be preserved by the Bedawin. (Barckhardt, Syria, pp. $566,567^{\circ}$.) Now when it is remembered that the eastern commerce of Greece and Pome, conducted by the Arabs of Yemen and Iladramant, must have brought their merchants and sailors to the vicinity of this ancient sanctuary at Arsinoe or at Elana, tbe pilgrimage becomes almost a matter of course; and the practice which we know prevailed in their own conntry of graving their memorials with an iron pen in the rock for ever, was naturally adopted by them, and imitated by the Clinistian pilgrims in after times. Undue stress has been laid on the frequency of the inscriptions about Serbal, contrasted with their rarity about Jebel Visa; but it should be remembered that they are executed almost entirely in the soft sandstone which meets the granite on and around Serbal, but which is scarcely found in the interior, where the hard, primitive rock did not encourage the scribbling propensities of the travellers, as the softer tablets in the more western part, where the blucks of trap-stone (which are also largely interspersed with the granite, and which present a black surface without, but are lemoncoloured within) were studiously selected for the inscriptions, which, in consequence, come ont with the effect of a rubricated book or illuminated manuscript, the black surface throwing ont in relief the lemon-coloured inscriptions.

This account of the peninsula must not be concladed without a brief notice of the very remarkable temple of arbut-cl-Chadem, and the stelae which are found in such numbers, not only in the temple, out in other western parts of the peninsula, where large masses of copper, mixed with a quantity of iron ore, were and still are found in certain strata of the sandstone rocks along the skirts of the primeval chain, and which gave to the whole district the name still found in the hieroglyphics, Maphat, "the "opper land," which was under the particular pro.
tection of the godless Hathor, Mistress of Maphat. The temple, dedicated to her, stands on a lofty sandstone ledge, and is entirely filled with lofty stelae, many of them like obelisks with inscriptions on botb sides; so crowded with them in fact, that its walls seem only made to circumscribe the stelue, although there are several erected ontside it, and on the adjacent hills. The monuments belong, apparently, to various dynasties, but Dr. Lepsius has only specially mentioned three, all of the twelfth. The massive crust of iron ore covering the hillocks, 250 yards long and 100 wide, to the depth of 6 or 8 feet, and blocks of scoriae, prove that the suclting furnaces of the Egyptian kings were situated on these airy heights; but the caverns in which the ore was found contain the oldest effigies of kings in existence, not excepting the whole of Egypt and the pyramids of Gizeh.

The chief authorities for this article, besides those referred to io the text, are Niebuhr ( loyage en Arabie, vol. i. pp. 181-204); Seetzen (Reisen, vol. iii. Pp. 55-121). For the physical history and description of the peniosula, Russegger is by far the fullest and most tustworthy authority (Reisen, vol. iii. pp. 22-58). Dr. Robinson has investigated the history and geography of the peoinsnla, with his usual diligence (Travels, vol. i. S§ 3,4. pp. 8i241 ) ; and Dr. Wilson Las added some important observations in the way of additional information or correction of his predecessor (Lands of the Bitle, vol. i. chapters vi.-viii. pp. 160-275). Lepsius's Tour from Thebes to the Ieninsula of Sinai (Letters, pp. 310-321,556-562), which has been translated by C. I. Cottrell (London, $18+6$ ), argues for Serbal as the true Mountain of tbe Lars; and his theory has been maintained with great learning and industiy by Mr. Joln Hugg (Remarks on Mount Serbal, if. in Transactions of the Royal Society of ${ }^{*}$ Literature, 1849). The graphic description of the country from $\mathrm{M}_{\mathrm{r}}$. A. I'. Stanley's pen is the latest contribution to the general bistory of the veniusula (Sinui and Palestine, 1856). The decipherment of the inscriptions has been attempted by the learned Orientalists of Germany, Gesenius. Roediger, Beer, and others (Ch. Bumsen, Christianity amb Mankind, vol. iii. 1p. 231-234); and Mr. Forster has published a vindication of his views against the strictures of Mr. Stanley on lis original work (The Toice of Jsrael from the Rocks of Sinai, 1851; The Israelitish Authership of the Sinaitic Inscriptions, 1856).
[G. W.]
STNCH1, a sub-division of the Surmatian tribe of the Tauri. (Amm. Mar. xxii. 8. § 33.) [T. H. D.]

SLNDA ( $\Sigma i v \delta \alpha$ : Eth. Sindensis), a town which seems to have been situated on the western frontier of Pisidia, in the neighbourhood of Cibyra and the river Caularis (Liv. xxxviii. 15 ; Strabo, xii. p.
 speaks of Sindia as a town of Lycia, is probably alluding to the same place. (Comp. Hierocl. p. 680 ; Polyb. Excerpt. de Leg. 30.) Some writers have confounded sinda with Isionda, which is the mose surprising, as Livy mentions the two as different towns in the same chapter. (Leake, Asia Minor, p. 152. )
[L. S.]
SINDA SARJLATICA ( §8), a town or village in Asiatic Surmatia, in the territory of the Sindi, with an adjoining harbour ( $\Sigma_{\imath \nu \delta u k ̀ s ~ \lambda u \mu t v, ~ P t o l . ~ 1 U .), ~}^{180}$ stadia E. of the mouth of the Bosporns Cimmerius at Corocondama, and, according to Arrian (Per. P. Eux. P. 19). 500
stadia from Panticapaeum，and 300 from the Holy Harbour．But，according to I＇liny，who calls it Civitas Sindica（vi．5．s．5），it was 67 miles from the latter．It lay apparently on the lake of Coro－ condametis．According to Scylax（ $\beta$ ．31）Sinda was a Greek colony；though Mela，who calls it Sindos（i．19），regards it，with less prubability，as a sea－port founded by the Eindi themselves．（Comp． Strab．xii．p．496；Keymn．Fr．v．154．）

2．A town of the simli，on the $\mathbb{W}$ ．coast of the Sinus Magnus，or on the E．coast of the Aprea Chersonesus in India extra Gangem，between the moutlis of the Derrias and Daonas．（Prol．viii．2．§ 7 ；Steph．B．P．602．）

［E．B．J．］
SINIAR，a district of Babylonia，which is nien－ tioned in Gumesis under the title of the＂land of Shinar．＂It is noticed unter the name of Eervade Tins Bafunavias ly Ilistiacus of Miletus，quated by Jusphins（Aut．Jul．i．5）and Eusebius（Precepar． Evang．ix．1j̄；coml）．（ien．xi．2：Iswinh，xi．11；

Zeck. v. II). It would seem to comprehend especially the great plain land of Babylonia, as distingnished from Assyria and Elymais (Gen. siv. 1), and probably extended to the junction of the Tigris and Euplrates, if not as far as the Persian gulf. Some have, without reason, confounded it with Singara, the modern Singir.
[V.]
SINIS (Eivis), a Roman colony in the district of Melitene in Armenia Minor. (Ptol. v. 7. § 5.) The jlace is not mentioned by any other writer, but it is jrossihle that it may be the same place as the one which Procopins (de Aed. iii. 4) sinply calls Ko入 $\omega$ la.
[L. S.]
SINNA. 1. (Zívva, Ptol. v. 18. §§ 11, 12), the name of two towns in Mesopotamia, one on the S. declivity of Mount Masius, the other more to the SE., on the Tigris.
2. (之ıvvâ, Strab. xvi. p. 755), a mountain fortress in Libawon.
[T. H. D.]
SINO'NIA (Zannone), was the name given in ancient times to the smallest of the three islands known as the Isole di Ponza. It is situated abont 5 miles to the NE. of Pontia (Ponza), the principal ifland of the gronp (Plin. iii. 6. s. 12; Mel. ii. 7. § 18).
[E. H. B.]
SINO'PE ( $\Sigma\left(\nu \omega \omega^{\prime} \pi \eta\right.$ : Eth. $\Sigma, v \omega \pi \epsilon u^{\prime}$ ), the most important of all the Greek colonies on the coast of the Euxine, was situated on a peninsula on the coast of Paphlagonia, at a distance of 700 stadia to the east of Cape Carambis (Strab. xii. p. 546 ; Marcian, 1. 73 ; Eustath. ad Dion. Per. 775.) It was a very ancient place, its origin being referred to the Argomauts and to Sinope, the danghter of Asopus. (Apollon. Rhod. ii. 947 ; Val. Flace. v. 108.) But the Sinopians themselves referred the foundation of their city to Autolycus, a companion of Heracles, and one of the Argonauts, to whom they paid heroic lionours (Strab. l. c.). But this ancient town was small and powerless, until it received colonists from Miletus. The Mhlesians were in their turn dispossessed by the Cimmerians, to whom Herodotus (iv. 12) seems to assign the fonndation of the city; but when the Cimmerians were driven from Asia Ninor, the Ephesians (in B. c. 632) recovered possession of their colony. (Scymn. 204, foll.: Anonym. Peripl. P. E. p. 8.) The leader of the first Milesian colony is called Ambron, and the leaders of the second Cous and Critines; though this latter statement seems to be a mistake, as Enstathius and Stephanus B. (s, v.) call the founder Critius, a native of Cus. After this time Sinope soun rose to great power and prosperity. About the commencement of the Peloponnesian War the Sinopians, who were then governed by a tyrant, Timesileon, received assistance from the Athemians; and atter the expulsion of the tyrant, 600 Athemian columists were sent to Sinope (Plut. Periel. 20). At the tinie of the retreat of the Ten Thousand under Xenophon, Sinope was a wealthy and flourishing city, wluse duminion extended to the river Halys, and which exercised great influence over the tribes of Paphlagonia and Cappadocia, independently of its colonies of Cerasus, Cutyora, and Trapezus. It was mainly owing to the assistance of the Sinopians, that the returning Greeks were enabled to procure ships to convey them to Heracleia (Xenoph. Anab. v. 5. §3; Arrian, Peripl. P. E. p. 17; Diod. Sic. xiv. 30, 32; Amm. Marc. xxii. 8). Strabo also acknowledges that the flet of the Sinopians held a distinguished position. anlong the naval powers of the Greeks; it was nistress of the Euxine as far as the cutrance
of the Bosporns, and divided with Byzantium the lucrative tunny fisheries in that sea. In the time of Ptoleny Soter, Sinope nas governed by a prince, Scydrotbenis, to whom the Egyptian king sent an embassy. (Tac. Hist. iv. 82, full.) It great wealth, and above all its excellent situation, excited the cupidity of the kings of Pontus. It was first assailed in D. C. 220, by Nithridates 1V., the greatgrandfather of Mithridates the Great. Polybius (iv. 56), who is our principal authority for this event, describes the sitnation of Sirupe in the following manner: It is built on a peninsula, which advances out into the sea. The jothmus which comects the peninsula with the mainland is not more than 2 stadia in breatth, and is entirely barred by the city, which comes up close to it, but the remainder of the peninsula stretches ont towards the sea. It is quite flat and of easy access from the town; but on the side of the sea it is precipitous all around, and dangerous for vessels, and presents very few spots fit for effecting a landing. This description is confirmed by Strabo (xii. p. 545), tor he says that the city was built on the neck of the peninsula; but he adds, that the latter was girt all around with rocks hollowed out in the form of basins. At high water these basins were filled, and rendered the shore inaccessible. especially as the rocks were everywhere so pointed that it was impossible to walk on them with bare feet. The Sinopians defended themselves bravely agaiust Mitbridates, and the timely aid of the Rhodians in the end enabled them to compel the agressor to raise the siege. Pharnaces, the successor of Mithridates IV., was more successful. He attacked the city unexpectedly, and fiading its inliahtants unprepared, easily overpowered it, e. c. 183. Frum this time Sinope becane the chief town, and the residence of the kings of Pontus. (Strab, l. c.; Polyb. xxiv, 10.) Mithridates, surnamed Euergetes, the successor of Pharnaces, was assassinated at Sinope in B. c. 120 (Sirab. x. p. 477). His son, Mitliridates the Great, was borm and educated at Sinope, and did much to embellish and strengthen his birthplace: he formed a harbour on each side of the isthmus, built naval arsenals, and constructed adnuirable reservoirs for the tunny fisheries. Atter his disaster at Cyzicus, the king intrusted the command of the garrison of Sinope to Bacehides, who acted as a cruel tyrant ; and Sirope, pressed both from within and from without, was at last takem by Lucullus, after a brave resistance. (Strab. l. c.; Plut. Lucull. 18; Appian, Bell. Mithr. 83; Memnan, in Phot. Cod. p. 238, ed. Bekker.) Lacullus treated the Sinopians themselves mildly, having put the Pontian garrison to the sword; and he left them in possession of all their warks of art, which embellished the city, with the exception of the statue of Autolycus, a work of Sthenis, aod the sphere of Billarus. (itrab. Iint. ll. ce.; Cic. pro Leg. Man.8.) Lucullns restored the city to its ancient freedon and indejendence. But when l'harnaces, the son of Mithridates, had heen routed at Zela, Cacsar took Sinope ander his protection, and established Ruman colonies tiere, as we must infer from coins bearing the inscription Col. Jul. Caes. Felix sinope. In the time of Strabo Sinope was still a large, splendid, and well fortified city; for he deacribes it as surromided by strung walls, and adorned with fine porticoes, squares, yymasaa, and other publicedifices. Its commerce indeed declineed, yet the tany fisheries formed an inexhanstable
source of revenne, which maintained the city in a tolerable state of prosperity. It possessed extensive suburbs, and numerous villas in its vicinity (Strab. l. c.; Plin. vi. 2). From Iliny's letter's (x. 91), it appears that the Nimopians suffered some inconvenience from the wait of a good supply of water, which Pliny endeavoured to remedy by a grant from the emperor Trajan to build an aqueduct conveying water from a distance of 16 miles, In the time of Arrian and Mareian, Sinope still continued te be a flourishing town. In the middle ages it belonged to the empire of Trebizond, and fell into the hatids of the Turks in A. D. 1470 , in the reign of Mohammed 11. Sinope is also remarkable tis the birthplace of several men of eminence, such as Diogenes the Cynic, Baton, the listorian of Persia, and Diphilus, the comic puet.

Near Sinope was a small island. called Scopelus, around whieh large vessels were obliged to sail, before they could enter the harbour; but small craft might pass between it and the land, by which means a cireuit of 40 stadia was avoided (Mareian, p. 72, \&c.) The celebrated Sinopian cinnabar ( $\mathbf{\Sigma}(\nu \omega \pi \kappa \kappa\rangle)$
 of the district of sinope, but was designated by this name only because it furmed one of the ehief arficles of trade at Sinope. (Groskurd on Strabo, vol. ii. p. 45\%, foll.) The imperial coins of Sinope that are known, extend from Augustus to Gallienus. (Sestini, Num. I'et. p. 63; Rascbe, Lex. Num. iv. 2. p. 1105 , foll.)

Sinope, now called Sinab, is still a town of some importance, but it contains only few remains of its former magnificence. The wall neross the isthmus has been built up with fragments of ancieot architecture, such as columns, architraves, \&c., and the same is found io several other parts of the modern town; but no distinct ruins of its temples, porticoes, or even of the great aqueduct, are to be seen. (Hamilton, Researches, vol. i. p. 306, \&c.)
[L. S.]
SINORIA ( $\mathbf{\Sigma}$ wopla, Strab. xii. p. 555), a town on the frontier of Armenia Major, a circumstance which gave rise to a pun of the historian Theophanes who wrote the name suvópia. The place is no doubt the same as the one called Sinorega by Appian (Mithrid. 101), by Ammianus Marcellinus (xvii. 7) Syruhorium, by I'toleniy (v. $7 . \$ 2$ ) Sinibra or Sinera, and in the Autonine Itinemary (p. 208) Sinervas. The pun upon the name made by Theophanes seems to show that the form Sinoria, which strabo gives, is the correct one. The town was a fortres luitt by Mitlridates on the frontier between Greater and Lesser Armenia; but assuming that all the different names mentioned above are only varieties or corruptions of one, it is not easy to fix the exact site of tho tuwn, for I'toleny and the Antonime Itinerary place it to the suuth-west of Satala, on the road from this town to Alelitene, and on the Euplarates, while the Table, calling it Sinara, places it 79 miles to the north-cass of Satalat, on the frontiers of Pontus; bot there can be no duubt that the Simara of the Table is altogether a different place from Sinoria, and the site of the latter place must be sought on the banks of the Nuplirates between Sitala and Melitene, whenee some identify it with Murad Chai and uthers with Sini Beli.
[L. S.]
SINOTIIM. [Synodium.]
MX゙sII (Zivatot, Ptol, iit. 8. §5), a people in the S. of Dacia.

SNXTI (Thae, ii. 98 ; Steph. 13. s.v.; Liv. xlii. 51 ), a Thracian tribe who occupied the district lying
between the ridge called Cercine and the right or W. bank of the Strymon, in the upper part of the course of that river, which was called from thence Sintice (ミivtukt, I'tol. iii. 13. § 30). When Macedonia was divided into four provinces at the Roman conquest, Sintice was associated with Bisaltia in the First Macedonia, of which Amphipolis was the eapital (Liv, xlv. 29). It contained the three towns Heraclela, Piroecoiolis, Tristolus. [E.B.J.]

SINTIES. [Leminos.]
 עove $\sigma \sigma \eta \nu 05$, Sinuessanus: Mondragone), a city of Latium, in the more extended sense of the mame, situated on the Tyrrhenian sea, about 6 miles N . of the mouth of the Vulturnus. It was on the line of the Via Appia, and was the last place where that great highroad touched on the sea-coast. (Sirab, v. p. 233.) It is certain that Sinuessa was not an ancient city; indeed there is no trace of the existence of ao Italian town on the spot before the foundation of the Roman colony. Some authors, indeed, mention an obscure tradition that there had previously been a Greek city on the spot which was called Sinope ; but little value can be attached to this statement. (Liv. x. 21 ; Ilin. iii. 5. s. 9.) It is certain that if it ever existed, it had wholly disappeared, and the site was included in the territory of the Ausonian city of Vescia, when the Romans determined to establish simultaneously the two colonies of Minturnae and Sinnessa on the Tyrrheninn sea. (Liv. x. 21.) The name of Sionessa was derived, according to Strabo, from its situstion on the spacious galf (Sinus), now called the Gulf of Gaeia. (Strab. v. p. 234.) The object of establishing these colonies was chiefly for the purpase of securing the neighbouring fertile tract of country from the ravages of the Samnites, who had already repeatedly overrun the district. But for this very reason the plebeians at Rome hesitated to give their names, and there was some difficulty found in carrying out the colony, which was, howerer, settled in the following year, B. c. 296 . (Liv. x. 21 ; Vell. P'at. i. 14.) Sinuessa seems to have rapidiy risen into a place of importance; but its territory was severely ravayed by Hamnibal in B. C. 217 , whose cavalry carried their devastations up to the very gates of the town. (Liv, xxii. 13, 14.) It subsequently endeavoured, in common with Minturnae and other "coloniae maritimne," to extablish its exemption from furnishing military levies; but this was overtuled, while there was an enemy with an arny in Italy. (Id. xxvii. 38.) At a later period (B. c. 191) they ayain attempted, but with equal ill success, to procure a similar exemption from the naval service. (ld. xxxvi. 3.) Its position on the Appian Way doubtless contributed greatly to the prosperity of Sinuesss; for the same reason it is frequently incidentally mentioned by Ciecro, and we learn that Caesar lialted there for a night on his way from Brundusium to Rome, in B. c. 49. (Cic, ad Att, ix. 15, 16, xiv. 8, ad Fam. xii. 20.) It is noticed also by Horace on his journey to Brundusium, ns the place where he met with his friends Tarius and Virgil. (Sat. i. 5. 40.) The fertility of its territory, and especially of the neightouring ridge of the Mons Massicus, so celebrated for its wines, must also have tended to promote the prosperity of Sinuessa, but we hear little of it under the Foman Empire. It received a budy of military colonists, apparently onder the Triumvirate (Lib. Col. p. 237), but did not retain the rank of a Colonia, and
is termed by Pliny as well as the Liher Coloniarum only an "oppidum," or ordinary municipal towu. (Plin. iii. 5. s. 9 ; Lib. Col. l. c.) It was the furthest town in Latium, as that term was understood in the days of Strabo and Pliny, or "Latium adjectum," as the latter suthor terms it; and its territory extended to the river Savo, which furmed the limit between Latium and Campania. (Strab. v. pp. 219, 231, 233; Plin. iii. 5. s. 9; Mel. ii. 4. § 9.) At an earlier period indeed Polybius reckoned it a town of Campania, and Ptolemy follows the same classification, as be makes the Liris the southern limit of Latium (Pol. iii. 91; Ptol. iii. 1. § 6); but the division adopted by Strabo and Pliny is probably the most correct. The Itineraries all notice Sinuessa as a still existing town on the Appian Way, and place it 9 miles from Ninturnae, which is, however, ronsiderably below the truth. (Itin. Ant. p. 108; Itin. Hier. p. 611 ; Tab. Peut.) The period of its destruction is unknown.

The ruins of Sinuessa are still visible on the seacoast just below the hill of Mondragone, which forms the last underfall or extremity of the long ridge of Monte Massico. The most important are thase of an aqueduct, and of an edifice which appears to have been a triumphal arcb; but the whole plain is covered with fragmenta of ancient buildings. (Cluver. Ital. p. 1080; Romanelli, vol. iii. p. 486.)

At a short distance from Sinuessa were the batha or thermal springs called Aguae sinuessanae, which appear to have enjoyed a great reputation among the Ronans. Pliny tells us they were esteemed a remedy for barrenness in women and for insanity in men. They are already mentioned hy Livy as early as the Second Punic War; and though their fame was eclipsed at a later period by those of Baas and ather fashionable watering-places, they still continued in use under the Empire, and were resorted to among others hy the emperor Claudius. (Liv. xxii. 13; Tac. Ann. xii. 66; Plin. xxxi. 2. s. 4.) It was there, also, that the infamous Tugellinus was compelled to put an eod to his own life. (Tac. Hist. i. 72; Plut. Oth. 2.) The mild and warm climate of Siunessa is extolleil by some writers as coutributing to the effect of the waters (Tac. Ann. xii. 66); hence it is called "Sinuessa tepens" by Silius Italicus, and "mollis Simuessa" by Martial. (Sil. Ital. viii. 528 ; Mart, vi. 42.) Tbe site of the waters is still called I Bagni, and the remains of Roman buildings still exist there. [E. H. B.]

SINUS AD GRADUS or AD GRADUS. [Fossa Mlariana.]

SION, M. ( $\Sigma(\omega \cdot v)$, originally the name of a particular fortress or bill of Jerusalern, but often in the poetical and propbetic books extended to the whole city, especially to the temple, for a reason which will presently be obvious. Sion proper bas been always assumed by later writers to be the SW. hill of Jerusalem, and this has beca taken for granted in the article on Jerusalem [Jerusalem, p. 18]. The counter hypothesis of a later writer, however, maintained with great learning, demands some notice uuder this lead. Mr. Thrupp (Antient Jerusalem, 1855) admits the origiual identity of Sion aud the city of David, but believea both to bave been distiuct from the apper city of Josephus, which latter he identifies with the modern Sion, in agreement with other writers. The transference of the natue and position of Sion he dates as far back as the return from the Babylonish
captirity, believing that the Jews had lost the tradition of its identity with the eity of David; so that, while they correctly placel the latter, they erroneonsly fixed the former where it is still found, viz., at the SW. of the Temple Mount, which motnt was in fact the proper " Siom," identical with "the city of David;" for it is admitted that the modern Siom is identical not ouly with that recognised by the Cbristinn (he might have added the Jewish) inhabitants of Jerusalem, and by all Christian (and Jewish) pilgrims and travellers fronı the days of Constantine, but with the Sion of the later Jewish days, and with that of the Maccabees. The elaborate argument by which it is attempted to remove this error of more than 2000 years' standing from the topography of Jerusalem, cannot here be stated, mnch less diseussed; but two considerations may be briefly mentioned, which will serve to cindicate for the SiH: hill of the city the designation which it has enjoyed, as is granted, since the time of the Babylonish captivity. One is grounded on the langnage of Holy Scripture, the other on Josephus. Of the identity of the original Sion with the city of David, there can be no doult. Mr. Tlrupp (pp. 12, 13) has adduced in proof of it three conclusive passages from Holy Scripture (2 Sam. 5. 7; 1 Kings, viii. 1; 1 Chron. xi. 5). It is singular that he did not sce that the second of these passages is atterly irreconcilable with the identity of the city of David with the Temple Mannt; and that bis own attempt to reconcile it with his theory, is wholly inadequate. According to that theory Mount Sinn, or the city of Darid, estended from tbe NW. angle of the present Haram, to the sonth of the same enclosure; and the tombs of David, which were certainly in the city of David, he thinks might yet be discovered beneath the south-western part of the Haram (p. 161). That the temple lay on this same mount, between these two points, is not disputed by any one. Now, not to insist upon the difficulty of supposing that the threshing-floor of Araunah the Jebusite, where the temple was undonbtedly founded (2 Chron. iii. 1), lay in the very heart of the city of Darid, from which David had expelled the Jebusites, it is demonstrable, from the contents of the second passage above referred to, that the temple was in no sense in the city of David; for, after the completion of the temple, it is said in that and the parallel passage (2 Chron. v. 2, 5, 7) that Solomon and the assembled Israelites hrouglit up the ark of the coveuant of the Lord out of the city of David, which is Sion, into the temple which he had prepared fur it on what Scriptare calls Mount Moriah (2 Chron, iii. 1). Again, in 2 Samuel, v. 6-9, we have the account of David's wresting " the stronghold of Sion, the same is the city of David," out of the bands of the Jebusites; after which "David dwelt in the fort, and called it the city of Datvid." Josephas, in recording the same events, states that David "laid siege to Jerusalem, and took the lower city by assault, while the citadel still held out." (Awt. vii. 3. § 2.) This citadel is clearly identified with the upper city, both in this passage and in his more detailed description of the city, where he says " that the hill upon which tbe upper city was built was by far the highest, and on account of its strength was called by Kiug David the fortress" (фpovipiov). (Bell. Juid, v. 4. § 1.) We are thus led to a conclusion directly opposite to that arrived at by Mr. Thrupp, who saya that "the accounts in the hooks of Samuel and Chronicles represent David as taking the stronghold of Sion first
and the ．Tebusite city afterwards；Jospplus repre－ sents him as taking the lower city first，and after－ wands the citadel．There can be ne doubt，therefore， that in Iosephus＇s view，sim was the lower city， and the Jebusite city the citadel；＂for a compnaison of the 7 th with the 9 th verse in 2 San．v．，and of the 5 th with the 7 th verse in 1 Chron．xi，ean leave no doubt that the internediate verses in both pas－ sages relate to the particulars of ocenpation of Sion， which particulars are narated by Josephus of the occtrpation of the upper city，here called by him by the identical name used by the sacred writer，of the ＂eastle in which David dwelt；therefore they called it the city of David；＂and this фpoupoon of Josephus is ：umitted by Afr．Thrupp to be the upper city（p． 56 ，note 2 ）．That the name Sion was subsequently used in a much wider acceptation，and applied par－ ticularly to the sanctuary，is certain；and the fact is aasily explained．The tent or tabernacle erected by Wavid fir the reception of the ark was certainly on Nownt Sion，and in the city of David（2 Sam．vi． 12； 1 Chron．xv．1，29），and thercfere in all the language of his own divine compositions，and of the other Psalmists of the conclusion of his and the commencement of Silemon＇s ruign．Sion was properly identified with the sanctuary．What cuuld be more natural than that，when the ark was transferred to the newly－consecated temple on the contignous hill， which was actually united to its former resting－ ］lace by an artificial embankment，the signification of the name should be extended so as to comprehend the Temple Mount，and continue the propriety and apphicability of the received phraveology of David＇s and Asapli＇s Psalms to the new and permanent abode of the most sacred enblem of the Hebrew worship？Bat to attempt to found a topographical argument on the figurative and frequently elliptital expressions of Psalms or prophecies is surely 10 build on a foundation of sand．It was no doubt in orrler not to perples the topography of Jerusalen by the use of ecclesiastical and devotional terminology that Jusephus has wholly abstained from the use of the name Sion．
［G．W．］
SIPH or ZIPIl（LXX．Alex．Zí $\phi$ ，Vat．Ogis： Eth．Zıpaios），a city of the tribe of Julab，men－ tioned in cennection with Maon，Carmel，and Juttah （Josh．xv．55）．The wilderness of Ziph was a t．aromite liiding－place of David when concealing hiunself from the malice of Sanl．（1 Sam．xxiii．14， $26, ~ x s v i .1$ ；$P_{\text {salm }}$ liv．titie．）This wilderness of Ziph was contiguons to the wilderness of Mawn（1 Somu．xxiii．25）；and this Mann is connected with C＇armel in the history of Nabal and Alignil（xav．2）． The three names are still found a few miles south of llebron，is Kirmel，Main，Ziph，The ruins lie on a low rilge between two small walys，which com－ mence here and run towards the Deal Sea．＂There is liere little to be seen except broken walls and frundations，most of them of unhewn stone，but in－ dieating solidity，and covering a considerable tract of ground．Numernus cisterus also remain．＂（Robinson， Bihh．Res．vol．ii．p．191）．Kiph is placed by St．Je－ rome 3 miles F ．of Heliren（ S ，would be more correct）， and the desent of Ziph is frequently mentioned in the ammals of the recluses of Pallestine，while the site of the town was identified by travellers at least three centuries ago，（Fiirer，Itinerarium，p．68．）［G．W．］
sll＇llAE or T1PllA（Zifat，Thuc，iv，T6；Scy－ lax，p．15；Steph．B．s．r．：P＇ol．iii．15．§ 5 ；Plin． iv．3．s．4；Ti $\varphi$ a，Pans．ix．32．§ 4：Eth．Tipaîos， Tisateis），a town of Beeotia，upon the Corinthian
gulf，which was said to have derived ils name from Tiphys，the pilot of the Argonsuts．In the time of lausanias the iohabitants of Siphae pointed out the spot where the ship Axge anchored on its returu from its celebrated voyage．The same writer men－ tions a temple of Hercules at Siphac，in whose honour an annual festival was celcbrated．（lause l．c．）Thucydides（l．c．），A pollonius Rholins（i．105）， and Stephanus B．（s．v．乏í申at）describe Siphas as a dependency of Thespiae；and it is accordingly placed by Miiller and Kiepert at Alikis．But Leake draws attention to the fact that Pausanias describes it as lying W．of Thisbe；and he therefore places it at port Sarandi，near the monastery dedicated to St． Taxiarches，where are the remains of a small Hel－ lenic city．On this supposition the whole of the territory of Thisbe wonld lie between Thespise and Siphae，which Leake accounts for by the superiority of Thespiae over nll the places in this angle if Bopotin，whence the whole country lying upoin this purt of the Corinthian gulf may have often，in con－ mon acceptation，been called the Thespice．（Leake， Northern Greece，vol．ii．p．515．）
SHPHNOS or SIPHNUS（ Zí申vos：Eth．Zíquos： Siphine（it：，Siphacnto Ital．），an island in the Aegsean sea，one of the Cyclades，lying SE．of Seriphos，and NE．of Mclus．Pliny（iv．12．．． 22. §66）describes it as 28 miles in circait，but it is considerably larger．The same writer says that the island was originally called Merope and Acis：ins ancient name of Bl trope is also mentioned by Ste－ phanus B．（s，v．）．Siphnos was colonised by Ionians from Athens（Herod．viii．48），whence it was said to have derived its name from Siphoos，the son of Sunius．（Steph．B．s．v．）In consequence of their gold and silver mines，of whieh remains are still seen，the Siphnians attained great prosperity，and were regarded，in the time of Polycrates（a．c． 520 ）， as the wealthiest of all the isladiders．Their trea－ sury at Delphi，in which they deposited the tenth of the produce of their mines（Paus．x．11．§ 2），was equal in wealth to the treasuries of the most opulent states；and their public buildings were decorated with Parian marble．Their riches，bewever，exposed them to pillage；and a party of Sumian exiles，in the time of Polycrates，invaded the island，and levied a contribution of 100 talents．（Herod．iii．57．58．） The Siphnians were among the few islanders in the Aegaean who refused tribute to Xerxes，and they fought with a single ship on the side of the Greeks at Sulanis．（Herod．viii．46，48．）Under the Athenian supremacy the Siphinns paid an annual tribute of 3600 drachmas．（Franz，Elem．Epigr． Gr．n．52．）Their mines were afterwarls less pro－ ductive；and Pausnnias（l．c．）relates that in con－ seyuence of the Siphnians neglecting to send the tenth of their tressure to Delphii，the gods destroyen their mines by sn inundation of the sea．In the time of Strabo the Siphians lad become so pore that ミipviov à $\sigma \tau \rho a ́ \gamma a \lambda o v$ beeame a proverbial ex－ pression．（Strab．X．p． 448 ；comp．Eustath．ad Dionys．Per．525；Hesych．s．v．इiфvios áphabív．） The moral character of the siphnians stovid low： and hence to net like a Siplutian（ （øpyáseav）was used as a term of reproach．（Steph．B．；Suid．； llestel．）The siphmians were celelorated in an－ tipuity，as they are in the present day，for their skill in pottery．Pliny（xxxvi．22．§ 159，Sillig） mentions a particular kind of stone，of which drink－ ing cups were made．This，according to Fiedler， ＂as a species of talc．and is probably intended by

Stephanus B. when he speaks of Si申voy motinpior.

Siphnos possessed a city of the same name (Ptol. iii. 15. §31), and also two other towns, Apollonia and Mlinoa, mentioned only by Stephanus B. The ancient city occupied the same site as the modern town, called Kastron or Seragliw, which lies upon the eastern side of the island. There are some remains of the ancient walls; and fragments of marble are found, with which, as we have already seen, the public buildings in antiquity were decorated. A range of moontains, about 3000 feet in beight, runs across Siphnos from SE. to NW.; and on the high ground betreen this mountain and the eastern side of the island, about 1000 feet above the sea, lie five neat villages, of which Stavri is the principal. These villages contain from 4000 to 5000 inhabitants; and the town of Kastron about another 1000. The climate is bealthy, and many of the inbabitants live to a great age. The island is well cultivated, but does not produce sufficieot food for its population, and accordingly many Siphnians are obliged to emigrate, and are found in considerable numbers in Athens, Sinyrna, and Constantinople. (Toornefort, Joyage, fe. vol. i. p. 134, seq. transl.; Fiedler, Reise, vol. ii. p. 125, seq.; Ross, Reise auf den Griech. Inseln, vol. i. p. 138, seq.)

COIN OF SIEIINOS.
SIPLA, in Gallin, is placed by the Table on a route from Condate (Rennes) to Juliomagus (A ngers). The distance from Condate to Sipia is avi. and tbis distance brings us to a little river Seche at a place called Ii-seche, the $\bar{I}$ being probably a corruption of Vadum. The same distance xvi. measored from liz-seche brings us to Combaristam (Combré) on the mad to Angers. But see the article Combabistum. The Seche is a branch of the l'ilaine (D'Anville, Nitice, \&c.).
[G. L.]
SIPONTUM, or SIPUNTUM, but in Greek al-
 [mitinus: Sta Maria di Siponto), a city of Apulia, situated on the coast of the Adriatic, immediately S. of the great promontory of Garganus, and in the bight of the deep bay formed by that promoritory with the prolongation of the coast of Apulia. (Strab. vi. p. 284.). This bay is now called the Gulf of Manfredomia, from the city of that name which is situsted within a few miles of the site of Siponturn. The Cerbalus, or Cervaro, and the Candelaro fall into this bay a short distance S. of Sipontum, and form at their mouth an extensive lagune or saltwater pool ( $\sigma \tau 0 \mu a \lambda i \mu \nu \eta$, Strab. b.c.), now called the Pantano Salso. Like most places in this part of Apulia the foundation of Sipontum was ascribed to Liomed (Strab. l.c.): but with the exception of this vague and obscure tradition, which probably means no more than that the city was one of those belonging to the Daunian tribe of Apulians, we have no account of its being a Greek colony. The name is clasely analogous in form to others in this part of

Italy (Hydruntom, Butuntum, \&c.): and its Greck derivation from $\sigma \eta \pi i a$, a cuttle-fish (Strab. l.c.), is in all prabability fictitions The Greek form Sipus, is adopted also by the Roman poets. (Sil. Ital. viii. 633 ; Lucan. v. 377.) The only mention of Si pontum in listory before the Roman conquest is that of its capture by Alexander, king of Epirus, about n. c. 330. (Liv, viii. 24). (of the manner in which it passed under the yoke of Rome we have no account; but in B. C. 194 a colony of Roman citizens wats settled there, at the same time flat those of Sulernum and Buxentum were established on the other sea. (Liv. xxxiv, 45.) The lands assigned to the colonists are said to have previously belonged to the Arpani, which renders it probable that Sipontum itself bad been merely a dejendency of that city. The new colony, however, does not seem to have prospered. A few years later (u.c. 184) we are told that it was deserted, probably on account of malaria; but a fresh body of colonists was sent there (Liv. xxxix. 22), and it seems from this time to have becotae a tolerably floorisbing town, and was frequented as a seaport, though never rising to any great consideration. Its principal trade was in corn. (Strab. vi. p. 284 ; Mel. ii. 4. § 7 ; Plin. iii. 11. s. 16; Ptol. iii. 1. § 16 ; Pol. s. 1.) It is, however, mentioned apparently as a place of some importance, during the Civil Wars, being occupied by M. Antonius in 8. c. 40. (Appian, B. C. v. 56 ; Dion Cass, xlviii. 27.) We learn from inscriptions that it retained its municijal government and magistrates, as well as the title of a colony, under the Roman Empire (Mommsen, Inser. R. N. 927-929) ; and at a later period Paulus Diaconus mentions it as still one of the "urbes satis opulentae " of Apulia. (P.Diac. Hist. Lung. ii. 21.) Lucan notices its situation immediately at the foot of Mount Garganus (" subdita Sipus montibus," Lucan, r. 37\%). It was, however, sctually situated in the plain and immediately adjoining the marshes at the inouth of the Candelaro, which must always have rendered the site unhealthy; and in the middle ages it fell into decay from this cause, till in 1250 Manfred king of Naples removed all the remaining population to a site about a mile and a half further N., where lie built a new city, to which he gave the name of Manfredonia. No ruins of the ancient city are now extant, but the site is still marked by an ancient church, which bears the name of 'Sta Maria di Siponto, and is still termed the cathedral, the archbishop of Manfredonia hearing officially the title of Archbishop of Sijuntum. (Craven's Southern Tour, p. 67 ; lomanelli, vol. ii. p. 209.) The name of Sipontum is found is the Itineraries (Itin, Ant. p. 314 ; Tab. Peut.), which give a line of road proceeding along the const from thence to Barium, passing by the Nalinae at the mouth of the Palus Salapina, and therefore following the narrow strip of beach which separated that lagone from the sea. There is still a good horse-road along this beach; but the distances giren in the Itituraries are certainly corrupt.
[E. II. B.]
Sl'PYLLS ( $\Sigma i \pi v \lambda$ dos ), a mountain of Lydia between the river Hermus and the town of Smyrna; it is a branch of Mount Tmolus, running in a northwestern direction along the Hermus. It is a rugged, much torn mountain, which seems to owe its present form to violent convulsions of the earth. The mountain is mentioned even in the 1liad, and was rich in metal. (IIm. Il. xxiv. 615; Strab. i. p. 5s, xii. p. 579, siv. p.680.) On the eastern slope of the

3 +2
monntain, there once existed, according to tralition, an ancient city, called Tantalis, afterwards Sipylus, the capital of the Maeonians, which was believed to have been swallowed up lyy an earthuake, and planged into a crater, attemarls tilled by a lake, which bore the name of Sale or Salui (Strab. i. p. 58 , xii. p. 579; Steph. B. s. A.; Plin. w. 31 ; Pans. vii. 24. \$ 7). Pliny relaten that the spot once nocupied by supylus was successively oceupied hy other towns, which he calls Arelacopolis, Colpe and Lebade. Haluanias (v. 13. § 4) ealls the lake the marsh of Tamtalus, and auds that his tomb was conspicnons near it, and that the throne of Pelops was slanwn on the summit of the mountain sbove the temple of (Cybele) Plastene. The tops of the houses of Sipylus were believed to have been seen under the water for some time after (lans. vii. 24. § 7 ); and some modern travellers, mistaking the ruins of ohd Sinyrna for those of Sipylus, imagine that they have discovered both the remains of Sipylus and the tomb of Tautalus. Chandler (Trarels in Asia Minor, p. 331) thoncht that a small lake of limpid water at the norlh-eastern foot of Dlonnt Sipylus, not far from a sepalchre ent in the rork, might be the lake Sule: but IIamilton (Reseurches, i. p. 49, foll.) has shown that the lake must be songht for in the marshy district of Manissa.

In speaking of Mount Sipylus, we cannot pass over the story of Niobe, alluded to by the poets, who is sail to have been metamorpbosed into stone on that mountain in ber grief at the luss of her children. (Hom. Il. sxiv. 614; Soph. Antig. 822; Ov. Met. vi. 310 ; Apollud. iii. 5; Paus. viii. 2. §3) Pausanias (i. 21. §5) relates that be himself went tn Mount Sipylus and saw the figure of Niobe formed out of the natural rock; when viewed close he saw only the rock and precipices, but nothing resembling a wonan either weeping or in any otber posture; but standing at a distance you fancied you satw a woman in tears and in an attitude of grief. This phantom of Niobe, says Chandler (p. 331), whose uhservation has been confirmed by subsequent travellers, may be defined as an effect of a certain portion of light and shale on a part of Sipylus, perceivable at a particular point of view. Ahount Sipylus now bears the name of Saboundji Dagh or Sipuli Dugh. [L. S.]

NlliACELLAE (Itin. Ant. . . 332 ; lh. p. 333, Siracelle; It. Hier. p. 602. Sirogellae; Tat, I'eut. Syrascellae; and in (Geog. R.av, iv. 6, and v, 12, Syrascele), a place in Thrace, on the road from Trajanopolis to Callipolis, and on the main road to Constaninople. Its distance from Trajanopolis is variously given in the Itin. Ant., and the readings of the Ms.i. differ,- one stating the distance to be as much as 59,006 paces, another as little as 50,000 . Accordwif to Mannert (viit. p. 205), its site is near the mondern Chachan or Rurqueur (?) of P. Lucas (Trois Vay. p. 47): but Richand places it near Zorna, and Lapme near Mulyare or Migntgara; the meertainty of the Inaerary above mentioned heing probably the cause of this discrepancy.
[.I. I.:]

## SHAACE'NL: [NH:OC.]

 grat and raighty people of Asiatic sumatia on the enst shore of the Jlaeotis, beyond the Kha and on the Achandens, in the rii-trict called by Strabo (xi. 504) Sracene. They appetr under varions names. Thas Strato (xi. p. 506) and Melt (i. 19) call thenn Niraces; Tacitus (Ann, xii. 15, seq.) Siran (in Strabo, xi. p. 452, £ (pakoi); and in an inscription (biokk, ii. p. 1009) wi find the form Sipdix.s.

They were governed by their own kings, and the Limans were engaged in a wor with them, A. 11,50 . (Tac. l. c.: Strab, ib, p. 504.)
[T. 11, D.]
SIRAE or SEIRAK:. [P'somins.]
MRAE, in Macedonia. [sums.]
SIRANGAE ( § 17). a tribe in the interior of Lihya. [T. H1 D.] SIRBES, [Xintues.]
SIRBI. [swmer.]
SIRBlTUM, a city of Aethiopia, above which the mountains cease, and at a distance of 14 days' nail from Merois. (Ilin. vi. 30. s. 35.) From thean particulars llamert (x. pt. i. p. 171) is indaced to regard it as the modern Senaar.
[T. 11. D.]
SIRBO'NIS LACUS ( $\dot{\eta} \Sigma(p E \omega v i s$ or $\Sigma(p \delta w v i \delta u s$ A ${ }^{\prime} \mu \nu \eta$, llerod. ii. 6; Dindor. i. 30; P'tul. iv. 5. §§ 12, 20; Strab, i. pp. 50, 65, xvii. 760-763; さíp6ov, Steph. 13. s. v.; Plin. v. 12. s. 14 : Sebaket-Barvhil), was a vast tract of morass, the eentro of which formed the sirhonian lake, lying between the eastera angle of the Delta, the Isthmus of Suez, Mount Casins, and the Mediterranean ses. Nith the latter it was at one time connected by a natural chanmel ( $\tau \dot{\delta} \dot{\varepsilon} \kappa \rho \in \gamma \mu a$ ), running through bars of quicksaul and shingle ( $\tau \dot{\alpha}$ Bxipa日pa), which separated the seat from the morass. The limits of the Serbonian burp have, however, been much contracted in later ages by the elevation of the sea-borde and the drifting of the sands, and the lake is now of inconsilerable extent. The Sirbomian region is celebrated in histoly for having been the scene of at least the partial destruction of the Persian army in B. C. 350 , when Datius Ochus was lcalling it, after the storming of Sidon, to Aegypt, in order to restore the authority of Persia in that kingdom. Diodurus (i, 30) has probably exaggerated the serions diaster into a tofal amihilation of the invading host, and Milton (P. /. ii. 293) has adopted the statement of Diodertas, when he speaks of

## "- that Serbonian bog

 Betwixt Damiata and Mount Crsius old Where armies wbole have sunk."The same Persian army, hewever, afterwards took Pelnsium, Bubartis, and other cities of the Dedta. The base of the Deltaic tiangle of Aegypt was reckoned by Herodotas (ii. 6) from the bay of Plinthine to the lake of Serbonis.
[W. B. D.]
shbLivosae lósulak. [Minervae Phomostonies].

SIRICAE, a place in Cappadocia on the rond from Comama to Nelitene, and 24 miles NIV. of the first. (Itin. Ant. 1p. 210, 211.) Aceording to Lapie, near the Benbodagh.
[T. H. D.]
SIRIO, in Gallia, is placed by the Itins on a ruad from Burdigala (Bordeaux) to Apinnum (Agen) The di-tance is probably corrupt in the Table, which places Sirio x. from Bordeaux; for the true distance is xv , or wxi. (iollic leagnes. D'Anville fixes Sirio (the Pout de Siron) near the point where the small iver Siron or Ciron juins the Garonne on the left bank.
[G. I..]
SIR1S (Sipis: Eth. Eiplons, but also Etpivos: Sirites), an ancient city of Magna Graecia, sitnated at the mouth of the river of the same name flowing into the Tarentine gulf, and now called the Sinno. There is no doubt that siris was a Greek culony, and that at one time it attained to $\pi$ great amount of wealth and prosperity; but its history is oxtremely olscure and uncertain. Its first origin was generally ascribed to a Trojan collony ; and, as a proof of this,
an ancient statne of Minerva was shown there which claimed to be the true Trojan Palladium（Strab，vi． p． 264 ；Lycophr．Alex． 978 －985）．Whatever may have been the origin of this legend，there seems no doubt that Siris was originally a city of the Chones， the native Oenotrian inhabitants of this part of Italy （Strab．l．c．）．A legend found in the Etymolugicun （s．v．Sipus），according to which the city derived its name from a danghter of Morges，king of the siculi， evidently points in the same direction，as the Murgetes also were an Oenotrian tribe．From these first settlers it was wrested，as we are told，by a body of lonian culonists from Cslophon，who had fled from their nutive city to avoid the dominion of the Lydians． （Strab．l．c．；Athenae．xii．p．523．）The period of this emigration is very uncertain；but it appears jrobable that it must have taken place not long after the captare of the city by Gyges，king of Lydia， about $700-690$ в．c．Archiluchus，writing about $660 \mathrm{~B}, \mathrm{c}$ ，allndes to the fertility and beauty of the district on the baoks of the Siris；and thongh the fresmeat preserved to us by Athenaens does not ex－ pressly notice the existence of the city of that aame， yet it would appear from the expressions of Athenaens that the poct certainly did mention it ；and the fact of this colony having been so lately established there was doubtless the canse of his allnsion to it（Archil． ap．Athen．xii．p．523）．On the other hand，it seems clear from the acconnt of the settlement at Neta－ pontum（Strab．vi．p． 265 ），that the territory of Siris was at that time still unoccupied by any Greek colony．We may therefore probably jlace the date of the Ionian settlement at Niris between 690 and 660 p．c．We are told that the Ionic colonists gave to the city the name of Polieum（Пo入ítoon，Strab．vi．p． 264 ； Stepb．B．s．v．Eipts）；bnt the appellation of Siris， which it derived from the river，and which seems to have been often given to the whole district（ $\delta$ 衣ipts， used as equivalent to $\dot{\eta} \Sigma i p \hat{\imath} \tau t s$ ），evidently prevailed， and is the only one met with in conmon use．Of the bistory of Siris we know literally nothing，except the general fact of its prosperity，and that its citizens indulged in habits of luxnry and effeminacy that rivalled those of their neighbours the Sybarites． （Atben．xii．p．523．）It inay be received as an ad－ ditional proof of their opulence，that Damasus，a citizen of Siris，is noticed by Herodotus anong the suitors for the danghter of Cleisthenes of Sicyon， ahout $580-560 \mathrm{H} . \mathrm{c}_{\text {．}}$ ，on which occasion Siris and Sybaris anong the cities of Italy alone furvished claimants．（Herod．vi．127．）This was probably abont the period that Siris was at the height of its prusperity．But an lonian city，existing as it did in the midst of the powerful Achaean colonjes，must naturally have been an object of jealousy to its neighbours；and hence we are told that the Meta－ pontines，Sybarites，and Crotoniats formed a league against Siris ；and the war that ensued ended in the raptnre of the city，which appears to have been followed by the expalsion of the inbabitants（Justin． xx．2）．The date of the destruction of Siris caanot be fixed with any approach to certainty：it was probalily after 550 B．C．，and certainly preceded the tall of its rival Sybaris in B．C． 510 ．Its rnin appears to have been complete，for we meet with no sub－ sequent meation of the city，and the territory is spoken of as open to colonisation at the time of the Persian War，b．c． 480. （Herud．viii．62．）

Upon that orcasion we learn incidentally that the Athenians considerel themselves as having a clam of old staudiag to the vacant district of the Sirites，
and even at one tina thonght of removing thither with their wives and fanilies．（Herof．l．c．）The origin of this claim is unknown；but it seens pretty clear that it was taken up by the Athenian colonists who established themselves at Thurii in u．c． $\mathbf{4 4 3}$ ， and became the occasion of hostilities between then and the Tarentines．These were at leugth tenmiusted by a compromise，and it was agreed to found in com－ mon a fresh colony in the dispated territory．This appears to have been at first established on the site of the ancient city，but whs soon atter transferred to a spot 3 miles distant，where the new colony received the mame of Heracleia，and som rose to be a flomish－ ing city．（Strab．vi．p． 264 ；Diorl，xii．36．）［Hera－ clela．］According to Straho，Siris still contimned to exist as the port or naval station of Heracleia； bnt no other mention of it is found，and it is not clear whether Strabo himself meant to speak of it as still subsisting in his day．No remains of it are extant， and the exact site does not ajpear to lave been de－ termined．But it may be placed on the left bank of the river Siris（now called the Sinno），at or near its mouth；a position which well accords with the dis－ tance of 24 stadia（ 3 miles）from Heracleia，the re－ mains of which are visible at Policoro，near the river Agri，the ancient Aciris．［Heraclela．］

The river Siris is mentioned by Lycophroa（Alex． 982），as well as by Archilochus in a passage already cited（ap．Athen．xii．p．523）；bnt the former author calls it Sivis，and its modern name of Sinno would seem to be derived from an ancient period；for we find mention in the Tabula of a station 4 miles from Heracleia，the name of which is written Semnum， probably a corraption for Ad Simnum or Sinnum． The Siris and Aciris are mentioned in conjanction by Pliny as well as by Strabo，and are two of the most considerable streams in Lacioia．（Plin．iii． 11. s．15；Strab．vi．p．264．）The name of the former river is noticed also in connection with the first great battle between Pynhus and the Romans，B．C．280， which was fought ppun its banks（Plnt．Pyrrh．16）． It has been absurdly confonnded by Florus and Oro－ sius with the Liris in Campauia．（Flor．i．18．§ 7 ； Oros．iv．1．）

The fertile district of the Siritis（方 $\mathbf{\Sigma}$ ipitis or $\Sigma_{\text {elpitis）}}$ is a poition of the level tract or strip of plain which borders the gnlf of Tarentum from the neighbourhood of Rocca Imperiale to the month of the Bradano．This plain stretches inland from the mouth of the Sinno to the foot of the hill on which stands the modern city of Tursi，abont 8 miles from the sea．It is a tract of extraordinary matural fer－ tility，but is now greatly neglected，and，in comison with all this coast，desolated by malaria．［E．H．B．］

SHRIS，SIRAE，SERHHAE（Zipus，Herod，viii． 115；Sirae，Liv，xlv．4；ミéppat，Hierocl．：Eth． इipotaioveis，Hervi．v．15；Steph．B．：Serreis），a town of Macedonia，standing in the wilest part of the great Strymunic phain on the last slopers of the range of mountains which bound it to the NE． Xerses left a part of his sick bere，when retreating to the Hellespont（Herod．l．c．）：and P．Aemilins Paulus，after his victory at l＇ydua，received at this town，which is ascribed to Odomantice，a deputation from Ierseus，who had retired to Samothrace．（Liv． l．c．）Little is known of Serrhae，which was the usaal form of the name in the 5th centary（thonels from two inscriptions found at Serrés it afpess that Sirrha，or Sirrhate，was the more ancieat ortho－ graphy，ind that which obtained at least until the division of the empire），untal the great spread of
the Serrian kinglon. Stephen Dushan in the 14th eentury seized on this large and flourishing city, and assumed the imperial crown here, where be established a court on the Roman or Byzantine model, with the title of Emperor of Romania, Sclavonir, and Albania. (Niceph. Greg. p. 4tiz.) After his death a partition of his dominions took place but the Greeks bave never since been able to recover their former preponderance in the provinces of the Strymonic valley. Sultan Murad took this town from the Servians, and when Sigismund, king of Hungary, was abont to invade the Ottoman dominions, Bay̧ezid (Bajazet Ilderim) smmmoned the Christian princes who were his vassals to his camp at serrhae, previous to bis victory at Nicopolis, A.1). 1396. (J. von Hammer, Gesch. des Osman. Reickes, vol. i. Pp. 193, 246, 600.)

Besides the Macedonian inscriptions of the Roman empire fonnd by Leake (1nscr. 126) and Cousinéry, the only other vestige of the ancient town is a piece of Hellenic wall faced with large quadrangular blocks, but composed within of small stones and mortar forming a mass of extreme solidity. Servian remains are more cummon. (Leake, Northern Greece, vol. iii. pp. 200-210.)
[E. B. J.]
SI'RM110 (Sermione), a narrow neck or tongue of land, projecting out into the Lake Benacus (Lago di Giarda), from its southern shore. Though a conspicuous and picturesque object in all views of the lake frorn its southern sbores, it is manoticed by any of the geograpbers, and its name would probably have been unknown to us, but for the cireumstance that Catullus, wbo was a native of the neighbooring Verona, had a villa on its shores, and has sung the praises of Sirmio in one of the mast charming odes in the Latin language (Catull. xxxi.). The name of Sirmio is, however, foond in the Itineraries, which place a "Sermione mansio" on the roal from Brisia to Verona, and jast midway between the tro cities, 22 M. P. from each (Itin Aut p. 127). This must, however, bave been situated at the entrance of the peninsula, probably where a roal turned off to it , as it is clear that the highroad could never have turned aside to the promontory itself.

Estensive substrnctions and other remains of an ancient villa are still visible at the extremity of the promontory, where it juts out into the lake: but these undonbtedly helong to an abode on a much more nasgnificent scale than the villa of Catullas, and probably belong to some villa of the injuerial times, which had replaced the lmmbler dweling of the poet.
[E. 11. B.]
Sl'RM1t’l ( $\mathbf{\Sigma} i p p t o y$ ), an important city in the south-eastern part of Lower I'annonia, was an ancient Celtic place of the Taurisei, on the left bauk of the sarus, a little below the point where this river is joined by the Bacuntius (Ilin. iii. 28.) /issimus (ii. 18) is mistaken when he asserts that Sirmiu:n was sorrounded on two sides by a tributary of the 1ster. The town was situated in a must favourable pasition, where several ruals met (It. Anet. pp. 124, 131; /t. Hieros. p. 5633), and during the wars against the Dacians and other Danubian tribes, it becaune the chicif depot of all military stores, and gradualy rose to the rank of the chief city in l'amonia. (Herodian, vii. 2.) Whether it was ever made a Roman colony is not quite certain, though an inseription is said to exist euntaining the words Bec. Colon. Sirmiens. It contained a large manufictory of arms, a spacious forum, an imperial Talace, and other public build-
residence of the admiral of the first Flavian fleet on the Danube. (Amm. Marc, xvii. 13, xis. 11: Nowit. Imp.) The emperor I'robus was born at Sirmium. (Vopise. Irob. 3, 21: camp. Strab. ii. p. 134: Ptol. ii. 16. §8, viii. 7. § 6; Steph. 13. s. v; Eutrop. ix. 17; Aethicus, p. 715 , ed. Gromov.; Geog. Rav. iv. 19.) The city is meutioned for the last time by Procopins ( $B$. Goth, iii. 33, 34), as being in the hands of the Avari, but when and how it perished are questions which him tory does not answer. Estensive ruins of it are still fonnd sbont the modern tnwn of Mitrocitz. (Nee Orelli, Inseript. n. 3617 ; Marsili, Danubius, p. 246, f.31.)
[L. S.]
SIRNIDES, a group of small islands off the prounntory Sammonium in Crete. (Plin. iv. 12. 8. 20.)

SllaCC ( $\Sigma$ ptik), a town of Parthyene, noticed by lsidorus. (Stuth. Parth. c. 12, ed. Jitiller.) It is not clear whether there is any corresponding modern town; but Remnell thinks it is represented by the present Seralkh. (Geog. Herod. p. 297.) P'olemy places a district which he calls Siracene anong the Astabeni, a people who occupied part of Hyreania (vi. 9. §5). It is not impossible that Sirnc and siracene may be thus connected.
[V.]
SISAPON ( siderable town in Hispania Baetica. (Cic. Phii. ii. 19 ; Plin. iii. 1. s. 3.) It lay N. of Corduba, between the Baetis and the Anas, and was eclebratel for its silver mines and reins of cimnabar (Strub. l. c.; Vitruv. vii. 9 ; Plin. xxxiii. 7. s. 40; Dincenr. จ. 109.) The town of Almaden in the Sierra Morena, with which Sisapon is identified, still possesses a rich mine of quicksilver. "The mine is ayparently inexhaustible, becoming rieher in proportion as the shafts deepen. The vein of cinnahar, about 25 feet thick, traveres rocks of quartz and slate; and ruus towards Almaclenejos. Virgin quicksilver occurs also in pyrites and hornstein." "Betwern 20,000 and 25,000 quintals of mereury are now procared annually." (Ford, Havabook of Spain, p. 70 ; comp. Laborde, ltin. ii. p. 133: Dillon's Trocels, ii. pp. 72, 77.) The name of this town is varionsly written It appears on coins as "Sisipu" (Sestimi, p. 87), whilst others have the enrrect name. (Florez, Med. iii. p. 119 ; Mionnet, i. p. 25, and Supp. i. p. 114.) The form "Sisalone" (linn, Ant. ( p .444 ) is probably currupt. It nppears to be the same town called 【 $1 \sigma \alpha \pi \dot{\omega} \nu \eta$ by Ptolemy (ii. 6. § 59), who, however, places it in the territory of the Oretani, in Hispania Tarraconensis, on which indeed it borders.
[T. II. D.]
SISAR. [Usak.]
SISARA ( $\sum_{i} \sigma \dot{\alpha} x$, Ptol. iv. $3 . \S 17$ ), a lake in Africa l'ropra, in the neighbourhood of Hippo Diurrhytus. Now Benizert or Bizerta. [T. II. D.]
SISARACA (ェıбадрака, 1'tol. ii. 6. § 52), a town of the Murbogi or Turmodigi in Hispania Tarracunensis. For coins, see Sestini, p. 197. [T.H.D.]
 ii. 19, de Aedif: ii. 4). a fortress of Mesopotamis, above Dara, noticed by lrocopius. It is unt elsowhere mentioned.
SI's'1A, SEGESTA, or SEGESTICA (E/бкia, $\mathbf{\Sigma} \in \gamma \dot{\epsilon} \sigma \tau \alpha, \mathbf{\Sigma} \in \gamma \in \sigma \tau \iota k \dot{\prime})$, a great town in the south of Upper lamnonia, on the sonthem bank of the Savus, or an island formed by that river and two otbers, the Colapis anl Odra, a canal dug by Tiberius cutnpleting the island. (1)ion Cass, alix. 37.) It was sitnated on the great road from Aemona to Sirmiun.

SITACE,
(It. Ant. pp. 259, 260, 265, 266, 272, 274; Plin. iii. 28.) According to Pliny the name Segestica lelonged only to the island, and the town was called Siscia; while Strabo (vii. p. 314) says that Siscia was $s$ fort in the neighbourhood of Segestica; but if this was so, it must be supposed that subsequently the fort and town became inited as one place. (Comp. Strab. iv. p. 202, v. p. 214, vii, p. 218 ; Appian, Illyr. 16, 23. \&c.) Siscia was from the first a strongly fortified town; and after its capture by Tiberios, in the reign of Augustus (Appian, Dion Cass., ll. cc.; Vell. Pat. ii. 113), it bechme one of the most important places of Pannonia; for being situated on two navigable rivers, it not only carried on comsiderable commerce (Strab. v. p1. 207, 214), but hecame the central point from which Augustas and Tiberius carried on their undertakings against the Pannonians and Hlyrians. Tiberins did much to enlagre and embellish the town, which as early as that time seems to have been made a colonia, for Pliny mentions it as such: in the time of Septimius Severus it received fresh colonists, whence in inscriptions it is eslled Col. Septimia Siscia. The town contained an imperial mint, and the treasury for what was at a later time called the province Savia; at the sanse time it was the station of the small fleet kept on the Savus. Siscia maintained its importance until Sirminm began to rise, for in proportion as Sirmium rose, Siseia sank and declined. (Comp. Zosim. ii. 48; Orelli, Inscript. n. 504, 505, $2703,3075,3346,4993$.) The modern town of Sissek, ocenpying the place of the ancient Siscia, cuntains many interesting remains of antiquity. (Marsili, Danslius, p. 47; Schönwisner, Antiq. Sabariae, p. 52, foll.; Machar, Norikum, i. p. 159.)
[L. S.]
SITACE ( ミıтákخ), a large town, first noticed by lenophon (Anab. ii. 4. § 13), situated about 8 parasangs from the Meiian Wall, and 15 from the Tigris and the mouth of the Physens. The exact situation canuot be now determined, but several travellers have noticed, in this neighbourbood, extensive ancient remains, which may perhaps helong to this city. (Mamuert, r. pt. ii. p. 281 ; Xiebuhr, ii. p. 305; Ives, Travels, 9c. p. 133.) [V.]

SITACUS (ミıTakós, Arrian, Ind. c. 38), a river of Persis, to which Nearchus came in his celebrated coasting voyage. It is in all probability the same as that called by Pliny Sitiogagus (vi. 23. s. 26); althongh his statement that, from its month, an ascent could be made to I'asargada in 7 days, is maoifestly erroneous. There is no reason to doubt that it is at present represented by a strean called Sith-Rhegiin. (Vineent, Voy. of Nearchus, i. p385 ; DAuville, Mén, de l.Acod. sxx. p. 158 ; Kitter, Erdkunde, vii. p. 763.)

SITHO'AIA ( $\Sigma, \theta$ wvin, Herod. vii. 123 ; Steph. B.; Virg. Bucol. x. 66; Hor. Carm. i. 1s. 9: Longos), the central of the three prongs which run out into the Aerean from the great peninsula of Chalcidice, forming a prolongation to the peak called Solomon or Kholomon. The Sithonian peninsula, which, though not so hilly as that of Acte, is not so inviting as Pallene, was the first, it appears, to be occupied hy the Chalcidic colonists. A list of its tomns is given in Chalcidice.
[E. B. J.]
sITIA, a place in Hispania Baetica. (Plin. iii. 1. \& 3.)
[T. H.D.]
SITIFI ( $\mathrm{Ei} \mathrm{i}_{1} \phi i$, Ptol. iv. 2. § 34), a town in the interior of Manretenia Caesariensis, situated in an extensive plain not far from the borders of

Numidia, and on the road from Cartlage to Cirta. (Itin. Ant.pp. 24. 29, 31, Xc.; comp. Amm. Mare. xxviii. 6.) At first, under the Numidian kings, it was but an unimportant place; but wider the Rotnan dominion it becane the frounter town of the new province of Numidia, was greatly enlarged nud elevated to be a colony; so that on the subsequent division of Mauretania Caesar. into two sualler provinces it became the capital of Mauretania Sitifensis. Under the dominion of the Vaudals, it was the capital of the district Zabé. (Záb $\quad$, Proeop, $B$. Foud. ii. 20.) It is still called Setif; and lies ujon an emmence in a delightful neighbourhood. Some roins of the ancient town are still to be seen. (Shaw's Travels, p. 49.)
[T. H. D.]
SITILLLA, in Gallia, is placed by the Taole on a road from Aquae Burmonis (Bourbon l' A rchatubault) to Puerioiunn, supposed to be Perrigni. Sitillia is xvi. from Aquae Bormonis and xiiii. from Pocrinium Sitillia is probably a place named Tiel. (I)'Anrille Notice, qu.)
[G. L.]
SITlociagus. [smacts.]
SITOAAGUS, a town of the Iceni or Simeni, in the E. part of Britannia Romana. (Itin. Ant. p. 480.) Camden (p. 456) identifies it with Thetford in Norfoll, whilst others seek it at Stowmarket, Southwold, and Saxmundhann. In the Tab. Peut. it is erroneousiy written "Sinomachus."
[T. H. D.]
SITONES, a pupulation conterminoas with the Suiones, from whon they differ only in being goveraed by a lenale: "in tantum non nodo a libertate sed etiam a servitute degenerant. Hic Sneriae finis." (Tax. Germ. 45.) The Sitonian locality is some part of Fiuland; probubly the northern lalf of the coust of the Gulf of Bothnia.

The statenient that they were under a female rule is explained as follows. The name by which the East Bothnian Finlanders designate themselves is Kainu-laiset (in the singular Kainu-lainen). The Swedes eall them (Lraens (Kvains). The mediaeral name fur their country is Cojan-ia. Now qvinna in the Norse language $=$ woman, being oor words queen and quean; and in the same Norse tongue the land of the Uraens woold be Cvenu-lond; as it actually is, being Cwaen-land ( (eween-land) in AngloSaxon. Hence the statement of Tacitus arises out of information concerning a certain Cwaen-land, erreneously considered to be a terra feminarum, instead of a terra Qutenorum. The reader who thinks this fancifol shonld be informed that in Adam of Bremen, writiug in the 12th centory, when the same country cones under notice, the same confusion appears, and that in a stronger form. The Sitonian country is actually terva fiminarum. Nore than this, the feminute beemne dmazons: "cirea haee litora Baltici maris fermut esse Amazonas, quod nunc terra feminarum dicitur, quas aquae gosto aliqui dieunt concipere.... Hae simul viventes, spernunt consortia virorom, qquos etiam, si advenerint, a se viriliter repellunt," c. 228. (Zenss, Die Deutschen, get, s.v. Kivenen.)

It is wortb noticing that Kivg Alfred's locality of the Covenas is, in respect to their relations to the Srias, exactly that of Tacitus,- Ceena-land succeeding Scea-land.

The Sitones seem to have been the ancient representatives of the Fiuns of Fiuland,- the Fenni of the ancieots being the laps. This is not only what the words Sitones and Qvaen suggest, but the inference from the word Fenni also. To the Finlander, Fin is a strange name. The Swede calls him Qvaun;

## SMYRNA．

he calls himself Suoma－lainen or Ilamelainen．On the other band，it is the Lap of Finmark that is called a Fin，and it is the Norwegian who calls him so．［Fexsi．］
［R．G．L．］
SITTACE（ェıテтákๆ，Ptol．vi．1．§ 6），a town of ancient Assyria，at the southern end of this province， on the raad between Artemita and Sasa，（Strah， xvi．p．744．）It is called Sitta（ （xvii．110）．It was the capitall of the district of bittacene，which appears to bave been ealled in later times Apolloniatis（Strab．xi．p．524），and which adjoined the province of Susis（xx．p．732）．Pliny， who gives the district of Sittacenc a mure northerly direction，states that it bore alse the names of Arbe－ litis and Palaestine（vi．27．s．31）．It is probably the same eountry which Cuitius calls Satrapene （v．2）．

SITTACE＇NE．［Sittice．］
SIT TUCATIS（ェitróкатıs，Arrian，Ind．с．4），a navigable river，which，according to Arrian，flowed into the Ganges．It has been conjectured by Man－ nert that it is the same as the present Sind，a tributary of the Juma，near Rampur（r．pt．i．p． 69）．
［V．］
SIUPII（さtov́ $\phi$ ．Herod．ii．172），a town of the Saitic nome in the Delta of Egypt．It does not ap－ pear to be mentioned by any other writer besides Herodutus．
［T．H．D．］
SIVA（ 氵íova），a town in the prefecture of Cilicia in Cappadocia，on the road from Mazaca to Tatium， at a distance of 22 miles from Micacu．（l＇tol．v． 6 s 15：Tab．Peut．）
［L．S．］
sMARAGDL＇S MUNS（ $\Sigma \mu \alpha ́ p a \gamma \delta o s ~ o ́ p o s, ~ P ' t o l . ~$ iv．5．§ 15），was a portion of the chain of hills which runs along the western coast of the Red Sea from the Heroopolite galf to the strnits of Bab－el－Man－ deb．Between lat． $24^{\circ}$ and $25^{\circ}$ in this range is the Mount Smaragdus，the modern Ijebel Zabareh， which derived its name from the emeralds found there，and early attracted by its wealth the Aegyp－ tians into that barren region．The priaciyal mine was at Djebel－Zabarch；but at Bender－el－Sogheir to N．．and at Sekket to S．，each a portiun of Musut Sinaragdus，there are traces of ancient mining ope－ rations．Small emeralds of an inferior quality are still found in this district．（Mannert，Gengraph． vol．x．p．21．）Strabo（xvii．p．815）and Plany （ $x \times x$ vii．15．s．I6）mention the wealth obtanned from these mines．At Sekket tbere is a temple of the Ptulemaic era；but the mines were known and wrouzbt at least as early as the reign of Amunoph III．in the 18th dynasty of the native kings of Aectpt．

SHENLS．［Laconia，p．114，b．］
amila．［Uronsala．］
 Snypra or Izmir），one of the most celebrated and most flourishing cities in Asia Ninor，was situated on the east of the muth of the Iemmus，and on the bay whicb received from the city the name of the Smyr－ namus Sinus．It is said to have been a very ancient town tounded by an A nazon of the name of simyrna， who had previntily conquerod Ephesns．In con－ sequence of this Singria was regarded as a colony of Ephesus．The Ephesian colonists are said after－ wards to have been expelled by Aevlians，who then occupied the place，until，aidet by the Colnghomians， the Ephesian colnists were enabled to re－establish themselves at Sinyros．（Strah．xiv．p．633；Steph． B．a．v．；Plin．v．31．）Herodotu，on the other hand （i 150），states that Smyrna originally belunged to
the Aeolians，who admitted into their city some Colophonian exiles；and tbat these Colophonians afterwards，duning a lestixal which was celebrated outside the town，made themselves masters of the place．From that time Smyrna ceased to be an Aedian city，and was received into the Ionian con－ federacy（Comp．Paus，vii．5．§ 1．）So far then as we are guided by anthentic history，Smyrra belonged to the Aeolian confederacy until the year n．c． $6 \times 8$ ． when by an act of treachery on the part of the Colophonians it fell into the bands of the Ionians， and became the 13 th city in the Ionian Leagne． （Herod．l．c．；l＇aus．l．e．）The city was attacked by the Lydian king Gyges，but successfully resisted the aggressor（Herod．i．14：Yaus．ix．29．§ 2．） Alyattes，however，about 15．C． 627 ，was more suc－ cessful；he took and destroyed the city，and hence－ forth，fur a periud of 400 years，it was deserted and in ruins（Herod．i．16；Strab．siv．I．646）， though some inhabitatits lingered in the place，laving $\kappa \omega \mu \eta \delta \partial \nu$ ，a is stated by Strabo，and as we must infer from the fact that scylax（p． 37 ）spraks of Sinyrna as still existing．Alexander the Great is said to have formed the design of rebuilding the city （Paus．vii．5．§ 1）；but he did not live to carry this plan into effect；it was，however，undertaken by Antignons，and finally completed by Lysimachus． The nem city was not built on the site of the ancient one，but at a distance of 20 stadia to the south of it， on the southern coast of the bay，and partly on the side of a hill which Pliny calls Mastusia，but prin－ cirally in the plain at the foot of it extending to the sea．After its extension and embellishment by Lysinachus，new Smyrna became one of the mnst magnificent cities，and certainly the finest in all Asis Minor．The streets were handsome，well paved， and drawn at right angles，and the city contained several squares，porticues，a public library，and numerons temples and other pablic buildings；but one great drawback was that it had nu drains． （Strab．l．c．；Marm．Oron．n．5．）It also pus－ sessed an excellent harbour which could be closed， and contiuyed to be one of the wealthiest and most flourishing commercial cities of Asia；it after－ wards became the seat of a consentns juridicus which embraced the greater part of Aeolis as far as Magnesia，at the fout of Mount Sipylus．（Cic．p． Flaec．30；Plin．v．31．）Daring the war between the Rumans and Mithridates，Smyina remained faithful to the former，for whiwh it was rewarded with various grants and privileges．（Liv，xxxv．42， xxxvii．16，54，xxxviii．39．）But it afterwards suffered much，when Trebonius，one of Caesar＇s murderers，was besieged there by Dolabella，who in the end took the city，and pat Trebonius to death． （Strab．b．e．，Cic．Phit，xi．2；Liv．Epit．119；Dion Cass，xlvii．29．）In the reign of Tiberjus，Sinyma had conferred upon it the equivocal heneur of being allowed，in preference to sevetal other Aviatic citiey， to erest a temple to the emperor（Tac．Ann．iii．63， iv．56）．During the years A．D．178 and 180 Smyma suffered much from earthquakes，but the ewperor M．Aurelius did much to alleviate its sufferings（Dion Cass．Ixxi．32．）It is well known that Sinyma was noe of the places clainning to be the bi thplace of Ilomer，and the Smyrnaeans them－ selves were so strongly convinced of their right to clam this honour，that they erected a temple to the great bard，or a＇Oんhipewv，a splendid edifice con－ taining a statue of Homer（Strab．L c．；Cic．p． （1．ch．8）：they even showed a cave in the neigh－
bourhood of their city，on the little river Meles， where the poet was said to have composed his works． suyrna was at all times not only a great commercial place，but its schools of rheturic and philosoplyy also were in great repute．The Christian Church also flourished through the zeal and care of its first hishop Polycarp，who is said to have lieen put to death in the stadium of Sinyma in A．D． 166 （Iren． iii．p．176）．Under the Byzantine emperors the city experienced great vicissitudes：having been occupied by Tachas，a Turkish chief，about the close of the 11th century，it was nearly destroyed by a Greek fleet，commanded by John Dueas．It was restored， huwever，by the emperor Commenus，but again sub－ jected to severe sufferings during the siege of Ta－ merlane．Not long after it fell into the bands of the Turks，who have retained possession of it ever sinec．It is now the great mart of the Levant trade．Of Old smyma only a few remains now exist on the north－eastern side of the bay of Sinyrna； the walls of the acropolis are in the ancient Cyclopean style．The anciont remains of New Stoyma are more nnmerous，especially of its walls which are of a solid and massive construction；of the stadium between the western gate and the sea，which，how－ ever，is stripped of its marble seats and decorations； and of the theatre on the side of a hill fronting the bay．These and otber remains of ancient buildings have been destroyed by the Turks in order to obtain the materials for other buildings；but numerous remains of ancient art have been dug out of the ground at Smyrna．（Chandler＇s Travels in Asia，pp．76，87； Prokesch，Denkwürdigkeiten．i．p．515，foll．；H：a－ milton，Researches，i．p．46，foll．；Sir C．Fellows， Asia Minor，P．10，full．）

COLN OF SMYRNA．
 called the bay of Hermus（＂Eputios кó入тоs），from the river Hermus，which flows into it，or the bay of Meles（Me入ŋ́тou к．），from the little river Meles，is the bay at the head of which Smymna is situated． From its entrance to the head it is 350 stadia in length，but is divided into a larger and a smaller hasin，which have been formed by the deposits of the Hermus，which bave at the same time much nar－ rowed the whole bay．A person sailing into it had on his right the promontory of Celaenae，and on his left the headland of Phocaea；the central part of the bay contained numerous small islands．（Strab． xiv．p． 645 ；Pomp．Mela，i．17；Vit．Hom．2； Stepb．B．s．v． $\mathbf{\Sigma} \mu u^{\prime} p \nu a$ ．）
［L．S．］
SOANAS（इoduas，Ptol，vii．4．§ 3），a small river of Taprobane（Ceylon），which flowed into the seat on the western side of the island．Lassen（in his map）calls it the Kilau．On its banks lived a people of the same name，the Soani．（Ptol．vii． 4．§ 9 ．）
［V．］
SOANDA or SOANDUM（乏́́avôa or ミ́ávóov）， a castle of Cappadocia，between Therma and Sacoena．（Strab．siv．p． 663 ；It．Aut．p．202．）The
same place seems to be alluded to by Frontinus（iii． 2．§ 9），who calls it Suend．Hamilton（Rescurches， ii．p．286，foll．）identifies it with Ssughanli Dere，a place situated on a rock，about 8 miles on tho south－west of Karahissar，but other geopraphers place it in a ditterent locality．
［L．S．］
SOAS，［Sonts．］
SOATRA（इ́arpa），or probably more correctly Savatra（之aíatpa），as the name appears on coins， Wats an open town in Lycaonia，in the neighbour－ hood of Apaneia Cibotus，on the rand from thence to Lanliceria The place was badly provided with water（Strab，siv．p． 668 ：Ptol．v． $4 . \S 12$ ；Hierucl． p． 672 ；Tab．Peut．），whence thavellers are inelined to identify its site with the place now called $S_{u}$ Ver－ mess，that is，＂there is no water here．＂［1．S．］
soAtraf，a town in Lower Muesia（Itin．Ant． p．229）．variously identified with Pravadi and Kiopikeni．In the Tab．Prut．and by the Gengr． Kav．（iv，6）it is callel Scatrae［T．H．D．］
 eavtern coast of llindustan，mentioned in the Peri－ Ilus（p．34）．It is probably the same as the modern Subras，between Pondicherry and Madras．（See Lassen＇s map．）

SUCANAA or SOCANDA（इwkaváa or इwkav－ oa），a small river of Hyreania，noticed by l＇tolemy （vi．9．§ 2）．It is probably the present Gurgan．Ann－ mianus Marcellinus speaks of a place called Socun－ da，on the shotes of the Hyrcanian or Caspian sea （sxiii．6）．
［V．］
so＇CRATIS I＇NSULA（玉ぃкрátoos $\nu \hat{\eta} \sigma o s)$ ，an island of the Sinus Arabicus（Red Sea）．placed by Ptolemy（vi．7．§44），who alone inentions it，in long． $70^{\circ}$ ．lat． $16^{\circ} 40^{\prime}$ ，and therefure off the N．coast of his Elisari，the Sabaei of other geugraphers， $30^{\prime}$ east of his Accipitrum Insula（＇I $\epsilon \rho \dot{\rho} / \kappa \omega \nu$ ）and 2020 south of them．They are probably identical with the Farsan islauds，of the E．I．Company＇s Chart，described by commanders Moresby and Elwon， in their Sailing Directions for the Red Sea，as＂the largest all along this coast，situated upon the ex－ tensive banks west of Gheeson．They are two in number，but may be considered as forming ons： island，being connected by a sandy spit of shoal－ water，across whicb camels frequently pass from one to the other．＂The westermost is Farsan Kebeer（ $=$ the greater）， 31 miles in length，extend－ ing from lat． $16^{\circ} 35^{\prime}$ long． $42^{\circ} 13^{\prime}$ to lat． $16^{\circ} 54^{\prime}$ long． $41^{\circ} 47^{\prime}$ ．Farsan Segycer（ $=$ the smaller）is，on its NE．side， 18 miles in length，and extends to lat． $17^{\circ} \frac{1}{2}$＇：their wholo breath is only 12 miles．The land is of considerable beight，interspersed with some plains and valleys：the hilly parts are coral ruck（pp． 38,39 ；C．Miller，Tubulae in Geog．Graec．Min，tab． viii）．In other comparative atlases，alopted by Arrowsmith，the modern name is given th Kotumbrib Is．，considerably to the N of the Farsan described by the same writers as lying only 2 miies from the main，a small inland about $\frac{1}{2}$ a mile in lencth and therefore not likely to lave been noticed by 1＇tolemy， who obriously mentions only the more important． （Sailing Directions．p．50．）Mannert identifies the Socratis Insula with Niebuhr＇s Firan，where the traveller says the ihhabitants of Lole ia have a pearl fislsery．This name does not occur in the＂Sailing Directions，＂but is probably the same as Furson． （Mannert，Geographic von Arabien，p．49：Niebuhr， Description de l＇Arabie，p．201．）［G．W．］
socunda．［Sucanaa．］
SODOM（тà ミíjopa，Strab．xv．p．764；Steph．B．
s. $r$.; Sixlumn, ortun, Tertul. Apoloy. 40; Soulana, -ae. Sever. Stlp, i. 6 ; Sedul. Carm. i. 105; Sodoנиun, Suliu. 45. §8; Sodenni, Tertull. Carm. de Simfon. 4), the instumus city of Caatan situated war the lead Son in an excoedingly rieh and fraitful country, called in its carly history "the plain of Judan ${ }^{4}$ and described as " well watered everywlam. before the Lord destroyed sondons and domornah, even as the garden of the laml, like the lant of Eityt, ats thon comest to Zoar." (fien. xiii. 10-12.) It is also reckumed one of "the rities of the plain" (xiii. 12. xix. 29), and was probably the eapital of the l'entapolis, which consisted of Sodom, Gumorrah, Admah, Zaboiim, and Bela, afterwards Zoar (Deut. xxix. 23 ; Gen. siv. 8, aix. 22), all of which towns, however, had their several petty kingh, who were confederate together against Chedorlaoner king of Flam and his three allies, Amraphel king of Shinar, Arioch kiog of Ellasar, and Tidal king of nations. Afuer Chedorlamer hat succeeded in reduciag these suvereigns to suljection, they served lim twelve years; in the thirteenth year they revolted, and in the fourteenth year were again vanquished by their northern enemies, when the conquerors were in their tum defented by Abraham, whose nephew I, ot had been carried captive with all his property. The sucred historian has preserved the names of form of the petty kmgs who at this time ruled the cities of the plain, viz. Bera of Sodon, Birsha of Gomorrah, shinab of Admah, and Shemeber of Zeboinn ; and the sceme of the engagement wis the vale of Siddim, which is the salt sea " (Gien, xiv.), an expression which seems clearly to imply that the battle-field. at least, was subsequently subinerged; the admission of which fact, however, would not iavolve the cuasequence that ne lake had previously existed in the plain; although this tuo may be probably inferred from the earlier passage already cited, which seens to descrite a wide plain watered by the river Jorilan, as the plain of Egypt is imgated by the Xile: and as this vale of Siddim was fall of slime-pits (beds of litumen), its subsidence naturally formed the Asplalt Lake. The catastrophe of the cities, as desctibed in the sacred narrative, does not certainly convey the idea that they were submerged, for fire and not water was the justrument of their destruetion (Gen. xix.; S. Jude 7); so that the cities need not necessarily have been situated in the middle of the ralley, but on the sloping sides of the hills which eonfined the plain, from which they would still be appropriately denominated "cities of the plain." (leland, l'aluestina, p. 255.) This is remarked in order to ranove what has been regarded as a fundamental nibjection to the hypotheses of a late traveller, wha clams to dave recovered the sites of all the cities of the l'entatpris, which, as he maintains, are still makked by very considerable rmins of furner habitations. Whatever value may be attached to the ilentification of the other four, there is little doobt that the site of Solon is correctly fixed near the month-western extremity of the lake, where the mudern mative name l'sdom or Essdon, containing all the radiats of the ancient mane, is attached to a plain and a hill (otherwise called Khashm or Jebel-t-, Milhh, i. e. the salt hill). which consequently lats long lreen renatrded as marking the site of that atcursed city. This singular rikge has been several times explored and deseribed by modern travellers, whose testimony is collected ansil confirmed by Dr. Inhinson (Bibi. hes, vol. ii. p. 481-48:3); but it was reserved for the diligence or inatrination of N . de

Sauley to diseover the extensive thleris of this antcient city, covering the small plaio and nuands on the north and north-east of the salt-ridere, and extending along the bed of II'ady Zumeduh (I'ayrege cutour de le Wer Morte, vel. ii. pp, 7 I (4). On the other side of the question M. Van de Velde is the latest autbority. (Sim-ite and Paleative in 185 J and 18.52 , pp. 114. 115, note). Lieut. Lynch, of the American explorting expedition, has given a striking view of this salt motuntain, illustrative of his description of the vieinity of Usdom. (Firperlition to the Dead Sert, 1.3. 306-308.) [G.W.]

Sol)liAE ( $\sum \dot{0} \delta \rho a i$ ), a tribe met with by Alcxander the Great in the lower Panjeib, near Pattalene, according to Diodorus (xvii. 102). The natne is probably of liadian origin, and may represent the caste of the Siubras.
$\mathrm{SOGDI}\left(\mathrm{S}_{\mathrm{N}}^{\mathrm{j}} \overline{\delta 04}\right)$, one of the smaller tribes noticed by Arrian (Anab. vi. 15) as encountered by Alexander in the lower Panjub. By their name, they would appear to represcat an immigration from the north.
[V.]
SOCiDIANA (方 p. 516; l'tol. vi. 12, \&.c.), a widely extendiné district of Central Asia, the bounduries of which are not consisteatly laid dawn by aneient authors. Generally, it may be stated that Sogdiana lay between the Oxus and the Jaxartes, as its N . and K . limits, the former separating it from Baetriana and Ariana, the latter from the nomad populations of Scythia. (Strab. xi. 1P. 511, 514; P'tol. vi. 12. § 1.) To the W. the province was extended in the direction of the Cispian sea, lut, in early times at least, not to it; to the E. were the suene and the Seres. The district comprelended the kreater jart of the present Turkestun, with the kingdom of Bukhara, which bears to this day the name of simgl. The character of the country was very diversitied; some part of it beine very mountainous, and some Part, is the walley of Bukhora, very fertile and pro. ductive. The larger extent would seem to have been, as at present, a gleat waste. (Arrian, Anab. iv. 16 ; Curt. vii. 10. \& 1.) At the time when Alexander visitel the country, there appear to have been extensive forests, filled with all mamer if game, and surmunded, at least in some parts, with walls, as preserves. Alexamier is said to hase Junted down 4000 wild beasts. (Curt. viii. 1. § 19.)

The primipal mountain clanins are those calied the Jontes Osii to the N. (at jresent the I'amer Hountuins,) the Comedarmm Montes (probably the range of the $A k$-qught or Jr/hite Mountrius) to the S., and the Nontes sugdii (tho moriern name of which is not certain, there being a doubt whether they comprchend the belar-tagh as well as the सara-lagh). The two great rivers of the cwanty were thone which formed its boundaries; the Oans (Gikon or Anu-Durju) and the Juxartes (sikon or $\Sigma_{y r-1 \text { (rrya) }}$. There are, also, besides these main streams, setyernI smaller ones, feeders of the great rivers, as the Demus, Bascatis, and the Polytimetus, the latter, donbtless, the struam which flows beside the town of Sugrl. The generic name of the inhabilants of Sogdtama is Sucdii or Sogdiani (Arrian, iv. 16, 18: Plin. vi. 16 ; Curt. iii. 2. \& 9 , \&c.), a race who, as is stated by Strabo (xi. p. 517), appear, in character at least, to have bonne a great resemblance to their nejghbours of Bactriana. Besides these, l'foleny and other writers have given a list of other rames, - those, probably, of local tribes,
who occopied differeat parts of the proviuce. Many of these show by the form of their name that if not directly of Indian denceot, they are clearly coonected with that country. Thus we have the l'asicae, near the Montes Oxii ; the Tbacori (Talurs) on the Jaxartes; the Oxydrancae, Drybactae, and Gandari (Giandhiras), under the mountains; the Mardyeni (Ifoulras), Chorasmii (Khroaresmians), near the Osus; and the Cirrodes (Kiratas) near the same river: (Wilson, Ariana, p. 164.)

The historians of Alexander's march leave us to suppose that Sogdiana abourded with large towns; but many of these, as Professor Wilson has remarked ( $l . c$.), were probably little more than forts erected along the lines of the great rivers to defend the country from the incursions of the barbarous tribes to its N. aod E. Yet these writers must have had good opportonity of estimating the force of these places, as Alexander appears to have been the best part of three years in this and the adjoining province of Bactriana. The principal towns of which the names bave been handed down to as, were Cyreschata or Cyrepolis, on the Jaxartes (Steph. B. s. v. ; Curt. vi. 6) ; Gaza (Ghaz or Ghazna, Iba Haukíl, p. 270); Alexandreia Ultima (Arrian, iii. 30; Curt. l. c.; Amm, Marc. xxiii. 6), doubtless in the neighbourhood off, if not on the site of the present Khojend; Alexandreia Oxiana (Ptol. vi. 12. § 5; Stepb. B. s. v.); Nautaca (Arrian, iii. 28, iv. 18), in the neighboarhood of Karshi or Naksheb; Branchidae (Strab. xi. p. 518), a place traditioually said to have been colonised by a Greek population; and Marginia (Curt. vii. 10. § 15), protably the present Marghinan. (Droysen, Rhein. Mus. 2 Jabr. p. 86; Mannert, iv. p. 452 ; Burnes. Travels, i. p. 350; Memoirs of Bibcr, p. 12; De Sary, Notices et Extraits, iv. p. 354 ; Thirlwall, Hist, of Greece, vi. p. 284.)
[V.]

## soginll Muntes. [Sogdina.]

sOGIU'NTII, an Alpine people mentioned by Pliny (iii, 20, s. 24). Nothing but resemblance of name gires us any iadication of the position of many small mountain tribes, bat the names remaio frequently very little changed. The position of the Sugiuntii is conjectured to be shown by the name Sauze or Suaclies, NE of Briançon in the department of Hautes Alpes. But this is merely a guess; and even the ortbograplyy of the name Sugiuntii is not certain.
[G. L.]
SULE, a small town in the interior of Hyreania, mentioned by Ammianas (sxiii. 6).
[V.]
SOLEN ( $\Sigma \omega \lambda \neq \eta$, Ptol. vii. 1. § $\$ 10,34$ ), a small river of S . India, which has its sonrces in M. Bettigo, and flows thence into the Sinus Colchicus or Gulf of Manaar. It is not certain which of two rivers, the Vaiparu or the Tamraparni, represent it at present: Lassen inclines to the latter.
[V.]
Sul.ENTA. [Onixnta Ixstra.]
SOLENTUM. [Soles.]
SOLETUM (Soleto), a town of Calabria, situated in the interior of the lapygian peninsula, about 12 uniles S. of Lupiae (Lecce). It is mentioned only by Pliny, in whose time it was deserted ("Soletum desertum," Plin. iii. 11.s. 16), but it must have been again inhatited, as it still esists under the ancient name. That the modern town occupies the ancient site is proved by the remains of the ancient walls which were still visible in the days of Galateo, and indicatel a turn of considerable maguitade (Galateo, de Sit. Lapgg. p. 81 ; Romanelli, vol.ii.p.26.) [E. H. B.]

portant town on the coast of Cilieis, between the mouths of the rivers Lamus and Pyramus, from each of which its distance was aboat 500 stadia. (Strab. xiv. p. 675 ; Stadusm. Mar. Mag. \& 170, \&\%.) The town was founded by Argives joined by Lindians from Rhodes. (Strah, xiv. p. 67t ; Pomp. Mela, i. 13; Liv. xxxvii. 56.) It is first mentioned in history by Xedophon (Anab. i. 2. § 24) as a maritime town of Cilicia; it rose to such ophalence that Alexander the Great conld fine its citizens for their attachment to Jersia with 200 taleuts. (Arrian, Anab. ii. 5. § 5; Curt. iii. 17.) Daring the Sithridatic War the town of Soli was taken and destroyed by Tigranes, king of Armenia, wlio probably transplanted most of its inluabitants to Tigranocerta. (Dion Cass. xsxvi. 20; Plat. Pomp. 2s; Strab. xi. p. 532) But the place was revived by Pompey, who peopled it with sume of those pirates who had fallen into his hands, and changed its name into Pompeiupolis. (Hounचïoúroגts, Plut. l. c.; Strab, xiv. p. 671 ; Appian. Mithr. 105 ; Ptol. v. R. \& 4: Plin. v. 22; Steph. B. s. v.: Tac. Ann. ii. 58; Hierocl. p. 704.) Sili was the birthplace of Chrssippas the philosopher, and of two distinguisbed poets, Philemon and Aratus, the latter of whom was believed to be buried on a hill near the town. The Greek inbabitants of Soli are reported to lave spokeo a very corrapt Greek in consequence of their intercourse with the natives of Cilicia, and hence to have given rise to the term solvcism ( $\sigma$ o入oust $\sigma \mu \sigma$ ), which has foond its way into all the langnages of Europe; other traditions, however, connect the oricin of this term with the town of Soli, in Cyprus. (Diog. Laert. i. $2 . \S 4$ : Eustath. ad Dion. Per. 875 ; Suid. s. v.玉ódos.) The locality and the remains of this ancient city lave been described by Beanfort (Kuramuniz, p. 261, foll.). "The first object that presented itself to us on landing," says he, "was a beautiful harbour or basin, with parallel sides and circalar ends ; it is entirely artificial, being formed with surrounding walls or moles, which are 50 feet in thickness and 7 in height. Opposite to the entrance of the harbour a portico rises from the surrounding quay, and opens to a double rotr of 200 columns, which, crossing the town, communicates with the principal \&ste towards the country. Of the 200 columns no more than 42 are now standing; the remainder lie on the spot where they fell, intermized with a vast assemblage of other ruined buildings which were connected with the colonnade. The theatre is almost entinely destroyed. The city walls, strengthened by numerous tuwers, entirely surrounded the town. Detached rains, tombs, and sarcophagi were found scattered to some distance from the walls, on the outside of the town, and it is erident tbat the whole conntry was mise occulied by a numerous and industrions prople." The natives now eall the place Mesetlu. (Comp. Leake, Asio Minor, p. 213, foll.) The little river which passed thruagh Soli nas callod Liparis, from the vily nature

CUIN OF SOLI.
of its waters. (Vitruv, viii, 3: Autic. Caryst. 150; I'lin. l. c.) I'liny (xxxi. 2) mentions bituminuns sprines in the vicinity, which are reperted by Reanfort to exist at Bikhordy, about six hunrs' walk to the north-east of Mestlu.
[L. S.]
SOLI or SOLOE ( Sinou, Ptol, v. 14. § 4), an important seaport town in the W. part of the N. coust of Cyprus, situated on a suall river. (Strab. xiv. p. 683.) According to llutarch (Sol. 26) it was founded by a mative prince at the suggestion of Sulon and named in honour of that legislator. The sojourn of Sohon in Cypres is mentioned by HeIndotas (v. 113). Other acconnts, lowever, make it an Athenian settlement, founded under the auspices of lhalerus and Acamas (Strab. l.c.), or of Demophon, the son of Thesens (1'iut. l. c). We learn from Strabo ( $l, c$.) that it hal a tenuple of Aplorodite and one of lisis; and from Galen (de Simp. Med. ix. 3, 8) that there were mines in its neighborrhoud. The inhabitants were called solii ( $\mathbf{\Sigma} \dot{\boldsymbol{j}} \lambda 201$ ). To distinguish them from the citizens of Soli in Cilicia, who were ealled इokeís (Diong. Laert. I. Solon, 4). According to Fococke (ii. p. 323), the valley which sorrounded the city is still called Solea; and the ruins of the town itself may be traced in the vill.uge of 4 ligorn. (Camp. Aesch Pers. 8x9; Scyl. p. 41: Stadiuam. M. Magni, § 295, seq.; Const. Porphyr. de Them. i. p. 39, Lips.; Herocl. p. 707, \&e.).
[1.H.D.]
soliA. [Abae Mh.sperd.]
solhel'NiUB, a town in the Agri Decumates, in South-weatern Germany, on Mount Pirus, where Valentinian in A. D. 369 gained a victory over the Alemanni. (Ainra, Marc. xxvii. 10, xxviii. 2, xxx. 7.) A varicty of conjectures have been made to identify the site of the town, but there are no positive criteria to arrive at any satisfactory conclusion.
[L.S.]
soLtMARIACA, in Gallia, is placed in the Antonine Itin. on the road from Andomatonom (Langres) to Tullan Lencorum (Toul), a ad nearly half-way between Mosa (Mense) and Tullum. There is a place named Soulosse, which in name and in position aserees with Solimariand. "The trace of the Roman road is still marked in several places by its eleration, both on this side of Soulosse and beyond it on the road to Tonl." (D'Anville, Notice, ge.) [G. L.]

SULIMNtA, a shall island of the Aegaean sea, off the coast of Thessaly, near Scopelos. (Plin. iv. 12. 8. 23.)
solts 1 NSULA (1'lin, vi. 22. s. 24), an islamel mentioned by Pliny betwere the mainland of Indios and Crylun, in the strait. There can be no doubt that it is the present Ramiseram Cor, famous for a temple of Rami. It bore also the name of K $\bar{\omega} p \mathrm{u}$ [Cons.]
[V.]
SOLIS FoAS. [OAsis, p. 458.]
SoLIS Po)kTUS ('HAiov $\lambda t \mu \eta \nu$, I'tol. vii. 4. § 6). a hathour tear the SE. corner of Taprolan (Ceylon). It has bexal conjectured by Forbiger that it is the present J'endelusbai,-- a name we do not discover on the bust mapos Its penitimb, sonth of the Malear momutains (Achen's I'rak) , is certain.
[V.]
 "Sacras solis extrema," a promontory of the eas" const of Arabia at the smuth of the Persian gulf. between the month of the river Lar and Rherma, in the country of the Nariti. (I'tol. vi. 7. § 14.) [Latis: Lingima.]
[6. 11.$]$
 on the coast of Acarnama, on the Ionian sea.

1 Is exact site is uncertain, but it was probably in the neighbourhood of Palaeros, which lay between Leacas and Alyzia. [Palakmes.] Leake, however, places it S. of Alyzia, at Strovolimiona (i.e. I'n't Stravo). Sollinm was a Corinthisn cology, and as sach was taken by tho Atheoians in the first year of the Pelopumesian War (n, c. 431), who gave both the place and its territory to Palaerus. It is again mentioned in 15. ©. 426, as the place at which Denusthenes landed when he resulved to invade Aetolia. (Thac, ii. 30, iii. 95, comp. v. 30; Steph. B. s. v.; Leake, Northern Greece, vol. iv. p. 18, seq.)
sOLMISsUS ( rising abrive the grove of Leto, where the Cureles, by the lond nuise of their arms, prevented Hera froun hearing the cries of Leto when she gave birth to her twins. (Strab. xiv. p. 640.)
[L.S. S.]
SOLOBLATIS (En^óuatis, Arrian, Ind. c. 4), a river named by Arrian as one of the feeders of the Ganges. There has been much difference of opinim as to what modern stream this name represents. Mannert thinks that it is one of the affinents of the Jumna (v. pt. i. p. 69): while Benfey, on the other band, considers it not unlikely that under the name of Sulomatis lurks the Indian Sarasviti or Sarsooti, which, owing to its being lost in the sands, is fabled by the ladians to flow under the earth to the sput where the Ganges and Jumna juin, near Allahubad. (Benfey, art. Indien, in Ersch und Gruber, p. 4.)
[V.]
sol, o'NA (Eth. Sulonas: Cittio del Sole), a tuwn of Gallia Cispadana, mentioned only by Pliny anone the municipal towns of the 8 th region (Plio. iii. 1. s. 20), but the name of the Solonates is fonad alwn in an inscription, which confinss its manicipal rank (Grater, Inser. P. Io95. 2). Unfortunately this inscription, which was found at Ariminan, affurds no clue to the site of Solona: it is placed conjecturally by Cluver at a place called Citter del Sole abont 5 miles SW. of Forli: bat this site would seem two cluse to the important town of Forum Livii. (Claver. Ital. p. 291.)
[E. H. B.]
sULONIUM ( where C. Pomptinus defeated the Allobroges, B. E : 61. (1)ion Cass. xaxvii. c. 48; Liv, Epit. 103, where it is said, "C. Pontinius Prator Allobruges qui rebellaverant ad Stlonem (Solonem ?) domuit.") It has been conjectared that Soloniun is Sallonas, in the department of $A$ ir, near the small river Brivas; but this is mercly a guess. The narrative of Thom is useless, as usual, for determining anything with precision. Other gucoses bave been made about the position of Solurium ; one of which is too abourd to mention.
[G. 1.]
SOLOXILS AGER ( $\Sigma_{i n}$ annor, Plut.), was the name gixen to a district or tract io the plain of Latium, which appears to have bordered on the tewritories of (1)stia, Ardes, and Lanurinus. But there is some difficulty in deternuing its precise sitnation or limits. Cicero in a passage in which he speako of a prodigy that happened to the infant limenos, places it "in Solnio, qui est canopus agri Lansvini" (de Die, i. 36): but there are sume resauts to saspect the last words to be an interpolation. (ht the other hand, livy spealis of the Antiates as making incursions "in atrum Ostiensem, Ardeatem, Solonium" (viii, 12). Plutarch mentions that Marius retired to a villa that he pussessed there, when he was expelled from lome in B. . . . 8 ; and from thence repaired to Ostis. (1'lut. Mar. 35.) But
the mnst Jistinct indication of its locality is afforded liy a passage of Festus（s．v．l＇monol，p．250） where he tells ns＂Iomonal ext in agro Solonio， via Ustiensi，ad duodecimum lapidem，diverticulo a miliario octavo．＂It is thence evilent that the ＂ager Solonius＂extended westward as far as the Via Ostiensis，and probably the whole tract border－ ing on the territories of Oitia，Laurentun，and Arlea，was known by this name．It may well therefore have extended to the neighburhood of Lanuvium also．Cieero tells us that it abounded in snakes．（De Div．ii．31．）It appears from one of his letters that he had a villa there，as well as Ma－ rins，to which he talks of retiring in order to avoid contentinn at Rome（al Att．ii．3）．

The origin of the name is unknown；it may pro－ hably have been derived from some extinct town of the name；but no trace of such is found．Dionysius， mileed，speaks of an Etruscan city of Solonium， from whence the Lucnmo came to the assistance of Romulns（Dionys．ii．3i）；but the name is in all probability corrupt，and，at all events，cannot at－ ford any explanation of the Latin district of the name．
［E．H．B．］
soLO＇RIUS MONS，an offhoot of Mons Argen－ tarius，running to the SW．，on the borders of His－ pania Tarraconensis and Baetica，and connecting Mount Ortospeda with Mount Ilipulia．（Plin．iii． 1. s，2．）It is prubably the same mount：in mentioned hy Strabo（iii．p．156）as rich in gold and other mines，and the present Sierro Nevuda．［T．H．D．］

SO＇LUS or SOLUNTUM（ ¿o入óets，Thac．；氵． גovis，Diod．：Eth．इoגouvrivos，Diod．，but coins have Zoגovtivos；Soluntinus：Solento），a city of Sicily， situated on the N．const of the island，ahout 12 mile，E．of Panormus，and inmediately to the E．of the bold promontory called Capo Zaffarana．It was a Phoenician colony，and from its proximity to Panormus was one of the few which that people re－ tained when they gave way before the advance of the Greek colonies in Sicily，and withdrew to the NW．corner of the island．（Ihuc．vi．2．）It after－ wards passed together with Panormus and Motys into the hands of the Carthaginians，or at least became a depmency of that people．It contirued stealfast to the Cartbaginian alliance ev－n in b．c． 397 ，when the formidable armanent of Dionysins shook the filelity of most of their allips（Diod，xiv，48）：its lerntory was in consequence ravaged by Dionysius， but without effect．At a later period of the war （u．c．396）it was betriyed into the bands of that despot（ 15.78 ），but prabably soon fell again into the power of the Carthaginians．It was certainly onte of the cities that usually formed part of tbeir domitions in the island；and in B．C． 307 it was give：up by them to the soldiers and mercenaries of Agathocles，who had made peace with the Cartha－ ci：ians whea shandoned by their leader in Africa． （Diwd．xx．69．）During the First Punic War we find it still subject to Carthuge，and it was not till after the fall of Panormins that soluntum also opened its gates to the Romans．（Id．xsiii．p． 505 ．） It continued to subsist tader the Roman dominion as a municipal town，but apparently one of no great consideration，as its name is ouly slightity and occa－ sir nally mentioned by Cicero（Ferr．ii．42，iii．43．） But it is still noticed both hy Pliny and I＇tolemy （Plin．iii．8．s． 14 ；Ptol．iii．4．§ 3 ，where the name is corraptly written＇Oגou入（s），as well as at a later p －rioul by the Itineranies，which place it 12 miles from Panormns and 12 from Thermae（Tormiui）．
（Itin．Ant．p．91；Tab．Peut．）it is probable that its complete destruction dates from the there of the Saraceus．

At the present day the site of the ancient city is wholly desolate and uninhabited．It stoml on a lufty hill，now called the Monte Catalfino，at the font if which is a sinall cove or port，with a fort，sill called the Ciestello dil Solunto，and a station for the tomy fishery．The traces of two ancient ronads，paveif with large blocks of stone，which led ups to the city， may still be followed，and the whole sunmit of the hill is covereal with fragments of ancient walls and foundations of buildings．Ainong these may the traced the remains of two temples，of whish sone capitals，portions of friezes，\＆c．have been discovered； but it is impossible to trace the plan and deeign of tbese or aty other edifices．They are prolably all of them of the period of the Lioman dominion． Siveral citerns for water also remain，as well as sepulchres；and some tragments of aculpture of con－ siderable merit have heen discovered on the site． （Fazell．de Reb．Sic．viii．p．352；Amico，Lex．Top． vol．ii．14．192－195；Haare＇s Class．Tour，vol，ii． p． 234 ；Serra di Faleo，Ant，della Siciliu，vol．v．jue． 60－67．）

SOLIMI．［LYCIA．］
SOMENA．［Simeni．］
SONAUTIS，according to Pliny（vi．I），a river in Pontus；while，arcording to Apollonius Rhodius （ii．747），the Acheron in Bithynia was anciently called Soonautes（さowvaúrns）．
［L．S．］
SONEIUM，it place in Moesia Snperior，on the borders of Throce，at the pass of Mume Scomins， called Succi．（Itin．Hieros．p．567．）Identified with Bagna．
［T．H．D．］
SONISTA，a town in Upper Pannenia，on the road from l＇ontovium to Siscla．（Geog．Rav．iv．19； Tab．Peut．；It．Hieros．p．561，where it is written Sunita．）Its exact site is unknown．［L．S．］

SO＇NTIA（Eth．Sontinus：Sanza），a town of Lucania，known only from Pliny，who enumerates the Sontini among the municipal towns of that pro－ vince（Plin．iii．11．s．15）．It is probable that it is the same place now callesl Sunza，situated in the mountains about 12 miles N．of the Ciulf of Poli－ castro．
［1． 11 B ］

SO'NTIUS (Isonzo), one of the most considerable of the rivers of Venetia, which has its sources in the Alps, at the foot of the lofty $1 / t$. Terglou, and has from thence a course of ahove 75 miles to the sea, which it enters at the inmont bight of the Adratic. between Aquileas and the Tinasus. It revrives at the present day the waters of the Nutisone and Torre, the ancient Noriso and Terecis, both of which in ancient times pursued independent conrses to the sea under the walls of Aquicia, :mil from tho E. those of the Wippach or 1ipao, called by the ancients the Fluvils Fracibes. Thongh so impartant a streum, the name of the sontus is not mentioned by any of the geographers; but it is found in the Tabula, which places a stattion callerl Ponte Sunti (Ad Pontems Sintii) 14 miles from Aquileia on the highroad to Acmona (Loybuch). This bridga which lay on the main entrance into Italy on this side, was a military point of considerable importance. It checked for a tinge the march of the emperor Maximin when :ulyancing upon Aquileia, in A. D. 238 (Hlerodian, vii. 4: ('apit. Maximin. 22): and at a later period it was here that Odoacer took up his position to oqpose the alvance of Thend sius, by whom he was, however, defented in a decisive hattle, A. D. 489 (Cassoul. Chrou. p. 4ie; 1d. Var. i. 18 ; Jurnand. (iit. 57). The somtins is correctly described by Herodian, thangh he does not mention its name, as a large and formi table stream, especially in spring and summer, when it is fed by the meltiog of the Alpine stiotrs.
[E. H. B.]
sonts (ธîvos, Artian, Ind. c. 4; Plin. vi. 18. s. 22), a $1^{\text {nimipal affluent of the Gonges. which }}$ tlows in a NE. direction to it from the Tindlyas Monntains, Its modern name is Sorane. There is mo dombt that it has been contracted from the Sanscrit Surarna, arolden. The Soas (¿̂̂as) of Ptotemy (vii. 1. \& 30) is certanly the same river.

SOH'HENE ( ( $\omega \phi \eta \nu \eta$, Strab, et alii: $\mathbf{\Sigma} \omega \phi \alpha \nu \eta \nu \hat{\eta}$, 1) Ton Cass. xxxvi. 36 ; Prucop. de Aedif. iii. 2, B. I'ps. i. 21: Eth. $\Sigma(w \phi \eta \nu(s)$, a district of Armenia, hiug between Antitaurus and Mount Masins, sepabuted by the Euphrates from Melitene in Armenia Minor, and by Antatauras from Mesopotamia, Its capital was Carcathiocerta. (Nitrab. xi. pp. 521, 522,527 .) It formed at one time, with the nowgLouring districts, a separate west Armenian kingdon, governed by the Sophenim Artanes, but w:s amexed to the eave Armenian kingdom by Tigranes. Suthene was taken away from Tigranes by Pomper: (Strab, xi. p. 532 ; Dion Class, xxxvi. 26: Plat. Lucull. 24, F'omp. 33.) Niro gave Suphene as a separate kaugden to Sulatemus. (Tac, .Aun. xiii. 7.)

SOPIANAE, a town in the central part of Lower Pannmi:h on the road from Mursa to Sabaria (It. Ant. pp. 2331, 232, 264, 26i), was according to Ammianus Marcellinus (xxviii. 1) the birthplace if the emperor Maximinus. lis site is occupied by the molern Funfzirchen.
[L. S.]
city of La-
SORR. 1 (Expa: Fith, suranns: Sora), a city of La-
finn, situated in the valley of the Liris, on the rigbt time, sithated in the ralley of the Liris, on No rigat pimum. Tlowgh indodel in Latitu in the more extmided selse of that term, as it was anderstood muler the kounan Kompie, Som wats originally a Fihrian eity (Liv, x. 1), and apparently the mose notherly phasessed by that people. It was wrested froms them liy the Romans in n. c. 345 , being surfurised by a sudden attack by the consuls Fabius 1) wro and Ser. Salpicius. (Liv, rii. 2s.) It was subsequentiy oecupiod by the limans with a colony:
the estallishment of this is not mentioned by Livy, but in 1B. C. 315 he tells ns the inhabitants bail revalted and joined the Sammites, putting to death the Ronam colonists. (Id. ix. 23; Diod. xix. 72.) The eity was in evnsequence berieged by the ditator C. Fabius, and, nutwithstanding the great defeat of the lomans it Lautulae, the siege was continued into the fullowing year, when the city was at length taken by the consuls C. Sulpicius and M. Poetelins ; the citadel, which was in a very strong and inaccessibie position, being betrayed into their hands by a deserter. The leaders of the defection were sent to Rome and doomed to execution ; the other inhabitants were spared. (Liv. ix, 23, 24.) Sora mas now uccupied by a Roman parrison; but notrithstanding this it again fell into the hauds of the Samnites in B. C. 306, and it was not recovered by the Romans till the followine year. (1d. is. 43. 44; Divd. xx. 80, 90.) After the close of the Second Sunnite War it was ane of the points which the Nomans determined to secure with a colony, and a body of 4000 colonists was sent thither in B. c. 303. (Id. x. 1.) Frum this time sora became one of the ordinary " colonine Latinae " and is mentioned in the Second Punic War among the refractory colonies, which in 1s. c. 209 refusel any further contribations. (Liv, xxvii. 9, xxix. 15 . The text of Livy gives Cora in the first passige, and Sora in the second, bat the same place is necessarily meant in both passages, and it is prokable that Sora is the true reading.) From this time we hear little more of Sora, which lapsed into the condition of an ardinary municipal town. (Cic, pro Plenc. 9). Its rank of a Colonia Latina was merged in that of a municipinm by the Lex Julia; but it received a fresh colony under Augustus, consisting, as we learn frum an inscription, of a hody of veterans from the 4th legion. (Lib. Colon. p. 237; Plin. iii. 5. s. 9; Oreli. Inscr. 3681.) Juvetal spenks of it as a quiet country tosn, where houses were cheap (Juv. ini. 2.23); and it is mentioned by al: the geographers among the towns of this part if 1taly. (Strab. 5. p. 238 ; P'tul. iii. 1. ह\% 63; Sil. Ital. vili. 394; Orell. Inser. 397.2.) Nothing mue is heard of it under the Roman Eimpire, but at survived the fall of the Western Empire, and cantinued throaghout the muldle ages to be a place of cunsiletation. Sora is still an episcopal see, and moch the anest important place in this part of ltaly, with about 10,000 mhabitants. The mukern town undoubtally occupies the same site with the ancirnt one, in the plain or broad valley of the Liris, resting upon a bold and steep hill, crovned by the ruins of a mediaeral castle. The ancient citadel, descriled by Livy, stond on a hill at the back of this, called the fiucca di S. Angelo, where some remains of the ancicnt walls, constructed of massive polygomal hhaks, are still visible. No remains of Eomsn times are preserved, except a few inscriptions, and some foundations, supposed to be thinse of a temple. (Wimanelli, vol. iii. Pp. 362-366; Hoare's Clasvical Tour, vol. i. pp. 299-302.)
[E. H. B.]
SORA ( $\delta$ op o or इûpa), a town of l'aphagonia, noticed only by the latest writers of antiquity, and of unknown site. (Constant. Porpb. Them. i. 7; Notellae, xxix. 1: Ilierocl. p. 695; Conc, Nicaen. ii. p. 52; Conc. chalced. p. 664, where it is called sura.)
[L. S.]
sulh ( $£ \omega \hat{p} \alpha, \mathrm{Pt}$ ]. vii. 1.§ 68 ), a town in the souxhern part of India, betweer M. Bettigo and Adeisathron. It was the capital of a nomad race
called Sorae (Ptol. l. c.), and the royal revidence of a king named Arcates. The people are evidently the same as the Surae of Pliny (vi. 20, s. 23). Lassen places them in the mountains above M/adras (see map).
[ V.$]$
soracte (Monte S. Oreste), a monntain of Ftruria, situated between Falerii and the Tiber, about 26 miles N. of Rome, from which it forms a conspicuous object. It is detached from the chain of the Apeunines, from which it is separated by the intervening valley of the Tiber; yet in a geological sense it lelongs to the Apennine range, of which it is an eutlying offset, being composed of the hard Apennize limestone, which at once distinguishes it from the Mons Ciminns and the other volcanic hills by which it is surrounded. Though of wo great alevation, being only 2420 feet in height, it rises in t hold and abrupt mass above the surrounling plain (or rather tahle-land), which renders it a striking and picturesque object, and a conspicumus feature in all views of the Cumpagna. Hence the selection of its name by llorace in a well-known ode (Corm. i. 9) is peculiarly appropriate. It was consecrated to Apollo, who had a temple on its summit, prubably no the sane spot now occupied hy the mo1hastery of s, Silvestro, and was worshipped there with peculiar religious rites. His priests were supposed to possess the power of passing unharned through fire, and treading on the hot cinders with their bare feet. (Virg. Acn. vii. 696, xi. $785-790$; sil. Ital. v. $175-181$, vii. 662; Plin. vii. 2.) Its rugged and craggy peaks were in the days of Cato still the resort of wild goats. (Varr. ỉ. R. ii. 3. §. 3.)
soracte stands about 6 miles from Civita Castellama, the site of the ancient Falerii, and 2 from the Tiber. It derives its modern appellation from the village of Sant' Oreste, which stands at its S. cxtremity on a steep and rocky bill, forming a kind of step or ledge at the foot of the moro elevated peaks of Suracte itself. This site, which bears evident signs of aucient habitation, ia supposed to be that of the ancient Feronia or Leces Feroniae. (Dennis's Etruria, vel. i. p. 179.)
[E. H. B.]
SORBIODU'NUSI, or SORVIODU'NUM, a town of Britamia Romana, in the territory of the Belgae. (Itin. Ant. pp. 483, 486.) It is identified with O!d Sarum, where coins of several Roman emperors have been found, and where the traces of the ancient Roman walls show it to have been about half a mile in circumference. (Camden, p. 113.) [T.H.D.]

SoldDICE, a lake in Gallia. A river Sordus ran ont of the E'tang Surdice, in the conntry of the Sordones or Sordi. [Surdones.]

> "Stagnum hic palusque, qnippe diffuse patet, Et incolae istam Sordicen cognominant."
(Avienus, Or. Mar., as I. Vossius reads it.)
The Sordice is supposed by some geographers to be the E'tang de Lencate; but others take it to be all étang firther south, called E'tang de St. Vasaive, and the E'tang de Lencate to he that near Salsulae, whieh is described by Strabo, Mela, and others. [silsulae; Ruscisi.]
[G. L.]
SORDONES, or SARDONES, as the name has sometimes been written, a people in Gallia. Mela (ii. 5) writes : after the salsulae forns " is the orat Gordonum, and the small streams Tolis and Tiehis; the Colonia Ruscino, and the vicus Illiberis." Pliny (iii. 4) begins his deseription of Gallis Narhonensis from the funt of the P'yrouces. Ile silys. "On
the caast is the regio Sordonnon or Sardonum, and in the interior the Consuarani ; the rivers Techum, Vernodubrum ; towns, Illiberis and Ruscino." Theso Sordones are the Sordi of Avienus (Or. Marit. 562):-

## "Sordus inile denique

Populus agebat inter avios locos Ac pertinentes usque ad interius mare, Qua piniferthe stant Pyrenae vertices, Inter ferarum lustra ducebat greges, Et arva late of gurgitem ponti premit:"
as I. Vossius reads the passage in his edition of Mela. The Nordi then accupied the coast of the Mediterranean from the Prrenees northward, and the neighbouring part of the interior at the north foot of the Pyrenees. Ptolemy, as D'Auville observes, does nut mention the Sordones, and he has made the territury of the Voleae Tectosages comprehend Illiberis and Ruscino. The Sorfenes probably occupied the whole of the territory called Roussillon, and they would be in possession of that pass of the Pyrences callen! Col de Pertus, which is defended by the fort of Bellegarde. They bordered on the Consorani. [Consorani.]
[G. L.]
SORICA'RIA, a place in Hispania Bactica, mentioned by Hirtius (B. Ilisp.c. 24), and the same called also "Soritia" by that author (c. 27). Ukert (ii. pt. i. p. 361) speks it in the neighbourhnod of the Flumen Sulsum (the Salado), S. of the Ractis, and between Osuña and Antequera. [T. H. D.]

SORLXGI (£́́pi $\gamma \boldsymbol{\sigma}$, Peripl. M. E. p. 34), a people of the southern part of Mindostan, who appareotly dwelt along the banks of the Chaberus (Káceri). Lassen places them below the Sorae, on the slopes of the hills above Madras. [V.]
soritia. [somicanta.]
Solinum, ( (bopov, Ptul. iii. 8. § 10), a city of Dacia; now Gierita. [T. H. D.]
SOROLAES (AD), a station in Lasitamia, N. of Emerita. (Itin.Ant. p. 433.) Varionsly identified with Montonches and Aliseda. [T. II. D.]

SOSTOMAGUS, in Gallia, is placed by the Jerusalem Itin. between Tolosa (Toulnuse) and Carcaso (Carcassone), 38 miles from Toulouse and 24 from Curcassone. The road is nearly direct, and if the distances are correct, we might perhaps find some name like Sosto in the proper place. Some geographers have found Sostomagus near Castelnaudari.
[G. L.]
SOTERA, n place in Ariana, mentioned by Ammianus (xxiii. 6). It is probably the same as that called hy P'tulemy इ́́tetpa (vi. 17. § 7). [V.]

SOTIA'TES or SONT1A'TES, a people of Aquitania. Schneider (Cuesar, B. G. iii, 20) who writes "in Sontiatium fines" las a louz note on the varims forms of this word. Nieolaus Damascenus (quoted by Athenacus, vi. p. 249) writes the name Notiani, but as Cacsar mas his authority for what he says, he may have altered the form of the word. In Dion Cassius ( $\mathrm{xxsix} . \mathrm{c}$. . 46) the reading is 'Amidas (ed. Reimarus) ; hut there are other variations in the Msi, In Pliny (iv. 19) we find among the nations of Aquitania "Ausci, Elusates, Sottiates, Orquidates Campestres," Orosius (vi. 8, ed. Haverkaup) has Nontiates, but one MS. has Sotiates and of hers have Siciates.

In b. C. 56 Catear sent P. Crassus into Aquitania. Crassus came from the nerth, and atter summoning the men of fighting age who were on the muster rolls of Toulouse, Carcassone, and Narbonne,
he entered the territory of the Sotiates，the first of the Ayritanian peoples whom he attarked．The Sotiates were the neighbours of the Elusates a natne represented by the town of Eause．A line drawn from Auch（Ausci）on the Gers to Bazus in the department of La Girmule，passes near Sns，a town which is on the Girtise，and in the Gabaret． In the midille ages it was called Sutium．Aucient remains have been found at Sos．Here we liave an instance of the preservation of ancient names in this part of France，and there are many other instancos．

D＇Anville in deternining the position of the Lutiates argues correctly that Crassus having passed through the Santones，a people who hal submitted to Caesar （B．G．iii．12）：nd would offer no resistance，entered Ayuitania ly the horth，and the Sutiates who were only seven or cight leagues sonth of the Giaronne woulh be the first tribe on whom he fell．Ile says that he has erilience of a Roman road very direat from Sins to Eause；and he is convinced that this is part of the road described in the Jernsalem Jtin，be－ tween Vasatae and Elusa．On this roal the name N＇ici－ tim：n orears in the Itin．，and as the nistance between Suittinm and Elusa correspunds very nearly to the distance betrpen Sos and Eause，he conjectures that this word Scittium is written wrong，aud that it shouid be Sotium．

The Sotiates，who were strong in cavalry，attacked the Romans on their march，and a battle took place in which they were defeated．Crassus then assaulted their town，which made a stout resistance．He brought up his rineae and towers to the walls，but the Sotiates drove mines under them，for as they had eopper mines in their country they were very skilful in burroming in the ground．At last they sent to Crassus to propose terms of surrender（B．G． iii．21）．While the people were giving up their arms on one side of the town，Adcantuanuus，who wa：a king or chief，attempted ton sally ont on another sitle with his 600 ＂soldurii．＂The Jomans met him there，and after a hard fight Alfantuanous was driven back into the town；but he still obtained the same easy terms as the rest．

These Soldurii were a body of men who attacherd themselves to a chief with whom they enjoged all the good things without working，so long as the chief lived；but if any violence took off their lesaler it was their duty to share the same fite or to die by their own hand．This was an Iterian and abo at Gallic fastion．The thing is easily understood． A nsurper or any desprrate fellow seized on power with the help of others like hinself；lived well，and fod his fiends ：and when his tyramy came to an end，he and all his crew mnst kill themselves，if they wished to escape the punishuncut which they deserved．（Plut．Sertor．c．14；Cienar，B．G．vii． 40 ；and the passage in Athenaens．）

The MSS．of Cuesar vary in the hame of Adcan－ thamms．Sclmoider writes it Adiatunus，and in Athenaens it is＇A $\overline{\text { ®áátounv．Sclaneider mentions a }}$ medal of felletin，with REX $\triangle$ ALETVONVE and a lion＇s had on one side，and on the other so． TIO（iA．Walckenaer（Giogr．\＆c．i．2s4）may be rpaking of the same medal，when be descrities one wheh is suid to have been found at Toulouse．with a liead of Adictanus on one stde and the word Sotiarae on the other．He thinks it＂very susjected；＂ and it may be．

 Scyl．l．c．）

APALATUM．［SAbONA］
SPASEFA，a town it Lorer Pannonia，of un－ known site．（It．Aut．p．268；It．Hieros．p．563； Geog．Jasv，iv．19，who writes Spaneatis．［L．S．］
sPARATA，a place in Moesia Superior，probably on the river Isker．（flin．Hieros．p．567．）By the Geogr．liav．it is called Sparthon（iv．7）．［T．H．D．］

Sl＇Alita（ミ $\pi \alpha \dot{\rho} \tau \eta$ ，Ior．ฐ $\pi \alpha \rho \tau \alpha$ ：Eth．ミ $\pi a \rho$－ тiátクs，Spartiates，Spartanus），the capital of La－ conia，and the thief city of Peloponnesus．It was aho called Lacediemon（ $\Lambda a k e \delta a i \mu \omega \nu$ ：Eth．$\Lambda a-$
 ginal naune of the conntry．［See Vol．1I．p．103，a．］ Starta stood at the upper end of the middle vale of the Eurotas，and npon the right bank of the river． The position of this valley，shut in by the monntain ranges of＇laygetus and l＇arnon，its inaccessibility to invaders，and its extraordinary beauty and great frertility，have been described in a previous article ［Lacosta］．The city was built upon a range of low hill sod apon an adjoining plain stretching SE： to the river．Those hills are offshoots of Mts．Tay－ getus，and rise almost inmediately above the river． Tenstadia S．of the point where the Oenus flows into the Eurotas，the latter river is divided into two arms by a small island overgrown with the oleander，where the fondations of an ancient bridge are visibie． This is the most important puint in the topogrophy of the site of Spart：a．Opposite to this bridge the range of hills rises upon which the ancient city stood；while a hollow way（Map，$f f$ ）leads through them into the plain to Magrild，a village situated about half－way be－ tween Mistrii and the island of the Eurotas．Upon emerging from this hollow into the plain，there rises on the left hand a hill，the south－western side of which is uccupied by the theatre（Map，A．）．The eentre of the building was excavated out of the hill； but the two wings of the cavea were entirely artificial， being built of enormons masses of quadrancular stones．A great part of this masonry still remain：； but the seats have ahmost entircly disappeared，be－ eause they have for many ages been ased as a quarry hy the iulabitants of Mistric．The extremities of the two wings are abunt 430 feet from one another． and the diameter or length of the orcbestra is about 170 feet；so that this theatre was probably the largest in Cireece，with the exception of thase of Athens and Megalupolis．There are traces of a wall arround this hill，which also embraces a considerat le part of the adjoining plain to the cast．Within the
space cnclased by this wall there are two terraces, apon one of which, amidst the ruins of a church, the French Commission discovered traces of an ancjent temple. In this space there are also some ancient doors, formed of threa stones, two upright with the architrave, buried in the ground; but no conjecture can be formed of the building to which they belonged without excavations.

The hill we have been describing is the largest of all the Spartan heights, and is distinguished by the wall which surronnds it, and by containing traces of foundations of some ancient buildiugs. From it two smaller hills .project towards the Eurotas, parallel to one another, and which may be regarded as portions of the larger hill. Upen the more southerly of the two there are considerable remains of a circular brick huilding, which Leake calls a circus, but Curtius an amphitheatre or odeun (Map, 3). Its walls are 16 feet thick, and its diameter only about 100 feet; bnt as it belongs to the Roman period, it was probably sufficient for the diminished population of the city at that time. Its entrance was on the side towards the river. West of this building is a valley in the form of a horse-shoe, enclosed by walls of earth, and apparently a stadium, to which its length nearly corresponds.

To the nortl of the hollow way leading from the bridge of the Eurotas to Maguila there is a small insulated hill, with a flat summit, bat higher and more precipitous than the larger hill to the south of this way. It contaios but few traces of ancient buildings (Map, B.). At its southern edge there are the remains of an aqueduct of later times.

The two hills above mentioned, north and south of this bollow way, formed the northern half of Sparta. The other portion of the city occupied the plain between the sutheru hill and the rivulet falling into the Eurotas, sometimes called the River of Maguila, because it flows past that village, but more usually Trypuitiko, from $T_{r y p i}$, a village in the mountains (Map, cc). Two cauals, beginning at Maguila, run across this plain: upon the southern one (Map, $b b$ ), just above its junction with the Trypiótiko, stands the small village of Psychiko (Map, 6). Between this canal and the Trypiotiko are some heights upon which the town of New Sparta is now built (Map, D.). Here are several ancient ruius, among which are some remains of walls at the southern extremity, which look like city-walls. The plain between the heights of New Sparta and the hill of the theatre is covered with corn-fields and gardens, anrong which are seen fragments of wrought stenes, and other ancient remaius, cropping out of the ground. The only remains which make any appearance above the ground are those of a quadrangular building, called by the present inhabitants the tomb of Leotidas. It is 22 feet broad and 44 feet long, and is built of pondetons square blocks of stone. It was probably an heroum, but cannot have been the tomb of Leonillas, which we know, from Pausanias (iii. 14. §ु 1), was near the theatre, whereas this building is close to the new town.

This plain is separated from the Eurotas by a range of bills which extead from the Roman amphitheatre or circus to the village of Psychitó. Between the hills and the river is a level tract, which is net much more than 50 yards wide below the Roman amphitheatre, but above and below the latter it swells into a plain of a quarter of a mile in breadth. Beyond the river Tryiniotiko there are a few traces of the foundations of ancient buildings near the little
village of Kalagonia (Map, 7). Leake mentions an aocient bridge over the Trypiotilo, about a quarter of a mile NE. of the village of Kalut goniút. This bridge, which was still in use when Leake risited the district, is described by him as having a rise of about one-third of the span, and constructed of large single blocks of stone, reaching from side to side. The same traveller noticed a part of the ancient canseway remaining at either end of the bridge, of the same solid construction. But as this lridge is not noticed by the French Commission, it probably no longer exists, liaving been destroyed for its materials. (Leake, Morea, vol. i. P. 157, Peloponnesiaca, p. 115.)

Such is the site of Sparta, and sach is all that now remains of this famous city. There cannot be noy doubt, however, that many interesting discoveries might be made by excavations ; and that at any rate the foundations of several ancient boildings might be found, especially since the city was never destroyed in ancient times. Its present appearaace corresponds wonderfully to the anticipation of Thucydides, who remarks (i.10) that " if the city of the Lacedaemonians were deserted, and nothing remained bnt its temples and the foundations of its buildings, men of a distant age would fiod a difficulty in believing in the existeace of its fommer power, or that it possessed two of the five divisions of Peloponnesus, or that it commanded the whole country, as well as many allies beyond the peninsula,-so inferior was the appearance of the city to its fame, beiug neither adorued with spleodid temples and edifices, nor built in contiguity, but in separate quarters, in the ascient method. Whereas, if Atbens were reduced to a similar state, it would be supposed, from the appearance of the city, that the power bad been twice as great as the reality." Compared with the Acropolis of Athens, which rises proudly from the plain, still crowued with the columns of its glorious temples, the low hills on the Eurotas, and the shapeless heap of ruins, appear perfectly insignificant, and present nothing to remind the spectator of the city that once ruled the Peloponnesus and the greater part of Greece. The site of Sparta differs from that of almost all Grecian cities. Protected by the lofty ramparts of mountains, with which oature had surronoded their fertile valley, the Spartans were aot obliged, like the other Greeks, to live within the walls of a city pent up io narrow streets, but continued to dwell in the midst of their plantations and gardens, in their original village trim. It was this rural freedom and confort which formed the chief charm and beanty of Sparta.

It must not, however, be supposed that Sparta was destitute of handsome public buildings. Notwithstanding the simplicity of the Spartan habits, their city became, after the Messenian wars, one of the chief seats of poetry and art. The private kouses of tlie Spartans always contimued rode aod unadorned, in accordance with a law of Lycurgus, that the doors of every honse were to be fashioned only witly the saw, and the ceiling with the axe (Plut. I,yc. 13); but this regulation was not intended to discourage architecture, bot to prevent it from ministering to private luxury, and to restrain it to its proper objects, the buildings for the gods and the state. The palace of the kings remained so simple, that its doors in the time of Agesilaus were said to be those of the eriginal building erected by Aristodemus, the foonder of the Spartan monarchy (Ken. Ages. 8. $\$ 7$ ); but the temples of the gods were built with

SPARTA．
great magnificence，and the spoils of the I＇crsian wars were employed in the erection of a beautiful stoa in the Agora，with figures of Persians in white marble upon the columns，among which Pausanias admired the statues of Mardonius and Artemisia （iii．11．§ 3）．After the Persian wars Athens be－ came more and more the centre of Greek art；but Sparta continued to possess，even in the time of Pausanias，a larger number of monnments tban most stber Grecian cities．

Sparta continued unfortified during the whole period of antozomoos Grecian bistory ；and it was first sorrounded with walls in the Macedonian pe－ riod．We learn from Polybius（ix．21）that its walls were 48 stadia in circumference，and that it was mach larger than Megalopulis，which was 50 stadia in circuit．Its superiority to Megalopolis in size must have been owing to its form，which was cir－ cular．（Polyb．v．22．）Leake remarks that，＂as the side towards the Eurotas measured about two miles with the windings of the ontline，the computation of Polybius sufficiently agrees with actual appearances， though the form of the city seems rather to have been semicircular than circalar．＂（Morea，vol．i． p．180．）Its limits to the eastward，at the time of the invasion of Philip（B．c．218），are defioed by Polrhius，who says（v．22）that there was a distance of a stadiom and a half between the foot of the cliffs of Mt．Menelaiam and the nearest part of the city． Livy also describes the Eorotas as flowing close to the walls（xxxiv．28，xxxy．29）．When Demetrins Poliorcetes made an attempt upon sparta in e．c． 296，some temporary furtifications were thrown up； and the same was done when Pyrrhos attacked the city in B．c． 272 ．（Paus．i． 13 ．§ 6，vii．8．§ 5．） But Sparta was first regularly fortitied by a wall and ditch by the tyrant Natis in B．c． 195 （Liv． xxxiv．27；Paus．vii．8．§ 5）；thougb even this wall did not sorround the whole city，hat only the level parts，which were more exposed to an enemy＇s attack．（Liv．xxxiv．38．）Livy，in his account of the attak of Sparta by Philopoemen in B．C．192， alludes to two of the gates，one leading to Pharae， and the other to Mount Barbusthenes．（Liv，xxuv； 30．）After the captore of the city by Philopormen， the walls were destroyed by the Achaean League （Paus．vii．8．§ 5）；but they were shortly after－ wards restored by order of the Romans，when the latter took the Spartans under their protection in opposition to the Acbaeans．（Paus，vii．9．§ 5．） Its walls and gates were still standing when Pan－ sanias visited Sparta in the second century of the Christian era，but not a trace of them now remains． When Alaric took Sparta in A．D．396，it was no longer fortified，nor protected by arms or mien （\％osim．v．6）；but it continued to he inhabited in the thirteenth century，as we learn from the＂Chronicle of the Murea．＂It was then always called Lace－ daemon，and was confined to the heights around the theatre．The walls which surrounded it at that time may still be traced，and have been mentioned above．It is to the medieval Lascedamon that the ruins of the charches belong，of which no less than xis are noticed by the Freach Commission．After the conquest of Pelopounesus by the Franks in the thirteenth century，Willian de Villehardonin built a strong fortress opon the hill of Misithrd．usually pronounced Mistra，a little more than two miles west of Sparta，at the foot of Mt．Taygetus．The iuhauitants of the medieval Lacedaemon soon aban－ soed their town and took refugo within the fortress

SPARTA．
of Mistra，which long continued to be the chief place in the valley of the Earotas．The site of Sparta Was occupied only by the snall villages of Maguila and Psychikó，till the present Greek government re－ solved to remove the capital of the district to its ancient seat．The position of New Sparta npom the southern part of the ancient site has been already described．
It has been observed that Sparta resembled Rome in its site，compreliending a number of contignons hills of little height or boldvess of character．（Hure， Tour in Greece，vol．ii．p．236．）It also resembled Rome in being formed out of several earlier settle－ ments，which existed before the Dorian conquest，and gradually coalesced with the later city，which was founded in their midst．These earlier places，whuth are the hamlets or $\kappa \bar{\omega} \mu \mathrm{a}$ mentioned by Thucydides（ i ． 10），were four in number，Pitane，Lirunae or Liro－ naeurn，Mesoa，and Cynosara，which were united by a common sacrifice to Artemis．（Pans．iii．16．§9．） They are frequently called фuגai，or tribes，by the grammatians（Mäller，Dorians，iii．3．§ 7），and were regarded as divisions of the Spartans；but it ia clear from aticient writers that they are names of places．＊We are best informed about Pitane，which is called a $\pi \delta \lambda_{t s}$ by Eoripides（Troad．1112），and which is also mentioned as a place by Piodar（ $\pi$ pos
 dotus，who had been there，calls it a $\partial \hat{\eta} \mu$ os（iii．55）． He also mentions a $\lambda$ b́रos Пıтaváтクs（ix．53）；and though Thncydides（i．20）denies its existence， Caracalla，in imitation of antiquity，composed s入óxos Mictavátクs of Spartans．（Herodian．iv．8．） It appears from the passage of Pindar quoted above， that Pitane was at the furd of the Eurotas，and con－ sequently in the northern part of the city．It was the favourite and fushionable place of residence at $\mathrm{S}_{\text {parta }}$ like Collytus at Athens and Craneion at Corinth．（Flat．de Exsil．6．p．601．）We are also told that Pitane was near the temple and stronghold of Issorium，of which we shall speak presently． （1＇olyaen．ii．I．§ 14；Plot．Ages．32．）Lima was situated upot the Eurotas，having derived its name from the marshy ground which once existed there（Strab．viii．p．363）；and as the Dromus oceu－ pied a great part of the lower lesel tuwards the southero extremity，it is probable that Limnae acco－ pied the northern．（Leake，Morea，vol．i．p．17．．） It is probable that DEcroa was in the SE．part of the city［see below，p． 1028 ，b．］，and Cynusara in the SW．

In the midst of these separate quarters stood the Acropolis and the Agora，where the Durian invaders first planted themselves．Pausanias zemarks that the Lacednemonians had no acropolis，totering above other parts of the city，like the Cadmeia at Thebes and Larissa at Argos，bot that they gave this narue to the loftiest eminence of the groap（iii．17．§ 2）．This is rather a doubtful description，as the great bill， upon which the theatre stauds，and the hill at the northern extremity of the site，present nearly the same clevation to the eye．Leake places the Acro－ polis upon the northern bill，which，he observes，was
＊Some modern writers mention a fifth tribe，the Acgeidae，because IIcrodotus（iv．I49）speaks of the Aegeidac as a great tribe（ （ unht）in Sparta；but the word $\phi u \lambda 斤$ secms to be liere used in the more general sense of family，and there is no evidence that the word Aegeidac was the name of a place， like the other four mentioned above．
better adapted for a citadel than any other, as being separated from the rest, and at one angle of the site; but Curtius suppases it to have stood apon the hill of the theatre, as being the only one with a sufficiently large surface on the summit to contain the numerous buildings which stood upon the Acropolis. The latter opmion appears the more probable; and the larger hill, eleared from its surrounding rubbish, surrounded with a wall, and crowned with buildings, would have presented a much more striking appearance than it does at present.

The chief building on the Acropolis, was the temple of Athena Chalcioecus, the tutelary goddess of the city. It was said to bave been begun by Tyndareus, but was long afterwards completed by Gitiadas, who was celebrated as an architect, statuary, and poet. He caused the whole building to be covered with plates of bronze or brass, whence the temple was called the Brazen Honse, and the goddess received the surname of Chalcioecus. On the bronze plates there were represented in relief the labours of Hercules, the exploits of the Dioscuri, Hepliaestus releasing his mother from ber cbains, the Nymphs arming Per-eus for his expedition against Mledusa, the birth of Athena, and Amphitrite and Poseidon. Gitiadas also made a brazen statue of the goddess. (Paus. iii. 17. §§ 2, 3.) The Brazen House stood in a sacred enelosure of considerable extent, surrounded by a stoa or colonnade, and containing several sanctuaries. There was a separate temple of Athena Ergane. Near the southern stoa was a temple of Zeus Cosmetas, and before it the tomb of Tyndareus; the western stoa contained two eagles, bearing two victories, dedicated by Lysander in commemoration of his victories over the Atheniaus. To the left of the Brazen House was a temple of the Muses; behind it a temple of Ares Areia, with very ancieot wooden statues; and to its right a very ancient statue of Zens Hypatus, by Learchus of Rhegium, parts of which were fastened together with nails. Here also was the $\sigma \kappa \eta \dot{\eta} \omega \mu \alpha$, a booth or tent, which Curtius con-
 lepoû (Thuc. i. 134), where Pausanias took refuge as a suppliant. Near the altar of the Brazen House stood two statues of Pansanias, and also starues of Aphrodite Ambologēra (delaying old age), and of the brothers Sleep and Death. The statues of Pusanias were set up by order of the Delphian Apollo to expiate his being starved to death within the sacred precinets. (Paus. iii. 17. § 2-18. § 1.)

The Agora was a spacious place, surrounded, like other Greek market-places, with colonnades, from Which the streets issued to the different quarters of the city. Here were the public buildings of the magistrates, - the council-honse of the Gerusia and senate, and the offices of the Ephori, Nomophylaces, and Bidiaei. The most splendid building was the Persian stoa, which had been frequently repaired and enlarged, and was still perfect when Pausabias visited the city. The Agora eontained statues of Julius Caesar and Augustus: in the latter was a brazen statue of the prophet Agias. There was a place called Chorus, marked off from the rest of the Arora, because the Spartan youths bere danced in honour of Apollo at the festival of the Gymnopaedia. This place mas adorned with statucs of the Pythian deities, Apollo, Artemis, and Leto; and near it were temples of Earth, of Zeus Agoracus, of Athena Agoraea, of Apollo, of Poseidon Asphaleius, and of Hera. In the Agora was a colossal statue
representing the people of Sparta, and a temple of the Noerae or Fates, near which was the tomb of Orestes, whose bones had been brought from Tegra to Sparta in accordance with the well-known tale in Herodotus. Near the tomb of Orestes was the statne of king Polydorus, whose efligy was used as the seal of the state. Here, also, was a Hermes Agoraeus bearing Dionysus as a child, and the old Ephoreia, where the Ephors originally administered jastice, in which were the tombs of Epimenides the Cretan and of Aphareus the Aeolian king. (Paus. iii. 11. $8 \$ 2-1 i$.)

The Agora was near the Acropolis. Lycurgus, it is said, when attacked by his opponents, fled for refuge from the Agora to the Acropolis; but was overtaken by a fiery youth, who struck out one of his eyes. At the spot where he was wounded, Lycurgus founded a temple of Optiletis * or Ophthalmitis, which must bare stool immediately above the Agora. Plutarch says that it lay withis the temenos of the Brazen House; and Pausanias mentions it, in descending from the Acropolis, on the way to the so-called Alpium, beyond wbich was a temple of Ammon, and probably also a temple of Artemis Coagia (Plut. Lyc. 11; Apophth. Lac. p. 227, b.; Paus. iii. 18. § 2.) The Agora may be Ilaced in the great bollow east of the Acropolis (Map, 2). Its position is most clearly marked by Pausanias, who, going westwards from the Agora, anrived immediately at the theatre, after passing only the tomb of Brasidas (iii. 14. §1). The site of the theatre, which he describes as a magnificent building of white marble, bas been already described.

The principal street, leading out of the Agorn, was named Aphetais (Aфetats), the Corso of Sparta (Map, dd). It ran towards the southern wall, throngh the most level part of the city, and was bordered by a succession of remarkable monuments. First came the house of king Pulydorus, named Booneta (Bóe$\nu \eta \tau \alpha)$, becnuse the state purchased it from his widow for some oxen. Next came the office of the Bidiaci, who originally had the inspection of the race-course; and opposite was the temple of Athena Celeutheia, with a statue of the goddess dedicated by Ulysses, who ereeted three statues of Celeutbeia in different piaces. Lower down the Aphetais occurred the heroa of lops, Amphiarans, and Lelex. the sanctuary of Poseidon Taenarius,-a statue of Athena, dedicated by the Tarentini,- the place called Hellenium, so called because the Greeks are said to have held counsel there either before the Persian or the Trojan wars, - the tomb of Taltbybius, - an altar of Apollo Acreitas,-a place saered to the earth named Gaseptun:, - a statue of A pollo Maleates, - and close to the city walls the temple of Dietynoa, and the royal sepulchres of the Eurypontidae. lausanias then returns to the Hellenium, probably to the other side of the Aphetais, where he mentions a sanctuary of Arsinue, the sister of the wives of Castor and Pollus ; then a temple of Artemis near the so-called Phruria ( $\Phi$ poipta), which were perhaps the temporary fortifications tbrown up before the completion of the eity walls; next the tombs of the lamidae, the Eleian prepbets, - sanctuaries of Maro and Alpheins, who fell at Ther-mopylae,-the temple of 'eus Tropaeus, built by the Dorians after conquering the Achaean inhabitants of Laconia, and especially the Anyclaci- the temple

[^29]of the mother of the gods,-and the heroa of Ilippolytus and Aulon. The Aphetais upon quitting the city joined the great IIyacinthian road which led to the Amyclaenm. (1’ans. iii. 12. §§ 1-9.)

The next mest important street leading from the Agora ran in a south-easterly direction. It is usually called Scias, though Pansanias gives this name only to a building at the beginning of the street, erected by Theodorus of Sanos, aod which was used even in the time of J'ausanias as a place for the assemblies of the people. Near the Scias was a rond structure, said to have been built by Euinchides, containing statnes of the Olympiano Zeus and Aphrolite; next came the tombs of Cy murtas, Castor, ldas, and Lynceus, and a temple of Core Soteira. The other huildings along this strect or in this direction, if there was no street, were the temple of Apollo Carneius, who was worshipped here before the Dorian invaxion,-a statue of Apollo Aphetaens,-a quadrangular place surrounded with colomades, where small-wares ( $\rho \bar{\phi} \pi=5$ ) were anciently sold,-an altar sacred to Zeus, Athena, and the Dioscuri, all surnamed Ambnlii. Opposite was the place called Colona and the temple of Dionysns Coloratas. Near the Colona was the temple of Zens Eumenus. On a neighbouring lifl was the temple of the Argive Hera, and the temple of Hera Hypercheiria, containing an ancient wooden statue of Aplindite llera. To the right of this hill was a statuc of Hetoemocles, who hal gained the victory in the Olympic games. (Paus. iii. 12. § 10 -iii. 13.) Although Piusanias does not say that the Colona was a hill, yet there can be no doubt of the faet, as
 and the one upon which the temple of Hera stwod me evidently the heights NW. of the village of $P$ sychiki between the Eurotas and the plain to the S. of the theatre ( $\mathrm{MLap}_{\mathrm{ap}} \mathrm{C}$.).

Aiter describing the streets leading from the Agona to the S. and SE. Pausanias next mentions a third street, rumning westward from the Agora, It led past the theatre to the royal sepulchres of the Aцnadae. In front of the theatre were the tombs of Pansarias and Leonidas (iii. 14. § 1).

Fyom the theatre Pausanias probably went by the ludlow way to the Eurotas, for be says that near the Sepmlchres of the Agiaulae was the Lesche of the Crotani, and that the Crotani were a portion of the l'tanatac. It would appear from a passage in Athenaeus (i. p. 31) that Pitane was in the reighlowrhowl of the Oenns; and its proximity to the Eurotas has been already shown. [See above, p. 1026, a.] It is nut improbable, as Curtins observes, that Pitane lay partly within and partly without the city, like the Cerameiens at Athens. After jroceeding to the tomb of Taenarus, and the sunctuaries of Poseidon Hippocuraus and the Aeginctan Artemis, Pausanias returns to the Lesche, near which was the temple of Artemis lssoria, also called Limmaca. L-sorimm, which is known as a stronghold in the nembabourhood of Pitane (1'olyaen. ii. 1. § 14 ; Plut. Ages. 32), is supposed by Curtius to he the hill to the north of the Acropolis (M..p, C.j. Leake, as we have alreaiy seen, regards this hill as the Amopolis itself, and identifies the losorimm with the bught above the rained auphitheatre or circos. Pansanias next memtions the temples of Thetis, of Bemeter Chthonia, of Surspis, and of the Olympian Zeus. Ile then reached the Bromos, which was used in his day as a place for runsing. It extended along the stream sontlowarts, and contained gym-
nasia, one of which was dedicated by a certain Eurycles. The Romm amphitheatre and the stadium, of wbich the remains have been already described, were inclnded in the Dromns. In the Dromus was a statne of Hercules, near which, but oniside the Dromus, was the honse of Menelaus. The Dromus must have formed part of Pitane, as Mlenelans is called a Pitanatan. (Hesych. s. v.) Proceeding from the Dromas occurred the temples of the Dioscuri, of the Graces, of Eileithyia, of Apollo Carneius, and of Artemis Hegemone; on the right of the Dromus was a statue of Asclepius Agnitas ; at the beginning of the Dromus there were statnes of the Dioscuri Aphetarii; and a littlo further the heroum of Alcon and the temple of Poseidon Domatites. (Pans. iii. 14. §\$s 2-i.)

South of the Dromus was a broader level, which was called llatanistas, from the plane-trees with which it was thickly planted. It is described as a round island, formed by streams of ronning water, and was entered by two bridees, on each of which there was a statue of Hereales at one end and of Lycurgus at the other. Two divisions of the Spartan Ephebi were acenstomed to cross these bridges and fight with one another in the Plataniston; and, though they had no arms, they frequently inflicted severe wounds upon one another. (1'rus. iii. 15. § \&, seq.; Lucian, Auachars. 38; Cic. Tusc. Quaest. x: 27.) The running streams surrounding the Plataniston were the canals of the Trypiutiko, which were fed by several spriogs in the nieighbourhood, and flowed into the Eurotas. Outside the city was the district called Phoubaeum, where each division of the Ephebi sacrificed the night before the contest. The Phoebneum occupied the narrow corner south of the Platariston formed by the Trypiotiko and the Eurotas. l'ausanias describes it as near Therapne, which was situated upon the Menelaium, or group of hills upon the other side of the Eurotas, mentioned below. The proximity of the Phocbacum to Therapne is mentioned in another passage of Pausanias (iii. 19. $\$ 20$ ), and by Herodotus (vi. 61). The heroum of Cynisca, the first fernale who conquered in the chariotrace in the Olympic grunes, stood close to the Plataniston, which was bordered upon one side by a colonnade. Behind this colonnade there were severat heroic monnments, among which were those of Akimus, Enaraephorus, of Dorceus, with the fonntain Dorceia, and of Sebrus. Near the latter was the sepulchre of the poet Alcman; this was followed by the sanctuary of Helena and that of Hercules, with the monument of Oeonus, whose death he here avenged by slaying the sons of Hippocoon. The temple of Herenles was close to the city walls. (Paus, iii. 14. § 8-15. § 5.) Since the poet Alcman, whose tomb was in this district, is described as a citizen of Mesoa [Dict. of Biogr., art. Ar.c Jr.iv], it is probable that this was the position of Mesoa, the name of which might indicate a tract lying between tworivers.
 Steph. B. s.v. M $\in \sigma \sigma$ 分 $\nu \eta$.)

After reaching the SE. extremity of tho city, Pausanias returns to the Dromus. Here be mentions two ways: the one to the right leading to in temple of Achena Axiopomus, and the other to the left to another temple of Athena, founded by Theras, near which was a temple of 1lipposthenes, and an ancient wooden statue of Enyalius in fetters. He then deseribes, but without giving any indication of its position, the painted lesche, with its surrounding herea of Cadmus, Ocolycus, Acgeus, nod Amphilo-
chus，and the temple of Hera Acgophagns．He afterwards returns to the theatre，and mentions the different monaments in its neighbonrhood；among which were a temple of Poscidon Genethlius，heroa of Cleodacus and Oebalns，a temple of Asclepius， near the Booneta，the most celebrated of all the temples of this god in Sparta，with the heroum of Tcleclas on its left ；on a lieight not far distant，an ancient temple of Aphrodite armed，upon an upper story of which was a second temple of Aphrodite Morphe ；in its neighbourhood was a temple of Hi－ lacirs and Phoebe，containing their statues，and an egg suspeaded from the roof，snid to have been that of Leda．Pansanias nest mentions a honse，named Chiton，in which was woven the robe for the Amy－ claean Apollo；and on the way towards the city gates the beroa of Cheiloa and Athenaens．Near the Chiton was the honse of Phormion，who hospi－ tally entertained the Diosenri when they entered the city as strangers（Paus．jii．15．§ 6－16．§ 4．）From these indications we may soppnse that the Anyyclaean road issued from this gate，and it may therefore be placed in the southern part of the city．In that case the double temple of Aphrodite probably stood upon one of the beights of New Sparta．

Pausanias next mentions a temple of Lycurgus ； belind it the tomb of bis son Eucosmus，and an altar of Latbria and Alexandra ：opposite the temple were monaments of Theopompus and Eurybiades，and the heroum of Astrabacns，In the place called Lim－ naenm stood the temples of Artemis Orthia and Leto．This temple of Artemis Orthia was，as we hare already remarked，the common place of meeting for the four villages of Pitane，Meson，Cynosura，and Limnae．（Paas．iii．16．§ 6，seq．）Limnae was partly in the city and partly in the suburbs．Its position to the N．of the Dromus has been mentioned abore ； and，if an emendation in a passage of Strabo be cor－ rect，it also incleded a district on the left bank of the Eurotas，in the direction of Mt．Thornas（ $\tau \delta$＾ıuvaiov катà $\tau \grave{\nu}$［＠ópva］ка，Meineke＇s emendation instead of［ $\left.\Theta_{p \bar{q}}\right]$ ka，Strab．viii．p．364）．

The most ancient topographical information re－ specting Sparta is contained in the answer of the Delphic oracle to Lycurgus．The oracle is reported to have directed the lawgiver to erect temples to Zeus and Athena，and to fix the seat of the senate and kings between the Babyca and Cnacion．（Plut． Ly／c．6．）These names were ohsolete in the time of Plutarch．He says that the Cnacion was the Oenns， now the Kelefina；and he also appears to have con－ sidered the Batbyca a river，though the text is not clear；in that case the Babyca must be the Trypió－ tiko，which forms the southern houndary of the city． It appears，however，from the same passage of Plu－ tarch，that Aristotle regarded the Babyca as a bridze， and only the Cosacion as a river；whence he would seem to lave given the name of Cnacion to the $T_{r y}$－ piutilo，and that of Babyea to the bridge over the Eumtas．

The left，or easten bank of the Eurotas，was not oceupied by any part of Sparta．When Epaminondas invaded Laconia ia B．c． 370 he marched down the Jeft bank of the Eurotas till he reached the foot of the bridge which led through the hollow way iato the city． But he did not attempt to force the passage across the bridge；and be saw on the other side a body of armed men drawn up in the temple of Athena Alea．He therefore continned his march along the left hank of the river till he arrived opposite to Anyclae，where be crossed the river．（Xen．Hell．
vi．5．§ 27．）The account of Xenoph in ilit trates a passage of Pausanias．The latter writer，in de－ scribing（iii．19，§ 7）the rosd to Therapne，men－ tions a statue of Athena Alea ns standing between the city and a temple of Zens Plusius，above the right bank of the Eurutas，at the point where the river was crossed；and as only one bridge across the Earotas is meationed by ancient writers，there can be no doubt that the rosd to Therapne crossed the bridge which Xenophon speaks of，and the remains of which are still extant．Therapne stovd upon the Menelaium or Mount Menelains，which rose abroptly from the left hand of the river opposite the soutb－eastern extremity of Sparta．（Meve入áiov， Polyb．v．22；Meve入d́eiov，Steph．B．s．v ；Mene－ laius Mons，Liv．xxsiv．28．）The Menelaium bas been compared to the Janicnlun of Rome，and rises about 760 feet above the Earntas．It derived its name from a temple of Menclans，containing the tombs of Menelaus and Helen，whither solema pro－ cessions of men and women were accustomed to re－ pair，the men imploring Menelaus to graot them bravery and success in war，the women irvoking Helea to bestow beauty upon them and their chil－ dren．（Paus．iii．19．§8 9；Herod．vi．61；1－ocr． Encom．Hel．17；Hesych．s．v，＇E入évia，Өєpumva－ tiסxa．）The foundations of this temple were dis－ covered in 1834 by Ross，who found amongst the ruins several small figures ia clay，representing men in military costume and women in long rubes，pro－ hably dedicatory offerings made by the poorer claises to Menelans and Helea．（Ross，Wandervingen in Griechenland，vol．ii．p．13，seq．）The temple of Menelans is expressly said to have been situated in Therafae（Өepánvi，Өspátval；Theramne，Plin． iv．5．s．8），which was one of the most ancient and venerable places in the imiddle ralley of the Enrotas． It was said to bave derived its name from 3 daughter of Lelex（Pans．iii．19．§ 9），and was the Aclusean citadel of the district．It is described by the puets as the lofty well－fowered Therapne，snrroanded hy thick woods（Pind．Isthm．i．31；Coloth．225）， Where slept the Diescuri，the guardians of Sparta． （Pind．Nem．x．55．）Here was the fountain of Desseis，the water of which the captive women had to carry（Paus．iii．20．§ 1；Hom．Il．vi．457）；and it was probably upon this height that the temple of Menelaus stood，which excited the astonishment of Telemachas in the Odyssey．Hence Therapne is said to bave been in Sparta，or is mentioned as sy．

 Schol．ad Apoll．Rhod．ii．162，Pind．Isthm，i．31．） It is probable tbat firther excatations upon this spot would bring to light some tombs of the hervic ages．The Phocbacum，which has leen already described as the open space on the right bank of the Earotas［see p．1028，b．］，contained a temple of the Dioscuri．Not far from this place was the temple of Poseidon，surnamed Gaeaochus．（Paus，iii． 20．§ 2．）

After the power of Sparta was destroyed by the battle of L．cuctra，its territory was exposed to inva－ sion and the city to attack．The first time that an enemy appeared before Sparta was when Epami－ nondas invaded Laconia in B．c．390，as already re－ lated．After crossing the river opposite Amychae，lie marched against the city．His cavalry adranced as far as the temple of Poscidon Gaeaochus，which we have seea from Pansanias was in the Phochaeum．We also learn from Xenophon that the Ilippodreme was

## 1030

 Sl ${ }^{3}$ AlitiA.in the aeighbonrliood of the temple of Poscidon, and eonsequently mnst not be eonfounded with the Droinus. The Thehans did not advanee further, for they were driven back by a boly of picked loplites, whon Agesilaus had placed in atmbush in the sanet tary of the Tyndaridac (Dioseuri), whiel we likewise know from Prusanias was in the Phoebatum. (Xen. Hell.vi. 5. §§ 31, 32.) In r. c. 362 Epaminondas made a daring attempt to surprise Sparta, fund actually penetrated into the market-place; but the Spartars laving received intelligence of his approach, the city had been put into a state of defenec, and Epaminondas again withdretw without venturiug upon an assault. (Xen. Hell. vii. 5. §s 11-14; Polyb. ix. 8; 14od. xv. 83.) In 15. c. 218 1'hilip unespectedly entered Laeonia, doseended the vale of the Eurotas by the left bank of the river, passing by Sjarta, and then laid waste the whole country as far as Taenarus and Malea. Lyeurgus, the Spartan king, resoived to intercept him on his retarn : be occnpied the heights of the Menclaium with at body of 2000 men, ordered the remaining forces of Sparta to be ready to take up their position between the city and the western bank of the river, and at the same time, by means of a dam, laid the low ground in that part under water.

