This district, which was separated on the E. from Numidia, by the river Ampsaza, and on the S. from Gictulia, by the snowy ranse of the Atlas, was washed upon the N, mast by the Meliterranean, and on the W. by the Atlautic. From the earlicet times it was oceupied by a preople whom the ancients distiaguished by the name Mamessrl (Maupoúciv, Strab. i. p. 5, iii. 1p. 131, 137, xvii. pp. 825, 827; Liv. xxiv. 49; V'irg. Ach, iv. 206; Maupŋ́volo, l'tol. iv. I. § 11) or Macm (Maupoi, " Blacks," in the Alexandrian dialect, P'aus. i. 33. § 5, viii. 43.
§ 3; Sall. Jug. 19 ; Pomp. Mela, i. $4 . \S 3$; liv. $x \times \mathrm{i}$. 22, xxviii. 17 ; Horat. Carm. i. 22.2, ii. 6. 3, iii. 10. 18; Tac. Ann. ii. 52, iv. 523 , xiv. 28 , Hist. i. 78, ii. 58, iv. 50 ; Lucan, iv. 678 ; Juv. v. 53 , vi. 337 ; Flor. iii. 1, iv. 2); hence the name MaureTANIA (the proper form as it appears in inscriptions, Orelli, Inscr. 485, 3570, 3672; and on coins, Eekhel, vol. vi. p. 48 ; comp. Tzchucke, ad Pomp. Mela, i, 5. § 1) or Mauritania (Maupitavía, Ptol. iv. 1. $\$ 2$; Caes. B. C. i. 6, 39; Hirt. B. Afr. 22; Pomp. Nela, i. 5 ; Plin. v. I; Eutrop. iv. 27, viii. 5 ; Flor. iv. (the MSS. and printed editions vary between this form and that of Manretania) ; $\dot{\eta}$ Maupoúrtwv $\gamma \hat{\eta}$, Strab. p. 827). These Moors, who must not be considered as a different race from the Numidians, but as a tribe belonging to the same stock, were represented by Sallust (Jug. 21) as a remant of the army of Mercules, and by Procopins (B. V. ii. I0) as the posterity of the Cananaeans who fled from the robber ( $\lambda \eta \sigma \tau$ ńs) Joshna; be quotes two columns with a Phoenician inscription. Procopius has been supposed to be the only, or at least the most ancient, author who mentions this inscription, and the invention of it has been attributed to himself; it occurs, however, in the history of Moses of Chorene (i. 18), who wrote more than a century before Procopius. The same inscription is mentioned by Suidas (s, v, Xavóav), who probably quotes from Procopius. According to most of the Arabian writers, who adopted a nearly similar tradition, the indigenous inlabitants of N. Africa were the people of Palestine, expelled by David, who passed into Africa under the guidance of Goliah, whom they call Ijjalout. (St. Martin, Le Bear, Bas Einpire, vol. xi. p. 328 ; comp. Gibbon, c. xli.) These traditions, thongh so palpably fabulous, open a field to conjecture. Without entering into this, it seems certain that the Berbers or Berbers, from whom it has been conjectured that N. Africa received the name of Barbary or Barbaria, and whose language has been preserved in remote mountainous tracts, as well as in the distant regions of the desert, are the representatives of the ancient inhabitants of Mauretania. (Comp. Prichard, Physical Hist. of Mankind, vol. ii. pp. 15-43.) The gentile name of the Berbers - Amazigh, "the noble language"is found, according to an observation of Castiglione, even in Herodotus (iv. 191, ed. Bähr), - where the correct form is Mazyes (MaSúes, Hecataeus, ap. Steph. B. s. v.), which oceurs in the MSS., while the printed editions erroneously give Makúvs (Niebuhr, Lect. on Anc. Ethnog. and Geog. vol. ii. p. 334), - as well as in the later Mazices of Ammianus Marcellinus (xxix. 5; Le Pean, Bas Empire, vol. iü. p. 471 ; comp. Gibbon, c. sxv.).

## II. Physical Geography.

From the extraordinary capabilities of the soil one vast corn plain extending from the foot of Atlas to the shores of the Atlantic - Mauretania was formerly the granary of the world. (Pliu, xviii. 20.) Under a bigoted and fanatical government, the land that might give food to millions, is now covered with weeds. Throughout the plains, which rise by three great steps to the monntains, there is great want of wood; even on the skirts of the Atlas, the timber does not reach any great size-nothing to justify the expression of Pliny (" opacum nemorosumque " v. 1 ; comp. Journ. Geog. Soc. vol. i. Pp. 123-155; Barth, W'anderungen).
Strabo (xvii. pp. 826-832) has given an account
of the productions of Maurctania, marvellons enourh, in some particulars, as where he describes weasels as large as eats, and leeches 10 ft . long; and among other animals the crocodile, which there can searcely be any river of Marocco capable of nourishing, even it the climate were to permit it. (In Aegypt, where the avenge heat is equal to that of Seneganbia, the crocodile is seldom seen so low as Siout.) Pliny (viii. 1) agrees with Strabo ( p .827 ) in asserting that Maturetania produced elephants. As the whole of Barbary is more European than African, it may be doubted whether the elephant, which is no longer found there, was ever indigenous, though it may have been naturalised by the Carthaginians, to whom elephants were of importance, as part of their military establishment. Appian (B. P.9) says that when preparing for their last war with the Romans, they sent Hasdrubal, son of Gisco, to hunt elephants; he could have hardly gone into Aethiopia for this purpose. Shaw (Trav. p. 258 ; Jackson, Marocco, p. 55) confirms, in great measure, the statements of Strabo (p. 830) and of Aclian (II. A. iii. 136, vi. 20) abont the scorpion and the "phalangium," a species of the "arachnidae." The "solitanus," of which Varro (de Re Rustica, is. 14. §4; Plin. ix. 82) gives so wonderful an account, bas not been identified. Copper is still worked as in the days of Strabo (p, 830), and the natives continue to preserve the grain, lerumes, and other produce of their husbandry in "matmoures," or conical excavations in the ground, as recorded by Pliny (sviii. 73 ; Shaw, p. 221).

Manretania, which may be described generally as the highlands of N. Africa, elerates itself like an island between the Mediterranean, the Atlantic, and the great rcean of sand which cuts it off towards the S. and E. This "plateau" separates itself from the rest of Africa, and approximates, in the form and structure, the lieight, and arrangement of its elevated masses, to the system of mountains in the Spanish peninsula, of which, if the straits of the Mediterranean were dried up, it would form a part. A description of these Atlantic bighlands is given in the article Atlas.

Many rivers flow from this great range, and fall into the Mcditerranean, and the Atlantic. Ot these, the most important on the N . coast were, in a direction from E. to W., the Ampsaga, Usare, Chinalafn, and Mulucha; on the IV. coast, in a direction from NE.to SW., the Subur, Salia, Phetir, and Lixes.

The ciast-line, after passing the Ampsaga (Wad-el-Kibir) and Sivus Numidices, bas the harbours Jgilgilis (Jijeli), Saldae Ps. (Bujeiyah), and Rusucuramm (Tedlez). Weighing from Algiers. and passing loanivm (Ras-al-Kanatir), to stand towards the $W$., there is a rocky and precipitous coast, mostly bold, in which in succession were the ports and creeks IoL (Zershell), Cartenna (Tenez), Murustaga (Mostaghanom), Alisenarla (Arzion), Quizi (Wahran or Oran); Portus Magnus (Marsa Kibit), within Metagonim Prom. (Ras-al Harsbah) ; and Acra (Ishgin). The Mclucha falls into the Gulf of Melilah of the charts. About 10 miles to the NW. of this river lay the Tres linsulae (Zaphran or Jajerii group) ; about 30 miles distant from these rocks, on a NW. by W. rhumb, was Rus.mDir P1oss. (Cap Tres Forcas of the Spanish pilots, or Ras-ud-Dehar of the natives), and in the bight formed between it and the Mulucha stood Rusadie:
(Melitah.) W. of Cap Tres Forvote, thit bis is teromination of an offiho it of the secendary , hain of the Atlas, was the district of the Metagonimas, exteniling to Abyla (Jebel-el-Mina). From here to Tixgls ( Tangier) the cosat is bruken by alternate cliffes and cores; and, still standing to the W., a bohl shore presents itself as far as the fine headland of Asipelt'sia (Cape Spartel; Rus-cl-Shukkir of the natives). From Cape Spourtel to the SsW. as far an $/ 71 \mathrm{Lis}$ ( Arzilit), the coast-line is a flat, samdy, and shingly bewh, after which it hecomes noere hold as it reaches Lixt's (Al-Haritch or Laraiche). (Simyth, The Mediterranean, pp, 94-99.) A desription of the SW. cinst is given in the article Labys. (Comp. C. Mitler, Tab. ad Grog. Graec. Minnres, ed. Didut, Paris, 1835; West Coast of Africa surreeged, by Arlett, Vidal, and Boteler. 1832 ; Ciute occidentale de l-tfriqne an Dipnt de la Mavine. Paris, 1852; Curte de lEimpirc de Maroc, par F. Renou, IS44; Barth, Kurte rom Nord Afrikanischen Gestadeland, Berlin, 1849.)

## 1II. History and Political Geagraphy.

The Romans first became acquainted with this country when the war with Hamibal was transferred to Africa; Mauretania mas the unknown land to the W. of the Mulucha. In the Jugurthine Warr, Bocchus, who is called king of Mauretania, played the traitor's part so skilfully that he was enabled to hand over his kingdom to his two suns Pogudes and Bocchoris, who were associnted upon the throne. These princes, from their bostility to the Pompeian party, were confirmed as joint kings of Mauretania by J. Caesar in e. c. 49. During the civil war between M. Antonius and Octavius, Bocchus sided with the latter, while Bogudes was allied with Antonins. When Bogudes crossed into Spain, Bocchus seized upon his brother's dominions; a usurpation which was ratified by Octavius. In B. c. 25, Octavius gare to Juba II., who was married to the dauchter of Cleupatra and Antonius, the two provinces of Mauretania (afterwards called Tingitatia and Cacsorjensis) wbich had formed the kingdom of Bogudes and Buechas, in exchange for Numidia, now mate a Rumath province. Jubz was sueceed d by his actir Pufomy, whom Seleme, Clen patra's dautliter, bure to him. (Strab, xrii. 15. $828,831,840$ ) Tiberins Ioated I'tolemy with farours on atcount of the assistance he gave the Romams in the war with Tacfarinas (Tac. Ann. iv. 23-26); lut in A.n. 41 he was put to duath br Caligula. (Dion Cass. lis. 25 ; Suet. Cal. 26 ; Smwar. de Trant. 11.) For coins of these native pincers, see Eckhel, vol. iv. Pp. 154-161.

In A.D. 42. Clatulins divided the kingdom into two province, , eparated from each other by the river MoJurlia, the ancient frontier betweon the territories of Bocchns and Jugurtha; that to the W. was called Maumetania Tingitiva, and that to the E. Matbetania Caesibinasts. (Dion Cass Ma. 9; Mlim. v. 1.) Buth were imperial provines (Tac. Hist. i.11. ii. 58 ; Spart. Moulr. 6, "Manretaniae praefectura"), and were stronetiened by numerous lioman "coluniae." M. Tingitanat contained in the time of Pliny (l. c.) five, three of which, Zntrs, Bamta. and Basasa, as they were fommeded by Augustas when Mauretania was independent of fiome, were recknued as brlanging to Baetica. (Plin. l. c.; Poump. Mela, iii. 10. §5.) Tixge and lises were colonien of Claudius (Plin. l. c.): to which were alded

## MAURETANLA.

M. Cae orimsis contained eight colonies founded by
 coslae, Resazcs, Salde, Siccabar, Tebesettus; two by Claudius, Cafsalest, formerly lot, the capital of Juba, who gave it this name in honour of his putron Augustus, and OrPiders Novem; one by Nerva, Strifis; and in later times, Arseximil, Bida, Siga. Aquae Catidale, Quiza, Ristocentiom, Auzis, Gilis, Iensiem, and TiPasa, in all 21 well-known eulanies, besides several "municipia" and "oppida Latina." The Notitia enmerates no less than 170 episcopal towns in the two provinces. (Comp. Morcelli, Africa Christiana, mol. i. pp. 40-43.) About A. D. 400, Mauretania Tingitanh was under a "Praeses," in the diucese of Sysin; while Mauretania Cacsariensis, which still remained in the hands of the diocese of Africa, was divided into Mauretasis 1. or Sitifensis, and Mauretinta II, or Cabsabiexsis. The emperor Otho had as-igned the cities of Mauretania to Baetica (Tac. Hist. i. 78); but this probally applied only to single places, since we find the two Mauretaniae remained unchanged down to the time of Constantinc. Marquardt, in Becker's Haudbuch der Rönn. Alt. ITP. 230-232; Murcelli, Africana Christiana, vol. i. p. 25.)

In A. D. 429, the Vanlal king Genseric, at the invitation of Count Boniface, crossed the straits of Gides, and Mauretania, with the other African provinces, fell into the bands of the barbarian conquerors. Belisarius, "the Africams of New Rome," destroyed the kingdom of the Vandals, and Nauretaria again became a Roman province under an Eistern exarch. One of his ablest generals, Jobn the Patrician, for a time repressed the inroads of the Moors upon Roman civilisation; and under his successor, the eunuch Solomon, the long-lost province of Mauretania Sitifensis was restured to the chpire; while the Second Mauretania, with the exception of Cacsareia itself, was in the hands of Masticas and the Moors. (Comp. Gibbon, cc. xli. xliii.; L. Betll, Bas Empire, vol. viii.) At length, in A. D. 698-709, when the Arabs made the final conquest of Africa, - desolated for 300 years situce the fint firy of the Vandals.- the Moors or Berbers adupted the relligion, tho name, and the origin of their ernquenurs, and sunk back into their more conernial state of Mabometan savages.

I'ling (l.c.) makes out the breadth of the two Maurvaniae as 467 M. 13. ; but this will be too much even for Tingitania, where Mount Atlas lies more 10 the S., and in re than 300 M. P. beyond the utmost extent of any part of Caesariensis. The same author frives 170 JI I'. which are too few for Tingitania, and 879 M. P., which are too many for Cacsuriensis. (Shaw, Trur. p. 9.)

The fillowig trites are enumerated hy Ptoleny (iv. 2. §§ 17-22) in 1. Munktainis Cafsamexsis:- Toducar (Toठuîkat), on the left bank of the Ampsaga ; to the N. of these, Cozdastesil (Koloapovaroi), and still more to thic N., towards the coast, and to the E. on thio Auphura, Myccivi (Moukoûpor) and Curtais (Niroiat); to the II. of the latter, Tcievsit (Touגrivotot) and Baviver (Baploupot); S. of these, Macililies (Mađuûpes). Silassil (इard́ogiot), and Matememi (Ma入Xoúbtot); NW, of the TULessin, and to the E.. of Zalaces M, and on the
 anul $\mathcal{N}$. of Zalecut, on the mouth of the Clinalaph, Mhentsil (MaXoviotot); below then, on the other
side of Zalarys, Maztres (Mátikes); and So up to the Giabivil M., Bantukaki (Bayroupápot); still further to the S., between Gakapmi M, and Cinnitit M., Aquensis ('Asoupjvatot), Mreeni (Muкйyoi), and Maccurae (Makkoûpat); and below them, in the S., on the N. spurs of Cinnaba, livabist (Evábaoot); W. of these, between Garaplii 31. and Durdes 31., Nicausil (Nakuniatot),
 of these and Durdus M., Driitae ( $\Delta$ püitrau); then Sorne ( $\sum$ üpout); and on the W. of the Machusii, Thiadusit (Ta入ajovortot). The Heupeditini ('Epjeōıravoi) extended into 11. Mauretanis Tixotraxa (Ptol. iv. 1. §§ $10-12$ ); to the S. of them, the Maubessil (Maupgrvatol); toward the sif., Vacuatae (Ojakovâta), Baxiumae (Bavioüsar) ; then, advancing to the N., Zegrensir (Zeypivatoi). Nectineties (Neкtiempes), Jan(iaucani ('Iay yaukavoi), Volubillini (Oúabintavvi), Vehes (Oѝєpoveis), and Socossir ( इ wooбoiot), upan the carast ; to the $W_{\text {., }}$, the Metagonitaf. (Metaywitat) ; and to the S. of them, Misices (Máनukes), and Vembicae or Verbices (OÚeptixat al. Oúspsixes); to the S. and to the W. of the Volubiliani, Salinsie ( (axivaal) and Causi (Kavyou); still further to the S., to the Jittle Atlas, Bacuatae (Bakovàtai) and Macanitae (Makanitai).
[E. B. J.)
MAURI, MAURUSIl. [MAURXtania.]
maUlifa'Na. [Marmbana.]
mallitta'NiA. [Maumetanla.]
MAXE'RA (Mak hipa, Ptol. vi. 9. § 2; Amm. Mare. sxiii. 6), a river of Hyrcania, which flowed into the Caspian sea. Pliny calls it the Mazeras (vi, 16. s. 18). It is not certain with which modern river it is to be identified, and geographers have variously given it to the Tedjin, the Babul, or the Gurgan. If Anmianus, who speaks of it in connection with the Oxus, conld be depended on, it would appear most probable that it was either the Atrck or the Gurgan. The people dwelling along this river were called Maxerae. (Ptol. vi. 9. § 5.)
[V.]
MAXILU'A (Mą̧ $\lambda$ ovia, Ptol. ii. 4. § 13), a town in Hispania Baetica, which, like Calentrom, was celehrated for its manufacture of a sort of bricks light enough to swin on water. (Plin. xxxv. 14. s. 49 ; comp. Strab. xiii. p. 615 ; Vitruv. ii. 3; Schneider, ad Ech. Phys. p. 88.) It was prohably situated in the Sierra Morenc. (Florez, Esp. Sayr. sii. p. 259.)

MAXIMIANO'POLIS (Mağtulavav́mo入ıs), a town of Thrace, furmerly called lmpara or Pyrsoalis (It. Ant. p. 331), not far from Rhodope (Ainm. Marc. xxvii. 4), and the lake Bistonis (Melet. p. 439, 2; It. Hieros. p. 603; Hierocl. p. 634; Const. l'opph. de Them. ii. 1 ; Procop. de Aed. iv. 11 ; Conc. Chal. p. 96.)
[A. L.]
MANIMAANOPOLIS [Constantia.]
MAXIMLANO'POLIS (Masturavormonts), the classical appellation of the Scriptural Hadadrimmon (Zechariah, xii. 11) in the plain of Megiddo, 17 M. P. from Caesareia (of Palestine), and $10 \mathrm{M} . \mathrm{P}$. from Jeareel, according to the Jerusalem Itincrary; consistently with which notice St. Jerome writes:"Adadremmom, pro quo LXX. transtulerunt Poŵvos, urbs est juxta Jesraelent, quae hoc olim vocabulo nuncupata est, et bodie vocatur Maximianopolis in Canpo Mageddon" (Comm, in Zachar. l. c.); and again,-" diximus Jesraelem, quas nunc juxta Maximianopalin est " (in Hos. 1). It is placed in the civil
 its bishop assisted at the Council of Nicaea. (1R.l.und, Palaestina, pp. 891, 892.)
[G W.]
MAXU'LA (Magoũa, Ptol. iv. 3. § 7), a Roman "colonia" (Maxulla, Plin. v. 3), about the exact distance of which from Carthage there is a considerable discrepancy in the Itineraries (Anton. Itin.; Peut. Tab.). From an expression of Victor Vitensis (de Persecut. Terdal. i. 5. § 6), who calls it " Ligula," "a tongue of land," its position was probably on the coast, between $R$ 'uides and Hammam-el-Euf, where there are the remains of a Roman rond.

The Coast-describer (Stadiasm.) speaks of tho harbour and town of M:asyla as 20 stadia from Crapis, or the modern Garbos: this was probalily different from the former, and is the modern $M_{r} \cdot t s a$, where there are the renains of a town and harbour. (Shav, Trav. p. 157; Barth, Wanderungen, p. 128.) As connected with the gentile epithet Maxyes or Nazyes, it is likely that there were several places of this name. Ptolemy (iv. 3. § 34) has Muxula Vetus (Máovia Пà $\lambda, \alpha$ ), and the Antonine Itinerary a station whels it describes as Maxula Peates, 20 N. P. from Carthage. It is fousd in the Notitia, and was famons in the annals of Martyrology (Augustin, Serm. c. Ixxxiii ; Moncelli, Africa Christiana, vol. i. p. 220.) [E. B. J.]

MAXYES (Mágues, Herod. iv. 191, where the name should be Má̧ves; see Mavretania, p. 297, a.), a Libyan tribe, and a branch of the nomad Ausexses. Herodotus (l.c.) places them on the "other side," i. e. the W. bank, of the river Triton: reclaimed from nomad life, they were "tillers of the earth, and accustomed to live in houses." They still, however, retained some relics of their former customs, as "they suffer the hair on the right side of their heads to grow, but sbave the left ; they paint their bodies with red-lead : " remains of this custom of wearing the hair are still preserved among the Tuargks, their modern descendants. (Hornemann, Trav. p. 109.) They were prabably the same people as those mentioned by Justin (xviii. 7), and called Maxytuni, whose king is ssid to have been Hiarbas (Virg. Aen. iv. 36, 196, 326), and to have desired Dido for his wife. (Heeren, Africun Nations, vol. i. p. 34, trans.; Remnell, Geog. of Herod. vol. ii. p. 303.)
[E. B. J.]
MAZACA. [CAERAMEIA, Vol. I. p. 469, b.]
MAZAE1 (Masaîos), a Pannonian tribe, occupying the sonthernmest part of Pannonia, on the frontiers of Dalmatia, whence Dion Cassius (lv. 32) calls them a Dalmatian people. They were conquered and severely treated by Germanicn. (Strab. vii. p. 314; Plin. iii. 26; Ptol. ii. IG. § 8.)
[L. S.]
MAZARA (Másapa, Diod.; Ma áp $\eta_{\text {, Steph. B.: }}$ Muzara), a town on the SW. const of Sicily, situated at the moutb of a river of the same name, between Selinus and Lilybaeum. It was in early times an inconsiderable place, and is first noticed liy Diodorus in B. C. 409, as an emporiam at the mouth of the river Mazarus. (Diod. siii. 54.) It was evidently at this time a dependency of Sclinus, and was taken by the Carthaginian general Hannibai, during bis advance npon that city. (Dind. l. c.) Stephanus of Byzantium calls it " a fort of the Selinuntines" (фpoúpoov $\Sigma_{\in \lambda t y o u v \tau i \omega v,}$ Steph. B. s.v.), and it is mentioned again in the Jirit Punic War as a fortress which was wrested by the Romans from the Carthaginians. (Diod. xsiii. 9. p. 503.)

It does not seem to bave ever then in anciont times to the rank of a city. Pliny mentions the river Mazara, as does Pteleny also, but apither of them notice the town. (Plin. iii. S. . . 14; Ptol. iii. 4. § 5.) The existence of this last is, however, attested ly the Itizerary, which correctly phaces it 12 miles from Lilybseum (Itin. Ant. p. 89) ; bat it was first raised to an important position by the Saraeens in the 9 th century, under whom it became the capital of the whole surrounding district, as it contiaued under the Normar rule. The western province of sucily still bears the name of 1 'al dil Alazara, bat the town itecli has greatly declined. though it stin retains the rank of a city, and has about 10,000 inhabitants. (Fazell. de Reb. Sic vi. 5. p. 2s4: Smyth's Sicily, p. 224.) A few sarcophagi and inscriptions are the only remains of antiquity extant there.

The river Mazafa, or Mazartes, as it is ealled ly Diodorus (MáSapos, Diod. xiii. 54). is still called the Fiume di Muzara. [E. H. B.]

MAZICES (MáSukes, Ptul. iv. 2. § 19: Mazax, Lucan, iv. 681; Claudian, Stil. i. 356), a people of Mauretanin Cacsariensis, who joined in the revolt of Firmus, but submittel to Theodosins, A. D. 373. (Aum. Darc. xxix. 5. § 17; Le Beau, Bas Empire, vol. iii. P. 471 : emmp. Gibbon, e. xxv.) [E. B. I.]

ME'ARL's (Méapos, Ptul. ii. 6. § 4: Mela, iii. 1. §9), a small river on the N. coast of Hispania Tarracoaensis, flowing into the gulf of the Artabri, still called the Mcro.
MECLILs, a town of Marmarica, which the Peutinger Table places at 33 M . P. to the E. of Paliurus ; the Antonine 1 tinerary has a town Michent. (one MS. reads Mecira), 20 M . P. to the E. of the same place; its position must be sought in the I'ally-er-Rimut (Barth, Wanderrangen, pp. 509 549.)
[E. B. J.]
MECYBERNA (Mqкv́Gєpva: Eth. M $\eta \kappa u \in \epsilon \rho-$ vaios, Steph. B.; Scyl. p. 26 ; Symm. 640), a town whieh stood at the head of the Toronaic gulf, which was also called Sixus Mecybernaets. (Plin. iv. 10 ; Iomp. Mela, ii. 3. § 1.) Meeyberna was the port of Olyathus (Strab. vii. p. 330), and lay between that town and Sermyle. (Herod.vii. 122.) It was taken from the Athenians by the Cbalrilic Thracians (Thuc. v. 39), and surrendered to thilip before the siege of Olynthors. (Diod. xvi. 54.) Jhe site must be sought at Molivipyrgo, where rome reanains of antiquity are said to be preserved. (Leake, North. Greace, rol. iii. 1. 155.) [E. B. J.]

MEDAVA (Mýdava), a town of Arabia Petraca, Ilaetd by Ptolemy in long. $68^{\circ} 30^{\prime}$, lat. $30^{\circ} 45^{\prime}$, doabtless identical with Medeliat or Madeba [MaDERA ] , the letters $\alpha v$ and $a \in$ being identical in sound, and. consequently, used interchangeably, especially in proper names. (1'tul. v. 17. § 6.) [(i, W.]

MEDAURA (A! Medera, Itin. Antor. ; Pent. Thb. ; Hygin. de Lim. p. 163; 'Auuaifapa al. 'А $\mu \mu \in \delta \in \rho \alpha$, l'tol. iv. 3. § 30 : E'th. Medaurensis), a towns of Numidia, which had originally belonged to the kangloma of Syphas, but was annexal to that of Masinissa at the cluse of the Secoad Punie War, and afterwards was colonisad by $n$ detachmont of Roman veterans, when it attained considerable splendour. Appuleius was born at this place, where his father hat hem "dumeir," amd calls himself" Sominumida" and "Semimaetulus." (Apolog. pp. 443, 44t.) It lay on the road from lares to Thevente, ts M. P. from the former and es M. P. from the liatter. At a river Ais, itio, which fluwed
between this place and Thereste, Mazceeel defeated the Moorish chieftain Gildo. (Oros. vii. 36; St. Martin, L. Reau, Bes Empire, vol. v. p. 161 ; comp. Gibbon, c. xsix.) Justinian furtified and placed a garrison in this town, which Procopius (de ted. vi. 6) calls Av̀uetepa. It is perbaps a ditjerent place from Madaura, to which Augustine was sent to be educated (Comfess, ii. 3).
[E. B. J.]
MEDEBA. [Madera.]
MEDEN (M $\eta \delta \in \nu$, Procop. B. I. ii. 4), a town ort the spuirs of Mount Papua, in the inland coantry of Numidia. Gelimer, king of the Vindals retired to this fastness in A. D. 534 . but was compelled to surrender to Pharas, chief of the 1Iernli. (Le Beau, Eas Empire, vol. viii. P. 248; comp. (iibbon, c. xli.)
[E. B. J.]
 Melion (Meঠíwv: Katina), a town in the interior of Acarnania, on the road from Stratus and Phytia (or Ploctriac) to Limmaea on the Ambraciot gulf. It was one of the few towns in the interior of the country which maintained its independence acainst the Aetolians after the death of Alesander the Great. At leagth, in r. C. 231, the Aetolians laid siege to Medeon with a large force. and had reduced it to great distress, when they were attaeked by a body of lilyrian mercenaries, who had been sent by sea by lemetrias, king of Macedozia, in order to relieve the place. The Aetolizns were defeated, and obliged to retreat with the loss of their camp, arms, and baggage. Medeon is agaia mentioned in e. c. 191. as one of the Acarnanian towns, of which Antiochus, king of Syria, obtained possession in that year. (Thuc, iii. 106 : Polyb. it. 2,3; Liv. xxxri. 11, 12; Leake, Nurthern Greecc, vol. iii. p. 575 .)
2. A town of Phocis, destroyed along with the other Phocian towns at the termination of the Sacred War, and never again restored. (Paus. x. 3. § 2.) Strabo places it on the Crissacan gulf, at the distance of 160 stadia from Boeatia (ix. Pp. 410 , 423); and P'austhias says that it was near Aaticyra (x. 36. \& 6; comp. Steph. B. s. r.). Leake places it at Lhesfina. (Northern Greece, vol. ii. p. 548.$)$
3. An ancient town of Boeotia, mentioned by Ilumer ( $I l$. ii. 501 ), is described by Strabo as a dependency of Haliartus, and situated near Chebestos, at the foot of Mt. Phoenicium, from which position it was afterwarls called Phoenicis (ix. pp. 410, 423; comp. Steph. B. s. v.; Plin, iv. 7. s. 12). It appears to have stomd near the lake, in the bay on the borth-western side of Mount Fowif, between the site of Haliartus and Kardhiticu. (Leake, Northern Grecce, vol. ii. p. 215.)
4. A town of the Labeates, in Dalmatia in Illyricum. (Liv, sliv. 23, 32.)

MEDERLACU3, in Gallia Belgica, is placed by the Antonine Itin, on a road from Colonia Trajana (Kelhn) thrmali Juliacum (Juliers) to Colonia Acrippina (Cologne). It lies betwees Lablones and Tenduram (Tudder), and is supposed by some geographers to b. Mcrom-Ruremozelo. [G. J.]
 кús), a cuuntry of onsiderable extent and importance, in the westemt part of Asia, between the Caspian siaa on the N . and the great rivers of Mesojutamia on the $\mathbb{W}$. It is by no means easy to determine what were its precise buandaries, or how mueh was compreliended under the name of Media. Mins Herodotus, whe speaks repeatedly of the Merles,
gives little or no description of the conntry they inliabited, and perhaps all that could be inferred from his language is, that it must have been a mountainous district hetween the Halys in Asia Minor and Persia, fit for raising a warlike and independent race of men (i. 72). Again, during the wars of Alexander, Media had to n considerable extent taken the place of Persia, and was the great country E. of Mesopotamia, and extending indefinitely along the Caspian sea eastwards to Ariana and Bactriana. Still later, at the close of the Roman Republic and under the earlier emperors, Media was restricted by the encroachments of the Parthian empire to its most mountamons parts, and to the Caspian coast westwards, - the province of Atropatene forming, in fact, all that could be strictly called Media. Indeed, its limits were constantly changing at different periods. General consent, however, allows that Media was divisilue into three leading divisions, each of which from time to time was apparently beld to be Media Proper. These were:-1. A northern territory along the shores of the Caspian, extending more or less from Armenia on the W. to Hyrcania on the E., comprehending much of the country now koown by the names of Mazanderin and Gilan; 2. Media Atropatenc, a very monntainons district, to the west aod south of the preceding [Atbopatese]; and 3. Media Magna, the most southern, extensive, and, histurically, the most important, of the three divisions, with its capital Echatana (the present Hamadun).

Of the ancient geographers, Ptolemy gives this country the widest boundaries. Media, says he, is bounded on the N. by the Hyrcanian (i. e. the Caspian) sea, on the W. by Armenia and Assyria, on the S. by Persis and a Jine drawn from Assyria to Susiuna, and on the E. by Hyrcania and Parthia (vi. 2. §§ 1,3 ). It is clear from this, and still more so from the mention he makes of the tribes and towns in it, that he is speaking of Media in its most extended sense: while, at the same time, he does not recognise the triple division noticed above, and speaks of Atropatene (or, as he calls it, Tropatene, vi. 2,5 ) as one only of many tribes.

Strabo, in the tolerably full account which he gives of ancient Media, is content with a twofold division, into Media Atropatene and Media Magna; to these he gives nearly the same limits as Ptolemy, comprehending, however, under the former, the mountain tract near the Caspian ( $x i . \mathrm{pp} .522-$ 526). Pliny, in stating that what was formerly the kingdom of the Persians, is now (in His time) under the Parthians, appears only to recognise Media Magna as Media Proper (vi. 14.s. 17). Atropatene, though subject to Echatana, the capital of Media Magna, he does not seem to consider has any thing to do with it (ri. 13. s. 16).

We proceed now to describe Media Magna, the first or most northern part of what was popularly called Media having been fully noticed under Atwopatese and Ecbatana. It is very difficult to distinguish the classical accounts of the different divisiuns to which we have alluded, the name Media being used very indefinitely. It may, bowever, be stated generally, that Media Magna comprehended the whole of the rich and fertile plain-conntry which was slut in between the great chain of the Carduchian mountains and of Mt. Zagros in the W. and by Mt. Curonus on the N. It appears to have extended as far south as Elymais and Susiana, and to have bordered on the eastern side on Caramania and Ariana, or on what, in later times, was better known
by the name of Partlia. Some have attempted to prove that it derived its name from its Iying in the middle part of Asia (Gesenius, Thes. ii. p. 768 ; cf. also Pulyb. v. 44, who states, ${ }^{\text {'H M M M }}$ Mia
 however, admits of douht. On the Cuneiform Inscrijtions the name is read Mada (Rawlinson, Behistun Insc. As. Journ. vol. x.). Mueh of this land was of a high eleration above the sea, but it abounded in fertile valleys, tamous for their richness, and in meadow land in which a celebrated breed of horses, called the Nismean horses, were raised. (Herod. vii. 40, iii. 106; Diod. xvii. 100 ; Strab. ธi. p. 525 ; Aclian, Ifist. A rim. iii. 2 ; Ammian. xxiii. 6.; cf. also the modern travellers, Kier Porter, vol. i. p. 216, Chardin, and Morier.) It is comprehended for the most part in the modern province of Irák Ajem.

The principal town of Media Magna was Ecbatana (doubtless the present Hamadán), which, during the time of the wars of Alexander, as for many years before, was the capital of the whole country, [Eciatana,] Besides Ecbatana, were other towns of importance, most of them situated in the NE. part of the country, on the edge of, if not within, Atropatene, as Rhigat and HEracleia.

It is equally difficult to determine with accuracy what states or tribes belong to Media Magda. It is probable, however, that the following may be best comprehended in this division:- The Sagartii, who occupied the passes of Mt. Zagros; Chorumithrene, in the champaign country to the sontis of Echatana ; Elymais, to the north of Choromithrene - if indeed this name has not bem erroneonsly introduced here by Ptolemy and Polybins [Elymais] ; the Tapyri or Tapyrrhi, S. of Mlt. Coronus as far as Parthia and the Caspian Gates; Rhagiana, with its capital Rtagae: Sigriane, Daritis, and, along the southern end of the Parachoatras, what was called Syromedia. (See these places under their respective names.)

The Medi, or inhabitants of Media, are the same people as the Madai of the Bible, from which Semitic word the Greek name is most likely derived. Madai is mentioned in Genesis, as one of the sons of Japhet $(x, 2)$, in the first repeopling of the earth after the Flood; and the same name occurs in more than one place, subsequently, indicating, as it would seem, an independent people, subject to the king of Ninereh (2 Kings, $\mathbf{x} v i i .6$ ), or in connection with, if not subject to, the Persians, as in Dan. 7. 28, vi. 15 ; Esth. i. 3, 14. The first Greek author who gives any description of them is Herodotus. According to him, they were originally called Arri, but changed their name to that of Medi on the coming of Medeia from Athens (vii. 62). They were divided into six tribes, the Busae (stepl. Byz.), Paraetaceni (Strah. xi. p. 522, xvi. p. 739 , \&c. ; Arrian, iii. 19), Struchates, Arizanti, Budii (Stepl. Byz.), and the Magi. Von Hammer has attemped to show that most, if not all, of these names ocenr under their Persian form in the Zendavesta and Shah-námeh ( Wiener. Jahrb. ix. pp. 11, 12), but it may be questioned whether the identification can be considered as satisfactory. Some, however, of these names indicate the Eastern oriyin of the inhabitants of Media, as Arii and Arizanti [Ariana; Arizanti]; though it may be doubted whether others of them, as the Magi, ought to be considered as separate tribes. The general evideace
is, that the Mani were a primat-elass one the Media: people; but, Hike the Achaemenidae in Persia, a distinet or dominant tribe. (CF. Strab. xyi. 1. 962 ; Cic. Diein. i. 41 ; Porply r. Abstinent. 4. 16, \&e.) In other authors we find the following peoples counted among the ishabitants of Media, though it may be doubted whether some of them do not more properly belong to one or more of the aljacent nations, the Sagartii, Tapyri or Tapyrrhi, Datiani Caspii, Cadusii, Gelae, and the Mardi or Amardi. (See these under their respective names.) Herodotas proceeds to state that originally the Medes were a free people, who lived in sejarate villages, but that at length they ebose for themselves a king in the person of Deioces, who built the celebrated eity of Eebatana [Ecbatana]. and was succeeded by lhraortes and Cyasares (i. 95-103). The reign of the former was, he adds, terminated by a defeat which be sustaioed (at Rhages, Judith, i. 15) ; while, during the commencement of that of the latter, all Wentero Asia was overran by a lorde of Seythians (i. 103). There can be no donut that for :uwhile they were sulject to, and formed a satrapy of, the Assyrian empire. as stated by Diodorus (ii. 2); that then they threw off tine Assyrian yoke, ns stated by Iferodotus (i. 106), and were ruled over by a series of kings of their own for a long period. (Cf. strab. xi.p.524.) The order and the names of these ralers are differently stated; and it would be out of J lace here to discuss at length one of the most difticult and disputed points of ancient chronulogy. (Cf., however, Diud. ii. 24, 32; Herod. i. 95 ; and Euseb. Chron. Armen. i. 101 ; Clinton, Fast. Hellen. vol. i. p. 257, app.) It may be remarked, that in the Bible the first notice we find of the Medes, eshibits them as the subjects of the Assyrim king Salmaneser (2 Kings, xvii. 6), who was contemporary with the Jewish king Hoslea; while in the bater times of Nebuchadnezzar, they appear ns a warlike nation, governed by their awn rulers. (Isaiah, siii. 17; Jerem. xxv. 25, li. 11, 28.) It is equally clear that the Nledians were united to the Persians by Cyras, and formed one empire with them (Herod, i. 129 ; Diod. ii. 34 ; Jastiu, i. 6), and hence are spoken of in the later boks of the Bible as a peuple subject to the same ruler as the P'ersians. (Dant. v. 28, viii. 20 ; Esth. i. 3, \&c.) From this time forward their fate was the same ns that of the Persian monarchy; and they became in succession subject to the Greeks, under Alesanter the Great, to the Syro-Macodonian rulers after his death, and lastly to the larthian kings. (Cf. 1 Macc. vi. 56, xiv. 2; Strab. xvi. p. 745 ; Juscph. Autiq. xx 3. § 3.)

The consent of history shows that in early times the Meles were held to be a very warlike raee, who had a pecnliar skill in the use of the bow. (Isaiahh, xiii. 1s; 1lerod, vii.62; Xin. 4uab, ii. 1.§ 7; Strab. xi. p. 525.) They had al o great knomledge and practice in horsemanship, and were cobsidered io this, as in many other acquirements, to have been the mesters of the Penians. (Strab. xv. 11. 525, 526, 531.) Hence, in the armament of Xerses, the Medes are desentind as equipped similarly with the l'ewians, and Hosudutus expresoly states that thoir de ss and weap mis were of Medi: o, uit Persian origin (l.c.). In later ages they appear to have degenerated very much, and to have whipted a luxmions fachion of life and dress (cf.
 whelh passal from then to their l'ersian conduerurs.

The rehcin of the Dedes was a system of Starwonhip; their prients bearigg, as we have remarked, the name of Magi, whiels was common to them with the Persians, indeed was probably adopted by the latter from the former. (Xen. Cyr. iv. 5 ; Strab. xv. 1p. 727, 735; Cic. Div. i. 33.) The principal object of their adoration was the Sun, and then the Mood and the five planets, Japiter, Veaus, Saturn, Mercury, add Mars.
[V.]
MEDIAE MURUS, mentioned only by mame by Nenophon, who calls it tò Myizias ка入ov́revov teixos. (Anab. ii. 4. § 12.) He states that it was 20 parasangs in Jength, 100 feet ligk, and 20 broad; and it may be inferred from his narrative that it was from 30 te 40 miles to the N . of Baghdád. There can be little doubt that it was the same work as that called by Strabo in two
 p. 529), and that it had been built acrosis the strip of land where the Tigris and Euphrates approach most nearly, as a defence to the province of Babylonia, which lay to the S. of it. There has been much question, whether this great work can be identified with any of the numerous mounds still remainiog in this fart of Mesopotamia ; bat the question has, we think, been set at rest by the careful sarvey of Lieut. Lynch, in 1837. (Roy. Geogr.Journ. vol. is. Pp. 472, 473.) Mr. Lynch places the end adjoining the Tigris in N. lat. $34^{\circ}$ $3^{\prime} 30^{\prime \prime}$, and long. $21^{\prime} 50^{\prime \prime}$ W. of Baghdád. He describes the existiog ruius as an embankment or wall of lime and pebbles, having towers or battresses on the northern or NW. face, and a wide and deep fosse ; and states, that, patting his horse at its full speed, be galloped along it for more than an hour without finding any appearance of termination. The natives, too, assured him that it extended to the Euphrates.
[ V.$]$
MEDLANI, AD. [Dicia, Vol. I. p. 744, b.]
MEDLA'NA, an inperial villa, 3 miles from Naissus, in Upper Moesia. (Amm. Mare. xxvi. 5.) A town of this name is mentioned. in the Peating. Table, on the road leuding through Rlaetia along the Danube, opposite to Donawoerth, and seems to be the same as the inodern Medingen. [L. S.]

MEDIOLA'NUA, a Gallie name of tow wh which occurs in Gallia, North Italy, and Britain.

1. Mediolanum is placed in the Table between Furum Segustavarum (Feurs) and Rodumba (Rouamue). As to D'Abville's remarks on the postion of Nediulanum, see Fonum Segrshanonem. This Mediolaum is supposed to have been a town of the Trunsalpine 1xscbres, and so it is generally marked in our maps; but the existence of these Transalpino lusubres is hardly established. [Galla Cas.alPLNA, Vol. I. p. 936 .]
2. The Table phaces Mediolanam between Argentomagus (Argenton) and Aquae Nerac (Necris). The figures which have been generally considered to belong to this road, belong to another, and so we have no distances in the Table for this place. Mediolanum seens to be Chattaut Meillan, sonth of Avaricum (Bourges). A milestone found at Alichamp between bourges and Chutcau Meillan, makes the distance from Avaricum to Nediolanum to be 39 Mf I'., which is not far fron the trath. (Walckenaer, Géorj. sic. vol, i. p. 67.)
3. The Autonine Itin, places a Mevlimbumon on a road from Colmia Trajana (Kellu) to Columa Agrippina (Coloume), and 12 Ml P. from Cuthia Trajans. If Culunia Irajana is rightly placel, it is
difficult to see where Mediolanum sheuld be. The nest position to Mediolanum on the road to Cologne is Satlones; which is also uncertain.
4. Nediolanum was the chief town of the Aulerci Eburovices (Ptul. ii. 8. § 11), or Nediolanium, as it is in Ptolemy's test. The name occurs in the Antonine Itin. and in the Table. In the Notitia of the Gallic provinces it is named Civitas Ebroieorum; and in the middle ages it was called Ebroas, whence the modern name Ecreux, a town in the French department of Eure.

Ammianus Marcellinus (xv. 11) mentions Mediolnoum as one of the chief cities of Secnnda Lugduneensis. There was a Roman town a few miles south-east of Evreux, at a place called lieil Evreux. There are the remains of a large theatre here, the fuundations of a building which is supposed to have been a temple, and remains of baths. A great number of amphorae, household utensils, articles of luxury, and imperial medals have been dug up bere, and deposited in the Museum of Ecreux. This Tieil Evreux may be the site of Mediolanum.
5. Mediolanum was the chief town of the Santones or Santoni, now Saintes, in the French department of Charente Inférieure. Strabo (iv. p. 190) writes the name Nedielanium, and also Ptolemy (ii 7.87 ). Marcellinus (xv. 11) speaks of this ytrice under the name of Santones, from which it appears that in his time the name of the people had, as in many instanecs, been transferred to the town. There is no doubt alout the site of this Mediolanum, which is Saintes on the Charente. It was once a consididerable Roman town. There is an arch io honour of Germanicns Cuesar, which appears to be built on the middle of the bridge orer the Charente, which joins the tomn to the faubourg, but the arch rests on the bed of the river, and the bridge has been built to it frem each bank. The most probable explanation of this singular circumstance is that the arch stood oliginally on one bank of the river, and that the river clanged its course. The bridge, of course, must have been built after this supposed clange. The amphitheatre is outside of the tomn, at the bottom of a valley. It is an ellipse, about 436 feet long and about 354 feet wide. Water was brought to the town from a source several miles to the nerth by an aqueduct, of which there are still some remains. In one of the valleys which it crossed there are traces of 25 arches, of which three are standing. One of them is nearly 50 feet high. [G.L.]
 Strab., Ptol. : Eth. Mediolaneossis: Milano, Milan), the clief city of the Insubres in Cisalpine Gaul, and for a long period the capital of Cisalpine Gaal itself. It was situated about midway between the rivers Ticinus and Aldua, in a broad and fertile plain, abont 28 miles from the foot of the Alps at Comum, and the same distance from the Padus near Ticinum (Paria). All ancient writers concur in ascribing its foundation to the Gauls, at the time when that people first estabished themselves in the plaios of Northern Italy. Livy, who has given the most detailed account of the settlement of the Cisalpine Gauls, tells us it was founded by the Inaubres, who called it after a village of the same uame in their native settlements in Transalpiue Gaul (Liv. v. 34; Strab. v. p. 213 ; Plin. iii. 17. s. 21 ; Justin. xx. 5.) There can be little doult that Strabo is correct in saying that, previous to the Roman conquest, it was rather a village than a town, as were indeed all the other Gaulish settlements. It was nevertheless
the chief place of the Insubres, and is mentioned ns such several times in the history of the wars of that people with the Romans. Thus, in the campaign of B. c. 222, after the battle of Clastidium, it was attacked and taken by the Roman consuls Claudins Marcellus and Cn. Scipio. (Pol. ii. 34; Eutrop. iii. 6 ; Oros, iv. 13.) On this occasion it was taken by assault with apparently but little difficulty, and this confirms the statement of Strabo that it was an open town. Again, in B. c. 194, a battle was fought near it, between the Roman proconsul L. Vizlerius Flaccos and the combined forces of the Insubrians and Boians, under a chief named Dorylacus, in which the Ganls are said to have lost 10,000 men. (Liv. xuxiv. 46.)

No other mention of Mediolanum occurs previons to the Roman conquest, nor have we any precise account of the time at which it passed under the Romm yoke, or that at which it was admitted to the Ruman " civitas." We can only infer that it must have sobmitted, together with the rest of the Insubres, about 190 B. c.: its citizens doubtless received the Latin franchise, togetber with the other Transpadane Gauls, in B. c. 89, and the full Roman franchise in B. c. 49. [Gallia Cisalpina, Vol. I. p. 945.] Mediolanuin thus passed into the condition of a Roman municipium, but it did not as yet enjoy that degree of importance which it subsequently attained. Strabo
 doyos, r. p. 213), and Tacitus reckons it among the "firmissima Transpadanae regionis municipia;" but neither he nor Pling give any indication of its possessing any marked superiority over the other municipal towns with whiel they associate its name. (Plin. iii 17. s. 21; Ptol. iii. 1. § 33 ; Tac. Hist. i. 70.) It is erident, however, that under the Roman Empire it increased rapidly in prosperity, and became not only the chief town of the Insohres, but the most important city in Northern Italy. We learn from the younger Pliny that it was a place where literature flowished, and young men from the neighbouring towns were sent for their education. (1lin $E p$. iv. 13.) It was the native place of the emperor Didius Julianus, as well as of Septimius Geta. (Dion Cass. Ixxiii. 11 ; Spartian، Did. Jul. 1, Get. 3.) At a later period, A. D. 268 , it was there that the insurper Aureolus took refnge after his defeat by Gallienus on the Addua, and was for some time besieged hy the emperor, tilla sedition in his owa camp ended in the death of Gallienus, and his brother Valerianus. (Eutrop. ix. I1; Treb. Poll. Gall. 14; Vict. Caes. 33, Epit. 33.) Shortly atter Aureolus was compelled to surrender the city to Claudius, who had been elected to succeed Gallicnus, and was put to death by order of the new emperor. (Treb. Poll. Clave. 5.)

But it was the establishment of the imperial residence at Mediolanum that raised that city to the lighest pitch of prosperity. Its central position, which rendered it a peculiarly suitable head-quarters from which to watch the novements of the barbarians, and the progress of the wars with them, whether in Ganl, Germany, or Pannonia, was nndoubtedly the cause of its selection for this purpose. Aucustus himself is said to have sometimes repaired to Nlediolsnum with the same view (Suet. Aug. 20); and the constantly jocreasing dangers from these quarters led subsequent emperors from time to time to follow his cxample; but Maximian appears to have been the first of the Roman emperors tho permanently fixed his residence there (about A. 1., 303),
and thas at once raised it to the dignity of the capital of Northern Italy. From this period the emperors of the West made it their Lab,tual abode (Eutrop. ix. 27 ; Zosim. ii. 10, 17, \&c.), until the increasing fear of the barbarians indnced Honorius, in A. D. 404, to take refuge in the inaccessible marshes of Ravema. Dlaximian is said to have adorned the city with many splendid public buildings (Vict. Caes. 39); ard it was doubtless at this period that it rose to the spleuduur and magniticence which, abont the middle of the fourth century, excited the admiration of the poet Ausonins, who assigns it the sixth place among the cities of the empire. The houses are described by bim as nnmerons and elegantly built, corresponding to the caltivated manners and cheerful character of the inhabitants. It was sarrounded with a double range of walls, enclosing an ample space for the bnildin?s of the city. Among thene werc conspicnous a circus, a theatre, many teuples, the palace or residence of the emperor, a nint ; and baths, which bore the name of Herculean, is honour of their founder Maximianus, and were so important as to give mame to a whole quarter of the city. The nnmerons porticoes which were attached to these and other public bnildings were adorned with marble statues; and the whole aspect of the city, if we may behere the poet, did not suffer by comparison with Rome. (Auson. Clar. Urb. 5.)

The transference of the imperial court and residence to Ravema most have given a considerable shock to the proserity of Mediolanum, thongh it continned to be still regarded as the capital of Liguria (as Gallia Transpadana was now called), and was the resilence of the Consularis or Vicarius Italine, to whose jurisdiction the whole of Northera Italy was snbject. (Libell. Prorinc. p. 62; Böcking, aul . Yot. Dign. ii. p. 442.) But a much more severe blow was inflicted oo the city in A. 12.452, when it was takeo and plondered by Attila, who after the fall of A quileia carried bis arms, almost withont opposition, through the whole region N. of the Po. (Joroand. Get. 42; Hist. Miscell. xv. p. 549.) Nutwithstanding this disaster, Mediolanum seems to linve retained nuuch of its former importance. It was still regarded as the metropolis of Northern Italy, and after the fall of the Western Empire, in A. D. 476 . became the royal residence of the Guthic kings Odoacer and Theudoric. Procopins indeed speaks of it in the sisth century as sprpassing all the other cities of the West in size and population, and inferior to Reme alone. (Procop. B. G. ii. 8.) It was recovered with little difficuity by Belisarius, but immediately besieged by the Guths under Uraia, the brother of Vitiges, who, after a long siege, made himself again master of the city (A. D. 539), which he is suid to have utterly destroyed, putting all the male iuhabitants, to the number of 300.000 , to the sword, and reduciug the women to slivery. (1d. it. 21.) It is exident, however, that the expressions of lrocopins on this ocration must be greatly exisggerated, for, a+ the time of the invasion of the Lombards under Alb.in (A. D. 568 ). Medholanum already reappears in littic less than its former importance. It was still the acknowled ed capital of Lignria (1'. Dac. Hist. Lang. ii. 15, 25), amh, as the metropulitan see, appears to have retained this dignity under the Lomband kin's, though those monarchs tansferred their ropal re ilence to Ticinum or Parie. In the midalle ages it rapilly rose ausin to prosperity; mad, though a second time destroyed ly the
emperor Frederic Barbarossa in 1162, quickly recovered, and has continued down to the present day to be one of the most important and flourishing cities of Italy.

The pusition of Milan, almest in the centre of the great plain of Northern ltaly, just about midway between the Alps and the Padns, appears to have marked it in all ages as the natural capital of that extensive and fertile region. Its ready conmmuications with the Ticinus on the one side, and the Addua on the other, io great measure supply the want which would otherwise have arisen from its not being sitoated on a navigaole river; and the fertile plain between these two rivers is watered by the minor bnt still coasiderable streams of the Lavabro and Olona. The latter, which is not noticed by any ancient writer, flows under the walls of Milan. The modern city contains few vestiges of its ancient splendour. Of all tbe public bnildings which excited the admiration of Ausonins (see above), the only remains are the colnmis of a portico, 16 in number, sud of the Corinthian order, now attached to tbe church of S. Lorenzo, and suppused, with some probability, to have been orizinally comected with the Thermac or baths erected by the emperor Naximian. A single antique column, now stauding in front of the ancient basilica of Sant' Ambrugio, has been remored from some other site, and dues not iodicate the existence of an ancient bnilding on the spot. Numerons inscriptions have, however, been discorered, and are still preserved in the museum at Molan. These fully confirm the municipal importance of Mediolaum under the early Roman Empire; while from one of them we learn the fact that the city, notwithstanding its flourishing condition, reccived a colony under Hadrian, and assomed, in henour of that emperor, the titles of Colonia Aelia Augusta. (Orell. Inscr. 1702, 1909, 3942, 4000, 4060, \&c.; Zumpt, de Colon. p. 409.)

Mediolannm was the central point from which all the higbroads of Italy N. of the Padus may he considered as radiating. The first and principal of these was that which led by Laus Pompeia to Placentia, where it joined the Via Aemilia, and thus became the direct line of route from Milan to Rarema and Rome. Aootber main lize was that by Novaria and Vercellae to Eporedia and Augusta Practoria, whicb musi have been the princinal line of commonication between Milan and Transalpine Ganl. A third road led in a sontherly direction to Ticinum (Pariu), from which there were tiro lines; the one proceeding by Lanmellum to Augusta Taurinorum, and thence over the Cottian Alps into the southern provinces of Ganl; the other crussing the Padus to Dertona, and thence across the Apenvines to Genoa. A fourth line was that to Consum. from whence there was a much frequented pass by the Lacns Larins, and across the Khaetian Alps into the valley of the Inn, thus opening a direct and speedy communication with the Fannbe. Lastly, a great line of highway led from Nilan to Aquilein, jaswing through Bergomnm, Brixia, Verona, Vicentia, Patavium, Altinum, and Concordia. The details of all these rontes are given in the Antonine ltinerary and the Tabula I'entingeriana.
[E. H. B.]
MED]OLA'NLM (Itin, Ant.; Mejionáviov, Ptol. ii. 3. § 18), a town of the Ordorices in Britain. It accurs in the Itin. Ant, between Dera (Clirster), and Uriconion (Ibroxeter), two towns, the sitco of which are well anthenticated; and in the
tenth Itin. it forms the terminus of a route from Glanoventa.
[C. R. S.]
 a town in the nortb-west of Germany, mentioned only by Ptolemy; its site must in all probability be identified with the modern Meteln, on the river Vecht. As the name Mediolanum is found only in countries inhabited by Celts, it has been supposed that Ptolemy is wrong, and that he by mistake placed this town on the right bank of the Rhine; but there is no good reason for doubting that the country about the Fecht was at one time occupied by a Celtic people.
[L.S.]
MedioniA'TRICI (Med̀opátpikes, Ptol. ii. 9. § 12), a people of Gallia, who belong to the division of Belgica. Caesar (B. G. iv. 10) shows their pusition in a general way when he says that the Rline flows along the territories of the Sequani, Mediomatrici, Triboci or Tribocci, and Treviri. Ptolemy places the Medionatrici south of the Tresiri. Divodurum (Metz) was their capital. [Divodurcm.] The diocese of Metz represents their temitory, which was accordingly mest of the Vosges. But Caesar makes the Mediomatrici extend to the Rhine, and consequently they had in bis time the country betreen the Vosges and the Rhine. And this agrees with Strabo (p. 193), who says that the Sequani and Mediomatrici inhabit the Rhioe, among whom are settled the Tribocci, a German nation which bad crossed over from their own country. It appears then that part of the territory of the Mediomatrici had heen occupied by Germans before Caesar's time; and as we know that after Caesar's time the German tribes, Nemetes, Vangiones, and Caracates occupied the Gallic side of the Rhine, north of the Triboci as far as Mainz, and that north of Mainz was the territory of the Treviri, we may infer that all these tribes were intruders on the original territony of the Me iiomatrici.
[G. L.]

## MEDION. [Meteon.] <br> \section*{MEDITERRA'NEUM MARE.}

## Mabe.]

MEDMA or MESMA (Mé $\mu \eta_{\text {, }}$ Steph. B.; Méô $\mu a$, Strab., Scymn. Ch.; but Meifua on coins, and so Apullodorus, cited by Steph. B. ; Scylax las Méva, evidently a corrnption for Mé $\sigma \mu a$ : Eth. Me $\delta \mu a i o s$, M $\epsilon \sigma \mu \alpha \overline{i o s}$ ), a Greek city of Southern Italy, on the W. coast of the Bruttian peninsula, between Hipponium and the mouth of the Metaurus. (Strab. vi. p. 256 ; Scyl. p. 4. § 12.) It was a colony founded by the Epizephyrian Locrians, and is said to have derived its name from an adjoining fouatain. (Strab. l. c. ; Scymn. Cb. 308 ; Steph. B. s. v.) But though it is repeatedly noticed among the Greek cities in this part of Italy, it does not appear ever to have attained to any great power or importance, and its name never figures in history. It is probable, however, that the Mledimnaeans ( $\mathrm{M} \epsilon \bar{\delta}$ г̀ $\mu \nu \mathrm{aiot}$ ), who are noticed by Diodorus as contributing a body of colonists to the repeopling of Messana by Diooysius in B.c. 396 , are no other than the Medmaeans, and that we should read Me $\delta$ paior in the passage in question. (Diod. xiv. 78.) Though never a very conspicuous place, Medma seems to bave survived the fall of many other more important cities of Magna Graecia, and it is noticed as a still existing town both by Stratio and Pliny. (Strab. l. c. ; Plin, iii. 5. s. 10.) But the name is not found in Ptolemy, and all subsequent trace of it disappears. It appears from Strabo that the tomo itself was situated a little inland, and that it bad a port or emporisum on the

Vol. 11.
sea-shore. The exact site has not been determined, but as the name of Mesima is still bome by a river which flows into the sea a little below Nicotera, $_{\text {a }}$ there can be no doubt that Medma was situated somewhere in the neighbourhood of that town, and probably its port was at the mouth of the river which still bears its name, Nücotera, the name of which is already found in the Antonine Itineraty (pp. 106, 211), probably arose atter the decline of Mesma.
[E. H. B.]

## COIN OF MEDMLA.

MEDMASA (Misuara or Mésuaros), a town of Caria, situated somewhere in the peninsula between the Ceramian and Iasian gulf, not far from Mrndus. ( 1 lin. v. 29: Steph. B. s. v.; Hecat. Fragm. 230.) It is probably the same town as the one which Stephanus elsewhere calls $\Delta$ é $\delta-$ $\mu \alpha \sigma \alpha$ : its site is unknown.
[L. S.]
MEDOACLS or MEDLACLS (Meóóakos: Brenta). a river of Northem Italy, in the province of Venetia, falling into the extensive lagunes which border the coast of the Adriatic, in the neighbourhood of the modern Venice. According to Pliny (iii. 16. s. 20), there were two rivers of the name, but no other author mentions more than one, and Liry, a native of the region, mentions the "Meduacns amnis" without any distinctive epithet. (Liv. x. 2.) There can be no doubt that this is the river now known as the Brenta, which is a vely considerable stream, rising in the mountains of the Fal Sugana, and flowing near Padua (Patavium). A short distance from that city it receives the waters of the Boechiglione, which nay probably be the other branch of the Medoacus meant by Pliny. Strabo speaks of a port of the same nane at its mouth (Meठóakos $\lambda_{t} \mu \dot{\eta} \nu$, v. p. 213), which served as the port of Patavium. This must evidently be the same to wbich Pliny gives the name of Portus Edro, and which was formed by the "Medcaci duo ac Fossa Clodia:" it is in all probability the one now called Porto di Lido, close to Senice. The changes which bave taken place in the contiguration of the lagunes and the channels of the rivers, which are nor wholly artificial, render the identification of the ports along this coast very obscure, but Strabo's statement that the Medoacus was navigated for a distance of 250 stadia, from the port at its mouth to Patavium, seems conclusive in favour of the Porto di Lido, rather than the more distant one of Chiozza. At the present day the Brenta flows, as it were, round the lagumes, and enters the sea at Brondolo, evidently the Portus Brandulus of Pliny (l. c.) ; while a canal called the Canale di Brenta, quitting the river of that name at Dolo, holds a more direct course to the lagunes at Fusina. This canal may perhaps be the Fossa Clodia of Illiny.

Livy tells us that, in B, C. 301, Cleonymus the Lacedaemonian arrived at the mouth of the Medoacus, and having ascended the river with some of bis lighter vessels, began to ravage the territory of the Patavini, but that people repulsed his at-
tacks, and destioyed a considerable part of lus fleet. (Liv, x. 2.)
[E. H. B.]
MEIMOBRIGA, a town in Lasitania (Hirt. B. Alus. 48), the inhahitants of which are called by 1'liny (iv. 22. s. 35) Medubricenses Plmmbarii, is the same place as Monoorrig., or Mostobiliga, which is placed in the Antonine Itinerary (p. 420) on the roul from Sralabis to Emerita. There are ruins of the ancient town at Marrao, on the frontiers of l'ortugal. (Kenmudi, Ant. Lus. p. 58; Florez, Esp, Sagr. xiii. p. 66.)

MEDOSLANILM (ME $\delta 0 \sigma \lambda$ áviov), a town in the southernmost part of Germany (Ptol. ii. 11. § 30), Which must lave been situated a few miles to the north of Iienna. lis exact site is only matter of conjecturs.
[L. S.]
MEDUACUS [Memacts.]
MEDUANA (Mayenne), a Dranch of the Liger, in Gallia. The name may be ancient, but the verse of lucsan io which it ucenrs is spmrions. [Ligur.]
[G. L.]
MEDUANTUM, in Gallia, is placed in the Table on a road from Darseortoram (Reims) through Noviomagus, Mose or Musit (Mouson), to Meduantum, an unknown site.

ME'DULI, a dallie people on the coast south of the Garumna (Geronne). Ausonius ( $E_{p}$. 4) says to Theon : -

## "Quum tumen exerces Mednlorum in litore vitam."

He says in another Epistle to Theon (Ep.5):-
> "Unus Dornnotoni te Jitore perferet aestus Condatem ad portum, si modo deproperes."

[As to this C wdatis Portus, see Condate, No. 6.] Ausonius (Ep. 7) thanks Theon for sending him some of the oysters, equal to those of Baise, which wore fattened in the "stagna Medulorum." The country of the Meduli corresponds to Médoc in the French department of the Gironde. [G. L.]

MedULLI (Meסóoardot, Strabo), an Alpine people, whose name accurs in the inseription on the arch of Susn and on the Trophy of the Alps (Plin. iii. 20), where they are placed between the Acitavanes and Uceni. Ptolemy (ii. 10. § 11) places the Allobroges "under the Meduli," as the mame is there written, by which he means that the Meduli occupy the country nearer to the Alps. Strabu's description of the position of this people is clear (iv. p. 203) :- "After the Vocontii are the Siconiii (Iconii), and Tricorii, and then the Medualli, who occapy the highest summits (of the Alps) ; now they say that the highest part of their comutry has an ascent of one hundred stadia, and thence to the borders of It:aly the descent is as much: and above, in certain hollows, there is a great lake, and two springs not far from one mother, and from one of these flows the Druentins (Ihurance), a torrent stream which flows down to the Rbodanus, and the Darias (Doria) rums in the opposite direction, for it juins the Padus (Po), flowing duwn thromgh the conntry of the Sulasi into Deltice south of the Alps." When Straber says further (iv. p. 204) that the Medulli " 3ie as neat is may be ( $\mu a \dot{\lambda} \lambda \sigma \tau \alpha$ ) above the conflnence of the larra and the Chone," he is not speaking of distanee, but of direction or position; for he addis "and the other side of the mountain country above deseribed, the part that slopes towarls Staly, is neenpied by the Taurini, a Ligurian peuple, and other Lieures." The conclusion is easy that the Medulli weic in the Mauricnne, north and south of the town
if S. Jean de Wauricunr, and enclosed between the Tarentaise and Dauphine. The lake is sumperd by D'Auville and by Walckenaer (Griog. vol. ii. p. 31) to be that on Mont Cenis; and Walckenacr alds "that it is exactly 200 Olympic stadia from Scez to the termination of the descent, 7 miles west of Aosta." But this is a false conclusion, derived probably from Strabo's remark about the Durias flowing through the country of the Salassi; the stream which flows through the country of the Salassi is the Doria Baltea, but the stream which rises near the Dhrance is the Doria Riparia.

D'Anville supposed that Strabo made the Alps in the country of the Medulli $\mathbf{1 0 0}$ stadia in perpendicular beight, which absurd mistake has been followed by the French translators of Strabo. Walckenaer has corrected it ; but he has erroneonsly made Ptolemy place the Medulli immediately north of the Allubroges, instead of to the south-east. Vitruvius (viii. 3) speaks of the guitres of the Medulli, a disease supposed to arise from the water which they drank.
[G. L.]
MEDU'LLIA (Meঠo入入(a: Eth. Me $\delta 0 \lambda \lambda i v o s, ~ M e-~$ dullinns), an ancient city of Latium, which is repeatedly mentioned in the early history of Rome; but, like many others, had disappeared at a comparatively early period. Aecording to Dionysins it was one of the colonies of Alla; and Diodorus also includes it anong the cities of which be ascribes the foundation to Latinus Silvius. (Dionys. iii. 1; Diod. vii., ap. Euseb. Arm. p. 185.) We are told that it fell into the power of Romulus by the voluntary submission of the inhabitants after the fall of Crustumerium, and many of its citizens migrated to Rome, among whom was the father of Tullus Hostilius. (Dionss. ii. 36, iii. 1.) But in the reign of Ancus Marcins it was again conquered by the Latins, who held it for above three years, when the Roman king a second time reduced it. (Id. iii. 38.) Livy, however, says notling of this reconquest, but treats it throughout as a Latin city, and enumerates it among those of the Prisci Latini which were taken by Tarquinius Prisens (i. 33,38 ). At a somewhat later period it is mentioned for the last time, in B. c. 492, as abandoning the Roman alliance, and joining the Sabines. (Dionys. vi. 34.) We have no account of the period of its destruction, but it is not noticed by any of the geographers, and P'liny tells us that it was no longer in existence in his time (iii. 5. s.9).

Tbe name of Medullia is found in Liry a-sociated with those of Cornieulum, Ficulea, Crustumerium, and Numentum, of which the site is approximately known, as well as with Ameriola and Cmmerin, of which the prosition is as uncertain as that of Medullia itself. All three were probably situated in the neighbourhood of the cities just mentioned; but this is all that can be asserted with any confidence. Gell and Nibby have described the remains of an ancient city, at a spot called Marcellina, about 4 miles from Palombara, at the foot of the lofty Aonte Gicmuro, which the former writer supposes to be Mednllia. The remains in question, comsisting of considerable portions of walls of polygotal construction, enclosing a traagular area, nre unquestionably those of an nncieut city: but its identification is whally uncertain; the situation would suit ejually well for Cameria or Ameriola, as fur Medullia. Nibby and Abeken wonld place the latter at $S$ Angifo di Capuccia, on the highest summit of the Corniculan hills; where there also remain ancient walls, supposed by Gell to be those of Corniculun
itself. (Gell, Top. of Rome, pp. 312, 319; Nibby, Jintorni, vol. ï. pp. 293, 327 ; Abelken, M. I. p. 78.)
[E. II. B.]
MEDULLUS (Flor. iv, 12 ; Medulliam, Oros. vi. 21), a mountain in Hispania Tarraconensis, rising above the river Minius ; perhaps the Sierra de Mameda, npon the river Sil, a tributary of the Miño.

MEDUS ( $\delta$ M $\hat{\eta} \delta o s$, Strab. sv. p. 729), a river of ancient Persis, wbich, according to Strabo, after taking its source in Media, flowed into the Araxes, which waters the plain of Persepolis. Curtius, however, in speaking of these rivers, makes the Arazes, which was the greater stream, flow into the Medus, which was the less ( $\mathrm{v}, 4, \S 7$ ). There can be no doubt, however, that strabo is more correct than Curtius. The Medus is the small stream (now called the Pulwain) which flows past the remains of Pasargadae, lstakr, and Persepolis, and falls into the Araxes (Kur or Bend-amir) a few miles helow the last ruios. The anited stream of the two rivers terminates in lake Bakhtegain, about 40 miles from Persepolis. (Fergnsson, Ninev, and Persep. p. 90.)
[V.]
MEGABAR1 (MeráGapot, Strab, xvii. Pp. 786,
 Plin. vi. 30. s. 35), a people of Aethiopia, near Heroe, also called Adibari according to some anthoyities (Plin. l. c.), and possessing a town of Apollo. Their name appears to survive in the tribe of the Mekaberab near Schendy. (Ritter, Erdkunde, vol. i. p. 663 ; Forbiger, vol. ii. p. 811.)

MEGA'LIA. [Megaris.]
 тоג1s: Eth. Mєүалотолírŋs: Sinainu), the "Great City," one of the most recent of the Grecian cities, and the later capital of Arcadia, was founded in B. C. 370. a few months after the battle of Leuctra, and was finished in the course of tliree years. (Paus. viii. 27. § I; Diod. xv. 52, 62, 72.) Areadia had been previunsly divided into a number of indepeadent politicsl communities; and it had always been the object of Sparta to maintain them in their isolated condition, that she might the more easily exercise supremacy over them. But after the fatal blow, which the Spartans bad received at the battle of Leuctra, several of the leading Arcadians, supported by Epaminondas, who was the sonl of the undertaking, resolved to found a new city, which should become the capital of an Arcadian confederation. Ten oecists were appointed to carry this resolution into effect, of whom two were from Tegea, two from Mantineia. two from Cleitor, two from the district of Maenalns, and two from that of Parrhasia. The site, which they chose, was an extensive plain upon the northwest frontier of Laconia; and the city was built upon the river Helisson, a tributary of the Alpheins. Jorty distinet Arcadian townships were either persuaded or compelled to contribute their inhabitants to form the new state. (Paus, viii. 27; Diod. xv. 94.) The inhabitants were furnished from seven states: to from Maenalus, 8 from the Parrhasii, 3 from Orchomenus, 4 from Cynuria, 6 from Eutresis, 3 from Tripolis, and probably 6 (though Pausanias mentions the oames of only 5) from Aegytis. The city was 50 stadia (more than 5 miles and a half) in circamfereace (Polyb. is. 21); while the territory assigned to it was more extensive than that of any other Arcadian state, exteoding morthwards about 23 English miles from the city, being bounded on the east by the territories of Tegea, Mantineia, Orchomenus. and Caphyae, and
on the west by those of Messene, Phignlia, and Heraea. (On the foundation of Megalopolis, see Clinton, Fost. Hell. vol. ii. p. 418 ; Thirlw all, Hist, of Greece, vol. v. p. 85 , seq.; Grote, Hist. of Greece rol. x. p. 306, seq.)

Megalopolis was the place of meeting of the Arcadiao confederation which was now formed. The council of the confederation was called the Ten Thousand (oi Múptot), and consisted of representatives of all the Arcadian states, except Orchomenus and Heraea. The number must be regarded as an indefinite one ; and it is probable that all the citizens of the separate states had the right of attending the meetings. (Xen, Hell. vi, 5. § 6, vii. 1. § 38 ; Diod. xv. 59: Paus, viii, 32. § 1 ; Dem. de Fals: Leg. p. 344.) A budy of troops, called Epariti (Exdiputor), was raised for the service of the confederation; their number was 5000 (Xen. Hell. vii. 4. $\S 34$, vii. 5 . § 3; Diod. xi. 62, 67.) The new confederation succeeded for a time in giving a certain degree of nsity of sentiment and action to the Arcadians; but its influence gradually declined; and the eity of Megalopolis never attained that importance which its fonnders had nnticijated, and which had caused it to be laid out on a scale too large for the the population cellected within its walls. (Polyb ii. 55. )

Upon the decline of the Theban power, the Spartans directed their attacks against JIetalopolis; Lut these were easily rapelled; and upon the rise of the Dacedonian power the Megalopolitans formed a close alliance with Philip, and subsequently with Alexander, as their best security against their formidable neighbour. After the death of Alexander they continued faithful to the Macedonian alliance, and refused to join the other Greeks against Antipater. In the contest between Polysperchon and Cassander, Megalopolis espoused the side of the latter; in comsequence of wbich Polysperchon laid siege to the city io B. c. 318. It was, however, bravely defended by its inhabitants, under an officer named Damis; and though Polysperchon succeeded in making a breach in its walls, he was finally repulsed with loss. (Diod. xviii. 70, 71.) We learn from Diodoras (l. c.) that the territory of Megalopolis possessed at this time 15,000 men capable of bearing arms, which implies a population of about 65,000 souls. After this time Dlegalopolis was governed by tyrants, of whom the first was Aristodenus, a Phigalian by birth, who, on account of his good qualities, was called X $\rho \eta \sigma \tau$ ós. During his reign the Spartaos, onder their king Arrotatus, the son of Areus, and grandson of Cleonymus 11., attacked Megalopolis, but were defeated, and Acrotatus was slain. (Paus. viii. 27. § 11, who erroneonsly calls Acrotatus the soo of Cleonymus.) Two generations later Lydiades, a native of Megalopolis, became tyrant of the city, but he voluntarily resigned his power in 0.c. 232, and united Mecalopolis to the Achaean League. (Paus, riii. 27. § I2, seq.; Pulyb. ii. 44.) In в. c. 222, Cleomenes III. surprised Megalopolis; the greater part of the inbabitants succeeded in making their escape to Messene; but, after plundering the city, be laid the greater part of it in ruins. (Paus. siii. 27. § 15 , seq.; Polyb. ii. 55; Plut. Philop. 5 , Cleom. 25.) Soon after the defeat of Cleomenes at the battle of Sellasia (n. c. 221), the Megalopolitans began to rebuild their city; but a dispute arose among them respecting its size. One party wished the compass of the walls to be contracted, that they might be the more eacily defended; and the other
insisted upon preserving the former dimensions of the city. The former party, through the mediation of Aratus, appear to have prevailed, and the city was unfortunately rebuilt in its original macnitude. (Polyb, v. 93.) The fortifications were sufficiently strong to resist the attack of the tyrant Nabis (Plut, Philop. 13); but they were again suffered to fall into decay; and even as soon as B. C. 175 , we find that Antiochus IV. Epiphanes promived the Alegalopolitans to surround their city with a wall, and gave them the greater part of the necessary money. (Liv. xli. 20.) Polybius remarks (ix. 21) that the population of Megalopolis in his time was only the half of that of Sparta, althongh it was two stadia greater in circnmference. So much was it reduced, that a comic poct, quoted by Strabo, described "the Great City as a great desert " (Epquía
 customed as Pausanias was to the sight of fallen cities, the ruined condition of Megalopolis appears to lave particularly impressed him, and gave rise to the reflections which he has inserted after his deseription of the city (viii. 33). Megalopolis was the birthplace of Philopoemen, and of the historian Polybius.

Megalopolis was situated in the middle of a plain, and, unlike the generality of Grecian cities, possessed no height, which might be converted into an acropolis. Mantineia, which was also rebuilt abont the same time, was placed in a level situation, instead of its old position upon a bill. A level situation appears to have been chosen as more convenient for a large population than the rocky heights opon which the old Greek cities were built; while the improvements which had been made in the art of fortifying cities enabled their inhabitants to dispense with uatural defences. The city lay upon either bank of the Helisson, which flowed through it from east to west, and divided it into nearly two equal parts.

## MEGALOPOLIS

galopolis are near the modern village of Sinúnu; but alnost all trace of the walls has disappeared, because they were probably built, like those of Hantineia (Xen. Hell. v. 2. § 5 ; Paus. viii. 8. §5), of nnburnt bricks. Pausanias has given a particular description of the public buildings (viii. $30-32$ ), the site of some of which may still be fixed by the existing remains. The two most important buildings were the theatre, on the left or southern side of the river, and the Arora on the right. The colossal remains of the theatre are conspicnous in the whole phain. Several of the seats remain, and a part of the wall of the cavea. It is described by Pausanias (viii. 32. § i) as the greatest theatre in Greece, and was 480 feet in diameter. Pausanias says that in the theatre there was a jerennial fountain, which Leake could not find, but which Russ noticed in the Urchestra; it is now covered with rubbish, so that it is not visible, but in dry seasons it makes the ground quite moist and slippery. On the eastern side of the theatre Was the stadium, the position of which is indicated in the shape of the gronnd near the river. Here is a fruntain of water, which Pausanias says was in the stadiam, and was sacred to Diunysus. On the eastern side of the stadium was a temple of Dionysus; and below the stalium, towards the river, were a sanctuary of Aphrodite, and an altar of Ares. Russ supposes a circular foundation close to the bank of the river to be the altar of Ares, and a quadrangular foundation between this and the theatre to be the temple of Aphrodite. East of the temple of Dionysins there is another source of water, also mentioned by Pausanias, by which we can fix the paition of the temple of Asclepius the Boy; above which, on a gently sloping hill, was a temple of Artemis Agrotera. West of the theatre was the Thersilinm, named from the person who built it, in which the Ten Thousand were accnstomed to meet; and near it was a house, built originally by the Negalopolitans for Alexander, the son of Philip. In this same locality there were a few foundations of a temple sacred to Apollo, Hermes, and the Muses.

Opposite the western end of the theatre there are, on both sides of the river, but more especially on the nortbern bank, large masses of square stones. These are probably the remains of the principal bridge over the Helisson, which led from the theatre to the Agora on the northern side of the river. The Agora was built on a maenificent scale, and extended along the river close to the western walls of the city; since lansanias, who entered Megalopolis upon this side, immediately came upon the Agora. As Pausanias has given a fuller description of the Agora of Megalopolis than of any other in Grecee, the following restoration of it (taken from Curtius) may be found useful in understanding the general form and arrangement of such buildings.