## SPAR'T.I.

Philip, however, contrary to the expectation of Ly eurgus, stormed the Menclaium, and brought his whole army safely through the pass, and encamped two stadia above the city. (Polyb. v. 17-24.) In B. c. 195 Quinctius Flamininus attacked Sparta, because Nabis, the tyrant of the eity, refused obedience to the terms which the Roman general imposed. With an army of 50,000 men Flamininus assaulted the city on its three undefended sides of Phcebaeum, Dictynnacum, and Heptagoniac. He forced his way into the city, and after overcoming the resistance which he met with in the narrow ways at the entrance of the city, marched along the broad ruad (probably the Aphetais) leading to the citadel and the surrounding beights. Thereapon Nabis set fire to the buildings nearest to the city walls, which compelled the Romans to retreat. But the main object of Flamininus bad been answered, for three days afterwards Nabis sent his son-in-law to implore peace. (Liv. xxxiv. 38, 39.) The pasition of the Pboebaeum las been already explained. The Dietynnaeum was so called from the tomple of Artemis Dietynna, which Pausanias describes as situated at the end of the Aphetais, closo to the walls of the eity (iii. 12. §8). Leake thinks that the name of the village of Kalagonia may be a

corraption of Heptagoniac; but it is more probable that the Heptagoniae lay frrther west in the direction of Mistra, as it was evideatly the object of Flaminions to attack the city in different quarters.

The small stream which encloses Sparta on the sonth, now called the Trypiotiko or river of Magüla, is probably the ancient Tiasa (Tia $\alpha$ ), npon which stood the sanctuary of Pbaëna aad Cleta, and across which was the road to Amyclac. (Pans, iii. 18. § 6.) Leake, however, gives the name of Tiasa to the Pandeleimona, the nest torrent sonthwards falling into the Eurotas.

With respect to the gates of Sparta, the most important was the one opposite the bridge of the Eurotas: it was probably called the gate to Therapne. Livy mentions two nthers, one leading to the Messeoian town of Pbarae, and the other to Monnt Barbosthenes (xxxv. 30). The former mast have been upon the western side of the city, near the village of Maguila. Of the sonthern gates the most important was the one leading to Amyclae.

In this article it has not been attempted to give any acconot of the political bistory of Sparta, which forms a prominent part of Grecian history, and cannot be narrated in this work at sufficient length to be of any value to the student. A few remarks apon the snbject are given under Laconia.

The modero anthority chiefly followed in drawing up the preceding acconnt of the topngraphy of Sparta is Curtius, Peloponnesos, vol. ii. p. 219, seq. Valuable information bas also been derived from Leake, Morea, vol. i. p. 150, seq., Peloponnesiaca, p. 129, seq. See also Mure, Tour in Greece, vol. ii. p. 220, seq.; Ross, Wanderungen in Griechenland, vol. ii. p. 11, seq.; Expédition scientifique de Morće, vol. ii. p. 61, seq.; Boblaye, Recherchics, ge., p. 78, seq.; Benlé, E'tudes sur le Péloponése, p. 49 , seq.

SRARTARIUS CAMPUS (ZTaptáptov $\pi \epsilon$ ®íov, Strab. iii. p. 160), a district near Cartbago Nova in Hispania Tarraconensis, 100 miles long and 30 broad, which produced the peculiar kind of grass called spartum, used for making ropes, mats, \&c. (Plia. xis. 2. s. 8) It is the stipa tenacissima of Linnaens; and the Spaniards, hy whom it is called esparto, still manufactnre it for the same purposes as those described by Pliny. It is a thin wiry rash, which is cut and dried like hay, and then soaked in water and plaited. It is rery stroog and lasting, and the mannfacture still employs a large number of women and children. It was no doubt the material of which the lberiao whips mentioned by Horace (Epod. iv. 3) were composed. (See Ford, Handb. of Spain, p. 168.) From this district Carthago Nova itself obtained the surname of "Spartaria." [T. H. D.]

SPARTO'LUS ( $\Sigma \pi \alpha \phi p \omega \lambda$ os, Thuc. ii. 79, г. 18 ; Steph. B.), a town of the Chalcidic peniosula, at no great distance from Olynthns (Isaens, de Dicaeogen. Haered. p. 55), nader the walls nf which the Atheoiao forces were ronted, B. c. 249. It belonged to the Bottiaeaos, and was perbaps their capital, and was of snfficient importance to be mentioned in the treaty between Sparta and Athens in tbe tenth year of the Peloponnesian War. [E.B.J.]

SPAUTA ( $\mathbf{\Sigma} \pi$ aîra), a lake in Media Atropatede, which is intensely salt, so as to cause the itcb on the bodies of persons who have nnwittingly bathed in it, with injury also to their clothes (Strab. xi. p. 523). Its present name is the Sea of Urumiah. Its earliest Armeaian name is said to have been Kaputan, or Kaputan Chow, whence the Greek form would seem
to have been modified. (I. Ingigi, Arcliamol. Armen. i. p. 160; St. Martin, Memoires, i. p. 59.) It is probably the same as the Mapтiavin $\lambda i \mu \nu \eta$ of l'talen. $y$ (vi. 2. § 17). Many travellers have risited it in madern times. (Tavernier, i. cb. 4; Morier, Sec. Voy. ii. p. 179.)

SPELLAEUM, a place in Macedonia which Livy says was near Pella (xlv. 33).

SPELUNCA (Sperlonga), a place on the coast of Latinm (in the more extended sense of that name), situated between Tarracina and Caieta. The emperor Tiberius bad a villa there, which derived its name from a natnral cave or grotto, in which the emperor used to dine, and where he on one occasion very nearly lost his life, by the falling in of the ronf of the cavern (Tac. Ann. iv. 59: Suet. Tib. 39). The tilla is not again mentioned, bnt it would appear that a village had grown up aronnd it, as Pliny mentions it in describing the conast ("locus, Spelancae," Plin. iii. 5. s. 9), and its memory is still preserved by a village named Sperlonga, on a rocky point abont 8 miles W. of Gaëta. Some Roman remains are still visible there, and the cave belonging to the Imperial villa may be identified by some remains of architectoral decoration still attached to it (Craven's Abruzzi, vol, i. p. 73). [E. H. B.]

SPEOS ARTEMILDOS, the present grottoes of Beni-hassan, was situated N. of Antinoe, in Middle Aegypt, on the eastern lank of the Nile, in lat. $27^{\circ}$ $40^{\circ} \mathrm{N}$. The name is varionsly written: Peas in the Itinerary of Antoninus (p. 16ž, Wesseling); Pois in the Notitia Imperii; but Speos is probably the true form, implying an excavation ( $\sigma \pi$ teos) in the rocks. Speos Artenidos was rediscosered by the French and Tnscan expedition into Aegypt early in the present century. It was constructed by some of the Pharaohs of the I8th dynasty in a desert-ralley ruaping into the clain of Arabian bills. The structure as a whole consists of a teraple, aod of between tbirty and furty catacombs. The temple is dedicated to Pasht, Bubastis, the Artemis of the Greeks. (Herou) ii. 58.) The catacombs appear to have served as the general necrepolis of the Hermopolite nome. Fur although Hermopolis and its district lay on the western bank of the Nile, yet as the eastern hills at this spot approach very closely to the strean, while the western hills recede from it, it was more convenient to ferry the dead over the river than to transport them across the sands. Sume of these catacombs were appropriated to the mommies of animals, cats especially, which were worsbipped by the Hermopolitans. In the general cemetery two if these catacombs merit particular attention: (1) the tomb of Neoopth, a military chief in the reign of Sesortasen I. and of his wife Rote; ; (2) that of Amenheme, of nearly the same age, and of very similar constraction. The tomb of Neoopth, or, as it is more usnally denominated, of Rotei, has in front an architrave excavated from the rock, and supported by two columns, each 23 feet high, with sixteeo fluted facelets. The columns have neither base nor capital; but betreen the architrave and the head of the colnmn a square abaens is inserted. A denteled cornice rans over the architrave. The effect of the structure, although it is hardly detached from the rock, is light and graceful. The chamber or crypt is 30 feet square, and its roof is divided into three vanlts by two architraves, each of wbich was originally supported by a single column, now vanished. The walls are painted in compartments of the most brilliant colours, and the

## SPERCIIEIUS．

drawing is gencrally in the best style of Aogyplian art．They represent various events in the lile of Neoopth．From the tomb of Rotej，indeed，might be compiled a very copious reenrd of the domestic life of the Aegyptians．On its walls are depicted， among many others，the following subjects：the return of warriors with their eaptives；wrestlers； lunting wild brasts and deer；the Nile boats，in－ clnding the Bari or high－prowed barge，and fisleries； gramaries and flax－dressing；spiaming and weaving； ganes with the lance，the ball，and the discus；and the rites of sepultare．The tomb of Amenheme is covered also witl：representations of men io various postures of wrestling；and the other grottoes are not less interesting for their portraitures of civil and domestic life．（Wilkinson，Modern Egypt and Thebes；Rosellini，Afon．Civ．vol．i．；Kenrick，Anc． Eyypt，vol．i．p．47，foll．）
［W．B．D．］
 the S ．of Thessaly，rising in Mount Tymphrestus （Strab．ix．p．433），and flowing into the Maliac gulf．The Dryopes and Amianes dwelt in the apper part of its conrse till it entered the plain of Malis， through which it flowed to the sea．In ancient times it joined the sea at Anticyra；and the rivers Dyras，Melas，and Asopus fell separately into the sea to the S．of the Sperckeius．（Herod．vii．198．） But the Spercheius has changed its course，and now falls into the sea much further south，about a mile from Thermopylae．The Dyras and Melas now unite their streams，and fall into the Spercheins，as does also the Avopas．［Thermofylie．］Spercheius is colebrated in mythology as a river－god［Dict．of Bioyr．s．n．］，and is mentioned in connection with Achilles．（Hom．I／．xvii．142．）1ts mame also trequently occurs in the otlter poets．（Acsch．Pers． 486 ；Sophocl．Phit．722；Virg．Georg．ii．485； Lucan，vi．366．）（Leake，Northern Greece，vol．ii． 1p．8，11，15．）

SLERCHIAE，a place in Thessaly，which，accord－ ine to the description of Livy（xxxii．13），would xcom to have been situated at no great distance from the sururces of the Spercheius．Pulemy（iii． 13. §17）mentions a place Sperchein between Echinns ：and Thebes in Plithiotis；and Pliny（iv．7．s．13） 13．ices Sperchios in Doris．It is probable that these three names indicate the same place，but that its real 1wsiti in was unknown．

sPlNA（ siva，Strab．；玉riva，Steph．B．；Eth．玉ォucions and ミmiviтns），an ancient city of Italy， situated near the southernmost month of the Padus， withu the limits of Gallia Cisalpina．It was，accord－ ing to Dinnysin，a Pelasgic settlement，and ore of the most flourishing cities founded by that people in Italy，enjoying for a considerable time the dominion of the $A$ driatic，and deriving great wealth from its commeroial relations，so that the citizens had a treasury at Delphi，which they adorned with costly oflerings．They were subsequently expelled from their city by an overwhelming force of balbarians， and compelied to nbaudon Italy．（Fionys，i．18， 28．）Stabo gives a similar accuant of the maval

## SLOLETIUM．

greatness of Spina，as well as of its treasury al Delphi； but he calls it a Greek（IIellenic）city；and Sirlax， who notices only Greek，or reputed Greck，cities， mentions Syina apparently as such．Its Greck origin is confirmed also by Justin，whose authority， however，is not worth much．（Strab．v．p．2It，ix． p． 421 ；Scyl．p． $6 . \S 19$ ；Justio，xx．1；Plio．iii． 16. s．20．）But these authorities，as well as the fact that it had a treasury at Delphi，which is undoubterlly bistorical，seem to exclude the suppasition that it was an Etruscan city，like the neighbumring Adria；and whatever be the foundation of the story of the old Pelasgic settlement，there scems oo rcason to doubt that it was really a Greek colony，though we have no account of the period of its establishment．Scy－ lax alludes to it as still existing in his time：henco it is clear that the barbarians who are said by Dio－ nysius to have driven out the inhabitants，can be no other than the neighbouring Gauls；and that the periud of its destruction was not very long before the conquest of Cisalpine Gaul by the Romans．It does not appear to have ever been rebuilt or become a Foman town．Strabo speaks of it as in lis time a mere village；and Pliny repeatedly alludes to it as a place no longer in existence．（Plin．iii．16．s．20， 17．s． 2 t ；Strab．v．p．214．）No subsequeut trace of it is found，and its site has never been ascertained． We koow，however，that it must have been sitnated on or near the southeromost arm of the Padus，which derived from it the name of Spineticum Ostium， and which probably corresponded with the modern Po di Trimaro．［Padus．］But the site of Spina must now be sought far from the sea：Strabo tells us that even in his time it was 90 stadia（11 miles） from the coast；though it was said to bave been originally situated on the sea．It is probably nuw 4 or 5 miles further inland；but the changes whith lave taken place in the chamels of the rivers，as well as the vast accumulations of allurial soil，render it almost hopeless to look for its site．

I＇liny tells us that the Spinetic branch of the Padus was the one which sas otberwise calhed Eridanus ； but it is probable that this was merely one of the attempts to comect the mythical Eridanus with the actual Padus，by applying its name to one particular branch of the existing river．It is，however，probable that the Spinetic channel was，in very early times，one of the principal mouths of the river，and much more considerable than it afterwards became．［P＇s－ Dus．］
［E．II．B．］
SI＇INAE，a place in Britannia Romana，E．of Aqua Solis（Bath）．（Itin．Ant．pp．485，486．）Now the village of Spene near Noubury in Berkishire， which has its name of new in regard to Spinac，the ancient borough．（Camden，p．166．）［T．II．D．］

SPIRAEUM（Plin．iv．5．s．9）or SPEHRAECM （I＇tol．iii．I6．§ 12），a promontory on the eastern coist of C＇eloponnesus upod the confines of the terri－ tories of Corinth and Epidabrus．For details，see Vol．I．p．685，a．

SIOLETIUM（ $\Sigma \pi \omega \lambda$ ýriov ：Eth．Spoletinus： Spoleto），a city of Umbria，situated between In－ teramna（Tirni）and Trebia（Trevi），about 9 miles S．of the sourees of the Clitumnus．Its namo is not mentioned in history as an Umbrian town， nor have we any account of its existence previous to the establishment of the Roman culony，which was settled there in B．c： 240 ，just after the close of the First Punic War（Liv，Epit．xx．；Vell．Pat．i． 14）．It was a Colonia Latima，and its name is re－ peatedly mentionced daring the Second I＇unic War．

In п. c. 217, just after the battle at the Lake Trasimenus, Hanuibal advanced to the gates of Spoletium, and made an assault upon the city, but was repulsed with so much vigour by the colonists, that he drew off his forces and crossed the Apennines into Picenum. (Liv, xxii. 9.) A fewr years later (B. C. 209) Spoletion was one of the colonics which distioguished themselves by their fidelity and zeal in the service of Rome, at the most trying moment of the war. (Id. xxvii. 10.) For some tine after this we hear but little of Spoletium, though it seems to bave heen a flourishing municipal town. In b. c. 167 it was selected by the scuate as the place of confinement of Gentins, king of 11 yria, and lis sons; but the citizens declined to take clarge of them, and they were transferred to Inuvium (Liv, x|v, 43). But in the civil war between Marios and Sulla it suffered severely. A battle was fought beneath its walls in B. c. 82, between Pompeius and Crassus, the generals of Sulla, and Carrinas, the lieutenant of Carbo, in which the latter was defeated, and compelled to take refuge in the city. (Appiat, B. C. i. 89.) After the victory of Sulla, Spoletium was one of the places severely punished, all its territory being confiscated, apparently for the settlement of a military colony. (Flor. iii. 21; Zumpt, de Colon. p. 254.) Fiorns calls Spoletitm at this time one of the "mnnicipia Italiae splendidissima;" but this is probahly a rhetorical exaggeration. Cicero, however, terms it, in reference to a somewlat eariier period, "colonia Latina in primis firma et illustris," (Cic. pro Balb. 21.) It became a municipium (in comnon with the other Latin colonies) by virtue of the Lex Julia; and does not appear to have subsequently obtained the title of a colony, though it received a fresh accession of settiers. (Lib. Col. p. 225 ; Zunspt, l.c.) It is again mentioned during the Perusian War (n.c. 41), as affurding a retreat to Munatius Plancus when he was defeated by Octavian (Appian, B. C. v. 33); and seems to have continued under the Empire to be a flourisbing municipal town, though rarely mentioned in history. (Strab. v. p. 227; Plin. iii. 14. 8. 19; Ptol. iii. 1. § 54 ; Orell. Inscr. 1100, 1103, 3966.) It was at or near Spoletium that the emjeror Aemiliaus was encamped, when the death of his rivals Gallus and Volusianus gave him temporary possessiun of the enipire; and it was there also that he was himself put to death by his soldiers, after a reign of only tbree montlis. (Vict. Epit. 31.) Spolctium is again mentioned during the Gothic Wars, after the fall of the Weatern Empire, when it was taken by the Gothic king Totila (Procop. B. G. iii. 12), who partially destroyed its fortifications; but these were restored by Narses (Ib. iv. 33). It was at this time regarded as a strong fortress, and was a place of importance on that account. Uuder the Lombards it became the capital of a duchy (about A. D. 570), the dukes of which soon readered themselves altugether independent of thic Lombard kiogs, and established their authority over a considerable part of Central Italy. The duchy of Spoleto did not cease to exist till the 12th century.

Spoletium was not situated on the Via Flaminia, properly so called. That line of highroad proceeded from Narnia to Mevania (Bevagna) by a more direct course through Carsulae, thus leaving on the right hand the two important towns of Interamna and Spoletinm. (Strab. v. p. 227.) We learn from Tacitus that this contimued to be the line of the

Flaminian Wiay as late as the time of Vespasian (Tac. IIist, iii. 60); but at a later period the road through Interamna and Spoletium came iuto general use, und is the one given in the Itineraries. (Itin. Aut. p. 125 ; Itin. Hier. p. 613.) This must have followed very nearly the same line with the modern road from Rome to Perugia, which crosses a stecp mountain pass, called Moutc Somma, between Sponleto and Terni; and this was probably the reason that this liee was aroided in the first instance by the Via Flaminia. But there must always lave been a branch road to Spoletium. and from thence, as we learn from Suetonius (lesp. 1), another branch led to Nursia in the upper valley of the Nar.

Spoleto is still a tolerably flourishing place, with the rank of a city. It has several Roman remains, among which the most intercsting is an arch commonly called the Porta d'Annibale, as being supposed tu be the gate of the city from whence that general was repulsed. There is, however, no fonndation for this: and it is doubtful whether the arch was a gateway at all. Some remains of an ancient theatre are still visible, and portions of two or threo ancient temples are built into the walls of molern clurches. A noble aqueduct, by wilich the city is still supplied with water, though often ascribed to the Romans, is not really earlier than the time of the Lombard dukes. Some remains of the palace inhabited by the latter, bnt first built by Theodoric, are also visible in the citadel which crowns the hill above the town.
[E. H. B.]
SPO'RADES ( $\Sigma \pi$ mopá $\bar{\epsilon}$ ), or the "Scattered," a group of islands in the Aegaean, Cretan, and Carpathian seas, so called becanse they were scattered throughout thesed seas, in opposition to the Cyclades, which lay round Delos in a circle. But the distinction between these groups was not accurately observed, and we find several islands sonetimes ascribed to the Cyclades, and sometimes to the Sporades. The islands usually included anong the Cyclades are given under that article. [Vol. I. p. 723.] Scylax makes two groups of Cyclades: but his southern groap, which le places off the coast of Laconia and near Crete, are the Sporades of other writers : in this southern group Scylax specifies. Melos, Cimolos, Oliaros, Sicinos, Thera, Anaphe, Astypalaea (p. 18, ed. Hudson). Strabo first mentions among the Sporades the islands lying off Crete, Thera, Anapbe, Therasia, lus, Sicinos, Lagusa, PhoIegandros (x. pp. 484, 485). Then, after describing the Cyclades, he resumes bis enumeration of the Sporades,-Amorgos, Lebinthos, Leria, Patmos, the Corassiae, Icaria, Astypalaea, Telos, Chalcia, Nisyros, Casos, the Calydnae (x. pp. 487489). Pliny (iv. 12. s. 23) gives a still longer list. An account of each island is given under its own name.

STABA'T10, in Gallia, a name which occurs in the Table on a road from Vienna (I ienne) past Cularo (Grenoble) to the Alpis Cottis (Mont Genevre). Stabatio is placed between Durotincum and Alpis Cottia. D'Anville fixed Stabatio at Monestier or Monctier near Briangon.
[G. L.]
STA'BLAE ( $\mathbf{\Sigma}$ тábtat: Eth. Stabianus; Ru. near Castell 'a Mare), a city of Campania, situated at the foot of the Jlons Lactarias, about 4 miles S. of Pompeii, and a mile from the sea. The first mention of it in bistory occurs during the Social War (B. c. 90), when it was taken by the Samnite general C. Papius (Appiad, B. C. i. 42). But it was retaken by Sulla the following year (B. c. 89), and entirely destroyed
(I'lin. iii. 5. s. 9). Nor was it ever restored, so as to resame the rauk of a tomn; Pliny tells us that it was in his time a mere village, and the name is not mentioned by any of the other geographers. It is, however, incilentally noticed both by Orid and Columella (Ovid. Met. xv. 711 ; Colum, R. R.x. 133), and seems to have been, in common with the whole coast of the Bay of Naples, a favourite locality for villas. Anong others Pomponians, the friend of the elder Pliny, bad a villa there, where the great naturalist songht refuge daring the celebrated eruption of Vesnvins in A.D. 79 , and where he perished, suffocated by the cinders and sulphureous fames (Plin. Ep. vi. 16). It is certain that Stabize was on this occasion buried under the ashes and cinders of the volcano, though less completely than I'ompeii and Herculaneum; but the site was again inhabited, and the name was retained throngbotut the period of the Roman Empire, though it appears to have never again risen into a place of any consideration. It was chiefly resorted to by iuvalidx and others, on account of its neighbourhood to the Mons Lactarits, for the purpose of adopting a milk diet (Galen, de Meth. Med. v. 12 ; Cassiod. I'ar. xi. 10 ; Symmach. Np. vi. 17). Its name is fonted also in the Tabula, and was preserved in that of Castell 'a Mare di Stabia, borne by the modern town. The Stabise of the Lower Empire seems to bave been situated on the coast, in the bight of the Bay of Naples; and probably did not ocenpy the same site with the older twon, which seems to have been sitnated about a mile inland at the foot of the hill of Gragnano. The exact spot was forgotten till the remains were accidentally brought to light about 1750 ; and since that time excavations have been frequently made on the site, but the results are far less interesting than those of Pompeii and Herculaneum. They confirm the account of Pliny, by showing that there was no town on the spot, but nuerely a row of straggling villas, and these for the most part of an inferior class. They seem to have suffered severely from the earthquake of A.D. 63 , which did sa much damage to Pompeii also. (Swinburne's Travels, sol. i. p 82.)
[E. II. B.]
STA'BULA, in Gallia, is placed by the Antmine Itin. vi. from Cambes (Gros Kembs) and xviii. from Argentovaria (Artzenkeim). These distances bring us to a place between Otmarsheim and Buntzheim, where Rhenanus, quoted by D'Anville, says that traves of an old place are found.

The word Stabula meant a station or resting place for travellers. a kind of inn, as we see from a passage of Clpian (Dig. 47. tit. 5. s. 1): "qui naves, canponas, stabula exercent; " and the men who kept these places were "Stabularii."
[G. L.]
st'A'BULUMI, AD, in Gallia, is placed by the Antonine ltin. between Salsulae (Sulses) and Summus Pyrenaeus, or the pass of the Pyrences at Bellegrirde. It is supposed to be Le Boulu, which looks like a part of the old name, on the left bank of the Terk. The distances in the Itin. both from Sulsulac to Ad Stabulum, and from Ad Stabnlum to Summns l'yrenaeus, are a great deal ton much. The name, however, and the place Le Boulu on the Tich seem to fix the porition of this Stabulum. [Centurhones, An; Sthbila.] [G. L.]

STA'BULUN DIOMEDIS (ftin. Ant. p. 331 ; ff. Ifier. p. 603), a place on the coast of Thrace, on the Via Eenatia, 18,000 paces, according to Itin. Ant., 12.000 , accoring to It. Hier., from I'rovia, or Maximianopolis; jrobably the same as lling (iv.
11. r. I8) calls Tirida : "Oppidmn fuit Tirida, Dio medis equormm stabulis dirum." This Diomedes was king of the Bistones in Thrace, and was in the habit of throwing strangers to be devoured by his savaro horses, till at length he himself was punished in the kame way by Hercules. (Mela, ii. 2. § 8.) Lapie places it pear the modern Iassikeni.
[J. R.]
STA'BILLUM NOVUM, a town probably of the Cosetami, in Hlisparia Tarraconensis. (Itin. Ant. p. 390.) Variously identified with Villanueva de Sitges, 1illanueva, and Solivela, or Sagarre.
[T. H. D.]
STACHIR ( $\Sigma \tau \dot{\alpha} \chi \in \iota \rho$, l'tol. iv. 6. §§ 7 and 8 ), 3 river on the W. coast of Libya Interior, which rose in Mount Ryssadimm. Not far from its source it formed a lake named Clonia, and after flowing in a westerly direction, discharged itself into the Simos Hesperius, to the SK. of the promontory of Ryssadium. It is probably the same river which Pliny (v. 1, s. 1) ealls Salsus, and may be the modern St. John or St. Antonio river, also called Rio de Guaon.
[T. H. W.]
STAGEIRA, STAGEIRUS ( $\Sigma \tau$ d́y $\epsilon \rho \frac{1}{2}$, Herod. vii. 115 ; Thnc. iv. 88 , v. 18 ; Strab. vii. p. 331, Fr. 33. 35 ; ミтáyєıpa, al. ミ̇távтєєpa, Ptol. iii. 13. $\$ 10$; Plin. iv. 17 , xvi. 57 ), a town of Chalcidice in Alacedonia, and a colony of Andros. The army of Xerxes, after passing throogb the plain of Sylens, passed through Stageirns to arrive at Acanthns. In the eighth year of the Peloponnesian War it surrendered to Brasidas, and two years afterwards was included in the treaty between Sparta and Athens. It was the birthplave of Aristotle. Alexander, from regard to his great teacher, restored this town, which with other Grecian colonies in that quarter had fallen into decay, when W. Thrace bad becone part of the Mincedonian kingdom. (Plnt. Alex. 7; Diog. Laert. v. § 4 ; Theophr. H. P. 102; Aelian, V. II. iii. 17.) But the improvement was not permanent, and no memorial of the birthplace of Aristotle remains, unless the coins inscribed 'Opoaropecty are of this place, as lickbel (vol. ii. p. 73) supposed, on the anthority of a fragment in the Geotraphi Minores (vol. iv. p. 42, ed. Iludmu). Leake (Northern Greecc, vol, iii. p. 168) has fixed the site at Stuvrós, which he emssiders to be a contraction of the old name; it is almost presumption to differ with so great an authority in comparative geography; hut it may be observed that the name Stauros or "Cross" is common enouyh in Greece, and Ml: Buwen (Mount Athos, fc. p. 120, London, 1852) has shown, from a comparison with the passage in Hurodotns (1. c.), tbat the traditional beliet of the Macedonian peasants in identifying Isboros or Nizoro, as it is called by them, with Stayeirus, rests upon satisfactory grounds. The position of this village, on the s. face of a wooded mountain which commands a view of Dit. Atbos and the Acgeas, is very mncb that of an Hellenic city, and there are vast substructions of Ilcllenic masonry all around. The Epitorniser of Strabo (vii. p. 331), who lived not long before the elcventh century, has a port and island called Caprus (Kámpos) near Stageirns, which is probably the island of Leftheritha near C. Marmairi; Leake (l. c.) prefors, in accordance with his riews that Stamris represents Stageirus, the port and island of Lybtididha.
[E. B. J.]
STAGNA VOLCARUM, on the coast of Gallia Narbonensis. Mela (ii. 5) speaks of the Stauna Volcarum, which he places W. of the Rbone. They are the long line of ctangs between Aigues-Morte
and Agde，separated from the land by a lone，narrow， Ilat，which widens near Cette，where the Mons Setius is．These lagunes are the E＇tangs de Tau，de Fron－ tignan，de Maguelone，and others．Avienns（Or． Marit．58）mentions the Taurus or E＇tang de Tau：
＂Taurum palvdem namqne gentiles vocant．＂
［Fecti Jugum：Ledus］．
［G．L．］
STALIOCA＇NUS PORTUS（ $\Sigma(\tau) \times \lambda$ сокауঠेs $\lambda_{s}$ $\mu \dot{\eta} \nu$ ）．Ptolemy（ii．8．§ 2）places this port betreen （iobaeam Promontorium［Gobafom］and the mouth of the Tetns，on the coast of Gallia Lugdunensis． D＇Anville（Notice，ecc．）found in a manuscript plan of the Anse du Conquet the name of Port Sliocan， N．of Cap Maké，at the bottom of the road of Loo－ Christ．Lobineau in bis History of Bretagne says that the name means White Tower，and that there were traces of a port there，censtracted of brick and cement．Gosselin places the Staliocamus on the N．coast of Bretague，at the outlet of the river on which Morlaix stands．It is impossible to deter－ mine which of the numerous hays on this irregular coast is Ptolemy＇s Staliocanus．
［G．L．］
STANACUM，a place in Noricum，on the road leading along the Danube from Augusta Vindeli－ carum to Carnuntum and Vindobona．（It．Ant． p．249；Tab．Peut．）Its exact site is uncertain． （Comp．Muchar，Norikum，i．p．285．）
［L．S．］
STATIELLI（ $\Sigma \tau a \tau i \in \lambda \lambda \circ t$ ），a tribe of Ligurians， who inhabited the oorthern slopes of the Apennines， mm bath sides of the valley of the Bormida．Their locality is clearly fised ly that of the town of Aquae Statiellae，now Acqui，which grew up under the Juman Empire from a mere watering place into a large and populous town，and the chief place of the surrounding district．The Statielli are mentioned by Livy in B．c．173，as an independent tribe，who were attacked by the Roman consnl，MI．Popillius： after defeating them in the field，he attacked and took their city，which Livy calls Carystus，and，not content with disarming them，sold the captives as slaves．This proceeding was severely arraigned at Rome by the tribunes，especially on the ground that the Statielli had previously been uniformly faithful to the Roman alliance；but they did not succeed in enforcing reparation（Liv，xlii．7，8，9，21）．Livy writes the name Statiellates，while Decimus Brutus， Who crossed their territory on his march from Mu－ tina，B．c．44，and addresses one of his letters to Cicero from thence，dates it＂finibus statiellensinm＂ （Cic．ad Fam．xi．11）．Pliny，who enumerates them among the tribes of Ligurians existing in his time，calls them Statielli，and their chief town Aquae Statiellorum（Plin．iii．5．s．7）．The site of Carystus，mentioned only by Livy，in the passage above cited，is wholly unknown．［E．H．B．］

STATO＇NIA（Eratwvia：Eth．Statoniensis），a town of Southern Etruria，which is mentioned by Strabo anong the smaller towns（ $\pi 0$ 入ínvat）in that part of Italy．（Strab．v．p．226．）Pliny also mentions the Statones among the municipalities of Etruria（iii．5．5．8），but Deither author attords any nearer clue to its sitnation．We learn，however，that it was celehrated for its wine，which was one of the most noted of those grown in Etruria（Plin．xiv． 6．s．8），and that there were valuable stone－quarries in its territory．（Vitruv．ii．7．§ 3．）From the terms in which Vitrnvius speaks of these，it seems probable that the district of Siatonia，which be calls ＂praefectura Statoniensis，＂adjoined that of Tar－ quinii ；and both Pliny and Seneca sllude to the
existence of a lake＂in agro Statoniens：，＂it which there were floating islands．（Plin．ii．95．天．96； Senec．N．Q iiii．25．）This catl lardly be any other than the smail Lagn di Mesann，a few miles W．of the more extensive Lago di Bolsena：we must there－ fore probably look for Statonia between this nad Tarquinii．But within this space several sites have been indicated as possessing traces of ancient habi－ tation；among others，Farnese and Castra，the last of which is regarded by Claver as the site of Sta－ tunia，and has as plausible a claim as any other． But there is nothing really to decide the point． （Cluver，Ital．p． 517 ；Dennis＇s Etruria，vol．i．pp． 463 468．）
［E．II．B．］
STATUAS（AD），the name of two places in Pannonia，one of which was situated on the Danube，a little to the west of Bregetin（ $h$ ．Ant． p．246；Notit．Imp．），and the other further sonth－ east，in the neighbourbood of Alisea and Alta Ripa （It．Aut．p．244），which Muchar（Norikum，i．p． 264）identifies with Ssekszarcl．
［L．S．］
STATUAS（AD），a town in the territory of the Contestani in Hispania Tarraconeosis，（Itin．Ant． p．400．）Variously identified with Adsaneta and Xativa or S．Felipe．
［T．H．D．］
STAVANI（ミtavavol，Ptol．iii．5．§ 25），a people in Europead Sarmatia，at the N．foot of Mons Bo－ dinus．Ukert（iii．2．§ 435）conjectures that we shonld read $\Sigma$ İ $\lambda a v a ́ v o t$, that is，Slavi，and seeks them on the Dunäa and the Itmensee．
［T．H．D．］
STECTO＇RIUMI（ $\Sigma \tau \epsilon \kappa \tau$ о́pion：Eth．$\Sigma \tau$ ткторпעós）， a town of Phrygia，between Peltae and Synuala． （Ptol．v．2．§ 25；Paus 2．27．§ 1．）Kiepert（in Franz＇s Fünf Inschriflen，p．36）identifies it with the modern Afium Karahissar．（Comp．Sestiui， Num．Vet．p．126．）
［L．S．］
STEI＇RIA．［ATTICA，p．332，a．］
STELAE（ $\Sigma \tau \tau \bar{\eta} \lambda a t$ ，Sieph．B．s．v．），a Cretan city which is described by the Byzantine geographer as being near twe towns，which are called，in the pub－ Jished editions of his work，Parsesus and Rbi－ thymna．In Mr．Pashley＇s map the site is fixed at the Mohammedan village of Philippo on the route from Kasteliana（Inatus）to Hoghias Dheka （Gortyna）．
［E．B．J．］
STELLA＇TIS CAMPUS was the name given to a part of the rich plain of Campania，the limits of which cannot be clearly determined，but which appears to bave adjoined the＂Falernus ager，＂and to have been situated likewise to the N ．of the Vulturnus．Livy meations it more than once during the wars of the Romans with the Samnites（ix．44， x．31），and again during the Second Punic War， when Hannibal found himself there by an error of his guides（Liv．xxii．13）．From his expressions it woold appear to bave adjoined the＂Calenus ager，＂ and apparently was the part of the plain lying between Cales and the Vulturnus．It was a part of the public lands of the Roman people，which the tribune Rullus proposed by bis agrarian law to parcel out among the poores citizens（Cic，de Leg．Agr，i．7．ii． 31 ）：this was for the time successfully opposed by Cicero，but the measure was carried into effect a few years later by the agrarian law of Caesar，passed in his consulship，B．C． 59 （Suet．Caes．20）．The statement of Suetonius that the districl thus named was previously regarded by the Romans as conse－ crated，is clearly negatived by the language of Cicero in the passages just referred to．The name of Stel－ latinus Ager seems to have been given to a district in quite another part of Italy，forming a part of the

## STOBI．

territory of Capena in southern Etruria．It was from this district that the Stellatine tribe derived its nathe（Fest，\＆．v．Stellatinn）．
［E．H．B．］
STENA，a station in Nacedonia，on ihe road from Tamriana（Doïrein）to Stohi（reut．Tab．），which is evidently the pass now cailed Demirkapi，or＂Iron Gate，＂where the river Axins is closely bordered by perpendictuar rocks，which in one place have been excavated for the road（Leake，Northern Gireece， vol．iii．p．442．）
［E．B．J．］
STE NTOMA I．ACUS（ $\leq \tau \in v \tau o p i s ~ \lambda i \mu \nu \eta$ ，Herod． vii． 58 ；Acropol．p．64），a lake on the south－east coust of Thrace，formed by the Hebras，and opening into the Aecean near the town of Annos．Pliny （iv．11．s．18）ineorrectly places on it a Stisntoris Fonses；and Mannert conjectures that perhaps the risllt reading in Herodutus（l．c．）is $\lambda i \mu \hat{v} \nu \alpha$, not $\lambda i \mu \nu \eta \nu$ ．
［J．R．］
STENUS a river of Thrace，mentioned by Mela moly（ii．2．§ 8）at near Maronea，on the south coast． The name is probably corrupt，as it occurs in the MSS．in a great variety of forms，－Stenos，Stonos， Shoenus，Sicenus，Sithenos，\＆c．（See Tzschucke， ad lor．）．
［J．R．］
STENYCLA＇RUS（ $\Sigma \tau \in \nu u ́ r \lambda a p o s, ~ \Sigma T e v u ́ k \lambda \eta p o s: ~$ Eth．ミTevek入ńpzos），in town in the north of Mes－ semia，and the capital of the Dorian conquerors， built by Cresphontes．Andania bad been the an－ cient capital of the country．（Paus，iv．3．§7； Strab．viii．p．361．）The town afterwards ceased to exist，but its name was given to the northern of the two Messenian plains．（Paus，iv，33．§ 4，iv． 15．§8：Herod．ix．64．）［Messemia，p．341．］

STEPHANAIHANA，more correctly，perhaps， Stephat Fanum，a place in Hllyris Graeca，on the Viai Fqnatia（Itin．Ilieros．p．608）．It was the castle of St．Stephen（ $\tau 0 \hat{v}$ á خiou $\Sigma \tau \epsilon \notin \dot{\alpha} \nu o v$ ），repaired by Justimian．（Procop，de Aed．iv．4．）Lapie places it on the river Boscneviza．
［T．II．D．］
STEPHANE（ $\mathbf{\Sigma} \tau \in \phi \dot{v} \eta$ ），a small port town on the coast of Paphlagonia，according to Arrian（Peripl， I．E．1．15） 180 stadia east of Cimolis，but accerding to Marcian（p．72）only 150．The place was me itioned as early as the time of Hecatacus as a town of the Mariandyni（Steph．B．s．$n, \mathbf{\Sigma} \tau \in \phi$ avis）， under the name of Stephanis．（Comp．Seylax，p．34； Ptol．r．4．§ 2．）The modern village of Stephanio or．Estifar probably occupies the site of the ancient Steplaime．
［L．S．］
 weotern Germany，probably in the country of the Bructeri or Marsi，the exact site of which cannot be ：Lscertained．（Ptol．ii．1i．§ 27．）
［L．S．］
STIPHANE（さтぃф́pŋ），a lake in the north－ wetern part of Fontus，in the dintrict called Phazemonitis．The lake was entensive and abounded in fish，and its shores afforded excellent pasture （Strab，xii．p．560．）Its modern name is Bughaz Kicui Ghiewl．（Hamilton，Researches，i．p．33G． f（ill．）
［L．S．］
STITRA．［Atrics，p，332，a．］
STllels（さtipus Eth．Stipitps），a town of Phocis situated 120 stadia from Chaerosein，the road between the two phaces rumbing across the mountains．The iuhabitants of Stiris claimed descent from an Atloc－ mian colony of the Attic demns of Steiria，led by l＇etets，when he was driwen out of Attica by Aegeas． Pausanias describes the city as situated upon a rocky summit，with only a few wells，which did not supply water fit for drinking，which the inhabitants whtained from a fountain，four stadia below the city，
to whith formb．tin there was a descent excavated among the rocks．The city contained in the time of Patssanias a temple of Artemis Stiritis，made of crade brick，containing two statucs，one of Pentelic marble，the other of ancient workmanship，covered with handages．（1＇aus．x．35．§§ 8－10．）Sitins was one of the Plocian cities destroyed by Philip at the close of the Sacred War（Pans，x．3．§ 2）；but it was afterwards rebuilt and was inhabited at the time of the visit of Pausanias．The ruins of Stiris， now called Palei khora，are situated npon a tabular height defended by precipitous rocks，about a quarter of an hour＇s ride from the monastery of sit．Luke． The sumnit is surrounded with a wall of loose con－ struction，and the surface of the rock within the inclosure is excavated in many places for habitations． The fountain of water described by Pausanias ia probably the copions source within the walls of the monastery issuing from the side of the hill．This fountain is mentioned in an inscription fised in the outer wall of the church．（Leake，Northern Greece， vol．ii．p． 528 ，seq．）

STLU1PI or STLUPPl（ ii．16．（17．）§ 9），a place in Liburnia．The inha－ bitants are called Stlupini by Pliny（iii．21．s．25）． Perhaps the present Slumi．
［T．H．D．］
STOBI（ $\Sigma \tau 666 t$, Strab．vii．p． 329, Ir．4，viii．p． 389 ；Ptol．iii．13．§4；Liv，xxxiii．19，xxxix． 59 ． xl．21，xlv． 29 ；Plin．iv．17），a town in the NW．of Paeonia in Macedonia，which appears to have been a place of some importance under the Macedonian kings，althougb probably it had been greatly reduced by the incursions of the Dardani，when Philip had an intention of founding a new city near it in memory of a victory over these troublesome neigh－ bours，and which he proposed to call Perseis，in honour of his son．At the Roman conquest，Stobi was made the place of deposit of salt，for the supply of the Dardani，the monopoly of which was given to the Third Macedonia．In the time of Pliny（l．c．） Stubi was a mumicipal town，but probably as late as the time of Heliogabalus it was made a＂colonia．＂ When about A．D． 400 Maccionia was under a ＂consular，＂Stobi herame the chief town of Mace－ donia Il or Salutaris（Marquardt，in Becker＇s Rön． Alter．vol．iii．pt．i．p．118）．According to the Tabular ltineray it stood $47 \mathrm{M} . \mathrm{P}$ ．from IIeracleia of Lyncus，which was in the Via Egnatia，and 55 M．P．from Tauriama，and was therefore probably in the direct road from Heracleia to Serdica．The position must hnve been therofore on the Erigon， 10 or 12 miles above the junction of that river with the Axius， n situation which agrees with that of Livy，who describes it ns belonging to I eariopus of Paconia，which was watered by the Erigon．Stobi was a point from which four roads issued．（Pent． Tab．）One proceeded NW．to Scupi，and from thence to Naissus on the great SE，ronte from Viminaciam on the Daumbe to Byzautium；the second NE．to Sierdica． 100 M. P．SE．of Naissus on the same route； the third SE．to Thessalonica；and the fourth SW： to lleraclen，the last formine $\pi$ communicntion with that central point on the Via lignatia leading through Stobi from all the plinces on the three former routes． In A．D． 479 Stobi was captured by Thendoric the Ostrogoth（Malch．Philaulelph．Exce，de Leg．Num． pp．is－86，ap，Muller，Fragm．Ilist．Graec．vol is． p．125）；and in the Bulmarian campaign of A．11． 1014，it was occupied by Basil II．and the Bezzantine army（玉тómeiov，Cedren．p．709）．The eeography of the basin of the Erigon in which Stobi was sitnated
is so imperfectly known that there is a difficulty in identifying its site: in Kiepert's map (Europaïsche Turkei) the rnins of Stobi are marked to the W. of Demirkapi, or the pass of the "Iron Gate." (Leake, Northern Greece, vol. iii. pp. 306, 440.) [E. B. J.]
 iv. 3. § 5), a headland of Numidia, between the promontory of Hippas and the town of Aphrodisium, at the E. point of the Sinus Olchacites. Now Cop Ferro or Ras Hadid.
[T. H. D.]
 CHADES, on the S, coast of Gallia. Straho (iv. p. 184) speaks of the Stocchades islands lying off the coast of Narbonensis, five in number, three larger and two smaller. They were occupied by the Massaliots. Steph. B. (s. v. ミrouqáס̄es) says, "ishands near Massalia; and they are also named Ligystides." Ptolemy (ii. 10. §21) also mentions five islands Stoechades, which be places in the meridian of the Citharistes Promontorinm [Citharistes].
Pliny (iii. 5) mentions only three Stoechades, which he sars were so named from being in a line ( $\sigma$ roì ${ }^{\circ}$ ), and he gives to them the Greek names respectively Prote, Mese or Pomponiana, and Hypaea. These must be the islands now named Isles dHïres, of which the most westerly is Porqueroles, the central is Portcroz, and the most easterly is TIsle du Levant or du Titan, opposite to the town of Hïres, in the department of Vor. These islands are mere barren rocks. Besides the three larger islands, which have been enomerated, there are two others at least, mere rocks, l'Esquillade and Bagneau, which make up the number of five. Coral was got in the sea about the Stoechades (Plin. xxxii. 3), and is still got on this part of the French coast.

Agathemerus (Geog. Min. ii. p. 13, ed. Hudson) places the Stwechades along the coast which was occupied by the settlements of the Massaliots; but he fises the two small Stoechades near Massilis. These are the two dismal rocks named Ratoneau and Pomègue which are seen as soon as yon get ont of the port of Marseille, with some still smaller rocks near them [MassiLIa, p. 292], one of which contains the small fort named Cháteus d'If.

The Stoechades still belonged to the Massal!ots in Tacitus' time (Hist. iii. 43). The Rornans who were exiled from Rome sometimes went to Massilis, as L. Scipio Asiaticus did; if he did not go to the Stoechades as the Scholiast says (Cic. pro Sest. c. 3) ; but the Roman must have found the Stoechades a dull place to live in. When Lacan (iii. 516) says " Stoechados arra," he uses a poetic license; and Ammianus (xy. 11) as usual in his geography blunders when he places the Stoechades about Nicaea and Aotipolis (Nizza, Antibes).
[G. L.]
STOEN1. [Evganes.]
STOMA, AI, a place in Moesia on the Southernmost arm of the Danube. (Tab. Peut.; Geogr. Rav. iv. 5.) Mannert (vii. p. 123) places it by the modern Zof.
[T. H.D.]
Stomalimne. [Fossa Mariana.]
STRADELA, a towu of Palestine mentioned only in the Itioerarium Hierosolymitanum as x. I.P. from Maximianopolis, and xii. MIP. from Sciopolis (i. e. Seythopolis), and identified by the writer with the place where Ahab abode and Elias prophesied, and -by a strange confusion-where David slew Goliath (p. 586, ed. Wesseling). The name is undoubtedly a corruption of Esdraela, the classical form of the Scriptural Jezreel. [Espisaela.]

STRA'GUNA (\$payóva), a tomn in the south-
eastern part of Germany, either in the country of the Silingae or in that of the Didnni, on the northern slope of Mons Asciburgins. (Ptol, ii. 11.§28.) If the resemblance of names be a safe guide, we might identify it with Strigau, though this bardly agrees with the degrees in which it is placed by Ptolemy; whence others suppose it to have been situated at Strehlen, betwecn Schweidnitz and Brieg.

STRAPELLUA. [APULIA, p. 167.]
STRA'TIA. [ENispe.]
STRATONICE ( $\Sigma \tau \rho \alpha \tau o v i k \eta$, Ptol. iii. 13. § 1I), a town of Chalcidice in Macedonia, which Ptolemy places on the Siagitic gulf. Leake (Northern Greece, vol. iii. p. 160) considers that there is here the same mistake as in the case of Acanthus [Acantia US], and refers it to the Hellenic remains on the coast of the Sirymonic gulf in the confined valley of Stratomi. [E.B.J.]
 Ptol. v. 2. § 20: Eth. $\Sigma$ тpatavikés), oue of the most important towns in the interior of Caria, was situated on the sonth-east of Mylasa, and on the south of the river Marsyas. It appears to have been founded by Antioclius Soter, who named it atter his wife stratonice. (Strab. xiv. p. 66i0; Steph. B. s. v.) The subsequent Syro-Macedomian kings adorned the town with spleadid and costly buildings. At a later time it was ceried to the Phodians. (Liv. $x \times x i i i .18,30$.) Mithridates of Pontus resided for some time at Stratoniceia, and marricd the daughter of one of its principal citizens. (Appian, Mithr. 20.) Some time after this it was besieged by Labienus, and the brave resistance it offered to him entitled it to the gratitude of Augustus and the Senate (Tac, Ara. iii. 62; Dion Cass. xlviii. 26). The emperor Hadrian is said to have taken this town under his special protection, and to bave changed its name into Hadrianopolis (Steph. B. l. c.), a name, however, which dees not appear to have ever come into nse. Pliny (v. 29) enumerates it among free cities is Asia. Near the town was the temple of Zeus Chrysaoreus, at which the confederate towns of Caria held their meetings ; at these meetings the several states had votes in proportion to the number of towns they possessed. The Stratoniceans, thongh not of Carian origin, were admitted into the confederacy, because they possessed certain small towns or villages, whicn formed part of it. Denippus, surnamed Catochas, according to Cicero (Brut. 91) one of the most distinguished orators of his time, was a native of Stratoniceia. Stephanus B. (sv. 'Epud's) mentions a town of Idrias in Caria, which had previously been called Chrysaoris; and as Herodotus ( v .118 ) makes the river Marsyas, on whose banks stood the white pillars at which the Carians held their national meetings, flow from a district called Idrias, it is very probable that Antiochus Soter built the new city of Stratoniceia upon the site of IUrias. (Leake, Asia Minor, p. 235.) Eskihissor, which nors occupies the place of Stratoniceia, is only a small village, the whole neighbourhood of which is strewed with marble fragments, while some shafts of colomens are standing single. In the side of a bill is a theatre, with the seats remaining, and ruins of the proscenium, anoong which arc pedestals of stataes, some of which contain inscriptions. Outside the village there are broken arches, with pieces of massive wall and marble coflins. (Chandler, Trovels in Asia Minor, P. 240; Leake, Asia Minor, p. 229; Fellows, Asia Minor,

STRATONIS INSULA，an island in the Ara－ Lian gulf between the burbour Elaea and the har－ bour Siba．（Strab．xvi．p．770；Plin．vi．29．s．34．）

STRATOAIS TURMIS．［CaEs．abeli，No． 4. P． 470.$]$

STRATUS（ミтpaitos：Êth．ミitpários：its ter－ ritory in $\mathbf{\Sigma}$ тpatikht：Surovigh），the chief town of Acarnania，was situated in the interior of the country， in a fertile plain on the right bank of the Achelous． It commanded the principal approaches to the plain from the northward，and was thus a place of great military importance．Straho（x．p．450）places it 200 stadia from the mouth of the Achelous by the conrse of the river．At the distance of 80 stadia S ．of the town the river Abapns flowed into the Achelous； and 5 Roman miles to its N．，the Achelous received another tributnry stream，named Petitanrus．（Thuc． ii．82：Liv aliii．22．）Stratus joined the Atbenian alliance，with most of the other Acamanian towns， at the commencement of the Pelopotnesian War．In B．C． 429 it was attacked by the Ambraciots，with a namber of barbarian auxiliaries，aided by some Pelo－ pounesian troops，under the command of Cnemus； but they were defeated under the walls of Stratus， and obliged to retire．Thucydides describes Stratus at that time as the chief town of Acarnania，which it is also called by Xenophon in his account of the expedition of Agesilaus into this conntry．（Thuc． ii．So，seq．，iii．106；Xen．Hell．iv．6．）When the Aetolians extended their dominions，Stratus fell into the hands of this people，whence it is called by Livy a town of Aetolia．It is frequently mentioned during the Macedonian and Roman wars．Neither Plalip V．nor his successor Perseus was able to wrest the town from the Aetolians；and it remuined in the puwer of the latter till their defeat by the Romans，who restored it to Acarnania，together with the other towns，which the Aetulisns had taken from the Acarnanians．（Polyb．iv．63，v．6，7，13，14，96； Liv．xxxvi．11，xlini．21，22．）Livy（（liii．21）gives an erroneous description of the position of Stratus when he says that it is situated above the Ambra－ cian gulf，near the river Inachus．

There are consideratle remains of Stratus at the modern village of Surovigli．The entire circuit of the city was about $2 \frac{1}{5}$ miles．The eastern wall followed the bank of the river．Leake diacovered the remains of a theatre situated in a hollow：its interior diameter below is 105 feet，and there seem to have been about 30 rows of seats．（Leake， Northern Greece，vol．i．p．137，seq．）

STRAVLANAE or SHRAYIA＇NA，a town in Lower Pamonia，on the road from Siscia to Mursa， of which the exact site has not been ascertained． （It．Ant．p． 265 ，where it appears in the ablat．furm Stavianis．）

STYLLA＇NGIUM（之itudad́ $\gamma \gamma \circ$ ov，Polyh．iv．77， 80；ミitu入入áriov，Steph．B．s．v．：Eth．ミтu入入á fios， ミтu入入aqєє́́s），a towa of Triphylia in Elis of un－ certain site，which surrendered to Philip in the Sucial War．

STY＇MBARA（\＄$\quad$ тímbapa，Strab．vii．p． 327 ； ミtuéép $\bar{f}$ a，Polyb．xxviii．8．§8；Stubera，Liv．xxxi． 39 ，xliii． 20,22 ），a town on the frontier of regal Macedonia，which is by some assigned to Deuriopus， and by others to Pelagonia，which in the campaign of B．c． 400 was the thind encampment of the consul Sulpicios ；it must be looked for in the basin of tbe Ergon．（Leake，Northern Greece，vol．iii．p． 306．）
［E．B．J．］
STYMPHA＇LIS，a district annexed by the Ro－ mans，along with Atintauia aod Elimiotis，to Mace－ donia upon the conquest of this kingdom，A．D． 1 C8． （Liv，xlv，30．）From the mention of this district along with Atintania and Elimiotis，which were purtions of Epeirus upon the borders of Thessaly，it would appear that Stymphalis is only another form of the more common name Tymphalis or Tym－ phaea；though it is true，as Cramer has observed， that Diodorus has mentioned Stymphalin（Diod．xx． 28），and Callimachos speaks of the Stymphalian oxen in that territory（Hymn，in Dian．179）． Ptulemy（iii．13．§ 43）likewise mentions a towo Gyrtuna in Stymplalia，but in this passage other MSs，read Tymplalia．（Cramer，Ancient Greece， vol．i．p．198．）
STYMP＇HA＇LUS（ $\tau \tau v ́ \mu ф \propto \lambda o s, ~ \Sigma \tau u ́ \mu \phi \eta \lambda o s$, Paus． et alii；тঠ ミтúuфŋлоу，Schol．ad Pind．Ol．vi． 129 Styimphalum，Plin．iv．6．s． 10 ；Stymphala，Lucret．
 a town，district，mountain，and river in the NE．of Arcadia．The territory of Stymphalus is a plain， about six miles in leagth，boonded by Achaia on the N．，Sieyonia and Paliasia on the E．，the territory of Mantineia on the S．，and that of Orchomenus and Plieneus on the 11 ．This plain is shut in on all sides by mountains．On the N．rises the gigantic mass of Cyllene，from which a projecting spor， called MIt．Stymphalos，descends into the plaio． （ミтíифа入os jpos，Ptol．iii．16．§ 14 ；Hesych．s．v．； nivalis Stymphalas，Stat．Sitc．iv．6．100．）The mountain at the southern end of the plain，opposite Cyllene，was called Apelaurum（ $\tau \dot{\text {＇}}$＇ $\mathrm{A} \pi \in \lambda a v p o \mathrm{y}$ ，

Polyb．iv．69）${ }^{*}$ ，and at its foot is the kata－ véthra or subterraneons outlet of the lake of Stym－ phalus（ $\grave{\eta} \mathrm{\Sigma} \tau u \mu \phi \alpha \lambda) s ~ \lambda(u \nu \eta$, Strab．viii．p． 37 t ； iो $\Sigma \tau u \mu \phi \eta \lambda i \eta \lambda(\mu v \eta$ ，IIerod．vi．76）．This lake is formed partly by the rain－water descending from Cyllene and Apelauram，and partly by thiree stremms which flow into it from different parts of the plain．From the west descends a small stream，which rises in Moont Geronteium in the ueighbourhood of Kastania：and from the cast cormes another streann，which niscs near Dusa．But the most important of the thrce streams is the one which rises on the northern side of the plain， from a copious kefalóvrysi．In summer it flows about two miles through the plain into the kata－ vóthra of Apelaurom；but in winter it becumes almost immediately a part of the waters of the lake， though its coursc may be traced throughe the shal． lower water to the katavóthra．This streath was called Stymphalus by the ancients；it uss regarded by them as the principal source of the lake，and was universally believed to make its reappearate，after a subterranead course of 200 stadia，as the river Erasinus io Argolis．（Herod．vi．76；Faus，i．3．§ 5，ii．24．§ 6，viii．22．§ 3 ；Stral．viii．p． 371 ； Angos，Vol．1．p．201，a．）The Stymplahin wor－ shipped the Erasinus and Metope（Mєтஸ́т $\boldsymbol{\eta}$ ，Aelian， V．H．ii．33），whence it bas been concluded that Metope is only another name of the river Strm－ phalus．Metope is also mentioned by Callinachus （Hymn．in Jov．26），with the epithet pebily（no－入úoteios），which，as Leake ohserves，seems not very appropriate to a streant issuing in a body from the earth，and flowing through a marsh．（Peluponnesiaca， p．384．）The water，which formed the soorce of the Stymphalus，was conducted to Corinth by the emperor Hadrian，by means of an aqueduct，of which considerable remains may still be traced．The state－ ment of Pausanias，that in summer there is no lake，is not correct，though it is coufined at that time to a small circoit round the katavóthra．As there is uo odtlet for the waters of the lake except the katavothra， a stoppage of this sobterraneous chamel ly stones， sand，or any other sulstance occasions an inundatiun． In the time of Pausanias there eccurred such an iouadation，which was ascribed to the anger of Artemis．The water was said to bave covered the plain to the extent of 400 stadia；but this number is evidently corropt，and we ought probably to read $\tau \in \sigma \sigma a p \dot{k} \kappa \nu \tau a$ instead of $\tau \in \tau$ ракобious．（l＇aos．viil． 22. § 8．）Strabo relates that Iphicrates，when be－ sieging Stymphalas without success，attempted to obstruct the katav6thra，bnt was diverted trom lis prorpose by a sign from heaven（viii．p．389）． Strabo also states that originally there was no sub－ terraneous outlet for the waters of the lake，so that the city of the Stymphalii，which was in his time 50 stadia from the lake，was originally sitaated upon its margio．But this is clearly an error，even if has statement refers to eld Stymphalus，for the breadth of the whole lake is less than 20 stadia．

The city derived its name from Stymphalus，a son of Elatus and grandson of Arcas ；hut the anctent city，in which Temenus，the son of Pelaspus，diwelt， had entirely disappeared in the time of Pacsathits，

[^30]and all that he could learn respecting it was, that ITera was formerly worshipped there in three different sanctuaries, as virgin, wife, and widow The modern city lay upon the sonthern edge of the lake, about a mile and a half from the katavóthra, and upon a rocky promontory connected with the mountains behind. Stymphalus is mentioned by Homer (Il. ii. 608), and also by l'indar (OL. vi. 169), who calls it the mother of Arcadia. Its name does not often occur in history, and it owes its chief importance to its being situated upon one of the most frequented rontes leading to the westward from Argolis and Corinth. It was taken by Apollonides, a general of Cassander (Diod, six. 63), and subsequently belonged to the Achaean League (Polyb. ii. 55, iv. 68, \&c.). In the time of Pausanias it was included in Argolis (viii. 22. § 1). The only building of the city, mentioned by Pausanias, was a temple of Artemis Stymphalia, under the roof of $\pi$ bich were figures of the birds Stymphalides; while behind the temple stood statues of white marble, representing young women with the legs and thighs of birds. These hirds, so celebrated in mythology, the destruction of which was one of the labours of Heracles (Dict. of Biogr. Vol. II. p. 396), are said by Pansanias to be as large as cranes. but resembling in form the ibis, only that they have stronger beaks, and not crooked like those of the ibis (viii. 22.85 ). On some of the coins of Stympbalus, they are represented exactly in accordance with the description of Pausanias.

Tbe territory of Stymphalus is now called the vale of Zaraki, from a village of this rame, sbout a mile from the eastern extremity of the lake. The remains of the city upon the projecting cape already mentioned are more important than the carsory notice of Pausamias would lead one to expect. They cover the promontory, and extend as far as the fountain, which was included in the city. On the steepest part, which appears from below like a separate hill, are the ruins of the polygonal walls of a small quadrangular citadel. The circuit of the city walls, with their round towers, may be traced. To the east, beneath the acropolis, are the foundations of a temple in antis ; bnt the most important ruins are those on the southern side of the hill, where are numerous remains of bnildings cut out of the rock. About ten minntes N. of Stymphalus, wre the ruins of the medieval town of Krónia (Leake, Murea, vul, iii. p. 108, seq. ; Peloponnesiaca, p. 384 : Boblaye, Recherches, fen, p. 354 ; lioss, Reisen im Prloponnes, p. 54 ; Curtius, Peloponnesos, vol. i. p. 201, scq.).

STYRA ( $\tau$ à $\mathbf{\tau}$ úpa: Eth. ミitupeús: Stura), a town of Enhoea, on the W. cuast, N. of Carystus, and nearly opposite the promontory of Cynosura in Attica. The tusen stood near the shore in the inner part of the bay, in the niddle of whith is the island Accrileia, now called Sturanisi. Styra is mentioned by Homer along with Carystus (Il. ii. 539). Its inhabitants were originally Dryopians, though they denied this orizin (Herod. viii. 46; l'aus, iv. 34. § 11), and chased to lie descended from the demus of Steiria in Attica. (Sirab. x. p. 446) In the First Persian War (3s. c. 490 ) the l'ersians landed at Aegileia, which belonged to Styra, the prisoners whom they had taken at Eretria. (Herod, vi. 107.) In the Sucoud Persian War (n. c. 450, 479) the Styrians f whith at Artemisinm, Sulamis, and Platacac. They s.nt two ships to the nawal engagements, and at 1'lataew they and the Eretriaus anoun:ed together
to 600 men. (Herod. viii. $\mathbf{1}, \mathbf{4 6}$, ix. 28 ; Pans. v . 23. § 2.) They afterwards became the suljects of Athens, and paid a yearly tribute of 1200 drachume. (lhuc, vii. 57 ; Franz, Elem. Epigr. Gr. n. 49.) The Athenian fleet was stationed here E., c. 356 (Dem. c. Mid. p. 568.) Strabo relates (x. p. 446) that the town was destroyed in the Maliac war by the Atbenian Phaedrus, and its territory given to the Eretrians; but as the Malinc war is not mentioned elsewherc, we ought probably to substitute Lamiac for it. (Leake, Northern Greece, vol ii. pp. 422, 432.)
STYX ( $\Sigma \tau \dot{v})$, a waterfall descending from a lofty rock in the Arosnian mountains, above Nonacris, a town in the NE, of Arcadia, in the district of 1'heneus. The water descends perpendicularly in two slender cascades, which, after winding among a labyrinth of rocks, anite to form a torrent that falls into the Crathis. It is by far the highest waterfall in Greece; the scenery is one of wild desolation; and it is almost impussible to climb over the rocks to thee foot of the cascade. The wildness of the scenery, the inaccessibility of the spot, and the singularity of the waterfall made at an early period a deep impression npom the Grecks, and invested the Stys twith superstitions reverence. It is correctly described by hoth Homer and Hesiod. The former puet speaks of the "down-flowing water of the Styx" (тd wa-
 " lofty torrents of the Styx " ( $\mathrm{\Sigma}$ тvyos ióacos aimà $\beta$ éєӨрa, Il. viii. 369). Hesiod describes it as " a cold stream, which descends from a precipitous lofty
 $\eta_{1 \lambda i s u ́ t o o ~}^{\text {ú }} \boldsymbol{\eta} \lambda \hat{9} 9 \mathrm{~s}$, Theog. 785 ), and as "the perennial most ancient water of the Styx, which flows throngh a very rugged place" (इTuךds ăфeıtov
 Theog. 805). The account of Herodotus, who dues not appear to have visited the Styx, is not so accurate. He says that the Styx is a fountain in the town Nonacris; that only a little water is apparent; and that it dropt from the rock into a cavity surrounded by a wall (vi. 74). In the same passage Herodotus relates that Clenmenes endeavoured to persuade the chicf men of Arcadia to swear by the waters of the styx to support him in bis enterprise. Among the later descriptions of this celebrated stream that of Pansanias (viii. 17. §6) is the must full and exact. "Nut far from the ruins of Notacris," he says, "is a lofty precipice higher tham 1 ever remember to have scen, over which descends water, which the Grecks call the Styx." He adds that when Homer represents Hera swearing by the Styx, it is just ats if the pret had the water of the stream dropping before bis eyes. The sityx was transforred by the Grcek and Roman puets to the invisible world [see Dict. of Gr. and Rom. Bingr. and Myth. art. Styx]; but the waterfall of Nonscris coatinued to be regarded with superstitions terrors; its water was supposed to be poisonous; and it was believed that it destroyed all kinds of vessel, in which it was put, with the exception of those made of the hoof of a horse or an ass. There was a report that Aloxander the Great had been poisoned by the water of the Sty.. (Arrian, Arob. vii. 27; 1'lut. Alex. 77, de I'rim. Frig. 20. p. 954 ; 1'sus. viii. 18. \& 4; Strab, viii. p. 389 ; Aelian, IT. An. x. 40; Antic. Mist. Mirah. 158 or 174: Stob. Fel. Phys, i. 52. § 4s; 1'lin. ii. 103. s. 106. xxx. 16. s. 53, xxsi. 2. s. 19; Vitrus, viii. 3; Senee. \& N. iii. 25.) The belicf in the delcterives nature of the
water continues down to the present day, and the inbabitants of the surrounding villages relate that no vessel will hold the water. It is now called $\tau \dot{\alpha}$ Maupavépia, or the Black Waters, and sometimes tà $\Delta \rho a \kappa o-\nu i p u \alpha$, or the Terrible Waters. (leake, Ilorea, vol. iii. p. 160, seq.; Fiedler, Heise durch Griechenland, vol. i. p. 400, who gives a drawing of the Styx: Curtius, Peloponnesos, vol. i. p. 195)

SUA'GELA ( ミovaje入a), a town of Cari:, in which was shown the tomb of Car, the ancestor of all the Carians ; the place was in fact believed to Lave received its nane from this circumstance, for io Carian oov̂a signified a tomb, and $\gamma \dot{\operatorname{c} \lambda} \boldsymbol{\lambda}$ as a king. (Siteph. B. s. v.) Strabo, whe calls the place Svangela (xiii. p. 611), states that this town and Myndus were preserved at the time when Mausolos united six other towns to form Halicaunassus. [L.S.]
 a town of Soutbern Etruria, situated in the valley of the Fiora (Arminia), about 24 miles from the sea, and 20 W . of Volsinii (Bolsena). No mention of it is frumd in history as an Etruscan city, but both Pluy and 1'tolemy notice it as a municipal town of Etruria under the Loman Empire. (Plin. iii. 5. x, 8; Ptel. iii. 1. § 49.) Its site is clearly marked by the modern town of Sorana or Soana, which was a considerable phace in the middle ages, and still retains the title of a city, sod the see of a bishop, though now a very poor and deeayed place. It has only some slight remains of Roman antiquity, but the ravines around the town abound with tombs hewn in the reck, and adorned with architectural facades and ornaments, strongly resembling in character thise at Castel $d^{\prime}$ Asso and Bieda. These relics, which are pronounced to be among the most interesting of the kind in Etruria, were first discovered by Mr. Ainsley in 1843, and are described by him in the Annali dell' Iustituto di Corrispondenza Archenlugica for 1843 (pp. 223-226); also by Mr. Dennis (Etrurin, vol. i. pp. $480-500$ ). [E. H. B.]
sUARDONES, a tribe of the Suevi in Northern Gerroany, on the right bank of the Albis, south of the Nasones, and north of the Langobardi. (Tac. Germ. 40.) Zeuss (Die Deutschen, p. 154), the riving their nawe from suard or sward (a sword), regards it as identical with that of the lharodini, mentioned by Ptolemy (ii. 11. §13) as living in nearly the same part of Germany.
[L.S.]
SUARNI, a rnde people of Asatic Sarmatia, in the neighbourhood of the Portae Caucasize and the Rhat. They prissessed gold mines (Plin. vi. 11. s. 12). They are pribably the same people whom Ptalemy calls
 the Hippic and Ceraunian mountains. [T. II. 1.]

SUASA ( Zováro: Fth. Suasanus: Ru. near Custel Jeone), a town of Umbria mentioned lath by P'toleny and Pliny, of whom the latter reckons it among the municipal towns of that country. Ptolemy places it. tugether nith Ostra, in the district of the Senones, and it was therefore situated on the northern dectivity of the Apemines. Its site is cleally ilentified at a spot hetween S. Lorenso and Castel Leone in the valley of the Cesano, about 18 miles from the sea. Cunsiderable ruins were still extant on the spot in the time of Cluver. including the remains of the walls, gates, a theatre, \&c.; and inseriptions frund there left no doubt of their identification. (Cluver, Ital. p. 620.)
[E. II, B.]
SUASTE'NE ( a district in the NW. of India, beyond the Panjib. and above tlie junction of the Kabial river and the (1). 1 .

Indus. It derives its name from the wa til hiver Suastus (the Suvastii or Stuwad), which is one of the tributaries of the Kabial river. [Goms.] [1.] SHASIUK [SrAstenk.
SUBANECT1. [SilvaNECTEs.]
SUBATII. [TEDANTES.]
SUBDINNUM. [Cenomast]
SIDBERTUM, another reading of Sidpertia.
SUB1, a river on the E. caast of Hispania Tarraconemsis, which entered the sea near the tomn of Subur. (Plin. iii. 3. s. 4.) Probably the nuklurn Froucoli.
[1. 11. 1).]
SUBLA'QUEUM (Subinco), a place in the valluy of the Anio about 24 miles abuve Tibur (Tivoli). It derived its name from its situation belnv the lake or lakes formed by the waters of the Anio in this prart of its course, and called the simbrocisa Stagna or Simbiavit Licts. These lakes lave now eatirely disappeared: they were evidently in great part artificial, fonned as reservoirs for the Aqua Marcia and Aquas Claudia, both of which were derived from the Anio in this part of its course. There is no mention of Sublaqueum before the time of Nero, who had a villa there called by Frontimus "Yilla Neroniana Sublacensis;" and Tacitus mentions the name as if it was one not faniliar to every one. (Tac. xiv. 22; Frontin. de Aquaed. 93). It seems certain thrmfore that there wats on town of the name, and it would appear from Tamitns (l.c.) that the phacy was incladed for municipal parposes within the territnry of Tibur. Pliny sho notices the name of Sublaqueum in the 4th Rezion of Augustus, bnt not annong the municial towns: an well as the lakes ("licus tres annemtate nohiles") from which it was derived. (Pliu. iii. 12. s. 17.) It appears from mediaeval records that these lakes continned to exist down to the middle ages, and the last nt them did not disappear till the year 1305. (Nibby, Dintorni, vol. ii. p. 125.) Subiuco obtainel a great celebrity in the middle ages as the place of retirement of St. Benedict, and the cradle of the cel-brated monastic order to which he gave his name. It seems probsble that the site was in his time quite deserted, and that the molern town owes its origin to the monastery founded by him, and a castle which was soon after established in jts neighbourhood. (Nibby, l. c. p. 123.)
[E. 11. B.]
SUBLATIO (It. Ant. p. 2s0) or SUBLA'B10) (Tob. Peut.), a place in Rlssetia, on the site ot the molern convent of Seben, near the town of Clausen. Some suppose the correct name to be Sub-avione, which occurs in a middle age document of the reign of the emperor Conrad 11 .
[L. S.]
SUBUR (Zoísoup, 1'tul, ii. 6. § 1i) a town of the Laeeitani in Hispania Tarraconensis lsing E. of Tarraco. (Mela, in. 6.) Yolemy ( $L$. c.) ascribes it to the Cosetani, and l'liny (iii. 3, s. 4) the the Ilergetes. It is mentinned in an inserintsun. (firuter, p. 414.) Variously identifical with siges and rillunuera.
[1. II. 1).]
s(BUTR ( Sov́Goup, P'tol. iv. 1. § 13). 1. A town in the interior of Mauretadia Tingitana, near the river of the same name.
2. (Ptol. iv. 1.§ 2), a river of Mauretania Tinestana. Pliny (v. 1.s. 1) calls it a fine naviga le river. It fell into the Allantic near Colomia Bamasa, 50 miles S . of lixus. It is still called Subu or Cubn, and rises amone the firests of Moont Solclo in the province of Sciaus (Graberg of 1 temsib, Dus Koiser. reich Morokko, tr. by lewumut, p. 12). [1' 11. 11.] SUBUS (Zov́bos, Ptol, iv, 6. §8), a rivir on the 3 x

SUE＇BU＇（ （oungos），a river on the north enast of Germany，between the Albis and Viadus，which flows into the Baltic at a distance of 850 stadia to the west of the nonth of the Viadus（Marcian．p．53）， and whicls，according to P＇tolemy（ii．11．\＆1）， divided at its mouth into several branches．Not－ withstandiag these explicit atatements，it is ex－ tremely difficult to identify the river，whence some regard it as the i＇cene，others as the Harne，and others ayain as the Viadus or Oder itself，or rather the ceatral branch of it，which is called the Siome or Sichucene．
［L．S．］
SUEI．（ミû́ $\lambda$, l＇tol．ii．4．§ 7），a town of His－ pania Bactica，on the road from Malaca to Gades．

## SUELTERI.

(Itin. Ant. p. 405.) According to inscriptions it was a Roman municipium in which libertini had been settled. (Reines, pp. 13, 131; Spon, Miscell. v. p. 189; Orelli, Inser. no. 3914 ; Mela, ii. 6, Plin, iii. 1. 8. 3.) It is the modern Fuengirola. (Inser. in Aldrete, Orig. Ling. Cast. i. 2.)
[T. H. D.]
SUELTERI, a people of Gallia Narboneosis, enumerated by Pliny (iii. 4), between the Camatallici and the Verrucioi. The nume Selteri is placed in the Table above Forum Julia (Frejus). Nothing can be ascertained about the position of this people [Camatullici].

SUESIA PALUS, a large lake of Gemmany mentioned only by Pomponius Mela (iii. 3) along with two others, the Estia and Melsaginm, but it is impossible to say what lake he is alluding to.
[ L. S.]
SUESSA, semetimes called for distioction's sake sUESSA AURUNC. (さv́e Sessa). a city of Latimm in the willest sense of that term, but previonsly n city of the Aurunci, situated on the SIV. slope of the velcanic monntain of Rocca Mon finct, about 5 miles S . of the Liris, and 8 from the sea. Thoogh it became at one time the chief city of the Aurunci, it was not a very ancient city, but was founcled as late as B. C. 337, in consequence of the Aurunci having abandoned their uncient city (called from their own name Aurunca), which was situated a gool deal higher up, and abont 5 miles N. of Suessa. [Aunuxca.] Aurunca was now destroyed by the Sidicini, and Suessa became thenceforth the capital of the Aurunci (Liv, viii. 15). That people had, after their defeat by T. Manlius in D. c. 340 , placed themselves under the protection of Rome, and we do not know by what means they afterwards forfeited it: perbaps, like the neighbouring Ausonians of Vescia and Minturnae, their fidelity had been shaken by the defeat of the Romans at Lantulae: but it is clear that they had in some manner incurred the displeasnre of the Romans, and given the latter the right to treat their territory as conquered land, for in n. c. 313 a Roman colony was established at Suessa. (Liv. ix. 28; Vell. Pat. i. 14.) It was a colony with Latin rights, and is mentioned ameng those which io the Second Punic War professed their inability to furnish their required quota to the Roman armies. It was punished a few years later by the imposition of double contribntions. (Liv. sxvii. 9, xxix. 15.) It is again mentioned in the Civil Wars of Marius and Sulla, when it esponsed the party of the latter, but was surprised and occupied by Sertorius. (Appian, B. C. i. 85, 108). In the titoe of Cicero it had passed into the condition of a municipium by virtne of the Lex Julia, and is spoken of by that orator as a prosperous and floarishing town: it was the scene of a massacre by Antonins of a number of military captives. (Cic. Phil. iii. 4, iv. 2, xiii. 8.) It received a fresh colony under Augustus, and assumed in consequence the titles of "Culonia Julia Felix Classica," by which we find it designated in an inscription. (Lib. Col. p. 237; Plin. iii. 5. s. 9; Groter, Inscr: p 1093. 8; Orell. Inscr. 4047.) Numerous other inscriptions attest its contimance as a flourishing and inportant town under the Roman Empire (Orell. Inscr. 130, 836, 1013, 22S 4,3042 ; Mommsea, Inscr. R. N. pp. 210-212); and this is confirmed by existing remains: but no mention of it is found in history. Nor is its name found in the Itineraries; but we learn from existing traces that there was an ancient road which branched niff from the Via Appia at Minturnae and proceeded
by Suessa to Teannm, from which it was contimued to Beneventum. (Hoare's Class. Tour, vol. i, p. 145. This is evidently the same line given in the Itin. Ant. p. 121, though the nane of Suessa is not there mentioned.)

Suessa Aurunca was the birthplace of the celobrated satirical poet Lucilias, whence he is called by Juveual "Auruncae alumnus." (Ausen. Epist. 15. 9; Juv. i. 20.)

The modern city of Sessa undoubtedly occnpies the aocient site: and considerable ruins are still visible, inchading, besides numerous inscriptions and other frayments, the remains of a temple incorporatel into the church of the lescovado, a retuarkable cryptoporticus, and several extensive subterranean vanlts under the church of $S$. Benedetto, comstructed of reticulated masonry. Sume remains of an amphitheatre are also visible, and an ancient bridge of 21 arches, constructed for the support of the road which leads into the town at the modern Porta del Borgo. It is still called Ponte di Ronaco, supposed to be a corruption of Ponte Aurunco (Hoare, l. c. pp. 145147; Giastiniani, Diz. Topagr, vol. is. p. 28, \&c.).
The fertile plain which extends from the foot of the hills of Sesse to the Liris and the sea, now known as the Demanio di Sessa, is the ancient "Ager Vescinns," so called from the Ansonian city of Vescia, which seems to have ceased to exist at an early period [VEsclit]. The district in question was probably afterwards divided between the Roman colonies of Suessa and Sinuessa.
[E. H. B.]

## COIN OF SUESSA ALRENCA.

## SUESSA POME'TIA (Zov́ $\sigma \sigma \alpha$ П $\omega \mu \in \nu \tau i a ́ v \eta$,

 Dindys.: Eth. Пwuevtivas). an ancient city of Latimm, which had ceased to exist in historical times, and the position of which is entirely unknown, escept that it bordered on the "Pomptinus ager" or P'omptinae Paludes, to which it was supposed to have given name. Virgil reckons it among the colonies of Alba, and must therefore hare considered it as a Latin city (Aen. vi. 776): it is found also in the list of the same colonies given by Diodorus (vii. Fr. 3); but it seems certain that it had at a very early period become a Volscian city. It was taken from that people by Tarquinius Superbus, the first of the Roman kings whe is mentioned as having made war on the Volscians (Liv. i. 53; Strab. v. p. 231; Vict. Jiir. Ill. 8): Strabo indeed calls it the metropolis of the Vulscians, for which we bave no other autberity; and it is probable that this is a mere inference from the statements as to its great wealth and power. These represent it as a place of such opnlence, that it was with the booty derived from thence that Tarquinins was able to commence and carry on the construction of the Capitoline temple at Rome. (Liv. L. c. ; Dionys. iv. 50; Cic. de Rep. ii. 24 ; Plin. vii. 16. s. 15). This was indeed related by some writers of Apiolae, another city taken by Tarquin (Val. Antias, ap. Plin. iii. 5. s. 9 ), but the current tradition seems to have been

＂Et Bitarix，longisque leves Saessones in armis：＂
Suessones is a correction；but there is 110 doubt about it（ed．Ondemtory）．
［G．L．］
SUlGSLLA（ฐovevorou入a：Eth．Suessulaus： Sessolu），a cily of Campania，sithated in the interior of that coumtry，near the froatiens of Sanumur， betwen Capua and Noln，and about 4 miles NE．of Acerace it is rapeatedly fomentiontel during the wars of the Ronans with the Samnites，as well as in their campraznx against Hamibal．Thus in the First Sumnite War（B．© 34.3 ）it was the scene uf a deci－ive victory by Valeria－（＇orvus over the Bamnites， who hal gathered tagether the renams of their army Which hat luedr marromsly defoated at Mnont Gaurus （Liv：vit，37）．In the creat Campanian War shonly after，the suossulam fillowel the fortunes of the cirizens of C＇ppata，and shared the same fate，so that at the close of the contest they must have obtained the Roman cisitas，but without the rizht of suffige （14．viii．14）．In the Second P＇mic War the city bears a consideratle part，theagh apparently more from its pusition than its own importance．The lioe of bills Which rises froar the level plain of Campania inmediately above Snessula，aod forms a kind of prolongation of the ridge of Mount Tifata．was a station almest as convenient as that mountaio itself， and in B．C． 216 ，it was ocerpied by Marcellus with the view of poutecting Nola，and watching the upaatims of llannibal against that eity（Liv．xxiii． 14．17）．From this time the Romans seem to have kipt up a permanent camp tbere for some yeas， Wheth was known is the Castra Claudiana，from the name of Marcellus who had first extablished it， and which is compmally alluded to during tho operatims of the subsegnent canpaiyns（Liv．xxiil． 31，xxiv．46，47，xsv．7，22，xsvi．9）．But from this perind the name of shessula disappears from history．It contimued to be a monitipal town of Compania，though apparemly one of a secondary class ；and inemptions attest its mmicipal rank under the Eupme．It had received a body of vererams as collumists under Silla，but did not attain the col nat rask（Stral．v．p．2f9：1lin．iii．5．s．9； Ow⒒／user．129，130．2333，Lib．Col．p．237）． The Tabula places it on a line of read from Capua to．Xibly，at the distance ot＇ 9 miles from each of those cition（ Tul，Pral）．It was an episcopal see in the litist ases of Cllastianity，and its destruction is ascribed to the saracens in the 9 th century：Its rans are still visible in a spot oow occupied by a minsliy lorest about 4 miles S．of Motdaloni，and ath adjacent castle is still called Torre ds Sessohn． Inarriptions，as well ne capitals of columns and other arehitectural fragments，laave brepa found there （Pratilli 1int Apuiu，iii．3．p． $34^{\circ}$ ；Lkmanelli，vol． iii 1．590）．
（E．11．B．
SUETRI（Zountpion，I＇tul．iii．1．§ 42 ，witten玉ouctpiot in wow catsions），a Ligurian people，placed by 1Fhy（1i．4）ahove the Usyl ii，who were on the coust hetwenn Frijus and Anthers．The suetri are the last people nathind in the Tiophy of the A pio． If the position of their tumn Salime［samanat is
properly fixed，the Suetri were in the northern part of the dincese of Frijus．
 for a very large jartion of the population of ancient Giermany，and comprised a great number of separate tribes with distinctive names of their own，such as the Semnones．German authors generally connect the name Suevi with Suiban，i，e，to sway，move unsteadily，and take it as a designation of the un－ steady and migatory habits of the people，to dis－ tinguish them from the Ingacvones，who dwelt in rillayes or fixed habitations（Zeuss，Die Deutschen， 1．55，foll．）；others，however，and apparently with groud reason，regard the name as of Celtic or even Slavonian origin；for the Romans no doubt em－ ployed the name，not because indrenous in Ger－ many，bat becaune they heard it from the Celts in Ganl．We must，liowever，from the first dis－ tioguish between the Snevi of Cacsar（B．G．i．37， 51,54, iii．7，iv．1，\＆e．）and those of Tacitus （Germ．38，\＆．c．）：the Suevi in Caesar occupied the castern bauks of the Rhine，ill and about the country now called Baden，while Tacitus describes them as weupying the country to the north and east of the Suevi of Caesar，so that the two writers assign to them quite a different area of count 1 ．Strabo（vii． p．290）again states that in his time the Suevi ex－ tended from the Rhenas to the Albis，and that sume of them，such as the Hermonduri and Longolardi， had advanced even to the north of the Albis． Whether the nations called Suevi by Caesar and Tacitus are the same，and if so，what causes induced them in later times to migrate to the north and east， are questions to which history furnizhes no answers． It is possible，however，that those whom Caesur encountered were only a bratich of tie great body， perhaps Chatti and Longobardi．That these latter were pare Germans cannot be doubted；but the Sueri of Tacitus，estending from the Baltic to the Danube，and occupying the greater part of Germany， no doubt contained many Celtic and still more Sla－ vonic elements．It has in fact been conjectured， with great probability，that the name Suevi was applied to those tribes which were not pure Ger－ mans，but more or less mixed with Slavonians；for thus we can noderstand how it happened that in their habits and mode of life they differed so widely from the other Germans，as we see from lacitus；and it would also account for the fact that in later times we tiud Slavomians peaceably established in countries previously occapied by Suevi．（Comp．Plin．iv． 28 ； 1＇tol．ii．11．§ i5；Oros，i．2．）It deserres to be noticed that Tacitus（Germ．2，45）calls all the country inhabited by Sucvian tibes by the name Suevia．The name Suevi appears to have been known to the Romans as early as z．C． 123 （Siseona， ap．Non s．v．lancen），and they were at all times re－ garded as a potrerful and warlike people．Their country was covered by mighty forcsts，but towns （oppida）also are epuken of．（Cacs．B．G．iv．19．） As Gerolany becane better known to the Rumans，the generic name suevi fell more and more into disase， and the separate tribes were callet by their own names，although Ptolemy still applies the name of Suevi to the Semnones，Longobardi，and Angli．

In the recond half of the thind centory we again find the name Sucvi limited to the country to which it had been applied by Caesar．（Amm．Marc．xvi． 10；Jornand．Giet．55；Tat，Peut．）These Suevi， from whon the modern Surbia and the Suabians de－ nee their names，seem to have been a body of ad－
renturers from varions German tilles，who assumed the ancient and illnstrious name，which was as ap－ plicable to them as it was to the Suevi of old． These later Suevi appear iu alliance with the Ale－ mannians and Burgundians，and in passession of the German side of Ganl，and Switzerland，and even in Italy and Spain，where they joined the Visigoths， Ricimer，who acts so promment a part in the history of the Roman empire，was a Suevian．（Comp．Zeass， l．c．；Wilhelm，Germanien，p．101，\＆c．；Grimm， Deutsche Gram．i．pp．8， 60 ii．p．25，Gesch．der Deutschen Spr．i．p．494；Latham，on Tacit．Germ． Epileg．p．lxxi．）

SLLCI（ 氵o入kó，Steph．B，P＇tol．；इov̂入 ұot，Strab．；玉íakot，P＇aus．：Eth．Sulcitanus：A．Autioco），one of the most considerable cities of Sirdituia，situated in the SWF．corner of the iskud，on a small island， now called Isoln di S．Autioco，wiich is，however， joined to the mainland by in narrow isthmus or neck of sand．S．of this istlimus，between the islimi！ and the mainland，is an extensive bay，now called the Golfo di Pulmas，which was known in ancient times as the Sulcitans l＇ortus（l＇tul）．The found－ ation of Sulci is espressly attributed to the Cartha－

## scLalo.

cumians (l'aus. x. 17. § 9; Claudian. R3, Gut. 518) :and it seems to have become under that people one of the most considerable cities of Sardimia, and one of the chief seats of their power in the island. Its name was first mentioned in history during the First l'unic War, when the Carth:"ginian general, Hannihal, having been defeated in a sea-ficht by C. Sulpicius, took refuge at sulci, but was slain in a tumult by his oun soldiers (\%onar. viii. 12). No other mention of the name occurs in listory till the Civil War between Pompey and Carsar, when the citizens of Sulci received in their port the fleet of Nasidius, the adniral of Pompey, and funished him with supphes: for which service they were severely puni heed by Caesar, on his retorn from Aliza, B. c. 46 , who imposed on the city a contribution of 100,000 sesterces, besides heavily increasing its ammal tribute of corn (llirt. B. Afr. 98). Nutwitlistanding this infliction, Sulei seems to lave continued under the Roman Empire to be one of the most flowrishing towns in the island. Strabo and Mela both mention it as if it were the seeond city in Sardinia; and its municipal rank is attested by inscriptions, as well als by Pliny. (Strab. v. p. 225; Nlel. ii. 7. § 19; Plin. ivi. 7. s. 13: Ptol, iii. 3. §ु 3; Inser. ap lhe la Marmora, vol. ii. pp. 479. 482.) The Jtineraries give a line of raad proceeding from Tibula direet to Sulci, a sufficient proof of the importance of the latter place. (Itin, Ant. pp. 83, 84.) It was also one of the four chief episcopal sees into which Nardinia was divided, and seems to lave continued to be inhabited through a great part of the middle ages, but ceased to exist before the 13 tb century. The remains of the ancient city are distinetly seen a little to the N. of the modern village of $S$. Autioco, on the island or peninsula of the same name: and the works of art which have been found there bear testimony to its flourishing condition under the Romans. (De la Marmora, vol. ii. 1. 357 : Smyth's Sardenia, p. 317.) The mame of Sutcis is given at the present day to the whole district of the mainland, immediately opposite to S. Antineo, which is one of the must fertile and lest cnltivated tracts in the whale of Siscdinia. The Sulctani of P'olemy (iii. 3. § 6) :me evidently the ishabitants of this district.

The Itinerames mention a town or village of the name of Sulci on the E. © atst of Sordinia, which must not be confounded with the more celebrated city of the name. (Itin. Ant, p. 80.) It was prohably situated at Girasol, near Tintoli. (b) la Marmoia, p. 443.)
[E.H.B.]
sUl.fiAS, river. [Gimha, p. 954 : Impalum.]
S''LlA, SULE'NA ( इounia, Zounjiva, Stedinsm. $\$ \$ 324,325$ ) a promontory of Crite, 65 stadia troun Matala, where there was a harbour and gond water, identifisl by Mr. Pashley (Tratels, vol. i. 1). 304) with Ifighiu Gialine, the chief port of Amari, on the S. coast of the inhand. [E. B. J.]
sclus. in Ciallia, is placed in the Table on a route from 1) artoritnna, which is Bariorigum [JAmongent ] the capital of the Veneti, to fiesocribate the western extrenity of Bretagnc. The distance from Dariungum to Sulis is xx . By following the direction of the route we come to the junction of a small river named Seuel with the river of Blavet. The name and listance, as DAnville supposes, indicate the position of Sulis.
[ ( $\mathrm{F}, \mathrm{L}$. .]
sULLONiACAE, a town is Britannia Romana (Itin. Ant. 1. 4:1), now Brockley Ilill in IlertJürdshire. (Canden, p. 359.) [T. H. J.]

SL1,110 (simmomel(). an ancient eity of Latiam,
mentioned only by Pliny (iii. 5. s. 9) annug those Whieh were extinct in his time, and incidentally noticed by Virgil. (Aen. x. 517.) It is in all probability the saine place with the inodern Sirmoneta, which stamds on a hill between Norba and Netia, looking over the l'ontine Marshes.
[E. H. B.]
SULJIO (Žu入дйv: Eth. Sulmonensis: Sulmona), a city of the l'eligni, situated in the valley of the Gizio, in a spacious basin formed by the jubetion of that river with several minor streams. There is no doubt that it was one of the prineipal cities of the Peligni, as an independent tribe, but no notice of it is found in history before the Roman conquest. A tradtion alluded to by Ovid and Silius Italiens, which aseribed its foundation to Solymus, a Phrygian and one of the companions of Aeneas, is evideutly a mere etyinological fiction (Ovid, Fast. iv. 79 ; Sil. Ital. ix. 70-76.) The first mention of Sultoo occurs in the Second Punic War, when its territory was ravaged by Hamnibal in B. C. 211, but without attacking the city itself. (Lis. xxvi. 11.) Its mame is not noticed during the Sicial War, in which the l'eligni took so prominent a part; bat aecording to Floras, it suffered severely in the subsequent civil war between Sulla and Marius, having been destruyed by the former as a punishment for its attaclment to bis rival. (Flor. iii. 21.) The expressiuns of that rhetorical writer are not, however, to be construed literally, and it is more probable that Sulno was contiscated and its lands assigned by Sulla to a budy of his soldiers. (Zumpt, de Colon. 1. 261.) At all events it is certain that Sulme was a well-peopled and comsiderable town in b.c. 49 , when it was occupied by Pomitios with a garrison of seven cohorts: but the eitizens, who were favourably affected to Caesar, npened their gates to his lieutenant M. Antonins as soon as he apjeared liefore the plawe. (Caes B. C. i. 18; Cic, ad Alt. viii. 4, 12 n.) Nuthing more is known bistorically of sulino, which, Lowever, appears to have always continued to be a considerable provincial town. Ovid speaks of it as one of the three municinsl towns whose districts composed the territory of the Peligni ("Peligni pars tertia ruris," Amor. ii. 16.1): and this is contimed hoth by Pliny and the Liber Coloniarum; yet it does not seem to have ever been :a large place, and Ovid himself dexignates it as a small prusincial town. ( -1 mon : iii. 15.) From the Liber Coloniarum we learn also that it had received at coliny, probably in the time of Augustus (Plin. iii. 12. \& 17 ; Lib. (olon. p1. 229, 260); though Pluy does not give it the title of a Colonia. Inacriptions, as well as the geographers and lineraries, attest its continued existence as a municipal town throu-hont the Roman Empire. (Strah. v. p. 241 ; Itwl. iii. 1. §64; Tab. Peut.; Orell. Inser. 3856 ; Mummsen, Inscr. R. N. pp. 287-289.) The modern city of Sulmona undoubtedly oecupies the aucient site: it is a tolerably flourishing place and an episcopal see, having succeeded to that difnity after the fall of Yalea, which had arisen on the ruins of Corfinium. (Romanelli, vol. iii. pp. 154156.)

The chief celebrity of sulmo is derived from its having been the birthplace of Ovid, who repeatecly alludes to it as such, and celebrates its salubrity, and the nomerous streams of clear and perennial water in which its meighbourhood abounded. But, like the whole district of the I'eligni, it was extremely eold in winter, whence Ovid limself, and Silius Italicus in imitation of him, calls it "gelidus

Snlmo＂（Ovid，Fast．iv．81，Trist．iv．10．3，Amor． ii．16：Sil．Ital．viii．511．）Its territery was fertile， both in corn and wioe，and one district of it，the Pagns Fabianus，is particularly mentioned by Pliny（xvii． 26．s．43）for the care bestuwed on the irrigation of the vincyards．

The remains of the ancient city are of little in－ terest as ruins，but indicate the existence of a con－ siderable town；among them are the vestiges of an amphitheatre，a theatre，and thermae，all of them withont the gates of the modern city．About 2 miles from thence，at the foot of the Monte Morrone， are some ruins of reticalated masonry，probably those of a Roman villa，which has been called，without the slightest reason or authority，that of Oxid．（Romat－ nelli，rol．iii．I＇p．159，161；Craven＇s Abruczzi，vol． ii．p．32．）

Sulno was distant seven miles from Corfinium，as we learn hoth from the Tabala and from Caesar． （Caes．B．C．i．18；Tab．Peut．）Ovid tells us that it was 90 miles from Rome（Trist．iv．10．4），a statement evidently meant to be precise．The actual distance by the highroad would he 94 miles；viz． 70 to Cerfennia， 17 from thence to Corfininm，and 7 from Corfininm to Sulmo．（D＇Anville，Anal．Géogr． de IItalie，pp．175，179．）There was，however，pro－ hably a branch road to Sulno，after passing the Dlons Imeus，avoiding the détour hy Corfinium．［E．H．B．］

SUMA＇TIA（Zovuatia，Paus，viii，3．§8 4；Steph． B．s．v．；ミоvuךтia，Paus．viii．36．§ 7；ミоvдáтelov， 1’aus．viii．27．§ 3；£ $\cup v \mu \eta \eta^{2} \tau \in 1 \alpha$, Steph．B．s．v．），a town of Arcadia in the district Maenalia，on the southern slope of Mt．Maenalus．It was probably on the summit of the hill now called Sylimna，where there are some remains of polygonal walls．（Leake， Morea，vol．ii．p． 51 ；Ross，Peloponnes，p．120．）

SUMMONTORIUM，a place in Vindelicia（ $1 t$ ． Ant．p．277），where，according to the Notitia Im－ perii，the commander of the 3rd legion was stationed． Its exact site is uncertain．
［L．S．］
SUMAIUS PYRENAEUS．One of the passes of this name mentioned io the Antoniae Itia．and the Table was on the road from Narbo（Narbonne）to Juncaria（Junquera）in Spain．The road passed from Narbo through Ad Centuriones and Ad Stabulum ； but the distances in the Itins．are not correct；nor is the distance in the Itin．correct from Summus Pyre－ nacus to Juncaria．The pass，however．is well marked；and it is the Col de Pertus，which is com－ manded by the fort of Bell－garde．This is the ruad ly which Hannibal entered Gallia，and the Homan armies marched from Gallia into Spain．A second pass named Summus Pyrenseus in the Antobine Itin． was on the road from Beacharnum［Benehannem］ in Aquitania to Caesaraugnsta（Saragosa）in Spain． The road went through Ihro（Oleron）and Aspa Luca［Aspa Luca］and Fornm Ligneam［Forver Ligneim］，which is 5 from Summus Pyrenaeus． This road follows the Gave d Aspe from Oleron； and on reaching the head of the valley there are two roads，one to the right and the other to the left． That to the right called Port de Bernire must be the old road，becanse it leads into the valley of Aragues and to Beilo in Spain，which is the Ebellnaum of the Itin．on the road from Summns Pyrenacus to Soragasa．

There is a third pass the most western of all also named Summns Pyrenaens on the road from Aquae Tarbellicse（Dax）in Aquitania to Pompelon（Pam－ plona）in Spain．The Summns Pyrenaeus is the Sominet de Castel－Pinon，from which we descend
into the ralley of Roncesvalles on the road to Pam－ ploma［Imes Prrenaeus］．（D＇Aaville，Notice， gc．）
［G．L．］

## SLNA［Aborigines．］

sU＇NICl．Tacitus（IIist．iv，66）mentions the Sunici in the history of the war with Cirilis．Ci－ vilis having made an alliance with the Agrippinenses （Cölu）resolved to 1ry to gain over the nearest people to Cöln，and he first secured the Sunici， Clandius Labeo opposed him with a force hastily raised among the Betasii，Tungri and Nerrii，and he was confident in his position by having possession of the bridge over the Mosa．［Pons Mosae］．No certain conclusion as to the position of the Sunici can be derived from this：but perhaps they were between Cöln and the Jlaas．Pliny（iv．17）men－ tions the sunici between the Tungri and the Frisia－ bones．
［G．L．］
SU＇NILM（ミoúviov：Eth．ミouvicús），the name of a promuntory and demus on the sonthern coast of Attica．The promontory，which forms the 2nost sontherly point in the country，rives almost perpen－ dicularly from the sea to a great height．and was crowned with a temple of Athena，the tutelary goddess of Attica．（Paus．i．1．§ 1 ；ミoúvoov ipóv， Hom．Od．iii． 278 ；Soph．Ajax， 1235 ；Enrip．Cycl． 292；Vitruv．ir．7）．Sunium was fortified io the nineteenth year of the Peloponnesian War（b．c．413） for the purpose of protectiog the passage of the corn－ slips to Athens（Thuc，viii．4），and was regarded from that time as one of the principal fortreses of Attica（Comp．Dem．pro Cor．p． 238 ；Liv．xxsi． 25；Scylax，p．21．）Its proximity to the silver mines of Laurium prohably contribnted to its pros－ perity，which passed into a proverb（Aoaxand．ap． Athen．vi．p． 263, c．）；but even in the time of Cicerc it had sunk into decay（ad Att．xiii．10）．The circuit of the walls may still be traced，except where the precipitons nature of the rocks afforded a batural defence．The walls which are fortified with square towers，are of the most regular Hellenic masonry， and eaclose a space of a little more than half a mile in circumference．The sonthern part of Attica，ex－ tending northwards from the promontory of Sunium as far as Thoricus on the east，and Anaphlystus on the west，is called by Herodotus the Sumiac angle （ $\tau \grave{\nu}$ үovvòv $\tau \grave{\nu}$ ミ ミouviaкóv，iv．99）．Though Sonium was especially sacred to Athena，we learn from Aristophanes（Equit．557，Aves，869）that Poseidon was also worshipped there．

The promontory of suniam is now called Cape Kolonnes，fron the ruins of the temple of Athena which still crown its summit．Leake ebserves that ＂the temple was a Doric hexastyle；but none of the columns of the fronts remain．The original number of those in the flanks is uncertain；bnt there are still standing nine columns of the southern， and three of the aorthern side，with their archi－ traves，together with the two columns and one of the antae of the proaans，also bearing their archi－ traves．The colamns of the peristyle were 3 feet 4 inches in diameter at the base，and 2 feet 7 incles under the capital，with an intercolumniation below of 4 feet 11 inches．The height，iocluding the capital，was 19 feet 3 inches．The exposed situa－ tion of the building bas caused a great corrosion in the surface of the marble，which was probably brought from the neighbouring mountains；for it is less homogeneous，and of a coarser grain，than the marble of Pentele．The walls of the fortress were faced with the same kind of stoae．The ertabius－
$3 \times 1$
ture of twe pesincte of the templi whe summen with sculpture，some remains of whe 1 have heon
 warly in a line with its eastern firme，are tonnda－ tinas of the L＇ropylamem or entat ce into the saered peribolns：it was abnit 50 tent long and 30 broal， and presented at either rad a finnt of two Dowic colamons hetween antace supprtis a pediment．The ridumas were 17 feet ligels，ind lading the capital． 2 feet 10 inclies in diametry at the base，with an ＂penins between them of 8 feet 8 iurlues．＂（The Demi of Attict，․ 6． 23.2 2nd vil．）Leake remarks that there are no tracts of any thed buidding visible， and that we most thomere conchule that here，ats in the temple of Atluma Polias ut Athens，Poweidon was honomed only wilh an altar．Wimdsworth， Lowever，remarks that a little to the XE ，ot the peninsula on which the ternple stanils is a conimal hill，where are exrensive vestiges of an ancient huhling，which may perhats be the remnins of the femple of I＇nseidon．（．\｛thens and Attica．1，207．）

SUNNE：1A，a sumall island on the $\therefore$ coast of Spain（ Geoury．Rav，v．27．）

Sutrentinun from. [Mnervae Prom.] serrentual (Zup̀pevtor, strab.; Zoúpeqtov, 1tol.: Eth. Surreatinns: Sorrento), a city on the chast of Campania, on the sonmern side of the heantifnl gulf eatled the Crater or Buyy of Aoples, abuat 7 miles from the healland called Minervae 1romontoram, which forms the southern bumbiary of that bay. We have very littie information as to its eariy lintory: its name is never mentioned till atter the Romaia conquest of Campania. Tradition indeed ascribed the foundation of Surrentun to the (irecks, but whether it was a colny from Cumae, or an earlier Gireek settlement, we have no account: and there dues not appear any evidence that it had, like mayy places in this jart of Italy, a di-tanctly tireek claracter in historical times. Strabo calls it a Campanian city (Strab. v. p. 247), but this may very probably reter to its not being one of those occipiel by the Piecatipes. According to the Lilier Coloniarnum a great part of its territory, and perlaps the town itself, was coosidered in a certain sense as con-ecrated to Mlinerva, on account of its proximity to her celebrated temple on the adjoining promontory, and was for that reason occupied by Greek settiers (Lib. Col. p. 236). It nevertheless received a partial colony under Angustus ( l. .), but wishout attaining the rank or character of a Colonia. Numerous inseciptions record its existence as a municipal town under the Loman Empire, and it is poticed by all the geographers: but its name is rarely mentioned in history (Strab. L. c.; Plin. iii. 5. \&. 9 ; Mel. ii. 4. § 9 ; Ptol. iii. 1 . § 7 ; Orell. Inscr. 3 42 ; Mlommsea, Inser. R. N. 2111-2125). It was, however, resorted to by wealthy Romans on account of its beantiful scenery and delightful clinate; amoog others Pollius Felis, the firiend of Statius, had a villa there, which the puet has celebrated at considerable length in one of his min.r poems (Sile, ii. 2). We are told also that Agrippas Postumus, when he first incurred the displea-are of Augustus, was ordered to retire to surrentum, before be was consigned to mare complete baxisllment in the island of Planasia (Suet. Aug. 65).

But the chief celebrity of Surrentum was derived from its wine, which eojosed a high reputation at Eome, and is repeatedly alluded to by the poets of the Empire. It was considered very wholesmue, and was in coosequence recommended by plysician, to convalescents and invalids. Tiberius indeed is said to lave declared that it owed its reputation entiricly to the physicians, and was io reality no better tham sinegar. It did not attain its maturity till it had been kept 25 years (Plin. xiv, 6. s. 8 ; Atheras. i. 1. 126 ; Ovid. Met. xv. 710; Martial, siii. 110 ; Sist, Sile. iii. 5. 102; Strab. v. p. 243; Colmu. $R$. R. iii. 2. § 10). We learn from Martial aloo (xiii. 110, xiv. 102) that Surrentum was noted for its pottery. The hiils which prodnced the celebrated wine were those which encirele the plain in which the city was sitnatei ("Surrentind colles," Ovid. Met. l. c.), and separate it from the gulf of l'osidemia on the other side These bills form a part of the lidge which descenis frow the lofty monntain group of the Monte S. Angelo between Castellamare sund Amalf, and is continued as far as the beadland epposite capri This point, now called the I wunta della Canpanella, the ancient Pronontmium Minew ae, was known aloo by the name of Surrentituun Promoatoriam, from its close comnection with the town of Surientum (Tac. Ann. iv. 67; Stat. Silr. v. 3. 165). The celebrated sanctuary of the Sirens,
from which Surrentum itself was supposed to bave derived its name, seems to have been situated (though the expressions of Strabo are not very clear) betweell this headland and the town (Strab. v. p. 24i). But the islands of the Sirens (Siremusae Insulae) were certainly the rocks now called $1, i$ Galli, on the opposite side of the promontory. The villa of Pollius, which is described by Statius as looking down upon the deep Gulf of I'uteoli, stowl npon the headland now called Capo di Sorreuto, on the W. of the town, separating the Bay of Survento from that of Massa: extensive ruins of it are still risible, and attest the accuracy of the peet's description. (Stat. Silv. ii. 2; Swinburne's Tracels, vol. i. pp. 88-90.)

The other ruins still visible at Sorrento and in its neighbourbood are of no great interest: they present numerous fragments of buildings of imperial times, to some of which the names of a temple of Hercules, temple of Neptune, \&c. have bern applied by local antiquarians, with no other foundauon than the fact that we learn finm Statins the existence of temples to those divinities at Surrentum. The most considerable relic of antiquity is a Piscina of larce dimensions, which is in such good preservation that it still serves to supply the iulabitants with water. The modern town of Survento is a flowrishing and populons place with a propulation of abrive 6000 sonls: it is ithech resoried to by strangers on account of its mild and delicions climate, fur which it is aiready extolled by Silins Italicus ("Kephyro Surrentum molle salulri," Sil. Ital. v. 466 ) [E. H. B.]

SLSA ( $\tau \grave{\alpha}$ ミaṽ $\sigma \alpha_{,}$Aeschyl. Pers. 535, 730; Herod. i. 188; Xed. Cyr. viii. 6. § 8 , \&c.; in 0 . T. Shusmas, Esther, i. 2; Nehemiah, i. 1; Daniel, viii. 2), the chief city of the province of Susiana, on the eastern hank of the Choaspes (Kerkhah). There was considerable doubt among the ancient writers as to the exact position of this celebrated city. Thns Arriaa (vii. 7), Pliny (vi. 27. s. 3f), and Daniel (viii. 2) place it on the Eulaens (Ulai in Daniel): while fiom other authors (strab. xv. p. 728) it may he gathered that it was sinuated on the Cheaspes. (For the probable cause of this cunfusion, see Cifonsres.) We nay add, however, that, according to Curitius, Alexander on his way from Bubylon had to cross the Choarpes before he could reath Nisa ( $\mathrm{v}, 2$ ), and that the same inference may be drawn from the account of Aristacoras of the relative position of the places in Persia in his address to Cleomenes. (Herod, v. 52.) It appears to have been an early tradition of the country that Snsa was founded by Dareius the son of Hystay (Plin. l. c.): and it is described by Aeschylas as $\mu^{\prime} \gamma^{\prime}$ д̆ $\sigma \tau v$ 【ovabôos (Pers. 119). By uthers it is termed Menvóvetov hatu (Herod. v. 54), and its origio is attributed to Memnon, the son of Tithonus. (Strab. l. c.; Steph. B. s. v.) The name is said to lave been derived from a native Persian word Susun (meaning lity), from the great abnadance of thise plants in that neighbourhood. (iteph. B. s. $v$.; Athen. xii. p. 513, ed. Cassaub.) Athenaeus also conbirms the account of the excellence of the clinate of Susa (l. c.). It may be remarked that the word Eoúotyov was well known as applied to an unguent extracted from lilies. (1) aseor, iii. c. de lilio; Athen. xv. P. 609: Etymol. M. s. $n$. $\sum$ veravar). The city was said to have been 120 stadia in ciremmference ( Strab. l. c), and to have been surrounded by a wall, buijt like that is: Babylon of burnt briek. (Strab. l. c.; Paus. iv. 31.

## SUSIANA．

§ 5．）Divdorus（xix．16，xvii．65）and Cassiodorus （vii．15）speak of the strength and splendenr of its citalel；and the latter writer affirms that there was a splendid palace there，built for Cyrus ly Memnon． Besides this structure，Pliny speaks of a celebrated temple of Diana（l．c．；see also Mart．Cajuella，ví． de India，p．225，ed．Grotius），in all prolability that of the Syrian goldess Anaitis：while St．Jerome adds，that Daniel erected a town there（Hieronym．in Dan．）．a story which Josephus narrates，with less probability，of Echatana．（Ant．x．11．）Susa was one of the rapitals at which the kings of Persia were wont to spend a portion of the year．Thus Cyrus， according to Xenophon，ilived there during the three months of the spring．（Cyrop．viii．6．§ 22．） Straho offers the most probable reason for this custom，where he states that Susiana was peculiarly well suited for the royal residence from its central position with respect to the rest of the empire，and from the quiet and orderly character of its govern－ ment（l．c．）From these and other reasods，Susa appears to have been the chief treasury of the Persian empire（Herod．v．49）；and how vast were the treasures laid up there by successive kings，may be gathered from the narrative in Arrian，of the sums paid by Alexander to his soldiers，and of the presents nade by him to his leading generals，on the occasion of his marriage at Susa with Barsine and 1＇arysatis（Curt．vii．4，5）：even long after Alex－ ander＇s death，Antigonus found a great amount of plunder still at Susa．（Diud．sis 48．）

With regard to the modern site to be identifiea as that of the ruins of Su：a，there has been consider－ able difference of opinion in modern times．This has，however，chiefly arisen from the scarcity of travellers who have examined the loralities with any sufficient accuracy．The first who did so，Mr． Kinneir，at once decirled that the modern Sis， sttuated at the junction of Kerkhah and river of Diz，must represent the Slushan of Daniel，the Susa of profane authors．（Travels，p．99：comp．Mal－ colm，Ilist．Persia，1．p．256．）Renuell had indeed suspected as much long before（Geogr．Herodot．i． p．302）：but Vincent and others had adranced the rival claim of Shuster．（Anc．Commerce，i．p．439．） The question has been now completely set at rest， loy the careful excavations which have been made during the last few years，first by Colonel（now Sir W．F．）Williams，and secondly by Mr．Loftus．The results of their researches are given by Mr．Loftus in a Daper read to the Royal Society of Literature in November，1855．（Tronsactions，vol．v．new series．） Mr．Loftus tound three great mounds，mea－uriog torether more than $3 \frac{3}{2}$ miles in circumference，and atove 100 fect in height；and，on extavating，laid hare the remains of a gigantic colomade，having a frontage of 343 fect，and a depth of 244 ，consisting of a central square of 36 columns，flamked to the N．， 1．，and IV．by a similar number－the twole arrange－ ment being nearly the same as that of the Great llall of Xerses at Persopolis．A great number of wher curnous discoveries were made，the most im－ purtant being nemerous inscriptiuns in the enneifurm character．Enough of these has been already decipliered to show，that some of the works on the mound belong to the most remote antiquity．Among other important but later records is an inscription，－ the only menorial yet discovered of Artaserxes Mnemon，tho conqueror of the Greeks at Cunaxa，－ which describes the completion of a palace，com－ menced by Dareius the sun of Hystaspes and
dedicated to the goddesses Tanaitis and Mithra． A Greck inscription was also met with，carved on the base of a colnmn，and stating that Arreneides w．ss the governor of Susiana．The natives exbibit a monument in the neighbourhooI，which they call and helieve to be the tomb of Daniel．There is no question，however，that it is a modern structure of the Mohnomedan times．
［V．］
SUsiA＇XA（̀̀ 玉ovaaví，Ptol．vi．3．§ 1 ：Polyb． v． 46 ；Strab．xr．729，\＆c．；ì Eovois，Strab．xr． 731 ：ì ミovaiás，Strab．ii．p．134），an extensive pro－ vince in the southern part of Asia，consisting in great measure of plain country，but traversed by some ranges of mountains．Its boundarics are vari－ ously given by different writers according as it was imagined to include nore or less of the adjacent dia－ trict of Persis．Generally，its limits may be stated to have been，to the N．，Media with the mountains Clarbanus and Cambalidus，part of the clasin of the l＇arachoathras；to the E．tbe outlying spurs of the Parachuathras and the river Oroatis；to the S．the Penian gulf from the mouth of the Oroatis to that of the Tigris；and to the W．the plains of Mesopo－ tamia and Babylonia．（Cf．Ptol．l．c．with Strab． l．c．，whoo，however，treats Susiana as part of Persis）． As a province it appears to have been vèry fertile， especially in grain，but exposed along the consts to intense heat．（Strab．xr．p．731．）The vine，the Macedonians are said to have introduced．（Strab． l．c．）Its principal mountains are those on the N．， called by Pliny Charbanus and Cambalidus（vi． 27. s．31），while a portion of the Montes Uxii probably belonged to this province，as in them is a pass called Hǜaz ミuaiठes．（Polyaen．iv．3．27．）
Susiana was intersected by numerous rivers which flowed either to the Tigris or Persian gulf，from the high mountain watershed whereby it was surruanded． Of these the princijal were the Euheus（Karin）， the Choaspes（Kerkliah），the Coprates（river of Diz），the Hedyphon or Hedypnus（Jerrohi），and the Oroatis（Tab）．The inhabitants of the district appear to have borne indifferently the names of Sussii or Susiani，and，as inhahitants of the plain country，to have been devoted to agricultural em－ ployments；in the mountains，however，were tribes of robbers，who，from time to time，were strong enough to levy black mail even on their kings when travers－ ing their passes．（Strab．xv．p．728．）Another name，whereby the people were known，at least in early times，was Cissii（Acsch．Pers．16），and the land itself Cissia（Strab．av．p．728；1lerod．v．49）． This name is clearly connected wath that of one of the chief tribes of the people，the Cossaei，who are repeatedly mentioned in aticient authors．（Strab． xi．p． 522 ；Arr．Ind．40；Polyb．v．54，\＆c．）There were many different tribes settled in different parts of Susiana；but it is bardly possible now to determine to what differcut races they may have belonged． Ainong thesc，the most prominent were the Uxii，a robber tribe on the momntain borders of Media；tbe Messabatae，who occupied a valley district，probably now that known as Wuh－Sabadan；the Cossaei，in the direction along the Median mountains；and the Elymaei，inhabitants of Elymais，the remnant，in all probability，of the earliest dwellers in this province－ Elasa being the name whereby this whole district is known in the sacred records．（Isaiah，$x$ xi． 2 ； Jerem．xlix．25．）Besides these，several smaller districts are noticed in different suthors，as Caban－ dene．Corbiana，Gahiene，and Characene．Though I＇tulemy has preserved the names of several sriad
towns, there seems to liave been no city of imJntanre in Susiana, excepting Susa itself. [V.]

SUSUDATA (इovбovסd́тa), a place in the southeast of Germany, probably in the country inimbited by the Silingae, at the font of the Vandalici Montes. (Ptol. ii. 11. § 28.) Its exact site cannot be ascertained.
[L. S.]
SUTHUL, a town and fortress in the interior of Numidia, where Jugurtha lad a treasury. (Sall. Jug. 37.)
[T. H. D.]
SU'TRIUM (ミoútpiov: Eth. Sutriensis: Sutri), a city of Etruria, situated in the soutliern part of that conntry, 32 miles from Rome, on the line of the Via Cassia. There is no doubt that it was an ancient Etruscan site, but apparently a small town, and in all probability a mere dependency of one of its more powerful neighbours. It was not till after the fall of Veii that the Romans carried their arms as far as Sutrium, which they first attacked in B. C. 391, with what success is uncertain (Diod. xiv. 98); but it must have fallen into their hands either in that or the following year, as we fiad it in a state of dependency on Rome immediately after the Ganlish invasion. (Liv. vi. 3.) The very year after that event (в. c. 389) the neighbouring Etruscans laid siege to Sutrium with a large force; the city fell into their hands, but was recovered (as the tradition related) by the dictator Camillus on the same day. (Liv. vi, 3; Diod. xiv. 117.) Very nearly the same story is told again in n. c. 385 , when the city was half taken by the Etruscans, but recovered by Canillus and Valerius. (Liv. vi. 9.) It was doubtless with a view to guard against the repetition of these aurpiises that two years afterwards Sutrium received a Roman colony, b. c 383 (Vell. Pat. i. 14), and henceforth became, in coujunction with the neighbouriog Nepete, one of the pracipal frontier fortresses of the Roman territory on this side; lunce Livy terms it "claustra Etruriae." (Liv. ix. 32.) We do not find any subsequent mention of it in history till B. C. 311 , when the Etruscans again laid siege to the city with their united forces, but were defeated in a great battle under its walls by Aemilius Barbula. (Liv. l. c.) The next year (u. c. 310) they were able to renew the siege at the opening of the campaign, but were once more defeated by the consu] (). Fabius Maximus, and took refuge in the $\mathrm{Ci}-$ minian forest, which lay only a few miles distant. (Ib. 33, 35.) But this barrier was now for the first time passed by the Roman arms, and henceforth the wars with the Etraceaos were transferred to a more northerly region. From this time, therefore, we hear but little of Sutrium, which was, however, still for a time the ontpost of the Roman power on the side of Etruria. (Liv. x. 14.) Its name is next mentioned after a long interval during the Second Punic War, as one of the Coloniae Latinae, which, in E. C. 209, declared their inability to bear any longer the burdens of the war. It was in consequence punished at a later period by the imposition of still heavier contributions. (Liv, xxvii. 9, xxis. 15.) Its territory was one of those in which peruission was given to the exiled citizeas of Capua to settle. (Id, xxvi. 34 .)

Sutrium continued under the Roman government to be a small and unimportant country town: it is only once again mentioned in bistory, at the outbreak of the Perusian War (B. c. 41), when it was occupied by Agrippa, in order to cut off the communications of Lucius Antouius with Rone. (Appian,
B. C.v. 31.) But its position on the Cassian Wiy preserved it from falling into decay, like so many of the Etruscan cities, under the Roman Empire: it is noticed by all the geographers, and its contioued existence down to the close of the Western Empire is proved by inscriptions as well as the Itineraries. We learn that it received a fresh colony under Augustus, in consequence of which it bears in inscriptions the titles "Colonia Julia Sutrina." (Strab. V. p. 226 ; Plin. iii. 5. s. 8 ; Ptol. iii. 1. § 50 ; Itin. Ant. P. 286; Tab. Peut.; Lib. Col. p. 217; Gruter, Inser. p. 302. 1 ; Zumpt, de Col. p. 351.)

The modern town of Sutri is out a poor place with only about 2000 inhabitants, but retains its episcopal see, which it has preserved throughout the middle ages. It occupies the site of the ancient city, as is shown by many fragments of columns and otber architectural ornaments built into the modern bouses, as well as by some portions of the ancient walls, which resemble in tbeir style of construction those of Nepe and Falerii. The sitnation is, like that of most of the towns in this part of Etruia, on a nearly isolated hill bounded by precipitous cliffs or lanks of tufo rock, of no great elevation, and surrounded by small glens or ravines on all sides. In the cliffs which beund these are excayated numerous tombs, of no great interest. But the most remarkable relic of antiquity at Sutri is its amphitheatre, which is excavated in the tufo rock, and is in this respect uaique of its kind. It is, however, of small size, and, though irregular in construction, its arebitectural details are all of a late character: hence it is prohable that it is really of Roman and Imperial tines, though great importance bas been sometimes attached to it as a specimen of an original Etruscan amphitleatre. Its aoomalies and irregularities of structure are probably owing only to the fact that it was worked out of a previously existing stone-quarry, (Dennis's Etrurit, vol. i. Pp. 94-97; Nibby, Dintorri, vol. iii. pp, 142, 143.) [E. H. B.]

SUZAEL (Eov (aîou), a tribe of ancient Per is, noticed by Ptoleny (vi, 4, §3). Lassco considers from this name that they were connected with the people of Susa, and that they were of the same race as the Uxii, one of the mountain races of Snsiana. (Frsch. u. Griber's Encych, iii. sect. vol. xvii. p. 438.)
[V.]
SYAGROS PROMONTORIUM (इv́aypos ة̈крa), a promontory of the S. cnast of Arabia, at the eastern extremity of the Adranitae, the westernmost of the gulf of the Sachalitae, placed by I'tolemy in long. $90^{\circ}$, lat. $14^{\circ}$ (vi. $7 . \$ 11$ ). He comments on an eiror of his predecessor, Marious, who, he says, places the gulf sachalites on the W. of Cape Syagros, while all who had navigated those seas distinctly asserted that the country Sachslitis and its synonymous bay were to the E. of Syagros (i. 17. §§ 2, 3). Marcianus (p. 23, ap. IIudson Geogr. Min. tom. i.) agrees with Ptolemy. The author of the Periplus ascribed to Arrian seems, however, to confirm the testimony of Marinus, by placing the Sinus Sacbalites next to Cane Emporium, between that and Syagros Promontornm, aud naming the bay to the E. of Syagros, Omana, which he reckons as 600 stadia in width; but as be mentions still further to the E., Jloscha Portus, as a magazine for the spicery of Sachalitis, which he there more fully describes, it is possible that he may bave included all the country as far E. as Moscha under this name. It is at least clear that the Omana Sinus could be no part of the present
diverict of Oman. The maps give may blow 10 her if Syagros, where the Tretus Pustik wis .0.0. 1 The Periptus says thit the cape extended eastwand. phices a castle with a harbour and magazine at Sragros, and dencribes, in comection with it, the Dinscoridis Insula (Sumtnert), which I'liny places at a distance of 2240 ) stalia.

There is no difficulty in udentifcing this promintory syagnas with the men'orn lias Firrtesk, wheh derives its designation from the shout of the animal commemorated in it.. Greek nanie, which was probubly a herse transation of uts mative afpllation. The Periplu- deacriluts Syemens as the largest promantary in the warld, - an lypertbical expression, no dontt, but better suited tu this cape thon tuany other on the crast, sure the isolated mountain that forms Ras Fiartusk reaches an elevation of 2500 feet, and is malle at a distance of 60 miles; while those uf Ras Suugra (al. Soukiva), further to the E., sometimen identifice with Nyatrus on account of the simi1.rity of name do not exceed 600 feet. The suhject, it must be admittel, is not free from difficnity, mainly owing to the tact that I'tolemy places Moxdia Portus.-whech is nawally supposed to be the same as the Muelia Partus of the Peroplas, and in ilentried with Dzafar or Saphar,-W. of Syagros; in which case Kius .Noos (al. Nous) or Kias Saugra (al. SiunKira), must be his syagros, and the swhalites sums still further E. But since the distanec betwrea Susatia and the coast at Rus Firrfusk, alrout 2hou stadia, approxumates much mure nearly to P'ony's figures, 240 M.I'. ( $=2240$ staila $)$, than that between the samp inland and either of tire other capes, - or Fars Noms is 3600 stadia distant, and lios Singra connterably mose,-the mont prubable solnthm of the diffii wilty is found in the hypothesis alepert alove, of two poits called Mostion on the -mie comas. [Moscma] (See Müller's Nitis to Hitat's mol, at the Geagr. Giraec. Min. val. i. Ip. 259.280.) The question has been examued tive 1bem Vineent, who was the fist to fix carrectly this mupurtant puint in Arabian gevgraphy, and his main thatustunh are aequiesed in by Mr. Fiorster, who has carruborated them hy fiesh evidence fram the twayches of mollorn travellers ; and it is an interenting fatt, that whine the Greek gemeraphors . $p$ i ${ }^{2}=4$ to have tramslated the native name of the vone, whith it retains to this day, the natives on the appear to have alopted a modification of that Giend th.tnilation the the name of the town situatel, them as tint. under the cape, which still hears the nomie of Dmper (Vincent, Periplus, vol. ni. Hf. 331-3.31; F inter, A cuthin, vil. ni. pp. 166-177.) [(i. W.]
 at chobratel city of Mayna firae ia, situred on the Wi. share of the Tarentme gul, but a shurt distance from the sea, betwen the rivers Crathis ami Syharis. (Strab. vi. p. 263; Dıod. xii. 9.) The lavt of these, from whinh it derived tas name, was the strean now fatlond the Coscile, which at the prosent das falls into the C'rati about 3 miles trom its munth, but mancent times undoubtedly purstemd an indequmbent comar th the sma. Syban is was atpramently the eathes of atl the Greck colonies in thas part of laly, bunt a tomded, aremang to the statement of Scymun Chim, is carly as B. 1: 720, (Notmn. Ch, 3bin: (*tum, F. I1, val, i. 1. 174.) It was an Achutan edmen, and its Ockint w:a a citzen of Helce an Arham: but whth the A bawan comigrants were unngled a number of Trochenap cituers. The Achuents, hoves ro of utually ob-

 In herom dines: som Silimus has a story that the firat founder of the city was a soll of Aj .x Cüleus (Sulin. 2. § 10); but this is evidently mete fictinn, and the city was, historically speaking, undmbtedly an Achawan collony. It no re rapilly to great prosjerity, ownum in the first instance to the fertinty of the phain in whichs it was situateni. Its citizens alsn, contrary to the policy of many of the Greek states, freely adnuitted settlets of other nations to the rights of citizeuship, and the rast jopulation of the city is expressly ascribed in great measure to this cause. (Dind. sii. 9.) The statements transmitted to us of the power and opulence of the city, as well as of the lusurnous habits of its inhabitants, have indeed a very fahulous inpert, and are without doubt grossly exazgerated, but there is no reason to reject the main fact that Syharis had in the sizth century $\mathrm{n} . \mathrm{c}$. a tained a degree of wealth and pow r unprecedented among (ireek citics, and which excited the admiration of the reat of the IIellenic world. We are told that the Ssbarites rules over 2.5 subject cities, and could hring into the firl 1300,000 of their own citizens (surab. l. c.), a statmamt obvionsly incredible. The sulject cities went probably for the mont part (Menotran towns in the interior, but we know that Sybaris had estended its don inima across the peninsula to the Tyrrhem, mea, where it had founded the colonies of Posidunia, Latis, and Scidrus. The city itself was sad to he not less than 50 stadia in circumference, and the lursemen or knights who figured at the religinus procmsions are said to have amounted tu 5000 ) in number (Arlien, sii. p. 519), which would prove that thiese wealthy citizens were nore than four times us numeruus as at Athens. Smiudyrides, a citizun of Sylaris, who was one of the stitors for the h.ughtera of Cleisthenes of Sicyon, is aid by H rodutus to have surjassed all other men in refined luxuly. (Himul. vi. 127.) It was iwserted that on this occasion he carnied with him a thain of 1000 slaves, incluling cooks, fishernm, \&e. (Athen, vi. 1. 273: Dhod, viii. Fr, 19.) It is unnecessary to topeat limere the tales that are told by varius writers, fop cially hy Athenapus, concerniths the absund retimenonto lusury ascribed to the Syharites, and whinh hase renucted their very mane proverbal. (Alhmat, an. pe. 518-521; Dion. vi. Fr. $1 \times-20$; sud. s. $v$. इuSapitukais) They wen patientaly noted for the splendur at theif ather, winch wav formed of the finest Milesian wool, and thas save rize to estenstve commercial relationis with Mhetus, whith produced a cluse thembluip between the two cities. (Thmaens, ap. Actern an p. 519; 11-rod. vi.21.) A an instane of their manmficence we are told that Alcmimes of Sybarm Ind dediented as a rotive ulfeng in the
 Whels lis afturwad fell iuto the power of Donysuls of syracuse :ond wats sold by binn for 120 talents, or moxe than 24,0007. sterling. (Pseod Arist. Mirab. 96 . Ahen. 84. p. 541.)

Notwithomathet thrse details cuncerning the wealth and luxury of sybaris. we are almest wholly without infmanton as to the listory of the eity until shorily latose ts fall. Herodotus incidentaly reters to the time of sumndyriles (about $586-360$, a. c.) as the perind when Sylaris was at the lecieht of its prower. At a later jeriod it seems to have been agitated by political diesensions, with the
circomstances of which we are very imperfectly acqusinted．It appears that the govermment bad previously been in the hands of an oligarchy，to which such persons as Smindyrides and Alcimenes naturally belonged ；but the democratic party，headed by a denagogue named Telys，succeeded in over－ throwing their power，and drove a considerable number of the leatling citizens into exile．Telys hereupon seems to have raised himself to the position of despot or tyrant of the city．The exiled citizens trok refuge at Crotona；but not content with their victory，＇lelys and his Fartianans called upon the Crotaniats to surrender the fugitives．This they refused to do，and the Srbarites hereupon declared war on them，and marched upon Crotom with an army said to have anounted to 300,000 men．They were met at the river Traeis by the Crutooiars， whose army did not amount to more than a third of their numbers；notwithstanding which they obtained a complete victory，and put the greater part of the Nybartes to the sword，continuing the pursuit to thet very gates of the city，of which they easily made themselves masters，and which they detemined to dentroy so entirely that it shoold never again be inhabited．For this farpose they turned the course of the river Crathis，so that it inundated the site of the city and buried the rains under the depwits that it bronght down．（Died，xii．9，10；Stiab．vi．p． 263；Herod．v．44；Athenae．sii．p．521；Scymn． Ch． $337-360$ ．）This catastrophe vecurred is B．c． 510 ，and seems to have been viewed by many of the Greeks as a divine vengeance apon the Sylarites fir their pride and arrogance，caused by their exces－ sive prosjerity，mose especially for the contempt they laid shown fur the great festival of the Olympic fianes，which they are said to hare attempted to supplant by attnucting the principal artists，athletes， Sic．，to their orru public games．（Scymn．Ch． $350-$ 360；Athen．l．c．）

It is certain that Sybaris was never restored． The surviving inhabitants took refuge at Lails and Sidras，on the shores of the Tyrrhenian sea．An attempt was indeed made， 58 years after the de－ struction of the city，to establish them anew on the ancient site，but they were quickly driven out by the Crotoniats，and the fugitives afterwards com－ bined with the Athenian colonists in the fuundation of Thurii．［Tm＇mi．］At the present day the site is utterly desslate，and even the exact position of the ancient city cannot be deternined．The whole plain watered by the rivers Coscile and Cratz （the ancient Sybaris and Crathis），so renowned in ancient times for its fertility，is now a desolate swanpy tract．pestilential from malaria，and fre－ quented only by vast herds of buffalues，the usual accompaniment in Suutbern ltaly of all such pesti－ ferony regions．The circumstance mentioned by Strabo that the river Crathis had been lurned from its course to inundate the city，is cunfirmed by the accidental mention in Herodotus of the dry chamel
 44）：and this would sufficiently account for the disappearance of all traces of the city．Swinburne indeed tells us that some＂degraded fragments of aquedacts and tombs＂were still visible on the peniusula formed by the two rivers，and were pointed vut as the ruins of Sybaris，but these，as be justly observes，being built of brick，are probably of Ilouan times，and have no connection with the ancient city． Keprel Craven，on the other band，speatks of＂a wall simetimes risible in the bed of the Crathis when the
waters ure very low＂as being the only remainine relic of the ancient Sybaris．（Swinburne＇s Tratels， vol，i．1p．290－292；Craven＇s Sonthern Tour，pp． 217,218 ．）The ruins marked on Zammoni＇s large map as $l$ ．Antica Sibari are probably those of Thurii ［Truemi．］But it is certain that the lucality has never yet been thoroughly examined，and it is pro－ bable that sune light may even yet br thrown upon the site of this celebrated city：especially if the marslyy plain in which it is situated should ever be reclaimed and cultivated．There is no doubt that if this were done，it would again be a tract of surpass－ ing fertility：it is citel as such by Varro，who tells us that＂in Sybaritano＂wheat was said to produce a hundred－fuld．（Varr．R．K．i．44．）Even at the present day the drier spots produce very rich exops of corn．（Swinburne，l．c．）

The river Sybaris was said to be so named by the Greek colonists from a fountain of that name at Bura in Achaia（Strab．viii．p．386）：it had the property，according to some authors，of making horses shy that drank of its waters．（Psead．Arist．Mi－ rab． 169 ；Strals，vi．p．263．）．It is a considerable stream，and has ins sources in the Apennines near Murano，flows beneath Castrovillari，and receives several minur tributary streans before it joins the Crathis．
［E．H．B．］

COIN of sybaris．
SI＇BOTA．［Concxha，p．670．］
SYBRITA（ミúยpıтa，scyl．p．18；इои́Epıтс，
 Polyb．op．Steph．B．s．飞，：Eth．ミıtpútios．Börkh， Corp．Inser，vol ii．p．637），a town of Crete， 8 M ．P． from Eleutherna（ $P^{\prime}$ eut．Tab．），and famons for its numerous and beautiful silver coins，which，thouyh some of them belong to a very early period，are the finest specimens of the Cretan mint；the types are always connected with the worship of Dionysus or Hermes．（Eckhel，vol．ii．p．320．）［E．B．J．］

SYCAMINA（ tine，placed by Stribo between Acre（Aкク）and Caesareia Palaestinae（ $\mathbf{\Sigma} \tau \rho \alpha ́ \tau \omega \nu o s ~ \pi \dot{u} p \gamma o s$ ），the name of whicb alone remained in his time．There were，he says，many such ：of which he specities this and Bu－ culon（Bouк $\dot{\lambda} \omega \nu$ ）and Crocodeilon（Кракоঠ́єi入шע）． （Strab．xvi．p．758．）It was here that I＇tolemy Lat－ thyrus，son of Cleopatra，landed the army of 30.000 men whom he had brought from Cyprus to besiege Ptulemais，which would impiy that it was not far distanit from Acre（Joseplus，lib．xiii．13．§ 3）． The Itinerary of Antoninus makes it xxiv．M．P．trom Ptolenais，Xx．M．P．from Caesarcia ；the Jernsalem Itinerary xv．il．P．from Ptwlemaid，zvi．fromCacareia． （Wesseling，Ip．149．584．）The last－named authonity places it at thount Carnel，thereby justifying its iden． tification with the modern Kaiphas or Haifa，tollowed by lieichard，Mamert，and Kiepert，rather than wath At lit，suggested by lapie．Judecd the testimuy of Eusebius would seem to be conclusive on this print，
as he speaks of a village of this name（ミukapivav $\pi \delta$（is）on the coast between l＇tolemais and Caesareia， near Nount Carmel，called also Ilepha（＇H申人̀）in his day．（Onomast．s．v．＇la申＇́日．）Dr．Wilson，however， thinks that the modern IInifo＂more probably oc－ cupies the site of the＇Jutatio Calamon，＇given in the Jerusalem Itinerary as 12 kuman miles from Ptolemais，while the＇Mansio Sicamenos＇of the same work was 3 miles farther on．Ruuns have been dis－ covered along the shore，about 2 Roman miles to the the W：of Haifa ；．．．these ruins may have been those of Sycaminos．＂（Lands of the Bible，vol．ii． p．241．）Iaifit is as small walled town to the S．of the Bay of Acre，at the northern base of the pro－ montory of Nount Carmel，distamt about 10 miles from ltolenais（Acre）；a distance far too small to satisfy the statement of the 1tinerary of Antoninns， or even that of the Jerusalem Itinerary．But，not－ withstanding this，its identity with Sycanina seems to be sufficiently establisthed by the testimony of Eusebius，juined to the bistorical fact recorded by Jusephns，which better suits this than any otber place on the coast，being in fact the very place where Ilrahim Pasha，when engaged in a similar enterprise against Acre，landed some of his troops and concen－ trated his army，in 1831，preparatory to forming the siege of the town．（Alderson，Nutes on Acre， 1p．23，24．）
［G．W．］
SYCE（ 之vín ），a town of Cilicin，which accord－ ing to the Ravenna Geographer，who calls it Sycae （i． 17 ），was situated between Arsinoi and Celenderis． （Athen．iii． 5 ；Steph．B．s．v．ミukai．）Leake （Asits Minor，p．202）looks for its site near the moder Kizliman．
［L．S．］
SYCEON，a town of Galatia，situated at the foint where the river Siberis flowed into the Kangarius．（1＇rocop．de Aed．v． 4 ；I＇it．Theod． Syceotae， 2 ；Wessel．ad Hicrod．p．697．）［1．S．］

SYCU＇RIUM，a town of Thessaly in the di－trict Pelasgiotis，at the foot of Mt．Ossa，which Leake jdentifies with Marmariani．（Liv．xlui．54；Leake， Northern Greece，vol．iii．p． 374 ．）

SYEBI MONTES（ $\frac{1}{2}$ E Zúnba ópn，Ptol．vi． 14. § s），a monntain chain in screthia，ronning from the Tupuri mountains in a NE．direction towards Imaus．
［T．H．D．］
SIEDRA（ $£ v ́ \in \delta \rho a:$ Eth．S ¿ve $\delta \rho \in v ́ s$ ）．a coast－town in the west of Cilicia，between Curacesium and Sclinus（Strab．xiv．P．669，where the common but erronenus reading is Arsinco ：Steph．B．s．v．； 1＇tol．v．8．§ु 1 ：Hierocl．p．683；Lacah，viii．259； 5 Flor．iv．2．）It should，Lowever，be observed that Stephanus B．calls it a town of 1sauria，and that Hierocles assigns it to Pamphytha．Beaufort （Karamania，P．178）observed smae ruins on a steep hill in that district，which be thinks may mark the site of Syedra；and Mr．Hamilton，in his map of Asia Minor，also marks the ruins of Sydre on the same spot，a little to the south－east of Alaya， the ancient Coracesium．
［L．S．］
SY＇E＇NE（ミvipn，Jerod，ii．30；Strab．ji．p．133， xvii．p．797，seq－；Steph．B．s．v．；1＇tol．vii．5．§ 15 ，viii． 15 ．§ 15 ；1＇lus．ii．zil s． 75, v． 10 ．s．11， vi．29．s．34；$/ 1$. Ant．p．164），the modern Assmuan， was the frontier town of segypt to the S．Syene stood upon a ppninsula on the right bank of the Nile，immediately below the Great Falls，which ex－ tend to it from lhilae．It is supposed to have de－ rived its name from Suan，an Acgyptian goddess， the Ilithya of the Cirecks，and of whels the inport is＂the opener；＂and at Syene Vprer Aecopy was
in all ages，conceived to open or begin．The quarries of syene were celebratod for their stone， and especially for the anarble called Syenite．They furnished the colossal statues，obelisks，and mono－ lithal shrines which are found throughout Aegypt； and the traces of the quarryinen who wrought in these 3000 years ago are still visible in the native rock．They lie on either bank of the Nile，and a road， 4 miles in length，was cut beside them from Syene to l＇hilae．Syene was equally important as a military station and as a place of traffic．Under every dynasty it was a garrison town；and bere were levied woll and custom on all boats phssing southward and northward．The latitude of Syene－ $24^{\circ} 5^{\prime} 23^{\prime \prime}$－was an object of great interest to the ancient geographers．They believed that it was seated immediately under the tropic，and that on the day of the summer solstice a vertical staff cast no shadow，and the sun＇s dise was reflected in a well at noonday．This statement is indeed incorrect ； the ancients were not acquainted with the true tropic：yet at the sumner－solstice the length of the sladow，or $\frac{1}{\text { dos }}$ th of the staff，could scarcely be dis－ cerned，and the northern limb of the sun＇s dise would be nearly vertical．The Nile is nearly 3000 yards wide above Syene．From this frontier town to the northern extrenity of Aegypt it flows for more than 750 miles without bar or cataract．The voyuge from Syene to Alexandreia astally occopied between 21 and 28 days in favourable weather．［W．B．D．］ syGAMBRL．［Stcambit．］
SYLINA INSULA．［SILEMA．］
SYLLIUM（ $\operatorname{si} 1 \lambda \lambda 6 O D$ ），a fortified tuwn of Pampbylia，situated on a lofty beight between Aspendus and side，and between the rivers Euryme－ don and Cestrus，at a distance of 40 stadia from the cuast，（Sitrab．xiv．p． 667 ；Arrian，Anab．i． 25：Scylax，p．40；I＇tol．v． 5 ．§ 1；Hervel．p． 679 ； Polyb．xxii． 17 ；Steph．B．mentions it under the name $\mathbf{\Sigma}$ inteon，while in uther passages it is called $\mathbf{\Sigma}$ ： －
 Minor，p．200）thinks that the remains of a Greek town which be found in a wood on the side of a rocky hill near Bolcascove belong to the ancient Syllium；bat from his description they do not appear to exist on a lofty height．
［L．S．］
SYMAETHUS（ $\Sigma$ íraitos：Simeto），whe of the most considerable rivers of Sicily，which rises in the chain of Muns Nebrodes，in the great fure：t nuw called the Bosco di Caronia，sul flows from thence in a southerly direction，skirting the bitse of Aetna，till it turns to the E ．and flows into tho sea about 8 miles S．of Catania．In the lower part of its course it formed the boundary between the territory of Leontini and that of Catana．（Thuc．vi．655．）it receives in its course many tributaries，of which the most considerable we，the Fiume Salso，flowing from the neighbourhood of Nicosia and Traina， probably the Cyamosor us of Polybius（i．9），which he describes as flowing near Centurip（Centorbi）， and the Dittaino，which rises in the lulls near Asaro，the ancient Assorus．This is undoubtedly the strean called in ancient times Curysas．Stephanus of Byzantium apparently gives the name of Adranus to the upper part or main brameh of the Symaethns itself，which flows mader the walls of Adraveras （Aderno）．This part of the river is still called the Simeto；lut in the luwer part of its counse， where it approaches the sea，it is now known as tho Giarretta．Sucls differences of name are common in modern，as well as in ancient times．The Symae－

 mentioned by Zosimas (iii. 27). It is probably the same as that called by Ammianus, Hucambra (xxiv, 8).
[V.]
SYME ( $\mathbf{\Sigma} \dot{v} \mu \eta$ : Symi), an island off the const of Caris, to the west of Cape Cybossema, between the Cnidian peninsula and Rhodes, at the entrance of the Sinus Schoenus. (Herod. i. 174 ; Thac. viii. 41 ; Strab. xiv. p. 656; Scylax, p. 38; Athen. vi. p. 262.) The island is described as 3 ? Roman miles in circumference, and as possessing eight barbours (Plin. v. 31, 133) and a town of the same nane as the island. The island itself is very high bat barren. According to Stephanas B. (s, v.; comp. Athen. vii. p. 296) Syme was formerly called Metapontis and Aegle, and obtained its later name from Syme, a daugliter of Lalysus, who, together with Chthovins, a soa of Poseidon, is said to have first peopled the island. In tbe story of the Trojan war, Syme enjoys a kind of celebrity, for the hero Nirens is said to have gone with three ships to assist Agamembon. (Hsm, Il. ij. 671 ; Dictys. Cret. iv. 17 ; Dares Plaryg. 21.) The first historical popalation of the island consisted of Dorians ; but subsequently it fell into the hands of the Cariats, and when they, in consequence of frequent dronghts, abandoned it, it was for a long time uninhabited, uutil it was finully and permanently occupied by Argives and Lacedaemonians, mised with Cnidians and Rhodians. (Diod. Sic. v. 33; Raonl-Rochette, Ilist. des Colon. Girecques, i. p. 337, iii. p. i2.) There ate still a few but unimportant retnains of the acropolis of Syme, which, however, are constantly dimioished, the stones being nsed to erect modern buildings. (Comp, Russ, Reisen auf den Griech. Inseln. vol, iii. F. 121, foll.)
[I. s.]
SYMPLE'GADES. [Bosporvs, p. 424.]
SYNCA ( Ĺv $\nu K a$ ), a small village of Babylonia noticed by Zosimns (iii. c. 28).
[V.]
SYNNADA (Eúvváa: Eth. 乏uvaōeús), a cown of Phrygia Salataris, at the extrenity of a plain abont 60 stadia in length, and covered witb olive plantations. "It is first noticed during the march of the cousu! Manlius against the Gallograeci (Liv. xxxviii. 15, xlv. 34); and Cicero (ad Att. v. 20; comp. ad Fam. iii. 8. xv. 4) mentions that be passed through Synnada on his way from Ephesus to Culicia. In Strabo's time (xii. p. 577) it was still a small town, but when Pliny wrote (r. 29) it was an important place, being the couventus juridicus for the
whole of the surronndiog coantry. It was very celebrated among the Romans for a beautifal kind of marble fornished by the neighboaring quarries, and which was commonly called Symadic marble, though it came properly from a place in the neighbonrbood, Docinia, whence it was more correctly called Docimites lapis. This marble was of a light colonr, interspersed with parple spots and veins. (Strab. l. c.; Plin. xxxv. 1; Stat. Silv. i. 5. 36 ; Comp. Steph. B. s. v.; Ptol. v. 2. § 24 ; Martial, ix. 76 ; Symmach. ii. 246.) There still are appearances of extensive quarries between Kosru-Khan and Bulwudun, which Col. Leake (Asia Minor, P. 36 ) is inclined to identify with those of Synnada or Docinia. Remains of the town of Synaada still exist under the name Eski-kara-hissar about 3 miles to the north-west of these quarries, where they were discovered by Texier. Earlier travellers imagined they had found them at Surmina or Surmeneh, or in the plain of Sundokleh. (Comp. llamilton, Researches, i. p. 466, ii. 177 ; Journal of the $R$. Geogr. Society, vii. p. 58, viii. p. 144; Eckhel, Doctr. Num. iii. p. 172 ; Sestini, Num. l'et. p. 127.)
[L. S.]
SYNNAUS (Źv́vvaos), a town in Phrygia Pacatiana, oot far from the sonrces of the Macestus, probably on the site of the modern Simawnl, (P'tol. v. 2. § 22; Sucrat. Hist. Eccl. vii. 3; Niceph. Hist. Eccles. siv. 11 ; Concil. Chalced. p. 674; Hamiltun, Researches, ii. p. 124; Franz, Funf Inschriften, p. 33.)
[L. S.]
SYNO1HIUM ( $2 v \nu o ́ \delta เ o v, ~ A p p i a n, ~ I l l y r . ~ 27 ; ~ \Sigma i-~$ $\boldsymbol{\nu}$ útiov, Strab. vii. p. 315), a town of Dalinatia, situated in a deep gorge between two hills, where Gabinins was deleated, and to which the Datmatians retreated in the campaigo of B, c. 34. Octavius, suspecting their intentions, sent skirmishers over the high ground while he advanced through the valley and burnt Synodium.
[E. B. J.]
 Steph. B.; bat Thacydides, Dioduras, \&c, use the form Zupakötos, which, as we learn from coins and inscriptions, was the native form; Syracusauns: Siracusa, Syracuse), the most powerfol and important of all the Greek cities in Sicily, situated on the E. coast of the island, about midway between Catana and Cape Pachynus. Its situation exercised so important an iufnence upon its bistory and progress, that it will be desirable to descibe this somewhat more fully before proceeding to the history of the city, reserving, at the sume time, tho topognaphical details for subsequent discussion.

## I. Situation.

Syracuse was situated on a table-land or tabular hill, forming the prolongation of a ridye which branches off from the more elevatel table-land of the interior, and projects quite down to the sea, between the bay known as the Great Harlour of Syracuse, and the more eatensive bay which stretches on the N , as far as the peninsula of Tharses or Magnisi. The broad end of the kind of promontory thus formed, which abuts upon the sea for a distance of abont $2 \frac{1}{2}$ miles, may be considered as the base of a triaogular platean which extends for abure 4 miles into the interior, having its apex formed by the point now called Mongibellisi, whicb was occupiel by the ancient fort of Euryalus. This commanicates, as already stated, by a narrow ridge with the table land of the interior, hat is still a manked point of separation, and was the highest point of

## syracusae.

the ancient city, from whence the table-hond slopes very graulually to the sea. Thuogh of small clevation, this plateat is bounded on all sides by precipitous banks or cliff, varying in leight, but only accessibie at a few points. It may be considered as naturally divided into two portions liy a slight valley or depression ronoing neruss it from N. to $\therefore$, ahout a mile from the sea: of these the upper or triangular purtion was known as limonas, the eastern portion adjuining the sea bore the name of Acmenmis., which thas forms in some degree a distinct and separate platean, though belonging, in fact, to the same mass with Epipulae.
The SE. angle of the phatean is separated from the Cireat llambur by a small trate of low nod ievel Erauml, opposite to which lies the island of On:traih, a has islet abunt a mile in length, exterdiag arowss the mouth of the Great Harbuur, and oriLinally divided by only a narrow strait from the In inland, whitet its southern extremity was sela-mat-l! from the nearest pint of the headland of 1"pmonyinum by an interval of about 1200 yards. forthing the entrance into the Geat Harbour. This fot was a spacious bay, of aboure 5 miles in circumfrenee: thas greatly exceeding the dimensions of what the ancients nsmally understond by a port. but forming a very nemly jud-dorked basin of a sumewhat aval form, which afferded a secure shelter to shipping in all weather; and is oven at the present day one of the finest harbours in Sully. But between the island of Ortygia and the mainland to the N . of it, was a deep bight-or inket, forming what was called the Lesser Port or Porves Lacceres, which, though very inforior to the other, was still cupal to the ordinary requirements of ancieat conmente.
S. of the Great Ilabour acsain rose the peninsular promentory of PoEvaryet'm, forming a table-land hommed, like that on the N. of the bay, hy precipitous esearpments a ad clitf, theugh of nio great elevation. Tbis table-land was prulonged by anather flute:u at a someshat lower level, bounding the sunthern side of the Gireat Harbour, and extending from thence towards the interior. On its NE. angle and opurite to the heights of Epipolae. stond the temple of Jupiter Olympius, or the Olymberm. wo-looking the low marshy tract which intervenes betwon the two table-lauds, and through whieh the river Anapus finds its way to the sea. The heautitiol areman of the Cyane rines in a sonrce ahout $1 \frac{1}{2}$ wile to the N . of the Oiympieam, nad , wins its waters with thase of the Ampus almost immonately below the temple. From the toot of tha hall crowned by the latter extends a broad tract of wry low mavshy ground, extending along the juar sime of the Great llarbour quite to the walls of the city itself. A purtion of this marsh, which seems to lave formed in ancient times a shallow pood or laynom, wa, known by the name of l.varableia (Avachédeta, Thue. vii. 53 ; Thewer. Id. xvi. 84). thongh its mare ancient apputlation would meen to have bren Sybaco (ミopaké), trom whenee the enity thelf was supposed to derive its oame. (Strph. D s. e. Z̈uparoürat; Seymn. Ch. 281.) It is, however, uncertain whether the names of syma and lessimetria may not origionily have helonged to ditlement poitions of thene marsfies. This marshy tract, which is abowe a mile in breadth, estends towards the interior for a considerable distance, till it is met by the precipitous escarpments of the Ereat table and of the interior. The proximity of
these marnhes must always have been prejudicial to the bealthiness of the situation; and the legend, that when Archias and Myscellus were about to found Syracuse and Crutoma, the latter chose health while the former preferred wealth (Siteph. B. l. c.), points to the acknowledged insalubrity of the site even in its most flourishing days. But in every other respect the sitnation was admirable; and the prosperity of Syracuse was doubtless owing in a Freat degree to natnral as well as political caures. It was, moreover, celebrated for the mildness and seronity of its climate, it being generally asserted that there was on day on which the sun was lut visible at Syracuse (Cic. Ierr. . . 10), un advantage which it is said still to retain at the present day.

## 11. Ihstoisy.

Syracnie was, with the siogle exception of Naxos, the most anmine of the Greek culonies in Sicily. It was a Corinthian coleny, sent ont from that city mider a leader named Archias, son of Euagetes, who Infonged to the pumerfint family of the Barcliadne, but hai been conpelled to expatriate himself. Acconling to sonne accounts the colony was strengthenied by an sulmixture of Dorian or Locrian colonists wilh thic original Corinthian settlers: but it is certuin that the Syracmans regarded themselves in all ages as if pure Carinthian origin (Theocr. Id, xv. 91), and matistained relations of the closest amity with their parent city. The culory was founded in 1s. .c. 734 , atul the first setthers establishet themselves in the island of (rrtygia, to which it is probsble that the city was contined for a considerable pertoki. (Thue, vi. 2; Strab. vi. p. 269; Seymn. Ch. 279-282; Narm. Iarr. ; concerning the date, sce Clinton, F. II, whi. i. p. 164) The name of Ontygiat is evidently Greck, and derived from the well-known equithet of Dianh, to whom the island was regarded as consecrated (Diod. v. 3); bnt the city seems to have assumed from the very beginning the name If Nyracusae, which was derived, as already mentinsel, from the natue of the adjoining marsh or L.ke, Symuen, doubtless an indigenons name, as it haw no signification in Greek. It appears indceel that the form Syraco was used ty Epicharmus for the name of the city itself, but this was evidently a mere pootic licunse. (Strab, viii. p, 364.)

A in the case of most of the Grewk colonies in Sirity, we lave very little information concerning the early listory and progress of Syracuse; but we may ioter that it rose stemdily, if not rapidly, to prosperity, from the circumstance that it continned to estend its power by the foundation of tresh colonies: that of Acrue within 70 years after its cown establishment (n. c. 6i64), Casmenae 20 years later (11. e. 644), and Camarima 4.5 yoars afterWarls, or n. C. 599. None of theve culonies, howwer, rove to any considerahle power: it was obvionsly the policy of Syracuse th keep then in the pusition of mere dependencies ; nod Comarina, having given mobrase to the parent city, was deatroyed ouly $4 t$ years after its foundation. (Thuce vi. 5: Scymin. Ch. 294-296.) Syracure was not, however, fire from internal dissensions und revalntions. An ollacure notice preserved to us by Thucydides indicates the onemrence of the-e it early a $15 . \operatorname{c} .644^{2}$, which led to the expulsion of : party or clan called the Myletidae, who withatrew into exile and joined in the fommation of Himen: (Thue, vi. 5.) Aonther indication of such dixputes is found in Aristotle ( Pol, v: 4), bat we are at iblo
to assign any definite place in chrunology to the occurrence there alluded to. At a later period we find the government in the hauds of an exclusive oligarchy called the Geomori or Gamori, who, from their name, would appear to have been the descendants of the origital colonists, arond whom there naturaily grew up a democracy or plebs, composed of the citizens derived from other sources. At length, about B. C. 486, a revolution took place; and the demoeracy succecded in expelling the Geomori, who thereupon withdrew to Casmenae. (Herod. vii. 155; Dionys. vi. 62.) But this revolution quiekly led to another; Gelon, the powerfol despot of Gela, having espoused the cause of the exiles. Gela was at this time at least equal, if not superior, to Syracuse in power. Hippocrates, its late despot, had estended his power over many of the other cities in the east of Sicily, and defeated the Syracusams themselves in a great battle at the river Helorus. He would probably indeed hare made himself master of Syracuse upon this occasion had it not been for the interposition of the Corinthians and Corcyrseans, who brought about a peace upon eqnitable terms. (Herod. rii. 154.) But the expulsion of the Geomeri opened a fresh opportudity to Gelon, who, patting himself at the head of the exiles, easily effected their restoration, while the people of Syracnse readily admitted Gelon himself as their raler with despotic suthority. (Ib. 155.)

This revolution (which occarred in B. c. 485) seemed at first likely to render Syracuse subordinate to Gela, but it ultimately produced a directly contrary effect. Gelon seems to bave been fully alive to the superior advantages of Syracuse, and from the moment he had established his porter in that city, made it the chief object of his solicitade, and directed all his efforts to the strengthening and adorning his new capital. Among other measures, he removed thither the whole body of the citizens of Camarina (which bad been repeopled by Hippocrates), and subsequently more than half of those of Gela itself, admitting them all to the full rights of Syracusan citizens. Aftermards, as he directed bis arms successively against the Sicilian Megara and Euboea, he remored the wealthy and noble citizens of both those cities also to Syracuse. (Ib, 156.) That city now rose rapidly to a far greater amount of power and prosperity than it had previously enjored, and became, under the fostering care of Gelon, unquestionably the first of the Greek cities in Sicily. It was probably at this period that it first extended itself beyond the limits of the island, and occupied the table-land or beights of Acliradina, which were adapted to receive a far more numerous population, and had already become thickly peopled before the time of Thucydides. (Thuc. vi. 3.) Tbis portion of the city now came to be known as the Outer City ( $\hat{\eta} \epsilon \xi \omega \pi \dot{d} \lambda(s)$, while the island of Ortygia was ealled the Inner City, though still frequently designated as "the Island." Strictly speaking, however, it had ceased to merit that term, being now joited to the maiuland by an artificial dike or causeway. (Thuc. l. c.)

From the time of Gelon the history of Syracuse becomes inseparably blended with that of Sicily in general ; its position in the island being so important that, as Strabo justly remarks, whatever vicissitudes of fortune befel the city were shared in by the whole island. (Strab. vi. p. 270.) Hence it would be useless to recapitulate the events of which a brief summary has been already given in
the article Sicilis, and which are more fully detailed by all the general historians of Greece. The foliowing summary will, therefore, be confined to those historical events which more immediately affected the city itself, as distinguished from the political ricissitudes of the state.
There cas be no doubt that Syracuse continaed to flourish extremely throughout the reign of Gelon (B. c. 485-478), as well as that of his successor Hieron (n. c. 478-467), who, notwithstanding the more despotic character of his government, was in many respects a liberal and enlightened ruler. His patronage of letters and the arts especially rendered Syracuse one of the chief resorts of men of letters, and his court affurded shelter and protection to Aeschylus, Pindar, and Bacchylides. Nor was Syracuse itself deficient in literary distinction. Epicharmus, though not a native of the city, spent all the latter years of his life there, and Sophron, the celebrated writer of mimes, was a native of Syracuse, and exbibited all bis principal works there. The care bestowed upon the arts is sufficiently attested by the still extant coins of the city, as well as by the accounts transmitted to us of other monuments; and there is every probability that the distinction of Syracuse in this respect eommeuced from the reign of Hierod. The tranquil reign of that monarch was followed by a brief period of revolution and distarbance; bis brother Thrasybulus baving, after a short but tyranoical and violent reign, heen expelled by the Syracusans, who established a popular goverament, B. c. 466. This ras for a time agitated by fresh tumults, arising out of disputes between the new citizens who had been introduced by Gelon and the older citizens, who claimed the exclusive possession of political power; bat after some time these disputes were terminated by a compromise, and the Dew citizens withdrew to Messana. (Diod. xi. 67, $68,72,73,76$.

The civil dissensions connected with the expalsion of Thrasybulus, which on more than one occasion broke out into actual hostilities, show how great was the extent which the city had already attained. Thrasyholus himself, and afterwards the discontented citizens, are mentioned as occupying the Island and Aclradina, both of which were strongly fortified, and had their own separate walls (Diod. xi. 68, 73); while the popular party lield the rest of the city. It is evident therefore that there were already considerable spaces occupied by buildings outside the walls of these two quarters, which are distinctly mentioned on one occasion as "the suburbs" ( $\tau \dot{\alpha}$ приaoteia, $1 b .68$ ). Of these, one quarter called Tycha, which lay to the W. of Acluradina, adjoining the N. slupe of the table-land, is now first mentioned by name (Tbid.); but there can be no doubt that the plain between the heights of Achradina and the marshes was already occupied with buildings, and formed part of the city, though it apparently was not as yet comprised within the fortifications.

The final establishmeat of the democracy at Syracuse was followed by a period of about sixty years of free government, during which we are expressly told tbat the eity, in common with the other Greek colonies in Sicily, developed its resources with great rapidity, and probably attained to its maximum of wealth and power. (Diod. xi. 68, 72.) Before the close of this period it had to encounter the severest danger it had yet experienced, and gave abundant proof of its great resources by coming off rictorious in a contest with Athers, then at the very beight of
its power The cireamstances of the ereat singe of Syracuse by the Athenians must here be related in some detail, on sccount of their important bearing on all questions counceted with the topography of the city, and the interest they confer on its localities. At the same time it will obvionsly be impossible to do more than give a very bricf sketch of that memorable contest, for the details of which the reader must refer to the narrative of Thacydides, with the copiuns illastrations of Arnold, Grote, and (Co). Leake.
It was not till the spring of B. c. 414 that the siege of Syracuse was regalarly commenced. But in the autumn of 415 , the Athenians had already made a d+monstration against the city, and sailing into the Great Harbour, effected a landing witbout opposition near the Olympieum, where they established their camp on the shore, and erected a temporary fort at a place called Dascon (Thue, vi. 66 ; biod. xii. 6), apparently on the inner bight of the harburr, betweea the month of the Anapus and the bay now called the Bay of Maddalena. But thongh snecessful in the battle that ensued, Nicias did not attempt to follow up his advantage, and withdrew to wiuter at Catana. The next spring the Athenians Landed to the N. of Syracuse, at a place called Leon, about 6 or 7 stadia from the heights of Eppolae, while they established their naval station at the adjoiniag peainsula of Thapsus (Magnisi). The land troops advanced at once to occapy Epipolae, the military importance of which was felt by both parties, and succeeded in establisbing themselves there, before the Syracusans could dislodge them. They then proceeded to build a fort at a place called Labdalum, which is described by Threcydides as situated ". on the top of the clitif of Epipolae, lowking towards Mesara" (Thae, vi. 97), and having occupied this with a garrison, so as to secure their communications with their fleet, they adranced to a place called Syce ( $\dot{\eta}$ Zuk $\hat{\eta}$ ), where they established themselves, and began to construct with great rapidity a hae of circmovallation across the plateau of Epipolae.* The constraction of sueh a line was the costomary mode of proceeding in Greek sieges, and it was with the -pecial object of guarding against it that the Syra-ch-ans had in the preceding winter extended their fortitications by ranuing a new lice of wall so as to encluse thie temple of Apollo Temenites (Thuc, ri. 75), which probably extended from thence down to the Great Harbotir. Nevertheless the Atbenian 1the of circumatlation was carried on su rapidly as forsoite in them the greatest alam. Its northern ixtronty was male to reat on the seat a point - mal I'rugilus (prubably near the Scala Greca). and it wan from thence carried across the table- land

The aecoment here given of the Athenian operatums assumes that "the circle" repeatedly spoken of toy Thueydi les (vi. $98,99.8 \mathrm{c}$.) , is the circuit of the thes of circumaalation This is the construction athoted by Giuller, and all earlice editors of Thucydulcs, as well as by Col. Leake: and appears to the writer of this article by far the most natural and intellizible interpretation. Mr. Grote, on the contrary, as weil is 1) . Aruold in his later edition adopts the sustestion of M. Firmin Didot that "tbe circle" ( $\delta$ кúk入os) was a particalar intrenchment or fortified camp of a circular form. It is difficult to understand the mil tary object of sach a work, as well as to reconcile it with the subsequent details of the sirge operations.
of the Epipolae, to the point nearest to the Great Harbour. Alarmed at the rapid progress of this wall, the Syraensans endeavorred to interrapt it by constructing a connter or cross wall (íлоткixso $\mu \alpha$ or є่ $\gamma \kappa \alpha ́ p \sigma t o \nu ~ \tau \epsilon i \chi 0 s)$, directed apparently from tho wall recently erected aronnd the temple of Apillo Temenites towards the southern cliff of Epipolae. (Thuc. vi. 99.) This wall was, however, carried by the Atbenians by a sudden attack and destroyed, whereopon the Syracusans attempted a second cousterwork, carried through the marshes and low ground, so as to prevent the Athenians from connecting their works on Fpipolae with the Great Harbuar. But this work was, like the preceding one, taken and destroyed; and the Athenians, whose fleet had meanwhile entered the Great Harbonr, and established itself there, were able to constroct a strong dooble line of wall, extending from the cliffs of Epipolae quite down to the harbour. ( $\mathrm{Ib}, 100-$ 103.) On the table-land above, on the contrary, their $\pi$ orks were still incomplete, and especislly that part of the line of circnmvallation near Trogilus was still in an unfinished state when Gylippos landed in Sicily, so that that commander was able to furce his passage throngb the lines at this point, and effect an entry into Syracnse. (Id. vii. 2.) It is remarkable that the hill of Euryalus, though in fact the key of the position on the Epipolae, seems to have been neglected by Nicias, and was still andefended by any fortifications.

Gylippus immediately directed bis efforts to prevent the completion of the Athenian lines across the table-land, and obtained in the first instance an important advantage by surprising the Athenian furt at Labdalum. He nest began to erect another cross wall, ruuning ont from the walls of the city across the platenn, so as to eross and intersect the Atheninn lines; and notwithstanding repeated efforts on the part of the Athenians, succeeded in carrying this on so far as completely to cot off their line of circumvallation, and render it impassible for them to complete it. (ld, vii. 4-6.) Both $1^{\text {arties scem to }}$ bave looked on the completion of this line as the decisive point of the siege; Nicias finding himself unable to captare the ontwork of the Syracusans, almost despaired of saccess, and wrote to Athens for strong reinforcements. Neanwliile he sought to strengthen bis position on the Great Jlarbour by occupying and fortifying the beadland of Pleminyrimn, which completcly commanded its entrance. (Ib.4.) The Syracasans, however, still ocenpied the Olympieam (or Polichas, as it was sumetimes called) with a strong body of troops, and baving, ander the gnidance of Gylippas, attacked the Athenians both by sea and land, thoagb foiled in the former attempt, tbey took the forts which bad been recently erected on the Plemmyriam. (Ib, 4, 2224.) This was a most important advantage, as it rendered it henceforth very difficult for the Atheaians to supply their fleet and camp with provisions; and it is evident that it was so regarded by both parties (1b. 25, 31) : the Syracusans also subsequently gained a derisive snccess in a sea-fight mithin the Great Harbour, and were preparing to push their advantage forther, when the arrival of Demosthenes and Eurymedon from Athens with a powerfal fleet restored for a time the superiority of the Athenians. Demosthenes inmediately directed all his efforts to the captare of the Syracusan connterwork on Epipolac; but meanwhile Gylijpas had not neglected to strengthen his position there, by constructing three
redoubts or forts, each of them occupied with a stroug garrison, at intervals along the sloping plateau of Epipolae, while a fort had been also erected at tho important post of Euryalus, at the extreme angle of the heights. (Thuc. vii. 43.) So strong indeed was their position that Demosthenes despaired of carrying it by day, and resolved opon a night attack, in which he succeeded in carrying the fort at Euryalus, but was foiled in his attempt upon the other outworks, and repulsed with beavy loss. ( 1 b . 43-45.)

The failure of this attack was considered by Demosthenes himself as decisive, and he advised the inmediate abandorment of the siege. But the contrary advice of Nicias prevailed; and even when increasing sickness in the Athenian camp had induced him also to conscnt to a retreat, his superstitions fears, escited by an eclipse of the moon, again cansed them to postpone their departure. The consequences were fatal. The Syracusans now hecame rather the besiegers than the besieged, attacked the Athenian fleet in the Great Harbour, and cut off and destroyed the whole of their right wing under Earymedon, in the bay of Dascon. Elated with this success, they sought nothing less than the capture of the whole armament, and began to block up the mouth of the Great Harbour, from Ortygia across to Plemmyrium, by mooring vessels across it. The Athenians were now compelled to abandon all their outposts and lines on the heights, and draw together their troops as close to the naval camp as possible; while they made a final effort to break through the barrier at the entrance of the harbour. But this attempt proved nnsuccessful, and led to a complete defeat of the Athenian fleet. There was now no course bnt to retreat. The army under Nicias and Demosthenes broke up from its camp, and at first directed their course along the valley of the Anapus, till they came to a narrow pass, commanded by a precipitous ridge called the Acraean Rock ('Akpaiov $\lambda \dot{\epsilon} \pi a s$, Thnc. vii. 78 ), which had beea occupied in force by the Syracusans. Failing in forcing this defile, the Athemians changed their line of retreat, and followed the road to Helorus, but aiter forcing in succession, though not without heary loss, the passage of the two rivers Cacyparis and Erinens, and reaching the banks of the A-inaras, the last survivors of the Athenian army were compelied to lay down their arns. The whole number of prisoners was said to amount to 7000 . A trophy was erected by the Syracusans on the bank of the Asinarus, and a festival called the Asinaria instituted to commemorate their victory. (Thuc. vii. 78-87; Diod. siii. 18, 19.)
The fuilure of the Athenian expedition against Syracuse seemed likely to secure to that city the unquestionable superiority amung the Greek colonies in Sicily. Bat a new and formidable power now appeared-the Carthaginians, who were invited by the Scgestans to support them against the Selinuntines, but who, not content with the destruction of Selinus and Himera (п. c. 410 ), and with that of Agrigentum (r. c. 406), pushed forward their conquests with a view of making thenselves masters of the whole island. Dionssius, then a young man. took advantage of the alarm and excitement caused by this danger to raise himself to despotic power at Syracuse (B.c. 405), and he soon after concluded a peace with the Cartbaginians, whose career of victory had been checked by a pestilence. The history of the reign of Dionysius at

Syracuse, which continued for a period of 38 years (B. C. $405-387$ ), caunot be here related: it is briefly given in the Biayr. Dict, art. Dhosysitus, and very fully in Grote's Ilistory of Greece, vols. x. and xi.; but its influence and effects ujun the city itself must be here noticed. From a sery early period be turned his attention to the strengthening and fortification of the city, and constructed great works, partly with a view to the defence of the city against esternal invasion, partly for the secarity of bis own power. One of his first operations mas to convert the island of Ortygin into a strong fortress, by surrounding it with a lofty wall, fortified with numerous towers, especially on the side where it adjuined the land, where be raised a strongly fortified front, called the Pentapyla; while, for still further security, he constracted an interior fort or citadel within the island, which became the acropolis of Syracuse, and at the same time the residence of Dionysius and his successors in the despotism. Adjoining this he constracted within the lesser port, or Portus Lacceius, docks for his ships of mar on a large scale, so as to be capable of receiving 60 triremes: while they were enclused with a wall, and accessible only by a narrow entrance. But not content with this, he a few years afterwards added docks for 160 more ships, within the Great Port, in the recess or bight of it which approaches most nearly to the Portus Lacceius, and opened a channel of communication between the two. At the same time he adorned the part of the city immediately ontside the island with porticoes and public buildiugs for the convenience of the citizens. (Diod. xiv. 7.) But bis greatest mork of all was the line of walls with which be fortified the heights of Epipola. The erents of the Athenian siege bad sufficiently proved the vital importance of these to the safety of the city; and hence hefore Dionysins engaged in his great war with Carthage he determined to secure their possession by a line of permanent fortifications. The walls erected for this purpose along the northern edge of the cliffs of Epipolae (extending from near Sta Panagia to the bill of Euryalus, or Mongibellisi) were 30 stadia in Jength, and are said to have beeo erected by the laboor of the whole body of the citizens in the short space of 20 days. (Diod. xir. 18.) It is remarkable that we hear notbing of the construction of a similar wall along the soothern edge of the platean of Epipolae; thougb the table-land is at least as accessible on this side as on the other; and a considerable suburb called Neapolis had already grown up on this side (Diod. xır. 9), outside of the wall of Actradina, and extending over a considerable part of the slope, which descends from the Temenitis towards the marshy, plain of the Anapus. But whatever may have been the cause, it seens certain that Syracuse continued till a later period to be but imperfectly fortified on this side.

The importance of the additional defences erected by Dionysius was sufficieotly shoma in the course of the war with Carthage which began iu e.c. 397. In that war Dionysius at first carried his arms successfully to the western extremity of Sicily, but fortune soon turned against him, and be was compelled in his tnrn to shut himself up within the walls of Syracuse, and trust to the strength of his fortifications. The Carthaginian general Himilco entered the Great Port with his fleet, and established his head-quarters at the Olympieum, while be not only ravaged the country outside the walls, but made limself master of one of the subarbs,
io which were situated the temples of Ceres and Proserpiae, bath of which he gave up to plunder. But the anger of the goldesses, brongit on by this act of sacrilere, was believed to be the source of all the calamities that soon befel him. A pestileace broke out in the Carthaginian camp, from which they sustained very heavy losses, and Dionysius took advantage of their enfeebled state to make a general attack oa their camp both by sea and land. The positinu occupied by the Carthaginians was very much the same as that which had been held by the Athenians: they occupied the headland of Plemmyrium, on which they liad erected a fort, while they had also fortified the Olympieum, or Polichne, and constructed a third fort close to the edge of the Great llarbour for the protection of their fleet, which lay witl in the inner bay or harbour of Dascon. But Diony-ins, by a sudden attack from the land side, carned both the lass forts, and at the same time succeeded in burning a great part of the Carthaginian flect, so that Hiunileo was compelled to abandon the caterprise, and by a secret capitulation secured a safe retreat for hinself and the native Carthaginians in his army, abaudoming his allies and mercenaries to their fate. (Diod. siv. 62, 63, 70-75.)

The defeat of the Carthaginian armament left Hionysius undisputed master of Syracuse, thile that city held as unquestioned a pre-eminence over the other citios of sicily; and it is probable that the eity itself contimed to increase in extent and population. The inpregnable citadel in the island of Ortggia constracted by the elder Dionysius continned to be the bulwark of his power, as well as that of his son and successor. Even when the citizens, in 1. c. 357, opened their gates to Dion, who made a triumphal entry into Ach adisa, and made himself master with little difficulty of the fort on the summit of Epipolae, the whand still held out, and Dion mas compelled to nesurt to a blockade, having erected a line or wall of contravallation across froot the lesser port to the greater, so as effectually to cut off the garrisou from all communcation with the ioterior. (Plat. Dion. 29; Dind. $\mathbf{5 v i}$ 12.) It wis not till after the blackade had heen continued for above a year that Apollocrates was conjelled by scarcity of provisions to surronder this stronghold, and Dion thus became cosplete master of Syracuse, B.c. 356. But that erent dill not, as had been expected, restore liberty t. Syracuse, and the foland citadel still remaived the stranghoh of the despots who saccessively raled over th i ir. When at leagth Timoleon landed in Sic Iy (4.c. 344) Ortygia was unce more in the 1 somen of binusius, while the rest of the city wa- in the bands of Hiceta. who mas supported by a Carthaginian theet and anny, with which he clusely blokkaded the island fortress. But the arrival of Tum Jeon qui kly chaaged the face of affairs: Ortyena was soluntarily surrendered to him by Dionysius: and Neon, whom he left there as commander of the kamsom, by a sudden sally made himself mavet if Aci ridina also. Soonsfter Tinioleod carried the heights of Epipolae by ascaut, and thus found hanse : riaster of the whole of Syracuse. Oae of tye inst neasstes he took after lis success was to demolsh the furtress erected by Hionssius within the lsland, as well as the palace of the despot himself, and the splendid monament that had bea cre ted to hin by his 8 m and successor. On the site were crected the new courts of justice. (Plut. Timol. 22.)

Syracuse bad suffered severely from the long
period of civil dissensions aad almost constant hostilitics which bad preceded its liberation by Timulena; and one of the first cares of its deliverer was to recrait its exhausted population, not only by recalling from all quasters the fagitive or exiled citizens, but by summoaing from Coriath and other parts of Greece a large body of nem colonists. Sueh was the success of his invitation that we are assured the total number of immigrants (iaclading of course the restored exiles) arnounted to not less than 60,000. (Plut. Timol. 22, 23.) The democratic form of government was restored, and the code of laws which liad been introduced by Diocles after the Athenian expedition, but had speedily fallen into neglect under the long deopotism of the two Dionysii, was now revived and restored to its fnll vigour. (Diod. xiii. 35, xvi. 70.) At the same time a new annual magistracy was established, with the title of Amplipolus of the Olympian Jove, who was thenceforth destined, like the Archoo at Athens, to give name to the year. The office was apparently a merely honorary one, but the years continued to be designated by the names of the Amphipoli down to the time of Augustus. (Diod. xri. 70; Cic. Verr. ï. 51 , iv. 61 .)

There can be no doubt that the period follorriog the resturation of liberty by Timoleon was one of grest prosperity for Syracuse, as well as for Nicily in general. Unfortunately it did not last long. Less than 30 years after the capture of Syracuse by Timoleoo, the city fell under the despotism of Agathucles (B. C. 317 ), which continued without iaterruption till B. C. 289. We hear very little of the fortunes of the ciry itself ander his government, but it appears that, like his predecessor Dionysias, Agathocles deroted his attention to the construction of great works and pablic buildings, so that the city continned to increase io magnificence. We are told, arnong other things, that be fortified the entrance of the lesser port, or Portus Lacceias, with towers, the remains of one of which are still visible. Daring the absence of Agathocles in Africa, Syracuse was iodeed exposed to the assaults of the Carthaginian general Hamilcar, who encamped, as Himilco had formerly done, at Polichne, acd from thence made desultory attacks opon the city, but without any important result ; and baving at length made a ni, ht attack upon the fort of Eargalas, he was defeated, and himself taken prisoner. (Diod, $x$. 29.) Aiter the death of Agathocles, Syracuse for a short time recovered its liberty, bat sown fell agnin ander the virtual despotism of Hicetas, and subsequently passed iuto the hands of successive military adventurers, till in घ. c. 275 , the government became rested in Hieron, the son of Hierocles, who, at frst with the title of geaeral autocrator, and afterwards with that of king, continued to reign over the city till b. c. 216 . His wisdom and moderation proved a striking contrast to the despotism of several of the former rulers of Syracuse, and while his subjects tlourished under bis liberal and eolighteaed rule, external tranquillity was secured by the steadiness with which he adhered to the alliance of Rome, after having once measnred his strength against that formidable pomer. Br the treaty conclnded betweed him and the Romans in B. c. 263, he was recograised as king of Syracuse, with the dependent towns of Acrae, Helorus, Netum. Megara, and Leontini, to which was annexed Taurumeninm also, as an outlying dependency: (Diod. xxiii. Exc. H. p. 502.) Notwithstanding the small extent of his territory;

Hieron was uvdoubtedly a powerful prince, and Syracuse seems to hare risel, during this long period of peace and tranquillity, to a high state of wealth and prosperity. Its commercial relations with foreign countries, especially with Egypt, were assiduously cultivated and extended, while the natural resources of its fertile territory were developed to the utmost by the wise and judicions regulatioos of Hieron, which, onder the name of the Lex Hieronica, were subsequently introduced into all parts of Sicily, and contioned to be observed by the Romaos, io their administration of that province. At the same time the monarch adorned the city with maoy public works and buildings, inclnding temples, gymnavia, \&c., while be displayed bis wealth and magnificence by spleodid offerings, both at Rome and the most ooted sactuaries of Greece. On the whole it may probably be assumed that the reigo of Hieron II. was the period wheo Syracuse attained its highest degree of spleodour and magoificence, as well as of wealth and population.
But this state of things was abruptly changed after the death of Hieron. His grandson, Hieronymus, who sacceeded him, deserted the alliance of Rome for that of Carthage, aod though the yoong hing was sbortly after assassioated, the Carthagivian party continned to maintain its ascendency at Syracuse ander two leaders named Hippocrates and Epicydes, who were appointed geoerals with sujreme porer. They shut the gates against Marcellus, who was in command of the Rornan armies in Sicily, and having refused all terms of accommodation, compelled that general to form the siege of Syrachse, в. c. 2ll4. (Liv. xxiv. 21-33.) The enterprise proved far more ardoons than the Roman General seems to bave anticipated. He established his camp, as the Carthaginians bad repeatedly done, on the height of the Olympieum ; but his priocipa? attacks were directed against the nortbern walls, in the reighbourbod of Hexapylum (the oatlet of the cily towards Leontioi and Megara), as well as against the defences of Achradion from the sea. His powerful fleet gave Marcellus the complete command of the sea, and he availed himself of this to bring up his ships with powerful battering engines under the very walls whicb bordered the rocks of Achradina; but all his efforts were bafled by the superior skill and science of Archimedes; his engines and ships were destroyed or suak, and after repeated attempts, both by sea and laad, be found bimself compelled to abandon all active assanlts and conrert the sigge into a blockade. (Liv, xxir. 33,34 .)
Doring the winter he left the camp and army at the Olympieum, under the command of T. Quinctius Crispious, while be himself took up his wioter-quarters andestabished a fortified camp at Leoo, on the N. side of the city. But he was unable to maiotaio a strict blockade by sea, and the Cartbagioisas succeeded in trequeotly throwing in supplies, so that the blockade was prolonged for more than two years; and Marcellus began to entertain little prospect of success, when io the spring of B. C. 212 an accident tirew in his way the opportunity of scaling the walls by night, at a place called by Livy the Portus Trogiliorum (cridently the little core called Scala Greca); and having thus surprised the walls be made himself master of the gate at Hexapylum, as well as of a great part of the slope of Epipolae. But the strong firt of Euryalas, at the angle of Epipolae, defied bis efforts, and the walls of Achradioa, which still retained its separate fortifications, enabled the

Syracusans to hold posscssion of that important part of the city, us well as of the island and fortress of Ortjgia. The two quarters of Tycha and Neapolis were, lowever, surrendered to him, aod given up to plander, the citizena having stipulated only for their lives; and shortly after Pbilodernus, who commanded the garrison of Euryalus, baving no hopes of relief, surreadered that important post also into the hands of Marcellus. (Liv, xxv, 23-25.) The Roman general was now in possession of the whole heights of Epipolae, and being secored from attacks io the rear by the possession of Enryalus, be divided bis forces into three camps, and endeavoured wholly to blockade Achradina. At the same time Crispinas still held the old camp on the bill of the Olympieum. (Ib. 26.) In this state of things a vigoroos effort was made hy the Carthaginians to raise the siege: they advanced with a large army noder Himilco aod Hippocrates, and attacked the camp of Crispinus; while Bomilcar, witb a fleet of 150 ships, occapied the Great Harbour, and took possessioa of the sbore betweea the city and the month of the Arapus, at the same time that Epicydes made a vigorous sally from Achradina against the lines of Marcellus. But they were repulsed at all points, and though they continaed for some time to maintain their army io the immediate neighlourbood of the city, it was soon attacked by a pestilence, arising from the marshy nature of the low grounds in which they were encamped, to which both Hippocrates and Himilco fell victims, with a great part of their troops. Bomilcar, also, who bad quitted the port with the view of obtaining reinforcements from Carthage, never returned, and Epicydes, who had gone out to meet him, abandosed the city to its fate, and withdrew to Agrigentum. The defence of Syracnse was now entrusted to the leaders of the mercenary troops, and one of these, a Spaniard named Mericus, betrayed bis post to Marcellus. A body of Romaa troops was landed in the night at the extremity of the island, Dear the fonntaio of Arethusa, and quickly made themselves masters of the whole of Ortygia; while Jarcellus, having at the same time made a gener. 1 assanlt on Achradina, succeeded in carrying a portion of that quarter also. The remaining part of the city was now volontarily surreodered by the iohabitants; and Marcellus, atter taking precautions to secore the royal treasures, and the bouses of those citizens who bad been faveurable to the Romass, gave up the whole city to be pillaged by his soldiers. Archirnedes, who bad contriboted so mucb to the defence of the city, was accidentally slaio in the confusioo. The plunder was said to be enormons ; and the magnificent statoes, pictures, and other works of art which were carried by Marcellus to Rome, to adorn his own triomph, are said to have given the first impulse to that lore of Greek art which afterwards became so prevalent among the Romans. (Liv. xsv. 26-31, 40; Plut. Marc. 14 -19 ; Diod. xxvi. Fr. 18-20.)

From this time Syracose sank joto the ordioary condition of a Roman provincial tonn; hat it continaed to be the unquestionable capital of Sicily, and was the customary residence of the Roman praetors who were sent to govern the island, as well as of one of the two quaestors who were charged with its finaocial administratio. Eveo in the days of Cicero it is spokeo of by that orator as "the greatest of Greek cities, and the most beantiful of all cities." (Cic. Verr. iv, 52.) Its public buildings had apparently suffered little, if at all, from its captare by

Marcellus, and were evidently still extant in the days of the orator, who enumerates most of them by name. All the four quarters of the city, the Island, Achradina, Tycha, and Nenpolis, were still well inhabited; though as a meusure of precaution no persons of native Syracusan extraction were permitted to dwell in the lsland. (Ib, v. 32.) But the prosperity of Syracuse secms to have sustained a severe shock in the time of Sextns Pompeius, who, according to Strabo, inflicted upon it injuries, from which it appears never to bave recovered. Such was its decayed condition tbat Augustus endeavoured to recrnit it by sending thither a Roman colony (B. c. 21). But the new settlers were confined to the Island and to the part of the city immediately adjoining it, forming a portion only of Achradina and Neapolis. (Strab. vi. p. 270; Dion Cass. liv. 7; Plin. iii. 8. s. 14.) It is in this part of the torn that the amplitheatre and other edifices of Roman coustruction are still found.

But though greatly fallen from its former splendour, Syracuse continued thronghout the Roman Empire to be one of the most considerable cities of Sicily, and still finds a place in the tha century in the Ordo Nobiliun Urbium of Ausonius. The matural strengtb of the Island as a fortress rendered it always a post of the utmost importance. After the fall of the Western Empire, it fell with the rest of Sicily under the donimion of the Goths, but was recovercd by Belisarins in A. D. 535, and annexed to the dominiuns of the Byzantine emperors, in whose hauds it continued till the 9 th century, when it was finally wrested from them by the Arabs or Saracens. Syracuse was, with the single exception of Tauromenium, the last place in Sicily that fell into the laands of those invaders: it was still a very strong fortress, and it was not till 878 , more than fifty years after the Saracens first landed in the island, that it was compelled to surrender, after a siege of nine montbs' duration. The inhabitants were put to the sword, the furtifcations destroyed, and the city given up to the flames. Nor did it ever recover from this calanity, thongh the Island seems to bave alsays continued to be inbabited. Its fortifications were strem:thened by Charles V., and assutned very much their present appearance. The modern city, which is stili confined to the narrow limuts of the Istand, contains about 14,000 inhabitants. But the whole of the expanse on the oppnsite side of the strait, as well as the broad table-land of Achradina and Epipalse, are now wholiy bare and dowlate, being in great part nucultivated as well as uninhabited.

## 11l. Topography.

The topographical description of Syracuse as it existed in the days of its greatness cannot better be intrudured than in the words of Cicero, who has describen it in unusual detail. "You lave often heard (says he) that Syracuse was the largest of all (ireek cities, and the most beautiful of all cities. Aut it is so indeed. For it is both strong by its natual situation and striking to behold, from whatever side it is approached, whetber by land or sea. It lases two parts, as it were, enclosed within the builangs of the city itself, so as to combine with it from every point of view, which have different and separate entrances, but are united and conjoined together at the apposite extremity. The junction of these separates from tbe mainland the part of the town which is called the 1 -land, but this is remited to the continent by a bridge across the nar-
row strait which divides them. So great is the city that it may be said to consist of four cities, all of them of very large size; one of which is that which I have already mentioned, the Lland, which is surrounded by the two ports, while it projects towards the mouth and entrance of each of them. In it is the palace of king Hieron, wbich is now the customary residence of our practors. It contains, also, several sacred edifices, but two in particular, wheh far surpass the others, one a temple of Diana, the other of Mincrva, which before the arrival of Verres was most highly adorned. At the extrenity of this island is a fountain of fresh water, which bears the name of Arethusa, of incredible magnitude, and full of tish: this would be wholly overflowed and covered by the wares were it not separated from the sea by a strongly-built barrier of stone. The second city at Syracuse is that which is called Acbradina, which contains a forum of very large size, beautiful portiooes, a most highly ornamented Prytaneum, a spacions Curia, and a magnificent temple of Jupiter Olympius; not to spenk of the other parts of the city, which are occupied by private bnildings, being divided by one broad street through its whole length, and many cross streets. The third city is that which is called Tycba, becanse it contained a very ancient temple of Fortune; in this is a very spacions gymnasium, as well as many sacred edifices, and it is the quarter of the town which is the most thickly inbabited. The fourth city is that which, because it was the last built, is named Neapolis: at the top of whicb is a theatre of vast size; besides this it contains two splendid temples, one of Ceres, the other of Libera, and a statue of A pollo, which is known by the narne of Temenites, of grat beauty and very large size, which Verres would not have besitated to carry off if he had been able to remuve it." (Cic. Ferr. iv. 52, 53.)
Cicero here distinctly describes the four quarters of Syracuse, which were commonly compared to four separate cities; and it appears that Diodorus gave the same account. (Diod. xxvi. 19, ed. Didot.) In Later times, also, we find it alluded to as "the quadruple city" ("quadruplices Syraeusae," Auson. Cl. Urb. 11). Others, however, enumerated five quarters, as Strabo tells us that it was formerly composed of five cities ( $\pi \in \nu \tau a ́ \pi a \lambda 1 s ~ خ ̄ \nu \nu \tau \delta \pi \alpha \lambda a i o ́ \nu$, Strab. v. p. 270), probally becanse the heights of Epipolae towards the castle of Euryalus were at one time inhabited, aud were reckoned as a fifth town. But we have no distinct statement to this effect. The several quarters of the city must now be considered separately.

1. Ohtigia ('Opruyia, Pind., Diod., Slrab., 8ec.) more commonly known simply as "the Ishand" ( $\dot{\eta}$ ) $\nu \hat{\eta} \sigma o s$, Thuc., \&ec., and in the Dorie dialect Nâros: bence Livy calls it Nasus, while Cicero uses the Latin Insula), was the original seat of the colony, and contimued throughout the flourishing period of the city to be as it were the citadel or Acropolis of syracuse, though, unlike mast citadels, it lay lower tban the rest of the city, its strength as a fortress being derived from its iisular position. It is about a mile in length, by less than half a mile in breadth, and of small elevation, though composed wholly of rock, and rising perceptibly in the ceatre. There is no doubt that it was originally an island, naturally separated from the mainland, though in the time of Thucydides it was unital with it (Thuc. vi. 3): probably, however, this was merely effected by an artiticial mole or causeway,
fur the purpose of facilitating the communication with "the onter city," as that on the mainland was then called. At a later period it was again severed from the land, probably by the elder Dionysins, when he constructed his great docks in the twe ports, It was, however, undoubtedly always connected with the mainland by a bridge, or series of bridges, as it is at the present day. The citadel or castle, constructed by Dionysins, stood within the island, but immediatcly fronting the mainland, and closely adjoining the docks or navalia in the Lesser Port. Its front towards the mainland, which appears to have been strongly fortified, was known as the Pentapyla ( $\tau \grave{\alpha} \pi \epsilon \nu \tau \dot{\alpha} \pi u \lambda a$, Plat. Dion. 29); and this seems to have looked directly upon the Agora or Forum, which we know to have been situated on the mainland. It is therefore clear that the citadel must have occupied nearly the same position with the modern fortifications which form the defence of Syracuse on the land side. These were constructed in the reign of Cbarles V., when the istbmas by which Ortygir had been reunited to the mainland was cut throu_b, as well as a Roman aquednct designed to supply this quarter of the city with water, constructed, as it appeared from an inscription, by the emperer Clandins. (Fazell. Sic. iv. i. p. I69.)

Ortygia was cansidered from an early time as consecrated to Artemis or Diana (Diod. ₹. 3), whence Pindar terms it "the conch of Artemis," and "the sister of Delos" ( $\delta \dot{\mu} \mu \nu 10 \lambda$ 'Aprémios, $\Delta \alpha \dot{\lambda} \lambda o v$ кабı $\boldsymbol{y}^{\prime}$ ára, Nem. i. 3). Hence, as we learn from Cicero (l. c.), one of the principal edifices in the island was a temple of Diana. Some remains of this are supposed to be still extant in the NE. corner of the modern city, where two columns, with a portion of their arcbitrave, of the Doric order, are built into the walls of a private honse. From the atyle and character of these it is evident that the edifice was one of very remote antiquity. Much more considerable remains are extant of the other temple, noticed by the orator in the same passagethat of Minerva. This was one of the most magnificent in sicily. Its doors, composed of gold and ivory, and conspicuous for their beautiful workmanship, were celebrated thronghout the Grecian world: while the interior was adormed with numerous paintings, among which a series representing one of the battles of Agathocles was especially celebrated. All these works of art, which had been spared by the generosity of Mlarcellus, were carried off by the insatiable Verres. (Cic. Verr. iv. 55, 56.) On the summit of the temple was a slield, which serted as a landmark to sailors quitting or approachiog the port. (Polemon, ap. Athen. xi. p. 462.) There can he no doubt that this temple, which must have stood on the highest point of the island, is the same which bas been converted into the modern cathedral er church of Sta Maria delle Colonne. The colamns of the sides, fourteen in number, are still perfect, though built into the walls of the church; but the portico aod façade were destroyed by an earthquake. It was of the Doric order, and its dimensions ( 185 feet in length by 75 in breadth), which nearly approach thase of the great temple of Neptuse at Paestum, show that it must have belonged to the first class of adcient edifices of this description. The style ef the architectural details and proportions of the columns would render it probable that this temple may be referred to the sixth century b. c., thus confirming an incidental notice of $D_{1 o d o r u s ~(v i i i . ~ F r . ~ 9), ~ f r o m ~ w h i c h ~ i t ~ w o u l d ~ a p-~}^{\text {a }}$
pear that it was built nuder the government of the Geomori, and therefore certainly prior to the despotism of Gelon. No other ancient remains are now extant in the island of Ortygis; but the celebrated fountain of Arethusa is still visible, as described by Cicero, near the southern extremity of the island, on its western shore. It is still a very copious source, but scarcely answering to the accounts of its magnitude in ancient times; and it is probable that it has been disturbed and its supply diminished by earthquakes, which have repeatedly afflicted the modern town of Syracuse.
At the extreme point of the island, and outside the ancient walls, probably on the spot where the castle built by Jobn Maniaces now stands, was sitnated a temple of the Olympian Juno, with an altar from which it was the custom for departing sailors to take a cup with certain offerings, which they flung into the sea when they lost sight of the shield on the terople of Minerva (Polemod, ap. Athen. l.c.). Of the other edifices in the island the mast remarkable
 $\kappa \alpha \lambda o u ́ \mu \in \nu 0 s$, Diod. xvi. S6), built, or at least finished, by Agathocles, but the purpose and nature of whicb are uncertain ; the public granaries, a building of so massive and lofty a construction as to serve the purposes of a fortress (Liv, xxiv. 21); and the palace of king Hieron, wbich was afterwards made the residence of the Roman practors (Cic. Ferr. iv. 52). The site of this is uncertain: the palace of Dionysius, which had been situated in the citadel constructed by him, was destroyed together with that fortress by Timoleon, and a building for the courts of jnstice erected on the site. Hence it is probable that Hieron, who was always desirons to conrt popularity, would avoid establishing himself anew upan the same site. No trace now remains of the ancient walls or works on this side of the island, which have been wholly covered and concealed by the modern fortifications. The remains of a tower are, bowever, visible on a shoal or rock near the N. angle of the modern city, which are probably those of one of the towers built by Agathocles to guard the entrance of the Lesser Harbour, or Portus Lacceius (Diod. xvi. 83): but no traces have been discovered of the correspooding tower on the other side.
2. Achradina ('Axpa $\delta i n \eta$. Diod., and this seems to be the more correct form of the name, though it is frequently written Acradina; both Livy and Cicero, however, give Achradina), or "the outer city," as it is termed by Thucydides, was the most important and extensive of the quarters of Syracnse. It consisted of two portions, comprising the eastern part of the great triangular plateau already described, which extended from the angle nf Epipolae to the sea, as well as the lower and more level space which extends from the foot of this table-land to the Great Harbour, and borders on the marshes of Lysimeleia. This level plain, which is immediately opposite to the island of Ortygia, is not, like the tract beyond it extending to the Anapas, low and marshy ground, but has a rocky soil, of the same limestone with the table-land above, of which it is as it were a lower step. Hence the city, as soon as it extended itself beyoud the limits of the island, spread at once over this area ; bat not content with this, the inhabitants occopied the part of the table-land above it nearest the sea, which, as already mentioned in the general description, is partly separated by a cross valley or depression from the upper part of the plateau, or the beights of Epipolac. Hence this part of the city
was of considerable natural strength, and seems to bave been early fortified by a wall. It is not improbable that, in the first instance, the name of Achradina was given exclusively to the heights*, and that these, as well as the island, had originally their orn separate defences; but as the city spread itself out in the plain below, this must also have been protected by an outer wall on the side towards the marslies. It has indeed been supposed (Grote's Greece, vol. vii. p. 556) that no defence existed on this side till the time of the Athenian expedition, when the Syracusans, for the first time, surrounded the suburb of Temenitis with a wall; but no mention is found in Thucydides of so important a fact as the construction of this new line of defence down to the Great Harbour, and it seems impossible to believe that this part of the city should so long have remained unprotected. $\dagger$ it is protalle indeed (though not certain) that the Agora was already in this part of the city, as we know it to have been in later times ; and it is highly improballe that so important a part of the city would have been placed in an unfurtified suburb. But still more necessary would be some such defence for the protection of the naval arsenals or dockyards in the inner bight of the Gveat Harbour, which certainly existed before the Athenian invasion. It seems, therefore, far more natural to suppose that, though the sejarate defences of Ortygia and the heights of Achradioa (Diod. xi. 67,73 ) were not destroyed, the two were from an early period, probably from the reign of Gelon, united by a common line of defence, which ran dorn from the beights to some point near that where the island of Ortygia most closely adjuined the mainlaod. The existence of such a boundary wall from the time, of the Athemian War is certain ; and there seems little donbt that the name of Achradina, supposing it to bave originally belonged to the beights or table-land, soon came to be extended to the lower area also. Thus Diodorus describes Dionysius on his return from Gela as arriving at the gate of Achradina, where the outer gate of the city is certainly meant. (Diod. xiii. 113.) It is probable that this gate, which was that leading to Gela, is the same as the one called by Cicero the Purtae Agragianne, immedintely outside of which he had discovered the tomb of Archimedes. (Cic. 7'usc. Quaest. v. 23.) But its situation canoot be determined : no distioct traces of the ancient walls remaio on this side of Syracuse, and we know not how they may have been modified when the suburb of Neapolis was included in the city. It is probable, however, that the wall (as suggested by Col. Leake) ran from the brow of the hill near the amphitheatre in a direct line to the Great Harbour.

[^31]
## SYRACUSAE.

Of the buildings noticed by Cicero as still adorning Acluradina in his day there are scarcely any vestiges ; but the greater part of thern were certainly sitnated in the fower quarter, nearest to the island and the two ports. The Forum or Agora was apparently directly opposite to the Peatapyla or fortified entrance of the island ; it was surrounded with porticoes by the elder Dionysius (Diod. xiv. 7), which are obviously those alluded to by Cicero (" pulcherrimae porticus," Verr. iv. 53). The temple of Jupiter Olympius, noticed by the orator, also adjoined the Agora; it was built by Hieron 11. (Diod. xvi. 83), and must not be confounded with the more celebrated tenple of the same divinity on a hill at some distance from the city. The prytaneum, which was most richily adorncd, and among its chief ornaments possessed a celebrated statue of Sappho, which fell a prey to the copidity of Verres (Cic. Serr. iv. 53,57), was prohably also sitoated in the neighbourhood of the Agora; as was certainly the Timoleonteum, or monament erected to the memory of Tinuleon. (Plut. Tinol. 39.) The splendid sepulehral monument which had been erected by the younger Dionysius is memory of his father, but was destroyed after his onn expulsion, seems to have stood io front of the Pentapyla, opposite the entrance of the citadel. (Diod. xr, 74.) A single column is still standing on this site, and the bases of a few others bave been discovered, hat it is uncertain to what edifice they belonged. The ouly other ruins now visible in this quarter of the city ate some remains of Roman baths of little importance. But beneath the surface of the soil tlere exist extensive catacombs, constituting a complete necropolis : these tombs, as in most similar cases, are probably the work of successive ages, and can bardly be referred to any particnlar feriod. There exist, also, at two points on the slope of the hill of Achradina, extensive yuarries hewn in the rock, similar to those found in Neapolis near the theatre, of which we shall presently speak.

Traces of the ancient walls of Achradina, crowning the low cliffs which bound it towards the sea, may be found from distance to distance along the whole Wive extending from the quarries of the Cappuccini round to the little bay or cove of Sta Panagia at the NW. angle of the platean. Recent researches bave also discovered the line of the western wall of Achradiaa, which appears to have rmn nearly in a straight line from the cove of Sta Panagia, to the steep and narrow pass of hollow way that leads up from the lower quarter to the heights above, thus taking advantace of the partial depression or valley already noticed. The cove of Sta Panagia may perbaps he the Portus Troomionum of Livy (xxv. 23), though the similar cuve of the Scala Gireca, about half a mile further W., would seem to have the better claim to that designation. The name is evidently the same with that of Trogilus, mentioned by Thucydides as the point on the N. side of the heights towards which the Athenians directed their lioes of circumvallation, but without succeeding in reaching it. (Thuc. vi. 99, vii. 2.)
3. Tycha ( Tiv $\eta$ ), so called, as we are told by Cicero, from its containigg an ancient and celebrated temple of Fortune, was situated on the plateau or table-land W. of Achradina, and adjoining the northern face of the eliffs lookiog towards Megara. Though it became one of the most populous quarters of Syracuse, no trace of its existence is found at the period of the Athenian siego ; and it may fairly be assumed that there was as yet no considerable
suburb on the site, which mast otherwise have materially interfered with the Athenian lines of circomvallation, while the Syracusans would naturally have attempted to protect it, as they did that of Temenitis, by a special ontwork. Yet it is remarkable that Diodorus notices the name, and even speaks of it as a distinct quarter of the city, as early as B. C. 466 , during the troubles which led to the expulsion of Thrasybulus (Diod. xi. 68). It is difficult to reconcile this with the entire silence of Thacydides. Tycha probably grew up after the great wall erected by Dionysius along the northern edge of the platean had completely secured it from attack. Its position is clearly shown by the statement of Livy, that Marcellus, after he had forced the Hexapylum and sealed the heights, established his camp between Tycha and Neapolis, with the view of carrying on bis assaults apon Achradina. (Liv. xxv. 25.) It is evident therefore that the two quarters were not contiguons, but that a considerable extent of the table-land W. of Achradina was stıll unoccupied.
4. Nearolis ( $\mathrm{N} \in \alpha$ ámadis), or the New City, was, as its name implied, the last quarter of Syracuse which was inhabited, though, as is often the case, the New Town seems to have eventually grown up into one of the most splendid portions of the city. It may, however, well be donbted whether it was in fact morereeent than Tycha; at least it appears that some portion of Neapolis was already inhab.ted at the time of the Atlienian invasion, when, as already mentioned, we have no tracc of the existence of a suburb at Tycha. But there was then already a suburb called Temenitis, which had grown up aronod the sanctuary of Apollo Temenites. The statue of Apollo, who was worshipped under this name, stood as we learn from Cicero, within the precincts of the quarter subsequently called Neapolis; it was placed, as we may infer from Thucydides, on the height above the theatre (which he calls $\sigma_{\text {кр }}$ Te $\mu \in \nu i \tau i s)$, forming a part of the table-land, and probably dot far from the sonthern escarpment of the plateau. A suburb had apparently grown mp around it, which was surrounded by the Syracnsans with a wall just before the commencement of the siege, and this outwork bears a conspicuous part in the operations that followed. (Thuc, vi. 75). But this extension of the fortifications does not appear to have been permanent, for we find in B, c. 396 the tempies of Ceres and the Cora, which also stood on the heights not far from the statue of Apollo, described as situated in a suburb of Achradina, which was taken and the temples plundered by the Carthaginian general Himilco. (Diod. xir. 63.) The name of Neapolis ( $\eta \mathrm{N} \epsilon \epsilon^{\alpha} \pi \delta \bar{\lambda} / s$ ) is indeed alrendy mentioned some years before (Id. xiv. 9), and it appears probable therefore that the city had already begun to extend itself over this quarter, though it as yet formed only an unfortified suburb. In the time of Cicero, as is evident from his description, as well as from existing remains, Neapolis had spread itself over the while of the southern slope of the table-land, which liere forms a kind of second step or underfall, rising considerably above the low gronnds beneath, thongh still separated from the heights of Temenitis by a second line of cliff or abrnpt declivfty. The name of Temeaitis for the district on the height seems to have been lost, or merged in that of Neapolis, whioh was gradually applied to the whole of this quarter of the city. But the name was retained by the adjoining gate, which was called the Temenitid Gate
(Plut. Dion. 29, where there seems no doubt that we should read $\mathrm{T} \in \mu \in \nu i$ íioas for $\mathrm{M} \in \nu i$ iti $\delta a s$ ), and seems to have been one of the principal entrances to the city.

Of the buildings described by Cicero as existing in Neapolis, the ouly one still extant is the theatre, which he justly extols for its large size ("theatrom maximum," Verr. iv. 53). Diodorus also alludes to it as the largest in Sicily (xvi. 83), a remark which is fully borne out by the existing remains. It is not less than 440 feet in diameter, and appears to have had sixty rows of seats, so that it could have accommodated no less than 24,000 persons. The lower rows of seats were covered with slabs of white marble, and the several cunei are marked by inscriptions in large letters, bearing the name of king Hieron, of two queens, Philistis and Nereïs, both of them bistorically unknown, and of two deities, the Olympian Zeus and Hercnles, with the epithet of Eúфpóv. These inscriptions evidently belong to the time of Hieron 11., who probably decorated and adorned this theatre, hat the edifice itself is certainly referable to a much earlier period, probably as early as the reign of the elder Hieron. It was used not merely for theatrical exhibitions, but for the assemblies of the people, which are repeatedly allnded to as being held in it (Diod. xiii. 94; Plat. Dion. 38, Timol. 34, 38, \&c.), as was frequently the case in other cities of Greece. The theatre, as originally constructed, must have been outside the walls of the city, but this was not an unnsual arrangement.

Near the theatre have been discovered the remains of another monument, expressly mentioned by Diodorus as constructed by king Hieron in that situation, an altar raised on steps and a platform not less than 640 feet in length by 60 in breadth (Diod. xiv. 83). A little lower down are the remains of an amphitheatre, a structure which undoubtedly belongs to the Roman colony, and was probably constructed soon after its establishment by Augustus, as we find incidental mention of gladiatorial exbibitions taking place there in the reigns of Tiherius and Nero (Tac. Ann. xili. 49 ; Val. Max. i. $7 . \S 8$ ). It was of considerable size, the arena, which is the only part of which the dimensions can be distinctly traced, being somewhat larger than that of Verona. No traces lave been discovered of the temples of Ceres and Libera or Proserpine on the height ahove : the colossal statue of Apollo Temenites had apparently no temple in connection with it, though it had of course its altar, as well as its sacred enclosure or $\tau \in \in \mu \in \nu o s$. The statue itself, which Verres was unable to remove on account of its large size, was aftcrwards transported to Rome by Tiberius (Suet. Tib. 74).

Immediately adjoining the theatre are extensive quarries, similar in character to those already mentioned in the cliffs of Achradina. The quarries of Syracase (Latomise or Lautumiae) are indeed frequently mentioned by ancient authors, and especially noticed by Cicero among the most remarkable objects in the city. (Cic. Verr. v. 27 ; Aelian, V.H. xii. 44.) There can be no doubt that they were originally designed merely as quarries for the extraction of the soft limestove of which the whole table-land consists, and which makes an excellent building stone; but from the manner in which they were worked, being sunk to a considerable deptb, without any outlet on a level, they were found places of such security, that from an early period they were em-
ployed as prisons. Thus, after the Athenian expedition, the whole number of the captives, more than 7000 in number, were confined in these quarries (Thuc. vii. 86,87 ; Diod. xiii. 33); and they continued to be used for the same parpose under successive despots and tyrants. In the days of Cicero they were used as a general prison for criminals from all parts of Sicily. (Cic. Verr, v. 27.) The orator in one passage speaks of them as constructed expressly for a prisoo by the tyrant Dionysius ( 16.55 ), which is a palpable mistake if it refers to the Lautumiae in general, though it is not unlikely that the despot may have made some special additions to them with that view. But there is certaidly no authority for tbe popular tradition which has given the name of the Ear of Dionysius to a peculiar excavation of singular form in the part of the quarries nearest to the theatre. This notion, like many similar ones now become traditional, is derised ooly from the suggestion of a man of letters of the 16 th century.
5. Epipolae ('Etíno八ai), was the name originally given to the upper part of the table-land which, as already described, slopes gradnally from its highest point towards the sea. It form is that of a tolerably regular triangle, having its vertex at Euryalns, and its base formed by the western wall of Achradina. The name is always nsed by Thncydides in this sense, as including the whole opper part of the plateau, and was doubtless so employed as long as the space was numbabited; but as the
suburbs of Tycla and Temenitis gradnally spread themselves over a considerahle part of the beights, the name of Epipolae came to be applied in a more restricted sense to that portion only which was nearest to the vertex of the triangle. It is generally assumed that there subseguently arose a considerablo town near this angle of the walls, and that this is the fifth quarter of the city alluded to by Strabo and those who spoke of Syracuse as a Pentapolis or aggregate of fuve cities. But there is no allnsion to it as such in the passage of Cicero already quoted, or in the description of the capture of Syracnse by Marcellus; and it seems very douhtful whether there was ever any considerable popnlation at this remote point. No restiges of any ancient buildings remain withio the walls; but the line of these may be distinctly traced along the top of the cliffs which bound the table-land both towards the N. and the S. ; in many places two or three conrses of the masonry remain; but the most important ruins are those at the angle or vertex of the triangle, where a sput named Mongibellisi is still crowned by the ruins of the ancieot castle or fort of Euryales (Eipún入os, Thac., but the Doric form was Eupúa $\lambda o s$, which was adopted by the Romans). The ruins in question afford one of the best examples extant of an ancient fortress or castle, designed at once to serve as a species of citadel and to secure the appruach to Epipolae from this quarter. The annescd plan will give a good idea of its general

PLAN OF THE FORT EURYALUS.
form and arrangement. The main entrance to the city was hy a double gate (A.), flanked on both sides ly walls and tuwers, with a smaller postern or snily-port a little to the right of it. The fortress itselfowas an irregular quadrangle, projecting abont 200 yards beyond the approach to the gate, and fortified by strong towers of solid masonry with a deep ditch cut in the rock iu front of it, to which a number of subterraneous passages gave access from within. These pasages communicating with the fort above by nartor openings and stairs, were evidently designed to facilitate the sallies of the besieged without exposing the fortress itself to peril. As the whole arrangemeat is an unique specimen of ancient fortifiention a view is added of the external, or N . front of the fort, with the subterranean openings.

There can be no doubt that the fortress at Mun-
gibellisi is the one ancieatly known as EuryalnsThis clearly appears from the mention of that fort at the time of the siege of Syracuse by Marcellns, as one capable of being held by a separate garrison after the capture of the onter walls of Epipolae, and threatening the army of Marcellns in the rear, if be proceeded to attack Achradina. (Liv. xxv. 25,26.) Euryalus is also mentioned by Thncydides at the time of the Athenian expedition, when it was still unfortified, as the point which afforded a ready ascent to the heights of Epipolae (Thuc. vi. 99, vii. 2); and it mnst indeed have always been, in a military point of view, the key of the whole position. Hence, the great care with which it was fortified after the occupation of Epipolue by the Athenians had shown the paramount importance of that pasition is case of a siege. The existing fortificationa may, indeed, be in part the work of Hieron II. (as
sapposed by Col. Leake); hut it is certain that a strong fort was ercoted there by Dionysius 1.*, and
the importance of this was sufficiently shown in the reign of Agathocles, when the attack of Hamilcar

VIEW OF THE FOIRT EURYALLS.
was repulised by means of a strong garrison posted at Euryalus, who attacked his army in flank, while advancing to the attack of Epipolae. (Diod, xx. 29.)

Some writers on the topography of Syracuse have supposed the fortress of Mongibellisi to be the ancient Hexapylmn, and that Euryalus occupied the site of Belvellere, a knoll or hill on the ridge which is continned from Mongibellisi inland, and forms a communication with the table-land of the interior. But the hill of Belvedere, which is a mile distant from Mongibellisi, though somewhat more elevated than the latter point, is connected with it only by a narrow ridge, and is altogether too far from the table-land of Epipolae to have been of any importance in connection with it; while the beights of Mongibellisi, as already observed, form the true key of that position. Moreover, all the passages that relate to Hexapylum, when attentively considered, point to its position on the N . front of the heights, looking towards Megara and Thapsus; and Colonel Leake has satisfactorily shown that it was a fort constructed for the defence of the main approach to Syracose on this side; a road which then, as now, ascended the heights at a point a short distance W. of the Scala Greca, where a depression or break in the line of cliffls affurds a natural approach. (Leake, Notes on Syracuse, pp. 258, 342, \&c.) The gate at Hexapylum thus led, in the first instance, into the suburb or quarter of Tycha, a circumstance completely in accordance with, if not pecessarily required by, a passage in Livy (xxiv. 2t), where the two are mentioned in close connection.

It is more difficalt to determine the exact position of Landalum, where the Athenians erected a fort suring the siege of Syracuse. The name is not subsequently mentioned in history, so that we have no knowledge of its relation to the fortifications as they existed in later times; and our only clue to its position is the description of Thucydides, that it steod " on the summit of the cliffs of Epipolae, looking towards Megara." It was probably situated (as placed by Göller and Mr. Grote) on the point of those heights which forms a slightly projecting

[^32]angle near the farnhonse now called Targia. Its purpose was, doubtless, to secure the communications of the Athenians with their fleet which lay at Thapsus, as well as with the landing-place at Leon.

It was not till the reign of the elder Dionysins (as we bave already seen) that the heights of Epipolae were incladed within the walls or fortifications of Syracuse. Nor are we to soppose that even after that time they became peopled like the rest of the city. The object of the walls then erected was merely to secure the heights against: military occupation by an enemy. For that purpose he in B. c. 402 constructed a line of wall 30 stadia in length, fortified with numerous towers, and extending along the whole N . front of the plateau, from the NW. angle of Achradina to the bill of Euryalus. (Diod. xiv. 18.) The latter point must at the same time have been occupied with a strong fort. The north side of Epipolae was thus securely gnarded; but it is singular that we hear of no sinilar defence for the S. side. There is no doubt that this was ultimately protected by a wall of the same character, as the remains of it may be traced all around the edge of the plateau ; but the period of its constraction is uncertain. . The portion of the cliffs extending from Euryalus to Neapolis may have been thonght sufficiently strong by nature; bat this was not the case with the slope towards Neapolis, which was easily accessible. Yet this appears to have contioued the weakest side of the city, as in в. с. 396 Himilco was able to plunder the temples in the suburh of Temenitis with apparently little difficulty. At a later period, however, it is certain from existing remains, that not only was there a lise of fortifications carried along the opper escarpment as far as Neapolis, but an outer line of walls was carried round that suburb, which was now included for all parposes as part of the city. Strabo reckoos the whole circuit of the walls of Syracase, including the fortifications of Epipolae, at 180 stadia (Strab. vi. p. 270); but this statement exceeds the truth, the actual circuit leing about 14 English miles, or 122 stadia. (Leake, p. 279.)

It only remains to notice briefly the different localities in the inmediate neighbourhood of Symacuse, which are noticed by ancient writers in connection with that city. Of these the most important
is the Olympieum, or Temple of Jupiter Olympins, which stood, as already mentioned, on a height, facing the sonthern front of Epipolae and Neapolis, from which it was about a mile and a half distant (Liv. xxiv. 33), the interval being occupied by the marshy plain on the banks of the Auapus. The sanctuary seems to have early attained great celebrity : even at the time of the Athenian expedition there had already grown up aronod it a small town, which was known as Polichne ( $\grave{\eta}$ Ho $\mathrm{\lambda i}$ Ø $\eta \eta$, Diod.), or the Little City. The military importance of the post, as commanding the bridge over the Auapus and the road to Helorus, as well as overlooking the marshes, the Great Harbour, and the lower part of the eity, caused the Syracusans to fortify and secure it with a parrison before the arrival of the Atheoians. (Tbuc, vi. 75.) For the same reason it was occupied by all snbsequent invaders who threatened Syracuse; by Himilco in b.c. 396, by Hamilcar in B. c. 309, and by Mareellus in B. c. 214. The remains of the temple are still visible: in the days of Cluverins, indeed, seven columns were still standing, with a considerable part of the substructure (Cluver. Sicil. p. 179), but now only two remain, and those bave lost their capitals. Thiey are of an ancient style, and belong probably to the original temple, which appears to bave been built by the Geomori as early as the 6th century B. c.

The adjoining promontory of Plemmyrium does not appear to have been ever inliabited, though it presents a table-land of considerable beight, nor was it ever permanently fortified. It is evident also, from the account of the operations of successire Carthaginian fleets, as well as that of the Athenians, that the Syracasaus bad not attempted to occupy, or ceen to guard with furts, the more distant parts of the Great Hurbour, though the docks or arsenal, which were situated in the inner bight or recess of the bay, between Ortygia and the lower part of Acliradina, were strongly fortified. The southern light of the bay, which furms an inner bay or gulf, now known as the bay of Sta Maddalena, is evidently that noticed both during the Atbeninn siege and that by the Carthaginians as the gulf of Dascon. ( $\Delta \dot{\alpha} \sigma k \omega \nu$, Tbuc. vi. 66 ; Diod. xiii. 13, siv. 72.) The fort erected by the Athenians for the protection of thwir flect apparently stood on the adjacent beight, which is connected with that of the Olympienm.

Aluust immediately at the foot of the Olympieum was the ancient bridge across the Anapus, some rem:tins of which may still be seen, as well as of the ancient road which led from it towards Helorus, memorable on accomat of the disastrons retreat of the Athenians. They did not, horrever, on that ocrailon cross the bridge, bnt after a fruitless attompt to penetrate into the interior by following the valley of the Auspus, struck across into the Helorine Way, which they rejoined some distance beyond the Olympieum. Not far from the bridge over the Anapus stood the monument of Gelon and his wife Demarete, a sumptuous structure, where the Sjracusins were in the labit of paying heroic honours to their great ruler. It was adorned with nine towers of a very massive construction; but the monument itself was destroyed by llimilco, when he encamped at the adjacenit Olyinpieum, and the towers were afterwards demolished by Agathocles. (Diod. xi. 38, xiv. 63.)

About a mile and a half S11: of the olympieum is the fountain of Cyaxe, a copious and clear strean
rising in the midst of a marsh: the sancinary of the nymph to whom it was consecrated ( $\tau \delta$ Tìs Kvávŋs $i \in p o v$, Diod.), must have stood on the heights above, as we are told that Dionysius led his troops round to this spot with a view to atlack the Carthaginian camp at the Olympienn (Diod, siv. 72); and the marsh itself must always have been impassable for troops. Some ruins on the slope of the hill to the W. of the source are probably those of the temple in question. [Crave:] The fountain of Cyane is now called La Pisma: near it is another smaller source called Pismotta, and a third, knowo as $I l$ Cefalino, rises between the Cyane and the Anapus. The number of these fountains of clear water, proceediog no doubt from distant sources among the limestone bills, is characteristic of the neighbourhood of Syracuse, and is noticed by Pliny, who mentions the names of four other noted sources besides the Cyane and the more celebrated Arethusa. These he calls Temenitis, Archidemis, Magraea, and Milichia, but they cannot be now ideotified. (1'lin. iii. 8. s. 14.) None of these springs, however, was well adapted to supply the city itself with water, and bence an aqueduct was in early times carried along the beights from the interior. The existence of this is already noticed at the time of the Athenian siege (Tbuc. vi. 100); and the channel, which is in great part subterraneous, is still visible at the present day, and conreys a stream sufficient to turn a mill situated on the steps of the great theatre.

A few localities remain to be poticed to the $\mathbf{N}$. of Syracnse, which, thongb not incloded in the city, are repeatedly alluded to in its history. Leon, the spot where the Athenians first landed at the commencement of the siege (Thuc, vi. 97), and where Jlarcellus established his winter quarters when he found himself nnable to carry the city by assault (Liv. xxiv. 39), is probably the little cove or bay about 2 miles N. of the Scala Greca: this is not more than a mile from the nearest point of Epipolae, which would agree with the statement of lluacydides, who calls it 6 or 7 stadia from thence; Livy, on the contrary, says it was 5 miles from Hexapylum, but this must certainly be a anistake. About 3 miles further N. is the promontory of Tharses ( $\grave{\eta}$ అá ${ }^{\prime}$ os, bow called Magnisi), a low but rocky peuinsula, united to the maioland by a sandy istlimus, so that it formed a tolerably seenre port on its S . side. Oo this account it was selected, in the first instance, by the Atheniuns for their naval camp and the station of their fleet, previons to their taking possession of the Great Harbour. (Thuc. vi. 97.) It bad been one of the first points on the Sicilian coast occupied by Greek colonists, but these speedily removed to Megara (Thuc. vi. 4); and the site secms to have subsequently always remaioed uninhabited, at least there was never a town upon il It was a low promontory, whence Virgil appropriately calls it "Thapsus jacens." (Virg. Aen. iii. 689; Ovid, Fast. iv. 477.) Abont a mile inland, and directly opposite to the entrance of the istlumus, are the remains of an ancient monument of large size, built of massive blocks of stone, and of a quadrangular form. The portion now remaining is above 20 feet bigh, but it was formerly surmounted by a column, whence the name by which it is still known of LAguglia, or "the Needle." This monument is popularly belicsed to have been erected by Marcellus to commemorate the capture of Syracuse; but this is a mere conjeeture, for which there is no foundation. It is probably in reality a sepulctiral
monument．（D＇Orville，Sicula，p．173；Swinbnrne， vol．ii．p．318．）

The topography of Syracuse attracted attention from an early period after the revival of letters；and the leading features are so clearly marked by nature that they could not fail to be recogaised．Bat the earlier descriptiocs by Fazello，Bonanni，and Mira－ bella，are of little value．Clnverius，as usual，in－ restigated the suhject with learning and diligence； and the ground has been carefolly examined by several modern travellers．Ao excellent survey of it was also made hy British eogineers in 1808 ；and the researches and excavations carried on by the duke of Serra di Falco，and by a commission ap－ pointed by the Neapolitan government in 1839 hare thrown considerable light upon the extant remains of antiquity，as well as upoo some points of the to－ pography．These have beeo discassed io a separate memoir by the architect employed，Saverio Cavallari， and the whole subject has been fully investigated， with constant reference to the ancient authors，in an elaborate and excellent memoir by Col．Leake．The atove article is based mainly upon the researches of the last author，aod the local details giveo in the

coins of syracusae．

 （5．）Ȧram Mascâh（חวุขp，LXX．Maađà， 1 Chron．xix．6）．Of these five districts thns dis－ tinguished，the first has no connection with this article．With regard to the second，fourth，and fifth， it is donbtful whether Sobah and Rehoh were in Meso－ potamia or in Syria Proper．Gesenias supposes the empire of Sobsh to have heen situated north－east of Damascus ；but places the towa，which he ideatifies with Nesebin，Nisibis，and Antiochia Mygdoniae，
 a comparison of 2 Sam，x． 6 with 1 Chron．xix． 6 seems rather to imply that Rehob was io Mleso－ potamia，Soba and Mlaacha in Syria Proper ；for，in
the formil passage, we have the Aramites a Rober Rehob, and the Anamites of Solna, and the kiras of Maracah, - in the latter, Aram Nalharaim $=$ Mesopotamia. and Aram Maarals and Zabah; from which we may infer the identity of Both-Rehob and Mesopotamia, and the distinction betwem? this latter and Maacah or Zohah: and again, the allance between IHadadetur, king of Zobah, and the Aramites of 1)nmaseus (2 Sam. viii. 3-6; 1 Chron. six. 3-6) would imply the contiguity of the two states; while the expedition of the former "to recover his burder," or "establish his dominion at the river Euphrates" (rer. 3), during which Javid attacked bim, would sappone a march from west to east, through Syria, rather than in the olposite direction through Mesopotania.
With regard to the origin of the name Aram, there are two Patriarchs in the early genealogies from whom it has been derived; one the son of Shem, the progenitor of the Hebrew race, whose other children Uz, Asshur, Arphazad, and Lud, represent ancient kingdoms or races contigoous to Syria; while Uz, the firstborn son of Aran, apparently gave his name to the native land of Joh, at a very early period of the world's bistory. (Gen. x. 22, 23.) The other Aramn was the grandson of Nator, the brother of Abraham, by Kemuel, whose brother Huz is by some supposed to bave given his name to the conatry of Jub, as it can scarcely adnuit of a doubt that the third brother, Buz, was the patriarch from whom the neighbouring district trok its name. (Gen. xxii. 20, 21; Job, i. 1, xxsii. 2.) But as we find the name Aram already applied to describe the conntry of Bethoel and Laban, the uncle and cousin of the later Aram, it is obrious that the - untry mant have derived its name from the earlier, not trum the later patriarch. (Gen, xxy. 20, xxviii. $5, \&-c$.

The classical name Syria is commonly supposed to be an abbreviation or modifieation of Assyria, and to date from the period of the Assyrian subjugation of the ancient Aram ; and this acconnt of its origin is confirmed by the fact that the name Syria does unt occur in Homer or Hesiod, who speak of the iuhabitants of the country under the name of Arimi, (eiv 'Apímois, Hom. Il. B. 783. Hes. Theog. v. 304), in connection with the myth of Typhon, recorded by trabo io deseribing the Orontes [Onostes]; and this writer iuforms us that the Syrians ware called - ramaei or Arimi (i. p. 42. xiii. p. 62\%, sri. pp. 784, 785). whoch name was, however, extended too far to the west or morth by other writers, so as to comprehend Cilicia, and the Sacne of Seythia. (See Bochart, Gecug. Sice. lib. ii. cap. 6.) Herodutus, the earliest extant writer who distinctly names the Syrians, declares the feryh to be identical with the Assyrians, where he is obvously speakine of the latter, makine the formar to be the Greek, the latter the barbarian nanu" (vii, 63); and this name be extends as far south as the confines of Egypt,-placiny Sidon, Azotus, Cadytis, and, in shart, the Phomicions in general, in Syrin (ii. 12, 158, 159), calling the Jews the Sorian in Pakeotine (ii. 104); and as far west as Ansa Miano, for the Capradocian, he says, are called Syrnans by the Greeks (i. 72), and speatis of the Syrians sbout the Thermodon and Parthenitus, rivers of Bithynia (ii. 104). Comsistently with tl is early nutice, Strabo, at at moch later period, states that the natne of Syrifurmerly extended from Balylonia as far as the gulf of Issus, and thence as far as the Fusiac (xri. p. 737); and in this wider sense
the nana i, used by other clasienl writers, and thus inclades a tract of country on the west which was not couprelended within the widest range of the ancient Aram.
11. Nitural butudaries and divisions. - The limits of Syrin proper, whicb is nuw to be considered, are clearly defined by the Mediterranean on the west, the Euphrates on the cast, the range of Amanus and Tawrus on the north, and the great Desert of Arabia on the south. On the west, however, a lonis and narrow strip of coast, commencing at Matrathas, and rumbing sonth to Domut Carnel, was recknned to Phomice, and has been described under that name. In compensation for this deduction on the south-west, a much more ample space is gained towards the suuth-east, by the rapid trending away of the Eoplirates eastward, between the 36 th and 34 th degree north lat., from near the 38 th to the 41 st degree of east longitude, thereby increasing its distance Irom the Meditertancan sea, from about 100 miles at Zeugma ( Bir ), to 250 miles at the boundary of Syria, suuth of Circesium (Kirrkisia). Commeacing at the northern extremity of the Issions sinus (Guif of Iskanderinn), near Iswus itself, the Amanus Nous (Alma Dayk), a branch of the Taurus, rnus off first in a northern direction for 18 miles, then north-east for 30 more, until it joins the main chain (Dardin Dagh), a little westward of Mar'ash, from whence it ruas due eastward to the Euphrates. The southern line eannot be accurately deacribed, as buing marked only by an inaginary line drawn through an intermiuable waste of sand. This icregular trapezimm may now be subdivided.

Fior the purpuses of a plysical description, the ranges of Lebatuon and Antilibanus may be assumed as landmarks towards the south, while the river Orontes aflords a convenient division in the geography of the cotintry towards the nortb ; for the valley of the Orontes may be regarded as a continuation nurthward of the great crevass of Coelesyria, the watersbed being in the vicinity of Baalbek, so that "tbis depression extends along the whole western side of the country, having on each side, through Dearly 6 degrees of latitude, an almost continuous chain of mountains, from which numerons offisets strike into the interior in diferent directions." (Col. Chesney, Erpedition for the Surecy of the Euphrates and Tïris, vol. i. p. 384.)

1. The neestern range. - Where the range of AmaBus meets the evast at the Gulf of Iskanderin, near the river Isans, it leaves unly a narrows pass between its base and the sea, furnerly occapied by the Armenian, Syrian, or Amanidan gates of the various geugrapbers, which will be apain referred to below: Thus range then advances soutbwards under various names, approaching or receding from the coast, and oceasionaliy throwing out bold headlands into the seh, arat Rus Khanxer.Ras Bosyt (Posidium l'rom.), Rus-esh-Shaka, \&c. The part of the chain north of the Orontes is thus described by Col. Chesney (1. 384): "The base of the chain consists of mases of serpentines and diallage rocks, rising abruptly from plains on each side, and supporting a tertiary formation, terminating with bold rugged peaks and conical summits, hasving at the crest an elevation of $5: 387$ feet. The sites of this mass are occasionally furrowed by rucky fissures, or broken into vallers, between which there is a succession of rounded shoulders, cither protruding through forests of pines, aaks, and larches, or diversified by the arbutas, the myrtle, oleander, and other shrubs. Some busalt
appears near $\boldsymbol{A} y a s$, and again in larger masses at some little distance from the NE. side of the chain. ...Southward of Bcilon the chain becomes remarkable for its serrated sides and numerous summits, of which the Akhma Tagh shows about fifteen between that place and the valley of the Orontes." The sharp ridge of Jebel Rhoms terminates in the rugged and serrated peaks of Cape Khanzir, which overhangs the sea, and separates the Gulf of Iskandervin from the Boy of Autioch. Sonth of this is Jebel Musa, the Mons lieria of classic writers, a limestone offset from Mount Rhoms, and itself imperfectly connected with the other elassical monnt, Casins, by the lower ramge of Jebel Simán. A little to the south of the embouchure of the Orontes, Mount Casius reaches an elevation of 5699 feet, composed of supra-cretaceous limestone, on the skirts of which, anong the birch and larch woods, are still to be seen the ruins of the temple, said to have been consecrated by Cronus or Ham (Ammianus Marcell. xxii. 14), while the upper part of its cone is entirely a nakcd rock, justifying its native modern name Jobel-el-Akra (the bald mountain). From this point the mountain chain centinues sonthward, at a much lower elevation, and receding further from the const, throws out its routs both east and west, towards the Orontes on the one side and the Mediterranean on the other. This range bas the general name of Jebel Ansarieh from the tribe that inhabits it, hut is distinguished in its rarious parts and branches by local names, chiefly derived from the towns and villages on its sides or base. The southern termination of this range must be the intervening plains which Pliny places between Libanus and Baryylus ("interjacentes campi "), on the north of the furmer. (Plin. v. 20.) These plains Shaw finds in the Jeune (fruitful), as the Arabs call a comparatively level tract, which "commences a little south of Maguzzel, and ends at Sumrah, extending itself all the way from the sea to the eastward, sometimes five, sometimes six or seven leagues, till it is terminated by a long chain of mountains. These seem to be the Mons Bargylus of Pliny." Sumrah he identifies with Simyra,-which Pliny phates in Cuelesyria at the northern extremity of Mount Libanus,-but remarka that, as Sumrah lies in the Jeune, 2 leagues distant from that mountain, this circumstance will better fall io with Area, where Mount Libamus is remarkably broken off and discontinned. (Shaw, Travels in Syria, pp. 268, 269, 4to ed.) We here reach the confines of Phoetiice, to which a separate article has been devoted, as also to Mount Lebanon, which continues the coastline to the southern extremity of Syria.
2. Coelesyriu, and the valley of the Orontes. Although the name of Coelesyria (Hollow Syria) is sometimes extended so as to include even the coast of the Mediterraneat - as in the passage above cited from Pliny-from Seleucis to Egypt and Arabia (Strabo, ut infra), and especially the prolongation of the southern valley along the crevass of the Jordan to the Dead Sea (see Keland, Palaestina, pp. 103, $458,607,774$ ), yet, according to Strabo, the name properly describes the valley between Libanus and Autilibanus (xvi. 2.§ 21), now known among the natives as El-Bükäa (the deep plain). "Under this name is embraced the valley between Lebanon and Anti-Lebanon, from Zahleh southward ; iscluding the villages on the declivities of both mount.ins, or rather at their foot : for the eastern declivity of Lebsoon is so steep as to have very few
villages much above its base; and the western side of Anti-Lebanon is not more inlabited. Between Zahleh and its suburb, Mu'allahah, a stream called El-Bürdóny descenda from Lebanon and runs into the plain to join the Litány. The latter river divides the Bükía from north to south ; and at its southern end passes out throngh a narrow gorge, between precipicea io some places of great beight, and finally enters the sea north of Sür, where it is called Kisiméyeh" [Leontes]. To the south of the Büki'a is the Merj 'Ayun (meadow of the springs), "betwecn Belâd Beshärah and Wâdy-etTeim, on the left of the Litany. Here Lebanon and Anti-Lebanon come together, but in such a manner that this district may be said to separate rather than to unite them. It consists of a beautiful fertile plain, sorrounded by hills, in some parts high, but almost every where arable, until yeu begin to descend towarda the Litany. The menatains fartber south are much more properly a contiouation of Lebanon than of Anti-Lebanon." (Dr. Eli Smith, in Biblical Researches, vol. iii. Appendix B. pp. 136, 140.) This then is the proper termination to the south of Coelesyria. The Merj' 'Ayin terminates in the Erd-el-Huleh, which is traversed by the several tributaries of the Jordan, and exteods as far south as the Bahr-el-Huleh. [Samachonitis Lacus; Palaestina, pp. 521,522.]

Te return now to the watershed. Baalbek gives its Dame to the remainder of the Bük"́a, from the villare of Zahleh northward (Smith, ut sup. p. 143), in which direction, as has been stated, the remotest sources of the Orontes are found, not far from Boalbek, which lies in the plain nearer to the range of Antilibanus than to Lebanon. [Orontes; Hellopolis.] The copions fondain of Labuceh is about 10 miles north-east of Baalbek; and this village gives its name to the stream which runs for 12 miles through a rocky desert, until it falls into the basin of a much larger stream at the village of Er-Ras or 'Ain Zerka, where is the proper sonrce of the Orontes, now El-Azi. The body of water now " becomes at Jeast threefold greater than lefore, and continues in its rugged chasm generally in a north-easterly course for a considerable distance, until it passes near Ribleh," then runs north threugh the valley of Homs, laving been fed on its way by numerous streams from the slopes of Lebanon and Antilibanus, draining the slopes of Jebel Anzerich, and forming as it approaches Homs the Bulur-elKades, which is 6 miles long by about 2 wide. (Chesney, ut sup. p. 394; Robiason, Journal of the R. G.S. vol. xxiv. p. 32.) Emerging from the lake, it waters the gardens of Homs about a mile and a half to the west of the town, then ruming north to Er-Rustan, where is a bridge of ten arches, it is turned from its direct course by Jebel Arbayn on its left bank, round the roots of which it sweeps almost in a semicircle, and enters Hamah, where it is crossed by a bridge of thirteen arches. It now continues its course north-west for about 15 miles to Kaluat-es-Sejar (Larissa), then due west for 8 miles, when it turna due north, and so continues to the Jisr Hadid meotioned below. About 20 miles below Larissa it passes Kaliat-em-Medaik: (Apameia) on its right bank, distant about 2 miles; a little to the north of which it receives an affluent from the small lake Et-Taka, remarkable for its abundance of black-fish and carp (Burckliardt, Syria, p. 143; Chesney, p. 395), theo, runding through Wady-cl-Ghab, enters the Birket-el-Howash, 8 miles
north of A pameia, where its impetnosity is curbed and its waters dissipated in the morasses, so that it flows off in a diminished streain to Jisr Shoyher, to be again replenished in its course through the plain of ' ${ }^{\prime} m k$ by other affluents, until it reaches its northernmost point at Jisr Ifadid (the Iron Bridye), a little belor which it winds round to the west, and athout 5 miles above Antioch receives from Bahr-elAbiud (the W'lite Sca) the Nahr-cl-Kowshit, a navigable river, containing a greater volume of water than $K l-A \approx y$ itself. It now flows to the north of Autioch and the infamons groves of Daphme, through an exceedingly picturesque valley, in a south-west course to the sea, which it enters a little to the south of Sdencia, after a circuitous conrse of about 200 miles, between $34^{\circ}$ and $36^{\prime} \quad 15^{\prime}$ of sorth latitude, $36^{\circ}$ and $37^{\circ}$ of east longitude.
3. Antilibanus and the eastern range. - The mountain chain which confines Coelesyria on the cast is properly designated Antilibanns, bnt it is further extended towards the north and sonth by offiects, which coofine the valley of the Orobtes and the Jordan valley respectively. Antilibanns itself, now called Jebel-esh-Shurkch (Eastern Mountain), which is vastly inferior to Libanus both in majesty and fertility, has been already described, as has also its sonthern prolengation in Mount Hermon, now Jebel-esh-Sheikh, sometimes Jehel-et-Telge (the Snow Mountain). [Antilibanus.] The northern chain, on the east of the Orontes valley, has not been sutbeiently surveged to admit of an accurate description, but there is nothiug striking in the beight or general aspect of the range, which throws out branches into the great devert, of which it forms the western boundary.
4. The eastern desert.-Although for the purposes of a geugraphical description the whole country east of the mouotain chains above described may be regarded as one region, and the insufficient materials for a minute and aceurate survey make it convenient so to regard it, jet it is far from being au uniform flat, presenting tbroughout the same features of desolation. Oa the contrary, so far as it has yet been explored, particnlarly to the sonth of the parallel of Dannaveus, the country is diversified by successions of hills and ralleys, which often present large fertile tructs of arable land, cultivated in many parts by a lardy and iodustrions race of inhabitants. By far the richest of these is the plain of Damascus ( El (ihcituh), at the foot of the eastern declivity of Antilibams, the most excellent of the four earthly paradises of the Arabian geographers. (Dr. Eli Smith, in Bib. Res. vol. iii. Append. B. p. 147.) It owes its beauty, not less than its fertility, to the abundance of water conreyed to it in the united streams of the Burada and the Phégeh, which, issuing together from the castern roots of Antilibanus, and distributed into munerous rivalets, permeate the city and its thonsands of gardens, and finally lose thenselves in the Sea of the Mlain, Bahr-el-Merj, which the exploration of a recent traveller has found to consist of two lakes instead of one, as has been hitherto represented in all modern maps. (Porter, Five Jears in Eamascus, 1855, vol. i. pp. 377-382, and map.) Indeed, so much fresh lirht has been thrown on the south-west of Syria by Mr. Porter's carefil surveys, that the geograplyy of the whole conutry will have to be greatly modified in all future maps, as we are now, for the first time, in a position to define with some degree of accuracy the limits of several districts mentioned both by sacred and classical writers,
whose relative position even has hitherto been only matter of donbtful comjecture. The statements of Burckhardt, who has hitherto boen the sole authority, require considerable correction.

The Barada, the ancient Abana, from its rise in Antilibamus, near the plain of Zebelany to its termipation in the Sonth and East Lakes, is computed to traverse a distance of 42 miles, and to water a tract equal to 311 square miles, inhabited by a population of 150,000 sonls, or an average of $4 \times 2$ to every square mile, including Damaseus and its suburbs. "The prevailing rock of the monotains through which it flows is limestone. In the bigher regions it is hard and compact, but near Damascas suft and chalky, with large nodules of flint intemixed. Fossil shells and corals in great variety are found along the central chain of Aatilibanus, throngh which the river first euts. In the white hills near Damascus are large quantities of ammonites. At Suik W"ady Barada (near its source) is a vast bed of erganie remains, not less than a mile in length, and in some places exceeding 100 feet in thickness. Travks of trees, branches of every size and form, and even the delicate tracery of the leaves maty be seen scattered about in vast masses. There are in several places among the monntains traces of volcanic aution. On a lofty snmmit, two hours' north-east of Siuk, is what appears to be an extinet crater. The monntain bas been rent, the limestone strata thrown back, and black porons trap-rock fills pp the cavity. The plain of Damascas has a loamy soil intermixed with fine sand. The sabstratum is generally conglomerate, made up of rounded smoutb pebbles, flint, and sand. The south-eastern portion of the plain is entirely volcanic." (Porter, Journal of Sacred Literature, vol. iv. p. 262.) The plain of Damasens is bounded towards the south by a low range of hills called Jebel-el-Aswad (the Black Mountain), the sontbern base of which is washed by a stream, which has lately been supposed by some travellers to represent the ancient l'harjar. It is now called Nahr-elA waj, which, rising in the roots of Hermon, runs in a course about north-east to a small lake named Bahret-el-Heijiny, only about 4 miles sonth of the Buhrct-el-Kibliyah, into which the Barada flows. It rans partly throogh a limestone and partly through a voleabic formation, which continues bence far to the sonth. (Porter, in Journal of Sac. Lit. vol. v. pp. 45-57, Travels, vol. i. pp. 297-322.) On the south side of the river, opposite to Jebel-elAswoud, is another low mountain range called Jelel Mania, and a higlier elevation connected with this range commands a view of those ancient divisiuns of Sonthern Syina, which have hitherto been only conjecturally placed in modern maps. Tbeir homadaries have notwithstanding been indelibly traced by the hand of nature, and the limits so clearly defined that they actually exist, mostly ander their identical ancient names, as an evidence of the fidelity of classical and sacred geographers. But theso will be more conveniently considered in connection with 'Trachoritis, round which they are grouped [Trachositis], particularly as this part of the country may be regarded as debateable ground between Syria, Arabia, and Palestine.
Turning now to the north of Dainascus and tho east of the monntain range, the conntry between this city and Alcppo offers nothing worthy of particular notice; indeed its geography is still a blank in the map of Syria, except its western side, which is traversed by the IIaj ruad, the most northern part
of which has been described by Burckhardt, and its sonthern by the no less enterprising and more accusate Porter, in more recent times. (Burckhardt, Syria, p. 121, \&c.; Porter, Damascus, vol. ii. p. $350, \& c$. )

The northern part of Syria is now comprehended in the pashalic of Aleppo, It is bounded on the east by the Euphrates, and on the north and west by the monntain chains of Tanrus and Amanus, the former of which throws off other diverging branches to the sonth, until they ultimately flank the valley of the Orontes on the east, so contiming the connection between Antilibanus and its parent stnck. Aleppo itself is situated in a rich and extensive plain, separated on the east by undulating hills from the almost unuccupied country, which consists of a level sheeptrack, extending from thence to the Euphrates. The sandy level of this Syrian devert is, however, diversified by occasional ranges of hills, and the plateaus are of various elevation, rising a little west of the meridian of Aleppo to a beight of 1500 feet above the Mediterranean, and thence declining suddenly to the east and much more gradually to the west. It is on one of these ranges in the heart of the desert, northeast of Damascus, that Palmyra is sitnated, the only nuticeable point in all the dreary waste, which bas been described in an article of its own [Palmyra]. The tract between Damascus and Palmyra has been frequently explored by mudern travellers, as well as the ruins themselves; but there is no hetter account to be found of then than in Mr. Porter's book, already so frequently referred to (vol. i. pp. 149254; compare Irby and Mangles, pp. 257-276).
III. Ancient geographical divisions.-The earliest classical notice of Syria, which could be expected to enter into any detail, is that of Xenophon in his Auabasis. Unhappily, however, this writer's account of the march of Cyrus through the north of Syria is very brief. The following notes are all that he offers for the illustration of its ancient gengraphy. Issus he mentions as the lavt city of Cilicia, towards Syria. One day's march of 5 parasangs brought the army to the gates of Cilicia and Syria: two walls, 3 stadia apart,-the river Cersus (Képoos) flowing between,-drawn from the sea to the precipituus rocks, fitted with gates, allowing a very narrow approach along the coast, and so difficult to force, even against inferior numbers, that Cyrus had thought it necessary to send for the fleet in order to cnable him to turn the flauk of the enemy: but the pasition was abandoned by the general of Artaxerxes. One day's march of 5 parasangs brougbt them to Myriandrus (Mupiavōos), a mercantile city of the Phoenicians, on the sea. Four days' marcb, or 20 parasangs, to the river Chalus (XáNos), abounding in a fish beld sacred by the Syrians. Six days, or 30 parasangs, to the fountains of the Daradax (al. Dardes, $\Delta$ áp $\delta \eta \mathrm{s}$ ), where were palaces and parks of Belesys, governor of Syria. Three days, 15 parasanes, to the city Thapsacus on the Euphrates (Anab. i. 4. §§ $4-18$ ). It is to be remarked that the 9 days' march of 50 parasangs beyond this is said by Xenophon to have led through Syria, where he nses that term of the Aram Naharaim, of the Scriptures, equivalent to Mlesopotamia. Of the places named by the historian in Syria Proper, Issus has been fully described [Isscs]. The position of the Cilician and Syrian gates is marked by the narrow passage left between the base of the Amanus and the sea, where the ruins of two walls. separated by an interval of ahout 600 yards, still
vole 11.
preserve the tradition of the fortifications mentioned in the narrative. The Cersus, however, now called the Merkez-su, appears to have been diverted from its ancient chamel, and rons to the sea in two small streams, one to the north of the northern wall, the other to the sonth of the sonthern. The site of Myriandrus has not yet been pmsitively determined, but it must have been situated about half-way between Iskanderín (Alexandria) and Arsuis (Khosus), as Strabo also intimates (see below). Fiom this point the army must have crossed the Amanus by the Beillin pass, and bave marched through the Jlain of ' $C m k$ ', north of the luke of Antioch, where three fordable rivers, the Labotas (Kara-su), the Oenoparas (Aswadd), and the Arceuthus ('Afim), must have been crossed on their march; which, however. are unnoticed by the historian. The river Chalus, with its sacred fish, is identiticd with the Chalib or Kowe $i k$, the river of Aleppo, the principal tributary to which in the mountains is still called Bubihlusiu, or Fish-river. The veneration of fish by the Syrians is mentioned also by Diodorns, Lucian, and other ancient writers. (Ainsworth, Travels in the Track of the Ten Thousind, pp. 57-65.) The source of the river Daradax, with the palaces and parks of Belesys, 30 parasangs, or 90 gengraphical miles, from Chalus, is marked by an ancient site called to the present day Ba'lis, " peculiarly positioned with regard to the Euphrates, and at a point where that river would be first approached on coming acruss Northern Syria in a direct line trending a little southward, and corresponding at the same time with the distances given by Xenophon." (Ainsworth, l. c. p. 66.) The ruins of a Roman castle, built upon a mound of ruins of greater antiquity, doubtless preserve the site of the satrap's palace; while the rich and productive alluvial soil of the plain around, coverel with grasses, flowering plants, jungle, and shrubs, aut abounding in game, such as wild boars, francobin, quails, landrails, \&c., represents "the very large and beantiful paradise:" the river Daradax, however, is reduced to a canal cut from the Euphates, about is mile distant, which separated the large park from the mainland; and Mr. Ainsworth thinks that the fact of the fountain being 100 feet wide at its source. "tends to show that the origin of a canal is meant, rather than the sonrce of a river" (p. 67, 1), 1) Thapsacus is described in a separate article. [Twn's.icts.]

Far more full, but still unsatisfactory, is the description of Syria given by Strabo, a comparisun of which with the later notices of Pliny and Ptolemy, illustrated by earlier histories and subsequent Itineraries, will furrish as complete a viow of the classical geography of the country as the existing materials allow. The notices of Phomicia, necessanily intermingled with those of Syria, are here omitted as having been considered in a separate article [PHOEvicia]. On the north Syria was separated from Cilicia by Mons Amanns. From the sea at the gulf of $\mathrm{l}_{\text {ssus }}$ to the bridge of the Euphrates in Comnagere was a distance of 1400 stadia. On the east of the Euphrates, it was bounded by the Scenite Arabs, on the south by Arabia Felix and Egypt, on the west by the Egyptiam sea as far as 1ssus (xvi. p. 749). He diviles it into the following districts, commencing on the north: Commagene; Soleucis of Syria; Coclesyria; Phoenice on the coast; Julaea inland. Commagene was a small territory, having Samosata for its capital, surrounded by a rich country. Seletucs, the fortress if Meropo-
tania, was situated at the bridge of the Euphrates in this district, and was assigned to Commagene by Punpey. Selencis, otherwise called T'etrapoulis, the best of the before-named districts, was subuivided according to the namber of its four principsal cities, S.leucis uf Pieria, Antiocb, A pameia, and Laodiceia. The Oroutes tlowed from Coelesyria thrungh this district, having to the east the cities of Bumbyce, Bervea, and Heracleia, and the river Finphrates. Heracleia was 20 stadia distant from the temple of Athena at Cyrrbestis. This gare its name to C'srrliestice wheh estended as far as Antiochis to the sontlo, touched the Amanus on the porti, and was conterminous with Commagene on the east. In Cyrrhestuce were situated Giadarus, its capital, and near it Herscleum. Contiguous 10 Gindarus lay Pagrae of Antiochis, on the Amanus, above the plain of Autwch, which was watered bs the Arceuthus, the Oroutes, the Labutas, and the Venoparas, in which was also the camp of Meleager ; above these lay the table mount, Trapezae. On the coust were Scleuceia and Mount Pieria, attached to the Amantus, and Khosu- (Poob's), between Issas and Selenceia. Sonth of Antioclis was Ajarieia, lying inland; sonth of seleutis Mount Casurs and Anticasius: lut the furmer was divided from Sclenceia by the erubouchare of the Orontes and the ruck-liewn temple of Nymphaeum; then Posidium a small sorn, iferscleia, Luklicea, ac. Tbe mountains east of Laodiceia, stoping gradually on their west side, had a steeper inclisution on the east towards Apsmeia (aamed by the Macedonians Pella) and the Chersonese, as the rich valley of the Orontes about tbat city was called. Conterminous with the district of Apamene, on the eist, was the country of the phylarch of the Arabs, named Parapotamia, and Chalcudice, extending from the Massyas; while the S'eaite Arabs also occupied the south, being less wild and less distinctively Arabs in propurtion as they were bruught nearer by position to the intuences of Syraan civilisation. (fbid. Yp. i49-753.) Then follows the description of the conot, which belongs to Phoencua (sup. p. 60G), and his extraordinary mis-statement about Libanns and Autilibanus (p. 755) alluded to ander thome articles. According to this view, the western temanation of Libanus was on the coast, a little to the south of T'ripuli, at a phace called Өєoû $\quad$ póownoy, while Antilibanus commencent at Sulou. The two ranges chen rau parallel towards the east, until they terminated In tise nountains of the Arabians, ahove Danascus, and in the two Trachones [Timenoxrtis]. Between threse two ranges lay the great plain ot CoeleYras, divided into several districts, the width at the sea 200 stadis, the length mland about duable the whlth: fertrisud by rivers, the larzest of which was the Juadan, and having a lake called Gennesaritis [Tinsintas Miner]. The Chrysorrhuas, which rose feear induasett, wis almest whully atsorbed in irritration. The Ly, us and Jurdan were navigated by the Aradiane The westermust of the plains, aling the sea-ourler, wis called Macra (Máкрa aföior), nest to which was Ma-syas, with a billy district in whi h Chaleas was sthated as a kind of acropolis of the distict, which ommenced at lawdicera ad Libanum. Tliss hily district wis beld
 Manysu was the Ii al I' an (Audav Buridukds) amil the comitry of Damasian, foll wed by the 'Iraclinnes, \&c. (pp. 7isi. 7.ifi). This very confosedand inaceurate ileorrijtion has been sufficuethy corrected in the scount above given of the I'lysical Geo-
graphy of Syria, and need not be further noticed than to observe that: it is very strange that, after Syria had been occupied by the Macedonians and the Iotmans for so muny years, and notwithstanding the frequent campaigns of the Koman legions in that country, even its main features were so little known.

Phinr confines Syria to the limits usually assigned it, that is be distinguislies betweea Syria and Palestine, which are confounded by Strabo. He de-cribes Galilee as that part of Judaea which adjuins Syria (v. 14. s. 15), but coincides with Strabo in giving a description of the coast under the name of Phoenice (19. s. If). His notion of the direction of the rages of Libanus and Antilibanus is more correct than that of strabo ; bat his description of the cuast of Phoenice, like that of his predecessor, is far more correct than that of the interior of the country ; while lis grouping of the varinns diatricts is altogether arbitrary and incorrect. Thus, while be correctly describes Mount Lebanon as commencing belind sidon, he makes it extend for 1500 stadis (a monstrous exaggeration, if the reading is correct) to Sirnyra, and this be calls Coelesyria. Then he Joosely states the parallel range of Antilibanos to he equal to this, and adds a fact, unnoticed by other writers, that the two ranges were jained by a wall drawn across the internediate valley. Within, i.e. east of, this last range ("post enan introrsus ") he places the region of Decapolis and the tetrarchies which he had before enumerated (riz. Trachonitis, Pareas, Abila, Arca, Ampeloessa, Gabe), and the whule extent of Palestine ("Palaestioae tuta laxitas"), -a coufusion on the part of the anthor involving a donble or triple error; for, 1st, nnless Damacus be included in the Decapolis, the whole region lay south of Antilibanus; 2dly, the cities of the Decapolis los in several tetrarchies, and therefore ought not to be distinguished from them as a separate district; Sily, the tetrarchies themselves, which are wrongly enamerated, lay, for the most part, within Coclesyria proper, and only Abilene, in any proper sense, to the east of Antilibanus, althougln this description might loosely apply to Trachonitis also [Twacifu. Nitis]. But to descend to particalars.

Phenice terminates to the north, acconting to Pliny, at the island Aradus, north of the river Elentheros, near sunyra and Marathos. On the coast were situated Carne, Balanea, Paltas, Gadale. the promontory on which lay Landiceia Libera, Biospolis, Heraclea Charadras, Pasidinu; then the proinontary of Syria of Antioks, then that of Selencias Libern, called alou Poria. Another egregions error follows this generally eursect statement, aud is accompanied with another example of exagyeration. Mun, Cusins be places above seleucia ("super vam") - from which it is distant about 15 mikes to the north, the Orontes intervening - and slates its ascent to be xix. M. P., and its direct beight is. M. H ., or Hazrly 20.000 feet ! - its sectual beight beiug ghout $5, \%(0)$ feet, from the summit of whil h the sun Inight be veen above the horizon at the frarth wat $h$. i. e. three hours belure suurise. North of this eanne the tuwn Ikhasos, behind which (" a tergo") Portae Syriae, Detween the Fhusii Montes anil the Taurus; then Myriandras, on the cesst, and Munnt Amanos, on which was Bumitac, and which separated Syran trom Clicia (v: 20 22). In the interior the folbuwing districts beloneed to Codestia: Ajameia, divided by the river Manyas from the tetraruly of the Xazetini; Bamby ec, uherwise called Hierapalia. but Mobug ly the Ayimus (tamuus for the wurslip
of the monstrons Atarcatis, the Derceto of the (irete:): Chalcis ad Beloun, which gare its name to the region of Chalcijene, the mot fertile in Syria: then Cyrrhestice, named from Cyrrbam; the Gazitae, Gilùareni. Gabeni; two tetrarchies named Granncormatue: the Eineeni; Hylatae; the Ituraeans and their kiddred Baetarrerif ; the Mariammitani, the tetrarchy of Mammisea, Parwulisas, Pagrae. Pinaritae: two other Seleocise the one at the Eoplrates, the other at Belas; the Cardstenses. Ail these be places in Cuelesyria: the towns and peoples enumerated in the rest of Syris, omitting thove on the Eophrates, which are separately described, are the Arethasi, Derceenses. Epiphanoenses: on the east. the Lavdiceans by Libanas, the Leocadii, Lariseei. beides serenteen tetraxchies with tarbarous names nin further specifed. The towns named in coonection with the Eophrates are, Samosats, the hesd of Commagene, xl. M. P. belom the cataracts, where it receires the Marsys: Cingills the end, and Immea the commeucerment, of Commagene; Epiphanis Artiochia ad Eopliraten; then Zengma, Isxii 31. P. from Sumasats, celebrated for the bridge orer the Euth ates - wherce its name - which connected it with Apameia on the left bark of the river: Europus; Thapacus, then called Amphipolis. On resching Ura, the river turned to the east, learing the vast deent of Palroyra on the right. Palmyra was cecexsrii. ML P. from the Parthisn city of Seleaceis ad Tigrim, ceiii. M. P. from the nearet pert of the s.rrian ciast and xsrii. 3L. P. from Damascos. Below ( "infra") the deserts of Pal'nirra was the rezion :srelendera and the abore-usted Hierapolis. Beroes, and Chalcis; and bey nud ("ulera") Palmyra.Emess and Elatins, half as near again (" dimidio propior") w. Petra as was Damascus ( Ib . ce. 23-26).

It is difficult to discorer many of these names in their Latin disguise still further obscored by corrapt readings; but many of them will wecor in the more accurate and methodied notices of Ptoleny, in connectin $n$ with which a comparative Geograpby of Ancient and Modern Syria way be atompted. The 1 andaries of Syria are fised by Ptolemy consistrutly with earlier writers. On the $\mathrm{N}_{\text {, }}$ C lion part If Cappolucias and Mins Amanus; on the W. the Srrian ses : on the S. Jodara: on the E. the Aralinn desert as far as the fond of the Euphrates, niar Thapsacns ; then the river ityelf as far as Cajpulocia (Frol. r. 15.5 § $1-8$ ).

Thie districts and towiss are enamerated onder the full wing subdirisi is:-
 cian Gates. 1. Alexa dreia by the Issas 2. Myrisndutus. 3. Phosesus 4. The Rhosian Rock ( $\sigma \mathrm{k}$ irèios). 5. Slenceis of Pieria 6. The mouth of the Ormotes -. Ponedion. S. Heracleis 9. Ladiocias. 10. Gsbals. 11. Paltos 12. Balmease [Then follows Pboenice, from the Eleatherus to the Chorseus. S. of In.ra. See Proence.] Of the shore-named maritime tuwns of Srris, No. 2 alone has occurred io Yenojhon, 5 parasangs S of the Cilician Gaie. Both this and most of the others occur in Sirabo and Pling, and the distances are furnished by the aothor of the Stadiasmns Maris Magni, and the Itinetariom Hier kolymitanam. Alexayidreis (Iskanderin). Dot mentioned by Strabo or Piiner, was 45 stavia from the Cilician Pylse. Myrisndrus was 80 stadia from Aleasadreir Its site has not been identified (Ainsworth. Trarels in tie Track of the Ten Thousasd, p. 59), bat is conjectorally, though probably. piaced by Pococke on the river Dulgehan. (Obserrations
on Syrin, p. 1;9.) Phesens ( mox A Irsiis) is 90 stadia from Myriandras: while the Rbassicas Sor palus, so stadia from Rhosess, is to be identiined in the: Ras Khaszeer, the seuthem promontory of the Gulf of Iskanderin. a well-known nastical featnre on this casst. (lb. P. 180; Cheney, Expedition, i. p. 410.) Between Nelenceis and the Rhossic rock the Stadissmos inserts Georgin 40 stadia from the former, 80 from the latter. Slencein is clearly marked by extensire and important ruir.s [Sielevcela.] From selenceis to the Omintes. 40 stalis. Between the Orontes and Poseidion the Stadiavmus enumerates Xympherem, 15 stadia; Lenk Island (Marpà minoos). one of the Pigeon Rocks, 50 stadia: Chaladrus, or Chalidropolis (ubriuasy the Charadrus of Piolemy). 10 sladia; Sdonis. 60 stadia, abore which was a lofty moonntain cailed the Throne (epóvos), distant 80 stadia from Poceidiam. Heracleis (Ras-el-Barit), sitasted on a cape cailed Polis, was 100 stadia from Poseidium, and Laodiceis 120 stadis direct distance from Heracteis: between which the Stadissmns inserts Pa-ieris and Albus Portus, the former 120 stadis from Polis, the latter 30 stadia from Laodiceis, with a like interral between the two. From Lum diceis the Stadissmus reck ns 200 stadia to Balanese (Banias), in direct distance, stbdivided as follorz: frum Laodiccis to a narigable river. probably. Nahr-el-Kebir. 70 stadis: from that to Gistala (Jebill. so: to Paltus (Boidu). 30; to Cape Belaneac, in stadia

Cbalybonitis received its name from No. 4 in the liat of cities, athergards called bemea by Selencus Nicatur, and as designated by Sirabo, sitwated atont half-way been Antioch and Iherapolis. [Berofa, Nis 3.] This fixes the district to the post of Cassiotis, in the pashatic of Alerpos, whase rewownd capital valled in Arabse Chateb, is the modern representative of Chalyhon, which bad resumed its ancicat name an tarly as the thne of I'tulemy, unlens it had rather retaned it thronglonit among the natives. The district eatended from the Oroutes to the Euphrates. The sites have not becu identiliped.

1x. ('masomek (§ 18). 1. Chalcis. 2. Asapheidana. 3. 'Tolmidessa. 4. Maronins. 5. Comara. Thas dotriet lay sonth of Aleppo, and therefore of Chalybonitis, according to $\mathrm{l}^{\prime}$ ocorke (ohlorrutions will Syrit, p. 149), which is confinued by the existenoe of Kenucuserein, whirh he takes to be idenfical in sthation with Chaleis, and which, aunong Arab whiturs, gives its name to this part of Syria, and to the gate of Aleppo, which leads in this direertim. [C'H.u.chs, No. 1]
x. Ap,smeve (§ 19). 1. Nazaba (ul. Nazama). And on the east of the Orontes, 2. Thr-memasms (iul. Theflomisms). 3. Apameia. 4. Emissa. This is - momelemed instrabo's scleucis, and is easily identified with the district of Hemos. [See Limasa, \&ic.]
x. Lanmulenv. (§ 20). I. Scabiusa Laudiceia, 2 Parahsus. 3. dibrula. Tou the south of the f. rmer, hiphor up the Orontes, also comprehendel in the selpheis of :'tabuo. No. 1 is adentical with Strabo and Plony' Limancia ad Lihbuam, placed by Mr. l'orter und 1r. Robmann at Till Neby Mindun on the left bank of the Goates, near fokie Homes, l'aradisas (2), still marked by a pyramid, on which a e reparsothed hambing aremes. (See aluve, p. 495, scr. Obostr...) Dr. Johinsm no neewly agrees with this identification as to place I'aradisus at Jiseieh-el-Kadim, whach is unty a fev miles distant from
the pyramid of Hurmul to the east. (Rubinson, Dib. Res. 1852, p. 556 ; Porter, Fire Years in Damuscus, vel. ii. p. 339.) Jabruda (3) is distinetly maked by Yabrial on the east of Antilbanus, a town mentioned by writers of sacred geography as an episcopal city in the fourth century, a distinction which it still retains.
xii. 1'mornick, inland cities (§21). 1. Area. 2. I'alacobiblus. 3. Gabalar 4. C'aesareia J'anias. These have been noticed under the articles l'mosNits, \&e.
xiii. Corlesynat, cities of the Dempulis ( $\$ \S 22$. 23). 1. Heliopulis. 2. Abila, named of Lymanian, 3. Siana. 4. Lua. 5. Dunuscus. 6. Sumulia, 7. Aluda. \& Hippus, 9. Cappitolias. 10. Ciadura. 11. Adra. 12. Aeythopolis. 13. Gerasa. 14. Della. 15. Drenk. 16. Gadôra. 17. I'hiludelpheia. 18. Canotho. The statement of the georapher that thene arr" the cities of the Decapulis, preceding, as it doces, the enmmeration of eighteen cities, ean only be taken to mean that the ten cities of the Decajolis were comprebended in the list, and that the remander might le regarded as sitnated in that region. It is remarkable, too, that the name Coeleyyria is bere used in a more restricted and proper sense than at the heading of the chapter under consideration, where it is equivalent to Syria in its willet acceptation. According to I'liny the nine cities markenl by italics in the above list, with the addition of laphana,-apparently the Raphaneue of l'toleny in Cassiotis,-propenly constituted the cities of the Ihecapolis, according to most authorities. These and the remaining cities requive a very large district to be assigned to this diysion of the conntry, eomprehending the whole length of the Büdicia, i. e. Cuelesyria I'roper, from lheliopolis (1) (Baalbel) to I'hiladelpheia (17) (Amwont), and in width from Damasens almost to the Mediterranean. Abila of Lysamias (2), has only lately been identified, and attracted the notice which it deserves, as the capital of the tetrarchy of Abileme, mentimed by St. Luke, in eotaneetiom Ferlaps with this same Lysamas, whose name is attached to it by the gengrapher. (St. Luke, iii. 1.) It is situated in the leart of Autilhamus, on the north side of the river Baradno Where the nunerons remains of antiquity and same insoriptians leave mo doubt of the identity of the site. (1e Sully, lignage autoner de la Mer Morte, vol. ii. pp. 593 6it4; Porter, Damascus, vol. i. 1p. 15. 102, 261-273; Lubinson, Lib. Res. 1852, 14.479 484.)
xiv. Palmykene (§ 24). 1. Rhesaplia. 2.Cholle. 3. Uriza t. P'utan. 5. Alada. 6. Palnyria. 7. Adacha. 8. Danaba. 9. (ivaria. 10. Aneria (al. Aueira). 11. Casuma. 12. Uhmana, 13. Atera; and, near the Eupharates, 14. Alalis. 15. Sura. 16. Alanatha. This district obviously lay to the east of the last-named, and south of Chatybonitis. It comprehendeal the vast denert region in which I'almyra is situated, lont which is almost a blank on the map, so an to defy all attempts to jidentify the sites.
xv. Batanafa ( $\$ 26$ ). 1. Getra. 2. Elere. 3. Nulaka. 4. Adrama. This distriet will best be considered in connection with Trachonitis. [G. W.]
IV. History.-The earliest accounts which we passess of Syia represent it as consisting of a number of independent kingdons. Thas we hean of the kiugs of Mawtha in the time of 1ravid (2 Nem. x. 6), of the kings of the neighbouring tuwn of Gebler in the tine of sulomon ( Ib, iii. 3 , xiii. $3 i$ ), \&o. But of all the Alsunacan monarehics the must
powerful in the time of Saul and David was Zobah, as appears from the number of men which that people brought into the field against Bavial (Ib. viii. 4), and from the rich booty of which they were poiled by the Israulites ( $16, \mathbf{v}, 7$ ). Esen after sustaining as signal defeat, they were able in a little time to take the field ugain with a considerable force ( 16 . x. 6). Davis never heless subdued all Syria, which, however, recovered its independence after the death of Solomon, B.c. 975 . From this period Damascus, the history of which has bren already given [DAmascus, Vol. 1. p. 748], became the most considerable of the Syrian kingloms. Syria was conquered loy Tiglath-Pileser, king of Assyria, about the year 747 B.c., and was annexed to that kingdom. Hence it successively formed part of the Babylonian and Persian empires ; but its history presents nothing remarkable down to the time of its conquest by Alexander the Great. After the death of that conqueror in e.c. 323, Syria and Mesopotamia fell to the share of his general Seleucus Nicator. The sovereignty of Seleucus, however, was disputed by Antigonus, and was not established till after the hattle of Ipsus, in 301 b. c., when be founded Anthech on the Orontes, as the new capital of his kingdom. [Antiocheia, Vol. I. p. 142.] From this period the descendants of Seleucus, known by the appellation of Scleucidae, oceupied the throne of Syria down to the year 65 B.c., when Antiocbus XIII. Asiaticus was dethroned by Pompey, and Syria becane a Roman province. (Plut. Iomp. 39 ; Appian, Syr. 46 ; Eutrop. vi. 14.) Into the history of Nytia muder the Seleucidae it is unnecessary to cuter, since a table of that dynasty is given in the Ifictionary of Bioyraphy ['ol. 111. p. 769], and the public events will be found described in the lives of the respective monarchs.

The tract of which l'ompey twok possession under the name of Syria comprised the whole country from the gulf of lssus and the Euphrates to Egypt and the deserts of Arahia. (Appian, Syr. 50, Mith. 106.) The province, bowever, did not at first comprehend the whole of this tract, but coasisted merely of a strip of land along the sea-coast, which, from the gulf of Issus to Damascus, was of slender breadth, but which to the S. of that city spreat itself ont as far as the town of Canatha. The rest was parcelled out in such a manner that part consisted of the territories of a great number of free cities, and part was assigned to various petty princes, whose absolute depentence upon Rome led to their dominions being gradually incorporated into the province. ( $\Lambda_{\mathrm{P}}$ pian, Syr. 50.) The extent of the province was thus continually increased during the first century of the Empire; and in the time of Hadrian it had hecone so large, that a partition of it was deemed alvisable. Commagene, the most northern of the ten districts into which, according to Ptolemy ( $v .15$ ), the upper or northern Syria was divided, had hecome an independent kingdom befure the time of 'rompey's conquest, and therefore did not form part of the province established by him. [Cosmmisgene, Vol. I. p. 651.] The estent of this province may be determined by the free cities into which it was divided by Pompey; the names of which are koown partly from their being mentioned by Josephus (Ant. xiv. 4. §4), and partly from the era wbicb they used, namely tbat of B. с. 63, the year in whieh they received their freedom. In this way we are enabled to enumerate the following cities iu the original province of Syria: Antiocheia, Se-
leuceia in Pieria, Epiphaneia, between Arethusa and Emesa, Apaneia; nearly all the towns of the Decapolis, as Abila (near Gadara), Antioclieia ad Hippum or Hippos, Canatha, Diun, Gadara, l'ella, aul Ploladelpheia ; in Phoenicia. Tripolis, Nidon, Tyrus, Dora ; in the north of lalestine, Seythopolis and Sanaria ; ou the coast, Turris Stratonis (Caesareia), Joppe, lamnoia, Azntus, Gaza ; and in the south, Marissa. The gift of freedom to so many eities is not to be attributed to the generosity of the Romans, but must be regarded as a necessary measure of poliey. All these towns liad their own jurisdiction, and administered their own revenues; but they were tributary to the Romans, and their tases were levied according to the Roman system established on the organisation of the province. ("Syria tum primum facta est stipendiaria," Vell. Pat. ii. 37.) The first governors of Syria, and especially Gabinits, who was proconsul in the year $57 \mathrm{n} . \mathrm{c}$., tork mueb pains in restoring the cities which bad been destroved. (Joseph. Ant. xiv. 5, § 3.) The divisions established in Judaea by Gabinius have been noticed in another article. [Ṕllaestina, Vol. 11. p. 532.] Caesar, during bis expedition against Pharnaces B.c. 47 , confirmed these cities in their rights, and likewise extended them to others, as Gabala, Lao diceia ad Mare, and Ptolemais. (Eckhel, vol. iii. p. 314, sq. ; Norisius, Ep. Syrom. pp. 175-213, 450.) Of the regulations adopted in Syria during the reign of Angustus we have little information.

The sabe political reasons which dictated the establishment of these free cities, where it was pussible to do so, rendered the continuance of dynastic governments necessary in the eastern and sonthern districts of the province, where either the nomadic charscter of the population, or its obstinate adberence to ancient institutions was adverse to the introduction of new and regular forms of government. These dynasties, however, like the free cities, were nsed as the responsible organs of the Roman administration, and were tributaries of Rome. Thas, in the histories of Cornmagene and Judaea, we find instances in which their sovereigns were cited to appear at Fome, were thied, condemned, and panished The loman idea of a province is essentially a finatucial one. A province was considered as a " praedium populi Romani" (Cic. Verr. ii. 3); and lene the dynasties of Syria may be consilered as belonging to the province just as manch as the free towns, since, like them, they were merely instruments for the collection of revenue. (Cf. Huschke, Ueber den sur Zeit der Geburt Jesu Christi gehaltenen Census, $\mathrm{pp} .100-112$.) Thus we find these petty surereigus in other parts of the world regarding themselves merely as the agents, or procurateres, of the Reman people (Sall. Jug. 14; Mıffei, Mus. 1'er. p. 234); nor were they allowed to subsist longer thian was necessary to prepare their subjects for incorporation with the province of which they were merely adjuncts.

The Syrian dynasties were as follows: 1. Chalcis ad Belum. 2. The dynasty of Arethusa and Emesa. 3. Abila. 4. Damascus. 5. Judaea. 6. Palmyra. These states lave been treated of under their respective names, and we shall bere only add a few particulars that may serve further to illustrate the history of some of them daring the time that they were under the Roman sway. All tbat is essential to be known respecting the first three dynasties has already been recorded. With regard to Damascus, it may be added that M. Aemilius Scaurus, the first
governor of Syria appointed by Jompry, after having pmuished its ruler, the Arabian prince Aretas, fur the attacks which he had made upom the province before it had been reduced to arder, conchudes a treaty with lim in 18. ©. 6.2. It is to this event that the coins of scaurus refer, bearing the inseription usex aneris. (lickliel, vol. v. p. 131; cf. Dion Cass. xxxvii. 15: $\Lambda_{\text {ppian. Syr. }} 51$; Joseph. Ant. xiv $\& \S 5,5$. §1.) Damaseus was dependent on the Romans, and sunctimes luad a Roman garnison (Hierom. in Isai. e. 17; Joseph. Ant. siv. 11, §7), though it camot be sunbted that the Arabian kings were in possession of it, on the condition of paying a tribute. It Jas already been remarked that the city was in the possession of an ethmarch of Aretas in A. 13 ; and it was not till the year 105 , when Arahid Petraea became a province, that Damascas was united with Syria, in the proconsulship of Cornelius Palua. (Eekhel, vol. iii. p. 330.)

On the other hand, Judaen aptears to have been annexed to the province of Syris immediately after its conquest by Pompey in B. c. 63 (Dion Cass. xxxvii. 15, 16; Eutrop. vi. 14 ; Liv. Ep. 102: Sirab. xvi. p. 762. sq.; Juseph. B. J. i. 7. § 7 ; Antrı. Marc. xiv. 8. § 12); though it retained its own administration, with regard especially to the taxes which it paid to the Romans. (Juseph. Ant, xiv. 4. \& 4, B. $J$ i. 7. § 6.) The race of the Jewish kiogs ended with Aristobulas, whom Yompey, after the eapture of Jerusalem, carried to Rome to adom his triumph (Appian, Syr. 50; Dion Cass. xxxsii. 16 ; Plut. Pump. 45 ; Jaseph. Ant. xiv. 4 , \&c.) Hyrcanus, the brother of Aristubulos, wis left indeed in Iudaea as chief priest and ethasrch, in which oflices Jre was confirmed by Caesar; but his dignity was only that of a priest and judge (1) Mon Cass. l.c.; and Joseph. l. c. sud xiv, 7. § 2, 10. § 2.) The land, like the providce of Syria, was divided for the convenience of administration into districts or circles of an aristocratic constitution (Jusepb. B.J. i. 8. § 5) ; and doring the constant state of war in which it wis kept either by internal disorders, or by the incursions of the Arabians and Purthians, the presence of Roman troops, and of the goveruor of the province himself, was alınost always necessary.

It hav been already related [Jenesalem, Vo]. I. 1.,26] that Antigonus, the son of A instubulus, olitilined possession of the throne with the assistance of the Parthan in B. C. 40 . In the following year the Parthians were expelled from syria by Ventidins (1)un Cass. slviii. 39-41; Liv. Epit. 127 ) : and in 15. e. 38 Judaea wis conquered by Sosius, Antony's legatus, Antigonus was cuptured ind executed, and Ilerod, surnamed the Great, was phaced $u$ pon the throne, which had been promised to him two year previously. (IHion Cass xlix. 19-
 pan, 1. C. v. 75; Suab. xvi. p. 765.) Fron this time, Indam again became a kingdom. With resard to the relation of Ilerod to the Romans we may remark, that a Roman legion was stationed at JCrusulem to uphold has sovereignty, that the oath of fealty was taken to the emperor, as lord paramount, as well as to the king, and that the alisolute dependence of the latter was recognised by the payment of a tribute and the prowaling of subsidiary troojs. (Josepli. Ant. xv. 3. § i, xvii. 2. § 4; Apliath, B. C. v. 75.) Herod, therefore, is to be regarded only as a procurator of the emperor, with the title of king. Antuny assigued jart of the reve.rues of Judaea to Clenpatra. (Jiseph. Ant. xv.
4. $\$ \S 2,4$.$) Aemording to an ordinance of Casear,$ the places on the jurindiction of Jerasalem, with the exception of Jappas, had to pay a yearly tribute of a fourth of all agricultural produce, which was to be delivered the following year in Sidon, besides a tenth to be paid to IIyrcanus. (Ibril. xiv. 10, §̧ 6.) Iı the seventh. or Sablath year, however, the tribute was internitted. Besides this trihute, there was a capitation tax ; and it was for the organising of this tax that the census mentioned in the (bispond of St. Luke (ii. 1, 2) was taken in the year of our Saviour's birth, which aplears to have been conducted by INerod's officers according to a Roman forma censualis. The division of Judaea amony the soms of Merod, and its subsequent history till it was incorprorated in the province of Syria by the emperor Claudius, A. D. 44 (Tive. Ann. xii. 23, IVist. v. 9), have been already narrated [Vol. II. p. 532], as well as the fate of Jerusalem under the emperors Titus and Hadrian. [Vol. II. p. 26, seq.]

With regard to Palingra, the sixth of the dynasties before enumerated, we need here only add to what has been alreaty said [Vol. 1I. P. 536] that it was united to the province of Syria by Hadrian, and bore from him the name of 'Aड̄рเаv̀̀ Пá入 $\mu \nu \rho a$. (Stepls. B. p. 498 , ed Meineke; cf. Gruter, p. 86. 8.) But whether it became a colony with the Jus Italicum on that occasion or at a later period, cannot bo determined.

Respectiog the administration of the province of Syria, it may be mentioned that the series of Lomma goveruors commences with M. Scauras, who w:s left these by lompey in the year 62 E. C. witli tho title of quaestor pro praetore. Scaurus was succeeded hy two pro-praetores, I. Marcins Philippus, 61-60, iand Leotulus Marcellinus, $59-58$; when, on aeconnt of the war with the Arabs, Gabinins was sent there as proconsul, with an army (Appian, Syr. 51; cf. Joseph. Xiv. 4, seq., B. Jud. i. 6-8; Eckliel, vol, v., , 131). We then find the followin! names: Crassus, $55-53$; Cassius, his quaestor, $53-51$ : M. Calpurdius Bibulus, procoosul. (Drumann, Geseh. Koms, vol. ii. pp, 101, 118-120). After the buttle of Tharsalus, Caesar gave Syria to Sex. Jahus Caesar, D. C. 47, who was put to death in the following year by Caecilius Bassus, an adherent of J'ompey. (lib. p. 125, iil. p, 768) Bassus retained possession of the province till the eud of 44 , when Cissius seized it, and assumed the title of proconsal. (Cic, ad Fam, xii. 11.) After the tattle of Jhilipi, Antony appointed to it his lieatehant, L. Decidius Sixa, n. e. 41, whose overthrow by the Parthians in the folluwing year occasioned the loss of the whole province. (Dion Cass, xlviii. 24 ; Liv. Fipit. 127.) The larthians, however, were driven out by Ventilius, anuther of Antony's Hentenants, in the atutum of 39 . (Dion Cass, ib. $33-43 ;$ Liv, ib.; Plat. Aut, 33.) Syria continued to be govensed by Autony's officers till his defeat at Actiom in 31, nanely, C. Susius, B. C. 38 (luy whom, as we have said, the throne of Judacs was given to 1lerod), L. Mnnatius Plancus, 13. C. 35 , and L. Ribulus, B. c. 31 . In B. C. 30 , Octavian intrusted Syria to his legate, Q. Didius. After the division of the provinces between the emperor and senate in B. C. 27 , Syria continued to have as governors legati Angusti pro practore, who were always consulares. (Suet. Tib. 41 ; Appian, Syr. 51.) The inost accurate account of the governors of Syria, from B. C. 47 to A. 15. 69, will be found in Norisius, Conotaphia Pisana. (OJP rol. iii. PD. 424-531.) Their
residence was Antioch, which, as the inetropelis of tie province, reached its highest pitch of prosperity. It was principally this circumstance that induced the emperor Halriais to divide Syria into three parts (Fpart. Ifadr. 14), namely: I. SyR1A, which by way of distiaction from the other two provinces was called Syria Coele, Magna Syria, Syria Major, and sumetimes simply Syria. (Gruter, Inscr. 346. 1, 1091. 5; Orelli, Inscr. no. 3186, 4997; Galen, de Aatidot. i. 2.) Antioch remained the capital till the time of Septimins Sevens, who deprived it of that privilege on account of its having sided with lescennius Niger, and substituted Laodiceia, which he inade a colony ioits stead (Capitol. M. Anton. 25 ; Arid Cass. 9; Ulp. Dig. 50. tit.15. s, 1. §3); and although Caracalla procured that its rights should be restored to Antioch, yet Laodiceia retained its title of metropolis, together with a small territory comprisiog four depeadent cities, whilst Antioch, which had also been made a colony by Caracalla, was likewise called Aletrocolonia (Corp.Inscr. Gr.no.4472; Paul. Dig. 50. tit. 15. s.8.§5; Eckhel, ïi. p. 302, sq.,319, sq.) Il. Syita Phoenice, or Sxibopioenice, under a legatus Augusti pro praetore (Marat. 2009. 1, 2; Marani, $1 t t i$, ge. p. 744), consisted of three parts, with three metrophitan cities, namely : 1. Tyre, which first obtained the title of metropolis, with relation to the Roman province, under Hadrian (Suidas, ii. p. 147, Bernh.), though it had that appellation previously with relation to its own colonies (Strab. xvi. p. 756 ; Eckhel, vol. iii. p. 386). 2. Damascus, which from the time of Hadrian becane a metropolis, with a small territory comprising five towns. (Just, Nart. Dial, c. Tryphone, c. 78; Tertull. ade. Marcian, iii. 13; Eckhel, vel. iii. Pp 3313i3.3.) 3. Paloyra, which appears to have been the residence of a procurator Caesaris; whence we may infer that it was the eentre of a fiscal circle (Notit. Jiyn. i. p. 85; Ulpian, Dig. 50, tit. 15. s. 1. § 5 ; J'nкop. de ded. ii. 11 ; Corp. Inscr. Gr. no. 4485. 4496-4499.) A fourth metropolis, Emesa, wasadded under Heliorabalus (Eekhel, ïi. p. 311 ; Ulpian, Dig. 50. tit. 15. s. 1. § +). Trachonitis also formed a separate circle at this time, with the village of Phama as it» $\mu \in т \rho о к \omega \mu i \alpha$ (Corp. Inscr. Gr. 4551 : Orell. Inscr. vol.ii. p. 437, no. 5040 ). III. Symia Palaestina, Irom the time of Hadrian administered hy a legatus Augusti pro pruet. The name of Syria Palaestina dues not appear on coins till the time of the Antoयines (Erkbel, iii. p. 435 ; ef. Aristid. ii. p. 470, 1)ind. Galen. de Simpl, Medic. iv. 19; Just. Mart. Apol. i. 1: Corp. Inser. Gr. no. 4(229, 415t, \&c.). Its mer impolis was Caenareia, aociently Turris Stratonis (Eckhel, iii. p. 432).

This division of the province of Syria was connected with an alteration in the quarters of the three legions usually stationed in Syria. In the time of Dion Cassius (lv. 23) the Legio VI. Scythica was cantoned in Syria, the Legio IlI. Gallica in Mhoenicia, and the Legio V1. Ferrata in Syria I'alaestima. The system of colonisation which was begun ly Augustus, and continued into the third century of our era, was also adapted to insure the security of the province. The first of these colonies was Berylus, where Augustus settled the veterans of the Legio V. Dlacedonica and V1Il. Augusta. It was a Colonia juris Italici. (Eekhel, iii. p. 356 ; Orelli, Inser. no. 514 ; Ulpian, Dig. 50 . tit. 15. s. $1 . \S 1$; Euseb. Chron. p. 155. Serl.) Augustus also founded Heliopolis (Baalbek), which received the jus Italicam nuder Septiaius Severus (Ulpian, l. c.; Eckbel, iii.
p. 334). Uoder Claudius was fonnded Ptolemais (Ace), which did not posmess the jus Italicum (U1pian, ib. § 3 ; Plin. v. 1 ; Ecklıel, iii. p. 424). Vespasiam planted two colonies, Caesareia (Timris Stratonis) and Nicopolis (Emmaus) Paul. Dig. 50. tit. 15. s. 8. \& 7; Eckhel, iii. p, 430); which latter, however, though originally a military coluny, appears to have possessed neither the right, nor the mane of a colonia (Eckhel, iii. P. 454 ; Joveph. Eell. Jud. vii. 6; Kozomen, IIist. Eccles. v. 21.) The chief eolony Inunded by Hadrian was Aclia Capitolina (Jcrusalem), whose colonists, howerer, were Greeks, and therefore it did not possess the jus Italicum. (Dion Cass.lxix. 12; Fuseb. Hist. Eccles. iv.6; Malalas, xi. p. 279, ed, Boun ; Ulpian, l. c. § 6.) Hadrian also prohably faunded Palmyra. Under Septimius Severus we have Laodiceis, Tyrus, aud Sebaste (Samaria), of which the first two possessed the jus Italicum. (Ulpian, ib. § 3. and 7 ; Eckhe!, iii. p. 319,387 , seq., 440 , seq.) Caracalla founded Antioch and Emesa (Ulpian, ib. $\S 4$; Pat. ib. §5; Eckhel, iii. 302, 3 11), Elagabalns Sidon (Eckhel, iii. p. 371), and Philippus, apparently, Damascus (ib. p. 33 t ). To these nust he added two colonies whose foundation is unknown, Capitolias, of whose former name we are ignorant (Paul. Dig. 50, tit. 15. s. 8. §7 ; E.ckhel, iii. p. 328, seq.), and Caesareia ad Libanum (Arca). (Eckhel, ib. p. 361.)

At the end of the fourth century of our era, Syria was divided into still snaller portions, namely: 1 . Syria prina, geverned by a consularis, with the metropolis of Antioch adod the following cities : Seleuceia, Laediccis, Gabala, Paltos, Beroca, Chale is. 2. Syria Secuoda, under a praeses, with Ajameia for its elief city, and the dependent towns of Epiphancia, Arethusa, Larissa, Narriamne, Balaueia, Raphaneae, and Seleuceia ad Belun. Malalas (xiv. p. 265, ed. Bonn.) ascribes its separation froen Syria Prima to the reign of Theolosius 11., which, hewpver, may be doubted. Bïking attribates the division to Theodesius the Great (nd Not. Dignit. i. p. 129). 3. Phocoicia Prima, under a consularis, with the metropolis of Tyrus and the cities Ptelemais, Sidon, Berytus, Byblos, Botryo, Tripalix, Arcae. Orthusias, Aradus, Antaradns, Caesarea Paneas. 4. Phoenici, Secunda, or Pboenicia ad libanam, under a prae-es, Laviog Damaseus for its capital, and embracing the cities of Enesa, Laodiceia ad Lihanum, Heliopolis, Abila, Palmyra. It was first separated by Theodosius the Great. 5. Palıestina Prima, administerel by a consularix, and in the years 383-385 by a proconsul. Its chief city was Cacsarcia, and it comprehended the towns of Dara, Antipatris, Ihiospolis, Azotus ad Mave, Azotus Mediterradea, Eleuthero. polis, Aelia Capitolima (Jerusalem), Neapolis, Livias, Sebaste, Anthedon, Diocletianopolis, Juppa, Gaza, Raphia, Ascalon, Sc. 6. Palaestina Sceunda, under a praeses, with the capital of Scythopolis, and the towes of Gadara, Abila, Capitolias, Hippos, Tiuerias, Dio Caesareia, and Gabae. 7. Palaestina Tertia. This was formed ont of tbe former provioce of Arabia. (Procop. de Aed. v. 8.) It was governed by a praeses, and its chief city was letra. (Cf. Palaestina, Vol. 11. p. 533.)

With respect to these later subdivisions of Srria, the reader atay consult Hierocles, p. 397 , ed. Boon, with the notes of Wesseling, p. 518, sqq.; the Notitia Dignit. i. p. 5, seq., and the commentary of Bibckiog, JP. 128-140, 511; Bingham, Orig. Eecl. vol. iii. p. 434, seq.; Norisius, de Epoch. Syromaced. in Upp. vol. ii. p. 374 , sqq., p. 419 , secp.

In the year 632．Syria was invated by the Sura－ certs，nominally under the cummand of Abn Obeidah， me of the＂companions＂of Mahomet，but really leal by Chaled，＂the sword of（iod．＂The easy eemquest of Bosra inspirited the Mosloms to attack Danaseas：but here the resistance was more deter－ mined，and，thengh invested in 6．33，the city was not captured till the following year．Heraclius had been able to collect a large forec，which，however， under the command of his general Werdan，was completely defeated at the battle of Aismadin；and Damasems，after that decisive engagement，thongh it still heht out for seventy days，was compelled to yiedd．1prlippolis and Emesa speedily shared the fate of losrat and bamasens．The last efforts of Heraclius in defonce of Syria，though of extraor－ linary maunitude，were fiustrated by the battle of the Yermuk．Jerusalem，Aleppa，and Damasens nncecssively yiolded to the Saracen arms，and He－ raclius abandoned a province which he could no Inncer hope to retain．Thus in six campaigns （633－639）Syrit was entirely wrested from the Roman empire．（Gibbon，Decline and Fall．ch． 51：Marquant，Rim．Alterth．vol．iii．）［1．H．1）．］

SYRIAE PORTAE（Supiat múnaı），a pass be－ $t$ ween Mount Amamus and the coast of the bay of 1 sus，which formed a passuge from Cilicia into Soria．It was 3 stadia in length，and only broad riough to allow an army to pass in colunns． （Xenoph．Anab．i．4．§ 4；Arrian，Anab．ii．8： 1＇lin．v．18；1＇tol．v．15．§ 12；Strab．xiv．p．676．） This mountain pass had formerly been closed up at hoth ends by walls leading from the rocks into the rea；but in the time of Alexunder they seem to have existed no longer，as they are not mentioned by any of his lastorians．Through the midst of this pass，which is now called the pass of Beilan， there flowed a small xtream，which is still known under the name of Merkez－sw，its ancient name being Cersus．
［l．S．］
SYR1AS（Eupuás），a hemiland in the Euxine， on the coast of Paphlagonia，which，to distinguish it from the larger promontery of Caramhis in its vi－ －inity，was also called ăкра 入еттヴ．（Marcian，p．72； Arriam，Peripl．P．E．14 15：Anunym．I＇eripl．P．E． 1．7．）Its modern name is Cape Inljc．
［L．S．］
SyluE＇N1．［Syb．astionse．］
slinNoLA（lin．Mier．p．56＊），a town in the north－western part of Thrace，hetween Mhilippopolis aud Parembole．
［3．1．］

## SYRO－PHOENICE：［SymL．P．1079．］

SYloos or SYlRUS（さípos，alsu Zupin，llom．Orl． ar．403，and Sipa，Dine．Laert．i．115：Hesyed．； Snicl．：Eth．Xípoes：Sipre（ $\mathbf{\Sigma i n p a}$ ），and the prowert
 Inv：Eipsor），an island in the Aegaman sea，one of the C＇ykdes，lying butween Rhenri．t and Cythous， and 20 mites it circmuference，arcording to some anciont authorities．（Plin．iv．12．又．22．）Syrus produces guad winc，but is unan the whole not fer－ tile，and does not desurve the praises bestowed uman it by llomer（l．c．），who describes it as rich in pas－ tares，cattle wioe，and wheat．It is asually states nyon the anthurits of lliny（xxxiii．12．s．56）that Syros produced sil or yellow nehre；but in Sillig＇s elition of Illiny，Suyros is substituted for Syros．

Syros had two citurs（ven in the time of llomer （Od．xv．412），one on the mastern，and the other on the western side of the islaml．The one on the eatern side，which was atled Syros（1＇tol．iii． 15. § 301 ，：towd en the same site as the modern capital
of the island，which is now one of the inast flourshing cities in Grecoe，containing 11,000 inhabitants，and the centre of a flourishing trade．In consequence of the numerous new buildings almost all trakes of the ancient eity have disappared；but there were con－ siderable remains of it when Tournefort visited the island．At that time the ancient eity was nban－ doned，and the inhabitants had built a town upon a lofty and stecp hill about a mile from the shore： this tewn is now ealled Old Syra，to distinguish it from the modern town，whieh hats arisen upon the site of the ancient city．The inhabitants of old Syra，who are about $60 n 0$ in number，are ehiefly Catholics，and，being under the protection of France and the P＇upe，they took no part in the（ireek revo－ lution during its earlier years．Their neutrality was the chief eause of the medern prosperity of the island，since numerous merelants settled there in consequence of the disturbed condition of the other parts of Greece．

There are ruins of the secend ancient city on the ＂estern eoast，at the harbour of Maria della Grasiu． Huss conjectures that its name may have been Gryn－ che or Gryncheia，since we find the $\Gamma \rho u \gamma \chi \hat{\eta} s$ ，who are otherwise unknown，mentioned three times in the inscriptions containing lists of the tributary allies of Athens．There was another ancient town in the island，named Eschatia．（Böckh，Inscr． mo． 2347, c．）Pherecydes，one of the carly Greek philosophers，was a native of Syros．（Comp．sitrab． x．pp．485， 487 ；Scylax，p．22；Steph．B．s．r．； Tournefort，loojage，vol．i．p．245，seq．Engl．tr．； Prokesch，Erimnerungen，vol．i．1．55，seq．；Hoss， Reisen auf den Giriech．Inseln，vol．i．p．5，seq．， wil．ii．p．24，sey．；Fiedler，Keise，vol．ii．p．164，sem．）

SY＇RIICA REGlO（方 Evptiky，Ptol．iv．3），a tract on the const of N．Africa，between the Syrtis Major and Minor，about 100 miles in length．（Sitrab． xvii．p．834，sq－；Mela，i． 7 ；Mlin．v．4．s．4．）After the third century it obtained the name of the Regio Tripolitana，from the thrce principal cities，whith were allied together，whence the modern name ot Tripoli（Vot．Inp）．Occid．c． 45 ；Procop，de Aerl． vi．3；ef．Solimus，c．27）．Mannert conjectures（ x ． pt．ii，p．133）that the emperor S－ptimius Severus， who was a native of Leptis，was the founder of this Provineia Tripolitana，which，according to the Not． Iup．（l．c．），was geverned by its own duke （1）ax）（Comp，Amm．Marc．axviii．6）．The dis－ trict was attributed by I＇tolemy，Mela，and Pliny to Africa I＇ropria；but in reality it formed a separate district，which at first belonged to the Cyrenacans， thut was subsequently wrested from them and anmexed to Carthage，and，when the whole kingdom of the latter was subjected to the Komams，formed a part of the loman province of Africa．For the most part the suil was samly and little capable of cuitivi－ tim，as it still remains to the present day（Decla Celli．I Itagio，p．50）；yet on the borders of the river Cinyps and in the neighbourhood of the town of Lepths，there was some rich and productive land． （1levol．iv．198；Scylax，p．47；Sirah．xvii．p． 835 ； （Wid）ex Pout．ii．7．25．）P＇toleny mentions several momenains in the district，as Mount Giglins or Grigius
 ©igibu opos，ib．）Mount Zuchabbari or Chazabarri

 $\lambda \in \tau 0 \nu$ ópos，ib．§ 18）．The more important prom montories were（＇ephalac（Kєфa入al ăkpov，l＇tol．iv． 3. § 13），near which also，on the W．，the same author
mentions another promoutory, Tricron (Tpinfow or Tanpov ăкpov, ib.) and Zeitha (тà Zeî̀o, ib. Ş 12). The principal rivers were the Cinyps or Cinyphus (Itol. ib. § 20), in the eastern part of the distuict, and the Triton, which formed its western houndary, :and by which the three lakes called Tritonitis, Pallas, and Libya were supplied (ib. § 19). Besides these waters there were extensive salt lakes and marshes along the coast (Strab. l. c.; Tab. Pent. tab. vii.) The lotus is mentioned among the scanty prolucts of this unfertile land (Plin. xxiv. 1. s. 1), atal a peculiar kind of precious stones, called after the country Syrtides gemmae, was found on the coast (Id. $x \times x v i i .10 . \S 67$ ). The tribes that inhatited the conntry besides the Nasamones, 1 ssytti. and Macae, who in the earlier times at least spread themselves aver this district, were the Lotophagi [ Vol. I1. p. 205], who dwelt abont Syrtis Minor, and the Gindames [Vol. I. p. 1002], who were situated to the W. of the former. Ptoleny, however, in place of these more ancient tribes, mentions others that are heard of nowhere else, as the Nigitimi, Samamycii, Nycpii, Nygbeni, Elaeennes, Damnesii, \&o. (ir. 3. §§ $23-$ 27). But Egyptian and Phoenician colonsts had been mixed at a very early period with these aboriginal Libyan tribes, whonn the Greeks found there when they settled upon the coast, and with whom, probably, they bad for some time previously had connections. The most important towns of the Regio Syrtica were the three from which it subsequently derived its name of Tripolitana, that is, Leptis Magna, Oea, and Sabrata ; besides which we find Tacape and other places mentioned by 1 'tolemy. Opposite to the coust lay the islands of Menins and Cercina,
[T. H. D.]
 каi $\mu \kappa \kappa \alpha ́$, Ptol. iv. 3), two bruad and deep gulfs in the Libyan sea on the N. coast of Africa, and in the district called after them Regio Syrtica. The name is derived from the Arabic, Sert, a desert from the desolate and sandy shore by which the neighbourbood of the Syrtes is still claracterised. The navigation of them was very dangerous because of their shallow aod sunken rocks, so that the smaller Syrtis was considered in ancient times as altogether unnavigable, and even into the larger one only small ships ventured. (Sirab. xvii. p. 835; Scylax, p. 48; Polyb. i. 39 ; Mela, i. 7 ; Mlin. v. 4. s. 4 ; Procop. de Aed. vi. 3.) The reports of modern traveliers, however, do not tend to establish these dangers. (Lauthier, Relazione in Della Cella's 1'aggio, p. 214, sqq.) The Greater Syrtis, which was the eastern one, now the Gulf of Sidra, extended from the promontory of Boreum on the E. side to that of Cephalae on the IV. (Scyl. 46, sq.; Polyb. iii. 29; strab. I. c. and ii. p. 123; Meta and Plin. ll. ce.) According to Strabo it was from 4000 to 5000 stadia in circumlerence (l. c.); but in anotber place (xxi. p. 835) be puts down the measure more accurately at 3930 stadia. Its depth, or laudward recess, was from 1500 to Is00 stadia, and its diameter 1500 stadia. (Comp. Agathem. i. 3, and ii. 14). The smaller, or more western Syrtis (now Gulf of Cabes), was formed on the $\mathbf{E}$. by the promontory of Zeitha and on the $W$. by that of Brachodes. (Scyl. P. 48; Polyb. i. 39, ii. 23 , xii. 1; Strab. ii. p. 123 , iii. p. 157, xvii. p. 834, \&c.) According to Strabo it had a circumference of 1600 stadia and a diameter of 600 (comp. Agathem. l. c.). Particulars respecting the size of both will likewise be found in Mela i. 7; and Itin. Aut. p. 64. sqq. The shores of both were
inhnspitable, and sandy to such a degree that men and even ships were often overwhelmed by the huge cloud-like masses lifted by the wind (Diod. xx. 41; Sall. Jug. 79; Hirod. iii. 25, 26, iv. 173; Lucan, ix. 294, sqq.); and it is affirned by modern travellers that these descriptinns of the ancients ane not exaggersted. (See Browne's Travels, p. 2s2: Bruce, Travels, iv. p. 458 ; Beechey, Expedition, of. ch. 10; Ritter, Evrdkunde, i. p. 1030 ) [T.11.1.]
SYSpllil'TlS (Evantpïts, Strab, xi. p. 5033), a district in Armenia Majar.
[T.H. D.]
Sythas. [Achall, p. 13, b.]
T.

TAANACII (అavák and @avaá $)$, a town in Palestine, not far Irom Megiddlo, with which it is generally mentioned, was originally one of the royal cities of the Canaanites. (Josh, xii. 21; Judyes, v. 19; 1 K̈ings, iv. 12.) It was assigned to Manasseh (Josh. xvii. 11), but was afterwards one of the cities given to the Leviles. (Josh, xxi. 25.) "Taanach by the waters of Meziddo" was the scene of the great battle of Deborah and Barak. (Judges, v. 19.) In the time of the Judges the Canaanitish inbabitants still remained in Taanach (Judges, i. 27), but in the reign of Solomon it appears as an Israelitish town. (1 Kings, iv. 12.) Eusebius describes it as 3 Ruman miles, and Jerome as 4 Roman miles from Legio, which is undonbtedly the Megiddo of Scripture. [LEgio.] Taanach is still called $T a^{\prime}$ annw $k$, a village standing on the slope of the hills which skirt the plain of Esdraelon towards the nouth. (Robinson, Bibl. Res. vol. ii. p. 316, rol. iii. p. 117, 2nd ed.; Stauley, Sinai and Pulestine, p. 331.)

TABAE (Tá6ar: Eth. TaEinvós), a town whicb, according to Strabo (xii. p. $5 \%$ ), wae situated on the ennfines het ween Phrygia and Caria, and which, in another passage (p. 576), he evidently inclades in Phrygia. The country was situated in a plain which derived from the town the name of $\Pi$ हס $\delta$ lov Ta6nvóv. (Strab. xii. p. 576.) S:ephanus Byz. (s.v.) on the other hand calls Tabae a Lydian town, though he at the same time mentions anuther in Caria; but it is bighly probable that not only both are one and the sane town, but also the same as the one assigned by Strabo to Phrygia, and that in point of fact the town was in Caria near the confines of Plarygia. Mythically the name of the place was derived from a hero Tabus, while others connected it with an Asiatic term tába, which signified a rock. (Steph. B. l.c.) The latter etymology is not inconsistent with Strabo's account, for though the tuwn is described as being in a plain, it, or at least a part of it, may have been built on a rock. The plain contained several other little towns besides Tabae. Livy (xxxviii. 13), in his account of the expedition of Manlius, states that he marched ia three days from Gordiutichos to Tabae. It must then have been a considerable place, for, baviug provoked the hootility of the Romans, it was ordered to pay 20 talents of silver and furmish 10,000 medimni of wheat. Livy remarks that it stood ou the borders of Pisidia towards the shore of the Pamphylian sea. There can be no doubt that D'Anville is correct in identifying the modern Thaous or Daras, a place of some note north-east of Moglah, with the ancient Tabae. Col. Leake (Asin Minor, p. 153), relying too implicitly on Strabo, looks tou far east for its site; for Hierucles
（p．6i89）distinctly enmmerates it mmot the Carian towns．Davas is a large and well－built town，and the eapital of a considerable distriet ；the gavernon＇s residence stands on a height overhoking the town， and commaming a most magnifient view．（lichter， Whllfuhrten，P．543；Fisuz，Funf Inschriften，1）． 30．）

It should be cabserved that Iliuy（v．27）mentions tumber town in Cilicta of the name of Tabae，of which，however，nothing is known．
［L．S．］

COIN OF TABAE．
TABALA（Tába入a）a town uf Lydia near the river Hermas，is known only from coins found in the country；but it is ne dotht the same as the one mentioned by llierncles（ p .670 ）under the name of （iabala，which is perhapsendy miswritten for Tahala． It is even possible that it may be the town of＇Tabae Which Stephanus Byz．assigns to Lydia．Some trace of the ancient phace seems to be preserved in the name of the village Toubaili on the left bank of the Hermus，between Adaliz and Kıula．
［L．S．］
TABANA（Tábava，Ptol．iii．6．\＄6），ia place in the interiur of the Chersonesus Tauricit．［T．II．D．］

TABASSI（TáBaaroi，I＇tol．vii． $1 . \S$ 6．5），a trilie of I dians，who ocmpied the interior ot the asuthern part of IIimdastin，in the neighbourhool of the present prowince of $\mathrm{N}_{\mathrm{y}} / \mathrm{s} \boldsymbol{m}$ e．Their eanct puntion rannot he diterminel，hut they were not far distant from 1\％．Belligo，the must S ．of the IV．Gheits． Tley derived their name from the Sanscrit Topasja， ＂words，＂（L．wsen，Ind．Alterth．wol．i．p．243．）［V．］
TABERNAE，in Gallia，is phaced by the Itinera－ rias lutween Norionagus（Speier）and Saktio（Seltz）． The pusition of Tabeenae is supposed to correspond t＂that of Rheinzabern．Tabemae is mentioned by Ammiuus Marcellinus（xvi，2），unless in this pas－ saue he means another place（No．2）which has the sume name．

2．Between Argentoratum（Strassburg）and Divo－ larum（ $11+t z$ ）is Flsatz－Zubern，or Sarerne as the Freneh call it，which is abut 21 miles from Strass－ burg．This scems to be the place which Ammianns （xvi．II）calls Tres Tabernale．When Juhati was barching against the Alcmanni，who were enceanped ypar Argentoratum，he repaised Tres Taburnate，for ther purpose of preventing the Germans from entering Gallia by thin gass in the loosgrs．Ambiames（xys． 12）also gives the distance from Tree Taberlaw to the German campat Arechtoratum at I4＂lengac，＂ which is 21 Roman miles，and agrees very well with the distance betneen Sucerne and Strassburg（1）An－ ville，Nufice，sto．）．

3．Tibernace is mentioned hy Anmmius（1／nsellit， v．s）on the road lutwern limgitum（Siagen）tuad Novimascua（．Vitmatgon）：lint the groglapliets are
 bcrn，a plare which is nut of the way，Buldenan，or Bernetustel on the Shesel．Ansonitus says there is a spring there：－
＂Iractereo arentem sitientihus undique terris
Dumaisoum dizuaspue peremi funte Tabertans．＂
［G．L．］

TLCAPE：
TABIE＇N1（TaEmpni，Ptel．vi．14．§ 11），n people in the N．part of Scythia，on this side of the Inaus．
［T．II．D．］
TABIl：＇NI．（Taeinvoi），an Acthiopian tribu， situated NW of the lepgis Troglolytica，near the healland of Bazium（Rus－el．Naschof），mentimard by I＇toleny alone（iv．27．§ 2Q）．［W．B．1）．］

TABLAE，in Gallia，is marked in the Table le－ tween Lagdurnon B．atavoram（Leiden）and Nuvio－ magns（Jymegen）．D＇Anville and ethers suppore it to be Albless，a little nbeve the junction of the Leck：and the Haas，and opposite to Hort．［G．L．］

TABOR，a celebrated mountain in Galilee，ealled by the Greck writers Atabyrium，under which name it is described．［ATabramem．］

TABRACA．［Thasbaca．］
TABUDA，or TABULLAS in some editions of Ptelemy（ii．9．§3），a river of North Gallia．The mouth of this river is plaed by Ptolemy betweon Gesoriacum（Bonlogne）and the month of the Musa （1／aas）．In another passage（ii． $9 . \S 9$ ），nfter fixing the pusition of the Menini，whase towns were Giesa－ riacun and Taruanua，he adds，＂Then after the Tabullas are the Tungri．＂All these indications seem to show that the Tabuda or Tabullas is the sichelfle，which would he correctly placed between the Morini and the Tungri．Ortelius，cited by D＇Auville and others，is sail to lanve producal evidence from writings of the mildle nges，that the Schelde was named Tabul and Tabula．［G．L．］

TABURNU＇S MoNs（Monte Taburno），was the name civen in areient times to ene of the mast inn－ portant mountain groups of the Apennines of Sum－ niun．It is situated nearly due W．of Beneventum， between the valley of the Calor（Calore）und that of the stnaller strean of the lselerv．Like the still more elevated mass of the Monte Matese，which fronts it on the N．，it forms no part of the main chain of the Apennines（if that ho reckened，as usual，by the Jine of water－shed），but is censiderably advanced to－ wards the W．，and its W．and NW．slopes consequently descend at once to the broad valley or plain of tho Vulturms，where that river reccives its tributary the Calor．It is evidently these slopes and underfalls to which Virgil alludes as affording $n$ Gavonable fielid tor the endivation of olives（Vire，Geory，ii． 3N：Vib．Sequest．p．33），with which they are coverel at this day．Iht in athother paskage he alludes to the＂lotty Tabumas＂as covered with forents，whith alfurded pasture to extensive herds of cattle：（Id．Aen．xii．715．）Gratius Faliseus also spuaks of it as a mugged mad rocky group of moun－ tatius（C＇ynegrt．509）．We lean from that writer that it was included in the territory of the Caudine Samitis［Catomini］，and indeed the celebrated prass of the Candine Forks was at a very short dis－ tance from the foot of Momut Tabarmas．The name of ．1／oute Tabumo or Tituro is still comnumly ap；－ plied to the whole group，thongh the differeut sum－ mits，like those of the Matese，have each their peculiar name．
There is no ground for reading（as has been sug－ gested）Tásupvov úpos for Aibupvov úpos，in P＇oly－ bius，iii．100）；the monntain of which that suthor is speaking most have been stluated in quite a dif－ fercut part of Italy．
［E．H．B．］
TACA1＇E（Taкd́m力 or Kánク，Ptol．iv．3．§ 11）， a town in the Roman province of Afriea，in the Regio Syrtioa and in the innermost part of the Syrris Minor．The surrounding country is represented by 1＇liny（xvi．27．s．50，aruiu．22．s．51）as exocedingly
fruitful, but its harbour was bad. (Geogr. Nul). Clim. iii. pt. ii. p. 87.) In early times it was subjeet to Byzacium; but subsequently, as a Romam colony, belonged to the Regio Tripolitana, of which it was the most westerly tuwn. In its neighbourhood were warm mineral springs called the Aquae Tacapitanse (Itim. Ant. 1. 78), now El-Hammah. (Cf. Plin. v. 4. s. 3 ; Itin. Aut. pp. 48, 50, 59, \&e., where it is called Tacapae). Now Gechs, Cabes, or Quâbes.
[1.H. 1.]
TACARAEI (Takapaiot, Ptol. vii. 2. § 15), a mountain tribe of India extrat Gangem, who lived in the extreme NW. near the junction of the hnaus and Emodus chains, adjoining the Mons Bepyrrhus. They must have occupied purt of the district now called Assom.
[V.]
TACHOMPSO (Taxо $\downarrow \dot{\omega}$, Herod. ii. 29; 1acompsus, Plin. vi. 29. s. 33 ; Mela, i. 9. § 2), a tuwn in the Regio DJdecaschoenns, S. of Aegypt and the Cataracts. It stood upon an island of the Nile, and was inhabited by a mixed colony of Aegyptians and Aethiopians. The Coptic word Tachempsa signifies "the place of many crocodiles." Tachompso was seated no the E. bank of the river, lat. $23^{\circ} 12^{\prime} \mathrm{N}_{\mathrm{t}}$, nearly opposite the town of Pselcis. As Pseleis inereased, Tachompso declined, so that it at last was regarded as merely a suburb of that town, and went by the name of Contra-Pselcis. Thoughsupposed by some to have been near the modern village of Conzo in Lower Nubia, it is impossible to reconcile any kuown lucality with the ancient descriptions of this place. Heeren ( 4 frican Nations, vol. i. pp. 346, 383) supposes it to have been either at the is iand Kalabshe (Talmis) or 20 miles furtber S as Ghyrshe. Hepodotus (l. e.) describes the island on which Tachompso stood as a plain contignous to a vast lake. But neither such a lake nor island now appear in this part of the Nike's course. The lake may have been the result of a temporary invodation, and the island gradually undermined and carried away by the periodical floods.
[W. B. D.]
TACO'LA (Táкàдa, Ptol. vii. 2. § 5), a place on the west coast of the Aurea Chersonesus, in Iodia extra Gangem, which Ptolemy calls an em$p^{\text {nrium. There }}$ cap be no doubt that it is represented now by either Tavoy or Tenasserim. [V.]

TACU'BIS (TakovGis, Ptol. ii. 5. § 7), a place in Lositania.
[T. H. D.]
TADLE, a river on the S . coast of Hispania Tarraconensis. (Plin. iii. 3. s. 4.) It is probably indicated by Ptolemy (ii. 6. § 14) under TépeEios noтаноиิ EкBo入ai. Nuw the Segur'a. [T. H. D.]

TADINUM (Eth. Tadinas: Rn. near Gualdo), a town of Umbria, mentioned by Pliny among the monicipal towns of that region. (Plin. iii. 14. s. 19.) It is not noticed by any other aneient author previvus to the fall of the Western Empire; but its name is repeatedly fonnd in the epistles of Gregory the Great, and it is evidently the same place ealled by Procopius Taginae (Táyıvat, Procop. B. G. iv. 29), near which the (iotbie king Tutila was defeated by Narses in a great battle, in which be was hiinself mortally wounded, A.D. 552 . The site is clearly fixed by the discovery of some ruins and other ancient monuments in 1750 at a place alout a mile and a half from Gualdo, where tbere is an old church consecrated in the middle ages to Sta Mavia di Tadino. Gualdo is about 9 miles N. of Nocera (Nuceria), close to the line of the Flaminian Way: hence there is little doubt that we should sulstitute Tadinas for "l'tanias," a name obviously corrupt,
given in the Jerusalen Itinerary as a station on the Flaminian Way. (Itin. Nier. p. 614; Wesseling, ad luc.; Cramer, Italy, vol, i. p. 267.) [E. H. 1.]

TADMOR. [Palmyid.]
TADU (I'lin. vi. 29. s. 35 ; comp, Strab. xvii. p. 786), a sinall island of the Nile that formed the harbour of the eity of Meroe. Brnce (Travels, vol. iv. p.618) snpposes Tadu to have been the modern Curgo, N. of Schendy As, however, the site of Meroe is mueh disputed, that of Talu is equally mucertain (Ritter, Erelknd, vol. i. p. 567). [W. B.D ]

TAE'NARUM (Taivapov, Herod. Strab. et alii; $\dot{\eta}$ Taw at the extremity of Laconia, and the most sontherly point of Europe, now called C. Matapan. The name of Taenarum, however, was not coofined to the extreme point bearing the name of Matapuin. It bas been shown by Leake that it was the name given to the peninsula of circular furm abont seven miles in circnaference, which is connected with the end of the great Taygetie pronontory by an isthmus about half a mile wide in a direct distance. Hence Taenarnm is correctly described by Strabo as an àкт̀̀̀ érкєt $\mu$ év (viii. p. 363). Letake conjectures with great probability that Matapin is merely another form of Mí $\omega \pi \pi \nu$, whicb may bave bsen the name given by the apcients to the southern extremity of the Ireniasula. (Morea, vol. j. p. 301.) On either side of the isthrnus, which connects the promontory of Tacoarum with that of Taygetus, is a bay, of which the one on the east is called Porto Quaglio, corrupted into Kaio, and the one on the west Marinari or Marmari. The name of Quaglio was given to the castern bay by the Venetians, because it was the last place in Europe at which the quails rested in the natumn before crossing over to Crete and Cyrene. Forto Quaglio is one of the best harbonrs in Laconia, being sheltered from tho S. and SE.; it is nearly circular, with a narrow entrance, a fine sandy bottom, and depth of water for large ships. Porto Marmairi is described as only a dangerons creek. In the Tacearian peninsula there are also two ports on its tastern side, of which the northern, called Vathy', is a loog narrow inlet of tbe sea, while the southern, called Ascimuto or Kistérnes, is very small and ill sheltered. A quarter of a mile southward of the inner extremity of the last-mentioned port, a low yoint of rock projects into the sea from the foot of the mountain, which, according to the inhabitants of the peninsul:a, is the real C. Matapin. The western side of the peninsula is rucky and larbourless.