In the centre of the Ag. ra was an inclosure sacred to Zens Lycacus, who was the tutelary deity of all Arcadia. It had no entrance; but the objects it contained were exposed to public view; here were seen two altars of the gol, two tables, two eagles, and a statue in stone of Pan. Before the sacred inclosure of Keus there was a statne of Apolle in brase, 12 feet high, which was brought from Bassae by the Phigalians, to adorn the new capital; it survived the destraction of the city, and is represented on coins of Keptimius Neverus. This colossal statue prohably stood on the west side of the sanctuary of Zus. To the right of the enlossal statue was the temple of the Mother of the Giods, of which
only the columns remained in the time of Pausanias．

AGORA OF MEGALOTOLIS．
A．Sanctuary of Zeus．
B．Statue of Apollo．
C．Temple of the Mother of the Gods．
D，Stoa of Philip．
F．Temple of Hermes．
F．Stoa of the Archives．
G．Stod of My，opolis．
H Statue of Polyhus．
L．Stoa of Ari－taoder．
1．Temple of Zeus Snter．
M．Sacred Inclosore of the Great Goddesses．
N．Gymnasium．
On the northern side of the Agora lay the Stoz of Philip，the son of Anyntas，which was named in honour of this king，on account of the serrices he had rendered to Megalopolis．Near it were the remains of the temple of Hermes Acacesins， Alongside of the Stoa of Philip，was another smaller Stoa，containing the Archives（ $\tau \dot{\alpha} \dot{a} \rho \chi \in \hat{i} a$ ），and consisting of six compartments．Behind the Stoa of the Archives was a temple of Tyche（Fortume）．

The Stoa called Myropolis，where the shops of the perfumers stond，was probably on the eastern side of the Arora．It was built from the spoils of the La－ cedaemonians under Acrotatus，when they were de－ feated by Aristodemus．Between it and the sanctuary of Zeus was the statue of Polybius．To the left of this statue was the Boulenterium，or Senate House． In the south of the Aurora may be placed the Stoa of Aristander，named after its founder．At the eastern end of this Stos，wad a Peripteral Temple of Zcus Soter，containing a statue of the god seated between the goddesses Megalopolis and Artemis So－ teira．At the other，or western end of the same Stoa，was the sacred inclosnre of the Great God－ denses IVmeter and Core（Persephone），containing sereral temples．The Gymmasium stood on the Western side of the Agora．

To the north of the Agora，behind the Stoa of Philip，there were two small heights，on one of which stood the ruins of the temple of Athena Po－ liss，and on the other those of Hera Teleia．The foundations of these temples are still visible．At the font of the temple of Hera Teleia was the stream Bathyllus，flowing into the Helisson．Parallel to the Bathyllus is another stream；and the hill be－ tween these two streams is，perbaps，the Scoleitas mentioned by Pausanias（viii．31．§ 7），who says that it lies within the walls，and that a strean de－ scends from it to the Helisson．

Some excarations were made on the site of Mega－ lopulis by Ross in 1834 ，but nothing of importance was fonnd．

Paussnias also gires a minute acconnt of the prin－ cipal ruads leading from Megalopolis．Of these he mentions eight，leading respectively to Messenc，Car－
nasium，Sparta，Methydrium，Maenslus，Pligaleia， Terea and Hersea．

1．The road to Messene passed，at the distarce of 7 stadia from the city：a temple of the goddesses called Manian，a name of the Eumenides，because Orestes here becarne insane on account of the murder of his motber．A little further was a small heap of earth，called the Monument of the Finger，becanse Orestes，in his madness，here bit off one of his fingers； still further was a place called Acé，because Orestes was here healed of his disorder，containing anotber temple of the Eumenides；and lastly a sanctuary named Cureium，because Orestes bere cut off his hair．These stations lay between the villages Sinano and $S t$ ．Bei，in the district where there are four tu－ muli．From the Maniae there was a distance of 15 stadia to the Alpheius，near the place where it re－ ceives the Gatheatas，joined by the Carnion．This united stream is the Xerild Potamó．From the Al－ pheius the road led to Crosnt，a distance of 40 sta－ dia，and from Cromi to Nrmphes，a distance of 20 stadia．Nymphus was a place abounding in water and trees，from whick there were 30 stadia to the Hermaetm，which marked the boundaries of Me－ galopolis and Messenia．（Paus，viii．34．）

2．The road to Carnasium，in Messenia，ran north of the former road，but parallel to it．It crossed the Alpheits，where it is joined to the united waters of the Malūs（Monoûs）and Scyres（ $\Sigma$ кípos）．The Malus is probably the river of Neokhori，which，a little westward of Dedibey，receives a small stream answer－ ing to the Scyrus．After proceeding from thence 30 stadia on the right bank of the Malus，you crussed the river and ascended，by a steep path，to a village called Phaedrias（\＄aiסpias），which appears to have， stond on the height above Neokhorr．Fifteen stadia further was the Hermafem，named Despoena，an－ other boundary hetween the teritories of Megalopolis and Messenia．（Paus．viii．35．§§ 1，2．）
3．The road to Sparta was for the most part the same as the modern road from Leondari to Mistra．At the distatce of 30 stadia the road crossed the Alpheins， where it is joined by the Theiés（ $\Theta$ etovis），now called Kutufirina．From thence the road followed the left bank of the Theius for 40 stadia to Phallsiae （\＄a入au⿱ia口），which mas 20 stadia distant from the Hermaeum towards Belemina．Abont 20 stadia beyond is the division of the waters flowing south－ ward to the Eurotas，and northward to the Alpheius． （Paus．riii．35，seq．）

4．The road to Methydrium was 170 stadia in length．It ran northwards from Megalopolis through that portion of central Arcadia which was sur－ rounded by the rivers Gortynius，Alpheins，and He－ lisson．Thirteen stadia from the city was a place called Sctas（亡kid́s），with a temple of Artemis Sci－ atis，founded by the tyrant Aristodemus．Ten stadia further lay Chaimisae（Xopiatai），and from thence， $a^{+}$the distance of another 10 stadia，mas Tricolosi （Tpıќdavol）．These two cities were in ruins in the time of Pausanias．Tricoloni，which was founded by the sons of Lycaon，still possessed a temple of Pin－ seidon，standing upon a hill in a grove of trees，We may place Tricoloni near the modern Karatila，on the edge of the plain of Megalopolis．At Methydrimm two side roads branched off from the main road． The road to the left went by Zuetia（ 10 stadia）．Pa－ roreia（ 10 stadia），and Thyraeom（ 15 stadia），to Hypsus．Zortli（Zoitia，Pans．；Zoitecon，Zol－ teia，Steph．B．s．v．）and Paboreia（Mapápeia） were founded by Tricolonus．They were in ruins
in the time of Paussnias, but in Zortia there still remained a temple of Dencter and Artemis. Pannreis probably ercupied the site of Paleomivi. Tuyraskom ( ©upaion) was founded by a son of Lycaon, and may be placed at Palamúri, at the fout of the mountain. The other side road branched off from Methydrium to the right, ascending to the fountain Cruxi (Kpouvof), and from thence descending 30 stadia to the tomb of Callisto, a lofty mound of earth, upon which was a temple of Artemis Calliste. Ilere Jansamits turned to the left, and at the distance of 25 stadia from this tomb he reached Axemoss. (A $\nu \in \mu \omega \sigma \alpha$ ), on the direct road from Megalupolis to Methydrimm. As Anemosa was 100 stadia from Trienloni and 57 from Methydrium, it may be placed at Ziborisi. Beynd Anemasa the road passed over the mountain Phalanthum, upon which were the
 the other side of this monntain was the plain of Polus, and near it Schoexus ( $\sum$ youvous), which was called from a Boeotian of this name : near Schoenus were the race-grounds of Atalaita. Methydrium was the next place. [METHyDHum.] (Paus, viii. 3.5 § 5. seq.)
5. The road to Maetnalus, led along the Helisson to the foot of Mt. Maenalus. In leaving the city it first ran through a marshy district, which was hare called Helos; it then entered a narrow valley, in which was a place called l'alisctus ( Пaniokios), where a mountain torrent, named Elaphns, flowed into the Helisson on the left: this is the torrent which flows from Valtitzi. Here a side road ran along the left bank of the Elaphus, for 20 stadia, to Periaftheis ( $\Pi$ epueteis), where was a temple of Pan; it must have stood near Rakhamýtes. But the direct road crossed the Elaphns, and entered the Macnalian plain, at the distance of 15 stadia from the Elaphus. This number, however, is much too small, as it is 5 geographical twiles from the junc. tion of the Elaphus with the Helissnn into the Macnalian plain. (Leake, Peloponnesiaca, p. 242; Pans. viit. 36. § 5 , seq.)
6. The rad to Phigalein crusced the Alpheius at the distance of 20 stadia from Negatopolis. Two stadia from the Alpheins were the ruins of Dlacaueas. 7 statia further those of DaskaE, whl asain 7 stadia the hill Acacesius, upon which stowl the enty Acacesium. At the distance of 4 stadia from Acacesium, was the temple of Deepoena, whe of the most celebrated sanctuaries in the Peloponnesus, and of which Pansanias has given a particular description. Ailjoining, was the temple of Pan, above which stood the ancient city of Lycosima. Between Lycosura and the river Plataniston, which was 30 stadia from Phigaleia, I'ansanias mentions no ubject, thourh the direct distance between lycosura and this river is 9 geographical miles. (Paus. viii. 36. $\$ \leqslant 9-39$.)
7. The road to Pallintium and Tecea, Iaised first throurls Laroceis. a subuib of Megalopolis, nuat by the ruins of IIaEmontar: [see Vol. 1 . 1. 192, U. ]: be jond which, to the right of the road, were the ruins of Oerstinasuss; while upon the tifec: road were the villages of Apmonositest and Arstkisets; and 20 stadia beyond the latter the ruins of Aska, near which were the sources of the Alpheius and the Eurotas. From Asca there was an ascent to the mometain called Boreium, upon which was the Chona, marking the bomndaties of Megalopolis, 1'allantium, and Tegea. (1'ans. viii. 44.)

## MEGARA.

8. The road to IIeraea was the one by which Pansanias travelled to Megalopolis, and consequently is described by him in an inverse direction to that of the others. This was the great Roman road through the l'elopounesus, which occurs in the Prutinger Table. After leaving Heraea, the first place was Melafxeaif, which in the time of Pausanias was deserted and covered with water. Forty stadia above Melaencae was Bupiagurt, at the sources of the river Buphagus, near which were the bomdaries of Heraca and Megalopolis. Next to Buphagiun came the village Manatha, and then Gontys. Further on was the sepulchre of those slain in battle acainst Cleomenes, and called PAkakbasula ( Mapaifatiov), because Cleomenes vinlatel his covenant with them. On the right of the road were the ruins of Brexthe, and on the other side of the Alpheius the ruins of Tharfzes. Descending from thence towards the Alpheins was a place called Bathos. Ten stadia further was Basinls; beyond which, after crossing the Alpheins, the traveller came to Thocsia, a deserted city standing upon a height above the Aminius, a tributary of the Helisson. (I'ans, viii. 26. \& 8, viii. 2-8.)
(Leake, Murea, vol. ii. p. 29, seq. p. 28s, seq., Peloponnesiaca, p. 231, se4.: Boblaye, Récherches, §.c. p. 167. seq.: Russ, Reisen im Peloponnes. p. 74, seq.; Curtius, Peloponnesns, vol. i. p. 281, seq.)

COIN OF MEGALOPOLIS.
MEGALO'POLIS. 1. In Caria. [Armmodisias.] 2. In Pontus. [Sebastla.]

ME'GAliA, sometimes called, for distinction's sake, ME'GAPA HYBI.AEA ( $\tau \alpha{ }_{\alpha}$ M $\gamma \alpha \rho \alpha$ : Eth. Merapeís or Meүapeìs 'reגaios, Megarehsis), a city of Sicily, situated on the E. coast of the island, between Syrachse and Catana, in the deep bay formed by the Xiphonian promontory. It was unquestionably a Greek coluny, deriving its nrigin from the Megara in Greece Proper; and the circumstancen attending its timndation are related in detail by Thucydides. He tells us that a colony from Jlegara, under the conmand of a lrader mumed Lamis, arrived in Sicily about the time that Leontini was founded by the Chalcidic colonists, and settied themselves first near the mouth of the river Fantacias, at a place called Trotilus. From thence they remuval to d,eontini itself, where they dwelt for a time together with the Chalcidians; but were sonn afterwards expelled by them, and next established themselves on the promontory or peninsula of Thapsus, near Syracuse. Hence they again removed after the death of Lamis, and, at the suggestion of Hyblon, a Sicilian chief of the surronadiug country, finally arttled at a flace afterwards called the Hyblacan Merara. (Hhuc. vi. 4) Scymnus Chus follows a different tradition, as he descrilips the establishment of the Clakeidians at Nasos and that if the Megarians at Ilybla a- contemporary, and buth preceding the foundation of Syracuse, n. .. 734. Strabo also adopts the same view of the suhjeet, as he represents Magara as founded about the same
time with Naxos (n. c. 735), and before Syracuse. (※ymm. Ch. 271-276; Strab, vi. p. 269.) It is impossible to reconcile the two accounts, but that of Thucydides is probahly the most trustworthy. According to this the foundation of Megara may probahly he placed ahout 726 n . c. Of its earlier histury we have scarcely any information, but it would appear to have attained to a flourishing condition, as 100 years after its foundation it sent out, in its turn, a colony to the other end of Sicily, where it founded the city of Selinus, which was destined to rise to far greater power than its parent city. (Thac, vi. 4; Scymn. Ch. 291; Strab. vi. p. 272.)

Nothing tnore is known of Mlegara till the period of its destruction by Gelon of Syracuse, who, after a long siege, made himself master of the city by a capitulation ; hat, notwithstanding this, caused the bulk of the inhabitants to be sold into slavery, while he established the more wealthy and nuble citizens at Syracuse. (Herod. vii. 156; Thuc. vi. 4.) Annog the persons thus removed was the celehrated comic pret Epicharmus, who had receired his education at Megara, though not a native of that city. (Suid. s. v. Eríxappos; Diog, Laert. viii. 3.) According to Thacydides, this event took place 245 years atter the fonndation of Megara, and may therefore be placed about 481 e. c. It is certain that Megara never recovered its power and independence. Thucydides distinctly alludes to it as not existing in his time as a city, but repearedly mentions the locality, on the sea-coast, which was at that time occupied hy the Syracusans, but which the Athenian general lamachns proposed to make the head-quarters of their fleet. (Thac. vi. 49, 96.) From this time we meet with repeated mention of a place named Megara or Megaris (Scyl. p. 4. § 6), which it seems impossible to separate from Hybla, and it is prohable that the two were, in fact, identical. [These notices are discussed under Hybla, No. 2.] The site of this later Megara or Hybla may be fixed, with little doubt, at the mouth of the river Alabus (Cantaro); but there seems much reason to suppose that the ancient city, the original Greek colony, was situated almost close to the remarkable promontory now occupied by the city of Agosta or Augusta.* It is difficuit to helieve that this position, the port of which is at least equal to that of Syracuse, while the penimsula itself has the same adrantages as that of Octygia, should have heen wholly neglected in ancient times; and such a station would have admirably served the purposes for which Lamachus urged upon his hrother generals the occapation of the vacant site of Megara. (Thuc. vi. 49.) [E.H.B.]

ME'GARA ( $\tau$ à Mé $\gamma a p a$, Degara -ōrum, sometimes Megara -ae : the territory $\dot{\eta}$ M $\epsilon$ रapis, sometimes i) Mєरap$\kappa \hat{\eta}$, sc. $\gamma \hat{\eta}:$ Eth. Me $\boldsymbol{\eta} a \rho \in \dot{\prime} s$, Megarensis: Adj. Meүapıós), a city in Greece Proper.

## 1. Situation.

The city of Megara is situated rather more than a nile from the Saronic gulf, in a plain abont 6 or 7 miles in length, and the same in breadth, hounded to the westward by the range of the Geraneian mountains, to the castward hy the range which terminates in the mountains called Kerata or the Horns, and to the south by the sea; while on the north

[^12]the plain loses itself in a gradnal ascent. The city stood on a low hill with a duable summit, on ex-h of which there was an acropolis, one named C.asta (Kapia), and the other Alcathor (A入кa日ón), the former prohably being on the ea-tern, and the latter on the western height, upon which the modern village is chiefly situated. Immerliately below the city was a port-town named Nisued (Nloaia and Niraia), the port being formed ly an islund called Minoa (Mááa). The city was connected with its port-town by Long Walls

## II. History.

There were two traditions respecting the early history of Megara. According to the Mlegarians, the town owed its origin to Car, the sun of Plormeos, who built the citadel called Caria and the templea of Demeter called Megara, from which the place derived its naue. (Paus. i. 39. § 5, i, 40. § 6.) Twelve generations afterwards Lelex came from Egypt and gave the inhabitants the name of Leleges, whence we read in Urid (Met. vii. 443):

## "Tutus ad Alcathoen, Lelegeia moenia, limes Compusito Scirone patet."

Lelex was succeeded by his son Cleson, the latter by his son Pylas, whose son Sciron married the daughter of Pandion, king of Athens. But Nisus, the son of Pandion, disputing with Sciron the possession of Megara, Aeacus, who had been called in as arbiter, assigned the kingdom to Nisus and his posterity, and to Sciron the command in war. Nisus was succeeded by Megareus, the son of Poseidon, who had married Iphinoë, the daughter of Nisus; and Megareus was folluwed by his son Alcathons, who built the other citadel named afier him. Such was the account of the Megurians, who purposely suppressed the story of the captave of their city by Minos dasing the reign of Nisus. (Paus. i. 39. §§ 5, 6, i. 41. §5.)

The other tradition, which was preserved by the Boeotians and adopted by the rest of Greece, differs widely from the preceding one. In the reign of Pylas, Pandion being expelled from Athens by the Metionidac, fled to Megara, married the daughter of Pylas, and succeeded his father-in-law in the kingdom. (Paus. i. 39. § 4; Apollod, iii. 15.) The Metionidae were in their turn driven out of Athens; and when the dominions of Pandion were divided aroong his four sons, Nisus, the youngest, obtained Megaris. The city was called after him Nisa (Níva), and the same name was given to the port-town which be built. When Minos attacked Nisus, Megareus, son of Poseidon, came from Onchestus in Bueotia to a-sist the latter, and was buried in the city, which was called after him Megara. The name of Nisa, subsequently Nisaea, was henceforth confined to the port-town. (Paus. i. $39 . \S \S 4,6$.) But even the inhabitants of M1-gata we.e sometimes called Nisuei, to distinguish them from the Megarians of Sicily, their colonists (Thener. $I d$ xii. 27.) Through the treachery of his danghter Scylla, Nisus perished, and Minos obtained passession of the city, and demolished its walls. They were subsequently restored by Alcathons, son of Pelops, who came from Elis. In this work he was assisted hy Apollo. (Paus, i. 41. § 6 ; Theogn. 771 ; Ov, Met. viii. 14.) It was further related, that Hyperion, the son of Agamemon, was the lant king of Megara, and that atter his death a detwo ra-
tical torm of government was eshblisidel. (Pans i. 43. § 3.)

Into the ralue of those traditions it would be useless to imquire. It may, however, be regarded as certain, that Megara and its territory wore in early times regarted as part of Attica: and hence Strabo accounts for the omissiom of their names in the Iliad, becaume they were comprehended alones with the Athenians under the general name of Jonians. (Strab, ix. p. 392.) The most certain event in the history of Nagara is its conquest by the Dorians. This event is connerted in tradition with the experlition of the Peloponnesians agaiust Athens. The Dorian insaders were defeated by the voluntary sacritice of Codrus; but Mugaris was notwithstanding permanently empuered, and a Corinthian and Messenian colony fonnded at Megara. The pillar at the isthunus of Corinth, whieh had hitherto markes the bumblaries of Jonia and Peloponnesus, was now removed; and Megara was henceforth a Dorian state, and its territory included in Peloponnesus. (Strab. ix. p. 393 ; Scyma Cli. 502.) Megara, however, continued for some time to be subject to Corinth, and it was not without frequent struggles and wars that it at length establoshed its independence. (For auth rities, see Miiller, Dorians, i. 5. § 10.) Megara appears not to have become the ruling city in the district till it was indepundent of Corinth, since in earlier times it had been only one of the five hamlets ( $\kappa \tilde{\omega} \mu \alpha 1$ ), into which the country was divided, nomely, the Heraems, Piraeans, Megarians, Cynusurians and Tripodiseazans. (Plut. Quaest. Grace. e. 17, p. 387.)

After Mesara had beenme an independent city, its prosperity rapidly inereased, and in the seventh century befure the fluristian era it was one of the most flourishing commercial cities of (ircece. For this it was chiefly indebted to its aduirable situation, which gave its inhabitants great facilities for the prosecution of eommeree both by land and sea. All the ruads from Northern Givece to Pelopmnesus passed through their country, while their shores being washed by the Cominthian and Saronic gulfs, enabled them to trade both with the West and Fast.

Megara founded some of the earlier Grecian colonies, both in sicily and Thrace. In B. C. 728 it established Negara Hyblaea in Sicily, in 712 Astacus in Bitlyynia, in 67.5 Cyzieus in the I'ropontir, in the following year Chalnedon at the mouth of the Boppurus, and in 657 Byzantium opposite Chaluedoh. About this time, or rather later, Comedy is said to have been invented by the Megarians. Aceording to the common account, Susarion, a native of Tripodisens in Alogaris, introdheed comedy into Altica. (Dict. of Biongr. art. Susamons.) But, with the increate of wealth, the lower orders attempted to obtain a share in the govermment, which had hitherto been exclusively in the bands of the Donian conguerors ; and Theagenes, the father-in-law of Cylom, became tyrant or despot of Merara, by attachme the rich landed proprictors and iulvacating the claims of the poor. (Aristot. Whet. i. 2. I'ofit, v. 4.) He embellished the city by the construction uf a beautiful aqueduct, which continued to exist duwn to the time of Pausanias (i. 40. §ु I). Theatenes ruled about r. C. 630600) , but he was subsequently driven from power, and Megara was for some time torn asunder by struggles butween the aristocracy and democracy. The elegiac poet Theognis, who helonged to the aristucrayy, deplores the sufferings of his party, and
complaius that the poor no longer pide the interest of their debts, and that they plundered the boust : of the rich and even the temples.

About the same time the Megarians were engaged in frequent contests with their neighbours in Altica. The chief struggle between them was for the island of Salamis, which was at length gained by the Athenians in consequence of the well-known stratagen of Sulon. (I'aus, i. 40. §5; Strab, ix. p. 394.) The Megarians tonk their share in the I'ersian wars. They fought with 20 ships at the battles of Artenisium and Salamis. (IIerod, viii. 1, 45.) Tbey repulsed a body of Persians whom Mardonins sent to ravage their territory (Paus, i. 40. § 2), and finally 3000 of their troops fought at the battle of Plataea. (Herod. ix. 28.)

After the Persim War the Megarians were inrolved in hostilities with the Coriuthians respecting the boundaries of their territories. This led the Mesarians to desert the Peloponnesian alliance, and unite themselves with the Athenians, B. c 455. In order to secure their communication with Negara, the Athenians built two Long Walls connecting the city with Nisaea; and they garrisoned at the same time the town of J'egae, on the Corinthian gulf. (Thuc. i. 103.) But ten years afterwards the Diegarians revolted from Athens, and having cbtained the assistance of some I'eloponnesian troops, they slew the Athenian garrison, with the exception of those who escaped into Nisapa. They eontinued to hold Nisaea and Pegae, but they also surrendered these toross in the thirty years' truce made in the same year ( 445 ) with Sparta aud her allies. (Thue. i. 114, 115.) The Athomians thus lost all authority over Mlegaris; but they were so exasperated with the Megariuns, that they passed a decree exeluding them from their markets and ports. This decree pressed very hard upon the Dlegarians, whose unpruductive soil was not sufficient to support the population, and who obtained most of their supplies from Attica: it was une of the reasons urged by the Peloponnesians for declaring war against Athens. (Thuc. i. 67,139 ; Aristopl. Acharn. 533.)

In the Peloponnesian Wir the Megarians suffered greatly. In the first year of the war the Athenians invaled Megaris with a very large force, and laid waste the whole territory up to the city walls. At the same time the Athenian fleet blockaded the larbour of Nisaea, so that Mezara was in the sitnation of a besieged city eut off from all its supplies. This invasion was repeated by the Athenians once in every year, and sometimes even twice; and the sufferings which the people then endured were rememhered by them many centuries afterwards, and were assigned to Pausanias as the reason why one of their works of art had not been finished. (Thuc. ii. 31 ; Ilut. Per. 30 ; I'ans. i. 40. § 4.) In the fifth year of the Peloponnesian War (B. c. 427), the Athemiaus under Nicias took possession of the island of Mlinoa, which lay in front of Nisaea, and Jeft a garrison there, by which means the port of Nisaea was still more effectively biockaded. (Thuc. iii. 5I.) Of the position of this island, and of the canseway connecting it with the mainland, we shall speak presently. In the eighth year of the Peloponnesian Wir (1s.c. 424), the democratical party in Alegara fearing the return of the aristocratical cxiles, who were at Pegae, entered into regotiations with the Atheniass to surrender their city to them. The Athenians still held Minoa; and the Long Walls and Nisaea were oceupied by an Athenian garrisun. Tho Atheniaus
were admitted within the Long Walls by their friends in Megara, and after a siege of two days they touk Nisaea.* Megara was sared by Brasidas, who advanced to the relief of the city with a large Peloponnesian force, and, after offering battle to the Athenians, which they declined, was admitted within the city. The aristocratical exiles were now recalled, and a strict and exclusive oligarchy estahlished, which lasted for some time. (Thuc. iv. 66 -it.) A few months afterwards the Megarians captured the Long Walls from the Athenians and levelled tbem to the ground; but the Atbenians still continued to hold Nisaea and Minoa. (Thuc. iv. 109.) In the truce concluded between the Athenians and Peloponmesians in the following year, it was settled that the line of demarcation between the Athenians in Nisaea and Minos, on one side, and the Megarians and their allies in Megara, on the other, should be the road leading from the gate of Nisaca near the monnment of Nisus to the Poseidonium or temple of Poseidon, and from the latter in a straight line to the causeway leading to Minoa. (Thuc, iv. 117.)

From this time Megara is seldom mentioned in Grecian history. Its prosperons condition at a later period is cxtolled by lsocrates, who says that it possessed the largest bouses of any city in Greece, and that it remained at peace, though placed between the Peloponnesians, Thebans, and Athenians. (1socr. de Pac. p, 183, ed. Steph.) Megara surrendered to Philip after the battle of Chaeroneia. (Aclian, V. $H$. vi. 1.) After the death of Alexander it was for some time in the power of Cassander ; but his garrison was expelled hy Demetrius Poliorcetes, who proclaimed the freedom of the city n. C. 307. (Diod. xx. 46 ; Plut. Demetr. 9.) Subsequently it again passed into the hands of the Macedonian kings, but it was united by Aratos to the Achaean Leagne. (Pulyb. ii. 43.) In the war between the Achaean League and the Romans, Megara surrendered to Netellns without a contest. (Pans. vii. 15. § 11.) It is mentioned by Sulpicius, in his well-known letter to Cicero (ad Fam. iv. 5), 2s one of the ruined cities of Greece. It still existed in the time of Strabo (ix. p. 393), and it was subsequently made a Roman colony. (Plin. iv. 7. s. 11.) Pausanias relates that it was the only city of Greece which IIdrian refused to assist, on acconnt of the murder by its inhabitants of Anthemocritus, the Athenian herald (Paus. i. 36. § 3) ; bnt we learn from inscriptions that a new tribe at Megara was called Adrianis, in honour of the emperor, and that subina, the emperor's wife, was worshipped here under the title of $\nu \dot{\varepsilon} \alpha \Delta \eta \mu$ íт $\eta \rho$ (Böckh, Inscr. vol. i. p. 566); and even Pansanias himself describes a temple of Apollo of white marble, built by Hadrian (i. 42 . §5). It continned to coin money under the Antonines and subseqnent emperors; and it appears in the Tabula Peuting. as a considerable place. In the fifth century its fortifications were repaired by Dingenes, an officer of the emperor Anastasins (Chandler, Inser. Ant. 130); but from this time it appears to have rapidly sunk, and was frequently plandered by the pirates of the Mediterranean.

Megara was celebrated on account of its philosophical school, which was founded there by Eu-

[^13]cleides, a disciple of Socrates, and which distinguished itself chiefly by the cultivation of dialectics. The philosophers of this school were called tbe Megarici (oi Meरapokol, Strab, ix. 393). It was also less creditably distinguished for its courtezans, who were called Megarian sphinzes. (Merapuкal $\mathbf{\Sigma} \phi i \gamma \gamma \epsilon s$, Suid. s. v. ; comp. Plant. Pers. i. 3. 57.) The Megarians were addicted to the pleasures of the table. (Tertull. Apolog. 39.) They had a bad character throbghont. Greece, and were regarded as fraudulent, perfidious, and ignorant; bnt they may have owed much of this bad character to the representations of their enemies, the Athenians. (Aelian, I. H. xii. 56; Schol. ad Aristoph. Pac.
 temptible people.) Of the Megarian games and festivals we have three kinds mentioned; the Ibioclean, celebrated in honour of the hero Diseles (Schol. ad Theocr. xii. 28 ; Schol. ad Pind. Ol. xiii. 155; Schol. ad Aristoph. Achorn. 774), the Alcathoan, celebrated in honowr of Alcathons, and the Smaller Pythian, in honour of the Pythian Apollo, whose worship was very ancient in Megara. (Philostr. Vit. Soph. i. 3; Schol. ad Pind. Nem. v. 84, Ol. xiii. 155: Krause, Die Pythien, Nemeen und Isthmien, p. 66.)

Dion Chrysostom (Orat. vi.) says that Megara is one day's journey from Athens, and Procopius (Bell. l'and. i. 1) makes it 210 stadia. According to modern travellers the journey takes 8 hours. (Dodwell, Classical Tour, vol. ii. p. 177.)

## III. Topography of the City and its Port-town.

Pansanias has giten a particnlar description of the pablic buildings of Megara (Paus. i. 40 , seq.). He begins his acconnt with the aquednct of Theagenes, which was supplied with water from the fonntain of the nymphs called Sithnides. Tbe aqueduct was remarkable for its magnitude and numerons columns. Near it was an ancient temple, containing a statue of Artemis Soteira, statues of the twelre gods said to he by Praxiteles, and images of the Roman emperors. Beyond, in the Olympieinm, or inclosure of Zeus Olympins, was a magnificent temple, containing a statue of the god, which was never finished, owing to the distress occasioned by the Atbenians in the Peloponnesian War. From thence Pausanias ascended to the citadel, named Caria, passing by a temple of Dionysus Nyctelius, a sanctuary of Aphrodite Apostrophia, an oracle of Night, and a roofless temple of Zeus Cronins. Here, also, was the Megarum, or temple of Demeter, said to have been founded by Car during his reign.

Below the northern side of the Acropolis Caria was the tomb of Alcmena near the Olympieinm. Hence Pausanins was conducted by his Megarian guide to a place called Rnus (Poús; comp. Flnt. Thes. 27), because the waters from the neighbouring mountains were collected bere, until they were turned off by Theagenes, who erected on the spot an altar to Achelous. It was probably this water which supplied the fountain of the Sithnides. Near this place was the monument of Hyllas; and not far from the latter were temples of Isis, Apollo Agraeus, and Artemis Agrotera, which was said to have lieen dedicated by Alcathons after be bad slain the Cithacronian lion. Below these were the beroum of Pandion, and the monuments of Hippolyte, queen of the Amazons, and Tereus, who married l'rocne.

On the ascent to the citadel Alcathoe, Pausanias saw, on the right hand, the sepolche of Megarelas, nod near it the hearth of the gods called l'rodomes, to whom Alcathous sacrificed when he was going to build the walls. Here was the stone mon which Apollo laid lis lyre, when he was assisting Alcathons, and which, on being struck, returned a somed like that of a harp. (Comp. Theogn. 771: Ov. Met. viii. 14.) Beyond was the council-house (Bou入eutúpoov) of the Megari:ns, formerly the sepulchere of Timalcus ; and on the summit of the Acrupolis was a temple of Athena, containing a statue of the goddess, entirely gilied, with the exception of the face, hands, and fect, which were of ivory. Here, also, were temples of Athena Nice, or Victory, and Apantis. The temple of Apollo was originally of brick, but had been rebuilt of white marble by Hadrian. Here, also, was a temple of Demeter Thesmophorus, in descending from which occurred the tomb of Callipolis, daughter of Alcathous.

On the road leading to the Prytaneium the traveller passed the heroum of Ino, the heronm of Iphigeneia, and a temple of Artemis said to have been erected by Agamemnon. In the Prgtaneium were tumbs of Menippus, son of Megarens, and Echepolis, son of Alcatbous ; near which was a stone called Anaclethra, because bere Demeter sat down and called her daughter. Pansunias next mentions the sepulchres of those Megarians who had fallen in battle against the Persians, and the Aesymninm, so named from its founder, which contained a monument of the heroes of Megara. There were several sepulchral momments on the way from the Aesyinnium to the beroum of Alcathons. in which the public secords were preserved in the time of Pausanias. Beyond was the Dionysium or temple of Dionysus ; close to which was the temple of Aphrodite, containing several statues by Praxiteles. Near the latter was a temple of Fortune, with an image of the goddess by Praxiteles. A neighbunring temple contained statues of the Muses, and a Jupiter in brass, by Lysippus.

In the Agoras stoud the tombs of Corochns and of the athlete Orsippus, the former of which was ornamented by some of the most ancient specimens of sculyture which Pausanias had seen in Greece. On descending from the Agora by the street called Straight, there stood, a little to the right, the temple of Aprollo Prostaterius, with a statue of the god of great merit, as well as other statnes by Praxiteles. In the ancient gymnasinm, near the gates called Nymphades, was a pyramidal stone, called by the natives Apollo Carinus, and a temple of the Eileithyiae.

On the road to the port of Nisaea was a temple of Immeter Malophorus. The Aeropolis of Nisaea still remained; on descending from the Acropolis there was the tomb of Lelex on the sca-side. Near Nisuea was a small island, calleal Minoa, where the fleet of the Cretans was monred during the war against Xisus.
Megara still retains its ancient name, but it is a miserable place. It oceupies only the western of the two ancient citadels, and as this was probably Alcathene, the town on the summit is on the site of the temple of Athena. There are havilly any remains of antiquity at Mugara. On the eastem acrupolis there are a few remains of the ancient walls. None of the numerous tomples mentioned by Pansanias can be identified; and only one of them is marked by the frusta of some lunic columns. The magnificent aqueduct of Theazenes has diappewed; and some imperfect foundations and a large fountain on the
awthern side of the town are the anly remains of the welebrated fountain of the sithnide nymphs.

Of the Long Wails, miting Megara with Nisaea, we have already spoken. They are noticed ly A ristophanes under the name of tà Mevapukà owè $\eta$ ( $I_{-y s i s t r}$. 11:2). They were destroyed by the Megarians themselves, as we have already seen, in the eighth year of the Peloponnesian War, but they were subsequently restored by Phocion. Strabo speaks of them is if they still existed in his time (ix. p. 391), but they would seem to have fallen to ruin before that of Pausanias, as he makes no mention of them. According to Thucydides (v. 66) they were 8 stadia in length, but according to Strabo (l. c.) is stadia.

The position of Nisaca and Mlinoa has given rise to much dispute, as the localities described by Thucydides do not agree with the present features of the coast. The subject has been briefly discussed by Colonel Leake (Northern Grcece, vol. ii. p. 401), and more fully by Dr. Arnold (Thuegd. vol. ii p. 393) and Lient. Spratt. (Lomlon Geographical Juurnal, vol. viii. p. 205.) Thacydides represents Minoa as an island close to Nisaen, and united to the latter by a bridge orer a morass. On Minoa the Megarians had built a fortress (Thuc, iii. 51). Strabo (ix. p. 39) calls Minoa a promontory (Kкра). He says that, " after the Scironian rocks, we come to the promontory Minon, forming the harbour of Nisaea." Pausanias (i. 44. \&' 3), however, ayrees with Thucydides in calling it an island; but it may be observed that the expression of Strabo (Kкpa) is not inconsistent with its being an island, as stated by Thucydides and Pausanias. The difficulty in deternining the site of Minoa and Nisaca aries from the fact, that there is at present no island off the coast which can be identified with Minoa. At the distance of nearly a $\mathrm{m} l \mathrm{le}$ and a half from Negara there is a small rocky peninsula, and further off two islands, the inner one of which affords shelter to a few of the small class of coasters. Hence it has been supposed that the inner island Was Minoa, as it forms the port of the Megarians of the present day. But this jsland is distant from the promontory about 200 yards, with 7 fathoms of water between them; consequently they could never have been connected by a bridge. It rnight, indeed, be argued, that the peninsula was once an island; but this is disproved by the fact that its isthmus is of equal height with its extremity. Moreover, there are no nncient remains, either on this island or the yenimsula.

Other writers, among whom are Colonel Leake and Dr. Arnold, suppose the promontory of Tikho (see map, No. 6), fnither to the east, at the entrance of the strait of Salamis, to have been Minoa, since it may at one time lave been an island. Accordingly, the statement of strabo respecting the length of the Lang Walls, is preferred to that of Thncydides. But ths promontory is nearly 3 miles in length, which is l:arger than is impled in the description of Thucydides (iii. 51), who speaks of it as furtified only by a single fort. Moreover, Pausanias calls Minoa a small inland. Licutenant Spratt has oflered a more probable solution of the difficulty. He supposes Minoa to bo a rocky hill, surmounted by a ruined fortress, and standing on the margin of the sea south of Megara, at the distance of little more than a geographic mile, thns agrecing with the 8 stadia of Thneydides. "That this hill was once a perimatha, appectis crident from the dry heds of two rivers, which jass close to its base ; one on each side. The casten
bed winds round the back of the hill, leaving only a narrow neck of elevated ground between it and that on the west side: and it is, therefore, clear, that when these two rivers had communication with the sea, the intermediate neck of land, with this hill, would have been a peninsula, or promontory. These two river heds were once the only outlets of the mountain streams which issue from the valleys on the north side of Mont Geraneia ; for the ancient course of the eastern bed, although now ploughed over and cultivated, can be traced through the jhain to the northward, as far as its junction with that river, whose torrent at present flows in an easterly direction towards the shallow bay of Tikho, crossing the site of the Long Walls which connected Mrgara with Nisaea and Minca, and losing themselves in the swamps hordering that bay. Although vestiges of the walls are not found in the bed of the
river, yet, on examining the ground near it, the evidence is convincing that its present course does cross their site, as, at a short distance from it, on the Megarian side, their foundations may be traced in a direction transverse to the course of the river, and towards the castellated lill before mentioned. The dry watercourse on the western side of this isolated hill can be traced to within two or three hundred yards of the eastern one; and having no communication with any other mountain stream, it may not be unreasonable to suppose that formerly the river split there into two branches or mouths. This hill would then have been an island, as Thucydides calls Minoa." The sulseqquent deposit of earth brought down by the above mentioned stream, would have joined the hill to the mainland.

The accompanying map and drawing are taken from Lient. Spratt's.

columns erect, and wanting apparently only the fourth to complete the original number. Probably they were monuments or temples ; and two Greek churches, which are now in ruins, but standing on twe anclent foundations, will not be unfavourable to the supposition. Another church, Agies Nikolans, whicb is perfect, also occupies the site of an ancient building, but it stands nearer to the sea." Lieut.

If this hill is the site of Minoa, the torn of Nisaea must have been near it ; and Lieut. Spratt discosered many vestiges of an ancient site on the castern side of the hill, between the sea and a low rock which stands in the plain a short distance to the northward. "Among these remains are four bnall heaps of ruins, with massive foundations, in oue of which there are three broken shafts of small

Spratt further supposes that he has discovered remains of the ancient causeway. "Between the lase of the hill on its morth side, and the opposite hank of the dry bed of a former river, there are thiree platforms of heavy buildings, one of which lies inmediatcly at the foot of the hill, another on the elge of the opposite bank, and the third nearly contral ; and as the course of that former river-bed clearly and indispmtably passes between them, it is more than probable that the bridge of communication may be recorguisell in these ruins." He also says, "that distinct remwins of an ancient mole are to be seen extending from the sonth-eastern end of the hill, and curviny to the eastward, so as to have formed a harbour betreen the hill and those ruins," which is in accordance with the statement of Strabo, that the port of Nisaea was formed by the promantury of Minos.

## IV. Termitory of Meg.ara.

Megaris nccupied the greater part of the larre Inthmus, which estends from the foot of Nt. Cithaeron to the Acrocorinthus, and which connects Nirthert Greece with the Pelopamesis. The southern part of this Isthnus, inclading the lsthmus properly so called, belonged to Corinth; but the boundaries of Megaris and Corinth differed at an earlier and a later periud. Originally Megaris extended as far as Crommyon on the sarmic, and Thernae ot the C'rinthian, gulfs, and a pillar was set up near the lsthunus proper, marking the boundaries between Peloponuesus and lonia; but subsequently this pillar was removed, and the territory of Corinth reached as far as the scironian rocks and the other passes of the (ierancian mumtains. (Strah. is. pp. 392, 393.) Tomards th. N., Megaris was separatel fivm Boeotia lig Mt. Cithaaron, and towards the E. and NE. from Attica by sume high land, which terminates on the west side of the bay of Eleusis in two sumumits. formerly called Kerata or Tae Honixs ( fà Kipata), and now Kandahli. (Strab. is. p. 395; Dind. xiii. 65; Plut. Them. 13.) Here there is an immense depusit of conchiferous limestone, which Paut sanias aloo noticed (i. 44. § 6). The river 1.1pis, which flowed into the sea a little to the $W$. of the Horns, was the boundary of Megaris and Attica. [Atrics, p. 323, a.] The extreme breadth of Neraris from Pagae to Nisaca is estimated by Stribn (viii. p. 334) at 120 stadia; and, according to the cal-ulation of Clinton, the area of the country is 143 square miles.

Hegaris is a rnegred and mountainons country, and contains no plain, except the one in which its capital. Mlerara, was situated. This plain was called the "White Plain" (rò $\Lambda \in u k \dot{\partial} \nu ~ \pi e \overline{\delta i a v, ~ S c h o l . ~ a l ~}$ Ilom. Od. r. 333, cal. Mai; Etymol. N. s. n. Aev$\kappa \delta \theta \in a$ ), and is the same as Ctmorsa (Kiuc)ia, Diond. si. 79), which prolnced the Creta Cimelia or fullers' earth, and which Leake erroneunly regards as a place (Northern (iremer, vol. ii. p. 413). The main rance of Mt. (ithacron runs from Wi. tn E. forming the brulary between Boentia and Attica; but it in also prolunged sonthwards along the shores of the Conothian sulf, aud gradually rises into a now chain, which stretches acrass Megaris from IV. (1) E., parallet to Mt. Cithacron. This chain i hishest on the wentern side, where it attains the height of 4217 feet (Paris), and gradually sinks down on the eatern side towards the saronic gulf. $O_{n}$ its wentern side it rurs out into the promontory Abghlaserts (Aivithayktos, Acsch. Agum.

303, nith Schol.), and also into those of Olmase and Ileraevas in the Corinthian territory, [Counvirus, p. 685.] On its eatern side the island of Salamis and the surrounding rocks are only a contimuation of this chain. The mountains were called Geraxela in antiquity ( $\Gamma$ epave:a, Thac. i. 105; Fans. i. 40. § 7), and are said to have reccived this name because, in the deluge of Dencalion, Megarus, the son of Zeus and a Sithonian nymph, was led by the cries of cranes (ripavot) to take refuge upon their summit. (Pans, l. e.) Towards the south the Geraneian monntains sink down into the plain of the 1sthruns, while to the sonth of the 1sthmus there rises another chain of mountains called the Oneian. Strabo (viii. p. 380) confounds the Geraneia with the Oneia; and erronennsly represents the latter extending as far as Boeotia and Cithaeron. His error has inisled many modern writers, who, in consequence, sppak of the Geraneia as a portion of the Oneia. (Curtius, Peloponnesos, vol i. p. 25.)
The Gerancian mountains are almost, if not entirely, calcareons. They form the true boundary of Northern Greece, and rise above the 1sthmus of Corintll like a vast wall from sea to sea. Three roads lead across these monntains into Peloponnesus. One runs from the western coast of Megaris, acrows the rocky peninsula of Perakhora, the ancient Peiraeum of Corinth, down to the Corinthian gulf. It was the road by which annies frequently marched from Pelopomesus into Northern Greece, but in ordiliary intercourse was not much used on account of its length. The second road passes through the centre of the Geraneia, and is called the road of the great Derrenia from the narrow pass (Tark. Derecrii), which leads between two masses of rock, and where gnards were stationed in Turkisb times. Accorling to Gell the tup of this pass was anciently fortifiel with a wall. The same writer says that, from the top of this pass to Corinth the distance is \& hours 37 minutes, and to Megara 2 hours 33 minutes. This road is now little usel. The third road, which leads along the eastern const of Megsanis, is the shortest way between Megara and Corinth, and therefore has been the chief line of communication between Peloponnesus and Northern Grece from the earliest times to the present day. This road, soon after leaving Megara, runs for several miles along a narrow ledge or terrace, cut in the rock half-way up the siles of the cliffs. On his right hand the traveller has the precipitons rock, while on his left it descends perpendicularly to tho sea, which is 600 or 700 feet beneath him. The road, which is now narrow and impracticable for carriaces, was made wide enongh by the emperor IIadrian for two carriages to pass abreast. From the hispher level the rad descends to the brink of the water by a mast ruyged and precipitons path cut between walls of rock. This pass is the celchrated Scironian rukks of autiquity, now called Kake-skala, or bad ladder (Ai ミкєipuviōes mitpac, sitrah. ix. p. 391;
 Skelpayos iккal, Var. Hippol. 1208; the road
 saxa, Plin, iv. 7. s. 11). According to a Megarian tradititut, these rocks derived their name from Scirom, a pultmarch of the Megarinns, who mas the first to make a footpath along the rocks (Paus. i. 44. § 6 ); but, according to the more common traditinn, they were so called from the robber Sciron. Xicar the sonthern end of the pass, where the road
begins to descend，we must place the Molurian rock （ $\bar{y}$ Mãovpis），from which lno or Leacothea threw herself with her soa Melicertes（Palaemon）into the sen：and close by were the execrable rocks（ $\varepsilon v a \gamma \in \hat{i s}$ ）， from which Sciron nsed to throw strangers into the sea，and from which lie was himself hurled by The－ sens．（Pans．i．44．§ 7，seq．）The tortoise at the foot of the rock，wbich was said to devonr the rob－ bers，was probably a rock called by this name from its shape，and which gave rise to the tale（ $\kappa a \tau \alpha ̀ ~ \tau \eta े \nu ~$
 mit of the mountain was a temple of Zeus Aphesins． On descending into the plain was the temple of Apollo Latons，near which were the boundaries of Mlegaris and the Corinthia．（Pans．i．44．§s 9，10．） Megaris contained only one town of importance， Megara，with its barbour Nisaea，which bave been already described．The other towns in the country were Aggostiena and Pegae（Doric Pagae），on the Alcyonian or Corinthian gulf；Tri－ rodisces and Rhus，in the interior；Phibalis，on the contines of Attica（Schol．ad Aristoph．Acharn． 802）；and Phalycos and Polichive，of which the site is uncertain．There was also a fortress， Geraneia，situated on one of the monntains of this name，but its position is also uncertain（Scylax， p．15；Plin．iv．7．s．11）；it is apparently the same place as the Erenela（＇Epéveia）of Pausanias（i． 44. § 5）．Scylax mentions a place Aris，but instead of
 tured that we onght to read П $\eta \gamma \alpha i$ reì $\chi o s, ~ \Gamma \in p a-$ $\nu \in i a$ akpis or akpa．Whether there was a place of the name of lsus in Megaris seems donbtful． ［Isus．］（Reinganum，Dos alte Megaris，Berlin， 1825；Dodwell，vol．ii．p．181，seq．；Leake，Northern Greece，vol．ii．p．388，seq．）

coln of megara．

## Meg．aris．［Megara．］

ME＇GARIS，a small island on the coast of Can－ pania，mentioned by Pliny（iii．6．s．12），who places it between Pansilypus and Neapolis；it can therefore be no other than the islet or rock now occupied by the Castel dell Oro．［Neaporis．］It is evidently the same which is callea by Statius Megalia．（Stat． Silv，ii．2．80．）
［E．H．B．］

## MLGGIDDO．［Legio；Magdolum．］

MEGIDDO VALLIS，the western part of the rast plain ef Esdraelon，at the northern foot of Mlount Carmel，watered by the Kishon．［Es． deaflon Vallis v．Campes．］［G．W．］

MEGISTE（Meүfot $)$ ，an island off the coast of Lycia，opposite to Antiphellus，It cuntained a town which，if the reading in Strabo（xiv．p．666）be correct，was called Cisthene（Kıoөn⿱亠䒑 ），but had perished before the time of Pling（ v .35 ）．There was also an excellent harbour，which appears to have beea capable of containing a whole fleet．（Liv xxxvii． 22 ；comp．Steph．B．s．$v$ ，who calls the town Megiste；Ptol．v．3．§9；Scylax，p．39．）The island， which derived its name from the fact that it is the largest of a group，is now called Kasteloryzo，or Castel Rosso．The island seems to have been colo－
nised by the Rhodians，or at least to have been in their possession，for inscriptions found there are composed in the Doric dialect．There are but few remains of ancient buildings．（Leake，Asin Minor， p．184：Fellows，Lycia，pp．187，\＆．c．）［L．S．］

MEGISTUS．［Macestus．］
MEIACARJRE（Amm．Marc．xviii．6， 10 ； Mä̈akaptpl，Theophyl．Sirnoc．i，13，ed．Bonn），a small place in Mesopotamia，mentioned by Ammianus and Theophylact．It appears to have been at no great distance from Amida．Ammianns states that it derived its name from certain cold springs which were there．（Cf．Bücking，Notit．Dignit．i．p． 418．）
［V．］
MEILICHUS．［Achaia，p．13，b．］
MELA or MELLA，a river of Gallia Transpa－ dana，still called the Mella，which rises in the Alps，flows tbrough the i＇al Trompia，anciently the residence of the Triompilini，enters the plain of Lombardy near Bixia，and falls into the Ollins （Oglio）more than 20 miles below that city．Ca－ tnllus speaks of it as flowing through the city of Brixia，but this is an inaceuracy or a pretical license，as it passes，in fact，abunt a mile to the W．of it．［Brixia．］Both he and Virgil describe it as a placid and winding stream．（Catull．Ixvii． 33；Virg．G．iv． 278 ；Philargyr．ad loc．）［E．H．B．］

MELAE．1．A town of the Samnites，mentiond d only by Livy（xxiv，20），among the towns of the Candine Samnites which were taken by Falins in ह．c．214．The same anthor elsewhere（xxvii．1） mentions a town of the Samnites which he calls Mefes，and which was not taken till b．c．210，by Marcellus．Nevertheless，it is probable that the same place is meant in both cases，but we have no clue to its position．

2．A town in the neighbourbood of Locri in Brat－ tium，mentioned by Thucydides（v．5），but other－ wise wholly unknown．［Locmi．］［E．H．B．］

MELAENA（Mé入alva）．1．A promontory of Ionia，forming the north－western point of the penin－ sula which is traversed by Mount Mimas．It was celebrated in ancient times for its quarries of mill－ stones．（Strab．xiv．p．645．）It is possible that this promontory，which is now called Kara－Burun （the Black Cape），may be the same as the one called by Pliny（v．31）Corynaeum Promontorium，from the town of Coryne，sitnated at the southern ex－ tremity of Mount Mlimas

2．A promontory of Bithynia，on the right hand on sailing throngh the Busporus into the Euxine， between the rivers Rheba and Artane．（Apollon． Rhod．ii．651；Orph．Argon．716；Arrian，Peripl． p．13；Marcian，p．69．）In the anonymons Periplus of the Euxine（p．2），it is called Ka入入ivakpov，and Ptolemy（ $\mathrm{v} .1 . \S 5$ ）calls it simply Biधvvias äкpov． Its modern name is Tshiti．

3．The north－western promontory of the island of Chios（Strab．xiv．p．645），now called Cape $S$ ． Nicolo．
［L．S．］
MELAENAE．［AtTICA，p．329，b．］
MELAENEAE or MELAENAE（Me入a！veai， Paus．；Menawai，Rhinn．ap．Steph．B．s．v．：Eth． Meגaiveús），a town of Arcadia，in the territory of Heraea，and on the road from Heraes to Negalopolis． It was distant 40 stadia from Buphagiom．Pan－ sanias says that it was founded by Melaeneus，the son of Lycaon，but that it was deserted in his time and overflowed with water．The ruins of Melsencae lie 4 or 5 miles eastward of Heraea，between the villages Kikora and Kakorcos，where are the re－
mains of a Roman bath，which bas also been a church，and is sometimes used as such，though it is said to be generally inundated，even in the dry season，which is in conformity with the account of l＇ansanias．The Peutinger Table specifies Melae－ reae as distant 1.2 miles from Olympia ；but it does not meation Heraea，though a much more important phace，and one which continued to exist long after Heraca：moreover，the distance of 12 miles applies to Heraes，and not to Mel．eneac．（Pans．viii． 26. § 8，comp．v．7．§ 1，viii．3．§ 3；Steph．B．s．ז．； Plin．is．6．s．10；Leake，Pelopommesiaca，p．231； Bublaye，Kickerches，g＇c．p． 159 ；Curtius，Pelopon－ mesnos，vol．i．p． 356 ．）

MELA＇MBlLX（MGAápSiov），a place in Pelas－ giotis in Thessaly，near Scotussa，is mentioned in connection with the movements of the armies before the battle of Cynosceplaalae．Leake places it near the sources of the Ouchestos，at a place called Deteruenf．（Polyh．xviii．3，6；Liv．xxsiii．6； Leake，Nonthern Greece，vol．iv．p．473．）

MELANCHLAENI（Me入arर入aîor），a nomad tribe，the natne of which first appears in Hecataeus （ap．Stcph，B．，Fr．154，cd．Klausen）．In the geo－ graplyy of Herodotus（iv．20，100－103，107）they are found occupying the districts E．of the Androphagi， and N．of the Rosal Scythians， 20 days＇journey from the Palus Macotis；over above them were likes and lands unknown to man．In has been con－ jectured that Herodotus may refer，through some hearsay statement，to the lakes Ladoga and Onega． There las been considerable discussion among geo－ graphers as to the position which should be assigned to this tribe ：it is of course impossible to fix this with any accuracy；but there would seem to be reason to place them as far N．as the sources of the Volga，or even further．（Schafarik，slav．Alt． vol．i．p．295．）Herodotus expressly says that they did not belong to the Scytl ian－Scolotic stock，al－ though their customs were the same．The name，the ＂Black－cloaks，＂like tbat of their cannibal neigh－ bours，the Anthropophagi，was applied to them by the Greeks，and was no corrupted form of any indi－ genous appellation．A people bearing this name is mentioned by Scylax of Caryanda（p．32）as a tribe of Pontus．Pomponius Mela（i．19．§ 4）and Pliny （vi，5）coincide with Scylas，who speaks of two rivers flowing through theic territory，the Meta－ somas（Merávapts）．prubably the same as the Thes－ sytits（ $\Theta$ éroupts，Ptol．v．9．$\$$ § 10， 30 ：Kamisiliar）， and the Aegrits（Aiyinios：Kentichli）．Diony－ sins Periege：es（r．309）places this people on the Burysthenes，and Ptalumy（v．9．§ 19）between the river Rha and the Hippici Muntes，in Asiatic Sar－ matia；but it would be a sreat error to found any observation concerning these ancient northern tribes upon either the Roman writers or Ptolemy，or to confuse the picture set before us by these geagra－ phers，and the more conrect delineations of Hew－ dotus．For the Mldanchlaeni of Amomanns（xxii． 8 ． § 31），vec $A=A \times 1$ ．
［ $\mathrm{B}, \mathrm{B}, \mathrm{J}$.
MHLANDH＇TAE（MEXavסĩaı），a people of Thrace． mentioned unly by Neuphun（．1acab，vii．2．\＆32）．

MELANGE1A．［Maxtinel．，p．264．b．］
MEI．A＇NIA（Meגavia），a plare on the coast of Cilicia，a little to the what of Cememberis，perhays on the site of the monem Kizlinan．（Strai），siv． p．6\％0．）From another pasage of Strabo（xvi． p．760），compared with Styphams B．（s，v，Mé－ Auvai），it would seem that the place was also called Neachse．
 or Meגavimatov），a small town on the coast of Lycia， on the western slope of Mount Phoenicus，aboat 30 stadia from Cape Hieron，and 60 stadia south of Gagae，of which Leake（Asia Minor，$\mu$ ． 185 ）belieres it to have been the port town．（Ilecat．Fragm．247； Steph．B．s．$v_{.}$，who erroneonsly calls it a river；Quint Smyrn．iin．232：S（adiusm，Mar．M．\＄\＄210，211．） Fellows（Discors in Lycia，p．212）found a few tombs cut ont of the cliffs of the neighbourhood．［L．S．］

MELANOGAlituli．［Gaftulia．］
MELA＇XTHIUS（Me入áv $\theta_{i} o s$ ），a small river on the north coast of Pontus，forming the boundary between Pontus Polemoniacus and Cappadocius，and flowing into the Euxine a little to the east of Cutyora． （Plin．H．N．vi．4：Arrian，Peripl．p．17；Anouym， Peripl．p．12；Tah．Peut．，where it is called Me－ lautus．）It is probably the same river as that now bearing the name of Melet Irmak：（Hamilton，Re－ searches，i．p．267．）
［L．S．］
MELANTIAS（Me入avtías），a village of Thrice， on the river Athyras，and on the road from Heraclein to Brzantium， 18 miles from the latter．（ $h t$ ．Ant． pp．138，230，323，332 ；Ammian．xxxi．11； Agath．v．p．158．）
［A．L．］
MELA＇NTII SCO＇PLLI（Me入ávтiot o котє入o！）， some rocks in the Aegaean sea，where Apollo ap－ peared to the Argonauts，probably lay between learia and Mlyconas．（Strab，xiv．p． 636 ；Apoll．Rhod． iv． 1707 ：N．yl． p 55 ：Hespch．s．v．；Apollod．i． 9. § 26 ；Stadiusm，§§ 252，270．）

MELAS（Mé入as），the name of several rivers，so calted from the dark colour of their water．

1．A small river of Arcadia or Achaia，deseribed by Dianysius as fluring from Mount Erymadturs． （Diony：．Per．416：Callim．in Joc，23．）Strabo （viii．p．386）confounds it with the Peirus or Pienns in Achaia；but the reading is probably corrupt． ［Achata，p．14，a．］

2．A river of Boentia．［Boeotia，p． 413 ，a．］
3．A river of Malis，which in the time of Herudo－ tus flowed into the Maliac gulf，at the distance of 5 stadia from Trachis．It is now called the Macra－ Niria，and falls into the Spercheius，after uniting its maters with the Gurgo（Dyras），which also used to flow in ancient times into the Maliac gulf（Herod． rii．198；Strab．ix．p．428；Liv．xxxvi．22；Leake， Northern Greece，vol．ii．p．26．）

4．A river of Phthiotis in Thessaly，and a tribn－ tary of the Apidanus．（Lucan，vi． $3 \stackrel{7}{\mathbf{4}}$ ；Vib．Sequ． de Flum．s．r．Apidanos；Leake，Northern Greece， vol．iv．p．515．）

5．A river of Thrace，now called Saluattio or Scheher－Su，falling into a deep bay of the same mame（Mí入as кס人тos），which is bounded on the east by the shore of the Thracian Chersonesus．The modern name of the lasy is the gulf of Saros． （Herocl，vi．41，vii．58，198：Strab．vii．p． 331 ； Liv，xxxiii．40；Ptolem．iii．11．§§ 1，2；Mela，ii．2； Jlin．iv．11．s．18．）

MELAS（Métas）．1．A small river of Carpa－ dercia，which had its sourecs on Monnt Argaens （Ptol，v．6．§8），and flowed in a north－western direction past the town of Mazaca，frequently orer－ flowing 1ts hanks and forming marshes．（Strah，sii． p． 538.8 c ．）It emptied itself into the river Halys， oppasite the town of Siva．Strabo（l．c．）erroneously descriles the Melas as a tributary of the Euphrates， as has been shown by Hamilton in the Journal of the Geng：Sority，wol，viii．p． 149 （comp．his Re－ Hewpho isysiby，（x4）．The river still bears a
name answering to the ancient Melas, Kara-Su, that is, the Black River.
2. A navigable river in Pamphylia, flowing in a southern direction from Mount Taurus towards the sea, into whicb it emptied itself 50 stadia to the east of Side. (Plin. v. 22; Strab. xiv. p. 667 ; Paus. viii. 28. §2; Mela, i. 14; Zusim. v. 16, vi. 3; Stadiasm, tJar. Magn. $\$ \$ 193,194$.) Its modern name is Menaryat-Su. (Leake, Asia Minor, p. 196.)
3. A small river in Pontus P'olemoniacus, in the country of the Macrones. (Plin. vi. 4.) [L. S.] MIELAS SinUs. [Melas, No. 5.]
MELLDI (Mé $\bar{\delta} \alpha a$, Ittol. ii. 8. § 15), a people of Gallia Celtica or Lugdunensis in Ptolemy's time, whose chief place was fatinum; but the position which Ptolemy a-signs to the Meldae and to Iatinum is very incorrect, if the Meldi are properly placed as neighbours of the Parisii and on the Matrona (Marne). Strabo is not clearer. He says (iv. p. 194:"On both sides of the Sequana there are the Parisii, who possess an island in the river and a city Lutecia, and Meldae, and Lexovii, along the Ocean these ;" by which be perhaps means only the Lesovii, but he might mean to say that the Meldae were on the Ocean. Pliny (iv. 18) mentions in Lugdunensis Gallia "Meldi Liberi, Parisii, Trecasses." From all this we may inter that the Meldi were near the Parisii ; but we only obtain a certain result as to their position from that of latinum [Iatinum] and other evidence. Gregory of Tours speaks of the "Comitatus Meldensis;" the "territorium Meldionm" is mentioned in the Gesta of Dagohert I.; and in the Capitularies of Charlemagne the "Melcianus Pagus" is placed between the "Parisiacus" and "Miludensis," or the Pagus of Melodumon ( $\mathrm{M}_{\mathrm{C}}$ lun), and as the Melcianus occupies the space between the two other Pagi, it must comprise the diocese of Mecurs. Thus we obtain with certainty the position of the Meldi. (D'Anville, Notice, fec.)

Caesar (B. G. v. 5) mentions the Meldi once; and the passage has caused great difficulty. The name Meldi in Caesar's text is not certain. The MSS, have Medi, Melui, Hedui, Meldi, and Belgae. Caesar, intending to invade Britannia a second time, ordered the legati who were set over his legions to get ships built in the winter of B. c. 55-54. All his legions were in the country of the Belgae during tbis winter (B.G. iv. 38); and it seems a proper inference that all these ships were built in the country of the Belgae. When Caesar in the spring of B.c. 54 came to the Portus Itius, be found all the ships there except sixty which were built "in Meldis." These ships being driven back by bad weather, had returned to the place from which they sailed. The wind which brought the other ships to the Portus Itius, which ships must have come from the south, would not suit ships that came from the north and east; and hence D'Anville justly concluded that these Meldi, whatever may be the true name, must have been north and east of Itins. A resemblance of words led him to find the name of the Meldi in a place which he calls Meldfelt near Bruges. The true name of the place is Maldeghem. There is a place on the Schelde about a league from Ondenterde, named Melden, which under the Empire was a Roman station (Recueil d'A Antiquités, ge. trouvees duns la Flandre, par M. J. de Bast). This is certainly not very conclusive evidence for fixing the site of the Meldi; it that is the right name. "Belgae" cannot be the true reading, because all the ships were built in the territory of the Belgac; and

Caesar's remark about the sixty would have no meaning, if he spoke of them as built "in Belgis."

If we cannot fix the site of these Meldi, we can see that they are not the perple on the Marne. Caesar could have no reason for building vessels so far up the river. If he did build any on the Seine, he built them lower down. But it is clear that Caesar does not mean any ressels built on the Seine, for he says that these sisty were driven back to the place from which they came; a remark which, if applied to ships built on the Seine, is without any meaning. Ukert (Gallien, p. 325) has made some objection to D'Anville's position of the Meldi, and his objections may have some weight; but his notion that Caesar's Meldi can be the Meldi on tho Marne shows that be did not understand Caesar's text.
[G. L.]
MELDIA (Meגסta), a town of Muesia Superior, on the road from Naissus to Sardica. (It. Ant. p. 135 ; It. Hieros. p. 566.)
$\left[\begin{array}{ll}\mathrm{A} & \mathrm{L} .\end{array}\right]$
MELES (Méגns), a small river of Ionia, flowing close by the walls of Sinyrna, and discbarging its waters into the Hermaean gulf. (Strab. xii. p. 554, xiv. p. 646.) The little stream derives its celebrity from its connection with the legends about Homer, and from a repurt about the healing powers of its waters. There was a tradition that near the sources of the river Meles there was a cave in which Homer had composed his epic pnems, whence he is sometimes called Meג $\eta \sigma t \gamma \in \nu$ и́s. (Paus. vii. 5 . § 6 ; Vit. Hom. 2 ; Stat. Silv. iii. 3. 60, 7. 33 ; Tibull. iv. 1.200.) The belief in the healing power of its waters is attested by an inscription quoted by Arundell (Asia Minor, vol. ii. p. 406) and Hamilton (Researches, vol. ii. Append. No. 48). These circumstances are of some importance in identifying the river. It used to be supposed that a small, dirty, and muddy stream, flowing close by the modern town of Smyrna, was the same as the ancient Meles. But there is another stream, with bright and sparkling water, which rushes over its rocky bed near Bournoubat, and is still celebrated for its agreeable and wholesome qualites. Travellers are now justly inclined to identify this river with the ancient Meles. This supposition is confirmed by our more accurate knowledge of the site of ancient Smyrna, which was on the north of the bay, while new Smyrna was on the south of it, at a distance of 20 stadia from the former; the site of the ancient place is still marked by a few ruins; and elose by them flows the clear stream which we mnst assume to be the ancient Meles. (Comp. Hom. Hymin.
 according to whom the river was also called Meletns; Plin. v. 31 ; Hamilton, Researches, vol. i. p. 51, foll.)
[l. S.]
MELESSES, a people in the S. of Spain. upon whose confines was stuated the rich city of Oringis, also called Aurinx. (Liv. xxviii. 3.) [Ackisx.]
 the interior of Germany, above the Semams Silva. (Ptol. ii. 11. § 7.) There can be little doubt that Melibocus is the ancient name for the Horz mountain, or the Thüringer wald, or for both.
[1. S.]
MELIBOEA, an island at the mouth of the Orontes in Syria, the sole authority for the existence of which appears to be a poetical myth of Oppianus. (Cyneget. ii. 115, sce.)
[G. W ]
MELIBOEA (Meגibota: Eth. MeגıSueús). 1. An ancient towu of Magnesia in Thessaly, mentioned by Homer as one of the plaves subject to Philoctetes
(Il. ii. 717). It was situated upoth the sea-coast (II rod. vii. 1S8: Neylax, p. 25; Apoll. Rhood. i. 5.2), andis described by Livy (xliv. 13) as situated at the roots of Mit. Ossa, and by Stratio (ix. p. 443) as lying in the gulf between Ossa and Pelimm. Leake therefore places it near Aytiois (Northorn (ircere, vol. iv. p. 414). Meliboea was taken and Ilundered by the Romans under Cn. Octavius, b. C. 168. (Liv. xliv 46: Melibuea is also mentioned by Strab. ix. p. 436; Steph. B. s. $v$. : Mela, ii. 3 ; Plin. iv. 9. s. 16.)

The Melibocan purple is said by Lucretius (ii. 499; Virg. Aen. v. 251) to have derivel its name from this town. Many modern writers, however, suppose the name to have come from the small island Melibres at the moutl of the Orontes in Syria ; but there is no reasmn for this suppasition, as the shellfish from which the purple dye is obtained is found in the present day off the coast of Thessaly.
2. A town of flstiacutis in Thessaly, is conjectured by Leake to be represented by loikolla. (Liv. xxari. 13; Leake, Northern Greece, vol. iv. p. 536.)

MELINO'PHAGI (Meגıvoфároi), a people of Thrace puon the coast of the Euxine, near Salnydessus. (X.n. Anab. vii. 5. § 12 ; Theopomp, ap. Steph. B. s. v.) They are, perhaps, the same people as the Asti ('A $\sigma \tau 0 i$ ) whom Strabo places in the same neighbnurhood (vii. pp. 319, 320).

ME'LITA (Me入itn: Eth. Meגıтaîos, Melitensis: Malta), an island in the Nediterranean sea, to the S. of sicily, from the nearest point of which it is distant 47 geogr. miles, but 55 from cape Pachynum. Strabo gives this last distance as 88 miles, which is greatly overstated; while Pliny ealls it 84 miles distant from Camarioa, which equally exceeds the truth. (Strab. vi. p. 277 ; Plin. iii. 8. 5. 14.) The island is about 17 niles long, and between 9 and 10 in breadth, and is separated only by a narrow elumnel from the adjoining island of Gaulos, now Gozo. Notwithstanding its small estent, the opportune situation of Melita in the channel betreen Sicily and Atrica, and the excellence of its harbours, must have eark rendered it a place of importance as a commereial station, and it was occupied, probably at a very early period, by a Phoeniciar colony. (Diod, v. 12.) The date of this is wholly uncertain, and it is called by later writers for the most part a C'artbarinian settlement (Seyl. p. 50. § 110 ; steph. B. s. v.), which it certainly became in after tines; but there can be no donbt that Diodorns is right in describing it as originally a Ploenician one, entablished by that people as an enyorium and harbur of refuce during their long royages towards the west. The same author tells us that in consequesce of this commercial traffic, the colony rose rapidly to prosperity, which was increased by the industry of its inlabitants, who practised varions kinds of manufactures with great success. (Diod. l. c.) But notwithstanding this aceount of its prosperity we have scaredy any knowledge of its history. The notice of it by Sicylas as a Carthaginian colony, seems to prove that it had not in his day recoived a Gireek settlement ; and indeed there is no trace in bintory of its having ever fallen into the lunds of tho Greeks of sit ily, though its coins, as weif as inscriptions, imdicate that it received a strong thuture of (ireck civilisation; and at a liter period 1. Hpears to have bem in a great measure Hellonised. Some of these inseriptions puint to a clove connection with syratus in parti malar. hut of the crist and mumicligitlized by
(Bocekh, Corp. Inser. Gr. 5752, \&e.) In the First l'unic War we fud Melita still in the hands of the Carthaginians; and though it was ravaged in B. c. 257 by a Roman fleet under Atilius Regulus, it does not appear that it fell permanently into the hands of the Romans. At the outbreak of the Second Punic War it was held by a Carthaginian garrison under Hanilear, the son of Gisgo, who, however, surrendered the island to Tib. Sempronius, with a Roman fleet, B. c. 218 (Liv, xxi. 51): and from this time it continued without intermission subject to the Roman rule. It was annexed to the province of Sicily, and subject to the government of the practor of that island. During the perind that the Mediterranean was so severely infested by the Cilician pirates, Melita was a favourite resort of those corsairs, who often made it their winter-quarters. (Cic. l'err. iv. 46, 47.) Notwithstanding this it appears to have been in the days of Cicero in a flourshing condition, and the great orator more than once during periods of civil disturbances etltertained the project of retiring thither into a kind of voluntary exile. (Cie. $a d$ Att. iii. 4, x. 7, 8, y, \&..)

The inhahitants of Melita were at this penod famous for their skill in manufacturing a kiud of fine linen, or rather cotton, stuffs, which appear to have been in great request at Rome, and were generally known under the name of "vestis Melitensis." (Cic. lerr. ii. 72, ir. 46 ; Diod. v. 12.) There is no doubt that these were manufactured from the cotton, which still forms the staple prodnction of the island.

Nelita is celebrated in sacred history as the scene of the shipwreck of st. Paul on lis voyage to Rome, A. D. 60. (Act. Apost. Exriii.) The errur of several earlier writers, Tho have transferred this to the Melita on the E. coast of the Adriatic (now Meleda), has exidently arisen from the vague ure of the name of the Adriatic, which is employed in the Acts of the Apostles (xsvii. 27), in the manner that was eustomary under the Roman Empire, as corresponding to the Ionian and Sicilian seas of geographers. [Adrliticum Mare.] The whole course and circumstances of the voyage leave no doubt that the Melita in question was no other than the modern Malta, where a bay called St. Paal's Bay is still pointed out by tradition as the landing-place of the Apnstle. (The question is fully examined and discussed by Mr. J. Smith, in his Foyage and Shipwerecz of St. Paul, 8 vo. Lond. 1848 ; alno in Conybeare and Howsun's Life of St. Paut, vol. ii. p. 353, \&c.)
No other mention is found of Melita daring the period of the Roman Empire, except in the geographers and the Maritime Itinerary, in which la-t the name alrcady appears corrupted into its modern form of Malta. (Strab. vi. p. 277; Plin. iii. 8. s. 13; Mel. ii. $7 . \S 18$; P'ol. iv. 3. § 37 ; Itin. Marit. p. 518 ; Sil. Ital. siv. 251.) After the fall of the Fomas Empire it fell for a time into the hands of the Vandals; but was recovered from them by Belisarims in A. D. 533 (Procop. B. Y. i. 14), and appears to have continued from this time subject to the Byzantine empire, until it was conquered by the Arabs in A. D. 870.

The present pupulation is prineipally derived from an Arabic stick; but it is probable that the Aral) conquerors here, as well as in Afrea, have been to a groat extent amalcamated with the previously existing I'unic population. The inseriptions discoveref at Malta sufficiently prove tifthen (inclofters) was at one time in ha-

Litual use there，as well as in the neighlouring islaud of sicily；and one of these，which is bi－ lingual，shows that Greek and Punic must have been buth prevalent at the same period．（Boeckh， Corpus Inscr．Gr．5752－5754．）The furmer was probably the language of the more caltivated classes， in the same manner as ltaliso is at the present day．

Diodorus justly extols the excelleace of the ports of Melita，to which that islard has always beea in－ debted for its importance．（Diod．v．12．）The ao－ cieut gengraphers all mention a city of the same name with the islaod，but its precise site is nowhere indicated；there is，however，good reason to believe that it was the same with that of the old capital of the island，now called Medinu（i．e．＂the city＂），or Civita Vecchia，situated almost in the centre of the island；the modern towa of La Valletta，which is the present capital，was not founded till 1566. Ciceru speaks of a celebrated temple of Juno＂on a prumontory not far from the town＂（Cic．Verr． iv．46）；but the expression is too vague to prove that the latter was situated close to the sea，like the modern Valletta．Ptolemy also notices the same temple，as well as one of Hercules，evidently the Phoenician deity Dlelkart．（Ptol．iv，3．§ 37．） The ruins of both these templesure described by Quia－ tino，who wrote in 1536 ，as existing in his time； but the grounds of identification are not given．The only considerable ruins now esisting in the islaud are those on the S．coast，vear a place called Casal Crendi，which are described in detail by Barth． （Arch．Zeitung，1848，Nos．22，23．）These are evidently of Yhoeniciaa origin，and construeted of masive stones，in a very rude style of architecture， bearng much resemblance to the remains called the Torre dei Giganti，in the ueighbouring island of Gozo．［Gavlos．］Some slight vestiges of build－ ings near the port called Marsa Scirocco may per－ haps be those of the temple of Hercules；while，ac－ cording to Fazello and Quintino，those of the temple of Juno were situated in the neiglatourbood of the Castle of S．Angelo，opposite to the modern city of Valletta．（Quintini Descript．Ins．Melitae．p． 110 ， in Burmann＇s Thes．vul．xv．；Fazell．de Reb．Sie． i．1．p．16．）

COEX OF MELITA．
Ovid terms Melita a fertile island（Fast，iii．56\％）； an expression which is certainly ill applied，for though it was，in ancient as well as modern times， populous and flourishing，and probably，therefore， always well cultivated，the soil is naturally stony and barren，and the great want of water prechades all natural fertility．Cotton，which at the present day is extensively cultivated there，was dumbtless the material of the fine stuffs manufactured in the island；and the excellence of its sott stone as a bulding material accounts for the splendour of the h uses，extolled hy Diudorus（v．12）．Another pe－ culiar production of the island was a breed of small dogs，noticed by Strabo and other authors，though
some writers derired these from the Mr－lita in the Adriatic．The breed still exists in Multa（Strah． vi p．277；Atheo．xii．p． 518 ；Plin．iii．26．s． 30 ） The freedom from venomous reptiles which Muitut enjoys，io common with many other secluded islands，is ascribed by the inhabitants to the mira－ culons interveation of St．Paul．（Quintino，l．c．p． 117．）
［E．H．B．］
DIE＇LITA（Me入írn，Scyl．p． 8 ；Steph．B．：Agathem． i． 5 ；Plin．iii． 30 ，Itin．Anton．；F＇eut．Tab．；Me入s－
 de Adm．Imp． 36 ；Malata，Geogr．Rav．），one of the Liburnian group of islands．It was so called like its namesake Melita or Malta，from the excel－ lence of its honey；and some erroneously have clained for it the honour of being the island on which St．Paul was wreeked．（See preceding article．） It is the same as the long narrow and hilly island of Meleda，lying about half－way between Curzola and Ragusa，remarkaile in modern times for the singular phenomenon of subterratean moises called ＂Detonazioni di Meleda，＂the cause of which has been attributed to the region of voleanic activity which is supposed to underlie the whole of this enast．（Comp．Dauheny，On Volcanoes，p．333．） The site of a palace which was built by Agesilaus of Cilicia，the father of Oppianns，the anthor of the＂Halieutica，＂when banished to the island in the time of Septimius Severns，is still shown． （Wilkinson，Dalmatia and Munte－Negro，vol．i． p．265．）
［E．B．J．］
MELITAEA，or MELITEIA（Meגiraia，Stıab， Plin．，Steph．B．；Meגiteta，Pulyb．；Meגetia，Thue．： Eth．Me入ırateús．Me入ıreús），an ancient town of Phthiotis in Thessaly，situated near the river Eni－ peus，at the distaace of 10 stadia from the towa Hellas．（Strab．ix．p．432．）The inhabitants of Melitaea affirmed that their town was anciently called Pyrrha，and they showed in the market－place the tomb of Hellen，the son of Deucalion and Pyrrha， （Atrab．l．c．）When Brasidas was marching through Thessaly to Macedonia，his Thessalian friends met him at Melitaea in order to escort him（Thuc，iv． 78）；and we learn from this narrative that the town nas one day＇s march from Pharsalus，whither Brasidas proceeded on leaving the former place．In the Lamiac war the allies left their baggate at Me－ litaea，when they proceeded to attack Leonnatus． （Diod．xviii．15．）Subsequently Helitaea was in the hands of the Aetolians．Thilip attempted to take it，but he did not succeed，in consequence of bis scaling－ladders being too short．（Polyb．v．97， ix．18．）Melitaea is also mentioned by Scylax， p． 24 ；E\} hor, ap Steph. B. s. v.; Dicaearch. p. 21 ； Plin．iv．9．s．16：Ptol．iii．13．§ 46 ，who erro－ neously calls it Me入itapa．Leake identifies it with the ruins of an ancient fortress situated upon a lofty bill oo the left bank of the Enipeus，at the foot of which stands the small village of Keuslär．（Vorthern Greece，vol．iv．p．469，seq．）

ME＇LITE（Me入ity）．1．A lake of Acumama． ［ACARNANIA，p．9，b．］
2．A demus in the city of Atbens．［Athenae， p．301，l．］］

MELITE＇NE（ $\boldsymbol{\eta}$ Meגut $\eta \nu \eta^{\prime}$ ，Ptol．vi．3．§ 3），the name given by Ptoleny to that part of susiana which lay along the banks of the Tigris．［V］

MELITE＇NE（Meגı $\tau \eta \nu \eta^{\prime}:$ Eith．Me入ı $\left.\tau \eta \nu o ́ s\right)$ ，a city in the easterumost part of Cappaducia，and the capital of the district called Melitene．It appears that in the time of Strako（xii．p．53\％）nether
this nor any other town existed in that dif ctict． J＇liny（vi．3），on the other hand，speaks of Jlehtene as a town built by the fabulotes quect Sunimanis of Assyria；both accounts may be reconciled by the suppasition that the site of the town was formerly octupied by some eastle or fort，sneh ：as we know to have existed in that country from carly times． （Stral，xii．p．537．）The town was situated on the banks of a small tributary of the Euphrates，which was not far distant from Melitene，and in a very salubrions district．During the first century of the Cluristian era，the town was not of mueh importance （Tac，Anow，xv．26）：but Traj：u raised it to the rank of a great eity（Procop，de Aedif．iii．4），and thence－ forth it bectme a central point to which several roads converged．（It．Ant．pp．157，209，211， 215．）The emperors Anastasius and Justinian also embellished the place and surrounded it with new walls．Ever since the reign of Titus．Melitene had been the station of the famous Cliristian Legio xii．fulminata；and after the division of Armenia into two provinces，it becane the capital of Armenia Sceunda．（Hierocl．p．703；comp．Ptol．v．7．§ 5， viii．17．§ 39；Dion Cass．Iv．23；Steph．B．s．v．； Plin．v．20；Procop．de Bell．Pers．i．17；Enseb． Ilist．Eccles，v．5．）In A．D．577，the Romans gained a sreat victory over the Persian Chosroes I． near M－litene；and the place is frequently mentioned by the Byzantine writers．But at present it is in ruins，thungh it still bears its ancient name in the form of Malatio．
［L．S．］
MELLTONU＇s．a station on the Egnation Way， which the Jerusalen ltinerary places between He－ rackia and Grande，at $13 \mathrm{M} . \mathrm{P}$ ．from the former． Its position mast be songht for not far from Filum rina．Tafel（de Viae Egmat．Part．Occ，p． 40 ） thinks that the name should be written Meגit－ $\tau \omega ் \nu$.