Tbe whole of the Taenarian peninsula was sacred to Poseidon, who appears to have succeeded to the place of Helios, the more ancient god of the locality. (Hom. IIymu. in Apoll. 411.) At the extremity of this peninsula was the temple of Poseidon, with an asylum, which enjoyed great celebrity down to as late period. It seems to lave been m ancient Acbaean sunctuary before the Dorian conquest, and to have contimued to be the chief sacred place of the Periocei and Ilelots. The great earthquake, which reduced Sparta to a leap of ruins in B. C464, was suppoused to have been owing to the Lacedaemonians having torn away some suppliant Heluts from this sanctnary. (Thuc. i. 128, 133; Pans, iii. 25. § 4 ; Strab. viii. p. 363; Kurip. Cyel. 292.) Near the sanctuary was a cavern, throngh which Hercules is said to have dragged Cerberns to the upper regions. (Paus. Strab. ll. cc.; Pind. Pyth. iv. 77; Taenariae fauces, Virg. Gcory. iv. 467;

Ticntorus aperte umbris，Lucan，ix．36．）There is a slight differenee between Strabo and 1＇ancuias in the position of the cave；the furmer placins it near the temple，which aurees with present appear－ anmers（see below）；the latter describing the cave it－ melf ：as the temple，before which stood a statue of P＇osedon．Anong the many dedicatery offeringes to I＇oscilon the most celebrated was the brazen statue of Arion seated on a dolphim，which was still extant in the time of Pansanias．（Herod．i．23，24．）The tomple was plandered for the first time by the Aetulians．（1＇olyb，ix．34．）

Tuenarum is said to have taken its name from Thenarns，a sen either of Zens or kearins or Elatus． （1＇ans．iii．14．§2；Stepl．B．s．e．；Schol．ctel Apoll． Rhoul．i．102．）Buchart derives the word from the 1＇luenician tinar＂rapes＂（Gexyruph．Sacra，p．459）； and it is not improbable that the 1＇hoenicians may lave had a settlement on the promontory at an early ［netiond．

I＇iusanias（iii．25．§ 4）mentions two harbours in comnection with the Taenarian promontory，called iespectively Psamathus（ $\Psi$ aua日oos），and the 11 ar－
 （p．17）allso meations these two harbours，and de－ seribm then as situated back to back（d$\nu \tau i \pi v \gamma o s)$ ． Strabo（viii．p． 373 ）speaks of the former of these two harbours under the name of Amathes（＇A $\mu \mathrm{c}$－ Hous），but omits to mention the llabbonr of Arhilles． It would appear that these two larhours are the Porto Quaglio and the port of l＇athy mentioned above，as these are the two most important in the perinsula．Leake identifies I＇samathus with Quaglio， anil the Ilarbour of Achilles with I＇athiy，but the French Commission reverse these positions．We have，however，po doubt that Leake is correct；for the ancient remains abuve the Porto Quaglio，the momantery ou the lieights，and the cultivated slopes and levels，show that the Taenarian population las in all ages been chiefly collected liere．Moreover， for ancient writers speak of a town in connection with the Harbour of Achilles，while Strabo aud uthers describe Amathus or Psamathus as a mónis． （Steplı．B．s．c．Yaua日oús；of．Aeschin．Ep． 1 ；Mliu． iv．5．s．8．）If we were to take the description of sicyldx literally，Pramathus would be Forto Quaglio， and the Harbour of Achilles Porto Marmari；and accordingly，they are so identified by Curtius ；but it is imposible to believe that the dangerous creek of Marmuiri is one of the two harbours so specifically mentioned both by Scylax and l＇ausaaias．

The remsins of the celebrated temple of Poseidon still csist at Ascimato，or Kistirnes，close to $C$ ． Matapuin on the rastern side．They now form pait of＇a ruined church；and the anciont llellome wall maty be triced on one side of the church．Lake ubereres that tho churrh，instead of facing to the cont，as tireck churchos usually do，faces sunth－ rastward，towards the head of the port，which is likely to base lieen the aspect of the temple．No menains of columis have been fonnd．A few paces north－east of the church is a large grotto in tho ruck，which $a_{1}$ pears tis be tho eave throngh which Heremes was supprowd to have dragged Cerberus； but there is no ：upharance of any subterrancan descent，as had been already remarked by l＇ausatias． In the neighbourbond there are several ancicit cisterns and other remains of antiquity．

There were celebrated marble quarries in the Taemarian peninsula．（Strah．viii．p，36\％）l＇luy deseribes the Taenarian mable as black（xxari．

18．s．29，22．s．43）；but Sextus Etopiricus（Iyrrh． Hypout．i．130）sposks of a specirs that was white when broken to pieees，though it appeared yellow in the mass．Leake inquired in vain for these quarries．

At the distance of 40 stalia，or 5 English miles， north of the isthmus of the Facmanain peninsula， was the town Tasnaliem or Tavanevs，subse－ quently called Cabexerolis．（Kavijtods，l＇ams． iii． $25 . \$ 9$ ；Kayri， 1 ＇tol．iii． $16 . \$ 9$ ；Plin．iv． 15. s． 16 ；Steph．B．s．v．Taipopos；the sane tuwn is probably mentioned by Strab，viii．p． 360 ，under the corrupt form Kıvaioiov．）It contaned a temple of Demeter and another of Aphrodite，the latter near the sea．The modern village of Kypdrisso stands on the site of this town．sume ancient remains and inscriptions of the time of the Aatonines and their successors have been found here．On the door－posts of a stmall ruined church are two in－ scribed quadrangular $\sigma \tau \hat{\eta} \lambda a t$ ，decorated with mould－ ings above and below．One of the inscriptions is a decree of the＇raenarii，and the other is by the com－ monity of the Eleuthero－Lacones（т̀े кowò̀ тuv
 l＇ausanias（iii．21．§ 7）that Caenopolis was oue of the Eleuthero－Lacoman cities；and it would ap－ pear frum the above－mnentioned inscription that the maritime Laconians，when they were delivered from the Spartan yoke，formed a comfederation and founded as their eapital a city in the neiglibourhowl of the revered sanctuary of Poseidon．The place was callod the New Town（Caenepolis）；but，as we Jearn from the inseriptions，it continued to be also called by its ancient name．For the inscrijutions relatiog to Tamarum，see Bückh，Inser．no． 1315 $-1317,1321,1322,1389,1393,1483$ ．（On the topngraphy of the Tamarian peninsula，see Leake， Morea，vol．i．p 290，seq．，Petoponnesiaca，p．175， seq，；Boblaye，Recherches，sfc．，p．89，seq．；Curtius， Pelopomnesos，vol．ii．p．277，seq．）

TAELALI（Tai $¢<\lambda o t$ or Targaגot，Ptol．ii．3．§ 15），a people on the eastern cuast of Britammia Barbara．In their territory was the promontory called Taika入ov そ̌кpov（Ib．§ 5），now Kinneirds Head．
［T．II．D．］
TAGAE（Tayal，Polyb，x．29．§ 3），a town in the northern part of larthia，situated in the defiles of the chain of Labutas，visited by Antiochus in his war against Arsaces．It lans been conjectured by Forbicer that it is the same place as Tape，montioned hy Strabo（xi．p．508）as a royal palace in the ad－ jawent province of Hyreania；but this conjecture semus unnceessary．l＇erlangs it may be represented by the present Jameghun．
［ $\mathrm{V}:]$
TA（iALA（Täyapa，Peripl．M．Erythr：§ 51 ， ed．Miller；1＇tol．vii．1．$\$ 82$ ），one of the two principal calporia of the interior of the Ieccan，ac－ cording to the author of the Periplus．It is not certain what modern town now represents this ancient sito，but there is a fair presumption in favour of Dcoghtr，which was the seat of govern－ ment down to A．13．1293，and which is now in ruins，cluse to Dowlatalad．（Vincent，Joyage of Nearchus，ii．P．41：3；Maunert，v．1．p． 83 ；kister， Evedk．v．p．513：Bergiams＇s Map．）I＇toleny，who places the town in Arlaca，probably copied from tho athelior of the Periplus．It may be remarked that the distance given between liarygaza（Beroach）， 1racthana（rytheun），and Tasara（Deoghir），are pit reconeileable with the uctual position of theso places．
［1．］

TAGASTE．
TALMIS．

TACASTE or TAGESTENSE OPP．（Plin，v． 4．s．4），a town of Numidia，whose spot is now marked by the ruins at Tajilt on the Oued Humise or Sugerast，a tributary of the river Mejerda．（Itin． Ant．p．4．4．）Tagaste is particularly distanguished by having boen the birthplace of St．Augustine． （Ang．Conf．ii．3．）
［T．II．D．］
TAGO＇NIU＇S（Tayúvtos，Plut．Sert．1i），a tri－ butary of the Tagus in Hispania Tarraconensis， either the Tajuaa or Hemares．（Cf．Florez．Fsp． Sugr．v．p．40；［ikert，ii．pt．i．p．389．）［T．H．D．］

TAGORI．［TAGME］
TAGill（Táypot，Ptol．iii．5．§ 25），a people of European Saroatia，on the borders of Dacia，and Irohably identical with the Tuyori of Pliny（vi． 7. s．7）and Jornandes（Get．4）．
［T．H．D．］
TAGUS（Táyos，Ptol．ii．5．§ 4），ono of the principal rivers of Spain，being considerably larger tian the Anas and having its sonrces between 31 ．unts Orospeda and 1dubeda，in the country of the Celtiberi．（Strib．iii．Pp．139，152，162．） After a tolerably straight course of upwards of 300 miles in a westerly direction，it falls into the At－ lantic ncean below Olisippo，where it is 20 stadia hroad，and capable of bearing the largest ships．It was navicable as far up as Moron for smaller ves－ sels．According to Strabo，at flood tides it over－ flowed the country at its mouth for a circnmference of 150 stadia．It was celehrated for its fish and oysters（Srrab．ib．；Mart．x．78），and likewise for its gold sand（1＇lin．iv．22．s． 35 ；Mela，iii． 1 ；Ca－ tull．xx．30；Ov．Met．ii．251，\＆e．）；of which last， however，so little is now to be found that it hardly repays the atnphibious paupers who earn a pre－ canious living by secking for it．（Ford＇s Mand－ book of Spain，p．487；Dillon，i．p．257．）The Taronius alone，is named as a tributary．The Tagus is still called Tajo in Spain，Tejo in l＇ortugal．（Cf． Liv．xxi．5，xxvii． 19 ；Plin．iii．3．s． 4 ，viii． 42 ．s． 67：Sen．Thyest．352，\＆ce．）
［T．H．D．］
TAHPA＇N1s or TEHAPHE＇NES（Jeven．sliii． 7，xliv． 1 ；Ezek．xxx．18；és Táqvas，1．NX．），is supposed to be the same place with the Daphne of P＇elusinm of the Greeks．It was the seat of a gar－ rison ander the native and the Persian kings of Aecypt（1lerod．ii．30），and was probably a place of considerable strength and importance，since it com－ manded the high road to Syria（Stral．xvii．p．802）． Accorling to the Hebrew writers，Tahpanis was also occasionally a rayal residence in Pharaonic times．In the reign of Psammitichus（n．c．670， foll．）the troops quartered at Talipanis，in common with the rest of the native Aeryptian army，offended by the King＇s favour to his Carian and Greek mer－ cenaries，abandoned their country，and established themselves in the Recrio Dodecaschoenus S ，of Syene （Diodur．i，67）．From the Itineraries it appears that Daphne or Taliyanis was 16 Roman miles from Pelusium．Tel－defenneh，lying nearly in a direct line between the modern Sola－Keieph and Pelusium， is supposed to be on the site of Talhpanis．［W．B．1）．］
TALABRIGA（ тà Ta入á6pı $\gamma$ a，App．Hisp．73）， a town of Lnsitania，between Eminiam and Lango－ lriga．（Itin．Ant．p． 421 ；llin．ii．5．s．7，iv． 21. 3．35．）Varionsly identified with Cacia，Aveiro， Talovera de la Keyna，anỏ J＇illarinho．［T．H．D．］

TALA＇BROCA（Ta入afpoik $\eta$ ，Strab．xi．p．508） one of the four principal towns of Hyrcania noticed by Strabo．It is perhaps the same place that is ealled Tambrax by Polybins（x．31）．lis site cannot naw be identif．ed．

TALACO＇RY（Tarák $\omega \rho$ ，Ptol．vii．4．§ 7），a part on the north－western side of the ishand of Taprobane or Ceylon．It is described as an em－ porium，and has，probably，derived ita name from the promontary of Cory，which was opposite to it， on the mainland．It appears to have been also called Aacote（＇Аакठ́r $\eta$ ）．
［V．］
TALADUSIl（Ta入aסov́atot，Ptol．iv．2．§ 17），a people in the north purt of Manretanin Chesari－ ensis．
［T．H．D．］
TALAEUS MoNS．［Tallaeve．］
TALAMINA（Taxauiv $\eta$ ，I＇tol．ii．6．§ 27），a town of the Seurri in Gallaecia．［T．H．D．］

TALARES（Tá入apes），a Molossian people of Epeirus，extinct in the time of Strabo（ix．p．434）．

TALAURA（Tádaupa），a mountan furtress in Pontus to wbich Mitbridates withdrew with his most precions treasures，which were afterwards found there by lacullus．（Dion Cass．xxxv．14； Appian，Mithr．It5．）As the place is not men－ tioned by other writers，some suppose it to have been the sanue as Gazinra，the modern Tourkhal which is percbed upon in lofty isolated rock．（11．t－ milton，Researches，vol．i．p．360．）［L．S．］
 in the interior of Pisidia，noticed only by P＇tolemy （v． $5 . \S 8$ ）．
［L．S．］
TA＇LETUM．［Laconia，p．108，b．］
TAL1A（lin．Ant．p．218），or TAL1ATA（Not． Inp．），erroneonsly called Tavátus by P＇tolemy（iii． 9．§ 4），Tabata by the Geogr．Rav．（iv，7），and Faliata in the Tab．Peut．A place in Upper Moesi：a， between Novae and Egeta．Variously identified with Tatalia，Göyervisinlik，and a place near Alt Porecs．
［T．H．D．］
TALICUS，a river of Seythia intra lmaum． （Amrn．Mare．xxiii．6．§ 63．）
［T．H．D．］
TALLAEUS or TALAEUS MONS（Bïckh， Corp．Inser．Graec．vol．ii．p．423；Hesych．s．v．）， the station of Talus，the mythical man of bronze， and the gnardian of the ishand of Crete．The well－ known inscription which deplores the loss of Artemis， the chatste wife of Salvius Menas，is now buried hy the mass of earth and stones beaped up at the en－ trance of the stalactitic cavern of Melidhomi．This grotto，memorable in modern times for the massacre of the Cretan Christians by the Mohatmedans，is identified from the inseription with the spot where in ancient times human victims were presented before the statue of Talus．（l＇ashley，Truvels，vol． i． $\mathrm{Pp} .126-139$ ．）
［E．B．J．］
TALMEN（Ta入 $\mu \dot{\eta} \nu$, Arrian，Indic．c．29），a port of Gedrosin at which the fleet of Nearehus fonad a secure harbour．It is not clear what place now may be identitiod with it，and different geo－ graphers have held different opinions．Vincent （Voyage of Nearchus，i．p．271）tbinks it is the bay formed by the month of a small river called by Itolemy Candriaces or Hydriaces（vi．8．§ 8）．It was probably elase to the modern town，Chenbar Tiz and Purug．（Cf．Gusselin，iii．p．148．）［V．］

TALMIS（It．Anton．p．I61；Olympiodor．ap． Photium，p．62，ed．Bekker），a town in the legio Itolecaschoenus，S．of Philae，from whieh it was five days＇journey distant，situated in lat． $23^{\circ} 30^{\prime} \mathrm{N}$ ．， and consequently immediately under the tropic of Cancer．Tahnis stoxd on the wentern bank of the Nile，and is represented by the modern Kalabsche． The Libyan hills which riso immediately belind the town afforled ：un inexhaustible supply of materials for buiding，and the uncient quarries are still visible
in their sides. The ruins of Tabnis are of surpassing juterest, and comparatively in anod preservation, probably beeause, being excavated in tho sandstone, they escaped mutilation or destruction by the l'ersians. The principal structure was a rock-temple at the foot of the hills, dedicated, as appears both from a hieroglyphical and a Greek inscription, to a deity named Mandulis or Malulis, a son of lsis. His mythical history is exlibited on bas-reliefs. But the sculptures at Talnis are of the highest interest, both as works of art and as historical moauments. Their execution is the werk of various ages: sume, as appears by their rude forms, asceadiog to a remute antiquity, others, as those in the temple of Mandulis, being of the best days of Aegyptian art. The temple wrs tounded by Amuaoph II., was rebuilt by oue of the I'tolemies, and repaired in the reigns of the Caesurs, Augustus, Culigula, and Trajan. The subjects of these scuiptures represent partly the trimuphs of the Pharabhs, and partiy the tributes exacted by them from the coaquered. Un one wall is the wartior in his chariot putting to flight bearded men in shout garments, armed with bows and arrows, and a sickle-shaped knife or sword. In another compartment the cenqueror is in the act of putting his captives to death. Another represents the booty obtained after a victory, and, besides the captives, exhibits the spoils taken, e. g. lien-headed and lienclawe! chairs; knives, loaves, sandals, skins of auinals, \&e. These sculptures illustrate also the natural history of S . Aethiopis. They coutain figures of lions, antelopes, and bulls, greyhounds, giraftes, ostriches and monkeys. The giraties and oatriches point elearly to a country southo of the utnoust limit of Aoryptian dominion, and seem to indicate wars with the Garanantes and the kingdom of Bornoo. Heroulotus (iii. 97) mentions ebony wood anoug the articles of tribute which every three years Acthepia offored to the Persian king. Elhony as well as ivory, a product of the interior of Libya, appoars on the w.alls of the temple of Manitulis. A coluured facsimile of these sculptures is displayenl in one of the ro.nns of the British Museum. At a short distance from Talmis stood another temple of scarcely interior interest, and the sproco between is covered with heaps of earth and fragments of pottery, mixed with human lumes and bandages that have been steeped in bitn-men- the evident traces of a large necropolis. At Talmis has been also discovered an inscription in the Greek language, supposed to be of the :Ige of 1hocletian, in which Silco, king of Aethimpia and Nubia, commemorates his victories over the Blemmyes. The wealth of Talmis, apparent in its sculptures, was donbtle-s in great measure owing to its pasition as at commercial station between Acgypt and Aethiopia, but partly also to the emerald mines in its aciglibourhoos. In the fifth century A.D., the lown and its neighbeurloond were occupied by the Bleminyes, who had a regular goverument, since they hall chiefs of tribes ( $\phi \cup \lambda \alpha \rho^{p} \chi^{o r}$ ) and were celelrated for their skill in divination. (Olympiodor. ap. Phatiom, p. 62.)
[W. B. D.]
TALUBAYH (Ta入ou8de, Ptol. iv. 6. § 25), a town of Gaetulia, in the NW. of Libya Interior, jerhaps the modern Tufilet.
[T. II. D.]
TALLCPAE, a tribe of India extra Gangem, mentioned by pling (vi. 19. 8. 22). They were probably seatel beyond the Brakmaputra, in the mountains of Birmah. Sollig, in his recent ellition of Pliny, bas given the name as Thalutae. [V.]

TAMARA (Tapapn, Piol. ii. 3. § 30), a town of

TAJILATIIS.
the Dumnenii, at the SW, extremity of Britannia Romana, at the month of the Tamarus. Now Tamerton near I/ymouth. (Camden, p. 25.) [T.1f.1)]

TAMAlilCl, a Gallaecian tribe on the river Tanaris in Ilispania Taraconensis. (Plin. iv, 20. s. 34; Mela, iii. 1.) According to Pliny (xxx. 2. s. 18) there were certain noted springs in their territory, which are undoubtedly the same described by Florez (Cantabria, p. 4) near the hermitage of S. Juan de fuentas divinas, 12 'spanish miles E. of Leon, and 5 N . uf Saldanna. (Cf. Ukert, ii. pt. i. p. 302, nute 80.)
[T. H. D.]
TAMARIS (called by I tolemy, Taud $\rho \alpha$, ii. 6. § 2), a small river of Gallaecia in Hispania Tarraconensis, which falls into the Atlantic ocean by tbe port of Ebera, between the Minius and the promontory Nerium. (Mela, iii. 1.) Now the Tambre. [T.IL.D.]

TAMARUS (Tamaro), a river of Samtium, which falls into the Cator (Calore), about 5 miles above Beseventum. Its name is known only from the Itinerary of Antoninus, which places a statien "super Tamarum fluvium" on the road from Bovimum to Equus Tuticus. (Lin. Ant. p. 103.) The line of this reall is not rery clear, but the noedern name of the Tamaro lenves no doubt of the river meant. It rises in the mountains near Sam pinum, only a few miles from Bovianum, and fluws with a general direction froun N . tu S . till it joins the Calor as above indicated.
[E. H. B.]
TABAlRUS (Tápapes, Ptol. ii. 3. § 4), a snall river on the S . coast of Pritunnia Romana, now the Tamur.
[T. H. D.]
TAMASSUS (Ta $\mu a \sigma \sigma b s$, Ptol. v. I $4 . \S 6$; calleal also Tamaseus by Pliny, v. 31. s. 35 , Tauć⿱óos by Constantine Pomphyr. de Them. i. p. 39, und Tamesa by Stutius, Achill. i. 413 ; cf. coins in Eckliel, i. 3. p. ss), a town in the imterior of the islund of Cyprus, 29 miles SW'. of Soloe, and on the road from that place to Tremithus. It lay in a fruitful neighbourhood (Orill, M. x. 644), and in the ricinity of some extensive copper mines, which yielded a kind of rust used in medicioe (Strab, xir. p. 864). It is very probably the Te $\mu \dot{\epsilon} \sigma \eta$ of Homer (od. i. 184; Nitzch, ad loc ; cf. Mannert, vi. 1. p 452), in which case it wonld appear to have been the principal narket fin the copper trade of the island in those carly times. Hence some derive its name from the I'lonenicam word themaes, signityiug smelting.
[T. H. D.]
TAMBRAX. [T.hamRoca.]
TAMESA or TAMESIS (Táue $\sigma$, Dion Cass. sl. 3), a river on the E. coast of Britannia Romana, on which Londiaium lay; thie Thanus. (Caves. B. (G, v. 11; Tac. Aun. xiv, 32.) [T. H. D.]

TAMESIS. [Tamisa.]
TANIIA (Táueia, I'tol. ii. 3. § 13), a town of the Vacomagi on the F. coast of Britannia Barbarb, probably on Loch Tay.
[J. II. D.]
TASILA'THIS (Tauiatıs, Steph. B. s. v.), was a considerable town in Lower Aegypt, situated at the mouth of the Phatnitic arm of the Nile. It is less celebrated in history than its representative, the modern Damiat or Damietta, which, since the era of the Crasades, has always been, antil the rise of Alezanulria in the present century, one of the most populous and commercial places in the Deta. Many antique colunums and blor ks frem the ancient town are built into the walls of the mosques in the modern one. The present Damictta, indeed, does not orcupy the site of Tamiathis, since, according to Abmiferia, the ariginal town of that name was destroyed, ou
account of its exposed situation, and rebuilt ligher up the Nile, about 5 iniles further from the sea. The date of this change of position is fixed by Abulfeda in the year of the Hegira 648 (A.D. 1:51).
[W.1.1).]
TAMNA (Táuva, Strab, xvi. p. i68; Steph. B. s.v.; Tamna, Plio. vi. 28. s. 32 : Єoú ‥ 37; Thomma, Plin. xii. 14. s. 32 : Eth. Tauvitns), a city of Arabia, and the chief town of the Cattabaneis (Catabani), according to Strabo, or of the Gebanitae, according to Plioy. It is described by Pliny as a large commercial town with 65 temples, to which caravans from Gaza in Palestine resorted. It is prolably Sand, the present capital of Yemen.
TAMNUM, in Gallia, is placed by the Itineraries on a road from Burdigala (Bordeavx) to Mediolanum Santonom (Saintes); bnt in the Table the name is written Lamnum. The distance from Blavia or Blarium (Blaye) to Tamnum is svi. in the Itins.; but the distance xxii. in the Table is nearer the truth, if Tallemont or Talnom is the site of Tamnum. Talmon is below Slaye on the right bnok of the Gironde.
[G.L.]
TANILGADIS, a towo in Numidia, on the E. side of Mount Aurasius, and 14 miles NE. of Lutubese. (It. Aut. Pp. 34, 40; Thamugadis, Tab. Peut.) It still retains the name of Temugadi. (Bruce.) Lapie identifies it with Ager Soudah. [T. H. D.]

TAMINAE (Tauival, Strab. et alii; Tapíva, Steph. B. s. v. : Eth. Tapuvaĩos, Tauvveús), a town of Euboea in the territory of Eretria, at the foot of Mt. Cotylseum, with a temple of Apollo, said to have toen built by Admetns. (Strab. x. p. 447 ; Steph. B. s. vv. Táuvva, Korúגaıov.) It was taken by the Persinns, when they attacked Eretria in B. c. 490 (Herod. vi. 101), but it is chiefly memorable for the victory which the Athenians, under Phocinn, gained liere over Callias of Chalcis, B. C. 350. (Aesch. c. Ctes, §S 85-88, de Fals, Leg. Is0: Den. de Pac. 5: Plut. Phoc. 12.) Leake places Tamynac at the village of Ghymnd, at the foot of a high mountain, which he supposes to be the anciont Cotylaem (Ancient Greece, vol. ii. p. 439); but Ulrichs regards Aliceri, where there are several ancient remains, as the site of Tamynae. (Hheinisches Juseum, for 1847. p. 512.)
 10. § 3), a town and promontory of European Sarmatia in the neighhourhood of a lake (Arnian, Per. P. Fux. p. 20), and in the innermost part of the gnlf of Carcinitis, now gulf of Achmeschid or Perekop. Hence, according to Strabo, the Sinus Carcinites was also called tho gnlf of Tamyrace (vii. p. 308). But the coast has undergone such extensive alterations at this part, that all attempts to determine the site of the twwn are nnavailing. Some, indeed, have coutbted its existence, as it is mentioned only by Ptulwng. (Cf. Neurnann, Die IEllenen in SkythenInude. p. 375 ; Ukert, ïi. 2. p. 157 ; Gail, Geogr. M. iii. p. 127.)
[T. H. D.]
TAMYRACES SINUS. [Camerna; Tamyнана.]

TAMYRAS or DAMU'RAS (Tauv́pas, Stmb. xvi. P. 756 ; $\Delta$ auoûpas, l'ulyb, v. 68), a river of Plonenicia between Sidon and Berytos, the modern Nahr-ecl-Dümúr. (Robinsm, Bibl. Res. vol. ii. p. 488, 2ad el.) [Comp. Leantes.]
TANAGER or TANA(iliUS (Tanagro), a river of Lucamia, a tributary of the Silarns. It rises in the mountains near Lago Negro, flows for about

30 miles in a NXL. direction, throogh a hroad and level upland valley called the lalle di Diano, till near La Polla it sinks into the earth, and encrges again through a cavern at a place thence called La Pertusa. Tlis peculiarity is mentioned by Pliny, who calls it "fluvius in Atinate campo," withont. mentioning its name (Plin. ii. 103. s. 106, with Harduin's note) : but this is known to us from Virgil, who notices it in connection with Mourt Alburnus, wbich rises immediately to the W. of it, and the epithet "siccus" which he applies to it ("sieci ripa Tanagri") donbtless refers to this same peculiarity. (Virg, Georg. iii. 151; Serv. ad loc.; Vib. Seq. p. 19.) There is no doubt, alse, that in the Itinerary we should read "Ad Tanagrum" for "Ad Tanarum," a station which it places on the road from Saleruum to Nerulum. (Itin. Ant. p. 109.) The same Itinerary gives a station "Ad Calorem," as the Lext on this line of route, which seems to show that the river was then, as now, called in the upper part of its course Calur or Calore, while in the lower part it assumes the name of Tanagro or Negro. This part of the runte, howeser, is very confosed.
[E. H. B.]
TANAGRA (Távaypa: Eth. Tava territory Tavaypala, Pans. ix. 22. § 1 , and Tavarpaink' or Tayaypıńn, Strab. ix. p. 404: Adj. Tavayoısós : Grimiulha or Grimóla), a town of Boeotia, sitnated upon the left bank of the Asopus, in a fertile plain, at the distance of 130 stadia fiom Oropus and 200 from Plataeae (Dicaearch. Stat. Gr. pp. 12, 14, ed. Hudson). Several ancient writers identified Tanagra with the Honeric Graca ( $\Gamma$ paia, Hom. Il ii. 498; Lycophr. 644); but others supposeil them to be ilistinct places, and Aristotle regarded Oropus as the ancient Graea. (Steph. B. s. v. Távappa; Strab. ix. p. 404 ; Pans. ix. 20. § 2.) It is possible, as Leake bas remarked, that Tanagra, sometimes writtea Tanagraca, may be connected with the ancient nate Graea, Tana, being an Aeolic suffix, and that the modern natne Grimudha or Grimada may retain traces of the llomeric name. Tanagra was also called Poemandria, and its territory Poenandrix, from the fertile meadows which surrounded the city. (Steph. B. s. v.; Strab. ix. p. 404.) The most ancient inhabitants of Tanagraa are said to have been the Gephyraei, who came from Phoenicia with Cadmus, and from thence emigrated to Athens. (Herod, v: 57; Strab. ix. p. 404). From its vicinity to Attiest the territory of Tanagia was the scene of more than one battle. In n. C. 457 the Lacedremonians on their return from an expedition to Doris, took up: a position at Tanagra, near the horders of Attica, with the view of assisting the oligarelical farty at Athens to overthrow the democracy. The Athenians, with a thousand Argeians and sume Thessalian hore, cressed Mount l'arnes and advanced against the Lacedaemonians. Both sides fought with great bravery; but the lacedacmoniuns gained the victory, chiefly through the treaclierons deserion of the Thessalians in the very heat of the engagement. (Thuc, i. 107, 108; Diod. xi. 80.) At the begining of the fullowing year (13. c. 456), and only sistytwo days after their defeat at Tanagia, the Athenians under Myroniles again in raded Boevtia, and gained at Oenophyta, in the territory of Tanagra, a brilliant and tecisive victory over the Boeotians, which made them mastens of the whole country. The walls of Tanagra were now razed to the gronnd. (Thue, i. 108 ; Diod. xi. 81, 82.) In B. . 426 the Athenians made an incursion into the territory of Tanagra, and
on their return defeated the Tanagraeans and Bonnthans. (Thuc, iii. 91.) Dicaearchus, who visited Tanazrat in the time of Cassander, says that the city stands on a rugged and lufty height, and has a white chalky appearance. The houses are adorned with handsong porticoes and encaustic paintings. The surrounding country does not grow much corn, but produces the best wine in Buentia. Dicaearchus adds that the inhabitants are wealthy but frugal, being for the mont part landholders, not manufacturers ; and he praises them for their justice, good faith, and huspitality. (De Statu Crace. p. 12.) In the time of Augustus, Tanagra and Thespiae were the two most prosperous cties in Buentia. (Strab. ix. p. 403.) Thamatra is callel by Pliny (iv. 7. s. 12) a fice state; it is mentioned by Ptolemy (iii. 15. § 20); and it continued to flourish in the sixth century. (Hierocl. p. 645.) Its public buildings are described at some length by Pausanias (ix. 20. § 3, seq.). The jrincipal temple was that of Dionysus, which contained a celebrated statue of Parian marble, by Calamis, and a remarkable Triton. Near it were temples of Themis, Aphrodite and Apollo, and two of Hermes, in one of which he was worslipped as Criophorus, and in the other as Promachus. Near the latter was the theatre, and probably at no great distance the gymnasium, which contained a picture of Corimna, who was a native of Tanagra. There was also a monument of this poetess in a conspicuous part of the city. Pausanias remarks as a peculiarity in Tanagra, that all their sacred buildings were placed by themselves, apart from the houses of the town (ix. 22. § 2.) He likewise notices (ix. 22. § 4) that Tanagra was funous for its breed of fight-ing-cocks, a circomstance which is mentiuned by other writers. (Varr. de Ne Rust. iii. 9. § 6; Hesych.
 pícou.) Tinagra passessed a considerable territury; athl Strabo (ix. p. 405) mentions four villages belonging to it, Elenn or LIelem, Harma, Mycalessus, and Pharae. (Pherae, Plin iv. 7. s. 12).

The ruins of Tanagra are situated at an uninhabited spot, called Grimádlka or Grimálr, sitnated 3 miles sonth of the village of Skimatari. The site is a large hill nearly circular, rising from the n.rth bank of the Asopus. The upper part of the site is rocky and abrupt, looking down upon the town theneatit; and it was probably upon this upper hecight that the sacred edifices stood apart from the other l.maldings of the town. The walls of the city which Multraced a circuit of about two miles, may still be traced, but they are a mere heap of ruins. Abrut 100 yards below the height already described are the monins of the theatre, hollowed out of the slope On the terrace below the theatre to the NE. are the fommations of a public building, formed of marble of a very dark colour with a green cast. The ground is thickly strewn in every direction with remains of carthenware, betokening the existence of a mumerous 1npulation in foriner times. (Leake. Aorthern

FOIN QF TSNAGRS.

Crecce, vol. ii. p. 454, seq; Wordswarth, Athens and Attica, p. 14, seq.; comp. K. O. Mäller, Orchomenus, p. 20.)

TA'NAIS (Távä̆s, Ptol. iii. 5. § 14, v. 9. §§ 1. 2, \&c.), a famous river, which in the course of time Was miversally assumed as the boundary between Europe and Asia. (Strab. vii. 310, xi. 490; Mela, i. 3 ; scyl. p. 30, \&c.) The older writers of athtiquity thought that it rose from a large lake (Herod. iv. 57 ; Ephor. ap. Anon. Per. P. Eux. p. 4), which is really the case, its source being in the lake Iean Ozero, in the goverament of Toulu; whilst later writers leld that it had its sources either in the Caucasns (Strab. xi. 493; Ammian. sxii. s), or in the lihipaean monntains. (Mela, i. 19; Lucm, iii. 272; Prucop, B. G. iv. 6, \&c.) The last of these hypotheses was most generally accepted; but there was likewise a fourth which made it a branch of the lster (Strab. l. c.). Whilst Strabo, however, adduces these different opinions, he himself holds tbat its source was entirely unknown (ii. 107). It is represented as flowing in so rapid a stream that it never froze. (Mela, l. c.; cf. Nonnus, Dimys, xxiii. 85.) It flows first in a SE. and then in a SW, direction; and after receiving the Ilyrgis (or Srrgis) us a tributary, empties itself into the Palus Miaeotis (Sea of Azof) by two mouths. (Herol. iv. 100.) These mouths, which are at the most northern point of the Palus Maeotis, Strabo places at the distance of 60 stadia from one another (vii. 310), whilst Artemidnrus (ap. Eustath. ad Dion. 14) inakes them only 7 stadia distant. At present, however, the Don has 13 months. (Clarke, Trat: i. p. 423.) The etymology of the name is disens*al by Plutarch (de Flum. 14) and Eustathius (1. c.); but its tive derivation is from the Scythian word Don or Dan, signifying vater, which occurs in the names of other rivers, as Danubins, Eridanas, \&u: (Forbizer, Mnndb. des Alt. Gcogr. p. $325, \mathrm{n} .16$ ) The Tanais is frequently alluded to by the Latiu poets. (Hor. Od. iii. 10. 1 ; Virg. G. iv. 517 ; Or. Ex. Pont. iv. 10, 55, \&c.) Clarke (Travels, i. pp. 339, 448 , note) would identify it with the Danuetz, from the similarity of the name, an hypothesis also accepted by Lindreer (Scythien, p. 66) ; lut there can searcely be a doult that it should be identified with the Don.
[T. H. D.]
TA'NAls (Távaĭs, Ptol. iii. $5 . \S 26$, viii. 18.§5), a town of Asiatic Sarmatia, lying on the more southern mouth and between both mouths of the river of the same name. It may also be deacribed as situated at the northermmost point of the Palus Maeotis, and not far from the sea. It was a flourishing colony of the Milesians, enjoying an extensive commerce, and being the principal market of the surrounding tribes, both of Europe and Asia, who here bartered slaves and skins for the wine, apparel, and other articles of more civilised nations. (Strab. xi. p. 493.) The inhabitants soon reduced a considerable part of the neighbouring coasts to subjection, bat were in turn themselves subdued by the kings of the Bosporus (1d. vii. p. 310, xi. p. 495). An attempt to regain their independence only ended in the destruction of their city by Polemon I. (Id. p. 493), a little before the time when Strabo wrote. Pliny (ri. .. s. 7) speiks of Tansuls as no longer existing in bis time ; but it appears to have been subsequently restured (Ptol. ll. cc.; Steph. B. 1. 633), though it never recovered its fimer prosperity: Clarke (i.p. 415) could discover no trace of it, nor even a prolable site ; but its ruius :ure stuid to exist near the modern Nedrijumha
(cf. Griafe, Mém. de lAc. des Sc. à St. Petersb. vi. Ser. vi. p. 24 ; Stempowsky, Nouv. Jour, Asiat. i. p. 55 ; Böckh. Inscr. ii. p. 1008). [T. H. D.]

TANAI'TAE (Tavaîa九, Ptol. iii. 5. § 24), a people of European Sarmatia, dwelling NE. of the Roxelani, and between them and the Tanais. [T.H.D.]

TANARUS (Tanaro), a river of Liguria, the most important of all the southern tributaries of the Padus. It rises in the Maritime Alps above Cera (Ceba), flows at first due $\mathrm{N}_{\text {, }}$ receives uear Cherasco the waters of the Stura, a strcam as considerable as itvelf, then turns to the NE., passes within a few miles of Polleutia (Pollenza), flows under the walls of Alba Pompeia and Asta (Asti), and discharges its waters joto the Po about 15 miles helow Valenza (Forum Fulvii). It reccives ma y considerable tributaries besides the Stura already mentioned, of which the most important is the Bormida, the ancient name of which has not been preverved to us; hut the $O r b a$, a minor stream which falls into it a few miles above its junction with the Tanaro, is evidently the river Urbs, mentioned by Claudian (B. Get. 555), the name of which had given rise to an ambiguous prophecy, that had misled the Gothic king Alaric. The Belbo, which falls into the Tanaro a few niles abose the Bormida, has been identified with the Fevus of the Tabula; but the names of rivers given in that document in this part of Italy are so corrupt, and their positions so strangely misplaced, that it is idle to attempt their determination. Though the Tanarus is one of the most important rivers of Northern ltaly, its name is not meotioned by any of the geographers except Pliny; nor does it occur in history until long after the fall of the Western Empire. (Plin. iin. 16. s. 20; P. Disc. Hist, Lang. ri. 58.)
[E. H. B.]
TANATIS, according to Sulinas (c. 12), an island in the neighbourhood of Britain. It is undoubtedly the same which Berla (Hist. Eccl. i. 25) calls Tanatos, and which still bears the name of Thanet.
[T.H.D.]
TANATIS. [Talla.]
TANAL'S. [Argos, Vol. J. p. 201, a.]
 Eth. Tanetanas, Plin. : S. Ilario), a small town of Gallia Cispadaus, on the Via Aemilia, between Regium Lepidum and Parma, and distant 10 miles from the former and 8 from the latter city. (Itin. Ant. p. 287 ; Itin. Hier. p. 616 ; Tab. Peut.) It is mentioned in history before the Roman conquest of this part of Italy, as a Gaulish village, to which the praetor L. Manlius retired after bis defeat by the Boii in B. c. 218, and where he was surrounded and besieged by that people. (Pol. iii. $40 ; \mathrm{Liv} . ~ a x i$. 25.) Its name is not again noticed in history, but it is mentioned both by Pliny and Ptolemy as a mnnicipal town of Gallia Cispadana, though it appears to have never risen to be a place of importance. (Plin. iii. 15. s. $20 ;$ Ptol. iii. 1. § 46 : Phlegon, Macrob. 1.) Livy calls the Gaulish town "vicus Pato propinquas," an expression wlich would lead to an erroneuns idea of its position; for we learn from the ltineraries that it certainly stuod on the Yia Aemilis, at a distance of more than 10 miles from the Padus. The site is still occupied by a large village, which is now called, from the name of its principal church, Sant' Ihario; but a bamlet or village about half a mile to the N. still retains the name of Taneto. It is distant ahout 2 miles from the river Enza, the Nicia of Pliny (iii. 16. s. 20),
which flows into the Po, abont 12 miles from the point where it crosses the Aemilian Way. [E. H. B.]

TANIS (Távis, Herod. ii. 166; Strab. xvii. p. 802: Ptol. iv. $5 . \S 52$; the Zoan of the Hebretss, Numb, xiii. 23: the Coptic Taxi or Athexnys, and the modern San), was a city of Lower Aegypt, situated, in lat. $30^{\circ} 59^{\prime}$, on the Tanitic arm of the Nile. [Nilus. Ostium Taniticum.] It was the capital of the Tanitic Nome. Although the nome of Tanis does not appear in Aegyptian annals earlier than the $x x i$-st dynast $y$, which consisted of 21 Tanite kings, it had long previonsly been among the most important cities of the Delta. The branch of the Nile on which it stood was, with the exception of the $\mathrm{Pe}-$ lusiac, the most casterly, and the nearest to Palestine and Arahia. It is described in the Buok of Numbers (l. c.) as fonoded only seven years later than Hehroa; and Hebron, being extant in the time of Alrabam, was one of the oldest towns in Palestine. Tauis owed its importance partly to its vicinity to the sea, and partly to its situation among the Deltaic marshes. It probably was never ocenpied by the Hyksos, but, during their usurpation, affurded refuge to the exiled kings and uobles of Memphis. It was a place of strength during the wars of the early kings of the New Monarchy-the sviiith dynastywith the shepherds; and when the Aegsptians, in their turn, invaded Western Ania, the position of Tanis became of the more value to them. For after Aegypt became a maritime power, in its wars with Cyprus and Pboenicia, a city at no great distance from the coast would be indispensable for its naval armaments. To these purposes Tanis was better adapted than the more exposed and easterly Pelosium. The eastern arms of the Nile were the first that silted up, and the Pelusiac mouth of the river was at a very early period too shallow for ships of war. The greatoess of Tanis is attested in many passages of the Hebrew mriters. In the 78th Psahn the wonders that attended the departure of the Israelites from Aegypt are said to have been "wrought in the plain of Zoan." This Psalm, indeed, is somewhat later than David (b.c. 1055-1015); hut it proves the tradition that Tanis was the capital of that Pharaoh who oppressed the Hebrew people. In the age of Isaiah (xis. 11, foll.), abont 258 years later, Tanis was still reckoned the capital of the Delta, since the prophet speaks of the princes of Zoan and the princes of Nuph (Memphis) as equivalent to the nobles of Aegypt. Again, Isaiah (xxx, 4) describes the ambasisdors who were sent to Aegypt to form an alliance with its king as repairing to Zoan and Hanes, or Heracleopolis; and the desolation of Zoan is threatened hy Ezekiel as the consequence of Nebuchadvezzar's invasion. Tanis probably dcelined as Sais and Memphis rose into importance; yet twenty jears before the Christian era it was still a large town (Strab. xvii. p. 802) ; nor did it shrink into insignibeance until nearly 80 A.D. (Joseph. B. Jud. iv. 13. § 4.) lts linen manufacture probably long sustained it. The marshy gronuds in its environs were well snited to the cultivation of flax; and Pliny (ix. 1) speaks of the Tanitic linen as among the finest in Aegypt.

No city in the Delta presents so many monnments of interest as Tanis. The extensive plain of San is indeed thitly inhabited, and no village exists io the immediate vicinity of the buried city. A canal passes through, without being able to fertilise, the field of Zoan, and wild beasts
nod marsh fever prevent all but a few fishermen from inhabiting it. The mounds which caver the site of Tanis are very high and of great extent, being upwards of a mile from north to sonth, and nearly three quarters of a mile from east to west. The arm in which the sacred enclosure of the temple of P thah stood is about 1500 feet in length by 1250 broad. The enclosure, which is of crode brick, is 1000 feet long and about 700 wide. A gateray of granite or fine gritstone, bearing the name of Ranneses the Great, stands on the northern side of this enclosure. The numerous obelisks and the greater part of the sculptures of the temple were contributed by Rameses. His name is also inscribed on two granite columns ontside the enclosure, ami apparently uncounected with the temple. Thouch in a very ruinous condition, the fragments of walls, columns, and obelisks sufficiently attest the former splendonr of this bnilding. The arebitecture is generally in the best style of Aegyptian art. and the beauty of the lotus-bud and pala capitals of the columns is much celebrated by travellers. Amang the deities worshipped at Tanis were Pthah (Hephaestus), Maut, Mis, Horus, \&c. The Pharaobs who raised these monuments were of varions dyaasties, ranging from the kings of the aviith dynasty to the Aetbiopian Tirhaka The murnerons remains of glass and pottery fond here, and the buge mounds of brick, prove that the civil portions of Tanis were commensurate in extent and population with the religinus. The modern villare of San cansists of mere huts. Early in the present century an attempt was made to establish nitreworks there; hat they have been long abandoaed: and the only occupation of the few inhabitants of this once flourishing city is fishing. North of the town, and between it and the coast of the Mediterraneas, was the lake Tanis, the present Menzaleh. (Wilkinson, Mod. Egypt and Thebes, val. i. pp. 407, 449, foll.; Kearick, Ancient Egypt, vol. ii. p. 341.)
[II.B.D.]
TANUS (Távas, Artemidarus, ap. Steph. B. s.v.), a town in Crete of which there is a coin with the epigraph TANI $\Omega$. (Eckhel, vol. ii. p. 321). [E.B.J.]

TANLS. [Areos, Vol. I. p. 20t, a.]
TA'OCE (Taók $\eta$, Arrian, Ind. c. 39 ; Strab. xv. p. 728), a town or fortress of the district of Taocene, in Persis. It was, according to Strabo, the seat of one of the tliree treasuries of the kings of I'ansia. It is not certain from Arrian's statement Whether be means the town or the district, but frohably the former. The town appears to have inen placed near the river Granis. Ptolemy speaks of a promontory and a town of this name (vi. 4. Sis 2 and 7). It is probable that it is the same Ilace as that called by Al-Edrisi, Toudj or Touj (ii. p. 391, \&e.). Where Dianysins ( 1069 ), enumorating the three palaces, speaks of the Tarkul, w. ourht most likely to read Twkol or Takol, with reference to the people of this district. The Granis is the river of Abushir. [Granis.] [V.]

TA'OCHI (Táoxot), a tribe in the interior of Puntos (sterph. B. s. v.), which is frequently noticed by Xinophon in the Amalasis (iv. 4. § 18). They livel in mountain fortresses in which they kept all their pussessions (iv. 7. § 1, comp. 6. § 5, v. 15. § 17). They ocenpied the country near the fronticrs of Armenia,
[L. S.]
TAPANI'TAF (Tatavital, Ptol. iv. 5. § 21), a people in the interior of Marnarica. [T. H. D.] TAPE. [TAg.aE.]

TAPOSIRIS
TAPHIAE, and more anciently TELEBO'IDES, a number of small islands off the western coast of Grecec, betweea Leucas and Acarnania (Plin. iv. 12. s. 19). also called the islands of the Taphiii or Teleboae (Taфiav, T $\eta \lambda \in$ Gowiv $\nu \hat{\eta} \sigma 0 t$, Strab. x. p. 459), who are frequently mentianed in the Homeric poems as pirates. (Od. xv. 427, xvi. 426.) When Athena visited Telemachos at Ithaca, she assumed the forn of Mentes, the leader of the Taphiars. ( Od d. i. 105.) The Taphians or Telebuans are celebrated in the legend of Amphitryon, and are said to have been subdued by this hero. (Herod. v. 59 ; Apollod, it. 4. §§ 6, 7, Sirab. l. c.; I'laut. Amph. i. 1: Dict. of Bing. art. Ampmithyon.) The principal island is called Taphos (Tá $\phi$ os) by Homer (Od. i. 417), and by later writers Taphiās, Taphiussa, or Taphias (Taф!où, Ta-
 Táфos), now Meganisí. The next largest island of the Taphii was Carnus, now Kilamo. (Scylax, p. 13 ; Steph. B. s. v.; Leake, Northern Greece, rol. iv. p. 16; Dodwell, vol. i. p. 60.) Stephaous B. mentions a towa in Cephallenia, named Taphus, represented by the modern Tafú, where many ancient sepulchres are foond. (Leake, Northern Greece, vol, iii. p. 67.)

TAPHIASSUS. [Aetolis. p. 63.]
TAPHIS (Itin. Anton. p. 161; TaAlis. Ptol. iv. 4. § 17; Támt5, Olympiod, ap. Phot. p. 62, ed. Bekker), a town situated outhe western bank of the Nile, in the Recio Dodecaschoenus, S. of Pbilae and the Lesser Cataract. The ruins of an ancient city have been discovered at Teffah in Lower Nobia, which are supposed to correspond with the ancient Taphis. It was in the neighbourlnod of large stone-quarries. On the opposite side of the river was a suburb called Contra-Tapbis. Both torns in the 5 th century A. D. were occupied by the Blemmyes. [W. B. D.]

TAPHOS [TAPhiaE.]
TAPHRAE or TAPHROS (Td́ppac, Steph. B. p. 642 ; cf. Mela, ii. $1 ;$ Plin. iv. 12. s. 26 ; Tádpos, Ptol. iii. 6. §5), that part of the neck of the Chersonesns Taurica which was cut through by a dyke and fortified (Herod. iv, 3). Iliny and Ptolemy ( 11. cc.) mention a town called Taphrse; and Strabo (vii. 308) also notices at this spot a people called Tá $\varphi p t o$. (Cf. D'Anville, Mém de l.sc. d. Inser. xxavii, p. 581 ; Romell, Geogr. of Herod. p. 96 ; Mannert, iv. p. 291.) Perecop, or Prezecop, the modern name of the isthmus, also signifies in Russian a ditch or eatrenchment. (Clarke, Trav. ii. p. 316.)
[T. H. D.]
TAPHROS. [TAURUS.]
TAPURI, a people of Lusitania. (Plin. iv. 22. s. 25.)
[T. H. D.]
TAPOSIRIS (Tãóreipus, Strab. xvii. p. 799 ; Tambripis, Ptol. iv. $5 . \S 34$; Dioscorides, Mater, Med. iii. 24 ; Tapóripis, Steph. B. s.v.; Tapostris, Tab. Peut. : the Busiri of Leo Africanus), was a town in the Libyan Nome, west of the Delta, and abont 25 miles distant from Alesandreia. There were probably several places of this nane in Aegypt, since each Name would be desirons to passess a "tomb of Osiris." Abulfeda mentions a Busir near Sehennytns, anather in the Arsinoite Nome, the Fyoum; a third at Gizeh, close to the Pyramids. The town, however, in the Libyan Nome appears to have been the most considerable of all, inasmuch as it was the place where the prefect of Alexandreia beld the periodical census of the Libyan Nome. Its market, indeed, was so murh frequented that the emperar Justinian (A.D. 527, foll.) constracted at Taposiris
a town-ball, and public baths. (Procop, de Aedif. vi. 1.) Nearer Alesandreia was a smaller town of
 B. s.v.; ${ }_{\eta}{ }^{2} \mu k \rho a$, Strah. xvii. p. 800.) [W.B. D.]

TAPPUAH or BETH-TAPPUAH, a city in Palestine, upon the mountains of Judah, not far from Hebron, which Rohinson identifies with the ancient village of Teffuh, lying in the midst of olivegroves and rineyards. (Josh. xv. 53; Robinson, Bibl. Res. vol. ii. p. 71, 2ad ed.) There was another Tappuah in the plain of Judah (Josh.xv. 34); but which of these was the phaee conquered by Joshua, cannot be determined. (Josh. xii. 17.)

TAPRO'BANE ( $\eta$ Tampubá $\nu \eta$, Strab. i. 63, xv. 690, Sc.. Steph. B. s. v.; Ptol. vii. 4 ; Plib. vi. 22. s. 24 ; Mela, iii. 77 ; Ov. ex Pont. i. 5. 80), a very latge island, now Ceylon. It is situated to the SE. of the peninsula of Hindostann, and is all but joined to the continent by a reef now ealled $A d a m$ 's Bridge, and by an island called Ramisir or Ramisceram Cor, the K $\hat{\omega} \rho v$ of Ptolemy (vii. 1. § 11) and the Insula Solis of Pliny (vi. 22. s. 24). (Comp. Duneao, As. Res. v. p. 39 ; Ritter, Erdk: vi. p. 63.)

Taprobane was not knewn to the writers of classical antiquity before the time of Alexander the Great, and the various narratives whieh have reached the West subsequent to his invasion of the Parjáb, though often correct as to its natural productions, are singularly erroneous as to its position, its size, and its shape. Thus Onesieritus estimates it at 5000 stadia, though whether this number implies length, treadth, or circumference, is not stated by Strabo (xv. p. 690). If the last, he is nearly correet, Rennell considering this to be about 660 miles. (See Map, and Memoir of India.) He adds that it was twenty days' sail from the continent - the ships being hadly constructed and unfit for sailing ; a view remarkably confirmed by Pliny, who notices the change in the length of the voyage owing to the improved kind of vessels, and the shallow character of the intervening strait (vi. 22. s. 24). Eratosthenes reduees the distance to a navigation of seven days - the same time as Pliny statea (l. c.); but this is far too great (Strab. xv. p. 691), as it is really little more than 50 miles from its nearest shores to the mainland of Hindostan. (Vincent, Yoy. of Nearchus, i. p. 495; Boyd, in Ind. Ann. Regist. 1799.) Eratosthenes is still more erroneons in the position he assigns to the island, for he extends it 8000 stadia in the direction of Africa (Strab. l. c.), while the author of the Periphus M. Erythr. makes it reach almost to the coast of Azania (c. 61, ed. Mïller) - an error which has probably led to that of Edrisi, who has ennfuunded C. Comorin with Madagascar, and in his map has even placed this island to the E. of Ceylon. Strabo supposes that Ceylon is not less than Britain (ii. p. 130), and Ptolemy gives it a length of more than 1000 miles, and a breadth of more than 700 (i. 14. §9, viii. 28. § 3). (Compare with this the statement of Marco Polo, which is, as to cireumference, identical with Ptolemy, l.c.; and Caesar Frederick, ap. Hackluyt's Voy. ii. pp. 225-227.)

The history of aneient Ceylum falls naturally into three beads: 1. What may be gathered from the writers who followed the march of Alexander. 2. What we may learn from tho Roman writers. 3 . What may be obtained from the Byzantines.

Of the times preceding the invasion of India by Alezander we have no distinct notice in classical history; yet it may be inferred from Pliny that some report of its existeace had reached the West,
where ho states that it had long been the opinion that Taprobane was another world, and bore the name of Antichthonas, but that it was determined to be an island about the aera of Alexander (vi. 22. s. 24): while it is not impossible that Herodotus may have heard some tradition on the subject, since be states that cinnamon is produced in those coantries in whieh Dionysus was brought up (iii. 111); from which passage, however, it cannot be determined whether the trae cinnamon, that is the bark of the shrub, is intended, or some other kind of cassia.

To the first class of writers belong Onesicritus, the companion of Alexander, Megasthenes and Daimaehus, who were sent as ambassadors by Seleucns to Sandrocottus (Chandragupta) and his son Amitrochates (Amitraghita), from whose memorials almost all that is preserved in Strabo and in the earlier portion of the notice in Pliny has been taked. There is no reason to snppose that either Onesicritus or Megasthenes themselves visited this island; they probably colleeted, while in India, the narratives they subsequently compiled.

The second class of writers are of the period when the vast commerce of Alexandria had extended to India subsequent to the death of Strabo, A. D. 24. (Groskard, Proleg. in Strab. i. p. 16.) Previous to this period, some few ships may have reaehed India from Egypt; but, from Stra6o's own statement, they appear to have been those only of private individuals (l. c.). Pliny, the writer of the Periplus of the Erythraean Sea, Marcian of Heraclea, Mela, and Ptolemy, belong to this elass, and, in the fulness of their narratives, show clearly how much additional knowledge had been acquired during the extension of the power of the early emperors of Rome.
Lastly, under the head of Byzantine writers, we have the remarkable account of the island in Cosmas Indieoplenstes, the latest which belongs to the period of aneient or classical history.

The most important notice is that of Pliny (l.c.), who states that ambassadors from the island were received at Rome by the emperor Clandius, through the instrumentality of the freedman of a certain Annias Plocamus, who, after baving been driven out of his course upon the island, remained there six months, and beeame intimate with the people and their rulers. He states that Plocamus landed at a port be calls Hippnros, which may be identified with the modern Kulremalai, which means the same in Sanscrit; and that the name of the king was Ruchia, evidently the Indian Räjah: he adds that the island contained 500 towns, the chict of which was called Palaesimundum, and a vast lake Negisba, from which flowed two rivers, one called Cydara (Kundara or Kadembo in the Annols, nuw Aripo). It is not possible aecurately to determine what modera place is to be ideatified with Megisba, but the Mahawanso speaks of enommens works of this nature attributed to Vasabha and other early kings. (Mah. pp. 65, 210, 221, 215.) Pliny adds some astronomical facts, which are not eqnally coincident with the truth; and remarks on the richness of the island in precious stones and metals, and on the fineness of the climate, which "xtended the life of man beyond its usual limits.

We may mention also, that Diodorns tells a remarkable story, which has been generally held to refer to Ceylon, though this is not capable of proof. According to him Iambulus, the son of a merchant, on his way to the spice countrics, was taked prisoner

## taprobane.

by the Aethiopians, and, after a time, with one other companion, placed in a boat and left to his fate. Ature a long voyage, he came to an island, rich in all kinds of natural productions and 5000 stadia
 lambulus stayed there seven years, and thence went to Palibothra, where he was well received by the king, who is said to have been $\phi t \lambda \epsilon \lambda \lambda \eta \nu$ (Diod. ii. 55, \&c.). That the details of this voyage are fabulus no one can doubt, yet the narnative is probably founded on fact, and points to an early intercourse between the shores of Fastern Africa and Inslia.

The fullest and by far the most interesting account of Cryton, is that preererved by Cammas Indicopleustes, which was published by Montfancon (Coll. Niov. Patr. ii. p. 336). Cosmas, who flourished in the reign of Justinian, about A.D. 535 , states that he abtained his information from a Greek named Sopatrus, whom he met at Adulis. According to this writer, the Taprobane of the Greeks is the Sieledibs of the Mudus, an island lying beyond the Pepper Coast, or Mnlabar, and having near it a great number of small islands (i. e. the Moldires). He reekons it about 900 miles in length and breadth, a measure he deduces from a native measure called fiandia (atill sal to be known in the island, and the same as the Tamil naliguoi, Vincent, ii. p. 506). There were, at the time he received his information, two kemgs in the island, one the possessor of the Hyacinth (i. c. of the monntum districts which abound in precions stoncs). and the other of the plain conntry and cuast, where in later times the Arabians, Purtuguese, Dutch, and Euglish, have in succession estabiished factories. A Christian charch, be adds, was establisbed there $\ell \pi i \delta \eta \mu 0 \bar{\nu} \nu \tau \omega \nu \quad \Pi_{\epsilon} \rho \sigma \omega \bar{\nu} \mathrm{X} p i \sigma$ tavêv, with a priest and deacon ordained in Persia. There is no doubt that these werc Nestorians, whose Catholicos resided at Ctesiphon, and who, on the Malabar coast, are often called Cbristians of St. Thomas. He deternines the position of Sielediba, by stating that it is as far from it to China, as from the Persian Gulf' to the island ( $\mathrm{p}, 138$ ). Again, he says, which is less correct, that Sielediha is five duys' sail from the continent ; and that on the continent is a place named Marallo (Marowar?), which produces the pearl oysters ; and adds, that the king if Ceglon sells elephants for their height ; and that ${ }^{1}$ I ludia elephants are trained fur war, while in Atuca they are captured for their ivory. Horses jumported from Persia pay no tax. It is remarkWhic that this notice of the elephants is in strict womdonce with that of Aelian, who asserts that day were bred in Ceylon and transported in lonar mative ressels to the opposite contiment, and notid to the king of Calingae (Hist. An. xxvi. 18). Pliny ( $1 . c$ ), on the authority of thesieritus. aftirms that lurger and mowe warlike elephants are reared in this island than anywhere else in India, aud that the hunting of them was a constant spurt: and I'toleuy places muder the Malea M. (Adam's l'eak) In. Eneфavzov voual, in the exact position in which they were, till lately, most abundant (vii. 4. § \&). The testi mony' of all modern travellers on the subject of the Coylmie elephant is, that thone bearing great tusks, and therethe valuable for their ivory, are extremely rave in the island. (Compare also Dionys. Perieg. v. 593, who calls Cegloh $\mu \dot{\eta} \tau \in \rho \alpha$ 'A $\sigma$ 青 tacфárтar: Alex. I.yolm. in Steph. B., who speaks
 Sirlin. c. 56 ; and Tretzes (hil, viii. Mist. 215). Cosmas concludes his remarkable story with a notice

## TAPROBANE

of a conference hetween the king of Ceylon and Sopatirns, in which the latter convinced the king that the Romans were a greater people than the Persians, by exlibiting some gold coins of Byzantium. It confinns the veracity of the narrator that we know from other searees that the Sassanimn princes of the sixth centary had only silver money, while at the eapital of the Eastern Empire gold coin was not rare. There were many temples in the island, ono of them fanous for a hyacinth of extraordinary size.
Few islands have berne, at different times, so large a number of names: as many of these have considerable interest, we shall notice them in succession.

The first, as we have stated, by which it was known to the Greeks was Tampobív $\begin{gathered}\text {. Several ex- }\end{gathered}$ planations have been given of this name; the best is probably Tamraparni (Sanscrit for red-leaved ; cf. Burnouf, Journ. Asiat, viii. p. 147; Mahawanso, ed. Turnour, p. 50; Lassen, Inst. Ling. Pracrit. p. 246), a form slightly changed from the Puli Tambapanni, the spot where the first king Vigaga is said to have landed (Mahawanso, $Z$ c.). This name is not unknown in other Indian writings: thus we find so named a place on the adjoining continent of /lindostón, and a river of the same district which flows from the Ghats into the sea near Tinnerelly (Wilsort, Vishnu Purana, p. 176); and a pearl-fishery at the month of this stream is noticed in the Naghu-vansa (iv. p. 50; cf. also I Iishou Purana, p. 175, and Asiat. Research. viii. p. 330). Other interpretatioos of Taprobane may be found in Bochart (Geogr. Sacra, p. 692), who, after the fashiun of the scholars of his day, derives it from two $\mathbf{l}$-brew words, and imagines it the Ophir of the Bible; Wabl (Erabeschr. r. Ost-Indien, ii. 682, 683), Mannert (v, p. 285), Duncan (Asiat. Research. v. p. 39), Gladw in (Ayin Akberi, iii. 36). Bubler (Altes Indien, i. 27), Vincent (Periphus, ii. p. 493), none of which are, however, free from objection. There can be no uioutt that the early language of Ccylon approximated rery clusely to that of the adjoiniug comtinent, and was, in fact, a form of Tamil. (Cf. Rask, Cingal. Skrift, p. 1, Colombo, 1821; Buchanan Hamiltun, ap. M. Martin's East India, ii. p. 795 ; ef. also Ptol. viii. 1. § 80). It may be observed that the name Tambapanni is found in the Girnar inscriptiun of Asoka (B. C. 280), and would therefore naturally be known to the Seleucidan Greeks. (As. Journ. Beng. vii. p. 159.)

We may add that Pluy states that the ancient inhabitants were called by Megasthenes Palacogoni (l. c.), durbtless the translation into Greek of some ludian name. It is not inpossible that Megasthenes aray have been acquainted with the Indian fable, which made the Rakshasas, ur Giants, the chiidren of the Earth, the earliest inhatitants of this island.
The next nane we find applied to Ceylon was that of Simundu ar Palaesimundu, which is found after the time of Stralo, but had, nevertheless, gone out of use before Ptolemy. (E'tol. L. c.; Stepb. B. s. r. Toprobane; Peripl. M. E., ed. Hudsom, P. 2; Marcian, ed. Ilndson, p. 26, and pp. 2, 9.) There is a difficulty at first sight about thene names, as to which form is the correct one: on the whole, we are inclined to aequiesee in that of palaesimundu (Ma入auสupovivov). on the anthority of Marcian (l.c.) and of the L'eriplus (\$ 61 , ed. Niiller). I'iny, too, in his aceount of the embassy to Rome, calls the city, where the roval palace was, Palaesin undu. There can be little doubt that this word is tho Graecised form of the Sanscrit Pali-Simanta, the

Head of the Holy Law, which is confirmed by another name of analogous claracter, Andrasimundu (Ptol. vii. 4); a pronontory now called Calpentyn (Mlanert, l.c. p. 211). The ancient city noticed by Pliny, with the royal palace, most be that elsewhere called Anurogrammon, and by the natives Anurajapura, the royal seat of empire from B. C. 267 to A. D. 769 (Mohawanso, Intr. p. Ixi.). (For other derivations of Palaesimnedu, see Dodwell, Dissert. de Geogr. Min. p. 95; Wahl, Erdbeschr, ii. p. 684 ; Renaudot, Anc. Relot. des Indes, p. 133; MalteBrun, Précis de Géagr. iv. 113: Mannert, i. p. 210; Puolino-a-St. Barth, loyage aux Indes, ii. p. 482.) The conjecture of Wiltord (As. Res. x. p. 148) that it may be Sumatra, and of Hecren (Soc. Reg. Götting. vol. vii. p. 32) that it is the town of "Pontgemolle," do not need refutation.
The other names which this island has borne eppear to have been as follow: Salice, with its inhabitumts, the Salae, Serendivus, Sielediba, Serendib, Zeilan, Ceylon. These are all closely counnected and in reality euphonic modifications of one original form. The first, Salice, - perhaps more correctly Satine, - which seems to have been in use when Ptolemy wrote the common name of Taprobane (l. c.), is certainly derivable from Sinala, the Pili form of Sinhala (Makav. cap. vii. p. 50): from this would naturally come the $\mathbb{\Sigma} i \in \lambda \in$ of Cosmas (Cosm. Indicopl. l.c.), the termination of this name, $\delta_{1}$ ( $a$, being nothing more than the Sanscrit $d^{p}$ wipa, an island. (Cf. in the same neighbourhood the Lakkadive and Dlaldive islands.) The slight and common interchange of the $L$ and $R$ gives the Serendivus of Ammianus (xxii. 7). From this, again, we obtain the more modern forms of the Arabic, Dutch, and English. Sinhala would mean the abode of lionswhich word is found with the same sense, and the form Sengkialo, in the narrative of the Chinese travellers who visited Ceylon in A. D. 412. (Foe-koue-ki, p. sli., cf. p. 328, Annot. p. 336). Besides these manes there is one other whereby alone this islaod is known in the sacred Brahminical writings. This is Lanka (see Mahübh. ii. 30, v. 1177, iii. c. 278, \&c.). It is most likely that this name had passed out of use before the time of Alesander, as it is not mentioned by any of the classical writers : it has been, however, preserved by the Buddbists, as may be seen from the notices in the Mohawonso (pp. 2, 3, 49, \&re.). (Comp. also Colebrooke, Ess. ii. p. 427; Davis in As. Res, ii. p. 229.)

Ceylon is a very mountainous island, the greater masses being grouped towards the southern end, and forming thereby the watershed for most of its rivers. The ancients had a tolerably accurate knowledge of the position of these hills. To the N. were the Montes Galibi, terminating in a promontory called Boreum (now Cape Pedro), and overlooking the principal capital, Anurajuipura. To the S. the great chain was krown by the generic name of Malea, doubrless a form derived from the Sanscrit Mfala, a mountain. The centre of this gronp is the wellknown Adam's Peak-in the native Pali language, Somana Küta (the Monntain of the Gods) (Upham, Sacred Books of Ceylon, iii. p. 202), and the bigh Jand now called Neura-Ellia.

The principal rivers of Ceylon, as known to the ancients, were the Phasis, which flowed from the Montes Galibi in a northern direction; the Ganges (now Mahavali-Ganga), the chief of all the streams whereby the island is watered, the principal source of which is in the S. range, of which

Aclam's Penk is the pre-eminent mourtain (Brooke on Makavella-Ganga, Roy. Geograph. Journ. iii. p. 223), nod whose course is nearly NE.; the Baraces, which rose in the M. Malea, and flowed SE. ; and the Soanas, which flows from the same source in a westerly direction. Besides these rivers was the celebrated lake called Negisba, the size of which has been extravagantly overstated by Pliny (vi. 22. s. 24). It is probable that this lake was formed by the connecting together of several great tanks, many remains of which still exist ; and thus Forbiger sngeests that it may be near the mouths of the Makavali-Ganga, in which neighbourhood there are still extraordinary remains of canalk, earthworks, \&c. (Brooke, l. c.). It was on the shores of this lake that Pliny placed the capital Palaesimundum, with a population of 200,000 souls. The island was rich in towns and peoples, which are not clearly distinguisbed by ancient writers ; of these the Anurogrammi with the town Anurogrammen (now Anurajapura) is the most important. The greatness of this place, which was the royal residence of the kings from s.c. 267 to A.D. 769 (Mahawanso, Introd. p. 1 xi. ), is shown by the vast remains which still exist on the sfot. (Chapman, Ancient Anurijápura, in Trans. Roy. As. Soc. ii. pl. ii. p. 463).

Other less known peoples and places were the Soani, Sandocandae, Rhogandani, Danae (now Tangalle), the Norduli with their seaport Nordulamne, the Nagadibi, Spartana (now Trincomali), Maagrammon (probably Tamonkadawe), and the Modutti. For these and many more we are indebted to Ptolemy, who from his own account (i. 17. § 4), examined the journals and conversed with several persons who had visited the island. It is a strong confirmation of what he states, that a considerable number of the names preserved can be re-produced in the native Indian form.

The people who iobabited the island were for the most part of Indian descent, their language being very nearly connected with the Pali, one of the most widely spread Indian dialects. To this race belong all the monuments which remain of its former greatness, together with a very curious and authentic series of annals which have been of late brotight to light by the exertions of Sir Alexander Johnston and the critical acnmen of Mr. Turbour (Mahawanso) and Uphan (Sacr, Hist. Books). There are, however, still existing in the island some few specimens of a wholiy different race, locally known by the game of the Ieddahs. These wild and uncivilised people are found in the valleys and woods to the E. and S. of the Makavali-Ganga; and are, in all probability, the remains of the aboriginal race who dwelt in the land antecedent to the arrival of Vigaya and his Indian followers. In physiognony and culour they bear a striking resembiance to the earliest inhabitants of the S. provinces of Hindostoin and are, most likely, of similarly Scythic origin. (Knox, Account of Ceylon, Lond. 1657; Perceval, Account of Ceylon, Lond. 1803: Gardiner, Descr. af Ceylon, Lond. 1807 ; Davy, Ceylon and its Inhabitants, Lond. 1821 ; W. Hapilton, India, ii. 522; Kitter, iv. 2. p. 226 ; Lassen, Indische Alterth. i. p. 198 ; Dissert. de Taprobrne, Bonn, 1832 ; Tornour, Mahawanso, Ceylon, 1836; Jour. Asiot. Beng. vi. 856 ; Chapman, Anc. City of A nurajapura, in Tr. R. As. Soc. iii. 463; Chitty, Ruins of Tammana Nuwera, in R. As. Soc. ví. 242; Brooke, Mahavella-Ganga, R. Gcogr. Soc. iii. 223.) [V.]

TAPSUS FLUVIUS．［THapst 3．］
TAPU＇RA（Táжovpa），a town of ancertain site in Armenia Miaor，is mentioned only by J＇tolemy（v． 7．§ 3）． ［L．S．］
TAPUREI（Taтoи́peot，Ptol．vi．14．§§ 12，13）， a tribe in Scythia intra Jenanm．［T．H．D．］

TAPU＇Ri（Támovpot or Túnupot，Strab．xi．p． 520；Plin．vi．16．s．18），a trive whose name and probable habitations appear，at different periods of history，to have been extended along a wide space of country from Arinenia to the east－ ern side of the Oxus．Strabo places them along－ side the Caspian Gates and Rhagae，in Parthia， （si．p．514），or between the Derbioes and Hyrcani （si．p． 520 ），or in counpany with the Annardi and other people along the sonthern shores of the Cas－ pian（xi．p．523）；in which last view Curtius（ri． 4. § 24，viii．1．§ 13），Dionysius（de Situ Orbis，733）， and Pliny（vi．16．s．18）may be considered to co－ incide．Ptolemy in one place reckons them among the tribes of Mcdia（vi．2．§6），and in anntler ascribes them to Margiana（vi．10．§ 2）．Their name is written with sume differences in different anthors； thans Tárovpos and Tánvopor oceur in Strabo；Ta－ puri id Pliny and Curtius；Táлvppou in Steph．B． There can be no donbt that the present district of Taberistan derives its name from them．Aelian （V．H．iii．13）gives a peculiar description of the Tapuri who dwelt in Media．（Wilson，Ariana，p． 157．）
［V．］
TAPURI MONTES，a chain of monntains，in Scythia，to the N．of the Jazartes，apparently a portion of the Altai range，towards its western ex－ tremity（Ptol vi．14．§ 7）．It may，bowever，be donbted whether this riew of Ptolemy is really correct．It would seem more likely that they are con－ nected with the Tapuri，a tribe who nearly adjoined the Myreani［Taferi］；and this a notice in Polyhins would appear clearly to imply（v．44）．［V．］

TARACHl（Tápaðo4，Ptol．vii．4．§ 8），a tribe of Taprolnane or Ceylon，who occupied the SE．corner of the island below the Malea monotains（Adam＇s Prak）．They appear to have liad a port called＇HAlou $\lambda_{i} \mu \eta \nu$ ，prolably in the neighbonrbood of the present Jintam．Near to them was a river called the Barace（Ptol．vii．4．\＆5）．It is not unlikely that the river and the people had once the same name， which has since been modified by the change of the initial letters．
［V．］
TARANDIUUS（Tápanסpo5：Eth．Tapávס̧ıos），a place in I＇hrygia of unknown site，is meutioned only Ly Stephamis Byz．（ s．v．）．
［L．S．］
TARANEI，a perple in Arabia Deserta of un－ known site．（Plin．ri．28．s．32．）

TAtias［Tanenrum．］
TARAsCON（Taparkẃv：Tarascon），a town in thr I＇rovincia Narbonensis，on the east side of the Whone，between Arles and Acignon The railway from Arignon to Marseille passes throngh Tarascon， and there is a branch from Tarascon to Nimes． l＇tnleny（in whose text the name is written Tapou－ oк $\dot{\nu} \nu)$ eumerales Tarascon anong the towns of the Salyes［SalyFs］．Strabo（iv．p．178）nays that the road from Nemausus（Nimes）to Aquae Sextiae passes through Ugerumm（Beaucaire）and Tarascon， and that the distance from Nemausus to Aquae Sextiae is 53 Roman miles；which，as D＇Anville ob－ serves，is not correct．In another passuge（iv．p．187） Strabo makes the distance from Nimes to the bank of the Rhone opposite to Turascon abuut 100 stadia， which is czact enough．［TAnusconienses．］［G．J．．］

## TARENTUM．

TARBA．［TAnRima．］
TARBELLl（Tápbe入入ot，Tápse入oi）are men－ tinned by Caesar among the Aquitanian peoples （B．G．iii．27）．They lived on the shores of the Ocean，on the Gallic bay（Strah．iv．p．190），of which they were masters．Gold was found ahondantly in their country，and at little depth．Some pieces were a handfnl，and required little purification．The Tar－ belli extended senthwards to the Aturis（ Adour）and the Pyrences，as the passaces cited from Tibnllus （i．7，9）and Lucan（Pharsal．i．421）show，so far as they are evidence ：－
＂Qui tenet et ripas Aturi，quo littore curvo Molliter admissum clandit Tarbellicus aequor．＂
Aasonins（Parent．iv．11）gives the pame＂Tar－ bellns＂to the Ocean in these parts．Ptolemy（ii． 7. § 9）places the Tarbelli south of the Bituriges Vi－ visci，and makes their limits extend to the l＇yrenees． He names their city＂roata Airov́cta，or Aquae Tarbellicae．［Aquae Tardelicicie．］

Jliny（iv．19）gives to the Tarbelli the epithet of Quatuorsignani，a term which indicates the establish－ ment of some Roman soldiers io this country，as in the case of the Cocossates，whom Pliny names Sex－ signadi．［Cocoss．ates．］The country of the Tar－ belli contained bot and culd springs，which were near one another．
［G．L．］
TARBESSUS（Tapeno $\sigma \delta s$ ），a town of Pisidia， mentioned only by Straho（xii．p．570）．［L．S．］

TARENTINUS SINUS（ $\delta$ TaparTivos кó入tos： Golfo di Taranto）was the name given in ancient as well as in modern times to the extensive gulf com－ prised between the two great promontories or penin－ sulas of Southern Italy．It was boonded by the lapygian promontory（Capo della Leucu）on the N．， and hy the Lacinian promontory（Capo delle Co－ lonne）on the S ．；and these datural limits being clearly marked，appear to have been generally re－ cognised by ancient geograpbers．（Strah．vi．pp． 261， 262 ；Mel．ii．4．§8；Plin．jii．11．s． 16 ； Ptol．iii．1．§ 12．）Strabo tells us it was 240 miles in extent．following the circoit of the shores，and $\mathbf{7} 00$ stadia（ $87 \frac{1}{2}$ miles）across from headland to headland． Plny reckons it 250 miles in circuit，and 100 miles across the opening．The latter statement consider－ ably exceeds the trath，while Strabo＇s estimate is a very fair approximation．This extensive galf de－ rived its name from the celebrated city of Tarentum， sitnated at its N E．extremity，and which enjoyed the adrantage of a good port，almost the only one throughont the whole extent of the gulf．（Strab． vi．p．278．）Bat notwithstanding this disadvantage， its western shores were lined by a ssccession of Greek colonies，which rose into flourishing cities． Crotona，Sybaris，Metapontum，and，at a later period， Heracleat and Thurii，all adorned this line of coast ； the great lertility of the territory compensating for the want of natural harbours．On the northern or Iapygian shore，on the contrary，the only city was Callipolis，which never rose above a subnrdinate con－ dition．
［E．H．B．］
TARENTUM（Tápas，－avtos：Eth．Tapartìvos， Tarentinus ：Taranto），one of the most powerfut and celebrated cities of Southern Italy，situated on the N．shore of the extensive bay，which derived from it，both in ancient sod modern times，the namo of the gulf of Tarentum．（Tarentinus Sivus： § Tapavtivos кó̀tos：Golfo di Teranto）．It was included within the limits of the province of Calabris， as that term nas used by the Romans；but the Grecks
would generally have reckoned it a city of Magna Graecia, and not have regarded it as included in lapygia. Its situation is peculiar, occupyiag a promontory or peainsula at the eatrance of an extensive but shallow bay, now called the Mare Piccolo, but in ancient times known as the Port of Tarentnm, an inlet of above 6 miles in length, and from 2 to 3 in breadth, hut which was so nearly closed at its month by the peninsula occupied by the city, that the latter is now consected by a bridge with the opposite side of the harbour. There can be no doubt that the ancient city originally occupied only the same space to which the modern one is now confined, that of the low but rocky islet which lies directly across the mouth of the harbour, and is now separated from the mainland at its E. extremity by an artificial fusse or ditch, but was previously joined to it by a narrow neck of sand. This may probably have beea itself a later accumulation; and it is not onlikely that the city was originally fonnded on an island, somewhat resembling that of Ortygia at Syracuse, which afterwards became joined to the mainland, and has again been artificially separated from it. As in the case of Syracuse, this island or penjosula afterwards became the Acropolis of the enlarged city, which extended itself widely over the adjoiniag plaio.

Tarentum was a Greek city, a colony of Sparta, foanded within a few years after the two Achaean colonies of Sybaris and Crotona. The circumstances that led to its fousdation are related with some variation by Antiochus and Ephorus (both cited by Strabo), but both aathors agree in the maio fact that the colonists were a body of youag men, born during the First Messeaian War under circumstanees which threw over their birth a taiat of illegitimacy, on which account they were treated with contempt by the other citizens; and after an abortive attempt at creating a revolution at Sparta, they deternined to emigrate in a body under a leader named Phalanthus. They were distinguished by the epithet of Partheniae, in allusion to their origia. Phalanthus, who was appareotly himself one of the disparaged class, and had been the chief of the conspirators at Sparta, after cossultiag the oracle at Delphi, became the leader and founder of the new colony. (Aotiochns, ap. Strab. vi. p. 278 ; Ephorus, Ib. p. 279 ; Serv. ad Aen. iii. 551; Diod. sv. 66; Justin, iii. 4 ; Scymn. Ch. 332.) Both Antiochus aad Ephorus represeat them as establishing themselves without difficulty on the spot, and received in a friendly manner by the oatives; and this is far more probable than the statemeat of Pausanias, according to which they found themselves in constant warfare; and it was not till after a loag struggle that they were able to make themselves masters of Tarentum. (Paus. x. 10. §6.) The same author represents that city as previously occupied by the indigenous tribes, and already a great and powerful city, but this is highly improbable. The name, however, is probably of native origin, and seema to have been derived from that of the small river or stream which always coatianed to be known as the Taras; thongh, as usual, the Greeks derived it from an eponymous hero named Taras, who was represented as a son of Neptune and a nymph of the country. (Paus. Ib. §8.) It is certain that the hero Taras continned to be an object of special worship at Tarentum, while Phalanthos, who was revered as their Oekist, was frequently associated with him, and gradually became the sub. ject of many legends of a very mythical character,
in some of which he appears to have been confonnded with Taras bimself. (Paus. x. $10 . \S \S 6$ 8, 13. § 10; Serv. ad Aen. l. e.) Nevertheicss, there is no reason to doubt the bistorical eharacter of Plualaathus, or the Lacedaemosian origin of Tareatum, which was confirmed by numerous local names and religions observances still retsined there down to a very late peried. (Pol. viii. 30, 35.) The Roman poets also abound in allusions to this origin of the Tarentines. (Hor. Carm. iii. 5.56, ii. 6. 11; Owid. Met. xv. 50, \&c.) The date of the foundation of Tarentum is given hy Hieronymus as D. C. 708 , and this, which is in accordance with the cireamstances related io connection with it, is probably correct, thongh no other anthor has mentioned the precise date. (Hieroa, Chron. ad Ol. xviii.)
The history of Tareatum, for the first two centories of its existence, is, like that of most other cities of Magna Graecia, almost wholly unknown. But the main fact is well attested that it attaised to great power and prosperity, though apparently at first overshadowed by the saperior power of the Achaean cities, so that it was not till a later period that it assumed the predominant position among the cities of Magna Gruecia, which it nltimately attained. There can be no doubt that it owed this prosperity mainly to the natural advantages of its situation. (Seymn. Ch. 332-336; Strab. vi. p. 278.) Though its territory was not so fertile, or so well adapted for the growth of grain as these of Metapoutum and Siris, it was admirably snited for the growth of olives, and its pastures produced woel of the finest quality, while its port, or inaer sea as it was called, abounded in shell-fish of all descriptions, among which the Mnrex, which prodnced the celebrated purple dye, was the most important and valuable. But it was especially the excelleace of its port to which Tarentum owed its rapid rise to opulence and power. This was not only landlocked and secure, but was the only safe harbour of aay extest on the whole shores of the Tarentine gulf; and as neither Bruadusium nor Hydraatum, on the epposite side of the Messapian peninsula, bad as yet attained to any emineace, or fallen iato the hands of a seafaring people, the port of Tarentum became the chief emporium for the commerce of all this part of Italy. (Pol. x. 1 ; Flor. i. 18. § 3.) The story of Arion, as related by Herodutus (i. 24) indicates the existence of extensive commercial relations with Coriath and other cities of Greece as early as the reign of Periander, B. c. 625-585.

As the Tarentioes gradually exiended their power over the adjoining territories, they naturally came into frequent collision with the native tribes of the interior,-the Messapians and Pencetians; and the first events of their history recorded to us relate to their wars with these nations. Their offeriags at Delphi noticed by Pausanias (x. 10. § 6, 13. § 10), recorded victories over both these nations, in one of which it appears that Opis, a king of the lapygiaas, who had come to the assistance of the Peucetians, was slain; bat we have no knowledge of the dates or circnmstances of these battles, It would appear, however, that the Tarentines were continnally gaining grouad, and making themselves masters of the Messapian towns one after the other, ontil their progress was checked by a great disaster, their own forces, together with those of the Rhegians, who had been sent to their assistance, being totally defeated by the barbarians with great slangliter. (Hered. vii. 170; Diod. xi. 52.) So heavy was their
loss that Iferodotus, without stating the utubers, says it was the greatest shaugher of Greeks that had oreurred up to his time. The loss scems to have fallen esperially upon the mulles and weathier citizens, so that it becane the orcasion of a pulitical revolution, and the gevermont. Which had previnusly bern an ari-tonacy. becane thenceforth a pure demncrawy. (Arist. Pol. v. 3.) Of the interaal condition and constitution of Tarentum previously to this time, we know searedly anything, but it seems proballe that its institutions were at fist copidd from those of the parent city of Sparta. Aristotle speaks of its gosermment as a $\pi о$ 人iteia, in the sense of a mixed poyernment or commonwealth; white Herodotus incidentally notices a king of Tarentam (iii. 156), not long before the Persian War, who was dombetess a king after the Spartan model. The instirutions of a democratic tendency noticed with conmendation by Aristotle (Pol. vi. 5) probatily bothing to the later and democratic period of the constutution. We hear bat little also of Tarentum in comection with the revolutions arising out of the influence exercised by the Pythagoreans: that sect had apparently not established itself so strongly there as in the Achacan cities; theugh many Tarentinus are enamerated among the disciples of Pythagoras, and it is clear that the city hal not altogether essalped their influence. (Lumbl. I'it. Pyth. 262, 266. Porphyr. J'it. Pyth. 56.)

The defeat of the Tarentiues by the Messapians, whish is referred by Diodurus to B. c. 473 (Diod. xi. 52). is the first event in the history of Tarentum to which we can assign a definte date. Great as that blow may have been, it did not produce any permanent effect in checking the progress of the city, wheh still appears as one of the most flourishing in Magna Giraccia. We next hear of the Tarentmes as intertering to prevent the Thurians, who had been recently established in Italy, from making thenmelves matiers of the district of the Siritis. On what grounds the Tarentines conld lay claim to this divtri 1 , which was separated from them by the mtervenng teritury of Metapontum, we are not inforbull; lint they carried on war for some time arainst the Thurians, who were supported by the Spartan exile Cleamlridas; until at length the dispate was terminated by a compronise, and a new colvey mamed Heracleia was founded in the contoted territory (b. C. 432 ), in which the citizens of buth states particijated, but it was agreed that it shonld be considered as a colony of Tarentum. (Autuech. ap. Strab. vi. p. 264 ; Divi. xii. 23, 36 ) At the time of the Athenian expelition to sicily, the Tarentines kept alnof from the contest, and coutented themselves with refusing all suiplies and as-istance to the Athenian Heete (Thuc. si. 44), while they afforded sheter to the Corinthian Fand Laconian ships ander (iylippus ( 16.104 ), but they did not even present the second fleet under Lomonthemes and Emymedon from touching st the inhouds of the Chomernfes, imznediately
 on hoard some anxilaries finmished by the Mesas[hias. (1d. vii. :̈3.)

Another lung interval now elapses, during which the histary of Tarentam is to us almost a blate ; yet the tew nmieen $u r$ hear of the city represen it as is at state of great prosperity. We are told that at one time (apparently alout $380-360 \mathrm{ssc}$.) Archytas, the 1'ythatorean phatusopher, exercised a paramount influence over the goverament, and filled
the office of Strategus or general no less than seren times, thoogh it was prolibited by law to hold it more than once ; and was successful in every campaign. (Ding. Laert. viii. 4. $\$ \$ 59-52$.) It is evident, therefore, that the Tarentines were far from enjuying unbruked peace. The hostilities alluded to were probably but a renewal of their old warfare with the Jlessapians ; but the security of the Greek cities is Italy was now menaced by two more formilable fies, Dionysius of Syratuse in the sonth, and the Lucanians on the north and west. The Tarentines, indeed, seem to have at first looked upon both dangers with comparative indifference : their remote position secured them from the immediate brunt of the attack, and it is even doubtful whether they at first joined in the general leagne of the Greek cities to resist the danger which threatened them. Meanwhile, the calanities which befel the more southern cities, the destruction of some by Dronysius and the hmmiliation of others, tended only to raise Tarentum in comparison, while that city itself enjoyed an immmity from all hostile attacks ; and it seems certain that it was at this period that Tarentmm first rose to the preponderating position anong the Greek cities in Italy, which it thenceforth enjoyed without a rival. It was apparently as an acknowledgment of that superiority, that when Tarentam had joined the confederacy of the Greek cities, the place of meeting of their congress was fixed at the Tarentine colony of Heraeleia. (Strab. vi. p. 280.)

It was impossible for the Tarentines any longer to keep alouf from the contest with the Lncanians, whise formidable power was now beginuing to threaten all the cities in Magna Graecia; and they now appear as taking a leading part in opposing the progress of those barbarians. But they were net content with their own resources, and called in successively to their assistance several foreign leaders and generals of renown. The first of these was the Spartan king Archidamus, who crossed over into Italy with a considerable furce. Of his operations there we Lave no accouot, but he appears to have carried on the war for some years, as Diudorus phaces his first landing in Itrly in B. C. 346 , while the battle in which he was defeated and slain was not fought till the same time as that of Chaeroneis, в. c. 338. (Diod. x $\times 1.63 .88$.) This action, in which Archidamus himself, and almost all the troops which he had brought with him from Greece perished, was fought (as we are told), not with the Luratians, but with the Messapians, in the neighbourhood of Munduria, only 24 miles from Tarentum (Plut. Agis. 3 ; Paus. iii. 10. §5; Diod. l. c.); but there can be no donbr, however, that both nations were nuited, and that the Lucanians lent their support to the Mensapians, as the old enemies of Tarentum. Henceforth, indecd, we find both names contmually united. A fers years after the death of Archidamus, Alexander, king of Epirus, was invited ly the Tarentines, and landed in Italy, B. C. 332. The operutions of his successive campaigns, which were continued till B. C. 326 , are very imperfectly known to us, hut he arpears to have first turned his arns against the Messapians, nud compelled them to cunclude a peace with the Tarentines, before he proceeded to make war upon the Lucanians and Bruttians. But his arms wero attended with considerable success in this quarter also: he defeated the Sammites and Lucamians in a great battle near Taestum, and penetrated into the heart of the Brut-
tian territory. Neanwhile, however, he had quarrelled with his allies the Tarentines, so that he turned against them, took their colony of Heracteia, and endeavoured to transfer the congress of the Greck cities from thence to a place on the river Acalandrus, in the territory of Thurii. (Strab, vi, p. 280 ; Liv. viii. 24 ; Justin. xii. 2.) Hence bis death, in B.c. 226 , only liberated the Tarentines from an enemy instead of depriving them of an ally. They appear from this time to bave either remained tranquil or carried on the contest single-handed, till E. C. 303 , when we find them again invoking foreign assistance, and, as on a former occasion, sending to Sparta for aid. This was acain furnished them, and a large army of mercenaries landed at Tarentum ander Cleonymus, the uncle of the Spartan king. But thongh he compelled the Messapians and Lucanians to sue for peace, Cleonymus soon alienated the minds of his Greek allies by his arrogance and lusurious habits, and became the object of general hatred before he quitted Italy. (Diod. xx. 104.) According to Strabo, the Tarentines subsequently called in the assistance of Agathocles (Strab. vi. p. 2s0); but we find no mention of this elsewhere, and Diodorus tells us that he concluded an alliance with the lapygians and Peucetians, which could hardly have been done with favoarable iutentions towards Tarentum. (Diod. xxi. p. 490.)
Not long after this the Tarentines first came into collision with a more formidable foe than their neighbours, the Messapians and Lucanians. The wars of the Romans with the Samnites, in which the descendants of the latter people, the Apulians and Lucanians, were from time to time involsed, had rendered the name and power of Rome familiar to the Greek cities on the Tarentine gulf and coast of the Adriatic, though their arms were not carried into that part of Italy till about B. c. 283 , when they rendered assistance to the Thurians against the Lucanians [Thurn]. But long before this, as early as the commencement of the Secoud Samnite War (d. c. 326), the Tarentines are mentioned in Roman history as supporting the Neapolitaus with promises of succour, which, however, they never sent ; and afterwards exciting the Lucanians to war agrainst the Romans. (Liv. viii. 27.) Again, in B. C. 321 we are told that they sent a havgity embassy to command the Samnites and Rumans to desist from hostiities, and threatened to declare war on whichever party refused to oiey. (Id. is. 14.) But on this occasion also they did not put their threat in execution. At a subsequent period, probably about B. c. 303 (Arnold's Rome, vol. ii. p. S15), the Tarentines concluded a treaty with Rome, by which it was stipulated that no Roman ships of war should pass the Lacinian cape. (Appiad, Samnit. 7.) It was therefore a direct breach of this treaty when, in B. c. 302, a Roman squadron of ten ships under L. Cornelius, which had been sent to the assistance of the Thurians, entered the Tarentine gulf, and even approached within sight of the city. The Tarentines, whose hostile disposition was already only balf concealed, and who are said to have been the prime movers in organising the confederacy against Rome which led to the Fourth Samnite War (Zonar. viii. 2.), inmediately attacked the Roman ships, sunk four of them, and tonk one. After this they proceeded to attack the Thurians on account of their having called in the Romans, expelled the Roman garrison, and made themselves masters of the city. (Appian, Samn. 7. § I ; Zonar. viii.
2.) The Rumans sent an embassy to Tarentum to complain of these outrages; but their demands being refused, and their ambassador theated with contuanely, they had now no choice hat to declare war upon the Tarentines, n.c. 281. (Appian, l. c. § 2; Zonar. l. c.; Dion Cass. Fr. 145.) Nevertheless, the war was at first carried on with little energy; bot meanwhile the Tarentines, followine their usual policy, bad invited Pyrrhus, king of Epirus, to their assistance. That monarch readily accepted the overture, and sent over his general Milo to occupy the citadel of Tarentam with 3000 men , while he himself followed in the wiuter. (Zonar. viii. 2; Plut. Pyrrh. $15,16$.

It is nsual to represent the Tarentines as at this period sunk is lexury and effeminacy, so that they were unable to detend themselves, and hence compelled to have recourse to the assistance of Pyrrhus. But there is certainly much exaggeration in this view. They were no doubt accustomed to rely much upon the arms of merceDaries, but so were all the more wealthy cities of Greece; and it is certain that the Tarentines themselves (apart from their allies and mercenaries), furnisbed not only a considerable body of cavalry, but a large force or phalanx of heavy-armed ufantry, called the Leucatpids, from their white shields, who are especially mentioned as serving under Pyrrhns at the battle of Asculum. (Dionys. xx. Fr. Didot. 1, 5.) It is unnecessary here to repeat the history of the campaigns of that monarch. His first successes for a time saved Tarentum itself from the brunt of the war : but when he at length, after his final defeat by Curius, withdrew from Italy (b. c. 274), it was evident that the full weight of the Roman arms would fall upon Tarentum. Pyrrhus, indeed, left Milo with a garrison to defend the city, but the Tarentines themselves were divided into two parties, the one of which was disposed to submit to Rone, while the other applied for assistance to Carthage. A Carthaginian fleet was actually sent to Tarentum, but it arrived too late, for Milo had already capitulated and surrendered the citadel into the hands of the Ruman consal Papirius, E. C. 272. (Zonar. viii. 6; Oros. iv. 3.)

From this time Tarentum continued subject to Rome. The mhabitants were indeed left in possession of their own laws and nominal independence, but the city was jealously watched; and a Roman legion seems to have been commonly stationed there. (Pol. ii. 24.) During the First Punic War the Tarentines are mentioned as furnishing ships to the Romans (Pol. i. 20): but with this exception we hear no more of it till the Second Punic War, when it became a military post of great importance. Hamibal was from an early period desirous to make himself master of the city, which, with it excellent port, would at once have secured his communications with Africa. It is evident also that there was a strong Carthaginian party in the city, who shortly after the battle of Cannae, opened negotiations with Hannibal, and renewed them apon a subsequent occasion (Liv. $\mathbf{x x i i} .61$, xxiv. 13); bat they were kept down by the presence of the Roman garrison, and it was not till B. C. 212 that Nico and Plilemenus, two of the leaders of this party, found an opportunity to betray the city into his bands. (Liv. xxy. 8-10; Pol. viii. 26-33.) Even then the Roman garrison still beld the citadel; and Hannibal haring failed in his attempts to carry this fortress by assault, was compelled to resort to a blockade. He cut it off on
the land side by drawing a double line of fientlications across the istbmus, and made himself master of the sea by dragging a part of the fleet which was shut op within the inner port (or Mare Piccols), across the narrowest part of the isthmus, and lamehing it arain in the onter bay. (Pol. viii. 34-36; Liv. xxv. 11.) This state of things continted for more than two years, during the whole of which time the Carthayinians continued masters of the city, while the Roman garrisnn still maintained possession of the citadel, and the besiegers were unable altongether to prevent them from receiving supplies from without, though on one occasion the Romans, having sent a considerable fleet under D. Quintius to attempt the relief of the place, this was met by the Tarentines, and after an obstinate conflict the liman fleet was defeated and destroyed. (Liv. xxv. 15, xxvi. 39, xxvii. 3.) At length in B. c, 209 Fabius determined if possible to wrest from Hamnibal the possession of tbis important post; and laid siege to Tarentum while the Cartbarinian geveral was opposed to Marcellus. He bimself encamped on the N. of the port. close to the eutrance, so tbat he readily put himself in communication witls M. Livius, the commander of the citadel. But while he was preparing his ships and engiaes for the assault, an accident threw in his way the opportunity of surprising the city, of which he made himself master with little difficulty. The Carthaginaun earrison was put to the sword, as well as a large part of the inhabitants, and the whole city was given up to plunder. (Id. xxvii. 12, 15, 16; Plut. Fab. 21-23.) Liry praies the magnarimity of Fabius in not earrying off the statues and other works of art in which Tarentum abouaded (Liv. xxvii. 16; Plut. Fab. 23); but it is certain that he transferred from thence to Rome a celebrated statue of Hercules by Lysippus, which long contimued to adorn the Capitol. (Strab. ri. p. 278; l'lid. sxxiv. 7. s. 18.) The vast quautity of gold and silver which fell into the hands of the vietors sufficiently bears out the accounts of the great wealth of the Tarentines. (Liv. l. c.)

Tarentum had already suffered severely on its capture by Hannibal, and there can be mo donbt that it sustained a still severer blow when it was retaken by Fabins. (Strab, ri. p. 278.) It was at first proposed to degrade it to a condition similar to that of Capua, but this was opposed by Fatios, and the decision was postponed till after the war. (Liv. xxvii. 25.) What the final resolution of the senate was, we know not; but Tareatum is alluded to at a subergunt perind, as still retaining its position of an allud city, "urbs foederata." (Liv. xxsv. 16.) It is eertain that it still remained the clief place in this jart of Italy, and was the customary residence of the prantur or other magistrate who was sent to the s. of laty. Thas we find in A. C. 1853 , L. 1'ustumius ernt thither to carry on investigations into the cumppracies that had arisen out of the Bacelimalian rites, ats well is among the slawe population. (Liv, xxxix. 29, 41.) Bat it is nevertheless clear that it was (in common with the other Greck cities of this part of Italy) fallen into a state of great decay; and hemee, in n. c. 123, amone the colonies ant ont by C. Gracclins, was one to Tarentum, which appears to have assumed the title of Corlutia Neptunia. (Vell. Pat, i. 15; Plin iii. 11. s. 16; see Moumson, in Berichite der Sücheischen (icsellschaft for 1849, pp) 49-51.) Aceording to Strabo this colony became at tluarisling one, and the
city enjoyed considerable prosperity in his day. Bnt it was greatly fallen from its former splendour, and only occupied the site of the ancient citalel, with a small part of the adjuining isthmus. (Strab. vi. p. 278.) It was, however, one of the few cities which still retained the Greck language and manners, in common with Neapolis and Rhegiun. (Ib. p. 253.) The salubrity of its climate, as well as the fertility of its territory, and, above all, the importance of its port, preserved it from the complete decay into which so many of the cities of Magna Grisecia fell under the Roman government. It is repeatedly mentioned during the civil wars between Octarian, Antony, and Sex. Fompeius as a naval station of importance; and it was there that in n. c. 36 a fresh arrangement was come to hetween Octavian and Antony, which we find alluded to by Tacitus as the "Tarentmum foedas." (Appian, B. C. ii. 40, v. 50, 80, 84, 93 -99; Tac. Ann. i. 10.)

Eves uoder the Empire Tarentum continned to be one of the chief seaports of Italy, thougb in some measure eclipsed by the growing importance of Brundusium. (Tac. Ann. xiv. 12, Hist. ii. 83.) An additional colony of veterans was sent there under Nero, but with little effeet, most of them having soon again dispersed. (Tac. Ann. xiv. 27.) No subsequent meation of Tarentum is found in history wutil after the fall of the Western Empire, but it then appears as a considerable town, and bears an inuportaat part in the Gothic Wars on acconnt of its strength as a fortress, and the excellence of its port. (Procop. B. G. iii. 23, 27. 37, iv. 26, 34.) It was takea by Belisarius, but retakea by Totila in A. D. 549 , and continued ia the hands of the Goths till it was finally wrested from them by Narses. From that time it continued snbject to the Byzantine Empire till A. D. 661, when it was taken by the Lombard Romoaldus, duke of Benerentum (P. Diac. vi. 1) ; and afterwards fell snccessively into the hands of the Saracens and the Greek emperors. The latter did not finally lose their hold of it till it was taken by Robert Guiscard in 1063. It has ever since formed part of the kingdom of Naples. The modern city of Tarenturn has a population of about 20,000 souls; it is the see of an archbishop, and still ranks as the most important city in this part of Itsly. Bat it is confiaed to the space ocenpied by the aacient citadel, the extremity of the peninsula or promontory between the two ports: this is nuw an island, the low isthmus which connected it with the mainland having been cut through by king Ferdinand $I_{\text {, }}$ for the purpose of strengthening its fortifications.

Scarcely any remains are now estant of the celebrated and opulent city of Tarentum. "Never (says Swinburne) was a place more completely swept off the face of the earth." Some slight remains of an amphitheatre (of coarse of Roman date) are visible outside the walls of the modero city; while within it the convent of the Celestimes is built on the foundations of an ancient temple. Even the extent of the ancient city can be very imperfectly determined. A few slight vestiges of the ancient walls are, however, visible near an old charch which bears tho name of Sta Maria di Murveta, about 2 miles from the gates of the anodern city; and there is no doubt that the walls extended from thence, on the one side to the Mare Piccolo, on the other side to the outer sea. The general form of the city was thus triangular, having the citadel at the apex, which is now joincd to the opposite shore by a
bridge of seven arches. This was already the case in strabo's time, though no mention of it is found at the time of the siege by Hannibal.

The general form and arrangement of the city cannot be better described than they are hy Strabo. Ile says: "While the whole of the rest of the Tarentine gulf is destitute of ports, there is here a very large and fair port, closed at the entrance by a large bridge, and not less than 100 stadia in circumference. [This is beneath the truth: the Mare Piccolo is more than 16 miles ( 128 stadia) in circuit.] On the side towards the inner recess of the port it forms an isthmus with the exterior sea, so that the city lies upon a peninsula; and the neck of the isthmus is so low that ships can easily be drawn over the land from one side to the other. The whole city also lies low, but rises a little towards the citadel. The ancient wall comprises a circuit of great extent; but noss the greater part of the space adjoining the isthmus is deserted, and only that part still subsists which adjoins the mouth of the port, where also the Acropolis is situated. The portion still remaining is such as to make up a considerable city. It has a splendid Gymnasium, and a good-sized Agora, in which stands the bronze colossal statue of Jupiter, the largest in existence next to that at Rhodes. In the interval between the Agora and the mouth of the port is the Acropolis, which retains only a few remnants of the splendid monuments with which it was adorned in ancient times. For the greater part were eitber destroyed by the Carthaginians when they took the city, or carried off as booty by the Romans, when they made themselves masters of it hy assanlt. Among these is the colossal bronze statue of Hercules in the Capitol, a work of Lysippus, which was dedicated there as an offering by Fabius Maximus, who took the city." (Strab, vi, p. 278.)

In the absence of all extant remains there is very little to be added to the ahove description. But Polybius, in his detailed nariative of the captare of the city by Hannibal, supplies us with some local names and details. The principal gate on the E. side of the city, in the onter line of walls, seems to have been that called the Temeaid Gate ( $\alpha i \pi i \dot{i} \lambda a$ T刀ueviviat, Pol, viii. 30); outside of which was a mound or tumulus called the tomb of Hyacinthus, whose worship had ohviously heen brought from Sparta. A broad street called the Batheia, or Low Street, led apparently from this gate towards the interior of the city. This from its name may be conjectured to have lain close to the port and the water's edge, while another broad street led from thence to the Agora. (Ib.31.) Another street called the Soteira ( $\Sigma \omega$ teipa) was apparently on the opposite side of the city from the Batheia, and must therefore have adjoined the outer sea. ( $f b, 36$.) Immediately adjoining the Agora was the Museum (Moureiov), a public bnilding which seems to have served for festivals and public hanquets, rather than for any purposes connected with its name. (Ib. 27, 29.) There is nothing to indicate the site of the theatre, alluded to by Polyhius on the same occasion, except that it was decidedly within the city, which was not always the case. Strabo does not notice it, hut it mnst have been a building of large size, so as to be adapted for the general assemblies of the people, which were generally beld in it, as was the case also at Syracuse and in other Greek cities. This is particularly mentioned on several occasions; it was there that the Roman ambaszadors
receised the insult which finally led to the ruin of the city. (Flor. i. 18. § 3; Val, Max. ii. 2. § 5; Appian, Samnit. 7.)

Livy inaccurately describes the citadel as standing on lofty cliffs ("praealtis rupibus," xxv. 11): the peoinsula on which it stood rises indced (as observed by Strabo) a little above the rest of the city, and it is composed of a rocky soil; but the whale site is low, and no part of it rises to any considerable clevation. The hills also that surround the Mare Piccolo are of trifling height, and slope very gradually to its banks, as well as to the shore of the outer sea. There can be no doubt that the port of Tarentum, properly so called, was the inlet now called the Mare Piccolo or "Little Sea," but outside this the sea on the S . side of the city forms a bay or roadstead, which affords good shelter to shipping, heing partially sheltered from the SW. hy the two small islands of S. Pietro and $S$. Paolo, apparently the same which were known in ancient times as the Choerades. (Thuc. vii. 33.)

Tareatum was celebrated in abcient times for the salubrity of its climate and the fertility of its territory. Its advantages in both respects are extolled by Horace in a well-known ode (Carm. ii. 6), who says that its honey was equal to that of Hymettus, and its olives to those of Venafrum. Varro also praised its honey as the best in Italy (ap. Macrob. Sat. ii. 12). Its oil and wines enjoyed a nearly equal reputation; the choicest quality of the latter seems to bave been that produced at Aulon (Hor. l. c.; Martial, siii. 125; Plin. xiv. 6. s. 8), a valley in the neighbourhood, on the slope of a bill still called Monte Melone [Aulon]. But the choicest production of the neighhourhood of Tareotum was its wool, which appears to have enjoyed an acknowledged supremacy over that of all parts of Italy. (Plin. xxix. 2. s. 9; Dlartial, l. c.; Varr. R. R. ii. 2. § 18 ; Strab. vi. p. 284; Colum. vii. 2. § 3.) Nor was this owing solely to natural advantages, aa we learn that the Tarentines bestowed the greatest care upon the preservation and improvement of the breed of sheep. (Colum. vii. 4.) Tarestum was noted likewise for its breed of hor:es, which supplied the famous Tarentine cavalry, which was long noted among the Greeks. Their territory abounded also in various kinds of fruits of the choicest quality, especially pears, figs, and chestnots, and though not as fertile in corn as the western shores of the Tarentine gulf, was nevertheless well adapted to its cultivation. At the same time its shores produced abundance of shell-fish of all de. scriptions, which formed in ancient times a favoarite article of diet. Even at the present day the inhabitants of Taranto subsist to a great extent apon the shell-fish produced in the Mare Piccolo in a profusion almost iscredible. Its Pectens or scallops enjoyed a special reputation with the Roman epicures. (Hor. Sat. iu. 4. 34.) But by far the most valnable production of this class was the Murex, which furnished the celebrated purple dye. The Tarentive purple was considered second only to the Tyrian, and for a long time was the most ralaable known to the Romans. (Corn. Nep. ap. Plin. ix. 39. s. 63.) Even in the time of Augustus it continued to enjoy a bigh reputation. (Hor. Ep, ii. 1, 207.) So extensive were the manufactories of this dye at Tarentum that considerable mounds are still visible on the shore of the Mare Piccolo, composed wholly of broken shells of this species. (Swinburne's Travels, vol. i. p. 239.)

The ob mate of Tarentam, thentil joble pro it in 11ar.... for its mildness, was zonनtlly recktomes at: an ? othervating, and was constilered as in mome (ase the canse of the Juxuious and effemmant l.wits ascribed to the mhabitants (" molle Taretrto u," Hor. Sat. ii. 4. 34. "imbelle Tarentom," ld. Ep. i. . 2. 45.) It is probable that this charge, as in many other cases, was greatly exaggerated; but there is no reason to doubt that the Iarentines, like almost all the other Greeks who becarme a manutacturing and conmercial prople, indulged in a degree of luxary far excecting that of the ruder nations of Central htaly. The wealth and opalence to which they attained in the 4th ceatury B. C. naturally tended to aggravate these erils, and the Tarotines are represented as at the time of the arrival of l'yorhas enfeebled and degraded by $\ln x u r i o u s$ indulgences, and devoted almost exclusively to the pursuit of pleasure. To sucb an excess was this carried that we are told the number of their anmal feativals exceeded that of the d.yys of the year. (Theopomp. ap. Athen. iv. P. 166 ; Clearch. ap. Athen. xii. p. 522 ; Strab. vi. p. 280; Aelian, V.H. xii. 30.) Juvenal alludes to their love of feasting and pleasure when he calls it "coronatum ac petuluns madaduinque Tarentum" (vi. 297). But it is certaia, as already observed, that they were not iocapable of war: they furnished a considerable budy of troops to the army of Pyrrins; and in the sea-fight with the Roman fleet off the entrance of the harbour, during the Second Punic War, they displayed buth courage and skill in naval combat. (Liv. xxri. 39.) In the time of their greatest power, according to Straho, they could send into the field an army of 30,000 foot and 3000 horse, besides a body of 1000 select caralry called Hipparclis. (Strab, vi. p. 280.) The Tareutine light cavalry was indeed celebrated thronglumt Girecce, so that they gave name to a particolar description of cavalry, which are mentioned under the name of Tarentines (Tapartivo:), in the armies of Alexander the Grest and his suecessors; and the appellation continued in we down to the period of the Roman Empire. (Arrian, Anab.; Id. Tact. 4 ; Jol. iv. 77, xi. 12 ; Liv. डxxv. 28; Aclian, Tact. 2. p. 14 ; Suidas, s. $v$. Tapartivou.) It is prabable, howerer, that these may have been always recruited in great part among the neighbouring Mensapians and Sallentines, who also excelled as lizht horsemen.

With their habits of luxury the Tarentines undoubtedly combined the retinements of the arts usually asouciated with it, and were diligent cultivators of the fine arts. The great variety and beanty of their coins is, even at the present day, a sufficient proof of this, while the extraordinary numbers of them which are still found in the S . of lialy attest the wealth of the city. Ancient writers :aloo speak of the nombers of piotures, statues, and other works of art with which the city was alorned, and of which a considerable nomber were transported to Rome. (Flor, i. 18; Strab. w1.p, 278; Liv.xxvii.16.) Among these the most remarkatile were the colossal statoc of Jupiter, mentumed by Strabo (l. c.), and which was appar"ntly still ata du: in the Agora in his time: the bronze statue of Hercules ly lysippus already noticed: and a statoe of Vietery, whe ho was also carried to Rome, where it became one of the chief ornaments of the Curia Juia. (Dion Cass. 1i. 22.) Nor were the Tarentines deficient in the coltivation of literature. In addition to Archytas, the l'ythagorean philoonher, eclebrated for his

## TARENTUM.

mut henntil attaimnents aod discoveries, who long Luld at Tarentuin a place somewtat similar to that bt l'ericles at Athens (Diog. Laert, viii. \&; Suid. s.v. 'Apxútas ; Athen. xii. p. 545). Aristoxenus, the celebrated mosician and disciple of Aristotle, was a native of Tarentum; as well as Mlinthon, the dramatic poet, who became the founder of a new speries of burlesure drama which was sobsequently cuitivated hy Sopater and other nuthors. (Suid. s.v. 'Pivणwv.) It was from Tarentum also that the Lomans received the first rudiments of the regular drama, Livius Audronicos, therr earliest dramatic puet, baving been a cireck of Tarentum, who was taken prisoner when the city fell into their hands. (Cic. Brut. 18.)

I'olybius tells as that Tarentum retained many traces of its Lacedaemonian origin in local names and customs, which still subsisted in his day. Such was the tomb of Hyacinthos already mentioned (Pol. siii. 30): the river Galaesus also was called by them the Eurotas (Ib.35), thaugh the dative name uitimately prevailed. Another custom which he nutices as peculiar was that of burying their dead within the walls of the city, so that a considerable space withio the walls was occupied by a decropolis. (Ib. 30.) This custom be ascribes to an oracle, bot it may have arisen (as was the case at Agrigentun and Syracuse) from the iocrease of the city laving led to the original necropolis being inclosed within the walls.

The dame of Tarentam (Taras) was supposed to be derived from a river of the wame of TARAS (Tápas). which is noticed by several ancient writers. (Steph. B. s. v. Tá as ; Paus, x. 10. § 8.) This is commonly identified with a deep, but slaggish, stream, which flows into the sea about 4 miles W. of the entrance of the harboor of Tarentum, and is still called Tara, thoneh corrupted by the peasantry into Fiume di Terra. (Fomanelli, vol. i. p. 251: Swiaburte, vol, i. p. 271.) The more celebrated stream of the Galaesus flowed into the Mare Piccolo or harbour of Tirrentum on its N. shore: it is commonly identified with the small stream called Le Citrezee, an old church near which still retains the name of Sta Maria di Galeso. [GalaEsts.] Another locality is the immediate peighbourhood of Tarentum, the name of which is associated with that of the city by Horace, is AlLos, a hill or ridge celcbrated fur the excellence of its wides. This is ideatified by lucal topographers, thoogh on very slight grounds, with a sloping ridge on the seashore about 8 miles SE. of Tarentum, a part of which bears the name of Monte Melone, supposed to be a corraption of Aulone [ArLox]. A more obscure name, which is repeatedly mentiven in connectiod with Tarentom, is that of Saterius (इatú piov). Fiom the introduction of this name in the oracle alleged to have been given to Phalanthus (Sitrab. vi. p. 279), it seems probable that it was an old mative name, but it is not clear that there ever was a towa or even village of the bame. It is more probable that it was that of a tract or district in the neichbourhood of Tarentum. Stephsnus of Byzantium distinctly calls it $\chi$ '́pa $\pi \lambda \hat{j} \sigma \omega \frac{\text { Tápavzos }}{}$ (s.v. Saripov); and the authority of Servius, who calls it a city (cuvitas) near Tarentum, is not worth much in comparison. There was certaialy no city of the name in historical times. Virgil applies the epithet "Satorium" (as an adjective) to Tarentum itself (Georg. ii. 197; Serv, ad loc. : many commentators, bowever, consider "saturi" from "satur"
to be the true reading），and Horace speaks of＂Sa－ tureianus cabellns＂as eqoivalent to Tarentine． （SaL．i．6．59．）The memory of the locality is pre－ served by a watch－tower on the coast，abont seven miles SE．of Tarentam，which is still called Torre di Saturo（Romanelli，vol．i．p．294；Zannoni Carta del Regno di Napoli）．
（Concerning the listory and ancient institations of Tarentum，see Heyoe，Opuscula，vol．ii．pp． 217－232；and Lorentz，de Civitate Jeterum Ta－ rentinorum，4to．Lips．1833．The present state and localities are described hy Swioborne，vol．i．pp． 225－270；Keppel Craven，Southern Tour，pp． 174－190；and Romanelli，vol．i．pp．282－289；but from the absence of existing remains，the autiquities of Tarentmm have scarcely received as much atten－ tion as they deserve．）

## COINS OF TARENTUM

TARE＇TICA（Tapetikì，or Topetiḱ⿱丶万⿱⿰㇒一乂，árpa，Ptol． v．9．§9），a heaulland of Asiatic Sarmatia in the Pontris Euxions，and in the neighbourhood of the modern town of Sulaski．
［T．H．D．］
TARGINES（Tacino），a small river of Bruttiom， mentioned only by Pliny（iii．10．s．15）among the rivers on the E．coast of that peninsula．It is pro－ bably the stream now called the Tacino，which rises in the monntains of the Sila，and falls into the Gulf of Squillace（Sinus Scylaceus）．
［E．H．B．］
TARI＇CHEAE or TARICHAEAE（Tapixear， Strab．svi．p． 764 ；Joseph．Vita，32，54， 73 ； Taptхaial，Joseph．B．J．iii．10．§ 1，et alibi； Taplxea，Steph．B．s．v．；Taricheae，Suet．Tit． 4 ； Tarichea，Plin．v． 15 ：Eth．Tapixeár $\eta$ ），a city in Lower Galilee situated below a mountaio at the southern end of the lake of Tiberias，and 30 stadia from the city of Tiberias itself．（Joseph．B．J．iii． 10．§ 1．）It derived its name from its extensive maunfactories for salting fish．（Strab．l．c．）It was strongly fortitied loy Josephus，who made it his head－ quarters in the Jewish war ；and it was taken by Titus with great slaughter．（Joseph．B．J．iii． 10. §§ 1－6．）Its ruins stand upon a rising groond， called Kerak，where at present there is a Muslim village，at the sonthern end uf the lake．The river Jordan，in issuing from the lake，runs st first south for abont a furloog，and then turns west for half a mile．The rising ground Kerak stands in the space between the river and lake，and was a place etisily defensible according to the ancient mode of warłare．（Robinson，Bibl．Res，vol，ii．p．387，2nd ed．）

TARNE（Tá $\rho v \eta$ ），is mentioned by Homer（Il．v．

44），and after him by Strabo（ix．p．413），as a town in Asia Minor：but Pliny（v．30）knows Tarne only as a fountain of Mount Tmolus in Lyoia．［L．S．］

TARNIS（Tarn），a river in Gallia，a branch of the Garonne．It rises near Mount Lozere，in the Ccivennes，and flows in the upper part of its course in a deep valley．After ranaing sear 200 miles it joins the Goronne below Moissac．Sidonios Apol－ linaris（24．44）calls it＂citns Tarnis．＂［Lesora．］ Ausonius（Mosella，v．465）speaks of the gold found in the bed of the Tarn：－

## ＂Et auriferum postponet Gallia Tarnem．＂

## ［G．L．］

TARODU＇NUM（Tapbioovvoy），a town is the south－west of Germany，between Slons Abnoba and the Rhenus．（Ptol，ii．11．§ 30．）It is universally identified with Mark Zarten near Freiburg in the Breisgou，which，down to the 8 th centary，bore the name of Zardona，a name which is formed from Tarodonom in the same way in which Zabern is formed from Taberaae．
［L．S．］
TARONA（Tap⿳亠二口⿱⿰㇒一乂⿴⿱冂一⿰丨丨丁口𧘇，Ptol．iii．6．§ 5）a place in the interior of the Chersonesas Taurics．［T．H．D．］

TARPHE（Táp $\emptyset \eta$ ：Eth．Tapфaios），a town of the Locri Epicnemidii，mentioned by Homer（II．ii．533）． It was situated apon a height in a fertile and woody country，and was said to have derived its name from the thickets in which it stood．In the time of Strabo it had changed its name into that of Pharygae （\＄apúyai），and was said to hare received a colony from Argos．It contained a temple of Hera Pbary－ gaea．It is probably the modern Pundonitza．（Nitrab． ix．p．426；Groskord and Kramer，od loc．；Steph． B．s．v．；Leake，Northern Greece，vol，iv．p．179．）

TARPODIZUS（It．Ant．p．230；It．Hier．p． 569：in Geog．Rav．jv．6，Tarpodizon），a towa in the E．of Thrace，on the road from Byzantiom to Anchialus．According to Kiepert，its site answers to that of the modern Bujuk－Derbend；according to Reichard，to that of Kodsje－Tarla；accarding to Lapie，to that of Dewlet－Agatch．But in some maps it is placed nearly due sonth of Sadame，and on or near the river Artiscus：if this is correct， Tarpodizus most have been in the neighbourhond of Erelili．
［J．R．］
TARQUI＇NII（Tapkvvia，Strab．Dionys．；Tap－ Kovivar，Ptol：Eth．Tarquiniensis：Conneto）．one of the must ancient and important cities of Etıaria， sitnated about 4 miles from the Tyrrhenian sea， aod 14 niles from Centumcellae（Civita I＇ccehia）， near the left bank of the river Marta．Alt ancient writers represent it as one of the most ancient of the cities of Etruria；indeed according to a tradition generally prevalent it was the parent or merrupulis of the tweive cities which composed the Etruscan League，in the same manner as Albs was repre－ented as the metropolis of the Latin League．Its own reputed founder was Tarchon，who according to ：ome accounts was the som，according to others the brother， of the Lydian Tyrrhenns；while both versions repre－ sented bim as subsequently founding all the other cities of the league．（Srrab．r．p．219；Sers．ad Aen． x． 179,198 ．）The same superiority of Tarquisii may be considered as implied in the legends that represented the divine being Tages，from whom all the sacred traditions and religious rites of the Etruscans trere cunsidered to emanate，as springing out of the soil at Tarquiaii（Cic．de Div．ii．23； Censorin．de Die Nat．4；Juan．Lyd．de Ost．3．） Indeed it seems certain that there was a close connec－
tion considered as subsisting between this Tages and Tarchon bimself, the eponymons hero of Tarquinii. (Miiller, Etrusker, vol. i. p. 73.) It is impossible here to discuss the historical bearings of these traditions, which seem to point to Tarquinii as the point from whence the power and civilisation of the Etruscans emanated as from a centre, while on the other hand there is another body of traditions which seens to represent that people as gradually extending themselves from the north, and Cortona as the first centre and stronghold of their power. [Etneteia, Vol. 1. p. 859.] A somewhat different version is given by Justin, whe states that Tarquinii was founded by the Thessalians, probably meaning the lelaspians from Thessaly, to whom Hellanicus ascribed the colonisation of Etrmia in general. (Justin, xs. 1; HelIanie. ap Dimys, i. 28.)

But whatever value may be attached to these traditions, they may at least be admitted as proving the reputed higb antiquity and early power of Tarquinii as eompared with the other cities of Southern Etruria: and this is confirmed by the important position it appears to have held, when its name first appears in connection with the lioman history. Cicero calls it " urbem Etrurise florentissiman" at the time when Demaratus the father of Tarquinius Priscus, was sail to have established hiniself there. (Cic. de Rep. ii. 19.) It is remarkable indeed that the story which derived the origin of the Roman king Tarquinius from Corinth represented Lis father Demaratus as bringing with lim Greek artists, and thus appears to ascribe the first oricin or introduction of the arts into Etruria, as well as its religious institutions, to Taxquinii. (Plin. xxxy. 12. s. 43 ; Strab. v. p. 220.) It is unnecessary to repeat here the well-known story of the emigration of an Etruscan Lucumo from Tarquinii to lione, where be became king under the name of Lucius Tarquinius. (Liv, i. 34 ; Dionys. iii. 46 - 48 ; Cie. de Rep. ii. 19, 20; Strab. v. p. 219.) The connection with Tarquinii is rejected by Niebulir, as a mere etymological fable, but it is not easy to say on what grounds. The name of Tarquinius, as that of a gens or family, as well as that of the city, is nodoubtedly Etruscan; the native form being "Tarcnas:" and the strong infusion of Etruscan influence into the Roman state before the cluse of the regal period is a fact which cannot reasumably lie questioned. It is remarkable also that the Roman traditions represented the Tarquinians as joining with the Veientes in the first attempt to restore the exiled Tarquins, e.c. 509 , though from this time forth we do not again hear of their name for more than a century. (Liv. ii. 6, 7; Dionys. v. 14.) The story of the emigration of the eider Tarquin to Rome, as well as that of his father Demaratus from Corinth, may failly be deemed unworthy of belief in its present form; but it is probable that in both cases there was a historical foundation for the tiction.

After the war already mentioned, in the first ycar of the Republic, no subsequent mention of Tarquinii oceurs in loman history till n.c. 398 , when the Tarquinians took up arms, and rataged the Roman territories, while their army was engaged in the siege of Veii. They were, however, intercepted on their march home, and all their booty taken trom them. (Liv, v. 16.) Livy distinctly calls them on this occasion "novi hostes:" but from this time they took an active part in the wars of the Jitruscans with liome. The conquest of Viii in
B.c. 396 , had indeed the effect of bringing the lomans into immediate collision with the cities which lay next beyond it, and annong these Tarquinii and Volsinii seem to have taken the lead. Already in B. C. 389, we find the Tarquinians joining with the other cities of Southern Ftruria in an attempt to recover Sutrium: the next year their territory was in its turn invaded by the Romans, who took the tuwns of Cortuosa and Contenebra, both places otherwise unknown, but which apjear to bave been dependencies of Tarquinii. (Liv. vi. 3, 4.) From this time we hear no more of them till H.c. 358, when the Tarquinians, having ravaged the Roman territories, the consul C. Fabins marched against them, but was defcated in a pitched battle, and 307 of the prisoners taken on the occasion were put to death in the Forum of Tarquinii, as a sacritice to the Etruscan deities. (Liv. vii. 12, 15.) Shortly after, we find the Tarquinians and Faliscans argain in arms, and in the first battle which occurred between them and the Romans they are said to have obtained the victory by putting forward their priests with flaming turches and serpents in their hands, to strike terror into their assailants. (Liv. vii. 16, 17). But the Etruscans were defeated in their tun by C. Marcius Rutilus, who was named dictator to oppose them: and two years later ( $\mathrm{n} . \mathrm{c}$. 354) the Rumans took a sanguinary revenge for the massace of their prisoners, by putting to death, in the Forum at Rome, 358 of the captives taken from the Tarquinians, chiefly of noble birth. ( $/ 6,19$. ) But the spinit of the Tarquimians was not yet subdued, and with the support of the Faliscans and Caerites, who now for a short time took part against Rome, they continued the war till b.c. 351 , when they sued for peace, and obtained a truce for forty years. (Ib. 19-22.)

This truce appears to bave been faithfully observed, for we liear nothing more of bostilities with Tarquinii till n. c. 311, when the Tarquiniana appear to bare united with the other contederate cilies of Etruria in attacking the Roman coluny of Sutrium. They were, however, defeated by the Roman consul Aemilius Barbula, and again the next year by Q. Fabius, who followed up his victory by pabsing the Ciminian forcst, and carrying his arms for the first time iuto Northern Etruria. There is no doubt that the Tarquinians, though not mentioned by name, bore a part in this contest as well as in the great battle at the Vadimonian lake in the following year (n. c. 309), as we find them soon after making their submission to Rome, abd purehasing the favour of the consul Decius by sending him supplies of corn. (Liv, ix, 32, 35-39, 41.) They now ubtained a fresh truce for forts years ( 16.41 ) ; and from this time we bear no more of them as an independent nation. Whether this long truce, like the last, was faithfully observed, or the Tarquinians once more joined in the final struggles of the Etruscans for independence, we know not ; but it is certain that they passed, in common with the other chinf cities of Etrura, gradually into the condition of dependent allies of Bome, which they retained till the Social War (n.c. 90), when they as well as all the other Etruscans oltained the full Roman francbise. (Appian, B. C. i. 49.) The only meution of Tarquinii that occurs in this interval is during the Second Punic War, when the citizens came forward to furnish the expedition of Scipio with sail-cloth for his flect. (Liv, xxviii. 45.) Accurding to the Liber Coloniarun a body of colonists was sent thither by

Gracchus; but though it is there termed "Colonia Tarquinii," it is certain that it did not retain the title of a colony ; Cicero distinctly speaks of it as a "municipiun," and the Tarquinienses are ranked by Pliny among the ondinary municipal towns of Etraria Its municipal rank is further confirmed by inscriptions recently discovered on the site. (Lib. Col. p. 219 ; Cic. pro Caec. 4 ; Plin. iii. 5. s. 8 ; Ptul. iii. 1. § 50 ; Inscr. in Bullett, d. Inst. Arch. 1830 , pp. 198, 199.) From these last records we learn that it was apparently still a flourisbing town in the tirie of the Antonines, and its name is still found in the Tabula near three centuries later (Tab. Peut.) It is probable, therefore, that it survived the fall of the Western Empire, and owed its final desolation to the Saracens.

At the present day the site of the ancient city is wholly desolate and uninbabited; but on a bill about a mile and a half distant stands the modern city of Cometo, the origin of which does not date further back than the eighth or ninth centnry. It was probably peopled with the surviving inhabitants of Tarquinii. The site of the latter is clearly marked: it occupied, like most Etruscan cities, the level summit of a hill, bounded on all sides by steep, though not precipitous escarpments, and ocenpying a space of about a mile and a balf in length, by half a mile in its greatest breadth. It is still known as Turchina, thongh called also the Piano di Civita. Hardly any rnins are now visible, but the outline of the walls may be traced aronnd the brow of the bill, partly by fonndations still in situ, partly by fallen blocks. The bighest point of the bill (farthest to the W. and nearest to the Marta) seems to bave served as the Arx or citadel, and bere the fonndations of some buildings, sapposed to be temples, may be traced. Nnmerons fragments of buildings of Roman date are also visible, and though insignificant in themselves, prove, in conjunction with the inscriptions already mentioned, that the site was well inhabited in Roman times. (Dennis's Etruria, vol, i. pp. $371-385$.)

But by far the most interesting remains now visible nt Tarquinii are those of the Necropolis, which occupied almost the whole of the hill opposite to the city, at the W. extremity of which stands the modern town of Cometo. The whole surface of the hill (says Deanis) "is ragged with tnmuli, or what lave once been such," whence the appellation by which it is now known of Montarozzi. Vast numbers of these tombs have been opened, and have yielded a rich barvest of vases, ornaments, and other oljects of antiquity. But the most important are those of wbich the walls are adoned with paintings, which possess a double interest, both as works of art and from the light they tbrow npon Etruscan manners. It may indeed be asserted in general of the paintings in these tombs that while the influence of Greek art is unquestionably to be traced in their design and execntion, the snbjects represented and the manners they exhibit are purely Etruscan. The number of these painted tombs found at Tarquinii greatly exceeds those which have been discovered on the site of any other city of Etruria; but they still bear only a very small proportion to the whole number of tombs opened, so that it is evident this mode of decoration was far from general. The paintings in many of those first opened, which are figured in the works of Micaliand Inghirami, have since been allowed to tall into decay, and have in great measure disappeared. Detailed descriptions of all the most interesting of them, as well as those more recently
discovered, will be found in Dennis's Etruria (vol. i. pp. 281-364.) [E. H. B.]
TARRACl'NA (Tappákıva, Strab; ; Tappáкךva, Stepb. B.: Eth. Tappppakぃviтクs, Tarracinensis: Terracina), a city of Latium in the more extended sense of that name, but originally a Volscian city, situated on the Tyrrhenian sea, about 10 miles from Circeii, and at the extremity of the Pomptine Marshes. It was also known by the name of ANxUR, and we learn from Pliny and Livy that this was its Volscian name, while Tarracion was that by which it was known to the Latias aod Romans. (Plin. iii. 5. s. 9; Ennius ap. Fest. s. v. Anzur; Liv. iv. 59.) The name of Anxur is frequently used at a much later period by the Roman poets (Hor. Sat. i. 5. 26; Lucan. iii. 84 ; Martial, v. 1. 6, \&c.), obvionsly because Tarracina could not be introdnced in verse; but Cicero, Livy, and all other prose writers, where they are speaking of the Roman town, nniversally cail it Tarracina. The Greek derivation of the latter name suggested by Straho (v. p. 233), who says it was originally called Tpaðเv่, from its rugged situation, is probably a mere etymological fancy. The hirst mention of it in history occurs in the treaty between Rome and Carthage concloded in B. C. 509 , in which the people of Tarracina are mentioned in common with those of Circeii, Antium, \&c., among the sabjects or dependencies of Rome. (Pol. iii. 22.) It seems certain therefore that Tarracina, as weli as Circeii, was included in the Roman dominions before the fall of the monarchy. Bat it is clear that it must have again fallen nuder the dominion of the Volscians, probably not long after this period. It was certainly in the possession of that people, when its name next appears in bistory, in B. C 406 . On that occasion it was attacked by N. Fabius Ambustus, and taken by a sudden assault, while the attention of the Vulscian armies was drawn off in another direction. (Liv. iv. 57; Diod. xiv. 16.) Livy speaks of it as laving at this time enjoyed a long period of power and prosperity, and still possessing great wealth, which was plundered by the Roman armies. A few years afterwards (n. c. 402) it again fell into the hands of the Volscians, through the negligence of the Roman garrison (Liv. v. 8). In B. C. 400 , it was again besieged by the Roman arms under Valerius Potitus, and though his first assaults were repulsed, and be was compelled to have recoure to a blockade, it soon after fell into lis hands. (16. 12, 13.) An attempt of the Volscians to recover it in 397 proved nnsnccessful (1b. 16). and from this time the city continned subject to Rome. Nearly 70 years later, after the conquest of Prwernum, it was thought advisable to secure Tarracina with a Roman colony, which was established there in B C. 329. (Liv. viii. 21; Vell. Pat. i. 14.)

The condition of Tarracina as a Roman colony ia not quite clear, for Velleins notices it as if it had beed one of the "Coloniac Latinae," while Livy certainly does not consider it as such, for he omits its name among the thirty Latin colonies in the time of the Second Punic War, while be on tro occasions mentions it in connection with the other maritime colonies, Antium, Minturnae, \&c. In common with these, the citizens of Tarracins in vain conteuded for exemption from military service daring the Second Panic War, and nt a later period claimed exemption from naval service also. (Liv. xxvii. $38_{1}$ xxxvi. 3.) There can, therefore, be no doubt that Tarracina was a " colonia maritima civium," and it secms to have early become one of
the most important of the maritime tomns sulject to Rome. Its position on the A pian Way, which here first touched on the sea (Strab, v. p. 233; Ilor. Sut, i. 5. 26), doubtless contributed to its prosperity; and an artificial port seems to have in some degree aupplied the want of a matural harbour. (Liv. xxvii. 4.) In a military puint of view also its position was important, as commanding the passage of the Appian II:ay, and the narrow defile of Lautulae. which was situated a short distance from the city on the side of Fundi. (Liv. xxii. 15.) [LaUTULAE.]

Under the Roman Republic Tarracina seems to have contimed to be a considerable and fluurishing town. Cicern repeatedly notices it as one the customary balting-places on the Appian Way, and for the same reason it is mentioned by Horace on his journey to Brundusinm. (Cic. de Orat. ii. 59, ad Fam. vii. 23, ad Att. vii. 5; Hor. Sat. i. 5. 26; Appian, B. C. iii. 12; Val. Mas. viii. 1. § 13.) At the outbreak of the civil war between Caesar and Pompey, Tarracina was occupied by the latter with three culorts under the praetor Rutilius Lupns, but they abanduned their post, when Pumpey wuhtrew to Brundusium. (Caes. B. C. 5. 24; Cic. aul Att. viii. 11, B.) Asstin, during the civil war between Vespasian and Vitellins, Tarracina was evidently rearded as a place of importance in a military point of vien, and was occupied by the partivans of Vespa-ian, but was wrested from them by L. Vitellius just before the deatb of his brother. (Tac. Hist. iii. 57, 76. 77.) It was at Tarracina also that the funeral convoy of Germanicus was met by his cousin Drusus and the chief personages of Rume. (ld. Amn. iii. 2.) The neighbourhood seems to have been a farourite site for villas under the Roman Empire: among others the Emperor Domitian had a villa there (Martial. v. 1. 6): and it was at another villa near the town, on the road to Fundi, that the emperur Galba was born. (Suet. Galb. 4.) In addition to the other natural advantages of the situation, there existed mineral springs in the neighbourbood, which seem to have been much frequented. (Martial, 5. 1. 6, 3. 51.8.) The iutrortant position of Tarracina douhtless prevented i-- falling intodecay as long as the Westem Eupire sulsisted. Its name is found in the Itineraries as a " initas" (Itin. Ant. p. 187; Itin.Hier. p. 611), am even after the fall of the Roman dominion it atpars as a furtreas of inportance during the Gothic wars. (Proc p. B. G. ii. 2, 4, \&e.)

The position of Tarracina at the extrentity of the lomptine Marshes, just where a projectiug ruige of the Volscian mountains rans down to the sen, and separates the marshy traet on the W. from a simular but much smaller tract on the E., which estends from thence towards Fundi, must in all ages have rendured it a phace of importance. The ancient city stood on the lull ahove the manhes. Ilurace distinctly deambers it as standing on lofty rueks, which were conspicnous afir, from their whate colur:-

## " Inquestum zasis late candentibus Ansur"

(11w. Sut, i. 5. 26); and the same rircunstance is alluided to by wher Latin poets. (Luem, iii. 84; Sil. Ital, vii. 392.) Livy also describes the oritinal Vilsians town as "heco alto situm "(v. 12), thom, h it extended ako down the slone of the hill tawats the marnhes (" urbs proma in jalutes," ir. 59). At a later peniud it not unly spread itself down the hill, but occupied a considerable leat at the fout of it
(as the modern city still does), in the neighbourhood of the port. This last must always have been in great part artificial, but the existence of a regular port at Tarracina is noticed by Liry as early as B. c. 210 . (Liv, $x \times v$ ii. 4.) It was subsequently eularged and reconstructed under the Roman Empire, Irobably by Trajan, and again restoned by Antoninus Pius. (Capit, Ant. P. 8.) Its remains are still distinctly visible, and the whole circuit of the ancient basin, surrounded by a massive mole, may be clearly traced, though the greater part or it is now filled with sand. Considerable portions of the ancient walls also still remain, constructed partly in the polygoral style, partly in the more recent style known to the Romans as "opus incertum." Several ancient tombs and ruins of varions bnildings of Ioman date are still extant in the modern city and along the line of the Via Appis. The modern cathedral stands on the site of an ancient temple, of which only the substructions and two columns remain. This is generally calted, though on very uncertain authority, a temple of Apillo. The most celebrated of the temples at Tarracina was, however, that of Jupiter, which is noticed by Livy (xxriii. 11, xl. 45), and the especial worship of this deity in the Volscian city muder the title of Jupiter Anxurus is alloded to by Yingil (Aen. vii. 790). He was represented (as we are told by Servins) as a beautiful youth, and the tigure of the deity corresponding to this description is found on a looman coin of the Vibian family. (Eckhel, vol. v. p. 340.) It is probable that this temple was situated in the lighest part of the city, very probably in the ancient citadel, which occupied the summit of a hill abure the town, where remains of its walls and substructions are still extant.

Tarracina was distant by the Via Appia 62 miles from Rone, and is from the Forum Appii. (Itin. Ant. p. 107̄: Itin. Hier. p. 611 ; Westphal, Rüm. Kamp. p. 68.) Three miles from the city, at the side of the Via Afpia, as well as of the cunal which was frequently used by travellers, was the fountain of Feromia, celebrated by Horace, tugether with the sacred grove attached to it. [Feronia.] [E.H.B.]

TA'RRACO (Tap̧akúv, Ptol. ii. 6. § 17), an ancient city of Spain, probably fonnded by the Plucenicians, who called it Tarchon, which, according to Bochart, means "a citadel." This name was pro bably derived from its situation on a bigh rock, between 700 and $\delta(K)$ feet abrive the sea: whence we find it characterised as "arce potens Tarraco." (Ausun. Clar. Vrb. 9 ; ef. Mart. x. 104.) It was seated on the river Sulcis, on a bay of the Mare Internm, between the Pyrenees and the river Iherus. (Mela, ii. 6 ; Plin. iii. 3. s. 4.) Livy xaii. 22) mentions a " portus Tarraconis;" and according to Elatosthenes (ap. Strab. iii. p. 159) it Inad a naval station or roads (vaú $\sigma \tau 0 \theta \mu 0 \nu$ ) ; but Artennilurus (ap. Strab. l. c.; 1olyb), iii. 76) says with mune probatathy that it had mone, and searcely even an anchoring place; and strabo bimself calls it $\dot{\alpha}$ 人iuevos. This answers better to its prescnt condition; for though a mole was constructed in the 15 th century with the materials of the ancient amphitheatre, and another subsequently by an Eughshman nanked Joln Snith, it still affords but little pratection for shipping. (Ford's Handbook of Sluan. p. 22.2.) Tarraco lay on the main roul along the S. cuast of Spain. (Itin. Ant. pp, 391, 396, $399,448,452$.) It was fortified aud much ea-
larged by the brothers Publius and Cneius Scipio, who converted it into a fortress and arsenal against the Carthaginians. Subsequently it became the capital of the provigce samed after it, a Roman colony, and "conventus juridicus." (Plin. /.c.; Tac. Ann, i. 78 ; Solin. 23,26 ; Polyb. x. 34 ; Liv. xxi. 61; Steph. B. p. 637) Augustus wintered at Tarraco after his Cantabrian campaign, and bestowed many marks of hodour on the city, among which were its honorary titles of "Colonia Victrix Togata" and "Colonia Julia Victrix Tarraconensis." (Grot. Inser. p. 382; Orelli, घo. 3127; coins in Eckhel, i. p. 27 ; Florez, Med. ii. p. 579 ; Mionnet, i. p. 51. Suppl. i. p. 104 ; Sestini, p. 202.) According to Mela (l. c.) it was the richest town on that coast, and Strabo (l. c.) represents its population as equal to that of Carthago Nova. Its fertile plain and suony shores are celebrated by Nartial and other poets; and its neighboarhood is described as producing good wine and flax. (Mart. x. 104, siii. 118; Sil. Ital. iii. 369, xv. 177; Plid. siv. 6. s. 8, xis. 1. 8. 2.) There are still many important ancient remains at Tarragona, the present dame of the city. Part of the bases of large Cyclopean walls near the Quartel de Pilatos are thought to be anterior to the Romans. The building just mentioned, now a prison, is said to hare been the palace of Augustus. But Tarrace, like most other ancient towns which bare continued to be inhabited, has been pulled to pieces by its own citizens for the purpose of obtaining building materials The amphitheatre near the sea-shore has been used as a quarry, and but few vestiges of it now remain. A circus, 1500 feet long, is now built over it, though portions of it are still to be traced. Throughout the town Latin, and even apparently Phoenician, inscriptions on the stones of the houses proclaim the desecration that has been perpetrated. Two ancient monuments, at some little distance from the town, have, however, fared rather better. The first of these is a magnificent aqueduct, which spans a valley about a mile from the gates. It is 700 feet io leogth, and the loftiest arches, of which there are two tiers, are 96 fcet high. The monament on the NWW. of the city, and also about a mile distant, is a Roman sepulchre, vulgarly called the "Tower of the Scipios;" but there is no anthority for assuming that they were buried here. (Cf. Ford, Handbooz, p. 219, seq.; Florez, Esp. Sagr. xxix. p. 68, seq.; \liñano, Diccion. viii. p. 398.)
[T. H. D.]
TARRACONEASIS PROVINCIA (called by the Greeks Tappanwrmoia, Ptol. ii. 6, viii. 4. §5,
 3), at first constituted, as alrendy remarked [Vol. 1. p. 1081], the province of Hispania Citerior. It obtained its new appellation in the time of Augustus from its chief city Tarraco, where the Romans had established themselves, and erected the tribunal of a praetor. The Tarraconensis was Jarger than the other two provinces put together. Its boundaries were, on the E. the Mare Interoum; on the N. the Pyrenees, which separated it from Gallia, and further westward the Mare Cantabricum; on the W., as far southward as the Durins, the Atlantic ocean, and below that point the prorince of Lusitania; and on the S. the province of Lusitania and the province of Buetica, the boundaries of which have been already laid down. (Mela, ii. 6; comp. Strab. iii. p. 166; Plio. ir. 21. s. 35 ; Marciaa, p. 34.). Thus it enbraced the modern provinces of Jurciu, Falencia, CataIniia, Arragon, Vavarre, Biscoy, Asturias, Galli-
cin, the N. part of Portugal as far down as the Dowro, the N. part of Leon, nearly all the Castiles, and part of Amdalusia. The nature of its climate and prodnctions may be gathered from what has been already sxid [Hisp.inia. Vol. 1. p. 1086.] A sommary of the different tribes, according to the various authorities that have treated upon the subject, has also been given in the same article [p. 1083], as well as the particulars respecting its government and administration [p. 108 1.] [T. H. D.]

TARRAGA (Tápp paya, Ptol. ii. 6. § 6\%), called by the Geogr. Rav. (iv. 43) Terracha, a torta of the Vascones in Hispania Tarraconensis (Plin. iii. 3. s. 4). Now Larraga. (Cf. Cellarins, Orb. Ant. i. p. 91.$)$
[T. H. D.]
TARRHA (Táppa, Palusan, ix. 16. § 13; Theophrast. H. P. ii. 2; Steph. B. s.v.; Orac. ap. Euseb. P. E. p. 133, ed. Stephan.; Tápposos, Stadiasm. $\$ \S 329,330$ ), a town on the SW. cosst of Crete between Phoenice and Poecilassus, one of the earliest sites of the Apollo-worship, and the native country of the writer Lucillus. For Tarba (Tápfa, Ptol. iii. 17. § 3) Meursins proposes to read Tarrba There can be little or no donbt that its position should be fixed on the SW. coast of the i,land, at the very entrance of the glen of Häghia Ruméli, where the bold banging mountains bem in the rocky bed of the river. (Pashley, Travels, sol, ii. p. 270). The Florentine traveller Buondelmonti, who visited Crete A. D. 1415, describes considerable remains of a temple and other brildings as existing on the site of the ancient city (ap. Cornelius, Creta Sacra, vol, i. p. 85). [E. B. J.]

TAPSATICA (Tapoátika, Ptol. ii. 17. § 2), called in the Itin. Ant. p. 273, Tharsaticum, a place in Illyricnm, on the road from Aquileia to Siscia through Liburnia, nuw Tersat, to the E. of Fiume. (Cf. Pliny, iii. 21. s. 25 ; Tab. Peut.) [T. H. D.] TARSHISH. [TARTESSL's.]
TA'Rsla (Tapoin, Arian, Ind. c. 37 ), a promontory on the coast of Carmania, visited by tbe fleet of Nearchus. The conjectare of Vincent (Voyage of Nearchus, i. p. 362) that it is represented by the present Ras-al-Djerd appears well founded. It is perbaps the same as the Themisteas Promontorium of Pliny (vi. 25) as suggested by Mïller. (Geog. Graec. i. p. 360 .)
[V.]
TA'RSIUM (Tápotov, Ptol. ii. I6. § 8), a place in Pamonia Inferior, now Tersacz. [T. H. D.]

TARSIUS (T $\dot{\rho} \sigma \sigma=5$ ), a river of Mrsia in the neighbourhood of the town of Zeleia, which had its source in Mount Temnus, and flowed in a northeastern direction through the lake of Miletopolis, aod, issning from it, continued its north-eastern course till it joined the Macestus. (Strab. xiii. P. p. 587.) Strabo indeed states that the river flowed in pumerous windings not far from Zeleia ; bat be can scarcely mean any other river than the one now bearing the dame Balikesri, and which the Turks still call Tarza. Hamilton (Researches, vol. ii. p. J06) identifies it with the Kara Su or Kara Dere Su, which flows into Lake Maniyas. [L. S.]
TARSU'RAS (Tapooúpas, Arrian, Per. P. Eux. p. 10), a riser of Colchis falling into the sea between the Singames and the Hippus. (Cf. Plin, vi. 4. s. 4.) It is probably the same river called Tassiaros in the Tab. Peut.
[T. H. D.]
TABSUS (Tapoós: Eth. Taponvós or Tapocés). sometimes also called Tarsi (Tapaob), Tersus Tep-
 to distingnish it from other places of the same name

4 E

## TARTESSCS

was the chief city of Cilicia, and ono of the most important places in all A sia Minor. It was situated in a most fertile and productive plain, on both sides of the river Cydnus, which, nt a distance of 70 stadia from the city, flowed into a lamon called khegma or Bliegmi. This lagoon formed the port of Tarsus, and was connected with the sea. The situation of the city was most favourable, for the river was navigable up to larsus, and several of the most important ronds of Cilicia met tbere. Its foundation is aseribed to Surdanapalns, the Assyrian king, and the very name of the eity seems to indicate its Semitic origin. But the Greeks claimed the honour of baving colunised the phace at a very early period; and, amonr the many sturies related by them about the colonisation of Tarsus, the one adopted by Strabo (xiv. p. 673; comp. Steph. B. s. $x$.) ascribes the foundation to Argives who with Triptolemus arrived there in search of 10 . The first really historical mention of Tarsus occurs in the Anabasis of Xenophon, who describes it as a great and wealthy city, situated in an extensive and fertile plain at the fout of the passes of Mount Taurus leading into Cappadoeia and Lycaonia. (Anab. i, 2, § 23, \&c.) The city then eontained thic palace of syennesis, king of Cilicia, but virtually a satrap of Persia, and an equivocal ally of Cyrus when he marched against his hrother Artaxerxes. When Cyrus arrived at Tarsus, the city was for a time given ap to plander, the troops of Cyrns being exasperated at the loss sustained by a detachment of Cilicians in crossing the mountains. Cyrus then concluded a treaty with Sseanesis, and remained at Tarsns for 20 days. In the time of Alesander we no longer lear of kings; but a Persian satrap resided at Tarsus, who fled before the young conqueror and left the city, whicb surrendered to the Macedonians withont resistance. Alexander himself was detained there in consequence of a dangerons fever bronght on by bathing in the Cylnus. (Arrian, Anab. ii. 4; Curt. iii. 5.) After the time of Alesander, Tarsus with the rest of Cilicia belonged to the enppire of the Selencidae, except daring the short period when it was connected with Erypt under the secund and third Ptolemy. Pompey delisered Tarsus and Cilicia from the dominion of the eastern despots, hy making the country a Roman province. Notwithstanding this, Tarsus in the war hetween Caesar and Pompey sided with the former, who on this account honoured it with a personal visit, in consequence of which the Tarsians Whansed the name of their city into Juliopolis. (Caes. B. Ale.e. 66 ; Dion Cass. x1vii. 24; Flor. iv. 2.) Cassius afterwards punished the city for this attachwent to Caesar by ordering it to be plundered, but M. Antuny rewarded it with municipal freedom and exwuption from taxes. It is well knowa how Antony monwed Cleopatra at Tarsus when that queen sailed uf, the Cyims in a masnificent ressel in the discuise if Aphrodite. An_nstus subsequently increased the favour previously beatowed upon Tarsus, which on cuins in called a " libera civitas." thuring the first centuries of the empire Tarsus was :1 place of great impartance to the lomans in their eampaigns against the Parthian and l'ersians. The emperor Tacitus, His brother F'lorian, and Maximinus and Julian died at Tarsur, and Julian was buried in one of its suhurbs. It continued to tre an opulent torn until it fell into the hasuls of the Suracens. It was, however, taken from them in the serond half of the 10th century by the emperor Niepphorus, but was sonn after again restored to them, and has remained in
their hands ever since. The town still exists ander the name of Tersoos, and though greatly redaced, it is still the chief town of that part of Karamania. Few important remains of antiquity are now to be seen there, but the country around it is as delightful and as productive as ever.

Tarsus was not only a great commercial city, bot at the same time a great seat of learning and plilosnply, and Strabo (xiv, p. 673, \&c.) gives a long list of eminent men in philosoplyy and literature who added to its lustre ; but none of them is mone illustrious than the Apostle Paul, who belonged to one of the many Jewish families settled at Tarsus. (Acts, x. 30, xi, 30, xv. 22, 41, xxi. 39; comp. Itol. v. 8. § 7: Dind. xiv. 20; Hierocl. p. 704; Stadiasm. Mar. M. § 156; Lpake, Asia Minor, p. 214: Russegger, Reisen in Asic $n$, i. 1. p. 395, full., 2. p. 639 , foll.)

Another town of the name of Tarsus is said to have existed in Bithynia (Steph, B. s v.), but nothing is known about it.
[L. S.]

COTS OF TARSUS.
TARTARUS (Tartaro), a river of Venetia, near the borders of Gallia Transpadana. It is intermediate between the Athesis (Adige) and the Padus ( $P u$ ) ; and its waters are now led aside by artificial canals partly into the oue river and partly into the other, so that it may be called indifferently a tributary of either. In ancient times it seemas to have had a recognised mouth of its own, though this was even then wholly artificial, so that Pliny calls it the " fossiones Philistinae, quod alii Tartarum vocant." (Plin. iii. 16. 8, 20.) In the upper part of its course it formed, as it still does, extensive marshes, of which Csecina, the general of Vitellius, skilfully availed himself to corer his position near Hostilia. (Tac, Hist. iii. 9.) The river is here still called the Tartaro: luwer down it assomes the name of Canal Bianco, and after passing the tomn of Adris, and sending off part of its woters right and left into the $P_{0}$ and Adige, discharges the rest by the channel now known as the Po di Lerante. The river Atrianus ('A piavòs mo $\quad$ aرús), mentioned by Ptoleny (iii. 16. § 20), could be no other than the mouth of the Tartarus, so called from its flowing by the city of Adria; but the clianaels of these waters bave in all ages been cbanging.
[E. H. B.]
TARTESSUS (Taptnनбós, Herod, i. 163; Tap$\tau \eta \sigma \sigma \dot{s}$ and Tapte $\dot{\delta} s$, Diodor. Siculus, Frag. lib. xxv.), a district in the south of Spain, lying to the west of the Colamns of Hercules. It is now the prevailing opinion ameng biblical critics that tho Tarshish of Scripturo indicates certain localities in the sonth of Spain, and that its name is equivalent to the Tartessus of the Greek and Roman writers. The connection in which the name of Tarshish oecurs in the Old Testament with those of other places, points to the most western limits of the world, as known to the Hebrews (Genes, x. 4; 1 Cheron. i. 7 ; Psalme, Is 土ii. 10; Isaiah, Isvi. 19);
and in like manner the word Tartessus, and its derivative adjectives, are employed by Latiu writers as synonymous with the West (Ovid, Met. xiv. 416 ; Sil. Ital. iii. 399 ; Claud. Epist. iii. v. 14). Tarshish appears in Scripture as a celebrated emporium, rich in iron, tin, lead, silver, and other commodities; and the Phoenicians are represented as sailing thither in large ships (Ezek. sxvii. 12, xxviii 13; Jerem. x. 9). Lsaiah speaks of it as ove of the finest colonies of Tyre, and describes the Tyrians as bringing its products to their market (xxiii. 1, 6, 10). Among profuue writers the antiquity of Tartessus is indicated by the myths connected with it (Strab. iii. p. 149; Justin, xliv. 4). But the name is used hy them in a very loose and indefinite way. Sometimes it stands for the whole of Spain, and the Tagus is represented as belonging to it (Rutilius, Itin. i. 356 ; Cland. in Rufu, i. 101; Sil. Ital. xïi. 674 , \&c.). But in general it appears, either as the name of the river Baetis, or of a town situated near its moutb, or thirdly of the country south of the middle and lower course of the Baetis, which, in the time of Strabo, was inbabited by the Turduli. The Buetis is called Tartessus by Stesichorus, quoted by Strabo (iii. p. 148) and by Avieuus (Ora Marit. i. 224), as well as the town situated between two of its mouths ; and Miot (ad Herod. iv. 152) is of opinion that the modern town of S. Luear de Barameda stands on its site. The coontry near the lower cuarse of the Baetis was called Tartessis or Tartesia, either from the river or from the town; and this district, as well as otbers in Spain, was occupied by Phoenician settlements, which in Strabo's time, and even later, preserved their national cnstoms. (Strab iii. p. 149 , xvii. p. 832 ; Arr. Exp. Alex. ii. 16; App. Hisp. 2 ; Cunst. Porphyrog. de Then. i. p. 107, ed. Bonn.) Tliere was a temple of Hercules, the Phoenician Melcarth, at Tartessus, whose worship was also spread aunongst the neighbomring Iberians. (Anr: l.c.) About the middle of the seventh century B. C. some Samiot sailors were driven thither by stress of weather; and this is the first account we have of the intercourse of the Greeks with this distant Phoenician colony (Herod, iv. 152), About a century later; some Greeks from Phocaea likewise risited it, and formed an alliance with Arganthonius, king of the Tartessians, renowned in antiquity for the great age which he attained. (Herod. i. 163; Strab, iii. p. 151.) These connections and the vast commerce of Tartessas, raised it to a great pitch of prosperity. It traded not oaly with the mother country, but also with Africa and the distant Cassiterides, aud bartered the manufactures of Phoenicia for the productions of these countries (Strab. i. p. 33; Herud. iv. 196 ; cf. Heeren, Ideen, i. 2. §§ 2, 3). Its riches and prosperity bad become proverbial, and we find them alluded to in the verses of Anacreon (ap. Strab. iii. p. 151). The neighbouring sea (Fretum Tartessium, Avjen. Or. Mar. 64) yielded the lamprey, one of the delicacies of the Foman table (Gell. vii. 16) : and on a coin of Tartessus are represeuted a fish and an esr of grain (Mionnet, Med. Ant. i. p. 26). We are unacquainted with the circumstaaces which led to the fall of Tartessus ; but it may probably have been by the hand of Hamilear, the Cirthaginian general. It must at all events have dissppeared at an early period, since Strabo (iii. pp. 148, 151). Pliny (iii. 1, iv. 22, vii. 48), Mela (ii. 6), Sallust (Hist. Fr. ii.), and others, confouuded it with arore recent Pboeaician colonies, or took its name to be an ancient appellation of them.
[T.H.D.]

TARCALTAE (Tapov́aital, Ptol. iv. 6. §19), a people of Libya Interior.
[T. H. D.]
TARVEDUM. [ORCAs.]
TARUENNA or TARUANNA (Tapov́avva, Ptol. ii. 9. §8), a town io North Gallia, and according to Ptolemy an inland town of the Morini. [Monnsi.] It is written Teruanna in the Table, where it is marked a capital town, and the modern name is Térouenne. It is mentioned in several Roman routes. The distance between Gesoriacum (Bonlogne) in the Antonine Itin, and Taruenna dues not agree with the true distance; nor does the distance in the same Itin. between Taruenna and Castellum (Cassel) agree with the actual measurement. It both instauces we must assume that there is an error in the numerals of the Itin. D'Anville says that the Roman road appears to exist between Terouenne and the commencement of the Boulenois, or district of Boulogne, near Devre, where it passes by a place called La Chaussée. There are also said to be traces of a Roman road from Itius Portus (Fissant) to Terouenve.
[G. L.]
TARVESEDE (lt. Ant. p. 279) or TARVESSEDO, according to the l'euting. Tiable, was a place in Nhaetia on the road from Mediolanum leading by Comum to Augnsta Vindelicorum. Its exact site is now unknown, though it seems to have been situated near Torre di Fercella.
[L. S.]
TARVI'SIUM (Tapsiotov: Eth. Tarvisianus: Treviso), a town of Northern Italy, in the province of Venetia, situated on the Jeft bank of the river Silis (Selc), about 15 miles from its mouth. The name is not mentioned by any of the geographers, though Pliny speaks of the Silis as flowing "ex montibus Tartisanis," in a manner that would lead ns to suppose it to have been a municipal town (Plin. iii. 18. s. 22), and this is confirmed by an inscription given by Muratori (Inscr. p. 328). After the full of the Western Empire it appears as a cousiderable city, and is repeatedly noticed by Procopius during the Gothic Wars, as well as by Cassiodorus and Paulus Diaconus. (Cassiod. Far. x. 27; Procop. B. G. ii. 29, iii. 1, 2; P. Diac. Hist. Lang. ii. 12 , iv. $3,8.28, \&$ c.) It retained this consideration throughout the middle ages, and is still a flourishing city under the name of Treviso. [E. H. B.]

TARUS (Taro), a river of Gallia Cispadana, one of the southern tributaries of the Padus, which crosses the Aemilian Way between 5 and 6 miles west of Parma. (Plin. iii. 16. s. 20 ; Geogr. Rav. iv. 36.)
[E. H. B.]
TAKUSATES are mentioned by Caesar (B. G. iii. 27) among the Aquitanian peoples who submitted to P. Crassus: "Vocates, Tarusates, Elusates." After Crassus had defeated the Sotistes [Sotiates] he entered the territory of the Vocates, and Tarusates, a statement which gives some indication of their position. Pliny (iv. 19) places the Tarusates between the Succasses and Basabocates; but the MSS, reading io Pliny seems to be Latusates, which probably should be Tarusates, There appesrs to be no variation in the name in the MSS. of Caesar. D'Anville conjectures that the name Tarusates is preserved in Tursan, or Teurson, a part of the diocese of Aire. The town of Aire is on the Aturis (Adour). [G. L.]

TARC'SCONIENSES, as the name stands in Ilarduin's edition of Pliny (iv. 4), but the reading is doubtful. Harduin found Taracunonienses in five MSS., and there are other variations. Besides Tarascon on the Rhone, there is Tarascon on tł.e

Arriege，a branch of the Garonne．This Tarascon is in the Pays de Foix，and in a valley at the foot of the Pyrenees，which circumstance seems to indi－ cate more probably the position of a small tribe or people than that of Tarascon on the Rhone．This Tarascon on the Amriege is mentioned in middle age documents under the name of Castrum Tarasco． lliny＇s Tarusconienses，or whitever may be the true name，are enumerated among the Oppida Latina of Narbonensis．
［G．L．］
TASCLACA，a town in Gallia，placed by the Table between Avaricum（Bourges）and Caesaro－ dunum（Tours）．The first station from Avaricum is Ciauris，supposed to be Chabris on the Cher， and the nist is Tasciaca，supposed to be Tezée，also on the Cher．But the number axilii．placed in the Table at the name of Tasciaca，which numher should represent the distance from Chabris to Tezëe， is nearly the distance between $T_{t \text { eee e and } \text { Tours，}}$ and accordingly there is some error bere．The Table gives no distance between Tasciaca aod Caenarodunum．（D＇Anville，Notice；Ukert，Gal－ lien）
［G．L．］
TASCONI is the name of a Gallic people in the Narbouensis，mentioned by Pliny（iii．4），as the name is real in tive MisS．There is a sumall river Tescon or Tescou，which flows into the Tarn，neat Montauban．DAnville quotes a life of S．Théo－ dard，archbishop of Narboane，which speaks of this river as called Tasco by the people of that part and as the limit between the territories of the Tolosani， or penple of Toulouse，and the Caturcenses，or peo－ ple of Cahors．This is a valuable passage，for it shows how far north the Narbonensis，to which the tervitory of Toulouse belonged，estended in this part of its fiontier；and it also confirms the conjec－ ture about the northern limits of the Rateni Provin－ ciales［Rctexi］，who were also included in the Nabbmensis．

## TASFA．［D．til．］

TATTA LACUS（ $\dot{\eta}$ Tár $\tau a$ ），a large salt lake on the frontiers between Lycaonia and Galatia；it bad originally belonged to Phrygia，but was alterwards thnexed to Lycaonia．Its waters were so impreg－ nated with brine，that any substance dipped into it， was immediately incrusted with a thick coat of salt； even birds flying wear the surface had their wings moi－tened with the saline particles，so as to become incapable of rising into the air，and to be easily caught．（Strah．xii．p． 568 ；Plin．xxxi． 41,45 ；Dios－ corid．v．126．）Stephanus Byz．（s．v．Botietov）speaks of a salt lake in Plrygia，which he calls Attaea （＂Aтtaua），near which there was a torn called Botienm，and whieh is probably the same as Lake Tatta．The Turks now call the lake Tuzla，and it still provides all the surrounding country with salt． （Leake，Asiat Minor，p．70．）
［L．S．］
TATA．［TACM．］
TAUA（Tava，Steph．B．s．v．；Taov́a，Ptol．iv． 5. $\S 50$ ；Taba，Itin．Aut．p．153），a town in Lower Asgypt，sithated on the left bank of the Canopic arm of the Nile，S．of the city of Naucratis．It was the capital if the small I＇hthemphuthic Nome（Plin． v．9．8．9），and is supposed to be represented by the prescht Thuouah．（1）Anville，Mumbire sur TMeypte，val．i．p．82．）
［W．B．D．］
＇AUCIII＇RA or THUCII＇lRA（Taíqetpa，Her d． iv．171，et allii；Tenixeipa，Hieroul．p．732；1lin．v． 5．s．5，\＆c．），a town on the coast of Cyrenaica， founded by Cyrenc．It lay 200 stadia W．of Pto－ lemnis．Cuder the Ptolemies it obtamed the name
of Arsinö̈．（Strab．xxii．p．836；Mela，i．8；Plin l．c．）At a later period it became a Roman colony （Tab．Peut．），and was fortified by Justinian．（Pro－ cop．de Aed．vi．3．）Tauchira was particularly noted for the worship of Cybele，in honour of whom an annual festival was celebrated．（Synes．Ep．3．）It is the same town erroncously written Tápixa by Dioloras（xviii．20）．It is still called Tochira．（Cf． Della Cella，J゙agg．p．198；Pacho，Voyage，p． 184．）
［T．H．D．］
TA＇TIUM（Taovion，Taútov）or TAVIA，a town in the central part of enstern Galatia，at some dis－ tance from the eastern bank of the river Halys，was the chief town of the Galatian tribe of the Trecmi， and a place of considerable commercial importance， being the point at which five or six of the great roads met．（Plin．v． 42 ；Strab．xii．p． 567 ；1＇tol．v． 4. §今 9；Stupb．B．s．v．＂A $\gamma \kappa u p a ;$ Hierocl．p．696；／f． Ant．pp．201，203．）It contained a temple with a colossal bronze statue of Zeus，Leake（Asia Minor， p．311）is strongly inclined to believe that Tshormu vccupies the site of ancient Tavium；but Hamilton （Researches，i．p．379，\＆c．）and most otber geo－ graphers，with much more probatility，regard the ruins of Bughaz Kieui， 6 leagues to the north－rwest of Jazgat or Juzghat，as the remains of Tavium． They are situated on the slope of lefty and steep rocks of limestone，some of which are adorned with sculptures in relief．There are also the foundations of an immense buitding，which are believed to be remaius of the temple of Zeus．（Comp．Hamilton in the Journal of the Roy．Geogr．Soc．vol．vii．p． It，foll．；Cramer，Asia Minor，ii．p．98．）［L．S］．

TAULA＇NT11（Tau入ávzıoı，Ptol．iii．13．§3），a people of Roman Illyria，in the neigbbourbood of Epidarnnes and Dyrrachium．In ancient times they were a powerful tribe，possessing several cities，and governed by their own kings，but subsequently they were reduced to subjection by the kings of Illyria， and at the time when the Romans waged war with Teuta they had sunk iato insignificance．（Cf， Thacyd．i． 24 ；Arrian，Anab．i．5；Mela，ii．3； Liv．xlv． 26 ；Plin．iii．22．s．26．）Aristote relates that they had a method of preparing mead from boney．（Jir．Ausc．t．ii．p．716．）［T．H．D．］

TAUM，TAUS，or TAVA（Tauv́a elóquots，I＇tol． ii． 3 ．§5），a bay on the E，coast of Britannia Barbara． （Tac．Agr．22．）Now Frith of Tay．［T．H．D．］

TAUM（AD），a place in the SE．of Britannia Romana，in the territory of the Iceni（Tab．Peut．）． Piobably Yarmouth，
［T．H．D．］
TAUNUS MONS，a range of hills in western Germany，beginning near the river Nicer（Neckar）， and running northward till they reach the point where the Moenus（Main）joins the Rheuns． （ Pomp．Mels．iii．3；Tac．Ann．i．56，xii．28．） This range of hills still bears its ancient name， though it is sometimes simply called the Höhe，that is，the Height，Taunus being probably the Celtio word Dun or Daun，which signifies a height．In various places along this range of hills Roman inscriptions have been found，in which Cives Tau－ nenses are mentioned，from which it may be inferred that there once existed a town of the name of Taumus．（Orelli，Inscript．nos．181，4981，4982； Wilhelm，（iermanien，p．44．）
［L．S．］
TAUliA＇NIA，a town of Campania，mentioned only by lliny（iii．5．5，9）as having in his time en－ tirely disappeared，like Stabiae，Ile affords no clue to its position．The name of Taurania（Taupavia） is found also in the older editions of Stephanus of

Byzantium ; but it appears that the true readin; is Taurasia. (Steph. B. s, v. el. Mein.) [E. H. B.]

TAURAN1'TIUM, a district of Armenia Major lying N. of Tigranoecta, in the direction of Artaxata. (Tac. Ann, xiv. 24; Cf. Moses Chor. i. 5; Ritter, Erdkunde, x. p. 650, sq.)
[T. H. D.]
TAURA'S1A (Taurasi), an ancient city of Samnium, in the country of the Hirpini sitnated on the right bank of the river Calor, about 16 miles above its junction with the Tamarus. The name of the city is known ouly from the inscription on the tomb of L. Scipio Barbatus, which records it among the cities of Simmium taken by him during the Third Samnite War. (Orell. Inscr. 550.) It was probably taken by assault, and suffered severely, for no subsequent mention of the town occurs in history : but its territory ("ager, qui Taurasinorum fuerat"), which was doubtless confiscated at the same time, is mentioned long afierwards, as a part of the "ager publicus populi Romani," on which the Apuan Ligurians who had been remored from their own aboles were established by order of the senate. (Liv. xl. 38.) These Ligurians appear to bave been settled in the plain un the banks of the Tamarus near its junction with the Calor ; but there can be little doubt that the modern village of Tasrasi, though 16 miles further S., retains the name, and marks (approximately at least) the site of the ancient Tanrasia.

Several modern writers identify these Taurasioi Campi with the Arasini Campi near Beneventum, which were the scene of the defeat of Pyrrhus by M': Curins Dentatus (Flor. i. 18; Oros. iv. 2), and the suggestion is probabie enongh, though unsupported by any authority. [Beneventum.] [E, H. B.]

## TAURAUNITES. [Bagraudanene.]

TAURE'SIUM (Taupウ́бuav, Procop. de Aed, iv, 1. p. 266), a place io Moesia Superior, near Scnpi or Justiniana Prima. It was situated in the Hiemus, not far from the borders, and was the birthplace of the emperor Justinian. (Cf. Gibbon, vol. v. p. 79, ed. Suith.)
[T. H. D.]
TAURI (Tavpon, Strab. vii. p. 308), the inhabitants of the Chersonesus Taurica, or modern Crimea. They were probably the remains of the Cimmerians, who were driven out of the Chersonese by the Scythans. (Herod. iv. 11, 12; Heeren, Ideen, i. 2. p. 271 ; Mamnert, iv. p. 278.) They seem to have been divided into sereral tribes: but the two main divisions of them were the nomad Tauri and the agricuitural. (Strab. vii. p. 311.) The former possessed the northern part of the country, and lived on meat, mare's milk, and cheese prepared from it. The agricultural Tauri were somewhat more civilised; yet altogether they were a rude and saraze people, delighting in war and plunder, and particularly aldicted to piracy. (Herod. iv. 103 ; Strab. vii. p. 308 ; Mela, ii. 1 ; Tac. $A n n$. xii. 17.) Nevertheless, in early times at least, they appear to have been united onder a monarchical government (Herod. iv. 119). Their religion was particularly gloomy and horrible, consisting of human sacrifices to a virgin goddess, who, according to Ammianus Marcellinus (xxii. 8. s. 34), was named Oreiloche, though the Gieeks regarded her as identical with their Artemis, and called her Tauropolos. (Soph. Aj. 172 ; Eur. Iph. Taur. 1457 ; Diod. iv. 44 ; Ach. Tat. viii. 2 ; Strab. xiii. 535 ; Bückh. Inser. ii. p. 89.) These victims consisted of shipwrecked persons, or Greeks that fell into their hands. After killing them, they stack their heads npon poles, or,

TAURICA CHERSONESLS.
1109
werchath to Ammianns (l.e.), affixed them to the wall of the temple, whilst they cast down the bodies from the rock on which the temple stood. (Herod. iv. 103 ; Ov. ex Pont. iii. 2 45, seq., Trist. iv. 4. 63.) According to a tradition among the Tauri themselves, this goddess was Iphigenin, the daughter of Aganemuon (Herod. l.c.) They had also a custom of cutting off the heads of prisoners of war, and setting them on poles above the chimneys of their houses, which usage they regarded as a protection of their dwellings ( $I b$ ). If the king died, all his dearest friends were baried with him. On the decease of a friend of the king's, he either cut off the whole or part of the deceased person's ear, according to his dignity. (Nic. Damasc. p. 160, Orell.)
[T. H. D.]
TAURIA'NUA (Traxiano), a town on the W. const of Bruttium, near the mouth of the river Metaurus (Marro). Its name is mentioned by Mela, who places it hetween Scylla and Metauram. It was probably, therefore, situated to the S. of the river, while the town of Metaurum was on its N. bank. Subsequontly all trace of the latter disappears ; but the name of Tanriana is still found in the Tabula, which places it 23 miles S. of Vibo Valentia. (Mel. ii. 4. §8; Tab. Peut.) It became the see of a bishop in the later ages of the Roman empire, and retained that dignity down to the time of Gregory V1I., when the town bad fallen into completo decay. Its ruins, however, still exist, and the site is said to retsin the pame of Traviana (Holsteu. Not. ad Clurer. p. 299; Romanelli, vol. i. p. 70. )

There can be no doubt that the "Tanroentum oppidum " of Pliny (iii. 5. s. 10), which he mentions immedintely after the "Metaurus amnis," is the same place that is called by Mela Thuriannm. [E. H. B.]

TAU'RICA CHERSONE'SUS ( $\bar{\eta}$ Tavpuk̀ Xepabrทoos, Ptol. iii. Arg. 2, \&c.), a peninsula stretcliing into the Pontus Euxinus from Sarmatin, or the conntry of the nomad Scythians, with which it is connected by a narrow isthmus, anciently called Taphrus, or Taphrae, now the isthmus of Pexecop The peninsola also bore the name of Cbersonesus Scythica, and was sometimes styled simply Taurica, (Plio. ir. 12. s. 26 ; Seylax, 1. p. 29, Huds.) It is now called the Crimea, from the once famons eity of Eski-Krim; but since its incorporation with the Russian empire, the name of Taurica bas also been again applied to it.

The isthmus which compects the peninsula with Sarmatia is so slender, being in some parts scarcely 40 stadia or 5 miles across (Strab. rii. p. 308; Clarke, Trav. ii. p. 314, 4th ed. 1816), as to make it probable that in a very remote period Taurica was an istund. (Plin. b.c.; cf. Pallas, Voyages, \&c., ii. p. 2, Fr. Transl. 4to.) The ancients compared it with the Peloponnesus, both as to size and slanpe (Strah, vii. p. 310; ef. Herod. iv. 99); and this comparison is sufficiently happy, except that Taurica throws out another smaller peninsula on its E. side, the Bosporan peninsula, or peninsula of Kertsch, which helps to form the S. boundary, or coast, of the Palus Macotis. The Chersonese is about 200 miles across in a direct line from Cape Tarchan, its extreme W. point, to the Straits of Kertsch, and 125 miles from N. to S., from Perecop to Cape Kikineis. It contains an area of about 10,050 square miles. Nearly three-fourths of Tanrica consist of flat plains little elevated above the sea; the remainder towards the S . is moun-
tainous. The NW. portion of the low colmtry, or that which would lie to the W. of a It... drawu from the isthmus to the month of the river Alma, consists of a sandy soil interspersed with salt lakes, an evidence that it was at one time covered by the sea (Pallas, IV. p. 605, \&c.); but the I: and S. part has a fortile mould. The mountain chain (Taurici Montes) begins to rise towards the centre of the peninsula, gently at first on the N., but increasing in height as the chain appronches the sea, into which it sinks steeply and abruptly. Hence the const at this part presents huge cliffs and precipices, and the sea is so deep that the lead often finds no bottom at the distance of a mile or two from the shore. From these mountains, which extend from Symbolon, or Balaclana, on the W., to Theodosia, or Caffic, on the E., many bold promontories are projected into the sea, enclosing between them deep and warm valleys open to the S., and sheltered from the N. wind, where the olive and vine flourish, the apricut and almond ripen, and the laurel creeps among the dark and frowning eliffs. The most remarkable mountains of this chain are that anciently called the Cimmerium at the N . extremity, and the Trapezus at the S . (Strab. vii. p. 309.) The former, which is said to have derived its name from the Cimmerians, once dominarit in the Bosporus, is now called AghirmischDrahi. It lies nearly in the centre of the peninsula, to the NW. of the aucient Theodosia, and near the town of Eski-Krim, or Oll Crim. Some writers, however, identify Cimmerium with Nount Opouk, on the S. enast of the peninsula of Kertsch. (Kühler, Mém. de l.Acud. de St. Petersb. 1824, p. 649, seq. ; Dubois de Montperreux, Voyages, ge. v. [1. 253, seq.) But Trapezus is by far the hizhest mountain of Taurica. Kolll estimates its height at 5000 Geman feet (Reisen in Suidrusslamd, i. p. 204); other authorities make it rather loss, or 4740 feet. (Neumann, Die Hellenen im Scythenturde, p. 448.) According to Mr. Seymonr, it is 5125 English feet Ligh. (Russia on the Blacks Sca, p. 146.) Its furm justifies its ancent rame, and is said to resemble that of the Table Mountain at the C(ly) of Guod Ilope (Kobl, 1l.). A goved idea of it may be obtained from the vipurte is Pallas (ii. p. 196). As it stands somewhat isolated from the reat of the chain, it presents a very striking and remarkable object, esprecially from the sea. At present it is called Tchatyr-Dagh, or the Tent Jountain. The other nuroutains scldom exceed 1200 feet. Their geclozical structure preseuts many striking deviations from the usual arrangement, especially in the abbence of granite. These anomalies are fully demeribed by Pallas in his second volume of travels. That part of Taurica which lay to the E. of them was called the Rugged, or Rocky, Cbersonesus (трךкè, Herod. L. c.) It is in these mountuins that the rivers which water the peninsula have their sources, none of which, however, are considerable. They flow principaily from the sorthern side, from which they descend in picturesque cascades. Only tro are mentioned by the ancients, the Thaspsis and the Istrimus. At present the most fertile distriets of Tamrica are the calcareous valloys annog the mountains, which, though often covered with only a thin layer of mould, proluce excellent wheat. The nature of the comatry, however, dues nut now correspand with the descriptions of the ancteuts. Strabo (l. c.) praises its fertility in produc-

## TAURICA CHERSONESUS.

L.. Wrin, especially in that part which lies hetween l'anticapaeum (Kertsch) and Theodosia (Caffa), Which at present is a desolate and monotonous sterpe. But this may probably be accounted for by the physical and political revolutions which the country has undergone. Taurica yielded a large tribute of wheat to Mithridates Enpator, King of Bosporas. That stivereign tonk much interest in promoting the cultivation of the country, especially by the planting of trees; but all his care to rear the laurel and the myrtle in the neighbonrhood of Panticapaeum is said to have been vain, though other trees grear there which required a mild temperature. (Plin. zvi. s. 59.) Wine was produced in abundance, as at the present day, and the custom mentioned by Strabo (p. 307), of covering the vines with earth during the wioter, is still observed, thongh Pallas considers it mnnecessary (Toyages, gic. ii. p. 444.)

The interest connected with the ancient bistory of the Tauric Chersonese is chietly derived from the maritime settlements of the Greeks, and our attention is thus priacipally directed to the coasts. An account of the barbarous people who iohatited the peninsula at the time when these settlements were made is given in a separate article [Taumi]. Its coasts, like thnse of the Euxine in general, were early risited by the Jlilevians, who planted some flourishing colonies upon it. Besides these we find a Dorian colony established near the site of the present Sebastopol; and, if we may believe Aeschines (contra Ctesiph. p. $141, \mathrm{sq}$.), the Athenians once possessed the toirn of Nymphacon on the Cimmerian Bosporus, which, according to bim, was betrayed to the Bosporan kings by Gylon, the maternal grandfather of Demosthenes (Cf. Crateros in Harpocration, s.v. Nípфaov.) The interier of the peninsula was but little known to the ancients, and wc sball therefore best explain their connection with it by taking a survey of the consts.

We shall begin on the NW. side, after the bay of Carcina or Tunyyraca, which has been already described [Carcina; Tamyrica]. Fram this bay the peninsula stretches to its most westerly point, Cape Tarchan, which presents some high land; but to the S. of Tarchan the coast sinks to a dead level as far as the river Alma, to the S. of which it again begins to rise in bigh cliffs. All the W. coast, however, presents no place of note in ancient listory till we come to its extreme southern point, where a hald plateau of hills runs in a westerly direction into the sea. On the E. this tract is divided from the rest of the peninsula by a deep and broad valley, into which it falls by steep declivities. The harbour of Sebastopol (or Roads of Akitiar) os the N., which bites into the land for about 4 miles io a SE. direction, and that of Balaclura on the S. coast of the peninsula, which runs up towards the N ., form an isthmus having a breadth, according to Strabo (p. 308), of 40 stadia, or 5 miles. This measurement is coufirmed by Clarke (Trav. ii. p. 219), who, however, scens only to have been guided by his eye; for in reality it is rather more, or about 6 miles. The S. coast of the little peminsula formed by this isthmus prescuts several promontories and small bays, with cliffs of from 500 to 700 feet in height.

So barren a spot presented no attractions to the Milesians, the chief colonisers of the Eaxioe ; but a inore laardy race of emigrants, from the Dorian city of Heracleia in Pontus, found a new home upon it, and founded there the triwn of Chersonesus (Strab. l.c.). We learn from lliny (iv. 12. s. 26) that it
was at first called Negarice, apparently from the circumstance that Megara was the mother city of the Pontic Ileracleots, From these settlers the little peninsula we have just described obtained the name of The Chersonesus Heracleotica, or Heracleotic Chenonese, sometimes also called "the small Chersonesus" ( $\tilde{\eta} \mu$ ккр $\alpha$, Strab. l. c.), by way of distinction from the great, or Tauric, peninsula.

The original city of Cbersonesus seems to bave been founded at the westernmost poiat of the peninsula, close to the present Cape Fanary. The date and occasion of its fonndation are not ascertained ; but Neumanu conjectures that it may bave been built about the middle of the fifth century E.c. (Die Hellenen, gc. p. 383). Considerable remains of the ancient city were visible so late as the end of the last centnry (Clarke, Trav, ii. pp. 292, seq.; Pallas, ii. Pp. 70, seq); but every trace of tbem had vanished when Murawiew Apostul visited the spot (Reise durch Taurien, p. 62). They were destroyed by a certain Lieut. Kruse, who nsed the stones for building and couverted the ground into a vineyard ( $\mathrm{Da}-$ bois de Montperreux, Voyages, \&c. vi. p. 133). The ancient Chersonesus, however, had fallen into decay before the time of Strabo; but the new tomn was flowrishing and appears from the ruins to have been seited on the W. side of what is not the Quarantine Harhonr of Sebastopol (Neumann, p. 392). The place was much damaged towards the end of the tourteenth century by Olpierd, sovereign of Lithuania, since which time it has been gradually falling into ruius (Karamsin, Russ. Gesch. v. 13. Germ. tr:). The Turks carried away many of its sculptures and columns to adorn Constantinople. Nevertheless, the town, although almost entirely deserted, remained for threc centuries in so perfect a state that a plan might have been drawn of it at the time when it came into the possession of the Russians; but its ruin was som completed by its new masters, who blew up the walls and destroyed the graves and temples. (Clarke, ii. p. 207.) Pliay (iv. 12. s. 26) gives the circumference of its walls at 5 miles; but their outline could still be traced in 1820, and according to Dubois de Montperreux (vi. 138), was only about a quarter of that size. It is probable that Pliny may have coufounded the town walls with the wall or rampart which extended across the isthmns, which, as we have already seen, Straho describes as being 40 stadia, or 5 miles, broad. The same writer speaks of it in another place ( $\mu .312$ ) as being fortified with a wall. This wall ran from Ctenus, at the E. extremity of the harbour of Sebrastopal to Symbolon (Balaclava) on the S. coast, and appears to have been made by the Bosporan kings as a defence against the Scythians. An account of its remaining vestiges is given by Clarke (ii. p. 285, seq.; cf. Seymour, p. 149.). The whole enclosure was anciently covered with gardens and villas, and the foundations of houses and of the boundary walls of fields and gardens may still be traced, as well as many remains of the town on the promontory between Quarantine Bay and Streletsika Bay. Vestiges of the principal street show it to have been 20 feet broad. The town wall on the land side was near 2 miles long, built of limestone, and 5 or 6 feet thick, with 3 towers (Seymour, p. I50). Many antiquities and coins have been found in the ruins of Cbersonesus. In the neighbourhood are graves of the most simple kind, hewn in the ruck. They are easy of access, and preseot in this respect a remarkable contrast to those at Panticapreum; but, from this cause, nothing but bones have been
found in them, whilst those at Panticapaenm have yielded valuable antiqnities. According to Clarke (ii. 201, 210), the town of Enpatorium stood close to Chersenesus, though others have identified it with Inkerman. About the latter place, the ancient Ctenus, the rock is pierced all over with the subterranean dwellings of the ancient Tauri. On the top are the ruins of the castle built by Diophantes, general of Slithridates, to defend the Chersonese against the Tauro-Scythians. These caverns or crypts are now rapidly falling in. (Seymour, P140.) Similar caves are found in other parts of the peninsula.

The Heracleotic Cbersmese was noted as the seat of the savage worship of Diada Tauropolis. The natives, or Tauri, themselves had a worship of a similar kind [TAURI] ; but whether it was indigenous among them, or whether they borrowed it from the Dorian Heracleots who settled here, cannot be ascertained. The account of the Tauri themselves, that their virgin goddess was Iphigenia, the daughter of Agamemnon, would seem to lead to the latter conclusion ; though it is well known that the nations of pagau antiquity readily adopted one another's deities when any similarity was observable in their rights and attribntes; and from the account of Herodotns (iv. 103) it might perhaps be inferred that this horrible worship existed among the Taari before the arrival of the Greeks. Artemis was a peculiarly Durian deity, and was worshipped in several parts of Greece with buman sacritices. There was a tradition that the town of Chersonesus was founded by Artemis berself. The Heracleot Chersonites erected a famous temple on a headland which took the name of Parthenium from it. Strabo however merely calls the Parthenium "the temple of the virgio, a certain daemon" (p. 308), and does not mention Artemis. Opinions vary as to which is the real promontory of Partheninm. Many seck it at cape Fanary or Chersonese, which seems too near the town of Chersonesus, as Strabo places the temple at the distance of 100 stadia from the town, though Fanary answers to his description in other respects. Clarke and Pallas identify it with the Aia Barun or "Sacred Promontory" (Clarke, ii. p. 286, and note), between Cape Fiolente and Balaclava, which, besides its name, bas also a ruin to recommend it; though the latter claim to notice is shared by C. Fiolente. Dubois de Montperreux (ri. p. 194, sq.) thinks that the temple may have stood on the spot now occupied by the monastery of St. George ; whilst Neumann. again places it on the beadland a little to the NW. of $C$. Fiolente. It will be seen that these opinions rest on little more than conjecture. On the coins of the Heracleotic Chersonese the image of Artemis occurs by far the most frequently. She sometimes appears with Apollo, sometimes with Hercules, the patron hero of the mother city, but more generally alone, and always as the goddess of the chase, never as Selene (Von Külne, in the Memoirs of the Archaedog. and Numism. Suciety of St. Petersburg, vol. ii. ap. Neumann, p. 420). On other coins a fish is frequently seen ; and one has a plougb on the obverse, and an ear of corn between two fishes on the reverse (Ib.). The bays of the Heracleatic peninsula abound with fish, which formed a great part of the riches of the country.

Of the bistory of the Heracleotic Chersonesus we know but little, but it may perlaps be inferred from the Inscription of Agasicles that its constitution was republican. It was impor-
tant enough to take a part in political : in ars as an iodependent city, nt least as late as albut the middle of the 2nd century J. C., when, like its mother city, Heracloia, it was a party to the alliance against Pharnaces 1., king of Pontus, and Mollridates, satrap of Armenia. (Polyt. Frg, lib. xxri. c. 6 , vol. iv. p. 345, suq, ed. Sireigh.) Soon afterwards, however, we find it struggling with the Taurians and their allies the Sarmatians for existence (Polyarns. Strat. viii. c. 56), and it was ultimately compelled to place itself under the protection of Mithridates the Great. Subsequently, however, it regained its independence, throngh the Romans, and under the name of Cherson or Chorson flourished till a late period of the middle ages, and even overturned the Bosporan kiogdoru. (Const. Porphyr. de Adm. Imp. c. 53.)

Leaving the lleracleotic Chersonese, we will now proceed to describe the remainder of the coast of the Tauric peninsula, which may be soon despatched, as an account of its different cities is given in separate articles. From the haven of Symbulon (Balaclaro) to Theodosia (Coffa) the coast is correctly described by Strabo as craggy, mountainous, and stormy, and marked with many headlands (p. 309). The distance, however, which he assigns to this tract of 1000 stadia, or 125 miles, is rather too small. In both the Periplas of the Euxine the distance given is 1320 stadia, but this mast include all the indentures of the coast. The most remarkable promontory in this part was the Criu-metopon, or Ram's Ilead, which has been variously identified. Some writers have taken it for the promontory of Laspi, which is in reality the most southern point of the peninsula. Some again have identified it with Ai Petri, and a still greater number with the Aju-dagh. But the account giveu by Arrian and the Anonymons agrees better with Cape Aitkudor: These writers say that the Gilu-metupon lay 220 stadia to the W. of Lampas. (Arrian, T'eripl. p. 20; Anon. Peripl. p. 6.) Now Lampas is maloubtedly the present Eijuk: Lampat, the distance between which and Cape Aithodor agrees very accurately with the preceding measurement. Scymnus indeed (ii. 320, Guil) states the distance at only 120 stadia; but this is evidently an error, as it is too short by half even for Aju-dugh. Cape Aithodor is not much N. of Lopsi, and from its pusition might easily have been taken by the Greeks for the southernmust point of the peninsula. (See Neumann, 451, sq.)

From the traces of Greek names, ruins, remains of marble columns, \&c, it may be inferred that the whole of this tract was once in the hands of the Greeks. liut these relics probalily belong to the Byzantine times, since the older geographers meotion only four phaces on this purt of the coast, namely, Charas, Lagyar, Lampas, and Athenteon.

To the E. of Theodosia the coast of the Enxine trends iuto a large bay, which, approaching the l'alus Macotis on the N., forms an isthmus about 12 miles broad, to the E. of which, as far as the Cimmerian Bosporns, extends the Busporan peuinsula, or that of Kertsch, which swells out to double the lyeadth of the isthmns, The western half of this peninsala is flat; but the castern portion rises into hills, which surrsund the bay in which Panticapacum was situnted. It possessed several flumishing mavitione towns, as Cazeka and Cimmericum on the S. cont. Nympham Panticapreum, the Boxpran capital, on the Citnmerian Bosporns; with some others of less note, as Mynoccium, Porthmion, and Hermisium. There
were also probally towns in the interior; but we know the name of only one, namely, lluratum. (Ptol. ii. 6. §6.) Beyond the Bosporan straits we have little to goide us but the acconds of l'tulemy. From those straits, the N. coast of the peninsula, which is high and chalky, proceeded in a westerly direction to the modern Arabat. Somewhere on this tract lay the Greek colony of Heracleion.

On the $\mathbf{V}$. side of the Tauric peninsula, the Tongue of A rabat, a narrow slip of land scarcely raised abore the level of the sea, 52 miles long and about half a mile hroad, runs along the whole coast, dividing the Mawotis from the $\Sigma \alpha \pi \rho \dot{\alpha} \lambda\left\{\mu \nu \eta_{1}\right.$ or Putrid Sea. But though Strabo knew that the latter formed the western portion of the Maeotis (p. 208), he nowhere mentions the Tongue of Arabat. The I'utrid Sea seems to be the Lacus Buges of Pliny (iv. 12.s. 26); but his description is not very intelligible. According to the accounts of recent travellers the Putrid Sea, now called the Shiváske, does not appear to deserve its name, as it bas neither an unpleasant smell nor are its shores mhealthy (Seymour, p. 33); yet in the times of Clarke and Pallas it seems to have possessed both these offensive qualities. (Clarke, Trav. vol. ii. p. 314, note.)

The chief feature in the history of the Chersonesus Taurica, is that of the kingdom of the Bosporns, a sketch of whicb has been already given. [Bosporus Cimmekics, Vol. I. p. 421, seq.] After the extioction of that dyoasty, towards the end of the 4 th century of our era, the peninsula fell into the bands of the Huns, of which race remnants still existed between Panticapaeum and Cherson in the 6th centary. (Procop, Goth. iv, 5.) It was subsequently overrun by the Goths and other nations Who followed the great stream of emigration. Justinian reunited the kingdom of the Bosporus to the Greek Empire; and the Byzantine emperors, till the fall of Constantioople, always regarded the Tauric peninsula as part of their dominions. But the Tatars had made themselves the actual masters of it before the middle of the 13th century. Under theoe prissessors, the Genoese, who settled on the coasts towards the end of the same century, played the same part as the Greeks did when the country was pussessed by the Tauri, and planted severnl flourishing colomies. (Neumann, Dic IIclloncn im Skythenlande; Georgii, Alte Geographte, vol. ii ; Clarke's Travels, vol, ii. ; Danby Seymour, Russia on the Black Sea; Forbiger, IIandb, der all. Geogr. vol. iii.) [T. H. D.]

TAUR'LCI MONTES. [Taumci Chersonystes]

TAliNI'NI (Tavpovoi), a Ligurian tribe, who neeupied the country on the E. slope of the Alps, down to the left bank of the Padus, in the upper part of its course. They were the most northerly of the Lignrian tribes, and from their geographical pasition would more naturally have been regarded as belonging to Cisalpine Gaul than to Liguria; but both Strabo and Pliny distinctly say they were a Ligurian tribe, and the same thing may be inferred from the omission of their name by l'olybius where he is relating the surcessive settlements of the Gaulish tribes in the N. of Italy (Pol, ii. 17 ; Strab. iv. p. 204 : I'lin. iii. 17. s. 21). Their territory adjuined that of the Vagienni on the S ., and that of the Insubres on the NE.; though the laevi and Lebecii, tribes of which we know very little, must also have bordered on tbeir NE frontier (l'ol. l.c.). The first mention of the Tamrini in history is at the time of Hanribal's passage of the $\mathrm{Al}_{\mathrm{ps}}$ (3. c. 218), when that genctal,
on descending into the plains of Italy, fond the Taurimi on hostile terms with the lnsmbres, and, in consequence, turned his arms against them, took their principal city, and put the inhabitants to the sword. (Pol. iii. 60; Liv. xxi. 38, 39.) Neither Polybius nor Livy mention the name of this city, but Appian calls it Taurasia (Annib, 5) : it wats prohably situated on the same site which was afterwards occupied by the Roman colony. The name of the Taurini is not once mentioned during the long wars of toe Romans with the Cisalpine Gauls and Ligurians, and we are ignorant of the time when they finally passed under the Roman yoke. Nor have we any precise account of the foundation of the Roman coluny in their territory which assumed the name of Angusta Taurinorum, though it is certain that this took place under Augustus, and it was doubtless connected with his final subjugation of the Alpine tribes in d.c.8. From this time the name of the Taurini never again appears in listory as that of a people; but daring the latter ages of the Roman Eimpire the city of Augusta Taurinorum seems to have been commonly known (as was the case in many instances in Transalpine Gaul) by the name of the tribe to which it belonged, and is called simply Taurini in the Itineraries, as well as by other writers. (Itin. Ant. p. 341 ; Itin. Hier. p. 556 ; Tab. Peut.; Armmian. xv. 8. § 18.) Hence its modern mame of Torino or Turin. Tlus is the only city that we can assign with any certainty to the Taurini. On the W. their territory was bounded (at least in the days of Angustus) by the Segusiani and the other tribes subject to Cuttius ; and their limit in this direction is donbtless markel by the station Ad Fines, situated 18 miles from Augusta, on the read to Segusio (Itin. Ant. l.c.). But it appears probable that at an earlier period the nation of the Taurini was more widely spread, or their name used in a more comprehensive sense, so as to comprise the adjuining passes of the Alps; for Liry speaks of the Insubrian Gauls who crossed into Italy, " per Taurinos saltusque invios Alpes transcenderunt" (Liv. v. 34), and Strabo, in enumerating, after Polybius, the passes across the Alps, designates one of them as $\tau \grave{\eta} \nu \delta i \alpha$ Taupuwhy (Strab, iv. p. 209.). Whether the pass here meant is the Mont Geneure or the Mont Cemis (a much disputed point), it would not be included within the territory of the Taurini in the more restricted sense.
[E. H. B.]
TAURIS, an island of the Ionian sea, between Pharus and Corcyra, opposite to the NW. point of the peninsula of Hyllis and the mouth of the Naron. (Auct. B. A. 47.) Now Torcola. [T. H. D.]

TAURISCI. [Noricum, Vol. 11. p. 447.]
TAURUEIS, TAUROE'NTIUM (Taupúes, Tavpoévtiov: Eth. Taupéévtios). Steph. B. (s.v. Taupóets), who calls it a Celtic town and a colony of the Massaliots, quotes the first book of Artemidorus' geography for a foolish explanation of the origin of the name. The place is mentioned by Caesar (B. C. ii. 4), who says "Tauroenta quod est castellum Massiliensium perveniunt;" by Strabo (iv. pp. 180, 184), by Scymaus Chius, and by Ptoleny (ii. 10. § 8), whe places it between Massilia and Citharistes Promontorium. D'Anville erroceously supposes that Caesar uses Tanroenta for the plural number ; but it is the accusative of Tauroeis. Strabo (iv. p. 184) enumerates the Massaliot settlements between Massilia and the Varus in this order: Tauroentinm, Olbia, Antipolis, Nicaea. Mela (ii. 5) enumerates the places on this coast in a different order
from east to west: Athenopolis, Olbia, Taurois, Citharistes, and "Lacydon Massiliensium portus." Ptuleny, as we have seen, places Tauroeis betweca Massilia and Citharistes. In the Maritime Itin, the positions letween Telo Martius (Toulon) and Inamadrus seem to be out of order [lmanadies]; and they are to be placed thus - Aemines (Embiez), Tamroeis (Taurenti), Citharista [Citharista]. Carsici (Cossis), lmmadrus, Massilia. Geographers have been much divided in opinion on the site of Tauroeis, but the modern name seems to deternine the place to be at the right of the entry of the bay of Ciotat.
[G. L.]
TAUROME'NIUM (Tavpouévion: Eth. Taupo$\mu \in \nu i ́ \tau \eta s$, Tauromenitamus: Taormina), a Greek city of Sicily, situated on the E. coast of Sicily, about midway betweed Messana and Catana. It was only about 3 miles from the site of the ancient Naxos, and there is no doult that Tauromenium did not exist as a city till after the destruction of Naxos by Dionysius of Syracuse, B. c. 403 ; but the circumstances connected with its foundation are somewhat confused and nncertain. [Naxos.] It appears, however, from Diodorns that after the destruction of Naxos, the remaining inhabitants of that city were driven into exile, and its territory was assigned by Dionysius to the neighbouring Sicoli. These, however, did not re-occupy the site of the ancient city, but established themselves on a hill to the N . of it, which was called the hill of Taurus ( $\delta \lambda$ и́фоs $\delta$ каגoúuevas Taüpos). Here they at first constracted only a temporary camp (in B. c. 396), but afterwards erected walls and converted it ioto a regular fortress or town, to which they gave the name of Tauromenium. (Diod. xiv. 58, 59.) The place was still in the hands of the Siculi in B. C. 394, and they beld it against the efforts of Dionysius, who besieged the city in vain for great part of the winter, and though he on one occasion forced his way within the walls by a nocturnal surprise, was again driven out and repulsed with beavy loss. (Ib. 87, 88.) But by the peace concluded in B. c. 392 , it was expressly stipulated that Tauromenium should be subject to Dionysius, who expelled the greater part of the Siculi that had settled there, and supplied their place with his own mercenaries. (Ib, 96.) From this time we bear no more of Tauromenium till e.c. 358 , when we are told that Andromachus, the father of the historian Timaeus, brought together all the remains of the exiled Naxians, who were still scattered about in different parts of Sicily, and established them all at Tauromenium. (Id. xyi. 7.) This is related by Diodorus as if it were a new foundation, and even as if the name had then first been applied to the city, which is in direct contradiction with his former statements. What had become of the former inhabitants we know not, but there is little doubt that the account of this resettlement of the city is substantially correct, and that Tauronenium now for the first time became a Greek city, which was considered as taking the place of Naxos, thongh it did not occupy the same site. (Wesseling, ad Diod. xiv. 59.) Hence Pliny's expression, that Tauromenium had formerly been called Naxos (Plin. uii. 8. s. 14) is nearly, though not strictly, correct.

The vew settlement seems to have risen rapidly to prosperity, and was apparently already a considerable town at the time of the expedition of Timoleon in B.c. 345 . It was the first place in Sicily where that leader landed, having eluded the vigilance of
the Cirthagivians, who were guarding the straits of Nessana, and crossed direct from Fhegium to Tauromenium. (Diod. xvi. 68; Plut. Tinol. 10.) The city was at that time still under the government of Andromachus, whose mild and equitatle administration is said to have presented a atrong contrast with that of the despots and tyrants of the other Sicilian cities. He welcomed Timuleon with ojen arms, and allurded him a secure renting place until he was enabled to carry out his plans in other parts of Sicily. (Died. l. c.; Plat. l. c.) It is certain that Andromachuss was not deprived of the chief power, wien all the other tyrants were expelled by Timoleon, but was permittell to retain it undisturbed till his death. (Marcellin. Vit. Thucyd. $\$ 27$. .) We hear, however, very hittle of Tauromenimu for some time after this. It is probable that it passed under the authority of Asathocles, who drove the historian Timaeus into exile; and some time after this it was subject to a domestic despot of the name of Tyndarion, who was cautemporary with Hicetas of Syracuse and Phintias of Agrigentum. (Diod. xxii. Exc. H. p. 495.) Tyndarion was one of those who concurred in inviting Pyrrlus into Sicily (n.c. 278), and when that moaarch landed with his arny at Tauromenium, joined hirn witb all his forces, and supported him in his march upen Syracuse. (Diod. l. c. pp. 495, 496.) A fer years later we find that Tauromenium bad fillen into the power of Hieron of Syracuse, and was eluployed by him as a stronghold in the war against the Dlamertines. (Ib. p. 497.) It was also one of the cities which was left under his dominion by the treaty concluded with him by the Romans in n.c. 263. (Did. $x$ xiii. p. 502.) This is doubtless the reavon that its nanic is not again mentioned during the First Punc War.

There is no doubt that Tauromenium continued to form a part of the kingdom of Syracuse till the death of Hieron, and that it orily passed under the government of Rume when the whole island of Sicily was reduced to a Roman province; but we have scarcely any account of the part it took during the Second Punic War, though it would appear, from a lint in Appian (Sic. 5), that it submitted to Marcellus on favourable terms; and it is prolable that it was on that occasion it obtained the pecoliarly firoured position it enjoyed under the Roman dominion. For we learn from Cicero that Tauromenium was one of the three cities in Sicily which enjeyed thie privileges of a "civitas fuelerata" or allied city, thus retaining a nominal independence, and was not eveu sulyject, like Messana, to the obligation of furnishing ships of war when called upon. (Cic. Verr. ii. 66 , iii. 6, v. 19.) But the city suffered severe calamities during the Servile War in Sicily, b.C. 134-132, baving fallen into the bands of the insurgent shaves, who, on account of the great strength of its position, masle it ore of their clief posts, and werc able for a loug time to defy the arms of the comsal limpilius. They hehd out antil they were reduced to the most fearful extremities by famine, whien the citalel was at length betrayed into the hands of the consul by one of their lealers named Sarapion, and the whole of the survivors put to the sword. (Divid. vxxiv. Exce. I'hot. p. 528; Oros. v. 9.) T:uronethium again bore a conspictoous part during the wars of Sextus Pompeins io Sicily, and, from its strength as a fortress, was one of the principal points of the position which he touk up in B.C. 36 , for defence ayainst Ottavian. It becarne the scene also of a sea-tight between a part of the floct of Octarian,

TAUROMENIUM.
commanied by the tiiumvir in person, and flat of Pompeius, which terminated in the defeat and alimost total destruction of the former. (Appian, B.C. v. 103, 105, 106 -111, 116; Dion Cass. xlix. 5.) In the settlement of Sicily after the defeat of P 'ompey, Tauromenium was one of the places selected by Angustus to receive a Roman colony, probably as a measure of precaution, on accouat of the strength of its situation, as we are told that he expelled the furmer inhabitants to make roora for his new colonists. (Diod. xvi. 7.) Strabo speaks of it as one of the cities on the F. coast of Sicily that was still subsisting in his time, though inferior in population both to Messana and Catana. (Strab. vi. pp. 267, 268.) Both Pliny and I'tolemy assign it the rank of a"colonia" (Plin. iii. 8. 5. 14; Ptoliii. 4. § 9), and it seems to have been one of the few cities of Sicily that continued under the Roman Euppire to be a place of some consideration. Its territory was noted for the excellence of its wine (Plin. xiy, 6. s. 8), and produced also a kind of marthe which seems to bave been bighly ralued. (Athen. v. p. 207.) Juvenal also speaks of the sea iff its rocky coast as producing the choicest mullets. (Juy. v. 93.)

The itineraries place Tauromenium 32 miles from Messana, and the same distance from Cataina (Itin. Ant. p. 90; Tab. Peut.) It continned after the fall of the Roman Erpire to be one of the mere considerable towns of Sicily, and from the strength of its position was one of the last places that was retained by the Greek emperors; but it was taken by the Saracens in A.D. 906 after a siege of two years, and totally destroyed, a calanity from which it has never more than partially recovered. The present town of Taormina is a very poor place, with about 3500 iwhabitants; but it still occupies the ancient site, on a lofty liill which forms the last projectiong point of the mountain ridge that extends along the coast from Cape Pelorus to this point. The site of the town is about 900 feet abuve the sea, while a very steep and almest isolated rock, crowned by a Saracen castle, rises about 500 feet higher: tbis is undoubtelly the site of the ancient Ars or citadel, the inaccessible position of which is repeatedly alluded to by ancient writers. Portions of the ancient walls may be traced at intersals all round the brow of the hill, the whole of the summit of which was evidently occupied by the ancient city. Numerous fragments of ancient huildings are scattered over its whole surface, including estensive reservoirs of water, sepulcbres, tessclated parements, \&ce, and the remains of a spacions edifice, commonly called a Naumachia, but the real destination of which it is difficult to determine. But by far the most rermarkable monument remaining at Tuormina is the ancient theatre, which is one of the mrost celcbrated mins in Sicily, on account buth of its remarkable preservation and of the surpassing beanty of its situation. It is built for the must part of brick, and is therefure probably of Ronaan date, though the plan and arrangement are in accoriance with those of Greek, raleer than Roman, theatres; whence it is supposed that the present structure was rebuilt upun the foundations of an older theatre of the Greek period. The greater part of the seats have disappearei, but the wail which surrouniled the whole carea is preserved, and the proscenium with the back wall of the scena and its nppendayes, of which only traces remain in most ancient theatres, are here preserved in singular integrity, and contribute much to the picturesque
effect，as well as to the interest，of the ruin．From the fragments of architectural decorations still extant we learn that it was of the Corinthian order， and richly oraamented．In size it ranks next to the theatre of Syracuse，among those of sicily． Some portions of a temple are also visible，converted jnto the church of S．Pancrazio，but the edifice is of sunall size and of little interest．The ruins at Taormina are described in detail by the Duke of Serra di Falco（Antichitit della Sicilia，vol．v．part iv．），as well as by poost travellers in Sicily．（Swin－ burne＇s Travels，vol．ii．p． 380 ；Sinyth＇s Sicily， p．129，\＆c．）
［E．H．B．］

## COLS OF TAURONENIUM．

TAUROSCyTHAE（Tauporré日al，Ptol．iii． 5. §25），called by Pliny Tauri Scythae（iv．12．s．26）， a people of European Sarmatia，composed of a nix－ ture of Taurians and Seythians．They were seated to the W．of the Jazyges，and the district which they inhabited appears to have beeu called Tauro－ scythis．（Cf．Strab．ap．Hudson，p． 87 ；Capit．M． Aut． 9 ；Procop，de Aed，iii．fin．）［T．H．D．］

TAURU＇NUM（Taúpouvod），a strong fortress in Lower Pannonia，at the point where the Savus joins the Dannbins，on the road from Sirmium to Singi－ dunum．It was the station of a small fleet of the Daaulius．（Pliu．iii．28；Ptol．ii．16．§ 4 ；It．Ant． pp．131，241；Tab．Peut．；Geogr．Ray．iv．19， where it is called Taurynum．）lts site is now occupied by the furtress of Semalin，opposite to Belgrade．
［L．S．］
TAURUS DONS（ $\delta$ Tappos），one of the great mountain ranges of Asia，the name of which is believed to be derived from the Aramaic Tur or Tura，i．e．，a high mountain or Alp，and secordingly is in reality a common noun applied to all the bigh mountains of Asia．The name has even been trans－ ferred to Europe，for the Taurian Chersonesus in Sarmatis and the Taurisci in the Norican Alps appear to owe their name to the same origin．We caunot wonder therefore when we find that Erato－ sthenes（ap．Strab．xv．689）and Straho（ii．pp．68， 129 ，z．p．490）appls the Dame to the whole range of mountains extending from the Mediterranean to the eastern ocean，although their connection is often hroken．This extent of mountains is，according to Strabo＇s calculation（xi．p．490）， 45,000 stadia in length，and 3000 in breadth．But in the narrower and common acceptation Mount Tanrus is the range of mountains in Asia Mioor which begins at Care Sacrum or Cbelidoninm on the coast of Lycia， which for this reason is called by Mela（i．15）and Pliny（v．28）Promontoriom Tanri．It was，how－ ever，well known to the ancients that this promontory was not the real commencement，but that in fact the range extended to the south－western extrenity of Asia Minor．（Strab．ii．p．129，xi．p．520，xir．pp．651， 666．）This range rises in the W．as a lotty and precipitous monotain，and runs without any inter－ ruptions，first in a northern direction between Lycia and Pamplyylia，then in an eastern direction throngh I＇isidia and Isauria as far as the fruntiers of Cilicia and Lycaovia．There it separates into two main
branches．The one proceeds north－eastward under the name of Antitaurus（Avtlicaupos），and surpasses the other in height．It runs through Cappadocia， where it forms Mount Argaeus（Apraïos），and Armenia，where it is called Mons Capotes，and through the Montes Moschici it is connected with the Cancasus，while a more sontherly branch，under the names of Abus and Macis or Massia，runs through Armenia towards the Caspian sea．The second branch，which separates itself on the frontiers of Cilicia and Lycaonia，retains the name of Taurus， and proceeds from Cilicia，where it forms the l＇ortac Cilicise，and sends forth Mons Amanus in a southern direction，while the main branch proceeds through Cappadocia．After being broken throngh by the Eophrates，it again seods forth a southern branch nnder the name of Mons Masius．The name Taurus ceases in the neighbourhood of Lake Arsissa，the monntains further east having other names，such as Niphates，Zagrus，\＆cc．Most parts of Mount Taurns， which still bears its ancient name，were well wooded， and furnished abundance of timber to the maritime cities on the sontb coast of Asia Minor．［L．S．］

TAURUS PALUS，an étang on the coast of Narbonensis，west of the delta of the Rhone．It is named in the verses of Avienns，quoted in the article Fecyi Jugum；and to the verses there cited may be added the following rerse：－
＂Taurum paludem namque gentici（gentili）ro－ cant．＂
But I．Vossins in his edition of Mela（ii．5，note） writes the verses of Avienus thus：－
＂In usque Taphrum pertinet，
Taphron paluden namque gentili vocant；＂
an alteration or corraption which D＇Anville justly condenns，for the étang is still named Taur，or vulgarly Tau．
［G．L．］
TAXGAE TIUM（Taక̧ raítiov），a place assigned by Ptolems（ii．12．§ 5）to Rhaetia，but which more properly belonged to Vindelicia，was sitnated on the northern shore of the Lacus Bricantinus，and pro－ bably on the site of the modern Lindau，［L．S．］

TA＇XILA（T $\alpha \xi \iota \lambda a$, Arrian，Anab．v． $8 ;$ Ta $\xi<\pi \lambda \alpha$ ， Ptol．vii．1．§ 45），a place of great importance in the Upper Panjub，between the Indus and Hydaspes， which was risited by Alexander the Great．It is said to have been raled at that time by a chief named Taxiles，who behaved in a friendly maoner to the Grecian king．The conntry around was said to be very fertile，and more abundant than even Eggpt （Strab．xv．pp．698－i14）．There can be little donbt that it is represented by the vast ruins of Manikyala，which has in modern times been the scene of some very remarkable researches（Elphin－ stone，Cabul，p． 79 ；Burnes，Travels，i．p．65，ii． p．470．）The famous Topes of Manikyale，which were examined by General Ventura and others （Asiatic Res．xvii．p．563），lie to the eastward of Rowil－pindi．Wilson considers Taxila to be the same as the Takhsasila of the Hindus（．triana， p．196）．
［V．］
TA）${ }^{\prime \prime}$ GETUS［LAconta，pp．108，109．］
TAZUS（Ta乡ós，Ptol．iii．6．§6）．1．A town in the SE．part of the Chersonesus Taurica．

TEA＇NCM（T＇́avov：Eth．Teanensis：Civitate）， sometimes also called Teanem Apuluar（Cic．pro Cluent． 9 ；Téavù ${ }^{\text {A A }}$ Tou入ov，Stral．：Eth．Tesnenses Apuli），to distinguish it from the Campaniancity of the

## 1116

TEANUM.
TEANUM.
same name, was a eity of Apulia, situato on the fielit b:ank of the river Frento (Forlorc), about 12 milis from its mouth. It appears to have been one of the most considerable cities of Apnlia hefore its c inquest by the Romans; but its name is first mentioned in s. c. 318, when, in conjunction with Canm-inm, it submitted to the Ronnan cousols M. Fumins Flaccinator and L Plautins Vemon. (Liv. ix. 20.) It is again notised during the Sesond P'unie Har, when it wals selected by the dictator M. Jorius Pera as the place of his winteroquarters in Apulia. (Id. axili. 24.) Cicero incidentally notices it as a municipal town, at the distance of 18 miles from larmum (Cic. mo Cluent. 9), and its name is found in all the geographers anong the municipal towns of Apulia. (Ntrab, vi p. 285; Mel. ii. $4 . \S 6$; Plin. iii. 11. s. 16 ; 1'tol. ini. 1. § 72 .) Its municipal rank is comtinaed also by an inscription, as well as by the Liber Coloniarum, and it is clear that it never attained the rarik of a colony. (Orell. Inser. 140; Lib. Col. p. 210.) Its ruins still exist at a place called Civitate, near the remains of a Roman bridge (now called the Ponte di Civitate), over the Fortore, by which the ancient road from Larimum to Luceria crossed that river. The distance from the site of Larinom agrees with that stated by Cicero of 18 miles (the Tabula erronconsly gives only 12), and the discovery of inseriptions on the spot leaves no doubt of the ideatification. Considerable remains of the walls are still estant, as well as fragments of other buildings. From these, as well as from an inseription in wbich we find mention of the "Ordo spleadidissiraus Civitatis Theaneosium," it seems probable that it continued to be a flourishing town under the Roman Empire. The period of its final decay is uncertain, but it retained its episcopal see down to modero times. (Holsten. Not. ad Cluver. p. 279; Iumanelli, vol. ii. p. 291; Mommsea, Inser. R. N. p. 271.)

Strabo speaks of Teanum as situated at some distance inland from a lake, the eame of which he dues not mention, but which is clearly the Lacus Pantanus of Pliny, now called the Lago di Lesina. From an inscription found on its barlks it appears that this was comprised within the territury of Teanum, which thos extended down to the rea (Romanelli, l. c.), though about 12 miles distant from the coast.

Several Italian topographers have assumed the existence of a city in Apulia of the name of Teate, distinct trom Teanum (Gioverazzi. Sito di Areja, p. 13: Romanelli, rol. ii. p. 286); but there scems Do dutut that the two narues are only different forms of the same, and that the Teates Apuli of Livy (is. 20) are in reality the people of Tcanum. It is true that that writer meotions them as if they were distinct from the Teancoses whom he had mentioned jims before; but it is probable that this arises merely trom ho haviug followed different anoalists, and that both statements refor in fact to the same people, and are a repetition of the same oceurrence. (Mommsen, U'inter-Ital. Iriul Kt. p. 301.) In like manner the Teate mentiuned in the Liber Colobiarno (p. 261) is evidently the same place called in an earlier part of the same document (1. 210) Teanam, $\lfloor\mathrm{E} . \mathrm{H}, \mathrm{B}$.

TEA'NUM (Teavov: Eth. Teadensis: Tcano), sometimes called for distinction's sake Teavem Simennum (Liv. ssii. 57 ; Cic, ad Att. viii. 11; Jlin. ii. 5. s. 9; Téavov 玉iôıkivov, Strab, v. p. 237), an important city of Campania, sitoated in the ioterior of that province, on the Sia Latida,
intreen Cales and Casinnm. (Strab. v. p. 237.) It was therefore the frontier city of Campania, as that temn was anderstood onder the Roman Empiré; but originally Teanom was not reckoned a Campanian city at all, but was the capital of the small independent tribe of the Sidicini. [Sumcisi.] It was indeed the only place of importance that they possessed, so that Livy in more than one instance allodes to it, where he is spraking of that peaple, merely as "their city," without mentiening jts Dame (Liv, viii. 2, 17). Hence its listory before the Roman conquest is identical with that of the people. which will be found in the article Sidicisi. The first mention of Teanum after the Reman conquest, is in D.C. 216, immediately after the battle of Cannac, when Marcellus sent formard a legion from lome thither, evideatly with the view of securiag the line of the Via Latina (Liv. xxii. 57.) A fem years later. B. C. 211. it was selected as a place of confinement for a part of the senators of Capoa, while they were awaiting their sentence from Rome; but the consul Fulvius, contrary to the opinion of his colleague App. Clavdius, caused them all to be put to death witbout waiting for the decrec of the senate. (Liv. xxvi. 15.) From this time Teanum became an ordiary municipal town : it is incidentally mentioned as speh on several occasions, and its position on the Via Latina doubtless contributed to its prosperity. A gross ontrage offered to one of its monicipal magistrates by the Roman consul, was noticed in one of the orations of C. Gracchus (ap. A. Gell. s. 3), and we learn from Cicero that it was in his time a flourishing and populous town. (Cic. de Leg. Agr. ii. 31, 35, ad. Att. viii. 11, d.) Its name repentedly occars in the Social War and the contest between Sulla and Marins (Appian, B. C. i. 45 , 85); and at a later perind it was the place where the conmanders of the legions in Italy beld a kind of cungress, with a siew to bring about a reconciliation between Octavian and L. Antooius (Ib. v. 20). It was one of the cities whose territory the tribune Rullus proposed by his law to divide among the Roman people (Cic. l. c.) ; but this misfortmne was averted. It subeequently, however, received a colony under Augustus (I,ib. CuL. p. 238; Plin. iii. 5. s. 9). and seems to have re:ained its colonial rank under the Empire. (Mommsen, Inscr. R. N. 3989, 3999.) Strabo tells us that it was the largest and most populous town on the Via Latina, and the mrat considerable of the inland cities of Campania after Capua. (Strab, v, pp, 237, 248) Inscriptions and exiating remains confirm this account of its importance, but we hear little more of it under the Roman Empire. The Itinerarics place it 16 miles from Casiutum, and 18 from Vethafrum: a cross road also struck off from Teanum to Allifac, Telesia, and Beneventum. (Itin. Ant. pp. 121, 304; Tab. Peut.) Aumber branch also communieated with Suessa and Minturnae.

Teanum was not more than 5 miles from Cales : the poiut where the territurics of the two cities joined was marked by two shrines or aediculae of Fortume, mentioned by Strabo, under the name of ai ốo Tüxaı (v. p. 249).

Teanum appears to have declined doring the middle ages, and the modern city of Teano is a pour place, with only about 4000 inhalitants, thougb retaining its epincopal see. Many ruins of the ancieot city are visible, though none of them of any great interest. They are situated below the modern city, which stands on a hill, and considerably nearer to

Colvi (Cales). The most important are those of an amphitbeatre and a theatre, situated near the Via Latina; bnt numerous remains of other buildings are found scattered over a considerable space, thongh for the most part in imperfect preservation. They are a!! constructed of brick, and in the reticulated style, and may therefore probably be all referred to the period of the Roman Empire. Numerous inscriptions have also been found, as well as coins, vases, intaglios, \&c., all tending to confirm the account given by Strabo of its ancient prosperity. (Rumanelli, vol. iii. p. 456 ; Hoare's Class. Tour, vol. i. pp. 249-264; Mommsen, Inscr. R. N. pp. 208, 209).

At a short distance from Teano are some mineral springs, now called Le Caldarelle, which are evidently the same with the "aquae acidulae," mentioned both by Pliny and Vitruvins as existing near Teanom. (Plin. xxxi. 2. s. 5 ; Vitruv. viii. 3. § 17.) The remains of same ancient bnildings, called $1 l$ Bagno Nuoro, are still visible on the spot. [E.H.B.]

coin of teinum sidicinum.
TEARI JULIENSES, the inbabitants of a town of the Jlercaones in Hispania Tarraconensis (Plin. iii. 3. § 4). It is called by Ptolemy Tıapıov入ia, and is probably the modern Troyguera.
[T.H.D.]
TEARUS (Plin. iv. 11. s. 18; Téapos, Hernd, iv. 90), now Teare, Deara, or Dere, a river in the SE. of Tlirace, flowing in a SW. direction, until it joins the Contadesdos, their united waters falling into the Agrianes, one of the principal eastern tributaries of the Hebrus. Herodotus ( $l$. c.) states that the sources of the Tearus are equidistant from Heraeum on the Fropontis and Apollonia on the Euxine; that they are thirty-eight in number; and that, though they all issue from the same rock, some of them are cold, others warm. Their waters bad the reputation, among the neighbouring people, of being pre-eminently medicinal, especially in cases of itch or mange ( $\psi \dot{\omega} \eta \eta$ ). On his march towards the Danube, Darias halted his army for three days at the sonrces of tbe Tearus, and erected a pillar there, with an inscription commemorative of tbeir virtues, and of his own.
[J. R.]
TEA'TE (Tearéa, Strab. Ptol.: Eth. Teatinus: Chieti), the chief city of the Marrucini, was situated on a bill about 3 miles from the river Aternus, and 8 from the Adriatic. All the ancient geographers concur in representing it as the metropolis or capital city of the trihe (Strab. v. p. 241; Plin. iii. 12. s. 17 : Ptol. iii. 1. § 60 ) ; and Silius Italicus repeatedly notices it with the epithets "great" and "illustrions" ("magnum Teate," Sil. Ital. viii. 520: Clarum Teate, Id. xvii. 453); but, notwithstanding this, we find no mention of it in history. Inscriptions, however, as well as existing remains, concur in proving it to have been a flourishing and important torn under the Foman dominion. It was apparently the only municipal town in the land of the Marrucini, and hence the
limits of its municipal district seem to have coincided with those of that people. We learn from the Liber Coloniarum that it received a body of colonists under Angustus, but it did not bear the title of a colony, and is miformly styled in inscriptions a municipium. (Lib. Colon. p. 258 ; Orell. Inser. 2175,3853 ; Mommsen, Inscr. R. N. pp. 278, 279.) It dcrived additional splendour in the early days of the Empire from being the native place of Asinius Pollin, the celebrated statesman and orator; indeed the whole family of the Asinii seem to have derived their origin from Teate. Herins Asinius was the leader of the Marrucini in the Social War, and a brother of the orator is called by Catullus "Marrucine Asini." (Liv. Epit. Ixxiii. ; Catull. 12. 1.) The family of the Vettii also, to which belonged the Vettins Alarcellus mentioned by Pliny (ii. 83. s. 85), appears to have belonged to Teate. (Mominsen, l.c. 5311 .)

The Itineraries place Teate on the Via Valeria, though from the pasition of the town, on a bill to the right of the valley of the Aternus, the road must have made a considerable détour in order to reach it. (Itin. Ant. p. $310 ; T a b$. Peut.) Its name is aliso noticed by P. Diacunus (ii. 20), and there seems no doubt that it continned throughout the middle ages to be a place of importance, and the capital of the surrounding district. Chieti is still one of the most considerable cities in this part of Italy, with above 14,000 inhabitants, and is the see of an archbishop. Still existing remains prove that the ancient city occupied the same site as the modern Chieti, on a long ridge of hill stretching from N. to $\mathrm{S}_{\text {, }}$, though it must hare been considerably more extensive. Of these the most important are the ruins of a theatre, which must bave been of large size; those of a large edifice supposed to have been a reservoir for water, and two temples, now converted into churches. One of these, now the church of S. Paolo, and considered, but witbout any authority, as a temple of Hercules, was erected by the Vettius Marcellus ahove noticed; tbe otber, from the name of Sta Maria del Tricoglio which it bears, has been cenjectured to have been dedicated to Diaria Trivia. All these edifices, from the style of their construction, belong to the early period of the Roman Empire. Besides these, numerous mosaics and other works of art have been discovered on the site, which attest the flourisbing condition of Teate during the first two centaries of the Christian era. (Rornanelli, vol. iii. pp. 104 -109; Craven, Abruzzi, vol. if. pp. 8,9.) [E.H.B.]

COLN OF TEATE.
TEBENDA (Té $6 \in v \delta a$ ), a town in the interior of Pontus Galaticus (I'tol. v. 6. § 9), is no doubt the same as the Tebenna mentioned by Anna Comnena (p. 364, b.) as sitnated in the vicinity of Trapezus.
[L. S.]
TECE'LIA (Teкє $\lambda(a)$, a town placed by Ptolemy
（ii．11．§27）in the north of Germany，perhaps in the country of the Chatuci，on the left batuk of the Visurgis（Heser）．Its site must probably be looked for near or at the village of Zetel，about 3 miles from the western bank of the Weser．（Reichard， Germaniem，p．245．）
［L．S．］
TECMON（Téкцшv：Eth．Teкца́vios），a city of Molossis in Epeirus，incorrectly called by Stephanns B．a city of Thesprotia，talen by L．Anicius，the Roman commander，in n．c． 167 ．Leake supposes that Gurimista，near Kiurendo，about 20 miles to the W．of Jounnina，may have been the site of Tec－ mon or Horreum，which Livy mentions in connection with Tecmon．（Liv．xlv．26；Steph．B．s．v．；Leake， Nurthern Greece，rol．iv．p．83．）

TECTOSACES（Teктó⿱㇒akєєs，Ptol．vi．14．§ 9）， a people of Scythia within Imaus．
［7．H．D．］
TBCIOSAGES．［Volcae．］
TECTOSAGES，THCTOSAGAE，or TECTO－
 great tribes of the Celts or Gallograeci in Asis Minur，of which they occupied the central parts． Fir particalars about their history，see Galatha． These Tuctosages were probably the same tribe as the one mentiuned by Polybius noder the names of Acgosages or Rigosages．（Polyb．v．33，77，is， 111．）
［L．S．］
feCUMI．［Tichis．］
TEDA＇NIUS（T $\eta \delta \alpha^{\prime} \nu i o s$ ），a small river of Ills－ ricuan（Ptol，ii．16．§3），on the frontier of the district called Iapydia（Plin．iii．25），is in all pro－ bability the modern Zermanja．
［L．S．］
TEGEA（Teyє́a，Steph．B．s．v．），a town of Crete， which，according to legend，was founded by Aga－ menuon．（Vell．Pat．i．1．）The cuins which Seatini and Pellerin attributed to the Cretan Tegea lave ben restored by Eckhel（vol，ii．p．321）to the Arcadian city of that name．
［E．B．J．］
 Tegenta），one of the most ancient and porrerfal towns of Areadia，situated in the NE．of the country．Its territozy，called Tegeatis（Te $\gamma \in a ̂ t i s$ ），was buanded by Cynurin and Argolis on the E．，fiom which it was separated by Mt．Parthenium，by Laconia on the S，by the Areadian district of Maenalia on the W．，and by the territory of Mantineis on the N． The Tegeatae are said to bave derived their name from Tegeates，a son of Lycion，and to have dwelt originally in eight，afterwards nine，demi or town－ shipr，the inhabitants of which were incorporated by Aleus in the city of Tegea，of which this huro was the reputcl founder．The names of these nine townships，which are preserved by l＇ansanias，are： Giurentue（Гapsàtaı）．Ikylaceis（Фu入akeîs），Cury－ àtae（Kapuârai），Corytheis（Koputeîs）．Potachidae （Пataxiठaı），Oeātue（Оiätaı），Manthyreis（Mav－ Eupeis）．Echeuetheis（ Exevi，$\theta$ trs），to which Aphei－ dimutes（＇Aфciõavtes）was added as the ninth in the reigo of king Apheidas．（Pans．viii．3．§ 4，viii． 45. § 1：Strab，viii．p．337．）The Tegeatae were eatrly divided into 4 tribes（ $\phi o \lambda a i$ ），called respectively Clareütis（K入apeñts，in inscriptions Kpaptâтıs），
 veẫts），and（thrueütis（Adaveârıs），to each of which belongel a certain number of metoeci（ $\mu \dot{\epsilon}-$ токкot）or resident aliens．（Pas．viii．53．§ $6 ;$ biokkl，（inp．Inser．no．1513．）

Tegea is mentioned in the lliad（ii．607），and was probably the mast celelrated of all the Area－ dian towns in the carliest times．This appears from its beroic renorn，since its king Wencmus is said
to have slain Hyllus，the aon of Hercules，in single combat．（Herod．ix．26；l＇aus，viii．45．§ 3．）The Tegeatae offered a long－continued and success－ ful resistance to the Spartans，when the latter at－ tempted to extend their dominion over Arcadia． In one of the wars between the two people，Chari－ lius or Charillus，king of Sparta，deceived by an oracle wbich appeared to promise victory to the Spartans，invaded Tegeatis，and was not only de－ feated，but was taken prisoner with all his men who had survived the battle．（Herod．i．66；Paus．iii． 7．§ 3，viii．5．§ 9 ，viii． $45 . \S 3,47 . \S 2,48$. § 4．）Dlore than two centuries afterwards，in the reign of Leon and Agesicles，the Spartans again fought unsuccessfully against the Tegeatae： but in the following generation，in the time of their King Anaxandrides，the Spartans，having ohtained possession of the bones of Orestes in accordance with an oracle，defeated the Tegeatae and compelled them to acknowledge the supremacy of Sparta，abont в．c．560．（Herod．i．65，67，seq－；Pans．iii．3．§ 5，seq．）Tegen，however，still retained its iude－ pendence，though its military force was at the dis－ posal of Sparta；and in the Persian War it appears as the second military power in the Peloponnenns， Laving the place of bonour on the left wing of tho allied army．Five hundrel of the Tegeatae fonght it Themopylae，and 3000 at the battle of Plataca， half of their force consisting of hoplites and balf of licht－armed troops．（Hurod．vii．202，ir．26，seq．， 61．）As it was not usual to send the whole furce of a state upon a distant march，we may probably estimate，with Clintor，the force of the Tegeatae on this occasion as not more than three－fourths of their whule number．This would give 4000 for the mili－ tary population of Tegea，and about 17,400 for the whole free population．（Clinton，F．H．vol．ii．p．417．）

Soon after the battle of Plataea，the Tegeatac were again at war with the Spartans，of the causes of which，howeser，we lave no information．We only know that the Tegeatae fought twice against the Spartans between B．C． 479 and 464 ，and were each tiuse defeated；first in conjunction with the Argives，and a second time together with the orher Aıcadians，except the Mantincians at Dipaca，in the Maenalian district．（Herod．ix．37；I＇aus．iii， 11．§ 7．）About this time，and also at a sulise－ quent periud，Tegea，and especially the temple of Athena Alea in the city，was a frequent place of refuge for persons who had remdered themselves ob－ noxious to the Spartan government．Niither fled the seer Hegesistratus（Herod．is．37）and the kings Leotychides，and Pausanias，son of Pleistoanax． （Herod．vi． 72 ；Xen．Hell．iii． $5 . \S 25$ ；Paus，in． 5．§ 6．）

In the Peloponnesian War the Tegeatae were the firm thlies of the Spsitans，to whom they remained frithful buth on account of their possessing an aristo－ cratical constitution，and from their jealonsy of the neighbonring democratical city of Mantineia，with which they were frequently at war．［For details see Mantineta．］Thus the Tegeatae not only re－ fused to foin the Argives in the alliance formed against Sparta in 13．c．421，but they accompanied the Lacedaemonians in their expedition against Argos in 418．（Thinc．v．32，57．）They also fought on the sile of the Spartams in the Corinthian War，394．（Xen．Hell．iv，2．§ 13．）After the battle of Lewetra，however（3；1），the Spartan party in Tepea was expelled，and the city joined the other Arcadian towns in the foundation of Megalopolis and
in the formation of the Arcadian confederacy. (Xen. Hell, vi. 5. §' 6, seq.) Whed Mantineia a few years afterwards quarrelled with the supreme Arcadian governneent, and formed an alliance with its old enemy Sparta, Tegea remained faithful to the new enfederacy, and fought under Epaminondas against the Spartuns at the great battle of Mantineia, 362 . (Xen. Hell. vii. 4. § 36, seq., vii. 5. § 5 , seq.)
Tegea at a later period joined the Aetolian League, but soon after the accession of Cleomenes III. to the Spartan throne it formed an alliance with Sparta, together with Mantineia and Orchomenns. It thus becane involved in hostilities with the Acbaeans, and in the war which followed, ealled the Cleomenic War, it was taken by Antigonus Doson, the ally of the Achaeans, and annesed to the Achaean League, B. c. 222 . (Pol. ii. 46,54 , seq.) In 218 Tegea was attacked by Lycurgus, the tyrant of Sparta, who obtained possessien of the whole city with the exception of the acropolis. It aubsequently fell into the laads of Maclanidas, but was recovered by the Achacans after the defeat of the latter tyrant, who was slain in battle by Pbilopoemen. (Pol. v. 17, xi. 18.) In the time of Strabo Tegea was the noly one of the Arcadian towns which continued to be inhabited (Strab. viii. p. 388), and it was still a place of importance in the time of Yausanias, who lias given us a minute account of its public bnildings. (Pans. viii. 45-48, 53.) Tegeas was entirely destroyed by Alaric towards the end of the 4 th century after Christ. (Cland. B. Get. 576; comp. Zosim. v. 6.)
The territory of Tegea furmed the southern part of the plain of Tripolitzi, of which a descriptiva and a map are gives onder Mastinens. Tegea was about 10 miles S . of the latter city, in a direct line, and about 3 niles SE. of the modern town of Tripolitzai. Being situated in the lowest part of the plain, it was exposed to inundations caused by the waters flowing down from the surrounding mountains; and in the course of ages the soil has beea considerably raised by the depositions lrought down by the waters. Hence there are scarcely any remains of the city visible, and its size can only be corjectured from the broken pieces of stone and other fragments scattered on the plain, nod from the foundations of walls and buildings discavered by the peasants in working in the fields. It appears, howerer, that the ancient city estended fronn the hill of Aio Sostis (St. Saviour) on the N., over the hamlets Ibrahion-Effendi and Paleo-EpisKuphi, at least as far as Akhirria and Piali. This would make the cily at least 4 miles in circumference. The principal remains are at Piati. Near the principal clurel of this village Leake found the foundations of an ancient building, of fine squared stones, annong which were two pieces of some large columns of marille; and there can be little doubt that these are the remains of the ancient temple of Athena Alea. This temple was said to have beeu originally built by Aleos, the fonnder of Tegea; it was burnt down in 1. c. 394, and the new building, which was erected by Scopas, is said by Pausanias to lave been the largest and most magnificent temple in the Peloponuesus (1'aus. viii. 45 . §4, seq.; for details see Dict. of Biogr. art. Scopas.) Pausalias entered the city through the gate leading to Pallantium, consequently the south-mestern gate, which must bave been near Pülk. He begins lis description with the temple of Athena Alea, and then goes across the great agora to the theatre, the remains of which Ross
traces in the ancieot foundations of the ruined church of Paled-Episkopi. Pérlaps this theatre was the splendid martle one built by Antiochus IV. Epiplanes in b.c. 175. (Liv. xli. 20.) Pausanias ends his description with the meation of a height ( $\chi$ colov íq $\boldsymbol{\eta} \lambda \dot{\alpha} \nu$, viii. $53 . \S 9$ ), probably the bill Aio Sostis in the N. of the town, and apparently the same as that which Pansanias elsewhere calls the Watch-Hill ( $\lambda 6 \phi o s$ qu入akTpis, viii. 48. § 4), and Polybius the acropolis (akpa, v. 17). None of the other pullic buildings of Tegeal mentioned by Pausanias can be identified with certainty; but there can be no doubt if excavations were made on its site many interesting remains would be discovered, since the deep alluvial soil is favourable to their preserration.

The territory of Tegea N. of the city, towards Mantincia, is a plain of considerable size, and is usnally called the Tegcatic plain (Tejeatıкoे テétovv). There was a smaller plain, separated. from the former by a low range uf mountains $S$. of Tripolitza, and lying between Tegea and Pallantiom: it was called the Manthyric plain (Mavөvpıкòv $\pi \dot{\epsilon}$ סbov), from Mautliyrea, one of the ancient demi of Tegea, the ruins of which are situanted SW. of Teyea, on a slupe of Mt. Boreiurn. (Paus. viii. 44. § 7, comp. viii. 45. § 1, 47. § 1 ; Steph. B. s. v. Mav $\theta \nu \rho \rho^{\prime} \alpha$. .) The remainder of the Tegeatis on the E. and S. is occupied by the mountains separating it from Argolis and Sparta respectively, with the esception of a small plain running eastward from the Tegeatic plain to the foot of Mt. Partheninm, and probably called the Corythic plain, from Corytheis, oue of the ancient demi of Tegea, which was situated in this plain. (Paus. viii. 45 . § I, 54. S4.)

The plain of Tegea baving no natural outlet for its waters is drained by natural cbasms through the limestone mountains, called katavóthra. of these the two most important are at the modern village of Persocá and at the marsh of Taki. The former ia situated in the Corythic plaia above mentioned, at the foot of Mrt. Partheniura, and the later is the marsh is the Manthyric plain, SW. of Tegea. The chief river in the district is now called the Sarantapotamos, whiclı is midoubtedly the Alpheius of Pausanias (viii. 54. § 1 , seq.). The Alpheius rose on the froitiers of Tegea and Sparta, st a place called Phylace ( $\Phi u \lambda a ́ k n$, near K'rya Irysis), one of the ancient demi of Tegea, and, as we may infer from its name, a fortified watch-tower for the protection of the pass. A little beyond Phylace the Alplieins receives a stream composed of several mountain torrents at a place named Sraniola (Eúmboia); but upon entering the plain of Tegea its course was different in ancient times. It now fluws in a north-easterly direction throngh the plain, receives the river of Dhalianá (the ancient Garates, $\mathrm{\Gamma} \alpha \mathrm{a}$ a$\tau \eta s$, Paus. viii. 54. § 4), flows through the Corythic plain, and eaters the katav́thra at Persord. Pausamias, on the other hand, says (viii. 54. § 2) that the Alpheius descends into the earth in the Tegeatic plain, reappcars near Asea (SW. of Tegca), where, after jowing the Eurotas, it sinks a second time into the earth, and again sppears at Asea. Hence it would seem that the Alpheius anciently flowed in a north-westerly direction, and entered the katavóthra at the marsh of Takk, in the Mantbyric phain. There is a tradition among the peasants that the course of the river was changed by a Turk, who acquired property in the neighbourlood, because the
tegranum.
kataróthra at the Taki did not absorb qurickly enow:h the waters of the mardh. The (iarates therefore anciently fluwed into the katavothra at Persord without having any connection with the Alpheius. It probably derived its name from Garea or Garease, one of the ancient den $i$ of Tegea, which may lave been situated at the villaze of Dhutiond. (luss, Peloponnes, p. 70, sel.; Leake, Teloponnesiaca, p. 112, seq.)
There were five roads leading from Tegen One led dne N. across the Tegeatic plain to Mantineia. [Mantineli.] A second led due S. by the valley of the Alpheins to Sparta, following the same ronte as the present roud from Tripolitza to Mistrá. A third led west to Pallantium. It dirst passed by the emalt mountain Cresinm (Kpintov), and then ran across the Janthyric plain along the side of the Taki. Monnt Cresinm is probably the small isclated hill on which the modern village of Junoे stands, and not the high monntain at the end of the plain, according to the French map. Upon reacling the Choma ( $\chi \hat{\omega} \mu \alpha$ ), the road divided into two, one road leading direct to Pallantium, and the other SW. to Megalopolis through Asea. (Paus. viii. 44. § 1, seq.; Xen. Hell. vi. $5 . \$ 9$, ai $\vdots \pi 1$
 separated the territories of Pallantium and Tegea, and extended as far sonth as Mount Boreiim (Kirivori), where it touched the territury of Megaiopolis. There are still remains of this choma running NE. to SW. by the side of the marsh of Taki. These remains consist of large blocks of stone, and must be regarded as the foundations of the choma, which cannot have been a choussce or canseway, as the French geographers call it, since $\chi \hat{\omega} \mu a$ aliways signifies in Greek writers an artificial heap of eartb, a tonulus, mound, or dyke. (Ross, p. 59.) A fourth roud lod SE. from Tegea, by the sources of the Garates to Thyreatis. (Paus. viii. 54. § 4.) A fifth road led NE. to Hysiae and Argos, across the Corythic plain, and then across Mt. Parthenium, where was a temple of Pan, erected on the spot at which the god appeared to the conrier Pheidippides. This road was practicable for carriages, and wis much frequented. (Pans. viii. 54 . § 5 , seq.; Herod. vi. 105, 106; Dict. If Bingr. art. Pheidipridis.) (Leake, Murea, vol. i. p. 88 , seq, rol. ii. p. 333, Peloponnesiucc, pp. 112, seq., 369 ; Ross, Pelopunnes, p. 66. seq.; 'urtius, Peloponnesos, wal. i. p. 247. seq.; Kuner, Com. de Rebus Tegeatarum, Berol. 1843.)

The Ruman puets use the adjertive Tegěēus or Tereaeus as equivalent to Arcadian: thus it is civen as an epithet to Pan (Virg. Gieorg. i. 18), Callisto, daughter of Lycam (Ov. Ar. Am. if. 55, Fast. ii. 167), Atalanta (Oc. Met. viii. 317, 3k0), Carmenta (Or. Fast. i, 627), and Mercury (Stat. Silc. 1. 54)

COIN OF TEGEA.
TEGIA'NUM (FH. Te ianen-is: Diuno). a municipal town of Lacania, situatel in the interior of that conntry, on the left bank of the river Tanager. lis name is found only in a corrupt form in Pliny,

## TEGYRA.

who enumerates the Tergilani among the "popali" in the interior of Lucania (Plia. iii. 11. s. 15) ; but the Liber Coloniarum mentions the "Praefectara Tegenensis" among the Praefecturae of Lncania (Lib. Col. p. 209), and the correct form of the name is preserved by inscriptions. From the same source we learn that it was a town of municipal rank while the discovery of them in the neighbonrhood of Diano leaves no donbt that that place represents the ancient Tegianum. (Romanelli, vol. i. p. 415 ; Mommsen, Inser. R. N. pp. 18, 19.) The modern eity of Diano is a considerable place situated on as hill about 4 miles west of I.a Sala, and kives the name of Valle di Diano to the whole of the extensive upland valley which is traversed by the river Tanagro in the upper part of its course. Sume remuins of the ancient city are still visible in the plain at the foot of the hill (Romanelli. l.c.). [E. H. B.]

TEGLI'CIUM (Itio. Ant. p. 223), Tegulicits (Tab. Peut.), and Tegulitis (Geogr: Rav. iv. 7), a place in Moesia Inferior, on the road between Candidjans and Dorostolum. It contained, according to the Not. Imp., a garrison of light troops. Variously placed near Veternicza and Tataritza. Some modern writers identify it with the fortress in Moesia called Saltopyrgus by l'rocopius (de Aedif. iv. 7.)
[T. H. D.]
TEGNA, in Gallia Narbonensis, was on the Rman ruad in the east bank of the Rhone between Vienna (Vïnne) and Valentia (Valence). The name occurs in the Table, in which the place is fixed at xiii. from Valentia. Tegna is Tein, the name of which in the writings of a later date is Tinctum. A milestone at Tein marks the distance to Vienna xxxviii. Tein is right opposite to Tournon, which is on the west side of the river. Tournon is well sitnated, and the monntains there approach close to the Rhone. (D'Anville, Notice, gc.; Ukert, Gallien.)
[G. L.]
TEGRA. [Tigra.]
TEGLLATA, in Gallia Narbonensis, is phoed in the Itins east of Aquac Sextiae ( 1 ir) on the road to Ad Turrim (Tources). The distance from Aquae Sestise to Terulata is xv, or svi., and from Tegulata to Al Turrim xvi. The distance measured along the roud between Aquae Sestiae and Ad Turrim is said to exceed the direct distance between these two phaces, which is not more than 28 Roman miles. Tegulata is supposed to be La Grande Peigiëre, near the bourg of Porrieres or Pourrières, perhapis somewhere about the place where C. Marius defeated the T'eutunes B. C. 102, and where a pyramid was erected to commemorate the great victory. This monument is said to have existed to the fifteenth century (A. Thierry, Hist des Gaulois, Veur. Partie, c. 3); and the tradition of tbis great battle is not yet effaced. Pourrieres is said to be a corrmption of Putridi Campi. (I)'Anville, Notice, gfc.) [G. L.]

TEGULICfUN [TEGLICtur]
TEGYRA (Tє $\mathbf{o ́ p a : ~ E t h . ~ T \epsilon \gamma u p e u ́ s ) , ~ a ~ v i l l a g e ~}$ of Boentia, near Orchomenus, and situated above the marshes of the river Melas. It was celebrated for its oracle and Temple of Apolle, who was even said to have been born there. In its neighbourhod was a mountain named Delos. Jeake places Tegyra at Xeropyrgo, situated 3 miles ENE. of Slripui (Orchomenus), on the heights which bund the marshes. (l'lut. Pelup. 16, de Def. Or. 5 and 8 ; Lycoplir. 646; Steph. B. s. v. ; Leake, Nurthern Gircece, vol. ii. pp. 155, 159 ; comp. Ulrichs, Reiscn, vol. i. p. 196.)

TEHAPHENES. [TAHPANIs.]
TEICHIUA (Teixtoy), a town of Aetalia Epictetus, on the borders of Locris, and one day's march from Crocyleinm. (Thuc, iii. 96.)

TEKOAH (Өєкає́, 1 Maccab. ix. 33; Өєки́a or Өєкové, Juseph. Vit. 75), a town of Palestine in Judab, to the south of Bethlehem. It was the residence of the wise woman who pleaded in behalf of Atsalom; was fortified by Rehoboam; was the birthplace of the propbet Amos, and gave ita name to the adjacent desert on the east. (2 Sam. xiv. 2; 2 Chron. xi. 6; Amos, i. 1; 2 Chron. xx, 20; 1 Mace. ix. 33.) Jerome describes Tekoah as situated upon a hill, 6 miles south of Betblebem, from which city it was visible. (Hieron. Prooem. in Amos. and Comm. in Jerem. vi. 1.) Its site still bears the name of Teki'口a, and is described by Rubinson as an elerated hill, not steep, but broad on the top, and covered with ruins to the extent of four or five acres. These consist chiefly of the foundations of houses built of squared stones; and near the middle of the site are the remains of a Greek church. (Rabinson, Bibl. Res. vol. i. p. 486, 2nd ed.)

TELA, a place of the Vaccaei in Hispania Turraconensis (Itin. Ant. p. 440), Variously identified with Fordesillas and Medinade Rio Seco. [T.H.D.]

TELAMON (Te $\lambda a \mu \omega{ }^{\prime} \nu$; Telamone), a city on the const of Etruria, situated on a promontory between the Mons Argentarius aod the mouth of the Umbro (Ombrone), with a tolerable port adjuining it. The story told by Diodorus of its having derived its name from the bero Telamon, who accompanied the Argonauts on their voyage, may be safely dismissed as an etymological fable (Diod. iv. 56). There seems no reasoo to doubt that it was originally an Etruscan town, but no mention of its name occars in bistory during the period of Etruscan independence. It is first noticed in B. c. 225 , when a great battle was fought by the Romans in its immediate neighbourhood with an army of Cisalpine Gaulb, who had made an irruption into Etruria, but were intercepted hy the consuls C. Atilius and L. Aemilins in the neighbourhood of Telamon, and totally defeated. They are said to have lost 40,000 men slain, and 10,000 prisoners, among whom was one of their cbiefs or kings (Pol. i. 27-31). The battle, which is described by Polybius in considerable detail, is expressly stated by him to have occarred "near Telamon in Etruria:" Frontinns, in speaking of the same battle, places the scene of it near Populonia (Strat. i. 2. $\S^{7} 7$ ), but the authority of Polybins is certainly preferable. The only other mention of Telamon that occurs in history is in B. c. 87 , when Marius landed there on his return from exile, and commenced gathering an army around him. (Plut. Mar. 41.) Bnt there is no doubt that it continued to exist as a town, deriving some importance from its port, throughout the perind of the Roman dominien. Its name is found both in Mela and Pliny, who calls it "portus Telamon," while Ptolemy notices only the promontory of the name ( $\mathrm{T} \in \lambda a \mu \omega ́ \nu$ ḱкpos, Itol. iii. 1. § 4 ; Plin. iii. $5 . ~_{5}$ s. 8; Del. ii. 4. § 9). The Itineraries prove that it was still in existence as late as the 4th century (Tab. Peut.; Itin. Marit. p. 500 , where it is called "Purtus Talanonis"); but from this time all trace of it disappears till the 14th century, when a castle was erected on the site. This, with the miserable village which adjoins it, still bears the name of Telamone; aod the shores of the bay are lined with remains of Koman buildings, but of no great interest ;
vol. it.
and there are no relics of Etruscan antignity. (Dennis's Etruria, vol. ii. p.258.)

TELCHI'NES. [RHoDIS, p. 713.]
TELEBOAE. [Taphine.]
TELEBOAS ( $\delta$ T $\eta \lambda \in 66$ as $\pi о \tau a \mu o ́ s, ~ X e n . ~ A n a b . ~$ iv. 4. § 3), a river of Armenia Major, a tribntary of the Eaphrates. Probably identical with the Alssanias.
[T. It. D.]
TELEPHRIUS MONS. [Ev'roen.]
TELEPTE. [Thala.]
TELE'SIA (Teגe $\begin{aligned} & \text { la : F.th. Telesinus: Telese), a }\end{aligned}$ considerable city of Samnium, situated in the valley of the Calor, a short distance from its right bank, and about 3 miles above its confluence with the Vultnrnus. It is remarkable that its name is never mentionell during the long wars of the liomans with the Samoites, though the valley in which it was situated was often the theatre of hostilities. Its name first occurs in the Second Punic War, when it was taken by Hannibal on his first irruption into Samnium, b. c. 217 (Liv. xxii. 13); but was recovered by Fabins in B. c. 214. (Id. xxir. 20.) From this time we hear no more of it till it became an ordinary Roman municipal town. Strabo speaks of it as having in his time fallen intn almost complete decay, in common with most of the citics of Samnium. (Strab. v. p. 250.) Bnt we learn that it received a colony in the time of the Trimmvirate (Lib. Colon. p. 238); and, though not mentioned by Plioy as a colony (the name is altogether omitted by him), it is certain, from inscriptions, that it retained its colonial rank, and appears to have continued under the Roman Empire to have been a flourishing and considerable town. (Orell. Inscr. 2626 ; Romanelli, vol. ii. p. 423; Dlommsen, Inscr. R.N. 4840-4915.) It was sitoated on the line of the Via Latina, or ratber of a branch of that road which was carried from Teanum in Campania through Allifae and Telesia to Beneventum (Itin, Ant. pp. 122, 304 ; Tab. Peut.), and this probably contributed to preserve it from decay.

The ruins of the ancient city are still visible about a mile to the NW. of the village still called Telese : the circuit of the walls is complete, inclosing a space of octagonal shape, not exceeding $1 \frac{1}{2}$ mile in circumference, with several gates, flanked by massive towers. The masonry is of reticulated work, and therefore probahly not earlier than thic time of the Roman Empire. The only ruins within the circuit of the walls are mere shapeless mounds of brick; but outside the walls may be traced the vestiges of a circus, and some remains of an amphitheatre. All these remains undoubtedly belong to the Roman colony, and there are no vestiges of the ancient Samnite city. The present village of Telese is a very small and poor place, rendered desolate by malaria; but in the middle ages it was an episcopal see, and its princijal church is still dignified by the name of a cathedral. Its walls cootain many Latin inscriptions, brought from the ancient city, the inhabitants of which migrated to the later site in the ointh century. (Craven, Abruzzi, vol. ii. pp.173-175; Giustiniani, Irizion. Topogr. vol. ix. pp. 149, 150.)

Telesia was remarkable as being the birthplace of the celebrated Samnite leader, during the social War, Pontius Telesinns; and it is probahle (though there is no distinct authority for the fact) that it was also that of the still more celobrated C. Puntins, who defeated the Romans at the Candine Forks.
[E. H. B.]
TELIS. [Pescino.]
4 c
 Strab．：Fith．Teג入 $\eta \nu \in u$＇s，Tellenmis），an ancient city of Latium，which figures in the early loman listory．According to Dionysius it was one of the cities founded by the Ahorigines sonn after their settlement in Latium（1）ionys．i．16），a proof at least that it was regarded as a place of great anti－ quity．Livy also reckons it as one of the eities of the Prisci Latini（i．33），which may perhaps point to the same result，while Dioderns includes it in his list of the calmies of Alba．（Diad，vii．ap．Euseb． Arm．j．185．）It was attacked by the Roman king Aneus Marcius，who took the city，and trans－ purted the inhabitants to Rome，where be settled them on the Aventine，together with those of Poli－ 1．rium and Ficana．（Liv．i 33；Dionys．iii．38，43．） Icllenae，however，does not seen，like the other two $1^{\text {laces }}$ just mentianed，to have been hereby reduced 1）i：significance；for its name appears again in B．c． 493 anong the confederate cities of the Latin League （1）iotys．v． 61 ）：and though this is the last mention that we find of it in listory，it is noticed both hy ：vrabo and Dinnysius as a place still in existence in 1l：mir time．（Dionys．i．16；Strab．v．p．231．）It is robable，however，that it had at that time fallen nitto complete decay，like Antemnae and Collatia；ns I：is only mentimud by Pliay among the once cele－ Irated cities of Latium，which had left no traces of their existence iri his day（Plin．iii．5．s．9），and from this time its name wholly disappears．The putices of Tcllenae atford scarcely any elue to its 1 ${ }^{\text {osition ；thrugh the circomstance that it continued }}$ ti）he inhabited，however slightly，down to the days of Augustus，weuld afford us more bope of being able to identify its site that is the case with Poli－ torium，Apiolap，and other places，which eeased to exint at a very early perind．It is this reason that las led Nibly to jlentify the ruins of an ancient city at $L_{a}$ Giostra，as those of Tellenae，rather than 1．ditoriun，as supposed by Gell．［PoLitomism．］ The site in question is a narrow ridge，bounded by two ravines of no great depth，but with abrupt and preipitous banks，in places artificially scarjed，and atill presentiag extensive remains of the ancient walls，constructed in an irregulur style of massive ${ }^{\text {jutuadrangular }}$ Whocks of tufo．Nin thoubt can exist that these indicate the site of an ancient city，but Wather of Politorium or Tellemae，it is imposible 1 determine；though the remains of a loman villa， －hirh indicate that the spet must have been in－ 1 sinted in the early a res of the Empire，give some UAhtional probability to the latter attribution．Ia Ciinstra is situated on the right of the Via Appin， about 2 miles from a farm－house ealled Fioruno inmediately adjuining the line of the ancient high－ 1 anl．It is distant 10 miles from lione，and 3 from L．－Frattecelie，on the Via Appia，adjoining the ruins of Boxillae．（Gill，Top．of Rome，Pp． $2 \times 1$ ） －2－3：Nibly，／finturni，vol．iii．pp．146－153．）

Whether the proverbial expression of＂tricae Tel－ 1 nue＂las suy referatuce to the ancient city of I nthum or not，can hardly be deternined，the origin fond meaning of the phrise being involved in com－ plate enseurity．（Vitro，ap，Non．i．1，8；Ammb， ath．（ientex，x．p． 28 ，with（ehler＇s note．）［E．II．I3．］

Sinus Telmissiena．（Lir，xxxvii．16；Incan，vii 248．）On the south－west of it was Cape Pelalium， at a distance of 200 stadia ．Its inhabitants were celebrated in ancient times．for their skill ns diviaens， nad were often consulted by the l．ydian kings． （Ilered．i．78；comp．Arrian，$A$ nab．ii．3．§ 4．）In the time of Strabo，hovever，who ealfs is a small tuwn（ $\pi ⿰ 冫 欠 \lambda^{\prime}(\chi י \eta)_{4}$ it seems to have fallen into decas； though at a later period it appears to lave been an episcopal sce．（Hieroel．p．684；cotap．Pomp．Mila， i． 15 ：l＇lin．v． 28 ；P（t）．v． 3 ．§\＄ 2 ；I＇olyb，xxii． 27 ；Studiasm．Mar．M．§§ 255，256；Scylax．p． 39，where it is miswritten ©eaviarós．）Consider－ able remains of T＇elmessus still exist at $3 / y e s$ or Neis；and those of a theatre，porticoes，and sepulciral chambers in the living rock，are nuneng the moot remarkable in all Asia Minor．（Leake，Asia Miner， p．128：Felluws，Asia Minor，p．243，where some representations of the remains of Telnessus are figured；I．yycia．p．106，foll．）

2．A small timen of Caria，at a distance of G0 st．dia from Halicarnassus，is likewise sometimes callel Telmessus，and sometimes Telinissus．（Suid． s．v．；Etym．Mag．s．v．；Arrian，Anab，i．25．\＆s； （ic．de Ihiv．i． 41 ：Hin．r．29，xxx，2．）The Carian Tchmessus lias often been confounded with the Lycian，and it is even somemhat denbtful whe－ ther the famous Telmessian soothsayers belonged to the Carian or the Lycian town．But the furmer nimst at all eveats have been an obscure place；and that it eannot have beeo the same as the latter is elear from the statement of Puleme in Suidas，thint it was only 60 stadia fron Halicarnassus．［L．S．］
TELMESSUS，according to Pliny（v．29），a tri－ butary of the river Glaucus in Caria，bot it flawed in all probability near the town of Telmessus，which derived its name from it．
［L．S．］
TlELMI＇SSICUS sINUS，a byy between I．yeia and Caria，which derived its name from the Le＂am town of Telmessus（Liv，sxxvii．36；Lucan，viii． 248 ）；but it is more commonly known by the name Glancus Sinus，and is at present called the Bay of Nacri．
［L．S．］
TLELMISSIS PROMONTORIUMI．［Telmesstis．］
TEMOBIS（Tท入ob．s．］＇tul．ii．6．§ 72），a town of the Jaccetani in Ilispauia Tarraconensis，now Martarell．（Ct．Laborde，Itin．i．§ 73 ；Swiubume， Lett．8．）
［T．H．D．］
TFLo MARTILS（Tuylon），in Galla Narbonen－ sis．This name is not mentioned by the geographers． It occurs in the Maritime Itin，and in the Notit． Ianp．Ovcid．，where a＂procurator Baphii Telonensia Galliaram＂is mentioned，which indicates the exist－ eare of a dyeing establishment there．In Lucan （iii．592）Telo is the name of a pilot or belmsman， and Cudendorp supposes that the pret gave the man this name because he was of the town Telo；which seems in strange conjecture．And again Silius （xiv．443）is supposed to allude to the same town， when he says－
＂Lit Neptanicolze transverberat ora Telonis．＂
Thesold lioman town is said to have been at or near Toulousan，where the Lazaretto now is．（Statist．du Jip．des Jiunches du Rkine，referred to by Ukert， Gallinu，p． 428 ）
［G．1．］
TELONXLY3，in Gallia．The Table lias a name on the romte lietween Apuac Bormonis（Borrbunt L．Archambault）and Augusteduntun（Autun），which name begins with 7 and ends with onnum．D＇An－ ville gives grod reasons for supposing that the place
may be Tunlun-sur-Arronx; and thas the modern nume may eoable us to correct the reading of the Table.
[G. 1.]
TELOS (Tyิ入os: Eth. Týdios: Dilos or Piscopiut), a small rocky island in the Carpathian sea, between Rbodus and Nisyrus, from the latter of which its distanee is only 60 stadia. Strabo (x, p, 48, s) tlescribes it as long and hirh, and abounding in stones fit for millstones. Its circumference was 80 stadia, and it contained a town of the same name, a larbour, bot spriogs, and a temple of Puseidon. The attribute long given to it by Strabo is scarcely correct, since the islaad is rather of a circular forn. The fanily of the Sieilian tyrant Gelon origioally came from Telos, (Hcrol, vii. 153.) According to Pliny (iv. 69) the island was celebrated for a species of ointmeat, and was in ancient times called Agathussa. (Šteph. B. s. v. Th̃̉os; Scylax, p. 38; Stadiasm. Mar. Magni, § 272.) The town of 'T'clus was situated on the Dorth coast, and remains of it are still seen above the modern village of $E_{l}^{\text {pis- }}$ copi. The houses, it appears, were all built in terraces rising above one another, and supported by struog walls of unhewn stone. The acrepolis, of which likewise a few remains exist, was at the top, which is now oecupied by a mediaeval castle. 1nseriptions have been found in Telos in great numbers, but, owing to the nature of the stone, many of then are now illegible. (Comp. Noss, Ilellenica, i. p. 59, foll., Reisen auf den Griech. Inseln, iv. p. 42, foll.)
[L. S.]

## TELPHU'SA. [Thelressi.]

' EMA, a tribe and district in Arabia, which took Their uame from Tema, one of the twelve sons of 1shmad. (Gen. xxv. 15 ; Is. $\mathbf{x x i} .14$; Jer. axv. 23 ; Jub, vi. 19.) Itulemy mentions in Aralia Deserta a town Themma ( $\Theta \dot{\epsilon} \mu \mu \eta$, г. 19. § 6). Tema is distinguished in the Old Testament from Teman, a tribe and distriet in the land of the Edomites (Iduluaca), which derived their name from Teman, a graudson of Esta. (Gen. xaxvi. 11, 15, 42: Jer. xlix. 7, 20; Ezek. xxv. 13; Amos, i. 12; Hab. iii. 3 ; Obad. 9.) The Temanites, like the other Edumites, are celebrated in the Old Testament for their wisdom (Jerem. xlix. 7; Obud. 8; Baruch, iii. 22, sey.) ; and henee we find that Eliphaz, in the book of Job, is a Temanite. ( $J o b$, ii. 11, iv. 1.) Jerome (Onomast. s. v.) represents Tema as distant 5 miles (Eusebius says 15 miles) from l'etra, and possessing a Kuaan garrison.

TE'MALA (T $\eta \mu \dot{\alpha} \lambda \alpha$, P'ol. vii. 2. § 3), a river in the Aurea Regio, in the district of India extra Giansen, probably now represented by the great river of Pegs, the Iravaddy. Near it was a town which bure the same name.
[ $\mathrm{V}:]$
TEMA'THIA. [Messenia, p. 341, b.]
TEME'NIUM (T $\eta \mu$ evoov), a town in the Argeia, at the upper end of the Argolic gulf, buitt by Temenus, the son of Aristonaches. It was distant 50 station from Nauplia (Paus. ii. 38. § 2), and 26 from Argos. (Strab, viii. 1. 368.) The river Hhrixus flowed ioto the sea between Temenium and Lerta. (l'aus. ii. 36. § 6, ii. 38. § 1.) Pausanias saw at Temenium two temples of Poseidon and Aphrodite and the tomb of Temenus (ii. 38, §1). Owing to the marshy nature of the 1 lain, Leake Was urable to explore the site of Temenium; but lioss identifies it with a mouod of earth, at the frot of which, in the sea, are remains of a dum forming a harbour, and upon the shore foun lations of builings, fragments of pottery, \&c. (Loake,

Morea, val. ii. 1. 4:6; Ross, Reisen int P'eluponnes, p. 149 ; Curtius, Peloponsesos, vol. ii. 1. 383 )

TEMENOTIITRA (Tquevou ev́pou. I':as. i, 35. § 7 : Eth. T T $\mu$ evobupeús, Coins), a small city of Lydis, according to 1'ausanias ( $l, c$.), or of Phrygia, accurding to llierocles (p. 668, ed. Wess.). It would seem to have lveen situated upon the borders of Mysia, since the Trimenothtritac ( $\mathrm{T}_{\mathrm{p}} \mathrm{\mu} \mu \mathrm{\nu}$ voloopitai) -which name is probably only anuther form of the Temenothyritae - are placed by Ptolemy (v. 2. § 1.5) iu Mysia. (licklel, vol. iii. p. 119.)

COIN OF TEMENOTHIHA.
TEMESA or TEMPSA (Tєué $\sigma \eta$ and T $\epsilon \mu \psi a$, Strab.; T $\epsilon \mu \epsilon \sigma \eta$, Steph. B.; T $\epsilon \mu \psi \alpha$, Ptol.: 1:th. Te$\mu=\sigma a i o s$, Tempsaous), an ancient city on thie W. cuast of Brottium, a little to the N. of the Gulf of Jipprdium, or Golfo di Sta Eufemia. Strabo tells us that it was oniginally as Ausonian city, hut subsequently occupied by a colony of Aetolians who had accompanied Thoas to the Trojan War. (Strab. vi. T, 255.) Many writers apjear to have supposed this to be the Temeaa meationed by Homer in the Odyssey on account of its mines of coppier (Odyss. i. 184); and this vietr is adopted hy Strabo; though it is much more probuble that the place alluded to by the poet was Tenesa in Cyprus, otherwise called Tamasus. (Strab. l.c.; Steph. B. s. v.; Schol. aul Ilom. Odyss. l.c.) We have no account of Temesa having teceived a Greek culony in historical times though it seems to bave become to a great extent Ilellenised, like so many other cities in this part of Italy. At one period, indeed, we learn that it was conquered by the Locrians (abuat 480-460 u. ..); but we know but how long it continued subject to their rule. (Stral. l.c.) Neither Seylas nur Scymoms Chins meation it among the Greek cities in this part of laly ; but Livy sul's expressly that it wis at Greck city before it fell into the liands of the Bruttiaos (Liv. $x \times x i r, ~ 45$ ). That people apparently made themselves masters of it at an early period is their eareer, and it remained io their hands till the whole country became spbject to the dominiun of Rome. (Strab. l.c.) During the Second l'unic War it sufferel severely at the hands, first of 1lannibal, and then of the lomans; but some ycars after the close of the war it was one of the places solected ly the Ronaans for the establishment of a colony, which was sent thither at the sume time with that to Crotona, 1. c. 194. (Liv, xxxiv: 45.) Bat this colony, the members of which had the privileges of lioman citizens, cios not appear to liave been numerous, and the town never rose to be a phace of importance. Its copper mines, which are alluted to by several writers (Ovid, Met. xv. 706; Stat. Sile. i. 1. 42), had censed to be productive in the days of Strabo (Strab. vi. p. 256). The only mention of Tempss which oceurs in lioman history is in connection with the great servile insurrection under Spartacus, when a remnant of the servile force seun to have established themselves at Tempan, and for a tine mantaned Inssession of the torn. (Cic. Firm:

## TEMPE.

v. 15, I6.) Its name is afterwards found in all the geographers, as well as in the Tabala, so that it unust have subsisted as a town throughout the Roman Empire. (Strab. l.c.; Plin. iii. 5. s. 10; Ptol. iii. 1. § $9 ;$ Tab. Peut.) Pausanias expressly tells ns it was still inhabited in his day; and Pliny also notices it for the excellence of its wine. (Paus, vi. 6. § 10 ; Plin. xiv. 6. s. 8.) The period of its destruction is unkuown; but after the fall of the Rutnan Empire the name wholly disappears, and its exact site has never been determined. The best clue is that afforded by the Tabula (which accords well with the statements of Pliny and Strabo), that it was situated 10 miles S . of Clampetia. If this last town be correctly placed at Amantea [Climpetia], the site of Tempsa must be lonked fur on the coast near the Torre del Piano del Casale, :dont 2 miles S. of the river Saruto, and 3 from Nicera. Unfortunately none of the towns along this lise of coast can be fised with anything like (ertainty. (Cluver. Ital. p. 1286; Romanelli, rol. i. 1. 35.$)$

Nuar Temesa was a sacred grove, with a sbrine of sanctuary of the hero Polites, one of the compamions of Ulysses, who was ssid to have been slain on the spot, and his spectre continued to tronble the inhabitants, until at length Euthymus, the celebrated Lucrian athlete, ventured to wrestle with the spirit, and having vanquished it, freed the city from all fiurther molestation. (Strab. vi. p. 255; Paus, vi. 6. §§ 7-11: suid. r. Ébevuos.) [E. H. B.]

TEMI'SDIA ( $\eta$ T TE $\mu \sigma \delta i a$, Ftol. ri. 4. § 3), one of the disticts inty which ancient Persia was divided. It cannot now be determined exactly what its position was; but, as it adjoined the Mesabatae, it proh bly was part of a long narrow plain which extends through that proxince in a direction north-west and suthth-cast. (Lassen, in Erscb und Gruber's Encycl. vul. xri. p. 438 .)

TEMMICES.
[Boeotis, p. 414.]
TEMNCS (T $\hat{\eta} \mu \nu \quad \nu$ úpas), a mountain range of Mrsia, extending from Mount Ida eastrard into Phrygia, and dividing Mysia into two balves, a nurthern and a southern one. It contained the xources of the Macestus, Mysius, Caicus, and Exenus. (Strab. xiii. p. 616: 1'tol. v. 2. § 13.) Ilanilun (Rescarches, ii. p. 125) is inclined to beleve that Jons Temnus is the same as the $A k$ Dagh, or, as it is commonly called in mapa, Morad Dagh.
[L. S.]
 Aeolis in Asia Minur, not far from the river Hermus, situated on a beight, from which a commanding view was intained over the territories of Cyme, Pbocaea, and Kmyrna. (Sirab. xiii. p. 621.) From a passage in Pausanias (v. 13. § 4), it might be inferred that the town was situated on the northern bank of the Hermus. But this is irreconcilable with the statement that Tumnus was 30 miles south of Cyme, and with the remarks of all other writers alloding to the place. I'ling (r. 29) also seems to he mistaken in placing Temnus at the mouth of the Hermus, for althungh the deposits of the river bave formed an extensive allowial tract of land, it is evident that the sea never extended is far as the site of Temnus. The town had already much decayed in the time of Strabo, thuugh it never appears to have been very large. (Xenoph. Ifell. iv. 8. § 5 ; Iferod. i. 149 ; Polyb. v. 77, xx. 25; Cic. pro Flacc. 18.) In the reign of Tiberins it was much injured by an earthquake (Tac. Ann. ii. 47), and in the time of l'ing it had ceased
to be inbabited altogether. Its site is commonly identified with the modern Menimen, though Texier, in bis Description de l'Asie Mineure, looks for it at the site of the village of Guzal-Hissar. [L. S.]

CON OF TEMNUS.
TEMPE ( $\tau \grave{\alpha}$ T $\epsilon \dot{\prime} \mu \pi \eta$, contr. of $\mathbf{T} \epsilon \mu \pi \in a$ ), a celebrated valley in the NE. of Thessaly, is a gorge between Mounts Olympus and Ossa, throngh which the waters of the Peneius force their way into the sea. The beanties of Tempe were a favourite subject with the ancient poets, and liare been descrihed at great length in a well-known passage of Aelian, and more briefly by Pliny: but none of these writers appear to have drawn their pictures from actual observation; and the sceoery is distinguished rather by sarage grandeur than by the s!lvan beauty which Aelian and others attribute to it. (Catull. Isiv. 285; Ov. Met. i. 56s: Virg. Georg. ii. 469; Aelian, 1. If. iii. 1 ; Plin. is. 8.s. 15.) The account of Livy, who copies from Polybius, ad eye-witness, is more in accordance with reality. This writer says, " Tempe is a defile, difficult of access, even though not guarded by an enemy; for besides the narrowness of the pass for 5 miles, where there is searcely room for a beast of burden, the rocks on both sides are so perpendicular as to cause giddiness both in the mind and eyes of those who Jook down from the precipice. Their terror is also increased by the deyth and roar of the l'eneus rushing through the midst of the valley." (Liv. xliv. 6.) He adds that this pass, so inaccessible by nature, was defended by four fortresses, one at the western entrance at Goanus, a second at Condylon, a third at Charax, and a fourth in the road itself, in the middle and narrowest part of the valley, which could be easily defended by ten men. The pass is now called Lykistomo, or the Holf's Moutk. Col. Leake gives ahout four miles and a half as the distance of the road throngh the valley. In this space the width of the gorge is in some parts less than 100 yards, comprehending in fact no more than the breadth of the road in addition to that of the river. Tbe modern road follows in the track of the ancient military road made ly the Romans, which ran along the right bank of tbe river. Leake remarks that even Livy in his description of Tempe seems to have added embellishments to the autbority from which be borrowed; for, instead of the Pencius flowing rapidly and with a loud noise, nothing can be more tranquil and steady than its ordinary conrse The remains of the forth castle mentioned by Liry are noticed by Leske as standing on one side of an immense fissure in the precipices of Osss, which afford an extremely rocky, though not impracticable descent from the heights into the vale; while between the castle and the river space obly was left for the road. About half a mile beyond this fort there still remains an inscription engraved upon the rock, on the right-hand side of the road, where it asceads the hill: "L. Cnssius Longinus Pro Cos. Tempe munivit." It is probable from the position of this inscription that it relates to the making of the rowi, though some refer it to defensivo works erected
by Longinus in Tempe. This Longinns appears to have been the L. Cassius Longinos who was sent by Caesar from Illyria into Thessaly. (Caes. B. C. iii. 34) When Xerxes invaded Greece, B. c. 480 , the Greeks sent a force of 10,000 men to Tempe, with the intention of defending the pass against the Persians; bot having lesrnt from Alexander, the king of Macedonia, that there was another pass across Mt. Olympus, which entered Thessaly near Gonnus, where the gorge of Tempe commenced, the Greeks withdrew to Thermopylae. (Herod. vii. 173.)

It was believed by the ancient historians and geographers that the gorge of Tempe had been produced by an earthquake, which rent asunder the mountains, and afforded the waters of the Peneius an: egress to the sea. (Herod. vii. 129 ; Strab, ix. p. 430 .) But the Thessalians maintained that it was the god Poseidon who had split the mountains (Herod. $\boldsymbol{l}$. c.) ; while otliers supposed that this had been tbe work of Hercules. (Diod. iv. 58 ; Lucan, vi. 345 .)

The pass of Tempe was connected with the worship of Apollo. This god was believed to have gone thither to receive expiation after the slaughter of the serpent Pytho, and aftermards to have returned to Delphi, bearing in his hand a branch of laurel plucked in the valley. Every ninth year the Delphians sent a procession to Tempe consisting of wellborn youths, of which the chief youth plucked a branch of laurel and brought it back to Delphi. Oo this occasion a solemn festival, in which the inhabitants of the neighbouring regions took part, was celebrated at Tempe in honour of Apollo Tempeites. The procession was accompanied by a flute-player. (Aelisn, I. H. iii. 1 ; Plut. Quaest. Graec. c. 11. p. 292, de Musica, c. 14. p. 1136 ; Bückh, Inscr. No. 1767, quoted by Grote, Hist. of Greece, vol. ii. p. 365.$)$

The name of Tempe was applied to other beautifu] valleys. Thus the valley, through which the HeJurus flows in Sicily, is called "Heloria Tempe" (Ov. Fast. iv. 477 ) ; and Cicero gives the name of Tempe to the valley of the Velinus, near Reate (ad Att. iv. 15). In the same way Ovid speaks of the "Helicouia Tempe" (Am. i. 1. 15).
(Leake, Northern Greece, vol. iii. p. 390, seq.; Dodwell, vol. ii. p. 109, seq.; Hawkins, in Walpole's Collection, vol, i. p. 517, seq.; Kriegk, Das Thessalische Tempe, Leipzig, 1835.)

TEMPSA. [TEMESA.]
TENPI'RA (Ov. Trist. i. 10. 21 ; in Geogr. Rav. iv. 6, Tympira; in It. Ant. p. 322, Timpirum; and in It. Hier. p. 602, Ad Unimpara), a town in the S. of Thrace, on the Egaatian Way, between Trajanopolis and Masimianopolis. It was situated in a defile, which rendered it a convenient spot for the operations of the predatory tribes in its neighbourlood. Here the Thrausi attacked the Roman army ponder Cn. Manlius, on its retarn, Joaded with booty, through Thrace from Asia Ninor (B. C. 188); but the want of shelter exposed their movements to the Romans, who were thus enabled to defeat them. (Liv. xxxviii. 41.) The defile in question is probably the same as the Kopain $\omega \nu$ ovevá mentioned by Appian (B. C. iv. 102), and through which, he states, Bratus and Cassius marched on their way to Philippi (Tatel, de I'ae Egnatiae Parte orient. p. 34). Paul Lucas (Trois Vog. pp. 25, 27) regards it as corresponding to the modern Gürschine.
[J. In]
TE'NCTERI or TE'NCHTERI (Tєүктєpot,
 an important German tribe, which is first mentioned hy Caesar (B. G. iv. 1, 4). They appear, together with the Usipetes, originally to have occrupied a district in the interior of Germany ; but on bring driven from their original homes by the Suevi, and baving wandered about for a period of three years, they arrived on the banks of the Lower Jhine, and compelled the Menapii who inhabited both sides of the river to retreat to the western bank. Some time after this, the Germans even crossed the Rhine, established themselves on the western bank, in the country of the Menapii, and spread in all directions as far is the districts of the Eburones and Condrasi, who seem to bave invited their assistance against the Romans. This happened in B.C. 56. The Germans demanded to be allowed to settle in Gaul; but Caesar, derlaring that there was no room for them, promised to procure habitations for them in the country of the Ubii, who happened to bave sent ambassadors to him at that time. The Germans asked for three days to consider the matter, requesting Cacsar not to advance farther into their country. But, suspecting some treacherous design, he proceeded on lis march, and an engagement ensued, in which the Romans were defeated and sustained serious losses. On the following day the chiefs of the Germans appeared before Caesar, declaring that their people had attacked the liomans without their orders, and again begged Caesar to stop his march. Caesar, however, not only kept the chiefs as his prisoners, but immediately ordered an attack to be made on their camp. The peuple, who daxing the absence of their chiefs bad abandoned themsplves to the feeling of security, were thrown into the greatest confusion by the unsuspected attack. The men, however, fought on and among their waggons, while the women and children took to flight. The Roman cavalry pursned the fugitives ; and when the Germans lieard the screams of their wives and children, and saw them cut to pieces, they threw away their arms and fled towards the Rhine; but as the river stopped their flight, a great number of them perished by the sword of the Romans, and others were drowned in the Rhine. Those who escaped across the river were hospitably received by the Sigambri, who assigned to the Teacteri the district between the Ruhr and the Sieg. (Caes. B. G. iv. 4-16; Livy, Epit. lib. exxxviii.; Tac. Germ. 32, 33, Ann. xiii. 56, Mist. iv. 21, 64, 77; Plut. Cats. 21; Dion Cass. xxxix. 47, liv. 20, 21 ; Flor. iii. 10 , iv. 12 ; Oros. iv. 20 ; Appian, de Reb. Gall. 4, 18 ; Ptol. ii. 11. §8.) The Tencteri were jarticularly celebrated for their excellent cavalry ; and in their Dew country, on the eastern bank of the Ehine, they possessed the town of Budaris (either Monheind or Dusseldorf), and the fort of Divitha (Dentz). In the reign of Augustus, the Tencteri joined the confederacy of the Cherusci (Liv. l. c.), and aftelwards repeatedly appear joining other tribes in their wars against Rome, until in the end they appear as a part of the great confederacy of the Franks. (Greg. Tur. ii. 9 ; comp. Wilhelm, Germanien, p. 141 ; Reichard, Germanien, p. 31 ; Latham, Tucit. Germ. p. 110.)
[L. S.]
TE'NEA (Tєyє́a: Eth. Tєyєár $\eta$ ) , the most important place in the Cointhia after the city of Coriuth and her port towns, was sitaated south of the capital, and at the distance of 60 stadia from the latter, according to Paussnias. The southern gate of Cornth was called the Teneatic, from its leading to

## TENEBRICN.

Trenea. Stephanns deseribes Tenea as Iyma between Cointh nnd Mycenae. (s, v. Tevéa.) The Teneatac chamed descent from the inhabitants of Tenedos, who were hrought over from Troy as prisoners, and settled ly Acamemonn in this part of the Corinthia; and they said that it was in consequence of their Trojan origin that they womhipped Apollo above all the other gols. (Paus. ii. 5. § 4) Strabo alsn mentions here the templin of $A$ pollis 'Fereates, and says that Tenea and Tenedos had a common arigin in lennus, the son of Cyenus. (Strab, viii. p. 380 .) According to Dionysius, however, Tenea was of late foundation. (Cic, al All, vi. 2. §3.) It was at Tenea that Oedipms was said to have passed his childinonl. It was almo from this place that .Irchias twok the ereater number of the colonists with whom ho founded Syracuse. Ifter the destruction of Corintli by Dummius, Tenea had the good fortune tn continue undisturhel, beeause it is said to have assisted the Romans against Corinth. (Strah. l. c.) We camnot, however, suppose that an imsignificaut phace like Tenea could have acted in opposition to Corinth and the Achaean League; and it is more probable that the Teneatae were spared by Mnmmius in conseyuenee of their pretended Trojan descent and consequent aflinity with the liomans themselves. However this may be, their geod fortune gave rise to the line:

## 

Tenea lay in the mountain valley through which flows the river that lalls into the Corinthian gulf to the east of Corinth. In this valley are three plawes at which vases and other antiguities have been discovered, namely, at the two villages of Chilimidi and Klemia, buth on the road to Nauplin, and the latter at the very foot of the ancient rand Contoporia [see Vol. I. p. 201, h.], and at the villace of A thiki, tin hour past of Chilimuidt, on the roal to Sophikio. In the tields of thliki there was found an uncient statue of A pollo, a striking conkirmation of the prevalence of the worship of this god in the district. The Teneatae would therefore appear to have dwelt in scattered ahodes at these three spots and in the intervening country; but the villace of Tenea, properly so called, was probably at Chilimodi, since the distance from this place to Corinth corresponds to the 60 stali: of Pausanias.

Since one of the passess from the Arreia into the Counthia russ by Klenia and Chilimoxk, there can to little dmoht that it was hy this road that Acesi1 urs marchel from the Argein to Corinth in n.c. 391. (Nen. Mell iv. 5. Si 19.), In the text of Xemophom
 Kópiplov, but Tevéay onght to he snbstitnted for Teyéar, since it is impussible to helieve that Arc--ilaths cothli bave marched from the Argein tu Corintis by way of Tegea. Mreoser, we learn from Ntadio (viii. p. :380) that the well-known name of Teepa was in other enses substitutel for that of Tenea. In the parallel passage of the Agesilans of Xenophon (ii. 17). the pass by Temea is called кatà Tえ̀ $\sigma \tau \in \nu a ̀$. (Lake, Merren, vol. iii. p. 320, Prhponmeiera, p. 400 ; Cartins. Pelompmesns, val. ii. 549, friil)
 a promuntory on the E. coast of Spain, near the momth of the therse. stephanis. B. (s, n.) :Itso tumutions a district ealled Tenchria, and Ptodmy 4 harbur callel Tratbrins, whiel Mara (Hisp, ii. s) takes to be Alfachs ns ir Torragrona, but which matt helmakel for to the sil:

## TENEDOS.

 Turk. Iingrdsha-Aclassi), an island off the const of Troas, from which its distance is only 40 stadia, while from Cape Sigemm it is 12 miles distant. (Strab, xiii. p. 604; Pllin, ii, L0G, v, 39.) It was originstly calleal Leuenphrys, from its white cliff, Calydna. Phenenice, or Lymessus (Strab. Lc.; Pivis. x. 14. S.3; Steph. B. s v. Teve 0 os; Eustath. ad IIom. Il. p. 33 ; Plin. l. c.), and was believed to have received the nane of Tenedons from Tennes, a son of Cyenas (Strab. viii. p. 380; Dind. r. 83 ; Conon, Narrat. 28; Cic. in Verr. i. 19). The island is described us being 80 stadia in circmuference, and containing a tewn of the same name, which was an Acolian settlement, and sitnated on the eastern coast. (llerol. i. 149; Thucyd. vii. 57.) The town possessed tro harbours, one of which was called Bópetov (Arrian, Arab. ii. 2. § 2; Scylax, p. 35, whe, however, notices only one), and a teimple of the Sinynthian Apollo. (Strab. L.c.; llom. Il. i. 38,452 .) In the Trojan legenl, the island plays a prominent part, and at an early period seems to have been a place of considerable importance, as may be inferred from certain mncient proverbial expressions which owe their origin to it, snch as Tevédos $\pi e ́ \lambda e k u s(S t e p h . ~ B . ~ s . ~ v .: ~ A p m s t o l, ~ x v i i i . ~$ 28 : Dingenian. viii. 58 : comp. Cic, ad Quint, Frat. ii. 11), Tevérıos દ̌עยparas (Zunob. vi. 9; Eu-tath.
 Plnt. Quaest. Gr. 28), Tevéôrov karớv (Apostol. x. 8(1), and Tevéroos छ̇uvj́yopos (Steph. B. s. v.). The lats anl civil institutions of Tenedos seem to have been celebraten for their wisdom, if wo may creilit Pindar, whose eleventh Nemean oi. is inscribel to Aristagoras, a prytanis or chief maxistrate of the island. We further know from Stephanus B, that Aristotle wrote nn the polity of Tenelos. Daring the Persian wars the island was taken poscession of by the Persians (1lerod. vi. 31), and during the Peloponnesian War it sidel with Athens and paill tribute to her (Thuc, l. c. ii. 2), which seems to have amounted to 3426 drachmac evory year. (Franz, Elem. Epigraph. n. 52.) Afterwards, in B. C. 389. Tenedos was ravaged by the Lacedaemonians for its fidelity to Athens (Xen. Hist. Gr. v. 1. § 6); but thongh the pence of Antalcidas gave up the island to Persia, it yet maintained its connection with Athens. (Demosth. $c$. Polycl. p. 1223, c. Thencr: p. 1333.) In the time: of Alex:miler the Grent, the Tenedinns throw off the Persian yoke, and, though reconquered by PharnaInzus, they sonn again revoltel from l'ersia. (Arrian, Anchb. ii. 2, iii. 2.) During the wars of Macedonis with the Iomans, Tenedos, owing to ita situation near the entrance of the Hellespont, was all important naval station. (Polyb. xvi. 34, xxyii. 6; Liv, sxxi. 16. xliv. 28.) In the war against Mithridates, Lucullus fought a great naval battle near Tenedos. (I'lut. Luc. 3; Cic. p. Arch. 9, p. Mur. 15.) In the time of Virgil, Tenedns scems to bave entirely lost its ancient impertance, and, being conscions if their weakness, its imhabitants had placed thennselves under the protection of Alexandria Trmas (1'ams. x. 14. §4). The favonrable situation of the is land, howeser, prevented its utter decay, aml thn enyeror Justimian cansed granaries to be erceted in it. to reccive the supplies of corn conveyed from Egypt to (' intantinnple. (Irocop. de stel. i. 1.) The women of Timedus are reported to have been of surpascil : Hewty. (. Athen xiii. p. 609.) There are but fesw ancient reustins in the islanl worthy of notice. (Chandler, Trurels in A 1 in , Minor. P. 22; I'rokesth.

Denkworligkeiten, i. p. 111, full.; tlemmer, Respublica Tenediorum, Ilafuiae, 1735.)
[L. S.]

COLN OF TENEDOS.
TENEDOS (Téveঠos: Eth. Teveঠ́cús), a fortified enast-town in the west of Pamphylia, 20 stalia to the west of Attalia. (Steph. B. s. v.; Stadiusm. Slar. M. §S 224, 225.) It has been conjectured that this town is the same as Olbia, the remaios of which are exactly 20 stadia frem Attalia, and that one of the two oames was I.ycian and the other Greek. (Mïller, ad Stadiasm. p. 490.) [L. S.]

TENE'RICUS CAMPUS. [Boeotis, p. 413, b.]

TE'NESIS REGIO (T $\eta \nu \in \sigma / 5$, Strab. xvi. p. 770), was, according to Strabo, who alone mentions it, an inland province of Aethiopi:a, lying due E. of the Sabse, and net far distant from the kingdom or city of Merce. Tenesis was geverned, at least when Straho wrote, by a queen, who was also the sovereign of Meroe. This was one of the many districts of Acthiopia assigned by rumour to the Autemali, Sembritae, or Aegyptian war-caste, whe abandened their native country in the reign of Psammetichus [seminitas]. The lake Coloe and the sources of the Astapus are by some geographers placed in Tenesis. It was an alluvial plain bounded on the E. by the Abyssinian Highlands, and frequented by elephants, rhinoceroses, \&e.
[W. B. D.]
TENOS (Tîvos: Eth. Tijulos: Tino), an island in the Aegaean sea, and one of the Cyclades, lying between Andros and Delos, distant from the former 1 mile and from the latter 15 miles. (Plin, iv. 12. s. 22.) It stretches from NW. to SE., and is 15 miles long according to Pliny (l. c.), or 150 stadia according to Scylax ( $p$. 55). It was also callet
 of its springs, and Ophiussa because it abounded in snakes. (Plin. l.c. ; Mela, ii. 7. § 11 ; Steph. B. s. v.) The sons of Bureas are said to have been slain in this island by Hercules. (Apill. Rhod. i. 1304, with Schol.) In the invasion of Greece by Serxes, the Tenians were compelled to serve in the I'crsian fleet; but a Tenian trireme deserted to the Greeks immediately before the battle of Salamis (II. C. 480), and accordingly the name of the Tenians was inscribed upon the tripod at Delpbi in the list of Grecian states which had overthrown the I'ersians. (Herod. viii. 82.) Pausanias relates that the name of the Tenians was also inscribed on the statue of Zeus at Olympia among the Greeks who had fougbt at the battle of Ilataen (v. 23. § 2). The Tenians afterwarls formed part of the Atherian maritime empire, and are mentioned ameng the snbject allies of Athens at the time of the Sicilinn expelition (Thue. vii. 57). They paid a yearly tribute of 3600 drachmae, from which it may be inferted that they emjoyed a considerable shave of prooperity. (Franz, Elem. E'pign: Gir: No. 49.) Alesander of Pherat took prseession of Tenos lor a
time (Dem, c. Polycl. p. 1207) ; and the island was afterwards granted by M. Autonius to the Rhodians (Aןpian, B. C. v. 7.) After the conquest of Constantinople Ly the Latins, Tenos tell to the share of the Venctians, and remained in their hands long nfter their olher possessions in the Aegaean lad been taken Ly the Turks. It was ceded by Venice to the sultan by the peace of l'assarovitz, 1718. It is still one of the most properous islands in the Aegaean, and the inhabitants are remarkable for their industry and good cenduct. The present pepulation is about 15,000 souls, of whom mere than half are Catheles, - a circumstance which, by bringing them into closer connection with western Europe, has contributcd to their prosperity.

The ancient eity of Tenus, of the same name us the island, stood at the south-westeru end apon the same site as St. Niculaos, the present capital. Scylax says that it pussessed a harbour, and Stralun describes it as a snall town. (Scyl. p. 22 ; Strab. x. p. 487 ; Ptol. iii. 14. § 30.) In the neighbourhood of the city there was a celebrated temple of Poseidon situated in a grove, where festivals were celebrated, which were much frequented by all tho neighbouring people. (Strab, l. c. ; Tac. Am. iii. 63; Clem. Protr. p. 18 ; Böckh, Inser. No. 2329, 2331.) The attributes of Poseidon appear on the coins of Tenes. There was another town in the island named Eriston ("Hpiatov; Bückh, Inser. 2336, 2337), which was situated in the intetior at the village of Komi. Among the curiosinies of Tenos was mentioned a fountain, the water of which would not mix with wine. (Athen. if. p. 43, c.) The island was celebrated in antiquily for its fine garlic. (Aistoph. Plut. 18.) 'fhe chiof modern production of the ishand is wine, of which the best kind is the celebrated Malvasia, Which new grows only at Tenos and no longer at Monembasia in Peloponnesus, from which place it derived its name. (Tonrnefort, linyage, fe. vol, i. p. 271, trunsl.; Exped. Scientif: vol. iii. p. 2: Fiedler, Reise, vol. ii. p. 241, ser. : Finlay, llist. of Grecee under Othoman and Ienetian Domination, pp. 276, 287; and especially Ross, Reise auf den Gricch. Inseln. vol. i. p. 11, seq., who cites a murnograph, Mareaky Zallony, Voynyo à Tine, lane des iles de lArchipel de la Gréce, Paris, 1809.)

CUIN OF TENOS.
TE'NTILA or TE'NTYRIS ( $\tau$ à Tévzvpa, Strab. xvii. p. 814; I'tol. iv. 5. $\S s S_{\text {6 }} 6,8$; Steph. B. s. c.: Eth. Tevtupitys), the Coptic Tentore and the modern Denderak, was the capital of the Tentyrito Nome in Upper Aegypt (Agutharch. ap. Phot. p.447. ed. Bekker). It was situated in lat. $26^{\circ} 9^{\prime} \mathrm{N}$., on the westem bank of the Nile, about 38 miles N. of Thebes. The name of the city was probally derived from the principal wbject of worship there the goddess Athor (Ajhrolite), being a constractal form of Thy-n-Athor or abode of Ather. The hie. ruglyphic legend of the genius of the place cintains
the name of the town, and is geperally attached to the head-dress of Athor, accompanied by the sign Kali or "the land." The Tentyrite Ather has a Luman face with the ears of a cow (Rosellini, Monum. del. Cullo, pl. 29. 3), and her attribntes so closely resemble thwe of 1 is, that it was long duabtful to which of the two goddesses the great temple at Tentyra was dedicated. Like Isis, Athor is delineated nursing a young child named Ehöon, suid, in hieroglyphics, to be her sen. He is the third menther of the Tentyrite triad of deities.

The principal fabrics aud produce of Tentyra were flax and linen. (1'lin. xis. 1.) Its inhabitants held the crocodile in abhorrence, and engaged in sabguinary conflicts with its worshippers, especially with thuse of the Ombite Nome [Ombos]. Juvenal appears to have witnessed one of these combats, in which the Ombites had the worst of it, and one of them, falling in bis flight, was torn to pieces and devoured by the Tentyrites. Juveoal, indeed, describes this fight as between the inbabitants of contiguous nomes ("inter finitimos"); but this is incorrect, since Ombos and Tentyra are mone thas 50 miles apart. As, however, Coptos and Tentyra were nearly oppasite to each other, and the crocodile was worshipped by the Cuptites also, we shonld probably read Cuptos for Ombos in Juvenal. (Sut. xv.) The latter were so expert in the chase of this animal in its uative element, that they were wont to follow it into the Nile, and drag it to shore. (Aelian, Hist. Anim. x. 24 ; Plid. viii. 25. s. 38.) Seneca (Nat. Quaest. ii. 2) says that it was their presence of mind that gave the Tentyrites the advantage over the crocodile, for the men themselves were small sinewy fellows. Strabo (svii. pp. 814, 815) saw at Rome the exbilition of a combat between the crucodile and men purposely imported from Tentyra. They plunged boldly into the tanks, and, eatangligg the crecodiles in nets, haled them backwards and forwards in and out of the water, to the great amazement of the beholders.

Su long as Aegypt was comparatively unesplored, no rnins attracted more admiration from travellers than those of Tentyra. They are the first in tolerable preservation and of conspicaous magnitude that meet the eyes of those who ascend the Nile. They are remote trom the highways and habitations of men, standing at the toot of the Lityan bals, tunid the sands of the westera desert. But though loms regarded is works of a remote cra, Aegeptian art wats already on the decline when the temples of 'Tontyra were erected. The architecture, indeed, reflects the grandeur of earlier periuds; but the sonlptures are unglacetul, and the hieroglyphics unAlulfully crowded upon its momments. The most succent of the inscriptions do not go farther back than the reigus of the later l'tolemies; but the names of the Caesars, from Themius to Antoninus l'us (A.b. 14-161), are of frequent occurrence. Tentyra, in common with Upper Angypt generally, appears to bave protited by the peace and security it enjoyed onder the amperial govenument to enlarge or restore its monuments, wheich, since the Persian occapration of the country, had mostly fallen into deeay. The proneipal structures at Tentyra are the groat tenple dedieated to Athor; a temple of Isis; a Typhonnum; and an isolated huitding without a root, of which the object li:s not been discovered. With the exception of the latter, these structures are inclosed by a crude lrick wall, forming a square, eash side of which occupics 1000 fect, aud which is
in some parts 35 feet high and 15 feet thick. Full descriptions of the remains of Tentyra may be found in the fullowing works; Belzoni's Travels in Nubiu: Hamilton's Aespptinca; and Fichardson's Travr/s along the Mediterranean and Parts adjacent, in 1816-1817. Here it mnst suffice to notice bricfly the three principal edifices:-

1. The Temple of Athor.- The approach to this temple is through a dromos, commencing at a sulitary stone pylon, inscribed with the oances of Dumitian and Trajan, and extending to the portico, a distar.ce of about 110 paces. The portico is open at the top, and supported by twenty-four colnmis, ranged in foor rows with quadrangular capitals, having on each side a colossal head of Athor, surmonnted by a quadrangular block, on each side of which is carved a teruple doorway with two wiaged globes above it. These heads of the goddess, looking down upon the dromos, were doubtless the most imposing decorations of tbe temple. To the portico sacceeds a hall supported by six colomas, and flanked by three chambers on either side of it. Nest comes a central cbamber, opening on one side upon a staircase, on the other into two small chambers. This is fulluwed by a similar chamber, also with lateral rooms ; and, lastly, comes the noos or sanctuary, which is small, surrouaded by a curridor, and tlanked on cither side by three chambers. The hieroglyphics and picturesque decorations are so nilmerous, that nowhere on the walls, columns, architraves, or ceiling of the temple, is there a space of two feet unoccupied by them. They represent men and women engaged in various religious or secular employments; animals, plants, public ceremonies and processions, and the emblems of agricalture or mannfactares. Occasionally, also, occur historical portraits of great interest, such as those of Cleopatra and her son Caesarion. The effect of this wilderness of highly-coloured basso-relievos was greatly enhanced by the mode by which the temple itself was lighted. The sanctuary itself is quite dark: the light is admitted into the chambers through small perforations in their walls. Yet ibe eatire structure displays wealth and labour rather than skill or good taste, and, although so elaborately ornamented, was dever completed. The emperor Tiberius finisbed the naos, erected the portico, and added anuch to the decoration of the exterive walls; but some of the cartonches designed for royal or imperial names have never beea filled op.

On the ceiling of the portico is the famous zodise of Teatyra, long imagived to be a work of the Pharaonic times, bnt now ascertained to have been executed within the Christian era. Though denominated a zodiac, however hy the French savans, it is doubtful whether this drawing be not mendy mytholugical, or at most astrological, in its object. In the birst place the oumber of the supposed signs is incomplete. The crab is wanting, and the order of the other zodiacal signs is not strictly observed. ludeed if any astral signification at all be intended in the picture, it refers to astrology, the zodiac, is we kouw it, being uaknown to the Aegyptians. Arcluneolugists are now pretty well ugreed that a panegyris or procession of the Tentyrite triad with their cognate deities is here represented. The Greez inscription, which, long overlooked, determines the recent date of this portion of the temple, runs along the projecting summit of the cornice of the portico. It was engraved in the twenty-first year of Tiberius, A. D. 35 (Letronac, Inscript. p. 97). Upon the
ciiling of one of the lateral chamkers, behind the portico, aod on the right side of the temple, was a siballer gronp of mythological figares, which has also been styled a plawisphere or zodiac. This being sculptured on a kind of sandstone, was removeable, and by the permission of Mehemet Ali, in 1821, was cot out of the ceiling by M. Lelorrain, and hrought to Paris. It was purchased by the Freach government, and is now in the lmperial Museum. It is probably a few years older tban the larger zodiac.
2. The Iseium. - "The chapel of Isis is behind the terple of Athor." (Strab. xvii. p. 814.) It stands, indeed, immediately behind its SW. angle. It consists of one central and two lateral chambers, with a corridor in front. Among its hieroglyplics appear the names of Angustus, Clandius, and Nero. About 170 paces E. of this clapel stands a pylon, with a Greek inscription, importing thast in the thirty-first year of Caesar (Augustus) it was dedicated to 1 sis. (Letronne, 1 b. pp. 82, 84.)
3. The Typhonium, as it is denomioated from the emblems of Typhon on its walls, stands about 90 paces N . of the great temple. It comprises two outer passage-chambers and a central and lateral aulytum. A peristyle of twenty-two columns surroands the sides and the rear of the building. On its walls are inscribed the names of Trajan, Hadrian, and Antoninus Pius. But although the symbols of the principle of destraction are found on its walls, Ty pbon can hardly have been the presiding deity of this tenple. From the circumstance tbat all the other scalptures refer to the birth of Ehôon, Clampollion (Lettres sur lEgypte, vol. ii. p. 67) suggests that this was one of tbe chapels styled "Mammeisi," or "lying-in places," and that it commemorated the accouchment of Athor, muther of Ehơou. Typhoo is here accordingly in a suburdinate character, and symbelises not destruction, but darkness, chaos, or the "night primeval," which precedes creation and birth.

For the monuments of Tentyra, besides the works already eammerated, Wilkinson's Ancient Egyptians and Modern Egypt and Thebes, and the volumes in the Library of Entertaining Kiowledge, eutitled British Museum, Egyptian Antiquities, may be consulted; and for the zodiacs, Viscuati, Oewores toin. iv.; Letronne, Observations sur TObjet des Représentations Zodiacnles de l'Antiquité, Svo. Paris, 1824 ; or Halna, Examen et Explicutions des Zo. diaques Eqyptiennes, 8vo. 1822.
[W. B. D.]

## tenuricio. [Tinuetium.]

TEOS (T'íws: Eth. Tintos), an lonian city on the coast of Asia Minor, on the sonth side of theisthmus connecting tbe lonian peninsula of Moant Mimas with the maioland. It was originally a colony of the Mlioyae of Orcloonenos led out by Athamas, but during the looian migration the inhabitants were joined by numerous colonists from Atheos under Nauclas, a son of Codras, Apoecus, and Damasus; and afterwards their numbier was further increased by Boeotians under Geres. (Strah. xiv, p. 633 ; Pitus. vii. 3. § 3; Herod. i. 142; Scylas, p. 37; Steph. B.s. v.) The city had two good liarbonrs, one of which is mentioned even by Scylas, and the second, 30 stadia distant from the furmer, is called by Strabo 「 $\epsilon \hat{\beta}$ paioau (xiv. p. 644), and by Livy (xxsvii. 27) Gerasticus. Teos became a flourishing commercial town, and enjoyed its prosperity antil the time of the Persian dominien, when its inbabitants, anable to bear the inselence of the barbailans, abandoned
their city and removed to Abdera in Thrace. (Ilerod. i. 168; Strab. l.c.) But though deserted ly the greater part of its inlatitants, Teos still continued to be one of the lonian cities, and in alliaace with Athens. (Thucyd. iii. 32.) After the Sicilian disaster, Teos revolted from Athens, but was speedily reduced (Thacyd. viii. 16, 19, 20). In the war against Antiochns, the fleet of the Romans and Rbodians gained a victory over that of the Syrias king in the neighbourliond of this city. (Liv. l. e.; comp. Polyl. x. 77.) The vicinity of Teos prolaced excellent wine, whence Bacchus was one of the chief divinities of the place. Pliny (v. 38) erroneonsly calls Teos an island, for at most it coold only be termed a peninsnla. (Comp. Pomp. Mela, i. 17; 1' tol. v. 2. § 6.) There still exist considerable remains of Teos at a place called Sighajik, which seems to have been one of the ports of the ancient city, and the walls of which are constructed of the rains of Teos, so that they are covered with a number of Greek inscriptions of considerable interest, referring, as they do, to treaties naade between the Teians and other states, snch as the Romans, Aetolians, and several cities of Crete, by all of whom the inviolability of the Teian teritory, the worship of Bacchus, and the tight of asylum are confirnied. The most interesting among the rnins of Teos are those of the theatre and of the great and splendid temple of Bacchns; the massive walls of the city also may still be traced along their whole extent. The theatre commands a magnificent view, overlookiog the site of the ancient city and the bay as far as the boid promontury of Myomnesus and the distant island of Samos. For a detailed description of these remains, see Hamilton, Researches, ii. p. 11, foll.; comp. Leake, Asia Minor, p. 350.
[L. S.]

COIN OF TEOS.
TERACATRIAE (Tepakatpiat), a German tribe in Noricum, on the banks of the Danobe, probably on the south of the teritory occupied by the Baeni (Ptol. ii. II. §26.)
[L. S.]
TEREDON. [Euphrates].
teren (Típ $\bar{\nu}$, Diod. v. $\bar{i} 2$ ), a river in Crete, perhaps a tributary of the Amnisus, or the modern Apposelemi.
[T. H. D.]
TERENU'THIS (TE $\rho \in \nu 0 \hat{\theta} \theta$ is, Not. Imp.), the modern Teranieh, a town in Lower Acgypt, was situasted on the left bark of the Canopic arm of the Nile. At this point a pass through the hills conducted to the Natron Lakes, about 30 miles to the W. of the town. The $z^{\text {eople of }}$ Terenuthis farmed of the goveroment a inonopoly for collecting and exporting natron. [Nitalae]. Ruins at the modern hamiet of Abou-Belleu represent the ancient Terenothis. (Sumnini, Voyaqes, vol. i. p. 228.) [W. B. D.]

TEREPS FLUUIUS. [Tader.]
TERESES FORTUNALES, a place in the W. of Hispania Baetira (Plin. iii. 1. s. 3). [T. H. D.]
 Eth. Tergestinas: Trieste), a city of Tenetia or 1 stris, situated on a bay to which it gave the name of TELigestives Sinus, which forms the inner bight or extremity of the Adriatic sea tuwards the N. It
was very near the confines of 1stria and Venetia, se that there is considerable diserequney between ancient authors as to which of these provinces it belongad, both Strabo and Ptolemy reckoning it a city of Istiia, while Illiny includes it in the region of the Cami, which was comprised in Venetia. (Stral. v. p. 215, vii. p. 314; 1'lin. iii. 18. s. 22 ; 1'tol. iii. 1. §27.) Mela on the cuntary ealls it the bomalary of llyyicum (ii. 4. §3). From the time that the Formio, a river which falls into the sea 6 miles $\$$ of Tricste, became fised as the boundary of the provinces [Foksuo], there can be no doubt that Plany's attribution is correct. It is probable that Trrieste was originally a native town either of the Carni er Istrims, but no mention is foond of its name till after the loman eonquest, nor dors it appea to have riven into a place of impurtance until a later period. The first historieal mention of it is in B. C. 51 , when we learn that it was taken and plundered by a sudden ineursion of the neighbourion babariaos (Cass, 13. G. viii. 24; Appian, Illyr. (8); bat trom the terms in which it is there notheel it is evident that it was already a Roman town, and apparently hal alrealy received a Rooson colony. It was afterwards restored, and, to protect it for the future against similar disisters, was fortifiel with a wall :ud towers by Octarian in B. c. 32. (Gruter, Inser. p. 266. 6.) It is certuin that it enjoyed the rank of :1 Colouia from the time of Augustus, and is styicd such both by I'liny and l'tolemy. (Plin. iii. 18. s. 22; 1'tol, iii. 1. 今3.27.) That ethperor also placed under the protection and authority of the eity the neighbouring barbarian tribes of the Carni and Catali, and, by reducing to subjection their more formilable neighbours, the lapodes, laid the fonndations of the prosperity of Tergeste. The growth of this was mainly promotel by the advantages of its port, which is the only gend harbour in this part of the Alriatic; but it was apparemtly overshaduwed by the greatness of the neighbouring Aquilvia, and Tergeste, thongh a consiterable mollnierpal town, never rome in ancient times to a commandine position. We even learn that in the reign of Antuninus I'ins the citizens obtained the admiswion of the Carni and Catali-who had previously been mere subjects or dependents-to the Roman " civitas," in orler that they might share the hurthensome honours of the local magistracy. (Orell. Inser. 40.40.) The inscription from which we learn this fact is one of the most interesting manicipal records preserved to us from ancient times, and bas been repeatedly pullished, expecially with nutes and illontrations by C. T. Zumpt (Inceretum Manicipale Trrgestinum, 4to. Berol. , 18:37) and by Gïttling (Foulżehn Rönische L'rkuden, p. 73). No subsequent mention of Tergeste is found in history under the Roman Empire; but it is vertain that it continued to exist ; and retained its ponition as a considerable towsin throughout the middle aces. But it is onty within the hast century that it has risen to the ponition that it now occupies of one of the most papulons and tlomrishime cities on the Adriatic. The only remaios of antiquity extant at Trieste are some purtions of a laman temple, built futo the madern cathedral, together with several inseriptions (incluling the celebraterl une alrady noticed) and some tragments of friezes, bas-reliefs, \&o.

Tergeste is plated by the ltineratics nt a distance of 24 miles from $A$ gurilein, on the line of road which tillowed the coast fiom that city into Istia. (Itim. Aut. p. 270; Tub. l'cut) liliny, less correctly,
calls it 33 miles from that city (Plin. l.c.). Tho spaciuus gulf on which it was situnted, called by Pliny the Thegestinus Sinus, is still known as the Gulf of Tricste.
[E. H. B.]
TElitioLAl'k, a town in Noricum, on the roal from Ovilabat to Jnvavun ; was situated in all probability near L.ambach. (Tab. I'eut.; Mlachar, Norihum, vol. i. p. 266.)
[L. S.]
LERLA (Tripeia), is mentioned in Inomer ( $11 . \mathrm{ii}$. 829) in connection with a lofty moantain, or as : mountain itself (Tnpeins üpas aimú), and, accordine to Strab (xii. p. 565 , comp. xiii. p. 589 ), ought to be regarded as a beigbt in the neighbourhood of Cy zicus; although others pointed out, at a distance of 40 stadia from Laupsacus, a hill with a temple of the Mother of the Gools, surnamed Tereia. [L.S.]

TE'lilas (Tnpias: Fiume di S. Leonardo), a river of sicily, on the E. cuat of the island, flowith into the sea between Catana and Syracuse. It is mentimed by P'liny (iii, 8. \&, 14) innedistely after the Symethus; and Seglux tells us it was navigable for the distance of 20 stadia up to Leontini. (Scyl. p. 4. § 13.) Thangh this last statement is not quite accurate, imasmuch as Leontimi is at least 60 stadia from the sen, it leaves little doubt that the river meant is that now called the Fiume di is I.conardo, which tlows from the Lake of Lentini (which is not mentioned by any ancient aththor) to the sca. It has its ontlet in a sulall bay or cove, which affords a tolerable shelter for shipping. Hence we find the mouth of the Terias twice selected by the Athenians us a halting-place, while proceeding with their fleet along the E. conat of Sicily. (Thue. vi. 50, 96.) Tbe connection of the Terias nith Leontini is confirmed by Diodorns, who tells ans that Dionysins emamped on the burks of that river near the city of L-ontini. (Diod. xiv, 14.) [E. II. B.]

TERICLAE. [TuICIAE.]
TERINA (Tepiva, but Tépewa Lycoplir.: Eth. Tepovaios, Terinaens), a city on the W. coast of the Bruttian peninsula, near the Gulf of St. Eafemine, to which it gave the name of Tenmasa's Sisus. All writers agrce in representing it as a tireek city and a colony of Crotona (Sumon. Ch. 307 ; Steph. B. s. v.; Scyl. p. 4. § 12 ; Sirab. vi. p. 256 ; Plin. iii. 5. s. 10; Solin. 2. § 10), but We huve no acconnt of the time or circumstaners of its foundation. It was regarded as the burialplace of the Siren Ligela, a tradition which evidently pointed to the existence of a more ancient town on the spot than the Greek colony. (Lycophr. Alex. $726_{\mathrm{i}}$ stephl. B. s. v.) The name of Terinat is searcely mentioned in history dming the flomishing period of Magna Graetia; but we learn from an incidental notice that it was engaged in war with the Tharians under Cleandridas (1’olyaen, Strat, if. 10. § 1)-a proof that it was at this time no inconsiderable city; and the number, beanty, and variety of its coins sufficiently attest the fact that it must have been a place of wealth and importance. (Millingen, Vamism. de IItalie, p. 53.) Alnost the first nutice of Terina is that of its conquest by the Bruttians, an event which appears to luve taken place soon after the rise of that people in B. C. 356, as, according to Diodoras, it was the first Greek city which fell into their hands. (Diod. xvi. 15.) it was recovered from thens by Alesander, king of Epirus, about 327 B. c. (I.iv, viii. 24), but probably: fell again under their yoke after the death of that monarch. It was one of the cities which declaved in favour of Hamilual during the Second Panc

War: but before the close of the war that general fonnd himself enmpelled to ataudon this part of Brattimen, and destroyed Terina, when he could no longer hohl it. (Sitrab. vi. p. 256.) The eity never recovered this blow ; and though there seems to have been still a town of the name in existence in the days of Strabo and Pliny, it never again rose to he a place of any importance. (Strab, L. c.; Plin. iii. 5. s. 10.) An inscription in which its name appears in the reign of I'rajan (Orell. Inscr: 150) is in all probobility spurious.

The site of Terina cannot be deternined with any certainty; but the circumstance that the extensive hay now known as the Ciulf' of Stot Eujemiz was frequently callel the Sixi's Temixaeis (Plm. iii. 5. 8. 10; $\delta$ Tepuraios кódtos, Thuce vi. 104), sufficiently proves that Terina mnst have been situated in its immediate proximity. The mast probable conjecture is, that it necupied nearly, if not exactly, the same site as the old tewn of Sta Eufenia (which wais destroyed hy a great earthyuake in 1638), about a mile below the molern village of the name, and near the N . extremity of the gulf to which it gives its name. Cluverius and other antiquarians have placed it considerably further to the N., near the modern Nocem, where there are said to he the ruins of an ancient city (Cluver. Ital. p. 1287; Barrins, de Sit. Calnbr. ii. 10. p. 124); but this site is ahove 7 miles distant from the gulf, to which it could bardly therefore have given name. There is also reason to suppose that the ruins in question are those of a town which bore in ancient times the name of Nuccria, which it still retains with little alterations. [Nuceris, No. 4.]

Lyenphren seems to place Terina on the hanks of a river, which he names Ormant's (' $\Omega$ кivapos, Lycophr. Alex. 729, 1009); and this name, which is not found elsewhere, has been generally identified with the river now called the Sacuto (the Sabatus of the Itineraries), which Hows by Nocera. But this identification rests on the position assumeed for Terina: and the name of the Ocinaras may he equally well applied to any of the streans latling into the Gulf of Sta Eufemia.

The vanety and beauty of the silver coins of Terina (which belong for the most part to the best period of (ireek art), has been already allusied to. The winged fenate figure on the reverse, though rommenty called a Victory, is more probably intended for the Siren Ligeia.
[E. II. 15.]

COIN OF TERINA.
TERINAEUS SINUS, [HITHONATEAS SNUs.] TERI'OLA CASTRA or 'TERIOLIS, a tortress in thatia, mentioned only in the Natitia /mperti, but generally identified with the castle near Merom, near which many Roman remains are found. (Comp). Pallhausen, Beschreib. der Röm. Heerstrasse von Veroma rach Augsburg, p. 86.)
[L. S.]
TERMANTLA. [TERMFs.]
TERDIERA (тà Tерuepa or Tepuepov: Eth. Tepuspeús), a maritime town of Caria, on the sonth coast.
of the peninsula of Halicarnassus, near Cape Termerium. (Hemsl. v. 37 ; Strah, xiv. p. 6.57; Plin. v. 29: Steph. B. s. v., who erruneonsly assigns tho town to Lycia.) Under the Rumatis this Durian town was a free eity. Accarding to Suidas (s,v) the filace gave rise to the preverbial expression Teputpia kak $\alpha$, it being used as a prison by the rulers of Caria; but his remark that it wats situated between Melos and Hadianassms is unintelligitle. Cramer supproses its site to be marked by the modern C'arlueglar ur Graishtus.
[L. S. . $]$
TERMERE (Tepuép ), a plase of uneertain site, mentioned only by l'tolemy (v. 2. ह. 16) as sitmated in the extreme morth of Lydia, in the distlict Cat..cesammenc, near the two sunces of the siver Herthus.
[L. S.]
TERMERIUMI. [TERABEA.]
TERMES (Tiputs, P'tul. ii. 6. § 56i), a town of the Arevaci in Hispania Tarraconensi: It is prohably the same town called Teppクのós and TepMarria by Appian (vi. 76 and 99). The inhabitants are called Termestini in Livy (Epit. liv.) and Tavitus (Aun. iv. 45 ; ef. coins in Sutimi, p. 208). Tennes was seated on a steep hill, and was often besieced without sucress by the lomans, till at last the iubsbitants, on account of tbeir host tle disposition towarls lome, were compelled in E. c. 97 to brild a new city on the plain and without walls (App. vi. 99). It lay andonbtedly on the site of the present Errnita de nuestirt Señora de Ternies. 9 leagnes W. of Numantia.
[1. 11. 5.]

 of lisidia, celehrateal for jis nutural strength mu less than for its artificial fortifications, wats sitnated on : height of 3lome Tanrus, at the entrance of the defiles which are traversed by the river Catarrhactes, and formed the means of communication between Pisidia, Pamphylia, and Lycia. (Shab, xiii. p. 630, xiv. p. 666 ; Ptol. v. 5. § 6, viii. 17. § 34; 1'olyb. sxii. 18; Steph. B. s.r-; Dion, Por. 859.) A peak of the mountain rising above the acropolis bore the name of Solymus; and the inhabitants of the town itself werc, as Strabo says, called Solymi. They were certainly not Greeks, for Arrian (i. 27) distinetly calls them Pisidians and barbarians. Their town stool on a lofly height, precipitons on all sides; and the mad ronning close by the place was very difficult, passing through a narrow gorge, which could be detended by a small force. Alexander the Great succeeded indeed in forcing his way through it, hut desparing of the possibility of taking Termessus, he contimed his warch. Sitrabo (xiv. p. 666) therefore seems to lo. mistaken in stating that Alexauder conquerel the place. The consul Manlins, alter relieving lsionda, pased along the same road. (I.iv. xxxmii. 15.) The town of Termessus continned to exist duwn ta a late period, when it was the see of a Christian lishop, who also had the administration of two neishlouring places, Jov:a and Eudecia. (Hierocl. p. 680.) The site of ancient Termessus has not been difficult to discouer by modern travellers, and comiderable remains still exist at Karabunar Kiui, at the foot of the height on which the ancient fi.rtress was situated. (Leake, Astin Aliner, pp. 13:3 -135.) As to the coins of Termessus, which tome down as far as the reign of the emperor Severns, see Sestini, p. 96. On some of these coins we read $\mu$ es $\delta \dot{v} \omega \nu$ in addition to the name of the Termessians, a cincumstance which confirms the
statement of Stephanus B. that there was another town of the same name in Pisdia, which was called Lesser Termessus (Tepuฑббós 方 $\mu$ uкро́.) [I.S.]

COIN OF TERMESSOS.
TERMETIS, a monotain of Lydia between Mlounts Olympus aod Tmolus, is meativoed only by Pliog (r. 31).
[L. S.]
TERMILAE (Tepuinai) is said to have beea the ancient name of the imhabitants of Lydia, before the name Lydi came into use. These Termilae were helieved to have come from Crete; and exen io the time of Herodotus the Lydians were ofteo called Termilae by the neighbouring nations. (Herod. i. 173 , vii. 92 ; Paus. i. 19. § 4.)
[L. S.]
TERPO'NUS (TépTHvOS), a town of the lapodes in lilyria, of uncertain site. (Appiao, B. Illyr. 18.)

TÉsA (T $\eta \sigma \alpha \dot{\alpha}$, Marcian, Peripl. p. 23; Tetóa, Ptol. vi. 8. §8), a small town on the coast of Gedrosia, visited by the fleet of Nearchus. It is probahly the same as the Táo or Tpoiot of Arrian (Ind. c. 29), and may be represented by the present Tiz. [V.]
 Mar. Eythyr. P. 1, ap. Hudson, Geogr. Min.), is supposed to have been a portion of the district inhatited by the Troglodytes. The modern Persian uame $T_{\text {rez-u- Bareek closely }}$ resembles the ancient ooe, and is said to mean, wheo applied to a country, " luw and flat," which designation would accord mith the S. portion of the Regie Troglodytica in the level egioo of Aethiopia near the month of the Red Sea. (Vincent, Commerce and Navigntion of the Ancients. vol, ii. p. 89. [Troglonytak.] [W.B.D.]
TEstrina. [Aboriglines.]
TETIUS (Tévtos, Ptol. ₹. 14. § 2). a river on the S. const of Cypros, probably the Tesis. [T.H. D.]

TETRADIUM. [TyRIAETM.]
teiranallochus. [Nauloches, No. 3.]
TETRAPHYLLA, a town of Athamania in Epeirus, where the ruyal treasnres were kept. (Liv. axxviii. 1.)

TETRAPOLIS, I. Of Attica. [Marathon.]
2. Of Duris. [Doris.]

TLIRAPYRG1A (Teqparupria). 1. A towa in the Cyrenaica, of uncertain site, situated ahove the hathoor llynus. (Strab. xvil. p. b38; 1'olyb. xxni. 26.)
2. A town of Cappadocia in the district Garsanris. (Ptwl. v. 6 § 14.)

TETJRICA MONS, a mountain in the central range of the Apennines, adjoiniog the territary of the Sabines. Vircil enumerates the "Tetricae horrentes rupes" atmong the localities of that people, and silius ltalicus in like manner closely associates the "Tetrica rupes" with Nursia. Varro al.e speaks of the Montes Fiscellus and Tetrica as tuboumliog in wild puats. (Virg. Aen. vii. 713; Sd. Ital viii. 417; Varr. R. K. ii. 1. § 5.) From all thesc passages it is evideat that it was one of the
lofty aod ragged chain of the Central Apennines, which extend from the Monti dellas Sibilla, southwards as far as the Gran Sasso, separatiog Picenum from the country of the Sabines: and this position ia confirmed by Servius and Vibius Sequester, of whom the former calls it "Mons in Piceno asperrimus," while the latter terms it "Muns Sabicorum." (Serv. ad Aen. l. c.; Vib. Seq. p. 33.) It cannot be identified with more accuracy. The two grammarians just quated write the name "Tetricus Moos ;" but Varro, as well as Virgil and Silius, adopts the feminine form, which is not therefore one merely poetical.
[E. H. B.]