MELLIST RG1S，a place in the rond from Thes． salonica to Aprillonia of Iygrlonia，which oceurs in two of the Itinuraries（Itin．Anton．；Peut．Tub．），at a distance of 20 D．P．from Thessalonica．It still preserves its anciont name in the nsual bomaic form of Melissurgus，and is imhabited by honey－ makers，as the word implies（Lake．North．Girece， vol．ini．p． 46 I ；Tafel，de I iue Egnat．Part．Orimt． p．5．）
［E．B．J．］
MELLOSEDCM or MELLOSECTUM，as it is also read，in Gallia Narbonensis，is placed in the Table on a route from Alpis Cottia（Mont Generve）to Viema （Henne）．It is the next place before Caturissium ［C．trorissicy］，which lies between it and Cularo （Grenoble）．Mellosedum may be at or near the Boury dOysans．
［G．L．］
MELOBOTEIRA（M M $\lambda_{0} \delta \delta \dot{\sigma \epsilon \epsilon} \rho a$ ），a name which was applied to Ldessa in Macedonia．（Steph．B．s．v． Airai．）
［E．B．J．］
MELODU＇NUM（Melun），a town of the Senones in Gallia（B．G．vii．58），on an island in the Sc－ quana（Seine）．Though the termination dan seems originally to have signified a hill or height，it be－ came a part of the name of some towns，which like Melodunum were not situated on any elevation． In the Antonine ltinerary Delodunum appears under the name Mecletum，and in the Table in the form Meteglnm．The distance from Lutetia in the Itins， is 17 or 18 Gallic Jeagues．From Melodunum to Condate（Montercau－sar．Yonne）is 15 Gallic leagues ［Condite．No．2］．The old Celtic town on the island was replaced by a castle，of which there aro some remains．The present town of Melun is on the right bank of the Scine，about 28 miles from Paris by the roal．

In the text of Caesar（B．G．vii． 58 ）there is a reading＂qui Metiosedu，＂where the common reading is＂qui a Meloduno．＂The same variation occars in c． 60 ；and in c． 61 ＂Metiosedum rersus＂appears to be the received reading．A careful study of Caesar will satisfy any person that Melan is meant in all these passages，whether the true reading in Caesar＇s test is Melodunnm，Metiosedum，or some－ thing else．Melodunum comes nearest to the molern firm．Walckenaer places Metiosedum at the con－ fluence of the Scine and Marne．The variety in the reading of this name appears also in the Itins．， as shown above．The stratagem of Labienus on the Seine（B．G．vii．5S，\＆e．）is explained in the article Leterta．
［G．L．］
MELOS（Mî̀ $10 s$ ：Eth．Mídios：Milo），an iNland in the Aegean sea，and the most sonth－westerly of the Cyclales，whence it was called Zephyria by Aristotle（ap．Plin．iv．12．s．23；comp．Steph．B． s．r．），and was even placed by Strabo in the Cretan sea（x．p．484）．The latter writer says（I．c．）that Meios was 700 stadia from the promontory lictyn－ naeum in Crete，and the same distance from the promontory Scyllaeom in Arcolis．The island is it reality 70 iniles north of the coast of Crete，and 63 miles cast of the coast of Peloponnesns．It is about 14 miles in leneth and 8 in breadth．Pliny and uthers describe it as perfectly round in shape（＂in－ sularum rotundissima，＂Plin．l．c．；Solin，c． 11 ； Isidor．Orig．siv．6）；but it more resembles the form of a bow．On the northern side there is a deep bay，which forms an excellent harbour．The island is said to have borne several names in more ancient timer．Besides that of \％ephyria given to it by Aristotle，it was also called Memblis by Aristides， Mimallis ly Callimachus，Siplis and Acyton ly

Heracleides (Plin. l.e.), and also Byblis by Steplanus B. (s.v, Mŷ̀os); the latter name is said to liave leen derived from its receiving a colony from the town of Byllus in Phoenicia. Other writers mention this Phoenician colony, and Festus derives the name of Melos from the founder of the colony. (Fest. s.v. Jelos.) Some connect the name with $\mu \hat{\lambda} \lambda o v$, an apple, on account of the round shape of the island. The Ploenician settlement is probable ; but we know that it was colonised at an early period by the Lacedaemonians, and that it continued to be inhabited by Dorians down to the time of the Pelopumesian War. According to the Melians themselves, the Lacedaemonians settled in the island 700 years before this war. (Herod. viii. 48 ; Thuc. v. 84, 112.) In the Peloponnesian War, the Melians remained faithful to their mother city. In B. c. 426 , the Athenians made an uusuccessful attempt upon the island; but in 416 they captured the principal town, put all the adult males to death, sold the women and cbildren into slavery, and colonised the island afresh by 500 Athenians. (Thuc. v. 84116 ; Diod. xii. 80 ; Strab. l. c.)

Melos is now called Milo. It is mountainons and of volcanic origin. Its warm springs, which are now used for batbing, are mentioned in ancient times. (Plin. xxxi. 6. s. 23 ; Athen. ii. p. 43.) Pliny says that the best sulphur was found in Melos (xxar. 15. s. 50 ); and among other products of the island he enumerates alum (xxsv. 15. s. 52), pummice-stone (xxxvi. 21. s. 42), and a bright colour, called Melixum pigmentum (xxxv. 6. s. 19 ; comp. Vitruv. vii. 7 ; Diosc. v. 180 ; Plaut. Most. i. 3. 107). The mines of alum are on the eastern side of the island, near a beight which emits smoke, and has every appearance of hacing been a volcano. In the south-western balf of the island, the mountains are more rugged and lofty; the bighest summit bears the name of St. Eluts. The island produces good wine and olives, but there is not much care taken in the cultivation of the vine. In antiquity Mlelus was celebrated for its kids. (Athen. i, p. 4.) One of its greatest deticiencies is want of water. The inhabitants of Kastron depend almost exclusively upon cisterns ; and the only spring in the vicinity is to the westward of the ancient city, on the sea-side, where is a chapel of St . Nicolas.

In ancient times the chief town in the island was called Melus, It stood upon the great harbour. It is celebrated as the birthplace of Diagoras, somamed the Atheist. [Dict. of Biogr. art. Dhagoras.] The tuwn appears to have been small, since it is called by Tbucydides a $\chi$ wpiov, not $\pi \dot{u} \lambda 1 s$; and of the 3000 men who originally composed the Athenian expedition, the smaller half was sufficient to besiege the place. (Thuc. v. 84, 114.) The present capital of Delos is named Kastron, and is situated upon a steep bill alove the harbour. The former capital was in the interior, and was deserted on account of its unhealthy situation. Between Kustron and the northern shore of the harbour are the ruins of the ancient town, extending down to the water-side. "On the highest part, which is immediately overlooked by the village, are some remains of polygonal walls, and otbers of regular masonry with round towers. The western wall of the city is traceable all the way down the hill from the sumnit to the sea : on the east it fullowed the ridge of some cliffs, but some foundations remain only in a few places" (Leake). Within the enclosure there is a small hill, on which stand a church of Sti Elias and a small
monastery, and which perhaps served in antiquity as a kind of acropolis. Here several architectural fragments bave been found. On the sunth-eatem side of the hill are some seats cut out of the rock in a semi-circular form, of which only four remained uncovered when Russ visited the island in 1843. Thry appear to have been the upper seats of a small theatre or odeum, which was perhaps more ancient than the large theatre mentioned below. In front of these seats is a quadrangular toundation of regular masonry, of which in one part four or five courses remain. About 40 steps eastward of this fomndation are the remains of a temple or some otber pnblic building, consisting of fragments of a Corinthian capital and part of a cornice. Albout a hundred steps SW. is the larger theatre, which was cleared from its rubbish in 1836 by the king of Bavaria, then Crown Prince. The nine lowest rows of seats, of white marble, are for the most part still remaining, but the theatre, when entire, extended far up the bill. From the character of its architecture, it may safely be ascrilied to the Roman period. There are no other remains of the ancient town worthy of notice.

Eastward of the ancient city is a village named Tpuanrท́, from the tombs with which the bill is pierced in every part. Eastward of Tpuantin is a narrow valley sloping to the sea, which also contains several sepulchral excavations. Some of them consist of two chambers, and contain niches for several bodies. There are, also, tombs in other parts of the island. In these tombs many works of art and other objects have been discovered ; painted rases, gold omaments, arms, and utensils of varions kinds. Some very interesting Christian catacombs bave al:o been discovered at Melos, of which Russ has given a description. (Tournefort, Joyage, vol. i. p. 114, Engl. tr.; Tavernier, Voyage, vol. i. p. 435; Olivier, Voyage, vol. ii. p. 217; Leake, Northern Greece, vol. iii. p. 77; Prokesch, Drnkwuirdiykeiten, vol. i. p. 531, vol. ii. p. 200; Fiedler, Reise, vol. ii p. 369 ; Ross, Reisen auf dens Griechischen Insehn, vol. iii. pp. 3, 145.)

## COLN OF MELOS.

MELOS (Mज̂̀nos : Eth. Mŷduos), a village of Acarnania, mentioned only by Stephanus B. (s, v.)

MELO'TIS, a district of Triphylia in Epirus. (Liv, xxxii. 13.) The names of Triphylia and Melotis, in comnection with Epirus, occur only in Livy. Leake supposes that Melotis, which name indicates a sheep-feeding district, was probably the pastural bighlands around Ostanitza, on the borders of Molossis and Atintania. (Northerm Greece, vol. iv. Pp. 101, 119.)

MELPELA (Mé $\pi \in ⿺ a$ ). a village in Arcadia, situated upon Mt. Nomia, which is a portion of Mount Lycaens, so called because Pan was said to have here discovered the melody ( $\mu \dot{\lambda} \lambda 0 s$ ) of the syrinx. (1'aus. viii. 38. § 11.)

MELPES, a small river of Lucania, flowing into T Trmicmup seas wear flie phomontory of 1 'a-
linurus (Plin. iii. 5. s. 10). It is now called the Molpa. [E.. 11. B.]

MELPIS or MELFIS ( $\delta$ M $\lambda \pi \pi t s$ : Melfit), a small river of Latium, falling into the Liris (Garigliano), abont 4 miles below its junetion with the Trerus (Sacca). It crossed the Via Latina about 4 miles from Apuinum, though Strabo erroncously speaks of it as foneing by that city. It is a still greater mistake that he calls it a great river ( потацoेs $\mu$ évas, Strab. v. p. 237), for it is in reality a very inconsiderable stream : but the text of strabo is, in this pas-age, very corrupt, and perhaps the error is not that of the author. The name appears in the Tabula, under the cormupt form Melfel, for which we should probably read Ad Malpem. (Tab. Peut.)
[E. H. B.]
MELPUN1, a city of Cisalpine Gaul, of which the only record preserved to us is that of its capture and destruction by the conbined forces of the Insubriuns, Buians, and Senones, which took phice according to Cornelius Xepos on the same day with the taking of Veii by Camillus, e, c 396 (Corn. Nep, ap. Plin. iin. 17. s. 21). He calls it a very wealthy city ("opulentia praecipuum"), and it therefore seems to have been one of the principal of the Etrusean settlements in this part of Italy. Ali trace of it subsequently disappears, and its site is a matter of mere conjecture.
[E. H. B.]
MELSIAGUM, a lake or marsh in Germany (Mela, iii. 3. §3), the site of which is unknown : it is perhaps one of the lakes of Mecklenburg. [L.S.]

MIELSUS (Me入oos), a small river of Hispania Tarraconenis, flowing into the sea through the territory of the Avtures, not fir from the city Niega (Noira). Perhaps the madern Narrea. (Stral, iii. p. 167, Florez, Esp. Saypr, xv. p. 47.)

MENBLLARESS. [AnapHe]
MEMBRE'SA (Me $\mu 8 p \eta \sigma a$ ), a town of the proconsular province, the position of which is fixed by 1'rocopius (B. I. ii. 15) at 350 stadia from Carthage. Membressa (Membrison, Peut. Tab.), as it is called in the Antomine Itinerary, was a station between Musti, and Siliciblia, and a place of smme impurtance in ecelesiastiral history. (Murcelli. Africa Christiona, sol. i. p. 223.)
[E.B. J.]
MEMIN1. [Cabientomacte]
MEMNONENSES (M\& $\mu \nu o v e i s$ ), a tribe of Acthapians, who dwelt between the Nile and the Astapas, wirth of the peninsular recion of Merve. (1'tul. iv, 8. \& 114.) The name was not an indigenous one, but given by the Greak geographers to one of the Nubian tribes, amone whom they placed their lewend of Memnon, suln of Aurora. [W.B.D.]

MEMPIILs (Mé $\mu$ фis, Iterod. ii. $99.114,136,154$; Polyb. v. 61 ; Dioul. i. 50, seyp.; Stoph. B. s. r. : Fth. M $+\mu$ fitins), the Nort of the Old Testament (Isaiah, xis. 13 ; Jerem. ii. 16, xliv. 1), was the first capital of the entire kinedom of Aegypt, after the Ditaic monardy at 11-fiopolis was united to the Thubail' capital at This or Alydos. It stoxd on the western bank of the Nile, 15 miles S. of Cepestorus, in lat. $30^{\circ} 6^{\prime} \mathrm{N}$.

The foundation of Mrmphis belanes to the rey earliest age of Acgyptian listury. It is ascribed (1) to Mones, the first mortal king; (2) to Cchoreus, a monarch of a later dynasty; and (3) to $A_{\text {pis }}$ or Ep,phoms. (1lygin. Fibb. 149) But the two latter may be dismined as resting on tery donbtful autho. rity. (1)iod. i.51.) The only exptainty is that Memphis wis of remote antignte cos if porm is inflied trothe norrigtion of its umpt 20 teche got that if wis
the finst tapital of the united kingllom of Tiper and lower Acgypt. The motives which induced its fonder to select such a site for his capital are obvious. Not far removel from the bifurcation of the Nile at Cercasorus, it commanded the S. entratice to the Delta, while it was nearer to the Thebaid than any of the Deltaic proviacial cities of importance, Meliupolis, Bubastis, and Sais. It is ahso dear why he placed it on the westem bank of the Nile. His kingdom had little to apprehend from the tribes of the Libyan desert; whereas the eastern frontier of Aesypt was always exposed to attack from Arabia, A syria, and Persia, nor indved was it boyond the reach of the Scythians. (Hered i, 105.) It was important, therofore, to make the Nile a barrier of the eity; and this was effected by placing Memphis W. of it. Before, bowever, Menes could lay the foundations of his eapital, an artificial ares was to be provided for them. The Nile, at that remote 1 wriod, scems t, have had a double bifurcation; one at the head of the Delta, the other above the site of Memphis, and paralicl with the Arsinoite Nome. Of the bramehes of its southern fork, the western and the wider of the two ran at the font of the Libyan hills; the eastern and lower was the present matin stream. Between them the plain, though resting on a limestone basis, was covered with marahes, caused by their periodical overflow. This plain Menes chose for the areat of Memphis. Ile began by constructing an embankment about 100 stidia S. of its site, that diverted the main borly of the water into the castern arm; and the marslies loo drained off inte two prineipal lakes, one to N., the other to W. of Memphis, which thus, on every sido but $\mathrm{S}_{\text {, }}$ was defended by water.

The area of Memphis, aceording to Diodorus(i.50), occupied a cirenit of 150 stadia, or nt least 15 miles. This spaue, doubtless, included moch open ground, laid out in gardens, as well as the conurts required fir the barracks of the garrison, in the quarter denominated "the White Castle," and which was successively nceupied, under the Plaraohs, by the mative milatia; in the reign of I'sammetichus (B. C. 658-614), by Phoenician and Greek mercenaries; by the Persians, after the invasion of Cambynes (b. c. 524); and finally by the Maredonian and Roman troups. For althongh Memphis was nut always a royal residence, it retained always two features of a metropolis: (1) it was the seat of the eentral garrison, at least until Aloxandreia was founded ; and (2) its neeropolis - the pyramidswas the tomb of the kings of cerery native dynasty.

The mound which curbed the inundations of the Nile was so essential to the very existence of MemWhis, that even the Pervians, who ravaged or neglected all other great works of the country, anually repaired it. (1lerod. ii. 99.) The climate was of remarkable salubrity; the soil extremely productive: and the prompect from its walls attracted the notice of the Greeks and Romans, who seldom cared much for the picturesque. Dindorus (i. 96 ) mentions its bright green meadows, intersected by canals, paven with the lotus-Hower. Pliny (xiii. 10, svi, 21) speaks of trees of such girth that three men with extended arms could not span them. Martial (vi. 80) says that the "navita Memphiticus" bronght roses in winter to Rume (comp. Lucan, Pharsul. iv. 135) ; and Atbenaeus (i. 20, p. 11) colebrates its troming snil and its wine. (Comp.

pasition in the "narrows" of Aecypt, at a point where the Arabian and Lityan hiills converge for the last time as they approach the Iecta, and whence Memphis commanded the whole inland trade, whetber ascending or descending the Nile. On the coins of Hadrian the wealth and fertility of Memphis are expressed by a figure of the Nile on their reverse, holding in his left haud a cornucopia. (Miomnet, Suppl. ix. No. 42.)
The position of Nemphis, again, as regarded the civilisation which Aegypt imparted or recevived, was most farourable. A capital in the Thebaid would have been too remote for communication with the East or Greece: a capital in the Delta would have been too remote from the Upper Kingdom, which would then have pertained rather to Aethiopia than to Aegypt; while the Delta iteelf, unsupported by the Theibaid, must in all probability have become an Assyrian province. But the internediate situation of SIemphis connected it both with the southern portions of the Nile valley, as far as its keys at Phlae aud Elephantina, and also through the isthmus of Sucz and the coast, with the most civilised races of Aoia and Europe. After the foundation of Alesandrcia, indeed, Memplis surk into a provincial city. But the Saracen invaders in the seventh contury coufirmed the wisdon of Menes's choice, for they huilt both Old and New Cairo in the neighbourhood of Mewphis, only changing the site from the western to the eastern bank of the river, because their natural alliances, uulike those of the Pbaraohs, were with the Arabians and the Syrian Kbalifates.
The history of Nemphis is in some measure that of Aesypt also. The great works of Menes were prolably accomplished by successive monarchs, if not irdeed by several dynasties. In the 1st period of the monarchy we tind that the 3 rd, 4 th, 6 th, 7 th, and 8th dynasties consisted of Memplite kings. Athotis, who is styled a son of Mlenes, is said to have built the palace, and thus stannped the new city as a royal residence. In the reign of Kaicchos, in the 2nd dynasty, the worship of Apis was establislied at Memphis, which was equivalent to rendering it a cathedral city. In the ith dynasty we have a record of seventy Memphite kings, each reigoing for one day: this probably denotes an interregnum, and perhaps a foregone revolution; for, as Herodotus remarks (ii. 147), the Aegyptians could not exist without a monarchy. After the 8 th dynasty no series of Memphite kings occurs; and the royal families pass to Heracleupolis, in the first place; next, after the expulsion of the Shepherds, to Thebes; afterwards to the Deltaic cities of Tanis, Bubastis, and Snis.
The shepherd kings, though they formed their great camp at Abaris, retained Memphis as the seat of civil goverument (Manetho, ap. Juscph. cont. Apion, i. 14); and although, after they withdrew into Syria. Thebes became the capital, yet we have a proof that the 18 th dynasty-the house of Ramesesheld their northern inetropolis in high esteem. For Sesostris, or Rameses III. (Herod. ii. 108), on his return from his Asiatic wars, set up in front of the temple of Ptab at Memphis a colossal statue of himself 45 feet high; and this is probably the coJossal figure still lying among the mounds of ruin at Mitranieh. Under the 25 th dynasty, while the Aethiopians occupied Aegypt, Memphis was again the seat of a native goverument,- apparently the result of a revolution, which set Sethos, a priest, upwn the throne. A victory obtained by this mon-
arch over the Assyrians was commemnrated by a statue in the temple of Ptah-setios holding in his hand a monse, the symbol of destruction. (Horapol. Hieroglyph. i. 50; comp. Aelian, II. Anim, vi. 41; Strab. siii. p. 604: Herod, ii. 141.) Under I'sammetichos (B.c. $6 \overline{7} 0$ ) the Phoencician soldiers, who had aided him in gaining the crown, were established by him in "the Tyrian camp,"-at least this seems to be the meaning of Herodotus (ii. 112), - but were removed by his successor Amasis into the capital itself, and into that quarter of it called the " White Castle."
Of all the Aeggptian cities, Memphis suffered the most severely from the cruelty and fanaticism of the Persians. Its populace, excited by the defeat of the Aegyptian arny at Pelusium, put to death the Persian herald who summoned the Memphians to surrender. The vengeance of the conqueror is related by Herodotus. Memphis became the headquarters nf a Persian carrism; and C'ambyses, on his return from lis unfortunate expedition against Acthiopia, was more than ever incensed against the vanquished. Psammenitus, the last of the Pharaohs, was compeiled to put limself to death (Herod. iii. 15); Cambyses slew the god $A$ fis with his own hand, and massacred his priests; he profaned the Temple of Ptah and burned the images of the Caheiri (id. ib. 32). Under Tharius Aegypt was mildly governed, and his moderation was shown by his acquiescence in the ligh-priest's refusal to permit the erection of a statue to him at Memplis. (Herod. ii. 110; Diodor. i. 58.) The next important notice of this city is in the reign of Artaxerses I. Inaros, son of Psammetichus, had revolted from Persia, and called in the aid of the Athenians. (Diod. xi. 71.) The Persians were defented at Papremis in the Delta (ib. 74 ; comp. Mannert, Geogr. x. p. 591), fied to Memphis, and were hesieged in the "White Castle." (Thucyd. i. 108-109.) The siege lasted for more than a year (Diodor. ii. 75), and was at lengtin raised (Ctesias, c. 33), and the authority of the king of Persia restored. Uoder Nectanebus I., the first monarch of the Sehenoytie dynasty, Memphis expelled its Persian garrison, nor did it return to its allegiance, until Nectavebus 11., the last representative of thirty dynasties, was driven into Aethiopia. (Athenneus, iv. p. 150.) From this period Memphis loses its metropolitan importance, and sinks to the level of the chief proviucial city of Aegypt.

If, as Diodorus remarks (i. 51), Thehes surpassed Mermplis in the grandeur of its temples, the latter city was more remarkable for the number of its deities and sacred buildings, and for its secular and commercial edifices. It might, indeed, as regards its shrines, be not impropelly termed the Pantheon of the land of Misraim. The following were its principal religious structures, and they seem to include nearly all the capital objects of Aegyptian worship except the goat and the crucodile:--

1. The temple of 1sis, was commenced at a very early period, hut only completed by Amasis, B. c. 564 . It is described as spacious and beautiful (Herud. ii. 176; Heliodor. Aethiop. vii. 2, 8, 11), but inferior to the Iseium at Busiris (Herod. ii. 59, 61).
2. The temple of Proteus, founded probalily by Phoenicians, who had a commercial establishment at Mempbis. It was of so carly date as to be asciibed to the era of the Trojan War. (Plutarch, de Gen. Socrat. c. 7.)
3. The temple of Apis completed in the reign of
 1i. 111: Clumens Alesand. P'acderg. iih. 2; Strab. xvii. p. S(1i), stood oppusite the sumlhern portal of the great temple of Ptah or Ileqhamtos, and was celobated for its colonmales, through which the procestions of Apis were conducted. Here was alsin an oracle of Apis, in connection with one of Osiris and 1.is (Plin. viii. 46 ; Pausan. vii. 22.) This temple was the eathedral of Acgypt, and not only established there a numerons, opulent, and learned college of priests, but also attrated thither inmmerable worshippers, who combined commercial with religious purposes.
4. The temple of Scrapis, in the western quarter of Memphis. This Serapis was of earlier date than the Alusatudrian deity of similar name. To the Momphias Scrapeinan was attached a Nilo-meter, for gauging and recording the periodical overfloms of the river. It was remosed by Constantine as a relic of pasamism, but replaved by his successor Juliam. (Socrat. IIst. Eccles. i. 18 ; Sozomen, v. 2 ; comp. 1 himar. i. 50,57 ; sence. Quest. Nat. iv. 2 ; Plin. viii. 46.)
5. A temple of Phre, or the Sun, mentioned only in the Ronetta inarription (Letromue, Reczacil des Inscr. Grecques et Lat, de l' Egypte; Brugscb, Inscript. Rosittan.)
6. The temple of the Cabeiri (Herod. iii. 37), into which wone but the high-priest night lawfully enter. The statucs of the pigmy gods were burned by Cambyses, and the temple snutilated.
7. The temple of P'ah or Hephaestos, the elemental principle of fire, worshipped under the form of a Pygmy. This was the most ancient shrine in Memphis, being creval with its fondation. (Divelor. i. 45 ; Herod. ii. 99, iii. 37 ; Strab. xvii. 807 ; Aınmian. xrii. 4.) It was enlarged and beautified by several successive monarchs, apparently through a spirit of rivalry with the great bnildings at Thebes. (1.) Moeris erected the great northern court (Herod. ii. 101 ; Dind. i. 51). (2.) Ranneses the Great raised in this court six colessal fignres of stonc, -portrait-statnes of himself, his queen, and their four sons. (Herod. ii. 108-110; Strab. xvii. p. 807.) (3.) Rhampsinitus built the western court, and erected two colossal figures of summer and winter. (Herod. ii. 121 ; Diodor. i. 62 ; Wilkinson, M. and (. i. p. 121.) (4.) A. g chis added the eastern cont. (Herod. ii. 136.) It was, in the opinion of Herudntus, by far the noblest and most beautiful of the four quadraugles. (5.) Psammetichus, the Sate king, added the sonth court, in consmemoration of his victory over the Dudecarcliy (Polyaen. Strating. vii. 3; Herol. ii. 153; Diolor. i. 67 ); and Annasis (Herod, ii. 176) erected or restored to its basis the cilusual statue of Ptah, in front of the southern partico. From the priests of the Memphian temples, the Grecks derived their knowledke of Aegyptian annals, and the rollments alos of their philomphical sy:tems. It was at Momphis that Herodertus made his longest sojmern, and gitucd must of his information reaperting Lower Arzypt. Democritus also resided five years at Mrmphrs, and wan the favonr of the priests by his addietion to astrategieal and hieroHlyphical studies. (1)iog. Laert. Ifrmorrit. ix. 34. Menplis reckoned among its illustrinas vi-itors, in eatly times, the legislator Shan, the historian Ilecatames, the philowophers Thakes and Clembuhas of 1indus ; and in a later ase, Strabo the gengrapher, and lha lorus the Sicilias.

grove of palm-trees, about 10 miles S . of Gizeh, maks, the site of the ancient Memphis. The successive conquerors of the lanil, indeed, have used its ruins as a stone-quarry, so that its exact situation has heen a subject of dispote. Major Remull (Giography of Herodntus, vol. ji. p. 121, seq.), however, brings incontentable evidence of the correspondence of Mitranieh with Demphis. Its remains extend over many hundred acres of ground, which are covered with blocks of granite, broken obelisks, columns and cotossal statues. The principal monnd corresponds probably with the area of the great temple of Ptah.

There are several accounts of the appearance of Mrimphis at different eras. Strabo sart the Heplatesteium entire, althrugb much of the city was then in ruins. In the twelfth century A. 1 , it was visited ly the Arabian traveller Ab-dallatif, who was deeply impressed with the spectacle of grandeur and desolation. "Its ruins offer," be says, " to the spectator a union of things which confound him, and which the most eloquent man in the world would in vain attempt to describe." He scems to bave seen at least one of the colussal statues of the group of Rameses in the northern court of the Heplasesteinm. Among iunnmerable "idols," as he terms them, be "measured oue which, withnit its pedestal. was more than 30 cubits long. This statue was fonned of a single picce of red granite, and was covered with a red varnish." (Ab-dallatif, De Sacy's Trunslation, 4 to. p. 1s4.) Sir William Hamilton (Aegyptiack, 4tw. p. 303) risited the syot, and says, that "high mounds enclose a square of 1800 yards from N. to S., and 400 from E. to W. The entrance in the centre of each side is still visible. The two principal entrances fared the desert and the river ${ }^{n}$ (that is W. and E.). He entered by the latter, and fonnd immediately "thirty or forty large blocks of rery fine red granite, Jying on the gromnd, evidently forming parts of some colossal statues, the chicf ornaments of the temple."

The district in which these remains are found is still termed Memf by the Coptic population, and thus lielps to confirm the identity of the village of Mitranich with the anceent capital of Aegypt. [W.B.D.]

MENAESC'M or MENAE (Mevai, Ptol., Steph. B. ; Mevaivov, Diod. : Eth. Mevaios, Steph. ; but coins have Mevawos; Menaenus, Cic.; Nenaenints, Plin. : Minéo), an inland city of Sicily, about 15 miles W. of Leontini. It was a city of the Siculi, and not a Greek colony, but, according to Diodorus, was not an ancient settlemeut of that people, but first founded by their king Ducetius, in B. c. 459. (Dind. xi, is.) It was situated at a distance of about 2 miles from the celebrated lake and sanctuary of the Palici [Paticomem Lacts] (Steph. B. s. v.) ; and Ducctius apparars, a few years afterwards, to lase removed the inlabitants again from his newly built city. and $t$ - lave founded another, in the inmediate neighbourhood of the sacred lake, to which he gave the name of Palica (Diod. xi. 88 , where the reating Mevas for Neas, snggested by Cluver, and adopted by Wesceling, is at least very probable, though it is difficult to understand how Diodorus conld call it the native city of Ducetius, if it liad, in fact, been only founded by him.) This new city, however, was destroyed soon after the death of Ducetins (Dind. xi. 90), and it is prabable that the inhathitants rettled again at Memanam. The latter city, thourh it never attuined to any
late period. There is little douht that it is the city meant by Diodorus (xiv. 78, where the editions have ミ $\mu$ iveov, a name certainly corrupt), which was redaced by Dionysins in B. c. 396 , together with Morgantia and other cities of the Siculi. It is mentioned more than once by Cicero anong the municijal towns of Sieily, and seems to have been a tolerably flourishing place, the inhabitants of which carried on agricultnre to a considerable extent. (Cic. Yerr. iii. 22, 43.) It is enmmerated also by silius Italicus among the cities of Sicily, and by Pliny among the stipendiary towns of that island. and its name is found also in Ptolemy. (Sil, Ital. xiv. 266 ; Plin. iii. 8. s. 14 ; Ptol. iii. 4 . § 13.) This is the last notice of it that occurs; but there is no doubt that the modern town of Minéo retains the name, and probally the site, of Mensenum, It is situated on a lufty hill, furming part of a range which sweeps ronnd from Palagonia to Caltagirone, and forms the boundary of a decp basin, in the centre of which is a small plain, with the voleanic lake now called Lago di Naftia, which is unquestiomably the ancient Lacus Palicornm. No ruins are now extant at Minéo ; but the coins of Menaenum, which are numerous, though only of copper, attest the consideration which it aneiently enjuyed.
[E. H. B.]

COEN OF MEKAENUM.
MENA'PIA (Mevaria, Ptol. vi. II. § 8), 3 small place in Bactriana in the immediate neighbourhond of Eucratidia. It is probably the same as that called Mexapila by Ammianus (xxiii. 6).
[V.]
MENA'PII, a people of North Gallia. In Caesar's time ( $B . G . \mathrm{iv} .4$ ) the Menapii were on both sides of the lower Phine, where they had arable farms, buildings, and small towns. The Usipetes and and Tenctheri, who were Germans, being hard pressed by the Sueri, came to the Rbine, surprised and massacred the Menapii on the east bank, and then crossing over spent the winter on the west side, and lived at free cost among the Menapii. The history of these marauders is told elsewhere. [Usimetes.] On the west side of the Rhine the Eburones were the immediate neighbours of the Menapii (B.G. vi. 5), and they were between the Menapii and the Treviri. The Menapii were protected by contiouous swamps and forests. On the sonth and on the coast the Menapii bordered on the Morini. Caesar does not state this distinctly; but he mentions the Menapui (B. G. ii. 4) among the Belgian confederates next to the Morini; and the Menapii were said to be able to raise 7000 fichting men. As the Veneti sought the aid of the Mlorini and Menapii in their war with Caesar, we must conclude that they had slips, or their aid would bare been useless (B. G. iii. 9). Caesar describes all Gallia as reduced to obedience at the close of the summer of B. . . 56 , except the Morini and Menapui (B. G. iii. 28), who were protected against the Roman general for this season by their firests and the had weather. The nest year (b. c. 55 ), immediately before sailing for Britaunia,

Caesar sent two of his legati to invado the country of the Menapii and those Pagi of the Monni which had not made their submission (B, G, iv, 22). After his return from Britannia Caesar sent Laliems againat the Morini with the legions which had been brought back from Britannia. The surmer had been dry, and as the marshes did not protect the Morini, as in the year before, most of them were compelled to yield. The troons which had been sent ngainst the Menapii under the two legati ravaged the lands, destroyed the corn, and burnt the houses; bnt the people fled to the thickets of their forests, and sared thenselyes from their cruel eneny. (B. G. iv. 38.)

In n. c. 53 Caesar himself entered the conntry of the Menapii with five legions unincumbered with bagcage. The Menapii were the only Galli who had never sent ambassadors to Caesar ahont peace, and they were allies of Ambiorix, king of the Eburones, Caesar's enemy. Trusting to the natural protection of their country, the Menapii did not combine tbeir furces, but fled to the forests and marshes, carrying their property with them. Caesar entered their country with his army in three divisions, after having with great rapidity made bis bridges over the rivers, but he does not mention any names. The buildings and rillares were barnt, and a great number of cattle and men were captured. The Menapii prayed for peace, gave hostages, and were told that their hostages would be put to death, if they allowed Ambiorix to come within their borders. With this threat Cuesar quitted the country that he had ravaged, leaving Conmm the Atrcbat, one of his shavish Gallic tools, with a body of cavalry to keep watch over the Menapii. (B. G. vi. 5, 6.)

It appears from Caesar's narrative that this people had farms, arable land, and cattle; and probably ships. They were not savages, but a people with some civility. Caesar's narrative also leads us to infer that the Menapii on the coast bordered on the Murini, as Strabo (iv. pp. 194, 199) says. Pliny (iv. 17) also makes the Menapii and Morini ennterminous on the coast, but he makes the Scaldis (Schelde) the northern limit of the Menapii; and he places the Toxandri north of the Schelde. D'Anville (Notice, Gic, Nerviz) attempts to show, against the authority of the ancient writers, that the Nervii estended to the enast, and consequently were between the Murini and the Menapii. But it is here assumed as proved that the Murioi on the coast bordered on the Menapii, who in Caesar's time at least extended alung the coast from the northern boundary of the Morini to the territory of the Baxani. [Batasorim Innella.]

Walckenaer proves, as he supposes, that the river Aas, from its source to its oullet, was the boundary between the Morini and the Menapii. The Aas is the dull stream which flows by St. Omer, and is made navigable to Gracelines. Accordingly he makes the hill of Cassel, which is east of the Aas, to be the Castellum Menapiorum of the Table. This question is examined under Casteluum Moranokum. The boundary on the coast between the Morini and Menapii is unknown, hut it may, perhaps, have been as far north as Ionnkerque. As the Eburones about Tongern and $S_{p a}$ were the neighbours of the Menapii of Caesar on the east, we obtain a limit of the Menapii in that direction. On the north their boundary was the Rhine; and on the south the Nervii. Under Augustus some German peoples, Ubii, Sicambri [Gugerni], and others,
were removed to the west sile of the Thine．The Toxandri，who were setted in North Brabant，oceu－ pimal the place of those Menajit who bordved on the J：urones．Bat the Menaypia still inatiatnined theon－ selves on the west．Tacitus（llist．iv． 28 ，in his deseription of the rubcllion of Civilis，still speaks of the＂Menapios et Morinos et extrema（ialliarmm．＂ l＇art of the former territory of the Menapii was fimally incluled in Germania Joforior，and the rest in Bolgical．The name Menapii subsisted for $n$ long timae．Antelins Vintor（de Cuesuribus，39）calls Caran－ins＂Mentipiae civis：＂and it appears in the matale aces．15Anville obserses that though the Notitin of the limpire mentiuns a bedy of soldiers namol Menapii，we see no trave of this nation in any city which represents it；but Willekenaer（Giong． fr．vol．i．p．460）cuntends that Turnacum （Tournai）was their chief place，to which place probatly helong the Belgic silver medals with the
 ant of Charles the Bald．A．D，847，in favour of the whey of St．Amand，which is south of Tournai，this whery is suil to be＇in territorio Menapiorum quod нum Mempiscum appelant．＇＂We thus oblain，as it wems，a fixed point for part of the territory of the Mrmapii，which under the later Empire may have bern limited to the country west of the Schelde．

It is observel that＂though it is very probable that Caesar never alvanced into the interior of Flander，it is，however，certain that the Romans afterwards，if they did not absolutely make them－ selves masters of it，at laast were there for some time at different eporhs．Their idols，their Dei Pe－ nates，spulchral urus，Jamps，Ruman utensils，and ＂sperially the medals of almost all the emperors， discovered in great numbers，are irretragable evi－ dence of this，＂（Bast，Recueil id．Antiquites Romaines et Gouluises，dंc．，Jntroduction．）
${ }^{4}$ Aucient earthen vessels have been found in great uumbers all along the cuave from Dunkerque to Bruger，which shows that the sea has not eained liers，and refutes the notion that in the time of Causar and Jliny this coast was neither imhabited uor habitable．＂（Walckenarr，Géug．fe．vol．i．p．469．） An ins ription fonml at limim，of the age of Ves－ pasian，mentions the＂Salinatures Menapionm，＂or salmakers of the Menapii．

If the positiun of the Muldi of Carsar has hem rightly dotormined［Mva．1n］，they were a Denapian 1＂ople．There is nothing to show whether the Me－ napii were Galli or Gramani．

 20．s．34），a town of the Varduli，on the N．coast of Hispania Tarraconensis．Its site is uncertain．Some phace it at St．Sebastian ；others at St．Andre ；and others，again，at Sumaya，

MENOSGADA（Myvooráda），a place in central Gurnany，not far from the sources of the Main （Juenms），from which it，no doubt，detived its name．（Ptol．ii．11．§ 29．）Its site is generally helieved to have been that of the modern M／ainroth， near Culmbach．
［L．S．］
ME＇NTESA．1．Surnamed Bastia（It．Anton． 5． 402 ；Mentissa，Liv．sxvi．17；Mèrifa，l＇tol．ii． 6．§59），a town of the Oretani in Hispania Tarra－ conensis，on the ruad from Carthago Nusa to Castulo， and 22 Roman miles from Castulo．Pliny（iii． 3. 5．4）ealls the inhabitants＂Mentesani，qui et Ore－ tami，＂to distinguish them from the following．

2．A small state of the Bastnli，in Hispania Baetica．（＂Mentcsai，qui et Bastuli，＂Plin．l．c．； Inscr．（iruter，p．384，2；Florez，Esp．Sagr．v． p．24．）

MIENTONOMON，an aestuary or bay of the Northern Occan，nentioned by Pytheas，upon which the Guttones dwelt，and at a day＇s sail from which was an island named Abalus，where amber was gathered．（Plin．xxxvii．7．s．11．）The same island is mentioned in another passage of Pliny（iv．13．s． 27），as situated a day＇s sail from the Scythian coast． In Sillig＇s edition of l＇liny this part of Scythia is called Raunonia ；but some of the MSS．and older editions have Bannonianna or Bantomannia，which is apparently only another form of Mentonomon． The bay was no doubt on the Prussian coa－t in the Baltic．（Zeuss，Die Deutschen．of c．p．269．）

MENTORES（Mévtopes），a Liburnian trilie （Hecatae．Fr．62，ed．Klausen ；Plin．iii．21．s．25）， off whose eeast were the three islands called Men－ torides，probably the same as the rocky islands of Pago，Osero．and Arbe．
［E．B．J．］
DENU IHIAS（Mevouetás，Steph．B．），an island off the E．coast of Africa．J＇tolemy（iv．\＆，§ 2 ， comp．vii．2．§ 1）describes it as being adjacent （таракентаı）to the Prom．Prasum；at the same time he removes it $5^{\circ}$ from the continent，and places it at $85^{\circ}$ long．， $12^{\circ} 30^{\prime}$ lat．，to the NE．（anò Ne－ ptv⿳亠丷厂彡 ávaro入av）of Prasum．The graduation of 1＇toleny＇s map is here so erroncous，that it is im－ pessible to make out the position of his island Denuthias，which some have identified with one of the islands of Zansibar，or even with Madagosear： （Viacent，Navigation of the Ancients，vol，ii．pp． 174－185：Gosselin，Géographic des Anciens，vol．i． Pp．191，195．）The simple narrative of the Periplus gives a very faithful picture of this coast，－－har－ monising with the statements of Ptolemy and Na－ rinus of Tyre，－as far as the Phaptus of the former （Govind，or the river of Juboh）．Aitermards it thus proceeds（p．9，ed．Hudson）：－
＂Thence＂（Irom the Nova Fossa，＂New Cut，＂ or＂Chamnel，＂or the opening of the coral reefs by Govind），＂at the distanee of two natural days＂sail， on a course a little above Libs（SW：），Menuthias island occurs on the W．（the important words＂Due West＂－$\left.\pi \alpha \rho^{\prime} \alpha i \tau \pi i \nu \tau\right\rangle \nu \nu \delta \dot{u} \sigma, \nu$－are arbitrarily ahtered in Blancard＇s edition to the opposite sense，with a view to force the author into agreement with Pto－ lemy；comp．Annot．ad Ifudson．p．68），abont 300 stadia from the mainland，low，and covered with wood，with streams，plenty of birlhs of varous kinds，and land－turtle．But，excepting crocodiies， which are harmless，it has no other amimais．At this island there are boats，both sewed together，and hollowed ont of single trunks，whicb are used for fishing，and catching turtle．Here，they take fish in wicker baskets，which are let down in frunt of the bollows of the rocks．＂It appears，therefore， that Meouthias was distaut about two days＇sail from Nova Fossa，or 60 or 80 miles from the river Govind，just where an opening in the coral reefs is now found．The coasting royager，steering sW．， reached the island on the E．bide，－a proof that it was close to the main；a contiguity which perhaps is further shown by the presence of the crocodiles ； though much stress cannot be laid upon this point，as they may have been only lizards．It is true，the navigator says that it was 300 stadia from the mainland；but as there is no reason to suppose that he survered the island，this distance must be taken
to signify the esfimated wilth of the northem intet separating the island from the main; and the , timate is probably much exagecrated. The mode of fishing with bavkets is still practised in the Jubahk islands, and along the coast. The formation of the enast of $\mathbf{E}$. Africa in these latitudes-where the hills or downs upon the coast are all formed of a coral conglomerate, comprising fragments of madrepore, shell, and sand-renders it likely that the island which was close to the main sixteen or serentcen centuries ago, should now be united to it. Granting this theory of gradual transformation of the coast-line, the Menuthias of the "I'eriplus" may be supposed to have stond in what is now the rich garden-land of Slamba, where the rivers, carrying down mud to mingle with the marine deposit of coral drift. cavered the choked-up estuary with a rich soil. (Cooley, Ptotemy and the Nike, London, 1854. 1p. 5668.)

AERINUN. [Gakganes.]
MERMESSUS (Mep $\mu \eta \sigma \sigma \dot{s}$ or Mupuloбós), a town in Troas or Mysia, belonging to the territory of Lamp-acus, was celelrated in antiquity as the mative place of a sibyl (Steph. B. s. r.; Paus. x. 12. $\S 2$; Lictant. i. 6, 12, where it is called Marmessus; Suid, s. v.): but its exact site is unknown. [L. S.]

MERODRTCA. [Mmomaiga.]
METRE (Mepón, Herod, ii. 29: Diol. i. 23, seq.: Strab. xviii. p. 821 : Plin. ii. 73. s. 78, v. 9. 8. 10: Steph. B. s. r.: Eth. Mepoaîos, Mepouicios). The kingdom of Meroe lay between the modern hanlet of Khartoum, where the Astapus jnins the true Nile and the influx of the Astaboras into their united stremms, lat. $17^{\circ} 40^{\circ}$ N.. long. $34^{\circ} \mathrm{E}$. Although described as an island by the ancient grographers, it was properly an irregular xpace. like Mesonntamia, included betireen twa or mare confluent rivers. Accorling to Diedorus (i. 23) the Irgion of Neroe was 375 miles in length, and 125 in brealth; but Strabo (xviii. p. 821) regards these numbers as referring to its circumference and diameter respectively. On its eastern side it was Inunded by the Abyssinian highlands; on the western hy the Tibyan sands - the desert of Bahouda. Its estreme sunthom extrenity was, accorling to a survey made in the reign of Nero, 873 miles distant from Syene. (Ilin. ri. 29. s. 33.) Eratosthenes and Artemiluras, indeed, reduced this distance to $6: 25$ and 600 miles. (Mannert, Geng. fl. Alten, x. p. 183.) Within these limits Deroe was a region of singular opulence, hoth as respects its mineral wealth and its ctreal and lecmuinotis productions. It possessed, on its cantorn frontice, mines of puld, iron, copper, and salt: its whols of dite-palm, almond-trees, ant ilex yielded abundant supplies of both froit and timber for exprot and home comsumption; its meadows suppiorted large herds of cattle, or prodreced double harvests of millet (ilhoura); and its forests an I swamps abounded with wihl biasts and game, which the natives caught and valten for food. The butaks of the Nile are so high in this recion, that Meroe derives no lenefit from the immiation, and,
seavon (Strab. xr. p. 690), the lands remote frem the rivers mut always have been nearly desert. But the waste bore little proportion to the fertile lands in a tract so intersected with streams; the art of irrigation was extensively practised; and in the south, where the hills rise towards Abyssimia, the rains nre sufficient to maintain a considerable degree of fertility. The valley of the Astaboras (Tacazsé) is lower and warmer than the rest of Meroe.
lartly frum its natural richness, and partly from its situationbetween Aethiopia and the Red Sea,-the regions which produced spice, and those which yielded gold-dust, irory, and precious stones,- Meroe was from very early times the seat of an active and diver. sified commerce. It was ore of the capital centres of the caravan trule from Libya Interior, from the havens on the Red Sea, and from Aegypt and Aethiopia. It wos, in fact. the receptacle and terminns of the Libyan traftic from Carthuye, on the one side, and frotin Adule and Berenice on the other. The ruins of its cities, so far as they have been explored, attest its commercial prosperity.

The site of the city of Meroe was placed by Eratrosthenes (ap. Strab. xvii. p. 786) 700 stadia, or nearly 90 miles, south of the junction of the Nile with the Astaboras. lat. $16^{\circ} 44^{\prime}$; and surh a position agrees with Phila's stntement (ii. p. 77) that the sun was rertical there 45 days before the summer solstice. (Comp. Mlin. vi. 30.) The primmids seattered over the plains of this mesopotamian region indicat" the existence of numerous cities besides the capital. The ruins which have been discovered are, hawever, those of either temples or public monuments, for the cities themselves, being built of palm-branches and bricks dried in the sum, speedily crumbled awny in a latitude to which the tropical rains partially extend. (Vitter, Africa, p. 542.) The remains of Meroe itself all lie between $16^{\circ}$ and $17^{\circ}$ lat. N., and are not far from the Nils. The most southerly of them are found at Naga-gebel-ardan. Here have been discovered the ruins of four temples, built in the Aegyptian style, but of late date. The largest of them was dedicated to the ram-headed deity Ammon. Tho principal partico of this temple is detached from the main bnilding, - an unusual practice in Aegyptian architecture. - and is approached through an avenne of sphinxes, 7 feet high, and also bearing the ram's head. The sculptures, like thase of Aegypt, represent historical events, - Ammon receiving the homage of a queen, or a king holding his captives by the hair, and preparing to strike off their heads with an axe. At It'oad Naja, about a mile from the Astapus, are the remains of a sandstone temple, 89 feet in length, bearing on the capital of its columns the figures and emblems of I'tah, Athor, and Trphon. These ruins are amidst mounds of brick, which betoken the former presence of an extensive city. Again, 16 or 17 miles west of the Astapus, and among the hollows of the sandstane hills, surroundel by the desert, are the ruins of $\mathrm{E}: \mathrm{l}$ Mesacurat. Light temples, connected with one another by galleries or colommes, and dirided into cotarts and cloisters, are here found. The style of architecture is that of the era of the P'tolemies.

On the eastern bank, however, and about 2 miles from the river, are found groups of pyramids, which mark the sito of a necropolis and the neighbourhood of a city: they are 80 in number, and of various dimensions; the hase of the largest being 63 feet

Inftiest of these pyramids is about 160 feet in lieight. Some of these bave evidently been royal tomls. None of the buildings of Meroe, indeed, can claim a remote antiquity. The sculptores as well as the pyrnmids bear the impress of the decline of Augyptinn art, and even traces of Greek architecture; and this circumstance is one of many indications tbat Meroe derived its civilisation from Aegypt, and did not, as has been supposed, transmit an earlier civilisation to the Nile valley. And yet it is not probable that Meroe received either its arts or its peculiar forma of civil polity from Aegypt, either entirely, or at any very remote epoch of time. Their points of resemblance, as well as of difference, forbid the supposition of direct transmission: for, on the one band, the architecture and sculptures of Meroe betray the inferiority of a later age, and its civil government is not modelled upon that of the Pharaobs. One remarkable feature in the latter is that the sceptre was so often held by female sorereigns; whereas in Apgypt we find a queen regnant only once mentioned - Nitocris, in the 3rd dynasty. Again, the polity of Meroe appears to bave been in great measure sacerdotal long after Aegypt had ceased to be goveried by a pure theocracy. Yet, that the civilisation of Meroe was indigenous, the general barbarism of the native tribes of this portion of Libya in all ages renders bighly improbahle. From whatever quarter the ruling caste of this ancient kingdom may have come, it bears all the tokens, both in what we know of its laws, and in what is visible of its arts, of the presence of a conquering race presiding over a subject people.

The most probable theory appears to be the following, since it will account for the inferiority of the arts and fur the resemblance of the polity of Meroe to that of Aegypt :-

Strabo, quotiug Eratonthenes (xvii. p. 786), says tbat the sembritae were subject to Meroe; and again be relates, from Artemidorus, that the Sembritae suled Meroe. The name of Sembritae, be adds, signifies immigrants, and they are governed hy a queen. Pliny (vi. 30. s. 31) mentions fonr islands of tbe Sembritae, each containing one or more torns, and which, from that circumstance, are evidently not mere river-islands, but tracts between tbe streams whicb intersect that part of Libya - the modern kingdom of Sennaar: Herodntus, in whom is the earliest allosion to these Sembritae (ii. 30), calls them Automoli, that is voluntary exiles or immigrants, aud adds that they divelt as tar above Meroe, as the latter is from Syene, i. e., a two motiths' voyage up the river. Now, we know that, in the reign of Psammetichus (b. c. 658-614), the military caste withdrew from Aegypt in anger, becanse their privileges had been invaded by that monareb; and tradition mniformly assigns Aethiopia, a vague name, as their place of refuge. The number of these exiles was rery considerable, enough even if we reduce the numhers of Herodotus (ii. 31 ), 240,000 , to a tenth - to enable wariors, well armed and disciplined, to bring inder subjection the seattered and barbarous tribes of Sennaar. The islands of the Sembritse, surrounded by rivers, were easy of defence: the soil and productiona of Neroe proper wonld attract exilea accoustomed to the rich Nile ralley; while, it the distance of two month's journey, they were secnre against invasion from Aegypt. Having revolted from a king rendered powerful by his army, they would naturally establish a form of
government in which the royal authority was limited; and, recurring to the era when the monarch waa clected by or from the sacerdotal caste. they ajparently reorganised a theocracy; in which the ruyal power was so restricted as to admit of its being held by male or female sovereigns indifferently, - for there were kings as well as queens of Meroe.

Again, the condition of the arts in this sonthern kingdom points to a similar conclusion. The pyrnmids scattered over the plains of Mlerve, though copied from the monumenta of the Nile valley, and burrowing names from early Egyptinn dynasties, are all of a comparatively recent date; long, indeed, posterior to the age when the arts of Aegypt were likely either to be derived from the south, or to be conveyed up the river by conquest or commercial intercourse. The structures of Meroe, indeed, so far as they bave been explored bitherto, indicate less a regular than an interrupted intercourse between the kingdoms above and below Syene. And when it is remembered that these monuments bear also many restiges even of later Greek and Roman times, we may infer that the original Sembritae were, during many generations, recruited by exiles from Aegypt, to whom the government of their Macedonian or Roman conquerors may have been irksome or oppressive. Finally, the native tribes of Sennaar live principally on the produce of the chase; whereas the population of Meroe was agricultural. New emigrants from Aegypt would naturally revert to tillage, and avail themselves of the natural productiveness of its alluvial plains. The whole subject, indeed, is involved in much ohscurity, since the ancient Meroe is in many parts inaccessible; partly from its immense tracts of jungle, tenanted by wild beasts, and partly from the fevers which prevail in a climate where a brief season of tropical rain is succeeded by many months of dronght. From the little that has been discovered, however, we seem warranted in at least surmising that Meroe was indirectly a colony of Aegypt, and repented in a rude form its peculiar civilisation. (Nee Heeren, African Nations, rol. i. Meroe; Cooley's Ptolemy and the Nile; Cailliand, TIsle de Meroe, \&c.)
[W, B. D.
merom. [Palaestin.i.]
MEROZ (MepúS), a tuwn of Palestine, mentioned only in Judges ( 5.23 ), apparently situated in the vicinity of the battle-field, and in the tribe of Aslier. The tradition of its site was lost as carly as tbe time of Procopics of Gaza, who had attempted in vain to recover it. (Reland, Palaestina, s.v, p. 896.)
[G. W.]
Mierva. [Gallaecta, p. 934, a.]
MERULA (Merula), a river of Liguria, mentioned only by Pliny (iii. 5. s. 7), who places it between Albinm Intemelium (Vintimiglin) and Albium Ingannam (Albenga). The name is still retained (according to the best maps) by a streatn which flows into the Mediterranean near the Capo delle Mele, abont 10 miles W . of Albenga, but more commonly known as the Füume $d^{\top}$. Andora, from the village of that name near its month. [E. H. B.]

MERCS (Mŷpos), a town of Phrygia, which is mentioned only in the coclesiastical writers as situated in Pbrycia Salutaris, on the south-east of Cotyaenm. (Hieroch, p. 677; Socrat. Hist. Eccles. iii. 15; Sozomen, v. 11 ; Constant. Porphyr. de Them. i. 4.) Some believe that the ruins near Doraslan (commonly called Doganlu), of which Fellows heard (Diseov. in Lycia, p. 134, \&c.), belong to Merus. (Comp. Leake, Asia 3 inor: p. 2t, \&c.) [L.S.]

MESE＇MBLIA（Meonuspia，Dor．Meqaubpia： Eth．MeoquEpuavos）．1．An important Greek city in Thrace，situated on the cuast of the Euxine and at the foot of Mt．Haemus（Scymo．Cli，738）； consequently upon the confincs of Moesia，in which it is placed by Ptolemy（iii．10．§8）．Strabo（vii． p．319）relates that it was a colony of the Mle－ garians，and that it was originally called Menebria （Meve\＆pia）after its fonnder Menis；Stephanus B．
 （MeגrnuEfia），from its formder Melsas；and both writers state that the termination－brid was the Thracian word for town．According to the Ano－ nyumu Periplus of the Euxine（1．14）Mesembria was forudel by Chalcedonians at the time of the expedition of 1hurius auainst Ecythia；but according to Herolutus（vi，33）it was fonnded a littie later， after the suppression of the Ionic revolt，by Byzantine and Chalcedoman ingitises．These statements may， however．for recunciled by sulposing that the Thri－ cian town was originally coloniked by Megarians，and afterwards reweived additiomal colonists from By－ zantimu and Cladcedon．Mesembria was one of the citier，firmiur the Greek Pentapratis on the Euxine， the other four benge Odessus，Tomi，Istriani and Ajol－ loniatae．（Nee Biackh，Inser，vol．ii．p．996．）Mc－ semhria is ravely mentioned in history，but it con－ tinued to exist till a late periol．（Mela，ii． 2 ； Plm．iv． 11 ．s． 18 ：Ptol．l．c．；Tab．Peut．）

2．A Greck city of Tirace，on the Acgaten Sea，

and nut far from the mouth of the Lissus．（H od． vii． 108 ；Stepl．B．s．v．）

M1Esl：NE（Meonyj，Strab．ii．p．84），a small tract of land in ancient Mesopotamia，about the exact position of which there has been much dis－ cussion，owing to the indistinct and confased ac－ counts of it which have been preserved in ancient anthors．The real canse of this would seem to be tbat there were two districts at no great distance one from the other，buth of which，from similar reasons，bore the name of Mesene，or Middle－Land． One of these was near the mouths of the Tigris， where that river is divided into two branehes，eor－ responding to the modern tract called Shat－al－Arab （Steph．B．s．v．Meaqviे．）To this Mesene must be referred the passage in Philostorgius（14．E． iii．7），in which he states that the Tigris，before it reaches the sea，is divided into two great branches， forming an extensive island，which is iwhabited by the Meseni．To this also belongs the Mesene，men－ tioned in the history of Trajau by Dion Cassius， who calls it an island in the Tigris，over whieh Athambilus was the ruler（1xviii．28）．The other was much higher up on the same xiver，and has derived its chief importance from its capital A pameria， Stephamus speaks of this tract in two places ；first （ $s, v$. ＇A ${ }^{\prime} \dot{\text { ámeia }}$ ），where lie states that that city is surrounded by the Tigris，where that river is di－ vided into two streams，of which that on the right hani is called Delas，and that on the left bears the name of Tigris ：and secondly（s．v．＇Opa日a），where he asserts that Oratha is a town of Mesene，which is near the Tigris，according to Arrinu，in the 16th book of his l＇arthica．

Pliny cvidently refers to this Mesene，when he is speaking of Aprinela，which town be states to have been 125 miles on this side（i．e，to the N．）of Sclenceia；the ligris being divided into two chan－ $\mathrm{n} \cdot \mathrm{l}$ s．by one of which it flows to the S ．and to Sclencein，washing all along Mesene（vi．27．s．31）． There might have been some doubt to which Mesene Ammianns refers ；but as he mentions Teredon， which was near the mouth of the Tigris，it is probaile that he is speaking of the former one（xxir．3）， The district in the neighbourhood of the Apameian Mesone has been surveyed with great care by lieut． Lynel？；and，from his observations，it seems almost certain that the more uorthern Nesene was the territory now comprehended between the lijeil and the Tigris．（Roy．Geogr，Journ．vol，is．p． 473．）

［L．．．］

district of Western Asia, deriving its name from its -hition between the two great rivers Euphrates and Tigris. It was hounded on the N. by Armenia and the S. branch of M. Tanrus, on the E. by the Tigris, on the W. by the Euphrates, and on the S. by the Medinn Wall, which separated it from Babylonia. (Strab. xvi. p. 746 ; Ptol. v. 18. §1.) Pliny apparently extends it on the southern side as far as the Persian Gulf (v, 24. s. 21) ; but, like many other ancient provinces, its limits varied much at different periods, - it heing semetimes exlended se as te comprehend Babylenia, at other times so as te take in parts of Syria.
Mesopotamia is nuticed ameng the earliest recorls of the human race which we bave in the Bible. It is cemmonly known by three titles in Hely Scripture: either Aram Nailarming (or "Siria of the Two Waters"), as in Gen. xxiv. 10; or Padin Aram ("Syris of the Plain"), as in Gen. xxxi. 18, xxxiii. 18, xxxv. 9 ; or SedeliAbam. "the field ef Aram" (Hos. sii. 12), corresponding with the "Campi Mesopotamiae" of Curtius (iii. 2, § 3 , iv 9. § 6). There are indeed places where Arim Mamailinm appears to be used in a mere limited sense for the more nerthern portion of it (Deut. xxiii. 4); while it is equally certain that it was not supposed to comprehend enly the flat country of the plain; for Balaam, who is said to have been a native of Aram Maharaim (Deut. xxiii. 4), is also in another place stated to bave been "brought from Aram ont of the mountains of the East." (Numb, xxiii. 7.) It is not certain how sonn in listury this ceuntry acquired its Greek title, which is, nfter all, only a modification of the meaning of the orixinal Hebrew werd, - probably, however, not till after Alexander's invasion of the East. (Cf. Arrian, vii. 7; Tacit. Arn. vi. 37.) The translators of the LXX render the Hebrew sometimes Mєбототацia ミupias, and semetines sinply Meбortotauia. In the Bible we have mention of one ruler who is called a king of Mesopotamia, Cushar-Rishathain, to whom the cbildren of Israpl were subject for eight years. (Judg. iii. 8, 10.) The modern Arabic name Al-Jezireh (the island) deacribes its locality accurately; but the modern province is much less extensive than the ancient.

The whole country (as known at least to the later writers) appears to have borne much the same charaeter as Balorlunia, and to have been rich in the same products. It was throughont well weoded, expecially in the neighbourhoud of the principal streums ; and some of the timber mnst have been ef a large size, as Trajan built a fleet in the neighhourhend of Nisibis during the Parthian War (1)ion Cass, Ixviii. 26), nnd Severns one in subsequertit times from the woods along the banks of the Fiuphrates. (Dion Cass. lxxv, 9.) Its extensive plains afforded abundant pasturage for cattle (Curt. v. 1. § 12 ; Amm. Mare. xxv. 8), and its wilder and less frequented districts were the haunts of the lion, the wild ass, and the gazelle. (Strab. xvi. 747 ; Ammian. xviii. 7.) The same character it possesses now; though, from the scantiness of the population, and the careless rule of its Turkish governors, much that was fermerly under cultiration has become a deserted wilderness. Among its natural products Strabe mentions especially naphtha, amomum, and a stone called gangitis or cagatis (perbaps a kind of anthracite ceall). (Cf. sítol. ad Nicandr. Ther. 37 ; Plin. x. 3. s. 4 ; Diuscerid. v. 146.)

Though Mesopstamia is for the most part a flat conntry, the ancients reckened some mountains which were alung its northern boundary, as belenging te this division of Avia. These were Moss Masrus (now Karja Baghlar), one of the southern outlying spurs of the great range of the Taarus; and M. Singaras (now Sinjur), which may be considered as an extension to the S. of the M. Masius. The latter is nearly isolated from the main ranges on the N., and extends on the NE. to the neighbeurhood of the Tigris. The two most important rivers of Mesopotamia are, as we have stated, these which formed its W. and E. beundaries, the Euphrates and Tigris; bat besides these, there are a number of smaller, but not wholly pnimportant streans, which traverse it as affluents of the former rivers. These were the Crabozas (Khabir); ; the Siocoras, perhaps the same as that which Xenophon calls Mascas (Arab, i. 5. § 4): the Belias or Bilecha ; and the Mrgdonics (ifermes.) Under the Roman Empire, Desepotamia was divided into two parts, of which the western was called Ost bnïne, while the eastern contirued to bear its ancient name. It was conquered by Trajan in A. D. 11.5, who touk Singara and Nisibis, and formed the three Roman provinces ef Armenia, Mesopotamia, and Assyria, of which Mesopotania reached as far as the Persiar Gulf. (Dion Cass. Ixviii. 22, 23; Eutrop. viii. 3 ; Enseb. p. 165, ed. Scalig. ; Malalas, p. 274, ed. Bonn) But even Trajan conld net retain his conquests (Dion Cass. Ixviii. 29), and they were given up by Hadrian ef his own acconl. (Spartian, Hadr. 5: Eutrop, viii.6.) Under M. Aurelius, Mesopotamia was again conquered by L. Verus, as far as the Median Wall (S. Rufus, Brev. 14); and the conquest was further secared by the foundation of the culonies of Carrhae on the Chaboras and Singara, to which Septimius Severus added tbese of Nisibis and Rhesaena. But this province was a censtant canse of war between the Persian and Rernan empites; and at lengtb the greater part of it was surrendered to the Persians by Jovian in A. D. 363 . After this time Mesopotamia centained two ėmapxial: Osrhoëne, bounded on the seuth by the Chaboras, with the capital Edessa; and Mesopotamia, extending as far south as Dara, and having Amida as its capital. The province was governed by a Praeses. (Nrrquardt, in Becker's Rönisch. Alterth. vol. iii. pt. i. pp. 204, seq.)

The rnest impurtant cities of this province were Batvae or Bathnae; Carbuae; Circesily; Nisibis or Anticcheia Mlygdoniae; and Sixgabi.
[ S$]$
ME'SPILA (Mé $\sigma \pi i \lambda a$, Yen. Anab. iii. 4. § 10), An ancient deserted city of Assyria, noticed by Senephon on his retreat nortbwards from Babylomia. He describes it as about 6 parasangs from Larissa, on the same (or left) bank of the Tigris. He mentions that the town had been inbabited by the Medes, and that its walls were of immense size, the foundations being of polished shelly limestene, 50 feet in breadth and beight; and the part above, made of brick, being 100 feet bigh and 50 broad. The circanference of the whole work he states to have been 6 parasangs. He mentions, as a report, that on the Medians being conquered by the Persians, the queen, wbo was a Median, fled to this place; and that, when subsequently the place was beriuged by the Persians, tbey weuld have been unable to take it, bad not Zeus aided them with his lightning. There can be little doubt that Mespila is represented
ly the present Mosut，－the name of which is pro－ bably a corruption of the ohd name，－and that the ruins of Kogunjik，in its immediate peighbourhooed （notr certainly ascertained，by Colonel Rawlinson＇s decipherment of the irscriptions fonnd there，to have been a vast paface erected by Scumaclaerib）， are those which Xenophon beleeld in a state much less injured by time and violence thm they are at present．（Layard，Ninuech and Babylin，p． 658．）
［1．］
MESSA（Ḿ́बनŋ），ane of the nine cities of La－ conia enumerated by Homer，who gives it the epithet
 Strabo says that the position of Messa was unknown （viii．p． 364 ）；but Pausanias mentions a town and harbour，named Messa（iii．25．§ 9），which is iden－ tified by most modern scholars with the Homeric town．Tbis Messa，now Mezapo，is situated on the western crast of Mani，between Hippola and Oetylus ；and the cliffs in the neighbourinod are said to abound in wild pigeons．（Leake，Morea， vol，i．p． 286 ；Bublaye，Récherches，\＆c．p． 91 ； Curtius，Peloponnesos，vol．ii．p．282．）Leake， however，has subsequently conjectured that Messa corresponds to Mistra in the Spartan plain，jartly on accomut of its site，and partly becanse the Messa of Pausanias could never，trom its situation， have been a place of mach iuportance．（Pelopon． nesiaca，p．357．）But there dues not appear any sufficient reason for rejecting the identity of the Messa of Pausanias with the Messe of Hutrer．

MESSABATE＇NE（Plin．vi．27．s． 31 ；Meqбa－ Gaтıкฑ！．Strab．xi．p． 524 ：Eth．Mecoabácal，Ptol． vi．4．§ 3），a narrow district in the mid－land of susiana（as indeed its nanme implies），situated ac－ cording to Pliny under Mt．Cambalidus（one of the suathero spurs of Mt．Zagros），to the N．of the tribe of the Cossiaei．Sirabo states that it lies under Zagrus，and is either a part of Mcdia，or，as others hold，of Elymaea（si．p．524）：in another place he calls Massabatice an eparchate of Elymaea，and alds that the best pass into Assyria lay through it （svi．p．744）．Ptulemy（ $l, c$ ．），who does not mention the district by its name，makes the Bessalatase the inhabitants of Paraetacene，itelff a subdivision of Persis，adjnining Deflia．

MESSA＇NA or MESSE＇NE（Meの $\sigma \dot{\eta} \nu \eta$ in almost all Greek authors，but the Doric form Meroaiva， which is found in Pindar，was universally in use anong the citizens themselves，and was from them adopted by the Romans，who always write the nume Messana：Eth．Meoorivios and Meбod́yzos，Messa－ nensis：Messizet）an important city of Sicily，situated on the strait which divided that island from Italy， nearly opposite to Rhegium，and owly a few nules from Cape l＇elorus，the NE．extremity of the islaud． It was oriminally called Zaxele（ZáqкAク：Fth． Zarkגaios），a name said to be of Siculim origiu，de－ roved from Zá $\alpha \kappa \lambda u v$ ，which in the language of that people meant a sickte，and was obriously applied to the spot from the peculiar contionation of the urved spit or point of sand which enelosers its port．（Thuc． vi． 4 ；Steph．Brz．s．v．Zá $\begin{gathered} \\ \text { 人 } \eta \text { ；N＇tıab．vi．p．268；}\end{gathered}$ Diod．iv．85．）From this derisation of the name it would appear probable that there wis a Siculian set－ thement on the spat，before it was orcupied by the Grecks：but no meatinn of this is tomal in history， and all ancient writers deweribe Zancle as a Chalcidic colomy．Accorling to Threydume it was at first fonnded by a band of pirates frome the Italian Cumae．
situation of the place soon led to the esfablishment there of a more regular colony，consisting of settlers from Chaleis and the other citics of Euboea，at the head of whom were Perieres of Chalcis and Cratue－ menes of Cumae，who became the joint founders or Ockists of the new colony（Thuc，vi．4）．This state－ ment of Thucydides is confirmed in its leading points by Pausanias；while Scymnus Chius，as well as Strabu，thongh agreeing in its Chakidic origin，re－ prescot it as founded immetiately from the Chalcidic colony of Naxas in Sicily．（1’aus．iv．23．§ 7 ；Scymn． Cl．284－286；Strab．vi．p．268．）From this lat rension we may infer that it was looked upon as of more recent origin than Naxos，and therefore not founded till after $735 \mathrm{E}, ~ \mathrm{c}$ ；；but we have no clue to the precise，or ceven approsimate date，of its csta－ blishment．Of its early history we know scarcely anything；but we may probably infer that it me early to a flourishing condition，from the circumstance that the Zanclaeans were able before the cluse of the seventh century B．c．to estahlish two colonies on the N．coast of the island：Mylae，about 30 miles W．of Cape Pelorus，and Himera，much further to the W． （Thue，vi．5；Scyms．Ch．288；Strab．vi．p．272．） The latter grew up into a great and powerful city， but Mylae appears to bave continued for the most part a mere dependency of Zancle．（Strab．l．c．）

The Zanclaeans appear to lave been still desirons of extending their colonial system in this direction， and were endeavouring to induce fresh settlers from the lonian cities of A sia to co－operate with them in this enterprise，when the fall of Miletus in B．c． 494 gave a fresh impulse to emigration from that quarter． A large body of samians，tugether with some of the surviving Milesians，were in consequence induced to accept the invitation of the Zanclaeans，and set out for Sicily，with the purpose of establishing themselves on the N．coast between Mylae and Himera，which was commonly known as＂the Fair Shore＂（方 Kadt？ ＇Aктरf．）But having arrived，on their way，at Locri Epizeplayrii，they were bere persuaded by Anaxilas， tyrant of Rhegium，to take a treacherous adrantage of the absence of the Zaoclaean troups，who were engaged in military operations ebewhere，and surprise the city of Zancle itself．That city was at this time under the government of a despot named Scythes，to whum Herodotus gives the title of king．On fuding themselves thus betrayed，the Zanclaeans invoked the assistance of the powerful Hippocrates，despot of Gela；but that monarch in his turn betrayed them． and instead of aiding them to recover possession of Zancle，made common cause with the Samians，whom be confirmed in the possession of the city，while he threw Sicythes into prison，and reduced the greater part of the Zanclaeans ibto captivity．（Herod．vi． 22 －24：Thuc，vi．4；Scymn．Cb．293；Arist．Pol．r． 3．）By this sudden revolution，the Sunians found themselves in undi－puted passession of Zancle，but they did not long er joy their new acquisition．Not many years afterwards they were in their turn re－ duced to subjection by Auaxilas himself，who is said to have expelled them from the city，which he peopled with a mixed bondy of colonists，while ho gave to it the name of Messene，in remembrance of the land of that name in Greece，from which his own ancestors derived their descent．（Thuc，vi． 4 ；Uenod． vii． 164 ：Strab．vi．p．265．）
The esact period of this revolution cannot be de－ termined with certainty；but the first settlment of the Samians at Kan le cannot be carried baek further than B C． 493 ，yaile their subsequent expulsion or
subjectinn by Anaxilas must have occurred some years prior to his death in n. C. 476 . It is certain that at that period lie liad been for some time ruler both of Rhegiam and Zancle, the latter of which, according to one account, he had placed under the nominal government of his son Cleophron or Leophron. (Diod. xi. 48; Schol. ad Pind. Pyth. ii. 34.) It is certain, also, that before the close of his reign Zancle had assumed the name of Mlessenc or Messana, by which it has ever since been known. The error of Pausanias, who carries back the whole settlement, and with it the reign of Anaxilas to the close of the Second Messenian War, B. C. 668, has been sufficiently refuted hy Bentley (Diss. on Phalaris, pp. 204-224.) It is probable that be contounded the Second Messenian War with the Third, which was really contemporaneous with the reign of Anaxilas (Clinton, F. H. vol. i. p. 257); and it is not unlikely that some fugitives from the latter were among the fresh settlers established by Anaxilas at the time of the colunisation of Messana. It is probable also that the Samians were by no means ubsolately expelled, as stated by Thucydides, but continued to inhabit the city together with the new colonists, thongh deprived of their exclusive asceodancy. (Herod. vii. 164; Siefert, Zancle-Messana, p. 16.$)$

The Messanians for some time followed the fortunes of their neigbbours of Rbegium: they passed, after the death of Anaxilas, under the govermment of Micythus, and subsequently of the two soos of Anaxilas: but, after the death of Hieron, and the expulsion of his brother Thrasybulus from Syracuse, they took the opportunity, in coujnaction with the other cities of Sicily, to drive out their despots and assert their freedom and independence, B. c. 461. (Diod. xi. 59, 66, 76.) A latre body of the foreign settlers, who had been introduced into Sicily by the tyrants, were upon this occasion established in the territory of Messana, a proof that it was at this period still thinly peopled: but the city seems to have participated largely in the prosperity wbich the Sicilian republics in general engoyed daring the period that fullowed, в. C. $460-410$. The great fertility of its territory, and the excellence of its port, were natural advantages which qualified it to become one of the first cities of Sicily: and this appears to have been the case throughout the period in question. In n. c. 426, their tranquillity was, however, interrupted by the arrival of the Athenian fleet under Laches, which established itself at Nhegium, on the opposite side of the straits ; and from thence made an attack on Mylae, a fortress and dependency of the Messanians, which, thougb occupied by a strong Earrison, was complled to surrender. Laches, with his allies, hereupon marched against Messana itself, which was nuable to resist so large a force, and was compelled to accede to the Atbenian alliance. (Thuc. iii. 86, 90; Diod, xii. 54.) But the next year (n, c. 425) the Messanians hastened to desert their new alliance, and join that of the Syracusans; and from thenceforth their port hecame the chief naval station of the combined Syracnsan and Locrian fleets. (Thuc. iv, 1, 24, 25.) They thernselves, also, on one occasion, took courage to make a rigorous attack on their Chaleidic neighbours of Naxos, and were able to defeat the Naxians themselves, and shut them up within their walls; but were in their turn defeated hy the Siculians and Leontines, who had hastened to the relief of Niasos, and who for a short time laid siege, but
without effect, to Messana itself. (Thuc, iv, 25.) The Messanians were included in the general pacification of Sicily, B., C. 424; but were themselves still divided by factions, and appear at one time to have for a short period passed under the a tual dominion of the Locrians. (Id. v. 5.) At the time of the Atbenian expedition to Sicily (b, C. 415) they wese arain independent, aud on that occasion they persisted in maintaining a neutral position, though in vaio solicited by the Athenians on one side, and the Syracusaus on the other. An attempt of the former to make themselves masters of the city by treachery proved wholly ineffectual. (Dind. xiii. 4 ; Thuc. vi. 48,74 .) A few years later, the Messanians afforded a hospitable refnge to the fugitives from Himera, when that city was taken by the Carthaginians, в. C. 409 (Diod. xiii. 61), and sent an anxiliary furce to assist in the defence of Agrigentum against the same people. (Id. 86.)

It appears certain that Messana was at this period, one of the most flourishing and consilerable cities in Sicily. Diudorus tells us, that the Messanians and Rhegians together could equip a fleet of not less than 80 triremes (siv, 8 ); and their conthined forces were viewed with respect, if not with apprehension, even by the powerful Dhonysins of Syracuse. (Id. 44.) But though unfavourably disposed towards that despot, the Messanians did not share in the strong sympathies of the Rhegians with the Chalcidic cities of Naxes and Catana [Rhegitm], and pursued an uncertain and vacillating policy. (Diod. xiv. 8, 40, 44.) But while they thus sought to evade the hostility of the Syracasan despot, they were visited by a toore severe calamity. Himilcon, the Carthaginian general, who bad landed in Sicily in в. с. 396, having compelled Dionysius to fall back upon Syracnse, bimself advanced with a large army from Panormus, along the N. coast of the island. Messana was the immediate object of the campaign, on account of the importance of its port; and it was so ill prepared for defence, that notwithstanding the spirited resistance of its citizens, it was taken by Himilcon with little difficulty. Great part of the inhabitants made their escape to the surrounding conntry ; bat the rest were put to the sword, and not only the walls of the city levellen to the ground, but all its buildings so studiously destroyed as, according to the expression of Diodorus, to leave scarcely a trace of where it bad formerly stood. (Diod, xiv. $56-58$.)
After the defeat and expulsion of the Carthaginans, Dionysius endeavoured to repeople Messana with the fugitive citizens who survived, to whom he added fresh colonists from Locri and Melma, together with a small body of Messamian exiles, but the latter were son after transferred to the newly founded city of Tyndaris. (Diod, xiv, 78.) Meanwhile, the lihegians, who viewed with dissatisfaction the footing thus established by Dionysius on the Sicilian straits, endeavoured to obtain in their torn an adyanced post agrainst the Messanians by fortifying Mylae, where they established the exiles from Naxos, Catann, and other cities, who bad been driven from their homes by Dingssius. (Id. xir. 87.) The attempt, however, proved abortive : the Messanians recovered posscssion of Mylae, and conitinued to support Dionysius in his enterprises against Rbegiom. (Id. 87, 103.) After the death of that despot, we hear but little of Messana, which appears to have gralually, but slowly, risen again to a flonrishing eondition. In B. c. 357 the Dlewa-
mians are mentioned as sending ass tance to Dion against the yomerer Dionysius: and aftom the cieath of Dion, they repulserd ate atempt of Calloppes to make himself master of their city. (Dion. xvi. 9; Ilut. Dion, 58.) At a somewhat later perion, howerer, they fell under the yoke of a tyrant namad Ilippon, from whom they were freed by Timolem, (B. c. 339), and at the same time detached from the alliance of Carthage, to which they had been for a time compelled to adhere. (Diod. xvi. 69; Plat. Timal. 20, 34.)
But Messana did not long enjoy her newly recovered freedom. Soon after the establishment of Arathocles at Syracuse, that monareh turned his arms against Messama, and, thongh his first attempts, in B. C. 315 , were unsuccessful, and he was even compelled to re-tore the fortress of Mylae, of which he had for a time made himself master, a few years later, B. c. 312, he succerded in establishing lis pawer at Messana itself. (Diod. xix. 65, 102.) But the severities which be exercised against the party which had opnosed him completely nlienated the minds of the Messanians, and they readily embraced the opportanity of the defeat of the tyrant at Enomas in the fullowing sear, n. c. 311 , to throw off his yoke and deelave in favour of the Carthaginian alliance. (Id. xix. 110.) The death of Azathocles, soon after, brought upon the Messenians even heavier calmmities than his enmity had done. The numerous bands of mercenary troops, chicfly of Campanian, or at least Oscan, extraction, which the despot had assembled in Sicily, were, after his death, compelled by the Syracusans, with the support of the Carthayioians, to quit the island. But, having arrived with that object at Messpna, where they were hospitably received by the citizens, and quartered in their hotises, they suddenly turved against them, massacred the male imhabit, onts, made themselves masters of thoir wives, houses, and property, and thus establi-hed themselves in undisputed possession of the city. (Pol. i. 7; Diod. sxi. 18, Esc. H. p. 493 : Strab. vi. p. 268.) They now assumed the name of M.ımertint (Mapsptâor), or "the children of Mars," from Mamers, an Usean name of that deity, which is found also in old Latin. (Diwl. I.c.; Varr. L. L. v. 73.) The eity, however, continued to be called Messana, thongh they attempted to ehance its name to Mamertina: Cicero, indeed, in several instances calls it "Mamertina civitas" (Cic. Ferr. ii. 5, 46, in. 6, iv. 10, \&c.), lut if toch more fieruently Mesana, thungh the inhabhitants were in his time miversally called Mamurtiti. The precise period of the orcupation of Mesans hy the Mamertines is nowhere stated. l'dyhius tells ws that it oceurred not long before that of Rhegium by the Campanians under Decius, which may be refersed to the your $280 \mathrm{~s} . \mathrm{C}$., while it must have taken place some time after the death of Astathocles in 1. C. 289 ; the year 282 is that commonly asigned, but within the ahove limits this is metely chnjectural.

The Matmertines now rapidly eatended their porer over the whole NE: ansle of Sicily, and made themselves masters of several fortresers and towns. The orepation of Thecrium by the Campanians, under very similar circumstances, contributed to streng ben their position and they became one of the most formidable powers in sirily. The arrival of I'yrrhus in the island (b.c. 27 s) fir a time gate a check to their argrandisement: thry in vain contined with
thongh he defeatel their forces in a battle and took severil of their fortresses, he did not attack Messana it elf; and on his return to Italy the Mamertines sent a large force across the straits which attacked the army of the king on its march, and inflicted on hinn severe losses. (Plut. Pyyrh. 23, 24; Diod, xxi. 7. p. 495.) The M.anertines, however, soon found a more formidable enemy in Ilieron of Syracuse, who, shortly after the departure of Pyrrbus from Sisily, established himself in the possession of the chief power in that city. His efforts were early directed aquainst the Mamertines; and after the fall of Rhecium, which was taken by the Romans in n. c. 271 , he invaded their territory with a great army, reduced the fortress of Mylae, and defeated the Mamertines in a battle on the banks of the river Longanus, with such slaughter that they were on the point of surrendering Messana itself without a blow; and the city was saved only by the intervention of a Cartbaginian force under Hannibal. (1'ol. i. 8, 9; Diod. sxii. 13. pp. 499, 500.) The events which followed are obscurely known to us, and their chronology is very uncertain ; but the Namertines seem to have found that they were no longer able to stand alone against the power of Hieron; and, while one party was disposed to throw themselves iuto the arms of the Carthaginians, another souglit protection from the power of Rome. The latter nltimately prevailed, and on embassy sent by the Manertines, to invoke the alliance of the Romans, first gave ocension to the intervention of that people in the aftilirs of Sicily, and became the origin of the First Punic War, 11. c. 264. (Pol. i. 10; Diod. xxiii. 1; Zonar. viii. 8: Orus, iv. 7 : Liv. Epit. xvi.)