## TETRISIUS [Tirazis].

TETUS (Tintos), a river on the Atlantic cosst of Gallia, which Ptolemy (ii. 8. § 2) places between the Staliocanas Portus aod Argenas, or the eutiet of the river Argenus, if that is the true reading. It is impossible to determine what river is the Tetus. D'Anville assumes the place to be the hay of Ser, which receives the rivers Sie aod Silune. Others take the Tetus to be the Treguier or Trieu. (Ukert, Gallien, p. 144.)
[G. I..]
TEUCERA, in North Gallia, is placed by the Table about halfway between Nemetacum (Arras) and Samarobriva (Amiens). Tierre, on the road from Amiens to Arras, represents Teucera. (D'Auville, Notice, gc.)
[G. L.]
TEUCRI. [Troas.]
TEUDERIUM (TEuס'fiov), a place in the country of the Chauci Dinores, on the river Amasia, in Germaoy (Ptol. ii. 11. §28). Its site is commenly ideotified with that of the village of Dürgen, near Meppen.
[L. S.]
TEUDURUM, in North Gallis, is placed in the Aotooine Itinerary on a route from Colenia Trajana [Colonla Trajana] through Juliacum (Juliers) to Colonia Agrippios (Cologne). The place is Tuddern. The distance from Tuddern to the supposed site of Coriovallum is Darked viii. [ComoVhlium.]
[G. L]
TEUGLLSSA (Teí $\gamma \lambda o v \sigma \sigma a$ ), an island mentioned by Thucydides (viii. 42, where some read Teír $\lambda 00 \sigma \sigma \alpha$ ), which, from the manner be speass of it, must bave been situated between Syme and Halicarruassus. Stephatis B also mentions the islund on the autbority of Thucydides, but calls it Teuthussa and an island of Ionia. There can be no doubt that the Scutlusa mentioned by Pliny (v.36) is the same as the Teuglussa or Tentlussa of Thucydides.
[L. S.]
TLUMESSUS (Tev $\mu \eta \sigma \sigma o ́ s: ~ E t h . ~ T e v \mu \eta \sigma \sigma \iota o s), ~$ a village in Boeotia. situated in the plain of Thebes, upon a low rocky hill of the same bame. The name of this bill appears to have been ulso given to the range of mountains separating the plain of Thebes from the valley of the Asopus. [Boeotia, pp. 413, 414.] Teumessus was upuo the road from Thebes to Chalcis (Paus. ix. 19. § 1), at the distance of 100 stadia trom the former. (Schol, ad Eurip. Phoen. 1105.) It is mentioned io one of the Homeric hymas (IIymn. in Apoll. 228) with the epithet $\lambda \in \chi$ ¢ $\pi$ oin or krassy, an epitbet justitied by the rich plain which surrounds the tuwn. Tenmessus is celebrated in the epic legends, especially on uccount of the Teumes. sian fox, which ravaged the territory of Thebes. (l'aus. l.c.; Anton. Lib. 41 ; Palaeph. de Incredib. 8; see Dict. of Biogr. Vol. 1. p. 667.) The only building at Teumessus mentioned by I'ausanias was a temple of Athena Telchinis, without aoy statue. (Besides the authorities already quoted, see Strab.
ix. p. 409 ; Aristot. Rhet. iii. 6; I iin. ir. 7. s. 12 ; Steph. B. s. v.; Phot. Lex. p. 428 ; Leake, Northern Greece, vol. ii. p. 245 , seq.)

TEURHOCHAEMAE (Tevproxaîpaı), a German tribe, occapying the country south of the Cherusci, on the north of Moos Sudeta, in the modern Erzgebirge and Foigtlund. (Ptol. ii. 11.§ 23.) [L. S.]

TEURISCl (Tevpiokat, Ptol. iii. 8. § 5), a Dacian tribe near the sources of the Tyras. [T. H. D.]

TEU'RNIA (T G oupvía), a Celtic towa in Noricum, on the left bank of the upper part of the river Dravus (Plin. iii. 27 ; Ptol. ii. 14. §3). Its site is still marked by considerable ruins not far from the little town of Spital. (Comp. Orelli, Inscript. Nos. 498 and 5071 ; Eugippus, Vit. S. Severi, 17, 21, where it is called Tiburnia.) [L. S.]

TEUTHEA. [Dyme.]
TEUTHEAS. [Achala, p. 14, a.]
TEUTHIS (Teîts: Eth. Teubioty), a tomn in the centre of Arcadia, which together with Tbeisoa and Methydrium belonged to the confederation ( $\sigma v \nu \tau \in$ $\lambda \in i a$ ) of Orchomenus. Its iohabitants were removed to Megalopulis opon the foundation of the latter. The Paleóeastron of Galatás probably represents Teuthis. (Paus. viii. 27. §§ 4, 7, 28. § 4 ; Steph. B. s.v.; Ross, Reisen im Peloponnes, vol. i. p. 114.)

TEUTHRANTA (Teufpavia), the name of the western part of Mysia about the river Caicas, which was believed to be derived from an ancient Mysian king Teuthras. This king is said to bave adopted, as his son and successor, Telephus, a son of Heracles; and Eurypylus, the soa of Telephus, appears in the Odyssey as the ruler of the Ceteii. (Strat. iii. p. 615; Hom. Od. x. 520; comp. Mysia.)

In the district Teuthrania a town of the same name is mentioned as situated between Elaea, Pitane, and Atarnens (Strab. l.c.; Steph. B. s, v.; Xenoph. IIist. Gr. iii. 1. § 6), but no other particalars are known about it.
[L. S.]
TEUTHRAS (Teí $\theta \rho a s$ ), the soath-westera part of Mt.Temnus in Teutbrania (Ctesias, op.Stob. Serm. p. 213 , ed. Bähr), is perbaps the monntaio now called Domacli, which the caravans proceediog fromSmyrna to Brusa have to traverse. (Lucas, Trois-Voyage, i. p. 133.)
[L. S.]
TEUTHRO'NE (Tevep $\dot{\prime} \nu \eta$ ), a town of Laconia, sitnated upon the westenn side of the Laconian gulf, 150 stadia from Cape Taenarum. It was said to have beeo founded by the Athenian Teuthras. The chief deity worshipped here was Artemis Issoria. It had a fountain called Naia. Its ruins exist at the village of Kotrones, and its citadel occupied a small peninsula, called Skopos, Skopia or Skopópolis. The distance assigned by Pausanias of 150 stadia from Teuthrone to Cape Taenarum is, according to the French Commission, ouly from 8 to 10 stadia in excess. Augustus made Tenthrope one of the Eleuthero-Laconian towns. (Paus. iii. 21. § 7, iii. 25. §4; Ptol. iii. 16. § 9 ; Bublaye, Recherches, g'c. p. 89 ; Curtins, Peloponnesos, vol. it. p. 276.$)$

TEUTIBU'RGIUM or TEUTOBURGIUM (Tevtosoúpysov), a town in Lower Pamnonia, near the confluence of the Dravus and Danubius, on the road from Murss to Cornacam, was the station of the praefect of the sixtb legion and a corps of Daluatian horsemen. (It. Ant. p. 243 ; Ptol. ii. 16. $\$ 5$; Not.t. Imp.; Tub. Peut., where it is miswritten Tittoburgium.) The name seems to indicate that it was originally a settkement of the

Tentones, which may have been founded at the time when they roamed over those countries, about B. c. 113. No remains are now extant, and ita exact site is only matter of conjecture. (Muchar, Norikum, vol. i. p. 265.)
[L. S.]
TEUTOBERGIENSIS SALTUS, a mountain forest in Western Germany, where in A.D. 9 the Roman legions under Varus suffered the memorahle defeat, and where, six years later, their unbaried remains were found by Drusus. (Tac. Ann. i. 60.) A general description of the locality without the mention of the name is found in Dion Cassins (Ivi. 20, 21 ; comp. Vell. Pat. ii. 105, 118, foll.). This locality has in modern times been the subject of much discussion among German antiquaries; but the words of Tacitus seem to imply clearly that he was thinking of the range of hills between the sources of the Lupia and Amasis; that is, the range between Lippspringe and Haustenbeck. (Giefers, De Alisone Castello deque I'arianae Cladis Loco Commentatio, p. 47, foll.)
[L. S.]
TEUTONES or TEUTONI (Teútaves), the name of a powerful German tribe, which about B. C. 113 appeared on the frontiers of Gaul at the same time when the Cimbri, probably a Celtic people, after defeating the Romans in several battles, traversed Gaul and invaded Spain. The Teutones, however, remaised behind ravaging Gaul, and were joined by the Ombrones. At length, in r. c. 102, they were defeated by C. Marius in a great battle near Aquase Sextiae, where, according to the most moderate accounts, 100,000 of them were slain, while 80,000 or 90,000 are said to have been taken prisoners. A body of 6000 men, who survived that terrible day, are said to have established themselves in Gaul between the Maas and Schelde, where they becaine the ancestors of the Aduatici. (Liv. Epit. lih. Ixvii. ; Vell. Pat. ii. 12 ; Flor. iii. 3 ; Plut. Mar. 36, foll.; Oros. v. 16; Caes. B. G. ii. 4, 29.) After this great defest, the Teutones are for a long time not heard of in history, while during the preceding ton years they are described as wandering about the Upper Phine, and eastward even as far as Pannonia. In later times a tribe bearing the name of Teutones is mentioned by Pomp. Mela (iii. 3), Pliny (xxxvii. 11), and Ptolemy (ii. I1.§ 17) as inhabiting a district in the north-west of Germany, on the north of the river Albis, where accurding to Pliny, they dwelt even as early as the time of Pytheas of Massilia. The question bere naturally presents itself whether these Teutones in the north of Germany were the same as those who in the time of Marius invaded Ganl in conjunction with the Cimbri, who in fact came from the same quarters. This question must be answered in the affirmative; or in other words, the Tentones who appeared in the south were a branch of those in the burth-west of Germany, having been induced to migrate soutbward either by inundations or other calamities. The numerons budy of emigrants so much reduced the number of thase remaining behind, that thereafter they were a trive of no great importance. That the name of Teutones was Dever employed, either by the Germans themselves or by the Romans, as a gederal name for the whole German nation, has already been explained in the article Germania. Some writers even repard the Tentones as not Germans at all, but either as Slaronians or Celts. (Latham, Epileg. ad Tac. Germ. p.ca.) The fact that the country between the lower Elbe and the Baitic was once inhabited by the

## THAI'SA. [Rushcade.]

fHA'PSACUS (eáqaкos), a town of considerable importance on the right bank of the Euphrates, in lat. $35^{\circ} 15^{\prime} \mathrm{N}$. It is meationed very early in ancient history, and is almost certainly the same as the Tiphsah, of the Old Testament (1 Kings, iv. 24 ; in the LXX. written $\Theta d \dot{\psi} \alpha$ ), whieh is mentioned as the eastern boundary of the kingdem of Solonon. There is some difference among ancient writers as to the province in which it should be included. Thus. Pliny (v. 24. s. 21) and Stephanns B. (s. v.) place it in Syria ; P'tolemy (v. 19. § 3) ic Arabia Deserta. The reason of this is, that it was a frontier town, and might therefore be claimed as belonging to one or more provinces. At Tbapsacus was the most. inpontant passage of the Euphrates in the northern jurtion of that river's course. As such, we read it was used by Cgrus the younger, whose army forded it, the water reaching up to their breasts, there being prohably at that time no bridge. (Xien. Auab. i. 4. § 1i.) Sume rears later Dareins crossed it to meet Alesiander in Cilicia, and recrossed it ia haste after his defeat at Issus. (Arrian, ii. 13.) Alexander, pursuing Dareius, crossed the river also ut the same spot, as the historian especially notices, on two bridges (probably of boats), which were joined together (iii. 7). Strabo, who makes frequent mention of Thapsacus, considers it, on the anthority of Eratosthenes, as distant from Babylon about 4800 stadia, ind from Commagene 2000 (ii. pp. 77, 78, S1, avi. p. 746) ; and states that it was situated just at that spot where Mesopotania is the widest (L.c.). There is no doubt that it derived its name from a Semitie verb, meaning to pass over (Hiner, Bibl. Wörterb. s. v.) : hence another passare-jlace of the same name, which is mentioned in 2 Kings, ar. 16, but which is really in Palestine, has been often confounded with Tijhsal on the Euphrates. I'liny states that the name was changed by the Aliwedonian Greeky to Amphipolis (v. 24. s. 21). :and Steplanus cails the Ainphipolis of Selenens Tourmeda. No trace of any of these names is now fomed in the country ( litter, x. p. 1114), nor any 1 mins that ean certainly be identified with its site. It was, however, probably near the present Dcir. [V.]

THAPSIS (®́á廿"s, Divdor. xx. 23), a deep viver of the Chersonengs Taurica, on which hay a royal castle. Ukert (iii. 2. p. 193) identifies it with the Sutyir: But kühler seeks the castle on Mount Opuk, 45 wersts south of Kertsch. (Slén. de l'Ac. de St. I'ctersb. is. p. 649, seq.)
[T. II. D.]
TIIAl'sU's (ex́qus, l'tol. iv. 3. § 10), a naritime city of Byzaciam, in Africa Propria. It lay on a ralt hake, which, according to Shaw (Trav. p. 99), still exists, and va a puint of land so stadia distant from the opposite istand of Lopadussa. Thapsus was strengly fortitied and celcbrated for Caesar's victury over the Pompeians, B. C. 46 . (Hirt. B. Af. 28, seq.) Shaw (l.c.) identifies it with the present temuks, where its ruins are still visible. (Cf. Strabo, xvii. pp. 831, 834 ; Liv. xxxiii. 48 ; llim. v. 4.5 .3, \&( $)$
[T. II. D.]
THAP'sd's a river of Numidia, falling into the sea near the town of Rasicade, probably the 1 resent Oued Resas (Vib. Sequest.)
[T. H. D.]
THABSUS [Srimacesme]
TIlARKANA, a place on the great line of rand which led across the devert from the Eaplrates to Hatrue (Al-/lathr). It is marked on the Tabula

Peutingerians. It has been conjectured ly Mannert (v. 2. p. 233) ihat the name is a mintake for Charama, awther form of Charrae; but this hypothesis seems lardly tenable. Reichard believes it is represented by the present Araban.
[V.]
TllARBAS (@ápspas, Ptol.: I'u. at Capo del Serw). a city of Sardinia, mentioged only by 1'tolemy (where the nome is written in many Miss, and editions Tarrace or Tarras) and in the ltincraries, but which scems to have been one of the most consilerable places in the ishand. It was simated on the W . coast, on a projecting point of land at the N. uxtremity of the Gulf of Oristano, where its ruins are still visible, though half buried in sand, and numerous minor antiquities have been discovered. From its position there can be little doubt that it was a l'hoenician or Carthagiuian settlenent; but continued to be a considerable town under the liomans, and an inscription records the repair of the road from Tharras to Curnus as late as the reign of the emperor Thilip. (De la Marmora, I'oy. en Sardaigue, vol. ii. pp. 359, 477.) The Antonine Itinerary correctly places it 18 miles Irom Cornos and 12 from Otheca (Oristane). (Itin. Aut. p. 84; P'tol. iii. 3. § 2.)
[E. II. B.]
THAlisANDALA (Eapodivjaka), a town in Thrace, between Dyzantinm and the wall of Anastasins, which was one of the numerons places fortified by Justinian. (Procop, de Aed. iv. 11. p. 305, Bupn.) According to Reichard, Ezatulcza now occupies its site.
[J. I.]
THASOS (Өáros, sumetimes @á $\sigma \sigma o s:$ Eth. Edovos: Thaso or T'asso), an island in the N. of the Aegnean sea, off the ceast of Thrace, and distant only 3$\}$ miles from the plain of the river Nestus or Kara-Su. It was distant half a day's sail from Amphipulis (Thue. iv. 104), and 32 miles from Abdera. (Plin. jv, 12. s. 23.) It was also ealled Aeria or Aethra (I'lin. I.c.; Steph, B. s. v.) and Chryse, from its gold mines (Eustath. oul Dionys. ${ }^{\prime}$ 'er. 517), which were the chief snurce of the jrosperity of the island. The earliest known inlabitants of Thasos were the I'hoenicians, who werc doubtless attracted to the inland by its valuable mines, but who are said to bave come thither in search of Euroja, five generations before the birth of the Giecian Hercules. They were Jed by Thasos, the son of Ayenor, from whom the island derived its name. (Ilerod. ii. 44, vi. 4\%; l'aus. v. 25. § 12; Scymm. 660; Conon, c. 37; Sterd. B. s. v.) Thasos was afierwards coluaised in 01.15 or 18 (B. c. 720 or 708) hy settlers from l'aros, led by Telesicles, the father of the poet Archilochus. (Thuc. iv. 104; Strab. is. p. 487 ; Clem. Alex. Strom. i. p. 144; Euseb. I'ratp. Ev. 1i. 7.) There also existed at that time in the island a Thracian tribe called Saians, with whon the Parian settlers carried on war, but not always sucecessfully; and an one oceasion Archihochus was obliged to throw away his shield. (Arclitoch. Fragm. 5, ed. Sclneidewin; Aristoph. Pac. 1298, with the Nelol.) The Greck colony rapidly rose in power, and obtained valnable paseessions on the adjouing mainland, which contained even richer mines than thase in the island. Shortly before the ''ersian invasion, the clear surplus revenae of the Thasizns was 200 , and sometimes even 300 talents yearly ( $46,000 \mathrm{l}$., $66,000 \mathrm{l}$.), of which Scaptê Hylê produced 80 talemts, and the mines in the island rather less. (Herod, vi. 46.) Besides Scaptê Hyle the Thisians also possered noon the mainland Galepsus and Oexrma (Thuc, iv.

107; Diod. xii. 68), Stryme (Herod. vii. 118; Suid. s. v. $\left.\sum \uparrow \rho v ́ \mu \eta\right)$, Datum, and at a later period Crenides. (Böckh, Publ. Econ. of Athens, p. 312. Engl. tr.) IIerodotus, who visited Thasos, says that the most remarkable mines were those worked by the Phoenicians on the eastern sile of the island hetween Aenyra and Conenyra opposite Samothrace, where a large mountain had been overturned in search of the gold. (1lerod. vi. 47.) The Thasians appear to have been the only Greeks who worked the valuable mines in Thrace, till Histinens, the Milesian, settled apon the Strymon and built the town of Myrcinus, aboot в. C. 511. (Herod. v. 11, 23.) After the captnre of Miletus (B. c. 494), Histiaeus made an unsuccessful sttempt to subdue Thasos (Herod. vi. 28), bot the growing power of the Thasians excited the suspicions of Dareins, whe commanded them in B. C. 492 to pull down their fortifications and remove their ships of war to Abdera, - an order which they did not venture to disobey. (Herod. vi. 46.) When Xerses marcbed through Thrace on his way to Greece, the Tbasians, on acconot of their possessions on the mainland, had to provile for the Persian army as it marched through their territories, the cost of which amonnted to 400 talents ( $92,800 l$ ). (Herod. vii. 118.) After the defeat of the Persians, Thasns became a member of the confederacy of Delos: but disputes having arisen hetween the Thasians and Atheoians respecting the mines upon the mainlaud, a war ensued, and the Athenians sent a powerfnl force against the island uoder the command of Cimon, 1.. c. 465. After defeating the Thasians at sea, the Athenians disembarked, and laid siege to the city botlı by land and sea. The Thasians held out more than two gears, and only snrrendered in the third year. They were compelled to raze their fortitications; to surrender their ships of war ; to give up their continental possessions ; and to pay ao immediate contribation it money, in addition to their anuual tribate. (Tlunc. i. 100 , 101 ; Diod. si. 70 ; Plut. Cim. 14.) In B.c. +11 the demueracy in Thasos was overthrown, and an oligarchical government established by Peisander and tbe Four Hundred at Athens; bnt as soon as the oligarcly liad got possession of the power they revolted from Atbens, and received a Lacedaemonian garrison and harmost. (Thuc, viii. 64.) Mloch internal dissension followed, till at length in B. c. 408 a party of the citizens, headed by Ecpbantus, expelled the Lacedaemonian harmost Eteonicus with his garrison and admitted Thrasybulus, the Athenian commander. (Yen. Hell. i. i. §§ 12, 32, i. 4. § 9 ; Dem. c. Lept. p. 474.) After the battle of Aegosputamos, Thasos passed ioto the hands of the Laceditemontians; but it was subseqnently again dependent apon Athens, as we see from the dispates between Philip and the Athenians. (Dem. de Ilalon. p. so; Ihilipp. Epist. p. 159.) In the Roman wars in (irecece Thasus submitted to Philip V. (Polyb. xv. 24), but it received its freedom from the Romans after the battle of Cynoscephalae, B. c. 197 (I'olyb. $x$ xiii. 27,31 : Liv. $x \times x$ ini. 30,35 ), and continued t.) be a free (libera) town in the time of Pliny (iv. 12. 8. 23).

The city of Thasos was situated in the northern part of the iskand, and possessed two ports, of which oste was closed. (Scylax, p. 27; 1'tol, iii. 11. § 14.) It stoon on three eminences; and several remains of the ancient walls exist, intermixed with towers built by the Venetiuns, who obtained posession of

## THAUMACI.

the island after the capture of Constantinople by the Turks. In the neighbonrhood is a large statue of Pan cut in the rocks. No remains have been discovered of Aenyra and Coenyra; and the mioes have long censed to be worked.

Archilochus describes Thasos as nn "ass's backbone

 17, 18, ed. Schneidewin), a description which is still strikingly applicable to the island after the lapse of 2500 years, as it is composed entirely of naked or woody mountains, with only scanty patches of cultivable soit, nearly all of which are close to the sea-shore. (Grote, IIist, of Greece, vol. iv. p. 34.) The highest mountain, called Mount Ipsario, is 3428 feet above the sea, and is thickly covered with fir-trees. Tbere is not enongb corn grown in the island for its present population, which consists only of 6000 Greek inhabitants, dispersel in twelve small villages. Hence wo are surprised to find it called by Dionysjus (Perieg. 532) $\Delta \eta \mu \dot{\prime} \tau \epsilon \rho o s$ àк $\tau \dot{\eta}$; but the praises of its fertility cannot have been written from personal observation, and must have arisen simply from the ahundance possessed by its iahabitants io consequence of their wealth. Thasos produced marble and wine, both of which enjoyed considerable reputation in antiquity. (Athen. i. pp. 28, 32, iv. p. 129 ; Xen. Symp. 4. § 41; Virg. Georg. ii. 91.) The chief produce of the island at present is oil, maize, boney, and timber; the latter, which is mastly fir, is the principal article of export.

The coins of Thasos are numerous. The one figured below represents on the ohverse the head of Dionysns, and on the reverse a figure of Hercules kneeling.
(Prokesch von Osten, Denkuürdigkeiten, vol. iii. p. 611, seq.; Cousivery, Ioyage dans la Macédoine, vol. ii. p. 85, seq. ; Griesbach, Reise, vol. i. p. 210 , seq.; Journal of Geogr. Society, vol. vii. p. 64.)

COIN OF THASOS,
THAUBA'SIUM (ttin. Ant. p. 171; Thasbasteom, Not. Imp.), was a frontier town of Lower Aegypt, situated on the Canopic ann of the Nile, alout 8 miles N. of Serapeinm and the Natron Lakes. In Roman times Thaubssinm was the head-quarters of a company of light auxiliary troops "1I Ala Ulpha Afrorum." (Orelli, Inscript. no. 2552.) It is snpposed to be at the modern Cheych-el-Vedy. (Clianupollion, TEgypte, vol. ii. p. II.) [W. B. D.]

THAU'MACI (Өavuakol: Eth. Өavцако́), a town of Phthiotis in Thessaly, was situated on the pass called Cuela, on the ruad from Thermopylae and the Maliac gulf passing through Lamia. At this place, kays Livy, the traveller, after traversing rugged mountains and intricate valleys, cones suddetuly in sight of an immeose plain like a vist sea, the extremity of which is scarcely visible. From the astonishuent which it excited in the traveller, the city was supposed to have derived its name. It stood opon a lofty and precipitous rock. It was
besieged by Philip in 11. c. 199; but a reinforcement of Aetolians having made their way into the town, the king was obliged to abaadon the siege. (Liv. xxxii. 4.) Thaumaci was taken by the consul Acilius in the war with Antiochus, B. c. 191. (Liv. xxxvi. 14 ; comp. Strab. is. p. 434 ; Steph. B. s. v. Өаодакia.) Dhomoko occupies the site of Thanmaci, and at this place inscriptions are found containing the ancient name. Its situation and prospect are in exact accordance with the description of Livy, who copied from Polybius, an eye-witness. Dodwell says that "the view from this place is the most wonderful and extensive he ever beheld," and Leake ubserves that "at the southern end of the town a rocky point, overtopping the other beights, commands a magnifieent prospect of the immeose plain watered by the Peneins and its branches." (Dodwell, vol. ii. p. 122; Leake, Northern Greece, rol. i. p. 458.) THAUMA'CIA (Єaодакía: Eth. Өauдакьєо́s), a town of Magnesia in Thessaly, one of the four cities whose ships in the Trojan War were commanded by Philoctetes. It was said to bave been founded by 'Ilammacus, the son of Poeas. Leake sapposes it to be represeated by the paleókastro of Askiti, one of the villages on the Magnesian coast. This Thaumacia mast not be confonnded with Thaumaci in Phthiotis mentioned above. (Hom. 11. ii. 716; Strab. ix. p. 436; Steph. B. s. v.; Eustath. ad Hom. p. 329. 6; Plin. iv. 9. s. 16 ; Leake, Northern Greece, vol. iv. p. 416.)

THEA'NGELA ( $\Theta \in \alpha ́ \gamma \gamma \in \lambda a: E t h . ~ \Theta \epsilon a \gamma \gamma \in \lambda \in u ́ s)$, a town of Caria, which Alexander placed under the jurisdiction of Halicarnassns, is kouwn as the birthphice of Philip, the bistorian of Caria. (Plin. v. 29: Athen. vi. p. 271 ; Steph. B. s. v.)

THEBAE ( $\Theta \hat{\jmath}$ 与at. Herud. i. 182, ii. 49 ; Strab. xvii. pp. 805, 815 , foll.; Thebe, Plin. v. 9. s. 11), the No (Ezeliel, sxx. 14) or No-Asımon (Nahum, vv. 3,8 ) of the Hebrew Scriptares; at alater period Drosrolis the Great of the Greeks and Rumans ( $\Delta t o \sigma_{-}$ пo入is $\mu \in \gamma$ á $\lambda \eta$, Ptol. iv. $5 . \S 73$; Steph. B. s. v.), was one of the most ancient cities of Aegspt, and even, according to Diodorus (i. 50, comp. sv. 45), of the world. Its fuundation, like that of Memplis, was attributed to Mlenes, the first mortal king of Aegypt, i. e. it went back to the mythical period of Aecyptian history. By some writers, bowerer, Memphis was reported to have been a colony of Thebes. It was the capital of the nome formed by the city itself and its environs, though Ptolemy ( $l$. c.) describes it as pertaining to the Nome of Coptos. In all Upper Aecypt no spot is so adapted for the site of a great capital as the plain occupied by ancient Thebes. The mountain chains, the Libyan on the western, and the Arabian on the eastern, side of the Nile, sweep boldly from the river, and leave on both banks a spacious area, whose breadth, including the river, anounts to utarly 4 leagues, and the length from N . to S . is nearly as mnch. Tuwards the N. the plain is again elosed in by the return of the hills to the Nile; but on the S., where the western chain contimues distant, it remains open. The ground, tberefore, on which Thebes stood was large enough to coatain a city of at least equal estent with ancient Rome or modern Paris; and, according to Strabo, ancient Thebes covered the entire plaim. Only a portion of it, however, was available for population. $\mathrm{An}_{\mathrm{n}}$ inmense area was covered with the temples and their avemmes of sphinses; and on the western side, as far as the Libyan bills, lay the monuments of the dead. On the easters bank, therefore, tbe population
was generally colleeted; and there it was probably densely crowded, since ancient writers assign to Thebes an almost incredible number of imhabitants, and Diodorus (i. 45) describes the houses as consisting of many stories. The extent of the city is very differently stated by ancient authors. Rimours of its greatuess had reached the Greeks of Homer's age, who (Il. ix. 381) speaks of its "hundred gates" and its 20,000 war-chariots, just as the Arabian story-tellers speak of the glories of Bagdad or Damascus under the Caliphs. Before the Persian invasion (n.c. 525) no Greek writer had visited Thebes; and after that catustrophe its dimensions had considerably shrunk, since Cambyses is said to have burnt all such portions of Thebes as fire would destroy, i. e. all the private buildings; and under the Persian viceroys no Aegyptian city was likely to regain its origibal proportions. It dues not appear that Herodotus ever visited Upper Epypt, and his acconnt of Thebes is extremely rague and meagre. Diodorus, on the contrary, who saw it after its capture by Ptolemy Lathyrus, sbout B. . 87 , beheld Thebes in the second period of its decay, and after Alexandreia bal diverted much of its commerce to Berenice and the Arsinoite bay. He estimates its circuit at 140 stadia or abont 17 miles. Strabo, again, who went thither with the expedition of Aelins Gallus in B. C. 24 , beheld Thebes at a still lower stage of decidence, and assigns it a compass of about 10 miles. But at that time the continuity of its parts was broken up, and it was divided into certain large hamlets ( $\kappa \omega \mu \eta \hat{\eta}^{\delta} \mathrm{o} v$ ) detached from one another. Neither of tbese writers, accordingly, was in a position to state accurately the real dimensions of the city in its flourishing estate, i. e. between 1600 and 800 n.c. Modern travellers, again, have still furtber rednced its extent; for example, sir Gardner Wilkinson supposes the aren of Thebes nut to have excecded $5 \frac{1}{2}$ English miles. As, however, during the space of 2600 years ( 800 n.c. -1800 A.D.) there have been very material chances in the soil from the contraction of the labitable ground, partly by tbe depnsitions of the Nile, and partly by the dritting of the sands, it is scarcely possible for modern traveliers to determine how far Aegyptian labour and art may ooce have extended their capital. An antlor quoted by Stephanus of Byzantium, probably Hecataens, runs into the opposite extreme, and ascribes to Thebes a popalation ( $\quad, 000,000$ ) hardly possible for the entire Nilevalley, and an extent ( 400 stadia, or 50 miles) larger than the Theban plain itself. (Steph. B. s $v$. $\Delta i \delta \sigma \pi 0 \lambda i s$.) The name of Theles is formed from the Tiape of the ancient Aegyptian language, pronounced Thaba in the Memplitic dialect of Coptic, and thence casily converted into $\Theta \hat{\eta} S a 1$, Thelé, or Thebes. In hieroglyphics it is written AP or APE, with the feminine article, T-APE, the meaning of which is said to be "head," Thebes being the "head" or eapital of the Upper Kingdom. Its later appellation of Dioepolis Magua ( $\Delta i \delta \sigma \pi o \lambda i s ~ \grave{\eta} \mu \in \gamma \dot{\alpha} \lambda \eta$ ) answers also to the Aegyptian title Ammuei or "abode of Amun,"- Aumina or Zeus, the ram-headed god, being the principal ubject of worship at Thebes. The name Tapic or Thebes applied to the entire city on either bank of the Nile: but the western quarter had the distinctive name of l'athyris, or, accoroing to Ptolemy (iv. 5. § 69), Tathyris, as being under the special protection of Athor, who is sometines called the President of the West. The necropolis, indeed, on the Libyan side was appropriately placed unde:
the gnardianship of this deity, since she was believed to receive the sun in her rous as he sank behind the vepstern hills. This quarter, ugain, in the age of the l'tolemies, was terned "the liby:an sulurb," which was subdivided also into particular districts, woch as the Memmoncia ( Tà Mervovera, Young, Hicroglyph. Literature, pp, 69, 73) and Thynabunnah, where the priests of Usinis were iaterred. (Wilkinson, Aac. Egyptians, vol. v. p. 387.)

The power and prosperity of Thebes arose from three sources - trade, manufactures, and religion. Its position on the Nile, near the great avenues through the Arabian hills to the Red Sea, and to the interior of Libya through the western desert, rendering it a common entrupot for the Indian trade on the one side, and the caravan trade with the gold, ivory, mak aromatic districts on the other, and its comjarative vicinity to the mines which intersect the linestone borders of the Red Sen, combined to make Thebes the greatest emporium in Eastern Africs, until Alexandreia turned the stream of commerce into :nnother channel. It was also celebrated for its linen manufacture - an important fabric is a country where a numerous priesthond was intendicted from the use of woollen garments (Plin. is. 1. 8. 4). The frlass, puttery, and intaglios of Thebes were also in high repnte, and generally the number and macnitude of its edifices, sacred aod secular, mnst lave attracted to the city a nultitude of artisans, who were employed in constructing, decomting, or repairing them. The priests alone aud their attendants donbtless constituted an enormous population, for, as regarded Aegypt, and for centuries Acthiopia alsi, Thebes stond in the relation ocenpied by Kome in medieval Christendom, - it was the sacerdotal capital of all who worshipped Ammon from $I^{\prime}$ "usimm to Axame, and from the Oases of Libya to tire Red Sea.

The bistory of Thebes is not entirely the same with that of Augypt itself, since the predominance of the Upper Kingdon implies a very different era in Acgyptan anuals from that of the lower, or the D.ita. It may perhaps be divided into three epocbs: 1. The period which preceded the occupation of Lower Aegypt by the Assyrian nomades, when it is dumbtful whether Mempbis or Thebes were the cajital of the entive country, or whether indeed both the Thebaid and the Delta were not divided into sevoral smaller states, such as that of Heliopulis in the $\mathrm{N}_{.}$, and Abydus in the S ., the rivals respectively of Nemphis and Thebes. 2. The interval betwren the expulsion of the Assyrians by Thouthicsis, and the 21 st dynasty of Tanite kings. Daring all this Feriod. Thebes was unquestionably the rapital of all the Nile-valley, from the Dediterranean to the island of Arge in Lat. $19^{\circ} 31^{\prime} \mathrm{N}$. 3. The perius of decadence, when the government of Aegypt was centered in the Delta, and Thehes was probably little mure than the bead-quarters of the sacerdotal caste and the principal refnge of old Acgyptian life and mamers. And this threefohl division is renthered the more I robable by the consideration that, until the Assyrian empire became formidable, and Phoenicia important from its maritime power, Aethio lin, rather than Arabia or Syria, was the formidable nuichbonr of Aegypt.

Ender the Old Donarelyy there is no trace of Apgyptian dominion extending beyond the peninsula of Sinai, the northern shores of the lied Sea, or the Jihyan tribes adjoining the Delta. During this [midd imsasion was ap]rehended almost exclusively

TIIEBAE AEGIPTI.
from the S. The Aethiopians were no less warlike, and jerhaps as civilised, as the Aegyptians: the Nile afforded them direct ingress to the regions north of the Cataracta, and they were then, as the Syrians and north-eastern states became afferwards, the immediate objects of war, treaties, or intennarriages with the Pharabls of Thebes. When the Theban state was powerful enough to expel the Assyrian nomades, it minst bave already securet tho alliance or the subjection ol Aethiopia; and the attention of its rulers was thenceforward slirected to the eastern frontier of the Lower Kingdom. Accordingly we find that while only one nome in the 'f hebaid and one in Middle Acgypt were assignel to the native militia, the bulk of the Calasirians and Hermobytians was permanently quartered in the Deltu.

The greatness of Thebes commences with the 18th dynasty of the Pharaohs, and the immediate cause of it appears to have been the collective efforts of the Upper Country to expel the Assyrian shepherds from the Delta. The Thebaid and its capital were, probably, at no period occupied by these invaders; since, uceording to Minethe's nccount of the 17 th dynasty, there were then two centemporaneous kingdoms in Aegypt - the Delta governed by the Hykses, and the Thebaid by native monarchs. Thoutmosis, king of Thebes, was the principal agent in the expulsion of the intruders, and his exploits against them are commenorated on the temples at Kamak: Memphis and the Dhlta, together with the lesser states, such as Xois, delivered trom the invaders, thenceforward were under the duminion of the kings of Thebes. Its flowrshing era lasted nearly eight centuries, i. e. from about 1600 to $800 \mathrm{H} . \mathrm{C}$.

During this period the most conspicnous monarchs were Amenophis I., whe appears, from the monuments, to have received divine hooours after hid decease, and to have been regarded as the second founder of the monareliy. He probably carried lis arms beyond the north-eastern frontier of the Delta into Syria, and lis presence in Aothiopia is recorded in a grotto at Ibrim near Aboosimbel. The victorics or coaquests of Amenoplis in the N. and S am inferred from the cireumstance that in the sculptures lue is represented as destroying or leading captive Asiatic and Aethiopian tribes. Next in succes. sion is Thothmes I., with whose reign appears to have begun the series of Theban editices which excited the wonder of the Greeks, who behehd them almost in their viginal magnificence, and of all subsequent travellers. The foundations, at least, of the palace of the kings were laid by this menarch. Thothmes also, like his predecessors, appears, from the monuments, to have made war with Assyria, and to lave estended his dominion as high up the Nile as the island of Argo in upper Nubia. Thothmes II. maintained or even enlarged the ralm which lie inlierited, since his name laas been found at Gebed-clBirked, the Napata of the Komums, lat. $18^{\circ} 30^{\prime} \mathrm{N}$. At this period Aethiopia was apparently an appanage of the Theban kingdum, and its rulers or viceroys secm to lave been of the bloud rogal of Aegypt, since now fir the first fime, and until the reign of Edei Denephthals (Rusellini, Mon. Reg.tab. xxxi.-iv.), we meet with the title of the royal son or prince of Aethiepia. The recurds of this reign have nearly perisbed; the great obclisks of Kamak, lowever, attest the flourishing condition of contemporary art. They were erected by Dent Amen, the sister of Thothmes II., whe appears, like the Nitucris of tho

Old Monarchy, to have exercised the functiuns of ruyalty. The reign of Tbethmes 111. is one of the most splendid in the anoals of the 18 th dynasty. The frontiers of Aegypt extended S . a litile beyood the second cataraet, and E. nearly to Mount Sinai. Thothmes III. completel in 'Thebes itself many of the structures begua by his predecessors, e. g. the pulace of the kings. - and generally enriched the cities of the Thebaid with sumptuous buildings. IIe commenced the temple at Amada, which was completed by Amunoph II. and Thothmes IV; and his name was inscribed on the monuments of Onki, Apollinopolis Magna, and Eilithya. Theles, however, was tbe centre of his architectural labours, and even the ruins of his great works there have served to adorn other capital cities. In the Hippodrome of Constaatinople is a mutilated obelisk of the reign of Thothmes 111., which was bronglit from Aegypt by one of the Byzaatine emperors, and which originally adorned the central court of Karnak. Again the obelisk which Pope Sixtus V. set up in frunt of the charch of St. Jobn Lateran at Rome, the loftiest and most perfect structure of its kind, was first rassed in this reign, and bears its founder's titles on the central column of its hieroglyphics. The records of this reign are inscribed on two interesting menameots, -a painting io a tomb at $G$ Gourneh (1ieskins, Trarels in Aethiopia, p. 437, fell.; Wilkinson, Mod. Egypt and Thebes, vol. ii. p. 234), and the great Tablet of Karnak, which is strictly an listorical and statistical document, and which, there can be little donlt, is the very Tablet which the priests of Thebes estibited and expounded to Caesar Germanicus in A. D. 16 (Tac. Ann. ii. 60). From the paintiogs and the hieroglyphics, so tar as the latter have been read, on these inosuments, it appears that in this reign tribute was paid into the Theban treasnry by nations dwelling on the berders of the Caspian sea, on the bauks of the Tigris, in the kingdom of Merve or Aethiopia, and by the more sarage tribes who wandered over the eastern flank of the great Sahara. Thirteen expeditions, iodeed, of Thothmes 111 .., are distinctly registered, and the 35th year of his reign, according to Lepsius, is recorded. At this perive the kingdenn of Thebes must base been the most powerful and opulent in the world. Of the son of Thotbnes, Ainmophis II., little is known; bnt be also added to the ereetions at Thebes, and reared other monnments in Nubia. Inscriptions found at Surabit el-Kaalim, in the peninsula of Sinai, record his name, and at Primis (Ilrim) he appears in a sjees, or excavated chapel, seated witb two principal ufficers, and receiving the acconnt of a great chase of wild beasts.
Next in inportance, though nut in succession, of the Thehan kings of the 18th dynasty, is Aumnopb, or Amenoplis 111. His name is found at Toumbos, near the third Cataract, and he pernanenily extended the froutiers of the Theban kingdom to Soleb, a degree further to S. than it had litherto reacled. These estensions are not only geographically, but commercially, inpurtant, inasmnch as the fartber sonthward the bonndaries estended, the nearer did the Aegyptians approach to the regions which produced gold, ivory, gems, and aromatics, and the more considerable, therefore, was the trade of Thebes itself. Only on the supposition tbat it was for many generations one of the greatest emprriuns in the world can we understand the lavish exp*enditure of its monarchs, and its fame among nurtbern nations as the greatest and riche:t of cities.

And this consideration is the more imporlant towards a correct estimate of the resources of the Theban kingdom, since its proper territory barely sufficed for the support of its dense population, mad there is no evidence of its having any remarkable traffic by sea. It is jrobable, indeed, that the domimons of Amenophis 111. stretcheel to within fise days' jonrney of Axume on the Red Sca; for a scarabaeus inscribed with his rume and that of his wife Tuia mentions the land of Karoei or Keluei, supprosed to be Coloe (Insellini, Mon. Stur. i:i. 1. 261 ; Birch, Goll, Brit, Mus, p. 83). as their sounhern limit. Thebes was cariched by this monareh with two vast palaces, one on the eastern, the other on the western bank of the Nile. He also commenced and erected the greater portion of the boildings at Luzor. On the walls of their chamhers Amenophis was designated "The vanquisber of tire Mennahoun," an unkaown people, and the " l'acificator of Aegypt." From the tragment of a monolithal granite statue now in the Louvre, it may be iuferred that his victories were obtained over negro races, and consequently were the results of campaigns in the interior of Libya and the S. of Aethiopia. Amenophis has a further claim to notice, since be was probably the Memaon, son of Aprora, whom Achilles slew at the siege of Troy. Of all the Aethiopian works the Memononian statues, from their real magnitude and from the fabulous stories related of them, have attracted the largest shave of attention. By the word Memon the (ireeks understood an Aethiopian of man of dark complexion (Steph. B. s. v.; Agathem. ap. Gr. Geograph. Min.), or ratber, perhaps, it darkcomplesioned warrior (comp. Eustath. ad 1l. v. 639) ; and the term may very properly have been applied to the conyueror of the sontbern land, who was also hereditary prince of Aethiopia. The statues of Nlemnon, which now stand alone on the plain of Thebes, originally may hare been the figures ut the entrance of the long dromos of crio-splinnes which led up to the Amenopheien or palace of Amenophis. Of the castern and northern limits of the Theban kingdom under the third Amenophis, we bave no evidence similar to that afforded by the tablet of Karnak: yet from the monuments of his battles we may bufer that he leviell tribute from the Arabians on the Red Sea and in the geniusula of Sinai, and at one time pushed bis conquests as far as Mesopotania. According to Manetho he reigned 31 years: lis tomb is the most ancient of the sepnichres in the Bab-el-Melook; and even so late as the I'tulemaic age he lad divine honours paid him by a special priest-college called "The pastophori of Amenophis in the Mennoneia." (Kenrick, Ancient Aegypt, vol. ï. p. 246.)

Setei Nenephthah is the next mouarch of the 38 th dynasty who, in cummection with Thebes, deverves mention. Besides the temples which he constructed at Amada in Nubia und at Silsilis (Silseleh), he began the great palace called Menephtheion in that city, althongh he left it to be completed by his successors Rameses 11. and 111. From the paintings and inscriptions on the rnins at Kornak and I.uxor it uppears that this monarch triumphed over five Asiatic nations as well as over races whose position cannot be ascertained, but whuse featnres and ilress puint to the interior of Libya. The tomb and surcophiagus of Setei Menephthalı were discosered by Lelzuni in the Bab-el-Melook: (Travels, vol, i. p. 167.) If he be the same with the S.thos of the lists, he reigued 50 or 51 years. We now coane it

THEBAE AEGYPTI.
the name of Rameses II. and III., the latter of whom is the Sesostris of Herulotus, and who nay therefore be regarded as a clearly historical personage. There can be no donbt of the greatness of Tbebes under his sceptre. In this, as in many other instances where Aegypt is concerned, the moonments of the country enable us to approach the trutb, while the credulity of the Gireek travellers and historrians in sccepting the narrations of the Aefyptian ptiests - naturally eager, after their subjection by the P'ersians, to exalt their earlier cundition - only tenuls to bevilder and mislead. Thus, for example, Dhendurns (i.54) was informed that Sesostris led into the field 600,000 infantry, 24,000 caralry, and 27.000 chariots; and he appeals to the passage already cited frum Honer to show that Thebres sent so many chariots out of its liundred gates. There is no evidence that the Aegyptians then possessed a fleet in the Mediterramean; yet Diodorus numbers ammeng his conguests the Cyclades, aud Desaarchus (Schol. in A poll. Rhod. iv. 272) assigus to bim "the grester part of Europe." The mumments, on the contrary. record nothing so increalitle of this monarch; alitiough if we may infer the extent of his conguests and the number of bis victuries from the spuce uccupied on the monuments by their pictorial records, he carried the arns of Aegypt beyond any previous houndaries, and counted anong his subjects races as rarious as thone which, nearly 17 centaries later, were ruled by Trajan and the Antonines. The regu of lameses was of 60 years duration, that is nearly of equal length with liis life, for the first of bis victores-that recorded on the proygluea of the tenuple of Lusor, and mach more fully on those of Abousimbel -was gained in his fith year. We must reter to norks professedly dealing with Ae . gyptiad amals for hil hisotry: here it will be sufficeent to observe of Rameses or Sesostris that he added to Thebes the Rannesein, now generally admitted to be the "monument of Osymandyas," " upm the western bank of the Nile; that he was distluguished from all his predecessors by the extem of his conquests and the wisdom of bis laws; und umung his subjects for his strength, comeliness, nnd valour. The very pre-emineace of lameses 111 . has, indeel, obscured lis authentic history. To bim were ascribed many works of earlier and of later monarchs,-such is the canal of the l'haraohs, betwren the Nile and the Red Sea; the dykes and embankments which rendered the Dela halitable: the great wall, 1500 stadi.t in length, between Pelusium :ud Heliopolis, raised as a barier against the Syrians and Atabians; a re-partition of the land of Aegypt; the law of hereditary occupation (Aristur. I'ol vi. 10); and foreign conquests, or at lea-t expedutions into Western Asia, which rendered tributary to him even the Colchians and the Bactrians. (Tacit. Ann. ii. 60.)

With the 21at dynasty appear the traces of a revolution afferting the l'per Kimgdom. Tanite and Bubastue 1'larinhas are now lords of the Nile-valley: and these are succeeded by an Aethicpian dynasty, nawking invasion and sceupation of the Thebaid by a firciguer. Jerhays, as Aezypt becalme more inwilved with the affiirs of $\Lambda$ sia- a realt of the conquests of the house of hameses- - it may have proved expedient to remove the scat of governmemt nee rer to the Syrian frontier. The dyuasty of sethos, the Arthopinu, boweser, mideates a revolt of the pruvinces S. of the catarach; and even after the Acthiupians had withdrawn, the Lower Kinglon re-
thebae afgypti.
tained its pre-eminence. The Saite Plarachs fearcd or derpised the untive inilitia, and sur rounded thertuselves with fureign mercenaries. Greek colunies were established in the Delta; and Aegype maintained a fleet an inneration extremely pejudicial to Thebes, since it implied that the uid isollation of the land was at an end, and that the seat of power was on the Syrian, and not on the Aethiopian frontier. The stages of its declive cannot be traced; bnt Thebes seems to have offered no oppositien, after the fall of Memphis, to the Persians, and certainly, after its occupation by Camhyses, never resumed its place as a metropolitan city. That Thebes was partially restored after the destruction of at least its secular buillings by the Persians, admits of no doubt, sioce it was strong enough in B. C. 86 to bold out against the forces of Ptolemy Lathyrus. But although the cirenit of its walls may have been undiminished, it seems never again to have been filled as before with a dense popnlation. The foundation of Alexandreia was more fatal to Thebes than even the violence of Cambsses ; and its rebellion aguinst the Nacedonians was perhaps prompted by jeulousy of Greek conmerce and religion. The Hand of Lathyrus lay heary on Tbebes; and from this epoch probably dates the second stage of its decline. From the glimpses we gain of it tbrough the writings of the Greeks and Romans, it appears to have remained the bead-quaters of the sacerdotal order and of old Aegyptian life and manvers. As a Macedooian or Roman prefecture, it took little or no part in the affairs of Aegypt ; yet it profited by the general peace of the world under the Caesars, and emploged its wealth or labour in the repair or decoration of its monuments. The uames of Alezander and some of the Ptolemies, of the Caesars from Tiberius to the Antonines, are inscribed on its monnments ; and even in the fourth cestury A. D. it was of sufficient importance to attract the notice of historians and travellers. P'erhaps its final ruin was owing as much to the faoaticism of the Cbristians of the Thebaid, who saw in its sculptures only the abominations of idol-worsbip, as to its occupation by the Blenumyes and other hasrbariaos from Nubia and Aribia. Wiben the Suracens, who also were icunoclasts, broke forth from Arabis, Thebes endured its final deselation, and for many centuries its nanic almost disuppears: nor can its monuments be said to have generally attracted the notice of Europeans, until the Frencls expedition to Aegypt once ayain discloved its menuments. From tbat period, and espectally since the latuors of Belzoni, ne ancieut city has been more frejuently risited or described.
The growth of Thebes and the additions made to it by successive monarchs or dynasties have been partly traced in the foregoing sketch of its political hibtory. A few only of its principal remains call bere be noticed, since the ruins of this city fora the subject of many works, and even the most condensed account of them would almost demand a volume for itself. Ancient Theles, as bas already been observed, occupied both the eastern and westem banks of the Nile; and fonr villazes, two, on each side of the river, now occuly a portion of its original area. Of these villaycs two, Luxor and Karnuk, are on the eastern bauk, and two. Gousreh and Medinet-Aboo, on the western. There in some difference in the character and purpose of the structures in the opposite quarters of the city. Thase on the western bauk formed part of its vast necropolis; and here are found the rock-hewn painted twinbs,-" the tombs
(f the kings," - whose sculptures so copiously illustrate the history, the arts, and the social life of Aegypt. On this side there are also the remains of temples, palaces, and halls of assembly or judicature, with their rast enclosure of walls and their long avenues of sphinses. But the western quarter of Thebes was reserved priccipally for the dead, and for the service of religion and the state, while the mass of the population was contained in the eastern. Yet the oumbers who inhabited the western side nf the city must have been considerable, since each temple had its own establishment of prients, and each palace or public edifice its proper officers and servants. Still we shall probably be correct in describing the eastern quarter as the civil, and the western as the royal and ecclesiastical, pertion of Thebes. At present no obelisks have been discovered in the westenn quarter, but, with this exception, the monaments of Gourneh and Medinet-Aboo yield little in grandeur, beauty, or interest to those of Luxor and Karnak, and in one respect indced are the mere important of the twe, since they afford the best existing specimens of Aegyptian celossal or portrait statues.

Beginning then with the western quarter,-the Dlemnogeia of the Ptolemaic times, - we find at the northern limit of the plain, about three quarters of a mile from the river, the remains of a building to wheh Champolion has given the nane of Menephtheion, because the name of Setei-Nenephthah is inscribed upon its walls. It appears to have been both a temple and a palace, and was appreached by a dromos of 128 feet in length. Its pillars belong to the eldest style of Aegyptian architecture, and its bas-reliefs are singularly fine.

The next remarkable rain is the Memnoneiom of Strabo (xvii, p. i28), the tomb of Osymandyas of Diodorns, now commonly called the Ramescion oo the authority of its sculptures. The situation, the extent, aod the beanty of this relic of Thebes are all equally striking. It occupies the first base of the liills, as they rise from the plain; and befure the alluvial soil had encroached on the lower ground, it must have been evea a more conspicooas object from the city than it now appears. The icequalities of the ground ou which it was erected were overcome by flichits of steps from one ceurt to another, and the Kamereion actually stood on a succession of natural terraces improved by art. The mais entrance from the city is flauked by wo pyramidal towers: the first court is open to the sky, surrounded by a double colonnade, and 140 feet in length and 18 in breadth. On the left of the staircase that ascends to the second court still stands the pedestal of the statoe of Rameses, the largest, according to Diodorus (i. 49), of the colossi of Aegypt. From the dimensions of its foot, parts of which still remain, it is calculated that this statue was 54 feet in height and 22 feet $f$ inches in breadth across the shoulders. The court is strewn with its fragments. How it was erected, or how overthrowa in a land toot liable to earthquakes, are alike subjects of wonder; since, witheut mechanical aids wholly beyond the reach of barbarians, it must have been almost as difficult to cast it down from its pedestal as to transport it eriginally from the quarries. The walls of the second court are covered with sculptures representing the wars of Rameses 111., a continuation and complement of the historical groups upon the interior walls of the pylen. Diodorus (i. 47) speaks of " monolithal figures, 16 cubits
high, supplying the place of columns," and these are probahly the pillars of this secend court. He also mentions the attack of a city surronnded by a river; and this group of sculpture, still extant, idertities the Memnoneiam with the monument of O.ymandyas. A third flight of stoins cenducts from the coart to a hall, which, according to Champolle in was ased for public assemblies. A sitting statue of Rameses flanked each side of the steps, and the head of one of them, now called the young Memmon adonis the British Museum. The columns and walls of the court are covered with sculptures partly of at religions, partly of a civil character, representing the homage of the 23 sons of lameses to their parent and bis offerings to the gods. Nine smaller apartments succeed to the hall. Ono of these was doubtiless the library or "Dispensary of the Nlinal" ( $\psi v \chi$ ท̂s iatpeion) of which Diodorns (i. 49) speaks, since in it are feund sculptures of Thoth, the inventor of letters, and his companion Saf, the " lady of letters " and "President of the Hall of Buoks." This chamber had also at one time an astronomical ceiling adorned with the figures or symbols of the Aegyptian months; but it was carried off by the Persians, and the Greek traveilers, Diodoras, Hecataeus \&c., knew of it only from hearsay. Of the nine original chambers, two only remain, the one just described, and a second, in which Rameses is depicted sacrificing to various divinities of the Theban Pantheon, Beecath the upper portion of the Memnoneium rock-sepulcbres and brick graves have been discovered, both coeval with the lameseian dynasty (Leprius, Kev. Arch. Jan. 1845). The entire area of the Memoneium was enclosed by a brick wall, in the double arches of which are occasionally imbedded fragments of still more ancient structures, the remains probably of the Thebes which the 18 th dynasty of the Pharaobs enlarged and adorned. A dromos XW. of the Memnoneium, furmed of oot less than 200 sphinses, and at least 1600 feet in length, led to a very anoient temple in a recess of the Libyan hills. This was probably a place of strength before the lowlands on each side of the Nile were artificially conserted by drainage and masonry iote the solid ares upoo which Thebes was built.

The nest object which meets the traveller's eye is a mound of rubbish, the fragments of a building once eccopying the ground. It is called by the Arabs Koum-el-Houtana, or mountain of sandstone, and is composed of the ruins of the Amenopheion, the palace or temple of Amunoph 111.-the Jemmon of the Greeks. About a quarter of a mile distant from the Amenopheien, and nearer to the Nily, are the two colossal statues called Tama and Chama by the patives, standing isolated on the plain and emiocot above it. The most northerly of these statues is the celebrated vocal Memnon. Their present isolation, however, is probably accidental, and arises from the subsidence or destruction of an intermediate dromes, of which they furmed the portals, and which led to the Amenopheien. Theno stataes have already been described in the Dictionary of Biography, s. v. Mest non [Vol. I1. p. 1028.] It may be added here that the present height of these colossal figures, inclusive of the pedestal, is 60 feet. The alluvial soil, however. rises to nearly ene half of the pedestal, and as there is an inscription of the age of Antoninus Pius, A. D. 139, foll., i. e. about 1720 years ofd, we obtain some measure of the amount of depocition in so many centuries. The blocks from which

4D 3
the statues are formed are composed of a coarse, lard breccia, intermixed with agatiseld pebbles. (liussegger, Keisen, vol. ii. pt. 1. p. 410.) The village of Medinet-Abon stands ahout one third of a mile SW. of Koum-el-Ituttam, uposs a lofty mound formed by the roins of the most splendid structure in western Thebes. It consisted of two purtions, a temple and a palace, connected with each wher by a pylon and a dronnos. The temple was the work of snecessive munarchs of the name of Thothnas, and hence has receired the name of the Thothmeseion. Apparently this site fomm favour with the sovereigus of Acgypt in all ages, since, either on the main building or on ita numerons outworks, which extend towards the river, are inseribed the names of 'Tirhakah the Aethiopian, of Nectanebus, the last independent king of Acgypt, of I'tolemy Siter 11., and of Antonimus Pius. The original Thothureseion comprises merely a sanctuary surruumed by galleries and eight clambers ; the additions to it represent the different periods of its patrons and architects. The pulace of Rameses-the anthern Ramescion of Champulion-far exceeds in dimensions and the splendour of its decorations the Thothaescion. It stands a little S of the temple, nearer the fout of the bills. The dromos which cunnects them is 265 feet in length. The sculptures on the pylon relate to the coronation of Rameses 1V. and bis victories over the Acthiopians. A portiou of the southern Rameseion scems to have been aplproprinted to the private uses of the lking. The maral decorations of this portion are of singular interest, inasmuch as they represent Rameses in his hours of privacy and recreation.

The walls of the suntluern Rameseion generally are cuvered both on the inside and the out with representations of battles, sacrifices, religions processions and coremonies, relating to the 18th dynisty. A plain succeeds, bonnded by sand-hills and heaps of Nile-mud. It is variously described ly modern travellers as the site of a race-course, if a camp or barrack, or an artificial lake, over which, according to Sir Gardner Wilkinson, the Weal were ferried to the neighburing necropalis. Whatever inay have been its purpose, this plan is uf ronviderable extent, being somewhat less than a mile and halt is length, and more than half a mile in breadth.
The contrast between the portion of Thebes once ( rowded with the living, and that which was equally thronced with the dead, is less striking now, when the whole city is a desert or occupied only by a few straguling villages. But under the l'baraohs the vinuity of life and death must have been most soleun and expresive. From Gournth to MedinetAhen the Libyan hills, atong it curve of nearly 5 milics, are honny-combed with sepulchres, and complichons among them are the Touns of the Kins, situated in the valley of Bab-el-Melook. The Theban merropulis is excavated in the native calcarcous row. The meaner deal were interred in the luwer ground, where the limestune is of a softer "rain, and wore exprosed to decumposition by wind and water. Tlits purtion of the cernetery has, accordiugly, fallon into decay. But the upper and herder strata of the hills are of tiner and more durahle texture, and liere the priest-caste and noblis wore intersed. Tiu- tumbs of the lower urders are enteratly without setulpture, but filled with mimsmies of animals acounted satrod by the Aesyptians. A favurrite con panion in leath myears to have been
the ape; and such numbers of this animal have been found in one portion of the necropolis that the valley containing their mummies bears the name of the "Apes' Burial llace." Upon the graves of tha upper classes painting and senlpture were lavished in a measure hardly inferior to that which marks the sepulchres of the kings. The entire rock is fuunelled by them, and by the galleries and staircases which led to the various chambers. The eutrances to these tombs are rectangular, and open into passages which either pierce the rock in straight lines, or wind through it by ascending and descending shafts. Where the limestone is of a crumbling nature, it was supported by brick arelies, and drains were provided for carrying off standing or casual water. The walls of these passuses and chambers were carefully prepared for the artist. Rough or carions portions were cat out, and their place filled up with tricks and plaster. Their entire surface wias then covered with stucco, on which the paintings were designed and highly caloared. The docorations are rarely in relief, but either drawn on the flat surface, or cut into the stucce. They are mostly framed in squares of chequer and arabesque work. The subjects portrayed withill these framea or niches are very various,-ranging through religious ceremonies and the incidents of public or private life. The ornaments of these tombs may redeed be termed the miniature painting of the Aegyptians. Within a space nf between 40 and 50 feet no less than 1200 hieroglyphics are often traced, and fivishod with a miaute delicacy nasurpassed even in buildings above ground, which were meant for the eyes of the living.

The Royal Sepulchres, however, form the most striking feature of the Theban necropolis. They stand in a louely and barren valley, seemingly a natural chasm in the limestone, and resembling in its perpendicular sides and oblong shape a sarcophagus, At the lower end of this basin an entrance has been cut-there seetins to be do natural mode of ingressin the rock. Forty-seven tombs were, at one time, knowa to the aecients. (Diedor, i. 46.) Of these twenty or twenty-one have been counted by modern explorers. Nere reposed the Tbeban Pharaohs from the 18th to the 21st dynasty. The ouly tombs, hitherto discovered, complete are those of Amunoph 11I., Hameses Meiamun, snd Rameses 111. To prepare a grave secms to have been one of the duties or pleasures of Aegyptian royalty ; and since the longest survivor of these monarchas rests in the most sumptuous tonib, it may ba inferred that the majority of them died before they bad completed their last habitation.

The gueens of Aecypt were bunied apart from the kings, in a spot about three-foorths of a mile NII: of the temple of J/cdinet-Aboo. Lach of them beass the title of "Wife of Amun," indicating either that their comsorts combined with their proper names that also of the great Theban deity, or that, after death, they ware dignulied by apothcosis. Twenty-four tombs have at present heen discovered in this cemetery, twelve of whish are ascertained to be those of the queens. The least injured of them by time or violence benrs the name of Taia, wife of Amunuph 11 I.
On the eastern bank of the Nile, the monuments are even more magnificent. The villages of Luxor and Karnak occupy a small Iortion ouly of the truc Diespolis. The ruins at Luxor stand close to the river. The ancient lanliag place was a jetty of stone, which
also served to break the eurrent of the stream. The most remarkable monnmeats are two obelisks of Kameses 11I., respectively 70 and 60 feet bigh, one of which still remains there, while the other has heen removed to the Place de la Concorde at Paris. Their unequal height was partially concealed from the spectator by the lower obelisk being placed npon the higher pedestal. Behind them were two monolithal statues of that monarch, in red Syenite granite. These are now covered from the breast downwards with rubbish and fluvial deposit, but were, originally, inclading their chairs or bases, 39 feet high. Next succeeds a coart, surrounded by a corridor of double columns, 190 feet long and 170 broad. It is entered through a portal 51 feet in height, whose pyramidal wings are inseribed with the battles of Rameses. On the opposite side of the court a second portal, ereeted by Amanoph III., opens upon a coloanade which leails to a smaller court, and this again terminates with a portico compased of four rows of columns, eight in each row. Beyond the third portico follows a considerable number of apartmeats, flanking a sanctaary on the walls of which are represented the birth of Amnnoph, and lis presentation to Ampn.

A dromos of andro-sphinxes, and varions baildings now covered with saad and dried mad, formerly comected the quarter of eastern Thehes, represented by Luxor, with that represented by Karnak. Near to the latter place a portion of the dromos still exists, and a little to the right of it a second dromos of crio-sphinzes branches off, which must have been one of the most remarkable structures in the city. It led up to the palace of the kings, and consisted of a donble row of statues, sixty or seventy in number, each 11 feet distant from the next, and each baving a lion's body and a ram's head. The SW. eatrance of the palace is a lofty portal, followed by four spacious courts with intervening gateways.

The grandenr of the palace is, in some degree, lessened hy later additions to its plan, for on the right side of the great court was a elnster of sunall chambers, while on its left were only two apartments. Their ohject is anknown, but they prubably served as lodgings or offices for the royal attendants. In the first of the two main courts stand two obelisks of Thothmes 1., one in fragioents, the other still erect and uninjured. In a second court to the right of the first, there were two obelisks also: the one which remains is 92 feet high. The oldest portion of the palace of Kurnak sppears to be a few chambers, and some polygonal columns bearing the shield of Sesortasen 1. To these-the ancleus of the later stroctures-Thothmes 111. made considerable alditions; among them a chamber whose scalptures compose the great Karnak Tablet, so important a doentuent for Aegyptian chronology.

But the Great Court is surpassed in magnificence by the Great Hall. This is 80 feet in height, and 329 feet long by 179 broad. The roof is supported by 134 colunns, 12 in the centre and 122 in the aisles. The central columns are each 66 feet high, clear of their pedestals, atd each 11 feet io diameter. The pedestals were 10 feet high, and the abecus over their capitals, on which rested the architraves of the ceiling, was 4 feet ia depth. The colamns were cach abont 27 feet apart from onc another. The aisle-columns stood in 7 rows, were each 41 fiet high, and 9 feet in girth. Liylit and air were admitted into the buildiog through apertures in the side walls. The founder of the palace was Setei-Mlenephthah, of the 18th dynasty; but one reign
cannot have sufficed for bailding so gigantic a court, and we know iadeed not oaly that many of the historical bas-reliefs which cover the walls were contribated by his son Rameses IL., bat also that the latter added to the Great Hall, on its NW: side, a vast hypethral conrt, 275 feet in breadth, by 329 in length. This, like the hall, had : double row of columns down its centre, and a covered corridor round its sides. Four gatewnys opening to the four quarters gave admission iutu this court: and to the priacipal one which froated the Nile an avenue of crio-splhioses led up, headeal by two granite statnes of Rameses II.

The parpose for which these spacions conrts and their annexed balls and esplanades were erected was perhaps partly religions, and partly secular. Though the kings of the 18th and succeeding dynasties lad ceaved to be chief-priests, they still retained many ceremonial functions, and the sacred calendar of Aegypt abounded in days of periodical meetings for religiousobjects. At such panegyries the priests aloor were a host, and the people were not excluded. Frons the sculptures also it appears that the Court of Royal Palaces was the place where troops were reviewed, embassies received, captives executed or distributed, and the spoils or hozours of vietury apportiuned. Both temples and palaces also served occasionally for the eacampment of soldiers and the administration of justice. The temperature of the Thebaid rendered vast spaces indispeasable for the congregation of numbers, and utility as well as pomp may have combined in giving their colossal scale to the structures of the Pharaohs.

In the Great IIall a great number of the columns aro still erect. The many which have falleo have been undermined by water loosening the soil helow: and they fall the more easily, because the architraves of the roof no longer hold them upright. The most costly materials were employed in sotne parts of the palace. Corzices of the fioest mauble were inlaid with ivory mouldings or sheathed with beaten gold.

These were the principal struetures of the castern moiety of Thebes: but other dromoi aad gateways stand within the circuit of its walls, and by their sculptures or inscriptions attest that the Macedonian as well as the native rulers extended, renovated, or adorned the capital of the Upper Couatry. The eastern brabch of the dromos which coanects $L$ uxou with Kurnak appears from its remains to have been originally 500 feet in length, and composed of a doable row of ram-headd lions 58 in number. The loftiest of Acgyptian portals stands at its SW. extremity. It is 64 feet high, but without the usual pyramidal propyla. It is indecd a work of the Greek era, and was raised by Ptulemy Euergetes I. Fameses IV. and lanoeses Vili. addevi tetuples and a dromos to the city. Nor was Thebes withont its benelactors even so late as the era of the Roman Caesars. The name of Tiberius was inscribed on one of its temples; and Hadrian, while eagaged in his general survey of the Empire, directed some repairs or additions to be made to the temple of ZeasAnmon. That Thebes, as Herodotus and Dinulurus saw it, stood upon the site and incorporated the remains of a yet morc aacient eity, is rendered prubable by its sudden expansion under the $18 \mathrm{th}_{1}$ dynasty of the I'haraohs, as well as by extant prectmens of its architecture, more in affinity with the monuments S . of the cataracts than with the propme Aegsptian style. It seems havdly queationalie that

Thebes was indebted for its greatness origimally to its being the principal centre of Ammon-worship,-a worship which, on the one hand, connected it with Meroe, and, on the other, with the islands of the L.ibyan desert. The strenuth which the Thebaid and its capital thus acquired not only cnabled it to rise superior to Abydus in the earlier period, but also to expel the Assyrian invaders from the Delta. It becomes then an interesting question which quarter of Thebes was its cradle? 1)id it spread itself from the eastern or the western shore of the Nile? Both Diodorus and strabo are agreed in placing the "old town," with its Annonian temple, on the eastern h:mk of the river; and this site too was the more accessible of the two, whether its population came from the left or, as it is more likely they did, from the richt shore. Between Luzor and Karnak lies the claim to be con-idered as the site of the earliest Dumpolis. Now in the former place there is no conspicuous trace of Ammon-worship, whereas the latter, in its ram-headed dromei, aboands with symbols of it. At Kurnak, every monament attests the presence of Amnoun. Osiris indeed appears as his son or companion on the sculptures, and in some of the temple-legends they were represented as joint founders of the shrine. But Ammon was withont doubt the elder of the two. We may accordingly infer that the first Thebes stood nearly on the site of the present Karnck; at a period anterior to all record: that it expanded towards the river, and was separated by the whole breadth of the stream and of the plain to the foot of the Libyan bills from the necropulis. Fioally, that as its population became too large for the preciacts of the eastern plain, a suburb, which grew into a second city, arose on the rpposite bank of the Nile; and thus the original dhatinction between eastern and western Thebes partially disappeared, and the river, baving thenceforward babitations on both its banks, no longer parted by a broad barrier the city of the living from the city of the dead.
(Kenrick, Ancient Aegypt ronder the Pharauhs, vol. i. pp. I49-178: Ilveren, Historical Researches, Thebes and its Monuments, vol. ii. pp. 201-342; Champollion, Lettres sur lEgypte; Hamilton, A egyptiara: Belzuni, Travels, 9c.)

The territory of Thebes was named Thebais ( $\dot{\eta}$ ensats, se, $\chi \dot{\omega} p a$, or of ăva tónot, the Upper Conntry, Ptol. iv, 5. § 62), the modern Sais or Patheros, and was one of the three principal divisions of Aegypt. Its frontiers to the S. varied acnardingly as Aecypt or Aethiopia preponderated, the Theban lharawhs at times ruling over the region athre the c'ataracts as far S. as Hiera Sycamina h.t. $23^{3} 6^{\circ} \mathrm{N}$ : while, at others, the kings of Neroe phanted their earrisons N . of Syene, antl, at one 1werinal. occupied the Thebais itself. Bat the ordihary lunits of Upper Aegypt were Syene to s., lat. $24^{j} \ddot{ }^{\prime}$ X..., tend Hermoperis Magna to N., lat. $27^{\circ} 45^{\prime}$ $\therefore$. ()n the E., it was bounded by the Arabian, on the W. by the Jibyan hills and desert. As rain veldom falls in thee Thebais (Ilerod. iii. 10), and as It- general sarfice is rocky or sandy, the breadth of (turtwable laot diepends on the alluvial deposit of the Nile, and this again is regulated by the couformation of the lanks on enther side. For a similar cause the populatinn of the Thelotis was mostly gathered into towns and large villages, both of which are utten diguified by accient waters with the appellation of cities. But numerons cities were incompatible with the physicul character of this region,
and its population must have been considerably below the estimate of it by the Grecks and Komans.

The Thebais was divided into ten nomes (Strab, xril. p. 78i), and consequently ten lails in the Labyrinth were appropriated to its Nonarchs. But this number apparently varied with the boundaries of Upper Aegypt, since Pliny (v. 9) enumerates eleven, and other writers mention fourteen Nomes. The physical sispect of the Thebais requires especial notice, since it differed, both geologically and in its Fauna and Flora, from that of Lower Aegypt.

For the most part it is a narrow valley, intersected by the river and bounded by a double line of hills, lofty and abrnpt on the easteru or Arabian side, lower and interrupted by sandy plains and valleys on the Libyan or western. The desert on either side prodaces a stunted vegetation of shrubs and berbs, which emit a slight aromatic olour. The cultivahle soil is a narrow strip on each side of the Nile, forming, with its bright verdore, a strong contrast to the brown and arid bue of the surrounding district. The eotire breadth of this valley, including the river, does not exceed 11 miles, and sometimes is contracted by the rocky banks of the Nile even to two.

Upper Aegypt belongs to Nobia rather than to the Heptanonis or the Delta. Herodotas (iii. 10) was mistaken in his statement that rain never falls in the Thebais. It is, however, of rare occurrence. Showers fall annually during four or five days in each year, and about once in eight or ten years heary rains fll the torrent-beds of the mountains, and convert the valleys on either side of the Nile into temporary pools. That this was so even io the age of Hecataens and Herodotas is proved by the circumstance that the lions on the cornices of the Theban temples have tubes in their moatha to let the water off.

Bot the fertility of the Thebais depends on the overflow of the Nile. From Syene nearly to Latopolis, lat. $25^{\circ} 17^{\prime}$ N., the cultivable scil is a narrow rim of alluvial deposit, bonoded by steep walls of sandstone. On the Arabian shore were the quarries from which the great temples of Upper Apgypt were constructed. At Apollinopolis Magna (Edfu) the sandstone disappears from the W. bank of the river, and on the E. it extends but a little below that city. Four miles below Eilithya, the limestone region begins, and stretclies down nearly to the apex of the Delta, descending on the Libyan side in terraces to the Mediterranean. At this point a greater breadth of land is cultwable, and in the Arabian hills deep gorges open towards the Red Sea, the most consideralite of which are the valleys that run from Eilithya in a SF. direction to Berenice, and from Coptos, past the porphyry quarries, to Cosseir on the Red Sea. The tanks and stations for the caravans which the Theban Pharaols or the I'tulemies constructed in these valleys are still occasionally found buried in the sand. At Latopolis the Nile-valley is nearly 5 miles wide, but it is acain contracted by the rocks at Gebelein, where, owing to the precipitous character of the banks, the road quits the river and crosses the eastera desert to Hermonthis.

The next material expansion of the Nile-valley is at the plain of Thebes. At this point buth clisios of hills curve boldly away from the river, and leavo an area of more than 5 miles in leogth and 3 in breadth. At the northern extremity of this plain the banks again contract, and at Gourneh are almost close to the Nile. Re-upening again, the
borders of the stream as far as Hermopolis Magna, the northern boundary of the Thebsia, generally extend inland on the E. side about one mile and a half, on the T . abont two miles. They do not indeed observe an unbroken line, but the alluvial soil, where the months of the collateral valleys permit, occasionally stretches much farther into the conntry. Canals and dykes in the Pharaonic period admitted and retaioed the Nile's deposit to an extent unknown either in Grecian, Roman, or modern eras.

Seen from the river the Thebaid, in the flourishing periods of Aegypt, presented a wide and animated bpectacle of caltivation and industry, wherever the harks admitted of room for cities or villages. Of the scenery of the Nile, its teeming population and moltitudinous river-craft, mention lias already been made in the article Nilus. Among many others, the following objects were beheld by thase who travelled from Syene to Hermopolis. At first the general :uppearance of the shores is barren atid dreary. Koum-Ombos, the ancient Ombi, would first arrest attention by the brilliant colours of its temples, and, at certain seasons of the sear, by the festivals held in honour of the crocodile-headed deity Serak. At times abo, if we may eredit the Roman satirist (Juvenal, Sat, xr.), the shure at Ombi was the scene of hloody frays with the crocodile externinators from Teotyra. Sixteen miles below Ombi was the seat of the special worship of the Nile, which at this point, owing to the escarged form of its sandstone banks, adınits of a narrow road only on either side, and seems to occupy the whole breadth of Aegypt. Here too, and on the easteru bank especially are the vast quarries of stone which supplied the Theban architects with their darable and beautiful materials. Various landing-places from the river gave access to those quarries: the names of successive sovereigns and princes of the aviiith dynasty, their wars and triumphis, are recorded on the rocks; and blocks of stone and monolithal shrives are still visible in their galleries. The temples of Apollinopolis Magna (Edfu), the hypogaes of Eilithya, Thebes occupying either bank, Coptos, long the seat of Aegyptian conmerce with India, the temples of Athor and Isis at Tentyra, the month of the ancient hranch of the Nile, the canal of Jusuf at Diospolis Parva, the necropulis of Abydos, near which rans the ligghroad to the greater Oasis, the lined-works and stone-masons' yards of Chemmis or Panopolis (Ekkmin), the sepuldural chambers at Lycopolis, and, finally, the superb portico of Hermopolis Magna, all evince, within a compass of abnut 380 miles, the wealth, enterprise, and teeming population of Upper Aegypt.

The regetation of this region announces the approach to the trapics. The pruductions of the desert, stunted shrubs and trees, resemble those of the Arahian and Libyan wastes. But wherever the Nile fertilises, the trees and plants belong rather to Aethiopia than to the lower country. The sycamore nearly disappears: the Theban palm and the date-palm take its place. The lotus (Symphaea Lotus and Nymphaea caerulea) is as abundant in the Thebas is the papyras in the Delta. It is the symbol of the Upper Land: its blue and white cups enliven the pools and canals, and representations of them furaished a frequent and gracefal ornament to architectare. Its bulb affurded a plentifnl and matritious diet to the poorer classes. The deserts of the Thehais, which in Christian times swarmed with monasteries and hermitages, contained the wolf, byaena, and
jackal : hat the larger carniverous animals of Libra were rarely seen in Aegypt. (Ilerod, ii. 65.) In tho Pharaonic times the hippopotamus was found in the Nile below the Cataracts: more recently it has seldorn been foand N . of them. The crocodile, being an object of worship in several of the Theban nomes, was doubtle:s more abundant than it is now. From both papyri and sculptares we know that the Theban landowners possessed horned cattle and sheep in abondance, although they kept the latter for their wool and milk principally; and the chariots of Thebes attest the breeding and training of horses. From extant drawings on the monuments we know also that horticulture was a favourite occupation in Upper Aegypt.

The population of the Thebais was probably of a purer Aegyptian stamp than that of the Delta; at least its admixtures were derived from Arabia or Meroe rather than from Pheenicia or Greece. Its revolutious, too, proceeded from the south, and it was comparatively noaffected by those of the Lower Country. Even as late as the age of Tiberins, A.D. $14-37$, the land was prosperous, as is proved by the extension and restoration of se many of its public monaments; and it was not until the reign of Diocletian that its ruin wis consummated by the inroad of the Blemmyes, and other barbarous tribes from Nubia and the Arahian desert. [W. B. D.]
 Ensaios, fem. Ongais, Thebanns, fem. Thebais), the chief city in Boeotia, was sitnated in the sonthern plain of the conntry, which is divided from the northera by the ridge of Oachestus. Both these plains are sarrounded by mountains, and contained for a long time two separate confederacies, of which Orchomenus in the north and Thebes in the south were the two leading cities.

## 1. History.

No city in Greece possessed such long contimned celebrity as Thebes. Albens and Sparta, which were the centres of Grecian political life in the bistorical period, were poor in mythical renown: while Argos and Mycenae, whose mythical anoals are fall of glorions recollections, sank into comparative insignificance in historical times, and Mycenae indeed was blutted out of the map of Greece soon after the Persian wars. But in the mythical ages Thebes shone pre-eminent, while io later times she always maintained her place as the third city of Greece; and after the battle of Leuctra was for a short period the ruling city. The most celebrated Grecian legends cluster round Thebes as their ceatre; and ber two sieges, and the fortunes of her royal houses, were the favourite subjects of the tragic muse. It was the natire city of the great scer Teiresias and of the great musician Amphion. It was the reputed birtbplace of the two deities Dionysus and Hercules, whence Thebes is said by Suphncles to be "the only city where mortal women are the noo-
 Ə̌oús, Fragm. op. Dicaearch, § 17, ed. Dlïller; Mare, Tour in Greece, vol. i. p. 253.)

According to the generally received tradition, Thebes was fonnded by Cadmus, the leader of a Phoenician colony, who called the city Cadmela (Kaঠ́uia), a name which was afterwards confined to the citadel. In the Odyssey. Amphion and Zothus, the two sous of Antiope by Zeus, are represented as the first founders of Thebes and the first
bailders of its walls. (Od. xi. 262.) But the logographers placed Amphion and Zethus lower down in the scries, as we shall presently see. The legends connected with the foondation of the city by Cadmus are relatell elsewhere. [Dict. of Diogr, and 1/yth. art. Cansues.] The five Sparti, who were the only survivors of the warriors sprung from the dragon's tecth, were the reputed ancestars of the noblest families in Thebes, which bore the name of Sparti down to the latest times. It is probable that the name of their families gave origin to the fable of the sowing of the dragon's teetb. It appears certain that the original inhabitants of Tbebes were called Cadmeii (Kaîutioh, Il. iv. 388, 391, v. 807, x. 288, Od, xi. 276) or Cadmeiones (Kaסueiaves, Il. ir. 385, v. 804 , xxiii. 680 ), and that the soutbern plain of Bueotia was originally called the Cadmeian land (Kaju $\mathrm{\eta}_{\mathrm{is}} \gamma \bar{\eta}$, Thuc. i. 12). The origin of these Cadmeians has given rise to much dispute among modern scholars. K. O. Ntialler considers Cadmas a god of the Tyrrhenian Pelangians, and maintains that the Cadmeians are the same as the Tyrrhenian Pelasgians; Welcker endeavonrs to prove that the Cadmeians were a Cretan coleny ; while otber writers adhere to the old traditions that the Cadrueians were Phoenicians who introduced the use of letters into Greece. (Miiller, Orchomenos, p. 111, seq. 2nd ed.; Thirlwall, Hist. of Grecce, vol. i. p. 111.) It is nseless, however, th enter into the disenssion of a subject respecting which we possess no materials for arrixing at a satisfactory conclosion. It is certain that the Greeks were indebted to the Phoenicians for their alphabet; but whether the Cadmeians were a Pboenician colony or some other race must be left uncertain.

But we must return to the legendary history of Thebes. Cadmus had one son, Polydorus, and foor daughters, Ino, Semele, Autonoë, and Agave, all of whom are celebrated in the mythical annalk. The tales respecting theor are given in the Dict. of Biogr. and $\mathrm{M}_{\mathrm{y}}$ th, and it is only uecessary to mention here that Ino became the wife of Athamas and the muther of Melicertes; Semele was beloved by Zeus and becane the mother of the god Dienysns; Autencë wats the mother of the celebraterl bunter Actaeon, whin was torn to fieces by the dogs of Aiternis; and Agave was the mother of l'enthens, who, when Calmus became old, succeeded him as king of Thebes, and whose miserable end in attempting to 1 cist the wor:hip of Dionysus forms the stibject of the Bacchne of Euripides. After the death of I'enthens, Cadmus retired to the Hllyrians, and his son Polydorns became king of Thebes. Polydorns is sucereded by his son Lahdacus, who leaves at lifs death an infant son laius. The throne is usurped by Lycus, whose brother Nyctens is the lather of Antiope, who becomes by Zens the mother of the twin sons, Amphion and Kethus. Nycteus laving died, Autiope is exposel to the jerserutions of her uncle Lycus and his cruel wife Hirec, till at length her two sons, Aruphion and Zethus, revenge her wrongs and become kings of Thelies. Tliey fortify thie city; and Amphion, who houl been trught by IIfermes, passessed such expuisite skill on the lyre, that the stones, obedient too his atrains, movel of their own accord, and formed the ".all (" movit Amplion lapides canendo," Hor. Car, a iii. 1t). The remainder of the legend of Amplaur and Zethus need not be rehated; and thece can bue no doubt, as Mr. Grote hass remarked, that the whole story was originally unconnected with the

TIIEBAE BOEOTIAE.
Cadncian fumily, as it still stands in the Odyssey, and bas been interwoven by the logographers into the series of the Cadmeian inyths an order to reconcile the Homeric account of the building of the city by Amplion and Zethus with the usually receivel legend of its foundation by Cadmus, it was represented by later writers that, while Cadmos founded the Cadmeia, Amplion and Zetbos built the lower city ( $\left.\tau \grave{\grave{\nu}} \boldsymbol{\nu} \pi \lambda_{i v} \tau \dot{\eta} \nu \kappa \alpha ́ \tau \omega\right)$, and gave to the united city the name of Thebes. (Paus, ix. 5. §§ 2, 6.)

After Amphion and Zethus, Laius became king of Thebes; and with him conmences the memerable story of Oedipus and his fumily, which is too well known to need repetition here. When Oedipus was expelled from Thebes, after discovering that be hat ourdered his father Laius and married his mother Jucasta, his two sons Eteoeles and Polyoices quarrelled for their father's throne. Their dispotes led to the two sieges of Thebes by the Argivo Adrastus, two of the mast menorahle events in the legendary history of Greece. They formed the sub. ject of the two epic poums, called the Thebais and the Epigoni, which were consilered only inferior to the !liad and the Odyssey. Polgnices, laving been driven ont of Thebes by Etencles, relires to Argus and obtains the aid of Adrastus, the king of the city, to rcinstate him in his rights. Polynices and Adrastus are joined by five other heroes, making the confeleracy known onder the name of tho "Seven ngainst Thebes." The names of these seven chiefs were Adrastus, Amphiariius, Capancus, Hippomeden, Parthenopaeus, Tydeus, and Polynices; but there are discrepancies in the lists, as we slatl notice more fully helow: and Aesclyylus (Sipt. c. Theb. 461) in particular omits Adrastus, and inserts Etcoclos in his place. The Seven Chiefs atvanced arainst Thebex, and each attackel one of the celebrated gates of the city. Polynices and Eteocles fell by each other's hands; and in the general engagement which followed tho combat of the two brothers, the Argives were defeated, and all their chiefs slain, with the exception of Adrastus, who was saved by the swiftness of his horse Arciull, the offspring of Poseidon. A few ycars afterwards the sons of the Seven Cliefs uodertowk an expedition against Thebes, to avenge their fathers' fate, bence called the war of the Epigoni or Descendarits. This expedition was also led by Adrastus, anul consistel of Aegialens, son of Adrastos, Thersander, son of Polynices, Alemateon atad Amphilochus, sons of Amphiarains, Diomedes, son of T'ydens, StherieJcus, son of Capanens, and Promachus, som of I'arthenopaeus. The Epigoni gained a victory orer the Cadmeians at the river Glisas, sud drove them within their walls. Upon the advice of the seer Teiresias, the Calmcians abanduned the city, und retired to the lllyrians under the gnidance of Laoilamas, son of Adrastus. (Apullod, iii. $7 . \S 4$; Herod, v. 57-61; Pans. ix. 5. § 13 ; Dial. iv. 65, 66.) The ETigoni thus became masters of Thebes, and $1^{\text {laced Thersander, son of Polynices, on }}$ the Throne. (For a full uccotent of the legends of Thebes, see Grote, Hist. of (ireece, vol. i. c. xiv.) According to the mythical chronology, the war if the Seven against Thebes took place 20 years beforo the Trojan experlition and 30 years before tha capture of Troy; and the war of the Epigoni was placed 14 years after the first expedition against Thebes, and consequently only 4 years befure tho dejartare of the Greeks against Thoy. (Clintod, F. Il. vol. i. p. 140.)

There is anotber important event in the mythical times of Thebes, which was not interworen with the scries of the lesends alroady related. This is the birth of Hercules at Thebes, and the important services which he readered to his native city by his war against Orchumenus. It was stated that the Thebans were compelled to pay tribute to Erginus, kiog of Orchomenus; but that they were delivered fivm the tribute by Hercules, who marched amainst Orchomenus, and greatly redaced its power (Pans, ix. 37. § 2; Strab, ix. P. 414 ; Diod. iv. 18). This legend has prohably arisen from the historical fact, that Orchonneous was at one time the mont fuwerfol city in Boeotia, and held even Thetes in sutujectioo.

Thebes is frequently mentioned in Homer, who speaks of ita celebrated seven gates ( $I l$, iv. 406, (dd. xi. 263); but its name does not occur in the ratalogue of the Greek cities which fought against Troy, as it was probably supposed not to have recovered from its recent devastation by the Epigoni. Later writers, however, related that Thersander, the ano of Polynices, aceonpanied Agamemnon to Troy, and was slatin in Mysia by Teleppus, before the cammencement of the siege; and that opon bis death the Thebans chose l'eneleos as ther leader, in consequence of the teuder age of Tisamenus, the son of Thersander. (Paus. ix. 5. §今 14, 15.) In the Iliad (ii. 494) Peneleos ia mentioned as one of the leaders of the Boeotians, but is not otherwisc conneeted with Thebes.

According to the chronology of Thncydides, the Cadneians continued in possession of Thebes till 60 years after the Trojan War, when they were driven out of their city and country by the Boeotians, an Aeolian tribe, who migrated from Thessals. (Tbuc. i. 12; Strab, ix. p. 401.) Thia seems to have been the genuine tradition; but as Homer gives the name of Bocotians to the inhabitants of the country called Boentia in later times, Thucydides endeavours to reconcile the authority of the poet with the other tralition, by the supposition that a portion of the Aeolic Bocotians had settied in Boentia previonsly, and that these were the Boeetians who sailed against Troy. Aecording to other accounts, Thebes was taken by the Thracians and Pelasgians during the Trojan War, and its inlahitants driven into exile in Thessaly, whence they returned at a later period. (Strab. ix. p. 401; Diod. xix. 53.)
rausanias gives us a list of the kings of Thebes, the suecessors of Tisamenas, till the kingly dignity was abulished and a republic established in its place (ix. 5. § 16). But, with the exception of one event, we kDow absolutely anthing of Thelian history, tull the dispute between Thebes and Plataea in the latter end of the sixth centary B. C.

The event to which we allude is the legislation of Philohas, the Corinthian, who was enamoured of 1 hiocles, also a Corinthian, and the victor in the Olympian games, n. c. 728 . Both Philulans and Diecles left their native city and settled at Thehes, where the former drew np a code of laws for the Thebana, of which one or two particulars are mentimed by Aristotle. (Pol. ii. 9. \$s 6, 7.) At the tinue when Thebes finst appears in history, we fund it under an oligarchical torm of goveroment, and the head of a political confederation of some twelve or fourteen Bueotian cities. The greater cities of Buentia were members of this confederation, and the sinailer towns were attached to one or other of these cities in a state of deqeadence. [Bosorta, p, 415.]

The affirirs of the confeteration were managed ly certain magistrates or genernls, called Eveotarcbs, of whom there were eleven ut the time of the battle of Delium (B, c. 424). two being elected by Thebes, and one apparently by each of the other members of the confederation (Thuc. iv. 91). But the real authority was vested in the hands of the Thebans, who userl the power of the confederation with an almost exclasive view to Theban interests, aud keyt the other states in virtual subjection.

The first well-known event in Grecian history is the dispute, already mentioned, between Thebes and Plataea. The Platacans, discontented with the supremacy of Thebe;, withdrew from the Bueotian confederation, and surrendered their city to the Athemians. This led to a war between tbe Thebans and Athenians, in which the Thebans were defeated and compelled to cede to the Platacans the territory S. of the A-ppos, which was made the boundary hetween the two states. (Ilernd, vi, 108; Thac, iii. 68.) The interference if Atbens upon this occastun was bitterly resented by Thebes, and was the commencement of the long enmity between the two states, which exercised an inportant influence upon the course of Greevian history. This event is uspally placed in B.C. 519, upon the nuthority of Thucgdides (l. c.); but Mr. Grote biings forkard strong reasons for believing that it must have taken place after the expalsion of Hippias from Athens in B. C. 510. (llist, of Grecee, vol. iv. p. 222.) The hatred which the Thelans felt against the Athenians was probably one of the reasuns which induced them to desert the cause of Grecian liberty in the great struggle against the Persian power. But in the Peloponaesian War (B, C, +27) the Theban orator pleaded that their alliance with Persia was not the fault of the nation, but of a few individuals who then exereised despotio power. (Thuc. iii. 62.) At the hattle of Ilataes, however, the Thebans sliowed no such reluctance, but fuught resolutely against the Atheuians. who were pented opprsite to them. (Herod. ix. 67.) Elesen days atter the battle the victorious Grecks appeared before Thebes, and compelled the inhabitants to sarreader their medising leaders, who were immediately put to death, without any trial or other investigation. (Heroul. is. 87, 88.) Thebes had lost so mneh credit by the part she had taken in the Persian invasion, that she wats mable to assert hev former supremacy over the other Boeotian towns, which were ready to enter into alhance with Athens, and woold doubtless have established their complete independence, had not Sparta supported the Thelans in maintaining their asceadency in the Poentism confeleration, as the only means of securing the Boeotian cities as the allies of Spartn against Athens. With this view the Spurtans nssisted the Thehans in strongthening the fortifications of their city, and compelled the Bueatian cities by furce of arms t. acknowledge the supremacy of Thebes. (Diod. ai. 81: Justan, iii. 6.) In v.e. 457 the Atheniamio sent an army intu Bocotia to uppose the Lacerlaununian furces in that country, but they were defuated by the latter near Tanagra. Sixty-two days after this battle (E. C. 456), when the Lacedamomians had returned home, the Athenians, under the command of Myronides, invaded Boeotia a second time. This time they met with the mast sigral success. At the battle of Ocmophyta they defeated the combined forees of the Thebans and Boeotians, and obtained in consequeuce posesssion of Thebes and of
the other Boeotian towns. A democratical form of government was estahlished in the different eities, and the oligarchical leadens were driven into exile. (Thuc. i. 108; Diod. xi. 81.) This state of things lasted barely ten years; the democracy established at Thebes was ill-conducted (Arist. Pol. v. 2. § 6): and in n.c. 447 the various Boentian exiles. eonobining their furces, made themelves masters of Orchomems. Chaeroneia, and some other places. The Athenians sent an anny into Boeotia under the command of Tolmides; but this cencral was slain in battle, together with many of his men, while a still larger number were taken prisoners. To recover these prisnners, the Atbenians agreed to relinquish their power over Thehes and the other Buentian cities. The democratical governments were everthrown; the exiles were restored; and Thebes ngain became the bitter enemy of Athens, (Thuc, i. 113, iii. 62; Ihiod. xii. 6.) The Thebans were indeed more antiAthentian than were the Spartans themselves, and were the first to commence the Peioponnesian War by their attempt to surprise Plataea in the night, 1s.c. 431. The history of this attempt, and of the subsequent siege and capture of the city, belongs to the history of Plataea. [Plitaea.] Throughoat the Pelojnonnesian War the Thebans continued the active and bitter enemies of the Athenians; and upon its close after the battle of Aegospotami they joined the Corinthians in urging the Lacedaemonians to destroy Atheas, and sell its population into slavery. (Xen. Mell. ii. 2. § 19.) But soon after this event the feelings of the Thebans towards Athens became materially changed in consequence of their jealousy of Sparta. who had refused the allies all participation in the spoils of the war, and who now openly aspired to the supremacy of Greece. (Plut. $L y s, 27$; Justin, vi. 10.) They consequently riewed with hostility the Thirty Tyrants at Athens as the snpporters of the Spartan power, and gave a friendly welcome to the Athenian exiles. It was from Thebes that Thrasybulus and the otber exiles started upon their enterprive of seizing the Peirseeus: and they were supported upon this occasion by Ismenias and other Theban citizens. (Xen. Hell. ii. 4. § 2.) So important was the assistance rendered by the Thebans on this occasion that Thaspbulas, after his success: showed his gratitude hy dedicating in the temple of Hercules colossal statues of this god and Athena. (Paus. ix. 11. § 6.)

The hostile teelings of Tbehes towards Sparta enntinued to increase, and snon produced the most important results. When Agesilaus was crossing over into Asia in E. c. 397 , in order to carry on war agrinst the Persians, the Thehans refused to take any part in the expedition, and they rudely iuterrupted Agesilaus when he was in the act of offering sacrifices at Anlis, in imitation of Agamemon: an insult which the Spartan king never firgave. (Xen. Hell. iii. 5. §5; Plut. Ages. 6: Paus, iii. 9. s§ 3-5.) Dhiring the absence of Agesilaus in Asia, Tithraustes, the satrap of Asia Minur, sent an envoy to Greece to distribute larce sums of money anmong the leading men in the Grecian eitirs, in arder to persuade them to make war against sparta. But hefore a coalition could be formed for this purpose, a separate war broke ont between Thelees and Sparta, called by Diodorus (xiv. 81) the Buentian war. A quarel having arisen hetween the Opuntian Locrians and the Plocians respecting a strip of border land, the Thebans espoused the cause of the former and

## TIIEBAE BOEOTIAE.

invaded Phocis. Thereupon the Phocians invoked the aid of the Lacedsemonians, who were delighted to have an opportunity of avenging the affronts they lad received from the Thebans. (Xen. /lell. iii. 5. §s 3-5: Paus. iii. 9. § 9.) The Lncedacmonians made active preparations to invade Bueetia. Lysander, who bad been foremost in promoting the war, was to lay siece to Haliartus, under the walls of which town Pausanias was to join lim on a given day with the united Lacedaemonian and Peloponnesian forces. Thus menaced, the Thebans applied for assistance to their ancient enemies, the Athemians, who readily responded to their appeal. thongh their city was still undefended by walls, and they lud no ships to resist the maritime power of Sparta. (Xen. Hell. iii. 5. § 16 ; Dern. de Cor. p. 258.) Orchomenus, however, seized the opportunity to revolt from Thebes, and jnined Lysander in his attack upon Haliartus, (Xen. Hell. iii. 5. § 17: Plut. Lyys. 28.) The death of Lysander under the walls of Haliartus, which was followed by the retreat of Pausanias from Boeotia, emboldened the enemies of Sparta: and not only Athens, but Corinth, Argos, and some of the other Grecian states joined Thebes in a leagne against Sparta. In the following year (B. C. 394) the war was transferred to the territory ef Coriuth; and so powerful were the confederates that the Lacedaemolians recalled Agesilans from Asia. In the month of August Agcsilaus reached Boeotiz on his homeward march, and found the confederate army drawn up in the plain of Coroneia to oppose him. The right wing and centre of his army were victorions, but the Thebans completely defeated the Orchomenians, who formed the left wing. The victorious Thehans now faced about, in order to regain the rest of their army, which bad retreated to Mount Helicon. Acesilaus advanced to meet them; and the conflict which ensued was one of the mest terrible that had yet taken place in Grecian warfare. The Thebans at length succceded in forcing their way through, but not withent great loss. This was the first time that the Thebans had fonght a pitched battle with the Spartans; and the valour which they showed on this occasion was a prelude to the victories which were scon to overthrow the Spartan supremacy in Greece. (Xen. Hell. iv. 3. §s 15-21.)

We have dwelt upon these events somewhat at length in order to explain the rise of the Thehan power: but the subsequcut history must be related more briefly. After the battle of Coroneis the course of events appeared at first to deprive Thebes of the ascendency she had lately acquired. The peace of Antaleidas (u. c. 387), which was concluded under the influence of Sparta, guaranteed the independence of all the Grecian cities ; and though the Thebans at first clained to take the oath, not in their own behalf alone, but for the Bueotian confederacy in general, they were compelled by their enemy Agesilaus to swear :0 the treaty for their own city alone, since otherwise they would have had to conteod singlehanded with the mhole power of Sparta and her allics. (Xen. Hell. v. 1. §ss 32, 33.) By this oath the Thebans virtually remounced their supremacy orer the loeotian cities; and Agesilaus hastened to exert all the Syartan poner for the purpose of weakening Thebes. Nint only was the independence of the Boeotian cities proclaimed, and a legal oligareliy organised in each city hostile to Thebes and tavourable to Sparta, but Lacedaemonian garrisons were
stationed in Orchumenus and Thesplace for the parpose of everawing Boeotia, and the cily of Plataca was rebuilt to serve as an-ontpost of the Spartan power. (Pans, ix. 1. §4). A more direct blow wats aimed at the independence of Thebes in B. c. 382 by the seizure of the Cadmeia, the citadel of the city, by the Spartan commander, Phoebidas, assisted by Leontiades and a party in Thebes favourable to Sparta. Though Phoebidas appears to have acted under secret orders from the Ephors (Dind. xv. 20; Plut. Agesil. 24), such was the indignation excited throughont Greece by this treackerous act in time of peace, that the Ephors found it necessary to disavow Phoebidas and to remove him from his command; but they took care to reap the fruits of his crime by retaining their garrison in the Cadmeia. (Xen. Hell. v. 2. \& 25.) Many of the leading citizens at Thebes took refuge at Athens, and were received with the same kindness which the Athenian exilcs experienced at Thebes after the close of the Peloponnesian War. Tbehes remained in the hands of the Spartan party for three ycars ; bat in B. C. 379 the Spartan garrisen was expelled from the Cadmeia, and the party of Leontiades overthrown by Pelopidas and the other exiles. The histury of these events is too well known to be repeated here. In the following year (B. c. 378) Thebes formed an alliance with Athens, and with the assistance of this state resisted with success the attempts of the Lacedaemonians to reduce them to sobjection; but the continued increase of the power of the Thebans, and their destruction of the city of Plataea [PLATAEA] provuked the jealousy of the Athenians, and finally induced them to conchule a treaty of peace with Sparta, B. c. 371 . This treaty, usually called the peace of Callias from the name of the leadiog Athemian negotiator, included all the parties in the late war with the exception of the Thebans, who were thus left to contend single-handed with the might of Sparta. It was nniversally believed that Thebes was doomed to destruction; but only twenty days after the signing of the treaty all Greece was astounded at the news that a Lacedaemonian army had been utterly defeated, and their king Clenmbrotus slain, by the Tbebans, under the command of Epaminondas, upon the fatal field of Leuctra (B. c. 371). This battle not only destroyed the prestige of Sparta and gave Thebes the ascendency of Greece, but it stript Sparta of her Peloponnestan allies, over whom she had exercised dominion for centuries, and led to the establishment of two new political powers in the Peloponnesus, which threatened her own independence. These were the Arcadian confederation and the restoration of the state of Messenia, both the work of Epaminondas, who condacted four experitions into Peloponnesus, and directed the councils of Thebes for the next 10 years. It was to the abilities and genius of this extraordinary man that Thebes owed her position at the liead of the Grecian states: and upon his death, at the battle of Mantineia (B. C. 362). she lost the pre-eminence she had enjoyed sioce the battle of Leuctra. During their supremacy in Grecce, the Thebans were of course undisputed masters of Boeotia, and they availed themselves of their power to wreak their vengeance upon Orchomenus and Thespiae, the two tuwns which had been the most inimical to their authority, the one in the north and the other in the south of Boeotia. The Orchomenians had in n. c. 395 open!y joined the Spartans and fought on their sile; and the Thespians had withdrown from the

Thicban army just before the battle of Lenctra, when Epaminondas gave permission to any Boeotians to retire who were averse to the Thelsan cause. (Paus. ix. 13. §8.) The Thespians were expelled from their city and Boeutia som after the battle of Leuctra [Thespiae]; and Orehomenas in b, c. 368 was burnt to the ground by the Thebans; the male inbabitants were put to the sword, and all the women and children sold inte slavery. [Onchomenus.]

The jealonsy which Athens had felt towards Thebes before the peace of Callias had been greatly increased by ber subsequent victories ; and the two states appear heaceforward in their old condition of hastility till they were persuaded by Demosthenes to unite their arms for the purpose of resisting 1hilip of Macedod. After the battle of Mantineia their first open war was for the possession of Enboea. After the battle of Lenctra this island lad passed under the sapremacy of Thebes; but, io в.c. 358 , discontent having arisen against Thebes in several of the etties of Euboea, the Thebans sent a puwerful furce into the island. The discontented cities applied for aid to Athens, which was readily granted, and the Thebans were expelled from Eaboea. (Diod. xvi. 7: Dem. de Cherson. p. 108, de Cor. p. 259, c. Ctesiph. p. 397.) Shortly afterwards the Thebans commenced the war against the Phocians, usually known as the Sacred War, and in which almost alt the leading states of Greece rere eventually involved. Buth Athens and Sparta supported the Phocians, as a counterpoise to Thebes, though they did not render them much effectual assistance. This war terminated, as is well known, by the intervention of Philip, who destroyed the Jhocian towns, and restored to Boeotia Orchomenus and the other towns which the Phocians had taken away from them, B.c. 346. The Thebans were still the allies of Philip, when the latter seized Elateia in Phocis towards the close of в.с. 339, as preparatory to a march throngh Boeutia against Atbens. The old feeling of ill-will between Tbebes and Athens still continued: Philip calculated ppon the good wishes, if not the active co-operation, of the Thebans against their old enemies ; and probably sever dreamt of a confederation between the two states $2 s$ within the range of probability. This union, bowever, was brouglit about by the eloquence of Demostbenes, who was sent as ambassador to Thebes, and who persuaded the Thebans to form an alliance with the Athenians for the purpuse of resisting the ambitious schemes of Philip. In the following ycar (B. C. 338) Philip defeated the combined forces of Thebes and Athens at the battle of Chaeroneia, which crusbed the liberties of Greece, and made it in reality a province of the Bacedonian monarchy. On this fatal field the Thebans maiotained the reputation they had won in their battles with the Spartans; and tbeir Sacred Band was cut to pieces in their ranks. The battle was folluwed by the surrender of Thebes, which Philip treated with great severity. Many of the leading citizens nere either banished or put to death; a Dacedonian garrison was stationed in the Cadmeia; and the govermment of the city was placed in the hands of 300 citizens, the partisans of Philip. The Thebans were also depuived of their sovereignty over the Boeotian towns, and Orchomenns and Plataea were restored, and arain filled with a population hostile to Thebex. (Diodor. xvi. 87; Justin, ix. 4; Paus. iv. 27. \& 10, ix. 1. § 8.) In the year after Philip's death (b.c. 335) the Thetian cxiles got possession of the city,
besieged the Macedonian garrison in the Cadmeia, and invited the otber Grecian states to declare their independence. But the rapidity of Alcxander's movements discuncerted all their plans. He appeared at Ouchestus in Boentis, brtore any istelligence had arrived of lifs quitting the porth. Ife was willing to allow the Thebans an opportanity for repentance; but as his proposals of peace were rejected, he directed a general assault upon the city. The Theban troops outille the gates were trisen back, and the Macedonians entered the town alung with them. A dreadful carnage ensued; 6000) Thebans are said to have been slain, and $30,000 *$ to have been taken prisoners. The doom of the conquered eity was referred to the Grecian :llies in his army, Orchomenians, Platae:ms, Phocians, and other inveterate enenies of Thebes. Their decision mast hare been known beforehand. They decreed that Tbebes shonld be razed to the ground, with the exception of the Cadmeia, which was to be held by a Nacedonian garrison; that the territory if the city should be divided anoong the allies; and that all the inbabitants, men, women, and chiluren slould be sold as slaves. This sentence was carried into execution by Alexander, who levelled the city to the ground, with the exception of the bouse of Pindar (Arrian, Anab. i. 8, 9; [iodur. avii. 12-14; Justiv, si. 4.) Thebes was thus blotted out of the map of Greece, and remained without inliabitants for the nest 20 years. Io b.c. 315 , Cassander undertook the restoration of the city. He united the Theban exiles and their descendants from all part's of Greece, and was zealously assisted by the Athenians and other Grecian states in the work of resturation. The new city uccupied the same area as the one destroyed by Alexander; and the Cadmeia was held ly a garrison of Cassander. (Diodor. xix. $52-54,78$ : P'aus. ix. 7. § 4.) Thebes was twice taken ly Denetrius, first in B. c. 293, and a second time in 290 , bat on each ocession be used his rietory with moderation. (Plut. Demetr. 39, 40; Diod. xxi. p. 491, ed. Wess.)

Dicaearchus, who visited Thebes not leng after its restoration by Cassaoder, has given a very interesting account of the city. "Thebes," be says ( $\$ 12$, seq. ed. Mïller), "is situated in the centre of Bueotia, and is about 70 stadia in circumference; its site is level, its shape cireular, and its appearance glooany. The eity is ancient, bat it has been lately rebuilt, having been three times destroyed, as listory relates*, oil aceoont of the insolence and haughtiness of its inlabitants. It is well adapted for reating hersets since it is pleutifully provided with water, and atoonds in green pastures and lills: it cootains also better gardens than any other city in cireece. Two rivers flow through the town, and irrigate all the subjacent plain. There is also a subterraneous stream issuing from the Calmein, through pipes, said to be the work of Cadunus. Thebes is a most atreeable revidence in the summer, in consequence of the abundance and couluess of the water, its large gardens, its agrveable breezes, its verdant appearance, and the quan'ity of sumucr and autvmal fruits. In the winter, howeter, it is a most diaggrecable re idence, from beim; destitute of fuel, and constantly exposed to floods and wimls. It is then often covered wit! s sow and very nutily." Although Dicaearchu:

* Hicacarchios frubally means the eapture of the city ly the Fipirani: secmily by the Pelasgi, during the Iruaan war atd lastly by Alesander.

## THEBAE BOEOTIAE.

in this passage gives to Thebes a cincomference of 70 stadia, he assigns in his verses (Stat. Grace. 93) a much smaller extent to it, namely 4.3 stadia. The latter number is the more probable, aod, being in metre was less likely to be altered; but if the number in prose is correct, it probably ineludes the suburbs and gardens outside the city walls. Dichearchos also gives an aceount of the character of the inlabitants, which is too long to be extracted. He reprewets them as noble-minded and sanguine, but insolent and proud, and alrays ready to settle theor disputes by fighting rather than by the orditary course of justice.

Thebes had its full share in the later calamities of Grecee. After the fill of Corinth, B.C. 146. Nummins is said to lave destroyed Thebes (Lis. Epit. 52), by which we are probably to mnderstand the walls of the city. In consequence of its having sided with Mithridates in the war against the Romans, Sulla deprived it of half its territory, whieh be dedicated to the gods, in order to make eompensation for liis having plundered the temjles at Olympia, Epidaurus, and 1elphi. Althnugh the Romans afterwards restored the land to the Thebans, they never recovered fronn this Lew (Paus, ix. 7. §§5, 6); and so low was it reduced io the time of Augustus and Tiberina that Strabo says that it was little more than a village (ix. p. 403). In the tine of the Autouines, Pausanias found the Cadneia alone inhabited, and the luwer part of the town destroyed, with the exception of the temples (ix. 7. §6). Jo the decline of the Roman Empire. Thebes became the seat of a considerable population, probably in consequence of its inland situation, which afforited its inhabitants greater security than the maritime towns from hostile attacks. In the eleventh and twelfth centuries Thebes was one of the most floarishing cities in Gireece, and was celebrated for its manufactures of silk. In A. D, 1040 the Thebans took the field to oppose the Bulgarian invaders of Gireece, but were defeated with great loss. (Cedren. p. 747, ed. Paris., p. 529 , ed. Buno.) In A. D. 1146 the city was plandered by the Normans of Sicily, who carried off a large ammunt of plunder (Nicetas, p. 50, ed. Paris., p. 98, ed. Bonn.) Benjianiu of Tudela, who visited Thebes aboot 20 years later, speaks of it as still a large city, possessiug 2000 Jewish iolnabitants, whu were very skilful manufaeturers of silk and parple eloth (i. 47, ed. Asher; Finlay, Byzantine Empiere, vol. i. p. 493, vel. ii. p. 199). The silks of Thebes continued to be esteemed even at a later period, and were worn by the emperors of Conistantioeple. (Niectas, 1. 297, ed. Paris, P. 609, ed. Beno.) They were, however, gradually supplanted by thome of Sieily and Italy; and the loss of the silk trade was followed by the rapid decline of Thebes. Under the Turks the city was again reduced, as in the time ef l'ansanias, to the site of the Cadmelia.

## II. Topogibarify.

Theles stanif nn oun of the hills of Mount Teumessos, whirh divides southern Bocetia into twi, distinet parts, the northern being the plain of Thehes and the southern the valley of the Asoms. The Greeks, in founding a city, took care to splect a spont where there was an ahondant sufply of water, and a hill naturally defensilde, whiels might be easily cunverted into an acropolis. They generally zareforned a position which would comamand the adjuecent flain, and which was neither immediately upur the coust nor
yet at a great distance from it．But as Boeotia lies between two seas，the founders of Thebes chose a spot in the ceatre of the country，where water was very plentiful，and where the nature of the gromed was admirably adapted for defence．The hill，upon which the towo stands，rises about 150 feet above the plain，and lies about 2 miles northward of the highest part of the ridge．It is bonnded on the cast and west by two small rivers，distant from each other about 6 or 7 stadia，and whicb rua in such deep ravines as to form a natural defence on cither side of the city．These rivers，which rise a little south of the city，and flow northward into the plain of Thebes，are the celebrated streans of Ismenus and lirce．Between them flows a smaller strean，which divided the city into tro parts，the western division comtaining the Cadmeia＊，and the southern the liill Istopoius and the Ampheion．This middle torrent is called Cnopus by Leake，but more correctly Stro－ phia（Callim．Hymn．in Del．76）by Forchhamaner． The Cnopus is a torreat flosiag from the town Cnopia，and contributing to form the lsmenus，whence it is correctly described by the Scholiast on Nicander as the sume as the Ismenus．（Strab．is．p，404； Nisand．Theriac．889，with Schol．）The three streams of Ismenus，Dirce，and Strophia noite in the plain below the city，to which Callimachus （l．c．）appears to allude：－

##  ＇I $\sigma \mu \eta \nu 0 \overline{~ \chi e ́ \rho a ~ \pi a \tau \rho o ́ s . ~}$

The middle torrent is rarely mentioned by the ancient writers；and the lsmeous and Dirce are the sticams olluded to when Tbebes is called $\delta: \pi \delta$ тapus $\pi o ́ \lambda i s$. （Eurip．Suppl．622；comp．Phoen． 825. Bucch．5，Ilerc．Fur．572．）Both the Ismeans and Dirce，though so celebrated in antipuity，are nothing but torrents，which are only full of water in the winter after heavy rains．The lsmenus is the enstern stream，now called $A i$ Iánni，which rises from a clear and copious fountain，where the small church of St．Jobn stands，from which the river de－ lives its name．This fuuntain was called in anti－ quity Melia，who was represeated as the mother of Jsmenns and Tenerus，the bero of the plain which the Ismenus ioundates．It was sacred to Ares，who was said to have stationed a dragon to guard it． （Callimach．Mymn．in Del．80；Spanhein，ad loc．； l＇inh．Pyth．xi．6；Pans．ix．10．§5；Forchhammer， IIellenica，p．113．）The Dirce is the western stream， now called Platziótissa，which rises from several fountains，and not from a single one，like the ls－ menus．A considerable quantity of the water of the Platziotissa is now diverted to supply the fountains of the tomn，aod it is represeated as the parest of the Thelan streatns；and it appears to have been so regarded in autiquity likewise，judging fross the epithets bestowed upon it by the paets．（＇A $\gamma \mathbf{y}$ ò víwp，l＇ind．Isthm．si．109，ка入入i $\bar{\beta}$ ¢oos，1sthm．viii． 43；й Sept．e．Theb．307；ка入入imórauos，Eurip．Phoen．

Though the position of Theles and of its cele－ brated strearns is certain，almost every point con－ nected with its topography is more or less doubtionl． In the other cities of Greece，which have heen inha－ bited continnuusly，most of the ancient buildings

[^33]lave disnppeared；but nowhere has this taken place more completely than at Thebes．Not a single trake of an ancient building reloains；and with the ex－ ception of a few scattered renains of architecture and sculyture，and some fragments of the uncient walls，there is notbiog but the site to indicate where the ancient city stood．Io the absence of all ancient momuments，there oust necessarily be great ancer－ tainty；and the tlireo writers who have investigated the sulject apon the spot，differ so widely，that Leake places the ancient city to the south of the Cat－ meia，and Ulrichs to the north of it，white Foreh－ hammer snpposes both the western lieights between the Strophia and the Wirce to have been in a certain sense the Cadmeia，and the lower city to have stood eastward，between the Strophia and the lomenus． In the great difficulty of arriving nt any independ－ ent judgment upon the subject withont a personal inspection of the site，we have adopted the bypo－ thesis of Forehbammer，which seems consistent with the statements of the ancient writers．

The most interesting point in Theban topography is the position of the seven celebrated Thebangates．

 $O_{p}$ ，161）；and their vanes are given by seven diflie－ rent authors，whose statements will be more easily compared by cotasulting the following table．The numeral represents the order in which the gates are mentioned by each writer．Tbe first line gives the names of the gates，tbe second the names of the Ar－ give chiefs，the third the emblems upon their shields， and the fourth the names of the Thehan chiefs．
Nounus designates five of the gates by the names of the gods and the planeta，and to the other two，to which be gives the names of Electrae and Oncaca， he also adds their position．Hyghus calls the gates by the oames of the danghters of Aophion；and that of Ogygia alune ngrees with those in the other writers．But，dismissing the statements of Noa－ nas and Hyginas，whose suthority is of no value apon such a question，we tind that the reloaining five writers agree as to the names of all the seven gates， with two or three excoptions，which will be pwinted out presently．The position of three of the sates is quite clear from the description of Pausamias alone． These are the Electraf，Proetides，and Nea－ tak．Pausmias says that Electrae is the gate by which a traveller from Plataea enters Thehes（ix． 8．§6）；that there is a hill，on the right hand of the gate，sacred to Apollo，called the Ismenian，since the river Ismenas rons in this direction（ix．10．§2）； and that on the left hand of the gate are the ruins of a honse，where it was said that Ainphitryou lived． which is followed by an account of other ancient mo－ numents on the Cadmeia（ix．11．§ 1）．Hence it is evilent that the gate Electrae was io the south of the city，between the litls Ismenius and Cadmeia．The gate Irvetides was on the north－eastern side of the city，since it led to Chalcis（is．18．§ 1）．The gate Neitae was on the north－western side of the city，since it led to Onchestus and Delphi；and the river alieh Pansanias crossed，could have been oo other than the Dirce（ix． 25 ．§§ 1,3 ，ix． 26 ．§ 5）．The names of these three gates are the same in all the five writers：the manuscripts of Apollodorns have the corrupt word＇O O vitias，which has been altered by the editors into＇Oy ${ }^{\text {atotonas，}}$ ，iostead of N hïra，w，which was the reading suggested by Porson（ad．Eurip． Phoen．1150），and adopted by Valckenaer．（See Unger，Thebana Paradoxa，vol．i．p．313．）

Of the other four gates，the Homoloides is also the same in all the five writers，of the remaiong three Aeschylus durs not mentiun their proper names，hut specifies two by their locality，one as near the temple of Atbena Onca，and the other as the Northern gate（Boppaĩa mú入ai），and describes the lust simply as the Seventh gate．The names of these three gates are nearly the same in the other four writers，the one oear the temple of Athena Oucs being called Crenaese，and in Statios Culmina Dircaea，the Northern gate Ogygise，and the Seventh gate Hypsistae，－Euripides，Lowever，alsn giving the name of Seventh to the last－mentioned gate．

Having described tbe position of the Electrae， Proetides，and Neitac，it remains to speak of the pwation of the other four，which we shall take in the orler of Aeschylus．The fourth gate was pro－ tably situsted on the western side of the city，and was called Cremaear，becmuse it was near one of the fountaius of Dirce，now called Пapanópтt，situated upon the right bunk of the river．Near that foun－ tain was a hill，called by the Greeks üykos，wheace Athena derived the name of Onca．Accordingly Statins，in alling the fourth gate Culmina Dir－ ears，connects both the fountain and the hill．Non－ nus，who calls this gate Onc：aea，describes it at the same time as situatod towards the west．It is usually stated，on the authurity of 1Fesychius，that the Uncaean gate is the same ns the Ogygian；but this identification throws everytbing into confusion， while the change of threc letters，propused by Furch－
hammer，brings the statement of Hesychius into accordance with the other writers．（＇Oyкаs＇A0ppas
 i．e．Aesch．Sept．c．Theb．486．）

The fifth gate was called Ogygian from Ogygus， the most aocient king of Thebes，in whose time the deluge is said to have taken place．Now there is no part of Thebes more exposed to inundation than the nortl of the city between the gates Neitae and Proe－ tides，where the torrent Strophia descends into tho plain．Lere we may probably place tho Ogygian gate，which Aeschylus calls the Northern，trom its position．
The esact position of the sixth gate，called Homo－ loiles，and of the seventh，designated by its number in Aeschylus and Euripiles，but by the name of Hypsistae in the other writers，is doubtful．Forch－ hatmer maintains that these gates were in the southern part of the city，one on either side of the gate Electrae ；but none of his argunents are con－ clusive；and the position of these gates must be left nncertain．Pausamias relates that，after the victory of the Epigoni at Gilisas，some of the Thebans fled to Jomole in Thessaly；and that the gate，through which the exiles re－entered the city，when they were recailed by Thersander，was named the Ilomaluides， from Homole in Thessaly（ix．8，§§ 6，7）．Furch－ bammer thinks that it would have heen suppoed that the exiles entered the city by the same gute by which they quitted it；and as the gate leading to Glisas must have been either in the southers or

## THEBAE BOEOTIAE.

eastern side of the city, the gate Homoloides must lave been on the southern side, as the Proctides lay towards the east. But this is mere conjecture; and Leake supposes, with quite as much probability, that the Homoluides was on the north-western side of the city, since the Thebans would re-enter the city in that direction on their return from Homole.

THEBAE BOEOTIAE. 1153
The divisions of the city, and its monuments, of which Pausanias has given a full deacription, must be treated more briefly. The city, as already remarked, was divided into two parts by the torrent Strophia, of which the western half between the Strophia and the Dirce was the Cadmein, while the eastern lialf between the Strophia and the Ismentis

was the lower city ( $\dot{\eta} \kappa a ́ \tau \omega ~ \pi o ́ \lambda ı s), ~ s a i l ~ t o ~ b a v e ~$ been sudred hy Amphion and Zethns. ('aus, ix. 5. $\$ \S 2.6$.) The Cadmeia is again divided by a slight depression tear the fountain of Dirce and the Crenaean gate intu two hills. of which the larger and the higher one to the sonth wais the actopolis
 while the northern hill formed the agora of the
 §3). The eastern lialt of the city was also divided between the Strophia and the lismemus into two parts, of which the southern consisted of the bill Ismenius, and the northern of several minor eminences, known under the general name of Ampheion. ('A $\mu \phi \in \hat{o} \nu$, Arrian, Anub. i. s.) Aeschylus descrabes the tomb of Amphion as standing near the northern gate.
 'Aupionos, Sipt. c. Thel. 528.) Hence Thebes consisted of four parts, two belonging to the acropolis, and two to the lower city, the former being the acropolis proper and the agora of the acropolis, and the latter beiog the hill Ismenius and the Ampheion.

Pausanias, leaving Potnias, entered Thebes on the south by the gate Electrax, before which he noticed the Polyandrium, or tomb of the Thebans who fell fighting against Alexander. (Pans. ix. 8. §§ 3, 4, 7, is. 10. § 1.) The explanation of Forchbammer that Alesander laid siege to the city on the soath, and that he did not return from the gate Electrae to the Proetiles, as Leake supposes, seems the most probable. Accordingly the double lines of circumvallation, which the Thebans erected against the Macedomian garrisen in the Cadmeia, nust bave been to the south of the city aromnd the chief gates of the Cadmeia. (See Arrian, i. 7, 8.) Upon entering the city through the gate Electrac, lausanias notices the lill Ismerius sacred to Apollo, named from the river Ismenus floming by it (ix. 10. § 2). Upon the hill was a temple of Apollo, contrining several monuments enumerated by P'ausanias. This temple is likewise mentioned by Pindar and IIerodotus, botk of whom speak of the tripods situated in its treasury. (Pind. Pyth. xi. 7, seq.; Herod. v. 59.) Alove the Ismenium, Pausmias noticed the fountain of the Ismenus, sacred to Ares, and guarded by a dragon, the name of which fountain was Melia, as we have alreudy seen (ix. 10. § 5).

Next l'tusaniac, begioming agaia from the gate Flectrse, turns to the left and enters the Cadrocia (ix. 11. § 1 , sef.). He dues not mention the acro-p-lis by name, but it is crident from the list of the munuments which he gives that he was in the Cadmena. He eoumerates the house of Amplntryon, 1. utaining the bedehamber of Alcmena, said to hase then the work of Trophonius and Aramedes ; a mo:nmment of the children of Hereules by Megars ; the strine called Sophronister: the temple of Hercules ('Hpáк入єiov, Artian, Anab. i. 8); and, near it, н innmasium and stadium, both bearing the name of this (iod: and above the Sophronister an altar of Apello Spodius.
l'ausumias next came to the depression between the atropolis and the agora of the Cadmeria, where be notiend an altar and statue of Athena, bearing the I'henician strmame of Onga ("O $\gamma \gamma \alpha$ ), or Onca ("Orka) actording to other nuthorities, and said to have bern dedicated ly Cadmus (ix. 12. § 2). We know from Aescliylus that there was onginally a temple of Athena Unca in this Incality, wheh stuod ontside the city har one of the gates, whence the goddess was called $\dot{\alpha} \gamma \chi i \pi t o \lambda i s$. Some derived the
name from a village named Onez or Oucae. (Aesch. Sept. c. Theb. 163, 487, 501, with Schol. ; Sichol. in Euripid. Phoen. 1069 ; Steph. B. s.v. Oүкаiat; Hesych. s. v. "Oykas ; Schol. ad Pind. Ot. ii. 39, 48 ; Tzetzes, ad Lycophron. 122.5 ; Phavorinus, s.v. "Oүкаu.) Suphocles also speaks of two temples of
 Oed. Tyr. 20), in one of which, according to the Scholiast, she wis surnamed Oncaea, and in the other Ismenia. In the valley between the two hills, there are still the remains of an aqueduet, partly ander aud partly above ground, to which Dicaearchus
 àpaves $\delta \dot{a} \alpha \sigma \omega \lambda \dot{j} \nu \omega \nu \dot{a} \gamma \delta \mu \in \nu o \nu, l$. c.)

In the agora of the Cadmeia the bonse of Cadmus is said to bave stood; and in this place were shown ruins of the bedchamber of Harmonia and Semele: statues of Dionysos, of Pronomus, the celebrated musician, and of Epaminondas; a temple of Ammon; the place where Tciresias observed the flight of birds; a temple of Fortune; three wooden statnes of Aphrodite, with the surnames of Urania, Pandemus, and Apostrophia; and a temple of Demeter Thesmophorus. (Paus. ix. 12. §§ $3-5$, ix. 16 . §§ $1-5$.

Crossing the torrent Strophia, Pausatias saw near the gate Proetides the theatre with the temple of Dionysus (ix. 16. §ु 6). In this part of the eity, to which Forchhammer gives the name of Ampheion, the following monuments are mentioned by Pausanias (ix. 16. § 7, ix. 17. §\$ 1-4): roins of the honse of Lycus and a monument of Senele ; monuments of the children of Amphion; a temple of Artemis Eacleia, and, near it, statues of Apollo Boedromios and of Hermes Agoraeus; the fueeral pile ( $\pi \nu \rho \alpha_{\text {a }}$ ) of the children of Amphion, distant balf a stadium from their tombs; two statues of Athena Zosteria; and the momument of Zethus and Amphion, being a mound of earth. As the lower city was deselted in the time of Pausanias, he does not mention the agora ; but there is no doobt that it contained one, if not more, since Suphocles speaks of several agorae (Ocdl. Tyr: 20).

Outside the gate Pruetides, on the road to Chalcis, Pausauias names the monuments of Melanippus, Tydeus, and the sons of Oedipus, and 15 stadia beyond the latter the monument of Teiresias. Panasnias also mentious a tomb of Hector and ode of A sphodicus, at the fountain Oedipodeia, which is perhaps the mudern foontain of St. Theodore. Ou the same road was the village Teumessus. (Pans. is. 18, ix. 19. § 1.) After deseribing the road to Chalcis, Pausamias returas to the gate Proctides, outside which, towarls the N., was the gymoasium of lolaus, a stadian, the heroum of Iulaus, and, beyoad the stadium, the hippodrome, contaiaing the momment of Pindar (ix. 23. §§ 1, 2). Pausanias then comes th the road leading from the Ogygian or Northern gate, to Acraeplusium, after following which lie returns to the city, and enumerates the objects ontside the gate Ncitac. Here, hetween the gate and the river Dirce, were the tomb of Menoeceus, the san of Creon, and a monument marking the spor where tie two sons of Uedipus slew each other. The whole of this locality was called the Syrma ( $\sum \dot{u} p \mu \alpha$ ) of Antigone, because, being anable to carry the dead body of her brother Polynices, slo dragged it to the funcmal pile of Etcocles. On the opposite side of the Dirce were the ruins of the house of Pindar, and a temple of Dindymene (ix. 25. §§ $1-3$ ). l'ausamas then appears to have retumed to the gate Neitae and
followed the road which ran from this gate to On－ chestus．He first mentions a temple of Themis，then temples of the Fates and of Zeus Agoraeus，and，a little forther，a statne of Hercules，surnamed Rhino－ colnstes，becanse he here cut off the noses of the heralds of Orchomenus．Twenty－five stadia beyond was the grove of Demeter Cabeiria and Persephone， and 7 stadia further a temple of the Cabeiri，to the

## COIN OF THEDES．

THEGANLSSA．［Messenta，p．342，b．］
THEI＇SOA（Өeiनóa：Eth．Өeiซoárns）．1．A town of Arcadia，in the district Cynuria or Parrhasia，on the northern slope of MIt．Lycaens，called after the nymph Theisoa，one of the nurses of Zens．Its in－ habitants were removed to Megalopolis apon the foundation of the latter city．Leake places it at the castle of St．Helen abose Lavdha．Ross discovered some ancient remains N．of Andritzüna，which he conjectures may be those of Theisoa．（Paus．viii． 38．§s 3，9，viii．27．§ 4；Steph．B．s．v．；Leake， Morea，vol．ii．p． 315, I＇eloponnesiaca，p． 154 ；Ross， Reisen im Peloponnes，vol．i．p． 101 ；Boblaye， Recherches，p．151．）
2．A town of Arcadia，in the lerritory of Orcho－ menus，the inhabitants of which also removed to Megalopolis．It is mentioned along with Methy－ drium and Teuthis as belonging to the confederation （ovvré $\lambda \in i a)$ of Orelomenos．It is probably repre－ sented by the ruins near Dimilzana．（Pans．viii． 27．§§ 4，7，viii．28．§ 3；Koss，p．115．）

THEIUM，a town of Athamania in Epeirus，of nncertain site．（Liv，xuxviii．2．）

THELINE．［Arelate．］
THELPU＇SA（ $\Theta \dot{\epsilon} \lambda \pi$ тоиба，Pans，and Coins：Tì－ фova $\alpha$, Polyb．，Diod．，and Stepb．B．s．v．：Eth．Өe入－ तovioios，Te $\lambda \phi$ ovioios），a town in the west of Arcadia，
xituated upon the left or eastern bank of the river Ladon. Its territory was bounded on the north by that of Psophis, on the south by that of Heraea, on the west by the Eleia and Tisatis, and on the east by that of Cleitor, Tripolis, and Theisoa. The town is said to have derived its name from a nymph, the danghter of the river Ladon, which nymph was probably the stream flowing through the lower part of the town into the Ladod. It is fint mentioned in history in B. c. 352, when the Lacedaemonians were defeated in its neighbourbond by the Spartans. (Diod. xri. 39.) In B. C. 222 it was taken by Antigonus Doson, in the war against Cleomenes, and it is also mentioned in the campaigns of Philip. (Polyib. ii. 54, iv. $60,73,77$ : Steph. B. s. v. Té $\lambda \phi 0 v \sigma \alpha$; Plin. iv. 6. s. 20.) Its coins show that it belonged to the Achaean Leaguc. (Leake, Peloponnesiaca, p. 206.) When Pausanias visited Thelpusa, the city was nearly deserted, so that the agora, which was formerly in the centre of the city, then stood at its extremity. He saw a temple of Asclepius, and another of the twelve gods, of which the latter was nearly levelled with the ground. (Paus. viii. 25 § 3.) Padsanias also mentions two temples of some celebrity in the neighboarhood of Thelpusa, one above and the other below the city. The ore above was the temple of Demeter Eleusinia, contaioing statues of Demeter, Persephone and Dinaysus, made of stone, and which probably stood at the castle oppasite to Spathari (viii. 25. $\$ \S 2,3$ ). The temple below the city was also sacred to Demeter, whom the Thelpusians called Erinnys. This terople is alluded to by Lycophron (1038) and Callimachus ( $\mathrm{Fr}, 10 \mathrm{n}$ ). It was situated at a place called Onceium, where Oncus, the son of Apnllo, is sail once to have reigned
 this temple stood the temple of Apollo Oncaeates, on the left baok of the Ladon, and on the right bank that of the boy Asclepins, with the sepolchre of Trygon, said to have been the nurse of Asclepius (viii. 25. § 11). The ruins of Thelpusa stand upon the slope of a considerable hill near the village of Vanena (Báveva). There are only few traces of the walls of the city. At the ruined church of St. John, near the rivulet, are some Hellenic foondations and fragments of columns. The saint is probably the successor of Asclepins, whese temple, as we learn from Pausanias, stood longest in the city. There are likemise the remains of a Roman bnilding, about 12 yards long and 6 wide, with the ruins of an arched mof. There are also near the Ladon some Hellemic foundations, and the lower parts of six columns. Below Janena there stands upon the right bank of the Ladon the rained charch of St. Athanasius the Miraculous, where Leake found the remains of several columns. H.lf a mile below this church is the village of Tumbiki, where a promontory projects into the river, upoo which there is a mound apparently artificial. This mound is probably the tomb of Trygon, and Tumbiki is the site of the the temple of Asclepius.

Pratsinias, in describing the route from Psophis

COIN OF THELITSA.
to Thelpusa, after mentioning the boundaries between the territories of the two states [Psorns], first crosses the river Arsen, and then, at the distance of 25 stadia, arrives at the ruins of a village Caus and a temple of Asclepins Causius, erected upon the roadside. From this place the distance to Thelpusa was 40 stadia. (Leake, Morea, vol. ii. pp. 97, seq., 250, seq., Peloponnesiaca, pp. 205, 222, 228 ; Boblaye, Recherches, f'c. p. 152; Ross, Reisen im Peloponnes. p. 111; Curtius, Peloponnesos, vol. i. p. $370, \mathrm{seq}$.)

THELUTHA, a fortress situated on an island in the Euphrates. It is mentioned by Ammianus (xxiv. 2), who states that it was nsed as a treasury by the Persians. It is unquestionably the same as the Thilabas of Isidorus (Stathm. Parth. 1), who gives a similar description of it, and places it at no great distance from another island in the same river, Anatho. Zosimus, speakiog of the same region, nutices a fortified island, which he calls $\phi$ pouprov ©xvpítatov (iii. 15) ; probably the same place. It is doubtless represented now by an island which Colonel Chesney calls Telbes, Tillous, or Anatelbes (i. p. 53 and Map.).
[V.]
THEMEOTAE ( $\Theta \mu \epsilon \bar{\omega} \tau \alpha$, Ptol. v. 9. § 17), a people of Asiatic Sarmatia.
[T. H. D.]
THEMMA. [Tema].
THEMISCY'RA (Өemiokvpa), a plain in the north of Pontus, about the moaths of the rivers Iris and Tbermodon, was a rich and beautiful district, ever verdant, and supplying food for namberless herds of osen and horses. It also prodaced great abundance of grain, especially parinick and millet ; and the sonthern parts near tha mountains furnished a variety of fruits, such as grapes, apples, pears, and outs io such quantities that they were soffered to waste on the trees. (Strab. ii. p. 126, sii. p. 547, foll.; Aesclysl. Prom. 722 ; comp. Apollod. ii. 5 ; Apollon. Rbind. ii. $3 \pi 0$; Plin. vi. 3 , sxiv. 102.) Mythology describes this plaid as the oative country of the Amazons.
A Greek town of the name of Themiscyra, at a little distance from the casst and near the mouth of the Thermodon, is mentioned as early as the time of Herodotus (iv. 86 ; comp. Scylax, p. 33; Pros. i. 2. § 1). Ptolemy (v.6.§3) is undoubtedly mistaken in placing it further west, midway between the Iris and Cape Heraclium. Scglax calls it a Greek town; but Diodorus (ii. 44) states that it was built by the founder of the kingdom of the Amazons. After the retreat of Mithridates from Cyzicus, Themiseyra was besieged by Lucullus. The iohabitants on that occasion defended themselves with great valour; and when their walls were andennined, they seat bears and other wild beasts, and even swarms of bees, against the workmen of Lucullus (Appian, Mithrid. 78). But notwitbstanding their gallant defence, the town seems to have perished on that occasion, for Mela speaks of it as no longer existing (i. 19), and Strabo does not mention it at all. (Comp. Anon. Teripl. P. E. p. 11; Steph. B. 6. v. Xadıola.) Some supyase that the town of Thermeh, at the mouth of the Thermodon, marks the site of ancieot Themiscyra; but IIamilton (Researches, i. p. 283) justly observes that it must have been situated a little further inland. Ruins of the place do not appear to exist, for those which Texier regards as indicating the site of Theniscera, at a distance of two days' joarney from the Halys, on the borders of Galatia, cannot possilly have belonged to it, but are in all probability the remains of Tavium.
[L. S.]

## THEMISONIUY

 a towo of Phrygia, near the borders of Yisidia, whence in later times it was regarded as a town of Pisidia. (Strab. xii. p. 576 ; Paus. x. 32; P'tal. v. $2 . \S 26$; Steph. B. s. v.; Plin. v. 29 ; Hierocl. p. 674 ; Geogr. Rav. i. 18.) Pausanias relates that the Themisonians showed a cave, about 30 stadia from their town, in which, on the advice of Heracles, Apollo, and Hermes, they had concealed their wives and children during an invasion of the Celts, aad in which afterwards they set up statues of these divinities. According to the Peuting. Table, Themisonium was 34 miles frem Laodiceia. Arundell (Discoveries, ii. p. 136), grided by a coin of the place, fixes its site on the river Azanes, and believes the ruins at Kai Hissar to be those of Themisoniom; but Kiepert (in Franz's Fuinf Inschriften, p. 29) thinks that the ruins of Kisel Hissar, which Arundell takes to mark the site of Cibyra, are those of Themisonium.
[L. S.]
THENAE ( $e$ evai, Callim. in Jov. 42; Steph. B. 6. $v$. 'O $\mu \phi a ́ \lambda(o v)$, a town of Crete close on the Omphalian plain, and near Cnossus. If not on the very site it must have been close to the Castello Temenos of the Venetians, which was beilt A. D. 961, when the Cretans, uoder their Saracenic leaders, were vanquished by Nicephorus Phocas ard the forces of the Byzantive emperor. (Pashley, Travels, vol. i. p. 224 ; comp. Fidiny, Byzantine Enpire, vol. i. p. 377 ; Gibbon. c, lii.)
[E. B. J.]
THENAE (Єeval), a maritime city of Byzacium in Africa Proper, at the mouth of a small river which fell into the Syrtis Minor, and 216 miles SE. of Carthage. (Plin, v. 4. 8. 3.) By Strato it is called î Đéva (xvii, p. 831), and by Ptolemy Đaiva, or Өéaivar (i. 15. § 2, iv, 3. § 11). At a later period it became a Roman colony with the name of Aelia Angusta Mercarialis (Gruter, Inscr. p. 363; cf. Itin. Ant. p. 59, also pp. 46, 47, 48, 57). Now Thaini, or Teny.
[T. H. D.]

## THEODORIAS. [Vacca.]

THEODOROPOLIS ( $\Theta \epsilon \omega \delta \omega p \delta \pi 0 \lambda \iota s$, Procop, de Aed. iv. 6, 7), a town of Dloesia Ioferior, fouoded by the emperor Justinian.
[T. H. D.]
THEODO'SIA ( Өeoסe $\sigma$ ia, Ptol. iii. 6. § 3), a flourishing colony of the Milesiaas, on the ceast of the Chersonesus Taurica, in European Sarmatia, with a harbour capable of containing 100 ships. (Strab. vii. 309; Arrian, Per. P. Eux. p. 20.) In the dialect of the natives, it was called Ardabda ('Apסdeboa, Anon. Per. P. Eux. p. 5), which is said to bave signified, in the dialect of the Taurians, "seven gods" (Pallas, i. p. 416), and at a later period Kapha (Kd́ $\phi$ a, Const. Porphyr. de Adm. Imp. c. 53); whilst by the Geogr. Rav. (iv. 3, v. 11) we find it named Theodosiopolis. It enjoyed an extensive commerce, particularly in corn (Dem. adv. Lept. p. 255), but appears to have been ruined before the age of Arrian, in the beginning of the second centory. (Arrian, l. c.) Yet it continues to be meationed by later writers (Polyaen, v. 23; Amm. Marc. xxii. 8. § 36; Oros. i. 2; Stepb. B. s. v. \&c.) Yet we should not, perhaps, allow these writers much aotherity; at all events the very name of the Dilesian coleny appears to have vaoished in the time of the emperor Constantine Porphyrogenitus, under whom the site on which it stood was already called Kaffoo (de Adm. Inip, c. 43 ; cf. Neumann, Die Hellenen im Skythenlande, p. 469.) Clarke imagined that he had discovered its ruins at Stare Crim, where there are still sume magnificent remains of a

THERA.
Grcek city (Trar. ii. p. 154, sq.; cf. p. 150 and note): but the mare general, and perhaps better fouoded opinion is, that it stood, near its namesake, the unodern Caffa or Theodosia. (Cf. Raoul-Rochette, Ant. du Bosp. Cimm. p. 30; Dobuis, v. p. 280.) For coins and inscriptions, see Kübler, Nov. Act. Acad. Petrop. xiv. p. 122, and Mèm. de St. Petcrsb. ix. p. 649, sq.; Clarke, Trav. ii. 148, sq. [T.H. D.]

THEODOSIO'POLIS (also called Arma), a town in the SE. of Thrace, on the road fiom Cypsela to Byzantium, a short distance to the E. of the suurce of the river Dlelas. Ammianus (xxvii. 4. § 12) mentions it by the latter name as one of the two chiel towns of Earopa, the designation in his time of tha SE. division of Thrace.
[J.R.]
THEODOSIO'POLIS ( $\Theta \in 0 \delta 0 \sigma \omega 6 \pi \pi 0 \lambda t s$, Procop de Aed. iii. 5), a city in Armenia Major, founded by Theodosius II. to keep the Armenians in subjection It was ealarged by the emperor Anastasius, and its fortifications were much strengthened by Justinian. (Precop, B. P. i. 10.) It lay S. of the Arases and 42 stadia S. of the moontain in which the Euphrates rises, the present Bingül. (Id. Ib. 17; cf. Ritter, Erdk. x. p. 79, seq.) Theodosiopolis enjoyed an extensive commerce. (Const. Porphyr. de $A d m$. Imp. 45.) S me writers identify it with Arzeroum (Ritter, Ib. pp. 80, 271, seq. ; Zeune, p. 431) ; but according to D'Anville (Geogr. Anc. ii. p. 99, sq.) it lay 35 miles E. of that place. (Cf. Chardin, ii. p. 173, sq.; Hamilton, Asia Minor, \&e. i. p. 178; Githen, Decline and Fall, iv. p. 168, ed. Smith.)
[T. H. D.]
THEODOSIOPOLIS, in Mysia. [PERperena.]
THEON OCHEMA. [Liaya, p. 179, t.]
THEOPHA'NIUS (Өєoфánios, Ptol. จ. 9. § 3), a river of Astatic Sarmatia, which fell into the Palus Maeotis, betweea the greater and less Rbombites. (Cf. Amm. Marc. xxii. 8. § 29.) [T. H. D.]

THEO'POLIS. This place in Gallia, with a pure Greek name, was near Sisteron, in the department of Basses-Alpes, on the left bank of the Druentia (Durance). An iescription cat on the slope of a reck in honsur of Dardaous, praefect of the Praetorium of Gallia in the time of Honcrius, and in bovour of his mother, informs us that they made a road for this towo by cutting hoth sides of the mountains, and they gave it walls and gates. The place is still called Theorux, and there are said to be remains there. (D'Auville, Nutice, \&c) [G. L.]

THERA (@hipa, Ion. ©ríp : Eth. ©ŋpaĩos: Sartorin), an island in the Aegaean sea, and the chief of the Sporades, is described by Strabe as 200 stadia in circumference, opposite the Cretao island of Dia, and 700 stadia from Crete itself. (Strab. x. p. 484.) Pliny places Thera 25 Roman miles S. of lus (iv. 12. s. 23). Thera is said to bave been formed by a clod of earth thrown from the ship Argo, to have received the name of Calliste, when it first emerged from the sea, and to have heea first inhabited by the Phoenicians, who were left there by Cadmus. Eight generations afterwards it was colonised by Lacedaemonians and Minyae under the guidance of the Spartan Theras, the sun of Aotesion, who gave his name to the island. (Herod. iv. I47, seq.; Pind. Pyth. iv. 457; Callin. ap. Strah. viii. p. 347, x. p. 484 ; Apoll. Rhod. iv. 1762 ; Paus. ini. 1. $\S 7$, iii. 15. $\S 6$, vii. 2. § 2.) Its only importance in history is owing to its being the mothercity of Cyrene in Africa, which was founded by Battus of Thera io n.c. 631. (Herod. iv. 150, seq.) At this time Thera cuntained sevea distuicts
( $\chi$ w̄pos, Herod. iv. 153.) Ptolemy (iii. 15. § 26) las preserved the names of two places, lileasin or Eleusis, and Oen; and a third, called Melamae, oceurs in an inseription. (Bückh, Inscr. no. 2448.) Lake Meles, Thera sided with the Lacolaemonians at the commencement of the P'eloponnesian War (Thuc. ii. 9), but of its subsequent history we have no information.
Thera and the surrounding islands are remarkable as baving been the scene of active volcanic operations in ancient as well as in modern times. In consequence of the survey made by command of the English Admiralty, we now possess precise information respecting these islands, the result of whicb, with additional particulars, is given by Lieutenant Leycester in a paper published in the Journal of the Royal Geograplical Society, from which the following account is chiefly taken. Thera, now called Santorin, the largest of the group, lias been likened in form to a hurse-shoe; but a crescent with its two points elongated towards the west would be a more exact description. The distance round the inner curve is 12 miles, and round the outer 18 , making the coast-line of the whole island 30 miles: its breadth is in mo part more than 3 niles. Opposite to Thera westward is Therasia, which still bears the same name. (Sitrab. i. p. 57, v. p. 484 ; Steph. B. s. v. Empaaia; l'tul, iii. 15. § 28 ; Plin. ii. 87 . s. 89, iv. 12. s. 70.) Its circuit is $7 \frac{1}{2}$ miles, its length from N . to S. ahout $2 \frac{1}{2}$ miles, and its breadth a mile. Aboat $1_{4}^{3}$ mile S. of Therasia, lies Aspruaisi, or White l-and, only a mile io circuit, and so called from being capped with a deep layer of pazzolana; the name of this island is not mentioned by the ancient writers. These three islands, Thera, Therasia, and Aspronisi, enclose an expanse of water nearly 18 mules in cireumference, which is in reality the crater of a great volcano. The islands were originally united, and were sulsequently separated by the eruption of the crater. In the centre of this basin tlaree volcanic mountains rise, known by the name of Kammini or the Burnt, (кацц' $\nu \eta$, i. e, каขцє́v $\eta$ instead of кєкаข́цєv $)$, and distinguished as the Puluea or OHd, the Nea or New, and the Mikera or Little. It was formerly asserted that the basin was untathomable, but its depth and shape have been clearly ascertained by the soundings of the English Survey. Supposing the basin could be drained, a gigantic bowl-shayed cavity would appear, with walls 2449 feet high in some places, and uowhere less than 1200 feet ligh, while the Kammenis would be seen to torm in the centre a huge mountain $5 \frac{1}{2}$ miles in circumference with three summits, the Palaea Kamméni, the Nea Kummini, and the 1 ikrra Kamméni, rising severally from the bottom of the abyss to the height of 1606,1629 , and 1550 feet. The rim of the great crater thus exposed wonld appear in all parts unhroken, except at the northern puiut between Thera and Therasia, where there is a clasm or door into the crater abont a mile in width, and 1170 feet in depth midway between the two islands. (Sce Map, B.) If we now supiose the waters of the Acgacan let in, the edges of the crater, furming the inner curve of Thera and Therasia, rise above the sea from the height of 500 to 1200 feet, and present frightitful precipices, of the colour of iron druss, except where their summits are capped with a deep layer of paze \%ulama. The I'aluen Kammeni is 328 feet above the water; the Nua Kummini 351 feot; and the Nikra Kamméni 222 feet.

## THERA.

Thera, Therasia, and Aspronisi are all composed of volcanic matter, except the southern part of Thera, which contains Mount Elias, of linestone formation, the peak of which rises 1887 feet abore the level of the sea, and is the highest land in the island. This mountain must have been originally a submarise emituence in the bed of the Mediterranean before the volcanic cone was furmed (Lyell, Principles of Geology, p. 445, 9th ed).

The first appearance of the three Kammenis belongs to historical times, and has been narrated by several writers. The Nea Kamméni, which is the largest of the group, did not emerge till the year 1707 ; but the other two were thrown up in ancient times. The exact time of their appearance, bowever, is differently related, and it is difficult, and in some cases impossible, to reconcile the confficting statements of ancient writers upon the subject. It appears certain that the oldest of these isjands is the most southerly one, still called the Palaea or Old Kamméni. it burst out of the sea in E. c. 197, and received the name of Hiera, a name fiequently given in antiquity to volcanic mountains. This fact is stated by Eusebius, Justin, Strabo, and Platarch. It is related by Strabo tbat flames burst out of the sea for four days, and that an islaud was formed I2 stadia or $1 \frac{1}{2}$ English mile in circunference. (Euseb. Chron. p. 144, Olymp. 145. 4; Justin, xxx. 4; Strab, i. p. 57; 1'lut. de Fyth. Or. 11. p. 399.) The unanimous statement of these four writers is, however, at variance with that of Pliny (ii. 87. s, 89), who says "that in the 4th year of the 135th Olympiad [v. c. 237] there arose Thera and Therasia; between tbese islands, 130 years later [s. c. 107], Hiera, also called Antomate; and 2 stadia from the latter, 110 years [A. D. 3] afterwards, in the consulship of M. Junins Silanus and L. Balbus, on the Sth of July, This." In another passage he says (iv. 12. s. 23): "Thera, when it first emerged from the sea, was called Calliste. Therasia was afterwawds torn away from it; between the two there presently arose Antomate, also called Iliera; and in our age Thia near Hiera." Seneca refers apparently to the events mentioned by Pliny, when he states ( $Q u$. Nat. ii. 26), upon the anthority of Posidonius, that an island arose in the Aegaean sea " in the memory of our ancestors" (majormm nostrorum memorin), and that the same thing happened a second time " in our monory" (nostra memoria) in the consulship of VaJerius Asiaticus [A. D. 46]. (Comp. Qu. Nat. vi.21.)

According to the preceding statements there would lave been tive different eruptions of islands in the -pace of little more than 200 years. First Thera and Therrsia themselves pppeared in E. c. 237, nccording to Plioy; secondly Hiera, according to Eusehius, Justin, Strabo, and Plutarch, in B. c. 197; thirdly Hiera or Automate, according to Pliny, 130 years later than the first occurrence, consequently in B. C. 107; fourthly, according to Pliny, 110 years afterwards, Thia, that is in A. D. 3; fifthly, according to Seneca and other writers, who will be montioned presently, an island in the reign of the omperor Clandias, A. Is. 46.

Now it is evident that there is some gross error in the test of lliny, or that he has made use of hin authorities with a carelesspess which is not unusual with him. The most surprising thing is, that he has omitted the eruptions of the islands in B.C. 197 and A.D. 46, which are guaranteed by several authorities. Ilis statement that Thera and Theracia first appeared in the 4 th yenr of the 135th Olympiad,

## THERA.

i. e. B. c. 237 , is absurd, as they are mentioned by Callinus and Herodotus, and must have existed even long before the time of those writers; but if we suppose a slight error in the numerals in the text of Pliuy (reading "Olympiadis exxxxy anno quarto" instead of "Olympiadis exxxy anno quarto"), we have the very year (b.c. 197) io which Ensebius and Justin place the appearaoce of Hiera. There can be little doubt, therefore, that Pliny's authorities referred to this event, and that it was only tbrough carelessness that he spoke of the appearance of Thera and Therasia in that year. Thus the first statement of Pliny may be reconciled with the accounts of Eusebius, Justin, aod the other writers. The appearance of the second island, to which he falsely transfers the name of Hiera from the earlier occurrence, must be placed in B.c. 67 , according to the corrected chronology. This island no longer exists; and it must therefore either have heen throwu up and disappeured again immediately, as was the case

TIIERA.
in the eruption of 1650 , or it was simply an addition to the ancient Iliera, of which there are some instances at a later periody It is apparently to this eruption that the statement of Posidonius quoted by Seneca, refers. Thie last statement of Pliny that a sew island, named Thia, was thrown up 2 stadia from Thia in the consulship of M. Junius Silamus and L. Balbus, on the sth of July, is so exact that it seems hardly possible to reject it; but here again is au error in the date. If we take the numbers as they stand, this event would bave happened in A.1. 3, ur, according to the corrected numbers, in A. D. 4.3, whereas we know that M. Junius Silazus and L. Ballus were cousuls in A.D. 19. No other writer, however, speaks of an eruption of an island in this year, which, if it actually happened, must again have disappeared. Moreover, it is strange that Pliny should have passed over the eruption of the real Thin, or Mikra Kiannèni, which oceurred in his lifetime, in the consulship of Valerius Asiaticus, and in

A. Shoal formed hy the submarine voltanic eruption in 1650.

1.. Meromothl.
M. Epanomeria.
N. C. Kolumbo,
the reign of Clandius, A.1. 46. This ever, with the differenco of only a single ye.ur, is mentioned by several writers. (Sinec. Gu, Xut. ii. 26, vi. 2t; Dum Cass. 1x. 29; Aure. Virt. Cuns. 4, Eppit. 4; Oros. vii. 6; Amm. Mare. svii. 7; (ieorg. Cedren. i. 1. 197, ed. P'ar.) Joreover Pliny himself, in another passure (iv. 12. b. 23), says that Thia appeared in our age (" m nustro sero"), which can hardly apply to the consulship of Silanus and Balbus, since be was nut born till A.1. 23.

In A. D. $\boldsymbol{i 2 6}$, during the reign of leo the isaurian, Itwera, or the $I^{\prime}$ 'tlaea $K$ 'mmemi, received an augmentation on the NE. side. (Theoph. Chromogr. p. 338, ed. Paris; Celren. i. p. 454 , ed. E'aris.; Nieephor. p. $3^{-}$, ed. l'ar.) There have been several eraptions in modern thnes, of which a full account is given by Lient. Leycester and Russ. Or theae one of the most mumptant was in 1573, when the Mdira Kamméni is said to have been formet. But as we have already seen from several authorities that an island was forned in the reign of Clandins, 1.11 . 46 , we must suppose cither that the last-mentioned island sumk mto the sca at some unknown perind, and made its appearance a second time as the Mikra Kamment in 1573. or that there was only th augmentation of the Mikra Kommeni in this year. The latter supposition is the more probable, especially since Father Riclard, who records it, was nut an eye-witness, but derived his informatiou from old people in the island. There was another terrible eruption in 1650 , which Father lichard himself saw. It broke out at an entirely different sput from all preceding eruptions, outside the gulf, off the NL. coast of Thera, athout $3 \frac{1}{2}$ miles from $C$. Kulumbon, in the directiou ut los and Anydros. Thits sobmarme outbreak lasted abont three months, covering the sea with pumice, and giving rise to a shoal, which was foand by the Figlish survey to have 10 fathoms water over it. (See map, A.) At the same time the island of Thera was viukntly shaken by earthquakes, io which nuny honses were overthrown, and a great number of persons and amimals were killed by the pestilential vaponrs emitted from the voleano. The sea inundated the flat eastern coast of the island to the extent of two Italian miles inland. The ruins of t wo amient tuwns at P'erissa and Kemari were disinterred, the existente of which was meviously unknown, and which must have heen overwhelmed by some previous -1uphon of vateatic mater. The raad also, which then existed round C'ape Vessa-1ouno, was sunk foneath tle waters.

For the next 50 yeans, or a little longer, the volcanie fires slept, but in 1707 they burst forth with redonbled tury, and produced the lingest of the three intrut islands, tiec. Nea Komméni. It orignally con.hated of two islands. The first which rowe was ralled the White lalaud, onnpused of a mass of putnice extremily porous. A few days aftetwards there appeared a large chain of dark rocks, eomposet of brown tradhyte, to which the name of the Black lsland was given. These two islands were gradually unted; and in the course of the cornptions, the blank rocks becaut, the centre of the actual island, the Nor Kiammini. The White Inhand was first seen on the 23rd of May, 1707, and for a year the distharges of the voliano were incessant. After this the the eruptions were less frequent; but they cornthmed to oreur at mtervals in 1710 and 1711 ; anul It was not till $1: 12$ that the tires of the volcano towame extinct. The ijland is now about $2 \frac{1}{2}$ males It circuit, and hats a perlect cone at its SE. side,
which is 351 feet bigh. From 1712 down to the present day there has been no further eruption.

There are several thermal and unineral springs at Thera and the surrounding islands, of which Lieut. Leycester gives an account, and which are more fully described by Laderer in the treatise entitled
 Athens, 1835. The must impurtant are the iron springs in a bay on the SE. side of Nea Kanmeni. There are springs on the NE. sile of Palaea Kamméni, likewise near C'ape Exomiti in the south of Thera, und at other places. Fresh water springs are very rare at Thera, and are only found round Mount Elias springing from the limestone. The inhabitants depend for their supply of water upos the rain whieb they catch in the tanks during the winter.

The prineipal modern town of the island is nom called Thera, or Phira, and is situated in the centre of the curve of the gult. When Tournefort visited Thera, the capital stoud apon the promontory Skaro, a little to the $N$. of the present cupital, and immediately under the town of Merovouli. The promnontory Skaro projects about one third of a mile into the sea; and njon it are the remains of a castle built by the dukes of Naxos. The chief town in the island, after the capital, is Epanomeria, on the NII: promontory, and directly opposite to Tberasia. As space is of the utmost value in this sumall island, all the principal towns are built upon the very edge of the cliffs, and present a very singular appearance, perched in some cases more than 900 teet above the sea. Wood being very scarce, the houses are escavated in the face of the vast beds of pozzolana, In nrder to make approuches to the towns upon the eliffs, the inbabitants lave ent zig-zaq stairs or roads in the sides of the precipices. The road upon the summit runs along the eigge of the precipices, and, in many cases, over the labitations, which are bualt in the face of them. The population of the island in 18.48 was about 14,000 , and, including Therasia, about 14,380 . In the time of Tounnefort there were 10,000 inhabitants, so that the inerease has been nearly a third in abont 150 years. The island is carefully cultivated ; and the chief production is wine, which is mostly exported to the Russian ponts in the Black Sea.

The sutiquities of the island lave been explained at leogth by Ross and Lieut, Leycester. There are remains of an ancient city situated on the SE. point of the ishand, upon the summit of Messa- Jouno, a mountain about 1100 teet above the level of the sea, connerted with Mount Elius by the ridge of the Sillada. The mountain of Messa- Jonno slopes snddenly off to the precipices on the NE. side, which rise perpendicularly 600 feet above the water and form the cape of the same name. The walls exlibit masonry of all ages, from the most ancient Cyclopean to the regular masomy of later times. The walls may still be traced, and enclose a circuit of only seven-tenths of a mile: but the houses appear to have been built terrace-fashion upon the side of the hill. Several inscriptions, fracments of sculpture, and other autiqnities, have been discovered bereThe name of this city has been a subject of some dispute. Iatan inscription found helow Messa- Iouno, at Kamari, in the church of St. Nicholas, the name Oex occurs, which, as we bave already scen, is one of the two tornns mentioned by P'tuleny. But iu an inscription upon some steps eut out of the rock of Messa-Vouno we find ©hipa móגıs. Ross, however, docs not consider this to be a proof that

Thera was tho name of the city, sapposing that wóds here signifies only the political commonity of the Theracans. On the other band, it was so osual for the islands of the Aegaean to possess a capital of the same name, that, taken in connection with the inscription last mentioned, it is probable, either that Ptolomy has accidentally omitted the name of the capital, or that in bis time the Theraeans had removed from the loftysite at Messa- Youno to Oea upon the sea-coast at Kanari, where snbmarine ruins still exist. Upon the other or S . side of the Cape MessaVouno, at Perisse, there are alsoso many ancient remains as to lead us to suppose that this was the site of an ancient city, but no inscription has been discovered to give a clue to its name. Upon either side of the mountain of Messa- Youno there are numerous tomhs.
South of Perissa is C. Exomiti, and a little to the N . of this cape there are the remains of an ancient city, which is probably the Eleusis of Ptoleny. Here are the ruins of a mole under water, and upon the side of the monotain many curious tombs. There are likewise some ruins and tombs at $C$. Kolumbo, in the NE. of the island, which Ross conjectnres may be the site of Melaenae. The island of Therasia possessed a town of the same name (Ptol. iii. 15. § 28), the ruins of which were discovered by Ross opposite Epunomeria in Thera. (Besides the earlier writers, snch as Tournefort and others, the reader is particnlarly referred to Ross, Reisen auf den Griechischen Inseln, vol. i. pp. 53, seq., 86, seq., 180, seq. ; and Lieut. Leycester, Some Account of the Volcanic Group of Santorin or Thera, in the Journal of the Royal Geogroplical Suciety, vol. $\mathrm{xx} . \mathrm{p} .1$, seq.)

THERAMBOS or THRAMBUS ( $\Theta \epsilon \rho \alpha ́ \mu 6 \omega s$,
 Scylax, p. 26; ©pau6ou⿱ía סeipás, Ly cophr. 1404), a town of the peninsula Pallene, in Clalcidice in Macedonia, is called a promontory by Stepbanns B., and is heace supposed by Leake (Northern Greece, vol. iii. p. 156) to have occupied a position very near the promontory Canastraeum, the most southerly puint of Pallene; bnt from the order of the names in Scylax we would rather place it at the promontory opon the western side of the peninsula, called Posidium by Thucydides (iv. 129).

THERANDA, a town of Moesia, now Trenonitza (Geogr. Rav. iv. 15; Tab. Peut.). [T. H. D.]

THERAPNAE ( Єєра́ $\quad \nu \alpha a:$ : Eth. ©epanvaios), a place io the territory of Thebes, between this city and the Asopus. (Eurip. Bacch. 1029; Strab. ix. p. 409; Leake, Northern Greece, vol. ii. p. 369.)

## THERAPNE. [Sfarta, p. 1029, b.]

THERA'SIA. [ThERA.]
THERIO'DES SINUS (empí́óns кó $\lambda \pi$ тs, Ptol. vii. 3. § 2), a gulf on the coast of the Sinae, between the promontories Notinm (Nóriov), and Satyron (इarópov). Perlaps the golf of Tonkin, or that between the Cape St. James and the river of Camporlja.
[T. H. D.]
Therdia. [Thessalonica.]
THERMAE (@éppat) was the name of two cities in Sicily, both of which derived their name from their pasition in the neighbourhood of hot springs.

1. The northern Thermae, sometimes called for distinction's sake Theramae Himerenses (now Termini), was situated on the N. coast of the island, in the immediate neighbourbood of the more ancient city of Himera, to the place of which it may be consudered as succeeding. Hence its history is given in the article Hinera.
2. The zouthern Thermae, or Thersake Selinuntlae (Sciacca), was sitnated co the SW. coast of the island, and, as its name imports, within the ter itory of Selinus, though at a distance of 20 miles from that city in the direction of Agrigentum. Tbere can he no donbt that it occupied the same site as the modern town of Sciacca, about midway between the site of Solinus and the month of the river Halycus (Platani), where there still exist sulphureons waters, which are in constant nse. (Suyth's Sicily, p. 217 ; Cluver, Sicil. p. 223.) We have do account of the existence of a town of the site during the period of the independence of Sclinus, though there is little donbt that the thernoal waters wonld always have attracted some population to the spot. Nor even under the Romans did the place attain to anything like the same importance with the northern Thermae; and there is little donbt that Pliny is mistaken in assiguing the rank of a colonia to the southern instead of the northern town of the name. [Himera.] Straho mentions the waters ( $\tau \dot{a}$ ubata тà $\Sigma_{\in \lambda}$.voúvtia, Strah. vi. p. 275); and they are again noticed in the Itincraries under the bame of Aquae Labodes or Labrodes (Itin. Ant. p. 89 ; Tab. Peut.)
[E. H. B.]
THERMAICUS SINUS. [Thessalonica.]
THERMO'DON ( $\Theta \rho \mu \omega \dot{0} 0 \omega \nu$ : Thermeh), a river of Pontns, celebrated in the story abont the Amazons, is described by Pling (vi. 3) as having its sources in the Amazonian mountains, which are not mentioned by any other ancient writer, but are believed still to retain their ancient name in the form of Mason Dagh. (Hamilton, Rescarches, i. p. 283.) Straho (xii. p. 547) places its many sources near Phanaroea, and says that many streauns combine to form the Thermodon. Its course is not very loug, but its breadth was nevertheless three plethra, ard it was a navigable river (Xen. Anab. v. 6. § 9, vi. 2. § 1 ; Arrian, Peripl. P.E. p. 16.) It discharged itself into the Euxine dear the town of Themiscyra, at a distance of 400 stadia to the north-east of the month of the Iris. This river is very oftea noticed by aocient writers, See Aeschyl. Prom. 274, Suppl. 290; Herod. ix. 27: Scylax, p. 33; Strab. i. p. 52, vii. p. 298 ; Anon. Peripl. P. E. p. 10 ; Ptol. v. 6. §4; Pomp. Mela, i. 19 ; Plin. xi. 19, xxxvii. 37 ; Virg. Aen. xi. 659; Oc. ex Pont. iv. 19. 51 ; Propert. iv. 4. 71, add many other passages. [L.S.]

THERMO'PYLAE (Өєp $\frac{1}{2} \boldsymbol{\pi} \dot{\lambda} \lambda a t$ ), or simply PYLAE (Hú入at), that is, the Hot Gates or the Gates, a celebrated narrow pass, leading from Thessaly into Locris, and the only road by which an enemy can penetrate from northern into sonihern Greece. It lay between Monnt Oeta and an inaccessible morass, forming the edge of the Maliac guli. In consequence of the clange in the conrse of the rivers, and in the configuration of the coast, this pass is now very different from its condition in ancient times; and it is therefore necessary first to give the statement of Herodotas and other abcient writers resjecting the locality, ado theo to compare it with its present state. In the time of Herodotus the river Spercheing flowed into the sea in an easterly dircction at the town of Anticyra, considerably W. of the pass. Twenty stadia E. of the Spercheius was another river, called Dyras, and again, 20 stadia further, a third river, named Melas, 5 stadia from which was the city Trachis. Between the mountains where Trachis stands and the sea the plain is widest. Still further E. was the Asopus, issuing from a rocky gorge ( $\hat{\sigma} \cdot a \sigma \phi \dot{\beta} 5$ ),
and E. acain is a small strean, named Pheenix, flowing into the Asopus. From the Ploenis to Thernopylae the distance, Merodutns says, is 15 stadia. (llerod, vii. 198-200.) Near the united streans of the Phoenis and the Asopus, Mt. Oeta approached so close to the morass of the gulf as to leave space for only a single carriage. In the immediate ricinity of the pass is the town of Anthela, celebrated for the temples of Amphictyon nnd of the Amphictyonic Demeter, containing seats for the members of the Amphicytonic conocil, who held bere their autumnal meetings. At Anthela Monnt Geta recedes a little from the sea, leaviog a plain a little more than half a mile in breadth, but again contracts near Alpeni, the first town of the Locrians, where the space is again only sufficient for a single carriage. At this pass were seme hot springs, which were consecrated to Hercules (Strab. ix. p. 428), and were called by the natives Chytri or the Pans, on account of the cells here prepared for the bathers. Across this pass the Phocians had in ancient times built a wall to defend their conatry agaiost the attacks of the Thessalians, avd had let loose the hot water, so as to render the pass impracticable. (Herod. vii. 200, 176.) It appears from this description that the proper Thermopylae was the narrow pass near the Locrian town of Alpeni; but the name was also applied in general to the whole passage from the mouth of the Asopas to Alpeni. Taking the term in this acceptation, Thermopylae consisted of the two narrow openings, with a plain between them rather more than a mile ia length and about half a mile io breadth. That portion of Mt. Oeta, which rises immediately above Thermopylae is called Callidromon by Livy and Strabe, but both writers are mistakea in describing it as the highest part of the range. Livy says that the pass is 60 stadia in breadth. (Liv. xxxvi. 15 ; Strab. ix. p. 428.)

In conseqnence of the accumnlation of soil bronght down by the Spercheins and the other rivers, tbree or four miles of new land have bern formed, and the mouatain forming the gates of Thermopylae is no longer close to the sea. Moreover, the Spercheius, instead of flowing into the sea io an easterly directivo, considerably W. of Thermopylae, now continnes its course parallel to the pass and at the distance of a mile from it, falling into the sea lower down, to the E. of the pass. The rivers Dyras, Melas, and Asopns, which tormerly reached the sea by different mouths, now discharge their waters into the Spercheius. In addition to this there has been a copious deposit from the warm springs, and a consequent formation of netv soil in the pass itself. The present condition of the pass has been described by Colonel Leake with his usual clearness and accuracy. Upon enteriog the western opening, Leake crossed a stream of warm mineral water, ruoning with great rapidity towards the Spercbeins, and leaving a great quantity of red deposit. This is undonbtedly the Plwenix, which probatly derived its name from the colonr of the sediment. After crossing a seend salt-spring, which is the source of the l'hoenix, and a stream of cold sait water, Leake enterel upon that which Herodotus calls the plain of Anthela, which is a long triangular slope, formed of a hard gravelly soil, and covered with shrubs. There is an easy descent into this plain over the monntains, so that the western opening was of no importance in a military point of view. Upon reaching the eastern pass, situated at the end of the plain
of Anthela, the traveller reaches a white elevated soil formed by the deposit of the salt-springs of the proper Thermupylae. There are two principal sources of these springs, the upper or westem being imme. diately at the foot of the highest part of the cliffs, and the lower or eastern being 200 yards distant. From the lower source the water is condncted in an artificial canal for a distance of 400 yards to a mill. This water emits a strong smlphureons vapour, and, as it issues from the mill, it pours ont a great volnme of smoke. Beyond the bill are conical heights, and in their aeighbourhood are two salt ponds, containing cold water; but as this water is of the same compesition as the hot springs, it is probably also hot at its issue. Leake observes that the water of these pools, like that of the principal hot source, is of a dark blne celonr, thus illnstrating the rernark of Pausanias, that the binest water he ever saw was in one of the baths at Thermopylae. (Paus. jv. 35. § 9.) The springs at this pass are much hotter, and have left a far greater deposit than those at the other end of the plain, at tho opening which may be called the false Thermopylae. Issuing from the pass are fomadations of a Hellenic wall, donbtless the remains of works by which the pass was at one time fortified; and to the left is a tumnlas and the foundations of a circular monnmeet. Upwards of a mile further is a deep ravine, in which the torrents descending from Mt. Callidromon, are collected into one bed, aod which affurd the easiest and most direct passage to the summit of the monntain. This is probably the menatain path by which the Persians, noder Hydarnes, deseended in the rear of Leonidas and his compaoions. This path, as well as the mountain over which it leads, is called Anopaea (方 'Avöntaia) by Ilerodotus, who does not use the name of Callidromon. He describes the path as beginning at the gorge of the Asopns, passing over the crest of the monotuon, and terminating near Alpeni and the rock called Melampygus, and the seats of the Cercopes, where the road is narrowest. (Herod. vii. 216.) The history of the defence of Thernopylac by Leonidas is ton well known to require to be related here. The wall of the Pbocians, which Leonidas repaired, was probably built a little eastward of the western saltspring. When the Spartan king learnt that Hydarnes was descending in bis rear, he advanced beyond the wall into the widest part of the pass, resolved to sell his life as dearly as possible. Upon the arival of llydarnes, the Greeks retired behind the wall, and took np their position upon a bill in the pass ( $\kappa 0 \lambda \omega \nu \delta^{\prime}$ iv $\tau \hat{\eta} \epsilon i \sigma \delta \delta \psi$ ), where a stone lion was afterwards erected in honour of Leonidas, This hill Leake identifies with the western of the two small heights already described, as nearest to the position of the Pbecian wall, and the narrowest part of the pass. The other height is probably the rock Melatapygns.

Thermopylae is immortalised by the beroic defeace of Leonidas ; bnt it was alse the sceno of sotne important struggles in later times. In n. c. 279 an allied army of the Greeks assembled in the pass to oppose the Ganls under Brennns, who were marching into southern Greece with the view of pillaging the temple of Delphi. The Greeks held their ground for several days against the attacks of the Gauls, till at length the Heracleotae and Aenianes conducted the invaders across Momnt Callidromon by the same path which Hydarnes had followed two centuries before. The Greeks, finding their position

## THERMUM.

no longer tenable, embarked on butrd their slips and retired without further loss. (Paus, x. 19-22.) In b.c. 207, when the Romans were carrying on war in Greece against Philip, king of Macedonia, the Aetolians, who were then in alliance with the Romans, fortified Thermopylae with a ditch and a rampart, but Philip shortly afterwards forced his way through the pass. (Liv. xxviii. 5,7 ; Polyb. x. 41.) In B. C. 181, Antiochus, who was then at war with the Romans, took up bis position at Thermopylae, which he fortified with a double rampart, a ditch, and a wall; and, in order to prevent the Romans from crossing the mountains and descending upon his rear, be garrisoned with 2000 Aetolians the three summits, named Callidromom, Teichins, and Rhoduntia. The consul Acilius sent some troops against these fortresses and at the same time attacked the army of Antiochus in the pass. While

THERMUM.
1163
the battle was going on in the pass, the Roman detachnent, which had succeeded in taking Callidromum, appeared apon the beights, threatening the king's rear, in consequence of which Antiochus immediately took to flight. (Liv. xxxyi. 15-12.) There are still remains of three Hellenic fortresses upon the heights above Thermopylae, which probably represent the three places meotioued by Livy. Appian (Syr. 17) speaks only of Callidromum and Teicbius, but Strabo (ix. p. 428) mentions Khoduatia also. Procopius relates that the fortifications of Thermopylae were restored by Justinian (de Aed. iv. 2).
(On the topography of Tbermopylae, see the excellent account of Leake, Northern Grecce, vol. ii. pp. 5, seq., 40 , seq.; there is also a treatise by Gordon, Account of two Iisits to the Anopaea or the Highlunds above Thermopylae, Athens, 1838, which the writer of this article has not scen.)

THERMUM, THERMUS or THERMA ( $\tau \grave{\text { T }}$ ఆ́f. $\mu \mathrm{ov}$, Pol. v. s; тà Өép $\mu \alpha$, Strab. x. p. 463 ; Pol. v. 7 ; @épuos, Steph. B. s.v.: Eth. Өépuros: I'tokho), the chief city of Aetolia doring the flourishing period of the Aetolian League, and the place where the meetings of the league were osually held and an annual festival celebrated. It possessed a celebrated temple of Apollo, in connection with which the festival was probably celebrated. It was sitnated in the very heart of Aetolia, N. of the lake Trichonis, and on a height of Mt. Panaetolium (Viena). It was considered inaccessible to an army, and from the strength of its situation was regarded as a place of refuge, and, as it were, the Acropolis of all Aetolia. The road to it ran from Metapa, on the lake Trichonis, through the village of Pamphia. The city was distant 60 stadia from Metapa, and 30 from Pamphia ; and from the latter place the road was very steep and dangerous, running along a narrow crest with precipices on each side. It was, however, surprised by Philip V., king of Macedonia, in his incasion of Aetolia in B c. 218. The Aetolians,

who had never imagined that Philip would have penetrated so far into their country, had deposited here all their treasures, the whole of which now fell into the bands of the king, together with a rast quantity of arms and armour. He carried off the most valuable part of the spoil, and burnt all the rest, among which were more than 15,000 suits of armour. Not content with this, be set fire to the sacred baildings, to retaliate for the destraction of Dium and Dodona. He also defaced all the works of art, and threw down all the statues, which were not less than 2000 in number, only sparing those of the Gods. (Pol, v. 6-9, 13.) A few years afterwards, when the Aetolians had sided with the Romans, Plilip again surprised Thermus (abont v. c. 206), when he destroyed everything which had escaped his ravages in his first attack. (Pol. xi. 4.) We bave no further details of the history of Thermum. Polybius alludes, in one or two otber passages (xviii. 3I, xxviii. 4), to the meetings of the league held there. In the former of these passages Livy (xxxiii. 35) has misunderstood the words Tो $\nu$
 Thermopylse.

Potybius's account of Philip's first invasion of Aetolia, which resulted in the capture of Thermum, supplies us with the chief information respecting the towns in the central plain of Aetolia. Philip set out from Limoaea, on the south-eastern corner of the Ambraciot gulf, crossed the Achelous between Stratus and Conope, and marched with all speed towards Thermum, leaving on his left Stratus, Agrinium, and Thestienses ( $\Theta e \sigma \tau 6 \epsilon i s$ ), and on his right Conope, Lysimachia, Trichonium, and Phoeteum. He thus arrived at Metapa, on the lake Trichonis, and from thence marched to Thermus by the road already mentioned, passing by Pamphia in his way. He returned by the same road as far as Dletapa, but from the latter place he marched in one day to a place called Acrae, where he encamped, and on tbe next day to Conope. After remaining a day at Conope, he marched up the Acbelous, and crossed it near Stratus.

The remains of the walls of Thermom show that the city was about $2 \frac{1}{2}$ miles in circumference. It was in the form of a triangle on the slope of a pyramidal hill, bordered on either side by a torrent flowing in a deep ravine. The ooly remaias of a public edifice within the walls consist of a square, pyramidal, sliapeless mass of stooes. (Leake, Nurthern Greece, vol. i. p. 126, \&c.)
THERVINGI. [Gотнi, p. 1009.]
 Hom. Il. ii. 498 ; Herod. viii. 50; Pans. ix. 26. § 6:
 Adj. అearıakós, Thespius, Thespiacus), an ancient city of Boeotia, situated at the foot of MIt. Helicon, looking towards the south and the Crissaean gulf, where stood its port-town Creusa or Creusis. (Strab. ix. p. 409 ; Paus. ix. 26 . § 6 ; Steph. B. s. v.) Thespiae was said to have derived its name from Thespia, is daughter of Asopus, or from Thespius, a sonl of Erechtheus, who migrated from Athens. (Paus, l. c.; Diod. iv. 29.) The city is mentioned in the catalogue of Homer. (Il. ii. 498.) Thespiae, like Plataca, was one of the Boeotian cities inimical to Thebes, which circumstance affected its whole history. Thus Thespiae and Plataea were the only two Boeotian cities that refused to give earth and water to the heralds of Xerses. (Herod. vii. 132.) Seven hundred Thespians joined Leonidas at Thermopylac; and they remained to perish with the 300 Spsitans, when the other Greeks retired. (Herod. vii. 202, 222.) Their city was burot by Xerses, wben he overran Bocotia, and the iohabitants withdrew to Peloponnesus (Herod. viii. 50.) The survivors, to the number of 1800 , fought at the battle of Plataea in the following year, bat they were reduced to such distress that they had no heavy armour. (Herod. ix. 30.) After the expulsion of the Persians from Greece, Thespiae was rebuilt, and the inhabitants recruited their numbers by the admission of strangers as citizens. (Herod. viii. 75.) At the battle of Delium (B. c. 424) the Thespians fonght on the left wing agaiast the Athenians, anc were almost all slain at their post. (Thuc. jv. 93, seq.) In the following year (B, c. 4:23), the Thebans destroyed tbe walls of Thespiae, on the charge of Atticism, the Thespians being unabile to offer any resistadce in consequence of the heavy loss they had sustained while figbting upon the side of the Tbelans. (Thne. iv. 133.) In B. e. 114 the democratical party at Thespiac attempted
to overthrow the existing government ; but the latter receiving assistance from Thebes, many of the cunspirators withdrew to Athens. (Thuc. vi. 95.) In B.C. 372 the walls of Thespiae were again destroyed by the Thebans. According to Diodorus (xv.46) and Xepophon (Hell. vi. 3. §1) Thespiae was at this time destroyed by the Thebans, and the inhabitants driven out of Boeutia; but this happened after the battle of Leuctra, and Mr. Grote (Hist. of Greece, vol. x. p. 219) justly infers from a passage in Isocrates that the fortifications of the city were alone demolished at this period. Pausanias expressly states that a contingent of Thespians was present in the Theban army at the time of the battle of Leuctra, and availed themselves of the permission of Eysminundas to retire before the battle. (Paus, ix. 13. §8, ix. 14. § 1.) Shortly afterwards the Thespians were expelled from Boeotia by the Thebans. (l'aus. is. 14. § 2.) Thespiae was afterwards rebuilt, and is mentioned in the Roman wars in Greece. (Pulyb. xxvii. 1; Liv. xlii. 43.) In the time of Strabo, Thespiae and Tanagra were the only places in Bocotia that deserved the name of cities. (Strab, is. p. 410.) Pliny calls Thespiae a free town (" liLerum oppidum," iv. 7. s. 12). It is also mentioned by Ptolemy (iii. 15. § 20) and in the Antonine Itinerary (p. 326, ed. Wess.), and it was still in existence in the sixth century (Hierocl. p. 645, ed. Wess.).

Eros or Love was the deity chiefly worshipped at Thespiae; and the earliest representation of the god in the form of a rude stone still existed in the city in the time of Paussnias (ix. 27.§ 1). The courtesan Phryne, who was burn at Thespiae, preseated to ber native city the celebrated statue of Luve by Praxiteles, which added greatly to the prosperity of the place in consequence of the great numbers of strangers who visited the city for the purpose of seeing it. (Dicaearch. § 25, ed. Nïller; Cic. Verv. iv. 2 ; Strab. is. p. 410 , who erroneously calls the courtesan Glycera; Pans, ix. 27. § 3.) The story of the manner in which Phryne became possessed of this statue, and its subsequent history, are related in the life of Praxiteles. [Dict. of Biogr. Vol. III. pp. 520, 521.] In the time of Pausanias there was ouly an imitation of it at Thespize by Menodorus. Ainong the otber works of art in this city Pausanias noticed a statue of Eros by Lysippus, statues of Apbrodite and Phryne by Praxiteles; the agora, containing a statue of Hesiod; the theatre, a temple of Aphrodite Mlelaenis, a temple of the Muses, containing their figures in stoce of small size, and an ancient temple of Hercules. (Paus, ix. 27.) Next to Eros, the Muses were specially honoured at Thespiae; and the festivals of the 'Epwtióa and Movigeia celebrated by the Thespians on MIt. Helicon, at the end of every four years, are mentioned by several ancient writers. (Paus. ix, 31. § 3; Plut. Amat. 1; Athen. xiii. p. 561 ; K. F. Hermann, Lehrbuch der gottesd. Alterth. $\$ 63$, u. 4.) Hence the Aluses are frequently called Thespiades by the Latin writers. (Vorr, L. $L$. vii. 2 ; Cic. Verr. ii. 4: Ov. Met. v. 310 ; Plin. xxxvi. 5. s. 4, § 39, ed. Sillig.)

The remains of Thespiae are situated at a placo called Lefka from a deserted village of that name near the village of Erimókastro or Rimúkastro. Unlike most other Greek cities, it stonds in a plain surrounded by bills on either side, and its founders appear to have chosen the site in consequence of its abundant supply of water, the sources of the
river Kanarari rising here．Leake noticed the foundations of an oblong or oval enclosure，built of very solid masonry of a regular kind，ahout half a mile in circumference；but he observes that all the adjacent ground to the SE．is covered，like the interior of the fortress，with ancient foundations， squared stones，and other remains，proving that if the enclosure was the only fortified part of the city，many of the public and private edifices stool without the walls．The site of some of the ancient temples is probably marked by the chorches，which contain fragments of architraves，columns，and other ancient remains．（Leake，Northern Greece，vol．ii． p．479，seq．；Dodwell，vol．i．p．253．）

COIN OF THESPIAE．
THESPRO＇Tl，THESPRO＇TIA．［EPEIRUs．］
THESSA＇LIA（ Өєббa入ía or Өetva入la：Eth．
 Өєттa入ís，Thessalis：Adj．Өєбба入ıкós，Өetтa入ıкós， Thessalicns，Thessalins），the largest political divi－ sion of Greece，was in its widest extent the whole conntry lying N ．of Thermopylae as far as the Cambunian mountaios，and bounded upon the W． by the range of Pindus，But the name of Thes－ saly was more specifically applied to the great plain，hy far the widest and largest in all Grcece， enclosed by the four great monotain harriers of Pio－ dus，Otbrys，Ossa and Pelion，and the Cambunian mountains．From Monut Pindus，－the Apennines or back－bone of Greece，－which separates Thes－ saly from Epeirus，twe large arms hranch off towards the eastero sea，running parallel to one another at the distance of 60 miles．The northern，called the Cambunian mountains，forms the boundary between Thessaly avd Macedonia，and terminates in the sum－ mit of Olympus，which is the highest mount：in in all Greece［Olympus］．The sonthern arm，named Othrys，separates the plain of Thessaly from Malis， and reaches the sea hetween the Malian and Paga－ siean gulfs［Othicss］．The foorth barrier is the range of mountains，first called $O_{\text {ssa }}$ and afterwards Pelion，which run along the coast of Thessaly npon the E．，nearly parallel to the range of Pindus［OssA； Pelion］．The plain of Thessaly，which is thus enclosed by natural ramparts，is broken only at the NE．corner by the celebrated vale of Tempe，which separates Ossa from Olympus，and is the obly way of entering Greece from the N．，except by a pass aeross the Cambonian mountains．This plain，which is drained by the river Peneius and its affloents，is said to have been originally a vast lake，the waters of which were afterwards carried off through the vale of Tempe by some sudden convalsion，which runt the rocks of the valley asunder．（Ilerod．vii． 129．）［Tfarre．］The lakes of Nessonis and Boe－ beis，which are connected by a channel，were sup－ posed by Strabe（ix．p．430）to have been the re－ mains of this rast lake．In addition to this plain there are two other districts included under the ge－ veral name of Thessaly，of which one is the long and
narrow slip of rocky coast，called Magnesia，extending from the vale of Tempe to the gulf of Pagasae，and lying between Monnts Ossa and Pelion and the sca； while the other，known under the name of Malis， is quite distinct in its physical featores from the rest of Thessaly，being a long narrow valley between Monnts Othrys and Oeta，throngh which the river Spercheius flows inte the Maliac gule．

The plain of Thessaly properly consists of two plains，which received in antiquity the name of Upper and Lower Thessaly；the Upper，as in similar cases，meaning the country near Mount Pindus mest distant from the sea，and the Lower the country near the Thermaic gulf．（Strah．ix．pp．430，437．） These two plains are separated by a range of hills be－ tween the lakes Nessovis aod Boebeis on the one hand， and the river Enipeus on the other．Lower Thes－ saly，which constituted the ancient division Pelas－ giotis，extends from Monnts Titarus and Ossa on the N．to Mount Othrys and the shores of the Pagasaean gulf on the S．Its chief town was Larissa．Upper Thessaly，which corresponded to the ancient divi－ sions Thessaliotis and Histiaeotis，of which the chief city was Pharsalns，stretches from Aegiciam in the N．to Thanmaci in the S．，a distance of at least 50 miles in a straight lise．The road from Ther－ mopylae into Upper Thessaly entered the plain at Thanmaci，which was situated at the pass called Coela，where the traveller came in sight of a plain resembling a vast sea．（Liv，xxxii，4．）［Thav－ mact．］

The river Peneins，now called the Salamria or Salambria（之a入aubpias，इa入a $\mu \pi \rho i a s$ ），rises at the NW．extremity of Thessaly，and is composed of streams collected in the valleys of Mount Pindus and the offshoots of the Cambunian mountains．At first it flows through a contracted valley till it reaches the perpendicular rocks，named the Metcora， upon the summits of which several monasteries are percbed．Below this spot，add bear the town of Aeginium or Stagus，the valley opens ont inte the vast plain of Upper Thessaly，and the river flows in a general sontherly direction．At Tricca，or Trik－ kala，the Peneins makes a beod to the E．，and shortly afterwards reaches the lowest point in the plain of Upper Thessaly，where it receives within a very short space many of its tributaries．Next it passes through a valley formed by a range of hills，of which these opon the right divide the plains of Uyper aud Lower Thessaly．It then emerges into the plain a few miles westward of Larissa；after passing which city it makes a sudden bend to the $\mathrm{N}_{0}$ ，and flows through the rale of Tempe to the sea．Althougb the Peneins drains the greater part of Thessaly，and receives many tribu－ taries，it is io the greater part of its course a shallow and sluggish river，except after the melt－ ing of the snows，when it sometimes floods the surrounding plain．Hence en cither side of the river there is frequently a wide graveliy uocultivable space，described by Strabo as потацо́кえл $u \sigma \tau 0 s$（ix．p． 430；Leake，Northern Greece，vol．i．p． 420 ）． Wheo the river is swollen in the spring，a channel near Larissa condacts the superfluous waters into the Karatjai＇r or Mavpo入 ${ }^{\prime} \mu \nu \eta$ ，the ancient Nessonis； and when this basin is filled，another channel conveys the waters inte the lake of Karla，the ancient Boebeis．（Leake，iv．p．403．）In the lower part of its course，after leaving Larissa，the Peneius flows with more rapidity，and is full of small vortices， which may have suggested to Homer the epitbet
àprupoঠtuns (Il. ii. 753); though, as Leake has reinarked, the poet carries his flattery to an extreme in comparing to silver the white hue of its turbid waters, derived entircly from the earth su-pended in them. (Northern Greece, vol. iv. p. 291.)

The principal rivers of Thessaly, according to Herodotus (vii. 129), are the Peneius, Apidanus, Onochonus, Enipens and Pamisus. The four latter rivers all flow from the S . Of these the most important is the Enipens, now called the Fersaliti, which flows through the plain of Plarsalus, and falls inte the Peneius near Yiresiae in the lowest part of the plain. The Apidanua, now called Vrysiti, inte which the Cusrius (Sofadhitiko) falls, is a tributary of the Enipeus. [Enmevs.] The Panisus, new called the Blüivi or Piliüri, also jnins the Peneins a little to the W. of the Enipens. The Onochonus, which is probably the same as the Onchestus, flows into the lake Boebeis and not into the Peneius. [For details, see Vol. II. p. 483, a.] The chief tributary of the Peneius on the N . is the 'Titaresius, now called Elassonitiko or Xerághi, which rises in M1t. Titarus, a part of the Cambunian range, and joins the main stream between Larissa and the vale of Tempe. Humer relates ( 11. ii. 7.53 , seq.) that the waters of the Titaresins did not mingle with those of the Peneius, but floated upon the surface of the latter like oil upon water, whence it was regarded as a branch of the infernal river Styx. (Comp. Lucan, vi. 375.) Leake calls attention to the fact that Strabe (ix. p. 441), probably misled by the epithet (appuposions) applied by the poet to the Peneius, has reversed the true interpretation of the pret's comparison of the Peneius and the Titaresius, supposing that the Peneius was the pellucid river, whereas the apparent reluctance of the Titaresins to mingle with the Peneius arises from the former being clear and the latter muddy. (Northern Greece, iii. p. 396, iv. p. 296) The Titaresius was also called Eurotas (Strab. vii. p. 329) and Horcus or Orcus (Plin. iv, 8. s. 15).

The plain of Thessaly is the most fertile in all Greece. It produced in antiquity a large quantity of corn and cattle, which supported a numerous population in the towns, and especially a rich and proud aristocracy, who were at frequent feuds with one another and much given to luxury and the pleasures of the table ( $\epsilon \kappa \epsilon \hat{i}$ रàp $\delta \dot{\eta}$ ) $\pi \lambda \in i-$ $\sigma \tau \eta$ àraģa каl áко入aбia, Plat. Crit, 15 ; Athen. xii. p. 564; Theopormp. ap. Athen. vi. p. 260; Dem. Olynth. p. 16). 'The Thessalian horses were the finest in Greece, and their cavalry was at all times efficient ; but we rarcly read of their infantry. The nohles, such as the Aleuadae of Larissa and the Scopadae of Crannon, supplied the jurorer citizens with hurses; but there was ne class of free equal citizens, from which the hoplites were drawn in other Grecian states. (See Grote, Hist. of Cirecce, vol. ii. p. 367.) Hence the political power was generally either in the hands of these nobles or of a single man who establisbed himself as despot. The numerous flocks and herds of the Scopadie at ('ranion are alluded to by Theocritus (Id. xvi. 36), and the wealth of the Thessalian nobles is frequently mentioned by the ancient writers.

Thessaly is suid to have been originally known by the names of Pyrrha, Aemenis, and Aeolis. (Rhias. ap. Schol. Rhod. iii. 1089 ; Steph. B. s. r. Aipovia; Herod. vii. 176.) The two former appellations belong to methology, but the latter refers to the time when the country was inlabited by the Acolian

Pelasgi, whe were afterwards expelled from the country by the Thessalians. This peaple are said to have been immigrants, who came from Thesprotia in Epeirus, and conquered the plain of the Peneius. (Herod. vii. 176, comp. i. 57 ; Strab. is. p. 444.) The Boeotians are said to have originally dwelt at Arne, in the conntry afterwards called Thessaly, and to have been expelled by the Thessalian invaders 60 years after the Trojan War. (Thuc. i. 12.) The expulsion of the Boeotians by the Thessaliana seems to have been conceived as an immediate consequence of the immigration of the Thessalinn invaders; but, however this may be, the name of Thessaly is unknown in llomer, who only speaks of the several principalities of which the country was composed. In the Homeric catalogue Pheidippus and Antiphus, who led the Greeks from Carpathus, Cos, and the Deighbouring islands, are called the sens of Thessalus, the son of Hercules (Hom. Il. ii. 676) ; and, in order to connect this name witb the Thessalians of Thesprotia, it was rejorted that these two chiefs had, upon their returs from Troy, been driven by a storm upen the ceast of Epeirus, and that Thessalus, the grandson of Pheidippus, led the Thessalians across Mount Pindus and Amposed his name upon the country. (Vell. Pat. i. 2, 3; Steph. B. s. v.
 cumstances in the historical period which make it probable that the Thessalians were a body of immigratt conquerors; though, if they came from Thesprotia, they mnst have gradually dropt their original language, and learnt that of the conquered peopie, as the Thessalian was a variety of the Aeolic dialect. There was in Thessaly a triple division of the population analogons to that in Laconia. First, there were the Thessalians proper, the rich landed proprietors of the plain. Secondly, there were the descendants of the original inhabitants of the country, who were" not expelled by the Thessalian conquerors, and who were more or less dependent upon them, corresponding to the Lacedaemonian Perioeci, but, unlike the latter, retaining their original names nnd their seats in the Amphictyonic council. These were the Perrhaedi, who occupied the menntainous district between Mount Olympus and the lower course of the Peneius ; the Dagnetes, who dwelt along the eastern coast hetween Dlounts Pelion and Ossa and the sea; the Achaeans, who inhahited the district called Phthiotis, which extended S. of the Upper Thessalian plain, from Nount Pindus on the W. to the gulf of Pagnsae on the S.; the DOLOPES, who occapied the monntainens regions of Pindus, S. of Pbtbiotis; and the Malmans, whon dwelt hetween Phtbiotis and Thermepylae. The third class of the Tbessalian pepulation were the Penestae, serfs or dependent culifivators, corresponding to the Helots of Laconia, although their condirion seems upon the whole to have been superior. They tilled the estates of the great nobles, paying them a certain propertion of the produce, and followed their masters to war upon borselack. They could not, howeter, be sold out of the conntry, and they possessed the means of acquiring property, as many of them were said to have been richer than their masters. (Archemach. ap. Athen. vi. p. 264 ; Plat. Leg. vi. p. 777 ; Aristet. Pol. ii. 6. §3, vii. 9. §9; Dionys. ii. 84.) They were probably the descendants of the original inlabitants of the conntry, reduced to slavery by the conquering Thesprotians ; but when Theopompus states that they were the descendants of the conquered Perrlaebians and Mag-
netes (ap. Athem, vi. p. 265), this can only be true of a part ef these tribes, as we know that the Penestae were entirely distinet from the subject l'errlasbians, Mlagoetes, and Achaeans. (Aristot. Polit. ii. 6. § 3.) The Penestae, like the Laconian Helots, frequently rose in revolt against their masters.

In the Homeric poems the names of Perrhaebi, Magnetes, Achaeans, and Dolopes occur ; and Achaea Phthiotis was the residence of the great bero Achilles. This district was the seat of Hellen, the founder of the Hellenic race, and contained the original Hellas, from which the Hellenes gradually spread over the rest of Greece. (Hom. Il. ii. 683; Thuc. i. 3; Strab. ix. p. 431 ; Dicuearch. p. 21, ed. Hudson; Steph. B. s. v. 'EANas). The Achaeans of Phthiotis may fairly be regarded as the same race as the Achseans of 1'eloposnesus.

Thessaly Proper was divided at an early period ieto feur districts or tetrarchies, named Thessalietis, Pelasgiotis, Histiaectis and Phthiotis. When this dirisien was introdaced is unknowo. It was elder than Hecataeus (Steph. B. s. v. Kpávvav), and was avcribed to Aleuas, the founder of the family of the Aleuadae. (Hellenic. Fragm. 28, ed. Didot; Harpocrat. s. v. Tetpapxia; Strab. ix. p. 430.) This quadruple division continued to the latest times, and seems to have been instituted for political purpeses; but respecting the internal government of each we have no precise information. The four districts were nominally united noder a chief magistrate, called Tagus; but he seems to have been only appointed in war, and his commands were frequently disobeyed hy the Thessalian cities. "When Thessaly is under a Tagus," said Jason, despot of Pherae, "she can send joto the field an army of 6000 cavalry and 10,000 hoplites." (Xen. Hell. vi. 1. § 8.) But Thessaly was rarely united. The different cities, upon which the smaller towns were tependent, not only administered their nwn affairs independent of one another, but the three most important, Larissa, Pharsalus and Pherae, were frequently at feud with one another, and at the same time torm with intestine faction. Hence they were able to offer little resistance to invaders, and never occupied that position in Grecian bistory to which their population and wealth would seem te have eotitled them. (Respecting the Thessalians in general, see Mr. Grote's excellent remarks, Hist. of Greece, vol. ii. p. 363, seq.)

The history of Thessaly may be briefly dismissed, as the most important events are related under the separate cities. Before the Persian invasion, the Thessalians had extended their pewer as far as Thermopylae, and threatened to overrun Phecis and the country of the Locrians. The Phocians built a wall across the pass of Thermopylae to keep off the Thessalians; and theugh artive hestilities seem te have ceased betore the Persian invasion, as the wall was at that time in ruins, the twe pations continued to cherish hitter animosity towards one another. (Herod. vii. 176.) When Xerxes invaded Greece, the Thessalians were at first opposed to the Persians. It is true that the poweriul family of the Alenadae, whom Herodetus calls (vii. 6) kings of Thessaly, had urged Xerxes to invade Greece, aod had promised the early submission of their countrymen; but it is evident that their party was in the minority, and it is protable that they were themselves in exile, like the Athenian Peisistratidae The majority of the Thessalians sent envoys to the confederate Greeks at the Isthmus, urging them to
send a force to the pass of Tempe, and promising them active co-operation in the defeoce. Their request was complied with, and a body of 10,000 heavy-arined infantry was despatched to Thessaly; but the (irecian commanders, upon arriving at Tempe, found that there was another pass across Muunt Olyıpus, and beliering it impossible to make any effectual resistance north of Thermopylae, retreated to their ships and abandoned Thessaly. (Herod, vii. 172, seq.) The Thessalinos, thus deserted, hastened to make their submission to Xerxes; and under the influence of the Aleuadae, who new regained the ascendency in Thessaly, they rendered zealous and effectual assistance to the Persians. After the death of Leenidas and his heroic companions at Thermopylae, the Thessaliaos gratified their eomity against the Phocians by directing the march of the l'ersians against the Phocian towns and laying their country waste with fire and swori.

From the Persian to the Peloponnesian wars the Thessalians are rarely mentioned. After the battle of Oenophyta (b. c. 456) had given the Athenians the ascendency in Boeotia, Lecris, and Pbocis, they endeavoured to extend their power over Thessaly. With this view they marched inte Thessaly puder the command of Myronides in B. c. 45t, for the purpose of restoring Orestes, ene of the exiled nobles or princes of Plaarsalns, whom Thncydides calls son of the king of the Thessalians. The progress of Myronides was checked by the powerful Thessalian cavalry ; and though he advanced as far as Pharsalus, he was unable to accomplish anything against the city, and was compelled to retreat. (Thuc. i. 111 ; Diodor. xi. 85.) In the Peloponnesian War the Thessalians took no part; but the mass of the population was friendly to the Athenians, though the oligarchical governinents favoured the Spartans. With the assistane of the latter, combined with his own rapidity and address, Brasidas contrived to march through Thessaly in B. C. 424 , en his way to attack the Athenian dependencies is Macedonia (Thuc. is. i8); but when the Lacedaemonians wished to send reinforcements to Brasidas in the following year, the Thessalians positively refused them a passage throngh their country. (Thuc. iv. 132.) In n. C. 395 the Thessalians joined the Beeotians and their allies in the league against Sparta ; and when Agesilaus marched through their country in tho fellowing year, baving heen recalled by the Spartan gevernment frem Asia, they endeavoured to intercept him on his return; but their cavalry was defeated by the skilful mannenvres of Agesilaus. (Xen. Hell. vi. 3 . § 3 , seq.)

About this time or a little earlier an important change took place in the political condition and relative importance of the Thessalian cities. Almost down to the end of the Peloponnesian War the powerful families of the Alcoadae at Larissa, of the Scopadae at Crannon, and of the Creondae at Plarsalus, possessed the chief power in Thessaly. But shortly before the close of this war Pherae rose into importance noder the administration of Lycophron, and aspired to the supremacy of Thessaly. Lycophron overthrew the goveroment of the nobles at Plerae, and made bimself tyrant of the city. In presecution of his ambitious schemes be attacked Larissa; and in B, C. 404 lie gained a great victory over the larissacans and the other Thessalians whe were opposed to him. (Xen, Hell. ii. 3. § 4.) In B. c. 395 Lycoobron was still engaged in a con-

## TIIESSALIA.

test with Larissa, which was then ander the govermment of Medius, probably the head of the Aleutdae. Lyeophron was supported by Sparta; and Medins accordingly applied for succour to the confeleracy of Greck statea which had been lately formed to resist the Lacedaemonian power. With their assistance Medins took Pharsalus, which was then occupied by a Lacedaemonian garrison, and is said to have sold all its inhahitants as slaves. (Diod. xiv. 82.) The return of Acesilaus, and his victory over the The salians, probally deprived Medins and his party of their power, and Larissa no lunger appears as the rival of Pherse for the supremary of Thessaly. Pharsalus soon recovered from the blow which it had received from Medins, and berame, next to Pherae, the most important city in Thessaly. The inhabitants of Pharsalus agreed to entrust the supreme power to Polydamas, ne of their own citizens, in whose integrity and abilities all parties placed the greatest confidence. The neropolis and the whole management of the finances were placed in his hands, and he discharged his trust to the satisfaction of all parties. (Xen. Hell. vi. 1. §§ 2, 3.)

Meantime the supreme power at Pherae had passed into the hands of Jason, a man of great energy and alsility, and probably the son of Lycophron, though this is not expressly stated. He inherited the amhitions views of Lycophron, and meditated nothing less than extending his dominion over the whole of Greece, for which his central sitnation seemed to offer many facilities. He cherished even still more extensive projects of aggrandisement, and, once master of Greece, he looked forward to conquer the Persian empire, which the retreat of the Ten Thousand Greeks and the campaigns of Agesitans in Asia seemed to point out as an easy enterprise. But the first step was his election as Tagus of Thessaly, and the submission of all the Thessalian cities to his suthority. For this parpose it was necessary to obtain the acquiescence of Pharsalus, and although be might have gained his object by force, he preferred to effect it by negotiation, and nccordingly frankly disclosed his schemes to Polydamas, and offered him the second place in Thessaly, if he would support his views. Polydamas asked the advice of the Spartans, and finding that he conld receive from them no help, he acceded to the proposals of Jasnn, and induced the Pharsalians to espnuse his cause. Soon after this, probably in B. C. 374, Jason was elected Tagos of Thessaly, and proceeded to settle the contingent of cavalry and heavy-armed troops which the Plarsalian cities were to furnish. He now passessed a force of 8000 cavalry and more than 20,000 infantry; and Alcetas I., king of Epirus, and Amyntas II., king of Macedonia were his allies. (Xen. Hedl. vi. 1. §§§ 2-19; Dind. xs. 60.) He cmuld in effert command a greater force than any other state in Grcece; and from the disunion and exhanstion of the other Grecian states, it seemed not improbable that lie might be able to carry his amhitions projects into effect. He had already formed an alliance with Thebes, and pfter the battle of Leuctra (B. C. 371) he was invited by the Thebans to join them in attacking the Laceduemonian camp. But Jason's policy was to prevent any other power from obtaining the preponderance in (irecce, and accordingly apon his arrival at teentra be aulvised the Thebans not to drive the Iacedamonians to decpair, and obtained a truce for the latter, which enabled them to secure their safety by a retreat. (Xen. Hell. vi. 4. § 20,
seq.) In the following year he announced his intention of marching to Delphi nt the head of a body of Thessalian troops and presiding at the Pythian festival. Great alarm was felt throughout Greece; lout before the time came, he was assassinated by seven youths as he sat in public to give audience to all comers. His death was fett as a relief by Grecce; and the hmonrs paid in many of the Grecian cities to his assassins prove the general fear which his ambitions schemes had excited. (Xen. Mell. vi. 4. §§ 28-32.)

Jason had so firmly established his power that he was sncceeded in the post of Tagns of Thessaly by his two brothers Polyphron and Polydoras; but they did not possess his abilities or energy, and Thesssly again sank into political insignificance. Polyphron was assassinated by his brother Polydorus, who became sole Tagns. Polydorus exercised his authority with great cruelty; be put to death Polydamas of Pharsalus, and killed or drove iato exile many other distingnished persons of this city and nf Larissa. (Men. Hell. vi. 4. $\S \S 33,34$.) At the end of a year he was also assassinated by Alexander, who was either his brother (Diod. xv. 61) or his nephew (Plut. Pelopid. 29.) Alexander surpassed even Polyphron in crvelty, and was guilty of gross enormities. The Aleuadae and other noble families, who were chiefly exposed to his vengeance, rpplied in their distress to Alesander, the youthful king of Macedonis, who had recently succeeded his father Amyntas. Alexander invaded Thessaly, defeated the tyrant, and took possession of Larissa and Crannon, which he garrisoned with his troops. (Diodor, xv. 61.) It wonld seem, however, that the necessitics of his own kingdom compelled him shortly afterwards to withdraw hia troops from Thessaly; since we find the Thessalian cities opposed to the tyrant inviting the aill of the Thebans. Accordingly, abont B. C. 369 , Pelopidas invaded Thessaly, and took Larissa and several nther cities under bis protection, apparently with the sanction of Alexander of Macedonia, with whom he formed an alliance. (Diodor. $\mathbf{x v .}$ 67.) In the following year (в.с. 368) Pelopidas again marched into Thessaly ut the head of a Theban force, to protect Larissa and the other cities aguinst the projects of Alexander of Pherae, who had solicited aid from Athens. Alexander was compelled to ste for peace; and Pelopidas, after arranging the affairs of Thessaly, marched into Macedonia, where the young king had been lately assassinated. Ptnlemy, the regent of the kingdom, was also compelied to enter into alliance with Pelopidas, andi to give him sereral hostages, among whom was the youthful Pinilip, afterwards king of Macedonia. (Diod, xv. 71; Plut. Pelop, c. 26.) By these means the influence of Thebes was extended over the greater part of Thessaly. Two years afterwards (B.c. 366) the Thehans obtained from the Persian court a rescript acknowledging their claims to the headship of Greece ; and in the same year P'elopidas, accompanied by lsmenias, visited Thessaly with the view of obtainng the recognition of their claim from Alexander of Pherae and the other Thessalian cities. Alexander met them at Pharsalus, but when he fonnd that they were not supported by any armed force, he seized theru as prisoners and carried thems off to Pherae. The finst attempt of the Thehans to rescue their countryman proved unsuecessful ; and the artny which they sent into Thessaly was only saved from destruction by the genins of Epaminondas, who was then serving as a private, and was compelled
by the solliers to take the commani. So greatly was Alexander strengthened in his power by this failure that all the Thessalian cities sutmitted to him, and the influence of Thebes in Thessaly was for x time destroyed. Subsequently a second expedition was sent into Thessaly under the conmand of Epaminondas, who compelled the tyrant to release Pelopidas and lsmeniss, but without restoring Thebes to the cmmmanding pasition which she had formerly beld in Thessaly. (Diod. sv. 71-75; Plut. Pelop. 27-29; Cornel. Nep. Pelop. 5; Paus. is. 15. हु 1.) The continned nppressions of Alesander of Pherne became so intolerable that the Thessalian cities once more applied to Thebes for assistance. Accordingly in n.c. 364 Pelopidas was again sent into Thessaly at the heal of a Theban army. In the first enyagement Pelppidas was slain, but Alexander was defrated. (Divil. xv. 80, 81; Plut. Pelop. 31, 32; Cornel. Nep. Pelop. 5 ; respecting the different expeditions of Pellopidas into Thessaly, as to which there are discrepancies in the accounts, see Grote, Hist. of (irecee, val. x. p. 361, note, p. 391, note.) The death of Pelopidss, however, proved almost fatal to Alexander. Burning to revenge bis loss, the Thebans sent a powerful army into Thessaly, which costipelled lim to renounce bis supremacy in Thessaly, to cmufine himself to Pherae, and to submit to all the demands of Thebes. (Plut. Pelop. 35.)

After the death of Epaninondas at the battle of Mantineia (n. C. 362) the supremacy of Thebes in Thessaly was weakened, and Alexander of Pherae recorered much of his power, which be continued to exercise with his accustomed cruelty and ferncity till his assassination in E. C. 359 by his wife Thebe and lier brothers. One of these brathers, Tisipbonus, succeeded to the supreme power, under the direction of Thebe; but his reign lasted only a short time, and he was fillowed in the government by Lycophron, another brother. (Xen. Hell. vi. 4. \$ 37 ; Diod. x+i. 14: Plut. Pelop. 35.) Meanwhile Philip, who liad ascended the tbrone of Macedon in e. c. 369 , had been steadily extending his dominions and his infloence; and the Aleuadae of Larissa now had recourse to him in preference to Thebes. Accordingly Thilip marched into Thessaly in n. c. 353 . Lycophron, unalle to resist him, invoked the sid of Onomarclus and the Plocians ; and Philip, after a sesere struggle was driven out of Thessaly. (Diedor. xxi. 35.) In the following year Plilip returned to Thessaly, and gained a signal vietory over Onomarchus and Lyeophron. Onomarchns was slain in the battle; and when Pluilip followed up his vietory by laying siege to Pherae, Lycophron surrendered the city to him, upon being allowed to retire to I 'hocis with his mercenaries. (Diodor. xvi. 37.) Thus ended the powerful dynasty of the tyrants of Pherae. Phillp established a popular government at Pherae (Diod. xvi. 38), and gave nominal independence to the Thessalian cities. But at the sume time be garrisoned Magnesia and the port of Pagasae with his troops, and kept steadily in vier the subjugation of the whole country. An attempt made in R. c. 344 to restore the dynasty of the tyrants at Plerae gave him an opportunity of carrying his designs iato effect. Not only did he garrison Pherae with bis own troops, but he revived the ancient division of the country into four tetrarcbies or tetradarelies, and placed at the head of each some of the chiefs of the Aleuadue, who were entirely devoted to his interests. The result of this arrangement was the entire subjection of Thessaly to Plilip,
who drew from the country a considerable addition to his revenues and tn his mihtary resources. (Harpacrat. s. r. Terpapxia; Dem. Olynth.i. §. 23; Strab. is. p. 440; Thirlwall, IVist of Greece, vol. vi. pp. 12-14.) Upon the death of Pbilip the Thessalians were the first Grecian people who promised to support Alexander in obtaining the sapremacy of Greece. (Diod, xvii. 4.) After the death of Alexander the Thessalians took an active part with the cther Grecian states in attempting tn throw of the Macedonian yoke, but by the rictory of Antipater they were again united to the Nacelonian monarchy, to which they remained subject till the deleat of $P$ hilip by the Romans at the battle of Cynoscepbalae, v. c. 197. Tha Roman senate then derlared Thessaly free (Lis. xxxiii. 32); but from this time it was virtually under the sovereignty of Rume. The governament was vested in the liands of the more wealihy persons, who formed a kind of senate, which was accustomed ta meet at Larissa. (Liv, xxxiv. 52, xaxvi. 8, slii. 38)

When Maeedonia was reduced to the form of a Roman province, Thessaly was incorporated with it. (Strab. avii. p. 840.) Under Alexander Severus it formed a separate province governed by a procurator (Groter, Inser p. 474. 4); and in the later constitution of the Eimpire after the time of Constantine, it also appears as a separate province under the administration nf a praeses. (Not. Dig. i. p. 7 ; Böcking, i. p. 151: Marquardt, in Becker's Röm. Alterth. sol. iii. pt. i. p. 117.)

In giving un enumeration of the Thessalian tribes and cities, we will first describe the four tetrarchies already mentioned, and then take the other divisions of the comntry.

1. Hestiaeotis or Histhieotis ('Eatiaiûtss, 'I $\sigma \tau 1 a\left(\hat{\omega} \tau \tau 5\right.$ ), inhabited by the Hestiacotae ('E $\sigma \tau_{1}-$ ai(w̃a.), was the northern part of Thessaly, of which the Pencius may be described in general as its soathern bonndary. It occupied the passes of Olrmpus, and extended westward as far as Pindus. (Plin. iv. 1; Strab. ix. pp. 430, 437, 438.) It was the seat
 tribe, who possessed in historical times several towns strongly situated upon the mountains. They are mentiomed by Honer ( 1 l. ii. $\mathbf{7}$-49) as taking part in the Trojan War, and were regarded as genuioe Hellenes, being one of the Amplictyonic states (Aeschin. de Folls, Ley. p. 122). The part of ilestiaeotis inhabited by them was frequently called Perrhaebia, but it never formed a separate Thessaham province. The Perrhaebi are said at one time to have extended south of the Peneins as far as the lake Boeteis, bnt to have heen driven out of this district by the nytbical race of the Lapithae. (Strab. is. pp. 439, 440.) It is probable that at an early period the Perrlaaeti secupied the whole of Hestiasotis, but were subsequently driven out of the plain and confined to the mountains by the Thessalian conquerors from Thesprotia. Strabo states that Hestiseotis, was formerly, according to some authorities, called Doris (is. p. 43i), and Herodotus relates that the Dorians once dwelt in this district at the foot of Mts, Osss and Olynupns (i.56). It is said to bavo derived the name of Hestineotis from the district of this name in Eubrea, tho inhatitants of which were transplanted to Thessaly by the Perrhaehi (Sirat). is. p. 437 ); but this is an uncertified statement, probsbly founded alone upon sinilarity of name. Honer mentions asother ancient tribe in this part of Thessaly called the Acthices, who are placed by Strabo apuin

YOL. 11 .
the Thessalian side of Pindus near the sources of the Peneins．They are deseribed as a barbarons tribe，living by plunder and robbery．（Hom．IL．ii． 744：Strab．vii．p． 327 ，ix．p． 434 ；Steph．B．s．v． Aigicia．）The towns of Hestiacotis were：Oxymela， Phalia，Agginium，Mbhimuea，Philohia，Erh－ cinium，Pelinnieum，Teicca，Oecilida，Sr－ lana，Gomphi，Pueca or Phecadua，lthome， Limaea，P＇hactum，Phaestts，Pharcadon， Myife，Mallofa，Cybethaf，Ebitiub，Oloos－ son，Azohes，Dolicirs，Pytiolia，Elone sobse－ quently Leimone，Eudirbe，Lapathes，Gon－ nes or Gonsi，Charix，Condylon，Phalanna， Outhe，Atrax．
2．Pelasgiotis（ $\Pi \in \lambda \alpha \sigma \gamma i \hat{\omega} / i s$ ），inhabited by the Pelasgriotae（ $\Pi е \lambda a \sigma \gamma: \bar{\omega} \tau \alpha u)$ ，extended S ．of the $\mathrm{Pe}-$ neins，and along the western side of Pelion and Ossa，inclading the district called the Pelasgic plaiu． （Strab．ix．p．443．）The name shows that this dis－ trict was originally inhathited by Pelasgians；and its chicf $t$ wn was Larissa，a well known name of Pe－ lascic cities．The towns of Pelagiotis were： Elite．i，Mopsium，Metnofolas，Gyrton or Gyk－ toxa，Argura，Lartissi，Srcurium，Channon， Amyrus，Ammenium，Pherae，Cynoscemilalae， Scotessa，Palakphares．
3．Tuessaliotis（ $\Theta \epsilon \sigma \sigma a \lambda i \omega ̂ t i s)$ ，the central plain of Thessaly and the upper course of the river Peneius，so called from its having been first oeeu－ pied by the Thessalian conquerors from Epeirus． Its townswere：Peirestae，Pityllus，Methopolis， Cinniem $_{4}$ Euhydriem．Pharsalus，the most important in the district，Themidium．

4．I＇uTutotis（ $\left.\Phi \theta_{\imath} \bar{\omega} \tau i s\right)$ ，inhabited by the Achaean
 are usually mentioned as members of the Amphic－ tyanic leagnc．This district，according to Strabo， included the southern part of Thessaly，extending from the Maliac gulf on the E．to Dolopia and Mlonut Pindus on the W．，and stretching as far N． as Pharsalus and the Thessalian plains．（Stral），is． p．430．）Phethutis derived its name from the Ho－ ineric Plathia（ $\Phi$ 8in，Il．i．155，ii．683），which ap－ pears to lave included in the heroic times not only Hellas and Dolopia，which is expressly called the furthest part of Pithia（Il．ix．484），but also the southero portion of the Thessalian plain，since it is problable that Phthia was also the ancient name of Plausalus，（Leake，Northern Grecce，vol．iv．p．484， sel．）The cities of Plthiotis were：Amphanaenm （Scylas，p．25），or Amphanae（＇Aupavaí，Steph．B． s．v．），on the promontory Pyrrha and on the l＇aun－ shean gulf；Thebae，Ehetra，Puylace，Itox． Hines，Pteleum，Antmon，Larissa，Cremaste， P＇mehena，Pieas，Nabtilicium，Thaumaci，Me－ hithai，Coroneli，Xynlae，lamla，Philafa， Eentuves．

5．Magnesti（Mayonनia），inhabited by the Magnetes（Máyuntes），was the long and narrow slip of conntry betweea Mts．Ossa and Pelion on the W．and the sea on the E．，and extending from the mouth of the Peneius on the N．to the Pagasaean gulf on the S ．The Magnetes were members of the Amphictyonic league，and were settled in this district in the Momeric times．（Il． ii 756．）The Thessalian Mngnetes are said to have founded the A－iatic cities of Marnesia on Mt．Sipylus ant of Masnesia on the river Macander． （Aristot．ap．Athen．iv．p．173；Conon，29；Strab． xiv．1．647）．The towns of Magnesia were：Cere－ conics，boebe，GlafinkaE，Absonis，Pa－

TIIESSALONICA．
gaside，Loicts，Demicthas，Nelia，Aimetar， Homofe or Homolum，Eneymenak，Mata－ moea，Thamach，Cisthaniea，Ruzrs， Mageesha，Oltzon，Mylae，Stalaethisa，Ci）－ n．deae，Mmanone．

6．Doloris（ $\Delta 0$ лoria），inhabited by the Dolopes （ $\Delta 0$ jomes），a mountainous district in the SW： comer of Thessaly，lying between Mt．Tymphrestus， a branch of Pindus，on the one side，and Mt．Othrys on the other．The Dolopes were，like the Magnetes， an ancient Hellenic people，and memhers of the Am－ phictyonic league．They are mentioned by Homer （Il．is．484）as included in Phthia，but were governed by a subordinate chieftain of their own． Though nominally belonging to Thessaly，they seem practically to have been independeot：and their country was at a later period a constant snbject of contention between the Aetolians and the kings of Macedonia．The only place in Dolopia of the slightest importance was C＇timene．
7．Oetaea（Oitaía），iohabited by the Oetaei （Oitaioc），was the mountainons district around Mt．Oeta in the upper valley of the Spercheins， and to the E．of Dolopia．The Oetaeans appear to bave been the collective name of the rarions prelatory tribes，dwelling upon the northern dc－ clivities of Mt．Oeta，who are mentioned as plun－ dering both the Malians on the east，and the Dorians on the south（Thuc．iii． $92-37$ ，viii．3．）The most important of these tribes were the Aeniānes （Aivầves），called Eniēbes（＇Evı讠̂ves）by Homer（ll． ii．749）and Herolotus（vii．132），an ancient Hel－ lenic Amphictyonic race．（I＇aus．x．8．§ 2 ；Har－ poerat．s．$v$ ．＇Auфıктvoves．）They are said to have first ocenpied the Dotian plain in Pelasgiotis ：after－ warls to lave wandered to the borders of Epeirus， and fiually to have settled in the uper valley of the Spercheius，where Hypata was their chiet town． （Plut．Quaest．Gr．13．p． 294 ；Strab．i．p．61，is． p．442．）Besides Hypata，which was the only place of importance in Oetsea，we find mestion of Srencmiae and Macra Come hy Livy（xxxii．13）， and of Sosthenis（ $\Sigma \omega \sigma \theta \in \nu i s$ ），Ilomilae（ ${ }^{\circ} \mathrm{O} \mu \mathrm{\lambda} \lambda a_{1}$ ）， Cypacra（Kúnuupa）and Phalachthin（\＄a入ax日ia）by Itolemy（iii．13．§ 45．）

8．Mulis，the lower valley of the Spercheius， described in a separate article．［Malis．］

COIN OF THESRALIA．
THESSALIOTIS［Thessalin．］
THESSALUNI＇CA（ $\Theta \epsilon \sigma \sigma a \lambda o d i \kappa \eta ; ~ \Theta \epsilon \tau \tau \alpha \lambda о \nu i k \eta$, Polyb． $8 x$ iii． 4 ；Scymn．Ch．625；Өєб⿱㇒木גovikela， Strab，vii．Epit．3：Eth．Өeqбa入ovikeús），a large and important city，the capital of Roman Macedonis， situated at the head of the Thermaic gulf，in the district anciently ealled Mygdonia．

1．Situatrox．－This is well described by Pliny （iv．10）as＂medio flexn litoris［sinus Thermaici］．＂ The gulf extends about 30 leagnes in a NW．direc－ tion from the group of the Thessalian islands，and then tarns to the NE．，forming a neble basin be－
tween Capes Vardar and Karaburau. On the edge of this basin is the city, partly on the level shore and partly on the slope of a hill. in $40^{\circ} 38^{\prime} 47^{\prime \prime} \mathrm{N}$. lat., and $22^{\circ} 57^{\prime \prime} 22^{\prime \prime}$ E. long. The present appearance of the city, as seen from the sea, is descrived by Leake, Holland, and other travellers as very imposing. It rises in the form of a crescent up the declivity, and is surrounded by lofty whitened walls with towers at intervals. On the E. and W. sides of the city ravines ascend from the shore and converge towards the highest point, on which is the citadel called 'Entarípytov, like that of Constantinople. (A view of Thessalonica from the sea is given by Consinéry). The port is still convenient for large ships, and the anchorage in front of the town is good. These circumstances in the situation of Thessalonica were evidently favourable for commanding the trade of the Macedonian sea. Its relations to the inland districts were equally advantageons. With one of the two great levels of Macedonia, viz. the plain of the "wide-flowing Axius" (Hom. Il. ii. 849), to the N. of the range of Olympns, it was immediately connected. With the other, viz. tha plain of the Strymon and Lake Cercinitis, it communicated by a pass across the neck of the Chalcidic peoinsula. Thus Thessalonica became the chief station on the Roman Via Egnatha, between the Hadriatic and the Hellespont. Its distance from Pella, as given by the Itineraries, is 27 miles, aod from Amphipolis (with intermediate stations; see Act. Apost. xvii. 1) 67 miles. It is still the chief centre of the trade of the district. It contains a population of 60,000 , or 70,000 , and (though Adrianople may possibly be larger) it is the mest important town of European Turkey, next after Constantinople.
2. Name- - Two legendary names, which Thessalonica is said to have borne in early times, are Emathia (Zonar. Hist. xii. 26) and Halia (Steph. B. s. v.), the latter probably having reference to the maritime pasition of the town. During the first period of its authentic history, it was known under the name of Therma (Өépua, Aesch.; Өép $\mu$ ग, Herod., Thucyd,; ©́́puat, Mal. Chronog. p. 190, ed. Bonn), derived, in common with the designation of the gnlf (Thermaicus Sions), from the hot salt-springs, which are found on varions parts of this coast, and one of which especially is described by Pococke as being at a distance of 4 English miles from the modern city. (See Scylax, p. 278, ed. Gail.) Three stories are told of the origin of the name Thessalonica. The first (and by far the most probable) is given by Strabo (vii. Epit. 10), whe says that Tberma was rebuilt by Cassander, and called after his wife Thessalonica, the daughter of Philip: the second is found in Steph. B. (s.v.), whosays that its new name was a memorial of a victory obtained by Philip over the Thessalians (see Const. Porphyrog. De Then. ii. p. 51, ed Bonn): the thirl is in the Etym. Magn. (s.v.), where it is stated that Philip himself gave the name in honour of liis daughter. Whichever of these stories is true, the new name of Thessalonica, and the new eminence connected with the name, are distinetly associated with the Macedonian period, and not at all with the earlier passages of true Greek histery. The name, thus given, became permanent. Throngh the Roman and Byzantine periods it remained unattered. In the Middle Ages the Italians gave it the form of Salonichi or Saloniki, which is still frequent. In Latin chronicles we find Salonicia. In German poems of the thirteenth century the name appears, with a Teutonic ternination,
as Salnek. Tho uneducated Greeks of the present day call the place Saגoviкn, the Turks Selanik.
3. Politteal and Mhlitary History. Thessaloniea was a place of some importance, even while it bore its earlier name of Tiferma. Three passages of chief interest may be mentioned in this period of its history. Nerxes rested here en lis march, his land-forces being eneamped on the plain between Therma and the Axius, and his ships cruis. ing about the Thermaic gulf; and it was the view from hence of Olympus and Ossa which tempted him to explore the course of the Peneius. (Herod. vii. 128 , seqq.) $\Lambda$ short time (n. c. 421 ) beforo the breaking out of the Peloponnesian War, Therma was occupicd by the Athenians (Thucyd. i. 6t); but two yenrs later it was given up to Perdicens (Id. ii. 29.) The thind mention of Therma is in Aeschines (de Fals. Leg. p. 31, ed. Bekk), where it is spuken of ns one of the places taken by Pausanias.

Tbe true history of Thessalonica begins, as we have implied :bove, with the decay of Greek nationality. The earliest author whe mentions it under its new name is Polybius. It seems probable that it was rebuilt in the same year (b. c. 315) with Cassundreia, immediately after the fall of I'ydna and the death of Olympins. [Cassavdrels.] We are told by Strabo (l. e.) that Cassander incorporated in his new city the population, not only of Therma, hat likewise of three smaller towns, viz. Aeneia and Cissus (which are supposed to have been on the eastern side of the gulf), and Chalastra (which is said by Strabo (vii. Epit. 9) to have been on the further side of the Axius, whence Tafel (p. xxii.) by some mistake infers that it lay between the Axius and Therma). It does not appear that these earlier cities were absolutely destroyed; nor indeed is it certain that Therma lost its separate existence. Pliny (l. c.) seems to imply that a place bearing this name was near Thessalonica; but the text is probably corrupt.

As we approach the Reman period, Thessalonica begins to be more and more mentioned. From Lisy (xliv. 10) this city would appear to have been the great Macedonian naval station. It surrendered to the Romans after the battle of Pydna (Ib. xliv, 45), and was made the capital of the second of the four divisions of Macedonia (1b. xlv. 29). Afterwards, when the whole of Macedonia was reduced to one province (Flor. ii. 14), Thessalonica was its mest important city, and virturilly its metropolis, thoogh not se called till a later period. [Macenonia.] Cicero,during his exile, found $a$ refuge here in the quaestor's house (pro Planc. 41); and on his jonrneys te and from his province of Cilicia he passed this way, and wrote here several of his extant letters. Daring the first Civil War Thessalunica was the bead-quarters of the Pompeian party and the senate. (Dion Cass. sli. 20.) During the second it took the side of Octavius and Aatonins (Plat. Brut. 46; Appian, $B . C$ iv. 118 ), and reaped the udvantage of this conrse by being made a free city. (See llin. l. c.) It is possible that tho word èneve日pias, with the head of Octavia, on some of the coins of Thessalonica, bas reference to this circumstance (see Eckhel, ii. p. 79); and some writers see in the Vardier gate, mentioned below, a monument of tho victory over Brutus and Cassius.

Even before the close of the Republic Thessalonica was a city of great importance, in consequence of its pasition on the line of commanication
between Rome and the East. Ciccro speaks of it as posita in gremio imprrii nostri. It increased in size and rose in importance with the consolidation of the Empire. Strabo in the tirst century, and Lucian in the second, speak in strong language of the nmount of its population. The supreme magistrates (apparently six in number) who ruled in Thessalonica as a free city of the Empire were entitled mo入itapұat, as we learn from the remarkable coincidence of St. Luke's language (Act, Ap. xvii. 6) with an inseription on the Jardar gate. (Börkh, 1967. Belley mentions another inseription containing the same torm.) In Act. Ap, svii. 5, the бjpus is mentioned which formed part of the constitution of the city. Tafel thinks that it had a ßoùiे also.

1hring the first three centuries of the Christian era, Thessalumica was the capital of the whole comntry between the Adriatic and the Black Sea ; and even after the founding of Constantirople it remained practically the metropolis of Greece. Macedenia, and lllyricum. In the middle of the third century, as we learn from coins, it was made a Ioman colonite ; perhaps woth the view of strencthening this position against the barlarian invasions, which now became threatening. Thessalonica was the great safezuard of the Empire during the first shock of the Guthic inroud: Constantine passed some time here after his victory over the Sarmatians; and perhaps the second arch, which is mentioned below, wats a commemoration of this victory : he is said ulan by Zosimus (ii. p. 86, ed. Bonn) to have constructed the port, by which we are, no donbt. to) understanal that be repaired and imponved it after a time of comparative neglect. Passing by the dreadful massacre by 'Theodrsins (Gibbon's Rome, ch. xsvii.), we come to the Sclavonic wars, of which the Gothic wars were only the prelude, and the brunt of which was successfully horne by Thessalunica from the middle of the sixth century to the latter part of the eighth. The bistury of these six Sclavonic wars, and their relation to Thessalonica, has been elaborated with great care by Tafel.

In the course of the Middle Ages Thessalonica was three times taken ; and its listory during this perind is thas convenieotly divided into three stages. Ont Sunday, July $29 t h, 904$, the saracen fleet appearel before the city, which was stermed after a few days' fighting. The slaughter of the citizens was dreadful, and vast numbers were sold in the various slave-markets of the Levant. The story of these eventrs is tuld by Jo. Cameniata, who was crozierbearer to the arthbi hop of Theessalonica. From his narrative it has beed inferred that the population of thi" city at this time must have been 220,000 . ( $D e$ Fiscitho Thessalonicensi, in the volume entitled Throphlemis Continutus of the Boon ed. of the Byz. writers, 1838 .) The next great catastrophe of Thessatonca was catsed by a differont enemy, the Nommans of strily. The flect of tancred sathed round the Borea to the Thermaic gulf, while an arny marched by the Via Eenatia from Dyrrhachiun. Thessilatiica co, staken on Ane, 15th, 1145 , and the Greeks were barlarously treated by the Latins. Their cruelties are fleneribed by Nicetas Choniates (de Andron. Commenw, p. 38s, ed. Bonn, 1835). The celebrated Eustathius wib archbistop of Thessalunica at this time; and he wrote an account of this capture of the eity, which was fint published by Tafel (Tiibingen, 1832), and is now pritted in the Boun ed.

THESSALONICA.
of the Byz. writers. (De Thessalonica a Latinis copta, in the same vol. with leo Grammations, 1842.) Suon after this period follows the curious history of western fendalism in Thessalonica under Boniface, marquis of Montferrat, and his successors, during the first half of the 13th ceotury. The city was again under Latin domirion (baving hem sold by the Greek emperor to the Venetians) when it was finally taken ly the Turks under Amurath 11., in 1430 . This event also is tescribed by a writer in the Bomn Byzantine scries (Joamnes Anagnostes, de Thessalmicensi Excidio Narratio, in the same volume with Plranzes and Cananus, 1838).

Fur the medieval history of Thessalosica see Mr. Finlay's works, Merlieval Eireece (1851), pp. 70, 71, 135-147; Byzmatine and Greek Empires, vol. i. (1853), pp. 315-332, vol. ii. (1854), pp. 182, 264 $-266,607$. For its mowern condition we must refer to the travellens, especially Beanjour, Cunsinéry, 1lolland, and Leake.
4. Ecclesiasticai, History. - The anmals of Thessulonica are no closely comected with religion, that it is desirable to review them in this aspert. After Alexamer's death the Jews sproad rapidly in ail the large cities of the provinces which bad formed bis empire. Hence there is no doubt that in the first century of the Christian era they were settled in considerable numbers at Thessadnica: indeed this circumstance contributed to the first establishment of Christianity there liy St. Paul (Act. Ap, sxii. 1). It seems probable that a large comnunity of Jews has been found in this city ever since. They are mentioned in the seventh century during the Sclavonic wars; and agrain in the twelfith by Eustathius and Benjamin of Tulela. The events of the fifteenth century had the effeet of bringing a large number of Spanish Jews to Thessilomea, Pranl Luras says that in his day there were 30,000 of this nation here, with 22 synagugnes. More recent authorities vary between 10,000 and 20,000 . The present Jewish quarter is in the south-east part of the tuwn.

Cluristianity, obce established in Thes:aloniea, spread from it in varims directions, in consequence of the mervantile relations of the city. ( 1 Thess. i. s.) During the succeeding centuries this city was the bulwark, not simply of the Byzantine Einpire, but of Oriental Christendom,-sand was largeiy instrumental in the conversion of the Sclavonimus and Bulgarians. Thus it received the desiguntion of "The Orthodnx City." It is true that the Jesends of Demetrns, its pation saint (a martyr of the early part of the fourth century), disfigure the Cluristian laistory of Thessalonica; in every siege success or failure seems to lave been attributed to the granting or withholding of his favour: but still this see hats a distinguished place in the annals of the Church. Theodusius was baptized by its bishop; even his massacre, in consequence of the stern severity of Ambrose, is chiefly commected in our mints with ecclesiatical assoriations. The see of Thessalunica became almost a patriarclate after this time; and the withdrawal of the provinces subject to its jurisdiction from comection with the see of lome, in the reign of Leo lsauricus, became one of the principal causes of the separation of Eist and West. Cameniata, the natire historian of the calamity of 904 , was, as we have seen, an ecclesastic. Eustathius, who was archbishop in 1185 , was, beyond dispute, the most learned man of his age, and the anthor of an invaluable commentary on the lhad
and Odyssey, and of theulogical works, which have been recently publisbed by Tafel. A list of the Latin archbishops of Thessalonica from 1205 to 1418, when a Roman hierarchy was establisbed along with Western feudalism, is given by Le Quien (Oriens Christionus, iii. 1089). Even to the last we find this city comected with questions of religious interest. Symeon of Thessalonica, who is a chief authority in the modern Greek Church on ritual subjects, died a few menths before the fatal siege of 1430 ; and Theudore Gaza, who went to laly soon atter this siege, and, as a Latin ecclesiastic, became the translator of Aristotle, Theophrastus, and Hippocrates, was a native of the city of Demetrius and Eustathius.
5. Remains of Antiguity. - The two monuments of greatest interest at Thessalonica are two arches connected with the line of the Via Egnatia. The course of this Roman road is undoubtedly preserved in the long street which intersects the city from east to west. At its western extremity is the Vardir gate, which is nearly in the line of the modern wall, and which has received its preseot name from the circumstance of its leading to the river Jardiror Axins. This is the Roman arch believed by Beaujour, Holland, and others to have been erected by the people of Thessalomica in bonour of Octavius and Antonius, and in memory of the battle of Philippi. The arch is constructed of large blocks of marble, and is about 12 feet wide and 18 feet high; bat a considerable portion of it is buried deep below the surface of the ground. On the outside tace are two bas-reliefs of a Roman wearing the toga and standing before a borse. On this arch is the abovementiuned inscription containing the names of the politarchs of the city. Leake thinks from the style of the sculpture, and Tafel from the occurrence of the name Flavius in the inscription, that a later date ought to be assigned to the arch. (A drawing of it is given by Cousinery). The other arch is near the eastern (said in Clarke's Travels, iv. P. 359, by mistake, to be near tl.e western) extremity of the main street. (A drawing of this areh also is given by Cousinéry and an imaginary restoration by 1 'ococke.) It is built of brick and faced with marbie, and formerly consisted of three archways. The sculptured camels give an oriental aspect to the roonument; and it is gecerally supposed to commemorate the victory of Cunstantine over Licinius or over the Sarmatiaas.
Near the line of the main street, between the two above-mentioned arches are four Corinthian colomns supporting an architrave, above which are Caryatides. This mounuent is now part of the house of a Jew; and, from a notion that the figures were petrified by magic, it is called by the Spanish Jews Las Incantadis. The Turks call it Sureth-Maleh. (A riew will be found in Cousinéry, and a nore correct one, with architectural details, in Stuart and Revett's Atheri, Antiq. vol. iii. ch. 9. p. 53). This colonade is supposed by some to bave been part of the l'ropylaes of the Hippodrome, the position of which is believed by Beaujour and Clarke to have been in the south-eastern part of the town, between the sea and a building called the Rotunda, now a mosque, previonsly the church Eski-Metropoli, bat formerly a temple, and ia construction similar to the Pantheon at Rome. (Pococke has a ground-plan of this building.) Another mosque in ThessaJotica, called Eski-Djumu, is said by Beaujour to have been a temple cunsecrated to Venus Thermaca.

The city walls are of brick, and of fireek construction, resting on a much older fonmation, which consists of hewn stunes of innnense thicknes. Everywhere are broken columns and fragnubts of sculpture. Many remains were taken in 1430 to Constantinople. One of the towers in the city wall is called the Tower of the Statue, because it contains a colussal figure of Thessalonica, with the representation of a ship at jts feet. The castle is partly Greek and partly Venetian. Somse colunms of verd antique, supposed to be relics of a temple of Hercules, are to be noticed there, and also a shattered triumplaal arch, erected (as an inscription proven) in the reign nf Marens Aurelius, in homour of Antominus Pius aod bis dauglter Faustina.

In larmony with what has been noticed of its history, Thessalonica has many remains of ecclesiastical autiquity. Leake says that in this respect it surpasses any other city in Greece. The church of greatest interest (now a mosque) is that of St. Sophia, built, according to tradition, like the church of the same name at Constantinople, in the reign of Justinian, and after the designs of the arclitect Authemius. This church is often mentioned in the records of the Middle Ages, as in the letters of Pope Innocent 11I. sod in the account of the Norman siege. It remains rery entire, and is fully described hy Beaujour and Leake. The clureh of St . Demetrius (apparently the third on the same site, and now also a mosque) is a structare of still greater size and besuty. Tafel believes that it was erected about the end of the seventh century ; but Leake conjectores, from its architectural features, that it was built by the Latins in the thirteenth. Tatel has collected with much diligence the notices of a great number of clrurches which hare existed in Thessalonica. Dapper says, that in his day the Greeks had the use of thirty cluurches. Walpole (in Clarke's Tracels, iv. p. 349) gives the number as sixteen. All travellers have noticed two ancient pulpits, consistiog of "single blocks of variegated marble, with small steps cut in them," which are among the most interesting ecclesiastical remains of Thessalonica.
6. Authokities. - The travellers who have descibed Thessalonica are numerous. The most important are I'aul Lacas. Second Joyage, 1705 ; Pococke, Description of the East, 174:3-17+5; Beaujour, Toblean du Commerce de la Grice, tisoslated into Eiughish, 1800 ; Clarke, Travels in Eurrope, gic. 1810-1823; Holland, Travels in the Ioniun lslos quo. 1815 ; Cunsihéry, Joyage dans la Maciduine. 1831 : Lenke, Northern Greece, 1835 ; Zachariii, Reise in den Orient, 1840; (irivebach, Kcise durch Rumelien, 1841 ; Bowen, Mount Athus, Thessaly, and Epirns, 1852.

In the Nemvires de TAcademie des Inscriptions, tom. xxxvili. Sect. hist. pp. 121-146, is an essay on the subject of Thiessalunica by the Ablié Belley; but the most elaborato work ou the subject is that ly Tafel, the first part of which was publishen at Tubingen in 1835. This was

CUIN OF THESALONICA.
afterwards reprinted as "Prolegomana" to the Dissertatio de Thessalonica ejusque Agro Gengraphica, Berlin, 1839. With this should be compared his work on the I'ia Eignatio. To these authorities we ought to add the introduction to some of the commentaries on St. Paul's E'pistles to the Thessalonians, -especially those of Koch (Berlin 1849) and Linnemann (Güttingen, 1850).
[J. S. H.]

## THE'STIA. [Thestifases.]

THESTIEASEN ( (ecotiet̂s, Pol. r. 7), areusually called the ioliabitants of a town Thestia in Aetolia. But no town of this name is mentioned by the ancient writers, and it is $n 0$ improbable that the tuwn itself was called $\Theta \in \sigma \tau u \epsilon i s$. Tbe name occurs only in Polybins, and the exact site of the place is unknown. We only learn, from the narratise of Polybius, that it was situatel in the Northern part of the upper plain of Actolia. The name is perhaps connected with Tbestius, one of the old Aetolian beroes.

THETIDIUM1 (Єeriסıov, Strab. ix. p. 431 ; Polyb. xviii. 3, 4 ; ©etiסetod, Eurip. Androm. 20; ©eatiסetov, Steph. B. s. c:: Eth. ©etıסet's), a place in Thessaly, close to Pharsains, where Flamininus encamped at the end of the second march from Pherae towards Scotussa, before the battle of Cynoscepbalae. It derived its name from Thetis, the mother of Achilles, the national hero of the Achuead Phtbiotse. Leake places it at or near Maguik, on the opposite baok of the Enipens. (Northern Greece, vol. iv. pp. 472, 473.)

THEUDORLA, one of the cliief towns of the Atbamanss in Epeirus, is identified by Leake with the moderd Thodhoriana, a village sitnated near Mount Teumérka in a pass which leads from the Achelons to the Arachthus. (Liv. xxsviii. 1; Leake, Northern Greece, vol. iv. p. 212.)

TIIEUMA, a town of Tbessaly, vear the froutiers of Dolopia (Liv. axsii. 13.)

TIIELPROSUPON. [Phoenicia, p. 606, a.]
THEVESTE ( ©єovéorn, Ptol. iv. 3. § 30), an important town of Numidia, but which is only mentioned in the later writers. It was a Roman colony (Gruter, Inscr. p. 600 ; Itin. Ant. p. 27), and the place where many roads running in a SE. direction into the Roman province of Africa, had their commencement. (Cf. $7 \operatorname{tin} .4 n t$. pp. 33, $46,47,53,54$.) It is the town of Tebessa, recently discovered ly General Negrier, considerable ruins of which still exist, especially the ancient walls, the circumference of which iudientes a town capable of containing 40,000 iuhabitants. (see Letrome, in Rev. Archiol. iv. p. 360, sqq-; Sur l.Are de Triomphe de Tereste, fic., Paris, 1847; Jahn's Jahrbücher, lii. p. 409.) [T. H. D.]

THIA. [ThERA.]
THLANNICE ( ©ravviкخ́, Arrian, Per. P. Eur p. 7), or THIANITICE ( (tapitiki, Anon. Per. P. Fuc. p. 14), a district of Asia in the Pontus Euxinus, which was separated from, Colchis by the river Ophis, Its name probably should be Samice, as the Sanni, or Tzani, were a well-known people in this region. (Cf. Mannort, iv. p. 378, vi. pt. 2. p. 421; Gail, ad Arriun. p. 95.)
[T. H. 1).]
THLAR, a town of the Contestani in Hispania Tarracononsis, between Carthago Nows, and Ilici (Itin. Ant. p. 401). Variously identified with San Gizes and Orihuela, near which latter place are many roins. (Florez, Esp, Sirgr. v. p. 30, vii. p. 124.) [T. II. D.]

T11113A ( $\Theta$ i6a: Fth, $\Theta, 6105$ ), a district in l'ontus, so called from an Amazon shan there by Herenles. The inlabitants were said to be suecrers, whose
breath was poismous, and who wonld not perish if thrown into the water, but would float on the surface. (Eustath, ad Dionys. Pcr. 828; Steph. B. s. v. Өi6ats; Plut. Symp. v. i. § 1 ; Phylarch. ap. Plin, vii. 2. s. 2.)

THILSAPHATA (Amm. Marc. xxv. 8), a fortifed town in the south of Nesopotamia, probably the present Tel el Hava, between M/usul and the Sinjar, in the neighborthood of the Tigris.
[V.]
THILUTHA, an impregnable fortress on an island in the Euplirates, near Anatho, which defied the arms of Julian (Amm. Marc. xxiv, 2). Kasimus (iii. 15) speaks of this island, and of the impreguable fortress ( $\phi$ рии́pıò ỏ $\chi$ vpútaтav) situated upon it, but without mentioning its name. It is described by Isidorus Charax (Sans. Parth. § 1. ed. C. Nüller) as an island in the Enplırates, containing a treasury of the Parthians, and distant two scboeni from Anatho. The old editions read 'OגaEous; but the MSS. have 'Oגaboús, which Miiller has changed into OiגaBoús, and there can be little doubt of the propriety of this correction. It corresponds to the island called Tillous by Chesney (vol. i. p. 5i), and is his map Telbes or Anatelbes, containiog ruins of very adcient buildings. (See Miiller, ad /sid. Char. l. c.)

THINAE (Oivat, or इivar, P'tol, vii. 3. §6, viii. 27. § 12), or TH1NA (Өiva, Arrian, Per. M. Erythr. p. 36), a capital city of the Sinae, who carried on here a large commerce in silk and woollen stuffs, It appears to have been an ancieot tradition that the city was surrounded with brazen walls ; but Ptolemy remarks that these did not exist there, nor anything else worthy of remark. Tbe ancient writers differ very considerably as to its situation. According to the most probable accounts it was either Nankin, or rather perhaps Thsin, Tin, or Tein, in the province Schensi, where, according to the accounts of the Chinese thenselves, the first kiogdom of Sin, or China, was foonded. (CE. Ritter, Erdkunde, ii. p. 199.)
[T. H. D.]
THINO'DES ( $\tau \delta \Theta_{1 \nu \omega ิ \delta e s ~ u ̈ p o s, ~ i . ~ e . ~ t h e ~ S a n d ~ I l i l l . ~}^{\text {a }}$ Ptol. iv. 5. § 18), a mountain of Egypt, belongin is to tho Libyan chain, on the S. borders of Marmarica.
[T. H. D.]
THIRMIIDA, a place in Numidia, the situation of whicb is totally unkoown. (Sull. Jug. 12.) [T. II. D.]

THIS. [Abydes.]
THISBE (E. $\sigma 6 \eta_{7}$, Hom., Pans., Steph. B. s. r.; ©iofat, Strab,, Men. : Eth. Etr马aîos), a tuwn of Bocotia, described by Stralo as situated at a sbort distance from the sea, under the southern side of Helicon, bordering upon the confines of Thespiac and Coroneia. (Strab. ix. p. 411.) Thisbe is thentioned by Homer, who says that it abounds in wild
 buth Strabo and Stepbanus B. remark that this epithet was given to the city from the abundance of wild pigeons at the barbour of Thisbe. Menophon remarks that Cleombrotus marched through the territory of Thisbe on his way to Creusis before the battle of Leuctra (Ifell. vi. 4. § 3.) The only public bnilding at Thisbe mentioned by Pausanias (ix. 32. § 3) was a terople of Hercules, to wbom a testival was celebrated. The same writer adds that betweel the monntain on the sea-side and the monntain at the foot of which the town stood, there is a plaio which would be inundated by the water fluwing into it, were it not for a mole or camseway constracted through the middle, by means of which the water is divented every year into the part of the plain lying
on one side of the causeway, while that on the other is cnltivated. The ruins of Thisbe are found at Kakisia. "The position is between two great summits of the mountain, now called Karamanghi and Paleovuna, which rise majestically above the vale, clothed with trees, in the upper part, and covered with snow at the top. Tbe modern village lies in a little hollow surrounded on all sides by low cliffs connected with the last falls of the monnt:in. The walls of Thisbe were about a mile is circuit, folluwing the crest of the cliffs which surround the village; they are chiefly preserved on the side towards Dobrent and the south-east. The masonry is for the most part of the fourth erder, or faced with equal layers of large, oblong, quadrangular stones on the ontside, the interior as usual being filled with loose rubble. Oi the principal height which lies towards the monntain, and which is an entire mass of rock, appear some reparations of a Jater date than the rest of the walls, and there are many IIellenic foundations on the face of this rock towards the village. In the cliffs outside the walls, to the northwest and south, there are many sepulchral excavations." (Leake, Northern Greece, rol. ii. p. 506.) Leake observed the mole or causeway which Pausanias describes, and which serves for a road across the marsh to the port. The same writer remarks that, as the plain of Thisbe is completely surrounded by heights, there is no issue for the river which rises in the Ascraea and here terminates. "The river crosses the causeway into the marsh by two opeuings, the closing of which in the winter or spring would at any time canse the upper part of the plain to be innodated, and leave the lower fit for cultivation in the summer: but as the river is now allowed to flow constantly through them, the western side is always in a state of marsh, and the ground has beconie much higher on the eastern side."

The port of Thisbe is now called Vathy. The shore is very rocky, and abounds in wild pigeons, as Strabo and Stephanos l:ave nbserved; but there is also a considerable number at Kakósia it-elf. The Roman poets also allude to the pigeons of Thishe. Hence Ovid (Ifet. xi, 300) speaks of the "Thisbaeae columbae," and Statins (Theb. rii. 261) describes Thisbe as "Dionaeis avibus circumsooa." Thisbe is mentioned both by Pliny (iv. 7. s. 12) and I'tolemy (iii. 15. § 20).

## THISOA. [Theisoa.]

## THIUS. [MEgalopolis.]

THMU1S (©rovis, Herod. ii. 168; Aristides, Aegypt. vol. iii. p. 610; Ptol. iv. 5. § 51, the modern Tmai, was a town in Lower Aegypt, sitnated upon a canal E. of the Nile, between its Tanite and Mendesian branches. It was the capital of the Thmuite Nome, in which the Calasirian division of the Aegyptian army possessed lands. At the time of Herodutas's visit to the Delta the Thmuite Nome had been incorperated with the Mendesian. Their incorporation was doubtless owing, partly to the superior size of the latter, and partly to their having a common object of worship in the goat Mendes (Pan), of whom Thmu was in the old Aegyptian langnage (IIieronym. in Isairm, xlvi. I) the appellation. In the reigos of Valentinian and Theodosius the Great (A, D. 375 , full.) Thmais was a town of some consequence, governed ly its own macistrales, and exempt from the jurisdiction of the Alexandrian prefect (Amm. Marc, xxii, 16. §6). It was also an episcopal see, and one of its bishops, Serapion, is mentioned by Heracleanus. (ap. Photium, p. 65, ed.

Bekker.) Iemains of the ancient city are supposed to exist at Tel-etmai or 'Tmai, SW', of Mnnsoorah. A monolithal slirine and many sarcophagi of granite have been found there, and a factitious mound at the village of Ternay, raised above the level of the innadation, is probably an Aegyptian work. (Champoilion, Egypte sous les Pharaons, vol, ii. p. 114.) Tbat dykes were essential to the preservation of the city appears from the description of it by Aristides (l. c.), who eepresents Thmais as standing upon and surrounded by flat and marsly grounds. [W.B.D.]

THOAE. [ECHIN,NDES.]
THOANA. [THANA]
THO'ARIS or THOA'RIUS (Єb́apis or Єoápios), a small coast river in Pontus Polemoniaus (Arrian, Peripl. P. E., p. 16; Anon. Peripl. P. E. p. 11), is Dow called Gheureh, Irmak, or perhaps more correctls Thureh Irmak. (Hamilton, Researches, i. ]. 2:9.)
[L. S.]
 town of Arcadia in the district Parrhasia, situated upon a height on the river Aninins, which fluws into the Helisson, a tribntary of the Alpheins. The tewn was said to lave been founded by Thocnus, the son of Lycaon, and was deserted in the time of Pausanias, as its inlabitants had been removed to Megalopolis. It is placed by Leake in the pasition of Vromosela. (Pads. viii. 3. § 2, 27. § 4, 29. § 5; Steph. B. s. v.; Leake, Murea, vol. ii. p. 293.)

THODINA, [TAMNA.]
THONITIS LACUS. [THOSritis.]
THORAE. [Attica, p. 331, a.]
THO'RICLS (Oopikós: Eth. Ooplnios: Theriko), a town of Attica on the SE. coast, and about 7 or 8 miles N. of the promontory of Sunium, was originally one of the twelve cities into which Attica is said to have been divided before the time of Theseas, and was afterwards a demns lelanging to the tribe Acamantis. (Strab. ix. p. 397.) It continned to be a place of importance during the flumrisling period of Athenian history, as its existing remains prove, and was hence furtified by the Athenians in the 24th year of the Peloponnesian War. (Xen. Hell. i. 2. §1.) It was distant 60 stadia from Abaphlystus upon the western coast. (Nen, de Vect, 4. § 43.) Thoricus is celebrated in mythology as the reaidence of Cephalus, whom Eus or Aurora carried off to dwell with the gods. (Apollod. ii. 4. \& 7 ; Enrip. Hippol. 455.) It has been conjectured by Wordsworth, with much probability, that the idea of Thoricus was associated in the Athenian mind with such a translation to the gods, and that the " Thorician stone" ( Oopikios $\pi i \tau \rho 0 s$ ) mentioned by Sophodes (Oed. Col. 1595), respecting which there lias beed so moch duubt, probably has refere⿻ce to such a migration, as the poet is describing a similar translation of Ocdipus.

The fortifications of Thorions snrrnunded a small plain, which terminates in the harbour of the city, Dow ealled Porto Mandr\{. The ruins of the walls mas be traced following the crest of the hills on the northern and southern sides of the plain, and crossing it on the west. The acropolis seems to have stood upon a height rising above the sheltered creek of Frango Limiena, which is separated anly by a cape from Porta Mandri. Below this leikht, on the northern side, are the mins of a theatre, of a singular form, being an irregular curre, with one of the sides longer than the other. In the plain, to the westward, are the remains of a quadran- ular c lintade, with Doric colmmos. (T, eake, Demi of A tica,
p. 68. seq. 2nd ed.; Wordsworth, Athens and Alticica, p. 208 , seq.)

THORNAX ( $($ ópva $\xi$ ). 1. A mountain near the city of Hermione in Argolis, between whieh and Mt. 1'ron the road ran from Hermione to Halice. It was sulsequently called C'occygium, because Zeus was said to have been here trausformed into a cuckoo; and on its sunmit was a temple of Zeus Coccygias. (Pias. ii. 36. §§ 1, 2; Leake, Peloponnesiaca, p. 288: Curtius, Peloponnesus, vol ii. p. 463.)
2. A mountain in Laconia, on the road from Sparta to Sellasia, upon which stood a eolossal statue of Apullo l'ythaeus. (Herod. i. 69; Paus. iii. 10. $\$ 8 ;$ Steph. B. s. v.; Leake, Morea, vol. ii. p. 5:34, Peloponnesiaca, pp. 348, 352: Boblaye, Rech. p. 75; Luss, Peloponnes, p. 190; Curtius, Peloponuesos, vol. ii. pp. 237, 259.)

THO'SP1A (Owaria, 1'tol. v. 13. § 19, viii. 19. § 12), the capital of the district Thuspitis. [T. H.D.]

THOSPl'Tls ( Өaoritits, l'tol. v. 13. § 18), a district of Armenia Major. It lay at the northeru side of the Lacus Thospites ( $\eta$ Oar $\begin{aligned} & \text { itcs } \lambda i \mu \eta \eta \text {, }\end{aligned}$ Ptol. ib. §7), through which the Tigris flowed (Plin. vi. 27. s. 31). It is perhaps the same lake called Thonitis or Thopitis by Strabo ( $\begin{aligned} & \text { avĩıs or } \Theta \omega \pi i \tau!s, ~\end{aligned}$ xi. p. 529), and Priscian (Lacns Thonitidis, Perieg. 913), the water of which is deseribed by strabo as nitrons and undrinkable. It is probably the modern Wan, in the district of Tosp, and hence called by the Armenians Dzow Tospai.
[T. II. D.]
THRACLA (Єрр́кŋ, Hom. ; Op

 Ө $\rho \bar{\eta} \xi$ : Tharax. Threx, the latter form being chietly, if not exchasively, empluyed of gladiators), a country at the south-eastern estremity of Europe, and sejarated from Asia only by the Propontis and its two narrow channels, the Bosporus and the Hellespont.
I. Name. - Besides its orlinary mame, the country had, according to Steph. B (s. o.), two older appellations, Пёрк $\eta$ and 'Apia; and Gellias (xiv. 6) mentions Sithon as anotber. Reypecting the origin of these names, various conjectures have been unale botb in ancient and in modern times; bat as none of then, with the exception to be presently mentioned, are of mach value, it is not worth while to devote any space to their consideration. * The exception alluded to is the etymology adopted by Cal. Mure (Ilist. of Lang. and Lit. of Anc. Greece, i. 1. 153, note), which is far more probalie and satistactory thau any other that the present witer has seen, and which derives the name Thrace from the adjective $\tau \rho a \chi$ eia, "rogyed," by the cimmon transfer of the aspirate. Thus the mane would indicate the geographical character of the various districts to which it is given; for, as we shall see, it was by no means confined to the combtry which is the special subject of the present nolice.
11. Rxrever - In the earliest times, the region called Thrace hal no definite boundaries, but was ufteu regarded as comprising all that part of Europe which lies to the north of (irecce. Macedonia, in the south, is spoken of by Hecataeus as bellunging to it (cf. Mel. ii. 2, sub fin., where the Chalcidic penimsula is described under the title of Thrace); and

* Those who me curims about such matters may comsult Steple. B. . . e..; En-tath. ad Dion. Per. 322, 3:33: Sickler, Hundb. i. §今 f*U; Rurkel ad Steph. B. 1. foo; Tzschacke. ad M l. ii. 2. P. 62; Kearick, Ihilol, Mus. i. p. 618.

Scythia, in the worth, is included in it by Steph. B. (s.v. Zкïau: ef. Anm, xxvii. 4. §̧3). This explains the fable reported by Andron (Thetz, ad $\boldsymbol{B}$ ycopir: 894), to the effect that Oceanus had fonr daughters, Asia, Libya, Enropa, and Thracia; thus elevating the last-named country to the rank of one of the four quarters of the known-or rather uuknown-world. But as the Greeks extended their geographical knowledge, the designation Thrace becane more restricted in its application, and at length was generally given to that part of Europe which is included withim the following boundaries: the lster on the N. (Strab. ii. p. 129; Plin. iv. 18; Mel. ii. 2); the Euxine and the Bosporos on the E.; the l'ropontis, the IIellespont, the Aegean, and the northern part of Macedonia, on the S.; the Sitrymon, or subsequently, i. e. in the time of Philip 11. and his son Alexander the Great, the Nestus (Strab vii. pp. 323. 330; Ptol. iii. 11), and the countries occupied by the llyyrians, on the W., where, however, the honndary was never very settled or accurately known. (Plin, and Mel. ll.cc.) These were the limite of Tbrace until the Romans sublued the country, when, in the reign of Augustus, it was divided into two parts, separatel! by the Haemus; the portion to the south of that mountain chain retaining the name of Thrace, while the part between the ister and the Haemus received the appellation of Muesia, and was constituted a Roman province. [Moesia, Vol. II. p. 367.] But evell after this period both countries were sometimes incloded under the old name, which the Latin pocts frequently ased in its earliest and widest extent of meaning. (Cf. Heyne, all Jirg. Aen. xi. 659; Barman, ad J'al. Flacc. iv. 280; Muncker, ad Hygin. Fab. 138; Tzsehucke, ad Mel. ii. 2. p. 63.) A the little that is known about Moesia is stated in the article above referred to, the present will, us far as possible, be contined to Thrace proper, or south of the Haemus, corresponding pretty nearly to the modern Roumelia, which, however, extends sonuwhat more to the west than ancient Thrace.
111. Phystcal Geograthy, Climate, Probuetions, \&c. - Many eircuinstances might have leti us to expect that the ancients would have trammitted to us full iuformation respecting Thrace: its proxinity to Greece; the numerous Greek colonies established in it; the fact that it was traversed by the bighruad between Earope and Asia; and that the capital of the Eastern Eapire was sitnated in it,-all these thing scem calculated to attract attention to the country in an unusnal degree, and to induce authors of sarious kinds to eniploy their pells in recording its natural and political history. Yet the latest and must profond listorian of Greece is compelled to admit that, apart from two main roads, "scarcely anything whatever is known of [the interior of] the country." (Grote, vol. xii. p.34, note. For this various reasons may be assigned; but the principal one is the barbarous character, in all ages, of the occupauts of the land, which has, at least until very recently, precluded the possibility of its exploration by peaceful travellers.* Those who have

[^34]trasersed it have heen alnost invariably engared ini military enterprises, and two much occupied with their immediate objects to have cither opportunity or inelination, even had they possessed the necessary qualifications, to observe and describe the natural features of the country. What adds to the difficulty of the writer on the classical geography of Thrace is the unfortunate loss of the whole of that portion of the seventh book of Strabo which was devoted to the subject. Strabo, in several parts of his work, treats incidentally of Thrace: but this is a poor substitute for the more systematic account of it which bas perished, and of which little more tham a table of contents has been preserved in the meagro epitome which alone remains of it.

In modern times, several travellers have entleavonred, with various degrees of success, to explore the country ; and some of them have published the results of their investigntions ; but it is evident from their rery frequent disagreement as to the sites of the places which they attempt to identify with those mentioned in ancient writers, that as yet the necessary data lave not been obtaioed; and the Itinernries, instead of assisting, not seldom add to the difficulty of the task, and render its accomplishment almost hopeless, Moreover, the extent of country examined by these travellers was very limited. "The mouotainous region of Phodope, bonuded on the west by the Strymon, on the north and east by the Hebrus, and on the south by the Aegean, is a terra incognita, except the few Grecian colonies on the coast. Very few travellers have passed along or described the southern or king's road; while the region in the interior, apart from the bighroad, was absolutely unexplored uotil the visit of M. Viquesuel in 1847 . (Grote, l. c.)

The results of this traveller's researches lave not yet, we believe, nppeared in a complete and connected furm. His reports to the French minister by whom he was comnissioned are publisbed in the work already referred to ; but most of them are mere outlines, written on the spot from brief notes. They contain much that is valuable aod interesting ; hut no one except their author could make full use of them ; and it is to be hoped that he may be able to employ the materials so ably collected in the composition of a work that would dispel much of the obscnrity that at present rests upon the conatry. M. Viquesnel was engaged little more than a year in Thrace, a period evidently insufficient for its complete exploration ; accordingly he seems to have devoted lis principal atteution to its geology, especially of the the mountain systems, above all in the district of Rhodope.

According to Ami Boués chart of the geological structure of the globe, copied in Johnston's Physicul Atlas, the three principal geological formations in Thrace are: (1) the crystalline schistous, comprehending all the granitoil rocks; this occupies the W. portion of the country, and a small district on the Euxine, immediately S. of the Haemus : (2) the tertiary, extending over the basin of the Hebras : (3) the primary stratifications, or the transition series, includiog the carboniferous formations ; this occupies the SE. part of the conutry, and a regrion S. of the Haemus, and W . of the tertiary formation above meationed. Near the sources of the Bourghaz, Viquesnel found voleanic rocks (p. 213).

The surface of Thrace is, on the whole, decidedly mountainous, the vast plains spoken of by Virgil (Aer. iii. 13) belonging to Moesia. From the great range of Haemus, three chaias of mountaius branch
off towards the SE., and with their varions ramifications crcoupy nearly the entire conntry. The most westerly of these begins at the NW. extrenity of the boundary line, and soon seprarates into two Almost parallel ranges, the Pangaeus and Rhodnpe, which are separated from each other by the river Nestus ; the former filling up the whole space between that river and the Strymm, the latter the district E. of the Nestns and SW, of the Hebrus. Buth Pangraeus and Rhodope extend down to the coast of the Aegean, and the latter is continued parallel to it as far E. as the llebrus. The ceutral offishoot of the Jaemns branclies off between the sources of the Hebrns and the Tonzus, und extends to their junction near Hadrianopolis. The nust easterly chain diverges from the Haemns about 100 miles W. of the Euxine, to the W. shore of which it is nearly parallel, though it gradually approaches nearer to it from N. to S.: it extends as far as the Busporns, nad with its lateral oflshoots occupies nearly the whole country between the E., tributaries of the Hebrus and the Euxine. The central and E. ranges appear to have had no general distioctive mames ; at least we are not aware that any ocenr in nocient writers : the modern name of the inost easterly is the Strandja-Dagh. A contimation of this range extends along the shore of the Propontis, and is now called the $T$ ckis-Dagh.

The loftiest peaks, amotg these mountains, belong to Pbudope, aod attain an elesation of about 8500 feet (Viquesnel, p. 325 ) ; the summits of the Stranelja-Dagh, are 2600 feet high (1d. p. 314); those of the Tekir-Dagh, 2300 (Id. p. 315); the other monotaias are frota 2000 to 600 feet in height (ld. pp. 314. 315). The Haemus is not more than 4000 feet high, in that portion of it which belongs to Thrace. It is olivions from these measurements that the statements of sorue of the aocieuts that the summits of the Thraciao mountans were covered with eternal snow ( $\Theta \rho p к \overline{\omega \nu}$ йрєа עıфиєンта, Hom. Il. xiv. 22.27), and that from the lighest peak of the Haemus the Adriatic and the Euxine could be seen, are mere faocies. Strabo (rii. pp. 313,31\%) points out the inaccuracy of this notion. An interesting uccount is given by Livy (xi, 21, 22) of the ascent of Haemus Ly Philip V., who shareo in the popular belief in question. Livy states plaimly enongh his conviction that Plilip's Jabour, which was far from slight, was throwa away ; but he and his artendants were prodently silent upon the subject, not wishing, says livy, to be lagglied at for their pains. Iet Florus, who alludes to the same circumstance (ii. 12), but makes Persens the mountainclimber, ansumes that the king's object was accomplished, and that the bird's-eje view of his dumibions, oltained from the monntain top, assisted him in forming a plan for the defence of his kiogdom. with reference to his meditated war with Jiome. Slela too repeats the erroneous statement (ii. 2).

The main direction of the rivers of Tluace is from N. to N., as might be inferred from the foregoing description of its mountain system. The Strymon forms its W. boundary. In the lower part of its comrse, it expands to a considerable width, and was called Lake Cercinitis, into which flowed a smaller river, the Angites (Ilerol. vii. 113) ; next, towards the E., comes the Nestus ; then, in succession, the Travus, which falls into Lake Bistonis, the Schoenos, the Hebrus, the priacipal river of Thrace, and lastly the Melas. All these rivers fall into the Aegean. Several small streams flow into the Hellespont and
the Propontis, of which we may mention Aegospotami, renowned, notwithstandiog its insignificant size, the Arzus, and the Erginus. The rivers which fall into the Eaxine are all small, and few of them are distinguisbed by name in the geographers, though donbtless not so unhonoured by the dwellers upon their banks: among them Pliny (iv. 18) mentions the Pira and the Orosines. The Hebrus drains at least one-half, probably nearer two-thirds, of the entire surface of Thrace ; and on its haoks, or oo those of its tribntaries, most of the level portions of the conntry are sinuated, as well as nearly all the inland towns. Its principal affluents are the Arda (in some maps called the Harpessus), and the Suemus on the W., the Tonzus, Artiscus, and Agrianes on the E.

The Thracian const of the Aegean is extremely irregular in its outline, being broken up by bays which enter far into the ladd. yet appiear to be of comparatively little depth. Most of them, indeec, are at the mouths of rivers, and have probably been filled up by alluvial deposits. It was perhaps for this reason that several of them were called lakes, as if they had been regarded as belonging to the land rather than to the sea; e. g. Lake Cercinitis, already mentioned, which seems, indeed, to have been little more than a marsh, and in Kiepert's map its site is so represented; Lake Bistouis, east of Abdera; and Stentoris Lacus, at the mouth of the Hebrus. The gulf of Melas, formed by the northern shore of the Chersonesus and the opposite const of what may he called the mainland, is an exception to this description of the Thracian bays. The coasts on the l'ropontis and the Euxine are comparatively unbroken, the only gulf of any extent being l'ortus IIellodos, near Anchialus, which is kuown in modern times, by the name of the bay of Bourghaz, as one of the best barbours in the Euxine, the Thracian shore of which was regarded by the ancients as extremely dangerous. [Salmydissus,]

The principal promontories were, Ismarum, Serrheum, Supedonium, and Mastusium, on the sonthern coast; Thyoias and Haemi Estrema, on the eastern.

For an account of ore of the most semarkable parts of Thrace, see Chersonesus, Vol. 1. p. 608.

Off the southern coast are situated the islands of Thasos, Samothrace, and Imbros; the first is separated from the mainland by a chamel about 5 miles wide; the other two are considerably more distant from the shore.

The climate of Thrace is alrays spoken of by the ancients as being extremely cold and rigorous; thus Athenaeus (viii. p. 351 ) describes the year at Aenus as consisting of eight months of cold and four months of winter; but such statements are not to be taken literally, since mavy of them are mere puetical exagcerations, and are applied to Thrace as the representative of the north in general. The Haemus was regarded as the abode of the north wind, and the conntries beyond it wero believed to enjoy a beautifully nuld climate. (See Niebuhr, Ethnog, and Cieog. i. p. 16, Eng. trans. ; Soph. Antig. 985 ; Eurip. Rikes. 440; Theophr. de Caus. v. 17 ; Virg. Georg. ini. 350 seq.; Or Pont. iv. 10. 41, ib. 7. 8. Trist. iii. $10 ;$ \&c.). Been after making full allowance for the undoubted effect of vant forests, undrained marshes, aud very partial cultivation, in lowering the average temperature of a country, it is difficult to believe that a land, the northem butudary of which (i. c. of Thace l'rofer) is in the sans paralle of latitude as Tuseany and the Pyrenees, and the lighest momtains of which are less than 9000 lect above the

## THRACIA.

level of the sea, can bave had a very scvere cilimate. That the winter was often extremely cold, there can be no doubt. The Hebrus was sometimes frozen over: not to dwell upon the " Ilebrus nivali compede vinctus " of Horace (Ep. i. 3. 3; cf. Virg. Aem. sii. 331, and the epigram, attributed by some to Cacsar, beginning, "Thrax puer adstricto glacie dum ludit in Hebro"), Florus (iii. 4) relates that, in the campaign of Minucius in sonthern Thrace, a number of horsemen in his amy were drowned while trying to cross that river on the ice. Xemophon states that the winter which he passed in Thrace, in the mountainous district of the Thyni, was so cold that even wine was frozen in the vessels, and that many Greek soldiers had their noses and ears frostbitten; the snow also lay deep upon the ground. Ard that this was not an exceptional season may be inferred from Xenophon's remarks on the dress of the Thirscians, which seemed to him to have been deviser with special reference to the climate, and to prevent such mishaps as those which befel the Greeks (Anab. vii. 4. §§ 3, 4). Tacitus (4mn. iv. 51) assigns the early and severe winter of Mount Haemus anong the canses which prevented l'oppacus Sabinux (A. 1). 26) from following up his first snecess over the rebellious Thracians.* Pliny (xvii. 3) says that the vines about Aenus were often injured by frosts, after the Hebrus was brocght nearer to that city; the allusion probably being to the formation of the western mouth of the river, nearly opposite to Aenus, the floating ice and the cold water brought down ly which would have some effect in lowering the temperature of the neighbomilhood. Mela (ii. 2, init.) describes Thrace gemerally as agreeable neither in climate nor in snil, being, except in the parts near the sea, barren, cold, and very ill adapted for agriculture and fruit-trees of all kinds, except the vine, while the froit even of that required to be protected from the coll by a covering of the leaves, in order to ripen. This last remark throws some doubt upon the accuracy of the writer; for the shading of the grapes from the direct rays of the snn is obviously more likely to prevent than to promote their arrival at maturity; and hence, as is well known, it is the practice in many parts of Europe to remore the leaves with a viers to this object.

However this may be, it is certain that Thrare did produce wine, some kinds of which were famous from sery early times. Homer, who bestows upon Thrace the epithet $\{\rho 18 \omega \hat{\omega} \wedge \xi$ (Il. xx, 485), represents Nestor reminding Agamemnon that the Grecian ships bring to him cargoes of wine from tbat country every day ( $I 6$. ix. 76 ) ; and the pnet celebrates the excellence of the produce of the Maroncian vineyards. (Od. ix. 197, seq.) Pliny (xiv, fi) states that this wine still maintained its reputation, nol describes it as black, perfumed, and growing rich with age; a description which agrees with Homer's (l. c.). Paul Lucas says that he fonnd the Thracian wine excellent. (Voy. dans la Turquic, i. p. 25 ; sce also, Athen. i. p. 31.) Tbrace was tertile in corn (Plin. sxii. 3), and its wheat is placed by Pliny hich in the seale of excellence as estimateri by weight. It has, he says (xviii. 12), a stalk consisting of several coats (tunicae),

[^35]to protect it, as he supposes, from the severity of the climate; by which also he accounts for the cultivation, in sane parts of the country, of the triticum trimestre and bimestre, so called because those varieties were resped in the third and second month respectively after they were sown. Corn was exported from Thrace, and espeeially from the Chersonesus to Athens (Theoph. de Plantis, viii. 4 ; Lys. in Diogit. p. 902), and to Rome (Plin. l.c.). Alillet was cultivated in some parts of Thrace; for Xenophon (Anab. vii. $5 . \S 12$ ) states that ou the marel to Salmydessus, Seuthes and his allies traversed the country of the "millet-eating Thracians" (cf. Strab. vii. p. 315.) The less important vegetable productions of Thrace may be briefly mentioned: a species of water-chestnut (tribulus) grew in the Strymon, the leaves of which were used by the people who lived on its banks to fatten their horses, while of its nuts they made a very sweet kind of bread. (Plin. xxi. 58, xxii. 12.) Roses (Rosa centifolia) grew wild on the Pangaeus, and were successfully transplanted by the natives ( $\mathrm{Id} . \times \times \mathrm{i}, 10$ ). The mountains, in general, abounded in wild-thyme and a species of mint (Id. xix. 55). A sort of morel or truflle (iton) was found in Thrace (Id. xix. 12; Athen. i. p. 62), and a styptic plant (ischacmon), which was said to stop bleeding from even divided blood-vessels. (Theoph. de Plant. ix. 15 ; Plin. xxv. 45.) Several varieties of ivy grew in the country, and were sacred to Dionysus. (Theoph. de Plant. iii. 16; P'lin. svi. 62.) Herodotus (iv. 74) states that the Scythians hod hemp both wild and cultivated; and as he proceeds to say that the Thracians msde clothing of it, we may fairly infer that it grew in Thrace also. "The Atheniaus imported their timber chiefly from the country about the Strymon, for the Thracian bills abounded in oak and fir-trees." (Niehuhr, Lect. Anc. Hist. i. p. 292, Eug. trans.). M1. Viquesnel states that the Strandja. dagh is covered with forests of oak ( $\mathrm{p}, 314$ ), and that in some parts of the district of Rhodope tobacco is now cultivated (p. 320).

Among the animals of Thrace, white horses sre repeatedly mentioned. The famous steeds of Rhesus were "whiter than snow." (Hom. Il. x. 437 ; Eurip. IRhes. 304.) When Xerxes reachod the banks of the Strymon in his onward march, the magi sacrificed white lorses (Herod. vii. 113), which were probably Thracian, for the same reason, whatever that was, that the human victims spoken of in the next chapter were the cbildren of natives. Xenoflon states that, during a banquet given by Seuthes, a Thracian entered, leading a white horse, which he presented to his prince, with an encamium on its fleetness (Anab. vii. 3. §26). Virgil speaks of Thracian horses with white spots (Aen. v. 565, ix. 49 ). Horses were no deubt plentiful ia Thrace: Homer (Il. xiv. 227) calls the Thracians immoró入os; and cavalry always formed a large part of their armies. Thus Thncydides (ii. 98) estimates the number of horsemen in the army with whieh Sitalces invaded Nacedonia at about 50,000 . One of the twelve labours of Hercules was to bring to Mycenae the savage mares of Diomedes, king of the Bistones in Thrace, who fed them with linman flesh. (Ov. Met. ix. 194.) Herodotus (vi. 126) states that lions were found thronghout the conntry bounded on the W. by the Achelous and on the E. by the Nestus; a statement which is repeated by Aristetle (H. A. vi. 31, viii. 28); so that the part of Thrace between the Strymon and the Nestus must have been in-
fested, at least in early tiines, hy those furmidable nnimals. Herodotus sisy that they utlacked the baggage-camels of Xerxes during the march of his army from Acmnthus to Therme (vii. 125). Cattle, both great and small, were abundant, and seem to have constituted the chief wealth of a people who, like most barbarisas, considered agriculture a base ocenpation. (Herox. v. 6.) The fertile valleys were well idapted for oxen, and the thyme-covered hills for sheep; and it is clear, from several passares in Xenophon, that even the wildest Thracian tribes were rich in this kind of wealth. (Anab. vii. 3. $\S 48$, 7. $\S 53$.$) Aristotle informs us that the Thracians$ had a peculiar method of fattening sivine (II. A. viii. 6). He attributes the smallness of their asses to the coldness of the climate $(16.28)$. Cranes are often mentioned as belonging to Thrace (Virg. Georg. i. 120; Ov. A. A. uii. 182; Juv. xiii. 167.) Aristotle says tbat an aquatic bird of the pelican kind ( $\pi \in \lambda \epsilon \kappa a ̄ \downarrow \in s$ ) migrates from the Strymon to the 1 ster (II. A. viii. 11); and that the people in some marshy districts of Thrace were issisted in catching water-fowl by hawks; which do wot seem to lave been trained for the purpose, but, though wild, to have been induced by a share of the gane, to second the proceedings of their human associates (Ib. ix, 36). Eels were caught at certain seasons in the Strymon (16. viii. 2, ad fin.). The tunny fisticry was a souree of great wealth to Byzantiun. (Strab. vii. p. 320.)

The prineipal mineral productions of Thrace were gold and silver, nost of which eame from the mountainous distriet between the Strynon and the Nestus. There, at the seuthern extremity of the Pangaeus, was situated Crenides, founded by the Thasians, and afterwards called Jhilippi, in a hill near which, named the hill of Dionysus (Appirn, B. C. jv. 106), were the most productive guld mines of 'Thrace, to get possession of which was Philip's principal object in annesing the district in question to his dominous. He is said to have derived from the mines an annual income of 1000 tulents. (Dioul. xvi. 8 ; cf. Stral. vii. p. 323.) * Strabo (xiv. p. 680) says that the wealth of Cadmus canse from the mines of the Pangacus; and Pliny refers to the same tradition when le states (vii. 57) that according to some authorities, the Pangacus was the place wbere Cadmus first discovered gold-mines, and the art of melting their produce (conflatura). Herodotus (vii. 112) mentions silver, as well as gold, mines in the Pangreus, which in his time were in the porsession of the native tribes called l'ieres, Odomanti, and Satrae. He states also (vi. 46) that the Thasians had gold mines at Scapte Hyle, near Abdera, from which they derived an (ammual) revenue of about 80 talents; and that a part of the revenues of Peisistrut us came from the Strymoo, by which the mines on its banks are probably meant (i. 64). (See also, ix. 75 ; Eurip. Rhes. 92 I ; Strabo (or rather his epitomiser), vii. p. 331.) According to Pliny (xxxiii. 21) gold was found in the sands of the Hebrus ; and this is confirmed by Paul Lucas ( $l$. c.), and by Viquesnel, who states (p.304) that in rainy years the affinents of that river are frequented by gold-finders, who wash the sands which contain gold in grains (en pailletter). Thucydides was interested ia gold mines and works near Amphipolis, as he limself informs us (iv, 105). Of the other minerals of I'hace we may mention the

[^36]opal (paederos, Plin. axsvii. 46) ; the Thracia gemmut, one variety of which seems to resemble the bloodstone (ib. 68); a stone which burut in water (14. xxxili. 30); and nitre, wheh was found near Philippi (ld. xxxi. 46). In addition to these, M. Viguesuel meations bine marble, which is quarried from the motmanans of Lielja (p. 200) ; excellent iron, manufactured at Sumakor (p. 209) ; alom, produced at Chuphane (p. 213) ; and potter's clay, in the district of Rhodope, usel by the Torks in the fabrication of earthenware ( 1.319 ). He states also that Rhodope aboonds in miveral waters (ib.), and that there aie warm springs at Lidju (p. 212).

A few miscellaneons notes will conclude this part of our subject.

The narrow portion of Thrace between the Enxine, Bosporus and Propontis, is sometimes called the Delta ( тò $\Delta \dot{́} \lambda \tau \alpha$, Jen. Anab. vii. 1. § $33,5 . \S 1$ ).

Reference is several times male to violent natural convulsions, which destroyed various Thracian cities. Thus Strabo (i. 59) says that it appeared that some cities were swallowed up by a flond is Lake Bistonis; and he (vii. p. 319), Pliny (iv. 18), and Mela (ii. 2) speak of the destruction of Bizone, on the Euxine, by earthquakes.
Livy (xl. 22) describes the region between Maedica and the Haemus as withunt inhabitants (solitudines).

Herodotus (vii. 109) speaks of a lake near Pistyras (on the coast N. of Abdera), , about 30 stadia in circumference, abounding in fish, and extremely salt.
Thrace possessed two highroads, "both starting from Byzantiom ; the one (called the King's roat, from having been in part the march of Xerxes in his invasion of Greece, Liv, xxxix. 27 ; Herod, vii. 115), crossing the Hebrus and the Nestas, touching the northern coast of the Aegean sea at Neapolis, a little south of Philippi, then crossing the Stryinon at Amphipolis, and stretching through Pella across Ineer Macedonia and Illyria to Dyrrhachium. The other road took a more bortherly course, passing along the upper valley of the Hebros from Adrianople to Philippopalis, then through sardica (Sophia) and Naissus (Nisch), to the Danube near Belgrade, being the highrosd now followed from Coustantinople to Belgrade." (Grote, vol. sii. p. 34, note.) Herodutus (l. c.) remarks, witb evident surprise, that the King's rond bad not, up to his time, beeo destruyed by the Thracians, a circumstance which he seems to attribate to the alnost religious respect with which tbey regarded the "great king." It may be safely inferred that people who were considered to bave done sometbing wonderful in abstaining from breaking up a road, were not great makers or maintainers of highways ; and it is clear from Livy's account of the march of Manlius (xxxviii. 40,41) along this very rond (afterwards called by the Romans, Via Egnatia, q.e.), that, although it was the principal here of communication between Europe and Asia, it was at that time (n. c. 188 ) in a very bad condition. From this sume conception may be formed of the deplorable stute in which the roads of the interior and monntainows districts must have been, and in which, indeed, they still remain. (Viquesnel, p. 312.) The Thracians no donbt were well axare that then independence would suon be lost, if there were an easy access for disciplined armics to every part of their country. Such paths as they possessed were safficient for their own purposes of depredation, of ambash, and, when overpowered, of flight.
IV. Erhsoleoy, Masnetes, Leligion, etc.-

The first point to be determined liere is, whether the Thracians mentioned in the ancient writers as extending over many parts of Greece, as far south as Atticis, were ethnologically identical with those who in bistorical times occupied the country which is the sabject of the present article. And before discussing the topic, it whll be convedient to lay before the reader some of the principal passages in the classics which bear upon it.

It is Strabo who makes the most distinct statements on the point. He says (vii. p. 321 ), "Hecataeus the Dilesian states that, before the Mellenes, barbarians inhabited Pelopommesus. But in fact nearly all Greece was originally the abode of barbarians, as may be inferred from the traditions. I'elops brought a people with him into the country, to which he gave liis name, and Danans came to the sabue region with followers from Egypt, at a time when the Dryopes, Caucones, Pelasigi, Leleges, and other similar races had bettlements within the Istbmus; and indeed without it too, for the Thracians whe accompanied Eumolpus had Attica and Tereus possessed Daulis in Phocis; the Phoenician compauions of Calmus occupied Cadmeia, the Aones, Temmices, and Hyantes Boeotin." Strabo subsequently (ix. 401) repeats this statement respecting Bueotia, and adds that the descendants of Cadmus and his fullowers, being driven out of Thebes by the Tirracians and Pelasgians, retired into Thessaly. They afterwards retorned, and, having joined the Mioyans of Orchomenos, expelled in their turn the Pelusgians and Thracians. The former went to Atlsens, where they settled at the foot of Hymettus, and gave the name of Pelasgicom to a part of the city (cf. Herod. ri. 135): the Thracians, on the other hand, were driven to Parnassus. Again (ix. p. 410) he says, speaking of Helicon: "The temple of the Muses, and Hippucrene, and the cave of the Leibethridam nymphs are there; from which one would conjecture that thase who consecrated Helicon to the Muses were Thraciam; for they dedsated Pieris, and Leivethrum, and Pumpleia to the sume goddesses. These Thracians were called P'ierians (Miepєs); but their power laving declined, the Blacedonians now occupy these (last named) phaces." This account is afterwards ( $\mathrm{x}, \mathrm{p}, 471$ ) repeated, with the aldition that "the cultivators of ancient music, Orphens, Iusaeus. Thamyris, and Lumolpas, were Thracians."

The difficulty that presents itself in these pas-sages,-and they are in general agreement with the whole boly of Greek literatare,-arising from the confounding under a cotmon name of the precursors of Grecian poetry and art with a race of men desidnated as barbarous, is well stated by K. O. Nliiller (Ilist. of Greck Liter. p. 26, seq.): " it is utterly meonceivable that, in the later listonic times, when the Thracans were contemned as a barbarian race, a motion shonld have sprong up that the first civilisation of cireece was doe to them; consequently we cannut doabt that this was a tradition handed down from a very early period. Now, if we are to understand it to mean that Eamolpus, Orpheus, Musieus, and Thamyris were tbe fellow-countrymen of thoso Elonians, Odrysians, and Odomaotians, who in the historical age occupied the Thracian territory, and who spoke a barbarian language, that is, one ummtelligible to the Grecks, we mast despair of being able to comprehend these accounts of the ancient Thracian nuinstrels, and of assigning them a place in the history of Grecian civilisation ; siuce it is
manifest that at this early perioi, when there was scarcely any intercourse between different nations, or knowledge of fureign tungues, poets who sang in an uuintelligible language could not have bad more inflnence on the mental developunent of the people than the twittering of birds."
Mïller therefore concludes that the Thracians of the ante-historical er:a, and those of subsequent times, belonged to distinct races. "When we come to trace inore precisely the country of these Thracian band, we find that the traditions refer to Pieria, the district to the east of the Olympus range, to the north of Thessaly, and the sonth of Emathia or Sacedonia: in Pieria likewise was Leibethra, where the Muses are said to have sung the lament over the tontb of Orpheus: the ancient poets, moreover, always make Pieria, not Thrace, the native place of the Muses, which last Homer clearly distinguishes from Pieria. (Il. siv, 226.) It was not until the Pierians were pressed in their own territory by the early Macedonian princes that some of them crossed the Strymon into Thrace Proper, where Herodotus (vii. 112) mentions the castles of the Pierians at the time of the expedition of Xerxes. It is, bowever, quite conceivable tbat in early times, ether on account of their close vicinity, or becanse all the north was comprehended under one name, the Pierians might, in Southeri Greece, bave been called Thraciaus. These Pierians, from the intellectual relations which they maintained with the Greeks, appear to be a Grecian race; which supposition is also confirned by the Greek names of their places, rivers, fountains, \&e., although it is probable that, situated on the limits of the Greek nation, they may have borrowed largely from neighbouring tribes. (See Möller's Dorians, vol. i. 4 p. $472.488,501$.)" After referring to the accounts of the Thracians in Southern Greece, Muller adds: "From what has been said, it appears sufficiently clear that these Pierians or Thracians, dwelling abont Helicon and Parnassus in the ricinity of Attica, are chiefly signified when a Thracian origin is ascribed to the mythical bards of Attica."

Colonel Mure, after referring to the furegoing view, which he designates as "plausible," goes on as fulluws: " But the case admits of another, and perhaps more satisfactory explanation. It is certain that, in the mythical geography, a tract of country on the frontiers of Boeotia and Phocis, comprebending Mount Parnassus and Helicon, bore the oarne of Thrace. [See the etymology, ante.] In this region the popular mythology also lays the scene of several of the most celebrated adventures, the heroes of which are called Thracians." The author then applies this explanation to the stories of Tereus and Procue, and of Lrcurgus, " king of Thrace; " and proceeds thus: "Pausanias makes the "Tbracian bard Thamyris virtaally a Phocian. He assigns him for $m$ ther a nymph of Parnassus called Argiope. His father, Philammon, is described as a native of the same region, son of Apollo, by the nymph Chione, and brother of Antulyons, its celebrated robber chieftain. The divine grandsire is obviously here but a figure of his own sacred region; the grandmuther Chione, as her name bears, of its snow. Others call the latter hervine Leucinoid. The names of these heroines are all so many varied modes of typifying the same 'snow-white' I'arnassus. This view of the 'Thracian' character of these suges becomes the more plansible, if it be remembered that the region of Central Greece, in which
the Hellow I lirace was situated. is that from which first or chiefly, the seeds of elementary culture were propagated throughout the nation. Here tradition places the lirst introduction of the alphabet. Here were also the principal seats of Apollo and the Muses. In the beart of the same region was sitnated the Binyean Orchomenos, the temple of the Grices, rivalling Thebes herself in the splendour of ber princes and zeal for the promotion of art. Among the early inastors of poetry or music, not vulgarly styled Tbracians, the most illustrions, Amphion and Linus, are Butstians. Nor was this region of Central Greece less fivoured in respect of its religious iostitutions. It was not only thie favourite seat of Apollo, the Muses, and the Graces, but the native country of the Dionysiac rites, zeal for the propagation of which is a claracteristic of the Thracian satges." (Ilist. of Lang. and Lit. of Ant. Greece, i. pp. 150-153; cf. Niebuhr, Lect. on Ethnog. and Geog. i. p. 287.)

In thus entirely discomnecting these early " Thraci:us," from thase of later times, we have the authority of Thucydides (ii. 29), who, in speaking of Teres, the father of Sitalces, remarks: "This Teres bad no connection whatever with Tereas, who married Procne, daughter of Pandion of Atbens; they did not even loblong to the same Thrace. Tereus dwelt at Daulia, a city of the country now called Phocis, and which was then occupied by the Tiracians." And he proceeds to show that it was not likely that Pandion would form an alliance with any one who lived so far from Athens as the country of the Odrysse.*

The consideration of the ethnological relations of the early Tliracians larilly falls within the scope of this article ; but sioce identity of name bas often caused them to be confounded with the historical inhabitants of Thrace, it may be desirable briefly to discuss the subject in this place.

The view which seems to the present writer to be best supported by the evidence, and to explain most satisfactorily the ancient authors, is that which regards the mytbical Thracians as members of the widely extended race to which the name of Pelasgians is usually given. It is clear from Homer that a close connection existed between the people of Sonthern Thrace and the Trojans, whowere probably Pelasgians, and who are at the sane time represented by biun as agreeing, in language, religion, and other importaat respects, with the Greeks. Again. Homer mentions among the auxiliaries of Priam, the Cancones, who are named along with the Pelasgians (IL. x. 429), and the Cicones ( $I l . \mathrm{ii}, 846$ ). These two names bear so close a resemblance to each otber as to suggest the probability of the cognate origin of the tribes so designated. Now the Cicones were undouhtedly Thraci,uns (Odys. ix. 39, seqq.) ; white as to the Caucones, Strabo (xii. p. 542) informs us that they occopied part of the casst of Bithynis, and were regarded by sume as Scythians, by others as Macedonians, by others again as Pelasgians. It will be remembered that Caucones arc mentioned by hiun (vii. p. 321) among the earliest inhalitants of Peloponnesus. Another noticeable fact is, that in the passage of Strabo already quoted (is. p. 401 ), be represents the Thracians and Pelasgians as acting in

* Yet subseqnent prose writers, to say nothing of poets, fall into the error of making Tereus an inhabitant of Thrace Proper ; and Pliny (iv, 18) even meations the castle there in which the crime of Tereus was perpetrated!
concert. The same author (siii, p. 590) points out the similarity of many Thracian names of places to those existing in the Trejan territory. Finally, the names of the places mentioned by Strabo (vii. p, 321) as common to Pieria and the southern Tliracians, are evidently Greek (sec Mitler's Doriuns, i. p. 501) and, as we have scen, the name Thrace itself is in all prebability a signiticant Greek word.

These considerations atppear to us to lead to the ennchusion alrealy stated, namely, that the mythical Thracians, as well as thuse spoken of by Homer, were Pelasgiams ; and lurnce that that race once occupied the northern as well as the other shores of the Aegean, until, at a comparatively late period, its continuity was broken by the irruption of the bistorical Thracians from the north into the country between the Strymon and the Enxine. The circunstance that the Greeks designated these barbarians by the name which had been borne by thuse whom they sapplauted, admits of easy explanation, and history ahounds in instances of a similar kind. But it may be dubbted whether the Thracians had any grneral designation in their own language: they prothably called theinselves Edones, Denseletae, Tisyni, Satrae, and so oa; bat we have no evidence that they really were all branches of a common stock. Under these cireamstances, it was ineritable that the Greeks should bestow upon then the name of the earlier posessers of the country ; and those Thracians who were brought in contact with the more cirilised race would probably adopt it. (On the foreroing question, see Niebulir, Lect. on Anc: Hist. i pp. 142, 212; Lect. on Ethuog. and Geog. i. p. 287 ; Wachsmuth, Hist. Ant. i. p. 44. segq.)

Respecting the historical Thracians we have tolerably full information, but not of that kiad which will enable us to arrive at any very definite conclusions as to their ethological relations. That they belooged to an extensively diffused race, whose early abodes were in the far northera regions, may be regarded as sufficiently prosed by the cencurrent testimany of the ancient writers. Herclotus, in a well-known passage ( v .3 ), says that the Tliracian nation is the greatest in the world, after the Indians, and that its sululivisions, of which the Getae are one, bave many mames, according to the countries which they severally occapy. Strabo too (vii. p. 295) states that the Getae and the Mysi were Thracians (as to the Mlysi, sce alse i. p. 6), who extended north of the Danube (vii. p. 296). In centirmation ef his assertion that the (Getae were ethnologically akin to the Thracians, he adfuces the identity of their lavguige (vii. p. 303). He audfs (vii, p. 305) that the Daci also opuke this langnage. From lis remark (vii. p. 315) athout the fapudes, it would seem that he regarded the illyriasos also as nearly allied to, if not actually a hranch of, the Tbracians. In another passage ( $x$. p. 47 1) he says that the Phrygians were colonists of the Thraciums; to which race also the Saraparae, a nation still farther towards the east, north of Armenia, were reported to belong ( $x i, p, 53 t$ ). "The Bithyni, previously called Mysi, were so nathed, as is admitted by noot authorities, from the Thracinn Bithyoi and Thyoi, who emigrated to that country (i. e. Asia Binor ; cf. llerod. vii. 7ij). And I conjecture that the Bebryces, who settem in Mysia before the Bithyni and Mysi, were also Thraums. The Mysians themselves are sad to be colonists of thrse Thracians who are now called Mysi. As the Marimdyni are in all reppects like the Bithyni, they two are probably Thracians." (Strib. xii. ppl. 541, 542.) Justin
conples the Thracians with the Illyrians and Dardani (xi. 1). In the west and south-west it is impossible to deline the Thracian boundary : we have seco that Mela describes the whole of the Chalcidic peninsula as part of Thrace (cf. Thucyd. ii. 79) ; and there is no doubt that they extendect as far south as Olympus, though mixed ap with Macedonians, who were the preponderating race in that quarter. In later times the intrnsive and undoubtedly distinct races which were mingled with the Thracians near the Danube, were sometimes confounded with them. Thas Florus (iii. 4) calls the Scordisci the most savage of all the Thracians.

Of the language of the Thraciuns scarcely a trace esists. They were too barbarous to lave any literary or artistic memorials, so that the principal guides of the etlunologist are wanting. Strabo (vii. p. 319) states that bria, which occurs as the termination of several names of Thracian tewns, signifed "city" or "town." This and a few proper oames constitute all that remains of their language.

The following is the account which Merodotas gives of the customs of the Thracians. They sell their children into foreign slavery. The wornen while onmarried enjuy perlect freedom in their intercourse with men ; but after marriage they are strictly guarded. The men pay large soms of money for their wives to the parents of the latter. "To be tattoued is considered an iodispensable mark of noble birth. (Cf. Strab, vii. p. 315.) ldleness is mast honourable; the cultivator of the soil is regardel as the meanest of men; to live by war and plundering is most noble. The only gods they worship are Ares, Dionysus, and Artemis. But their kings differ in this respect from their subjects; for they worship Hermes especially, and swear by him alone, from whom they say tbat they are descended. Wheo a wealthy man dies, his cerpse lies in state for three days: his friends then make a great feast, at which, after bewailing the departel, they slanghter victims of every kind: the body is theo buried, having sometimes beeo previously burnt. A mound is ruised above the grave, upon which athletic games are celebrated (v. 6-8; cf. Xeo. Hell. iii. 2. § 5) . Besides these customs, which were commen to all the Turacians, IIerodotus mentions some which were peculiar to certain tribes; as, fer instance, that which prevailed among the people to the narth of the Crestonians. " Ainong them, each man las many wives. When any mao dies, a great contest arises ameng his widors on the question as to which of then was most beloved by their huluand; and in this their relativos take a very active part. She in whase lavour the point is decided, receives the congratulations of buth men aod women, and is then slain upon her lmoband's grave by her nearent male relation. The other widows regard tivemselves as extremely unfortunate, for they are considered to be disgraced." (lb. 5.) Herodotus here seems to speak of polygany as confined to a certain trilie of Tluracians; but strabo (vii. p. 297) represents this custem as general among them. In a note upon this passage, Cassaubon quotes from Heracleiues Punticns to the effect that Thracians eften had as many as thirty wives, whom they employed as servants, a practice still common in many eastern countries. Xemophon furaishes us with an illastration of the Tlaracian enstom of purchasing wives. Ile states that at his first interview with Seathes, the Thracian prince proposcal to give his danghter in marriage to Nenophon; and if the Greek himself had a
daughter, offered to bny her as a wife. (Anab. vii. 2. § 38 ; of. Mela, ii. 2.)

The want of anion among the Thracians is mentioned by Herodotas (v. 3) as the only cause of their weakness. Their tribes, like the lighland clans, seem to have been constuntly engaged in petty warfare with one another, and to have been incapable of co-operating even against foreign foes, except for very brief periods, and rarely with any ligher object than plunder. Until a late period (Flor, iv. 12. §17) they appear to have been destitute of discipline, and this, of course, rendered their hravery of compratively little avail. Thus we learn from Throcydides (ii. 96, 98) that, although Sitaices was the most powerfinl Thracian kiog that bad ever reigned- (he seems indeed to have been subsequently regarded as a kiod of national bero; Xen. Anab. vi. 1. 56 ), -yet a large part of the army with which he invaded Macedonia consisted of mere volunteers, formidable chiefly for their numbers, and attracted to his standard hy his offers of pay, or by their hope of plonder. Any ooe, in fact, who held out these inducements, could easily raise an army in Thrace. Thas Clearchas no sooner received supplies of money from Cyrus the Younger, than he collected a force in the Chersonesus, which, although in great part undoubtedly Thracian, was employed by him in making war upon other Thraciaus, until he was required to join Cyrus in Asia Minor (Ib, i. 1. § $9,2 . \S 9, \& \mathrm{cc}$.). So when Seuthes andertook the expedicion against his so-called revolted subjects, his army was soon tripled by volunteers, who lastened from other parts of Thrace to serve him, as soon as they heard of his eaterprise ( $I b$. vii. 4. § 21). Such soldiers could not, of course, be depenned upon for one inoment after a reverse. A considerable number of Thracian mercenaries in the army of Cyrus took the carliest opportunity to desert to Artaxerxes after the battle of Cunaxa (Ib. ii, 2. § 7).

Tacitus (Ann. iv, 46) infurnss us that the priocipal cause of the insurrection (A, D. 26) of the Thracians who dwelt in the elevated mountain districts (probably of Rhodope), was their dislike of the conscription, which, it would appear, the Romans had introduced into Thrace. 'This was a yoke to which they could nut subnit; they were not accustomed to obey even their own rulers, except when it pleased them; and when they sent troops to the assistance of their princes, they used to appoint their own commanders, and to war against the neighbouring tribes only. (Cf. Liv. slii. 51 ; Xen. Anab. vii. 4. § 24,7 . § 29 , seq.)

Thra ian troups were chiefly light-armed infantry and irregular horse. (Xen.Anab.i. 2. §9, vii. 6. §27, Memor, iii. 9 . § 2 ; Curt. iii. 9.) The bravest of the foot-soldiers in the army of Sitalces were the free mountaineers of Rhodope, whe were armed with short swords ( $\mu a \chi$ aupoфороt; Thucyd. ii. 98). The equipment of the Asiatio Thracians is described by Herodutus (vii. 75), and as this description agrees with what Xenophon states respecting Seuthes' furces (Anab. vii. 4. § 4), it is no doubt substantially true of the Thracians geuerally. They wore caps covering their ears, made of fox-skins, claaks, and party-coloured mantles ( $\varsigma$ eipal, ? = plaids) ; their boots, which cane ligh up the leg, were wade of deer-skin; their arms were shields, javelins, and daggers (cf. Thueyd. vii. 27). The Thracians in the amy of Philip V . were amel with very long vhompinaene, a word which some translate jatelins, utiurs swords. (Liv, x $x \times i .39$;

Plut. Paul. Aemil. 17.) Thracian soldiers fuught with impernosity and with no lack of bravery; but they, like all barbarian and undisciplined tronps were incapable of sustained efforts. Livy (slii. 59 ) describes them as rushing to the attack like wild beasts long confined in cages: they humstrung the horses of their ndvorsaries, or stabbed them io tho belly. When the victory was gained on this occasion (the first encounter in the war between tho Romans and Perseas), they retarned to their eamp, singing lond songs of triumph, and carrying the beads of the slain on the tops of their weapons (Ib. 60). When defeated, they fled with rapidity, throwing their shields upon their backs, to protect then from the missiles of the pursuers. (Xen. Anab. vii. 4. § 17 .)

About the time of the Peloponoesian War, Thrace began to be to the countries around the Atgean what Switzerland has long, to its disgrace, been to the despotic powers of modern Europe, a land where men nuight be procared to fight fur any one who could hold out sufficient inducements is tho shape of pay or plunder. (Thncyd. vii. 27, et aliti; Xen. A uub. i. pass.; Just. xi. 1 \& 9.) The chief canses of this, apart from the character of its people, appear to have been the want of any central govermment, and the difficult nature of the country, which rendered its savage independence tolerably secure; so that there wis nothing to restraia those who might wish to seek their fortane in foreign warfare. During the period of Macedonian supremacy, and after its close, under the Ruman power, Thracians are often mentioned as nuxiliaries io Macedonian and Roman armies; but few of these, it is probable, were voluriteers. (Liv. xxxi. 39, xlii. 29, 51, ot al.; Caes. B. C. iii. 4 ; Vell. Pat, ii. 112; Tac. Hist. i. 68, \&ce.) Cicero (de Proe. Cons. 4) seems to imply that Thracians were sometimes hired to assassinate liko the modern Italian bravos; these were perhaps gladiators, of whom great numbers wero Thracians. Calignla gave the command of his German budygnard to Thracians. (snet. Calig. 55.)

Another point in which the Thracians remind ns of the oatives of lndia, is mentioned by Tiunoydides (ii. 97) in these words: "The tribute of the barbarians and of the Greek cities received by Seuthes, the suocessor of Sitalces, might be reckoned at 400 talents of silver, reckoning gold and silver together. The presents in gold and silver amounted to as much more. And these preseats were made not onily to the king, but aiso to the most influential and distioguished of the Odrysse. For these people, like those of Thrace generally, differ in this respect from the Persians, that they would rather receive than give; and among them it is more shamoful not to give when you are asked, than to be refused when you ask. It is true that abuses arise from this custom ; for nothing can be dune without presents." (Cf. Liv. xlii. 19, xlv. 42 ; Tac. Germ. 15.) Xenuphon (A nab. vii. 3) gives some amusing illustrations of this practice among the Tbracians.

Sention is often made of the singing and dancing of the Tiracians, especially of a martial kind. Nenophon (Anab. vi. 1. §5, seq.) gives an account of is dance and combat pertormed by some Thracians, to celebrate the conclusion of a peace between the remnant of the 10,000 Grecks and the Paphlagonians: they danced fully armed to the masic of the flate, jumping up nimbly to a considerable height, and fencing with their swords: at last, one man struck awother, to all apoearance mortally and be fell as if
leat, though in reality not in the least injured. His antagonist then stripped off his armour, and weat ont sianging the praises of Sitalees, while the other man was carried out like a corpse by his comrades (cf. Ib, vii. 3. § 32, seq.; Tac. Ann. iv. 47).

Their amsic was rate and noisy. Strabo (x. p. 471) compares it to that of the Phrygians, whom, iadeed, be regards as desceaded from the Thracians. Xenophon, in the passage last referred to, says that they plisyed me horns and on trumpets made of raw ox-hide. Their worship of Dionysus and Cotytto was celebrated on mountain tops with loud justruments of music, shonting, and acoises like the bellowing of cattle. (Strab. x. p. 470.)

Their barbarity and ferocity became proverbial. Herodotus (viii. 116) tells a story of a king of the Bisaltae, who punished his six soas for disoheying him by putting out their eyes. Seuthes, with his orna hand, tramsfized some of the Thyni who had been taken primners (Xen. Anab. vii. 4. § 6). Rhascuparis invited his nephew to a banquet, plied him wath wine, thea loaded him with fetters, and afterwards put him to death. (Tac. Amn. ji. 64, seqq.) Thacydides (vii. 27 , seq.) gives an instance of the fencity of the Thracians in their massatere of the inlabitants of Mycalessus.

A truly barbarian trait in the character of the Thracians was their thithlessness, even to one another. This is especially showa in their disrecard of their obligations Lowards the hostages whom they gave as securities for their observance of their eacarements with others. Seuthes had received from the Thyai a nomber of old mea as hostases; yet the Thyni, seeing a favourable opportunity, as they supposed, for renewing hostilities, at once seized it, apparently witbout a thought of the but too probable consequences of such conduct to their helpless countrymen. (Nea. Anab. vii. 4. § 21; cf. Liv. xl. 22). Some of the tribes inhabiting the Thracian coast of the Euxine were systematic wreckers [Smaypessus]. Rubbery, as we have seen. was considered honourable by them; and plunder was their chief inducement to engage in war. (Strab. vii. p. 318; Cie. Pis. 34 ; Liv. xxvi. 25, wzxviii. 40, seq.) Strabo (iii. pp. 164, 165), Mela (ii. 2), and Tacitus (Ann. iv. 51 ) bean witness to the bravery of the Thracian women.

The deity most worahipped by the Thracians was Dionysus, whom they, as well as the Phrygians, called Sabazius, (Sichol. Aristoph. Jesp, 9.) The aythical stories resperting Orpheus and Lycurgus are closely connected with the worship of this god, who had an oracle on Rholope, in the country of the Satrue, but under the direction of the Bessi [Satnak]. 1 leromiatus (vii. 111) states that the made of delivering the answers of this eracle resembled that which 1urvailed at Delphi. He compares also the worshy of Artemis (whose Thraciar name was Bendis or Cotylto), as he had seen it celebrated by Thracian and l'seonian women, with some of the cerearonies at Delos (iv. (33). There resemblances may be aerounted for on the suppesition that the Thracian rites were derived from the original l'elasgian population, remnants of which may have maintained themselves anvid the momntain fistnesses; as Niobuhr holds (Ethoug, and fieng. i. p. 287) was the case with the Paeonians, whatare mentioned by Herolotios in the pasage last referred to. (On the Thracian divinities, see Straho, x. pp. 470,471 ; Soph. Antig. 955 , seq. ; Plan. xvi. 62 ; and the articles Beanis, Cotys, aad Rues, in the Dict. Bing. and Myth.)

It has sometimes been asserted that the Thracians were acenstomed to sacrifice hmman victims to their divinities; but this appears to be either an incorrect generalisation, or a confounding of them with other races; for we find no reference to such a custom in any of the ancieat acconnts of their manners. Hcroloutus, it is true, states (ix. 119) that when the P'ersian Oeobazus fell into the hands of the Apsinthii, after the taking of Sestus by the Athenians, they sacrificed lim to their local god, Pleistorus; but from the next words ( $\tau \rho \delta \pi q \psi \tau \hat{\omega} \sigma \phi \in \tau \dot{\epsilon} \rho \varphi)$ it is clear that he regarded the practice as characteristic of the Apsinthii, and not as one common to all Thracians : nor is it conceivable that he would have omitted to mention so striking a circumstance, in his geaeral description of Thracian manaens, which bas beea already quoted (v. 3. seqq); for the practice of slaying the favourite wife on the tomb of ber deceased hasband cannot with any propriety be called a sacribice.

Whether indulgence in wine was regarded as a part of the homage dne to Dionysus, or simply as a means of sensual gratification, certain it is that it was prevalent in Thrace, and frequeatly attended with violent and sanguinary quarrels: "Natis in u-um laetitiae scyphis pugnare Tbracmon est," says Horace, and evidence is not wantiag in suppert of the accusation. Ammianus (xxvii. 4.§ 9 ) describes the Odrysae as so fond of bloodshed that in their banquets, after eatiag and drinking to satiety, tbey used to fall to blows with one naother. Tacitus (Ann. iv. 48) relates that the Thracians serviag with Poppaeus Sahinus agaiast their fellow-countrymen, indulged to such a degree in feasting and drinking that they kept no guard at night, so that their camp was stormed by their exasperated brethren, who slew great numbers of them. Xeaophon tells us that at his first interview with Seuthes, they drank horas of wine to each other's bealth, according to the Thracian custom (Anab. vii. 2. § 23). At the banquet which seuthes afterwards gave to Xenophon and some other iuportant persuns the drivking seems to have been deep. Xenophon admits that he had indulged freely; and he was evidently astonished that when Senthes rose from the table, he manifested no signs of iatoxication. (Ib. 3. § 26, seqq.) The Thracians are said to bave had a custom, which prevailed in England as late as the last century, of compelling all the guests to drink the sume quautity. (Csllim, ap. Athen. x. p. 44․) The Odrysian auxiliaries of Dereyllidas poured great quantities of wine upon the graves of their slain comrades. (Xen. Hell. iii.2. § 5.) It would appear from Mela (ii. 2), that some of the Thraciuns were unaequainted with wine, but practised another mode of prolucing intoxication: while feasting, they threw into the fires arousd which they were seated certain seeds, the funes of which cansed a cheerful kind of drunkenness. It is possible that these may have been the seeds of bemp, which, as we have seen, probably grew in Thrace, and coatains, as is well knowa, a narcotic principle.

The Thracians against whom Senthes led his forces lived in villages (Ib. § 43), the houses being fenced rount with large stakes, within the inelosure formed by which their sheep were secured ( $I b, 4$. § 14 ; ef. Tac. Ann. iv. 49).

Pliny (vii. 41) states that the Thracians had a custar of marking their happy or unhappy days, by placing a white or a black stune in a vessel at tho close of each day. On nay one's death, the vessel
belonging to him was emptied, the stones were separately counted, and his life pronounced to have been happy or the reverse, as the wbite or the black were more oumerous.
V. History.-Tbrace is one of those countries mhose people, not being sufficiently civilised to estahlish a national government or to possess a national literature, cannot have histories of their own. We become acquainted with the Tiracians at second band, as it were, through the parrations of foreigners, who necessarily make them subordinate to their own countrymen; and therefore it is only in connection with foreign states that their listory has been recorded. Hence it is fragmentary, and, consequently, eften obscure; nor would its importance, indeed, repay the latour that might be employed in elucidatiog it, even if we possessed the requisite materials. Destitute of union, the Thracians, notwithstanding their numbers, their wide diffision, their powers of epdurance, and their coutempt of death, exerted no perceptible influence upon the general course of history; but were reduced, is spite of their wild love of independence, to assist, as humble allies or subjects, in the aggrandisement of the more civilised or politic races with which they came in contact. These were the Greeks, the Persians, the Macedonians, and the Romans, with the suceessors of the last in the Eastern Empire. We shall now briefly state the leading points of their bistory, as connected with that of the nations just mentioned ; refering the reader for details, especially as to the little that is known of their purely interval affairs, to the articles in this work which relate to the Bessi, Odrysae, and other prominent Thracian tribes.

We pass over the alleged conquest of Thrace by Sesnstris (Herod. ii. 103; Diod. i. 53), and that said to have been effected by the Teucri and Mysi hefure the Trojan War (Herod. vii. 20 ; cf. Eurip. Rhes. 406, seq.), and come at ouce to the strictly bistorical periods.

The first connection of the Greeks with Thrace was through colonies planted upon its various coasts, the original ebject of which seems generally to have heen of a commercial kind. Only an approximation to the date of most of these can be made, since the majority were established long before the commencetnent of authentic history. Byzamtium and Selymbria, colonies of Megara, belong to the seventh century B. C., the year 675 B. C. being assigned for the foundation of the former. In 651 B. C. an unsuccessful attempt is said to have been made by settlers from Clazomenae to establish themselves at Abdera (Solin. x. 10); but that eity was not actually foupded till $560 \mathrm{~B} . \mathrm{C}$., nnd then by emigrants from Teos. (Herod. i. 168.) Mesembria, on the Euxide, was a colony of the Byzautians and Chalcedonians, who abandoned their cities on the approach of the Pboenician fleet, B. C. 493. (ld. vi. 33). When Dicaea, Mlaronea, and Aenus, all on the south coast, were established, is not known; which is the ease also with Cardia and Sestus in the Chersonesus. That these settlements were generally exposed to the hostility of their Thracian neighbours, there can be no doubt, though we rarely have their infabt struggles so fully recorded as in the instance of Amphipolis. The Athenians sent no lesa than 10,000 men (B. C. 465 ) to found a colony there; and they succeeded in driviug off the Edonians who occupied the country; but havieg adranced into the interior, they
were defeated at Drabescus by the natives, and compelied to abandon the couotry. About thirty years afterwards, however, the Athenians returned, and this time overcame all resistance. Sometimes the relation between the Greeks and the Thracians was of a more friendly description. Thus, in the time of Peisistratus, the Dolonei, who dwelt in the Chersonesus, invited Miltiades (the elder) to rule over them, as they were unable to cope with their peichbours the Apsinthii; nnd this led to the Atheaians obtaining a firm footiog in that most important and valuable district. (IIerod. vi. 34, seq.) By these various means, the Greeks had wbtained possession of acarly the whole coast of Thrace, a considerable period before the commencement of the great contest between themselves and the Persian empire. Of the interior they appear to have koown scarcely anything whatever; and althongh in some cases the surrounding barkarians may have heen brought ioto subjection (Byzantium is said to have reduced the Bithyoian Thracians to the condition of tributary petioeci), yet this was rarely the case. On the contrary, it is clear from Tbucydides (ii. 97), that the Greeks somotimes paid tribute to the native kiogs. The Greeks, even when dwelliog among bostile strangers, showed their tendency to separation rather than to union; and lence their settlements on the Thracian coast never gained the strength which union would have conferred upos them. Each city had a government and to a great extent a history of its own; and we must therefore refer the reader for information respecting those states to the serarate articles in this work devoted to them.

The first Persian expedition to Thrace was that of Darius, who crossed the Bosporus with his anoy about B. C. 513 (or 508 , as some authorities hold). As the principal object of Darius was to chastise the Seythians for their invasion of Asia in the reign of Cyaxares, he took the shortest route through Thrace, where he met with no opposition. The Greeks whom he found there were required to follow in his train to the Danube: annong them was the younser Miltiades, the destined hers of Marathon, who then ruled ever the Chersonesus, as his uncle had formerly done, and who had married the danghter of a Thracian king. (Herod. ri. 39.) * On returning from the north, Darius directed his march to the Hellespont, and before crossing from Sentus into Asia, erected a furt at Doriscus, near the mouth of the Hebrus. (Hlerod. iv. 89-93, 143, 144, vii. 59.) Megabazus was left with 80,000 men to subdue the whole of Thrace, a task which he begnu by besiegiog l'erinthua, which, though previously weakeoed by the attacks of the l'aconians, made a brave but fruitless resistance. After this, Jlegabazus reduced the country into suljection, though perhaps only the districts near the sea. (Herod. v. 1, 2, 10.) That his conquests extended as far as the Strymon appears from Darius's grant of a district opon that river to Ilistiaeus, who founded there the town of Nyrcinus. (Herod. v. 11.) Merabazns soon returuet to Asia; and it seems probable that be took with him the greater part of lis army; for if the Persiana lad maintained

[^37]vot. II.
a powetful force in Thrace, the Paedmars coni latrdly have sneceeded in making their escape from 1'heysia back to the Strymon (Id. v. 98), nor could the revolted Jonians (B, c. 498) have taken Byzantium and all the other cities in that conatry. (Id. v. 103.) It is to this period that we must refer the invasios of the Serthians, who are said to have advanced as far as the Chersonesus, thus occasioning the temporary flight of Miltiades, who, they were aware, had assisted Darius io his attaek upon their cous.tiv. (Id. vi. 40.)
After the suppression of the lonian revolt (b. c. 493), the Phoenician fleet sailed to the Hellespont, and again brought the country under the Persian dominion, Cardia being the only eity which they were uoable to take. (1d. vi. 33.) Niltiades made his escape from the Chersocesus to Athens, on beariog of the approach of the bostile fleet. (Ib, 41.)
Next year Mardooius Ied an army aeross the Hellespont, and advanced as far as Macedonia ; but his fleet baring heen wreeked of Muant Athos, and his land forces having suffered considerably in a war with the Tliracians, who then occupicd the country W. of the Strymon, he retraced bis steps, and transported lis shattered army into Asia (Id. ri. 43, seqq.).

It was not till $\mathrm{E} . \mathrm{c} .480$ that the vast army nader the command of Xerxes crossed the Hellespont by the famous bridges which spanned the strait from Abydos to Sestus. Of his march through Thrace, Herodotus gives an interestigg account (vii. 108115); but, as he met with no opposition, we need oot dwell upua these circumstances.

After the disastrous battle of Salamis, Xerses, with an eseort of 60.000 men, hastened back by the same rad which he bad so recently trod in all the overweening confidence of despotic power: in Thrace, his miselable troops suffered greatly from hunger and consequent disease, hut do not appear to bave heen openly attacked. (Herod. viii. 115, seqq.)

Nest year (B. c. 479) was fought the battle of Platacae in which Thracims formed part of the motley host arrayed agaiost Greek freedom (1d. ix. 32). Artabazus led the $40,000 \mathrm{men}$, who alone remained of the Persian army, by forced marches through Thessaly, Macedmia, and Thrace. He struck through the interior of the latter country, probably fir fe.ur of the Greek cities on the coast ; but he ensountered enemies as mneh to be dreaded, and lost a groat part of his aroly hy hunger, fatigue, and the attacks of the Thracians, before be reached Byzantium.

It wats now the tum of the victorious Greeks to assail their foes in their own territories. Hhrace, with the exception of Doriscos, was soon cleared of the Pemians. After the battle of Mycale, their fleet suiled to the Hellespont, where the Atbenians laid surge to Siestus, which was takeo early in the following year (b. c. 478) [Sestus]. Eiod, at the mouth of the Strymon, made a desperate resistance ; but at levith (b. c. 476) fell into the hands of Cimon and the Athenians, after its Persian governor had put to death all his family, and finally bimself. (llerod. vii. 107 ; cf. Thucyd. i. 98 ). Byzantium had been taken by 1'masaias the year befure. Thus the Perstans were duven out of Europe, and the Greek settlements in Thrace resumed their internal freedom of action, though most of them, it is probable, were minder the supremacy of Athens, as the chosen heat of the great Greek enfederacy.

During the adininistration of Pericles, 1000 Athenian eitizens were settled in the Thraeian Chersonesus, which mas atrays the chief stronghold of

Ati.ne in that quarter. Vuder the anspices of the same statesman, in E. C. 437 , the Athenians sucreeded in founding Amphipulis, the contests for the possession of which occupy a very promitient place in the subsequent history of Grece. [Ampuronis, Vol. I. p. 126.]

About this time flounislsed the most powerful Thraciao kingdom that ever existed, that of the Odrysae, for the listory of which see Onmysab, Yol. 11. pp. 463-465. At the commencement of the Pelopoonesian War (B.c. 431), the Athenians entered into an allianee with sitalces, the king of the Odrysae (Thucyd. ii. 29), whe, they hoped, would enaile them to subdne all opposition to their supremacy io the Chalcidic periusula. In consequence of this alliatee, Sitalees fed (B. C 429) a vast host into Macedonia, the ruler of which supported the enemies of Athens: he encountered no opposition, yet was compelled by want of supplies to return to Tbrace, about a month after he had left it (Ib. 95-101). But although Sitalces was an ally of Athens, this did not prevent Brasidas from hasing great numbers of light-ammed Thracians in lis arwies, while commaoding the Spartan forces in the oeighbourhood of Amphipolis (B. C. 422).