Before the arrival of the promised aid from Rome the Carthnginian party had again prevailed, and the citadel was occupied by a Cartlaginian garrison; but this was expelled by the Mamertines themselves on the arrival of C. Clandius; and soon after the consul Appius Claudius landed at Messana, and drove off in succession the Carthaginians and Hieron, who had just before concluded an alliance against the Mamertines, and laid siege to the city with their combined forces. (Pol. i. 11, 12; Diod. кxiii. 1, 3. p. 501: Zonar. viii. 8, 9; Dion Cass. Exe. Vat. 58 60.) Messana was now protected by a Roman garrison. and, dluing the whole course of the war which followed, continued to be one of their chief strongholls and the principal station of their fleets. The importance of its harbour, as well as its ready commumication with ltaly, rendered it a point of rital impurtance to the lomans: and the Namertines either entrinued steadily fairhfol or were kept under by the constant presence of a Roman force. (Pol, i. 21 , 25, 38, 52; Diod. xxiii. 18. p. 505, xxiv. 1. 1. 508: Zonar, viii. 10, 12.) At the close of the war the Mamertines obtained a renewal of their treaty, and continued to enjoy henceforth the nominal priviteres of an allied city (foederata ciritas), while they in reality passed under the dominion of Rune. (Cic. Ferr. iii. 6.) Even in the time of Cicero we find them still retaining this privileged condition; and though this alone would not have sufficed to protect them against the exactions of Verres, the Mamertines arimar to have adoptend the safer policy of suppurting the practor in all his oppressions and conciliating him by luibes, su that they are represented by the orator as the accomplices, as well as defenders, of all his iniquities. (C'ic. 16. ji. 5, 46, iv. 8, 67, \&c.)

Mesoma was certainly at this time one of the most populuas and flourishing places in Sicily. Civeno
calls it a very great and very rich city ("civitas maxima et locupletissima," Verr. v. 17), and extols the advantages of its situation, its port, and its buildings. (Ib, iv. 2.) Like all other allied cities, it had its own senste and magistrates, and was legally subject to no other contributions than the furnishing ships and naval supplies in case of war, and the contributing a certain proportion of the corn furnished by Sicily to Rome at a given rate of remuneration. (Ib. v. 17-22.) Nor does Messana appear to have suffered severely from any of the wars that caused such ravages in Sicily, thougb it narruwly escaped being taken and plundered by Athenion during the Servile War, B c. IOI. (Dion Cass. Fr. Val. p. 534.) In the Civil War, b. c. 48, it was the station of a part of the flect of Caesar, which was attacked there by that of Pompey under Cassius, and the whole of the ships, thirty-five in number, burnt; but the city itself was protected by the presence of a Roman legion. (Caes. B. C. iii. 101.) At a somewhat later period it was the head-quarters and chief stronghold of Sextus Pompeius during bis war with Octavian, n. C. 36 ; and its capacions harbour became the station of the fleet with which he commanded the coasts of Sicily, as far as Taurumenium on the one side and Tyudaris on the other. It was from thence also that Pompeius, after the total defeat of his fleet by Agrippa, made his escape with a squadron of only seventeen ships. (Appian, B. C. v. 97, 103, 109, 122; Diun Cass. xlix. 1-12; Strab. vi. p. 268.)

It was in all probability in consequeuce of this war that Messana lost the privileged condition it had so long enjoyed ; but its inhabitants received in exchange the Roman franchise, and it was placed in the ordinary position of a Roman municipium. It still continued to be a flomishing place. Strabo speaks of it as one of the few cities in Sicily that were in his day well peopled; and though no subsequent mention of it is found in history under the Roman Empire, it reappears during the Gothic wars as one of the chief cities and most important fortirsses in the island,-a rank it had undonbtedly held throughout the intervening period. (Strab. vi. J. 268 ; Plin. iii. 8. s. 14 ; Ptol. iin. 4. § 9 ; Mel. ii. 7. § 16 : Procop. B. G. i. 8, uii. 39.) The wine of the neighbourhood of Messana, known as Vinum Mannertinum, exjoyed a great reputation in the days of Pliny; it was first brought into vogue by the dictator Caesar. (Plin, siv, 6. s. 8.)

Throughout the vicissitudes of the middle ages Messina continued to be one of the most important cities of Sicily; and still ranks as the second city in the island. It has, bowever, but few remains of autignity. The only vestiges are some baths and tesselated pavements, and a small old church, suppased to have formed part of a Roman basilica. (Singth's Sicily, p. 118.) Another church, called §. Gioranni de Fiorentini is believed, but wholly withont authority, to oecupy the site of the Sacrarium or family chapel of Heius, from which Verres purloined a bronze statue of Hercules, attributed to Myron, and one of Cupid, which was believed to be the work of Praxiteles. (Cic. Yerr. iv. 2, 3.)

The celebrated port of Messana, to which the city ored its chief importance in ancient as well as modern times, is formed by a projecting spit or torgue of sand, which curves round in the form of a cresent or sickle (whence the name of Zancle was suppused to be derived), and constitutes a natural vole 11.
furm MEEEANION or MEEミANISN．4，Coins struck by the Manertines，with the name of MA－ MEPTINAN．These are very numerons，but in copper unly．（Millingen，Trans，of Roy．Sue，of Lit． vol．i．pt．ii．pp．93－98；Eckhel，vol．i．pp．219－ 224．）
［E．H．B．］
MESSA＇PIA（Mearamia），was the name com－ monly given by the Greeks to the peninsula forming the SE．extromity of Italy，called by the Romans Calierta．But the usage of the term was very fluctuating；Iapygia and Mlessapia being used some－ times as synonymous，sometimes the latter con－ sidered as a part only of the former more general designation．（Pol．iii．88；Strab．vi．pp．277，282．） ［This question is more fully disenssed under Cala－ biina，Vol．I．p．472．］The same ancertainty pre－ vails，thoogh to a less degree，in the use of the name of the people，the Messifil（Meबбámiot），who are described by Herodutus（vii．170）as a tribe of the Iapygians，and appear to be certainly ideotical with the Calabri of the Romans，thongh we have no explanation of the origin of two such different ap－ pellations．The ethnical aftinities of the Messapians have already been discussed，as well as their history related，noder the article Calabria．
Italian topographers in general admit the exist－ ence of a town of the name of Nessapia，the site of which is supposed to be marked by the village now called Mesagne，between Oria and Brindisi；but the passage of Pliny，in which alone the name is found，appears to tie corrupt；and we shonld proba－ bly read，with Cluverius and Mommsen，＂Varia （Uria）eni cognomen ad discrimen Apulae Mes－ sapia．＂（Plin．iī．I1．s．I6．§ 100；Cluver，Ital． p． 1248 ；Monımsen，Die Linter．Ital．Dialekte，P． 61．）

MLSSENE（Meबनทimp：Eth，and Adj．Me $\sigma$－ ớrios：Adj．Meoorquiakós），the later capital of Messenia，built ander the direction of Epanimondas in B．c． 369 ．（Diud．xr．66；l＇ans．iv．27．）The name of Messene had been applied in ancient times to the country inhabited by the Jessenians；but there was no city of this name till the one founded by Epaminondas．The Thebans and their allies assisted the Messenians in building it ；and the best architects and masons were invited from all Greece t．lay out the city with regnlarity，and to arrange and construct properiy the temples and other public buildings．Epanimondas aloo tonk especial pains with the fortifications，which were regarded by Pausanias as the most perfect in Greece．The walls， as well as the towers and bulwarks，were built en－ tirely of stnne；and the excellemce and solidity of the masonry are still apparent in the existing remains．（Paus．iv．31．§ 5．）The foudation of the city was attended with great pomp and the celchration of solemn sacrutices．First，sacrifices were offered by Epaminondas，who was recognised ns Ockist or Founder，to Dinnysos and $A_{1}$ ollo I－menins，－by the Argives to the Argive Ifera ：nd Zeas Nimelus，－by the Mesomians to Zous Itho－ matas and the Diuscnri．Nest．prnyer was offered to the ancjent Iferoes and IIeroines of the Messenian nation，especially to the warrior Aristomenes，that they would cone buhk and the up thoir plode it
the new city．After this，the ground was marked out and the bnilding begnn，under the sound of Argive and Boeotian flutes，playing the strains of Pronomus and Sacadas．（Paus．iv．28．§ 6；Grote＇s Greece， vol．ix．p．309．）The history of this town is related under Messenia，so that it is only necessary in this place to give an account of its topography．

Messene is situated upou a rugged moontain， which rises between the two great Messenian plains， and which thus commands the whole country．This mountain，abont half－way up，divides into two sum－ mits，of which the northern was called lthome and the southern Eva．The sharp ridge connecting them is about half a mile in length．Mt．Ithone is one of the most striking objects in all Pelopon－ nesus．It rises to the height of 2631 feet，or more than 700 feet higher than the Acrocorinthus；hut it looks much loftier than it really is，in consequeace of its precipitons sides and isolated position． Upon this summit the Acropolis of Nessene was built；but the city itself was situated in a hollow somewhat in the form of a shell，extending on the west side of the sharp ridge which cannects lthome and Eva．Tbe city was connected by a continuous wall with its acropolis．There are considerable remains of the aocient city，and the walls may still be traced in the greater part of their extent．They are most perfect on the northern side，with the Arcadian or Megalopolitan gate in the centre．They may be fullowed up to the sumnit of Ithome，and then along the ridge connecting Itbome and Eva ；but bere towards the south－east traces of them are sometimes lost．In this part，however， the foundations of the eastern or Laconian gate， as it has been called，are clearly seen．The sum－ mit of SIt．Eva was evidently not included within the city walls．The direction of the southem wall is most uncertain．From the eastern gate to the ruins，which are supposed to be those of the sonthern gate，and near which the present road runs to the sunthern Messenian plain，no line of walls can be traced；but on the western side the walls may again be clearly followed．The circuniference of the walls is about 47 stadia，or nearly 6 English miles ； but it includes a large space aitogether unfit for the site of buildings；and the great extent was dumbtess intended to receive a part of the surrounding popn－ lation in time of war．

The space iucluded within the city－walls now con－ sists of corn－felds and pastures amidst wouds of nild olive and uak．Nearly in the centre of the ancient town is the modern village of Morromáti ；and near the southeru gate，at the foot of Joust Eva，are two poor villages，named Simissa．On the eastern slope of Murnt Eva is the monastery of Jurkíno，embossed in cypress and orange groves，and one of the most

elegant and picturesque structures of this class in Greece.

The northern gate, leading to Megalopolis in Arcadia (Paus. iv. 33. $\S 3$ ), is one of the finent speci-

PIAN OF THE RUINS OF MESSENE.

## A. Arcadian or Megalopolitan Gate.

mens of Greek military architecture in existence. Its form is seen in the preceding plan. It is a small fortress, containing double gates opposite to one snother, and connected by a circular court of 62 feet in diameter. In front of the outer gate on either side is a strong rectangular tower. Upon entering the conrt through the outer gate, there is a niche on each side for a statue, with an inscription over it. The one on the left hand is still legible, and mentions Quintus Plotius Euphemion as the restorer (Böckh, Inscr. No. 1460). Pausanias (iv. 33. §3) notices in this gate a Hermes in the Attic style, which may possibly have stood in one of these niches. Leake ohserves that the interior masonry of the circular court is the most exact and beautiful be ever sam. The lower course is a row of stones, each about $5 \frac{1}{2}$ in length and half as mach in height; upon this is placed another conrse of stones of equal length and of half the height, the joiots of which are precisely over the centre of each stone in the lower coorse. The upper part of the walls has fallen: nioe conrses are the most that remain. Neither gateway retsins its covering, but the flat architrave of the inner one lies in an oblique position upon the ruins of the wall hy which it was formerly supported; it measures 18 feet 8 inches in length by 4 feet 2 inches in breadth, and 2 feet 10 inches, in thickness.

The road still Jeads throngh this gate into the circnit of the ancient city. The ruins of the towers, with the interjacent curtains, close to the gate on the slope of Mount lthome, slow this part of the fortifications to have resembled a chain of strong redonbts, each tower constituting a fortress of itself. "A flight of steps behind the curtain led to a door in the flank of the tower at half its beight. The upper apartment, which was entered hy the door, had a range of loopholes, or embrasures, on a line with the door, looking along the parapet of the curtain, and was liyhted by two windows above. The embrasures, of which there are some in each face of the tuwers, have an opering of 7 inches within, and of 3 feet 9 inches without. so that, with a small opening, their scope is very great. The windows appear to be too high for any jurpose but to give light. Both the curtains and towers in this part of the walls are constructed entirely of large squared blocks, without rubble or cement. The curtains are 9 feet thick. The inner face of the towers bas neither door nor window. The tower next to the gate of Mlegalopolis has had all the stones disjointed, like those of the Propylaea at Athens, probably by an earthquake." The towers are in ceDeral about 25 feet square, projecting about 14 feet. from a curtain varying in length according to the nature of the g-aund, and 8 or 10 feet in thickurss.

The masonry was not in geneml such as has been describel at the towers near the gate of Megalopulis, but, as in must tireek works of defence, consisted of an exterior and interior facing of that kiod of masomry filled up with rubile.

In deseriling Messene, Pausanias first mentions the Agora, which contained a fountain called Arsinoe, supplich by a subterraneous canal from the source named Clepsydra. In the Agora, probably ia the centre, was a statue of Zcus Soter. Tbe various temples, which he then proceeds to eaumerate, either surrounded the Acora, or were in its immediate neighlamonood. These were temples of Poseidon aud Aplarodite; a marble statne of the mothes of the gods, the work of Damopion, who also made the statne of Artemis Laphria; a temple of Eileithyia, a sacred building of the Curetes, and a sanctuary of Demeter, containing statues of the Dioscuri. But the temple of A-clepius contained the greatest number of statues, all of which were made by Damophon. The temple of Messene contained her statue in gold and larian marble, while the back part was alorned with pictures representing the Messenian heroes and kings. A building, called Hierosythium, contained statues of all the gods wurshipped by the (irceks. Pausanias nest mentions the gymnasium, with statues made by Acgyptinn artists, a pillar bearing a ficure of Aethidas in relief, and the monument of Aristomenes, -the stadium containing a brazen statne of Aristomenes ; and lastly, the theatre, with the adjoioing temple of Serapis and Isis, The funntain called Clepsydra occurs in ascending to the stumnit of lthome. On the summit was a temple of Zeus lthomatas; and an annual festical, called Jthomaea, was celebrated in hmour of the god. (Paus, iv, 31. § 6-iv, 33. § 2.)

The Agora must have stood near the modern village of Mavromuiti, in the neighbourhood of which most of the fonndations of the ancient buildings are found. The rivulet, which nuw ruas unconfined through the village, was in ancient times cooducted throngh a subterrancous canal, aod furmed the fountain Arsinve mentioned above. The modern vallage has derived its name from the spring, Macromeiti meaning Black Spring or Black Eye. South of the site of the Agora are the ruins of the stalium, of which the upper or circular ead and more than balf of one of the sides still remain. The rivulet of Marromiti now runs through the length of the stadium. "The stadium was surrounded by a colonnale, which was double at the upper end: bere the lower parts of the columns are in their original places; there were about twenty in each row, 1 foot 10 inches in diameter, with Doric flutiogs. l'art of the colunnade, on the right side of the stalium, is Bikewise io its place, and on the left side is the foundation of a public edifice, where are many pieces of columns of the same description as the colonaade round the stadium. Perhaps this was the Hierothysium. The stme seats of the stadium did not extend its whole lenuth, but about twothirk only : at the circular end, they are most perfect." (Le.ke.) limmediately south of the stadiun is a wall, which appears to have been part of the walls of the city. In this wall a small temple is built, lik= a kind of tower. Between the stadium and the village of Marromati, to the west of the rivulet, are the remains of a small theatre, about 60 feet in diameter. North of the stadian the slope is divided into terraces, of which the suppurting walls still rensin. Were some

In ascending Mount lthome, there is ahout half way ap a terrace of considerable size, which commands a fine view of the Messenian gulf. Here the French Commission discovered some ruins overgrown with shrubs, which appear to have beed an Ionic temple facing the east, containing a porch with two colunus and a cella. This was probahly a temple of Artemis, as an inscription here found contains the names of Messenians, who had held the priesthood of Artemis Limnatis, and the remains of the statue discovered io the cella appear to be those of this goddess. Beluw the temple are two smaller terraces ; and 60 feet further sideways, WSW. of the temple, is a kind of grotto cut out of the rock, with a portico, of which there are remains of five pillars. This was, perhaps, intended to receive the water of the fountain Clepsydra, which Pausanias mentions in his ascent to the summit of the mountain. The summit itself is a small flat surface, exteoding from SE. to NW. On the borthern and eastern sides the wall runs along the edge of the perpendicular cliffs, and some remains of a more ancient masonry may be perceived, which probably belonged to the earlier fortifications of Messene. At the northern and brouder ead of the summit are the deserted buildings of the monastery of Vurkano; this was undonbtedly the site of the temple of Zeus Ithomatas. There is a magnificent view from the summit. Along the nortbern loundary of the horizon the Lycaean range extends : to the east are seen the mountains now named Jaktgplai, which unite with the range of Taygetam ; to the north-west the sea-coast between the rivers Cyparisseeis and Neda is visible; while to the south the mouth of the Pamisus and the Messeoian gulf are spread open to view.

The similarity of Ithome to Acrocorinthos is noticed by Strabo (viii. p. 361). He observes, that both are lofty and precipitous mountains, overhanging their respective cities, but coonected with them by a cummon line of fortifications. Messene continued to exist in the later times of the Roman empire, as we learn from inscriptios ; bat in the middle ages it had ceased to be a place of any importance ; and hence the ancient remains have been less disturbed ly the hands of man than in most other parts of firecce. (Lenke, Morea, vol. i. p. 366, seq. ; Mure, Tour in Gireece, rol. ii. p. 26.4; Boblaye, Richerches, fe., p. 107, seq.; Curtius, Pelopunnesos, vol. ii. p. 138 , seq.)

MEssli'NIA (Meaotvia. Herol., Thuc.; io older
 Pind. Pyth. ir. 126 ; shortened Mé $\sigma \sigma \eta$, Mé $\sigma \eta$,
 41 : Eth, and Adj. Mea 1 the south-westerly district of Peloponnesus, bounded on the east by Laconia, on the north by Elis and Areadia, and on the south and wert by the sea. It was separated fron Laconia by IIt. Taygetus, but part of the western slope of this mountain belonged to Laconin, and the exact boundary between the two states, which varied at different times, will be mentioned presently. Its southern foontier was the kont of mountains, which form the watershed of the rivers Neda, l'anisus and Alpheius. On the south it was washed by the Messemian gulf ( $\delta$ Meaonviakos $\boldsymbol{\kappa} \delta \lambda \pi$ ros, Strab, viii. p. 335), called also the Coronaran or Asimaean gulf, from the towns of Corone ur Asine, on its western shore, now the Gulf of Ko roni. On the east it was bounded by the Sicilian or Ionian sea. The aren of Messenia, as calculuted liy

MESSENIA．
MIESSENIA．

I．General Descrittion of the Country．
Nessenia，in its general features，resembles La－ conia．The Pamisus in Messenia，like the Earotas in Laconia，flows throngh the entire length of the country，from north to south，and forns its most cultivated and fertile plains．But these plains are much larger than those in Laconia，and constitute a considerable portion of the whole comntry；while the mountains on the western coast of Messenia are much less rugged than on the eastern coast of Laconia，and contain a larger propertion of fertile land．Hence the rich plains of Messenia are often contrasted with the sterile and rugged soil of Laconia； and the climate of the former conntry is praised by the ancients，as temperate and soft，in comparisoa with that of the latter．The basio of the Pamisus is divided into two distinct parts，which are separated from each other on the cast by a ridge of mountains ex：ending from MIt．Taygetus to the Pamisus，and on the west by Mt．Ithome．The npper part， called the plain of Stenycleras or Stenyclarus（ $\tau \delta$
 moderate fertility，and is entirely shut in by moun－ tains．The lower plain，which opens to the Mes－ senian gulf，is much more extensive，and was some－ times called Macaria（Maкарia），or the＂Blessed，＂ on accuant of its surprising fertility．（Strab．viii． p．361．）It was，donbtless，to this district that Euripides referred，when he described the excellence of the Messeoian soil as too great for words to esplain，and the land as watered by innumerable streams，abounding in fruits and flocks；neither too hot in summer，nor too cold in winter．（Eurip．ap． Strab．viii．p．366．）Even in the present day， although a part of the plain has become marshy by neglecting the embankments of the Pamisus，it is described by travellers as the most fertile district in the Peloponnesus．It now prodaces oil，silk，figs， wheat，maize，cotton，wioe，and honey，and presents as rich a cultivation as can well be imagined． （Leake，Morea，vol．i．pp．347，352．）Besides the Pamisus，numerous other streams and copions per－ eunial springs gush in all directions from the base of the mountaios．The most remarkable feature on the western coast is the deep bay of Pylos，now called Navarino，which is the best，and indeed the ouly really good harbour in the Peloponnesus．

## II．Mountains，Promontories，Rivers，and lslands．

1．Mountains．－The upper plais，in which are the sources of the Pamisus，was the origioal abode of the Messenians，and the stronghold of the nation． Here was Andania，the capital of the most ancient Messenian kings．Thither the Messenians retreated， as often as they were overpowered by their enenies in the lower plains，for here were their two great natural fortresses，lthome and Eira，the former cormanding the entrance to the lower plain，and the latter sitnated in the mountains，which rise in the northern part of the apper plain．These monn－ tains，now called Tetrizi，form，as has been already said，the watershed of the rivers Neda，Pamisus，and Alpheius．From this central ridge，which is 4554 feet high，a chain extends towards the west，along the hanks of the Neda，and is also prolonged towards the south，forming the mountains of the western peninsula，and terminating at the promontory Acritas． From the same central ridge of Tetrazi，another chain exteads towards the east，dividing the Mes－ senian plain from the upper basin of the Alpheius，
and then uniting with Mount Taycetns，and form－ ing the barrier between the basins of the lower Pamisus and the Enrotas．These two mountain chains，which，issuing from the same point，almoet meet abont balf－way between Mount Tatrózi and the sea，leave only a narrow defile throngh which the waters of the Pamisus force their way from the upper to the lower plaio．Sonth of this defile the mountains again retire to the east and west，leaving a wide opening for the lower plain，which has been already described．

Scarcely in any part of Greece have the names of the ancient mountains been so little preserved as in Messenia．Tetrazi was perhaps the monntains of Eira．The eastern contimation of Tetrázi，now named Makrypleii，formed part of the ancient Mt．Nomia．（Nopia ઠ́pך，Paus．viii．38，§ 11．） The western prolongation of Tetrazi along the banks of the Neda was called Elaeum（＇Exdiov）， now Kuvela，and was partly in the territories of Phigalia．（Paus．viii．41．§ 7．）The mountains Ithome and Evas are so closely connected with the city of Messene that they are described under that head．［Messexe．］in the southern chain extending down the western peninsula，the names only of Aegaleurn，Buphras，Tomeus or Mathia， and Temathia hate been preserved．Aegalecmi （Ai＇yà＇́ov）appears to have been the name of the long and lofty ridge，ranning parallel to the western shore between Cyparissia and Coryphasium（Pylos）； since Strabo places the Messenisn Pylos at the foot of Mt．Aegaleum（riii．p． 359 ；Leake，Morea，vol．i． pp．426，427）．Buphras（方 Bouфpás）and Tomers（ $\delta$ To $\mu$ tús）are mentioned by Thucydides （iv．118）as points near Coryphasium（Iylos）， beyond which the Lacedaemonian garrison in the latter place were not to pass．That they were monntains te may conclude from the statement of Stephanns B．，who speaks of the Touaion jpos near Coryphasium．（Steph．B．s．$v$ ．Toutús．）TE－ mathla（Tiua日ia），or Mithia（Ma日ía，the reading is doubtful），was situated，according to Pansanias （iv．34．§ 4），at the foot of Corone，and must there－ fore correspond to Lykoidimo，which rises to the beight of 3140 feet，and is prolonged sonthward in a gradually falling ridge till it terminates in the promontory Acritas．

2．Promontories．－Of these only four are men－ tioned by name，－Acritas（＇Aкpitas），now C． Gallo，the most southerly point of Messenia［Acri－ tas］；and on the west coast Corymbasicm， forming the entrance to the bay of Pylus［Pvics］； Platamodes（ II入ata $\mu \omega^{\prime} \delta \eta s$, Strab．viii．p．348）， called by Pliny（iv．5．8．6）Platanodes，distant， according to Strabo（l．c．）， $1: 20$ stadia N．of Cory－ phasium，and therefore not far from Aia Kyriaké （Leake，vol．i．p．427）；and lastly Cypanissicm ［Ciparissis］，a little further north，so called from the town Cyparassia．

3．Rivers．－The Pamisus（Hauıбб́s）is described by Strabo as the greatest of the rivers withip the Isthmous（riii．p．361）；but this name is only given by the ancient writers to the river in the lower plaio，thongh the moderns，to facilitate the descrip－ tion of the geography of the country，apply this name to the whole course of the waters from their sources in the upper plain till they fall into the Messenian gulf．The principal river in the opper plain was called Balyba（Ba入ipa）．It rises dear the village of Sulimd，and flows along the western side of the plain：two of the streams composiang it
were the Elfotra ('H入éktpa) and the Coer's (K ôs). Near lhome the lsalyra receives the umted waters of the Letceasin (Aeveariaz) and the Anpiritrs ("Auфizos), of which the firmer flows from the valley of Bugnsi, in a dinuction from N . t.) E., while the latter rises in Mt. Makryptai, and Hhows through the plain from E. to W. This river (the Amplaitis), which may be regarded as the prin(ijact onf, is formed ont of two streams, of which the northern is the Charalms (Kápa§pos). (Ou the Bulyat and its tributaries, see l'ans. iv. 33. §s 3-6.) The Balyra abose the junction of the Amphitus and Lencasia is called Tasiliku, and below it Matrozimeno, though the latter name is sometimes given to the river in its upper course aloo. At the junction of the Balyra and the Amphitus is a celebrated trimgular bridge, known by the name of the bridge of Mucrozumeno. It consists of three branches or arms meeting in a common centre, and corresponding to the three principal roads through the plain of Stenyclerus. The arm, ruming from north to south passes over no river, but only over the low swampy ground between the two streams. At the southern end of this arm, the two others branch off, one to the SW. over the Balyra, and the other to the SE. over the Amphitus, the former leadinc to Mussene and the other to Thuria. The foundatoms of this bridge and the upper parts of the piers are ancient: and from the resemblance of their masonry to that of the neighbouring Messene, they may be presumed to belong to the same period. The arches are entirely modern. The distance of this bridge from the Megalopolitan gate of Dessene agrees with the 30 stadia which Pausanias (iv. 33. § 3) assigns as the interval betwepu that gate and the Balyra: and as he says immediately afternards that the Leucasia and Amphitus there fall into the Balyra, there can be little doubt that the bridge is the point to which Pausanias Procended fiom the gate. (Leake, Morea, vol. i. Pp. 480, 481.)

plan of the nridge of mavinzumieno.
The Merrozimeno, shortly after entering the lower plain, received on its left or western side a considerable strean, which the ancients regarded as the genuine Pamisus. The soures of this river are at a north-entern eorner of the plain near the chay 4 of St. Ftoro, and at the foot of the rilge of Sloctu. The position of these somrees marves suffienently with the distances of Pansanias (iv. 31. § 4) and Strabo (viii. 1. 361), of whom the former writer describes them as 40 stadia from Messene, while the latter asoifus to the l'aminus a conse of only 100 stadia. Between two and three miles south of the sourco of the lamisus there rises anather river callm Pathima, which flows SW, and

t. ${ }^{2}$ b bolow Nixi, and at no great distanee from the sea. Aras ("Aprs) was the aurient name of the Firlhima. (Prans, iv, 31. § 2.) The Maurozi. meno, after the junction of the Pidhima, assumes the name of Dhipotamo, or the double river, and is navigable by small boats. Pausanias describes it as navigable 10 stadia from the sea. He further says that seafish aseend it, especially in the spring, and that the mouth of the river is 80 stadia from Messene (iv. 34. § 1).

The other rivers of Messenia, with the exception of the Neda, which belongs to Arcadia also [NEDA], are little more than momntain torrents. Of these the most important is the Nenox (Né $\delta a \nu$ ), not to bo confounded with the above-mentioned Neda, Howing intothe Messenian gulf, east of the Pamisus, at Pherae, It rises in the mountains on the frontiers of Laconis and Messenia, and is now called the river of Kalamaita: on it there was a town of the same name, and also a temple of Athena Nedusia. (Strab, viii. pp. 353, 360 ; Leake, Morea, vol. i. pp. 344, 345; Ross, Reisen itn Peloponnes. p. 1.) The other mountain torrents mentioned by mame are the Buas (Bias), flowing into the western side of the Messenian gulf, a little above Corone (Paus. iv. 34. § 4); and on the coast of the Sicilim or Ionian sea, the Selas ( $\sum$ einas. Ptol. iii. 16. § 7), now the Longorardho, a little S. of the island Prote, and the Cypabissty (Kvad́pıन 0 ), or river of Arkhudhia. [See Vol. I. p. 728 .]
4. Islands.-Thegastess ( $\Theta \eta \gamma a v o \bar{v} \sigma \sigma \alpha$ ), now lenetike, distant 3700 feet from the southern point of the promontory Acritas, is called by Pansanias a desert island ; but it appears to have been inhabited at some period, as graves have been found there, and rains near a fountain. (Paus. iv. 34. § 12; Envaraû̃a or Єuvaroûta, Ptol. iii. 16. § 23 ; Plin. iv. 12. s. 19. § 56 ; Curtius, Peloponnesas, vol. ii. p. 172.) West of Thegannssa is a group of islands called Orxessan (Oivov̂arau), of which the two largest are now called Cabrera (by the Greeks $\mathbf{\Sigma}_{\chi}(\bar{\zeta}(\alpha)$ and Supienza. They are valuable for the pasture which they afford to cattle and horses in the spring. On the eastern side of Sapienza there is a well protected harbonr ; and here are fonnd cisterns and other remains of an ancient settlement. (Pans. ir. 34. § 12 ; Plin. ir. 12.s. 19. § 55 ; Leake, vol. i. p. 433 ; Curtius, vol. ii. p. 172.) On the western coast was the island of Srusctema, opposite the barboar of Pycus; and further north the small island of Prote (Прळтй), which still retains its ancient name. (Thuc. is. 13; Plin. is. 12. s. 19. $\S 55$; Mela, ii. 7 ; Steph. B. s. $v$. )

## Il1. History.

The earliest inhabitants of Messenia are said to have been Leleges. Polycaon, the younger son of Lelex, the kine of Laconia, married the Argive Messene, and twok possession of the country, which he named after his wife. He built several towns, and amoug others Andamia, where ho took up his residenee. (Paus i. 1.) At the ond of five qencrations Aculians cane into the country under l'erieres, a son of Aeulus. Hle was succeeded by his son Aphareus, who founded Arene, and received the Acolian Neleus, a fingitive from Thessaly. Neleus founded Pylus, and liis descendants reigned here over the western elyast. (1'aus. i. 2.) On the extinction of the fannily of Apharrous, the eastern half of Messenia was united with Laconia, and came under the sore-

tinued to belong to the kings of Pylus. (Pans, iv. 3. § 1.) Hence Earipides, in referring to the mythic times, makes the Pamisus the bonndary of Laconia and Messenia ; for which he is reproved by Strabo, because this was not the case in the time of the geographer. (Strab. viii. p. 366.) Of the seven cities which Agamemnon in the Iliad (ix. 149) offers to Achilles, some were undoubtedly in Messenia ; but as only two, Pherae and Cardamyle, retained their Homeric names in the historical age, it is difficalt to identify the other five. (Strab. viii. p. 359 ; Diod. xv. 66.)

With the conquest of Peloponnesus by the Dorians a new epoch commences in the bistory of Messenia. This country fell to the lot of Cresphontes, who is represented as driving the Neleidae out of Pylus and making himself master of the whole country. According to the statement of Ephorus (ap. Strab, viii. p. 361), Cresphontes divided Laconia into five parts, of which he made Stenyclerus the royal residence.* In the other four towns he appointed viceroys, and hestowed upon the former inhabitants the same rights and privileges as the Dorian conquerors. But this gave offence to the Dorians ; and he was obliged to collect them all in Stenyclerus, and to declare this the

[^14]only city of Messenia. Notwithstanding these concesxions, the Dorians put Cresphontes and all his children to death, with the exception of Aepytus, who was then very young, and was living with his grandfather Cypselus in Arcadia. When this youth had grown up, he was restored to his kiugdom by the help of the Arcadians, Spartans, and Argives. From Aepytus the Messenian kings were called Aepytidae, in preference to Heracleidae, and continued to reign in Stengelerus till the sixth generation,-their names being Aepytus, Glaucus, Isthmius, Dotadas, Sybotas, Phintas, - when the first Messenian war with Sparta began. (Paus. iv. 3.) According to the common legend, which represerits the Dorian invaders as conquering Feloponnesus at one stroke, Cresphontes immediately became master of the whole of Messedia. But, as in the case of Laconia [LAConiA], there is good reason for believing this to be the invention of a later age, and that the Dorians in Messemia were at first confined to the plain of Stenyclerus. They appear to have penetrated into this plain from Arcadia, and their whole legendary history points to their close connection with the latter country. Cresphontes himself married the daughter of the Arcadian king Cypselns ; and the name of his son Aepytus, fromi whom the line of the Messenian kings was called, was that of an ancient Arcadian hem. (Hom. Il. ii. 604, Schol. ad loc.; comp. Grote, Hist. of Greece, vol. ii. p. 437 , seq.)

The Dlessenian wars with Sparta are related in every history of Greece, and need not be repeated here. According to the common chronology, the first war lasted from B.c. 743 to 724 , and the second from B., C. 685 to 668 ; but both of these dates are probahly ton early. It is necessary, however, to glance at the origin of the first war, because it is connected with a disputed topographical question, which has only recently received a satisfactory solution. Dlt. Taygetus rises abruptly and almast precipitously above the valley of the Eurotas, hut descends more gradually, and in many terraces, on the other side. The Spartans had at a very early period taken pos-

MAP OF THE AGER DENTHELIATES.

## MESSENIA.

session of the western slopes, but how far their territory extended on this side has leen a matter of dispute. The contines of the two countries was marked bv a temple of Artemis Limnatis, at a place called Limnae, where the Mossenians and Laconians offered :aurfifies in common; and it was the murder of the Spartan king Teleclus at this place which gave nccasion to the First Messenian War. (Pans. iii. 2. §6, iv. 4. §2, iv. 31. §3; comp. Strab. vi. p. 257, viii. p. 362.) The exact site of Limnne is unt indicated by Pansamias : and aceordingly Leake, led chiefly by thor name, supposes it to have heen situated in the ptain upon the left bank of the Pamisus, at the marshes near the: conflumence of the Aris and Pamisns, and not far from the site of the modern town of $N$ isi ( $\mathrm{N} \eta$ al, island), which derives that appellation from the similar cirmonstance of its pasition. (Leake, Morea, vol. i. p. 361.) But Russ has discovered the ruins of the terple of Artemis Limnatis on the western slope of Mt. Taygetus, on a part of the mountains called Volimuos ( $\mathbf{B} \dot{\alpha} \lambda \lambda \mu \nu a s$ ), and amidst the ruins of the church of Iranayhint Folimniutissa ( $\Pi$ avayía $\mathrm{B} \omega \lambda_{1} \mu \nu \mathrm{a}$ átı $\sigma \sigma a$ ). I'olimunos is the name of a bollow in the mountains near a mountain torrent flowing into the Nedon, and sitnated between the vilJares of Nitzora and Poliani, of which the latter is about 7 miles NE. of Kalamita, the ancient Pherae. The fact of the similarity of the names, $\mathrm{B} \omega$ $\lambda \not \mu \nu$ os and $\Lambda i \mu \nu a$, and also of Mavayia $B \omega \lambda i \mu \nu i \alpha$,
 of a temple in this secloded spoit, would alone make it prubable tbat these are the remains of the celebrated temple of Artemis Limnatis; but this is rendered certain by the inscriptions found by Russ upon the spot, in which this goddess is mentioned by nume. It is also confirmed by the discovery of two boundary stones to the eastward of the ruins, upon the hirchest ridge of Taygetus, upon which are in-
 pillars, therefore, shom that the bumdaries of Messenia and Laconia must at one period lave been at no great distance from this temple, wbich is always reprewnted as standing near the confnes of the two countries. This district was a frequent subject of dispute between the Messenians and Lacedaemonians even in the times of the Roman Empire, as we shall sce presently. Tacitus calls it the "Dentbeliates Acer" (IIst. iv. 43); and that this name, or something sindiar, was the proper appellation of the district. appears from other antharities. Stephanns B. speaks of a town " 1enthalii" ( $\Delta \in \nu$ Өá入ton, s. v.; others read $\Delta \in \lambda \theta$ ávet $)$, which was a subject of contention between the Messenians and Lacedaemonians. Aleman also (ap. Athen. i. p. 31), in enomerating the different kinds of Laconian wine, mentions also a Denthian wine ( $\Delta$ évets olvos), which came from a fortress Denthiades (ėk $\Delta \epsilon \nu \theta$ ád $\delta \omega \nu$ ipúpatós tovos), as particularly good. Ross conjectares that this fortress may have stood opon the momntain of St. George, a little S. of Sitzoni, where a fewt ancient rembins are said to exist. The wine of this mountain is still celcbrated. The positron of the above-mentioned places will be hest shown by the accompanying map.

But to return to the history of Messenia. In each of the two wars with Sjarta, the Blessentians, after being defeatel in the opon plain, tork refuge in a strong fortress, in thlome in the first war, and in Eira or Ira in the second, where they maintained themselves for several years. At the conclusion of the Second Dlessenian Wiatr, mamy of the Messenians
left their country, and settled in various parts of Greece, where their deseendants continued to dwedl as exiles, hoping for their restoration to their native land. A large number of them, under the twe suns of Aristomenes, sailed to Rhegium in Italy, and afterwards crossed over to the opposite coast of Sicily, where they obtained possession of Zancle, to which they gave their own name, which the city bas retained down to the present day. [Meswava.] Those who remained were reduced to the condition of Helots, and the whole of Mlessenia was ineorporated with Sparta. From this time (n. c. 668) to the battle of Lenctra (b. C. 371), a period of nearly 300 years, the name of Messenia was blotted out of history, and their conntry bore the name of Laeonia, a fact which it is important to recollect in reading the history of that period. Once only the Messenians attempted to recover their independence. The great earthquake of B. C. 464 , which reduced Sparta to a heap of ruins, encouraged the Messenians and other Helots to rise against their oppressors. They took refuge in their ancient stronghold of Ithorne; and the Spartans, after besieging the plaee in vain for ten years, at length obtained possession of it, by allowing the Messenians to retire unmolested from Peloponnesus. The Athenians settled the exiles at Nappactus, which they had lately taken from the Locri Ozolae; and in the Peloponnesian War they were among the most active of the allies of Athens, (Thuc. i. 101 -103 ; Paus. iv. $24 . \S 5$, seq.) The capture of Athens by the Lacedaemonians compelled the Messerians to quit Naupactus. Many of them took refuge in Sicily and Rhegiam, where some of their countrymen were settled; but the greater part sailed to Africa, and obtained settlements among the Enesperitae, a Libyan people. (Paus. iv. 26. § 2.) After the power of Sparta had been broken by the battle of Leactra (n. c. 371 ), Epaninondas, in order to prevent her from regaining her former influence in the Peloponnesus, resolved upon forming an Ar cadian contederation, of which Megalopolis was to be the capital, and at the same time of restoring the Messenian state. To accomplisli the latter object. he not only converted the Helots into free Messenians, Int he despatched messengers to Italy, Sicily, and Africa, where the exiled Messenians liad settled, inviting them to return to their native land. His summons was gladly resporded to, and in B. c. 369 the new town of Messene was built. Its citadel or acropolis was placed upon the summit of Mt. lthome, white the town itself was situated lower down on the slope, thongh connected with its aeropolis by a eontinnous wall. (Diod. xv. 66 ; Pans. iv. 27.) [Messenk] During the 300 years of exile, the Dlessenians retained their ancient customs and Doric dialect ; and even in the time of lansanias they spoke the parest Doric in l'eloponnesns. (Pans. iv. 27. § 11 ; comp. Miller, Dor. vol. ii. p. 421, tramsl.) Other towns were also rebuilt, but a great part of the land still continued uncultivated and dewerted. (Strab. viii. p. 362.) Under the protection of Thebes, and in close alliance with the Arcadians (comp. Polyb, iv, 32), Messene maintained its iollependence, and the Lacedsemenians lost Messenia for ever. On the downfall of the Theban supremacy, the Messemians courted the alliance of Philip of Macedon, and consequently took no part with the other (irecks at the battle of Chaeroneia, n. c. 388. (l'aus. iv. 2 S . § 2.) 1'hilip rewarded them by compelling the Lacedarmonians to cede to them Limuse and certain districts. (Polyb. ix. 28 ; Tac. Amn
iv. 43.) That these districts were those of Alagonia, Gerenia, Cardamyle, and Lenctra, situated northward of the smaller Pamisus, which flows into the Messenian gulf just below Leuctra, we may conclnde from the statement of Strabo (viii. p. 361) that this river had been the subject of dispnte between the Messenians and Lacedaemonians before Philip. The Messenians appear to have maintained that their territory extended even further sonth in the most ancient times, since they alleged that the island of Pephnus had once belonged to them. (Pas. iv. 26. § 3.) [Perhnos.] At a later time the Messenians joined the Achaean League, and fonght along with the Achaeaos and Antigonns Doson at the battle of Sellasia, n, c. 222. (Paus. iv, 29. § 9.) Long before this the Lacedaemonians appear to have recovered the districts assigned to the Messenians by Philip; for after the battle of Sellasia the boundaries of the two people were agaia settled by Antigonus. (Tac. Ann. l. c.) Shortly afterwards Philip V. sent Demetrius of Pharus, who was then living at his court, on an expedition to surprise Messone; but the attempt was unsuccessful, and Demetrius bimself was slain. (Polyb. iii. 19 ; Paus. iv. 29. §§ $1-5$, where this attempt is erroneously ascribed to Demetrius II., king of Macedonia.) Demetrins of Pharus had observed to Pbilip that Mt. Ithome and the Acrocorinthus were the two borns of Peloponnesas, and that whoever beld these borns was master of the hulf. (Strab. riii. p. 361.) Afterwards Nabis, tyrant of Lacedaemon, also made an attempt upon Messene, and had even entered within the walls, when he was driven hack by Philopoemen, who came with succours from Megalopolis. (Paus, iv. 29. § 10.) In the treaty made between Nabis and the Romans in B.c. 195, T. Quintius Flamininus compelled him to restore all the property he had taken from the Messenians. (Liv, xxxiv. 35 ; Plut. Flamin. 13.) A quarrel aftertrards arose between the Messenians and the Achaean League, which ended in open war. At first the Achaeans were unsuccessfal. Their general Philopoemen was taken prisoner and put to death by the Messenians, B. c. 183; bnt Lycortas, who succeeded to the command, not only defeated the Messenians in battle, but captared their city, and executed all who had taken part in the death of Philopoemen. Messene again joined the Achaean League, hut Abia, Tharia, and Pharae now separated themselves from Messene, and became each a distinct member of the league. (Paus. iv. 30 . §§ 11, 12 ; Liv. xxxix. 49; Polyb. xxiv. 9, seq, $\mathbf{\pi x v} .1$.) By the loss of these states the territory of Messene did not extend further eastward than the Pamisus; but on the settlement of the affairs of Greece by Mummins, they not only recovered their cities, bat also the Dentheliates Ager, winch the Lacedaemonians had taken possession of. (Tiac. Ann. iv. 43.) This district continned to be a subject of dispute hetween the two states. It Was again assigned to the Messenians by the Milesians, to whose arbitration the question bad been submitted, and also by Atidius Geminus, praetor of Achaia. (Tac. l.c.) But after the battle of Actium, Augustus, in order to punish the Messenians for having espoused the side of Antony, assigned Thuria and Pharae to the Lacedaemonians, and consequeotly the Dentheliates Ager, which lay east of these states. (Paus. iv. 31. § 2, comp, iv. 30. § 2.) Tacitus agrees with Pausanias, that the Deatheliates Ager belonged to the Lacedaemonians
in the reign of Tiberias; but he differs from the latter writer in assigning the possession of the Lacedaemonians to a decision of C . Caesar and MI. Antonius (" post C. Caesaris et Marci Antonii sententia redditum"). In such a matter, however, the aathority of Pausanias deserves the preference. We learn, bowever, from Tacitus (l.c.), that Tiberius reversed the decision of Angustns, and restored the disputed district to the Messenians, who contianed to keep possession of it in the time of Pansanias; for this writer mentions the woody hollow called Choerins, 20 stadia sonth of Abia, as the bonndary between the two states in his time (iv. 1. § 1, iv. 30. § 1). It is a curious fact that the distriet, which had been such a frequent subject of dispate in antiquity, was in the year 1835 taken from the govermment of Misthra (Sparta), to which it had always belonged in modern times, and given to that of halamdita. (Ross, Reisen im Peloponnmes, p. 2.)

## IV. Tows.

1. In the plain of Stenyclerus.-Andania, the capital of the Messenian kings before the Dorians. Oechalla, at the distance of 8 stadia from Andania, the reputed residence of Eurytns, occopied, according to Pausanias, the grove of cypresses called Carnasium. Amphela, in the moantains on the borders of Arcadia. Two roads led into Arcadia: the more northerly ran alng the river Cbaradrus past Carnasium (Pans, viii. 35. § 1); the more southerly started from Messene, and was a military road made by Epaminondas, to connect more closely the two newly founded cities of Messene and Megalopolis. (Paus. viii. 34 ; comp. Leake, Morea., vol. ii. p. 296.) Stenyclarus, the capital of the Dorian conquerors, and which gave its name to the plaio, was also on the borders of Arcadia. Ina or Eira, where the citizens maintained themselves during the Second Messenian War, was situated upon the monntain of this name, to the north of the plain above the river Neda. At the extreme south of this plaio, commanding also the entrance of the plain Macaria, was Messene, with its citadel Thome. To the west part of the plain, on the road from Andania to Cyparissia, were Polichive and Dorius.
2. In the plain of Macaria. - Pherae, the modern Kalamita, situated about a mile from the sea, on the left bank of the river Nedon, was in antiqnity, as it is at present, the chief town in the plain. Three roads lead from Pherae: one southwards along the coast to Abia, said to be the Homeric Ira; a second up the valley of the Nedon, across Mt. Taygetus to Sparta, one of whose gates was bence called the gate towards Pharae (" porta quae Pharas ducit," Liv, xxxv. 30); while the third road ran across the Nedon in a north-easterly direction to Calamae, the modern Katami, where it divided into two, the one to the west going across the Pamisus, and the other to the north leading to Thumis, of which there were two towns so called. and from thence to the soarces of the Pamisus. To the east of Pberae was the mountainous district called the Ager Dentheliates, and containing Limane, which has been already described.
3. In the western peninsula and on the vestern coast.-Corone and Asine were on the Messenian gulf, and consequently on the east coast of this peninsula. The situation of Colonides is uncertain, some placing it on the Messenian gulf, and others near the barhour lhoenicns, NW. of the promontory Acritas. At the extreme southern point

MESSENLACUS SINU's.
of the western coast stood Mermose, shifansed in be the Ilomeric Pedasns. North of Dethonc. n the W. coast, was Pylus, on the promontory Coryphasimn, opposite to which was the island Sphacteria. lurther north, was the small tona EkiNa, and then the more important Crasmessid ; beyond which was a place Aulon, at the entrance of the defile of this name, through which flowed the river Cywhissus.
(On the geography of Mescenia, sce Leake, Morea, vol. 1. pp. 324. seq.; Boblaye, hicherches, p. 103, seq; Curtius, I'eloponnesos, vol ii. p. 121 , seq.)

COIN OF MFSSENIA.
MEsSENTACUS SINTS [Messenin.]
MESUA, in Gallit Narbonensis, is described by Molt (ii. 5) "as a hill surroundedi by the sea almost on all silies, and it would be an island if it were not j-ined to the mainland by a narrow agcer." The paace is supposed to be Mese or Mise on the borkey of the E'tang de Touk, between dgile and $\mathrm{M} / \mathrm{on}$ pellier.
[G. L.]
METAGONI'TAE (Metayonitat, Ptol. iv. 2. §10), a people of Mauretania, between the Muluclia and the Pillars of IIereules. Their name recalls the Urber Metagoniticae (Metaywhitè y $\pi \dot{\delta}$ eis. Pulyb, iii. 33), or settlementsfimnded by the Carthacinians on the NW. cunst, and wlich seem to have furmed a rezular chain from their frontice to the Pillars of Hercules (Scyl. p. 81). These marts enabled the republic to carry on inland trate with the nomal tribers, as well as to keep open a commu. nication by land with Spait. (Heeren, Africon Nations, vil. i. p. 52, trans!.)
[E.B.I.]
MLTAGONITES PROM. (Meтaywitns äкроv, P'tol, is. 1. § 7). a headland of Matretania Tingit.wa, W. of the Mulucha, now Cape Tres Forcas or Ris-ud-Dehir of the natives.
[E. B. J.]
METAGeXIUM (Merayóntov, Strab. xvii, pp, 827- $\$ 29$; Pomp. Mela, i. 7. § 1), a headland of N. Africa, which Strabo (l.c.) plares over against Cartha_11 Nova, at a distance of 3000 stadia. He descriturs the district about it as beine dry and barren, and bearing the sane name ; the headland is now called Ris-el-IIarsbah. (Comap. Shaw, Truel. p. 94.$)$
[E. B. J.]
METAILINUM. [Miteltinum.]
METALLC:I. [Matalia.]
DleTAPA ( $\dagger$ Metara: Eth. Metanaios. Meta$\pi$ evis), atown in Aet, lia, sitnated on the northern shore of the lake Trichonis, at the entrance of a narrow tlefile, and bu stadia from Thermum. It was lornt by Philip, on his invasion of Aetolia, n. c. 21s, as he returned from the eapture of Thermum. Its site catmat be tixed with certainty, motwithstanding the description of l'olybins. Teake phaces it immediately below Frakhiri, near the eastern extremity of the luke Hyria, or the smaller of the two lakes; sup1msing that as these two lakes are connected rith one another, the larger division may often have given name to the whole. (Pol, v. 7,13 ; Steph. B. 8. r. ;

## NETAPONTCM.

1. cake, Now ithern Gireece, vol. i. p. 150, seq.; compo Thermem.)

MELAPLNUM OSTHME [RHODANES.]
METAPONTLA or METAPOXTLCM (METa$\pi o ́ v \tau t o v:$ Thoc., Strab., and all Greek writers base this form; the Latins almost universally Metupontum: Eith. Metanoytivos, Paus., Sleph. B, and on cuias; but Ilerud. has Meqaaóvtcos; in Latin, Metapuntinus: Ru. near Torre di Mare), an important city of Magna Graecia, situated on the gulf of Tarentum, between the river Bradanus and the Casumtus. It was distant about 14 miles from Heramea and 24 from Tarentum. Historically spoaking, there is no doubt that Metapontum was a Greek ciry founded by an Achaean colony ; but rarious traditions assigned to it a mach earlier origin. Strabo ascribes its foundation to a body of Pyliams, a part of thise who bad followed Nestor to Troy (Strab. r. p. 222, ri. p. 264); while Justin tells us it was fornded by Epeins, the hero who constructed the wooden horse at Troy; in proof of whicb the inbabitants showed, in a temple of Minerva, the torls used by bim on that occasion. (Justin, xx, 2.) Ayother tradition, reported by Ephorus (ap, Strab. p. 264), assigned to it a Phocian origin, and called Dalins, the tyrant of Crisa near Delphi, its founder. Other legends carried back its origin to a still more remote perind. Antiochus of siyracuse said that it was originally called Metabus, from a hero of that name, who appears to have been identified with tha Metapontus who figured in the Greek mythical story as the husland of Melanippe and father of Aerlus and Bucotus. (Antioch. ap. Strab. L. c.; Hygin. Fab. 186; Eustath. ad Dionys. Per. 368 ; Diod, iv. 67.)

Whether there may liare really been a settlement on the spot mure ancient than the Acbacan colons, we have no meaos of deterinining; but we are toid that at the time of the foundation of this city tha site was unoccupied; for whicb reason the Achaean settlers at Crotona and Sybaris were desirous to culonise it, in order to prevent the Tarentives frum taking possession of it. With this riew a colony was sent from the mother-country, under the comimand of a leader named Leucippus, who, according to one acconnt, was compelled to obtain the territory by a fraudulent treaty. Another and a more plausrble statement is that the new colonists were at first engaged in a contest with the Tarentines, as well as the neighbouring tribes of the Ocnotrians, which was at length terminaced by a trenty, leaving them in the peaceable pussession of the territory they bad acquired. (Strab. vi. pp. 264. 265.) The date of the colonisation of Metapontum cannont be dotermined with certainty ; but it was evideotly, from the circumstances just related, subsequent to that of Tarentum, as well as of Sybaris and Contora: hence the date assigned by Eusebius, who would carry it back as far as B. c. 774, is wholly notenaile; nor is it easy to see how such an error can have urisern. (Euseb. Arm. Chron. p. 99.) It may probably be referred to about $700-690 \mathrm{~B}$. C.

We hicar very little of Metapontum during the first ages of its existence; but it seems, certain that it rose rapilly to a considerable amount of prosperity, for which it was indebted to the extreme fertility of its territury. The same policy which had led to its foundation would naturally unite it in the bonds of a close alliance with the other Achaean cities, Srbaris and Crotuna; and the first orcasion on which we meet with its name in history is as joinity with
these two cities in a leagne against Siris, with the view of expelling the Ionian colonists of that city. (Justin, xx. 2.) The war seems to have ended in the capture and destraction of Siris, but onr acconnt of it is very obscure, and the period at which it twok place very uncertain. [Siris.] it docs not appear that Metapontum took any part in the war between Grotona and Sybaris, which ended in the destruction of the latter city ; bat its name is frequently mentioned in connection with the changes introduced by Pythagoras, and the troubles conscquent apon them. Metapootom, indeed, appears to have been one of the cities where the doctrines and sect of that philosopher obtained the firmest footing. Eveu when the Pytharoreans were expelled from Crotona, they maintaided themselves at Metapontum, whither the philosopher himself retired, and where he ended his days. The Metapontines paid the greatest respect to his memory; they consecrated the house in which be had lived as a temple to Cercs, and gave to the street in which it was situated the name of the Museum. His tomb was still shown there in the days of Cicero. (Jambl. I'it, Pyth. 170, 249, 266 ; Porphyr. Vit. Pyth. 56, 57 ; Piut. de Gen. Socr. 13 ; Diog. Laërt. viii. 1. § 40 ; Liv. i. 18 ; Cic. de Fin. v. 2.) The Metapontines were afterwards called in as mediators to appease the troubles which had arisen at Crotona ; and appear, therefore, to have suffered comparatively little themselves from civil disseosions arising from this soarce. (Iambl. 262.)

At the time of the Athenian expedition to Sicily, B. c. 415 , the Metapontines at first, hike the other states of Mlagna Graecia, endeavomred to maintain a strict neutrabty ; but in the following year were induced to enter into an alliance with Athens, and furnish a small auxiliary force to the armament under Demosthenes and Eurymedon. (Diod, xiii. 4; Thac. vi. 44, vii. $33,57$. ) It seems clear that Metapontum was at this time a flourishing and opulent city; nor have we any reason to suppose that its decline began until long after. From its position it was secured from the attacks of Dionysius of Syracuse; aod though it must have been endangered in common with the other Greek cities by the adrancing power of the Lacanians, it does not appear to have taken any prominent part in the wars with that people, add probably suffered but little from their attacks. Its name is again mentioned in B. c. 345 , when Timoleon tonched there on his expedition to Sicily, bat it does not appear to have taken any part in his fayour. (Diod. xsi. 66.) Is B. c. 332 , when Alexander, kiog of Epirns, crossed over into Italy at the invitation of the Tarentines, the Metapontines were among the first to conclude an alliance with that monarch, and support him in lis wars against the Lacanians and Bruttians. Hence, after his defeat and death at Pandosia, B. c. 326 , it was to Metapontum that bis remains were sent for ioterment. (Justin, xii. 2; Liv. viii. 24.) But some years later, B. c. 303, when Cleonymus of Sparta was in his turn invited by the Tarentines, the Metapontines, for what reason we know not, pursued. a different policy, and incurred the resentment of that leader, who, in consequence, turned his own arms, as well as those of the Lucarnians, arainst them. He was then admitted into the city on friendly terms, but nevertheless exacted from them a large sum of modey, and committed varions other excesses. (Diod. xx .104 ) It is evident that Metapontum was at this period still wealthy; but its
citizens had apparently, like their neizhboars the Tarentines, fallen into a state of slothfulness and luxury, so that they were become almost proverbial for their effeminacy. (Plut. Apophth. Lac. p. 233.)

It seems certain that the Metapontines, as well as the Tarentines, lent an active support to Pyrrhus, when that monarch came over to Italy ; but we do not find them mentiuned during his wars there; nor have we any account of the precise periad at which they passed under the yoke of Rome. Their name is, howerer, again mentioned repeatedly in the Second Punic War. We are told that they were among the first to declare in favour of Hannibal after the battle of Cannae (Liv. sxii. 61); but notwithstanding this, we find their city occmpied by a Roman garrison some years Jater, and it was not till after the capture of Tarentum, in B. c. 212, that they were able to rid themselves of this force and openly esponse the Carthaginjan canse. (1d. xxy. 11, 15 ; Pol. viii. 36 ; Appian, Annib. 33, 35.) Hannibal now occopied Metapontnm with a Carthaginian garrison, and seems to have made it one of bis principal places of deposit, until the fatal battle of the Dletanras baving compelled him to give up the possession of this part of Italy, B. C. 207, he withdrew his forces from Metapontam, and, at the same time, removed from thence all the inhabitants in order to save them from the vengeance of Rome. (Id. asvii.

## $1,16,42,51$.)

From this time the name of Metapontum does not again appear in listory ; and it seems certaio that it never recovered from the blow thus inflicted on it. But it did mot altogether cease to exist ; for its name is found in Mela (ii. 4. §8), who dues not notice any extinct places ; and Cicero speaks of visiting it in terms that show it was still a town. (Cic. de Fin. v. 2 ; see also Appian, B. C. v. 93.) That orator, bowever, elsewhere alludes to the cities of Magna Graecia as being in his day sunk into almost complete decay; Strabo says the same thing, and Pansanias tells us that Metapontum in particular was in his time completely in ruins, and nothing renaained of it bot the theatre and the circuit of its walls. (Cic. de Amic. 4 ; Strab. vi. p. 262 ; Pans, vi. 19. § 11.) Hence, thongh the name is still found in Ptolemy, and the "ager Mletapontinus " is noticed in the Liber Coloniarum (p. 262), all trace of the city subsequeotly disappears, and it is not even noticed in the Itineraries where they gire the line of ronte along the coast from Tarentum to Thurii. The site was probably already subject to malaria, and from the same canse has remained desolate ever since.

Though we hear mach less of Metapontum than of Srbaris, Crotona, and Tarentum, yet all accounts agree in representing it as, in the days of its prosperity, one of the most opolent and flourishing of the cities of Magna Graecia. The fertility of its territory, especially in the growth of corn, vied with the neighbonring district of the Siritis. Hence we are told that the Metapontines sent to the temple at Delphi an offering of "a golden harrest" ( $\stackrel{\sim}{ }$ pos Xpuooūv, Strab. vi. p. 26t), by which we must probably understand a sheaf or bundle of corn wrought in gold. For the same reason an ear of com became the characteristic symbol on their coins, the number and variety of which in itself sufficiently attests the wealth of the city. (Millingen, Numismatique de IItalie, p. 22.) We learn also that they had a treasury of their own at Olympia still existing in the days of Pausanias (Pans. vi. 19. § 11 ; Athen. xi. p. 479). Herodotus tells us that they paid par-

## METAURUS.

ticular honours to Aristeas, who was said to have appeared in their city 340 years after he had dissppeared from Cyzicus. They erected to hirs a statue in the siddlle of the formo. with an altar to A pollo surrounded by a grove of laurels. (Herod. iv. 15 ; Athen. xiii. p. 605, c.) From their coins they would appear also to have paid bervic honomrs to Leucippus, as the founder of their city. (Miliagen, l.c. p. 24.) Strabo tells us, as a proof of their I'ylian origis, that they continued to perform sacrifices to the Neleidae. (Strah, vi. p. 264.)

The site and remains of Netapontum have been carefully examined by the Due de Luynes, who has illustrated them in a special work (ifitaponte, fol. Paris, 1833). It is remarkable that no trucc exists of the ancient walls or the theatre of which Pausanias speaks. The most important of the still existing monuments is a temple, the remains of which oceupy a slight elevatioa near the right baak of the Bradanus, about 2 miles from its mouth. They are now known as the Tarola dei Poladini. Fifteen columas are still standing, tea oa onc side and five on the other ; but the two ends, as well as the whole of the eatablatare ahove the architrave and the walls of the cella, have mholly disappeared. The architecture is of the Dric order, bat its proportions are lighter and more sleader than those of the celebrated temples of Paestum: and it is in all probability of Jater date. Some remains of aaother temple bat prostrate, and a mere heap of ruias, are visible nearly 2 miles to the S . of the preceling, and a short distance from the mouth of the Bradanus. This spot, called the Chiesa di Sansone, appears to mark the site of the city itself, sumerous foundatioas of buildings baving been discovered all around it. It may be duubted whether the more distant teaple was ever iacluded within the walls; but it is impansible now to trace the extent of the ancieat city. The Torre di Mare, now the only inhabited spot on the plain, derives its name from a castellated edifice of the nididle ages; it is situated above $1 \frac{1}{2}$ mile from the sea, and the same distance from the river Busiento, the aacient Casuentus. Itmediately oppusite to it, on the sea-shore, is a small salt-water Leasm or lagnon, now called the Lago di Sta. Pelagina, which, thungh neither deep aor sjacious, in all prubability formed the ancient port of MetaPontim.

Metapoatura was thus situated between the two rivers Bradanas and Casnentus, and oceupied (with its port and appurtenaaces) a considerabic part of the intermediate spare, Appian speaks of " a river between Metapontum and Tarentum of the sane nemu," by which he probably means the Bradanes. which may have beea commonly known as the river of Detapnatum. This is certainly the only river large enough to answer to the description which he gives of the meeting of Octavian and Aptony which touk place on its hanks. (Appian, B. C. v. 93.94.)

The coias of Metapuntum, as already observed,

COLN OF METAPUSTEM.
are very numerons; and many of the later ones of very bemutithl workthanship. Those of more athcicnt date are of the style called incuse, like the carly coins of Crotona and sybaris. The oae in the annexed figure has on the obverse the head of tho bero Leucippus, the founder of the city. But the more common type on the obverse is the head of Ceres.
[E. II. B.]
METARIS (Metapis, Ptol. ii. 3. §6), aa estuary in Britaia; the Hash between Norfolk and Lincobishire.
[C. R. S.]
METAURC'M (Máraupos, Steph. B.), a city on the W. coast of Bruttium, at the mouth of the river of the same name. According to Stephanus of Byzantium, it was a coloay of the Locrians, but seems never to have risen to any importaace; and its name is chiefly knowa becanse, according to some accounts, it was the birthplace of the poet Stesichurus, who was more generally regarded as a native of Himera. (Steph. B. s. v.; Suid. s. v. ミitnoiरopos.) Stephanus erroneously calls it a city of Sicily; but Suidas, who writes the name Matauria, correctly places it ia Italy: and there can be no dloubt that botb mean the town at the mouth of the Metaurus, which is called by Latia writers Metaurum. Sulinus ascrihes its fuuadation to the Zanclaears. Mela nentions it as if it were a still existing town; but Strabo speaks only of the river Metaarus, with an anchorage or roadstead of the same name: and Pliny also notices the river (" Mctaurus amnis") without any meation of a town of the name. (Strab. vi. P. 256 ; Plin. iii. 5. s. 10 , Mel. ii. 4. §8; Sulin. 2. § (1.)
[E. II. B.]
METAL'RUS (Méraupas). 1. A river of Umbria, flowing into the Adriatic sea, near Fano, and one of the most considerable of the numerous streams which in this part of Italy descend from the eastern declivity of the Apeanines into the Adriatic. It is still called tbe Metauro or Metro; and has its sources in the bigh group of Apennices called the Monte Nerone, from wheace it has a course of betweea 40 and 50 miles to the sea, It flows by Fossombrone (Forun Sumpronii), and throughout the latter part of its course was followed by the great highroad of the Flaminian Way, whicb desceaded the valley of the Cantiano, one of the priacipal tributaries of the Metaurns, and emerged iuto the main valley of the latter river a few miles below the pass of Iotercisa or $1 /$ Furlo. Its mouth is about 2 miles S. of Fano (Fanum Fortuase). but has no port; and the river iteelf is justly described by Silius Italicas as a viuleat and torreat-like stream. (Strab, v. p. 227; Plin. iii. 14. s. 19; Mel. ü. 4. §5; Sil. Ital. viii. 449; Lucan, ii. 405.)

The Jetaurus is celcbrated in history for the great battle which was fougbt on its banks in n. c. $20 \overline{7}$, between Ilasdrulal, the brother of Ilannibal, and the Roman consuls C. Claudius Nero and M. Livius, in which the former was totally defeated and slan.-a battle that may be considered as the real turningpint of the Second Punic War, and therefore one of the mast important in history. (Liv. xxvii. $46-$ 51 ; Orus. iv. 18; Eutrop. iii. 18; Vict. de Iir. Ill. 48; Hon. Carme, ir. 4. 38; Sil. Ital. vii. 486.) Unfirtunately our knowlolge of the topograply :und details of the battle is extremely japerfect. But we learn from livy, the oaly author who has left as a conncetell narmative of the operations, that M. Iivius was eacamped with his anny under the walls of Sena (i. e. Soma Gablica, now Sinigaglia), and Itasdrubal at a short distayce from him. But as
soon as the Carthaginian general discovered the arival of Clandius，with an anxiliary force of 6000 foot and 1000 horse，he broke up his camp and re－ treated in the night to the Metanrus，which was ahout 14 miles from Sena．He had intended to cross the river，but missed the ford，and ascended the right bank of the streau for some distance in search of one，till，fuding the banks steeper and higher the further he receded from the sea，he was compelled to halt and encamp on a hill．With the hreak of day the Roman armies overtook him，and compelled him to a general engagement，withont leaving him time to cross the river．From this account it is clear that the battle was fought on the right bank of the Detaurus，and at no great distance from its mouth，as the troops of Hasdruhal conld not，after their night march from Sena，have proceeded many miles op the course of the river．The gronnd， which is well described hy Aruold from personal inspection，agrees in general character with the de－ scription of Livy；but the exact sceoe of the battle cannot be determined．It is，however，certainly an error to place it as higb up the river as Fossombrone （Forum Sempronii）， 16 miles from the sea，or even， as Cramer has done，between that town and the pass of the Furlo．Both he and Vandoncourt place the battle on the left bank of the Metanrus，which is distinctly opposed to the narrative of Livy．Appian and Zonaras，though they do not mention the name of the Metaurus，both fix the site of the Roman camp at Sena；bnt the former bas confounded this with Sena in Etruria，and has thence transferred the whole theatre of operations to that conotry．（Appian， Annib． 52 ；Zonar．ix． 9 ；Arnold＇s Rome，vol．iii．pp． $364-374$ ；Vaudoncourt，Campagnes d Annibal，vol． iii．pp．59－64；Cramer＇s Italy，vol．i．p．260．）

2．（Métaupos），a river of Brnttium，flowing into the Tyrrhenian sea，betweeo Medma and the Scyl－ laean promontory．It is mentioned both by Pliny and Strabo；and there can be no doubt that it is the river now called the Marro，one of the most consi－ derable streams in this part of Bruttinm，which flows into the sea about 7 miles S ．of the Mesima，and 18 from the rock of Scilla．（Strab．vi．p． 256 ；Plio． iii．5．s． 10 ；Romanelli，vol．i．p．66．）There was a town of the same name at its month．［Metau－ RUM．］
［E．H．B．］
METELLI＇NUM（It．Anton．p． 416 ；Metelion， Geogr．Rav．iv．44），or METALLI＇NUM（Coloais Metallinensis，Plio．iv．21．s．35），a Roman colony of Lusitania on the Anas， 24 Roman miles from Angnsta Emerita，now Medellin．The modern town lies on the southern side of the river，so that the ancient town ought to bave been included in Baetica Hence some modern writers have conjectored that the Anas may here have changed ita bed．The furm of the name would lead to the supposition that the co－ lony was fonnded by Metellus，in which case Metel－ linum wonld be a more correct form than Metal－ linum．

METEON，a town of the Labeate，to which Gentins removed his wife and family．（Liv，xlir． 32 ；Medion，Geogr．Rav．）It may perhaps be represented by the village of Meterees in the Ricka distriet of Monte－Negro，to the N．of Luke Scutari． （Wilkinson，Dalmatia，vol，i．p．552．）［E．B．J．］ METHA＇NA（ тù Mé日ava，Pans．，Strahı，et alii； Metcorn＊，Thuc．iv． 45 ；Diod．xii． 65 ；Me日rjv7，

[^15]Ptol．iii．16．§ 12 ：Méhana），a striking rocky peninsula，connected by a narrow isthmus with the territory of Troezen in Argolis，and containing a city of the same name．Pansanias describes Me－ thana as an isthmus rnoning far into the sea（ii．34． § 1）；Thucydides more correctly distinguishes be－ tween the isthmus and chersonesus（iv．45）；and Ptolemy also speaks of the chersonesus（iii． 16. § 12）．The isthmns is only about 1000 feet broad， but it immediately spreads out equally on hoth sides． The outline of the peninsula is grand and picturesque． The bighest mountain，called Chelona，mbich is 2281 （French）feet above the level of the sea，is of a conical form，and was thrown up by a volcano． The whole peninsula bears marks of volcanic ageacy． The rocks are composed chiefly of that variety of lava called trachyte；and there are bot sulphnreous springs，which were used in antiquity for needicinal purposes．Pausanias speaks of bot baths at the distance of 30 stadia from the city of Methan：s， which were said to have first burst ont of the ground in the time of Antigonus，sou of Demetrius，king of Macedon，after a violent volcanic eruption．Pansanias adds tbat there was no cold water for the use of the bather after the warm bath，and that he could not plunge in the sea in consequence of the sea－dogs and other monsters．（Pans．l．c．）Strabo，io describing the same volcanic eroption to which Pausanias al－ ludes，says that a hill 7 stadia high，and fragmeuts of rocks as high as towers，were thrown up；that in the day－time the plain conid not be approached in consequence of the beat and sulphureous smell，while at night there was no unpleasant smell，but that the heat thrown ont was so great that the sea boiled at the distance of 5 stadia from laud，and its waters were tronbled for 20 stadia（i．p．59）．Ovid de－ scribes，apparently，the same ernption in the lioes beginning

## ＂Est prope Pittheam tumulus Troezeaa＂

（Mfet．xv．296），and says that a plain was upheaved into a bill by the confined air seeking vent．（Comp． Lyell＇s Principles of Geology，pp．10，11，9th ed．） The French Commission point out the site of two hot sulphureous springs；one called Vroma，in the middle of the north coast，and the other near a rillage Vromolimni，a little above the eastern shore． There are traces of ancient baths at both places； but the aorthera mnst be those alluded to by Pan－ saoias．

The peninsula Mlethana was part of the territory of Troezen；but the Athenians took possession of the peninsula in the seventh year of the Peloponne－ sian War，в．c． 425 ，and fortified the isthmns． （Thac．ir．45．）There are still traces of an aocient fortitication，renewed in the middle ages， and onited by means of two forts．In the perun－ sula there are Hellenic remains of three diflerent monntain fortresses；but the capital lay on the west coast，and the rnins are near the small vil－ lage of the same name．Part of the walls of the acropolis and an ancient town on the north side still remain．Within the citadel stands a cbapel， containiug stones belonging to ao ancient building， and two inscriptions on marble，one of which refers
so called in Dlacedonia．＂This form is now fonnd in all the existing MSS．of Tbncydides．But there can be no doult that Métave，which has prevailed down to the present day，is the genuine Duric form of the name．
to Isis. This, accordingly, was the site of the tenple of Isis, mentioned by l'tusanias, who also speaks of statues of Alermes and Horenles, in the Atrora. (Leake, Merea vol, ii. p. 453, seq., Peloponnesiaca, p. 278 ; Boblaye, Ficherches, g'c. p. 59; Curtius, Pelinonnesos, vol, ii. p. 438 , seq.)

METHONE (Me日wzy, Sleyh. B.), a town of Pieria in Macelonia, on the Thermaic gniff, mentioned in the Periplus of Scylas ( $\mathrm{p}, 26$ ), and therefore one of the Greek colonies estallished in early times on this coast. According to Plutarch (Quaest. Graer. p. 293), a party of Erctrians settled there, who were called by the natives $\dot{\alpha} \pi о \sigma \phi \in \nu \sigma o ̈ o n t o c$, and who alpear to have come there nearly at the sanue time as the o capation of Corcyra by the Corinthians в. с. $730-720$.

The town was occupied loy the Athenians with a view of annoying Perdiceas, by rasaging his territury, and affiording a refuge to his discontented subjects. (Thuc. vi. 7.) It appears to have been in $35-353$ e. c. that Philip attacked Methone, the last remaining posscssion of Athens on the Macedonian coast. The position was a convenient station for Athenian pricateers to intercept trading ressels, not merely to and from Macedonian ports, but alsu from Olynthns and Potidaea. The siege was vigoruusly pre-sed by Pli:lip; and the Methonaeans, who gallantly beld out until all their means were exbausted, werc at length compelled to surrender. The inhabitants were allowed to depart with one garment ; hot the walls were razed to the ground, and the land apportioned among Macedotian colonists. Phrtip lost the sight of one eve in this siege. (Diod. xri. 31-34; Dem. Oiynth, i. p. 12. Philip. i. p. 41, iii. p. 117; Plut. Par. 8 ; Luc, de Scrib. Hist. 38 : Strab, vii. p. 330; Justin. vii. 6i.) Mr. Grote (Hist. of Greece, rol. xi. pp. 363, tull., comp. p. 488 ) is of opinion that this happened afterwards (B,C, 34s). at another flace ealled Methone, situated in the Chatcidic peninsnla, near Olynthas and Ayollonia. The epitomiser of Strabo (vii. p. 330) places Dethone at a distance of 40 stadia from Pydna. This statement does not agree with the position assi nod by Leake (North. Grecer, rol. iii. p. 435) to Menhone at Elefthro-khóri, 2 miles from the sea: but the lepitone is not mutb to be depended on in this passays.
[E. B. J.]
DETHOXE 1. (Me日úm, Strah, ; Mofúvn. Paus., Seylux, p. 17: Eth Mobowatos, P'ans, ir. 18. § 1 , and C. ins: MeAurateús, Steph. B. s. v.: Mothini, M/odon), all ancient tuwn in the SW. corber of Messenia, Thas alvaỵs been an important place, both in ancient and in modern times, on account of its excellent latre ur and salubrious situation. It is situated at the estreme point of a roky rilze, which runs into the sea, appusite the inland Suppiensa, one of the group called in ancient times Ocmusse. "Off the outer ead of the town, is the little insulated rock whi h Pawanias (iv, 35. § 1) calls Muthon, and whit he dencribes as firming at once a tatrow entrance and a shelter to the harbour of his time: it is now occ phed $\mathrm{bs}_{5}$ a tower and lantern, which is canected by a bridge with the furtification of Mothoui. A mole branches from it, which runs prablel to the eastern wall of the town, and forms a Hownur fir shall wosels. It seoms to be exactly in the pasition of the ancirnt $\mathrm{I}^{n h t}$, the entrance into vil was probigly where the brilece now stands." (1. Whr.) Acturding to the unamiuns testion y of 1.. aufont writers (Sitrab. viil. 1. 559 : 1'aus. iv. 35. § 1), Methupe was the Humerie Hedions, one
of the scven cities which Agamemnon offered to Achilles. (IIom. Il. ix. 294.) Homer gives to Pedusus the epithet $\dot{\alpha} \mu \pi \in \lambda \sigma \in \sigma \sigma \alpha$, and Methone seems to have been celebrated in antiqnity for the cultivativn of the rine. The eponymous heroine Methone, is called the daughter of Oeneus, the "wineman" (Pans. L. c.); and the same name occurs in the islands Oenussae, lying opposite the city. The name of Methone first occurs in the Messenian wars. Methone and Pylus were the only two places which the Messenians continned to hold in the second war, after they had retired to the momotain fortress of Ira. (Paus. iv. 18. § 1, iv, 23. § 1.) At the ead of the Second Messenian War, the Lacedaemonians gave Methone to the inhabitants of Nauplia, who bad lately been expelled from their own eity by the Argives. (Paus, iv. 24. § 4, iv. 35. § 2.) The descendants of the Napplians continued to inhabit Methone, and were allowed to remain there even after the restoration of the Messenian state by Epaminondas. (Paus. iv. 27. §8.) In the first sear of the Peloponnesian War, B. c. 431, the Athenians attempted to obtain possession of Methone, but were repulsed by Brasidas. (Thuc. ii. 25.) Methose suffered greatly from an attack of some Illyrian privateers, who, under the pretext of parchasiog wise, entered into intercourse with the inhabitante and carried off a great nomber of them. (Pans, iv. 35. §§ 6, z.) Shortly before the battle of Actiam, Methone, which had been strongly fortified by Antony, was besieged and taken by Agrippa, who found there Bognd, king of Mauretania, whom be put to death. (Dion Cass. 1. 11; Strab. viii. p. 359; Oros. ri. 19.) Methone was favoured by Trajan, Who made it a free city. (Pans. iv. 35. § 3.) It is also mentioned by Mela (ii. 3), Pliny (iv. 5. s. 7), Ptolemy (iii. 15. 7), and Hierocles (p. 647).

Pausadias found at Methone a temple of Athena Anemotis, the "storm-stiller," and one of Artemis. He also mentions a well of bituminous water, similiar b oth in smell and coluar to the ointment of Cyziens, but of which no trace is now found. In 1124 Modon was coaquered by Venice, bat did not become a permanent possession of the republic till 1204. In the middle of the old Venetian piazza there still stands the shaft of an ancient granite column, abont 3 feet in diameter and 12 feet high, with a barbarous bace and capital, which appear to have been added by the Venetians, when ther fixed upon the tup of it, in 1493, a Ggure of the Lion of St. Mark. Five years afterwards it was taked by the Tarks, and remained in their hands till it was recaptnred by Murosini. In 1713 the Turks again took passession of it, and retained it till the last Greek revolution, when it was wrested from them by the French in 1s28. Like other places in Gireece, which have been continuously inhabited, Modon cuntains fow ancient remains. Some Hellenic fuundations may be traced in the city-walls, and ancient spl ulchres may be scen above the suburb. (Leake, Mforec, vol. i. p. 429. seq. ; Boblaye, Recherches, fc: p. 113 : Curtins, Peluponnesos, vol. ï. p. I69, sed.)
2. A town of Thessaly, mentioned by Homer (II. ii. 716) as belomging to Philoctetes. Later writers describe it as a town of Magnesia, but we lave no further particulars respecting it. (Neylax, p. 25 ; Strab. ix. p. 436 ; L'in. iv. 9. s. 16 ; Solin. c. 14; Stup h. B. s. t.)
3. Anre priperly cafled Methana, a town and peninsula of Troczenia. [Mbinanca.]

NE＇THORA（Métopa，Arrian，Indic．8），a small state in the ceutre of India，which was subject to the great tribe of the Prasii．It was situated near， if not upon，the Jumazes or Jumna（Piin．vi． 19. s．22），and has，with much probatility，been as－ sumed to be on the site of the present Allakic－ bid．

METHIRIADES（Me $\theta o v p a a^{\delta e s}$ ），a group of smail islauds，lying between Nissaed，the port of Megara，and Sulimis．（Plin．iv．12．s．19．）Strabo describes them，withont mentioning their names，as five snall islands，lying before Nizsea to a person kailing into Attica（is．p．393）．Stephamus B． （s．v．）loosely spacaks of them as lying letween Aegina and Altica．
METIIYMNA（Mińधu
 the most important nest after Mytileses．It was situated on the northero shore of the island，where a channel of 60 stadia（Strab．siii．p．618）inter－ vened betreen it and the coast of the mairland nesr Assos．

One of the earliest notices of the Methymozeans， is the mention of their conquest of Arisba，another town of Lesbrs，and their enslaving of its citizens． （Herod．i．151．）The territory of Methymna seems to have been contigwous to that of Mytilene，and this may have been one cause of the jealonsy be－ tween the two cities．The power and fame of Mytilene was on the whole far greater；but in one period of the history of Lesbos，Methymna enjoyed greater prosperity．She did not join the revolt of the other Lesbians from Athens in the Peloponnesian War（Thuc．iii．2， 18 ，，and she was therefore exempted from the severe punishment which fell on Mytilene． （Thuc．iii．50．）Heuce she retained the old privilege of furnishing a naral contingent instead of a tribute in money．（Thuc．vi．85，vii．57．）Shortly before the battle of Arcinnsae，Methymna fell into the power of the Lacedsemonians，and it was on this occasion that the magnanimous conduct of Callicraticas pre－ sented so remarkable a contrast to that of the Athe－ nians in reference to Mytilene．（Xed．Hellen．i． 6 ． § 14．）After this time Methymas seems to have becunie less and less importaut．It comes into notice，bowever，in every subsequent period of history．It is mentioned in the treaty forced by the Liomans（n．c．154）between Attalus 11．and Prusias 11．（Polyb．xxxiii．11．）It is stated by Lisy（xlv，31）and by Pliny（v．31）to have in－ coljorated the iuhabitaots of Avtissa with its own． Its ccios，both autonomons and imperial，are nu－ merous．1t was honourably distingnished［see Lexeos］for its resistance to the Mahomedans，both in the 12th and 15th centuries；and it exists on the bame spot at the present day，under the pame of Afrlieo．

We have no information conceroing the buildings and apprarance of ancient Methymna．It evidently passeased a good harbour．Its chief fame was con－ nected with the excellent wine produced in its neighbourhood．（Virg．Georg．ii． 90 ；Ovid，Art． Am．i．57；Hor．Sut．ii．8．50．）Horace（Od．i． 17. 21）calls Lesbian wive＂ionocens；＂and Athenaens （ii．P．45）applies the epithet evorómaxos to a sweet Lestiun wioe．Io avother place（i．p．32）be describes the medicinal effect of the wine of this island．（See also i．pp．28，29；and Anl．Gell．xiii．5．） Pluy sayn（xiv．9）that it had a salt tiste，and ap－ jarently mentious this as a merit．Pausanias，in lis wecount of Delphi（ $\mathrm{x}, 19$ ），tells，a story of some
fishermen of Nethymna dragging in their nets out of the sea a rude inage of Bacchns，which was afterwards worshipped．

Methymua was the birthplace of the poet and musician Arion．Myrsilus also，who is said to bave written a history of Lesbos，is supposed to have been born bere．
［J．S．H．］

COIN OF METHYMNA．
MLTHYMNA（Min并uvq），a city in Crete，near Rhocen，which Aelian（N．A．xiv．20）mentions in connection with a curious story respecting a remedy for bydrophobia discovered by a Cretan fisherman． Mr．Pashliey（Trav．vol．ii．p．40）considers that the remains near the chapel of Hüghios Geơrghios，by Nopia，on the extreme castern edge of the phain of Kisamo－kastéli，represent Methymna．［E．B．J．］
METHI DRIUM（Mêúdpıov：Eth．Metuôpteús）， a town in central Arcada，situate 170 stadia nurth of Megalopolis（Paus，viii．35．§5），obtained its name，like Interanina，from being situated opon a lofty height between the two rivers Maloetas and Mylaon．（Paus．viii．36．§ 1．）It was fuunded by Orchomenus；but its inhahitants were renoved to Megalopolis，upon the establishment of that city． It never recovered its former population，and is mentioned by Strabo（viii．p．388）anung the phaces of Arcadia which bad almost entirely disappeared． It continued，bowever，to exist as a village in the time of Pausanias，who saw there a temple of Poseidon Hippius upon the rivvr Myluon．He also meotions，above the river Maloetas，a mountain called Thanmasium，io which was a cave where Rhea took refuge，when pregnant with Zeus．At the distance of 30 stadia from Methydrium was a fountain named Nymphasia．（Paus．viii．36．1－3， comp．viii．12．§ 2， 27. §§̧ 4,7 ．）Netlydrium is also mentioned in the following passages：Thue，v．58； Polyb．v． $10,11,13$ ；Plin．iv． 6 ．s． 10 ；Steph．B．s．v．

There is some difficulty in determining the exact site of Methydrium．Some writers identify it with the Hellenic remaios called Palatia；but these are not on a liffty hill betreen two rivers，but in a lows situation above the junction of the rivers on the right bank of one of them．Methydrium should rather be placed 45 minutes further，at the distance of 10 minutes SE．of the village of Nimnitza，where there are some ancient ruins，one betweell two streams，on a height below Pyrgo，otherwise called Pyrgiko．It is true that this also is nut a lofty hill ；bat Pausanias nses the expression Ku入cu os
 which means only a slight elevation．（Leake，Moree， vol．ii．p． 57 ；Peloponnesiaca，p． 201 ；Bublaye， Richerches，gc．p． 151 ；Ross，Reisen in Peloponnes， p．116；Curtius，Peloponnesos，val．i．p．309．）
METINA INstLA．［RHoDANTs．］
METIOSEDUM．［Melodexem．］
METORES（Métopes，Ptol．vi．4．S 3），a branch of the great robber tribe of the Jlardi，who were settled in Persis．Their lame is sobietimes mritten Maitopets．
入ín s ）．1，A tomn in the Caystrian plain in

Lydia, on the road from Smyrna to Ephesus, at a distance of 120 stadia from Ephesus, and 1 so from Sinyrna. The district of Metropilis produced excellent wine. (Strab, xir. pp, 6.32, 637: Ptul. v. 2. § 17 ; Stepb. B. s. v.; Plin. v. 31: Hiernel. p. 600.) Near the modern village of Tourbati, no doubt a corruption of the ancient name Metropolis, some ruins are still seen; and as their distance from Simyma and Ephesus agrees with that mentioned by Sitrato, there can be no besitatou in ideatifying the place. (Comp. Arundell, Seven Churches, p. 22, \&e.: Hamilton, Restarcles, i. p. 542 ; Rusche, Leric. Num. iii. 1, p. 633. \&..)
2. A town in the north of Pbrygia, and, as the name seems to indicate, the capital of the ancient kings of Pbrysia, thongh Stephanus Byz. (s, v.) derives the name from the mother of the gods. It was situated to the north of Synnada (Athen. xiii. p. 574 ), and must not be confounded with another town of the same name in the south of Phrygia, Its site is, io all probability, indicated by the ruins of Pismesh Kalasi, north of Doganlu, which show a very antique style of arcbitecture, and mainly cunsist of tombs cut into the rocks; one of these tombs is that of king Midas. Leake (Asia Minor, p. 24) is inclined to think that these ruins mark the site of Nicoleia; but other travellers, apparently with more justice, identify them with Sletropolis. (Franz, Fünf Inschriften, p. 42.) From the extent of the ruins, it would seem that in the time of the Roman emperors Metropolis was an important town; but afterwards it declined, though it is still mentioned by Hierocles (p. 677.)
3. A town in the sonthern part of Phrygia, belonging to the conventus of Apamea. (Plin. г. 29.) That this town is different from No. 2, is quite evident, eveo independeatly of the fact that Stephanus 13. mentions tro torns of the name of Metropolis in Phrygia, and that Hierocles and the Notitiae speak of a toma of this name in two different provinces of Phryia. (Hierocl, p. 673; Strab, xii. p. 576, xir. P. 663 : Liv. sxxviii. 15.)
[L.S.]
METRO'POLIS (Mytpóro入ts, Ptoi. iii. 5. § 2s), a torm of European Sarmatia, on the Burysthenes, near Otbia.
[E. B. J.]
METRO'POLIS (MทтрóтоגIs : Eth. Mทtротоdirns). 1. A town of Histiaeotis in Thessaly, described by Stephanus B. (s. v.) as a torm in Upper Thessaly. Strabo says (ix. p. 438), that Metropulis was fuunded by three insigniticant turns, but that a larger number tras afterwards added, among which was Ithome. He further says, that Ithome was witbin a quadrangle, formed by the four cities Tricca, Metropolis, Pelinnaeum, and Gomphi. The position of M reropolis is also determined by its being on Cassar's march from Gomphi to Tharsalus. (Caes. Is C: îi. 81 ; Appian, B. C. ii. 64 ; Dion Cass. xli. 51.) It was taken by Flaminitus on his descending into this part of Thessaly; after the battle of the Aus, B.c. 198. (Liv, xxxii. 15.) We learn from an inscription that the territory of Metropolis odjuned that of Ciorium (the ancient Arne), and that the adjustenent of their boundaries was a frequent subjeet of discussion octween the two peoples. [Cibracm.] Metry lis is mentioned in the suxth century by Ilicrocles (p. 642), and contimued to exist in the midlle ages under the name of Neo-Patrae (Neal חárpal, Cunstant. de Thent. ii. p. 50, el. Burn). The remains if Mretronolis are placed by Leake at the st all village of Paleoikastro, ahout 5 miles SIV.
a circular form, and in the centre of the circle are the restiges of a circular citadel, part of the wall of which still exists in the yard of the village chureh of Paleokastro, where is a collection of the scnlptured or inscribed remains found upon the spot within late years. Among other sculptures Leake noticed one in luw relief, representing a figure seated upon a rock, in long drapery, and a mountain riving in face of the figure, at the foot of which there is a man in a posture of adoration, while on the top of the monotain there are other men, one of whom holds a bog in his hands. Leake conjectured with great probability that the seated figure represents the Aphrodite of Merropulis, to whom Strabo says (l.c.) that hogs were offered in sacrifice. (Leake, Northern Greece, vol. iv. p. 506.)
2. Another town in Thessaly, which Stephanas B. calls simply a tora in Thessaly. This appears to be the Bletropolis mentioned hy Livy in his account of the campaign of Antiocbus, in B. c. 191, where it is related that the Syrian kiog having tanded at Demetrias, first took Pherae, then Cramnon, then Cypaera, Metropolis, and all the neighbouring fortresses, except Atrax and Gyıton, and afterwards proceeded to Larissa. (Liv, xxxvi. 10.) From this account it would appear that this Metropolis Was in Perrbaebia; and its site has been discovered by Leake, near that of Atras, at a place called Kastri, where the name of MIntooataníns uccurs in an inscription. (Leake, Northern Greece, vol. iii. p. 371.$)$
3. (Lygovitzi), a town in the interior of Acarnania, S. of Stratus, and on the road from the latter place to Conope in Actolia. At a later time it fell into the bands of the Aetolians, but was taken and burned by Philip io his expecition against the Aetolians, B. c. 219. It is mentioned as one of the towns of Acarnania, in a Greek inscription found at Actium, the date of which is probably prior to the time of Augustus. (Polyh. iv, 64; Steph. B. s.e.; Bückh, Corpus Inscript. No. 1793 ; Leake, Northern Greece, rol. iii. p. 576 .)
4. A town in Amphilocbia, near Olpae. (Thne. iii. 107.) As to its site, see Angos Aurhiochictm.
5. A town of Doris. (Steph. B.s. v.)
6. A torn of Euboea. (Steph. B. s. v.)

METULEM. [IAFODES, Vol, II. p. 36.]
MEVA'NIA (Mnovavia, Strab., Ptol.: E゙Th. MeFanas, ätis: Berayna), a considerable city of Uimbria, on the Flaminian Way, between Carsulae and Fulginium. It was situated on the river Tinia, in a broad and fertile ralley, which extends from the neighbourhood of Spoletium to the Tiber, sepnrating the main chain of the Apennines from a lateral mass or offlhoot of the same range, which extends from Mexania and Spoletium to Tuder and Ameria. It is this valley, about 8 or 10 niles in breadth, watered by the Clitumnus and Tinia, with several trihutary streams, the pastures of which were celebrated for their breed of wbite oxen, the only ones thoaght worthy to be sacrificed as victims on triumphal and other solemin occasions. Hence their praises are not less frequently associated with the name of Mexania than with that of the Clitumnus. (Colum, iii. 8 ; Sil. Ital. vi. 647, viii. 458 ; Lucan, i. 473.) Mevania appears to liave been an important place before the Rowan extuent of this part of Italy. In B. C. 308 it was chosen by the Umbrians as the headquarters of their assembled forces, where they were defeated by (. Fdyins (J.iv. is. 41.) At a much
later period it was occupied by the emperor Vitellius, with the intention of defending the passes of the Apennines against the generals of Vespasian, but le quickly abandoned it again, and retired to Fome. (Tac. Hist. iii. 55,59 .) As it was situated in the plain, it could scarcely be a very strong fortress; but 1liny notices it as one of the few cities of Italy that hiad walls of brick (xxxv. 14. s. 49). Strabo speaks of it as in his time one of the most considerable towns in the interior of Umbria: it was only of manicipal rank, but seems to bave contioned a flourishing place throughout the period of the Empire. (Strah. v. p. 227 ; Plin. iii. 14. s. 19 ; Ptol. iii. 1. § 54; Itin. Ant. p. 311 ; Orell. Inscr. 98.) The modern Bevogna is a very poor and decayed place, with little more than 2000 inhahitants, though retuining its episcopal see, and the title of a city. It contains some remains of an amphitheatre, and mosaic pavements which belonged to the ancient Thermae. (Calindri, Stat. del Pontif. Stato, p. 104.)

Merania appears to be indicated by the poet Propertins himself as the place of his birth (iv. 1. 123), though others understand this passage dufferently, and regard Hispellum as having the better claim. (Barth. 1ït. Propert.; Kuinoel, ad l. c.) It was noted for the fogs to which it was subject. (Propert. $l . c$; Sil. Ital. vi, 646.) Pliny speaks of its territory (Mevanas ager, xiv. 3. § 37) as producing a particular kind of vine, which he calls Irtiola; probably the same now called "Pizzotello," for which the district is still celebrated. (Harduin, ad loc.; Rampoldi, Corografia, vol. i. p. 233.) [E.H.B.] MEVANIOLA. [Umbria.]
milacords or Milcords (Mákwpos, Miגкwpos; Theupump. ap. Steph. B. s. v.), a place which may be assigned to the interior of Chalcidice. (Leake, Nurth. Greece, sol. iii. p. 456.) [E. B. J.]

MIBA, in Britain, supposed more correctly Mida, is placed in the Ravennas's Chorography among the towas in the south of Britain. It has been conjectared that Midhurst, in Sussex, is its modern representative ; hut this supposition is not warranted by existing remains.
[C.R.S.]
MICHMAS (Maxuás, LXX. ; Maxuá, Juseph., Euseb.), a city of the tribe of Benjamin, eastward from Bethel or Bethaven (1 Sam. xiii. 5), beld by the Philistines, while Saul and the Israchites were in Gibeah. It was on the line of march of an invading army from the north, and the Assyrians are represented as depositing their baggage there When advancing against Jerusalem. (Isaiah, x. 28.) It is placed by Easebins and St. Jerome in the horders of Aclia, and was then a considerable village, retaining its ancient dame, 9 miles from Aelia, near Rama. (Onomast. s. v.) The same description exactly applies to it at the present day. It is 3 honas distant from Jernsalem, nearly due north. Miakheis stands on a low ridge between two small Wadys runniog south into the much larger valley named Wady es-Swinit. It hears marks of having been a mneh larger and stronger place than any in the vicinity. There are many foundations of hewn stones, and some columns among them. The Wady es-Swinit is "the Passage of Michmash" spoken of in 1 Samuel (xiii. 23), and Isaiah (x.29). It is an extremely steep and rugged valley, which commences in the neightourhood of Bethel, and a little below (E.) Müldinás contracts hetweed perpendicular precipices.

The rocks Bozez and Seneh, mentioned in conbection with Jouathan's exploit (1 Sam. xiv. 4),
may still be recognised in two conical rooky knolls projecting into the valley betrees $J_{t}$ bur' (anciont Gibcah) and Mrekhemuss. (Jibinson, Bill. Res, vol. ii. pp. 116, 117.) In the Tahnud the soil of Michmash is celebrated for its fertility. (Iieland, Paluestina, s.v. p. 897.$)$
[G. W.]
MIDAEIUM or MIDAIUYI (Mi $\delta \dot{c} \varepsilon \sigma \nu$ ) a tuwn in the NE. of Phrygia, on the little river Bathys, on the road from Dorylaeum to Pessinus, and belonging to the conventus of Synnada. (Steph. B. s. $v$. ; Plin. v. 32. s. 41 ; Ptol. v. 2. § 22 ; Strab. sii. p. 576 ; Hierocl. p. 678 , where it is wrongly callel $\mathrm{M} \in \delta \delta^{\alpha}$ zov. ) The town, as its name indicates, mast have been built by one of the ancient kings of Phrygia, and has become celchrated in histury from the fact that Sextus Pompeius, thic son of Pompey the Great, was there taken prisoner by the generals of M. Antony, und afterwards put to death. (Dion Cass. xlis. 18.) It bas heen supposed, with some probability, that the town of Mygdum, mentioned by Ammianus Marcellinus (xxri. 7), is the same as Sidacium.
[L. S.]
M1LDEIA or MIDEA. 1. (Mî́eia, Paus.; Miṓa, Strab.: Eth. Mıסєáт ${ }^{2}$ ), an ancient city of the Argeia, was originally called Persepolis (Пepotws $\pi o ́ \lambda i s$, Steph. B. s. $v$. Míseta), and is inentioned hy Apollodorus (ii. 4. §4) in connection with this hero. It was said to have derived its name from the wife of Electryon, and was celebrated as the residence of Electryon and the hirthplace of his daughter Alcmena. (Paus. ii. $25 . \S 9$; Schol, ad Piud. ol. vii. 49.) But it is mentioned in the earliest division of the country, along with the Heraeum and Tiryns, as belongiag to Proetus. (Paus, ii. 16. § 2.) It was the residence of Hippodameia in her banishmeat. (Paus, ri. 20. § 7.) It was destroyed by Argos, probably at the same time as Tiryns, soon after the Persian wars. (Paus, viii. 27. § 1; Strub. viii. p. 373.)

Strabo describes Midea as near Tiryns; and from its mention by Puusanias, in consection with the Heracum and Tiryns, it must be placed on the eastern edge of the Argeian plain; hut the only clne to its exact prosition is the statement of Pausanits, who suys that, returning from Tiryns into the road leading from Argos to Epidaurus, "you will reach Mideia on the left" (ii. 25. § 9).

Two different sites have been assigned to Mideia. The French Commission place it at the Hellenic remains at Dendrui, $5 \frac{1}{2}$ geographical miles direct E. by N. from the citadel of Argos, as this place lies to the left of the road firom Argos to Epidaurus. But Leake objects, that the distance of Denelra from this road - more than 3 geogra. phical miles - is greater than is implied by the words of Pausanias. He therefore places Mideia at the Hellenic remains near Katzingri, 2 geographical miles due E. of Tiryns. The objection to the latter site is that it lies to the right of the road from Argos to Epidaurus, from which it is separated by a deep ravine. The ruins at Dendra stand upon a hill almost inaccessible on three sides, enclosed by four different walls, one above another, In one of them is a gateway formed of three pieces of stone, resembling the stoaller gateway of the citadel of Mycenae. The ruins descend from the summit to a fountain, which springs out of a grotto near a cbapel of the Panaghia. The surrounding meadows afford good pasture for horses, and thus illustrate the eputhet of Statius (Theb. is, 4.1)
"aptior armentis Midea," and the selection of this lace as the resilence of the harac-lowing Hippodameia in her banishment. (Bublaye, Rectherchus, कc. p. 52; Leake, Peloponnesiacu, p. 268; Curtius, Peloponnesos, vol. ii. p. 395.)
2. A city of Bucotia. [Leranerd.]

MHDIANI'TAE (Maס̄avītaı), the descendants of Midian, one of the suns of Abraham by Keturah, whom the patriarch is said to have sent away during lis lifetime "eastward. unto the cast conntry" (Gen. xxr. 2, 6), and whom we subseqnently find reckoned among "the chiliren of the east." (Judg. vi. 3.) In the third generation after Abraham they were a distinct people, trading between Gilcad and Eivypt; but are asseciated with, or confoutded with, anuther Arab family, the Ishmalites. (Gen. xxxviii, 25, 28, 36.)

The Midianites were probably a Bedawi tribc, and their situation may be pretty aceurately determined, by the following notices, to the territory afterwards occupied by the Nadatief, to the south and east of Palaestine. Duses fod the sheep of Jethre, a priest of Midian. in the peninsula of Mount Sinai, and about Mount Horeb (Exod. iii. 1); subsequently Jethro came to his son-in-law from the land of Midian, while 1srael was encamped in the vicinity of Hureb (xviii. 2, \&c.) ; and Moses was glad to avail himself of his lecal knowledge while traversing the desert to the north of the peninsula. (Nunb. x. 29-32). The close alliance between the Mlidianites and the Mabites, to oppose the progress of Isael, indicates the proximity of the two peoples; and the hostility of the former proves that the alliance of Muses with one of their family did net conciliate the national feeling. (Numb, xxii. 4, 7, sxv. xxxi. 8-12; Josh. xiii. 21.)
The Midianites contimued the bitter enemies of the Israelites thronghout the period of the Judges, when. in concert with "the Amalekites and the children of the east," they invaded simultancously, and in conntless numbers, the southern frontier towards Gaza and the trans-Jordanic tribes in Gileal and Bashan (Judg, vi. rii.). from whence they extended their lavages to the west, and north as far as the confines of Naphthali and Asher. After their signal defeat by Gideon, they disappear from the records of histury, but their slaughter became proverbial. (Psaln 1xisiii. 9; Isaiah, ix. 4, x. 26.)

The country of the Millanites, however, had still a traditionary recullection; and subsequent notice, consistently with the foregoing, place them between Edum and Paran, which berdered on Egypt (1 Kings, xi. 17, 18), in the country afterwards comprehombed under the name of Idumaea, and still later asaighed to the Sabliceni. Indeed Josephus (Ant. iv. $\overline{7}$. § 1) asserts that Petra, the capital of Arabias (i. e. ldmmaea). was called by the natives Areceme ('Apekeuí), fiom the Midianitish king Jokem, one of the five slain by Moses. (Vumb. Axxi. 8.) Fusctius and St. Jermme mention a city Madian, so narmed after ube of the sons of Abraham by Keturah, situated luyond Aratian (i.e. Idumaen) ti) the somn, in the droest of the Saracens, by the Bed Sisa, from which the distriet was called; and :tnolher city of the same name near the Arnon and Areopulis; the ruins of which only existed in their days. (Onomast. s. v.; comp. Hieron. Comm. adt Jcs. 1x. and $F$ Esch, xxs:)

The sitaation of these two cities wonld define the limits of the territory of the Midianites in
their most palmy days. The former of theee two cities is doubtless that mentioned by Josephas (Ant. ii. 11. § 1) under the name of Madiene (Maסımp $)$ ), sitnated at the Red Sea, and is properly identified by Relland as the modern Midyan (the Madian of Abulfeda), identical with the Mdiana of Ptolemy. (Reland, Palaestina, p1. 98 -100.) It is situated abont half-way down the eastern corst of the Elauitic gulf. (Forster, Ging. of Arabia, val. ii. p. 116; aud see the refereners in his index under Mictian.) [G. W.]

Mll:ZA (Miȩ̧a: E'th. Mief(aĩos, Miegeés), a Macedunian city, the pusition of which it is mast difticult to ascertain. Stephanus of Byzantium (s.v.), on the authority of Thearenes, assigus to an eponymons founder, Mlieza, a sister of Beroca, and granddaughter of Mamdon: this legend implies that it was an important city. From the name it would seem most natural to look for it in the neighbourhond of Beroes, which agrees witb Ptolemy (iii 13. § 39), who clases it among the cities of Emathia. Stephanus, on the ether hand, still deriving his information apparently from Theagenes, alludes to it as a тónos $\Sigma$ тpupóros, aud adds that it was sometimes ealled Strymenjum. Alexander the Great eatablishted atn Aristotelian school at Mieza (Plut. Alex. M. 7); and it was famed for a stalactitio cavern. (Plin. xxxi. 2. s. 20; Leake, North. Greece, vol. iv. p. 583.)
[E. B. J.]
MIGGDOL, a Hebrew werd signifying " a tower," and used as a eomplement of several proper names of places in Holy Seripture.

1. Migdul-Eofr, translated in Gen. xxxv, 21 (v. IG in LXX.), qoū $\pi i \not \rho \gamma o u$ Гa $\delta \bar{\epsilon} \rho$. Aulh. Ver. "the tower of Eder ; " and in Micah, iv. 8., mipyos motuviov, Auth. Ver. "tower of the flock" (marl. "Edar"). From the first cited passage, it would appear to have been near Bethlehem ; and St. Jerme mentions a sbephend's tower a mile from Bu:hlehem, so called, as be suggests, in prophetic anticipation of the angelic announcement of the Nstivity. (Onomast. s. r. : Reland, Palaestina, s. v. p. 898.)
2. Mredol-El, a tewn in the tribe of Naphthali (Josh. xis. 38), where the L.XX, running two numes tugether, read Meya入aapip for "Misdal-el, Horem." Eusebins and St. Jerome mention it as a large village named Magdiel, ix. M. P. (St. Jemme writes r. M. P.) from Dura on the road to P'tolemais, probably ilentical with the modern El-Mejdel, in the phain of Esdraelon, a little to the SW, of Sheja Amar, which is, however, more remote than even Euschius states from Dora, i. e. the modern Tantura. Neither could this have any connection with the Miedal-ol of Naphthali, as Reland, in agreement with his two authors, seems to imagine, secing it was situated in the tribe of Asher or Issuchar. (lieland, Polaestina. p. 898.) The Maydala of Galilee (now $1 /$-Mrjidel) is much nore probably the Mindat.el of Naphethali. [Magmala.]
 the tribe of Judah. (Josh. xv. 37.)
3. Migdit sexia, corrupted to Me $\gamma \dot{d} \lambda \eta$ Iend $\alpha$ in Euscbins (onomast. s. v. Serna), whieh, however. St. Jerome's tramslation enables us to correet to
 There is yet another corruption of the Greek correeted in the Latin; the former having סpouv Tगิs 'Iovouaias, the latter, correctly, "terminus Judae." A village of this mame existed in their days 7 miles nuth of Jeticloo.
[G. W.]
MLGONICM. [GyTHLM.]
Microsoft (R)

MIGRON，a town in the tribe of Benjamin，men－ timed in 1 Somuel，xir． 2 （where the LXX．reads Mayס̄́v）as in the extreme border of Gibeah， celebrated for its pomegranate tree；and connected with Aiath（probably Ai）in Isaiah，x． 28 （where the LXX．reads Maryeõó）．Its site has not been recovered in modern times．Dr．Robinson remarks， ＂Migron must have been situated between Deir Diwdin and Michmash；＂1 and so the line of the Assyrian march in Isaiah would seem to require． But the passage in Samuel implies that it was S．of Michmash，which was then occupied by the Philistine garrison，watched by the Israelites in Gibeah，which lay to the S．of＂the passage of Michmakh，＂and with which Migron is connected． （Rinbinson，Bibl．Res．vol．ii．p．149．）［G．W．］

MILETO＇POLIS（Mi入mtoro＾ıs），a town in the north of Mysia，at the confluence of the rivers Ma－ cestus and Phyndacus，and on the west of the lake which derives its name from it．（Strab．sii．p 575 ， xiv．p．681；Steph．B．s．v．；Plin．v．32，40．） Some modern geographers，as D＇Ancille and Man－ wert，have identified Milctopolis with the modern Beli Kessr or Belikesri，bat this place is situated too far S．Leake，too，seems to place Miletopolis two far SW．of the lake，and identifies it with Mi－ nius，which others regard as the site of the ancient Puemanenum．The most probable view is，that the site of Mliletopolis is marked by the modern Moalitsh or Muholitsch，or by the place Hamamli，near which many ruins of an ancient town are found． （Hamilton，Researches，g＇c．，vol．i．p． $81 . \& \mathrm{c} ., \mathrm{vol}$ ii． p．91．）
［L．S．］
MILETOPOLI＇TIS LACUS（Mi入ntouao入ïtis $\lambda(\mu \nu \eta)$ ，a lake io the north－west of Mysia，deriving its name from the town of Miletopolis，near its western shrre．（Strab．xii．pp． 575,576 ．）Ac－ cording to Pliny（v．40）the lake aiso bore the name Artynia，and probably confoonding the river Tar－ sius with the Rhyndacus，he erroneously describes the latter river as laving its origin in the lake， whereas，in fact，the Rhyndacos enters the lake in the south，and issues from it in the north．It now bears the name of the lake of Maniyas（Hamilton， Researches，\＆c．，vol．ii．p．105．\＆c．）［L．S．］

MILETUS（Mi＾ntos：Eth．M $\lambda$ 万бtos，Jilesins）， once the most flourishing city of lovia，was sitnated on the northern extremity of the peninsula formed， in the south－west of the Latmicus Sinus，by Mount Grion．The eity stood opposite the mouth of the Maeander，from which its distance amounted to 80 stadia．

At the time when the Ionian colonies were planted on the coast of Asia Minor，Miletus already existed as a town，and was inhabited，according to Herodotus（i．146），by Carians，while Ephorus（ap． Strab．xiv．p．634）related that the origioal inhabitants had been Leleges，and that afterwards Sarpedon in－ troduced Cretan settlers．The testimony of Hero－ dotus is born out by the Homeric poems，in which （IL，ii．867）Miletus is spoken of as a place of the Carians．That the place was successively in the handa of different tribes，is intimated also by the fact mentioned by Pliny（v．30），that the earlier names of Miletus were Leleccïs，Pityusa，and Acac－ toria（Comp．Pans，vii．2．§ $3 ;$ Stepb．B．s．v．） On the arrival of the lonians，Neleus，their leader． with a band of his followers，took forcible possession of the town，massacred all the men，and took the women for their wives，－an event to which certain social customs；regulatiog the intercourse betweeu
the sexes，were traced by subsequent generations． It appears，however，that Neleus did not occupy the ancient town itself，but built a new one on a site somewhat nearer the sea．（Strab．l．c．）Tombs，forti－ fications，and other remains，attrihuted to the ancient Leleges，were shown at Miletus as late as the time of Strabo（xiv．p．611；comp．Herod．ix．97）．As in most other colonies the Ionians had amalgamated with the ancient inhabitants of tbe country，the Dlilesians were believed to be the purest representa－ tives of the Ionians in Asia．Owing to its excellent situation，and the convenience of foor harbours，one of which was capacious enough to contain a fleet， Miletns sood rose to a great preponderace among the Ionian cities．It became the nost powerful maritime and commercial place；its ships sailed to every part of the Mediterranean，and even into the Atlantic ；but the Milesians turned their attention principally to the Euxine，on the coasts of which，as well as elsewhere，they fuonded upwards of 75 colonies．（Plin．r． 31 ；Senec．Cons．ad Helv．6； Strab．xiv．p．635：Athen．xii．p．523．）The most remarkable of these colonies were Abydos，Lamp－ sacus，and Parium，on the Hellespont；Proconnesus and Cyzicns on the J＇ropontis ；Sinope and Amisus on the Euxine；while others were founded in Thrace， the Crimea，and on the Borysthenes．The period during which Miletus acquired this extraordinary power and prosperity，was that between its occn－ pation by the lonians aud its conquest by the Per－ sians，B．C． 494.

The history of Miletus，especially the earlier por－ tion of it，is very obscure．A tyramis appears to have been established there at an early time；after the overthrow of this tyrannis，we are told，the city was split into two factions，one of which seems to bave been an olizarchical and the other a demo－ cratic party．（Plat．Quaest．Gr．32．）The former gained the ascendant，but was obliged to take ex－ traordinary precautions to preserve it．Oa another： occasion we hear of a struggle between the wealihy citizens and the commonalty，accompanied with horrible excesses of cruelty on both sides．（Athen． xii．p．524．）Herodutus（v．28）also speaks of a civil war at Miletus，which lasted for two genera－ tions，and reduced the people to great distress．It was at length termioated by the mediation of the Persians，who seem to have committed the govern－ ment to those ladowners who had shown the greatest moderation，or bad kept aloof from the contest of the parties．All these convalsions took place within the perivd in which Niletus rose to the summit of ber greatness as a maritime state．When the kingdom of Lydia began its career of conquest， its rolers were naturally attracted by the wealth and prosperity of Miletus．The first attempts to con－ quer it were made by Ardys，and then by Sadyattes， who conquered the Milesians in two engagements． After the death of Sadyattes，the war was contioned by Alyattes，who，however，concluded a peace，be－ cause be was taken ill io consequence，it was be－ lieved，of his troops having burnt a temple of Athena in the territory of Miletus．（Herod i．17．\＆c．）At this time the city was governed by the tyrant Thra－ sybulns，a frieod of Periander of Corinth（Herod．v． 92），and a crafty politician．Subsequently Dliiptus seems to bave concluded a treaty with Cruesis， whose sovereignty was recognised，and to whom tribnte was paid．

After the conquest of Lydia by the Persians， Miletus entered into a similar relation to Cyrus
as that in which it had stood to Croesus, and was thereby saved from the calamities inflicted uion other lonian citics. (Herod. i. 141, \&c.) In the reign of Darius, the Ionians allewed themselves to be prevailed opon by Llistiacus and his unscrupulous kinsman and succesor openly to revolt against Persia, n. c. 500 . Nifetus having, in the person of its tyrant, headed the expedition, had to pay a severe penalty for its rashoess. After repeated defcats in the field, the city was hesieged by land and by sea, and finally taken by storm B. C. 494. The city was plondered and its inhabitants massacred, and the survivors were transplauted, by order of Darins, to a place called Ampe, near the mouth of the Tigris. The town itself was given up to the Carians. (Herod. vi. 6, \&c. ; Strab. xiv. p. 635.)

The battle of Mycale, in B. C. 479 , restored the freedom of Miletus, which soon after joined the Athenian cenfederacy. But the days of its greatness and glory were gone (Thue. i. 15, 115, \&.c.) ; its ancient spirit of liberty, hewever, was not, yet estinct, for, towards the end of the Peloponnesian Wir, Miletus threw off the yoke imposed upon her by Athens. In a battle fought inder the very walls of their city, the Milesians defeated their oppouents, and Plorynichos, the Atbenian admiral, abandoned the enterprise. (Thuc. viii. 25, \&.c.) Nit Jong after this, the Milesiars demolished a furt which the Persian Tissaphernes was erecting in their tervitery, for the parpose of bringing them to subjection. (Thue, viii. 85.) In B. c. 334 , when Alesander, on his Eastern expedition, appeared before Miletus, the inhabitants, enowuraged by the presence of a Persian army and fleet stationed at Mycale, refused te submit to him. Upon this, Alesander immediately commenced a vigerous attack upon the wails, und finally took the city by assault. A part of it was destroyed on that occusion ; but Alesander pardoned the surviving inhabitants, and grauted them their liberty. (Arrian, Anab. j. 18, \&ec.; Strab. l.c.) After this time Mhletus continued, indeed, to flourish is a conmercial place, but was only a second-rate town. In the war between the Romans and Antiwhens, Miletus sided with the former. (Liv. x xxvii. 16, sliii. 6.) The city contimued to enjoy seme degowe of prosperity at the time when Strabo wrote, and even as late as the time of Pliny and Pamsanias. (Comp. Tac. Ann. iv. 63, 55.) From the Acts (xx. 17), it appears that st. Paul stayed a few days there, on his return frem Macedonia and Troas. In the Cbristian times, Ephesus was the see of a bishop, who oceupied the first rank among the bishops of Caria; and in this condition the tewn remained for several centuries (Hierocl. p. 687 ; Mich. Duc. 1. 14), until it was destroyed by the Turks and ather barbarians.

Miletus, in its best days, consisted of an inner :and an outer city, each of which had its own fortitictions (Arrian l.c.), while its harbours were preteeted ly the group of the Tragusacan islands in front of whicin Lade was the largest. Great and beantitul as the eity may have been, we have now no means of forming any idea of its topugraphy, since its site and its whole territory have been changed by the deposits of the Mamuder into a ferstileotial swamp, covering the remains of the ancient city with water and mud. Chandler, and other travellers not being aware of this change, mistonk the ruins of Myns for those of Miletus, and describe the:n as such. (Leake, Asiu Minor, p. 239.)

Great as Miletus whas as a commercial city, it is no less great in the histery of (ireck literalure, being the birthplace of the philosophers Thales, Anaximander, and Anasimenes, and of the historians Cadmus and Hecataeus.

The Milesians, like the rest of the Lenians, Here notorious for their voluptuousness and effeminacy, though, at one time, they must have been brave and warlike. Their manufactures of couches and other furnitnre were very celebrated, and their woollen eloths and carpets were particularly estecmed. (Atlren. 1. p. 28, xi. p. 428, xii. 540 , 553, xv. 691 ; Virg. Georg. iii. 306 , iv. 335 ; comp. Rambach, the Mile to cjustrue coloniis, Halae, 1790, $4^{\circ}$; S.lroeder, Comment. de Kebus Milisiorum, par: i. Stralsund, 1817, $4^{\circ}$; Suldan, Rerum Mitesiarum Comment. i. Darnustadt, $1829,4^{\circ}$.) [L. S.]

## COIN OF MLETES.

MILE'TUS, a town of Mysia, in the territory of Scepis, on the river Evenus, which was destroyed as early as the time of Pliny (v.32.). Another tewn of the same name in Papblagonia, on the ruad between Amastris and Sinope, is mentioned only in the Peuting. Table.
[L. S.]
MILE'TUS (MiAクTOS), a town of Crete, mentioned in the Homeric catalegue. (Il. ii. 647.) This town, which no longer esisted in the time of strabu, was looked upon by some writers as the mother-city of the Ionian celuny of the same name. (Epherus, ap. Strab, xii. p. 573, siv. p. 634; Schel. Apell. Rhod. i. 186; Apolloã. iii. 1, 2, 3 ; Plin. iv. 12.)

Mr. Pasbley (Trav. vol. i. p. 269) explored the site of this Homeric city not far from Episkopiano, at which, considerable remains of walls of polygonal masonry, both of the acrepolis and city are still to be seen. (Hiock, Kreta, vol. i. pp. 15, 418.) [E.B.).]

MILELD, a Roman " colonia" (" Dilen culunis" Peut. Tab.) in Numidia, which the Antemine 1tinerary places at 25 \$1. I. from Cirta. There can be little doubt that this place, which. from the cirewmstance of two councils having been held there, was of some importance (Morcelli, Africa Christana, vol. i. p. 228). was the same as Mnewat (Mipeov al. Múpatov. 1'tol, iv. 3 . § 28).

MHLICHLS. [ACHANA, p. 13. b.]
MILOLITUM (It. Ant. p. 322 ; Nelalicum, It. Hieros. p. 60)2 ; Mytoliton, Geogr. Ras. iv, 6), a town in the interior of Thrace, on the mad from Maximianopolis to Trajanopolis.
[A. L.]
MILON1A. [M.uss.]
MILYAS (Minvás) is said to have been the ar. eient and original name of the conntry sterwards called Lycia (Herod. i. 173) ; but during the period of the l'ersian deminion, it was the name given to the whole momntainens ceuntry in the nurth of Lycia, the somth of lisidia, and a portion of eatern Phrygia. (Strab. xii. p. 573.) The boundaries of this country, however, were never properly fixed, and the whule of it is sometimes described as a part of Lycia. (Arrian, Anab. i. 25.) After the acerssion of tbe dynasty of the Seletucidae in Syria, the name Malyas was limited to the south-western part of

Pisidia, bordering upon Lycia, tbat is, the territory extending from Termessus northward to the foot of mount Cadınus. (Polyb. v. 72; Strab. xii. p. 570, xiii. p. 631, xiv. p. 666 .) This district, the westem part of which bore the name of Cabalia, is atterwards described, sometimes as a part of Lycia (Ptol. v. 3. § 7, 5. §6), and sometimes as part of Pamphylia or Pisidia. (Ptol. v. 2. § 12 ; Plin. v. 42.) After the conquest of Antiochus the Great, the Romans gare the conntry to Eumenes (Polyb. Exc. de Leg. 36), though Pisidian princes still continue to be meotioned as its rulers.

The greater part of Milyas was rugged and mountainons, but it also contained a few fertile plains. (Strab. xii. p. 570.) The inhabitants were called Milyae. (Mı^úaı, Herod. vii. 77 ; Strab. xiv. p. 667; Plin. v. 25, 42.) This name, which does not occur in the Homeric poems, probably belonged to the remnants of the ancient Solymi, the original inhabitants of Lycia, who had been driven into the mountains by the immigrating Cretans. The most important towns in Milyas were Cinyba, Oenoanda, Balbura, and Bubon, which formed the Cibyratian tetrapolis. Some authors also mention a town of Milyas (Polyb. v. 72; Ptol. v. 2. § 12; Steph. B. s. v. Minúu), which must have been situated N. of Termessus in Pisidia. [L. S.]

MIDACES (Miцaксs), a people in Byzacium (Ptol, iv. 3. § 26), and also in Libya Interior. (Ptol. iv. 6. § 20.)
[E. B. J.]
MMAS ( $\delta$ Míuas), a mountain range in lonia, traversing the peniesula of Erytbrae from south to north. It still bears its uncient name, under which it is mentioned in the Odyssey (iii. 172.) It is, properly speaking, only a braach of Mount Tmolus, and was celebrated in ancient times for its abundance of wood and game (Strab, xiv. pp. 613, 645.) The neck at the south-western extremity of the peninsula formed by Mount Mimas, a little to the north of Teas, is only about 7 Roman miles broad, and Alexander the Great intended to cut a canal through the isthmus, so as to counect the Caystrian and Hermaean hays; but it was one of the few undertakings in which he did not succeed. (Plin. v. 31 ; Paus. ii. 1. § 5 ; comp. vii. 4. § I: Thucyd. viii. 34; Ov. Met. ii. 222 ; Amm. Marc. xxxi. 42; Callim. Hymn. in Del. 157; Sil. Ital. ii. 494.)

Moust Nimas forms three promontories in the peniosula; in the south Coryceum (Korake or Kurko), in the west Argennum (Cape Blanco), and in the north Meluena (Kura Burnu). Chandler (Travels, p. 213) describes the shores of Mount Dlimas as covered with pines and shrubs, and garnished with flowers. He passed many small pleasant spots, well watered, and green with corn or with myrtles and sbrubs. The summit of the mountain commands a magnificent view, extending over the bays of Smyrna, Clazomeuae, and Erythrae, the islands of Samos, Chios, and several others. [L. S.]

MiNAEI (Meivaiot), a celebrated people of Yemon, in the SW. of Arabia. Strabo names them first of four great nations situated in this extremity of the peninsula, and bordering on the Red Sea: their principal town was Carna or Carana; next to these were the Sabaei, whose capital was Mariaba. The Catabanes were the third, extending to the straits and the passage of the Arabian Gulf - the Straits of Bab-el Mandeb. Their royal city was Tamna, To the east were the Chatranotitac, whose capital was named Cabatanum. From Elana to the country of the Minaci mas 70
days' journey. Thns far Strabo (xvi. pp. 768, 776); consistently with whose account, I'toleny (vi. $7 . \S 23$ ) mention. the Minaei as a mighty people (Mivaior, $\mu \dot{\epsilon} \gamma \alpha$ é $\theta \nu 0 s$ ), bordering on the ioner frankincense country, not far from the Sabaei, and places Carna Metropolis in long. $73^{\circ} 30^{\prime}$, lat. $23^{\circ} 15^{\prime}$, which would be on the coast of the Gulf of Arabia, distinct from the Carnus or Carna above named, and identical with the Cornon of Pliny, a town of the Charmaei, who were contiguous to the Minaci. Pliny represents the Minaei as contiguous to the Atramitae in the interior; which Atramitae-identical no doubt with the Chatramotitae of Strabo-he represents as a branch of the Sabaci, which last tribe extended along both seas, i. e. the Indian Ocean and the Arabian Gulf; and as the Carnus, which he names as a city of the Sabaei, is doubtless the Carma which Strabo makes the capital of the Minaei, be would seem to imply that these last were also aiother division of the same principal tribe of the Sabaei. Their country was reported by Aelius Gallus to be exceedingly rich. "Minaeis fertiles agros palmetis arbustisque, in pecore divitias." (Plin. vi. 32.) They are mentioned by Diodorus (as Muvalot), in connection with the Gerrhaci, as transporting frankincense and other scented wares from Upper Arabia ( Ek $^{2} \tau \hat{\eta} s$ ăvw $\lambda \in \gamma o-$ $\mu$ évis 'Apasias), i.e. the interior (iii. 42). All these notices would serve to fix the seat of this tribe at the SW. part of the peninsula, in the modern Yemen, Pliny says that they were supposed to derave their origin from Minos, the king of Crete, as their neighbours, the Rhadamaei, were from his brother Rhadamanthus (vi. 32), in which Mr. Forster thinks we may " easily recognise, under the thin veil of classical fiction, the important historical fact of the existence of an open trade between the Greeks and Arabs from very remote times, and of all the facilities iomplied l.y commercial intercommanity." (Arabia, vol. i. p. xxxvii., ii. pp. 74, 75.) lo his account of the myrrh and fratkincense, Pliny relates that this plant, which grew in the country of the Atramitae, one canton (pagus) of the Sabaei, was conveyed by one narrow path through the neigbbouring canton of the Minaei, who were the first to carry on the trade, and always the most active in it; from which fact the frankincense canie to be called Minnaeum (xii. 30). And in speaking of the varions qualities of myrrh, be mentions secoud, " Ninaea, in qua Atramitica," as most esteemed next to the Troglodytica (sii. 35).

With regard to the position of this important tribe in the modern map of Alabia, there is a wilie difference of opinion amoog geographers. D'Anville finds their capital Carana in the modern Almakarana, which is, he says, a strong place. (Gengroph. Anc. tome ii. p. 2थ1; comp. Forster, Arabien, vol. i. p. 1iii.) Gosselin contends that Almakarana is too far south for the Carna of the Minaei, and is disposed to find this capital in Curn-al-Manazil, as Bochart had suggested (Phaleg, lib. ii. cap. 22. p. 121) ; which Edrisi places two days juuruey from Mekke, on the road to Siloa. (Gosseliin, Récherclies sur la Góographie des Inciens, tomie ii. p. 116.) Dean Vincent thus attempts to fix their position:- "The site of the Minacans is not easy to fix; but by a comparison of differnit accounts, they were S. of Hedjaz, N. of Hadramaut, and to the eastward of Sabera; and they were the carriers to all these provinces: their caravans passed in 70 days from Hadramaut to Aila, as we leam from Strabo; and Aila is bat 10 miles (?) from Petra." He reand Aila is bat 10 miles (?) from Petra."

## MINAFI

marks, in fifect opposition to Ciosend n. that Bochart. in placing them at Carmos-l. 1/aruali (1. Kirru-el-1/aghisal), only 3 stations S. of Mecca, which lien supposes to be the Carma or Camana of Pliny. brings them too far to the N., for that "Ptelemy Whaces them much farther s." (Periphus, cap. xxvii. p. 363, and notu 254.) But M. Jomard holds that Wudy Mince, to the S. (?) nf Mecca, correspunds with the ancient Minaci: the divance to Aile he computes as $10 \frac{1}{2}$ decrees, or 294 hours (ap. Mengin. Histoire de l'Eylyte, Ge. p. 377). Mr. Furster asizns them a wide extent of territory in the modern provinces of Meiliuz, Nedjd, and Iemen, even to the borders of I/adromectst. "The seat of this great commercial prople, who divided with the Girraei the commerce of the peninsula (transpurted by IVAlwille to the lieart of Femen, and by lincent to the country of the Asyr Arabs), assuredly lay, if any reliance whatever may be placed in the position of Prolemy, in an inland dreetion ESE. of Mlecca. For the Minaei, according ti) him, hay inmediately S of the "regio interior myrrifera;" and this, again, was situated dne S. of thie Manitae. The Manitae being the same with the M-zeyue, this description would identify the "interior myrrifera" with the fruitful mountain region 1: of Tayf: and the Minaei, consequently, with the great Ateybe tribe described by Burkliarits, as the most numerous of the tribes of IFedjaz, and inhathiting the rich inland comntry stretching eastrard, under those mountains, from Lye and Kindikth to Turaba." (Arabia, vol, ii. pp. 251.252.) He adds, in a note(*)," Its site (viz. that of the "interiur myrrifera ${ }^{1}$ ), with that of its inhalitants, the Minaei, may be determined independently, by the concurrent testim nies of Ptoleny and I'liny: the former places his Clargatha [ Xapiáda, Pal. Map $\dot{\alpha} \dot{\theta} a$ ], and the latter his Karriata, in conjunction with the Minati. The town thas denominated is clearly that of Kariatuin; but Kariatain is seated beneath, or rather upon, the mountains of Tauf." Hiwing thus determined their nurthern bonder " $\$$. uf Karintain, or in the plans below tbe mountain chain ruming ENE, from Tayf." be thas defines their southern limits. "On the S., according to Ptolemy, the Minaci were bouniled by the Doreni and the Mokeretae. It is mpossitle to mistake, in the Doreni, the imhatitants of Zokran, or in the Mokeretar, thame of Mellhra, two adjuining provinces, lying S of Mecat and Tayf. and crosing the entire space between the sea and the unimbatited deart. This decisive vernfisation slats in the ancient Minaei betwen the matutains of Zolpren and Mthere, and those N. if Titff" (1.255). "The chief tawns, the territory at de the national labits of the Minaei, as deseriberl by the anciont सemeraphers, bat a remarkable ci re-pondmine to those of the Atayle Arabs, the present inbabitants of this district ; atal the coincidonce of the falu-groves, and other fruit-trees of the Minari, and their wealth in cattle, notieed by Pliny, with the excellent pasture-grownds, the great alumbase of canche anul sherep, possessed by the Imwerful tribe of Ategter, and with the plantations for which Taraba is remarkable, that furrish all the surroumling country with dates, environed, as Burekbardt describes both it sul Tuff to be, 'with Jalm-groves and cardens, watered by numerous risulets,' mast be allowsal to a mrohorate, in a very renarkable manner, thus veritication of the ancient seats of the Mamei," (Furster, Arabia, vol. ii.

Mr. Forster further identifies the principal fomm of the Minati (the Carman Regia of Ptolemy) with Karn-al-Munzil, a consideraole town still in being between Tayjand M. kka; . . . and Carmon with Karn-al-1/ugsect, 口fent the mountains S. of Tauff; which former Bockart had already ilentifiel with the Carna or Carana of Illiny. "The site of their capital, within a few niles of Wady Mina [immelliately to the E. of Mckka], suggests the not improbable derivatiun of their name from that famnus seat of the indolatry of ancient Arabia " (p. 254 notet): an byputhesis in which, it has been seen, Jomard coincides. But, though fixing the orininal und principal seat of the Minary in the S. of the Iledjoz, he thinks - it still is certain, from Pling's statement, that this prople posmessed a key to the conmerce of the incense count y, by having oltained the command of one of the two passes into the Ijebal-al-Kamir " (which is in the heart of IIadramout): and he bence infers that they possessed one of the two emporiums of the trade in incense and myrrh, mentioned hy Pliny, on the sonthern coast; "an inference which at mee conducts us to Thauare or Doin [NE. of Rus Fartuk], and to the mountain pass imnediately behind it " (p. 258, comp. vol. i. p. 135, 136). The arguments in proof of this position, and of the connection of the Dinaei with the Joktanite patriareb Jerah, which camot be considered as convincing, are tully stated and enforced by Mr. Fonster with lis usual ingtonity (vol. i. pp. 128-136); but it is an unfirtuaate circumstance that he has remored the central seat of this tribe--deacended, according to this hyputhesis, frum "t the father of Yemen,"into the territory of Hedjuc and for Nodjd; be maintains that, "from E. to W. the Dinaei stretched the entire breadth of the peninsula, their eastem frontier tunching the Gerrlieans, on the Porsion Giulf; while Carman Regia, now Karn-al-1/anzil, their metropulis, is seated only 21 leagues ESL.. of Mokka, in the great province of Al-Karelje or Iemama" vol, i. p. 1xviii)

The question of the position of the Minaeans lias been investigated by M. Fremel with a widely different result. (Jorrinal Asiatique, 3me Niriè, toure x. pp. 90-96, 176-200.) He coufines them to the central part of Yemen, and denies their connertion either with Wady Mina, near Mekka, or with Munüh, an idol of the Hudhaylides and the Khomzäziles, between Mekta and Medina. He regards the name as a possible corruption of Yemenaci, the first syllable being cons. verted into the Greck article, in its transmutation from one language to another; but suggests also another derivation of the name from the patriarch Ayman, found in the native genealogies third in timecont from. shas. In contromation of the former etymulugy, he maiutains that the name ${ }^{\text {Pemen, which now }}$ comprebends the eastern quarter of Suutbern Arah a, was formerly proper to the central portion of that province. He thinks that the capital of the Minsel -the Carna or Carma of Strabo, the Carown of Iliny, ilemical, slso, with the Carman Regis of Ptolemy (to which that geographer assigns too higb a latitude, as he does also the Minaci)-is to be found in the Al-Kuru of 1Fady Doan, five or six days N... or, according to another authority, WNH:., of Mutwllah. Their other town, Mariabs Baramalacum, he places in the same valley. [Mathabs. 2. 7 The position thus assigned to Caroa in tho. If culy fruin, enables us to fix the extent of the Fispros of fin:(19) between the sabacums and

Hadramaut. Their conntry must have comprehended the eastern laalf of the territnry of Yafa, and the western balf of the modern Hadramaut. So that Shituim and Férim, and the tomb of Hidd, and the wells of Barkot (Itolemy's source of the Styx), which now form part of Madramoul, pertained to the Minaei. (Kitter, Erdlande von Arabien, i. pp. 278-284.)
[G. W.]
MINARIACUMI, in Belciea, is placed on a road from Castellum (Cassel) to Tumacum (Tournni); and a road also ran from Cnstellum throngh Dinariacum to Nemetaem (Arras). The distance is xi. (leagnes) from Cassel, a well-known position, to Minariacnm. D'Anville conteads that the gengraphers are mistaken in placing Dlinariacmm at Merghem, or, as the French call it, Merville, on the river Lys, instead of placing it at Esterre, also on the Lys. The distances as nsual cause a difficulty, and there is nothing else that decides the question. An old Roman road leads from Cossel to Esterre, and Roman coins have been found at Esterre. [G. L.]

MINAS SABBATTHA (Meivas इabateá, Zosim. iii. 23), a small fortified work in Babylooia, which Zasimus describes as, in his day, occapying the site of the celebrated Parthian capital Ctesiphon. Abúlfela (p. 253) speaks of a place in the neighbnurhood called Sabath.
[ V .]
MINA'TICUMI, in Belgica, is placed by the Antonine Itin, and the Table on a road from Bagacum (Burcui) to Durocortorum (Reins). It is placed in the Itin. between Catusiacum (Claours) and Auxenna or Axuenna. [Axuenva.] Catusiacum is onitted in the Table, and Miraticum appears nnder the form Ninittaci, or Nintecasi, as D Anville writes it. Here, as in some other cases, the name in the Table appears to be more exact, for Ninittaci is Nizy le Conte, which stands on an old Roman road that leads from Chanurs to Reims. [G. L.]

MI'NCIUs (Míरкıs: Mincio), a considerable river of Gallia Cisalpina, and one of the most important of the northern tributarjes of the Padus. (Plin. iii. 16. s. $20,19$. s. 23 ; Strab. iv. p. 209.) It has its snurces in the Rhaetian Alps, at the foot of the Monte Tonale, from which it flows to the lake Benacus, or Lago di Gardo, which is formed by the accumulation of its waters ; from thence it issues again at Peschiera (the ancient Ardelica), and has from thence a course of about 40 miles, till it falls into the Po near ciovernolo, about 10 miles above Hostilia. In the upper part of its course it is a mere monhtain torrent; but after it leaves the lake Benacus it is a deep and clear stream, which holds a Now and wioding course through the low and marshy plains of this part of Cisalpine Gaul. It is characteristically described by Virgil, who diwelt on its banks. (Virg. Ecl. vii. 13, Georg. iii. 15, Aen. x. 206.) In the immediate neighbourlood of Mantua the waters of the Mincius stagnate, so as to form shallow lakes of considerable extent, which surround that city on three sides, the fourth being also protected ly artificial inundations.

A battle was fought on the banks of the Mineins in r. c. 197, between the consul Correlius and the enmbined forces of the Insubres and Cenomani, in which the latter were entirely defeated, and their leader, the Carthaginian Hamilcar, taken prisoner. (Liv. xxxii, 30.) At a meuch later period it was on the banks of the Mincius, near its confluence with the Padns, at a place called by Jormandes Acrotentus, Mamboleius, that the celebrated interview took place between Pope Leo 1. and Attila,
which led the king of the liuns to withdraw his furces from Italy. (Jornand. Get. 42 ; 1?. Diac. Hist. M/iscell. xv. p. 549.)
[E. H. B.]
MINERTAE PLOAONTO'RIUM ( $\tau \dot{\text { º }}$ 'A日quaiov àкрштท́pıov, strab.: Punta della Camponella) a a prumontory on the coast of Canpania, oppusite to the island of Capreae, forming the southern bounday of the celebrated Crater or Bay of Noples. It is a bold and rocky hearland, constituting the extremity of a monntan ridge, which branches off from the main mass of the Apennmes near Nuceria, and furmis a great mountain promontory, abust 25 miles in length, which separates the Bay of Naphes from that of Paestum or Salerno. The actual headland de rived its name from a temple of Minerva, situated on its summit, which was said to have been fuunded by Ulysses (Strab. v. p. 247) : it was separated by a channel of onls 3 niles in width from the island of Capreae (Capri). On the S. side of the promontory, but abont 5 miles from the extreme bcadland, are some small rocky islets now callied Li Gialli, very bold and picturesque in appearance, which were selected by tradition as the abode of the Sirens, and beace damed the Sirenusae Insulae (Eeipquov̂oबat עท̂$\sigma 0 t$ Ptol. iii. 1. § 79 ; Strab. v. p 247; Pseud. Arist. Mirob. 110). From the proximity of these, according to Strabo, the beadland itself was sometimes called the lromontory of the Sirens ( $\mathbf{\Sigma}$ є $\rho \eta$ puva$\sigma \hat{\omega} \nu$ áкрштй more nsual appellation of Promontory of Mlinerria, though Pliny adds that it had once been the abode of the Sirens ; and there was an ancient temple on the side towards Surrentum in honour of thise mythical beings, which bad at one time been an object of great veneration to the surrounding population. (Strab. v. pp. 242, 247; Plin. iii. 5. s. 9: Pseud. Arist, l. c.; Ovid. Met. xv. 709; Mel. ii. 4 § 9 ; Liv, xlii. 20.) Tacitus in one passage calls the headland Surrentioum Promontorium, from its proximity to the town of Surrentum, from which it was only 5 miles distant; and Statius also speaks of the temple of Ninerva as sitnated "in vertice Surrentioo." (Tac. Ann, iv. 67 : Stat. Sill. v. 3. 165.)
The Promontory of Minerva is a point of cunsiderable importance in the const-line of Italy: bence we find it selected in B. C. 181 as the point of demareation for the two squadrons which were appointed to clear the sea of pirates; the one protecting the coasts from thence to Massilia, the other those on the S . as far as the entrance of the Adriatic. (Liv, 21,18 .) In B.c. 36 a part of the flect of Augusas, under Appins Claudus, ob its voyage from Misemum to Sicily, encountered a tempest in passing this caje, from which it suffered heavy loss. (Appian, B. C. v. 98.) It is mentioned also by Luchlus as a point of importance in his voyage along the const of lraly. (Lucil. Sot. iii. Fr. 10.)
[E. H. B.]
MH'N1O (Mignone), a small river of Etruria, flowing into the Tyrilienian sea, betreen Centomcellae (Civita 1'ecchia) and Graviscae, and about 3 miles S . of the mouth of the Marta. It is a trifling stream, though noticed by Virgil, as well as by lintilius in his voyace along this coast; but Mela and the Geographer of Ravenna are the only geograp hical writers who deem it worthy of mention. (Virg. Aen. x. 183 ; Serv. ad loc. ; Iutil. Itin. i. 279; Mel. ii. 4. § 9 ; Geogr. Rav. iv. 32.)
[E. H. B.]
M11'NIUS (Mintos: Minho), a river of Spain, rising in the north of Gallasecin, in the Cantabrian momntains, and falling into the Ocean. (Strab. iii. p. J53.) Strabo erroneously says that it is the
largest river of Lasitania, and is na l-ble for :min stadia. Acconling to Acthicus Ister Th. 1:), it has a coune of 310 milon; hut its real wrome is ahout 120 miles. The river was said to have derivel its natne from the minium, or vermilion, carried down lyy its waters. (Justin, xliv, 3.) Acconling to Strabn (l.c.) it wa orizinally called Baests (Baivis); hut as this name dhes not occur elvewhere, it has been conjecturd that Baives is a false reading for Nai is s, or $\mathrm{N} j \mathrm{j}$ ess, mentioned by Ptolemy (ii. 6. § 1) and Mrla (iii. 1). The Nafurs is a river falling into the Ocean between the Minins and the Durius; and it is supporel that P'nseidonius, whom Strabo fulluwed, coufinmed this river with the Minitus. (Groskurils Struho, rol. i. p. 260.) Níuos, in Appian (Ilisp 72). is clearly only a false reading for Mivios. The Jlinius is also mentimel by Ptol. ii. 6. § 1: Mela, iin. 1; Plin. iv. 21. s. 35.

MNIZ1/s [MsIz.s.]
MINSA(iARA (Mivdáyapa, Arrian, Peripl. p. 24: Mivarápa. Ptol. सii. 1. §63), the chief tuwn of the district lying between the Namadus and Indus, which towards the sea was known generically by the name of Indu-Scythia. Its exact position cannot now bo determined ; hence, sume have supposed that it is represented by Tatte, near the months of the Indus, which is suid to be called by the native Rajputs, Sa--) Vinugur. (Iitter, Erdkunde. vol, r. p. 475.) There is little doubt that the name expresses the "city of Min," rugura being a common Sumacrit word for city, and lsidure of Charas mentimnine a town called Min in this exact locality. (Tourth. p. 9 : Lassen, Pentap. Indic. p. 56.) [V.]

MINXITH. a tuwn on the E. of Jurdan, in the country of the Arumanites (Judlyes, xi. 33), celehrated for its corn, which was sold for export in the markets of Tyre. (Erech xxvii. 17.) The proper name does not occur in the LXX. in eitber of these faswees, reading in the former Arnon (Als. $\mathrm{\Sigma}_{\varepsilon-}$ $\mu \omega \in i \theta)$, and translating a corrupt reading in the 1.tter by $\mu$ ipoev, aftor oszov, as in the same passage ti y represent the proper name Pannag by kaбias. livatuation, as Reland has remarked (Palaestiva, A. $\because$, p, 899), depends on the two questions, (1) of 1). lum of march followed by Jephtha, and (2) of t: - लvistence of two Aroers. There is no proof of 1', latter lyythesis; and the course of the narra1. ${ }^{\prime}$ soms to demand that the former question ton whit he resulved in farour of a course tron N. 1.1 S.; which wombl oblige us to took for Minhalo some distance sontle of Aroer, whicb was sith-att-1, we know, on the river Amon. [Anson; Auosk.] Jurphas names it Maniathe (Mariaily), lus yiver no clhe th its praition, further than that ;- was in Ammanitis. Eusehins places it at Maan14 (Maavi'), iv. M. P. from Fisbus (Heshbum), on 1., raad to Plitadelphia (Onmast. s. r. Mevarie: S. . Jerome, Me mith): but this does not accord with theabwe notufations of its site.
[G. W.]
 ati, on a raad from Vivisens ( Vexti), on the lake 41 limera, to, Aventionm (Atrenches). The place is Monulom, or as the Combans call it Militen, in the (:unton of liculd, on the roud from Bern to Letmx+me.
[6. 1.] $]$
 Mminm, Pl'n. iv. 12.) 1. A plare in Crete, which It ony ( $t$ c.) fixes to thie W . of the healland of 1Pryanon. Mr. Palahley (1row, wol. i. p. 44) thinks thut it was sitnated at sternes, on the Akretciri of the bay of Südhes.
2. A city of Crete, which belomed to the district f Lyetus, and stood on the narrowest part of the whind, at a distanee of 60 stadia from Hierapytna. (Strab. x. p. $475 ;$ Ptol. iii. 17. § 5.)

Its position has been fixed at Castel Mirabello, near Istrones. (Häck, Kreta, vol.i. p. 421.) [E.B.J.]

MINO'A (Mev'́a). 1. A small island in frunt of Nisuca, the port of Megara. [For details, see Meg.aka.]
2. A promontory of Laconia, S. of Epidaarus Limera. [Epidatrea Limera.]
3. Another namu of the inland of Paros. [Paras.]
4. A city of Si ily, usually ealled Heracleia Minca. [Hersicleia Mtnoa.]
5. A town in the island of Anorgos. [Asomoos.] 6. A town in the island of Siphnos. [Surnvos.]

MNTHE. [Elis, p. 817, b.]
MINTLRNAE (Mevtoūpva, Ptol.: Mertovipun, Stral. : Eth. Muvtoupvifacos, Plut. : Mintumensis) a city of Latium, in the more extended sense of that term; bat originally a city of the Alnomians, situatel on the ri, ht bank of the Liris (Garigliamn), ahout 3 miles from the sea. It was on the line of the Appian Way, which lere crossed the Liris. (Strab. r. p. 233.) The name of Ninturnae is first mentioned in history during the great Latin War, B. c. $340-338$, when it afforded a refuge to the Latin forces after their defent in Campania. (Liv. viii. 10.) It was not, however, nt that time a Latin city, but belonged to the Ausonians, who appear to have heen then in alliance with the Latins and Campanians. For, in B. c. 315. Livy tells us that thre were three cities of the Ausonians, Ausona, Minturnae, and Vescia, which had declared themselves hostile to Rome after the battle of Lautula, but were again betrayed into the hauds of the Romans by some of the joung nobles in each, and the inhabitants unsparingly put to the sword. (Liv, ix. 25.) Nut inany years later, in b. c. 296, a Foman c lony mas established at Minturnae, at the same time tith one at Sinuessa, a little further down the coast: they were both of thom of the class called "Culonize Dlaritimae," with the rights of Roman citirens (Liv, x. 21: Vell. Pat. i. 14): and were ubvionsly desirned to maintain and secure the comnmunications of the Romaus with Campania. During the Second Punic War both Ninturnae and Simessa were among the colonies which endeavoured, but without success, to establish their exemption from the obligation to furnish military levies (Liv, xxvii. 38): and again, during the war with Antiochus (2. C. 191), they attempted, with equal ill success, to procure a similar exemption from providing recruits and supplies for the naval service. (Id. xxxvi. 3.) Minturnae was situated on the borders of an extensive marsh, which rendered the city unbealthy, but its situation on the Appian Way must have contributed to maintain its prasperity; and it seems to have been already under the Republic, what it certainly became under the Empire, a flomrishing and propulotis town. In B. C. so Minturnae was tho seene of a celebrated adve iture of C. Marius, who, while flying trom Rome by sca, to escape frum the lande of Salla, was compelled tu put into the mouth of the Liris. He at first endeavoured to cenceal himself in the marshes near the sea-const; but being diwowernd and drewerel from thence, he was east iuto prism by onler of the maciotrates of Minturnac, whu sent a slave to put him to death. But the man is said to have been se struck with the majestic appearance of the ased general that he was unable

MINTURNAE.
MISENUM.
to execute his task; and hereupon the magistrates determined to send Marius away, and put him on bonrd a ship which coureyed him to Africa. (Plut. Afar. 36-39; Appian, B. C. i. 61, 62; Vell. Pst, ii. 19 ; Val. Mas. i. $5 . \S 5$. ii. $10 . \S 6$; Liv. Epit, Ixxvii.; Juv. x. 276; Cic. pro Plane. 10, pro Sext. 22.)

We hear little more of Minturnae under the Republic, thougb from its position on the Appian Way it is repeatedly noticed incidentally by Cicero (od Att. v. 1, 3, vii. 13, xvi. 10.) It still retained in his time the title of a colony; but received a material accession from a fresh body of colonists established there by Augustus ; and again at a later period under Caligula. (Lib. Colon. p. 235; Hygin. de Limit. p. 178; Zumpt, de Colon. p. 355.) We find it in consequence distinguished both by Pliny and Ptulemy by the title of a colony, as well as in inscriptions (Plin. iii. 5. s. 9; Ptol. iii. I. § 63 ; Orell. Inscr. 3762 ; Mommsen, I. R. N. 4058 -406 I ) ; and notrithstanding its unhealthy situntion, which is alladed to by Ovid, who calls it "Ninturnae graves" (Met. xy. 716), it appeara to have continued throughout the Roman Empire to have been a flourishing and important town. Its prosperity is attested by numerous inscriptions, as well as by the ruins still existing on the site. These comprise the extensive remains of an amphitheatre, of an aqueduct which serred to bring water from the neighbouring hills, and the substructions of a temple, as well as purtions of the ancient walls and towers. (Romanelli, vol. iii. p. 430 ; Eustace, Classical Tour, vol. ii. p. 318.) All these remains are on the right bank of the Liris, but according to Pliny the eity extended itself on both sides of the river; and it is certain that its territory comprised s considerable extent on both banks of the Liris. (Hygin. de Limit. p. 178.) The periud of its destruction is unknown: we find it still mentioned in Pricopius (B. G. iii. 26) as a city, and apparently a place of some strength; but at the commencement of the middle ages all trnce of it is lost, and it was probably destroyed either by the Lombards or Saracens. The inhalitants seem to have withdrawn to the site of the modern Trajetto, $a$ village on a hill nbout $1 \frac{1}{2}$ mile distant, the name of which is obviously derived from the passage of the Liris (Ad Trajectum), thouch wholly inapplicable to its present more elevated position.

Between Ninturnate and the sea-coast, at the mouth of the Liris, was the celebrated grove of Marica [Lects Mabicae], with a temple or shrine of the goddess of that name, which seems to have enjoyed a great reputation for sanctity. (Plut. Mar. 39; Strab, v. p. 233.) She appears to have been properly a local divinity; at least we do not meet with her worship under that name any where else in Italy; though many writers called her the nowher of Latinns, and others, perbaps on that very arcount, identified her with Circe. (Virg. Aen. vii. 47 ; Serv. ad luce; Lactant. Inst. Div. i. 21.) We may probably conclude that she was connected with the old Latin religinn; and this will explain the veneration with which her gruve and temple were regarded, not only by the inhabitants of Minturnac, but by the Romans themselves. Fiequent allisions to them are found in the latin poets, but always in cinse connection with Dinturnae and the Liris. (Ilor. Carm. iii. 17. 7; Lucan. ii. 424: Martial, xini. 83; Claudian, Prob. et Ol. Cons. 259).

Strabo calls Minturnae abuut 80 stadia from Formiae, and the same distance from Sinuessa: the

Itincraries give the distance in each case as 9 miles. (Strab. v. p. 233; Itin, Ant. pp. 108, 121.) After crossing the Liris a brunch road quitted the Aypian Way on the left, and led by Suessa to Teanum, where it joined the Via Latina.
[E. H. B.]
M1'NYA (Mivía), a city of Thessaly, said by Stephanns B. (s.v.) to have been formerly called Halmonia ('A $\left.\mu \mu v v^{\prime} a\right)$, and to have derived its name from Minyas. It is mentioned by Pliny (iv. 8. s. 15) under the name of Almon, and in conjunction with Orchomemus Minyeus in Thessaly, (See Müller, Orchomenos und die Minyer, p. 244, 2nd ed.)

MINYAE (Muvial), an ancient race in Grecce, said to bave been descended from Minyas, the son of Orchomenus, who originally dwelt in Thessaly, and afterwards migrated into Boeotia, and founded Orchomenus. [For details see Orehomenus.] Most of the Argonautic heroes were Minyae ; and some of them having settled in the island of Lemnos, continued to be called Mioyae. These Lemmian Minyae were driven out of the island by the Tyrrhenian Pelasgians, and took refuge in Lacedsemon, frem whence some of them migrated to Thera, and others to Triphylia in Elis, where they frunded the six Triphylian cities. (Herod, iv. 145-148.) [Elis, p. 818.]

MINIFIUS (Muvyitos), the ancient name of the river Anigrus in Elis. (Hom. Il. xi. 721.) [Anicrus.]

MlROBRIGA (Mıpófpıra). 1. Also called Merobnica (Plin. iv. 12. s. 35; Coins), a town of the Celtici in Lusitania, upon the Ocean (Ptol. ii. 5. $\S 6$ ), identified by some with Odemiva, by others with Sines. (Nentelle, Esp. Anc. p. 260 ; Ukert, ii. 1. p. 390.)
2. A Roman municipium, in the territory of the Turduli, in Hispania Baetica, on the rond from Emerita to Caesaraugusta, now Capilla, N. of Fuente Orejuna. (Ptol. ii. 4. § 13; Plin. iii. 1. a. 3; It. Anton. p. 444 ; Inscr. Gruter, pp. 76, 257.)
3. A town of the Oretani, in Hispania Tarrnconensis, mentioned only by Ptolemy (ii. 6. § 59).

MISE'NUM (Mıoŋpóv), was the name of a remarkable promontory on the const of Campania (Misenum Pronontorium, Tac. Ann. xiv. 4; sometimes also Misent l'romontonitar, Liv. sxiv. 13 ; тঠ Mıoŋvò äкpov, Strab.: Capo di Miseno), together with the adjacent port (Portus Misenus, Flor. i. 16), and a town which grew up adjoining it, after the harbour had become the station of the Homan fleet. The promontory of Disenum furms the northern limit of the celebrated gulf called the Crater or Sinus Cumanus (the Bay of Noples). It is an almost isolated beadland, forming a hill of considerable elevation, and of a somewhat pyramidal form, joined to the mainland opposite to $I$ rocida only by a narrow strip of low land, between whicb and the contimuation of the coast by Bauli and Baiae is a deep inlet forming the harbour or port of Misenum (Strab. v. p. 243). A large stagnant pool or basin, still deeper in, now called the Mare Morto, commanicated with this outer port by a very narrow entrance, which could be closed by a bridge or causeway. It is probable that the headland of Misenum itself at one time formed part of the encircling heights of the crater of a long extinet voleano, of which the Mare Morto occupies the centre, and the Monte di Irocida (as the headland opposite to the island of that name is now called) constituted the opposite margin, (Daubeny On Volcanoes, p. 202, 2nd edit.)

The name of the promentory of Mi inum was derived, according to a tradition very gemmity adopted by the Ruman writers, from the trumpetor . i Aencas, who was suppased to be huried there (Virs, Ain. vi. 163.212-235; Propert. iv, 18. 3 ; Sil. 1tal. xii. 155 ; Stit. Site. iii. 1. $150 ;$ Mel, ii. 4. §9; Solin. 2. § 13). Amother logend, however, seems to have represented Misemns as one of the companions of Ulysses (sitrab. v. p. 245). There is no trace of the existence of a town on the spot at an early period, though it is almost certain that its secure and land-locked port (already alluded to by Lycophtron, Alex. 733) must have been tnrned to account by the Cumaeans during the period of their naval and commercial potmer. Before the close of the Roman Republic the actoal promontory of Misenum, as well as the neighbouring shores of Bauli and Baiae, was become a favourite site for the villas of wealthy Romans; but it was not till the reign of Augustus that any considerable population was cullected there. Tbat emperor first intrulaced the custom of maintaining a fleet for the defince of the Tyrthenian or Lotrer Sea, of which Misenum was made the permanent station (Suet. Aug. 49; Tac. Ann. iv. 5), as it continued throughout the perind of the En pire. Thus we find the "clas is Alisenensis" continually alluded to by Tacitus (Aun. xiv. 3, 62, xт. 51, Hist. ii. 100, iii. $56, \mathcal{K c}$.) : and the elder I'liny was stationed at Miscnum in command of the flect, when the memoralle eruption of Vesurius bruke ont, in which he perished, A.s. 79 , and of which his nepliew has left ns so interestinz an account (Ep. vi. 16, 20). At a much later period we find the establishment of a fleet at Misenum, with a legion specially organised for its service, referred to as a permanent institution, both by Veretius and the Nititia. (Veget. s. 1. 2; Notit. Dign ii. p. 118.) There can be no doubt that in cunsequence of this important estahlishment a considerable town grew up aronnd the port of Nisenum; and we learn from several inscriptions that it posscssed monicipal privilezes, and even bore the title of a culony. (Orell. Inser: 3772; Mommsen, f. R. N. $2575-2575$.) But the "Misera*es," whose name fre uuently oecors in inscriptions, are in geveral the soiliers of the fleet (Mitites clussis prattoriae Misinatium, Monmsen, l. c. 2725 , \&c.), nut the inlabitauts of the town.

Before it became thus memorable as the station of the Roman flect, Mi-enum was remarkable in histury for the interviest between Octavian and Antony and Sestus Punpeius, in which the two former were recrived by Sextus on board his ship, and a treaty was cuncluted for the divivion of the lioman Empire between the three contracting parties. It was on this occasion that his admiral Menas proposed to Pompey tu cut the cables and carry the two triamvirs off to seah (I'lut. Ant. 32; Dion Class. xlviii. 36: Yell. 1att. ii. 77.) At a somewhat earliar period Cicero notices it as havina loen intiotel by the Cilician pirates, who carrivi int frim thence the daughters of M. Antouits, who hat himself cearried on the war agai st thom. (Cis pro Leg. Manil. 12.) We Iearn foom Illuarels that C Marius had a villa there, which be descratos as more splendid and luxurious than was suited to the character of the man (1'lht. Mar. 34) ; nevertholus it was then far infurior to what it became in the hands of 1. latullas, who subsequently purcbased it for a sum of $2,500,000$ tenarih, and allorned it with his usual magniticence. It subsequently pased into the lames of the emperor Tiberins, who :pquars to have not unfrequently
mate it his residence; and who ultimately died there, on the 16th of March, A. D. 37. The vila it elf is described as situated on the summit of the hill, conmanding an extensive vien over the sea; but it is evident, from the aecount of its vast substractions and subterranean galleries, \&e., that it must have comprised within its grounds the greater part of the promontory. (Plut. l. c., Lucull. 39 ; Seneca, Ep. 51 ; Tac. Ann. vi. 50; Suet. Tib. 72, 73: Dion Cass. Iviii. 28: 11aedr. Fab. ii. 36.) Benides this celebrated villa of lacullus, we leam from Cicero that 21. Antonius the orator bad a villa at Misenum, and that the triumsir, his grandson, made it a frequent place of residence. (Cic. de Or. ii. 14, ad Atl. x. 8, xiv. 20, Phil. ii. 19.) At a murh later period Misenum became the flace of exile or continment of the unhappy Romulus Aufustulus, the last emperor of the West, to whom the villa of Laucullus was assigned as a place of residence by Odoacer after his deposition, A. D. $4 / \mathrm{G}$. (Jurmand. Get.46, Marcellin. Chron. p. 44.) Horace notices the sea off Cape Misenom as celelrated for its echini or sea-archins. (Ilor. Sat. ii. 4. 33.)

Sime ruins, still extant near the summit of the hill, are in all probability those of the villa of Locullus. Of the town of Xisenum the remains are but incousiderable ; they are situated on the S side of the Porto di Miseno, at a place now called Casaluce; while those of a theatre are situated at a spot called Il Forno, a little furtber to the W., just where the inuer basin or Mare Morto opens into the outer port. The two were separated in ancient tumes by a bridge of three arches, which has recently been reflaced by a closed causeway, the effect of which has been to cause both the inner basin and outer harbour to fill up with great rapidity, and the latter has in consequence becone almost oseless. In the sides of the hill at the head of the port, and on the N. of the Mare Morto are excavated numerous sepulchres, which, as we learn from the inscriptions discovered there, are those of officers and soldiers of the flcet stationed at Misenuin. Many of these inscriptions are of considerable interest, as throwing light upon the military and naval institutions of the Roman Empire. They are all collected by Mommsen (Inscr. Regn. Neap. pp. 145-154).
[E. H. B.]
MISE IT'S (Mtantós: Eth. Mtońrios, Steph. B.), a tomn of Macelonis, the pusition of which is undetermined.
[E. B. J.]
M1'STHIUSF (Miatiov), a town of the mountain tribe of the Orondici in the north of Pisidia (Ptol. v. 4. § 12) and probubly the same as the town of Mistheia, which llieroeles ( $p .625$ ) places in Lycaun is. The latter mane oecurs also in other late writes, as Theophames (Chrono p. 320) and Nice phorus (e. 20).

MisvLANI. [Mesthani]
 Ptol, v. 9. § 19), a distrect of Asiatie Surnatia, E. of the llippici Montes. It derived its name from Mithrilates, kng of the Broporns, whom Vaillant (Achacmenidarum Imper. vol. ii. p.246) cails eighth of that nance, and who fled to this country for refnge in the reign of the emperor Claudius, (Plin. vi. 5: Tac. 1 mm . sii. 15 ; Dion Cass. Ix. 8.) [E.B.J.] MITIIRILA'TLLM (Miepıöátov), a fortress of the Trocmi, situated on the frontiers of Galatia and Poutus. Afer the subjugation of Pontus by the Niumans, I'macy took Dlithridatium from l'ontus,
and gare it to a Galatian prince Bogodiataras, or Brogitarus, as be is called on coins. (Strab, xii. p. 567 ; Sestini, p. 129.)
[L. S.]
MITYLE'NE. [Mytil.fne.]
MITYS, a river if lieria in Macedmia, which the liman army, in the third campaign against Persens, noder Q. Marcios, reached on the first day after their occupation of Dium. (Liv, xliv. 7.) The Mitys was perhaps the river of Kuterina. (Leake, North. Grecce, vol. iii. p. 424.) [E. B. J.]
Milagus. [Mnizus.]
MIZPAH v. MIZPEH (Ma $\alpha \phi$ á). This Itebrew appellative ( r . $-\underset{\mathrm{T}}{\mathrm{T}} \mathrm{J}$ ), signifying "a commanding height," "a beacon," "watchtower," and the like
 $\gamma \lambda \omega \bar{\tau} \tau \alpha \nu$, Joseph. Ant. vi. 2. § 1), is used as the proper name of several sites or towns in Palestine, duabless from their positions.

1. The most important was Mizpah (once written Mizpeh, Josh. xviii. 26), in the tribe of Bedjamin, where a convocation of the tribes of Isracl was held on important occasions, during the times of the Judges, and was one of the stations in Samuel's annual circnit. (Judges, xx. 1, 3, xxi. 1; 1 Sam. vii. 5-17, 8. 17, \&c.) It was strengthened by Asa, king of Judah. as a frontier garrison against Israel, and be used for his works the materials brought from the neighbouring Eamah, which Bassha, ling of Israel, had built on his sonthem frontier, "that he might not suffer any to go out or to come in to Asa, king of Judah." ( 1 Kings, xv. 17-22; comp. 2 Chron. xvi. 6.) After the destruction of Jerusalen by Nebochadnezzar it became, for a short time, the seat of the government, and there it was that Gelalinh and his officers were barbarously mordered by 1shmael and his company. (2 Kings, xxr. 22-25; Jeremiah, xl. xli.) It is clear from this narrative that it was situated on the highroad between Samaria and Jerusalem (xli. 5.6): and it is evident from the narrative in Judges time it could not be far distant from Gibenh of Benjamin, as the head-quarters of the Jsraelites were at Mizpah while they were besieging Gibeah. It mas restored and inhabited soon after the captivity (Xehem. ii. 7, 15), and is mentioned in the book of Maccabees as sitnated over against Jeru-
 haviny been formerly an oratory of Israel; and there it was that Judas Maccabaeus and his brothers iasugurated their great work with fasting and prayer. (1 Maccab. iii. 46.) It is frequently mentioned by Josephus in his narrative of the Scripture history, but his orthography is far from uniform.
 §§ 2, 4, 5), Maбфф (viii. 13. § 4). In the last cited passage he informs us that Mizpah was in the same place as Ranathon (or Ramah), which he places 40 stadia from Jerusalem (§ 3). Ensebins and St. Jerome most unaccountably confound this Mizpah with the Mizpah of Gilead (infra, No. 3). They place it near Kirjathjearim. (Onomast. s.v. Macarnөai.) Its site bas not been satisfartorily identitied. Dr. Robinsoa thinks that either Tcll-elF'all (Bean-bill), lying about an bour south of ErRam (Ramah) towards Jerusalem, or Neby Samwil, somewhat furtber distant from Er-Ram, to the west of the former site, wonld correspond to the site of Mizpah. He, inclines strongly to the latter site ( Sib. Res. vol. ii. p. 144); which, however, seems to be too far removel from the hichroad between Jerusalem and Samaria, on which Mizpah was cer-
tainly situnted. Possibly the modern village of Shruphat, isentical in meaning with Mizpah, situated on that road, near to Tell-el. Full, may mark this ancient site; or another site, between this and Er Rim, on the east of the road, still called 'Ain Niuspeh, may mark the spot. It is worthy of remark that the high ground to the north of Jerusalem is called by a name of kindred signification with Mizpah, and doubtless derived its name ミkomós from that town. It is on this ridge that Shaphat lies.
2. Mizpeh (LXX., Ma $\sigma \phi \dot{\alpha}$ ) is mentioned among the cities of Judah (Josh. xv. 38); and this must be either the one which Eusebius mentions as still existing under the same name, in the borders of Eleutheropolis to the north, or the other in the tribe of Judah, on the way to Aelin. The former of these is probably Tell-es-Saf"ieh, the Alba Specula of the middle ages; the latter may be Beit-Safa, a little to the south of Jerusalem, between that city and Bethlehem.
3. Mizpab, in Mount Gilead, probably identical with Ramath-Mizpeh in Gad (Josh. xiii. 26), derived its name from the incident mentioned in Genesis, $\mathrm{xxxi} .44-55$, and was apparently the site of the rough monument of unhewn stones called by Laban in Chaldee, " Yegar-sahadutha," and by Jacob in Hebrew, "Galeed," buth signifying " the heap of witness," The site was called "Mizpah; for, he said, The Lord watch between me and thee, when we are absent one from the other." This is doabtless the Mizpah of Jephtha the Gileadite, which seems to have had somewhat of a sacred character, and to have served for the national conventions of the trans-Jordanic tribes, as its namesake in Benjamin did in Palestine Proper. (Judges, x. 17, xi. 11, 34.) Eusehins notices it as a Levitical city in the tribe of Gad. (Onomast. s. v. Marфd.)
4. A fourth Mizpel is named in Josh. xi. 3, more to the north of Peraea, where we read of "the Hivite under Hermon, in the land of Mizpeh;" and presently afterwards of "the valles of Mizpeh eastward" (rer. 8), which cannot be identical with the Gileadite Jizpeh, but must bave been at the southern base of Mlount Hermon.
5. Mizpeh of Moab is mentioned (in 1 Sam. xxii. 3) in a manner which seems to intimate that it was the capital of that cunstry in the time of Darid, as it was certainly the residence of its king. (Enseb. Onom. s. v, Macronфd.)
[G. W.]
MNIZUS, or MiN1ZUS, a small town in Galatia, between Lagania and Aacyra, where the Emperor Anastasios must have resided for some time, as sereral of his constitutions are dated from that place, both in the Codex Theodosianus and the Codex Justinianeus. (Itin. Hieros. p. 575 ; It. Ant. p. 142 ; Notit. Episc., where it is called M $\nu \bar{\eta}$ Sos ; Hieroct. 1. 697, where it bears the name ' $\mathrm{P} \in \boldsymbol{\gamma} \boldsymbol{\gamma} \mu \mu \nu$ gus; Tab. Peut. ealls it Mizagus; Cod. Theod. de his qui ad Eerles. i. 3; de Epist. i. 33; de Poen. i. 16.) Mnizus was the see of a bishop, as we know from several councils at which its bishops are mentioned. Kippert identifies the place with the modern Ajas.
[L. S.]
MOAB (Mwá6), vallis, regio, campestria, \&c
[Monbitak.] The notice of Eusebius may be liere introduced (Onnmast. s, v. M M ás):-" A city of Arabia, now called Areopolis. The conotry also is called Moab, but the city Rabbath Moab." [Arieorolis.]
[G. W.]
MOABITAE (Mwafital: the conntry MoakíTis), the people descended from Moab, the son of

Lot, the frnit of his incestnous connection with his eldest daughter. (Gen. xix. 37.) Moses has preserved the very early history of their country in buteronotny (ii. 9-1I):-"The Lord said anto me , Distress not the Moabites, neither contend with them in battle, for $\mathbf{I}$ will not give thee of their land for a possession; because 1 have given Ar unto the children of Lot for a possession. The Emims dwelt there in times past, a people great, and many, and tall, as the Anakims." The Moabites, having dispossessed these gigantic aborigines, held possession of their country, which was brunded on the north by the river Arnon, which separated them from the Amorites. At atn earlier period, indeed, they had extended their conquests far to the north of the Arnon, but had been forced to retire hefore the Amorites, to whom they had ceded their northerti conquests, eren befire the children of Isract came into their consts: and several fragments of the ancient war-songs relating to there times are preserred by Moses. (Numb. xxi. 13-15, 26-30.) The boundary question was revived subsequently, in the days of Jephthah, when the Amorites demanded the restoration of the conquests that Israel had made between the Arnon and the Jabbok south and north, and to the Jurdan westward, as of right belonging to them, their title not having been invalidated by 300 years' occupation by the Israelites. It appears from Jephthal's historical review of the facts, that the lsraelites bad neither invadel nor ocempied any part of the territories of which Moab and Ammon were in actual possession at the period referred to; but only so much of their ancient possessions as Sihon king of the Amorites had already forced them to abandou (.Julyes, xi. 12-28); and it is remarkahle that the memorial of the occupation of the territory north of Arnon by the Moabites has been preserved, throngb the Mnsaic records, even to this day, in the name that is popalarly assigned to that remarkable mountain district east of the Dead Sea, which forms so conspicuous and remarkable a feature in the distant view from Jerusalem towards the east, still called "the mountains of Moab," as in Irenteronomy that bich table land is described as the "plains of Moab" (Devt. xxix. 1, xxxii. 49); and Juspphns occasiunally uses the name with the same latitude, of the country north of the Arnon, describing the Mrabites as still a mighty nation of Coelesyria (Ant. i. 11. §.5); and reckoning among the Morbite cities occupied by the Jews under Alexander Jannaeus, Chesbon (Heshbon), Medaba, Pellas, and others that lay considerably north of the Arnon (Ant. xiii. 15. §4), although in nther passages he makes that river divide the Moabites from the Amurites (Ant. ir. 5. § 1), and describes the country of Noab as the southern limit of Peraea (BCll. Jud. iii. 3. § 3), consistently with which notices he compares the country of the Amorites to an island, bounded by the Arnon on the S.. the Jabbok on the N., and the Jordan on the E. (Ant. iv. 5. § 2.) it is then justly remarked by Reland (Palorvitina, p. 102), that by "the plains of Monb," where the larawhes were encamped before they crosed the Jowtan (Numb. axxiii. 48, 49, 50), whith is described as being over agai at Jorich", and by the "land of Moab," in which mount Nebo is said to lee situatel (De eut. xxxii. 49, comp. xxxiv, 1.5.6.8), it is mot to be understoon as though that district was actually in possession of the Muabites at that time; but is so called because they formerly held it under their dominion. (Numb.
xxi. 26.) It may be added, that after it had been occupicd by the tribes of Giad and Reuben, to whom Moses assigned it (Numb. xxxii. 3.33-38), the Moabites ayain conquered it for a time, as it is cleay that Eglon must have suljugated that district east of the Jordan, before he could have possessed himself of Jericho, on the west of that river. (Judges, iii. 1230.) Their long and undisturbed fenure of their own proper country is forcibly described by the prophet Jeremiah. "Moab hath been at ease from his youth, and he hath settled on his lees, and liath not been emptied from sessel to vessel, aeither liath be gonc into captivity: therefore his taste remained in him, and bis scent is not changed "(x]viii. II); and the enumeration of its prosperous cities, in bis denunciation, indicates the populonsness and richness of the country, to which the lsraelites resorted when suffering from famine in their own most fruitful districts (Ruth, i. 1), and which supplied the market of Tyre with grain. (Ezek. xxvii. 17.) [Minnith.] The conntry is described by Joseplus as fertile, and capable of supporting a number of men on its produce. (Ant. iv. 5. § 1.) This account buth of its propulonsness and fertility is remarkably confirmed by modern travellers, and the existing monuments of its unmerous cities. Thus lrbs and Nangles, proceeding south from Kerek, "ascended into a country of downs, with rerdure so close as to appear alnost like turf, and with cornfields at intervals." They passed many ruined sites, the names of several of which they obtained; "in short," they add, "the whole of the fine plains in this quarter are covered witb sites of towus, on every eminence or spot convenient for the construction of one ; and as all the land is capable of rich cultivation, there can be little doubt that this country, now so deserted, once presented a continued picture of plenty and fertility" (Truvels, p. 371, compare under June 5, P. 456) ; and it is to this quarter that the Arabs referred, when they rejorted to Volney "that there are to the SE. of the lake Asphaltes, within three days' journey, upwards of three hundred rnined towns absolutely deserted; several bave large edifices with columns." ( $\mathrm{lb} . \mathrm{p}$ 310.) He indeed assigns the country to "the Nubathaeans, the most potent of the Arabs and of the Idumaeans;" but the ruins are more probably to be referred to the carlier inhabitants of the country, who, we know, lived in settled habitations, while the Nabatbaci were a Bedowi trike. living for the most part in tents. In any case the present aspect of the country furnishes a striking commentary on Jeremiah xlviii., e. ह. "Joy and gladness is taken from the plentiful field, and from the land of Mrab; and I have caused wine to fail from the wine-presses: none shall tread with shonting: their shouting shall be no shouting."
[G.N:]
 a fort in the north western part of Cappadocia, which the Emperor Justinim, at the time when he divided the country into three provinces, raised to the rank of the capitaf of Cappadocin III. On that occaston the place was considerably enlarged, and its name was changed into Justinianopolis. (Procop. de Aed. v. 4 ; Hiwrocl. P. 701 , where it is miswritten 'Pe $\gamma$ e-
 Them. i. $2 ;$ Steph. 13. s. v. Moúkioбos; Cone. Const. ii. p. 96.) It mudera name is Kir Shehr. [L. S.]

MODI'CLA (Momat), a city of Cisalpine Gaul, sitnated on the river Lambrus, about i2 miles N. of Milan, the name of which is not found during the period of the Roman Empire, and it was probably in
those days a mere village，or at least a dependency of Mediolanum；lot the Gothic king Theodoric constructed a palace there，and made it his summer residence．It continued to be a farourite abode of the Lombard kings，and Queen Thendolinda founded a Basilica there，which has ever since been one of the most celebrated churches in the N．of Italy，and still contains many interesting relics of the cele－ brated Lombard queen．（P．Diac．Hist．Lang．iv． 22．49．）
［E．H．B．］
 Joseph．；M $\eta \delta \in \epsilon i \mu$ ，Euseb．），the residence of Nattathias， the great grandson of Asamonaeus，and the father of Judas Maccabreus and his four valiant brothers，who was however ooly a sojourner at Modin，being a native of Jerusalem，and a priest of the course of Joarib．It was probably the native place of the sons，as it was also their burying－place．Here it was that the first opposition to the impious ediet of Antiochus Epiphanes was made，when Mattathias slew with his own haod the renegade Jew who had offered idolatrous sacrifice，and demolished the altar．（Jos． Ant．xii．8．§§ 1，2．）Judas was boried there in the sepulchre of his father（ $1 \mathrm{~b} .11 . \S 27$ ）；and sabse－ quently on the death of Jonathan，Simon erected a mooument of white polished marble over their graves， which he raised to a great height，so as to be con－ spicaous from afar，and surrounded with a monolithic coloonade．In addition to this，he raised seven pyramids，one for each of the family，remarkahle both for their size and beauty，which remained until the age of the historian（xiii．6．§ 5 ，comp． 1 Mace．xiii．27－30），as isueed Eusebius and S． Jerome affirm that the sepulchres of the Maccabees were shown there at their day．（Onomast．8．v．） Jusephus（xii．6．§ 1）simply calls it a village of Judrea；but the last－cited authors speak of it as a village near to Diospolis（ $L$ ydde）．The author of the 1st Book of Maceabees writes that upon the pil－ lars which were set about the pyramids，Simon ＂made all their armoar for a perpetual memory，and by the armour ships carved，that they might be seen of all that sail on the sea．＂（xiii．28，29．）This would imply that these pyramids were not very far distant from the sea，and so far confirm the report of Ensebius and S．Jerome，who place the sepul－ chres in the vicinity of Lydda，and perbaps affords some countenance to the idea that the name＂Mac－ cathee＂was derived from the root 1 D the final radicals of the names of the three patriarchs Abra－ bann，Issaac，and Jacub，which the tribe of Dan，on whose borders Mudin was situated，are said to have carried on their banner．（Reland，s．v．p．901．）A comparatively modern tradition has placed Modin on a remarkabie corical bill，named Söba， $2 \frac{1}{2}$ hours from Jerusalem，on the left of the Jaffa road；but this is，as Dr．Rubinson has remarked＂several hours distant from the plain，upon the mountains，and wholly shut out from any view of the sea．＂（Bib． Kes．vol．ii．p．329．）He suggests that it may bave beeo at Litrôn，which is also on the Jaffa road，on the very verge of the plain（llid，note 4，and vol．iii． p． 30, r．4．）But this is too far from Lydda，and so mear to Nicopolis［Emsmaus，2．］that Eusetius would doubtless have described it by its vicinity to that eity，rather than to Diospolis．Its site bas yet to be smught．
［G．W．］
MODOGALINGA（Plin．vi．19．s．22），one of the large islands in the Delta of the Ganges．Calinga is of frequent occurreace in the ancient notices of India． ［Calinga．］

MODOGULLA（Moóórou入入a，Ptol．vii．1．§§ 83）， a town mentioned by I＇tolenas，on the western side of Ilindostin．It is prolatly the present Modgucll， at no great distance from Calliany．
［V．］
MODOMA＇STICE（Moбоца⿱㇒⿻二丿⿴囗⿱一一儿牥，Ptol．vi． 6. § 2），one of the four divisions into which Ptolemy dirides the province of Carmania Deserta（now Kirman ）．
［ V ．］
MODRA（ $\tau d$ M M $\delta \rho \alpha$ ），a small tomn，which，ac－ cording to Strabo（sii．p．543），was sitnated in Phrygia Epictetus，at the sources of the river Gal－ las；but as this river flows down from the northern slope of mount Olympos，which there forms the boundary between Phrycia and Bithynia，Strabo must be mistaken，and Modra probably belonged to the south－west of Bithynia，and was situated at or near the modern Aine Geul．（Paul．Lacas，Sec，Ioy． i．14．）As Strabo＇s expression is $\dot{e} \kappa$ Módopuv，somie have supposed that Modra was no town at all，bot only a name of a district ；but it is known from Coostantioe Porphyrogenitus（de Them．vi．）that the district about Modra was called Mlodrene．［LS．］

MODUBAE（Plin．vi．19．s．22），one of several nnknown tribes or nations placed by Pliny besond the Gauges，in that part of India which was anciently called India extra Gangem．
［V．］
 are two places of this name mentioned in the ac－ counts of ancient India ：one described by Ptolemy （l．c．）as $\beta_{\alpha \sigma i \lambda t i o n ~ \Pi a v o i o v o s, ~ t h e ~ P a l a c e ~ o f ~ K i n g ~}^{\text {a }}$
 the Sucred Modoura（vii．1．§ 50）．The former of these towns was in the southern part of Hindostdn， and is most probably the present rained city，Ma－ dura；the second was in the land of the Caspeiraei in the NW．part of India，eitber on the frontier or in the Panjib．Its exact position canoot now be determined．
［V．］
 § 7），a port in the island of Taprobane or Ceylon， mentioned by Itolemy．The strong resemblance of the name makes it extremely probable that it is the same with the present Mantotte，where there are still the remains of a great city，and where a great number of Roman coins of the times of the Antonines bave been dog up．It appears to have heen sitnated at the northern point of the island．The inhabitants were called Moठoи̃ттo．
MOENUS（the Main），a navigable river of Ger－ many，which has its sources in the Sudeti Montes， near the town of Menosgada，and after flowing in a western direction through the country of the Her－ munduri and tbe Agri Decumates，empties itself into the Rbine，a little abore Muguntiacum（Plin．is．17； Mela，iii．3．§ 3 ；Amm．Mare．svii．1，Tac．Germ．2s； Eumen．Pareg．Constant．13．）［L．S．］
moeris lacus（ $\grave{\eta}$ Mofpos $\lambda i \mu \nu \eta$ ，Herod ii． 13,148 ，self．；Diod．i．52：Moíp 8 ous $\lambda(\mu \nu \eta$ ，Strab． xviii．p． 810 ；Ptol．iv． 5 ．$\$$ S 20,36 ；Mueris Laens． Mela，i．9．§ 5；Nueridis，Plin．v．9．s．9），was the most extensive and remarkable of all the Aegyptian lakes． It formed the western boundary of the Arsinoite nome［Ansivoz］in Middle Aegypt，and was con－ nected with the Nile hy the canal of Joseph（Balir－ Jusuf）．A portion of its ancient bed is repre－ sented by the modern Birket－el－Kicrün．Of all the remarkable objects in a land so replete with woders， natural and artificial，as Argypt，the lake of Mueris was the most enigmatical to the ancients．Herodotus （ii．149），who is followed by Pliny（v．9．s．9）， regarded it as the woik of man，and ascribes it to a
king of the *um name. This supposition i ine credible, and rocts mounter both to lawal tratoman and actual obserwation. "Nothing," sars a mwitorn traveller (Browne, Travels in Egypt, p. 169), "tan present an appearmee so unlike the works of tuen. On the NE. and s. is a rocky ridec, in every ap1"narance primeval:" and Strabo (xvi. ]. 112) observes upan the marine conformation of its shores and the billowy coloor and motion of its waters. So far as it hias been bitherto sumerem, indeed, Mnerts is known to hase bien inclowal by clevated lands; and, in early times, the lned of the Nike was too low to admit of its waters flowing into the lasin of the lake, even: If there had been at natural commumation between the river and Moris. Strabo believel it to be altogether a natual reservoir, and that the cunal which connected it with the Nile was alone the work of human art. His opinion is doubtless the correct one, but admits perhaps of some modifintion. The whole of the Arsinoite nome was indehted to hmman enterprise for much of its extent and fertility. Gealuyically sjeaking, it was, in remute periods, a vast limestune valley, the reservoir of waters desconding from the encompasing hills, and probably, if consnected with the Nile at all, the commumiention was subteratneous. As the wecumulatel waters graluatly subsided, the summits and sides of the hij, ler groturd were cultivated. The richmess of the soula deposit of clay and muriate of lime, like that of the Uases-wunld induce its occupiers in every age to rescue the land from the lake, and to run dams and embankments into the water. In the dry season, therefore, Moeris would exhibit the spectacie of a budy of water intersected by peminsulas, and broken by inlands, while, at the geriod of inumbation, it wuld wear the aypect of it vast basm. Accorclingls, the accounts of eye-witocses, such as wern Strabo and Ilerodutus, woulh vary accordins to the seasun of the year in whin they itspected it. Noreover, there are frounbs for supposing that aucient travellers dul not :llways distingulah between the comnecting canal, the Eahr-J/isif; and Moorrs itarf. The cinal wats unguestionaliy constructed by man's labumr, nor would it presint any msuper.ibe dafficulties to a people so labormuns as the A.uyptians. There nis aiso a further motive for redectaing the Mueriute district gemeratly, for the lands opmosite to it, on the eastem lauk of the Nile, were generally harren, king cither a sandy level or stonc quarries, while the soil of the Arsinoite nume was sinvularly fertile, and suited to various erops, corn, vesetables, and fruit. If then we distimpuish, as Strabo did, the canal ( $\delta$ óspog) from the lake ( $\lambda$ i $\mu v y$ ), the ancent varratives may be easily reconcaled with ons another and with modern surveys. Even the uords of llerudatus (ót $\overline{\text { E }}$ Хeipuatointós
 wis of consileatle eatent, berimuint at Ilemopols
 tarning from N. to S. tur 3 hawhes more, until it towhes tise lake. Mudern whters fiepnenty
 vextent to the lake, and some of then surmise that Herodntus and Strabon (h) not spedk of the same waten. Bub the momems hase mestly restricted themsilves to the comal ath hate cillere mot exphat Anois itadt, the Nll shats of whell ate sear ely kome, of hase mit mato allmonse for its diminatom ly the mon mething samds and the detrizas of fallen embankucuts.

We infer, therefore, that the lake Moris in a athral lake, aknt the size of that of Genevat, and was oripinally a depression of the limestone platean, which intersects in this latitude the valley of the Nile. Even in its diminished extent it is still at least 30 miles long, and 7 broad. Its direction is from SW. to NE., with a considerable curve or ellow to the E. The present level of its surface is nearly the same with that of the Mediterraucan, with which indeed, according to a tradition mentioned by Henntivius, it was connected by a subterraneam ontlet into the Syrtes. If the lake, indeed, ever dischayed any portion of its waters into the sea, it must have been in pre-lintoric times.

The waters of Moeris are impregnated with the alkalime salts of the nuthbouring desert, and with the thennitions - muriste of lime - of the surromming hills, But, althuyb brackish, they are nut so saline as to be noxiuns to fisln or to the crocudile, which in andient times were kept in preserves, and tamel by the priests of the Arsinoite nome. (Strab. svii. p. 112: Aelian, Ihist. A. x. 24.) The fisheries of the lake, erperially at the point where the shaices regulated the influx of the Bahr-Jusuf, were very pralnctive. The revenue derived from then was, in the lharaonic era, applied to the purchase of the queen's wardrobe and perfumes. Under the Persian kings they yichlecl, during the season of inundation, when the canal fed the lake, a talent of silver daily to the royal treasury (150l.). During the test of the year, when the waters cbbed towarls the Nile, the rent was 30 minae, or $60 l$., daily. In modern times the right of fishing in the Birket-elKerien has been farmed for 13 purses, or about 841 , yearly. (Laborde, Férue Frungaise, 1829, p. 67.) It is pribable, indered, that at copious infusion of Nile water is required to render that of Doeris palatable to man, or salutary for fish.

To Thoutunsis 111. the Acryptians were prob.ibly indebted for the eanal which comected the lake of Mueris with the Nile. It may have been, in part, a matural chamel, but its dykes and embambonents were constructed and kept in repair by man. There is, indeed, some difficulty respocting the influx and reflus of the water, since the level of the Buhr-Jusuff is much higher than that of the Arsinute nom and the lake; and Herodotus seems to saly (ii. 149) that the waters returned by the same channel by which they entered Mueris, As mention is made, lowerer, of sluives at their point of , metion, it is pussible that a series of floodgates retaned or impelled the water. The main dyke rau between the Memplite and Arsinoite nomes.

Beizoni founal remains of ancient cities on the wostern sile of Moeris, and is disposed to place the Great Tabyrim! in that quarter. But if we may trust the accounts of the best ancient writers, it ecrtainly was not on that side of the lake. Its shares and islands were, however, covered with Iraitilinss. Of the ruins of Assinue mention has heon made alrouly. But Herodetus tells an extraordinary story of piranids seated in the lake itself ( $1 \quad$ (:):-"Abunt the midfle of it are two pyranids, emch rising 300 feet above the water; tho part that is unfer the water is just the same height. On the top of earh is a colossus of stone seated in a dhair:" Thas aceount is simpular, as implying that pramital bollinus were sometines eraployed as the bace of staruss. But it is impussible to ree chuile !lm- tomenent with the ascortained depth of the $\operatorname{bink}$ ict-he ank, which on an average does
not exceed 12 feet, and even where it is deepest is only 28 . We may indeed admit, that, so long as the fisheries were a royal monopoly, a larger body of water was admitted from the Nile, and the ordinary depth of the lake may thus have been greater than at present. It is also possible that much of the surrounding country, now covered with sand, may formerly, during the inundation, have been entirely submerged, and therefore that the pyramids which Herodotus sam, the sides of which even now bear traces of submersion (Vyse, On the Pyramids, vol. iii. p. 84), may hare been the trancated pyramids of Biahmu, nosr beyond the reach of the Birket-el-Kerin, but within the range of the ancient Moeris. Herodotus, if, as is probable, he visited the Arsinoite nome in the wet season, may bave been struck with the eleration of thexe monuments above the lake, and exaggerated their proportions as well ahore as below its surface. Pococke (Travels, vol. i. p. 65) tells us that he saw on its western extremity, "a head of land setting out into the lake, in a semicircular figure, with white cliffs and a teight above," which he thonght might be the lower part of the two pyramids described by Herodotus. And Pére Lucas ('゙oyages en Egypte, vol. ii. p, 48 ) observed an island in the middle of the lake, a gond leagne in circumference. He was assured by his guides that it contained the ruins of several temples and tombs, two of which were leftier and broader than the rest.

The region of Moeris awaits more accurate survey. The hest acconnts of it, as examined by modern travellers, will be found in Belzonn, Travels; Champollion, legypte, vol. i. p. 329; Jomard, Descript. de l'Egypte, vol. i. p. 79; Ritter, Erdkunde, vol. i. p. 803.
[W. B. D.]
MOE'SIA, a Roman province in Europe, was bounded on the S. by M. Haemms, wbich separated it from Thrace, and by M. Orbelus and Scordus, which separated it from Macedonia, on the W. by M. Scordus and the rivers Drinus and Sarus, which separated it from Illyricum and Pannonia, on the N. by the Danube, which separated it from Dacia, and on the E. by the Pontus Euxinns, thas corresponding to the present Servia and Bulyaria. The Greeks called it Mysia (Muria), and the inhabitants Mysians (Murol), and sometimes European Mysia (Muría ì ív Evipúmp, Dion Cass, xlix. 36; Appian, Ill. 6), to distinguish it from Mysia iu Asia.

The original inlabitants of Moesia were, according to Strabo, a tribe of Thracians, and were the ancestors of the Mysians' of Asia (vii. p. 295). Of the early bistory of the country, little or nothing is known. In n. C. 277, a large body of Gaulish invaders entered Moesia, after the defeat and death of their leader Brenuus, and settled there under the narne of the Scordisci. The Romans first entered Moesia in n. C. 75, when C. Scribonius Curio, proconsul of Macedonia, penetrated as far as the Danube, and gained a victory over the Muesians. (5. Rof. Bree. 7 ; Jornand. de Regn. Succ. 50 ; Eutrop, vi. 2.) But the permanent subjugation of Minesia was probably effected by M.Licinius Crassus, the grandson of the triumvir, who was proconsul of Macedonia in b. C. 29. (Liv. Ep. 134, 135; Dioa Cass. 1i. 25-27; Flor, iv, 12, 15.) This may be inferred from the statement of Dion Cassius ( liii .7 ), who represents Augustus two years afterwards (a. c. 27) speaking of the subjugation of Gallia, Mysia, and Aegypt. Further, in A. D. G, Dion Cits-
sins mentions the governor of My ysia (lv. 29), and in A. D. It Tacitus speaks of the legatus Moesiae (Ann, i, 79); so that there can be no doubt that it was reduced into the form of a province in the reign of Augnstus, and that the statement of Appian is incorrect, that it did not become a Ronam province till the reign of Tiberius. (Ill. 30.) In the reign of Tiberius, Moesin was laid waste by the Dacians and Sarmatians, being then without a garrison, contrary to the usual Rowan practice, for a legion was gencrally stationed there. (Suet. Tib. 41, Vesp. 6; Tacit. Ann. xvi. 6.) As a frontier province of the empire, it was strengthened by a line of stations and fortresses along the south bank of the Danube. A Roman wall was built from Axiopolis to Tomi, as a defence against the Sarmatians and Scythians, who inhabited the delta of the Danube. Moesia was originally only one prorince, hut was divided into two provinces, called Moesia Superior and Inferior, prohably at the commencement of Trajan's reigo. (Marquardt, in Becker's Romisch. Alterth. vol, iii. pt. i. p. 106.) Each province was governed by a consular legatus, and was divided into smaller districts (regiones et vici). Mossia Superior was the western, and Moesia Inferior the eastern half of the country; they were separated from each other by the river Cebrus or Ciabrus, a tribntary of the Danube. (Ptol. iit. 9, 10.) They contaioed several Roman colonies, of which two, Ratiaria and Oescus, were made colonies by Trajan, and Viminacium by Gordian III. (Marquardt, l. c.) The conquest of Dacia, by Trajan, removed the frontiers of the empire farther north, beyond the Danube. The eraperor Hadrian visited Moesia, as we are infortned hy his medals, in bis general progress throngh the empire, and games in his honour were celebrated at Pincum. Io A. D. 250 the Goths invaded Muesia. Decius, who was then emperor, marched against them, but was defeated and killed in a battle with them in 251. What the valour of Decius could not effect, his successor, Trebonianus Gallus, obtained by bribery; and the Goths withdrew to the Duiester. When Aurelian gave up Dacia to the Goths, and witbdrew bis troops and part of the inhabitants to the south side of the river, he formed a settlement in the heart of Moesia, which was named from him Dacia Aureliani. [DActa, Vol. 1. p. 745] In 395 the Ostrogoths, being lhard pressed by the Hunk, requested permission of the Romans to pass the Danube, and scttle in Moesia. The request was acceded to by Valens, who was then emperor, and a large pumber took advantage of the privilege. They sooo, however, quarrelled with the Roman authorities, and killed Valens, who marched to oppose them. The Goths, who settled in Alvesia, are sometimes called Moeso-Guths, and it was for their use that Ulphilas translated the Scriptures into Gothic about the middle of the fourth century. In the seventh century the Sclavonians entered Moesia, and the Bulgarians about the same time, and founded the kingdoms of Bulgaria and Servia.

Moesia was occupied by sarious populations; the following are enumerated by Ptolemy and Pliny (Ptol. iii. 9; Plio. iii. 26): the Dardani, Celegeri, Triballi, Timachi, Moesi, Thraces, Scythae, Tricornesii, Pincensii, Troclodytes, and Peucini, to which may be added the Scordisci. (Liv. xl. 57.) The relative situations of these people were somewhat as follows : the Dardani, said to be a colony from Dardania in Asia, dwelt on the borders of Macedonia, The Triballi dwelt near the river Ciabrus ; the

MONESI．

Tumachi hy the river Timachus，The Triconesin， who derived their name from Tricornum，wore on the confines of Dalmatia，The Peurini inlabited the jaland of Peace，at the mouth of the Danube． The Thraces were near their own country；the Seordisci，between the Dardani and Dahnatia．The Moesi，or Mysi，proper，inlabited the heart of the country to which they gave their uane，on the banks of the river Ciabrus．

MOMEMPHIS（M $\omega \dot{\mu} \epsilon \mu \neq$ ，Strab．xvii．p．803： Diodor．i． 66,97 ；Steph．B．s．v．），the capital of the nome Mo－Memphitis，in the Delta．It was seated in lat． $31^{\circ} 5^{\prime} \mathrm{N}$ ．，on the eastern shore of the lake Mareotis， N．of the Natron Lakes．Both its ancient and its modern appellation－Manoufclseffly－indicate its position as the Lower Memphis，or Mcmphis in the marshes．During the troubles which Ied to the Dodecarchy，Momemphis was a place of sonie strength，owing to the difficulties of its approaches， It was chiefly remarkuble for its exportation of mineral alkalies from the neigbbouring Natron Lakes．Athôr or Aphrodite，under the furm of a cow，wals worshipped at Momemphis．
［W．B．D．］
MONA（Móva，Ptol，ini．2．§ 12 ；Mávva，Diun Cass．Isii．7），an island in Britain，off the casst of the Ordorices，the Isle of Anglesey．

Caesar describes Monat as situated in the middle of the passage from Britain to Ireland（B．G．v．13）， but by Mona in this passage be must mean the Isle of Man，which Pliny calls Moxaria（iv， 16, s．30）；and P＇tolemy that of Dusamesa or Mo－ saoedi（Moyapiva，Mováoiôa）．

The Isle of Auglesey was first invaded by Sue－ tonius l＇aullinus，governor of Britain under Nero， A．1），61．I＇revions to the appointment of Sueto－ nius I＇aullimens，the IRomans had met with some re－ verses in the wint of Britain．From the vigurous measures adoptel by Paullinus on entering upon the government of Britaiu，it may be inferred that the Draids of Mona had excited the Ordovices and the Silnres to rise in rebellion ；or had assisted them ； prubably both．Tacitus states that Mona was a re－ ceptacle for fugitives．The island was well populated， and there the pricots of the Druidical religion had established themselves in great strength．Paullinus was recalled from the conquest of Anglesey by the revolt of the Britons under Boadicea，and its suliju－ gation was not completed till A．D． 78 by Agricola． （Tac，Agric，pp．15，18，Ann．xiv．29．）［C．H．S．］

MONAPIA．［Mosa．］
MuNDA．［MLNDA．］
MUNESI，one of the many peoples of Aquitamia
enomerated by Pliny, who places them below the Saltus Pyrenteus (iv, 19). The name seems to be preservel in that of Moneins, which is between Pons and Navarreins, where it is said that there are traces of Roman camps. Moneins is in the department of Basses Pyreinies.
[G. L.]
MOXE'JIUM (Movर्राoov), a town of the Lapodes in Illyria. (Strah. iv. p. 207, vii. p. 314.)

MONOECL PORTUS (Modoikov $\lambda \mu \mu \eta \nu$, Strab. Ptol.). or more correctly PORTUS HERCULIS MONOECI (Plin, iii. 5. \& 7 ; Tac. Hist. iii. 42), sometimes also PORTUS HERCULIS alone (Val. Max. i. 6. § 7: Monaco), a port and town on the coast of Liguria, at the foot of the Maritime Alps, distant rather more than 200 stadia from Antipolis. (Strab.iv. p. 202.) Its name was obviously derived from the existence there of a temple of Hercules ; and the Greek form of the epithet by which it was characterised, at once shows that it must have owed its foundation to the Greeks of Massilia. But Strabo, who derives the same inference from the name, had evidently no account of its origin or foandation, which were naturally connected ly later writers with the fables concerning the passage of Hercules, so that Ammianus ascribes the foundation of "the citadel and port" of Monoecus to Hercules himself. (Amm. Marc. xv. 10. §̧ 9.) The port is well described by Strabo (l.c.) as of small size, so as not to admit many vessels, but well sheltered. Lucan, however, who gives a somewhat detailed notice of it, says it was exposed to the wind called by the Gauls Circius (the Vent de Bise) which rendered it at times an unsafe station for ships (Lucad. i. 405-408) ; and Silius Italicus dwells strongly of the manner in which the whole of this part of the coast of Liguria was swept by the same wind, which he designates under the more general name of Boreas. (Sil. Ital. i. 586-593.) The port was formed by a projecting rocky point or headland, on which stands the modern town of Monnco, and which was doubtless occupied in like mamer in ancient times, at first by the temple of IIercules, afterwards by the town or castle of Monoecus (orx Monoeci, Ammian. l.c.) The town, however, does not seem to have ever been a place of ranch importance; the advantage of its port for commercial purposes being greatly neutralised by the want of conimunication with the interior. It was, however, frequently resorted to by the Roman fleets and ships, on their way along the coast of Liguria into Spain; and hence was a point of importance in a naval point of view. (Val. Max. i, 6. § 7; Tac. Hist. iii. 42.) The heatland of Monaco itself is of comparatively sin .ll height, aod lies immediately under a great mountain promontory, formed by one of the spurs or prujecting ridges of the Maritime Alps: and which was regarded by many writers as the matural termination of the great chain of the Alps. [Alpess, p. 107.]* The passage of this mountain most always have been one of the principal difficulties in the way of constructing a high rond along the coast of Liguria; this was achieved for the first time by Augustus, and on the lighest point of the passage (called in the Itineraries "in Alpe summa" and "in Alpe maritima," ltin. Ant. p. 296; Tab. Peut.), be erected a troply or monument to nommemorate the complete subjugation of the different

[^16]VOL. 1 .
Digitized
nations inlaliting the Alps. The inscription of this monument lins been preserved to us by Pliny (iii. 20. s. 24). and is one of our chief authorities for the geograply of the Alpine tribes. The ruins of the monument itself, which was of a very massive character, still remain, and rise like a great tower above the village of Turbia, the name of which is evidently a mere corruption of Thopaea Aversti (Tpótala ミebaftov̂, Ptol. iii. 1. § 2), or Tropaea Alpicm, as it is termed ly Pliny (l.c.).

The line of the Roman road, cut in the face of the mountain, may be traced for some distance on each side of Turbia, and several ancient milestones have been found, which commemorate the constraction of the road by Augustus, and its reparation by Hadrian. (Millin. Voy, en Pümont, vol. ii. pp. 135, 138; Durante, Chorographie du Conté de Nice, Pp. 23 -30.)

The port of Monoecus seems to have been the extreme limit towards the E. of the settlements of Massilia, and hence both Pliny and Ptolemy regard it as the point from whetice the Ligorian coast, in the more strict sense of the term, began. (Plin. iii. 5. s. 7 ; Ptol, iii. 1. §§ 2, 3.) Ptolemy has made a strange mistake in separating the Portus Herenlis and Portus Monoeci, as if they were two distinct places. [E. H. B.]

NONS AUREUS (X $\rho v v^{\sigma} \sigma v y$ ǒ $\rho o s$ ). 1. A mountaio in Mocsia Superior, which the emperor Probus planted with vines. (Eutrop. ix. 17, 20 ; It. Ant. p. 132; It. H. p. 564.)
2. A town on the Danube, at the foot of the mountain, 23 miles from Singiduaum. (Tab. Peut.)
[A. L.]
MONS BALBUS, a mountain fastuess of N. Africa, to which Masinissa retired. (Liv, xxix, 31.) shaw (Trat. p. 184) places the range in the district of Dokhul, E. of Tunis ; perbaps Sabalet-csSahib.
[E. B. J.]
MONS BRISIACUS. This is one of the positions in the Roman ltins, along the Rline. They place it between Helvetum or Helcebus [Hflcents] and Urunci. There is no doubt that is I'ieurBrisach or Altbreisoch, as the Germans call it. All the positions of the Jtins, on the Rhine are on the west or Gallic side of the river, but I'ieux-Brisach is on the east side. The Rhine has changed its bed in several parts, and this is one of the placis where there has been a change. Breisach is deseribed by Luitprand of I'avia (quoted by D'Anville), as being in the tenth century sucrounded by the Thine "in modum insulae." It may have been on an island in the Roman period. The hill (molls) of Altbreisach is a well markel position, and was once crowned by a citadel. Altbreisach is now in the ducby of Baden, and opposite to Nendrcisach on the French side of the Rhine.
[G. L.]
MONS MARIO'RLM, a town in Hispania Baetica, on the Mons Marianus, and on the ruad leating from the mouth of the Anas to Emerita, now $\mathrm{N}_{\text {t- }}$ rines, in the Sierra Morena. (It. Ant. p. 442 ; Inser. alt. Caro, Ant. i. 20; Spon. Miscell. p. 191 ; Florez, Espl. Sagr. ix. 1, 23.)

MONS SACER ( т $\begin{gathered}\text { iepòv ŏpos, Ptol. iii. 17. § 4), }\end{gathered}$ a mountain range on the SE. coast of Crete, near Hierap̧tna, identified with the Pytxa (חútva) of Strabo (x. p. 472 ; comp. Groskurd, ad loc.; Höck, Kreta, vol. i. p. 16.)
[E.B.J.]
MONS SELELCUS, in Gallia Narbonensis, is placed in the Antouine 1 in . next to Vapincum (Gap) on ratrad from Varinctun to Vienna (J'iennt).

## MORGANTIA．

It is 24 M．P．from Vapincum to Mons Selencus， and 26 M．P．from Mons sidencus to Lucus（／．uc）． The Jerusalem Itin．has two Dutationes（Ad Fines， and Davianum）between Vapincum and the Matsio Mons Selencus，and the whole distance is $31 \mathrm{M} . \mathrm{P}$＇． The distances would not settle the pnsition of Mons Sclenens，but the name is presersed in Sulem．The Batie Mont－Salion is only an ahbreviation of the Bastida Montis Soleuci，a name that appears in some of the old doomments of Druphine．Many remains exist or did exist at Mons Selencus；certain evidenee that there was a Roman town here．

Magnentius was defeated A．D． 353 by Cuastantius at \＄lons Sulencas．（Tillemont，Mistuire des Em－ pereurs，vol．iv．T． 383 ）The memory of the battle is preserved in several local names，as Le Champ ITmpeiris，and Le（huomp Butailles．（Ukert，fiul－ lien．p． 448. ）
［G．L．］
Mo＇PSIUM（Mó\＆ Mo母eievis，a dialectic form of Mo廿teís），a town of Pelasgiutis in Thessaly，situated upon a hill of the same name，which，according to Lisy，was situated midway between Larissa and Tempe．Its rnins are still conspicuous in the situation mentioned by Livy， near the northern end of the lake Kuratjair or Nessonis．（Steph．B．s．v．；Strab．ix．pp．441，443； Liv．xlii．61，67；Leake，Northern Greece，vol．iii． p． 377 ．）

## MoPSO＇PIA．［Pamphylia．］

MOPSO＇PLA（Mo廿oria），an ancient name of Attica，derived from the hero Mupsopus or Mopsops， （Strab．iv．p． 397 ；Lycaphr． 1339 ；Steph．B．s．r．）

MOPSUCRE＇NE（Mö $\Psi$ ov Kpvipm），a town in the eastern part of Cilicia，on the river Cyduus，and not far from the frontier of Cataonia to which Ptolemy （v．7．§ 7），in fact，assigus it．Its site was on the southern slope of Monot Taurus，and in the neigh－ burhood of the monatain pass leading from Cilicia into Cappadocia，twelve miles north of Tarsas．It is celebrated in listory as the place where the em－ peror Constantias died，A．n．361．（Sozum．v．1； Philostorg．vi． 5 ；Eutrop．x． 7 ；Amm．Mare．xxi． 29 ； Itin．Ant．p．145，where it is called Namsucrone； It．Hieros．p． 579 ，where its name is mutilated into Mansverite．）

MOPsUE＇STIA（Míqou $\dot{\epsilon} \sigma \tau i a$ or Mo廿oue $\sigma \tau i a$ ： Eth．Moфfárचs），a considerable town in the extreme east of Cilicia，on the siver Pyramus，and on the road from Tarsus to Issus，In the earlier writers the town is not mentioned，thongh it traced its origin to the amcient soothsayer Mopsus ；but Pliny （v．22），who calls it Mopsos，states that in his time it was a free town．（Comp．Strab，xiv． p．676；Cic．ad Fam．iii． 8 ；Steph．B．s．v．； Jrocop．de Aerl．v． 5 ：Amm．Marc．xiv．8．：Phot． Cod．176；I＇tol．v．s．§ 7：H．Ayt．p．705；Ilierocl． p． 705 ；It．Hieros．p．680，where it is called Man－ sista．）A splendid fridge across the Pyramus was built at Mnpsucstia by the emperor Constantius． （Malala，Chron．xiii．）It was situated only I2 miles from the coast，in a fertile plain，called＇Anhtov $\pi \in \delta i o v$. （Arrian，Anul．ii． 5 ；Enstath．ad Dionys．

Per．872．）In the middle ages the name of the place was comrupted into Mamista ；its present name is Messis or Meusis．Aneient remains are not men－ tioned，and travellers deseribe Dlensis as a dirty and uniuteresting place．（Leake，Asia Minor，p．217； Otter＇s Reisen，i．c．8．）
［L．S．］
MORBIUM，in Britain，is saentioned in the Nofitia as the quarters of a body of horse Cataphractarii （＂praefectns equitam Cataphractariosum Morbio＂）． We are justified by an inscription in plueitug Mor－ binm at Moresly near Whitchaven，where the re－ mains of a Loman camp are yet to be traced．The inseription，preserved in a MS．of Dr．Stukeley，but ant read by him，is upoti a monument to the me－ mory of a sollier of the Cataphractarii，which was Found within the precinets of the Camp．［C．R．S．］

MORDULLAMNE（Mopסov $\lambda \alpha ́ u p \eta$, Ptol．vii．4．§5）， a port on the castern eoast of Taprohane（Ceylon）． The name is probably a corruption of the MSS．，and
 is，perhaps，represented by the present Kattregam， where there are still extensive rains．（hitter，İd－ kornde，vi．P．22；Davy，Account of Ceylon，p． 420．）
$[\mathrm{V}]^{2}$
RGA N
MORGA＇NTIA，MURGA＇NTIA，or MORGA＇N－ TlUAI（Mop áavtıov，Strab．；Mopүaprivn，Diod．； Eth．Mopyavtivos．The name is varionsly written by Latin writers Murgantia，Murgentia，and Mor－ gentia；the inhabitants are called by Cicero and Pliny，Margentini），a city of Sicily，in the interior of the island，to the SW．of Catana．It was a city of the Siculi，though Strabo assigns its foundation to the Morgetes，whom he supposes to have crossed over from the sonthern part of Italy．（Strab，vi． pp．257，270．）But this was prabably a mere inference from the resemblance of name；Stephanus of Byzantium（s．v．），who is evidently alluding to the same tradition，calls Murgentium，or Morgentia （as he writes the name），a city of Italy，but no such place is knowa．［Mongetes．］Strabo is the only anthor who notices the existence of the Morgetes in Sicily ；and it is certain that when Morgantium first appears in history it is as a Siculian town．It is first mentioned by Diodorus in e．c． 459 ，when he calls
 78 ）：it was at this time taken by Ducetins，who is and to have added greatly to his power aud fame by the conquest；but after the fall of that leader， it beeame again independent．We next hear of it in B．C．424，when，aecording to Thueydides，it was stipulated，at the peace concluded by Hernocrates， that Morgantia（or Morgantina，as he writes the name）should belong to the Camarinaeans，they paying fur it a fixed sum to the syractasans．（Thuc iv．65．）It is impossible to understand this nrrange－ ment between two cities at such a distance from one another，and there is probably some mistake in the names．＊It is certain that in R．．．396，Mor－ gantia again appears as an independent city of the Siculi，and was one of those which fell under the arms of Dionysius of Syracuse，at the same time with Agyriun，Menaenum，and other places．（Diod． xiv．78．）At a later period it afforded a refuge to Asathecles，when driven into exite from Syracase，

[^17]＂Digilytieda by Mricionsoft ${ }^{(8)}$
and it was in great part by the assistance of a boily of mercenary troops from Morgantia and other tomus of the interior, that that tyrant succeeded in establishing his despotic power at Syracuse, B. C. 317. (Justin. xxii. 2; Diod. xix. 6.) Morgantia is repeatedly mentioned during the Second Punic War. During the siege of Syracuse by Marcellus it was occupied by a Roman garrison, and great magazines of corn collected there; but the place was betrayed by the inhabitants to the Carthagivian general Hinilco, and was for some time occopied by the Syracusan leader Hippocrates, who from thence watehed the proceedings of the siege. (Liv. xxiv. 36,39 .) It was ultimately recovered by the Roinan general, but revolted again after the departure of Marcellus from Sicily, n. c. 211; and being retaken by the praetor MI. Cornelius, both the town and its territory were assigned to a body of Spanish inercenaries, who had deserted to the Romans onder Mericus. (ld. xxvi. 21.)

Morgantia appears to have still continued to he a considerable town under the Roman domioion. In the great Servile insurrection of e. c. 102 it was besieged by the leaders of the insurgents, Tryphon and Athenion; but being a strong place and well fortificd, offered a vigorous resistance; and it is not clear whether it ultimately fell into their bands or not. (Diod. xxxri. 4, 7. Exc. Phot. pp. 533, 534.) Cicero repeatedly mentions its territory as one fertile in corn and well cultivated, thongh it suflered severely from the cxactions of Verres. (Cic. Verr. iii. 18. 43.) It was therefore in his tine still a municipsl town, and we find it again mentioned as such by Pliny (iii. 8. s. 14); so that it must be an error on the part of Strabo, that he speaks of Morgantium as a city that no longer existed. (Strab. vi, p. 2\%0.) It mar, howerer, very probably have been in a state of great decay, as the notice of Pliny is the only subseqnent mention of its name, and from this time all trace of it is lost.

The position of Morgantia is a subject of great mencertainty, and it is impossible to reconcile the conflicting statements of ancient writers. Most authoritics, however, concur in associating it with the Siculian towns of the interior, that border on the valleys of the Symaetbus and its tribataries, Menaenum, Agyrium, Assorus, \&c. (Diod. xi. 78, xiv. 78; Cic. Verr. l. c.; Sil. Ital. xiv. 265); and a more precise testimony to the same effect is found in the statcment that the Carthaginian general Mago encamped in the territory of Agyrium, by the riter Chrysas, on the raad leading to Morgantia, (Diod. xiv. 95.) The account of its siege during the Servile War also indicates it as a place of natural strength, built on a lofty bill. (Diod, xxxvi, l. c.) Hence it is very strange that Livy in one passage speaks of the Roman fleet as lying at Morgantia, as if it were a place on the sea-coast ; a statement wholly at variance with all other accounts

coln of morgantig itizec
of its position, and in which there must probably be some mistake. (Liv. xxiv. 27.) On the whole we may safely place Morgantia somewhere on the borders of the fertile tract of plain that extends from Catania inland along the Simeto and its tributaries; and probably on the hills between the Dittaino and the Gurna Longa, two of the principal of those tributaries; but any attempt at a ncarer determination must be parely conjectural.

There exist coins of Morgantia, which have the name of the city at full, MOPLANTIN $\Omega N$ : this is unfortunately effaced on the one figured in the preceding column.
[E. H. B.]
MIORGE'TES (Móp $\gamma \eta \tau \epsilon s$ ), an ancient people of southern Italy, who had disappeared before the period of authentic history, but are noticed by several ancient writers among the earliest inbabitants of that part of the yeninsula, in connection with the Onotrians, Itali, and Siculi. Antiochus of Syracuse (ap. Dionys. i. 12) represcnted the Sienli, Mlorgetes and Italietes as all three of Oenotrian race; and derived their names, according to the favourite Greek custom, from three snocessive rulers of the Oenotrians, of whom Italus was the first, Morges the second, and Siculus the third. This last monarch broke up the nation into two, separating the Siculi from their parent stock; and it would seem that the Morgetes followed the fortunes of the younger branch; for Strabo, who also cites Antiochus as his autbority, tells us that the Siculi and Morgetes at first inhabited the extreme southern peninsula of Italy, until they were expelled from thence by the Oenotrians, when they crossed over into Sicily. (Strab. vi. p. 257.) The geographer also regards the name of Morgantinm in Sccily as an evidence of the existence of the Morgetes in that island (lvid. pp. 257. 270) ; but no other writer notices them there, and it is certain that in the time of Thucydides their name must have been effectually merged in that of the siculi. In the Etymologicon Magnum, indeed, Dorges is terined a king of Sicily: but it seems clear that a king of the Siculi is intended; for the fable there related, which calls Siris a daughter of Morges, evidently refers to Italy alone. (Etym, M. v. Eip/s.) All that we cad attempt to deduce as historical from the legends above cited, is that there appears to have existed in the S. of Italy, at the time when the Greek colonists first beeame aequainted with it, a people or tribe bearing the nane of Morgetes, whom they regarded as of kindred race with the Chones and other tribes, whom they included under the more general appellation of the Oenotrians. [Oenotria.] Their particular place of abode cannot te fixed with certainty; but Strabo seems to place them in the southern peninsula of Bruttium, adjoining Ihegium and Locri. (Strab. vi. p. 257.)
[E. H. B.]
MORGINNUN1, in Gallia Narbonensis, is placed by the Table on the road from Vienna (J'ienne) to Alpis Cottia, and $14 \mathrm{M} . \mathrm{I}^{2}$. short of Cularo (Grenoble). The place is Moirans. [G. L.]

MORI'AH. [JERUs.alem.]
MORICAMBA (Mорккá $\mu 8 \eta$, Ptol. ii. 3. § 3), an estuary of Britain, Morecambe Bay, on the coast of Lancashire.
[C. R. S.]
MORIDU'NUM, in Britain, placed both by the Antonine Itin. and Geogr. Rav, near Isca of the Dumnonii (Exeter) : it was one of the stations termed mansiones and mutationes, probably the latter y it site has by no nweans bedragreed nion by
mommaliusa.
topographers, and three or four localities have been proposed. Of these, Scaton and Hembury, near Iloniton, appear to have the best claims for consideration ; but as the stations next to larre trwns were often merely establislnnents for relays if borses and other purposes connected with postine, they were the least likely to be constructed on a large on substantial scale; and thus we have often great difiticalty in detecting even a vestige of them. [C. R. S.]

MORI'\$1ENE (Mopıцevz), a district in the northwest of Caypadocia, comprising both banks of the river Halys, is said to have been fit only for pasture land, to have haul scarcely any fruit-trees, and to lave abounded in wild asses, (Strab. xii. pp. 53.4, $537,539,540$; Plin. II. N. vi. 3.) The Komans regarded it as a part of Galatia, whence Ptolemy (v. 6) does not mention it among the districts of Cappadocia.
[L. ..]
MO'RINI, a nation of Delgica. Virgil is the authority for the quantity: -
"Extremique hominum Morini." (.1ch. viii. 727.)
It bas been shown in the article Mexapir that on the north the Morini were bounded by the Menapii. On the west the ocean was the bunudary, and on the south the Ambiani and the Atrebates. The eastern boundary cannot be so easily determined. The element of Dorini seems to be the word mor, the sea, which is a common Flemish word still, and also found in the Latin, the Gierman, and the English languages.

Caesar, who generally speaks of the Morini with the M-napii, has fixed their position in general terms. When he tirst invaled Britamnia he went into the country of the Morini. because the passage from there to Britain was the sbortest (B. G. iv. 21). In the next expedition. r. C. 54, he sailed from Portus Itius, having ascertained that the passage from this port to Britain was the most commodious. Portus Itins is in the country of the Marini [Imes Poetus]. Itolemy (ii. $9 . \S 8$ ) mentions tiro cities of the Morini, (iesoriacum or Bumonia (Buslogne), and Taruema (Thérozemur), east of it. in the interior. If we add Castelham Morinoran (Cassel), in the interior, south of Dankerque, " we see that, beviles the diocese of Bomboyne, the territory of the Morini comprises the new diuceses of St. Omer and Ypern, which suececied to that of Tournai." (D'Antille.) But if Cassel is not within the limits of the Morini, their territory will not be so extensive as $v$ 'Auville makes it. [Menarri.]

Causar's wars with the Morini were mons suceesful than with the Menapii. A large part of the territory of the Morini did not offir surle satural (w) tacles as the land of the Menajii. The marshes of the Morimi wonld be between Calais and Dunkergue. The foree which the Morini were suppused to be able to send to the Belsic confeleration in B. c. 57 was estimaterl at 25,000 men. Tlourgh most of the Mirmi were subuluel by Caesar, they rwe again in the time of Augustns, and were put down by C. Carinas (Dion Cassins, 1i. 21). Wien Bononia was masle a Roman pont, and Tarmema a Romal: tawn, the cometry of the Merini would become Romanisel, and Joman nsages and the Roman langrace woull prevail. There were firman roads which terminated at Bononia and C'ancillum.

An inscription mentione the Theremviri of the Cinkma Jormormm, but it is malonom whit place itis Digitized OM:M

## MOSCHA PORTUS

Mo'RIUS. [Bozotis, Vol. I. p. 412, b.]
MORON (Mópwy), a town of Lusitania upon the Tagus, which Brotus Callaïcus made his headquarters in lis campaign against the Lusitanians. (Strah, iii. 1. 152.) Its exact site is unknown.

Monontiabalia ( tà Mopurtá6apa, Arrian, Indic. c. 22), a place on the coast of Gedrosia, at no great distance W. of the mouths of the Indus, noticed by Arrian in his account of Nearchus's expedition with the fleet of Alexander the Grat. It does nat appear to have been satisfactorily identified with any modern Ilace.
[V.]
Moliosgl, a town of the Varduli in Hispania Tarraconensis, identified by I kert with St. Sebastion, which, however, more probably represents Menosea. (Plin. iv. 20. s. 34 ; Uhert, ii, 1. p. 446 ; Fobbiger, iii. p. 80.)

MORTUUM MARE. [PALAEstina.]
MORTUUD MARE. [SEPTENTRONALIS Demines.]

## MORILLUS. [MyGDONTA.]

MOSA in (iallia is placed by the Antonine Itin. between Andomatumm (Langres) and Tullum (Toul). It is 18 M. P. from Andomatunum to Mosa, which is supposed to be Mrute, sitnated at a passage over the Macs, and in the line of an old Loman road.
[G. L.]
MOSA (Maas), a river of Gallia, which Caesar supposed to rise in the Vosegus (I'osges) within the limits of the Lingones. (B. G. iv. 10.) This passage of Caesar: in which be speaks of the Moss in the lower part of its course receiving a part of the Ehine, called Valalis (ITacl), is very obseure. This matter is disenssed in the article Batayi. Dion Cassins writes the word in the form Móoas (xlis. 42); and Ptwlemy (ii. 9. § 3) has the form Mwira in the genitive.

Carsar (B. G. vi. 33) says that the Scaldis (Schild ) Hlows into the Jiosa; a mistake that might easily be made with snch knowledge of the coast of Bulgium and Holland as he possessed. The only branchs of the Mosa which Cnesar mentions is the Salis (Sambre), which joins the Maas on the left bank at Charleroi in Belginm.

The Maas, called Meuse by the French, rises about $48^{\circ} \mathrm{N}$. lat. in the Faucilies, which mite the Cite dUr and the Jisges. The general couse of the Maus is north, hut it makes several great bends before it reaches Lieqe in Belgiom, from whieh its c norse is north as far as Grave, where it turns to the west, and for 80 miles flows nearly parallel to the Wach. The Maas joins the IV aal at Gorcum, and, retaining its name, flows past Rotterdam into the North kict. The whole length of the Maas is above 500 miles.
[G. L.]
 stream, placed by Ptoleny between the Fulaeus and the Tigris. It is probably the same as that ealled by Marcian (p. 17) the Ma raios. It was, no doubt, one of the streams which tugether form the months of the Tigris, and may nut impossibly be the same which Pliny names the Aduas (vi. 27, 31), and which he appears to have considered as a feeder of the Eulaeus.
[V.]
MUSCHA TORTUS (Mórxa $\lambda \mu \mu \dot{\mu} \nu)$. I. A harbour on the S. coast of Arabia, near the extren in east of the Abrasutine, or mure properly of the Asritac, since the nest mamed place is "syagros ex
 from Syazm moms to the sea. (Ptol. vi, 7. p. 153

culty in identifying it with Kesen, the last seaport westirard of Cape Fartusk; his "Syagros extrema." (Geogr. of Arabia, vol. ii. pp. 164. 178 ) The position assigned it by D'Anville at the modern Muscat is certainly untenable. (Ib. pp. 167, 168, 224, 233, 234.)
2. A second harbour of this name is mentioned by the author of the Periplus, on the east of the Syagros Promontorium, in the large bay named by Ptolemy Sachalites Sinus ( $\Sigma \alpha \chi \alpha \lambda$ ใ $\tau \eta s$ ко́лтоs), and east of the smaller one, named Omana ("Opava), by the anthor of the Periplus, who piaces this Moscla Portus 1100 stadia east of Syagros. He calls it a part appointed for the lading of the Saclaalite in-
 you $\pi \rho o \delta s{ }^{k} \mu\left(\xi_{0} \lambda \hat{\eta} \nu\right)$, frequented by ships from Cane, and a wintering-place lior late vessels from Limyrice and Barygaza, where they bartered fine linen, and carn, and oil for the native produce of this coast. Mr. Forster furnishes an ingenious etymological explanatinn of the recurrence of this name on the cuast of the Sachalites Sinns. "The Arabic Moscha, like the Greek áoкós, signifies a hide, or skin, or a bag of skin or leather blunen up like a bladder. Now, I'tolemy informs us that the pearl divers who frequented his Simus Sachaliter (uaquestionably the site of Arrian's Moscha Portus), were noted for the practice of swimming, or floating about the bay, supported by inflated hides or skins. What more natural than that the parts frequented by these divers should be named from this practice ? . . . And hence, too, the name of the Ascitae of Ptolemy ('fluaters on skins'), the actual inhabitants of his Moscha Portus immediately west of bis Suágras." It is a remarkable fact mentinned by modern travellers, that this practice still prevails among the fishermen on this coast; for "as the natives have but few canoes, they generally substitute a single inflated skin, or two of these laving a flat board across them. On this trail contrivance the fisherman seats bimself, and either casts his small hand-net or plays his hook and line." (lient. Wellsted, Travels in A rubica, vol. i. pp. 79, 80, cited by Forster, Arabia, vol. ii. p. 175 , note*.) The identilication of Arrian's Moscha with the modern Ausera, is complete. Arrian reckons 600 stadia from Syagros across the bay which he names Omana. This measurement tallies exactly with that of the Bay of Seger, in Commodore Owen's chart of this coast; and from the eastern extremity of this bay to Moscha Portus, Artian assigns a distance of 500 stadia, which measures with nearly equal exactness the distance to Ras-al-Sair (the Ausara of Ptolemy), situated about 60 Roman miles to the east of the preceding headland. The identity of the Noscha Portus of Arrian with the Ansara of Ptolemy is thus further corroborated. "Arrian states his Mosclia Portus to have been the emporium of the incense trade; and Pliny proves Ausara to have been a chief emporium of this trade, by his natice of the fact that one particular kind of incense bore the name of Ausaritis." (Plin, xii, 35 : Forster, L. c. pp. 176, 177.)
[G. W.]
MusCHl (Móo Xol, Hecat. Fr. 188, ap. Steph. B. s. r.), a Colchian trilie, who have been identified with the Mesnecti of the prophet Ezekiel (xxyii. 13; Rosenmiiller, Bibl. Alterthumsk;, vol. i. pt. i. p 248). Along with the Tibareni, Mosynaeii, Macrones, and Marlae, they formed the 19 th satrapy of the Persian empire, extending along the SE, of the Euxine, and buunded on the S. by the lofty chain of the Armenian noumtains. (Herod itil.

94, vii. 78.) In the time of Strabo (xi. pp. 497 -499) Moschice (Moб ${ }^{\iota k} \boldsymbol{\eta}$ ) - in which was a temple of Leucothea, once famons for its wealth, but plandered by Pharnaces and Mithridates - was divided between the Colchians, Albanians, and Iberians (comp. Mela, iii. 5. § 4 ; Plin. vi. 4). Procopius (B. G.iv. 2), who calls them Mé $\sigma \chi 0$, says that they were subject to the Iberians, and had embraced Christianity, the religion of their masters. Afterwards their district became the appanage of Liparites, the Abasgian prince. (Cedreo. vol. ii. p. 770 ; Le Beau, Bas Empire, vel. xiv. p. 355 ; St. Martin, Memoires sur l'Armenie, vol. ii. p. 222.)
[E. B. J.]
 i. p. 61 , xi. pp. $492,497,521,527$, xii. p. 548 , Plut. Iontp. 34 ; Mela, i. 19. § 13 ; Ptol. v. 6. §13; Moschicus M., Plin. v. 27), the name applied, with that of Paryadres, and others, to the mountain chain which connects the range of Anti-Taurns with the Cancasus. Although it is obviously impussible to fix the precise elevation to which the ancients assigned this name, it may be generally described as the clain of limestone mountains, with volcanic rocks, and some granite, which, braoching from the Caucasus, skirts the E. side of Imiretia, and afterwards, under the name of the Perengah Tagh, runs nearly SW, along the deep valley of Ajirah in the district of Tchildir; from whence it turns towards the S., and again to the W. along the valley of the Acampsis, to the W. of which, bearing the name of the Kop Tiigh, it enters Lesser. Asia. (Ritter, Erdkunde, vel. x. p. 8J6; Cbesney, Exped. Euphrat. vol. i. p. 2s5.)
[E. B. J.]
MOSE in Gallia appears in the Table on a road from Darocortorum (Reims) to Mednantum. [MEDUANTIM.] The place appears to be Mouzon on the Maas, D'Aoville says that the place is called Mosomacus in the oldest middle age records. [G.L.]

MOSELLA (Mosel, Moselle), a river of Gallia, which joins the Rline at Coblenz [Confluentes]. In the narrative of his war with the Usipetes and Tenctheri Caesar (B. G. iv. 15) speaks of driving them into the water " ad confluentem Mosae et Rheni." One of the latest and best editors of Caesar, who however is singularly ignorant of geography, supposes this confluence of the Mosa and the lhenus to be the junction of the Mosa and a part of the Rlienus which is mentioned by Caesar in another place (B. G. iv. 10 ; Mosa.) But this is impossible, as D'Anville had shown, who obscrves that the Usipetes [Menapin] had crossed the Thine in the lower part of its course, and landed on the territory of the Menapii. Having eaten them up, the iovaders entered the country of the Eburones, which we know to be between the Rhine and the Mosa, and bigher up than the country of the Menapii. From the Jiburones the Germans advanced into the Condrusi in the latitnde of Liige; and they were here before Caesar set out after them. (B. G. iv. 6.) Caesar's narrative shows that the (ieman invaders were not thinking of a retreat: their design was to penetrate further into Gallia, where they had heen invited by some of the Gallic states, who hoped to throw off the Roman yoke. After the defeat of the Germans on the river, Caesar built bis wooden bridge over the Rhine, the position of which was certainly somewhere between Coblenz and Axdernach. The conclusion is certain that this confuence of the Rbenus and the Mosa is the confluence of the Rhenus and the Mosella atcablenz guad wermust explain Caesar's
mistake as weil as we ean. It is possible that both rivers were called Mosa; and Muscla or Musula, as Florus has it, seems to be a diminutive of Mosa, but that reading is somewhat duab:ful. (Florus, iii. 10. el. Duk.) There is no variation in Caesar's text in the passage where he sppaks of the confluence of the Rhenus and the Mosa. (Caesar, ed. Shmeider.) Several of the affluents of the Mosel are mentioned in the ancient writers, and chiefly by Ausonius: the Sura (Sokr), Pronawa (I'rum), Nemesa (Nims), (ielthis (Kill), Erabras (Rurer), Lesura (Leser), Drahomus (I)rone), Saravus (Seetr), and Salmonat (Silm).

The Mosella is celebrated in one of the longer poeins of Ausonius, who wrote in the. 4 th century A. D. The vine at that time clothed the slopes of the hills and the clitts which bund this deep and pieturesque river valley in its course below Ther:
" Quat sublimis apex longo super ardua tractu, Et rupes et aprica jumi, flexusque sinusque
Vitibus adsurgunt naturalique theatre." (v. 154.)
There is a German metrical translation of this poem hỵ Bücking with notes.

The Movel rises on the western face of the Tosges, and its upper course is in the hill country, formed by the offisets of the mountains. It then enters the plain of Lorraine, and after passing Tullam (Toul), it is joined by the Meurthe on the right bank. From the jonction of the Meurthe it is navigable, and has a general north course past Divodurum ( $M / \not / z$ ), and Thioncille, to Augusta Treviroram (Triur or Treves). From Trier its general conrse is about NNE, with many great bends, and in a bed deep sunk below the adjacent country, to its jumetion with the Rhine at Coblenz. The whole cururse of the river is somewhat less than 300 miles. It is navigable for steamboats in some seasons as far as Metz.

A Roman governor in Gallia propased to unito the Mosella and the Arar (Strine) by a canal, and thus to effect a mavigation from the Meditertamean to the North Sea [Galbia Thasxaliplei, Vul, 1. p. 967.
[G. L.]
Moste'NI (Mootnvoi), a town of Lydia in the Hyreanion plain, south-cast of Thyatirs, and on the road between this latter town and Sardis. In A. In. 17, Monteni and many other towns of that country were visited by a fcarful earthquake. (1't 1. v. 2 . § 16: Tac. Ann. ii. 17 ; Hieroch. p. 671 , where it is erroneonsly calleal Muaqทi้un or Móãıva; Concil. Chate. P. 240, where it bears the name Mova< hขp.) lts exact site is unknown. (Comp Rasche, Lex. Num. iii. 1. p. 869, \&...)
[L. S.]
Mosychlids [Lemmes.]
MosiNOECL, MUssiNOREL, MOSYNI, MOSSYNI (Muarivorkot, Mancíporkot, Mafuvoi, Maraovoi). a tribe on the cuast of Pontu, occupying the district besween the Tibaweni and Maerones, and containmy the towns of Cerist's and Pamenicla. The Mosynneci were a brave and warlike people, but are at the same time said to have Lern the rodest and most uncivilised amone all the tribes of A sia Minor. Many of their peculiar customs are neticed by the Greeks. who planted colonies in their districts. They are said to have lived on trees and in towers. (htrab. xii. p. 549.) Their kines, it is swid, were clectel hy the people, and dwelt in an isolated tower rising smmethlat above the homses of his subjecte, who watcholl hi procewhes clomely. and provided

anything that displeased them, they slopped their supplies, and left him to die of starvation. (Xen. Snab. v. 4. § 26 ; Apollon. Rhod. ii. 1027 ; Jiod. xiv. 30 ; Summus, Fraym. 166.) They used to cut off the heals of the enenvies they had slain, and carry them abont amid dances and songs. (Xen. Anab. iv. 4. § 17 ; v. 4. § 15.) It is also related that they knew nothing of marriage (Xen. Anob. v. 4. § 33 ; Diod. l. c.), and that they generally tattooed their bolies, Eating and drinking was their greatest bappiness, whence the children of the wealthy among them were regularly fattened with salt dolphins and chestnuts, until they were as thick as they were tall (Xen. Anab. v. 4. § 32). Their arons consisted of heavy spears, six cubits in length, with round or glubular handles ; large shields of wicker-wurk covered with ox-hides ; and leather or wooden helmets, the top of which was adorned with a erest of bair. (Ken. l. c., v. 4. § 12 ; Merod. vii. 78.) The fourth chapter of the fifth book of Xenophon's Anabasis is full of curions information about this singular people. (Comp. also Strab. xi. p. 528 ; Hecat. Fragm. 193 ; Steph. B. s. v.; IIerod. iii. 94 ; Scylax. p. 33. : Amm, Marc, sxii. 8 ; Orph. Argon. 740 ; Mela, i. 19 ; Tibull. iv. 1. 146; Curtius, vi, 4. 17; Plin. vi.4; Val. Flace, v. 152; Dionys. Per. 766.)
[L. S.]
MOTENE. [Otene.]
Mo'TYA (Motin: Eth. Morvaios: S. Pantaleo), a city on the W. coast of Sicily, between Drepanum and Lilybaeum. It was situated on a small island, about three quarters of a mile (six stadia) from the mainland, to which it was joined by an artificial canseway. (Dind, xiv, 48.) It was originally a colony of the Phomicians, who were fond of choosing similar sites, and probably in the first instance merely a commercial station or emporium, bnt gradually rose to be a flourishing and important town. The Greeks, however, according to their custom, assicned it a legendary origin, and derived its name from a woman named Motya, whom they comected with the fables concerning Hercules. (Steph. B. s.e.) It passed, in common with the other Phomician settlements in Sicily, at a later period under the guvernment or dependency of Carthage, whence Diodurns calls it a Carthaginian enlony ; but it is probable that this is not strietly correct. (Thue, vi. 2 : Diow, xiv. 47.) As the Greek colonies in Sicily increased in numbers and importance the Phoenicians gradually abandoned their settlements in the immediate neighbourhood of the new comers, and concentrated themselves in the three prineipal colonies of Sulus, Panormus, and Motya. (Thuc. l.c.) The last of these, from its proximity to Carthage and its opportune situation for commanication with Africa, as well as the natural strength of its position, became one of the chief strongholds of the Carthaginians, as well as one of the most important of their commercial cities in the island. (Diod, xiv, 4\%.) It alpears to huve hekd, in both these respects, the same poxition which was attained at a later period by Lilybacum. [Lumnabum.] Notwitbstanding these accounts of its early importance and floarishing condition, the name of Motya is rarely mentioned in history until just before the period of its memorable siege. It is first mentioned by Hecatacus ( $o p$, siteph. B3, s.v.), and Thueydides notices it among the chief colonies of the Phoenicians in Sicily, which still xubsisted at the period of the Athenian expeI (T) FCH3O in tig Carthaginian army under

Hannibal landed at the promontory of Lilybaeum, that general laid up bis fleet for secmrity in the gulf around Motya, while he advanced with his land forces along the coast to attack Selinus. (Diod. xiii. 54, 61.) After the fall of the latter city, we are toid that Hermocrates, the Syracusan exile, who had established himself on its ruins with a numerons band of followers. laid waste the territories of Motya and Panormus (1d, xiii. 63) ; and again during the second expedition of the Carthaginians under Hamilcar (n. C. 407), these two cities became the permanent station of the Carthaginian fleet. (Id. xiii. 88.)

It was the important position to which Motya liad thus attained that Ked Dionysius of Syracuse to direct his principal efforts to its reduction, whet in B. C. 397 he in his turn invaded the Carthaginian territory in sicily. The citizens on the other liand, relying on succour from Carthage, made preparations for a vigorons resistance; and by cutting off the causervay which united them to the msinland, compelled Dingysius to have recourse to the tedious and laborious process of constructing a mound or mole of earth across the intervening space. Even when this was accomplished, and the military engines of Dionysius (among which the formidable catapult on this occasion made its appearance for the first time) were brought ap to the walls, the Motyans continued a desperate resistance; and after the walls and towers were carried by the overwhelning forces of the enemy, still maintained the defence from street to street and from house to house. This obstinate struggle only increased the previons exasperation of the Sicilian Greeks against the Carthaginians ; and wheo at length the troops of Dionysins made themselves masters of the city, they put the whole surviving pupulation, men, women, and children, to the sword. (Diod. xiv, 4i-53.) After this the Syracusan despot placed it in charge of a garrison under an officer named Biton; while his brother Leptines made it the station of bis flect. But the rest spring (n.c. 396) Himilcon, the Carthaginian general, baving landed at Panormus with a very large force, recovered passession of Motya with comparatively little difficulty. (ld. ib. 55.) That city, however, was not destined to recover its former importance ; for Himilcon, being apparently struck with the superior advantages of Lilybaeum, founded a new city on the promontory of that name, to which he transferred the few remaining inhabitants of Mlotya. (Diod. xxii. 10. p. 498.) From this period the latter altogether disappears from history; and the little islet on which it was hnilt, has probably ever since been iwhabited only by a few fishermen.

The site of Motya, on which earlier geographers were in much doubt, has been clearly identified and described by Captain Smyth. Between the promontory of Lilybaenm (Capo Boco) and that of Aegithallus (S. Teodoro), the coast forms a deep bight, in front of which lies a long group of low rocky islets, catled the Stagnone. Within these, and coosiderably nearer to the mainland, lies the small isiand called $S$. Pantaleo, on which the remains of an ancient city may still be distinctly traced. Fracments of the walls, with those of two gatewaya, still exist, and coins as well as pieces of ancient brick and pottery - the never failing indications of an ancient site - are found scattered thronghout the island. The circuit of the latter does not exceed a mile and a half, and, it is inhabited only by a few fishermen; but is hot devidef
fertility. (Smyth's Sicily, pp. 235, 236.) The confined space on which the city was bnilt agrees with the description of Diodorus that the honses were lofty and of solid coastruction, with narrow streets ( $\sigma \tau \in \nu \omega \pi \sigma i$ ) between them, which facilitated the desperate defence of the inhabitants. (Diod. xiv. 48,51 .)

It is a singular fact that, though we have no account of Mutya having received any Greek population, or fallen into the bands of the Greeks before its conquest by Dionysius, there exist coins of the city with the Greek legend MOTTAION. They are, however, of great rarity, and are apparently imitated from thnse of the meighhouring city of Segesta. (Eckhel, vol. i. p.225.) [E. H. B.]

## COIN OF MOTYA.

MO'TYCA, or MU'TYCA (Mótouka, I'tol.: Eth. Mutycensis, Cic. et Plin.: Modica), an inland town in the SE. of Sicily, between Syracuse and Camarina. It was probably from an early period a dependency of Syracase; and hence we meet with oo mention of its name nutil after the Roman conquest of Sicily, when it became an independent municipium, and appatently a place of some consequence. Cicero tells us that previous to the exactions of Verres, its territory (the "ager Mutycensis") supported 187 farmers, whence it would appear to have beeo at once extensive and fertile. (Cic. Verr. iii. 43,51 .) Motyea is also mentioned among the inland towns of the island both by Pliny and Ptolemy; and though its name is not found in the Itineraries, it is again mentioned by the Geographer of lavenna. (Plin. iii. 8. § 14 ; Ptol, iii. 4. § 14 ; Geogr. Rav. v. 23.) Silius 1talicus also includes it in lis list of Sicilian cities, and immediately associates it with Netum, with which it was clearly in the same neighbourhood. (Sil. Ital. xiv. 268.) There can be no doubt that it is-represented by the modern city of Molica, one of the largest and most populous places in the 1 al di Noto. It is sitaated in a deep valley, surrounded by bare limestone mountains, about 10 miles from the sea.

Ptolemy notices also a river to which he gives the name of Motychanus (Moтv́đavos $\pi 0 \tau \alpha \mu$ ós), which he places on the S. coast, and must evidently derive its name from the city. It is either the trifling stream now known as the Fiume di Scicli, which rises very near Modica;-or perhaps the more considerable one, now known as Fiume di Ragusa, which flows within a few miles of the same city. [E. H. B.]

MO'TYUN (Mótvav), a small town or furtress of Sicily, io the tervitory of Agrigentum. It mas besieged in D. C. 451 by the Siculian chief Ducetius, and fell into his hands after a battle in which be defeated the Agrigentines and their allies; but was recorered by the Agrigentines in the course of the fullowing summer. (Diod. xi. 91.) No other mention of it is found, and its site is wholly unknown. [E. H. B.]

MOXOE'NE, one of the five provinces beyund the Tigris, ceded by Narses to Galcrius and the Ronufis, and which Sapor fafterxards recovered

## MURGANTIA.

frow Jowinn. (Amin. Mare, xxy. 7. § 9, comp. xxiii. 3. §5; Le Bean, Bus Fimpire. vol, i. p. 380, vol. iii. p. 161 ; Gibbon, ce. xiii. xxir.). Its exaut pasition cannot be made ont, thongh it must have been near Kurdistim. (litter, Errllande, wol, x. p. 816.)
[E. B. J.]
ML'CIIlle'sls (Movxeip Pacup. B.G. iv. 2,15,16), a cimton of Laziea, populnos and fertile: the vine, which does not grow in the rest of Coldhis, wats found here, it was watered ly the river RuEON ('Péwy). Arclaeopolis, its chief town, was the capital of Colchis, and a place of considerable importance in the Lazic war. (Le Bean, Bas Eimpire, vol. ix. p. 217 ; Gibbon, c. xlii)
[F. B. J.]
MCCRAE or NUCRAE (the reading is uncertain), a town of Samniom, mentioned ouly by Silius Italicns (viii. 566), the situation of wbich is wholly unknown.
[E. H. B.]
MtICUSI. [Mamethnla.]
MI1)ETII. [MoDutti.]
MUGILLA, an ancient city of Latium, mentioned only by Dinnysius (viii. 36), who enumerates the Magillani (Moyidaivous) anong the places conquered by Coriolanus, at the bead of the Vok-cian army. He there mentions them (ns well as the Albietes, who are equally unknown) between the citizens of Pollusea and Corioli, and it is therefore probable that Mugillat lay in the neighbourhood of those cities; but we have nu further clue to its site. The name does not again applear, even in Pliny's list of the extinet cities of Latimu; and we should be apt to suspect some mistake, but that the cognomen of Mogillanus, borne by oue family of the P'apirian Gens, seems to confirm the correctness of the name. [E. H. B.]

MUICU'RUM (Movãooupor), a place on the enast of 1llyricum, near Salona, which was taken fir Totila, kine of the Goths, by llanf. (Trocop. B. f. iii. 35; Le Bean. Bus Emuire, vol. ix. p. 82.) [E. 13.J.]

SILIELACHA, a town unm a promontary of the same name on the W. eoost of Afrion (Polyb. ap. Plin. v. 1). now Maley But silhtim, the old Mannta of the charts. (Conup. Iozulon Gieng. Journ. vol. 51. p. 302.)
[E. B. J.]
Nu1, CCil.1, a river of Mauretania, which Sallust (Jug. 92, 110), Mela (i.5. §s 1,5), and Pliny (r. 2) assign as the boundary between the Mani and Mis. suecylit, or the sulyjects of Bocchus and Jugurtha. As Stratur (svii. if $, 827,829$ ) makes the Nown-
 the sane pmopoce, there can be mo donbt that they are one and the same river. The Monsis (Masova, Ptol. l.e.) of Pliny (l. c.) or the Muluaci, which forms the frontier hetwem Marocro and Algeria, is the same as the river which boumled the Moars from the Numidians. Tbis river, rising at or near the S. extremity of the lower chain of Atlas, and flossing throngls a diversified country, as yet almost untroden by Europeans, falls into the sear nearly in the middue of the Gulf of Mrdilate of our charts. (Shaw, Trar. p1, 10-16.)
[E. B. I.]
MUNDA (Možoסa). 1. An impurtant tawn of Mispania bastica, and a Poman comy belonging to the conventus of A-tici. (sirab. iii. p. 14t ; Hin. iii. 1. © 3.) Strabo (l.C.) says that it is 1400 stadia from Carteia. It was echurated on account of two battles fought in its viciuty, the first in 18.c. 216. when Cn. Scipio defeatell the Carthaginians (Liv, sair. 42 ; Eil. Ital. iii. 400), and the

xliii. 39 ; Anct. Bell. Hisp. 30, seq.; Strab. in. 1p. 141, 160; Flor. iv. 2 ; Val. Max. vii. 6.) It was taken by one of Cacsar's genetals, and, according to Pliny, from that time it ceased to cxist. ("Fuit Munda cum Pompei filio rapta," Plin. iii. I. s. 3.) But this eannot be correct, ns strabo (l.e.) describes it as an important place in his time. It is nsually identifind with the village of Monda, SW. of Malaga; but it has been pointed ont that in the vicinity of the modern M onde, there is no plain adapted for a field of hattle, and that the ancient city should probably be placed near Cordora. It has been supposed that the site of Munda is indicated by the romains of ancient walls and towers lying between Martos, Alcaudete. Espejo, and Bicna. At all events this site agrees better with the statement of Strabo, that Munda is 1400 stadiar from Carteia, for the distance from the modern Mondia to the latter place is only 400 stadia ; and it is also more iu accordance with Pliny, who places Munda between Attubi and Urso. (Fortiger, vol. iii. p 51.)
2. A town of the Celtiberi in Ifispania Tarraconersis, prolably near the fromtiers of the Carpetani. (Liv, sl. 47.)
3. A river on the W. coast of Lusitania, falling into the sea between the Tagns and Durius, now the Memdrgo. (Plin. iv. 21. .. 35 ; Moúrōas, Strab. iii. p. 153 ; Móvóas, Ptol. ii. $5 . \S 4$; Marc. p. 43.) MUNDOBRIGA. [Menomriga.]
MLNIMENIUM CORBLLONIS. [Corbuloats Munimentra.]

ML NIMENTUN TRAJANT, a fort in the country of the Mattiaci. (Ainm. Marc, xvii. 1.) Its site is not certain, thotrg it is generally believed that the Roman remains near Ilöclust are the ruins of this fort. (Wilhelm, Gormanien, p. 148.) [I..s.] ML NI'CHIA. [Athexam, p. 306.]
MLRANLM (Morano), a town of the interior of Lucania, the natue of which is not found in any ancient author: but its existence is proved by the Itinerary of Antoninus, which places a station Summurano, evidently a corruption of Sub Murano, on the road from Nerulum to Cunseutia; and this is confirmed by the inscription found at La Polla [Fonma Popilit], which gives the distance from that place to Miranmm at $74 \mathrm{M} . \mathrm{P}$. It is, therefure, evident that Muranum mnst have occupied the same site as the modern town of Moramo, on a cunsiderable bill, at the foot of which still runs the high road from Naples to Reggio, and whem was situated the station noticed in the Itinerary. Near it are the sources of the river Coscile, the ancient Sybaris. (ftim. Ant. Pp. 105, 110; Orell. Inacr. 3308: INmmuelli, vol. i. p. 387.) [E. H. I1]

ML'RBOGil (Múpboyot, 1'tol. ii. 6. § 52), a people in Ilypania Tarraconensis, the southon neighours of the Cautabri, are the same as the poople called Tewandor by Pliny (iii. 3. s. 4) and Orosius (vi. 21). This may be inferved from the fact that Pliny calls Segisamo a town of the Turmodizi, and I'tclemy calls Desobrigula a town of the Murione; while in the Antonine Itinerary ( p . 449) these two towns are only 15 miles apart. (Finfiger, vol. iii. p. 102.)

MUR( AA NT1.I, 1. A city of Samninm, mentinsed only by Liry, who calls it "a strong city" (ralidam urben, x. 17), notwithatanding which it was taken by assanlt, by the Roman consul P. Deeius, in a single day. r. C. 296. Its pasition is fixed by RoFreuto), in the territory of
the Hirpini, about 20 miles W. of Luceria. An inscription fonnd here would seem to attest that Mingantia existed as a manicipal town as late as the reign of Severus; but considerable donbts have been raised of its anthenticity. (Romarielli, vol. ii. p. 481 : Mommsen, Topografia degli Irpini, pp. 4. 5 : in Bull. dell' Inst. Arch. 1848.) The coins, with an Osean legend, which have been generally attributed to Murgantia. in reality belong to Teate. (Friedliader, Oskische Münzen, p. 49.)
2. A city of Sicily, the name of which is variously written Murgantia, Murgentia, and Morgantia. [Morc.stia.]
[E. H. B.]
MURGIS (Moopy(s), a town of Hispania Baetica, near tlie frontiers of Tarraconensis, and on the road from Castulo to Malsea, probably near Puenta de la Guardia rieja. (Ptol. ii. 4. § 11 ; Plin. iii. 3. s. 4 ; Itin. Ant. p. 405 ; Ukert, ii. 1. p. 352 ; Forliger, iii. p. 56.)
MURIANE (Moupiavi), one of the fonr districts of Catsonia in Cappradocia, on the west of Lavianesine, and sonth-west of Melitene. It is mentioned only by Ptolemy (v. 7. § 8), and mnst not be confounded with Morimene.
[L. S.]
MURIUS (Muhr), a tributary of the Drave (Dravas), which is mentioned only in the Peuting. Table, thongh the antiquity of the name is undoubted, and attested by the station "in Murio," "lich was situated on the road leading from Augusta Vindelicorun throngh Noricum. (Machar, Noricum, i. p. 280 .)
[L. s.]
merocincta, an imperial villa in Pammia, where Valentinian II. was residing with his mother Justina, when he was proclained emperor. (Ainm, Mare. xxs. 10.)
MURSA or MU'TSIA (Moúpoa, Moupria), also called Mursa Majur, to distinguish it from Mursella (Mersella) or Mursa Mlinor, was an important Roman colony, founded by Hadrian in Lower Pannonia, and bad the sumame Aelia. It was the residence of the gorernor of the conntry, on the Dtavus, and there the rouls met leading from Aqnincam, Celeia, and Poetovio. In its neighbourhood, Gallicnus gained a victory over Ingehus; and Constantine the Great male the town the seat of a bishop, A.D. 338. Its modern name is Essek, the capital of Slavonia. (Ptol. ii. 16. §§ 8 , viii. $7 . \S 6$; Anrel. Vict. de Caes. 33 ; Zosim. ii. 43 ; Steph. B. s. v. Moipoa; Geogr. Rav. iv. 19 : It. Ant. pp. 243, 265, 267, 331; It. Hieros. p. 562 ; Urelli, Inscript. Nos. 3066,3281 .)
The Lesser Mursa (Marsa Minor or Mursella) was likerise situated in Lower Pannonia, ten uniles to the west of Mursa Major, on the road frum this latter place to Poetovio, near the mudern village of Petrovice, on the right bank of the Danube. (I'tol. ii. 16. § 7; Geogr. Rav. iv. 19; lt. Hieros p. 562; Tab. Peut.)
[L. s.]
mursella. [Mursa.]
mldus cajesaris. [Helyeti, vol. i. p. 1042.$]$

MLSAGores (Mouad́ropor, Pomp. Mela, ii. 7. § 13), three islands lying off the E. coast of Crete, the position of which is described by Pliny (iv. 12. s. 20): "(iircumvectis Criumetopon, tres Musagores appellatae." In Mr. Pashley's map they are represented by Elaphonesin. (Comp. Höek. Kreta, vol. i. p. 378.)
[E. B. J.]
MUsarNid (Moorápva, Ptol. vi. 21. § 5 , vi. 8. §9; Marcian. Peripl. 29-32, ap.Geogr.Gruec Min. ed. Miiller, 1855), a spot on the shore of Gedrosia, as may be inferrel from the comigity of the ear
thoritics. Ptolemy mentions two places of the name one in Gedrosia, and the other in Caramanis; but there can be no doubt that the same place is intended. Arrian speaks of a place which he calls $\tau \grave{\alpha}$ Mórapya, on the coast of Gedrosin, which was occnpied by the Ichtlyyor hagi (Indic. 26). Vincent, who has exanined this geographical que:tion with much care, thinks that tbis port mnst have been situated a little west of the modern cape Passence or Pasmee. ( Toyage of Nearchus, vol. i. p. 242.) The difference of position in the ancient geographers may be accounted for by the fact that Musarna must have been on the boundary between Gedrosia and Caramania. Ptolemy speaks of a trike, whom he calls Musarmaei (Movaapyaìo, vi. 21. §4). There can be little doubt that they were the people who lived around Musarna.

MUSO'NES (Amm. Marce sxix. 5. § 27 ; Moriaovvot, Ptol. iv. 3. § 24 ; Mussini, Plin. v. 4. s. 4; Musunii, Peut. Tub.), a Morish tribe, who joined in the revolt of Firmns. (Amm. Marc. l.c.; comp. St. Martin, Le Beau, Bas Empire, vol. iii. p. 475.)
[E. B. J.]
MUSTI (Movarú, Ptol. iv. 3. § 33), a town of Numidia, which the Autonine Itinerary places at 84 M. P. (32 M. P. Peut. Tab.) from Sicra Veneria, 92 M. P. from Sufetula, 86 M. P. from Carthage, 119 M. P. (by Tipasa) to Cinta; all which distances (considering that the ruads are indirect) agree with the position assigned to it by Slixw (Trat, p. 179) and Barth (Wanderungen, P. 221) at 'AbderRabbi, so called from the tomb of a "Narabont." According to Vilius Sequester (de Flum. p. 7), it was uear the river Bagradas; but Shaw (l.c.), nho first discovered the site, by the remains of a triumphal arch, and a stone with an inscription bearing the ethnic name "Musticensiom," speaks of it as being at sume distance from the present course of the Mejerdah.
[E. B. J.]
MLsLlàjill (Tac. Ann. ii. 52, iv. 24: Maroúतauob, P'tul. iv. 3. § 24 ; Misulanii, Peat. Tab.), a Muorish tribe, whom Ptolemy (l. c.) places to the S. of Cirta, at the foot of Andum. Tacitus (l.c.) gives them a more westerly position. and describes the defeat of this powerful tribe under Tucfarinas, their leader.
[E. B. J.]
MUTENUM, a place in Upper Pamnonia, on the road from Vindobona to Celeia, and probably occupying the same site as the modern MuLon. (It. Ant. pp. 233, 266; Claver, 1'indel. 5.) [L. S.]

MU THUL, a river of Numidia, which, from its being in the division belonging to $A$ ilherbal, must be looked tor towards the E. of that country. (Saill. Jug. 48.)
[E. B. J.]
IU'TINA (Mivtivn, Strab.; Motivn, Pol.; Moútupo. Ptol.: Eth. Mutinensis: Modena), an important city of Gallia Cispadana, situated on the \in Aenilia, between Parma and Bunonia. It was 35 miles distant from the furmer, and 25 from the latter city. (Strab. v. p. 216; Itin. Ant. p. 127; Itin. Hier. p. 616.) It appears to have celtainly existed previous to the conquest of this part of Italy by the Romans, and was not improbably of Etrusean origin. Livy tells us, that the district or teritory in which it was situated, was taken from the Boians, and had previously belunged to the Etruscans (Liv. x.xxix. 55) ; bnt be does not mention the city. Nor do we know at what period the latter fell into the hands of the Rumans, thoogh it was probatly dyuing the Gaulish War

possession shortly after, at the comuneucement of the Secoml l'unic War, B. c. 218. It that period Mutina must have already been a considerable place and well fortified; as we are told that, when the sudden outbreak of the (iauls internupted the procedlings of the triumvirs who were appointed to found the new colony of Placentia, and compelled them to fly for safety, they took refuge within the walls of Mutina, which afforded them an effectual protection agaiust the arms of the barbanians. (Liv. xxi. 25,26 , xxvii. 21 ; 1'ol. iii. 40.) 1'olybius calls it at this period a Roman colony; but it seems probable that this is a mistake; for we have no account of its foundation as such, nor does Liry ever allude to Mutiua as a colony, where he expressly notices those of Cremoma and I'lacentia (xxvii. 10). But whether it had been fortified by the Romans, or was a regular walled city previnusly existing (in which case it must have been, like its neighbour Bononia, of Etruscan origin), we have no means of determining, though the latter supposition is perbaps the more prubable. In any case it continued to be held by the lomans not only during the Second l'unic War, but throughout the long wars which followed with the Cisalpine Gauls and Ligurians. (Liv, sxxy. 4, 6.) It was not till after the funal defeat of the Buians in B.c. 191, on which occasion they were deprived of a large portion of their lands, that the Romans determined to secure the newly acquired territory, by planting there the two columies of Parma and Alutina, which were accordingly established in b.c. 183. (liv. xxxix. 55.) They were both of them "colonise civium;" so that their inhabitants from the first enjoved the full riglits of Loman citizens: 2000 settlers were plarited in each, and these received 5 jugera each for their portion. (Liv. l. c.) The construction of the great military high road of the Via Aemilia a few years before, B.C. 187 (Liv. sxaix. 2), must have greatly facilitated the foundation of these new colonies, and became the clief source of their prosperity.

But shortly after its foundation Mlutina sustained a severe disaster. The Ligurians, who still occupied the leights and 'valleys of the Apennines bordering on the Buian territory, in B.c. $17 \%$ made a swdiden descent upon the new colony, and not only ravaged its territory, but actually made themselves masters of the town itself. This was, however, recovered with little diffloulty by the consul C. Claudius, 8000 of the Ligurians were put to the sword, and the colunists reeestablished in the possession of Mutioa. (Liv, sli. 14. 16.) For a considerable period after this, we do not again meet with its name in histury; but it appears that it must have disen rapilly to prosprity, and become one of the most flomishing of the towns along the line of the Yia Ambilia. Heace it bears a ennsfienans part in the Civil Wars. When Lepidus, atter the death of Sulla. H.C. 7R, raisel an insurection in Cisalpine Gial agains the senate, Mutina was alinost the only phace which was sble to offor any restistance to the arms of Pompeins, and was held agninst him by Brutus for a consuderable peniwl. (Plut. Pomp. 16.) But it was the siege which it sustained, a id the battles fonght in its meithtromblowd after the death of Caesar, n.e: 44 , that have robdered the mame of Matina chindly ewdebratol in history, and are reterred to by Suctenins wably the name of "Bellam Mutinense." (Suct. A uf/. 9.) On that occasion 1). Brutus, to whom the province of Cisalpine Gaul had bedh movtrze of no whet
hinsulf into Mutina with three legions and a large bouly of auxiliary troops. Here he was besieged by M1. Antonins with a numerous army ; but the senate having declared ngainst the latter, the two consuls, llirtius and $P^{2}$ ansa, as well as the young Oelavian, were despatched to the relief and succour of Brutus. (Jan. B.C. 43.) Antonius at this time occupied Bononia, as well as Parma and Regium, with his garrisons, while he hinself, with the bulk of his forces, maintained the siege, or rather blockate, of Mutina. Hirtius on his arrival seized on Clatema, while Octarian occnpied Forum Cornelii (Imola). From thence they advanced after considerable delays, tork possession of Bononia, and approached Mutina itself, but were unable to open commupications with Brutus. Meanwhile the other consul, C. Pansa, was advancing with a forec of 4 newly raised legions to their support, when he was attacked by Antonius, at a place called Forum Gallorum, about 8 iniles frons Mutina on the road to Bohodia. [Fonum (ialloricm.] A severe contest ensuol, in which Pansa mas mortally wounded; but the other cousul, Ilirtius, having fallen on Adtony's army in the rear, completely defcated it, and compelled him to retire to bis camp before Mutina. A secoud battle tuok place some days afterwards (April 27, B. . 43 ), under the walls of that city; in which Hirtius was slain; bat the forces of Antonius were acain worsted, and that general found himself compelied to abandou the siege (which had now lasted for above four months). and retire westward, with a view of crossiog the Alps. (Appian, B. C. iii. $49-51,61,65-72$; Dion Cass, xlvi. 35-38; Cic. al Fam. x. 11, 14, 30, 33, Fhil. v.-viii.; Vell. J'at. ii. 61: Suct. Aug. 10.)

Mutina was evidently at this period a flourishing and important towa, as well as strongly fortified. Cicero calls it "firmissima et splendidissima populi Romani colonia" (Phil. v. 9); and these praises are confimed by Appian (B. C: iii. 49), who calls it "a wealthy city," as well as by the fact, that it was calpable of supporting so large an army as that of Brutus for so long a time. Dlela, also, singles out Mutina, together with Bononia and l'atavium, as the mort opulent cities in this part of Italy. (Mela, ii, 4 . § 2.) The same inference may fairly be drawn from the circumstance, that it was at Mutina the mumerous body of senators who had accompaniced the emperor Otho from Rome, in A. D. 69, remained, whle Otho himself advanced to meet the generals of Vitellius, and where they very nearly fell victims to the animosity of the soldiery, on the first news of his defeat and death. (Tac. /hist. ii. $52-54$.) But with this exception, we meet with scarcely any mention of Mutina unker the Roman empire unfil a late periou, though the still extant ioscriptions attest thic fart of its contimued prosperity. Some of these give to the city the title of Colonia, as do also Mela and IPliny. (Mela, l. c., Plin. iii. 15. 5. 20; Cavedoni, Marmi Mouduesi, pp. 120, 165.) We leum also from Pliny and Strabo, that it was famous for the exectlence of the wool produced in its territory, as well as for its wine, and the city itself possessed considerable manufactures of cathenware, as well as woollen goods. (Strab, v. p. 218; Plin. siv. 3. s. 4, xxav. 12. s. 46, Colum. vii. 2. \& 3.)
10. A.11. 312, Mlution was taken by Constantine during his war with Maxentius, but appears to have syffered but little on this occasion. (Nazar. Paneg. $52 /$ Boing Cricusom the century, bowever, bath
the city and its lerritory had begun to feel severely the calamitics that were pressing apon the whole of this fertile and once flourishing tract of country. In A. D. 377 , the remains of the conquered tribe of the Taifali were settled, by order of the emperor Gratianus, in the coumtry around Mutina, Regium, and Parma (Amtn. Marc. xxxi. 9. § 4) - a plain indication that the population was already deficient; and St. Ambrose, writing not long after the same date, describes Mutina, Regium, and the other cities along the Aemilian Way, as in a state of ruin and decay, white their territories were uncultivated and desolate. (Ambros. Ep, 39.) The same district again suffered severely in A.D. 452, from the ravaces of Attila, who laid waste all the cities of Aenilia with fire and sword. (Ilist. Miscell. xv. p. 549.) They, however, survived all these calamities, from w'ich, nevertheless, Nutina appears to have suffered more severely than its ncighbours. Under the Lombard kings, it became the frontier city of their dominions towards the Esarchate; and though taken by the Greck emperor Mauricius in 590, it wat again annexed by Agilulphus to the Lombard kingdom of Italy. (Muratori, Antiq. Ital. vol. i. p. 63.) At this period it fell iuto a state of great decay. P. Diaconus, who mentions Bononia, Parina, and Regium as wealthy and flourishing cities, does not eren notice the name of Mutina (Hist. Lang. ii. 18); and a writer of the 10th century draws a lamentable picture of the condition to which it was reduced. The numerous streams which irrigated its territory having been then neglected, inundated the whole surrounding tracts; and the site of the city had become in great part a mere morass, in which the ruins that attested its ancient grandeur, were half buried in the mud and water. (Murat. Ant. vol. ii. pp. 154, 155.)
At a later period of the middle ages, Modena again rose to prosperity, and became, as it has ever since contioued, a flourishing and opulent city. But the truth of the description above cited is confirmed by the fact, that the remains of the ancient city are wholly buried muder the accumulations of alluvial soil on which the buildings of the modero city are founded, and are only brought to light from time to time by excavations. (Murat. l.e.) Large portions of the ruins were also employed at varinus periods, in the construction of the cathedral and other churches; and no remains of ancient buildings are now extant. But a valuable collection of sarcophagi and inscriptions, discovered at varions periods on the site of the modern city, is preserved in the mnseum. These have been fully illustrated by Cavedoni in bis Antichi Marmi Modenesi (8vo. Jodena, 1828), in which work the facts known concerning the ancient history of the city are well brought together.

Modena is situated between the river Sccchia, which flows abont 3 miles to the W. of the city, and the Panaro, about the same distance on the E. The latter is unquestionably the ancient Scultesna, a name wbich it still retains in the upper part of its conrse. The Secchin is probably the Gabellus of Pliny; but seems to have been also known in ancient times as the Secia; for the Jernsalem Jtinerary marks a station called Pons Secies, 5 miles from Nutina, where the Aemilian Way crossed this river. (Itin. IIier. p. 616.) The Apennines begin to rise abont 10 miles to the S. of the eity; and the ancient territory of Nutina seems to haye included a considerabie extent of these mountaine no rliay evtres
a prodigy which occurred "in agro Mutinensi," when two mountains were dashed against one another with great violence, so that they appeared to recoil again from the shock. ( 1 'lin. ii. 83. s. 85.) This phenomenon, which occurrel in B. c. 91 was doubtless the result of an eartliquake, and not, as has been sometimes supposed, of a volcanic outbreak.

nutuscae. [Thenula Mutusca.]
MUTICA. [Motyca.]
MUZA (Múşa, Arrian; Muṽoa and MoúŞa é $\mu \pi 0-$ piov, Ptol.), an important mercantile town on the Arabian coast of the Red Sea, not far north of the Straits of Bab-el-Mandel, in thie country of Elisari: placed by Ptolemy in lung. $74^{\circ} 30^{\prime}$, lat. $14^{\circ}$; or $30^{\prime}$ west, and $2^{\circ}$ north of Ocelis ('Oкn入ıs $\grave{\epsilon} \mu \pi$ тopiov) close to the straits. (Ptol, vii. 15. p. 152.) He states that its longest day is $12 \frac{1}{2}$ hours, that it is $\mathrm{I}^{\prime}$ east of Alexandria.and within the tropics (viii. Tab. vi. Asiae, p. 241); Pliny (vi. 23) names Blusa as the third port of Arabia Felix "quem Indica navigatio non petit, nec nisi turis odorumque Arabicorum mercatores." The author of the Periplus frequently alludes to it, and gives a full account of it and its trade. He describes it as situated in the southernnost gulf of this coast, a regular mart; inlabited altogether by Arab mariners and merchants, distant about 12,000 stadia from Berenice to the south, and 300 north of the straits. (Vincerit, Periplus, p. 296. n. 100; Gosselin, Recherches, qc. tome ii. pp. 265, 266.) It was not only an emperium of Indian merchan-dise-a manifest contradiction of Pliny's statement already cited - but had an export trade of its own. It was distant three days' journey from the city of Save ( इaín), which was situated inland, in the country of Maphoritis. It had no proper harbour, but a good roadstead, and a sandy anchorage. Its principal import trade was in tine and conmon purple cloth; Arab dresses with sleceves-probably the kemts - some plain and common, others embroidered with needlework and in gold; saffion ; ab aromatic plant, named cyperus (кїтєpos); fine linen; long robes-the abuis; quilts; striped girdes ; perfuues of a middling quality; specic in abundance; and small quantities of wine and grain, for the country grew lut little wheat, and more wine. To the king and tyrant were given horses, pack-mules, vessels of silver and brass, and costly raiment. Besides the above named articles of merchandise, which were cbiefly snpplied to its markets from Adule, on the opposite coast, the great eraporinm of •African produce [Adule], Musa exported a precious myrrh cf native growth, an aromatic gum, which the author
 alabaster ( $\lambda$ ́́joos). (Arrian, Peripl. ap. Invdson. Geogr. Min. vol. i. pp. 13, 14.) Vessels from this purt visited all the principal mercantile towns of the south coast of Arabia. Bueliart's identification of this Musa with the Mesha mentioned by Moses, as one extreme point of the Joktanite Arals,- Sephar being the other (Gen. x. 30),-is thought by Mr. Forster to be untenable, on account of the narrow limits to which it would confine this large and important race; for the site of Sephar is clearly ascertained. [Maphoritae; Saphobitae.] (Geogr:of A rubia, vol. i. pp. 93, 94.) M. Gosselin (Rercherches, qc. tome ii. p. 89) asserts that this once most cele. brated and frequented port of Yemen is nuw more than six leagnes from the sea, and is replacel as a purt by . Mokha, the foundation of which dates back no mole than $400 /$ cearc (Nubaift Vagnge en Arabie,
tome i. p. 349); as indeed he mantaim, that some of the maritime towns of the coast of IHeljuz and Firaten date more than 400 or 500 years from their foundation, and that the towns whose walls were onee washed by the waters of the gulf, and which owed their existence to their vicinity to the sea, have disappeared since its retirement, with the exception of those whose soil was suthiciontly fertile to maintain their inhabitants. In a samdy and arid commery these were necessarily few, so that there are not more than six or seven that cim be clarly identified with ancient sites. Among these Mfusa still ceists umber its ancient name unchanged (1h. pp. $2: 38,239,284$ ) at the required distance from the Straits of Bab-clMandel, viza 300 stadia, reckouingt 500 stadia to a derree. (lb. pp. 269, 2\%0.) Vincent makes it shant of 40 miles. (P'riphus, p. 319.) In the middle ages when the sea hal already retired from Musa, another town naned Mosek or Mausidj was built as a seaport in its stead, which seens to have usurped the name of the more ancient town, and to lare been mistaken for it by some reographers. This Mosek still exists, in its turn abandoned by the sea; but about $25^{\prime}$ north of the true position of Musa. (16. p. 270.) "The mart of Yemen at the present day is Mokha. $\qquad$ Twenty miles inland from Mokha Nibbular discovered a Moosa still existing, which he with great probubility supposes to be the anciont mart, now carried inland to this distance by the recession of the coast." (Vincent, l. c. p. 31.5.) There is a circumstance mentioned by Brtuce of the roadstead of Mokke, which coincides with a statement cited fron Arrian with rerard to Muza. Bruce says that " the cables do not rub, beeause the botton is sand, while it is coral in almost every other port." (1h. p. 313. n. 142.) Bhonse itself Niebuhr formd to be $6 \frac{1}{2}$ hours $=4 \frac{1}{2}$ (iernman miles, due eust of Mokka, at the commencement of the momtain country, the intervening space being extremely dry and thinly peopled, It is an ordinary villase, badly built, only recommended by its water, wheh is drunk by the wealthier inhabitants of Moklot. (loyjage en drabie, tume i. pp. 296, 297; Description de $[$ ATrabie, 1p. 194. 195.)

alUZIRIS (Mousipis, Peripl. M. Eryfhr: c. 54, p. 297, ap. Geugr. (irmec. Min. ed. Mitller,'1855), a pront on the went eoavt of IIindostin, situated between Tyndis and Neleynda, and at the distance of 500 stadia from either, where, according to the author of the Periplos, ships came from Ariaca and Grecee (that is, Alesambria), Ptoleny ealls it an emporium (vii. 1. §s), and places it in Limyrica. There can le little dotbt that it is the place whieh is now called Mangutom, and wheh is still a considerable port. [V.]
MY'CAl.E (Musid $\eta$ ) , the westernmost branch of M1. Mesugis in: Ledin; it forms a hizh ridge and terminates in a promontry celled Trocylimm, now eape $S$. Maria. It rum ont into the vea just ojposite the island of Samos, from whid it is separated omly by a narrow chantid sevent stadia in breadth. It was in this clamel, and on the mainland at the foot of Shunt Myeale, that the I'ersians were deteated, in B. 5.479 . It is probable that at the fout of Motnt Myeale there was a tumn called Myeale or Myeallessus, for Stuphams Byz. (o.e.) and Scylax (p. 37) speak of a town of Myeale in Caria or L.ylia. The whole range of Minnt Mrale now bears the name of Simusum. (1lum, fi. ii. 869 ;

Strah. : in. Pp. 621, 629; Ptol. v. 2.§ 13; Agathem. P. 3.) [L. S.]
 alos), an ancient town of Bocotia, mentioned by Homer. (fl. ii. 498, Ilymun. Apoll. 224.) It was said to have been so called, because the cow, which was guiding Cadnus and his conrales to Tluebes,
 §. 4.) In n. ©. 413, some Thracians, whom the Athonins were sending home to their own country, were latuled on the Euripus, and surprised Mtycalessus. They not only sacked the town, but put all the inhabitaits to the sword, not spating even the women and children. Thucydides xays that this was one of the greatest calamities that had ever befallen any city. (Thue, vii. 29 ; Paus, i, 23. § 3.) Strabu (ix. p. 404) calls Mycalessus a village in the territory of Tamura, and places it upon the road from Thebes to Chalcis. In the time of Pausanias it had ceased to exist: and this writer saw the rnins of Harma and Mycalessus on his road to Chalcis. (Patus, ix. 19. §4.) Pausanias mentions a temple of Demeter Mycalessia, stauding in the territury of the city upon the sea-coast, and situated to the right of the Euripus, by which he evidently meant south of the strait. The only other indication of the position of 3lycalessus is the statement of Thneydides (l.c.), that it was 16 stadia distant from the Hermaeum, which was on the sea-shore near the Eimipus, It is evident from these accounts, that Mycalessus stood near the Euripus; and Leake piaces it. with great probability, upon the height immediately abuve the southern bay of E'gripo, where the ruined walls of an ancient city still remain. (Vorthern Greece, vol. ii. pp. 249, seq, 264.) It is true, as Leake rema ks, that this position dnes not agree with the statement of Strabo, that Mycalcssus was on the road from Thebes to Chalcis, since the above-mentioned ruins are nearly two miles to the right of that road: but Strabo writes lonsely of places which he had never seen. Mycalessus is also mentioned in Strab. is. pp. 405, 410 : Pans. iv. 7. s. 12.

MYCE'NAE, a town in Crete, the foundation of which was attributed by an historian of the Augustan age (Vell. I'aterc. i. 1) to Agamemnon.

Harduin (ad Plin. iv. 12) proposed to read Mycenae for Myniva, which is mentioned as a city of Crete in the text of Pliny (l.c.). Sieber (Reise, wi. ii. p. 280) believed that he had discovered the remains of this city at a place called Maca or W/asis, on the river Armyro. (Höck, Kreta, vol. i. p. 435.)
[E. 13. J.]
DICENAE, sometimes MYCE'NE (Muкipal; Muкìvך, Honn. Il.iv. 52 : Eth. Muкクvaĭos, Mycenaens, Mycenensis: Kharriti), one of the most ancient towns in Greece, and celebrated as the residence of Agamemon. It is situated at the north-eastern extremity of the phain of Argos upon a rugged height, which is shat in by two commanding summits of the range of montains which border this side of the Argeian plain. From its retired position it is deserilbed by llomer (Od. iii. 2G3) as situated in a recess ( $\mu \nu \times \hat{\mathrm{y}})$ of the Argeian land, which is supposed by some modern writers to be the origin of the name. The ancients, however, derived the name from an eponymous heroine Mycene, danghter of Inachus, or from the word $\mu$ v́kys, for which various reasons were assi_nel. (Paus. ii. 17. \& 3 ; Steph. 13. s. v.) The pasilion was ons of "yeat importance. In the first

geian plain, which spread out under its walls towards the west and south; and secondly the most important roads from the Corinthian gulf, the roads from Pblius, Nemea, Cleonae, nud Corinth, unite in the monntains above Mycenac, and pass onder the beight upon which the city stands. It was said to have been huilt by Perseus (Strab. viii. p. 377 ; Pans. ii. 15. § 4, ii. 16. §3), and its massive walls were believed to have been the work of tbe Cyclopes. Hence Luripides calls Mycenae пó入л $\sigma \mu \alpha$ Пє $\rho \sigma \dot{\epsilon} \omega s$, Kuк $\lambda \omega$ $\pi i \omega \nu \pi \dot{\delta}$ the favourite residence of the Pelopidae, and under Agamemmon was regarded as the first city in Greece. Hence it is called $\pi 0 \lambda \dot{u}$ Xovoros by Homer (Il. vii. 180, xi. 46), who also gives it the epithets of ejpvá (Il. iv. 52) and єن̇к $\tau \dot{f} \mu \in \nu 0 \nu \pi \tau o \lambda i \in \theta \rho o \nu \quad$ (Il. ii. 569). Its greatness belongs only to the beroic age, and it cenzed to be a place of importance after the return of the lleracleidae and the settlement of the Dorians in Argos, which then became the first city in the plain. Mycense, however, maintained its independence, and sent some of its citizens to the assistance of the Greeks against the host of Xerxes, although the Argives kept aloof from the common cause. Eighty Mycenaeans were present at Thermopylae (Herod. vii. 202) , and 400 of their citizens and of the Tirynthians fonght at Plataeae (Herod. is. 28). In n.c. 468 , the Dorians of Argos, resolving to bring the whole district under their sway, laid siege to Mycenae; bnt the massive walls resisted all their attacks, and they were obliged to have recourse to a blockade. Famine at length compelled the inhabitants to abandon the city; more than half of them
took refuge in Macedonia, and the remainder in Cleonae and Ceryncia. (Dicd. xi. 65; Strab. viii. pp. $372,37 \overline{7}:$ l’us. ii. 16. §5, v. 23. § 3, vii, 25. §3, viii. 27. §1.) From this time Mycenae remained uninhabited, for the Argives took care that this strong fortress should remain denolate. Strabo, however, committed a gross exacgeration in saying tiat there was not a vestige of Mycenae extant in his tine (viii p. 372). The ruins were visited by Pausanias, who gives the following account of them (ii. 15, 16):-" leturaing to the pass of the Tretus, and fillowing the rond to Argos, you have the roins of Mycenae on the left hand. Seteral parts of the encloswe remain, and among them is the gate upon which the lions stand. These also are said to be the work of the Cyclopes, who built the walls of Tiryns for Proetus. Among the rains of the city there is a fountain named Perseia, and subterraneous buildings (ímo $\alpha$ aía oikoбо $\mu \hat{\eta} \mu a \tau a$ ) of Atreus and his sons, in which their treasures were deposited. There are likemise the tombs of Atreus, of his chanioteer Earymedon, of Electra, and a sepulchre in comnoon of Teledamas and Pelops, who are said to have been twin sons of Cassandra. But Clytaemnestra and Aegisthus were bwied at a little distance from the walls, being thought anworthy of burial where Agamemnon lay."
The ruins of Mycenae are still very extensive, and, with the exception of those of Tiryns, are more ancient than those of any other city in Greece. They belong to a period long antecedent to all historical records, and may be regarded as the genuine relies of the heroic age.

PLIN OF THE RULNS OF MYCENAE.

Mycenae consisted of an Acropolis and a lower town, each defended by a wall. The Aeropolis was situated on the sumnit of a steep hill, projecting from a higher mountain behind it. The lower town lay on the south-western slope of the hill, on either silk of which runs a torrent from east to west.

of which the base fronts the south-west, and the apex the east. (on the southeru side the cliffs are almost precipitous, overhanging a deep gorge; but on the northern side the descent is less steep and rugsed. The suminit of the lill is rather more than 1000 feet in length, and swound the edge the ruived
eait, with the exenpition of a small oper space .atuve the precipitons claf on the sunthern side, which perhaps was neter dutembed by a wall. The walls are nore perfect than thove of any other fortress in Greece; in some places they are 15 or 20 feet high. They are built of the dark-coloured limestone of the surrounding monntains. Some parts of the wall are built, like those of Tiryns, of hage blocks of stome of irregular shaje, no attempt being made to fit them into one anuther, and the gaps being filled up with smaller stones. But the greater part of the walls consists of polygonal stones, skilfully hewn and fitted to one another, and their faces cut so as to give the masonry a smooth appeurance. The walls also present, in a few pats, a third species of masoary, in which the stones are constructed of blocks of nearly quadrangular shape; this is the case in the approach to the Gate of Lions. This difference in the masonry of the walls has been held to prove that they were constructed at different ages; but more recent investigations amidst the ruins of Greece and Italy has shown that this difference in the style of masonry cannot be regarded as a decisive test of the comparative antiquity of walls; and Col. Mare has justly remarked that, as there can be no reasonable doubt that the approach to the tiate of Lions is of the same remote antiquity as the remainder of the falric, it would appear to have heen the custom with these primitive builders to pay a little more attention to symmetry and regnlarity is the more ornamental portions of their work.

The chief gate of the Acropolis is at the NW. angle of the wall. It stands at right angles to the aljoiaing wall of the fortress, and is approached by a passare 50 feet long and 30 wide, forned by that wall and by another wall exterior to it. The ofening of the gateway widens from the top domowards; bat
at least two-thinds of its height are now buried in ruins. The width at the top of the door is $9 \frac{1}{2}$ feeto This door was formed of two massive uprights, covered with a third block, 15 feet long, 4 feet wide, and 6 fect 7 inches high in the middle, but diminishing at the two ends. Above this block is a triancular gap, in the masonry of the wall, formed by an oblique approximation of the side courses of stone, continued from each extremity of the liatel to as aper above its ceatre. The racaut space is occupied by a bluck of stone, 10 feet ligh, 12 broad, and 2 thick, upon the face of which are sculptured two lions in low relief, standing on their hind-legs, upoa either side of a covered pillar, upon which they rest their fore-fect. The colums becomes broader towards the top, and is surmouated with a capital, formed of a row of four circles, eaclosed between two parallel fillets. The beads of the animals are gone, tugether with the apex of the cone that surmonated the column. The block of stone, from which the lions are sculptored, is said by Leake and other accurate observers to be a kind of green basalt; but this appears to he a mistake. We learn from Mure (Tour in Gireece, vol. ii. p. 324) that the block is of the same palombino, or dove-coloured limestone, of which the native rock mainly consists, and that the erroneous impression has been derived from the colvar of the polished surface, which has received froas time and the weather a blueish groen hue. The columin between the lions is the castomary symbol of A pollo Agyieus, the protector of doors and gates. (Mitiller, Dor, ii. 6. § 5.) This is also proved hy the invozation of Apollo in the Agamemnon of Amschylus (1078, 1083, 1271), and the Electra of Suphocles ( 1374 ), in both of which tragedies the scene is laid in front of this gate.

GATE OF TIE LIONS AT MYCENAE.

It has heen whil ohs rved that this pair of lions stands to the art of Cirrece somerrhat in the same relation as the Hiad and the Odyssey to her literature; the one, the only extant specimens of the plastic skill of her mythical era, the other, the only genviae memorials of its chivalry and its song. The best observers remark that the animals are in a style of art peculiar to themselves, and that they have littic or nothing of that dry linear stiffness which characterises the earlier stages of the art of senlptnre in almost every country fuad profont conviqunty is
little resemblance to the Archaic style of the Hellenis: works of a later period as to those of Egypt itself. "The special peenliarities of their execution are $n$ certan solidity and rotundity amomatiag to clumsiness in the limbs, as compared with the bollies. The hind-legs, indeed, are more like those of elephants than lions; the thighs, especially, are of immense bulk and thickness. This unfarourable feature, however, is compensated by much matural ease and dignity of attitude. The turniag If the pily wult thouthers is admirable, combiniag
slrength with elegance in the happiest proportions. The bellies of both are slender in comparison with the rest of the figure, especially of the one on the rigbt of the beholder. The muscles, sinews, and joints, though little detailed, are indicated with much spirit. The finish, both in a mechanical and artistical point of view, is excellent; and in passing the hand over the surface, one is struck with the smooth and easy blendiog of the masses in every portion of the figure." (Mure, vol. ii. p. 17I.)

Besides the great Gate of Lions, there was a smaller gate or postern on the northern side of the Acropolis, the approach to which was fortified in the same mauner as that leading to the great gate. It is constructed of three great stones, and is 5 feet 4 inches wide at the top.

Near the Gate of Lions the wall of the lower city may be traced, extending from N. to S. In the lower town are four subterraneous buildings, which are evidently the same as those described by Pausanias, in wbich the Atreidae deposited their treasures. Of these the largest, called by the learned the "Treasnry of Atreus," and by the Greek ciceroni the "Grave of Agamemnon," is situated under the aqueduct which now conveys the water from the strean on the northern side of the Acropolis to the village of Kharevili. (See Plan, C.) This building is in nearly a perfect state of preservation. It is approached by a passage now in rains, and contains two chambers. The passage leads into a large chamber of a conical form, about 50 feet in width and 40 in height; and in this chamber there is a doorway leading into a small interior apartment. The gronnd-plan and a section of the building are figured in the Dict. of Antiq. p. I127. The doorway terminsting the passage, which leads into the large cbamber, is 8 feet 6 inches wide at the top, widening a little from thence to the bottom. "On the outside before each door-post stood a semi-colomn, having n base aod capital not unlike the Tuscan order in profile, but enriched with a very elegant sculptured oroament, chiefly in a zigzag form, which was continued in vertical compartments over the whole shaft. Those ornaments have not the smallest resemblance to anything else found in Greece, but they bave some similitude to the Persepolitan style of sculpture." (Leake, Morea, vol. ï. p. 374.) There are remains of a second subterraneous building near the Gate of Lions (Plan, D); and those of the two others are lower down the bill towards the west.

There has heen considerable discussion among modern scholars respecting the purpose of those subterraneous bnildings. The statement of Pausanias, that they were the treasnries of the Atreidae, was generally accepted, till Mare published an essay in the Rhe inisches Aluseum for 1839 (vol. vi. p. 240 ), in which he endeavoured to establish that all such buildings were the family vaults of the ancient berves by whom they were constructed. In the great edifice at Mlycenae he supposes the inner apartment to have been the burisl-place, and the onter rault the heroum or sanctoary of the deceased. This opinion has been adopted by most modern scholars, but bas been combated by Leake, who adheres to the anciect doctrine. (Peloponnesiuca, p. 256.) The two opiniuns may, however, lie to some extent reconciled by supposing that the inner chamber was the burisl-place, and that the outer contained the arms, jewels, atd other ornaments most prized by the decensed. It was the practice among the Greeks in all agea for the dead to carry with them to, their tombs
a portion of their property; and in the heroic ages the burial-places of the powerful rulers of Mycenae moy have been adorned with such splendour that the name of Treasuries was given to their tombs. There is, indeed, good reason for believing, from the remains of brazen mails found in the large charnber of the "Treasury of Atreus," that the interior surface of the chamber was covered with brazen plates.

At the foot of the lower town stands the modern village of Kharrúti. (Leake, Morea, vol. ii. p. 365, seq.; Mlare, Tour in Grecce, vol, ii. p. 163, seq.; Curtius, Peloponnesos, vol. ii. p. 400, seq.)

MYCE'NI. [MaUhetania.]
MYCHUS. [Belis.]
MY'CONUS (Múroyos: Eth. Muкónzas: Mijkono), a small island in the Acgacan sea, lying E. of Delos, and N. of Naxos. Pliny says (iv. 12. s. 22) that it is 15 miles from Delos, which is mach greater than the real distance; but Scylax (p. 55) more correctly describes it as 40 stadia from Rheneia, the island W. of Delos. Myconns is nbout 10 miles in length, and 6 in it: greatest breadth. It is in most parts a barren rock, whence Ovid gives it the epithet of humilis (Met. vii. 463); and the inhabitants had in antiquity a bad reputation on account of their ararice and meanness (Athen, i. p. 7 ; bence the proverb Mukóvios $\gamma$ єícuv, Zenob. Prov. v. 21; Suidas, Hesch., Phot.). The rocks of Myconus are granite, and the sommits of the hills are strewn with immense blocks of this stone. This circanistance probably gave rise to the fable that the giants subdued by Hercules lay under Myconus; whence came the proverb, " to pat all things under Myconas," applied to those who ranged under one class things naturally separate. (Strab. x. p. 487 ; Steph. B. s. v.) The tomb of the Locrian Ajax was also shown at गlyconus. (Tzetz. ad Lycophr. 401.) Of the history of the island we bave no acconnt, escept the statement that it was colonised from Athens, by the Nelide Hippocles. (Zenob. v. 17; Schol. ad Dionys. Per. ap. Geogr. Min, vol. iv. p. 37, Hndson.) Myconus is mentioned incidentally by Herodotus (vi. 118) and Thucydides (iii. 29). Ancient writers relate, as one of the peculiarities of Myconus, that the inbabitants lost their bair at an early age. (Strab. l. c.; Plin. xi. 37. 9. 47; "Myconi calva omnis juventus," Donat. ad Ter. Hecyr. iii. 4. 19.) The bighest mountain, which is in the nortbern part of the island, has a summit with two peaks, whence it is called Dimastus by Pliny (iv. 12. s, 22). The promontory of Phonima (\$op6ia, Ptol, iii. 15. § 29) Was probably on the eastern side of the islaud. Scylax mentions two cities (Múkovos, aĩ̌ך ठimodis, p. 22). Of these one called Myconns occupied the site of the modern town, which presents, however, scarcely any ancient remains. The name and position of the other town are unknown. The coins of Myconus are rare; and in general very few remains of antiquity are found in any part of the island. (Ross, Reisen auf den Griechischen Inseln, vol. ii. p. 28 , seq.)

MY'GDONES (Mú $\boldsymbol{Y}^{\delta} 0 \nu \in s$ ), a tribe dwelling in Bithynia, about the river Odrysses and the coast of the Propontis, but extending into Mysia, where they ocenpied the district about Monnt Olympas and lake Dascylitis. They bad immigrated ioto Asia Minor from Thrace, but were afterwards subdued or expelled by the Bithynians. (Strab. vii. p. 295, xii. pp. 564, 575.) The district inhabited by them was called Mygdunia. (Strab. xii. pp. 550, 558, 576;

MYGDON1A (Murionvia: Eth. Múrôoves, Strat B.), a district of Nacelowia, wl: ho comprehew ios. the plains rented Thewal nica, tesether with the valleys of K/isald and Bestkia, extending towards the E. as far as the Axius (11 rol, vii. 123), and Encluding the Lake B. Whe to the E. (Thec, i. 58.) Ti, the N. it was jwined by Cre-t niat, for the E fhiditus. which flasel into the gulf near the marshes of the Asins, hal its sumrees in Crestonia (1lerud. vii. 124). While the puss of Aul m or Arethusa was prolably the bonodary of Myedonia towards Bisaltia. The maritiane part of Myed nia furmed a district called Amphasitiv, a distinetion which fint ace ans in Polytinte (v. 98), who divides all the great phain at the head of the Thermaic gulf into Amphaxitis anl Bostisel, and which is found three rentaries later in l'tolemy (iii. 13. § 36). The hater intrudu es Amphasitis twice puder the subdivisions of Maced, miis, $\rightarrow$ in oue instance placing: mider that name the muths of the E hiflorns and Asius, with Thessal wica as the only town, which agrees with Pulsbias and particul.rly with strabo (vii. p. 330). In the other lace, Ptoleny includeStacma and Arethusa in Amplaxitis, which, if it he correct. would indicate that a portion of Ams Whasitis, very distant from the Axius, was separated from the remainder by a part of Myzdonia; but as this is improbable, the word is perhaps an error in the test. The orizinal inhabitants, the Mysdonians. were a tribe belonzing to the great Thracian race, and were powerfil enongh to be jueath their name to it, even after the Macedonian con puest. (Thace, ii. 99.) The cities of this district were Thess. nonica. Sisdes, Chalistea, Altyes, Strepsa. Cinses, Mrlinckges, Heraclecstes. Beides these, the fillowing nbscure towns orecur in Ptolemy (l. c.): - © aretae, Muryllos, Antigoreia. Calindaea, Boerns. $1^{\prime \prime}$ y-ca. Trepillas.Carabia, Nyl pollis, Assorus, L.pte, Plifleas. As to the $t$ was wui lh ocenped the fer il phain betweea Mt. Cissis and the Asins, their propulation was nu doubt absorbex by Thessalonest, on its fomblation by Cassander, and rethains of them are not likely to be found: nor are the andicat references sutf ' int to indicate their sites. One of these would semo, from ancient in-ciptims which wete foom at $K$ lefrit, to have stood in that paitim, and others Ir batiy occupied similar praitions on the last falls if the heights whinh esterd nearly fo in Kiuationt to the Axins. One in particular is inflicuted by sume laree "tumeli" or barraws.situatel at two. thich of that distance. (Leake, North. Grecce. vill. i.i. 1. 4 +5.)

the river Longanns, on the banks of which the action was faught, cannot be identified with certainty. [Longanes.]

It is probable that, even after the Roman conquest of sicily, Mylae continned to be a dependency of Messana, as long as that city eajoyed its privileged condition as a "foederata civitas:" henee no meation is found of its name in the Verrine orations of Cicero; but in the time of Pliny it had acquired the ordinary municipal privileges of the Sicilian towas. (Plin, iii. 8. s. 14; Ptol. iii. 4. § 2.) It never, however, seems to have been a place of importance, and was at this perioal wholly eclipsed by the neighbouring colony of Tyndaris. But the streagth of its position as a fortress caused it in the middle ages to be an object of atteation to the Norman kings of Sicily, as well as to the enaperor Frederic II.; and thougb now much neglected, it is still a military position of importtance. The modern city of Mriazzo is a tolerably flourishiog place, with about 8000 inlabitants; it is built for the most part on a low sandy neck of land, connecting the peninsula, which is bold and rocky, nith the mainland. But the old town, which probably occupied the same site with the ancient city, stood on a rocky hill, forming the first rise of the rocky ridge that constitutes the peninsula or beadland of Copo di Milazzo. The modern castle on a hill of greater elevation, commanding both the upper and lower town, is probably the site of the ancient Acropolis. (Thuc. iii. 90; Smyth's Sicily, pp. 103, 104; Hoare's Classical Tour, wol. ii. p. 215.)

The promontory of Mylae, stretching out abruptly into the sea. forms the western boundary of a bay of considerable extent, affording excellent anchorace. This bay was memorable in aocient history as the socee of two great naval actions. The first of these was the victory obtained by the Roman fleet under C. Duillins, over that of the Carthaginians in the First Punic War, b. c. 260, in which the Roman consul, by means of the engines called Corvi (then used for the first time), totally defeated the enemy's fleet, and took fifty of their slips. (Pol. i. 23.) More than two centories later, it was in the same bay that Agrippa, who commaoded the fleet of Octavian, defeated that of Sextus Pompeius, в. c. 36. Agrippa advanced from the island of Hiera, where his fleet had been before stationed, while the ships of Pompey lined the shores of the bay of Mylae. After their defeat they took refuge at the months of the nomeruss small rivers, or rather mountain torrents, which bere descend into the sea. After this battle, Agrippa made himself master of Mylae as well as Tyadaris; and some time afterwards again defeated the fleet of l'ompeins in a second and more decisive action, betweca Mylae and a place called Naulochus. The latter name is otherwise unknown, but it seems to have been situated somewhere in the neighbourhood of Cape Rasoculmo, the Phalacrian promontory of Ittoleny. (Appian, B. C. v. 195-109, 115-122; Dion Cass. xlix. 2-11; Vell. Pat. ii. 79; suet. Aug. 16.)

In the acconnt of this campaign Appian speaks of a small town named Artemisions, which is noticed also by Dion Cassias, and must have been situated a little to the E. of Mylae, but is not mentioned by any of the geographers. (Appian, B. C. v. 116 ; Oion Cass. alix. 8.) It is, however, obviously the ame place alluded to by silius Italicus as the " sedes Facelina Diante" (Sil. Ital. xiv. 260), and alled by Lucilims, in a tragment of bis satires, - Facelitis templa Dianae." (Ludy Sal. Mis 33.

Vibius Sequester also mentions a river which he calls Phacelenes, and describes as "juxta Peloridera, confinis teaplo Diamae." (Vib. Seq. p. 16.) It is, however, obvious, from Appian, that the temple was not situated in the neighbourhood of l'elorus, but at a short distance from Mylae, though the precise site cannut be determined. It was designated by popular tradition as the spot where tho sacred cattle of the Sun had been kept, and were slaughtered by the companious of Elysses. (Appian, l. c.; Plin. ii. 98. s. 101.) The Mons Thorax, mentioned by Diodorus in lis account of the battle of the Longanus (Diod. xxii. 13), must have been one of the aaderfalls of the Neptunian Monstains, which throughout this part of Sicily descend close to the sea-shore; but the particular monitain meant is wholly uncertain.
[E. H. B.]
MYLAE. Pliny (iv. 12) speaks of two islands of this name, lying off the coast of Crete. They belonged to the group of three islands off Pbalasarna (Kutri), called by the Anonymous Conast-describer Jusagora, Mrse, Myle (Stadiasm). Petalithe is the name of the northernmost of the three little islands; the second, opposite to which is Kerusi, is called Megolonesi, ia spite of its very moderate size; and the third Prosonesi. (Pashley, Trav. vol. ii. p. 61.)
[E. B. J.]
MYLAE (Mu入ai: Eth. Moגaîos), a town of Perrhaehia in Thessaly, taken by Perseus in в. c. 171. (Liv. xlii. 54; Steph. B. s. v.) As Livy describes it as a strong place near Cyretiae, it is placed by Leake at Dhamcisi, "which is not only strong ia itself, but very inportant, as commanding the pass of the Titaresius, leading into Perrhaebia from the Pelasgiutis." (Vorthern Greece, vol. iv. p. 311.)

MYLAS, or MYLE (Módas), a promontory on the coast of Cilicia, between cape Aphrodisias in the west and cape Sarpedon in the east. On or close to it was a small town of the same name (Plin. 5. 22 ; Stadiasm. Mar. Mag. $\S \$ 165,166$.) As the Stadiasmus calls Mylas a cape and cbersonese, Leake (Asia Minor, p. 205) is inclined to identify it with cape Coculiere, which answers exactly to tbat description.
[L. S.]
MILASSA or MILASA ( $\tau \dot{\alpha}$ Múлaб白a, or Mú$\lambda \alpha \sigma \alpha$ : Eth. Moخareús), the most important tomn of Caria, was situated in a fertile plain, in the west of the country. at the foot of a moustain, abounding in beautiful white marble, of which its buildings and temples were coustructed. Hence the city was exceedingly beautiful on account of its white marble templesand perticoes, and many wondered that so fine a city was built at the foot of a steep overbanging monntain. The two most splendid temples in the city were tbose of Zeus Osogos and Zeus Labrandenos, the latter of which stood in the neighbonring village of Lathranda, on a hill, and was connected with the city by a road called the sacred, 60 stadia in length, along which the processions nsed to go to the temple. The principal eitizens of Mylassa were invested with the office of priests of Zeus for life. The city was very ancient, and is said to have been the birthplace and residence of the Carian kings before Halicarnassus was raised to the rank of a capital. Its nearest point on the coast was Physeus, at a distance of 80 stadia, which was the port of Mylassa; though Stephanns B. calls Passala its port-town. (Strab. xir. p. 658, \&.c.; Acschyl, Fragm. 48, where it is called Mylas ; Steph. B. s. v. ; Herod. i. 1i1. 1'tolnv, 2. § 20 ; Pline). 29; I'aus. viii. 10.

## MYONNESUS.

anecdote preservel in Athenaens (viii. p. 348) of the witty musi ian stratunicus, who, on coming to Mylassa, and observing its mauy temples, but fess inhabitunts, placed liunself in the middle of the market-place, and exclaimed, "Hear me", oh ye temiles." As to the history of this city, we know that Philip of Macrdonia, the son of Demetrius, endeavoured in wain to olstan jnseession of it ; and it was probably to reward the place for its opposition to bim that the Pomans, alter the war with Antiochus, declared its citizens free (Polyh. xvi. 24, asii. 27; Liv. xxsviii. 39). In a petty war with the neighbouring Euromians, the Mtylasans were victorious, and towk sone of their towns; but were afterwarls compelled to submat to the Rhodians (Polyb. xxx. 5; Lix, xlw. 25.) In the time of Strabi, the town appears to have been still flourishing, and two eminent orators, Euthydemus and Hybreas, excretised considerable influence over their fellowritizens. Ilybreas, lawever, incursed the enmity of Labienus, his political whersary, whose pretensions he trield to resist. But lie was obliged to take refuge in Rholes; whereupon Labienus marebed with an army against Mylassa, and did grent damage to the town. (Strab. xir. p. G60.) It is mentioned, however, is late as the time of Hierocles (p. 188). It is generally admitted that the site of the ancient Mylassa is marked by the modern Mi lasso or Melussa, where considerable ancient remains have been observed by travellers. A temple, erectal by the perple of Atylissa in honour of Augustus and Rama, considerable ruins of which had existed until modern times, was llestroyed about the middle of lat century by the Turks, who built a netw manne wils the materials (Pocock ${ }^{\text {. Tracels, tom. ii. p. 2. c. 6.) (handler }}$ (.Asia Minor, 1 . 234 ) saw benenth the hill, on the cost side of the torn, an arch or gateway of marble, of the Curinthiom uriter; a broal mant to parement, with restiges of a theatre ; and round the town ranges of columns, the reunains of porticses. (Comp. Leake, Isia Wiume, p. 230; Fellows, Jowral of an Exce. 1. 260, Diseore rits in L.jcius, p. 67, who saw many atheirnt remains scattered abont the phace: Rasche, Lex. S'un, iii. 1. p. 999, ©<.)
[I. S.]

+ OIN OF MYI.AGSA.
MJSDU's (Múpoos: Fth, Múróos), a Dorian eulony of Truezen, on the comst of Caria, situated on the bortherment of the tlaree Derian peninsulas, as fow miles to the num thwest of Halivarnassus. It was funtectal ly stront walls, and bat a gend harbour. (Iras, ii, 3i). Ş, Siral, xiv, j. 658; Arrim, A nab. i. 20, ii. 5) But otherwise the phace is not of tumela ionmane in ancient listory. Buth I'liny (x. 29) and se flatur 1ya (x.r.) mention l'alaemyndus as a phare ulace by Myndus: and this I'a-
 the Carime which bevane deerted after the estatidhonent of the Dheian Mynder. (Comy, Strol), xiii. 1. 611.) Dwa (i. 16i) and Pliny (I.c.) aloo speak if a phace called Ne:pula in the same \}"ninsula; and ( ni) other antlion mention suth a plate in that [int of the combiry it las bewn sify Nel that

same place. Tut it onght to be remernbered that Pliny mentions buth Myndus and Neapolis as two different towns. Myndian ships are mentioned in the expedition of Anaxazoras azainst Naxos. (1lerod. v. 33.) At a later time, when Alexander besieged Halicarnassus, he was anxions first to muke himself master of Myndus; but when he attempted to take it by surprise, the Myndians, witb the aid of reinforcements from 1lalicarnasus repuised him with some luss. (Airian, l.c.; comp. Ilecat. Fragm. 229; Polyb. xvi. 15. 21 ; Scylas, p. 38: Ptol, v. 2. § 9 ; Liv, xxsvii. 15 ; Hierocl. p. 687 .) Athenaeus (i. 32) slates that the wine grown in the district of Myndus was goud for dizestion. It is generally beliped that Montesha or Muntesha marks the site of Myndus; but Col. Leake (Asia Minor, p. 228) identifies Myndus with the smali sheltered port of Gumishlu, where Captain Beatafirt remarked the remains of an ancient pier at the entrance of the port, and sonie ruins at the loend of the bay. (Comp, Rasehe, Lex. Niom. iii. 1. P. 1(K)2, Sce.; Eckluel, Doctr. Num. vol. ii. pt. i. p. 585. )
Ptolemy (v. 2. \& 30) mentions a small island called Myndus in the Icarian Sea.
[L. S.]

COIN OF MYNDES.
MIONIA or MYON (Muovia, Patas. ; Múw, Steph. B.: Eth. Muoyeus, I'aus., Thuc.), a town of the Locri O/wlar, situated on the most difficult of the pesses leadiue from Actolia into Loeris. (Thne. iii. 101.) Pansanias describes it as a small town ( $\pi \delta \lambda, \sigma \mu \alpha)$ ) sitnated upon a hill 30 stadia from Am$p^{\text {hissa inland, containing a gruve and an altar of the }}$ trods called Meilichii, and above the town a temple of loseilon. (Patus. x. 38. § 8, eomp. vi. 19. § 4.) leake (Northern Greece, vol. ii. p. 592) and other anthorities place Myonia at Aghia Thymia, or Athymia, a small village, containing Hellenic remains, divtant $1 \frac{1}{2}$ bour from Silona (Amphissa) on the rad to Cruluridlii on the canst; but this cannot be correst, as, according to the passige in Pausanias, Myunia lay further inland than Amphissa. (Avo uiv

 Kirpert places Myonia in his map N. of Ampbissa, on the rond from the latter place to Cytinium in Doris.
 montory on the south-west of Lebedus, on the coast of lonia, at the northern extremity of the bay of Ephesus. It is celehrated in history for the naval victory there csuned by the Romans under L. Aemilins over Autachus the Great, in a. c. 190. (Steph. B. s. v.; Strab. xiv. 1. 643 ; Thucyd. iii. 42 ; Liv. xxxvii. 27.) Lisy describes the promontory as situated between Samos and Teos, and as rising from a brou! basis to a pointed summit. There was an approach to it in the land side by a narrow path; while on the sea side it was girt by rocks, 50 monch worn by the waves, that in some parts the overhangine cliffs extended forther into the sea than the hhips statiomel under them. On this promontory

(Steph. B, Strab. $l$ l. cc.), which belonged to Teus. The rocks of Myonnesus are now called Hypsilibosnos.

Pliny (II. V.r. 37) mentions a small island of the name of Myonuesus near Ephesus, which, togetber with two others, Antlinae and Diarrheusa, forned a group called Pisistrati Iosulae.
[L..s.]
MYONNE'SUS (Mứvע $\quad$ бos: Eth. Muovvíotos), a small island lying off the coast of Phthiotis in Thessaly, in the bay between Larissa Cremaste and Antron. (Strab. ix. p. 435 ; Steph. B. l.c.)

MYOS-HORMOS ( $\delta$ Muds ठopuos, Diodor. iii. 39 ; Strab. xvi. p. 760-781, xvii. p. 815; Ptol. iv. 5. § 14, viii. 15. § 18; Peripl. Mar. Erythr. pp. 1, 6, 9,11 ;'Aфроб́iтŋs סориos, Aqatharch. p. 54 ; Veneris Portus, Plin. vi. 29.§ 33) was founded by Ptolemy Piiladelphus (B. C. 274) upon a headland of similar nace. (Mela, iii. 8. § 7.) He selected it for the principal harbour and station of the trade of Aegypt with Inlia, in preference to Arsino": at the head of the Red Sea, on account of the tedious and difficult narigation down the Heronpolite gulf. The name Myos-Hormos, which indicates its Greek origin, may signify the "Harbour of the Mouse, but more probably means "the Harbour " of the Muscle" ( $\mu v \in \omega$, to close, e.g the shell), since on the neighbouring coast the pearl-muscle or Pinna narina (comp. the Hebrew pininin, Job, xsxviii. 18; Prov. xxxi. 10) is collected in large quantities. (Bruce, Travels, vol. vii. p. 314, 8vo. ed.) The uame was afterwards changed, arcording to Agatharchides and those writers who copied him, to that of Aphrodites-1lormos; but the elder appellation is more generally retained. Myos Hormos seems to have obtained the designation of Aphrodite (floam of the sea), from the abundance of sca-sponge found in its bay.

The latitude of Myos-Hormos is fised by Brace. D'Anville, \&c., at $2 \dot{j}^{\circ} \mathrm{N}$. Its situation is determined by a cluster of islands, called Jaffateen by modern natigators, of which the three largest lie opposite to an indenture of the Aegyptian caast. Bechind these islands and on the curve of the shore was the harbour. Its entrance was oblique (Strab. xri. p. 769); but it was spacious and sheltered, and the water, even to the land's edge was deep enough for vessels of considerable burden.

Myns-llormos owed its prosperity, as well as its foundation, to the trade with Africa, Arabia, and India. The resvels bound for Africa or the S. coast of Arabia left this harbour in the month of Septemher, and thus fell in with the wind, which at the equinox bluws steadily from NW., and carried them down the African coast, bringing them back in the fullowing May. The furthest S. point of the African trade was the town of Rhaptum, in the Regio Barbarica, about $10^{\circ} \mathrm{S}$. of the equator. The vessels bound for India (the coast of Malabar or Ceylon) left Myos-Hormos in July; and if they cleared the mouth of the lied Sea before the Ist of September, they had behind them the monsoon for rearly three months. The voyage out usually cecupied about 40 days. We are not informed of be extent of the Indian trade under the Ptolemies; sut in the reign of Claudius, when the route throngh 4egypt to Malabar first became really known to the Punans, we have a detailed account of it in Pliny vi. 23. s. 26). That writer calculated the worth if gold and silver sent yearly from Jome to the ast at $400,000 \mathrm{l}$. sterling, in exchange for which 'sods were received of at least fuur timest the value
of that amount, when sold again in Rome or Constantinople. The caravans went up the Nile as far as Coptos, whence they travelled through the desert for 7 or 8 days to Berenice or Myos-Hormos, and exchanged their gold for silk, spices, porcelain, and perfumes. A pound of silk was considered equivalent to a pound of gold. Philadelphus first opened the road between Coptos and Myos. Hormos. At first the caravans carried their water with them across the desert, and employed camels for the transport of merchandise. But afterwards carasansaries ( $\sigma$ тa $\theta \mu 0 i$ ) were bullt for the use of travellers; and wells were sunk and cisterns dug for the collection of rain water; although the supply of the latter must have been scanty and precarious, since rain in that latitude seldom falls.

The prosperity of Myos-Hormos as an emporium, however, seems to have been fluctuating, and it was finally supplanted as a depôt at least by Berenice, which, being Jower down the Red Sea, was yet more convenient for the southern trade. That it was fluctuating may be inferred from the mention of it by the geographers. Agatharchides, who composed his work in the reign of Philumeter (B. C. $180-145$ ), in his account of the Indian trade, makes no meotion of Berenice. Diodorus who wrote in the age of Augustus, speaks of Myas-Hormos, but nut of its rival. Strabo, who was nearly contemporary with Diodorus, says that Bererice was merely a roadstend, where the Indian vessels took in their cargo, but that they lay in port at Myos-Hormos. Pliny, on the other hand, in his description of the voyage to India does not notice Myos-Horimos at all, and speaks of it incidentally only in his account of the W. coast of the Red sea. Accordingly, in the reigns of Vespasian and Trajan it must have been on the decline.

There is one difficulty in the relations between these harbours - their distance from each other. According to the Periplus, Berenice was 1800 stadia, or 225 miles, from Myos-Hormos, and even this is under the mark, if Cape Rus-el.anf be the Lepte Promontorium of Ptolemy. As the pretest for founding either city was the supernor convenience of each, as compared with Arsinoë (suez), for the Indian trade, it seems strange that the ships should have been kept at Myos-Hormos, but the ladings taken in at Berenice. It is more reasonalle to suppose that the latter becane the principal emporium of the Indian traffic; and as that increased in importance, the port where it was principally carried on became the more frequented and opulent place of the two.

It is uncertain whether the ruins at the village of Abuschaar represent the site of the ancient MyosHormos.
[W. B. I).]
MYRA ( $\tau \alpha$ Múpa or Múpov : Eth. Mupevis), one of the most important towns of Lycia, situated on the river Andracus, partly on a hill and partly on the slope of it, at a distance of 20 stadia from the sea. (Strab. xiv, p. 666; Steph. B. s. г.; Plin. xxxii. 8; Ptol. v. 6. § 3, viii. 17. § 23.) The small town of Andriaca formed its port. It is remarkable in history as the place where the apostle Panl landed (Acts, xxy.5); and in later times the importance of the place was recognised in the fact that the emperor Theodosius 11. raised it to the rank of the capital of all Lycia (Hierocl. p. 684.) The town still exists, and bears its ancient nanie Myra, though the Turks call it Dembre, and is renarkable for its fine remains of antiquity. Leake (Asia Minor, 1 . 183) meations the ruing of a thearig 35 feet in dia-
meter, several publie bnildings, and numerous inscribed sepulchres, some of which have inseriptions in the Lycian characters. But the place and its splendid ruins have since been minutely described by Sir C. Fellows ( Hiscoc. in Inycia, P. 196. \&c.), and in Tesier's work ( 1 iseription de l'A sic Mincure), where the ruins are fignred in 22 plates. The theatre at Myra, swys Sir Charles, is among the Lagest and the beat built in Asia Minor: mach of its fine corridor and corniced proseviom remains. The number of tombs eut in the rock is not large. but they are generally very spaciuss, and consist of several chambers communicating with one another. Their external ornameats are enriched by sculptored statues in the rocks around ; but they are mostly withont inscriptions (sce the plate of one in $\mathrm{Sir} \mathbf{\mathrm { C }}$. Fellows' Discov. facing p. 198, and numerons others in a plate facing p. 200). On the whole, the ruins of Myra are anzong the most beautiful in Lycia. (Comp. Spratt and Forbes, Travels in Lyycia, vol. i. p. 131, \&c.)
[L. S.]
MYRCINT'S (Múpkıyos, Steph. B.; Múpkivyos, Tzetz, Clitl. iii. 96 : Eth. Mupкivios), a place belonging to the Ldoni, on the left bank of the Strymon, which was selected by Histiacus of Miletus for his settlement. It offered great advantages to settlers, as it contained an abondant supply of timber for shipbuilding, as well as silver nimes. (Ilcrod. vii. 23.) Aristamoras retired to this place, and, soon after landing, perished before some Tlimcian town which he was besieging. (Herod r. 126; Thuc. iv. 102.) Afterwards, it had fallen into the hands of the Edoni; but on the murder of I'ittreus, chicf of that perple, it surrendered ta Bmasilas. (Thuc. is. $10^{-7}$.) The position of Myrcinus was in the interior, to the X. of M. Pangaeus, not far from Amphipolis. (Liake, North Grecree, vol. iii. p. 181.)
[E. B. J.]

## M)TLLANDRES. [Isers.]

MYRACUS (Mupakoūs), a town on the coast of Tror, "opposite," as Steph. By_. (s.e.) sams, " to Tenedos and Lestrus," whence it i- impossible to guess its situation. It is nut mentioned by any other writer.
[L. S.]
MYII'XA (Mupiva : Fth. Mupsuaios), one of the Aedlian cities on the western conast of Mysin, abont 40 stadia to the south-wnst of liryneimm. (Herod, i. 149.) It is said to lave been fonaded by one Myrinns before the other Acolitu cities (Mcla, ‥ 1N). or by the Amazon Myrina (Strab. xi. p. 505, xii. p. 55,3, xiii. p. 623: Diod. iii. 54). Artaserxes stave Grywiutn :m I Myrina to Gimgylus an Eretrian, who had tura baished from his native city for favouring the merests of Persia. (Nimoph. If Illen. iii. 1. § 4.) Myrima was a very straus place (Liv. xxsiii. 30), though not very largee and had a enod harbons. (Scylax. p. 36; Agath. Prouf. p. 9, ed. Bonn.) Bliny ( $v, 32$ ) mentions that it bore the sumame of Sehastoplis: while, according to Symeellus, it was also calleil smyrma. Fur some time Myrina was arcupial ty Plilif of Macedonia; but the Romans - ompelled him to eracnate it, and declared the place free (Liv, $l$. $\subset$; Prlyh, xviii. 27.) It was twice visited by severe carthamken; first in the reign of Tibeins (Tace, Ann, ii. 47), on which oceasion it received a remisai ma of dution on accumt of the loss it had sumtained; anl a seomd time in the reign of 'Tragian (0ris. vis. 12). The totsu wis restored each tine, and continued to exist until a hate period. (Sirph. By\% s. u.: Ptol. r. 2. \& 6; Apullun. Mhod. i.

called Myrenna, while in the Peat. Tab, it brars the name Marinua.) Its site is believed to be secupied by the modern Sandurlik.

MY'RTILIS, surnamed Jotric (lounía Muptenis, Ptol. ii. 5. § 5), a town of the Turdetani in Lusitania, on the Ants, which had the Jus Latii; mav Mertule. (1llis. iv. 21. s. 35 ; Mela, iii. 1; It. Ant. p. 431 ; Sestini, Mol. p. 11 ; Mrannet, Sippl i. p. 8; Florez, Rep. Sagr. siv. pp. 208, 232; Forbiser. iii. p. 36.)
M) RTILX of MIRTE'NLIN (Múpttov, Mupthvóv), a place in Thrace mentioned by Demosthenes along with Serrhium, but otherwise unknown (de Cor. p. 234).

JinTTOS. [Akgabla Mare.]
MYRTOTM MalRE. [AEGakta Mare.]
 xus (Múpotwos) by Homer, who mentions it ame ng the tuwns of the Epifi. It was a town of Elis, and is deseribed by Strabo as sitnated on the road from the city of Elis to Dyme in Achaia, at the distance of 70 stadia from the former place and near the sea, Leake remarks that tho last part of the deseription must be inearrect, since no part of the road from Elis to Dyme conld have passed by the sea ; bit Curtius observes that Myrtuntium would at one time have been uear the sea-cuast, supposing that the lagoon of Kotiki was originally a gulf of the sea. The min thear Kalatilios probably represents this place. (1lom. Il. ii. 616 ; Strab. viii. p. 341 ; Steph. 13.sv. Múprovos; Leake, Moma, vol. ii. 1. 169 : 13u laye, Richerches, qc. p. 120; Curtius, Peloponnesos, fol. ii. 1. 36.)

MISAR1S (Murapis al. Muoapis, P't.l. iit. 5. $\S 8)$, the 11 . promontory of the Acmurteos Ihntmos.
[E. B. J.]
Mli Sla (Muría: Eth. Murós Mysi.), thic ane
of a province in the north－west of Asia Minor， which according to Strabo（xii，p．572）was derived from the many beech－trees which grew about Mount Olympus，and were called by the Lydians $\mu v \sigma o$ ， Other＇s more plausibly connect the name with the Celtic moese，a marsh or swamp，according to which Mysia would signify a marshy country．This sup－ position is supported by the notion prevalent among the ancients that the Mysians had immigrated into Asia Ninor from the marshy countries about the Lower Danube，called Moesia，whence Mysia and Moesia would be only dialectic rarieties of the same name． Hence，also，the Mysians are sometimes mentioned with the distinctive attribute of the＂Asiatic，＂to distinguish them from the European Mysians，or Moesians．（Eustath．ad Dion．Per． 809 ；Schol．ad Apollon．Rhod．i．1115．）

The Asiatic province of Mysia was bounded in the north by the Propontis and the Hellespont，in the west by the Aegean，and in the south by Nount Temnas and Lydia．In the east the limits are not accurately defined by the ancients，though it was bounded by Bithynia and Plirygia，and we may assume the river Rhyndacus and Mount Olympas to have，on the whole，formed the boundary line． （Strab．xii．pp．564，\＆c．，571．）The whole extent of conntry hearing the name of Mysia，was divided into five parts ：－1．Mrsia Mixor（Muola ì $\mu k \kappa \bar{c}$ ），that is，the northern coast－district on the Hellespont and Proportis，as far as Mount Olympus；it also bore the name of Mysia Hellespontiaca，or simply Hellespontus， and its inhabitants were called Hellespontii（Ptol．v． 2．$\S \S 2,3,14$ ；Xenoph．Ages．i．14）；or，from Mount Olympus，Mysia Olympene（Mvaía 方＇Oגvu－ ann场（strab，xii，p．571）．This Lesser Mysia em－ braced the disticts of Morene，Abrettene and the Apian plain（＇A $\quad$ las $\pi \in \delta i o v$ ；Strab．xii．pp．574，
 ing the southern part of the interior of the country， inclading a tract of country extending between Troas and Aeolis as far as the bay of Adramyttium．The principal city of this part was Pergamum，from which the country is also called Mysia Pergamene
 $\S \S 5,14$.$) 3．Troas（ \grave{\eta}$ Tpwás），the tervitory of ancient Troy，that is，the northern part of the western coast，from Sigeimn to the bay of Adra－ mytium．4．Aeolis，the southern part of the coast，especially that between the rivers Caicus and Hermus．5．Tetthrania（ì Teu日pavia），or the district on the southern frontier，where in ancient times Teuthras is said to have formed a Mysian kingdons．（Strab．xii．p．551．）

These names and divisions，however，were not the same at all times．Under the Persian do－ minion，when Mysia formed a part of the secoud satrapy（Herod．iii．90），the name Mysia was ap－ plied ouly to the north－eastern part of the country， that is，to Mysia Minor；while the western part of the coast of the Hellespont bore the name of Lesser Phrygia，and the district to the south of the latter that of Trons．（Scylax，p．35．）In the latest times of the Roman Empire，that is，under the Christian emperors，the greater part of Mysia was contained in the province bearing the name of Hellespuntus， while the sonthern districts as far as Troas belonged to the province of Asia．（Hierocl，p．658．）

The greater part of Mysia is a mountainous country，being traversed by the north－western branches of Monnt Taurus，which gradually slope down towards the Aegean，the man brauches being

Mount IdA and Momnt Tenenes．The comntry is also rich in rivers，though most of them are small， and not navigable ；bat，notwithstanding its abun－ dant supply of water in rivers and lakes，the country was in ancient times less productive than other provinces of Asia Minor，and many parts of it were covered with marshes and forests．Besides the ordinary products of Asia Minor，and the excellent wheat of Assus（Strab．xv．p．725），Mysia was cele－ brated for a kind of stone called lapis assius（ $\sigma \alpha \rho-$ кофáyos），which had the power of quickly consum－ ing the human body，whence it was used for coffins （sarcophagi），and partly powdered and strewed over dead bodies．（Dioscorid．v．141；Plin．ii．98， xxxvi．27；Steph．B．s．v．＂A $\sigma \sigma o s$. ）Near the coasts of the Hellespont there were excellent oyster beds． （Plin．xxxii．21；Catull．xviii．4；Virg．Georg． i． 207 ；Lucan，ix． 959 ；comp．Theophrast．Hist． Plant．i．6．13．）

The conntry of Mysia was inhabited by several tribes，as Phrygians，Trojans，Acolians，and Mysians； but we must here confine ourselves to the Mysians， from whom the country derived its name．Mysians are mentioned in the Iliad（ii． 858 ，x． 430 ，xiii．5）， and seem to be conceived by the poet as dwelling on the Hellespont in that part afterwards called Mysia Minor，Thence they seem，during the period subsequent to the Trojan War，to have extended themselves both westward and southward．（Strab． xii．p．665．）Herodotas（vii．74）describes them as belonging to the same stock as the Lydians，with whom they were always stationed together in the Persian armies（Herod．i．171），and who probably spoke a language akin to theirs．Strabo（vii． Pp．295，303，xii．pp． 542.564, \＆c．）regards them as a tribe that had immigrated into Asia from Europe．It is difficult to see how these two state－ ments are to be reconciled，or to decide which of them is more entitled to belief．As no traces of the Mysian language have come down to us，we cannot pronounce a positive opivion，thongh the evidence，so far as it can be gathered，scems to be in favour of Strabo＇s view，especially if we bear in mind the alleged identity of Nuesians and Mysians．It is， moreover，not quite certain as to whether the Mysians in Homer are to be conceived as Asiatics or as Europeans，If this view be correct，the Mysians must have crossed over into Asia either before，or soon after the Trojan War．Being afterwards pressed by other immigrants，they advanced farther，into the country，extending in the south－west as far as Per－ gamum，and in the east as far as Catacecaumene． Abont the time of the Aeolian migration，they founded，under Teuthras，the kingdom of Teuthrania， which was soon destroyed，but gave the district in which it had existed its permanent mame．The people which most pressed upon them in the nurth and east seem to have heen the Bithynians．

In regard to their history，the Mysians shared the fate of all the nations in the west of Asia Minor． In e．c． 190 ，when Antiochus was driven from Western Asia，they became incorporated with the kingdom of Pergamus；and when this was made over to Fome，they formed a part of the province of Asia．Respecting their national character and insti－ tutions we possess scarcely any information；but if we may apply to them that which Posidonius（in Strab．vii．p．296）states of the European Moesians， they were a pious and peaceable numadic people， who lived in a very simple manner on the produce of
civilisation. Their lauguare was, acoriun to Strabo (xii. p. 572 ), a mixture of Lydian and Phryginn, that is, perlapes, a dialect akin to buth off them. Their comparativisy low state of ceviliastion serous ulan to be indiataed hy the armour attributed to them by 1herulotus (vii. 74), which comsisted of a conmon hedhect, a suall slamhl, and a javelin, the joint of which was hardened lyg firet. At a latem time, the inthurare of the Grecks by whom they were surrounded seems to have done away with everything that was pernliar to them us a nation, and to have drawn thent into the sphere of Cireck (ivilisation. (Chmp. Forbiger, Handbuch der alten Gengraphic, vol. ii. p. 1to, \&e.; Cramer, Asia Minor, i. 1. 30. Se. ; Nicbulir, Lect. on Ane: Hist vol. i. p. s3.s.e.)
[1. s.]
A1Y'slles (Mórtos), a tributary of the Cations, on the frontiers of Mysia, having its sontres on Moment Tomms, and joining the Caicns in the neighbourluwal of Pergamm. (Strabl. xiii. p. 616.) According to Ovid (1et, xv, 277) Mysius was unly another mame for Caicus, whence some have infered that the upper part of the Caicus was actually called Mysins. It is fenerally belleved that the Mysius is the sume as the modern Boryma. [L. S.]
arsoctalis (Mororopas, Ftol. iv. I. § 3 ), a harbur on the W. coast of Mauretania, near the Phuth, problably the same as the Camect Mores (Kapurì тєīxos) of Hanno (p. 2, ed. Hudson: comp. Ephw, ap. St ph. B. s. r.), now A Ahous, near the Wiad Tinsift, where Denonis map of Marweco marks ruins. (Geoy. Grace Min, vol. i. p. t, ed. Miill re, Pariv, 1835.)
[E. B. J.]
MYSOMACEEDONES (Muaouak'Eaves), a tribe of the Mysians, prebably occupsing the district about the soarces of the small river Mysics. (Ptol. v. 2. \& 15; Ilin. v. 31.) In the time of the Romans this tribe belmened to the conventus of Fphesus; but further particulars are not knorn of them.
[L.S]
MY'STIA (Mustia: Eth. Mustiavis: Mimaster(cee), a tuwn of Bruttium, which sems to bave been sittated on the E. coast of that province, letwere Scylacium and the \%ephyrian promuntury, al frrently whe far from (C.tpe Cocinthun (Cup) if Stilu). (Mela, ii. 4. \& 8 ; Plin. iii. Io. s. 15.) Stephanus of Byzantimm citrs Pliliston ats calling it a city of the Sanuites, by which be mut evilleutly mean their Luasaim or Bruttanm leseendants. (Siteph. B. s. r.) Its poition cammet be nave exactly determinad, but it is phacel conjesturally at Manstroce, that the Capo oli Stilo. (Claver. Itel. p. 1305 ; Ramanelli, vol. i. 1. 175.) [E. II. R.)]

 thanch it was probaily sittateal an the north-west sibe of the Lacus Avania. It is said that durime the winter all the attitiotial wells of the phace were counfletely dr ined of wather, but that in summer thing broame filled agaih to the brim. (Aristot. I/ir, Ausc. 5.7: Autig. Caryst. 188.) Sitphambs By\%. (8. o. Пuoj́aias) and pliny (5. 43) mention a town of the name of Pythronis in Mysa, which may poosibly be the same as Mrthew lis.
[L. S.]
 tu入ipy: Eilh. Mutinquaîos or Misu入चpaius), the most impartant city in the intand of leesbos. Thure is some uncertainty abont the orthugraphy of the name. Cinas are unat impos in fivare of Mutadyy.

The first passage in which the history of Mytilene comes prominently into view is in the struggle between the Aeolians and Athenians for Sigeum (b, C. 606), at the NW. corner of Asia Minor. The place and the time are both remarkable, as illustrating the carly vigour with which Mytilene was exercising its maritime and political power. We see it already grasping considerable possessions on the mainland. It was in this couflict, too, that Pittacus, the sage and lawgiver of Mytilene, acted so noble a part, and that Alcaens, her great poet, lost his shield. The mention of these two names reminds us that this time of rivalry with Athens coincides with the famons internal contests of the nobles and commons in Mytilene. For the history and results of this struggle, see the lives of Alcabes, Piminces, and Sispuo, in the Dict. of Biography.

It may be difficult to disemanale the history of the Mytilebaeans from that of the Aeolians in general, during the period of the Persian ascendancy on these coasts. But we have a proof of their mercantile enterprise in the fact that they alone of the Aeolians took part in the building of the Hellenium nt Naucratis (Herod, ii. 178) ; and we find them taking a prominent part in the invasion of Egypt by Canbyses. (Ib. iii. 13, 14.) They supplied a contingent to Darius in his Scythian expedition (lb. iv. 97). They were closely connected with the affairs of Histiaeus (Ib, vi. 5); and doubtless, though they are not separately mentioned, they were the best portion of those Aedians who supplied sixty ships to Xerses in his invasion of Greece. (Ib. vii. 95.)

The period of the Athenian supremacy and the Peloponhesian War is full of the fame of Mytilene. The alliance of its citizens with those of Athens began soon after the final repulse of Persia. They held a very distinguished position among the allies which formed the Athenian confederacy; but their revolt from Athens in the fourth year of the Peloponnesian War brought upor them the must terrible ruin. Though the first dreadful decision of the Athenian assembly was overruled (Thucyd. iii. 36), the walls of Mytilene were pulled down, and her fleet given up; her territory was divided among Athenian share. holders, and sbe was deprived of her possessions and forts on the mainland. (lu. iii. 50.)

Towards the close of the Peloponnesian War, Conon was defeated by Callicratidas off Mlytilene, and blockaded in the harbour. (Xen, Hell. i, 6.) We pass now to the period of Alexander, with whose campaigns this city was conspicuously connected. The Lesbians made a treaty with Macedonia. Memnon reduced the other cities of the island; and his death, which inflicted the last blow on the Persian power in the Aegean, took place in the moment of victory against Myctilene. It was retaken by Hegesilochus, in the course of his general reduction of the islands, and received a large accession of territory. Two Mytilenaeans, Laomedon and Erigyius, the sons of Larichus, were distinguished members of Alexander's staff. The latter fell in action against the Bactrians; the former was governor of Syria even after Alexander's death.

The first experience of the Roman power in the Aegean was di-astrous to Mytilene. Having espoused the cause of Mithridates, and baving held out to the last, it was sacked by M. Thermus, on which occasion J. Caesar honourably distinguished himself. Pompey's friendship with Tbcophanes led to the recognition of Mytilene as a free city. (Plin. v. 31.) Atter the defeat of Pharsalia, Pompey touched, there
for the last time to take Cornelia on board. His son Sextus met with a friendly reception there, ntter lis defeat at sea, ly Agrippa. (Dion Cass. slix. 17; A 1 p. B. C. v. 133.) Agrippa himself resided thete for some time is retirement, ostensibly on account of his bealth, bot really through mortification caused by the preference shown to M. Marcellus (Tac. Aun. xiv. 53 ; Suet. Aug. 66, Tib. 10) ; and this residence is commemorated by an inscription still extant. (See Pococke.) The last event which we need mention in the imperial period is the crossing over of Germanicus with Agrippina from Euboca to Lesbos, and the birth of Julia. (Tac. Ann. ii. 54.) This event, also, was commemorated buth by coins and inscriptions. (Sce Eckhel and Pococke.) It appears that the privilege of ficedom was taken away by Vespasian, hut restored by Hadrian. (Plehn, Lesbius: p. 83.)

Mytilere is onc of the few cities of the Aegean, which have continued rithout intermission to flouri-h till the present day. Is the course of the middle ages it gradually gave its name to the whole island. Thus, in the Syuecdemus of Hierocles, Mirvinuך and Me日ípva are both mentioned under the Province of the Islands; but in the later Byzantinc division, Dlytilene is spoken of as an island, like Lemno and Chios, in the Theme of the Aegean Seo. (Const. Porphyrog. de Them. i. Pp. 42,43 , ed. Bonn.) The fortunes of Mytilene during the first advancas of the Mabomedaus in the Levant, and during the ascendancy of the Venetians at a later period, are noticed in Finlay's History of the Byzantine and Greek Empires, vol. ii. pp. 72, 171, 223. The island of Lesbos was not actually part of the Mlahomedan empire till nearly teu years after the fall of Constantinople.

With the exception of the early struggles of the time of Alcarus and Pittacus, there is little to be said of the interoal constitutional history of Mytilene. It shared, with all Greek cities, the results of the struggles of the oligarchical and democratical parties. We fiod a commonalty ( $\delta \hat{a} \mu \nu s$ ) and a council ( $\beta \dot{\lambda} \lambda \lambda a$ ) mentioned on coins of the period of Alexander; and the title of mactistrates, called $\sigma \tau \rho a \tau \eta \gamma$ ós (praetor), appears on coins of Lucius Verus. In cunnection with this part of the subject ne may allode to two creditable laws ; one which enacted (doubtless in consequence of the great quantity of wine in the island) that offences cummitted by the drunk should be more severely punished than those committed by the sober (Arist. Fol. ii. 9. 9); the other making a singular provision for the punishment of faithlessness in trihutaty allies, by depriving them of the privilege of educating their children. (Aelian, Var. Uist. vi. 15.)
[J. S. H.]

COIN OF MTILENE.
MYTI'STRATUS (Mvтiotpatos, Steph. B., Diod.; Movtíatpatas, Zonar.: тो Mutтiotpatov, Pol.: Eth. Mutustratinus, Plin.) a town in the interior of Sicily, the position of which is wholly uncer-
tain. It wa. pwbalit but a ste. 11 tuwn, than strongly fortition, whetuce Philt-ius (ap. Steph. B. s. r.) called it "a frtress of Sicily." It is eonspicuonsly mentioned during the First Puaic War, when it was in the hands of the Carthacil ans, and was besicsed by the Ramans, but for some time without suchens. wh aceount of the great strenzth of its position: it nats at Jet -the taken by the one if A. NAARDA (Naúp5a, P'l. v. 1s. \& 7: Stoph. B.

 Jusephius speik (l.c) of Nisudat is a F , ace in
B.tylonia, posw oing an extensive range of territory, and defended from hostile attack by the Euphrates, which flows round it. When Tiberius overthrew the Jews in the East, the remnant of that people touk refuge in Nauda and Nisibis; and the former vity long remained a place of refoge for the Jews. In the intermediate records of the Christian East we find occasional aotices of this place, under the titles of Nahardeir and Beth-Nubsulni. Thus, in A. 11. 421 , a bishyp of Nahanleir is mentioned (Assem. Bibl. Orient. iii. 1. 264); in A. D. 755, Junas is bishop of Beth-Niuhatra (Assem. ii. P. I11); and is late as A. 1). 1285. anuther person is recorded as "Epuscupus Nuhadrensis" (A-sem, ii. p. 249.) Durime all this period Nearda is incloded within the episcupal province of Mosul. Lastly, in the Travels at Bunjumin of Tudela, which towik place towards thic eud of the 12 th century, the traveller mentions Wouge to " Juba, which is P'umberitha, in Nehardea, coutaining sbout two thonsand Jews" (p. 92, Asher's evlit.); from which it appears that, at that period, Naarda was considered to comprehend a district with other towns in it. Pumbeditha and Lura were two celebratel Jewish towns situated near one anuther, at no great distance from Baghdid. [V.]

NAARMAl.CHA. [Bibyloxia, Vol. 1. p. 362, a.]

NABAEUS (Nabaios, Ptol. ii. 3. §1). a river in the extreme aurth of Britannia Barbara or Caledonia, probably the Xavern river, east of C. Wrath.

工ABALIA, in the text of Tacitus (Hist. v. 26), is a river in or near the Batavorom Insula, over Which there was a brilge. During the war between Civilis and the P tams, there was a conference between Civilis and Cerealis on this bridge, which had been cut asunder for safetr's sake. each party at the conference keping on his own side of the river. It is uncertaiu if the name Nabalia is right ; and if it is right, it is also oncertain what tne river i. It must, however, be some stream about the lower [at of the Ihine ; and Walekenaer (Geog. yo. vel. i. p. 296) conjectures that it is the-Yssel or eastem tranels of the lhine which flows into the Zuyder Zee. Ptoleny (ii. 11. § 28 ) bas a place Navalia (Naú̀ıa) in Great (icrmania, the pasition of which, if we can trust the numbers, is on or near Ptolemy's eastern brauch of the Ihine, whatever that eastern branch maty be.
[G. L.]
NABATAEI (Na\&ataiol, 'Aтataion, Ptol. vi. 7. § 21 ; NaSárac, Suil, s. z.; Navataîo, LXX.; Nabsthap. Sun. Here. Oet. 160: the country, Nabaraia, Strab. Nabaznét, Juseph.), a numerous and important people of Arabia Petracia, celebrated in the classical geugraphers. Josephus describes the country as vol prehending all from the Euphrates to the R eise, i.e. the whele of the northern part of the Atabiar peninsula : and inlablited by the descendants of the I2 mans of Dohmael, from the ellest of whom, Xubaioth. this territory is supposed to have derived it name. This is confirmed by the authority of S Jerome, th ree centuries later, who writes, " Nebaioth unnis rogio ab Euphrate usque ad Mare Robbrum Nabathera usque hodie dieitur, quae pars Arabiae ist." (Joseph. Ant. j. 13. \& 4; Hicrod. Comment. in fienes xxr. 13.) The only allusion to this preople in the canonical Suriptures, supposing them identical, is by their patriarchal designation ; and the meet ${ }^{\circ}$ in of the " rams of Nebsioth," in connevtion with th. .. laxhs of Kedar ${ }^{-}$(lan, Ix. 7). is imates that they existed is a distilnt pastoral tribe. But they oceny fyumentiy in histury after
the captivity. They were the friends and allies of the Jews in their struggle for independence; for when Judas Maccabaeus, with his brother Jonathan, found them 3 days S. of the Jordan (cir. n. c. 164), they received him amicably, and gave lim information which led to the deliverance of the oppressed Jews in Gilead from the Ammonites, under Timotheus (Joseph. Ant, xii. 8. § 3; 1 Maccab. v. 24, \&c.); and when preparing for an engagement with Batchides (cir. B. C. 161), the same Jonathan proposed to place all their moveable property in their custudy. (1b. xiii. 1. §2; 1 Maccab. ix. 33.) But the earliest and fullest notice of this people ard of their country occurs in Diodorus Sicnlus, who meations them frequently. In n. c. 312, Antigonus, having recovered Syria and Pallestine out of the hands of Ptolemy, resolved on an expedition against the Nabataei, and detached his general Athenaeus on this service, with 4000 light-armed troops and 600 light cavalry. The manners of these Arabs and their conntry is described by the historian in this connection. They inhabited tents in a vast desert tract, which offered neither streams nor fountains to an invading army. Their institutions, as deseribed by him, bear a striking resemblance to those of the Rechabites in every particular, "to ©iriok no wine, nor to bnild houses, nor to have vineyard, nor field, nor seed, but to divell in tents." (Jer. sxxv. 6-11.) Diodorus mentions that the violation of any of these customs was a capital crime. Their oceupations were chiefly pastoral; some possessing canels and others sheep in much greater abundace than the other Arabs, althongh their namber did not exceed 10,000 ; but they also acted as carriers of the aromatic drugs of Arabia Felix, which were discharged at their great mart at Petra, and by them transported to the Mediterranean, at Rhinocorura. The love of liherty was a passion with them; and their custom, when attacked by a more powerful enemy, was to retire to the wilderness, whither the invaders could not follow them for want of water. They themselves had provided for such emergencies vast subterranean reservoirs of rain water, dug in the clayey soil, or excavated in the soft rock, and plastered, with very narrow months,-which conld be easily stopped and concealed from sight, but which were marked by indications known only to themselves,-but gradually expanding until they attained the dimensions of 100 feet square. They lived on flesh and milk, and on the spontaneons produce of the conntry, snch as pepper and wild honey, which they drank mixed with water. There was an annual fair held in their country, to which the bulk of the males used to resort for purposes of traffic, leaving their flocks with their most aged men, and the women and childreo at Petra, naturally a very strong place, though unwalled, two days distant from the inhabited country. Athenaeus took adrantage of the absence of the Nabataeans at the fair, to attack Petra; and making a forced march of 3 days and 3 nights. from the eparchy of Idumaea, a distance of 2200 stadia, he assaulted the city about midnight, slaughtered and wounded many of its inhabitants, and carried off an immense booty in spicery and silver. [Petika.] On his retreat, howerer, be was surprised by the Nabataei, and all his forces cut to pieces, with the exception of 50 horsemen. Shortly afterwards Antigonus sent another expedition against I'etra, under the command of Demetrius; but the inhabitants were prepared, and Demetrius
was glad to withdraw bis army on receiving such gifts as were most esteemed among them. (Diod. xix. 44-48, comp. ii. 48.) In the geographical section of his work the author places them on the Laianites Simus, a bay of the Aelanitic gulf, and describes them as possessing many villages, both on the coast and in the interior. Their country was most populons, and inercdibly rich in cattle ; but their national character had degenerated when he wrote (cir. n. c. 8). They had formerly lived honestly, content with the means of livelihood which their flocks supplied; but from the time that the kings of Alexandria liad rendered the gulf navigable for merebant ressels, they not only practised violence as wreckers, but made piratical attacks from thicir coasts on the merchantimen in the passage through the gulf, imitating in ferocity and lawlessness the Tauri in Pontus. Ships of war were sent against them, nnd the pirates were captured and punished. (Ib. iii. 42, comp. Strabo, xvi. F. 777.) The decrease of their transport trade and profits, by the new chamel opened throngh Egypt, was doubtless the real cause of this degeneracy. The trade, however, was not entirely diverted; later writers still mention Petra of the Nabataei as the great entrepôt of the Arahian commerce (Arrian, Periplus, p. 11, ap. Indson, vol. i.), both of the Gerthaei of the west, and of the Minaci of the south of that peninsula. (Strabo, syi. p. 776.) The account given by Strabo agrees in its main features with the earlier record of Diodorus Siculus ; and he reeords at length the deception practised on his friend Aelins Gallus by Syllaens, the procurator (énitponos) of the Nabataei, under the king Obodas; a false friend of the Romans, through whose territory be first led them on leaving Leuce Come, where they had landed. The policy of syllaeas illustrates the remark of Strabo (xvi. p. 783 ), that the Nabataeans are prudent and acquisitive; so much so, that thuse who wasted their property were punished, and those who increased it rewarded by the state. They had few slaves anong them; so they either waited on themselves, or practised mutual servitude in families, even in the royal family. They were mneh addicted to feasting, and their domestic manners marked considerable progress in luxury and refinement, from the rude simplicity of the primitive times described by the more ancient author (p. 783, seq.). He mentions that they were fire-worshippers, and sacrificed daily to the sun on their house-tops Their government may be stylcd a limited monarehy, as the king was subject to be publicly ealled to account, and to have to defend himself before the people. Their cities were unwalled, and their country frnitful in everything but the olive. The limits of their country are not clearly defined; Strabo places them above the Syrians, with the Sabuei, in Arabia Felix (xri. p. 779) ; but this must be a corrupt reading, and is inconsistent with his other nutices of them. Thus he speaks of the promontory near Seal lsland - the peninsula of Mount Sinai - as extending to Petra of the Arabs called Nahataei (p. 776), which he describes as situated in a desert region, particularly towards Judaea, and only three or four days' journey from Jericho (p. 779). The approach to Egypt from the east, towards Phoenice and Judaea, was difficult by way of Pelusiun, but from Arabia Nabataca it was easy. All these and similar notices serve to show that, from the age of Antigonus to this period, the Nabataei had in-
lakited the land of Edom, com:an'y known wh Idumaea, and in timate that there wa fo "omen tis whatever betwen the Tdumamin of lotra in tha Angustine perion, and the chiblen of Esan; then were, in fowt, Nalatamans, and therefore, according t. Joseqhas sud other ancient authoritios, Ishmathite Arabse How or when thoy hat diyposerssed thaBlemites does not apprar in history, wor what had bereme of the remmant of the E1) mites (1sobinen, Jith. Fies. vol. ii. pp. 558,559 .) Put white Judus Naccabaets was on terms of frimendship, with the Nabataci, he was earrying on a war of extern ination atainst the Ed mites. (Joseph. Ant. xii 8. § I ; I Maccub. v. 3.) It is worthy of remark, howeser, thate the Idunatems with whon Myreauss was in alliane, oxer whom Aretas reimed, and fom whin Heroll was spumg, are expressly said to be Nabiotawns (Auk. xir. 2. § 3, 3. §§ 3, 4), whome alliance was refuscet by Pompey, on actount of their insutitude for war. And this identity is further prowd hy Strabn, who writes that the Idumacans and the lake (A-phaitides) ocertpy the extreme west (?) corner of Jubata : - " These limmatans are Nahatacans ; but being expelled thence in a sedition, they withdrew to the Sows and er haced their ens. funs." (xvi. p. 260.) This recoenition of the Nalatacial olicin of the later flamacans, prowes that the name is to be regarded is a geograyhiral, rather than as a gemenlugical designation. Pliny (vi. 32) throws little light upon the suljecet, merely making the Nahataci contiguons to the Menite Arats, with whan they were more prolahily identical, und stating that the ancimens had placed the Thimanari mest to them (i, c. on the F..) ; in the place of whou lie names seseral other tribes, as the Twcui, Sachlori, Arrotwh, \&e. (Ihial.) But the :tatement of Jusphon that the Nabatami extended fiom the Euphrates th the Red hea, is confirmed by the fiem that the narr" is still to he foum in both : be co rieinss. Thas the name Nalant is applied to a mar-hy district, dereribed by Gilins as $1^{\text {ant }}$ of the " phatrias Chath ane", brtween If asith and

 1. $214 \mathrm{n}^{-}$), while at the other catremity tho name Sabot is givn to a town two days beyonal (i. e. +i.2th) of t.l./turare in the Ifreljar by an Araldian or cay her (situnti, cited by Quatromire, Nitmenime Les Nabute ths, 1,38 ), near where It hu $l$ Nibhit is

that counley afterwards called Irak-Arab, in the most extended schse of that namie, even eomprebending several pravinces beyond the Tigris ; anil it is worthy of remark, that Mi.suudi mentions a remnaut of the Babylonians and Chaldaeans existing in his day in the rery place which is designated the marrhes of the Nabataeans, i.e. in the villages situated in the swampy pround between W"asith and Bitarc. (1b. p. 6fi.) Other anthors mention Nabatarans near J.thrib or Medina, which would account for the Icbel Nibrit in that vicinity; and another section of them in Ealrein, on the eastern coast of the peminsula, who had become Arabs, as the Arab inhabitauts of the province of Oman are said to have become Nabatawus. (Ib. 1. 80) This settlement of Nabatacans in the I'ersien Givlf may be alladed to by Straho, who relates that the Chaldacans, banished from their country, settled themselves in the town of Gerrlia, on the coast of Arabia (xvi. p. 76G); which fart would account for the commercial intercoture between the merchants of Gerrlia and those of Petra ubove referred to; the Nabataei of Petia being a brancls of some family also from Babylon and perhaps driven from their country by tho sume political revolution that dispossessed the refugers of fierrhn. However this may have been, it must be admitted that the very ingenions and forcible arguments of M . Quatremère leave little doubt that this rematkable people, which appears mo suddenly and comparatively late on the stage of Arabian history, to disajpear as suddenly after a briff and brilliant carecr of mercantile activity and surcess, were not natives of the soil, but aliens of athother race aud fanily into which they were subF"puently merged, again to rempear in the annats of their awn original seats. (Ib. pp, 88-90.) Reland gives a different account of the identity of the names in the two quarters. (Palastina, p. 94.) [G. W.]

NABATIIRAE. [Anvaltes]
NABIA'NI (Na\&iavot), a tribe of the Canteasus, whom Sitrabo (xi. T. 506) couples witls the I'arxani (По\% gavol), about the Palus Maeotis. [E. B. J.]

NABLIS a river of Germany, flowing into the Dambe from the north, and probably identical with thu Joubl in Bavaria. (Venat. Fort. vi. 11; Geogr. Rav. jv. 26, who cails it Nabus or Navus.) [1. S.]

NABRISSA or NEBIIISSA (Náspi $\sigma \sigma a$, Strab, iii. 17. 140, 143 ; Ptol. ii. 4.812 ; Nebrissa, in ald coitt. of Plin. iii. 1. s. 3, hut Sillig reads Nabrissa; Nebrissa, Sil. iii. 393), surnamed Veneria, a town of the Turdetmi in Ilispania Bactica, situated upon the arstuary of the river Baetis. Acording to Silius (I. c.) it w.I- colhhrated) for the worship of Dionysus. Suw L.otoriju. (Florez, Fisp. Sayr: xii. p. 60.)

NAlblil M, a river of (iedrosia, mentioned by Pliny (vi. 23. s. 26). It must have been situated near tho muruth of the Arahis, between this river and the Indus; but its exact position cannot be determined. It is mot mentioned in the voyage of Nearchus. [V.]

NACML'SII. [Mametasia.]
NACOLE:IA, NACO'LIA (Naкó入є a town in Phryyia Ppictetus, between Dorylacum athl C tyacum, on the opper course of the river Thymbres. (Strab. xii. p. 576 ; Steph. B. s. r.; 1'til. v. 2. § 22.) In the earlier times, the town duen not seem to have hee: a lace of much eonsequence, bat later writers uften mention it. It has acyuiral some celcbrity from the fact that the emperir Vallas there defeated the usurper Procopius. (Amm. Mare xxvii .27 ; comp, Zosim. iv. 8 ; Sucrat.
Whcturbort(m) iv. 8.) In the reign of

Arculius, N.icolefir mas occupied by a Gothic garrison, which revolted against the emperur. (Pliilostorg. xi. 8; comp. Hierocl p. 678 ; Conc. Chalced. p. 5; \%.) The Peuting. Table places it 20 miles south of Dorylaeum, and Col. Leake (Asia Minor, p. 24) is inclined to identify the place with Pismesh Kalesi, near Doganlu, where he saw some very remarkable, apparently sepulchral, monmients. But the monuments alluded to by Leake seem to have belonged to a more important place than Nacoleia, and Texier (Descript. de I Asie Mia. vol, i.) asserts that it is proved by coins that Nacoleia was situated on the site of the modern Sidighasi, on the north-west of Doganlu.
[L. S.]
NACO'NA (Naки́v7, Steph. B. : Eth. Naк世vaios), a tuwn of Sicily meationed only by Stephanus of Byzantium, who cites Plilistus as his authority. The accuracy of the name is, however, confirmed by cuins, the earliest of which bear the legend NaKONAION, while those of later date have NAK $\Omega$. NAION. From one of the latter we learn that the town had been occupied by the Campanians, apprarently at the same period with Aetna and Entella. (Millingen, Ancient Coins, pp. 33-35; Sestivi, Lett. Sun. rol. vii. pl. 1.) There is no clue to its position.
[E. H. B.]
NA'CRASA (Nákpaza), a torn in the north of Lydia, on the road from Thyatira to Pergamum. (1'tul. v. 2. § 16; Hierocl. p. 670, where it is called Asparos.) Chishull (Ant. Asiat. p. 146) has identified the place by means of coins with Bakhir, or Bakri, somewhat to the north-east of Somma. (Comp. Arundell, Seven Churches, p. 276.) [L. S.]

COIN OF NACEASA.
NaEbIS or Nebis. [G.mlatectu, Vol. I.p. 933 ; Mivies.]

NaELUS (Nainos, Ptol, ii. 6. § 5), a river on the north cuast of IIspania Tarraconensis, in the territory of the Paesici, a tribe of the Astures. Now the .ialon.
NAGADIBA (Nayáòı6a, Ptol, vii. 4. § i: E:th. Naydór6ot, Ptol. vii. 4. § 9 ), a town in the NE. corner of the island of Taprobane or Ceylon, at no great distance from the capital Anurgramnum. Ptolemy gives the same name to one of a group of ixlands which, he states, surrounded Ceylon. (vii. 4. § 13). The name may be a corruption of the Sanscrit Nagadvipa, which would mean IEland of Snakes.
[1.]
NAGARA (Náqapa), a city in the XW. part of India intra (Gangem, distinguished in I'tolemy by the title $\mathfrak{\eta}$ кail $\Delta$ tovvo $\delta \pi 0 \lambda_{i s}$ (vii. 1. § 43). It is no doubt the present Nagar, betreen the Kíbul river and the Indus. From the second name which Ptolemy has preserved, we are led to believe that this is the same place as Nysa or Nyssa, which was spared from plunder and destruction by Alexander becanse the inliabitants asserted that it had been foundel hy Baccius or Dionysns, when be conquered the Indians. (Arrian, Anab. v. 1; Curt. viii. 10. § 7.) A mountain called Jleron was said to overbang the city, which whis sisg cinitered cifh/tin
lepe 1 of Bacchus having been reared in the thigh of $Z$ cus.
NAGARA. [MarsyabaE.]
NAGEIRI (Ná $\begin{gathered}\text { epot or Navíyetpot, Ptol. vii. } 4 .\end{gathered}$ § 9), ofe of the two most southern tribes of Taprobane (Ccylon). They appear to lave lived in the immediate neighbourhood of what P'telemy calls, and what are still, "the Elephant P'astures," and tu liave had a town called the city of Diongsus (Diovicou Tóds or ärpov), which is prubably represented now by the ruins of Kattregam (Davy, Account of Ceylon, p. 420; liitter, Erdkunde, vi. p. 22); if these are not, as some have supposed, the remains of Murdulamne.
NA'GIDUS (Náyíos: Eth. Nayibeús), a towu of Cilicia on the coast, said to have been colvnised by the Sumians. Stephanus B. mentions an ioland named Nagidusa, which corresponds to a little rock about 200 feet long, close to the castle of A namour: (Strab. xiv, p. 670; Mela, i. 13. §5; Scylax, p. 40 ; Sieph. B. s. ...; Beaufort, Karamania, p. 206; Cramer, Asia Minor, vol. ii. p. 326.

coin of Nagides.
NAGXA'TA (Náqvara, Ptol. ii. $2 . \S 4$, in the nl editt. Máyrata), an important town ( $\pi$ óds è è $\pi i$ $\sigma \eta \mu 05\}$ on the west coast of Ireland, in the territory of the Nagxitae (Nayuâtai, Ptol. ii. 2. § 5), probably situated upon Sligo Bay.

NAHALAL (NaSaúN, LXX.), a city of the tribe of Zabulon, mentioned only in Joshua (xix. 15). Ensebius identifies it with a village named Xila (Net/á), in Batanaea; but Reland justly remarks, that this is without the territory of the tribe of Zabulon. (Palaestina, s. e. p. 904.) [G. W.]

NAHARI ALI, one of the mast powerful tribes of the Lygii, in the north-east of Germany. Tacitus (Germ. 43) relates that the country inhabited by them (probably about the Vistnla) contained an ancient and mncb reverel grove, presided over by a priest in female attire. It was sacred to twin gods called Alcis, whom Tacitus identifies with Castor and Pollux. (Latham on Tae. Germ. l. c.; Sprengel, Erlaiter, au Tac. Germ. p. 140.) [L. S.]
NAIN (Naiv), a village of Palestine, mentioned by St. Luke as the scene of the raising of the widow's sin (vii. 11). Eusebius places it two niles S. of Mount Tabor, near Endor. in the district of Scythopolis (Onomast. s. ve. 'H $\nu \mathrm{o} \dot{\omega} p$ and Naiu), where a poor village of the same name is found at the present day, on the nortbern slope of Little Hermon, and as short distance to the W. of 'Ain-dor. (Robinson, Bib. Ree. mol. iii. p. 226.)
[G. W.]
NAloth (Navà $\theta \dot{\epsilon} \nu$ ' Pauâ, LTXX. in 1 San. six. 18, 19. 22, 23). [R.ммL.]
[G. W.]
NAISSt'S (Naīo $\sigma$ ós, Steph. B. s. c. ; Naïoros, Ptol. iii. 9. §6; Náíros, Zosim. iii. 11; Naïós, Hicrocl. p. 654), an important town in Upper Moce sia, situated in the district Dardasia, upon an eastern tributary of the river Marsus, and upon the military road ranning through this country. It was in the nfighompred of Affor (Hht Claudius 11. gained
his victory over the Goths in A.n. 269 (Zosim, i. 4.j) ; but the town is chiefly memoralhe as the birthplace of Constantine the Great. (Stoph. B z. v.; Conat. Purph. de Them. ii. 9. p. 56. ed. Bonn.) It was destroyed by the Hums under Attila (l'riseus, p. 171, ed. Bum.), but was restored by Justimian (Procop, iv. 1, where it is called Naisopulis). It still exists undor the name of Nissa, upon the river Nissara, an affluent of the Morava.

NALATA. [1,MMLTLA.]
NAMADCN (Náuåos, or Nauápms, Ptol. vii. J. $\left.\$ S_{5} 5,31,62,6 . \overline{3}\right)$, a great siver of Wistern lulia, which, after risine in the M. Vindius ( Fioulhya Mountains), falls into the S . Barygazemus ( Giulf of (ianday) not far fonn the town of Beroach. In the It riph. M. Erythr. (Gomyr. Graec. vol. i. p. 291 , ed. Mïller) the river is called Nammadius ( $N a \mu \nu \alpha{ }^{\circ} \mathrm{J}$ os ) The present name is Nirbuulle, which, like the Greek form, is doubtless derived from the Sanserit Narmada, "plensant." (Forbes, Oricntal Mem. ii. 11. 8, 104-112.) [ $\mathrm{V} \cdot]$
NAMNETES, NANNE'TES (Naup ii. \&. §9). for there is authmity for luth forms, were a fiallic people on the moth site of the Liger (Loina), and on the sea. The river scparated them from the Pictones or l'ictnvi. (Strab. iv, p. 190.) Thesr thiof town was Condivionm (Juntes). When I:cesar was carrying on lis war with the Veneti, these maritime cialli called in to their aid the (hismi, Xannetm, and other neishbouring people. (Cacs. F. 6. iii. 9.) The Bhivates l'ortus of P'tolemy is within the linits of the Nammetes. The former diocese of Nauts a sceeted the limits of the temritory of the Nametes.
[G. L.]
NANAGE"NA (Navaroúvas, Ptol. vii. 1. $\$ 5$ 7, 32, 36), a considerahb, river of Wiwtem India, which riser, like the Verlumhin, in the Vinerloge Momatains, and flows into the Intand Oceari to the S of the fornar diver, mint fir trom Sorut. Its procent name is the Juputi or Jupli. (Lassen, Ind. Alterth. vol. i. ph sis.

NA.lGEIRI. [NAGEMGL]
NANIUA'TES, a peeple who borlered on the Allheree. who in Casesar's tinne were inchuded within the limits of the 1'rovincia. Caesar (B. G. iii. 1) at the clise of the eampaign of r. c. 57 sent Servius (ialla with nome trongs into the combtry of the " Nantuatos Veragri and Sedmi, who extend finm the borters of the Allobrugts, the Lacus Lemannus and thie river Fifune to the summits of the Alps." The prition of the sichusi in the valley of the Rhone abont sitten or Sion, and of the Varsuri lower dasn at Martigny or Marlinach, being asertainel, we tunt place the Nantuates in the Clewbleris, on the sumth sile of the Leman lake, In position which is couf mumble to Cole-ar's text. Strabo (iv. p. 204) who probally got liv information from Camsar's work, sjeaks " of the Vemasti, Nantuatae, and the loman lake;" tiom which we might infir that the Nantuates wome near the lake. An inseription in lownur of Augustas, which according to dinicl:mon's testimuny was found at Mourice, which is in the Fithis lower down than Mfartigny, emintins the words "Nantuates jatrono ;" and if the insertiption belones to the spot where it is found, it is some evrdence that the Niuntuates were in the lower part of the loluis. But if the Niantuates were nei hbours of the Alhblowes, they mmst have extended nestixard alone the onuth lank of the lake into the Chubluis. "Thy (Gumbturives that part of Savoy which lefortyzec may
belween the Arve and the Valais. It is not certain how far the Allobroges extended along the Lenaan lake east of Geneva, which town was in their territory. It has been observed that the word Nant in the Celtic language signifies "running water ; " and it is ssid that in the dialeet of Savoy, cvery little mountain streain is called Nont, and that there are many streams of this name. Nant is also a Welsh word for stream.

There is another passage in Caesar, where the mame Nantuates occurs in the common texts ( $B . G$. iv, 10), which has caused great difficulty. Ile says that the Rhenus rises in the country of the Lepontii who occupy the Alps, and that it flows by a long distance (longo spatio) through the eountry of the Nantnates, Helvetii, and others. Walckenaer affirms (Geog. gc. vol. i. p. 558) that the best and tho greater part of the Miss. of Caesar have Vatuatium; but this is not true. The readings in this passage are Nantuatiusi, Natuantium, Vatuantium, Mantuantium, and some other varieties. (Caesar, ed. Schreid.) Strabo (iv. p. 192) says that the Actuatae (Aitoucital) inhabit the first part of the course of the lhine, and that the sources of the river are in their country near Mount Adulas. Casaubon changed Aetuatae into Nantuatae to make it agree with Caesur's text, and Cluver changed it into Helvetii. Both changes are opposed to somnd eriticism. The name in Caesur's text is not certain, and in Strabo it may be wrong, but nothing is plainer than that these people, whatever is their name, are in the valley of the Rhine. Oberlin in his ctlitiom of Caesar has put the name " Sarunetium" in place of "Nantuatium;" but the Sarunetes of Pliny were in the valley of Sargans. Groskurd (Transl. Strab. vol. i. p. 192) has adopted the alteration "Helvetii" in lis translation; and very injudicionsly, for the Helvetii were not in the hich Alps. Vkent (Giallien, p. 349) would also alter Strabo's Aetuatae into Nantuatae to fit the cummon text of Caesar ; and he gives lis explanation of the pasition of the Namtuatae, which is a very bad explanation. The Nantuates ocour annotg the Alpine peoples who are mentioned in the Trophy of Augustus (Plin, iii. 20) and they are placel thus : " Lepontii, Uberi, Nantuates, Nelnni, Veragri," from whicl, if we can conclude anything, we may conclude that these Nautuates are the Nantuates of the Lourer Valnis.

## NAPAEL. [Tatrica Cuersunests.]

NAPARIS' (Námapis, Herod, iv. 48), an affluent of the Ister, identified by Schafarik (Slawische Alterthimen, vol. i. p. 506) with the Assus of the 1'eutinger Lable. It is one of the rivers which take their source in the Transylvonian Alps, probably the Anluschich.
[E. B. J.]
NAI'A'l'A (Nánara, Strab. xvii. p. 820; P'tol. iv. 7. § 19. viii. 16. §8; Namatai, Steph. 13. s. v.; Tavánท, Dims Cass, liv. 5.), was the eapital of an Aethiopian kingdom, north of the insolar region of Neroc, and in about lat. $19^{\circ} \mathrm{N}$. There is, however, preat difficnlty in determining the true position of Nayata, as strabo (l. c.) places it much farther N. than Pliny, and there is reason for supposing that it is the designation of a royal residence, which might be moveable, rather than of a fixed locality. litter (Ervllounde, vol. i. p. 591) brings Nippata as far north as Primis. (Ilrim), and the ruins at $I_{p}$ sambin, while Mannert, Lkert, and wther geogra-
 nhafidyofly friat Neroe. It is, how-
ever，generally placed at the E．extremity of that great bend of the Nile，which skirts the desert of Ba － hiouda［Nubaz］，and near Mount Birkel（Gebel－el－ Birkel），a site which answers nearly to the descrip－ tion of Napsta，in Pliny（l．c．）．Napata was the furthest point S．beyond Egypt，whither the arms of Rome penetrated，and it was taken and plundered by Petronius，the lieutenant of Angustus，in B．c． 22. （Dion Cass．liv．5．）Nor dues Napata seem ever to have recovered its earlier greatness；for Nero＇s sur－ veyors found only an inconsiderable town there，and after wards all traces of this city vanish．The govern－ ment of Napata，like that of Merue，was often com－ mitted to the hands of women，who bore the title of Candace（Acts of Apost．viii．27；Enseb．Hist． Eccles．ii．1；Tzetzes，Chiliad．iii．v． 885 ）；and in the kingdom of Schendy，Burckhardt fonnd in the present century a similar regimen．Napata，if not a culony， was probalily at one time among the dependencies of Meroe．The government and religion were the same in both；and from the monuments discovered in either，both seem to have been in a similar state of civilisation．If Merave，indeed，represent the ancient Najata，it seems to follow that the latter city was the second capital of the Mesopotamian region of Mieroe．

Napata owed much of its wealth and importance to its being the terminus of two considerable cara－ van routes：－（1）One crossing the desert of Bahi－ ouda；（2）The other further to the N．running from the city to the island Gagaudes in the Nile（Ilin． vi．35），the modern Argo．（Russegger，Karte von Nubien．）Althongh Napata was surrounded by Nomade hordes，its proper population was probably as civilised as that of Meroe，at least its wealth pre－ supposes settlement and security．Its commerce consisted in an interchange of the products of Libya and Arabia，and it was near enongh to the marshes of the Nile to enjoy a share in the profitable trade in ivory and hides which were obtained from the chase of the hippopotamus and elephant．If the ruins which are found near Mount Birkel represent Napata，the city can have been second only to the golden city of the Aethiopians，Meroe itself．（Dio－ dor．liii．6．）On the western bank of the Nile are found two temples and a considerable necropolis． The former were dedicated to Osiris and Ammon； and the sculptures respresenting the Ammonian and Osirian worship，are inferior in execution and design to none of the Nubian monuments．Avennes of sphinnes lead up to the Anmonium，which exhibits in its ruins the plan of the great temples of Aegypt． On the walls of the Osirian temple，which Calli－ and（Lifsle de Meroe）calls a Typhonium，are re－ presented Ainmon－Ra and his usual attendants． The intaglios exhibit Ammon or Osiris receiving gifts of fruit，cattle，and other articles，or offering sacrifice；strings of captives taken in war are kneeling before their conqueror．On the gateway leading to the court of the necropolis，Osiris was carved in the act of receiving gifts as lord of the luwer world．The pyramids thenselves are of con－ siderable magnitude；but having been built of the sandstone of Mount Birkel，have suffered greatly from the periodical rains，and have been still more injured by man．

Among the rnins，which probably cover the site of the ancient Napata are two lions of red granite， one bearing the name of Amuneph 111．the other of Amuntuonch．They were brought to England by Lord Prudhoe，and now stand at the entrance to the

Gallery of Antiquities in the British Museum． The style and execution of these figures belong to the most perfect period of Aegyptian art，the aviiith dynasty of the Pharaohs．Whether these lions once marked the southern limit of the dominions of Aegypt，or whether they were trophies brought from Aegypt，hy its Aethiopian conquerors，cannot be determined．（Hoskins，Travels，Pp．161．288； Callinud，L＇Isle de Meroe；Transact．of Royal Soc． Lit．2nd Ser．vol．i．p．54．）
［W．B．D．］
NAPETINUS SINUS（ $\delta$ NaməTivos кó入жos） was the name given by some writers to the gulf on the W．coast of Bruttium more commonly known as the Terinaeus Sinus，and now called the Gulf of St． Eufemia．We have no account of the origin of the name，which is cited from Antirchus of Syacuse both by Strabo and Dionysius．（Strab．vi．p． 255 ； Dionys．i．35．）Aristotle calls the same gulf the Lametine Gulf（ $\delta$ 几a $\mu \eta$ тivos кó入тos，Arist．Pol。 vii． 10 ），from a town of the name of Lametium or Lametini ；and in like manner it has been generally assumed that there was a town of the name of Nape－ tiom，sitnated on its shores．But we lave no other evidence of this；an inscription，which has been frequently cited to show that there existed a town of the name as late as the time of Trajan，is almost certainly spurious．（Mommsen，Inser．Regn．Neap． App．No．936．）
［E．H．B．］

## Naphtali，［Palarstina．］

NAPOCA．［DACIA，Vol．1．p． 744 ，b．］
NAR（ $\delta$ N $\alpha \rho$, Strab ．：Nera），a considerable river of Central Italy，and one of the principal tributaries of the Tiber．It rises in the lofty group of the Apennines known as the Monti della sibilla（the Mlons Fisceilns of Pliny），on the confines of Um－ bria and Picenam，fron whence it has a course of about 40 miles to its conflnence with the Xiber， which it enters 5 miles above Ocriculum，atter florring under the walls of Interamona and Narnia． （Strab，v，pp．227， 235 ；Illin．iii．5．s．9；Lucan． i． 475 ；Vib．Seq．p．15．）About 5 miles above the former city，it receives the tributary stream of the Velinus；a river as large as itself，and which brings down the accumulated waters of the Lacus Velini，with those of the valleys that open out at Reate．The Nar and Velinus together thus drain the whele western declivity of the Central Apennines through a space of above 60 miles．The Nar is remarkable for its white and sulphureous waters， which are alluded to by Emmius and Virgil as well as Pling．（Ennius，Avn．vii．Fr．19；Virg．Alen． vii． 517 ；Plin，iii．12．s．17．）it is singular that the last writer has confounded the Nar with the Yelinus，and speaks of the former as draining the Lacus Velini，into which it falls mear Reate．Both Cicero and Tacitus，on the contrary，correctly refre－ sent the waters of the lake as carried off into the Nar，which is now effected by an artificial cut forming the celebrated Cascade of the Jelino，or Falls of Terni．This channel was first opened by NI＇．Curius，about B．c． 272 ，but there must always have been some natnral ontlet for the waters of the Velino．（Plin．l．c．；Cic．ad Att．iv．15；Tac． Ann．i．79．）The Nar was reckoned in ancient times navigable for small vessels；and Tacitus speaks of l＇iso，the murderer of Germanicus，as embarking at Narnia，and descending from thence by the Nar and the Tiber to Rome．（Tac，Aun． iii． 9 ：Strab，v．p．227．）

c. $4 ., 5$ It las been conjectotel that the name Mantus tras given to the plawe becanse of the warlike natives of tha conntry :1 ainst whom the setrlers lad to protect themselves. But this is not probible. Others, again, haw eonjuetured that its name is deriverl from the legio Martia (V'ell. Pater. ii. 8, pd. Bumami) ; and the orthngraplyy Martia is defended by an jnscriftiun, Narbo Mart. (Gruter, ecsxix.), and a coin of Goltzius. To this it is objected, by a writer quoted by Ľkert (Callien, p. 410), that the Legio Martia was first formed by Angustus, and that Cirmo mentions the title Martius. (Ad Fam. X. 33.) Forbiger capios Ukert. It appears that neither of them lowked at Cicero's letter, in which he speaks, but of Narbo Martius or Marcius, lut of the legio Martis, which existed before the time of Aumnstus. Cicero, Dowever, does speatk of Nabon Marcius, as it stanis in Orelli's text. (Pro Fomt. c. 1.) The Latin MSS. write the word hoth Marcius ;und Martius; and the same variation occurs in many other words of the same fermination. The most pmobable conclusion is, that the name Martius or Marcius is the mame of the consul Marcins (b. C. 118), who was fighting in this year against a Lighatan people, named Shent. The name may have bon written Narlo, Marcius in Cicero's time, and afterwards cormuptel.

Xarbo was an uld town, placed in a gond position on the rand into Spaio and into the basin of the Goronne; a commercial plare, we may cortainly assume, from the earliest time of its existence. Thare was a tradition that the conntry of Narh muse was once necupies? by Bebryces. (1)ion Cass. Fixeg. I ates, vi. ed. Rein., and the reference to Zoyaras.) The entlist writer who mentions Narbn is Ilecatacus, quoted ho Stephamus; and, accordingly, we conelude that Narbo was well known to tho Grecks in the fifth century before the Christian acra. The first Roman settloment in South Gallia wats Aquae Sestiae (Aix), on the cast side of the 1:ione. The sccond was Narbo Marcius, by which the Romans secured the road into Spain. (icero call. Narbo " a colony of Roman citizens, a watch tuwer of the Romam jeople, and a bulwark epposed and placerl is front of the rations in those parts." I) aring Caear's wats in Gatlia this Roman colony was an inmortant pusition. When $l^{\prime}$. Crassus invadul Aquitamia (B, c. 56) he got belp from Tolosa, (arcaso, and Narbo, at all which places there was a master-roll of the fighting oien. ( $B$. ( $f$, iii. 20.) In the great rising of the cialli (B. C. 52), Narbo Was thriatenal by Lucterius, but Cacsar came to its relref. ( $1 . G$, vii. 7.) $A$ second colony twas suttled at Narbs, or the old one rather strengtheneel hy a supplemmontun under the dictator Caesar (Sucton. Tiber. c. 4) by Tiberius Clandins Nero, the father of the empleror Tiberius. Some of the tenth legion, Caesar's farourite legion, were settled here, as we may infer from the nane Decumanorum Cohmia. (1'lin. iii. 4.) The name Julis Jaterna, which appears on inscriptions and in Martial, is detived from the dietator Caesar. 'The establishnent of Narbo was the canse of the decline of Massilia. Strabo, who wrote in the time of $\mathrm{Au}-$ guntus and Tiberins, says (iv. p. 186): "that Narbo is the port of the Voleae Arccomici, but it might more properly be called the port of the rest of Coltice; so mach dues it surpass other towns in trade." (The latter part of Strabo's text is corrapt hove.) ' 2 he tin of the north-west part of the Spanish
yevienta and of Britais Fanyed by way of Narbo, as
it did also to M.tssalia. (Diod. v. 38.) There was at Narbo a great variety of dress and of people, who were attracted by the commercial alvantages of the city. It was adorned with poblic buildings, after the fashion of Roman towns. (Martial, viii. 72; Auson. Narbo ; Sidon. Apullin. Carm. 23.) A temple of Parian marble, probally some poetical exaggeration, is spoken of by Ausonius; and Sidonius euumerates, in half a dozen miserable lines, the glories of ancient Narbonne, its gates, porticues, formm, theatre, and other things. He speaks of a mint, and a bridge over the Atax. The coast of Narbonne was and is famed for oysters.

Nut a single Roman monument is standiog at Narbonne, but the sites of many bnildings are ascertained. Nomerous architectural fragments, friezes, bai-reliefs, tombstmes, and inscriptions, still remain. Some inscriptions are or were preserved in the courts and on the great staircase of the episcopal palace. There is a museum of antiquities at Narbonne, which contains fragments of mossic, busts, heads, cinerary urns, and a great number of inscriptions.
[G. L.]
NaRDINIUM (Napסívov, Ptol. ii. 6. §34), a town of the Saclini, a tribe of the Astures, in Hispania Tarraconensis, probably near Villatpando on the Ezla. (Sestini, p. 172.)
NARISCI, a German tribe of the Sucri, occupying the conntry in the west of the Gabreta Silva, and east of the Hermunduri. They estended in the north as far as the Sudeti Montes, and in the south as far as the Danube. In the reign of M. Aurelius, 3000 of them emigrated sonthward into the Romau province. (Dion Cass. Isxi. 21, where they are called Napıatai.) After the Marcomannian war, they completely disappear from history, and the country once occupied by them is inhabited, in the Peuting. Table, by a tribe called Arnalansi. (Tac. Germ. 42; Jul. Capitol. 11. Ant. 22.) Ptolemy (ii. 11. § 23) calls them Yaristi (Ouapıa⿱㇒日: ), which is pussibly the more geauine form of the name, since in the middle ages a portion of the conntry once inlabited by them bore the name of Provineia Variscarum.
[L. S.].
NA'RNIA (Napvia, Strab, Ptol.: Eth. Narniensis: Narni), one of the most important cities of Unbria, situated on the left bank of the river Nar, about 8 miles above its confluence with the Tiber. It was on the line of the Via Flaminia, by which it was distant 56 miles from Rome. (Itin. Ant. p. 125; Itin. Hier. p. 613; Westphal, Rö̀m. Ǩanıp. p. 145.) It appears to have been an ancient and important city of the Umbrians, and previous to the Roman conquest bore the name of Nequinum. (Plin. iii. 14. s. 19; Liv. x. 9: Steph. Byz. writes the name N $\eta$ кovía.) In B. C. 300 , it was besieged by the Roman consul Appnleius; but its natural strength enabled it to defy his arms, and the siege was protracted till the next year, when it was at length surprised and taken by the consul M. Fulvins, в. C. 299. (Liv. x. 9, 10.) Fulvius was in conseqnence honoured with a triumph "de Samnitibus Nequinatibnsque" (Fast.Capit.); and the Ronan senate determined to secure their new conquests hy sending thither a colony, which assumed the Dame of Narnia from its position on the banks of the Nar. (Liv. x. 10.) It is strange that all mention of this colvny is omitted by Velleins Paterculus; lat its name ayain occurs in Livy, in the list of the thirty Latin colonies during the Second Punic War. On that occasion (B. C. 209), it was one of those which professed themselves exhausted and unable
any longer to bear the burdens of the war; for which it was subsequently punished by the imposition of a double contingent and inereased contribution in money. (Liv. xxrii. 9; xxix. 15.) Yet the complaint seems, in the case of Narnia at least, to have been well founded; for a few years aftervards (B. c. 199), the colunists ayain represented their depressed condition to the scnate, and obtained the appointment of triumvirs, who recruited their numbers with a fresh body of settlers. (Id. xxxii. 2.) Daring the Second Punic War, Narnia was the point at which, in B. c. 207, an army was posted to oppose tho threstened advance of Hasdrobal upon Rome; and hence it was some Narnian horsemen who were the first to bring to the capital the tidings of the great victory at the Metauras. (Liv, xxvii. 43. 50.) These are the ouly notices we find of Narnia under the repablic, bnt it seems to have risen into a flourisling municipal town, and was one of the chief places in this part of Umbria. (Strab. r. p. 227; Plin. iii. 14. s. 19; Ptol. iii. 1. § 54.) It probably owed its prosperity to its position on the great Flaminian highway, as well as to the great fertility of the subjacent plain. In the civil war between Vitellins and Vespasian, Narnia bore an important part, having been nccupied by the generals of the furmer as a stronghold, where they hoped to check the advance of the army of Vespasian; but the increasing disaffection towards Yitellius caused the troops at Narnia to lay down their arms without resistance. (Tac. Mist. iii. 58-63, 67, 78.) The natural strength of Narnia, and its position as commanding the Flaminian Way, also rendered it a fortress of the utmost inpportance during the Gothic wars of Belisarins and Narses. (Procop. B. G. i. 16, 17; ii. 11; iv. 33.) It became an episcopal see at an early period, and continued throughout the middle ages to be a considerable torn.

The position of Narriia on a lofty hill, precipitous on more than one side, and balf encircled by the waters of the Nar, which wind through a deep and pietaresque wonded valley immediately below the town, is alluded to by many ancient writers, and described with great truthfulness and accuracy hy Claudian, as well as by the historian Procopius. (Clandian, de IT. Cons. Hom. 515-519; Sil. Ita). viii. 458 ; Martial. vii. 93 ; Procop. E. G. i. 17.) It was across this ravine, as well as the river Narr itself, that the Via Flaminia was carried by a bridge constructed by Augustus, and which was considered to surpass all other structures of the kind in boldness and elevation. Its ruins are still regarded with admiration by all travellers to Rome. It consisted originally of three arches, built of massive blocks of white marble; of these the one oo the left bank is still entire, and bas a height of above sixty feet ; the other two have fallen in, apparently from the foundations of the central pier giving way; but all the piers remain, and the imposing style of the whole structure justifies the admiration which it appears to have excited in ancient as well as modern times. Martial alludes to the bridge of Narnia as, even in lis day, the great pride of the place. (Procop. l. c. ; Martial. vii. 93. 8; Cluver. Ital. p. 636; Eustace's Italy, vol. i. p. 339.) The emperor Nerra was a native of Narnia, though his family wonld seem to have been of foreign extraction. (Viet. Eprit. 11 ; Caes. 12.) [E. H. B.]

NARO ( $\delta$ Nápov, Ptol. ii. 16. § 5 ; Plin. iii. 26 ; Nar, Pomp. Mela, ii. 3. § 13 ; Narcnum, Geogr. Rav. iv. 16: Narenta), a river of Illyricum, which Scylax (ep. 8, 9) describes as navigable from its

 ts hav. vide on th prongtized by

NASANONES.
Tjaton and Pras near lower Tjaterli. (Northern (i.t.... vol. iv. p. 471, seq.) The town Narthacium is muntimed by Ptuleny (iii. 13. § 46 ), and should probatly be restored in a passage of Strabo (ix. p. 434), where on the Ms. there is only the termination . . . . . toy. (Soe Groskurd and Kramer, ad lnc.)

NARTHE'CIS (Naponkis), a small island in the enst of Samos in the strait between Mount Myeale and the island of Samos. (Strab. xiv. p. 637 ; Steph. B. s. v.; Suid. s. v. Napenk.) [ L. S.]

NARYCUS, NARYX or NARY'CIUM (N $\alpha-$ puкus, Strab. ix. p. 425 ; Nápug, Steph. B. s. v.; Narycium, Plin. iv. 7. s. 12 ; in Diod. xiv. 82 and xvi. 38, "Apukas and "Apúka are false readings for Nipuka : Eth. Napúktos), a town of the Opuntian Locrians, the reputed birthplace of Ajax, son of Oileus (strab. Steph. B. ll. cc.), who is hence called by Otid (.Met. xiv. 468) Narycins heros. In n. c. 395, Ismemas, a Bueotiaa commander, undertowk an expedition against Pbocis, and defeated the Phocians near Narys of Locris, whence we may conclude with Leake that Narys was near the frontier of Phocis. (Diod. xiv. 8.2.) In 352 Naryx was taken by Phayllus, the Phucian commander. (Diod, xvi. 38.) It is placed by some at Tálande, but by Leake at the small village of Kalapoidhi, where there are a few ancient remains. (Vorthern Greece, vol. ii. p. 187.) As Locri in Bruttum in Italy was, according to some of the ancients, a coluny of Naryx (Virg. Aen, iii. 399), the epithet of Narycian is froquently given to the Bruttian pitch. (Virg. Georg. 11. 438 ; Colum. x. 386 ; Piin. xiv. 20. s. 25. )

NAAMONES (Nagaū̄ves, Herod. ii. 32, iv. 172; Ptol. iv. 5 SS21. 30; Plin. xxvvii. 10. s. 64; Dionys. 1'eriegetes, v. 209; Scylax, p. 47; Stepls. I. s. r.) wete, acconling to Herolotus, the most powerful of the Nomadic tribes on the northern coast of Libya. There is some discrepancy in his accome of their situation, as well as in those of other ancient writers. (Cump. ii. 32, is. 172.) They aptuar. lowever, to have occupied at one time part in (yrenaica and the Syites. Strabo (xvii. p. 857) phom them at the Gireater Syrtis, and beyond them the l'sylli, whoseterritory, according to both Herodotus and straho, they appropriated to themselves. Iliny ( $\mathrm{v}, 5, \mathrm{~s}, 5$ ) says that the Nasamones were originally uamed Mesamonies hy the Greeks, because they dwelt betwern two quicksands- the Syrtes. Ptolemy (iv. 5. $\$ 21$ ) and Diodorus (iii. 3) again remove them to the inland revion of Augila : and all these descriptions may, at the time they were written, have been near the truth ; siure unt only were the Nasamones, as Nomades, a wandering race, but they were also pressed upon by the (irvels in C:yrene, on the one side, and by the Curthamians, wi the other. For when, at a later pond, the houndaries of Carthage and the Regio C.meraica touched at the Pbilenian Altars, which were-ituater in the inmort recesses of the Syrtes, it. is wident that the Nasamones minst have been displacel from a tract which at one time belonged to thom. When at its greatest extrut, their territory. jnclu ins. the lands of the 1'sylli and the oasis of Augila, must have reached iniand and along the shore of the Mediterrancan about 400 geographical indes from Fi. to II:
So lony as they had access to the sea the Sisam nes bad the exil reputation of wreckers, making up for the general barreuness of their lauls by the phumeler of vessels strauded on the

iv. 7.) Their modern represcutatives are equally inhospitable, as the traveller Bruce, who was shipwrecked on their coast, experienced. (Bruce, Tratels, Introdnction, vol. i. p. 131.) The Nasumones, however, were breeders of cattle, since Herodotus informs us (iv. 172) that in the summer season, " they leave their herds on the coast and go np to Aurila to gather the date harvest" - the palms of that oasis being numerous, large, and frnitful. And here, again, io existing races we fiad correspondences with the habits of the Nasamones. For according to modern travellers, the people who dwell on the coast of Derna, gather the dates in the plain of Gegrabib, five days' journey from Augila. (Proceedings of Afric. Association, 1790, ch. x.)

Ilerodotus describes the Nasamones as practising a kind of hero-worship, sacrificing at the graves of their ancestors, and swearing by their manes. They were polygamists on the widest scale, or rather held their women in common; and their principal diet, besides dates, was dried locnsts rednced to powder and kneaded with milk intoa kiod of cake-polenta. Their land produced also a precious stone called by Pliny (xxxvii. 10. s. 64) and Solims (c. 27) Nasamonitis; it was of a blood red hne with black veins.

Herodotus introlnces his description of this tribe, with a remarkable story relating to the knowledge possessed by the accients of the sonrces of the Nile. He says (ii. 32) that certaio Nasamones came from the neighbourbood of Cyreoe, and made an expedition into the interior of Libya; and that they explored the continent as far as the kingdom of Timbuctoo, is rendered probable by bis acconnt of their adventares. For, after passing through the inhabited region, they came to that which was infested by wild beasts ; next their course was westward throngh the desert (Sahara), and finally they were talseo prisoners by black men of diminutive stature, and carried to a city washed by a great river flowing from W. to E. and abounding in crocodiles. This river, which the historian believed to be the upper part of the Nile, was more probably the Niger. The origin of the story perhaps lies in the fact that the Nasamones, a wandering race, acted as guides to the caravans which annually crossed the Libyan coutinent from the territories of Carthage to Aethiopia, Meroe, nad the ports of the Red Sea.
[W. B. D.]
NASAVA (Narav́a, al. Naraúa日, Ptol. iv. 2. § 9), a river of Mauretania Caesariensis, the mouth of which is to the E. of Saldae. This river of Borjeiyah, is made by a number of rivulets which fall into it from differeat directions, and, as the banks are rocky and monntainons, occasion ioundations in the winter. (Shaw, Trav. p. 90.)
[E. B. J.]
NAsCI. [Rimpaei Montes.]
NASCUS (Náбкоs, al. Маб́бкотоs $\mu \eta t \rho \dot{\sigma} \pi$ л^ıs), an inland city of Arabia Felix, in long. $81^{\circ} 155^{\prime}$, lat. $20^{\circ} 40^{\prime}$ of Ptolemy. (Ptol. vi. 7. § 35.) Mr. Forster takes it to be Nessa of Pliny, the chief town of the Amathei, who occupied the present district of Yemama. (Geography of Arabia, vol. ii. 1p. 266, 267.)
[G. W.]
NASI. [CAPHyaE.]
NA'SIUM (Náoıov), in Gallia. Ptolemy names two cities of the Leuci, Tullum (Toul) and Nasium, which he places 20 minutes further sonth than Tullum, and as many minntes east. Both these indications are false, as the Itins, show, for Nasium is on a ruad from Durocortornm (Reims) to Tullan; and consequently west of Toul, aud it is not south. Aa old chronicle places Nasinm on the Ornain or

Ornez, a branch of the Mfaas; and its name exists in Naix or Nais, above Ligny. The Antonine Itin. makes it 16 leagues from Nasium to Tullum. The Table places Ad Fines between Nasium and Tultum, 14 leagues from Nasium and $5 \frac{1}{2}$ from Tnilnm. [As to Ad Fines, see Fines, No. 14.]
[G. L.]
NASUS [OExladae.]
NATISO (Natiow , strab.: Natisome), a river of Yenetia, which flowed under the walls of Aquileia, on the E. side of the city, and is noticed in connection with that city by all the geographers as well as by several other ancient writers. (Plin. iii. 18. s. 22 ; Strab. v. p. 214 ; Mela, ii. 4. § 3 ; Ptol. iii. 1. § 26 ; Ammian. xxi. 12 . § 8 ; Jrraand. liet. 42.) Pliny speaks of the Natiso together with the Tnrins (Aatiso cum Turro), as flowing by the coIony of Aqnileia. At the present day the Natisone, a considerable stream which descends from the $\mathrm{A} \mid$ ps near Cividale, falls into the Torre (evidently the Turrus of Pliny), and that again ioto the Isonzo; so that neither of them now flows by Aqnileia; but it is probable that they have changed their comse, which the low and marshy character of the country renders easy. A small stream, or rather canal, communicating from A quileia with tlie sea, is still called Natisa; but it is clear that the Natis*a of Jornaodes, which he describes (l.c.) as flowing ander the walls of Aquileia, must be the far more important stream, now called the Natisone, as he tells ns it had its sources in the Mons Picis, and it would be vain to look for any monntains nearer than the Alps. Strabo (l c.) also speaks of the Natiso as navigable for ships of borden as far as Aquileia, 60 stadia from the sea; a statement which renders it certain that a considerable river must have flowed moder the walls of that city.
[E. H. B.]
NAVA, the river Nara io Tacitus (Hist. iv. 70) and io Ausonius (Mosella, v. 1) is the Nahe, a small strean which flows into the Rhine, on the left bank just below Bingium (Bingen). [G. L.]

NAVA'LIA or NABA'LLA (Navaria), a small river on the north-west coast of Germany (Tac. Hist. v. 26), either an eastern branch of the Rhine, at the mouth of which Ptolemy (ii. 11. § 28) places the fort Navalia, or some river in the country of the Frisians.
[L. S.]
NAVARI. [Neuri]
NAVARUML. [NetRt.]
MAUBARUD. [Nevki.]
NAU'CRATIS (Naúkpatts, Herod. ii. 179; Strab. xvii. P. 801 ; Ptol. iv. 5. § 9; Callimach. Epigr. 41 ; Plid. v. 10. s. 11 ; Steph. B. s. c.: Eth. Nauкpaziтns or Navкрaтiúтクs), was originally an emporium for trade, founded by colonists from Miletus, in the Saitic nome of the Delta. It stood upon the eastern bank of the Canopic arm of the Nile, which, from the subsequent importance of Nancratis, was sometimes called the Ostium Nancraticnm. (Plin.v.10.s.11.) There was, doubtless, on the same site an older Aegyptian town, the name of which has been lost in that of the Greek dockyard and baren. Naneratis first attained its civil and commercial earinence in the reign of Amasis (B. C. 550) who rendered it, as tegarded the Greeks, the Canton of Aegypt. From the date of his reign until the Persian invasion, or perhaps even the fonnding of Alex:mdreia, Naucratis possessed a monopoly of the Mediterranean commerce, for it was the only Deltaic harbour into which foreign vessels were permitted to enter; and if accideot or stress of weather had driven them
inte any nther port or mouth of the Nile, they were compelied citber to sail round to Xancratis, or 10 trunsmit their cargoes thither in the country buats. Bevides these commercial privileges, the Greeks of Naucratis received from Amasis many civil and religious immanities. They nppointed their own magistrates and officers for the regulation of their trode, custems, and barbour dues, and were permittel the free exercise of their religious worship. Beniles its docks, wharses, and other features of an Hellemic city, Xaucratis, contained four celebrated tomples: - (1) That of Keus, founded by colonists from Acgina; (2) of Ilera, built by the Samians in honnur of their tutclary goddess: (3) of Apollo, erected by the Milesians; and (4) the most ancomt and sumptnons of them all, the federal temple entitled the Helleninm, which was the comnots property of the lonians of Chios, Teos, Phocaus, and Clazomenale; of the Dorians of Rhodes, Cindins, and llal.carmasus; and of the Aetolians of Mytilne. They also observed the Dionysiac festivals; atal sere, acconling to Athenaeus (xiii.p. 596, xv. p. 676), devout wor hippers of Aphrodite.

The two phimeinal manufactures of Nancratis were that of porerhain and wreathes of flowers. The former recemed from the silicions matter ahounding in the earth of the neighbourthod a high glaze; and the putt-ries were importunt enough to give names to the Putter's Gatte and the P'otter's Sitreet, where such wares were exposed for sale. (1.d. xi. p. 480.)

The sarlands were, accurding to Athmaens (xx. p. 6:1, setp.), made of myrthe, or, as was sometimes stid, of flowers eutwined with the flaments of the papyms. Fither these garlands must have beon artitional, or the makers of them possessed some se ret for prearving the natural flowers, since they were experted to Italy, and hell in high esteem by 1). Roman lodieco (Buetti her, Solbinet, vol. i. pp. 22s. sem.) Athomaens gives a particnlar aecount (iv. pp. 150, siv.) of the Prytaneian dinners of the Nameratites, as wel! as of their zeneral disposi-ti-n to laxmions living. Some of their feasts appear to have been of the kind called " $\sigma \dot{\mu} \mu$ Go $\lambda a$," where the eity providel a banqueting-room and wine, but the gnests brought their provisions. At weddine entertaimments it was ferbidden to introlum either eggs or pastry sweetened with honey. Xucratis was the birthplace of Athenaens (iii. I. 73, vii. P. 301) ; of Julius Pollus, the antignary and grammarian ; and of certain ohscure hivturi im, cited by Athenaens, e. g. Leceras, Phylarchus, Paychamms, Herostratus, \&C, Heliodorus (Aethiop. vi. 1. 229) absurdly says that Aristophanes, the comie 1 pert, was horn there. Naueratis, howeter, was the native city of a pernm much more comprictous in lis day than any of the above mentioned, viz., of Cleomenes, commissioncr-general of finures to Alezander the Great, after his conquest of Ar-ypt. But neither the eity nor Aegypt in genemi hal mneh reason to be prond of hime; for he was ey atif: olpressive and dishoneat in his administration; and hating excited in the Delta a gencral fieling of diecontent aqainst the Alacedonians, he was $1^{\text {nith }}$ to death Iy Polle 5 Lagis. (Arrias, Esp. Ahs. iii. 5, vii. 23; 1)indur. xvii. 14; 1'send. Aristat. (teconom. ii. 34. s. 40.)

Ilerodotus probably lamid at N:ucratis, on his ettance into Aegs pt ; V it he dill nit temain there. It was, however, for some time the resdence of the legislator Solon, who there exchancel his Attic oil and honey for degyptian milet ; and is sail to bave
taken sundry hints for his cole of haws frem the statutes of the Pharadhs. (Phutarch, Sulon, 26.)

Naucratis, like so many others of the Ieltaic cities, began to decline after the foundation of Alexandreia. Situated nearly 30 miles from the sea, it conld not compete with the most extensive and commodions laven then in the world; and with the Macedonian invasion its monopoly of the Mediterrancan traffic ceased. Its exact site is unknown, but is snpposed to correspond nearly with that of the modern bamlet. of Sulhaulschar, where considerable heaps of ruin are extant. (Niebobr, Travels in Arabia. p. 97.) The coins of Naucratis are of the age of Trajan, and represent on their obverse a laureated head of the emperor, and on their reverse the figure of Anubis, or a female holding a spear. (hasche, Lexic. R. Numar. s. v.) [W. B. D.]

NAVILUBIO (Plin. ir. 20. s. 34 ; Naovid-入oovíwhos потацой Éкволal, Ptol. ii. 6. § 4), a river on the N. coast of Hispania Tarraconensis, now Naria.

NAU'LOCHUS, an island, or rather reef, off the Sammonian promontory, in Crete (Plin. iv. 12), the same as the Nucmachos of Pomponius Mela (ii, 7. § 13; Höck, Kreta, vol. i. p. 439.) [E. B. J.]

NAU'LOCHLS or NAU'LOCHA (Nav́入oxa, Appian), a place on the N. coast of Sicily, between Mylae and Cape I'elorus. It is known only from the great sea-fight in which Sextus Pompeins was defeated by Agrippa, B. c. 36 , and which was fonght between Mylae and Naulochus. (Suct. Ang. 16; Appian, B. C. v. 116-122.) [Mylae.] Pompeius himself during the battle bad been encamped with his land forces at Naulochus (Appian l.c. 121), and after his victory, Octavian, in bis turn, took up his station there, while Agrippa and Lepidos adwanced to attack Messana. (Ib, 122.) It is clear from its name that Naulochas was a place where there was a good roadstead or ancborage for shipping; but it is probable that there was no town of the name, though Sllins Italicus includes it in his list of Sicilian cities. (Sil. Ital. xiv. 264.) From the description in Appian it is clear that it was situated between Mylae and Cape Rasoculmo (the Pbalacrina Promotory of Ptolemy), and probably not very far from the latter point; but there is nothiog to fix its site more definitely. [E. H. B.] NAL'LOCHU'S (Naúnoxos), a small port on the caast of Thrace, belenging to Mesembria, called by Pliny Tetrapaulochus. (Strab. vii. p. 319, ix. p. 440 ; Plin. iv. 11. s. 18.)

## NALMACHOS. [Navlochus, No. 1.]

NAUPACTUS (Naíлaктos: Eth. Naṽárties: $E^{\prime}$ pakto by the Greek peasants, Lepanto by the Italians), an important town of the Locri Ozolae, and the best harbonr on the northern coast of the Corinthian gulf, was situated just within the entrance of this gulf, a little east of the promentory Antirrlinm. It is said to have derived its name from the Heracleidae having here built the fleet with wbich they crossed over to Peloponoesus. (Strab, ix. p. 426 ; Paus, x. 38. § 10 ; Apollod. ii. 8. § 2.) Though Naupactus was indebted for its bistorical importance to its linrbour at the entrance of the Corinthiso pulf, it was probably eriginally chasen as a site for a city on account of its strong hill, fertile plains, at d copious supply of running water. (Luate, Northern Greece, vol. ii. p. 608 .) After the Persian wars it fell into the power of the Athenians, who settled there tbe Messenians, who had been compelled to leave their country at the end of tho

Thind Messenian War, s. c. 455 ; and during the I'eloponnesian War it was the head-quarters of the Athevians in all their operations in Western Greece. (Paus. iv. 24. § 7 ; Thuc. i. 103, ii. 83, seq.) After tie battle of Aegospotami the Messenians were expelled from Naupactus, and the Locrians regained priseession of the town. (Pans. x. 38. § 10.) It afterwards passed ioto the hands of the Achacans, from whom, howerer, it was wrested by Epaminondas. (Diod. xv. 75.) Philip gave it to the Aetolians (Strab. ix. p. 427 ; Dem. Phitl. iii. p. 120), and hence it is frequently called a town of Actolia. (Scylax, p. 14; Mela, ii. 3 ; Plin. iv. 2. s. 3.) The Aetolians rigorously defended Naupactus against the Romans for two months in e. c. 191. (Liv, xxxvi. 30, seq. ; Polyb. v. 103.). Ptolemy (iii. 15. § 3) calls it a town of the Locri Ozolae, to whom it must therefore have been assigned by the Romans after Pliny's time.
Pausanias saw at Naupactus a temple of Poseidon near the sea, a temple of Artemis, a cave sacred to Aphrolite, and the ruins of a temple of Asclepius (x. 38. $\S \S 12,13$ ). Nanpactus is meotioned by Hierocles (p. $6 \pm 3$ ); but it was destroyed by an earthquake in the reign of Justinian. (1'rocop, B. Goth. iv. 25.) The situation and present appearance of the town are thus described by Leake: - " The fortress and town occupy the south-eastern and sonthern sides of a hill, which is ooe of the roots of Mount Rigini, aud reaches down to the sea. The place is fortified in the manner which was common among the ancients in positions similar to that of E'pakto, -that is to say, it ocenpies a triangular slope with a citadel at the apex, and one or more cross walls on the stope, dividing it into subordinate enclosures. At E"pakto there are no less than five enclosures between the summit aod the sea, with gates of comunupication from the one to the other, and a sile gate on the west leading out of the fortress from the second enclosure on the descent. It is not improbable that the modern walls follow exactly the ancient plan of the fortress, for in many parts they stand upon Hellenic foundations, and even retain large pieces of the ancient masonry amidat the modern work. The present town occupies only the lowest eaclosure; in the middle of which is the small harbour which made so great a figure in ancient history: it is now choked with rubbish, and is incapable of receiving even the larger sort of boats which navigate the gulf." (Northern Greece, vol. ii. p. 608.)

NAU'TLIA (Nauntia), a rock abore Delpbi. [Deiphi, p. 764, a.]

NAU'PLIA (ì Navinia: Eth. Naumiteús), the port of Argos, was situated upon a rucky peninsula, connected with the mainland by a barrow isthmus. It was a very ancient place, and is said to have derived its oame from Nauplius, the son of Poseidon and Amymone, aod the father of Palamedes, though it more probatly owed its name, as Strabo has observed, to its harbour (àmoे тoû qaîs vaval mpo$\sigma \pi \lambda \epsilon i \sigma \theta a u$, Strab. viii. p. 368 ; Pans. ii. 38. § 2.) Pausanias tells us that the Nuuplians were Egyptians belonging to the colony which Danans brought to Argos (iv. 35. § 2); and from the pasition of their city upon a promontory running out into the sea, which is quite different from the site of the earlier Grecian cities, it is not improbable that it was originally a settlement made by strangers from the East. Naoplia was at first independent of Argos, and a member of the maritime confederacy which held its meetings in the island of Calaureti. (Strab.
viii. p. 374.) About the time of the Sucond Mes sedian War, it was conquered by the Argives; and the Lacedaemodians gave to ita expelled citizens the town of Methone in Messenia, where they continued to reside even after the restoration of the Messenian state Ly Epaminondas. (Paus. iv. 24. § 4, iv. 27. \& 8 , iv. 35. § 2.) Argos now took the piace of Nauplia in the Calaureian confederacy; and from this time Nauplia appears in history only as the scaport of Argos ( $\delta$ Naúmitos $\lambda i \mu \eta \nu$, Eurip. Orest. 767;入ipéves Naúmitot, Electr. 451). As such it is meotioned by Strabo (l.c.), but in the time of Pursaoias the place was deserted. Pansanias noticed the ruins of the walls of a temple of Poseidon, certain forts, and a fountain named Canathus, by washing in which Hera was said to have renewed her virginity every year. (Paus. ii. 38. § 2.)

In the middle ages Nauplia was called $\tau \grave{\partial}$ Nav́-
 resumed its avcient name. It became a place of considerable importance in the middle ages, and has contivned so down to the present day. In the time of the Crusades it first emerges from obscurity. In 1205 it was taken by the Franks, and became the capital of a small duchy, which commanded the plain of Argos. Towards the end of the 14th century it came into the hands of the Venetians. who regarded it as one of their most important places in the Levant, and who successfully defended it both against Mahomet 11. and Soliman. They ceded it to the Turks in 1540, but wrested it from them agaio in 1686, when they constructed the strong fortificationa od Mt. Palamidhi. This fortress, althongh reckoted impregnable, was stormed by the Turka in 1715, in whoce hands it remained till the outbreak of the war of Grecian independence. It then became the seat of the Greck goverument, and continned such, till the king of Greece removed his residence to Athens in 1834.

The modern town is described by a recent observer as having more the air of a real town than any place now existing in Greece under that title; having continuous lines of houses and streets, and offering, upon the whole, much the appearance of a second-rate Italian seaport. It is built on the peninsula; and some remains of the Hellenic fortifications may be seen in the site of the walls of Fort Itskale, which is the lower citadel of the town, and occupies the site of the ancient Acropolis. The apper citadel, called Palamidhi (Пa入auñ $\delta 0 \nu$ ), is situated upon a steep and lofty mountaio, and is one of the strongest fortresses in Europe. Although its name is not mentioned by any ancient writer, there can be little doubt, from the connection of Palamedes with the ancient town, that this was the appellation of the bill in ancient times. (Leake, Morea, vol. ii. p. 356, Peloponnesiaca, p. 252; Mure, Tour in Greece, vol. ii. p. 187 ; Boblaye, Récherches, \&fc. p. 50; Curtius, Pelopomesos, vol. ii. p. 389.)

NAUPORTUS (Ná́тортos). 1. (Laybach), a small but navigable river in the south-west of Pannonia, flowing by the town of Nauportus, and emptying itself into the Savus a little below Aemona. (Strab. iv. p. 207, comp vii. p. 314, where some read Naúnovzos; Plin. iii. 23.)
2. A town in the south-west of Pannonia, on the small river of the same name, was an ancient and once flourishing commercial town of the Taurisci, which carried on considerable commerce with Aquileia. (Strab. vii. p. 314; Tac. Ann. i. 10; I'lin iii. 22 ; Vell. Paterc. ii. 110.) But after the
frucuatime of Acm na, at a distan of only 15 in lies from Namportus, the latter phaw lust its furner importance and decayol. Wurbig the ineurrection of the Pamusian legions after the death of All I tha, the town was planderal and destroynd. (Tis: 1. c.) The place is now callol Oler-Laybach: Its Roman name Naupstus (from nas is and pretin) was conmected with the stary of the Argohisut: who were believed on their return to hate : 11. t up the Inter to this phate, and thence to lave f uriol their ships on their shoulders across the Al is th the Adriatic.

aticia, Clinton, F. II. vol. i. p. 164 : Euseb. Churon. ail (11. 11.1.) The memory of Naxos as the earHist of all the Greek settlements in Sicily was preserved by the dedication of an altar outside the twwn to $A$ pollo Archegetes, the divine patron under whese authority the colony had sailed; and it was a cust om (still retained long after the destruction of