It would occapy too mueli space to relate minutely the various turns of fortune which occurred in Tbrace during the Teloponnesian War. The principal struggle io this quarter was for the command of the Dosporus and Hellespont, so important, especially to the Athenimis, on account of the eorn trade with the Enxine, from which Atbens drew a large part of her supplies. Hence many of the most important naval battles trere fought in the Hellespont: and the possession of Byzantium and Sestus was the prize of many a vietory. The battie of Aegospotan i, Which terminated the long contest for supremner, took place to the S. of Sestus, B. C. 405 . By the peace concluded next year, Atheas gave up all her foreign possestions ; and thuse in the east of Tlurace fell into the hands of tive Spartans and l'ersians. [See Byzantiem, Sestis, \&e.]

When the remnaut of the 10,000 Greeks returned (n. c. 400) to Europe, they were engaged hy Scuthes, atı (Nrrysian priuce, to assist him in recovering the domiuions which had belonged to his father, in the south eavern part of Thrace. (See. Anab, vii. pass.) Having thus beeo reinstated in his priucipality, lie showed his gratitude to the Greeks, by sending auxillaries to Dercyllidas, who commanded the Spurtan Gorces atainst the lersians, with whom they were Dow (3.c. 399) at war (Xen. Hell. iii. 2). Next gear Dercyllidas crossed over into the Chersonesus, and crected a wall across its morthern extremity, as a protection to the Gireek inhabitants, who were expowed to constant attacks from their barbarous nuightours (Il, 2, §s 8-10). The same gencral successfully defended Scotus from the combined forces of Convo and Plamabazus (b. c. 394 : 16. iv. $8 . \S$ 5, seqq.) But in B. c. 390 Thrasybulus restored Atbenian influence in Thrace, by forming an alliance with two native princes, and by establishing democracy at Brzantium (lb. § 25 , seqq.) ; and his success was confirmed by the victory of 1phierates over Anaxitius the nest year (ib. § 34). The peace of Antalcidas, bowever, released all the Greek staters from their couneetion with Athens, and virtually gave the supremacy to Sparta (n. c. $38^{7}$ ).

Nothing of any importance happened in Thrace after this event till the aecession of Philip 11. to the throne of Dacedonia (15, c. 359). This able but un-
scrupulous monarch at once began his career of aggrandisement towards the east. He contrived to get possession of Amphipolis (b. c. 358), and thus obtained a secure footing from which be might extend his dominions in Thrace as opportunity offered. At this time there were three native Thracian prioces, probably brothers, who seem to have ruled over most of the country. According to Justin (viii. 3), Berisades and Amadocus, two of them, chose Philip as judge of their disputes; of which position he treacherously availed himself to seize opon their dominions. Though this statement is not sapported, we believe, by any other ancient author, yet it is probably true; for such conduct is highly characteristic of the Macedonian monarch; and the aimost entire disappearance from history of these Thracian princes aoon after Philip's accession, would thus be acconated for. Cersobleptes, the third brother, who seems to have had the E. portion of Thrace, maintained a long struggle against his ambitious neighbour. In B. c. 357 he ceded the Chersonesns to the Atheoians, who sent a colony to occupy it four years afterwards. [See Cersonleftes, Dict. Biog. Vol. I. p. 674 : Sestus.] Philip at various times marched ioto Thrace, and repeatedly defeated Cersobleptes, whom he at length (n. c. 343 ) completely subdued and rendered tributary. Next year he established colonies in the eastern part of Thrace, and acts of hostility occurred between him and Diopeithes, the Athenian commander in that quarter. Philip was occupied the nest three years in Thrace, and laid siege to Perinthus and Byzantium, which were in alliance with Athens, whose forces, commanded by Phocion, compelled Philip to abandon the sieges; and he soun afterwards left Thrace, to advance towards the south against the confederate Greeks. On his departare Plocion recovered several of the cities in which Macedonian garrisons had beeo placed.

Notwithstanding these checks, Philip had bronght under bis command a great part of Thrace, especially ou the south coast: he had, above all, completely incorporated with his kingdom the district between the Strymon and the Nestus, and from the mines of the Pangaeus, which be seized in B. c. 356 , he obtained abundant supplies of the precious metals.

Philip was assassinated B. c. 336: next year his successor, Alesander the Great, marched across the Haemus to attack the Triballi; but bis chief attention was bestowed upon the preparations for the Asiatic expedition, which he entered upon nest year, crossing the Hellespont from Sestus.

On the death of Alexander (B. c. 323), Thrace was allotted to Lysimachus, who was sooo involved in hostilities with Seuthes, a king of the Odrysae. The reader is referred to the account of Lysimachus [Dict. Biog. Vol. 11. pp. 867-870] for details respecting his government of Thrace: the result of his various wars was that his sway was firmly established over all the conntries south of the Danube, as far as the coufines of Macedonia: the Greek cities oo the Euxine were garrisoned by his troops; and though many of the native tribes, in the more inaccessible districts, no doubt retained their freedom, yet he had completely defeated all their attacks upon his power. In e.c. 309 he founded Iysimachia, near the northern extremity of the Chersonesus and made it liis capital. Having engaged in a war with Seleucus, the ruler of Syria, be advanced to meet his antagonist io Asia, and was defeated and slain at Corupedion (B. C. 281), npon which Seleucus passed
over into Europe and took possession of Thrace. Nest year, however, he was assassinated by Ptolemy Ceraunus, who was thereupon acknowledged king; but shortly afterwards a vast borde of Celta invaded the country, and Ptolemy was slain in a battle with them. Anarchy now prevailed for some years in the conatry: the Celts again advanced to the south in B. c. 279 , and under Brennas penetrated as far as Delphi, on their repulse from which they retreated northwards, and some of them settled on the cuast of Thrace.

For vearly fifty years after this time little mention io made of Thrace in history; it appears to have been anoesed to Macedonia; but the rulers of that kingdom were too insecure, even in their central domioions, to be able to exercise much control over such a conntry as Thrace, inhabited now by races differing so widely as the Thracians, the Greeks, and the Celts, and offering so many temptations to the assertion of iodependence. [See Antigonus Gonatas, Denetrius Il., and Pirrenus, in Dict. Biog.]

About B. C. 247 , the fleet of Ptolemy Euergetes captured Lysimachia and other important cities on the coast; and they remained for nearly half a century under the kings of Egypt. (Polyb. v. 34, 58.)

In B. c. 220, Plilip V. ascended the throne of Macedonia. Uader Lim the Macedonian power regained something of its old prestige; and bad it not beea brought in collision with Rome, it might have become as exteasive as in forbuer times. But Philip unfortunately directed his ambitious views in the first instance towarda the West, and thus soon eacountered the jealons Republic. It was not till b.c. 211 that Philip commeaced his enterprises against Thrace: he theo led an army into the country of the Maedi, who were in the habit of makiog incursiona into Macedonia. Tbeir laods were laid waste, and their capital, Iamphorina, compelled to surrender. Having made peace with the Romans (1s. c. 205), he iovaded Thrace, and took Lysimachia. In B. c. 200, he again attacked that country, both by sea and land; and it is evident that he did not anticipate much resistance, since be took with him only 2000 infautry and 200 cavalry. Yet with this insigniticant force, aided by the fleet, he made himself master of the whole of the south coast, and of the Chersonesus. He then laid siege to Abydos, and after a desperate resistance took it (Liv. xxxi. 16). This seems to have hastened the declaration of war on the part of the Romans ; a war which lasted till B. c. 196, wheu Philip was reduced to procure peace by surrebdering all his conquests, and withdrawing his garrisons from the Greek cities (Liv. xsxiii. 30). L. Stertioius was sent to see that these terms were complied with (ib. 35). But scarcely had the cities been evacuated by the Macedonian garrisons, when Antiochus the Great crossed the Hellespont, and took possession of the Chersonesus, which he claimed as a conquest of Seleucus (ib. 38). He refused to comply with the demand of the Rumans, that he shouid withiraw his army from Europe ; but left his soo Sclencus to complete the restoration of Lysimachia, and to estend lis influence, which seenia to have been dooe by placing garrisons in Maruneia avd Aenus.

In the war whick ensned between the Romans and Antiochas (B. c. 190), Philip rendered the former good service, by providing everything Decessary for their march through Thrace, and securing them from molestation by the native tribes (Liv, xxxvii. 7). Autiochus was defeated by Scipio at Magnosia, and
sued for peace, which was at length granted to vim (3. c. 188) on condition of lis abandoning all hav dimminions west of the Tanrus (Liv. xxxviii. 38). The lomans gave the Chersonesis and its dependencies to their ally Eunenes (il. 39). As indicative of the internal condition of Thrace, even along the great sonthern road, the account which Livy (ib. 40 , seq.) gires of the march of the consul Manlins' ariny through the country on its return from Asia Minor, is highly interestivg. The army was loaded with booty, conveyed in a long train of baggagewatgons, which presented an irresistible temptation to the predatory tribes through whose territories its ronte lay. They accordingly attacked the army in a defile, and were not beaten off until they bad succeeded in their object of sharing in the pluoder of Asia.

The possession of the Chersonesus by Eumenes soon led to disagreements with Philip, who was charged by Eumenes (B.c. 185) with baviog seized opun Maroneia and Aenns, places which he coseted for himself. (Liv. axxix. 24, 27). The Romans insisted upon the withdrawal of the Macedonian garrisons (B.C. 184), and Philip, sorely against bis will, was obliged to ubey. He wreaked bis anger upon the defedceless citizens of Marodeia, by conniving at, if not actually commanding, the massacre of a great number of them ( $i 6,33,34$ ). In the course of the disputes about these cities, it was stated that at the end of the war with I'hilip, the Roman commissioner, Q. Fabins Labeo, had fixed upoo the king's road, which is described as nowhere approaching the sea, as the S. boundary of Philip's pussessions in Thrace; but that 1hillip had afterwards formed a new road, considerably to the S.. and had thus included the cities and lands of the Maronitae in lis territories (ib. 27).

In the same year. Plilip undertook an expedition into the interior of Thrace, where be was fettered by oo engagements with the Romans. He defeated the Thracians in a battle, and took their leader Amadoens prisoner. Before returning to Macedunia he sent envoys to the barbarians on the Dampe to invite them to make an incursion into Jtaly (ib. 35). Again in e.c. 183, Philip marched against the Odrysae, Dentheletae and Bessi, took Plaslippopolis, which its iobabitants had abandoned at his approach, and placed a garrisob in it, which the Odrysae, however, soon afterwards drove out (ib. 53). Io s.c. 1\$2, Pbilip removed nearly all the inhabitants of the cosst of Nacedonia into the interiur, and sapplied their places by Thracians and other barhariaos, on whom be thought be could more safely depend in the war with the Romans, which be now saw was inevitalle (Lis, sl. 3). He had done something of the savie kivd a few years hefore (14. xsxix. 24).

J'hilip's ascent of the Huemns, alrendy referred to, took place in s. c. 181 : oo the summit he erected altars to Jupiter and the Sun. On bis way back his army phundered the Dentheletae ; and in Maedica be took a town called Petra. (Liv, sl. 21, seq.)

Philip died in 1s. C. 179, and his successor Perscus continued the preparations which his father lad made for rowewing the war with liome, which did not bepin, however, till s. ©. 171 . The Romans had formed an alliance the year before with a namber of independent Thracian tribes, who had sent ambassad is to thome for the purperse, and who were likely to be formidalite fers to Perseus. The limans touk cate to send valuable presents to the frincipal Thracians, their ambassadurs baving no

## TIIRACLA.

Whe ubt inpressed upoo the senate the necessity for compliance with this national costom. (Liv. x]ü. 19.)

The advantage of this alliance was soon zeen. Cotys, king of the Odrysae, was an ally of l'erseus, and marched with him to meet the Ronans in Thessaly, but with only 1000 horse and 1000 fiot, a furce which shows low greatly the power of the Odrysian monarchy lata declined since the reign of Sitalces (ib, 51). Cotys commanded all the Thracians in Persens's army in the first engagement with the Romao cavalry, which was defeated (ib. 57, seq.). When I'erseus retreated into Dlacedonia a report was brom the that the Thracian allies of Rome lad insaded the dominions of Cotys, whom Perscus was therefure obliged to dismiss for their protection (ib. 67), and he does not seem to have persunally taken any further part in the war, thongh he prubably sent part of his forces to assist Persems (xliv. 42). His son Bitis fell into the hands of the Romans, after the battle of Prdoa (n. C. 168), which put ao end to the Macedonian kingdom. Cutys sent ambassadors to lome to endeavour to ransom bis son, and to excuse limself for having sided with Persens. The senate rejected his offers of money, but liberated his sun, and gave a considerable suni to each of the Thracian aubassadors. The reason it assigned for this generosity was the old frieadship which had existed hetween Rome and Cotys and his ancestors. The Romans were evidently unmilling to ensage in a war with the Thraciao people at this time; aod were anxious to secure friends among them for the sake of the peace of Macedomia, which, though not yet nominally made a province, was completely in their power. They seut ( $\mathrm{n}, \mathrm{c}, 167$ ) three commisioners to condoct Bitis and the other Tbracians home; and at the sause time, no doubt, to make obserrations on the state of that country. (Liv, xlv, 42).

After the fall of Perseus, the seoate divided his donninions into faur districts (regiunes), the first of which included the territory between the Strymon and the Nestus, and all the Macedonian possessions east of the latter, except Aenus, Maroneia, and Abdera: Bisaltica and Siutice, west of the Strymon, also belonged to this district, the capital of which thas Amphipolis. (Ib.29.) it is important to recollect tbat the Thrace spuken of by the Latin historians subsequently to this time does net include the territories here specified, which thenceforth cunstituted an integral part of Macedonia.

From the year B. C. 14s, wheo the Romans undertook the direct government of that country, they were brooght into contact with the various barbarous nations on its fr motiers, and were continually at war with one or another of them. Fir some years, hutsever, their chicf ocenpation was with the Scordisci, a people of Celtic origin which lad seitled sonth of the l)anube, and often made derastating incursions into the more civilised regions of the sulth. They are sometiones called Thracians (e. g. by Florus, iii. 4 ; cf. Amm. xxvii. 4. § 4), wbich is the less summing when we remen ber that great numbers of Celts had settled in Sonthern Thrace, and wonld soon be confonded onder a commen nerio with the otber occupants of the country. The listory of all this period, up to the time of Autastus, is very obscore, owiug to the loss of so great a part ef Livy's work ; enough. In wever, apfears in of rer writers to shuw that Thrace was left ahmoot entirely to its native rulers, the Romans rarcly inserfering in in it except when $y^{\text {ravaked by tle prud tory inctasiny }}$
of its people into Macedonia: they then sometimes made retaliatory expeditions into Thrace ; but seem gencrally to have made their way back as soon as the immediate object was accomplished. The relation existing between the Romans and the Thracians, for mere than a century after the conqnest of Macedonia, thus bears a close resemblance to that which has loug existed between our own countrymen and the Caffres.

During the years n. C. 110, 109, the Consul M. Minucins Pufus was engaged in hostilities with the Scordisci and Triballi; and, according to Florus (l.c.), laid waste the whole valley of the Hebrus (cf. Eutr. iv. 27). In b.c. 104, Calpurnius Piso penetrated into the district of Ithodope (Flor, l. c.). In B, C. 92, the Maedi defeated the praetor, C. Sentius, and then ravaged Macedonia (Cic. Pis. 34 ; Liv, Epit. 70). After the breaking out of the Mithridatic War (B.c. 88), mention is made in several successive years of the incursions of the Thracians into the Roman provinces, and it is probable that they were acting in concert with Dithridates, whose general Taxiles, in e. c. 86 , led a vast army through Thrace, and Macedonia te the assistance of A rchelaus. (Liv. Epit. $74,76,81,82$ ). On the tinal defeat of Archelaus, Sulla directel his march towards Asia through, Thrace B. c. 84 , and, either to punish the people for their connection with Mitbridates, or because they opposed his passage. made war upon them with complete success (Id. 83). C. Seribonius Curio defeated the Dardani, and penetrated to the Danube, being the first Ruman who had rentured into that part of Eurepe (b. c. 75 ; Liv. Epit. 92 ; Eutr. vi. 2). Curio was sneceeded as gevernor of Macedonia by M. Lucnllus (в. с. 73), who defeated the Bessi in a pitched battle on Monat Haemus, took their capital, and ravaged the whole country between the Haemns and the Danube (Liv. Epit 97 ; Eutr. vi. 10). The Bessi were again conquered in n. c. 60 by Octavius, the father of Augustus (Suet. Aug. 3 ; cf. Ib. 94 ; Frciush. Suppl. cxxxv, 2). In the years B. C. 58,57 , Piso, so well known to ns from Cicere's celebrated speech against him, was governor of Macedenia ; and, if we may believe Cicero, acted in the most eruel and faithless manner towards the Bessi and other peaceable Thracian tribes. (Pis. 34, de Prov. Cons. 2, seq.). From the latter passage it appears that altheugh Thrace was not under the government of Rome, yet the Romans claimed the right of way through it to the Hellespont; for Cicero calls the Eguatian Way "via illa nostra militaris."

In the civil war between Caesar and Pompey, several Thracian princes furnished the latter with auxiliary forces. Why they interfered in the contest, and why they preferred Pompey to Caesar, are matters of conjecture only. Pompey had been chiefly engaged all his life in the East, Caesar in the West ; and that is probably sufficient to account for the greater influence of Pompey in Thrace. (Caes. B. C. iii. 4 ; Flor. iv. 2 ; Diea Cass. xli. 51, 63, xlvii. 25).

At the time of Caessr's death two brothers, Phasenporis and Rasens [Dict. Biog. Vol. III. p. 647] ruled over the greater part of Thrace ; and wben the war broke out between the triumvirs and the republican party, Phascuporis sided with the latter, while Rascus aided the former. By this plan tbey hoped to be safe, whichever party might be victorious; and it is said that their expectations were realised.

When the power of Rome was at length wielded by Augustus without a rival, the relation of Thrace
to the Roman state scems to have become in many respects like that which the native princes of India leng borc to the Britisb. 'flue Thrac:an kings were generally allowed to exercise, without restraint, their authority over their own subjects, and when needful it was snpported by the arms of Rome. But all disputes among the native rulers were referred to the decision of the emperers, who disposed of the country as its acknowledzed lords. These subject princes were expected to defend Thrace from external and internal foes ; to assist the Romans in the field ; to allow them to enlist troops, and in other ways to exercise the rights of soscreignty. For illustrations of these statements we must refer the reader to Tacitus, especially to the following passages : Ann. ii. $64-$ 67, iii. 38, 39, iv. 5, 46-51. The few Tbracian coins which are extant afford a proof of the dependent character of the Thracian kings ; they bear on the obverse the effigy of the reigning emperor, on the reverse that of the native prince. [See Dict. Biog. Vol. III. p. 653.]

The interferesce of the Romans in the government of Thrace was not submitted to by the nation at large withont several severe struggles. fhe most furmidable of these eccurred aboot E. C. 14, the fullest account of which is given by Dion Cassius (lib. liv.). The leader in this insurrection was Yologaesus, a Bessian priest of Bacchus, who availod bimself of his sacerdetal character to inflame the religious feelings of bis countrymen. Having thas assembled a large army, he attacked, defeated, and slew Rhascuporis, a king under Foman protection ; his uncle, Rhoemetalces, was next assniled and compelled to flee : the insurgents pursued him as far as the Chersonesus, where they devastated the comntry and captured the fortified places. On receiving information of these proceedings, Augustus ordered L. Piso, the gevernor of Pamphylia, to transport his army into Thrace, where, after a three jears' war and several reverses, he at length succeeded in subduing the Bessi, who had adopted Roman arms and discipline. They soon afterwards made a second attempt to regain their independence ; but were now easily crushed. (Vell. Pat. ii. 98 ; Tac. Ann. vi. 10; Sen. Ep. 83 ; Flor. iv. 12 ; Liv. Epit. 137.)
After this war, the Romnes gradually absorbed all the powers of government in the country. Germanichs visited it in A. D. 18, and introduced reforms in its administration (Tac, Ann. ii. 54). A system of conscription seems to have been imposed upen the Thracians about A. D. 26 (Ib. iv, 46). The last native prince of whom we find any mention is Rhoemetalces II., who, in A. D. 38, was made by Caligula ruler over the whole country; and at length, in the reign of Vespasian (A. D. 69-79), Thrace was reduced into the form of a province. (Suet. Fesp. 8; Eutr. vii. 19; cf. Tac. Hist. i. 11.) Tho date of this cvent has been dispoted on the authority of the Eusebian Chronicle, which states that it took place in A. D. 47 , in the reign of Claudius; but the statement of Soetorius is express on the point. It is possible that Rhoemctalces II. may bave died about the year last mentioned ; and if Claudias refused to appoint is successor to him, this would be regarded as equivalent to incorporating the country io the Roman empire, altbough its formal constitution as a proviece was delayed; as we knuw was commonly the case. It is remarkable that Muesia was made in province upwards of 50 years before Thrace Proper, its first propraetor being meationed in A. D. 15. (Tac. $\begin{gathered}n n . ~ i . ~ \\ 79\end{gathered}$ cf. $I b$. ii. 66 ; Plin. iii. 26. s. 29.)

Thrace now shared in the general fortunes of the Roman world, on the division of which into the Fiatero and Western Empires, it was attached to the former, being governed by the Vicarius Thraciarum, who was subordinate to the Praefectus Praetoris Orientis. Its sitation readered it extremely liable to the inmonds of barhariaas, and its history, so far as it is knowi, is littie else than a record of war and devastation. The Goths made their first appearance there in A. D. 255 ; the emperor Probus, about A. D. 280, established in it 100,000 Bastarnae. In A. D. 314, and arain in 323, the emperor Liciaius was defeated at Hadriaoople by Constantine, who, in A. D. 334, settled a maltitude of Sarmatians in Thrace, which, is 376 , received another accession to its heterogeneous population, Valens baring given permission to the Goths to reside in it. This gave rise to innmerable wars, the details of which are recorded by Ammianus (lib. 8xxi.). In 395 the de5oted country was overrun by Alaric, and in 447 by the more dreadful Attila, Throngh all these misfortunes, however, Thrace remained in connection with the Eastern Empire, the capital of which was within its boundaries, until the year 1353, when the Turks, who had crossed over into Earope in 1341, obtained possession of the Thracian fortresses. Their Ieader Amurath conquered the whole conatry, except Corstantiaople, and made Hadrianople his capital. At length, in 1453, Constantinople itself was taken, and the Turks have ever siace been the undisputed Iords of Thrace.

V1. Torography. - Under this head we shall merely collect such names as will serve to direct the reader to articles in this work, where fuller information is given.

Play (iv. 18 ; cf. Mela, ii. 2 ; Amm, xxrii. 4) enumerates the following as the principal Thracian tribes: Denseletae, Maedi, Disaltae, Digeri, Bessi, Elethi, Drubessi, Carbilesi, Bry*ae, Sapaci, Odomaoti, Odrysae, Cabyleti, Pyrogeri, Drugeri, Caenici, IIypalti, Beni, Corpill, Bottiaci, Edoni, Selletae, I'riantae, Dolocci, Thyni, Coeletae. To these we may add, the Apsiothii, Bistones, Cicones, Satrae, Dii, and Trausi.

Of the towns mentioned by Pliny (l. c.), these belonged to Thrace Proper: 1. On the coast (i.) of the Aegeaa: Oesyma, Neapolis, Datum, Abdera, Tirida, Dicaes, Muronea, Zone, and Aenus; to these must be added Amphipolis, Pistyrus, Cosinthus, and Mesembria; (ii.) of the Chersonesus: Cardia, Lysimachia, I'achyta, Callipolis, Sestus, Elaeus, Coelos, Tiristasis, and Panormus; besides these there were Alopecomaesus and Acora; (iii.) of the Propoatis: Bisanthe, Perinthas, and Selymbria: (iv.) of the Bosporas: Byzantiun; (v.) of the Euxine: Mesembria, AnchiaLus, Aprillunia, Tbynias, Sulmydessus, and Phinopolis. 2. In the interior: I'hilippopolis, Philippi, Soctusa, Topiris, Dorisens, Cypsela, Apros, and Develton. This is a very scanty list; hut many of the procipal inland towns were founded after Pliny's time: their names also were often changed. The following are some of the chief towns in the interior: Iladrianopolis, l'lotinopolis, Trajanopulis, Tempyra, Nicopolis, Beroca, Lamporima, and Petra.

Besides the rivers mentioned in the conrse of this article, the following occur: the Bathynias, Pydaras or Atyras, Bargas, Cossinites, Compsatus, and Xerogypsus.

As to the political divisions of Thrace, Pliny (l.c.) states that it was divided into fifty strategiae ; but he describes Muesia as Iart of Thrace. According to

Ptolemy (iii. 11. §8. seq.), its districts were Mnedica, Dentheletica, Sardica, Bessica, Drosica, Beanica, Usdicesica, Selletica, Samaica, Cueletica, Sapaica, Corpiliaca, Caenica, and Astica.

Ammianus ( $l$. c.) states that in the 4 th century Thrace was divided into six provinces, bat of these only foor belonged to Ttrace south of the Hacmus: (i.) Thrace Proper (speciali nomiae), including the W. part of the country; principal cities, Philippopolis and Beroea : (ii.) Maemimontus, i. e, the NE. district: chief towns, IIadrianopolis and Aachialus: (iii.) Europa, comprehending the SE. district; cities, Apri and Perintbns (Constantinople, beiag the capital of the whole Eastern Empire, wus not regarded as beloaging to any province): (iv.) Rhodopa, comprisiag the SW. recion; pribcipal cities, Maximianopolis, Maroneia, and Aenas.

The principal modern writers in whase works ivformation will be found respecting Thrace, have been mentioned in the course of this article. Among the other authors whom the reader may consult, we may name the following: Dapper, Beschryring der Eilanden in de Archipel, Amst. 1688, of which Latin and Freach translations were published at Amsterdan in 1703. Panl Lncas, Voyage dans la Turquie, lAsie, ofe 2 vols. Amst. 1720. Choiseal, Voyage Pittoresque dans lEmpire Ottoman: of this work the first volume was published at Paris in $1 \% 82$, the first part of the second not till 1809; the author died in 1817. A new edition, with many corrections and additions, was pablished is 4 vols. 8 8.o. at Paris in 1842. This work is devoted eliefly to the antiquities of the country ; of which the plates contained in the illustrative Atlas which accompanies the book give many representations. Ami Bonés, La Turquie d'Europe, 4 vols. 8vo. Paris, 1840, is the most complete work yet written on the snbject; its anthor, a man of great scientific acquiremeats, made two journeys in Turkey, in 1836, when he was accompanied by M. Viqnesnel, and in 1838. Tbe first volume contains an elaborate account of the pliysical geograplyy, geology, vegetation, fauna, and meteorology of the country; but takes little or no notice of its classical geography. A map is prefixed to it, which was a vast improvement on all that bad preceded it; but it is now in its turo superseded by that of Kiepert, who las employed in its construc. tion the materials afforded by M. Viquesnel's reports already referred to. (Comp. Gatterer, le Mevoduti ac Thucydidis Thracia, contained in the Commentationes Soc. Reg. Gottin. vol. iv, Pp. 87-112, vol. v. pp. $59-88$.
[J. I.]
THRAC1A, in Asia. A district in Asia Mlinor on the coast of the Fonine, is sometimes called Thrace, and its inlabitants Thracians. (Herod, i. 28 ; Xen. Anab. ri. 2. § I4, et al.) This country is more commonly called Bithyoia. [See BuTuyxiA, Vol. 1.p. 404.]
[J. R.]
TIIRA'CIUS Bo'SPORUS. [BosponUs.]
THRASIME'NUS LACLS [Tmastarfats]
THRAUSTUS (Epavootos, Xed) or THRAE-
 trict of Acroreia in Elis, of unknowa site. (Xec. Hell. vii. 14. § 14 ; Diod. xiv. 17.)

THRLA. [ATTICA, p. 328, b.]
THLROASCA (Єро́бка), a place in Carmania, mentioned hy l'tolemy (vi. §. § 14). Perbaps the modern Girost.
[1.]
THRONI (Opobor), a town and promontery on the SE. coast of Cyprus, distant 700 stadia from the promontory Curias. On the promontory of Throni

Pococke observed an ancient tower．（Strab，xiv．p． 682 ；Ptol．v．I4．§§ 2，3；Engel，Kypros，vol．i．p．99．）

THRO＇NIUM1（Opóviov：Eth．©póvios，©povitク̧s， ©povitús）．1．The chief town of the Locri Epicne－ midii，situated 20 stadia from the coast and 30 stadia from Scarpheia，upon the river Boagrius， which is described by Strabo as sometimes dry，and sometimes flowing with a stream two plethra in breadth．（Strab．ix．p 436．）It is mentioned by Homer，who speaks of it as near the river Buagrina． （Il．ii．533．）It was at one time partly destroyed by an earthquake．（Strab，i．p．60．）At the be－ ginning of the Pelopoonesian War（n，c．431）Thro－ nium was taken by the Athenians．（Thuc，ii．26； Diod．xii．44．）In the Sacred War it was taken by Onomarchus，the Phocian general，who sold its in－ habitants into slavery，and beace it is called by Scylax a Phoeian city．（Diod．xvi．33；Aesch．de Fals．Leg．p．45，33；Scylax．p．23．）（Thronium is also meationed by Polyb．ix．41，xvii．9；Eurip．Iph． Aul．264；Liv．xxxii．5，6，xxxiii．3，xxxv，37， xxxvi．20；Paus，v．22．§4；Lycophr． 1148 ；Ptol． iii．15．§ 7 ；Plin．iv．7．s． 12 ；Steph．B．s．v．） The site of Thronium was ascertained by Meletins who found above the village Romani，at a place named Paleokastro，where some remains of the city still exist，a dedicatory inscription of the council and demus of the Thronienses．（Leake，Northern Grecce， vul．ii．pp．177，178．）

2．A town in Greek Illyria in the neighbourhood of Amantia［Asustin］，said to have been fonnded after the Trojan War by the Abantes of Euboea and the inhabitants of the Lecrian Throniam．It was taken at an early period by the inbabitants of the neighbouring town of Apollonia，and annexed to their territory，as appears from an epigram inscribed on a dedicatory offering of the Apolloniatae at Olym－ pia．（Paus，v．22．\＆s 3，4．）

## THRYON，THRYOESSA．［Emitalium．］

THULE（Єaú $\lambda \eta$ ，Ptul，ii．6．§3 32），a celebrated island in the Northern Ocean，discovered by the navigator Pytheas．Pytheas arrived at it after a voyage of six days from the Orcades，in which it may be computed that he had accomplished abont 3000 stadia．（Plin．ii．77．）According to the account of Pytheas，he reached the polar circle，so that on this island the longest day mas twenty－four hours，and there was constant day during the sis sumarer months and constant night during the six winter ones．It was deficient in animals，and even the most necessary fruits，but produced a little corn． From the time of its discovery it was regarded as the most northerly point of the known world．although no further knowledge was obtained respecting it ； and this view seems to be confirmed by ita name， since in Gothic Tiel or Tiule（ $\tau \dot{\epsilon}$＇os，goal）denoted the remotest land．（Strab．i．p．63，ii．pp．104，114， iv．p． 201 ；Agath．i．8；Prisc．Perieg．587，sqq－； Jela，iii． 6 ；Plin．iv．16．s． 30 ；Tac．Agr． 10 ； Virg．G．i． 30 ；Solin．c．22，S．．；cf．Praetorins， de Orbe Goth．iii．4．3．p．33；D＇Anrille，Sur la Navig．de Pytheas，p． 439 ；Rudbeck，Atlant．i．p． 514．）Ptoleny is the only writer who places Thule a great deal further S．，thongh he nudoubtedly had in view the island discovered by Pytheas ；and according to him it would seem to bave been the largest of the Shetland islands，or the modern Mainlond（see ii．3．§ 32，i．24．§§ 4，6，17，20， vi．16．§ 21 ，vii． $5 . \$ 12$ ，viii．3．§ 3）．Slost mo－ dern geographers incline to the opinion that Pytheas meant Iccland；though according to others his

Thule is to be varinusly sought in Norway；in that part called Thite or Thilemark；in Julland， the extreme point of which is called Thy or Thylaum； or in the whole Scandinavian peninsula（Jalte－ Brun，Geogr：Univ．i．p．120；Ortelins，Theatr．Orb． p．103．）
［T．H．D．］
THUMATA（ $\because o v \mu \dot{\alpha} \tau \alpha$, Ptol．vi．7．§ 33；Plin． vi．28．a．32；Thamatha，Not．Imp．Rom．§ 2．2．p． 37），a town of Arahia Felix，necording to 1＇toleny， and described by Pliny as distant 10 days＇sail from Petra，and subject to the king of tho Characeni．

THUMNA．［TAmina］
THUNU＇DROSION（Єounov́万popov，Ptol．iv． 3. § 29），a Roman colony in Numidia．It seems to be the same place as the Tynidrumense oppidum of Pliny（v．4．s．4）．
［T．H．D．］
THU＇RLA（Øovpia：Eth．©ouptátクs），a town of Messenia，situated in the eastern part of the sonthern Messenian plain，apon the river Aris（Pidhima），aod at the distance of 80 stadia from Pharae．which was about a mile from the coast（Paus，iv．31．§ 1）．It was generally identified with the Homeric Antheia， though others supposed it to be Aepeia．（Paus．l．c．； Strab．viii．p．360．）It must have been a place of considerable importsace，since the distant Messenian gulf was even named after it（ $\delta$ ©oupıáтクs кסं入тos， Strab．l．c．）．It was also one of the chief towns of the Lacedaemonian Perioeci after the subjugation of Messenia ；and it was here that the Third Messenian War took its rise，b．c． 464 （Thuc．i．101）．On tho restoration of the Messenians by Epaminondas，Thuria， like the other towns in the conntry，was dependent npon the newly－founded capital Messene ；but after the capture of this city by the Achaeans in 1．c．182， Thuria，Pharae，and Abia joined the Achacan League as independeat membera．（Polyl，xxv，1．）Tharia was annexed to Laconia by Angustus（Paus．l．c．）； but it was restored to Messenia by Tiberius．［Miss－ senli，p．345．a．］Pausavias found two cities of this name．The Thmriatae had desceoded from the summit of the lofty bill of the npper city to dwell upon the plain ；but withont abandoning altogether the upper city，where a temple of the Syrian goddess still stood within the town walls（Paus，iv．31．§ 2）． There are considerable remains of both places．Those of Upper Thuria are on the bill of the village called Pakcikastro，divided from the ranige of mountains named Mukryplai by a deep ravine and torrent，and which commands a fine view of the plain and gulf． The remains of the walls exteod half a mile along the summit of the hill．Nearly in the centre of the ruins is a quadrangular cistern， 10 or 12 feet deep， cut out of the rock at one end，and on the otber side constructed of masonry．The cistern was divided iuto three parts by two cross walls．Its whole length is 29 paces ；the breadth balf as mncb．On the highest part of the ridge thero are numerous ruins，among which are those of a small Doric temple，of a hand brown calcareous stone，in which are cockle and muscle shells，extremely perfect．In the plain at Paled Lutra are the ruins of a large Foman building，standing in the middle of fig and mnlberry gronnds．Leako observes that＂it is in an uncommon state of preservation，part even of the roof still remaining．The walls are 17 feet ligh，formed of equal conrses of Roman tiles and mortar．Tho roof is of rubble mised with cement． The plan does not seem to be that of a bath only，as the name would imply，though there are many ap－ pearances of the building having contained batbs ：it seems rather to have been the palace of aome Roman

464

## TIIURII.

gowemor. As there are no sources of water here, it is to be supposed that the bribling was supplied by an agqueduct from the neighbouring river of Pullima." (Leake, Morea, vol. i. pp. 354. scq. 360; Boblaye, Recherches, ifc. p. 105; Ross, Reisen im Peloponnes, [. 2; (Curtius, Peloponnesos, vol. ii. p. 161.)

THU'RII ( $\begin{aligned} & \text { oúpios: Eth. ©oupivos, Tburinus), }\end{aligned}$ called also by seme Latin writers and by Ptolemy Thumus (Đoúpoy, Plol.), a city of Magna Graceia, situated on the Tarentine gulf, within a short distance of the site of Sybaris, of whicb it may be considered as having taken the place. It was one of the latest of all the Greek colonies in this part of Italy, not having been founded till nearly 70 years after the fall of Sybaris. The site of that city bad remained desolate for a period of 58 years after its destruction by the Crotoniats [Sybams]; when at lenerth, in b.c. 452 , a number of the Sybarite exiles and thoir descendants made an attempt to establish thenselkes again on the spot, under the guidance of some leaders of Thessalinn origin ; and the new celony rose so rapidly to prosperity that it excited the jealousy of the Crotoniats, who, in consequence, expelled the now settlers a little more than 5 years after the estahli-hment of the colony. (Diod. xi. 90, sii. 10.) The fugitive Sybarites first appealed for sulport to Sparta, but withoat saccess : their application to the Athenians was more successful, and that penple determined to send ont a fresh colony, at the same time that they reinstated the settlers who had been Italy expelled from thence. A body of Athenian colonists was accordingly sent ont by Pericles, under the command of Lampon and Xenocritus; but the number of Athenian citizens was small, the greater part of thnse who took part in the colony being coljected from various parts of Greece. Anong them were tro celebrated names,- Herodotus the historian, and the orator Lysias, both of whom appear to liave formed part of the original colony. (Diod. xii. 10; Strab, si. p. 263; Dinyys. Lyys. p. 453 ; J'it. X. Orat. p. 83.5; Plat. Peric. 11, Nic. 5.) The nem colunists at first established themselves on the site of the dosprtel Sylanis, but slortly afterwards remosed (apparently in ohedience to an oracle) to a spont at a short distance from thence, where there was a fountain named Tharia, from whence the new city derived its name of Thurii. (1)iod, l.c.inStrab l.c.) The foundation of Thurii is assigned by Diodorus to the year $446 \mathrm{~B} . \mathrm{C}$ : but other authorities place it three years later, n. . 443 , and this seems to be the best authenticated date. (Clinton, F. II. vol, ii. p. 54.) The protection of the Athenian name probably seoured the rising oulons from the assaults of the Crotoniats, at least we hear nothing of any obstacles to its progress from that quarter; but it was early disturbed liy dissensions between the descendants of the original Sylarite settlers and the new colonists, the former layug claim not only to bonorary distinctions, bat to the exclusive possession of important political privileges. Theso dispuntes at length ended in a rovolution, and the Syharites were finally expelled from the city. They establishod themselves for a short time upon the river Traens, but did not maintain their froting long, heire listodged and finally dispersed by the neightouning barbarians. (1)iod. xii. 11, 22; Arist. Pol. v. 3.) The Thurians meanwhile concluded a treaty of peace with Crotona, and the new city rose rapidly to prosperity. Fresh colonists poured in from all quarters, especially the Peluponnese; and though it continued to be generally regarled as an Athenian colony, the Athenians in fact
formed bat a small clement of the population. The citizens were divided, as we learn from Diodorus, into ten tribes, the names of which sufficiently indicate their origin. They were, - the Arcadian, Achaean, Elean, Boeotian, Amphictyonic, Doriad, Iunian, Athenian, Eubuean, and Nesiotic, or that of the islanders. (Diod. xii. 11.) The form of government was demecratic, and the city is said to have enjoyed the adrantage of a well-ordered system of laws; but the statement of Diodorus, who represents this as owing to the legislation of Charonday, and that lawgiver bimself as a citizen of Thurii, is certainly erroneons. [Dict. of Biogr. art. Chamosdas.] The city itself was laid out with great regularity, being divided by four broad streets or "platcas," each of which was crossed in like manner by three etbers. (Diod. xii. 10.)

Very shortly after its foundatien, Tharii became involved in a war with Tarentum. The subject of this was the possession of the fertile district of the Siritis, about 30 miles N . of Thurii, to which the Athenians liad a claim of long standing [Sters], which was naturally taken up by their colonists. The Spartan goneral, Cleandridas, who liad been banished from Greece some years befere, and takon up his abode at Thurii, became the general of the Thurians in this war, which, after various successes, was at length terminated by a compromise, both parties agreeing to the fuondation of the new colony of Heracleia in the disputod torntory. (Diol. xii. 23, 36, xiii. 106 ; Strab. vi. p. 264 ; Polyaen. Strut. ii. 10.) [Henaclela.] Our knowledge of the history of Thurii is uufortunately very scanty and fragmentary. Fresh disputes arisiog between the Athenian citizens and the other colonists wore at length allayed by the oracle of Delpbi, which decided that the city had no other foander than Apollo. (Diod. 又ii. 35.) But the same difference appears again on occasion of the great Athenian expedition to sicily, when the city was divided into two parties, the one desirous of favouring and supprorting the Athenians, the other opposed to them. The latter faction at first prevailod, so far that the Thurians observed the same nentrality towards the Athenian fleet under Nicias and Alcibiades as the other cities of laly (Thnc. vi. 44); but two years afterwards (1. c. 213) the Athenian party had reganod the ascendency ; and when Demosthenes and Eurymedon touched at Tburii, the eitizens affordod then every assistanco, and even furnished an anxiliary force of 700 boplites and 300 darmen. (Id. vii. 33,35 .) From this time we hear nothing of Thurii for a perind of more than 20 years, though there is reason to believo that this was just the time of its greatest prosperity. In B. C. 390 we find that its territory was already beginning to snffer from the incursions of tho Lacanians, a new and formidable enemy, for protection against whom all the cities of Magna Graecia had entered into a defensive league. But the Thuriana were too impatient to wait for the support of their allios, and issued forth with an army of 14,000 foot and 1000 horse, with which tbey ropulsed the attacks of the Lucanians ; but having rashly follewed them into their own territory, they were totally defeated, near Laiis, and above 10,000 of them cut to pieces (Diod. ziv. 101).

This defeat must have inflicted a severe blow on the prosperity of Thurii, while the centinually increasing power of the Lucanians and Bruttians, in their immediate neighbourbood would prevent them from quickly recovering from its effects. The city
coutinued also to be on hostile, or at least unfriendly, terms with Dionysius of Syracuse, and was in censequence chosen as a place of retirement or exile by his brother Leptines and his friend Philistns (Dind. xv. 7). The rise of the Bruttian people about b. c. 356 probably became the causc of the complete decline of Thurii, but the statement of Diodorus that the city was conquered hy that people (xvi. 15) must be received with considerable douht. It is certain at least that it reappears in history at a later period as an independent Greek city, though much fallen from its former greatness. No mention of it is found during the wars of Alezander of Epirus in this part of Italy; but at a later period it was so hard pressed by the Lucanians that it had recourse to the alliance of Rume; and a Roman army was sent to its relief under C. Fabricins. That general defeated the Lucanians, who liad actually laid siege to the city, in a pitched battle, and by several other sDecesses to a great extent broke their power, and thus relieved the Thurians from all immediate danger from that quarter. (Liv. Epit. si.; Plin. xxsiv. 6. s. 15 ; Val. Max. i. 8. § 6.) But shortly after they were attacked on the other side by the Tarentines, who are said to have taken and plundered their city (Appian, Samn. 7. §1); and this aggression was one of the irmmediate canses of the war declared by the Romans against Tarentum in R. C. 282.

Thurii now sunk completely into the conulition of a dependent ally of Rome, and was protectel by a Roman garrison. No mention is fonnd of its name during the wars with Pyrrhus or the First Punic War, but it plays a considerable part in that with Hannibal. It was apparently one of the cities which revelted to the Carthagioians immediately after the battle of Cannae, though, in another passage, Livy seems to place its defection somewhat later, (Liv. xxii. 61 , xxv. 1.) But in B. c. 213 , the Thurians returned to their alliance with Rome, and received a Roman earrison into their city. (Id. xxv. 1.) The very next year, however, after the fall of Tarentum, they changed sides again, and betrayed the Roman troops into the hands of the Carthaginian general Hanno. (Id. xxv. 15; Appian, Henn. 34.) A few years later (B. c. 210), Hannibal, finding himself unable to protect his allies in Campania, removed the inhabitants of Atella who had survived the fall of their city to Thorii (Appian, Hann. 49); but it was not long hefore he was compelled to abanden the latter city also to its fate; and when he himself in B. c. 204 withdrew his lorces into Bruttium, be removed to Crotona 3500 of the principal citizens of Thurii, while be gave up the city itscif to the plunder of his troops. (Appian, l.c. 57. ) It is evident that Thmrii was now sunk to the lowest state of decay; but the great fertility of its territory rendered it desirable to preserve it trom utter desolation: hence in E. c. 194, it was one of the places selected for the establishment of a Lioman colony with Latin rights. (Liv. xxxiv. 53; Strab, vi. p. 263.) The number of colonists wats small in proportion to the extent of land to be divided among them, but they amounted to 3000 foot and 300 koights, (Liv. xxxv. 9.) Livy says merely that the colony was sent "in Thnrinum agrum," and dnes not mention anything of a change of name; but Strabo tells us that they gave to the new colony the name of Corias, and this statement is confirmed hoth by Stephanus of Byzantium, and by the evidence of coins, on which, bowever, the name is written Corla. (Strab. l. c.; Steph. Byz. s. v. ©oúptor;

Eckhel, vol, i. p. 164.) Put this new name did not continue long in use, and Thurii still contrnued to be known by its ancient appellation, It is mentioned as a municipal town on several occasions during the latter ages of the Republic. In D.c. 72 it was taken by Spartacus, and subjected to heary contributions, but not otherwiso injured. (Alpian, B. C. i. 117.) At the outbreak of the Civil Wars it was deemed by Caesar of sufficient importance to be secured with a garrison of Gaulish and Spanish horse; and it was there that M. Coelius was put to death, after a vain attempt to excite an insurrection in this part of Ataly. (Cacy. B. C. iii. 21. 22.) In B. c. 40 also it was attacked by Sextus Pompeius, whe laid waste its territory, but was repulsed from the walls of the city. (Appian, B. C. v. 56,58 .)

It is certain therefore that Thorii was at this time still a place of some importance, and it is mentioned as a still existing town by Pliny and Ptolemy, as well as Strabo. (Strab. vi. p. 263; Plin, iii. 11. s. 15 ; Ptol. iii. 1. § 12.) It was probably, indeed, the ooly place of any consideration remaining on the coast of the Tarcntine gulf, between Crotona and Tarentum; both Metapontum and Heraclea having already fallen into almost complete decay. Its name is still found in the Itineraries (Itin. Ant. p. 114, where it is written "Turios;" Tab. Pezt.) ; and it is noticed by Procopins as still existing in the 6th ceotury. (Procop. B. G. i. 15.) The period of its final decay is ancertain; bat it seems to have beeb abandoned during the middle ares, when the inhabitants took refuge at a place called Terranora, about 12 miles inland, on a bill on the left bavk of the Crathis.

The exact site of Thurii has not yet been identified, but the neigbbourbood has never been examined with proper care. It is clear, from the statements both of Diodorus and Strabo, that it occupied a site near to, but distinct from, that of Sybaris (Diod. sii. 10; Strab. l. c.): hence the position suggested hy some local topographers at the foot of the hill of Terranora, is probably too far inland. It is more likely that the true site is to be senght to the N. of the Coscile (the ancient Sybaris), a few miles from the sea, where, according to Zannoni's map, ruins still exist, attributed by tbat geograpber to Sybaris, but whicb are probably in reality those of Thurii. Swinburne, bowever, mentions Roman ruins as existing in the peninsula formed by the rivers Crathis and Syharis near their junction, which may perhaps be those of Thurii. (Swinburne, Travels, vol. i. pp. 291, 292; Romanelli, vol. i. p. 236.) The whole subject is rery obscure, and a careful examination of the localities is still much needed.

The cons of Thurii are of great beanty; their number and varicty indeed gives us a higher idea of the opulence and prosperity of the city than

coin of thurir.
we should gather frem the statements of ancient writers.

THURIUML. [Boveria, p. 412, b.]
THY'A'M1A. [J'mlits, p. 602, b.]
THY'AMIS (©uaurs), a river of Epeirus, flowing into the sea near a promontory of the same name. (Ptol. ini. 14. \$§ 4, 5.) It formed the borthern boundary of Thesprotia, which it separated from Cestrine, a district of Chaunia (Tbuc. i. 46 ; Strab. vii. p. 324 ; Paus. i. 11. § 2; Cic. ad Att. vii. 2, de Leq. ii. 3: Ilin. iv. 1.) It is now called Kalamd, apparently from the large reeds and aquatic plants which grow upun one of its principal tributaries. Its ancient name seeus to bave been derived from the Àva or juniper, which, Leake iaforms us, though not abundant near the sources of the river, is common ia the woody bills which border the middle of its course. The historian Pbylarchus related (ap. Athern. iii. p. 73) that the Egsptian bean, which grew ooly in marshy places and nowhere but in Egypt, once grew for a sbort time upon the banks of the Thyamis. (Leake, Northern Greece, vel. i. p. 103, vol. iv. p. 97.)
THY'AllUS (Өv́apos), a mountais lying to the S. of Argos A npliilochicum, identified by Leake with Spartovüni (Thuc. iii. 106; Leake, Nurthern Greece, vol. iv. p. 251.)
 a considerable city in the north of Lydia, on the river Lyens, and on the road leading from Sardes in the south to Germa in the north. It was anciently called Pelopeia, Enhippa, and Semiramis. (Plia. v. 31; Steph. B. s. v. Єvát tipa.) Strabo (siii. p. 625) calls it a MLacedenian colony, which probably means only that durmg the llacedosian period it was increased and enbellished, for Stephanus B., admitting that it previously existed under other names, relates that Sclencus Nicator gave it the name of Thygateira or Thyateira on being informed that a daughter ( $\Theta \cup \gamma \alpha \tau \eta \rho$ ) सas born te lim. But whatever we may think of this etymology, it seems clear that the place was not originally a Macedonian colony, but liad existed long before under other names, and at whe period belonged to Mysia. After the time of Antivechus Nicator, however, it became an important place, and is often noticed in history. When the two Scipios arrived in Asia on their expedition against Antiochus the Great, the latter was encamped near 'Thyateira, but retreated to Magnesia. (Lis, sxsvii. 8. 21, 37.) After the defeat of the Syrian king, the town surrendered to the Romans. (Liv. xxxvii. 44; Pulyb, xvi. $1, x x x i i .25$; comp. Appian, Syr: $30 ;$ Strab. sii. p. 646: I'lut. Sulla, 15 ; Ptol. v. 2. §'16; It. Ant. p. 336.) In Cliristian times Thyateira appears as oue of the seven Clurclues in the Apocalypse (ii. 18); in the Acts of the Apustles (xvi. 14) mention is made of one Lydia, a purple-beller of Tliyateira, and at a still later period we hear of several bishops whose see it war. In the middle azes the Turks changed the name of the town into Alhissar, which it still bears. (Mich. Duc. p. 114.) Dir C. Fellows (Asiut

COIN OF THYATEIRA.

Min. p. 22), whe calls the modern place Ak:sa, states that it teems with relics of an ancient splendid city, although he could not discover a trace of the site of any rain or early building. These relics consist chiefly of fragments of pillars, many of which have been changed into well-tops or treughs. (Coinp. Arundell, Seven Churches, p. 188, foll.; Wheeler and Spon, vel. i. p. 253; Lucas, Troisieme Joy. P. 192, \&c.; I'rekesch, DcnKwurdigkeiten, iii. p. 60, foll.)
[L. S.]
THY1A (Ovid), a place in Phocis, where the Delphians erected an altar to the winds, derived its name from Thyia, a danghter of Cephissus or Castalins, and the mother of De!pbus by Apollo. (Herod. vii. 178 ; Dict. of Biogr. art. Thyia.)

THYMBliA ( $\Theta \dot{v} \mu 6 \rho \eta$ or $\Theta \dot{v} \mu \mathrm{~b} \rho \mathrm{u}$ ), a town of Troas, in the vicinity of Ilium. (Hom. Il. x. 430 ; Steph. B. s. v.; Plin, v. 33.) Strabo (xiii. p. 598) speaks of it only as a plain traversed by the river Thymbrins. The valley of Thynbra and the lisll in it, called Callicolone (Hom. Il. 2x. 53, 151; Strab. l. c.), are said still to retain their ancient names. (Irokesch, Denkwirdigkeiten, i. p. 145, foll.) The town of Thymbra must have perished at an early period; but its name remained celebrated in religion, for Apollo, who bad had a temple at Thymbra, is frequently called Toymbracus ( $\Theta v \mu 6$ paios; Virg. Aen. iii. 85 ; Eurip. Thlesus, 224 ; Steph. B. s. v. ©ví_epa).
[L. S.]
THYMBRARA ( $\Theta \dot{v} \mu 6 \rho a \rho a)$, a place near Sardes, not far from the small river Pactolus, at which the contingents of the l'ersian army furnisbed by the iohabitants of Avia Minor used to assemble. (Xen, Cyrop, vi. $2 . \S 11$, vii. $1 . \S 45$; Steph. B. s. v.) Sume are inclined to identify this place witb Thybarna, mentioned by Diodorus Siculus (xiv. 80); but this latter place could hardly be said to he situated on, er even noar the P'actolus.
[L. S.].
THYMBliES, a tributary of the Sangarius in Flurysia (Liv. xsxriii. 18), is no doubt the same as the Tembrngius of IPliny (vi. 2) and the Timbrius in the Argonautica bearing the name of Orpheus (713), where the river is deseribed as abounding in fish.
[L. S.]
THI'MBRIA ( Ou ${ }^{\prime}$ Spia), a small tewn of Caria, only 4 stadia cast of Myus en the banks of the Maeander ; in its neighbourhood there was a socalled Charonium, or care from which poisonous vapours isaned. (Strab. xiv. p. 636.) [L. S.]
THY MBNUM (Ónepiov. Eth) Thy

TH1 MBRIUM (Өv́p6piov: Eth. Thymbrianus), n tewn of Ihrygia, at a distance of 10 parasangs to the west of Tyriaeum (Xenoph. Anab. i. 2. § 13 ; Hierocl. p. 673 ; Conc. Constant. iii. p. 505.) Tibius Sequester (p. 25. ed. Oberlid) mentions a forest Thymbra in Phrygia, which scems to have been near the tuwn of Thymbrium.
[L. S.]
THY'3B1alds ( ©iu6plos), a small river of Troas in the neighbourhood of Iliunt; it was a tributary of the Scamander, and oa its banks stoed the town of 'Hyyutra (Strab. xiii. p 598 ; Eustath. ad Hom. 12. x. 430 .) There still exists in that district a small river called Tindrek; which, however, docs not flow into the Scamander, but into a bay of the sea; if this be the ancient Thymbrius, the plain of Thymbra must have been at a considerable distance from llinm. For this reason, Col, Leake is inclined to identify the Thymbius rather with the Kawara Su, which still is a tributary of the Scamander or Merdere Su (Asia Minom, p. 289.) [L. S.]

THYMENA (Өíu $\bar{v} v a$ ), a place on the coast or Paphlagonia, at a distance of 90 stadia from Ac-
ginlns. (Arrian, Peripl. P. E. p. 15; Anonym. Peripl. P.E. p. 6.) Ptolemy (v. 4. § 2) mentions it under the name of Thymaena, and states that it was also called Teuthrania.
THYMA TE'RION ( Өvplatípuv, Hanno, Peripl. p. 2), called by Scylax (p. 23) Ouularnplas, the first Carthaginian colony planted by Hanno on the west coast of Mauretania, 26 miles south-west of Lixus, on the Sinus Emporicus. There is no further mention of it. It has been variously identifed with Murmora, Larache, and Tangier, but perbaps mest correctly with the first.
[T. H. D.]
THY'MNIAS, a bay on the south-west coast of Caria, on the south-west of the bay of Schoenus, and between Capes Aphrodisium and Posidium. (Pemp Mela, i. 16: Plin. v. 29.)
THYMOETADAE. [Attica, p. 325, b.]
THYNI (Plin, iv. 11. s. 18, v. 32. s. 43 ; ©uvol, Herod. i. 28), a people in the SE. part of Thrace, between the Agrianes and the mountains which separate its head-waters from the Euxine. At a very early period, a portion of the tribe, along with the related race of the Bithyni, emigrated to Asia Minor, where they occupied the district afterwards called Bithynia; but part of which seems originally to have been named more directly frem the Thyni, since we find the names Өvvakो $\Theta \rho$ व́k (Memnon. c. 18), @uvd́s (Scymn. 727, and 236), ©uvía (Steph. B. p. 315), and Thynia (Amm. xxii. 8. § 14). Respecting the Asiatic Thyni, see also Strabo, vii. p. 295 , xii. p. 541 ; and the article Bithynla.

Of the Tbyni who remained in Eurepe scarcely any netice is taken by the ancient bistorians. When Xenophon and the remnant of the 10,000 Greeks entered the service of Seathes, oue expedition in which they were employed had fer its object the subjugation of the Thyni, who were said to have defeated Teres, an ancestor of Seuthes (duab. vii. 2. § 22). Xenophon gives them the somewhat equirocal character of being the most warlike of all people, especially by night: and he bad personal experience of their fondness for nocturnal fyghting: for, baving encamped in their villages at the foot of the mountains, to which the Thyni bad retired on the approach of Senthes and his forces, he was attacked by them on the next night, and narrowly escaped being burnt to death in the bouse in whicb he had taken up his quarters ( $l \mathrm{~b} .4$. § 14 , seq.). But this attack having failed, the Thyni agnin fled to the mountains, and soon afterwards submitted to Seuthes. Xenuphen visited the country of the Thyni in the winter (Ib. 6. § 31 ), which he descrikes as heiag extremely severe, there being deep snow on the ground, and se low a temperature, that not enly water, but even wine in the vessels was frozen; ard many of the Greeks lost noses and ears throngh frostbite. (Ib.4. § 3.)
[J. R.]
THY'NIAS (Ovvías), a small island in the Euxine at a distance of one mile from the coast of Thynia or Bithynia; its distance from the port of Rtooe was 20 stadia, and from Calpe 40. (Plin. vi. 13; Arrian, Peripl. P. E. p. 13.) The island bad only 7 stadia in circumference, and had at first been called Apollonia from a temple of Apollo which existed in it. (Plin., Arrian, U. ce.; Apollon. Rhod. ii. 177, 675; Anon. Peripl. P. E. p. 3.) According to Ptolemy (v. 1. § 15) it was also called Daphnosia, and obtained its name of Thynias from the Thyni, who inhabited the opposite coast. The island had a port and a naval station belonging to Heracleis (Scylaz, p. 34; Arrian, l. c.); and Mela (ii. 7)
is probably mistaken in beliering that the island contained a town of the same name. (Comp. Strab. xii. p. 543 , where it is called Thynia; Marcian, p. 69 ; Steph. B. s. v.; Orph. Argon. 717, where it bears the name Thyneis.) The modern name of the island is Kirpeh.
[L. S.]
THY'NIAS (Mela ii. 2. § 5; Plin. iv. 11. s. 18; Quvias, Strabo vii. p. 319, xii. p. 541: Scynin. 727; Arrian. Per. P. Eux. p. 24; Anon. Per. I? Eux. p. 15; Ptol. iii. 11. § 4 ; Steph. B. $8 . v$. ) , a promontory on the Thracisn coast of the Euxine, N. of Salmydessus, which was probably at one time in the territories of the Thyni, althongh Strabo (vii. p. 319) speaks of the district as belonging to the people of Aporlonia. Pliny ( L c. .) mentions a town of the same name, which in some maps is placed a little to the sonth of the promontory, on the site of the modern Inada or Iniada; but which, according to Dapper (de l.Archip. p. 515), is still called Thinno.
[J. R.]
THINOS or TYNOS, a town mentioned only by Pling (v. 22) as situated between Mupsns and Zephyrium in Cilicia.
[L. S.]
THYRAEUM (Oupaiov: Eth. ©upaios), a town of Arcadia in the district Cynoria, said to bave been founded by Thyraens, a son of Lycaon. It is placed by Leake at Palamdiri. (Paus. viii. 3. § 3, 35. §
7 ; Steph. B. s. v.; Leake, Peloponnesiaca, p. 240.)
thiraeum. [Megalopolis, p. 310, a.]
THY'REA, THYREATIS. [CINCRA.]
THIREA'TES SINUS. [Cynuma, p. 727, a.]
THYREUM. [Thybits.]
THYRGONIDAE. [ATrica, p. 330, a, ]
THYRIDES (Өup $(\overline{6 \epsilon s})$, a promontory of Laconia, on the western coast of the Taygetic peninsula, now called Cape Grosso. It is of a semicircular form, nearly 7 miles in circumference, and rises from the sea to the height of 700 feet. There are many apertures and clefts in the rocks, the abodes of innumerable pigeons, and from the window-like form of these boles the whole promontory has received the name of Thyrides. Strabo describes it as a powions кр $\quad$ uעds, "a precipitons cape beaten by the winds," distant 130 stadia from Taenarum (reckoning from the nortbern point of Thyrides) ; Pausanias, us a promontory (ăkpa), sitnated 70 stadia from Taenarum (reckoning from the sonthern point of the promentory). Pausanias likewise calls it a promontory of Taenarum, using the latter word in its widest sense, to signify the whcle peninsala of Mani. According to Strabe, the Messenian gulf terminated at this premontory. Pliny (ir. 12. 8. 56) mentions three islands of the name of Thyrides in the Asimeun gnlf. (Paus. iii. 25. § 9 ; Strab. viii. pp. 360, 362 ; Leake, Morea, vol. i. p. 302, seq.; Boblaye, Recherches, fo. p. 91; Curtius, Peloponnesos, vel. ii. p. 281.)

THY'RIUN, or THY'REUM (@íplov, Pol. iv. 25; ©ípeov, Pol. is. 6: ©oúprov, Pol. xxviii. 5; ©ứppetov, Anth. Graec. ix. 553 : Eth. ©uplév́s,'Thyrieusis), a city in Acarnania, the exact site of which is unknown. It placed by Pouqueville in the interior near the sources of the Anapus; and his anthority is followed by K. O. Miiller and others. This, however, is evidently a mistake. Cicero tells ns (ad Fam, xvi, 5) that in sailing from Alyzia to Leucas, he torched at Thyrivm, where he remaincd two hours; and from this statement, as well as from the history of the erents in which Thyrium is mentioned, wo may infer that it was situated on or near the lonian sea, and that it was the first t .wn on the coast S . of the canal
which separated Leucas from the mainland. It is placed by Leake in the plain of Zavirdha, but no ruins of it have been discovered. Its name does nat occur in Strabo. Tliyrium is first mentioned in 1. c. 373 , when its teritory was invaded by Iphicrates. (Nen. Ilell. vi. 2. § 37.) Xenophon describes it as a place of impurtance; and it appears as one of the chief cities of Acarnania at the time of the Roman wars in Cirecce, when its name frequently occurs. At this period Thyrium was one of the places at which the neetings of the Acarnanian League wero nsoally beld. [Acannania.] It was one of the many towns whose ruin was oecasioned by the foundation of Neomolas, to which its inhabitants were removed by order of Augustus. (Pol. iv, 6, 25, xvii. 10, xxii. 12, xxviii. 5; liv. xxxvi. 11, 12, xxxviii. 9, xliif. 17; Anth. Graec. l.c.; Leake, Northern Greece, vol. iv. p. 16.)

COIN OF TIIYRIUAS.
THYRSUS or TYRSUS ( ©ípros потaubs, Ptal.; Oópcos, Paus.: Tirso), the most considerable river of Sardiuia, which still retains its ancient name almost unaltered. It has its sourecs in the mountains in the NE. corner of the island, and flows into the Gulf of Oristano on the W. enast, after a caurse of ahove 75 miles. About 20 miles from its month it flowed past Fornm Trajani, the ruins of which are still visible at Fordungianus ; and ahont 36 miles higher up are the Bagni di Benctutti, supposed to be the Aquac Lesitanae of I'tolemy. The Itineraries give a station " ad Caput Tyrsi" ( Itin. Ant. p. 81), Which was 40 M.P. from Oibia by a ragged mountain road: it mast have been near the village of Buclusó. (De la Marmora, Ioy. en Surduignc, vol. ii. p. 445.) Pausnnias tells us that in early times the Thyrsus was the boandary between the part of the island occupied by the (ireeks and Jrojans and that which still remained in the hands of the native barbarians. (Paus, x, 17. § 6.) [F.1I. B.]

THYSDRUS ( Oia $\delta p o s$, Ptol. iv. 3. § 399), the oppidum Tusdritanum or Thysdritanm of L'ing ( v . 4. s. 4), a city of Byzacium, in the Romam province of Atrica, lyme midway between Thrmac and 'Thapsul, and west of the promontory Brachodes. It was here that the cuperor Gordianns first set up the Nandard of rebellion against Maximin (Herodian. vii. 4. seq. ; Capitol. Gord. c. 7, 5eq.), and it was fiom lim, prolably, that it derived its title of a Joman colony. We find the name varionsly written, is Tumia, by llirtias or whover was the author of the hivery of the Atrican War (B. Afr. 26, 27, \&e.). ated 'Tusdrus, in the Itin. Ant. (1, 59). Now El Iemme or Legom, with extensive ruins, especially of a fine amplatheatre in a tolerably perfect state. (Shaw, Tretels, vol, i. p. 220, sqq.) [T. H. D.]

THISNA'GETAE ( ©vaacyetat, Herod. iv. 22), a numerous people of Asiatic: Samatia, living prineipally hy the chase. They dwelt to the north-east of a great desert of 7 days" juurncy, which lay between them and the Budni. Ntpphanus B. (a. v.) erroneonsly places them on the Mavetic, apparently from misunderstanding Herouotus. Thy are called

Thussagetae by Mcla (i. 19) and Pliny (ir. 12 s. 26), and Thyssagetac by Valerius Flaceus (vi. 140).
[T. II. D.]
THYSSUS (Єúaros), a town of Chalcidice in Macedonia, situated on the W. or S. side of tho peniosula of Acte or Mt. Athos. Its exact position is uncertain, but it appears that Thyssus and Cleonse occupied the central part of the W. or S. coast of the peninsula, and that one of them may be placed at Zogrof $u$ or Dhokhiairi, and the other at Xeropotami. (Herokl. vii. 22; Thuc. iv. 109, v. 35 ; Seylax. p. 26 ; Strab. vii. p. 331 ; Plin. iv. 10. s. 17 ; Leake, Northern Greece, vol, iv. pp. 149-152.)

T1ARANTIIS (Tapaytos, llerod. iv. 48), a river in Scythis, flowing into the Ister from the N. Mlannert identifics it with the Syl (iv. p. 105; cf. 1'kert, iii. $2, p, 184$ ).
[T. H. D.]
Tlariulia. [Temit Juinenses.]
TIASA. [Laconia, p. 110, a.]
TIASUM (Tía ov or Tiacनov, Ptol. iii. 8. § 9), a town in Dacia, in the neighbourbood of the modern Fukschani.
[T. II. D.]
TIBARAN1, a tribe of Cilicin, about Mount Amanus and in the vicinity of Pindenissus, which was subdued by Cicero during liis proconsular administration of that country, but is otherwise unknown, (Cic. ad Fam. xv. 4.)
[1. S.]
TIBARE'NI (Tisapqvof), a tribe on the coast of Pontus, occupying the country between the ChaIrbes and the Musynorci, on the east of the river Iris. They are mentioned as early as the time of Herodotus (iii, 94), and were believed to be of Scythian origin. (Schol. ad Apoll. Rhod, ii. 378, 1010; Sen. Anal. v. 5. \& 2; Scylax, p. 33; Steph. B. s. $r$. Tibapmvía.) Strabo (xi. p. 527) describes them as inhabitine the mountains braneling off from the Montes Moschici and Colchici, and mentions Cotyura as their primeipal town. (Comp. Xen. l. c.; Plin. vi. 4.) They appear to have been a haruless and happy people, who performed all their duties in a josous manner. (Schol. ad Apoll. Wihud. l. c.; Stoph. B. L. c.; Anm. D'eripl. I. F. p. 12; Pomp. Mela, i. 19.) Their arms comsisted of wooden helmets, small shields, and short spears with long points. (Herod. vii. 78.) Xenuphon and his Grecks spent three days in travelling through their countiy. (Xen. l. c., vii. 8. § 25 ; Diod. Sic. xiv, 30; hhurys. Per. 767 ; Pomp. Mela, i. 2; Val. Flace, v. 149 ; Strab. ii. p. 129, rii. p. 309, xi. p. 549 , xii. p. 555.)
[L. S.]
TIBERIACUM, in North Gallia. is placed in the Antonine Itin. between Juliacum (Juliers) and Culonia Agrippina (Cologne), viii. from Juliacum and x. from Cdonia. D'Auville and others fix Tiberiacum at Birghion, at the passage of the river Eirfit, which flows between Juliers and Colorne. Others place Tiburiacum at Tarren, south of Beryhem, where the bridge is. D'Auville adds "that a place situated in the direction between Juliers and Derghem is called Stein-Stras, that is to say, Lapidea Strata (Slone Street), just as in our provinces they say Chemir Pervé" (D'Anville, Nutice, gc.; Ukert, Gallicu, p. 544.)
[G. L.]
T1BETRIAS (TiGepás, Juseph. Aut. xviii. 3, B. I. ii. 8, iii. 16; Stepl. B. s. v.; Ptol. viii. 20. § 16), the principal town of Galilaca, on the SW: bank of the sea of Tiberias or Gemucsareth. It was situated in the most beautiful and fruitful part of that state (Joseph. Ant. xviii. 2. § 3), and was adorned with a royal palace and stadimm. (Joseph. Fit 12, 13, 64.) It was built by the
tetrarch I rodes Antipas, in bonour of the Poman emperor Tiberius, from whom it derived its name. (Josepl. l. c.) It is stated to have been 30 stadia from Hippo, 60 from Gudara, and 120 from Scythopolis (Joseph. Vït. 65) ; distances which are not much at variance with thnt of Joliffe, whe states that it is 20 miles English from Nazareth and 90 from Jerusalem. (Truvels, p. 40.)

From the time of Herodes Autipas to that of the reign of Agrippa I1., Tiberias was prolally the capital of the province (Joseph. Jit. 9), and it was one of the four cities which Nero added to the kingdom of Agrippa. (Joseph. Ant. xx. 8. § 4.) In the last Jewish Wrar, Tiberias, from its great strength, played an important part (Joseph. B. J. ii. 20); as, after Sepphoris, it was held to be the largest place in Gulilaea (Joseph, Vit. 65), and was very strongly fortified. (B. J. iii. 10. § 1.) The inbabitants derived their sustenance in great measure from their fisheries in the adjoining sea. (Joseph. l'it. 12.) On the destruction of Jerusalem, and for several centuries subsequently, Tiberias was famons for its academy of leamed Jews. (Lightfoot, Hor. Hebr. p. 140.)

In the inmediate neighbutrhood of Tiberias were the celebrated bot springs of Emuraus (Joseph. B. J. ii. 21, Ant. xviii. 2.) [Emmaus.] ]t is not certain whether Tiberias occupied the site of Chinnereth, though Hieronymus thinks so (Onoms. s.v. Chinnereth) ; it seems more likely that this place belonged to tho tribe of Naphthali. (Jusl. xix. 35; Reland, Palaest. p. 161.) Nor is there any better reason for identifying it, as some have done, with Chammath (Josepl. xix. 35) or Rakkab, which was the Rabbinical notion. (Cf. Hieroo, Megil. fol. 701 ; Lightfoot, Chorograph. Cent. cap. 72-74.) The modern name of Tiberias is Tabarieh: it is not, however, built actually on the site of the old town, thougle close to its ruins. When Joliffe was there, it had a population of 11,000 (Travels, pp. 48-58.) It was pearly destroyed by an eartluquake on New Year's Day, 1837, since which time it has never been completely rebuilt. (Russegger, iii. p. 132; Strauss, p. 356: Rolinson, iii. p. 500.)
[V.]
TibE'rias mare ( $\lambda i \mu \nu \eta$ Tigepias, Pausan. v. 7. ${ }^{4} 4$; Ptol. v. 16. § $\ddagger ; \lambda i \mu \nu \eta$ 方 Tisepiav, Juseph. B. J. iv. 26), the principal lake or sea of Palestine in the provioce of Galiluea. It was bordered on the W. side by the tribes of Issachar and Zabulon, and on the E. by the half-tribe of Manasseh. The waters were fresh (Joseph. B. J. iii. 35) and full of fish (Joseph. B. J. iv. 26 ; Matth. iv. 18 ; Luke, v. 1, \&c.), and its size is varionsly stated, by Joseplus (l. c.), to bave been 140 stadia long by 40 broad, and by Pliny, to have 1 cen $16 \mathrm{DI} . \mathrm{P}$. long and $6 \mathrm{M} . \mathrm{P}$. broad (v. 15). It was traversed in a direction NW. and SE. by the river Jordan. [Jordanes; Palaestina.] This sea is koown by many different names in the Bible and profane linstory. Its earliest title would seew to have been Clinnereth (Numb. xsxiv. 11 ; Josh. xiii. 27; LXX. Xedvepég.) From this form has probably arisen its second appellation of Gennesareth ( $\dot{\eta} \lambda i \mu \nu \eta \Gamma e \nu_{-}$ $\nu \in \sigma a \rho \in ̀ \tau$, Matth. xiv. 34, Sc.; vijup $\mathrm{Vevv} \mathrm{\eta} \mathrm{\sigma d} \mathrm{p}, \mathrm{I}$ Maccab, ii. 67; 玄 $\lambda\left\{\mu \nu \eta \Gamma_{\epsilon \nu \nu \eta \sigma \grave{\alpha} \rho, ~ J o s e p h . ~ B . ~ J . ~}^{\text {, }}\right.$
 xvi. p. 755 ; Genasara, Plid. v. 15.) A third appellation it has derived from the province with which it was most nearly connected, viz. the sea of
 Mark, vii. 31, \&c.; and with a double title, Эá $\lambda a \sigma \sigma a$
 in describing the same localties, speaks of a town called Tarichaca, from whence also he says the adjoining lake was sometimes mamed ( $l$. c.; ef. also Strab. xvi. p. 764). The present name is Bahr-al-Tabarieh. (Pocucke, ii. p. 103; Theyenot p. 387 ; Haselquist, i. p. 181; Robinson, iii. pp. 499 - 509 . \&c.)
[V.]
TIBERIOTOLIS (TisEptoímonts), a town in Phrygia Major, io tho neighbourhond of Fumenit: (Ptol. v. 2. § 25 ; Socrat. Hist. Eccles. vii. 46.) Its site is yet unecrtain, but Kiepert (in Framz, Fünf Inschriften, p. 33) is disposed to regard the extensive ruins wear Suleiman as the remnants of Tiberiopolis. Hamilton (Researches, i. p. 127. toll.), prokably more correctly, regards then as the ruins of Blaundos. (Comp. Arundell, Discoverins, i. p. 81, foll.)
[L.S.]
TI'BIRRIS ( $\delta$ Tibepls: Tevere, Tiber: the forms Tibris, Tybris, and Thy bris are chiefly poetical, as is Oúu®pis also in Greek: the Latin poets use also Tiberinns ns an adjective form, as Tiberinus pater, Tiberinum flumen, \&ie., and thenee sometimes $\mathrm{T}_{\mathrm{i}}$ berinus by itself as the name of the river), one of the most important rivers of Central ltaly. It has its sources in the Apennines above Tifenum, but in the territury of Arretium (Plin. iii. 5. s. 9), on the confines of Etruria and Umbris, and flows at tirst m a southerly direction, $1^{\text {rassing by the walls of Tifer- }}$ num, which derived from it the name of Tiherinnin (Cittic di Castello), and afterwards within a few miles of Perusia on the E., and within a still shorter di-tance to the W. of Tuder (Torli). From thence it still preserves a general S. direction, notwithstanding cunsiderable windings, till it receives the waters of the Anio (Teverone), a fotw miles from the walls of Liome, from which point it has a general SW. course to the sea at Ostia. Pliny estimates the upper part of its course at 150 miles, to which must be added about 35 more for the luwer part, giving as a total 185 miles (Plin. l.c ; Strab. v. p. 218) ; bat this estimate is below the truth, the whole course of the river being about 180 geogr. or 225 Runam miles. During the whole of its course from Tifernun to the seat the Tiber formed is ancient times the eastern boundary of Etruria, sparating that country from Umbria in the upper part of its course, afterwards from the territory of the Sabines, and, in the lower part, from the mouth of the Anio downwards, dividing it from Latiun. (Stral, v. p. 219: Plin, l.c.) It receives numerous confluents or tributaries, of which tbe most important are, the Tinis, an inconsiderable stream which juins it from the F. a little helow Perusia, bringing with it the waters of the more celebrated Clitomnus ; the Cfaxis, which falls into it from the right bank, descending from the marshy tract near Clusium ; the Nane, a mach more considerable strearn, which is joined by the Velinus a few miles above Interanna, and discharges their combined waters into the Tiber, a few miles abore Ocriculum ; and the Avio, which falls into the Tiber at Antemnac, 3 miles ahove Rome. These are the only affluents of the Tiber of any geugraphical importance, but among its minor tributaries, the Allia on its left bank, a few roiles above the Anio, and the Cremera on the right, are names of bistorical celebrity, though very trifling streams, the identification of which is by no means certain. [See the respective articles.] Two otber streams of less note, which descend from the land of the Sabiues and fall into the Tiber between Ocriculum and Ere-
tum, are, the Himplla (Aia) and the Farfames or Fisanis (Farfa).

The Tiber is unquestionably, in a merely geographical puint of vew, the most important river of Central laly, but its great celebrity is derived from its flowing under the walls of Kome, or rather through the hean of the city, atter this had attained to its full exteusion. The detailed account of the river in this part of its course nust be sought in the articie Rossi: we need here only mention that after flowing ander the Milvian Bridge [Pons Matius or Mrlowits] the river makes a considerable bend to the W. so as to approach the foot of the Vatican hills, and leave, on the other side, between its left bank and the nearest ridge of hills, a broad tract of plain, early known as the Campus Martins, the whole of which was eventually included within the imperial city. A short distance lower down, but still within the walls of the city, its stream was divided into two by an island known as the Insera Themina, and reported by tradition to have been formed by allurial accumulations within the period of Roman history. It is remarkable that this is the only island of any consideration in the whole course of the river, with the exception of that called the Insula sacra, at its mouth, formed by the two arms of the river, and which is undoubtedly of late growth, and in great part of artificial formation.

The Tiber was at all times, like most rivers which are supplied priscipally by mountnio streams, a turlid, rapid, and irregular river, that must always lave presented considerable difficulties to navigation. The vellow and muddy hue of' its turbid waters is repatedly alluded to by the Roman poets ("flavam Tīberim," llor. Carm. i. 2. 13; " sue cum gurgite flavo," Virg. Aen. ix. 816: \&c.), and the truth of Vircil's description, "Vorticibus rapidis et multa flavus areaa," (Acn. vii. 31) must be familiar to every oue who has visited Rome. In the upper part of its course, as we learn from Pliny, the river was with difficulty navigable, even for small beats : nor did its first tributarie- the Tinia and Clanis contribute much to its facilities in this respect, though their waters were artificially dammed up, and let off from time to time in order to nugment the main stream. (Plin, iii. 5. 5. 9.) But from the point of its junction with the Nar, the Tiber became navigable for larger vessels, and even from an early period exteasire supplies of various kinds were brought down the river to lome. (Liv, ii. 34, v. 54; Cic, de Rep. ii. 5; \&'.) In the more fiourishing period of the city the navigation of the Tiber was of course enormously increased ; and vast supplies of timber, stone, and other materials for building, as well as corn and provisions, were continually introdaced by meann of the river and its tributaries. (Strab, v. p. 235.) Corn was brought down the Tiber even from the neighbourbood of Tifernam, when the upper jart of the streall was navigable. (Plin. Ep. v. G.) It seems alvo to have been used as an ordinary mode of travolling, as we are told that in A. D. 20 , Piso, the murderer of Germ:mions, proceeded fom Namia to Rene hy descending the Nar and the Tiber. (Tac. Ann. iii. 9.) At the present day the river is navigated by boats of large size as far as the confluence of the Nera, and small steamers ascend as far as Borghetto, a few miles from Otricoli.

But it was from lome itself to the sea, a distance of 27 miles by the river (Strab. v. p. 232), that the navigation of the Tiber was the most important. Pliny speaks of it as in this part of its course ma-
vigable for the largest ressels (" quamlibet magnarum navium ex Italomari capax "), and ar becuming the receptacle of merchamaline from enery part in the world. The latter statement may be teadily admitted; but the former is calculated to astonish any one acquainted with the river in its present condition yet it is partly confimed by the distuct statement of Straho (v. p. 232), that the larger cla-b of merchant ressels used to ride at anchor in the open sea off the mouth of the river, until they lual been lightened of os part of their cargores, which they discharged into barges, and afterwards priceded up the river to Rome. Dionysins gives the same account, with the exception that ressels which exceeded 3000 annphorate in burden ware unable to enter the river at all, and forced to send their cargoes up by barges. (Dionys. iii. 44.) But all kinds of rowing vessels, not excepting the largext ships of war, were able to ascend the river (Il.); and thus we find the younger Cato en his retum from Cyprns proceeding at once in his galley to the Naraha within the walls of Rome. (I-Jut. Cat. Min. 39.) We Jearn also from Livy that the ships of war which had been taken from Persens king of Nacedonia, though of mnustal size ("inusilatae aute magnitudinis"). were carried ap the river as far as the Campus Martius (Liv. xlr. 42); and eren the gigantic vessel constructed for the purpose of bringing the obrelisk that was set up in the Circus Maximus, was able to ascend as far as the Vicus Alezandri, within three miles of Rome (Ammian. x:ii. 4. § 14). The chief difficulties that impeded the navigation of the river in the time of Strabo were caused by its own accomulations at its moatb, whicb bad destroyed the port of Ostia. These were afterwards in great measure removed by the construction of an artificial port, called the Portus Avgusti, commenced by Claudius, and enlarged by Trajan, which commmnicated by an artificial canal or arm with the main strean of the river. (The history of these works, and the clanges which the months of the Tiber underwent in conseguence, are fully given in the article Ostia.) The importance of the navigation of the Tiber led to the formation of distinct bodies or corporations in connection with it, called Naricnlarii aad Lenancularii, both of which are frequently mentioned ia inscriptions of imperial times (Preller, p. 147).

Another disadvaotage under which the Tiber Laboured, in common with most rivers of monntain origin, arose from the frequent inundations to which it was sulfect. Tbese appear to bave occurred in all ages of the Itoman history ; bat the earliest recorded is in 13. C. 241, immediately after the close of the first Punic War (Oros. iv. J1), which is said to have swept away all the houses and buildings at Fome ia the Jower part of the city. Similar iunndations, which did more or less damage to the city are recorded by livy in n. C. 215, 202, 193, and asain in 192 and 189 (Liv, xxiv. 9, xxx. 38, xxxy. 9,21, xxxviii. 28) and there is little doubt that it is ouly from the loss of the detailed annals that we do not hear again of the occurrence of similar catastrophes till near the close of the Rejublic. Thas we find a great inundation of the Tiber noticed as taking place in R.C. 54 (Diva Cass. xxxix. 61), which is alluded to by Cicero ( $a d$ Q. Fr. iii. 7); tend several similar inundations are known to have occurred in the time of Augnstus, in B. c. 27, 23 and 22 , of which the first is probably that alluded to by Horace in a well known ode. (Hor. Carm. i. 2. 13; Orell. Excurs. ad b. c.; Dion Cass. liii. 20,

33, liv. 1.) Great attention was lestored by Angustus upon the subject, and he first instituted magistrates with the title of Curatores Tiberis, whose special duty was to endeavour to restrain the river within due beunds, to preserse the embankments, \&c. (Suet. Oet. 37.) These ofticers received increased powers under Tiberius, and contianed down to the close of the Empire. We frequently meet with mention in inscriptions of the "Curatures slvei Tiberis et riparum," and the oftice seenas to lave heen regarded as one of the most bonourable in the state. (Dion Cass. Ivii. 14; Orell. Inscr. 1172, 2284, \&c.; Gruter, Inscr. pp. 197, 198.) But it is evideut that all their efforts were ineffectual. In the reign of Tiberius so serions was the mischief caused by an inundation in A. D. 15 that it was proposed in the senate to diminish the bulk of the waters by diverting seme of the chuef tributaries of the stream, such as the Nar, Velinus and Clanis. (Tac. Ann. i. 76 ; Diea Cass. Ivii. 14.) This plan was, bewever, abandoned as impracticable; and in A. D. 69 another inundation took place, which appears to have caused still more damage than any that had preceded it (Tac. Hist. i. 86). It is strange that in face of these facts Pliny should assert that the Tiber was so confined within artificial banks as to have very little power of outbreak, and that its inuodations were rather subjects of superstitious alarm than formidable in themselves. (Plio. iii. 5. s. 9.) During the later ages of the Empire indeed we hear but little of such outbreaks of the Tiber, but this is very probably owing only to the scanty nature of our records. One great inundation is, bowever, recorded as doing great mischief in the reign of Trajan, another in that of Macrinus, and is third io that of Valerian. (Dion Cass. Ixsviii. 25 ; Vict. Caes. 34, Epit. 13.) One of the mast destructive of all is said to bave been that of A.D. 590 , which added to the various calamities that at that tine almost overwhelmed the city. (Hist. Miscell. xviii. p. 583 ; Greg. Turon. x. 1.) At the present day the lomer parts of Rome are still frequently fleoded by the river, for thougb the seil of these parts of the city has unquestionably been raised, in some places maury feet, the bed of the Tiber bas undoubtedly been also elevated, though probably in a less degree. The whole subject of the itundations and navigation of the Tiber, and the measures taken io ancient times in cennection with them, is fully illustrated by Preller in an article entitled Rom unel der Tiber in the Berichte der. Süchsischen Gesellschaft for 1848 and 1849.

The Tiber appears to bave beeo in ancient times occasionally frozen, at least partially ; a circumstance to which the Latin poeta repeatedly allaile. But we must not construe their rhetorical expressions toe strictly; and it is clear from the terms in whicb Livy notices its being frozen over in the extraordinary winter of B. c. 398 , that sach an occurrence was of extreme rarity. ("Insignis annus hieme gelida ac nivosa fuit, adeo ut viae clausae, Tiberis innarigabilis fuerit, Liv, v. 13.) St. Augustin also alludes to such a winter (apparently the same noticed by Livy), "ut Tiberis quoque glacie duraretur," as a thing unheard of in his times. (Augustin, Civ. Dei, iii. 17.)

It was a tradition generally received among the Romans that the Tiber bad been originally called Albula; and that it changed its name in consequence of Tiberinus, one of the fabulous kings of Alba, having been drowned in its waters. (Liv. 1.3 ; Dionys.
i. 71; Vict. Orig. G. Rom. 18.) Virgil, hewever, whe calls the king Thybris, assigns him to au carlier period, prior to the landing of Aeneas (Aen, viii. 330). Hence the river is not unfrequently called by the Reman poets Albula. (Sil. Ital. vi. 391, viii. $455, \mathbb{S}^{\mathrm{c}}$.) It had naturally its tutelary divinity or river-god, who, as we learn from Cicero, was regularly invoked in their prayers by the nugurs under the name of Tiberinus (Cic. de N. I) iii. 20). He is frequently introduced by the Roman poets as "pater Tiberinus" (Eno. Ann. i. p. 43; Virg. Aen. viii. 31,$72 ;$ \&c.)
[E. H. B.]
TIBIGENSE OPPIDUM, a town in Africa Propria, apparently the Thigiba ( $\Theta_{i} \gamma^{\prime}[a$ ) of P'olemy (iv. 3. § 29 ; Plin. v. 4. з. 4). [T. 11. D.]

TIBILIS, a town in the interior of Numidia, 54 miles from Cirta having bot mineral springs (Ayuae Tibilitanae) (August. Ep, 12s: Itin. Ant. p. 42), commonly identified with Hammam Meshutin in the monntsins near the river Seibonse; but, according to DAvezac and the map of the province of Constantine (Par. 1837), it is Nammam-elBerda, somewhat more to the N.
[1. H. D.]
T1B1SCUM (Tiftoкоу, P'tol. iii. 8. § 10), a town of Dacia, on the river Tibiscus. By the Geugr. lav, it is called Tibis (iv. 14), and in the Tab. Pcut. Tiviscum. Its ruins exist at Kavaran, at the junction of the Temesz (Tibiscus) and Bistra (cf. Ukert, iii. 2. p. 616).
[T. H. D.]
TIBISCUS (Tísoras, Ptol. iii. 8. § 1), a tributary river of the Danube in Dacia. We aloo find it called Tibissus (Inscr: Grut. p. 448.3) and Tibisia (Geugr Rav. iv. 14). Several authers identify it with the Tisianus or Tysia (the modern Theiss), with which, indeed, Ptolemy seems to bave confounded it, as he does net mention the latter (Manoert, iv. p. 203; Sickler, i. p. 196; ef. Ukert, iii. 2. p. 603). But Forbiger, after Reichard, identifies it with the Temess; his grounds for that opinion being that Jornandes (Gct. c. 34) and the Geographer of Raveona (l. c.) mention the Tysia and Tibisia as twe distinct rivers, and that the site of the ancient town of Tibiscum appears to point to the Donesz (IIandb. d. alt. Geogr. iii. p. 1103, note). It is probable that the Patbissus of Pliny (iv. 12. s, 25) and Parthiscus of Ammianus Marcellinus (xvii. 13. § 4) are the same river, though some identify them with the Tisianus.
[T. H. D.]
TIBISIS (Tifiots), a large river of Scytbia, which Herodutns describes as rising in Mt. Haemus, and flowing into the Maris (iv, 49). It is identified by some with the Kara Low.

TIBULA (Tisou入a, l'tol.), a town of Sardinia, near the N. extremity of the island, which appears to have been the customary landing-place for travellers coming from Corsica; for which reason the Itineraries give no less than four lines of route, taking their departure from libula as a starting-point. (Itin. Ant. pp. 78-83.) It is very unfortunate therefore that its pusition is a matter of great uocertainty. That assigned te it by l'toleny would place it on the site of Castel Sardo on tiae N. coast of the island, and only ahout 18 milea from Porto Torres, but this is wholly incompatible with the statements of the ltineraries, and mast certainly be erroneous. Indeed I'tolemy himself places the Tibulates, or Tibulatii (Tifov áreot), whe must have been closely connected with the town of that name, in the extreme N . of the island (Ptol. iii. 3. $\$ 6$ ), and all the data derived from the ltineraries concur in the same result. The most probable pasi-
fiom is, therefore, that assigned it by Jo la M.rmamer, who fises it on the port or small bay carided Porto di $I$ angu Sardo, almost close to the northermmost point of the island, the Errebantina Pron. of 1'toleny. (De lat Marmora, Joy. en Surdnagne, vol. ii. Pp. 421-432, where the whole question is fully esamined and discussed.) [E. H. B.]
'1BL1: (ì Tisoopivav or Tikoupunay $\pi \dot{j} \lambda 15$, 1'ulyb. vi. 14: тà TíGoupa, Strab, v. p. . 338 : тù Ti\&oóp, I'ol. iii. 1. § 58 ; 市 Tifupis, stephl. B. p. 564: Eth. Tiburs, Liv, vii. 9 ; Ving. Aen. xi. 757; Hor. S. i. 6. 108; Tac. Ann. xiv. 22. \&c.; Tiburtinus, Cic. Phil. v. 7; 1ron. iv. 7.85; 1lin. Ep. vii. 29 , Sc.; ' 'iburmus, Stat. Siln, i. 3. 74; Prop. iii. 22. 23: now Tirnli), an sancient and celebrated town of Latium, seated on the Anio, to the NE. of Rome, from which it was distant 20 Roman milex (Itin. Aut. p. 309 ; cf. Mart. iv. 57 ; Procop. B. G. ii. 4). Tibar lies on an offshoot or spur thrown out frona the northern side of what is now called Monte Fipoli, at a level of between 800 and 900 feet alove the sea. This ledpe extends across the bed of the Anio to Monte Catillo on its north bank, thus fornsing a natural barrier over which the river leaps into the valley below, from a height of abont 80 feet, and furms the celpbrated waterfall so frequently mentioned by the ancient writers (Strab. l. c. ; Dionys. H. v. 37 ; Hor. Od. i. 7. 13, \&c.). The town lay principally on the cliff on the lett or southern bank, where it is half encircled by the Anio. It is probable that at a remote period the waterfall mas lower down the river than it is at presunt, since there are tukens tbat the strean once washed the sobstructions of the terace on which the round temple is built; especially a broken wheel enbended in the chiff at it height of 150 feet above the abyss called the Grotto of Neptane. The awful catastrophe in A. D. 105 recorded by the younger 1'lioy (Ep, viii. 17), when the Anio burst its batiks and carried away whole masses of tork - muntes lie calls them - with the groves and haldines upon them, must have produced a womakable chatige in the character of the fall. We may satber, froms sorne descriptions in l'ropertins (iii. 16. 4) and slatin- (sile. i. 3. 73), that previonsly to that crent the Anio leaped indeed from a high rock, but that its fall was broken tomards its lower part by projecting ledges, which caused it to form small lakes or pouls. From the time of Pliny the cataract Lrobably reroained much in the same state down to the year 1*26, when the river again swept away a number of houses on the left bank, and threatened so much tanger to the rest that it was found necessary to divert its course by forming a tunnel for its waters through Monte Catillo on the right bank. This alteration spuiled the romantic points of vien on the vile of the erottoes of Noptume and the sirens; but the f.ll is still is very fine oue. Scarvely inferion to is in pieturesque beauty are the numerous small cascades, called Cascatelle, on the weatern side of the town. These are formed by water diverted from the Anio for the supply of vamons mannfactories, which, after passing through the town, seeks its formser chamsel by precipitating itself over the rock in several small streams near what is conmonly ealled the villa of Matecenas. Nothing can be finer than the view of these caseades frons the declivities of Montc $P$ cschizavatore, whence the eye ranges orer ${ }_{1}$ lie whole of the Compagra, with lione in the dist:int background.

Tbe country around Tibur was not very fertile
an erain; but it was celebrated for its frnit-frees and orchards (*"potnosi Tiburis arva," Col. R. R.x. p. 347, ed. Lugd 1548 ; cf. Propert. iv. 7. 81: "Pomosis Anio qua spunifer incubat arvis"), and cspecially for its grapes and figs ( 1 lin. xiv. 4. s. 7, xv. 19). Its stone, now called travertino, was mach used at Rome for brilding, whither it was easily conveyed by means of the Anio, which became navigable at Tibur (Strab. l. e.). Vast remains of aucient quarries msy still be seen on the baaks of that river (Nibby, Jiaggio Ant. i. I12). Of this material were constructed two of the largest edifices in the world, the Colossentn and the Basilica of St. Peter. The air of Tibur was healtlyy and bracing, and this was one of the recomnuendations, together with its beautiful scenery, which made it it favourite retirement of the wealthy Komans. Besides its salubrity, the air was said to possess the pecnliar property of bleaching ivory (Sil. 1t. xii. 229; Mart. viii. 28. 12). Tibur was also famed for its puttery (Sen. Ep. 119).

The foundation of Tibur was long anterior te that of Rume (Plin. xvi. 87). According to Dionysius of Halicarmassus (i. 16), it was oue of the cities founded by the Siculi when tbey had possession of Italy; in proof of which statement be adduces the fact that in his own time part of the town was still called Sicelion; a game which mould also indicate its having been one of the chief cities of that people. Another legend affirmed that the Siculi were expelled by Tiburtus, Coras and Catillus II., sons of Catillus 1. The last was the son of Amphiamas, the celebrated Tbeban king and proplect, who flourisbed about a century before the Trojan War. Catillas migrated to Italy in consequence of a ver sacrum. Tiburtus, or Tiburnus, the eldest of his three sons, became the eponymous hero of the newly founded city; for surli it may be called, since the Siculi dwelt only in untralled towns, wbich were subsequently fortulied by the Greek colonists of Italy. According to Cato's versiun of the legend, Tibur was founded ly (atillus, an officer of Evauder (Sulin. 1. 2). From these accounts we may at ali events infer the high antiquity of Thbur. The story of its Greek orikili was very generaily adopted by the Roman poets, whence we fiod it designated as the " moenia Catili" by IIorace (Od, i. 18. 2; of. Ib. ii. 6. 5; Virg. Acn. vii. 670; Ov. Fast iv. 71, Anor. iii. 6. 45 ; Stat. Silv. i. 3. 74: sil. It. iv. 225 , viii. 364 ). Tibur possessed a small surrounding territory, tbe limits of which, however, we are unable to fix, all that we know reopecting it being that the towns of Empulum and Sassula, beaides one or two others, at one time belunged to it. Both these places lay in what is called the Valle di Sicilinno, to the NE. of the town, the aame of which is probably connected with the Sicelion of Dionssius. Enpulum is identified with the present Ampiglione, a fulace about 4 miles distant from Tibur. Sissula 1 rotably lay 2 or 3 miles beyond Empulum, in the sime direction. The bonndary between the Tiburtine territory and that of the Sabines was rery uncertain. Augnstus adopted the Anio as the linit ; yet considerable wucertainty seems to have prevailed even subsequently to the assumption of that bumdary. Thus according to Tritus (Ann. xiv. 22), the ternitory of Tibur extended beyond the Anio, and included Sublaqneum, the nodern Subiaco, which is commonly assigned to the Acqui. Originally Tibur with its territury seems to have belonged to the Subines. Pliny cmuncrates Titur aunong the Sabine tuwus (iii. 12, :, J\%).

We know nothing of the history of Tibur except is connection with that of Rome. The first occasion on which we find it mentioned is in the time of the decemsirate, B. C. 446 , when M. Claudius, the infamous toel of the decemvir Appius, went into exile there (Liv, iii, 58). It does not appar, however, as taking any active part in affairs till B. c. 357 ; in which year the Tiburtines slut their gates against the Roman consuls C. Sulpicius and C. Licinius Calvus, who were returning from a successful expedition against the Hernici. Tbere appear to have been previous disputes and complaints hetween the Tiburtines and Romans, and the latter seized the opportunity to declare war (Liv. vii. 9). But hostilities were suspended for a time by an incursion of the Gauls, who crossed the Anio and adranced to within 3 miles of Rome. This invasion of the Gauls was assisted by the Tiburtives ; and therefore, after the barbarians had been repulsed by the prodigious valour of Manlius Torquatus, the ceusul C. Poetelius was sent against them with an army in the following year. But the Gauls returned to the assistance of the Tilburtines; and, te meet this emergency, Q. Servilius Ahala was named dictator. The Gauls again advanced close to the walls of Rome, and a great battle was fought just outside the Porta Collina, in the sight of all the citizens. After a desperate conflict, the barbarians were defeated and fled to Tibur for refuge. Here they were intercepted by the consul Poetclius, whe drove them inte the city, as well as the Tiburtines whe had come to their aid. For this achievement a triumph was awarded to Poetelius, which we find recorded in the Fasti Capitolini as well as by Livy. This triumph, however, excited the ridicule of the Tiburtines, whe denied that the Romans had ever met then in a fair and open field: and in erder to wipe out this affront, they made, in the following year, a nocturnal attempt upon Rome itself. But when day dawned and two armies, led by the two consuls, marched out agaiost them frem different gates, they were scarcely able to sustain the first charge of the Romans (Liv. vii. 11, 12). Yet the war continued for several years. In B. c. 350 . the consul M. Popilins Laenas devastated their territory (ib.17), and in the following year Valerius Poplicola took Empulum, one of their dependent cities (ib. 18; cf. Empulem). Sassula also yielded ie 348 to the arms of MI. Fabius Ambustus; and the Tiburtines would have lost all the rest of their territory bad they not laid down their arms and submitted to the Roman censul. Tbe triumph of Fabius is recorded in the Fasti and by Livy (ib. 19). Yet a few years later we find the Tiburtives juining the Latin league against the Remaus ; and even after the everthrow of the Latins they allied themselves with the Prsenestini and Veliterni to defend Pedurn (Id. viii, 12). In n. c. 335 , the consul L. Furius Camillus, attacked and completely defeated them under the walls of that place, in spite of a sortie of the inhabitauts, and then took the town by escalade. All Latium was now subdued, and we do not again hear of the Tibartines taking up arms against Rome (ib. 13). For this expluit Cannillus not ouly obtained a triumph, but alse an equestrian statue in the forum, a rare honour in that age. In the Senatusconsultum subsequently drawn up for the settlenent of Latinm, Tibur and Praeneste were treated with more severity than the other citics, except Velitrae. They were deprived of part of their territory, and were not admitted to the

Roman franchise like the rest. The cnuse of this severity was not their recent inatrrection, the quilt of which they ahared with the rest of the Latin cities, but their having formerly juined their arms with those of the finuls (ib. 14). Thus Tibur remained nominally free and independent, 80 that Foman exiles might resort to it (l'olyb. vi. 14). Hence we find the tibicines taking refuge there when they fled from the rigenr of the censors (u. c. 310), who had deprived them of the gond dimers which they were accustomed to enjoy in the temple of Jupiter; an event more important than at first sight it might seem to be, since, without the tibicines, neither sacrifices, nor several other important ceremonies, ceuld be performed at kome. On this oceasion the rights of the Tiburtines were respected. The senators sebt ambassadors to them as to an independent city, to request their assistance in procuring the return of the fugitives. The Tiburtines, like able diplomatists, took the pipers by their weak kide. They invited them to dimner and made them drunk, and during the night carted them in waggoon to Rome, so that when they awoke in the morning solier, they found themselves in the Forum (Liv. ix. 30). The stery is also told by Ovid with his usual felicity (Fast. vi. 665, sqq.). Other instances might be adduced in which Tibur enjoyed the privilege of affording an asylum. Tbat of NJ. Claudius, hefore alluded to, was of course previous to the conquest of Latium by the Romans; but we find Cism taking refuge at Tibur after the murder of Caesar (App. B. C. i. 65) : and Ovid (ex Ponto, i. 3, 81 , sq.) notes it as the most distant land of exile among the ancient Romans.

It was at Tibur that Syphas, king of Nutnidia, expired, io B. C. 201, two years after being captured in Africa. He had been brought thither from Alba, and was destined to adom the triumph of Scipio; a humiliation which be escaped by lis death (Liv, xxx. 45). Some centuries later Tibur received a more interesting captive, the beautiful and accomplished Zenobia. The former quecn of the East resided near the villa of Hadrian, io the unostentations mamer of a Roman matma: and at the time when Trebellius l'ollio wrote ber history, the estate still bore her name. (Poll. .I.XX. Tyr. 26.)

In the Barberini palace at Rome is preserved a bronze tablet on which is engraved the following fragment of a Senatusconsultmm: Propterea . quod. scibamus . ea . vos . muerito . nustro . facere . non , potuisse neque , vos . dignos . esse . quei. jucretis neque id , vobeis - neque rei , poplizae. vostrac , oitile, esse. facere. This monument, lirst acquired by Fulvio Orsini, aed left by him to Cardinal Farrese, is published by Gruter (Inser. ccecscix. 12). The tenour seems to show that the Tiburtines had been accised of some grave offence from which they succeeded in exculpating themselves; hut, as there is nothing to fix the date of the inscription, varions opinions lave been entertained respecting the accasion of it. As the style seems to belong to about the middle of the 7 th century ot Rome, Nibby (Dintorni, iii. p. 1/2) is of opiniou that the document refers to the social war: that the Tiburtines bad cleaved themselves from the clarge of taking part in that lengue, nod were in consequence admitted to the Roman franchise, at the same time with many other Latin and Eirnsean cities. This conjecture is by no means improbable. If, however. Tibur received the franchise brfore the civil wars of Marius and Sulla, the latter must have taked 4 H
vol. 11.
it awny when he deprived the rest of the municipal cities of it, with the exception of Anagnia (Cic. pro Dom, 30), but it was probably regained on the abdication of the dictator. The treasure deposited at Tibur in the temple of Hercules was appropriated by Octavian during his war against Lucius Antonins, when so many other temples were plandered at Rome and in its neighbourhood. (App. B. C.v. 24.) From this period we have no notices of Tibur till the time of the Gothic war in the 6th century of our era. During the siege of Rome by Vitiges, Belisarius placed 500 men in it, mud afterwards garrisoned it with lsaurians. (Procop. B. G. ii, 4.) But under his successor Totila a party of the Tiburtines having introduced the Goths by night into the city, the lsaurians fled, and the Goths murdered many of the inhabitants with cireunstances of great cruelty ( Ib . iii. 10.) Great part of the city must have been destroyed on this occasion, since it appears further on (c. 24) that Totila having retired to Tivoli, after a vain attempt upon Home, rebnilt the fortress.

At present there are hat few traces of the homndaries of the ancient city ; yet there are certain points which, according to Nibby (Dintorni, iii. p. 186 , seq.), enable us to determine the course of the walls with some degree of accuracy, and thua to estimate it; circumference, at all events during the time of its subjection to the Romans. These points are determined partly by the nature of the gromnd, partly by existing remains, and partly by positive testimeny. The nature of the ledge upon which the town is built shows that the walls must have traversed the edge of it towards the N. and E.; and this assumption is confirised by some remains. The two temples commonly known as those of the Sibyl and of Drasilia in the quarter called Castro Jetere, and the cvident paios taken to isolate tbis part, indicate it to lave been the ancient neropolis or arx, and prubably the Sicelion of Dionysius. On the W. the boundary is marked by some remains of the walls and of the gate opening ou the road to Rome. On juvestigating this track, we find that it inclined inwards towards the church of the Annunziuta, leaving out all that part now occupied by the J illa $a$ Este and its appurtenances. From that church it Iroceeded towards the modern gate of Santa Croce and the citadel built hy Pope Pins 11. on the site of the ancient amphitheatre. Thence to the Anio two points serve to fix the direction of the walls: first, the church of $S$. Clemente, which was cert.inly outside of them, since, according to the testimony of Narzi, some sepulchral stones were discovered there; second, the charch of $S$. V'incenzo, which was certainly within them, as vestiges of aucient baths may still be seen at that spot. From the furtress of I'ins 11. the wall seems to have proceeded in an almost direct line to the Anio hetween the church of $S$. Bartolommeo and the modern cate of S. Giovanni. It did not extend to the opposite bank, as a small sepulchre of the imperial times has recently been discovered there, at the spot where the tumel for diverting the Anio was opened; where also were fiund remains of an ancient bridge. Thus the plan of the city, with the abatement of stare irregularities, formed two trapeziams joined together at their smallest sides. The arx siso formed a trapeziun completcly isolated, and was connected with the fown by a brigge on the same site as the present one of S. Martino. The circunference of the city, including the arx, was about

8000 Roman feet, or $1 \frac{1}{2}$ miles. The remains of the wall which still exist are of three different epochs. The rarest and most ancient consist of trapezoidal masses. Others, near the Porta Romana or del Colle, are of opus incertum, and belong to the time of Sulla. The gate itself, though comporsed of quadrilateral masses, is of the style of the gates of Rome of the uge of Justinian. From the nature of the place and the direction of the ancient roads, Tibur must have had five gates; namely, three towards the W., one towards the S., and one towards the E., without counting that which communicated with the citadel; but with the exception of the Keatina, where the aqueduct called Anio Vetus began, their names are unknown, and even with regard to that the reading is doubtful. (Front. Aq. p. 30.)

The ancient remains existing at Tivoli, to call them by the names under which they commonly pass, are, the teomple and portico of Hercules, the temples of Vesta and Sibylla, the thermae or baths, the two hridges and the little tomb recently discovered, the temple of Tussis, the villas of Dlaecenas, of Varus, \&c.

Tibur was famed for the worship of Hercules, and bence the epithet of Herculean, so frequently applied to it by the Roman poets (Prop, ii. 32. 5; Sil. It. iv. 224; Mart. i. 13. 1, \&c.; cf. Stat. Sile. iii. 1. 183.) The temple of that demigod at Tibur was, with the exception of the vast temple of Fortune at 1'raeneste, the most remarkable presented by any city in the neigbourhood of Ronie. Thus Strabo (l. c.) mentions the Heracleum and the waterfall as the distinguishing features of Tibur, just as he alludes to the temple of Fortune as the principal olject at Praeneste. And Jnvenal (xiv, 86, seq.) censures the extravagance of Cetronius in building by saving that his villas at Tibur and l'raeneste outdid the fanes of Hercules and Fortune at those places. The name of Heracleum used by Strabo of the former, as well as the term refuevos applied to it by Stephanus Byzantinus, show that it embraced a large tract of ground, and as Angustua is said to have frequently admini-tered jnstice in its porticoes (Suct. Uct. 72), they must have been of considerable size. It possessed a library, which, however, in the time of the Antonines appears to have fallen into decay. (A. Gell. N. A. xix, 5.) We have already seen that it had a treasury. There was also an oracle, which, like that at Praeneste, gave responses by means of sortes. (Stat. Silv. i. 3. 79.) Some antiquaries seek this vast temple belhind the tribune of the present cathedral, where there are some remains of a circular cella composed of materials of a rhomhoidal shape, thus marking the tranaition in the mode of buildiog which took place shout the age of Augustus from the opus incertum to the opus reticulatum. But it would be difficult to regard these vestiges as forming part of a temple 150 feet in circumference; nor was it usual to erect the principal Cbristian church on the foundations of a heathen temple. Nibby therefore (IVintorni, iii. p. 193), after a careful investigation, and a comparison of the remains at Palestrina with those of the soculled villa of Maecenas at Tiroli, is inclined to regard the latter, which will he described further on, as belonging to the celebrated temple of Hercules. It is probable, however, that there were several temples to that deity at Zibur, just as there were at Lome. The principal one was doubtless that dedicated to Ilcreules Victor Tiburs; but there was also one of IIercules Saxamus, which will be described by
and by; and the remaius at the eathedral may have helonged to a third. It is pretty certasis, however, that the Forum of Tibur was near the eathedral, and occupied the site of the present Piuzaa dell Ormo and its euvirons, as appears from a Bull of l'ope Benedict V11. in the year 978, referred to by Ughelli in his Italia Sacra (t. i. p. 1306), and copied by Marimi (Papiri Diplomatici, p. 316). In this Bull, the object of which was to determine the rights and jurisdiction of the bishop of Tizooli, many places in the town are mentioned by their ascient natnes; as the Formm, the Vicus Patricius, the Luripus, the Porta Major, the Porta Obscura, the walls, the postern of Vesta, the district of Castrum Vetns, \&e. The round temple at the cathedral belonged therefore to the Fornm, as well as the crypto-porticus, now called Porto di Ercole in the street del Puggio. The exterior of this presents tea closed arches abont 200 feet in length, which still retain traces of the red plaster with which they were covered. Each arch has three Ioopholes to serve as windows. The interior is divided into two apartments or halls, by a row of twenty-eight slender pillars. Traces of arabesque painting on a black ground may still be seen. The mode of building shows it to be of the same period as the circular renains.
In that part of the city called Castro Vetere, which Nilby identifies with the arx, are two temples, one round, the other oblong, buth of which have been variously identified. The ronnd one, a charming relic of antiquity, is comenonly regarded as the temple of the Sibyl. We know that the tenth and last of the Sibyls, whose name was Alburea, was Wurshipped at Tibur (Varro, ap. Lactant. de Falsa
 vaia, Suid. p. 3302 Gaisf.); and Horace evidently allndes to her when he speaks of the "domus Albuneter resonantis"at that place. (Od.i. i. 7. 12.) It can scarcely be douhted therefore that she had a fane at Tilur. But Nibby is of opiaion that the epithet of "resonantis," which alludes to the noise of the waterfall, is inapplicable to the situation of the round temple on the cliff ; for though it immediately overlhaug the fall, before the recent diversiun of the stream, the cataract, as before shown, must in the time of Horace have been lower down the river. This objection however, may perhaps be considered as pressing a poetical epithet rather too closely; nor is there anything to show how far the fall may have been remored by the catastrophe descrived by the younger Pliny. Some writers have ascribed the temple to Vesta, an opiuion which las two circumstances in its favour: first, we know that Vesta was worshipped at Tibur, from inscriptions recording the Vestal virgins of the Tiburtiti; secondly, the teaples of Vesta were round, like the celelerated one near the Roman furum. Unfortunately, however, for this hypothesis, the Bull of P'ope Benedict before referred to shows that the district of Vesta was on the opposite side of the river. Hence Nibby (Dintorni, iii. p. 205) regards the building in question as the temple of Ilerculea Saxanus. We kuow that round temples were sometimes erected to that deity, as in the Forum Boarium at Liome; and the epithet of Susimns is applicable tu the one in question, fron its being seated oo a rock. It may be observed, however, that Saxanus is not a usual derivative forn from Saxam; and on the whole it may perthaps be as satisfactory to follow the ancient tradition which ascribes the temple to the Sibyl. It is of the style called peripteral, or bav-
ing columns all round. These were originally eighiteen in number, but only ten now renmia, of which seven are isolated aed three are loilt int the wall of a modern strncture; but in such a mamer that the sides towards the cell are visible. The colmuns nre of travertino, of the Corintlian order, mid chasnelled: hence the ternlie bears consideralle resemblance to that in the Fornm Boarium at Roune. Accerding to the Bull before quoted, it was, in the 10th century, a chnrch dediented to the Xirgin Mary.
The same was the case with the adjoining temple, which was dedicated to S. George. This bnilding is also principally of trazertino. It has fuar columns in front, pow hidden by molern honsec, and six at each side, five of which are bnilt into the walls of the cella to the exteut of two-thirds of their circnmterence. Hence it was of the style called prostylos tetrastylas 1 sendo-peripteros. The colunnus are of the luuic order. From an inscription fonad near it, some writers have inferred that the temple was dedicated to the worship of Drusilla, the sister of $\mathrm{C}_{3}$ ligula : but the style of building is cousiderably earlier, and belougs to the age of Sulla. Others have called it the temple of the Sibyl. Professur Nillby (Dintorni, iii. p. 210) started a novel hypothesis, and regarded it as the teuple of Tiburtus, or Tiburans. It is certain that the eponymons founder of the city eujoyed divine hononrs in it, as wo see from Herace ("Tilmrni lucus," Od. i. 7. 13) and Statius(" illa reembat Tiburnus in unbra," Silv, i. 3. 74). But these expressions refer to a sacred grove or $\tau \dot{\mu} \in \nu=$ s, probally with a shrine, or perhape merely an altar, and therefure situated, in all likelihood, in the ontskirts of the town, and not in a a narrow crowded place like the arx. And we most here point out n little inconsistency into whiel the learned professor has fallen: for whilst he objects to the ronnd temple Jeing called that of Vesta, on the ground that it was not within hearing of the waterfall, when that was in its ancient state, yet he regards the square ene, which immediately adjoins it, as the temple of Tithnrnus, beeause it was close to the cataract. On the whole, therefore, we must for the present content ourselves witi one of the ancieat names for this buildiog, or else, which may jerlaps be the safer course, leave it altogether unidentified.

The catastrophe of $1: 26$ brought to light the remains of a bridge; and anuther btill mure perfect one was discovered in 1832, in the progress of the works for diverting the course of the river. At the same tine the workmen cane upon a small tomb, between the \ia Taleria and the banks of the river, containing sereral skeletons and monumental stones. Among these was a cenotaph to Senecie, who was consul for the furrth tine A. D. 10ĩ, and several inseriptions. Under this tonib was an anciest aqueduct, intended to distribute the waters of the Auio anoug the adjucent villas.

There are no other remains in the town excelt some fine opus reticnlatum et lateritinn, bear the eburch of S . Andrea. At this spot were discovered, in 1738 , soune large and handsome culumns with Coriothian capituls, and also the pedestal of a statue to Fur. Maecius Graceus, with an iuscription connecting it with some embellishment of the baths. Hence we may conclude that the thermac were situated here.
Outside the city, on the Xia Constantiana, is the building known as the temple of Tussis, for which appellutivu, however, no nuthority exists. Extelnally it is of an octagon furn, but ronnd inside.

4112

Nibly holds that it is not anterior to the 4th centwry of our era, its construction resembling that of the villa of Maxentius on the Via Appia. There are traces of painting of the 13th century, showing that then, if not previously, it was a Cluristian church. A little further on we come to an inscription which records the levelling of the Clivus Tiburtinus in the time of Constantius and Constans. The name of the latter is purposely effaced, no doubt by the order of Magnentius. This monument was discovered in 1736, and re-erected by order of the magistrates of Tibur at the same spot where it was found.
The delightful country in the vicinity of Tibar caused many villas to be erected there during the latter period of the Republic and under the first Caesars, as we see from the writings of Catullus, Horace, Propertius, Statius, and other prets. Of these villas, however, of which we shall mention only the more ioteresting, there are lut few remains, and scarcely any that can be identified with certainty. The most striking are those commonly called the villa of Mrecenas on the SW. side of the town, near the Cascatelle. Ligorio was the first who called this building the rilla of Mapcenas; but there is no authority for the assumption. It was probably frunded on a wrong couception of a passage in Harace (Od. iii. 29. 6, seq.), which is also quoted by Mr. Cramer (Italy, vol. ii. p. 60) under a misapprehension that it contains an allusion to a residence $1^{n}$ nevensed by Naecenas at Tibur, instead of to his town-hotse on the Esquiline. The plan of this huhling published by Marquez and Uggeri is correct. It was fuunded on gigantic substrnctions, the magni tiwle of which nay be best observed on the N . side. ut that tumards the valley of the Anio. It is an ${ }^{111 m} \mathbf{1}$ puse quadrilateral edifice, $637 \frac{1}{2}$ feet long, and 4.50 broad, surrouniled on three sides by sumptuous porncmes. The fisorth side, or that which looks tuwards Rome, which is one of the long sides, had a theatre in the middle of it, with a hall or saloon on rauh side. The porticoes are arcled, and adorned on the side towards the area with half columns of the 1 oric order. Behind is a series of clambers. An oblong tumulns now marks the site of the house, or, aucondiy to Nilby, who regards it as the temple of Hercules, of the Cella. The pillars were of travertine. and of a beautiful lonic order. One of them still existed on the ruins as late as $\mathbf{1 8 1 2}$. Thris immense building intercepted the ancient road, for which, as appears from an inscription preserved in the Vatican, a vault or tunnel was constructed, part of which is still extant. Hence it gave name to the Porta Scura, or Obscura, mentioned in the Bull of Bmediet, which it continued to bear at least as late ats the 15 th century.

To our apprehension, the plan here laid down is rather that of a palare or villa, than of a temple, nur do we perceive the resemblance, insisted on by Nihby, to the temple of Fortune at J'raeneste. It is not protrable that the chief fane of Hereules, the patrom deity of Tibur, should have been erected outside the town, nor would it have been a convenient spet fur Augustus to administer justice, as we have mentioned that he did in his frequent retirements to Tibur, in the porticoes of the temple of Ilercules. The precincts of the Forom would have been more adapted to such a purpose. But if that emperor so much frequented Tilur, evidently the favourite among all his country retreats (Siset. l. c.), he must have had a suitable residence for his reception. Might
not this rilla have been his palace? Nibby himself observes that the style of building is of the Augustan, or transition, period; and a suhject wonld scarcely have ventured to occupy the highroad with his substructions. But we offer this notion as a mere conjecture in favour of which we ean adduce nothing but its probability.

Catullos had a paternal estate in the neighbonrhood of Tibur; and the pretended site of his honse is still pointed out in the valley by Monte Catillo. It is evident, however, from his address to his farm (Carm. 42), that it was more distant from the town, and lay at a point where the boundary between the Sabine and the Tiburtine territory was uncertain. Ile himself wished it to be considered as in the latter probably as the more fashimable and aristocratic sitnation ; but his ill-wishers persisted in asserting that it was Sabine. Horace had also a resiuence at Tibur, besides his Sabine farm; and, according to his biographer, it was situated near the grove of Tiburnus (Suet. J"it. Ifor.); but whether it was at the spot now pointed out, near the hernitage of S. Antonio, on the road from Tivoli to the Cascatelle, is very problematical, the remains there heing, according tis Nibby (Dintorni, iii. p. 221). of a period anterior to that of Horace. Nibby would identify them as belonging to the villa of Sallust, who, if we may trust the Declanetio in Sallustium (c. 7) falsely ascribed to Cicero, had a residence at Tibur. But this is mere conjecture. Equally uncertain is the site of the villa of Vopiscus, a puet of the age of Domitian, of which Statius has left us a pretty description (Sile, i. 3). The grounds seem to have extended on both sidea of the river, and from certain particulars in the description, Nibhy (Dintorni, iii. p. 216) imagines that he has tiscovered the spot pear the place conmoniy assigned to the villa of Catulus and the grove of Tiburnus, in the valley between M. Catillo and M. Peschiavatore. Thie Cynthia of Projertius, whase real name was 1lostia (Appul. Apol. ii. p. 4(15, ed. Bossha), lived and died at Tibur (Prop. iii. 30, iv. 7. 85. \&e.); so that scarcely any place was more associated with the domestic life of the Roman prets. The situation of the villa of Quintilius larus, a little further on the same rond, is rather better supported than most of the others. Horace alludes to the estate of Varns at Tibur, which appears to have lain close to the town (Od. i. 18, 2). A tract on the declivity of Monte Peschiarotore, opposite to the Cascatelle, bore the name of Quintiliolo as far back as the loth century, and the little church at this spot is called La Madonna di Quintiliolo, an appellution which may possibly have been derived from the family name of Varus. Here are the remains of a magnificent villa, in which marble pavenents, columns, capitals, statues, consular coina, \&c., have been discovered, and especially. in 1820, two beaatiful marble Fauns, now in the Vatican. Just below this villa is the P'onte Acquoria, which, as well as the surmonding district, takes its name, literally "the golden water," from a beautifully clenr spring which rises rear it. This bridge was traversed by the primitive Via Tiburtina. One arch of it still remains, constructed of large blocks of travertine. Near it is another bridge of bricks of the imperial times, as well as a modern one of the 15 th century, but none of these are at present in use. On the other side of the river, which is crossed by a rude wooden bridge, the road ascends the Clivus Tiburtinus in returning towards the town. Portions of
the pavement are in complete preservation. Under a rock on the right is an ancient artificial cave, called hy the local aotiquaries Il Tempio del Mondo, but which was probably either a sepulchre, or one of those caves consecrated by the ancients to the rustic tutelary deities. This road joins the Via Constantia before meationed, leading up to the ruins of the so-called villa of Dlaecenas.

Outside the Porto $S$. Croce is a district called Carciano, a corruption of the name of Cassiaoum which it bore in the 10th century, derived from a magaificent villa of the geas Cassia which was situated in it. In the time of Zappi, in the 16th century, a great part of this building was extant. The splendour of this residence is attested by the numerous beautiful statues found there, many of which were acquired by Pope Pias VI. and now adorn the Vatican. In the neighbourhood of Tibur are also the remains of several aqueducts, as the Anio Vetus, the Aqua Marcia, and the Aqua Claudia. The ruins of the sumptnous villa of Hadrian lie about 2 miles S. of the town. A description of it would be too long for this place, and it will suffice to say that, in a circuit of about 8 miles, it embraced, besides the imperial palace and a barracks for the guard, a Lyceum, an Academy, a fac-simile of the Poecile at Atheas and of the Serapeum at Alexandria, a vale of Tempe, a Tartarus, a tract called the Elysian Fields, a stream called the Enripus, numerons temples, \&c. (Cf. Nibby, Jiaggio Antiquario, vol. i.; Analisi della Carta de' Dintorni di Roma, v. viii.; Gell, Topography of Rome and its vicinity, ed. Bunbury; Ant. del Ré, Antichità Tiburtine; Cabrale and F. del Ré, Della I'illa e de' Monumenti antichi della Cittc̀ e del Territorio di Tivoli; Santo Viola, Storia di Tivoli; Keller, De vetere cum nova Tibure comparato : concerning the villa of Hadrian, Piero Ligorio, Pianta della Villo Tiburtinu: Fea, ap. Finckelmann, ii. p. 379.)
[T. H1. D.]
TibURES or TIBURI (Teiboupwe in gen., Ptol. ii. 6. § 37), a hraoch of the Astures in Hispania Tarraconensis, whose principal towa was Nemetobriga.
[T. H. D.]
TlCHIS ( Tech), a river of Gallia Narbonensis, placed by Mela (ii. 5) in the "Ora Sardonum" [Sardones]. The Tichis is the Tecam of Pliny (iii. 4). The Tet and the Tech, two small rivers, cross the territory of Roussillon from west to east. The Tichis is named 1lliberis or $11 l e r i s$ by other writers. [1LLiberis.]

Tl'CHIUML [Teichiom.]
TICHIUSSA (T $\epsilon \backslash \chi \iota \tilde{0} \sigma \sigma a$ ), is mentioned twice by Thucydides (viii. 26, 28) as a fortified place in Caria in the territory of Miletus. Stephanus B. speaks of it under the name of $\mathrm{Teixi} \delta \epsilon \sigma \sigma \alpha$, and Athenaeus knew it uader the oame of Teixious (viii. p. 351 .) It seems to have been situated on the Dorth coast of the bay of lassus.
[L. S.]
TICHOS or TEICHOS. [DYME.]
TICINUM (Tikıvo: Eth. Ticinensis: Pavia), a eity of Gallis Transpadana, situated on the river Ticinus, from which it derived its name, about 5 miles above the junction of that stream with the Padus. According to Pliny it was fonnded by the two tribes of the Laevi and Marici, at the periud of the first Gaulish immigrations into this part of ltaly. (Plia. iii. 17. s. 21.) But it is remarkabe that no mention is found of any towa on the site daring the operations of P. Scipio against Hanoibal in B. C. 218, thongh be mast have crossed the Ticious in the immediate neighbourhood of the spot where the
city afterwards stood. It is probsble, indeed, that in this, as in many uther cases, the rise of a town upon the spot was mainly owing to the "xistence of a convedient passage across the river. There scems no reason to doubt that under the Roman government Ticinum had grown up into an con-iderable municipal town befure the chase of the liwpablic, though its name is not noticed in bistury. But it is mentioned by all the geographero, and repeatedly figures in bistory during the Roman Empire. It is included by Ptolemy among the cities of the Insubres, and would na:uially be so reckoned, thaugh not of losubrian origin, as soun as the river Ticinus came to be considered as the boundary of that people. (Strab. v. p. 217; Plin. iii. 17. s. 21 ; Ptol. iii. 1. § 36.)

The earliest mention of Ticinom in history is on occasion of the death of Drusus, the father of Germanicus, when we are told that Augustus alvanced as far as Ticinum to meet his funeral procession. (Tac. Ann. iii. 5.) Its name is also repeatedly mentioned duritg the civil wars of A.D. 69, when its position on the great highroad that led from the foot of the Alps to juin the Acmilian Way at Placentia, rendered it an important pust. It was the sceve of a serious sedition among the troaps of Vitellius, while that emperor halted there. (Id. Hist. ii. $17,27,30,68,88$.) At a later period it was at Ticinum that the emperor Clandius (the second of the name) was saluted with the imperial title, while he was commanding the garrison of the city. (Vict. Caes. 33, Epit. 34.) It was there also that Constantius took leave of his nephew Julian, whom be had just raised to the rank of Caesar. (Ammian. xv. 8. § 18.) Frum these frequent notices of Ticinuw it seems probable that it had already risen under the Roman Einpire into a floarishing muricipal town, and derived importance from its position, the great highroad which formed the contiunation of the Aemiliaa Way from Placentia to the foot of the Alps passing tbrough Ticinum, autil the increasiog importance of Dediulaom, which became the second capital of Italy, made it customary to proceed through that city instead of following the direct route. (Itin. Ant. Pp. 283, 340, 34i.)

But thoogh Ticinum was unduobtedly a considerable towa under the loman Empire, it was not till after the fall of that empire that it ruse to the position it subsequently occupied. In A. D. 452, indeed, it had sustained a great calamity, having been taken and devastated by Attila (Jornand. Get. 42); but the Gothic king Theoduric, being struck with the importance of its position, not only raised it from its ruios, bot erected a royal palace there, and strengthened the city with fresh furtifications, uotil it became obe of the strungest fortresses in this part of Italy. It consequently bears an important part in the Gothic wars, that people having made it their chief stroaghold in the north of Italy (Procop. B. G. ii. 12,25 , iii. 1, iv. 32,8 e.), in which the ruyal treasures and other valuables were deposited. At the time of the Lombard invasion, it offered a prolunged resistance to the arms of Alboin, and was not taken by that monarch till after a siege of more than three years, A. D. 570 (P. Diac. Wist. Lang. ii. 26,27 ). It thenceforth became the residence of the Lombard kings, and the capital of the kingdom of lialy, and continued to hold this posituou till A. D. 7 it , when Desiderius, the last of the Lomband kings, was compelled to surtender the city to Charleanagne, after a blockade of nure than 15 months.

4 H 3

From this time Ticinum sank again intn the condition of an ordinary provincial town, which it has retained ever since. Before the close of the Lomhard period we find that it was already designated by the name of Pania, from which its modern appellation of Pavit is derived. Paulus Diaconns calls it "Ticims quae alin nontine lapia appellatur " (P. Diac. ii. 15); and the anonymous Geographer of Ravenna gives the same double appellation (Geogr. Ravenn. iv, 30). The most probable explanation of this change of name is that when Ticinum became admittel to the rights of a Roman municipium its inhabitants were enrolled in the Papian tribe, a fact which we learn from inscriptions (Gruter, Inser. p. 1093. 7 ; Murat. Inscr. p. 1087. 1, p. 1119. 4), and that in consequence of this the city came to be known as "Civitas Papis," in centradistinction to Mediolanum, which belonged to the Ufentine tribe. (Aldini, Antiche Lapidi Ticinesi, pp. 43-60.)

The modern city of Pavius contains no remains of antiquity except a ferr sarcophagi and inscriptions. These confirm the manicipal condition of the city under the Roman Empire, but are not in themselves of much interest.
[E. H. B.]
TlCINUS (Tiktvos: Ticino), a considerable river of Northern Italy, and one of the mest important of the northern tributaries of the Padus. It has its sonrees among the high Alps, in the Mons Adula or Mont St. Gothard, aod, where it first emerges from the Alpine valleys forms an extensive lake, called the Lices Veroanes or Lago Vaggiore. Where it issues from this again it is a deep, clear, and rapid stream, and flows through the level plains of Lombardy, with a course of above 60 miles, passing under the walls of Ticinum (Pavia), and discharging its waters into the Padus or Po, about 3 miles below that city. (Strab. iv. p. 209, v. p. 217; Plin. ii. 103. s. 106 , iii. 19. s. 23.) Throughont this lower part of its course (from the Lago Maggiore to the $P o$ ) it is navigable for vessels of considerable burden; but the extreme rapidity of the corrent renders the navigation inconvenient if not dangerous. lts banks are low and marshy, the river being bordered on each side by a belt of thickets and marshy woods. This character of its banks is noticed by Claudian (de 1T. Cons. Hor. 194), while Silus Italicus alludes to the beautiful clearness of its waters. (Sil. Ital. iv. 82.)

The Ticinus appears to have been recognised at an early period as the boundary between the Insubrians and their neighbours the Libicii and Laevi (Liv, v. 34, 35). From its geographical position it must always liave presented a formidable barrier to any invader alrancing into Italy after having erossed the Cuttian, Graian or Pennine Alps, and for this reason its hanks have heen the scene of many successive hatiles. Even in the first descent of the Gauls into the plains of Northern 1taly, we are told that they defeated the Etrascans in a battle near the river Ticinus (Liv, v. 34). But much the mnst celebrated of the contests which were fought on its banks was that between llannibal and 1'. Scipio in 1... 218 , shortly after the descent of the Carthaginian general into lialy. The precise scene of this action cannot, however, be deternined; but it nppears to have been fought on the W. or right bank of the Ticious, at a short distance from the Padus, atul probably not tar from the site of Ticinum or Paria. Livy marks it more distinctly as being within 5 miles of a place called Victumvii (?); but as no other mention of this obscure namic occurs, this lends uis no assistance.
(Liv, xxi. 45.) The narrative of Polybins is far from clear and has given rise to considerable disenssion. Scipio, who had hastened from Pisne into Cisalpine Gaul, on hesring that Ilannibal hnd actually crnseed the Alps and descended into the plains of Italy, advanced to meet him, crossed the P'adus by a bridge constructed for the occasion, and afterwards crossed the Ticinus in like manner. After this, Polybius tells us, " both generals advanced along the river, on the side facing the Alps, the Romans having the streatn on their left hand, the Cartbaginians on their right" (iii. 65). It is clear that this is nut consistent with the statement that the Romans had crossed the Ticinus*, as in ascending that river they would bave had the stream on their richt, anless we suppose "the river" to mean not the Ticinus but the ladus, which is at least equally ennsistent with the general plan of operations. Hannibal was in fact advancing from the country of the Taurini, and no reason can be assigned why he should bave turned so far to the N. as to be descending the Ticinus, in the manner supposed by those who would place the battle near figevano or Borgo S. Siro. If we are to understand the river in question to be the Ticinns, the words of Polybius above quoted would necessarily require that the battle should bave been fonght on the left bank of the Ticinus, which is at variance with all the other particalars of the operations, ns well as with the probabilities of the case. The battle itself was a mere combat of cavalry, in which the Roman horse was supported by a portion of their light-armed troops. They were, however, defeated, and Scipio at once retreated to the bridge over the Padus, leaving a small body of troops to break up that over the Ticinus. These troops, 600 in oumber, were cut off and made prisoners by Hannibal, who, however, gave up the attempt to pursue Scipio, and turned up the stream of the Padus, till he could find a point where he was able to construct a bridge of boats across it. (Pol, iij. 65, 66.) The account ol Liry (which is based mainly upon that of Polybius, though be most have taken some points, soch as the name of Victumvii, from other smurces) agrees with the above explanation, thougb he certainly seems to have transferred what Polybins relates as occarring at the bridge over the Ticinus to that over the Padus. It appears also by his own account that there was ennsiderablo discrepancy among his authorities as to the point at which Hainibal eventually crossed the Padus. (Liv. xxi. 45-47.) It may therefore on the whole bo assumed as probahle that the battle mas fought at a short distance W. of the Ticinus, and not close to the banks of that river: the circumstance that Scipio had encamped on the banks of the Tieinus just before, and advanced from thence to meet Ilannibal will explain why the hattle was always called the "pugna ad Ticinum" or "apud Ticinum."

Two other battles were fought in the same neighbourlood before the close of the Roman empire: one

* I'olybius, indeed, does not distinctly say that the Romans crossed the Ticinus, bnt it is implied in his whole narrative, as hotells ms that the consol ordered a bridge to be built over the Ticinus with the purpose of crossing that river, and afterwards relates their adrance without further allusion in it (iii. 64, 65). But after narrating the defeat and retreat of Kicipio, he says that Hannibal fullowed him as far as the bridge on the first river, which can be no other than the Ticious. (Ib, 66.)
in A.b. 270, in which the Alemanni, who had inraded Italy, were finally defeated by the Emperor Aarelian (Vict. Epit. 35): the other in A.D. 352, between the rival emperors Magnentius and Constantins. (Ib. 42.)
[E. H. B.]
TIERNA (called by Ptol. Diepva, iii. 8. § 10), a town of Dacis on the Danube, epposite to the castle of Zernes (Old Orsove) in Moesia. In inscriptions we fiod it called Statin Tsieruensis (Murst. p. 332. 3; Grisefini, i. p. 265) ; in the Digest (de Cens. i. 8), Colenia Zernensiam; and in the Not. Imp. (c. 3), Trans Diernis.
[T. H. D.]
 di Mrddaloni), a mountain ridge on the borders of Campania and Samnium, only about a mile from the city of Capua. It is one of the last outlying masses of the Apennines, and is a long, narrow ridge of no great elevation, but above 12 miles in length from E. to W., and presenting a bold and steep monntain front towards the Campanian plain, upon which it looks directly dowa. The name was derived according to Festus from the woods of evergreen oak with which it was covered, "Tifata" being equivalent to "iliceta," thnugh whether it was ao Oscan or old Latin word, we are not told. (Fest. s.v. Tifata.) It is first mentiened during the war between the Samnites and Campanians which immediately preceded the First Samnite War. On that occasion the Samnites in the first instance occupied the ridge itself with a strong force, and afterwards drew out their main army ioto the plain below, where they soon defeated the Campanians in a pitched battle. (Liv. vii. 29.) Livy calls it on this occasion "Tifata, imminentes Capnae celles," and elserthere "meotem immineotem Capoas" (xxvi. 5), which well describes its character and situation. It was this opportune position with regard to Capas and the sorroundiog plain, that casosed it to be selected by Hanoibal as a post where he established his camp in B. C. 215 , and from whence he long carried on his operations against the various cities of Campania. (1d. $\leq x i i i . ~ 36,37,39,43$, $x \leq v i . ~ 5 ; ~ S i l . ~$ Ital. sii. 487.) At a later period it was in the plain at the foot of Tifata that Sulla defeated the Marian general Norbanus, B. c. 83 ; and in grati.tude for this victory, he coosecrated a consideraile tract of territory to Diana, the tutelary goddess of the mountain. (Vell. Pat. ii. 25.) We bence learn that that divinity had a celebrated temple on Tifata, and the "Dianae Tifatioae faoum " is Doticed also in inscriptions fonod at Capua. From one of these we learn that the censecrated territory was acain assigned to the goddess by Vespasian. (Orell. Inscr. 1460,3055 .) As the Tabola marks a station "Ad Dianae" near the W. extremity of the ridge, it is probable that the temple was sitoated io that neighbourhoud. (Tab. Peut.) From the same authority we learn that Jupiter, who was worshipped on so many of the highest points of the Apennines, had a temple also on Tifata, to which it gives the name of Jovis Tifatinus. It is placed in the Tabala at the E. extremity of the ridge. (Tab. Peut.) Agaio in n. c. 48 the fastnesses of this mountain ridge afferded a shelter to Nille when driven from Capua. (Dion Cass. xTii. 25.) This is the last time its name is mentioned in history, and it is not noticed by any of the gengraphers : in the middle ages the name seems to have been wholly forgotten; and the monntain is now called from a peighbouring village the Moate di Maddaloni. Bot the descriptions of Livy and Silius Italicus leare no donbt of
the identification. It is indeed, from ita proxitmity to Capus and the abruptness with which it rises from the plain, one of the most strking natural features of this part of Campania. [E. H. B.]

TIFERNUM (Tiфepvar) was the name of two cities or towns of Umbria, which were distinguished by the epithets Tiberinnm and Metaurense (Plio. iii. 14. s. 19).

1. Tifernum Tibenness, which apperrs to have been the most considernble place of the natue, was situnted on or near the site of the modern Citua di Castello, in the upper valley of the Tiber, about 20 miles E. of Arezzo. The Tifernates Tiberini are enamerated among the municipal conmonitiea of Umbria by Pliny (l.e.); but our principal knowledge of the town is derived from the epistles of the younger Pliny, whuse Tuscan villa was situated io ita neighbourhood. For this reason the citizens had elosen him at a very early age to be their patron; and in return for this hoooor be had bnilt a temple there at his own expense. (Plid. Ep. iv. 1.) He afterwards adorned this with statues of the various Roman ernperors, to which he in ene of his letters begs leave to add that of Trajan (Ib, x. 24). From the circumstance that Pliny's villa itself was in Etrurin (whence he always calls it lis Tuscan villa), while Tifernmm was certainly io Umbria, it is evident that the frontier of the two countries ran very near the latter place, very probably as that of the Tuscan and Roman States does at the present day, between Cittia di Castello and Borgo S. Sepolcro. The position of Tifernum on nearly the same site with the former of these cities seems to be well established by the inscriptions foand there and reported by Cluverins (Clnver. Ital. p. 624 ; Grater, Iuser. p. 494. 5). But it was probably sitnated rather further from the Tiber, as Pliny describes it as heing, like Perugia and Ocriculom, "not far " from that river (Plin. iii. 5. 3. 9), while the modern Cittia di Custello almost adjoins its banks.

The precise site of Pliny's Toscan rillo cannot be ascertained, as the terms in which he deseribes its position (Ep, v. 6) will apply to many localities on the underfalls of the Apennines in the upper valley of the Tiber. It is, however, most probable that it was situated (as suggented by Cluverius) in the neighbourhood of Borgo S. Sepolero, abont 10 miles N. of Città di Cnstello, rather than in the immediate vicioity of Tifernum. (Cluver. Ital. p. 590.)
2. Tifernum Metaurense was evidently, as its name implies, situsted on the other side of the Apencines, in the valley of the Metaurus. Its name is mentioned only by Pliny ameng ancient writers ; but it is found in several inseriptioes (in which the citizens are termed, as by Pliny, Tifernates Mletanrenses), and the discovery of these at S. Angelo in Fado leaves no doubt that Tifernum occupied the same site as that town, near the sources of the Jetanrus, about 20 miles above Fossombrone. (Forum Semproaii). (Cluver. Itnl. p. 621 ; Orell. Inscr. $3049,3305,3902$.

It is uncertain which of the towns above mentioner is the Tiferaam of Ptolemy (iii. 1. § 53); perhaps the first has the better claim.
[E. H. B.]
TIFERNLS ( $\Phi$ itepvos, Ptol.: Biferno), one of the most censiderable rivers of Samnium, which has its sources in the heart of that conntry, near Bovianum (Bojano), in a lofty gromp of mountaios, now known by the same name is the river (Wonte Diferno). This is evidently the same which is called by Livy the Tiferaves Mloss, which the Samnite
arruy had oceupied as a stronghole in B. c. 295 - bat notwithstanding the strength of the position, they were attacked and defeated there by the Roman consul L. Volumnias Flamma (Liv. x. 30, 31). Upon two other occasionis during the Sammite wars Livy speaks of Tifernus or Tifernum in a maoner that would leave it uncertain whether this meuntain fastness is meant, or a town of the same name (Liv. ix. 44. x. 14); but as we have no other mention of a town of Tifernum in Sumnum, it is perhaps more probable that in all these cases the mountain of that nane is meant. The group thus named is a part of that known collectively as the Monto Matese, - one of the most conspicnous mountain masses in Samnium. [Samnuum.] The river Tifernus has a course of above 60 miles from its source to the Adriatic, in a general direction from SW. to NE. In the lower part of its course, after leaving the confines of Samnimm, it constituted in ancient times the boundary between Apulia and the Frentati. (Mel. ii. 4. § 6; Plin. iii. 11. s. 16,12 . क 17 ; Ptol. iii. 1. \& 18 , where the MSS. have $\Phi$ it $\boldsymbol{\text { w }}$ vos ; but this is probably a mistake for Tíqepvos.) [E.H.B.]

T1GAVA CASTRA (ft. Aut. p. 38; Tuguvae, Plin. v. 2.s. 1; Ti jầa, Ptol. jv. 2. § 26), is fortress in Mauretania Caesariensis, between Op pidum Novum aud Malliana, variously identified with El-Herba, Cantara, Abd-el-Kuder.

TIGRA (called Ti $\quad$ a by l'rocopius, de Aed. iv. 7), a tortress in Moesis Juferior, near the Danube, and hetweuts Sexautaprista aud Appiaria (Itin. Aut. p. 2222). In the Not. Imp. it is called Tegra. Variously identified with Marotin and a place near Olaghissar.
[T. II, D.]
TlGRANuCERTA (тג̀ Tı үраио́кєрта, Sitrab. xi. pp. 522, 532; 1'tol. v. 13. \$22; 方 Tıүралокејта, Plut. Lucull. 25. \&c.), literally, the city of Tigranes, since кє́pтa (kert, gerd, or karta) meant, in the Armenian dialect, city (Hesych. ini. p. 237). The later capital of Armenia, bult by Tigranes on an enninence by the river Nicephorius, a city of considerable size and strongly tortified. It was in a great measure populated with Greeks and Macedonians, taken thither by force from Cappadocia and Cilicis. After Lucullus gained his vietory over Tigranes before its walls, be eaused a great part of the still ontiushed town to be pulled dows, and permitted its kidnapped inhabitants to return to their homes. Nevertheless, the town continued to exist, though we bear but little of it subsequently to this event. (Cf. Strab. $u$. cc. and sii. p. 539, xvi. p. 747 ; A1p. Mithr. 67; Hlut. Lucull. 25, sq4.; Tac. Ann. xii. 50, xiv. 24, xv. 4; Plin. vi. 9.s. 10.) It has been variously identified with the ruins of Sert on the Chabar, with Mejufarkin, and with Amid or Amadiah. (See Ainsworth, ii. P. :361; St. Martin, i. p. 173; Ritter, Erdk: x. p. 87, xi. 1. 105, sq9.)
[T. 11. 1.]
TiGlils, is celebrated river of Asia. We find various forms of its oame, both in Greek and Latim wruters. The earlier and more classical Greck form is $\delta$ Tiypns, yen. Tíypŋtos (Herod. vi. 20; Xen. Anab. 1v. 1. 3; Arr. Anab. vil. 7, \&e.), whilst the form $\delta$ Tiypıs, g.r. Tiypıôos, anl sometimes Tiүplos, is more usual among the later writers. (Strab. ii. p. 79, xv. p. 728; Ptol. v. 13. § 7; Ilut. Lucull. 22, \&c.) Amongst the Romans the nom. is constantly Tiurris, with the gen. Thgis and ace. Tigrin and Tisrim among the better writors (Virg. Eicl. i. 63; Lucan, iti. 261: 1'lin. vi. s. 9; (urt. iv. 5, S.c.); but sometimes Tigridis, Tigriden (Luean, iii. 256;

Eutrop ix. 18: Amm. Marc. xxiii. 6. § 20, \&̌c.) According to Pliny, the river in the upper part of its course, where it flowed gently, was called Diglito; but lower down, where it movel with more rapidity, it bore the name of Tigris, whieh, in the Medisin language, signified an arrow (cf. Strab. xi. p. 529; Curt. iv. 9 ; Isid. Or. xii. c. 2, Scc.) Josephns (Ant. i. 1, 2, sq.) and Zonaras (Ann. i. 2) mention that it bore the name of Diglad; and in its earliest course it is still called Daghele, Didschle or Dadschla.

According to the general testimony of the ancients the Tigris rose in Armenia (Xen. Anab, iv. 1. § 3; Eratusth. up, Strab. ii. p. 80 ; Plin. vi. 27. s. 31 ; Ptol. l. c., \&u.). Diodurus, indeed, places its sources in the territory of the Uxii in Penia (xvii. 67); but he has here confounded the Tigris with the Pasitigris. Herodotus (v, 52) ohserves that there were three rivers bearing the name of Tigris, but that they did not spring from the same source; one of them rising in Armenia, another is the country of the Matieni, whilst lie does not meation the origio of the third. These two branches, which are not meationed by any other ancieot writer, are the more westeru and proper sources of the Tieris in Supheve, to the NE. of the cataracts of the Eaplarates. The more eastern of them forms the little river Nymphius or Nymplaseus (now tho Butman Siu or river of Mufarakin.) The uniou of these two sourees forms the main western arm of the Tigris, which flows for between 100 and 200 miles, first in a KE., then in a S., and lastly in ant E. direction, betore it joins the main eastern branch of the river, about 62 mles SE. of Tigranocertia The authors subsequent to Jerodotus do not notice bis correct account of these sonrees, but confine themselres eatirely to the eastern branch. According to Strabo (xi. Ip. 521, 529) this rose in Mount Niphates, at a distance of 2500 stadia from the sources of the Euphrates. But Pliny, who hus written in most detail concerning tbis enstern branch, describes it as rising in a plaio of Armenia Major, at a place called Eiegosine (vi. 27. s. 31 ). It then flowed through the nitrous lake of Arethusa, without, however, taingling its waters with those of the Jake, and after losing itself at a place called Zerounda (near the present Hazw'), under a chain of the Tamrus (the Ninurad Dagh), burst ageic from the eartb, and flowed through a second lake, the Thospites. After emerging from this, it again sank into the earth with much noise and foam (ef. Strab. xvi. p. ${ }^{7} 46$; Prisc. Perieg. 913; Amm. Marc. xxiii. 6. \& $15,8 c$.), and, after a subterranean passage of 25 miles, reappeared at a place called Nymphacuan (cf. Justin, xlii. 3). The account of Strabu, huwever, varies very considerably from the preceding one of Pliny, The former writer mentions only one lake ( $\mathrm{si} . \mathrm{p} .529$ ), the description of which entirely resembles Pliny's Arethusa, but which Strabo calls Arsene or Thopitis, meating evidently the Thospites of Pliny, the present Wan in Tosp, on which is situated the town of Ardschisch, with which the Tigris is in reality quite unconnected. Subsequently the river approaches the Euphrates in the neighbourhood of Scleucia, forming in this part of its course the boundary between Assyria and Mesopatamia. 1)iodorus Siculus (ii. 1I) and Curtius (v. I) errobeansly represent it as tlowing tbrough Media, wheh it does not even toucb. Near Selencia, it was connected with the Euphrates by means of caaals (Arrian, Anab. vii. 7). After this, it again retires from tho Eupbrates, till at last, bending its
course to the SW., it completely unites with that river, at a place called by Pliny (l. c.) Digha, 1000 stadia ubove their common embouchure in the Persian gulf. Many of the ancients wero aware that tho two rivers joined one another, and had a common mouth (Plin. ib.; Strab, ii. p. 79 ; Procop. B. P. i. 17, \&c.), whilst others were of opinion that the Eophrates had a separate embouchure (Onesicritus, ap. Strab, xv. p. 729 ; Arrian, Arab. l. c.; and 1 ml .41 ; Nearch. p. 37, Huds.). But even those who recoguised their juaction were not agreed as to which stream it was that receivel the other, and whether their united course, now the Shat-elArab, should be called Tigris or Euphrates. Must writers adopted the former name, but Nearchus and Onesicritus preferred that of the Euphates (cf. Arrian, Indic. 41). It is not impossible, however, that the Euphrates may at one time have had a separate nouth (ef. Plin. l. e.; Ritter, Erdle. x. p. 27). There was also a difference of opioion as to the number of mouths by which the united stream emptied itself into the Persian gulf. Its western mouths were entirely unknown to the ancieut Greeks, as Aotiochus Epiphanes wats the first who caused the coast to the W. of the Tigris to be accurately surveyed; and anengst later conquerors, Trajan alone penetrated as far as this neighbourhood. Hence tbe ancient Greeks, as well as Pliny (l. c.), speak of only one mouth, the breadth of which is given by the latter at 10 miles. Ptolemy, however, mentions two mouths (vi. 3. § 2) at a distance of $1 \frac{1}{2}$ degrees apart, which is confirmed by Onesicritus (ap. Philostorg. Hist. Eccl. iii. 7, 8), aecording to whom the island between these mouths was inhabited by the Meseni. But probally by the eastern mouth was meant that of the river Eulacus, the present Karuin, one arm of which neites with the Tigris, whilst the other falls into the sea by an independent moutl. This river was also called Pasitigris by the ancients (Mafitivpıs, Strab. $x v$. p. 729), that is, "the little Tigris," from the old Persian word pas, signifying "small;" whence also among the modern Persians it bears the name of Didjlahi-Kudak, whicb means the same thing. Hence we may explain how the united stream of the Tigris and Euphrates itself was throughout its course called Pasitigris by some writers (Strab. l. c.; Plin. l. c.); whilst others regarded the Pasitigris as quite a separate stream, rising in the territory of the Uxii, aud disemboguing into the Persian gulf (Nearch. ap. Strab. l. c.; Arrian, Ind. 42; Diodor. xvii. 67 ; Cert v. 3 , init). This last view would make it identical with the present Karín (ef Kinneir, Mem. p. 59; Gosselin, Recherches, foc. ii. p. 86, sqq; Vincent, Peripl. iii. p. 67, not. \&c.) The other affluents of the Tigris were the Nicephorius or Centritis, the Zabatus or Lycus, the Bumadus, the Caprus, the Tornadotus or Torns, apparently the same as the Pbyscus of Xeoophon (Anab. ii. 4. §25), the Gyndes or Delas, the Choaspes, and the Coprates, wbich fell into the main stream after joining the Eulseus. All these rivers were on the left or eastern bank of the Tigris. The stream of the Tigris was very rapid, and according to Strabo (p,529) from its very source; whilst Pliny ( $l$. c.) more correctly ascribes this quality only to its lower course. It was, in fact, owing to the large quantity of water which the Tigris received by means of the canals which connected it with the Eupirates, none of which was returned through the same channels, owing to the
bed of the Tigris being at a lower level. (Arrim, l.c.; Dion Cass. Ixviii. 28; Strab. l, c.; IIur. Od. Iv. 14. 46; Lucan, iii 256, \&c.) In ancient times muny dana lad been constructed in its conree fium Opis to its month, designed to retain its waters for the parpose of irrigating the adjoining districts (ef. Heeren, Ideen, i. 2. p. 171; Tuvernier, Voyages, i. p. 185; Niehuhr, Reise, ii. p. 243). These, however, were all eut through by Alexander, in order to improve tho navigation, which began us high up as Opis (Arrian, l. c.; Strab. 739, sq.) lsetween M/vsul and the confluence of the greater Zab, and 3 hours' journcy above the latter, there still remams an ancient dau of masonry thrown across the stream (Ritter, Erdkunde, x. p. 5, sqq.) [T. H. D.]

TlGUADRA, a small island off the canst of Spain, opposite tho town of P'alma, in the island of Balearis Major. (Plin. iii. 5. s. 11.) [T. II. D.]

TIGURINUS PAGUS, [HeLveth.]
TILADAE (Ti九ájai, P’ol. vii. 2. §ु 15), a mace who lived under the Mons Maeandrus in Western India. They are probably the same as the Tahuctae of Pliny (vi. 19. 8. 22). [Taluetak.] [V]

THLAVEJIPTUS (Tiגaov́e $\mu \pi$ тos: Tagliumento), a river of Venetia, which has its sumrces in the Alps, above 80 miles from the sea, and ufter triversing the broad plain of the frioul, falls into the Alriatic sea between Aquileia and Concordia. (Plin. iii. 18, s. 22; Ptol, iii. 1. § 26.) It is the most considerable river in this part of Italy, and, like all the neighbouring rivers, is sulyject to be swollen by flouds and winter rains, so that it leaves a broad bed of shingle, great part of which is dry at ordinary seasons. The name is found in P'iny and Ptolemy; and it is doubtless the same river which is described by Strabo, though without men. tioning ita name, as separatiog the territory of Aquileia from the proxince of Venetia, and which be says was navigable for 1200 stadia from its mouth. (Strab, v. p. 214.) This last stateouent is indeed a great exaggeration; but the valley of the Tagliamento is one of the natoral oponings of this part of the Alps, and was followed by the line of a Roman rosd, which proceeded from Aquileia by Julium Carnicum (Zuglio) over the pass of the Monte di Sta Croce into the valley of the Gnil. [Alpes, p. 110.]
Pliny speaks (l. c.) of a "Tilaventum mayjus minusque," but it is impossible to asy what river he mennt to designate under the latter appellation. The name is written in the Tabula "Tiliabinte," while it assumes very nearly its modern form in the Geographer of Raveuna. (Taliawentum, Geogr. Rav. iv. 36.)
[E. II. B.]
TLLENE, in Gallia. The name is File in the Table, or Filena as some say. D'Anville altered it to Tilene, and he finds the place on 4 rond in the Table from Andomatunum (Lamgres) to Cabillonum (Challon-sur-Saone). The place is Tib-leChatenn, the Tile Castrum of the eleventh centary, Some documents of that time have Tiricastrum and Tricastel, and accordingly the place is vulgarly called Tré-chäteat or Tri-chiteau. [G. L.]

TIL.PIIOSSA FONS [BoEmTIA, p. 41:2, n.]
TLLPHO'SSIUM or THLPHOSSAELM. [BoEotta, p. 412, a.]

TLLURIJA (Geogr. Rav. iv. 31), or Tu.unt Poss (Itin. Aut. p. 337), a place in Dalmatis, on the river Tilurns. It appears to be the same place as the Tribulium of Pling (iii. 22. s. 26). Now Trigl.
[T. H. D.]

TILURUS, a river of Dalnotia falling ioto the sea near Daloninium. (Itin, Ant. p. 337: Tab. Pent.) Now the Czettina.
[T. II. D.]
TIMIACHUS, a river in Upper Mossia, a tributary of the Danube, which it juinell between Durticura and Florentisna. (Phn, iii. 26. s. 29; Tab. Peut.) Now the Timok.
[T. II. D.]
TIMACUM MAJUS and M1NUS (Tiцакор, Ptol. iii. 9. § 5), twe towns of Moesia Superior situated on the Jimachus. (Geogr. Rav. iv. 7; Tab. Peut.) One still exists ly the nume of Timok; bot Mannert secks the larger town near Iperik, und the stualler noe oear Geurgowutz.
[T. H. D.]
TIMALINUM, a place in Gallaccia in Hispania Tarraconensis (Itio. Ant. pp. 425, 430). Variomsly identified with Iillerklinaud Fontaneira. [T.H.D.]

TIMA'VUS (Tipavos: Timao), a river of Venetis, flowing ioto the Adriatic sea betweeo Aguileia and 'Tergeste, abeut 12 iniles E . of the former city. Notwithstanding its classical celebrity, it is one of the shortest of rivers, being formed by copions sources which burst out from the rock at the foot of a lofty cliff, and impiediately constitute a broad and deep river, which has a course of little more than a mile before it discharges itself into the sea. Tbere cau be uo doubt that these sources are the outlets of some subterraoean stream, aod that the account of Posidooius (ap. Strab. v. p. 215), who says that the river after a course of sobe leogth falls into a chasm, and is carried under ground about 130 stadia before it issues out again and falls into the sea, is substantially correct. Such subtcrradean passages are indeed dot uncommon in Carniola, and it is impossible to determine from what particular river or lake the waters of the Titnavus derive their origin; but the popular notion still regards them as the outflow of a stream which sinks iote the earth near S: Canzian, about 13 miles from the place of their reappearance. (Cluver. Ital. p. 193.) The number of the sources is variously stated: Virgil, in the well-known passage in which he describes them (Aen. i. 245), reckons them nine is number, and this agrees with the statement of Mela; while Strabo speaks of seven; aod this would sppear from Servins to bave been the common belief (Serv.ad Aen. l. c.; Mel. ii. 4. § 3), wbich is supperted also by Martial, while Claudian follows Virgil (Mart. iv, 25. 6; Clandian, de VI. Cons. Hon. 198). Cluverius, on the otber hand, coold find but six, and some modern travellers make them ooly four. Strabe adds tbat, according to Polybius, all but one of them were salt, a circumstance whicb would imply some connection with the sea, and, according to Cluverius, who described them from personal observation, this was distioctly the case in his time ; for though at low water the stream issued tranquilly from its rocky sources, sod flowed with a still and placid current to the sea, yet at high tides the waters were swoilen, so as to rush forth with much greater force and volume, and innndate the neighbouring meadows: and at such times, be adds, the waters of all the sources but one become perceptibly brackish, doubtless from sone subterranesn connumbication witb the sea. (Cluver. Ital. p. 194.) It appears from this account that Virgil's retmarkable expressions -
"Uade per era novem, vasto cuin murmure montis It mare proruptuin, et pelago premit arva somanti"
-are not mere rhetorical exaggerations, bot have a foundation in fact. It was donbtless from a reference to the same circumstance that, accordiag to

Polybius (ap. Strab. l. c.), the stream was called by the natives "the source and mother of the sea" ( $\mu \eta \tau \dot{\text { ipa }}$ тis communication with the sea has been choked up, as no modern traveller alludes to the phenomenon described by Cluverius. The Timao is at present a very still and tranquil stream, but not less than 50 yards broad close to its source, and deep eneugh to be uavigable for vessels of considerable size. Hence it is justly called by Virgil "mngnus Timavus" (Ecl. viii. 6); and Ausonins speaks of the "aequorens amdis Timavi" (Clar. Urb. xiv. 34).

Livy speaks of the " lacum Timavi," by which he evidutly means nothing more than the basin formed by the waters near their source (Liv, xli. 1): it was close to this that the Rooman consul A. Mantius established his camp, while C. Furius with 10 ships appears to have ascended the river to the same point, where their combined camp was attacked and plundered by the Jatrians. According to Strabo tbere was a temple io hovour of Diomed erected near the sources of the Timavas, with a sacred grove attached to it. (Strab. v. p. 214). Tbere were also warm springs in the same oeighbourbood, which are new known as the Bagni di $S$. Giovanni.
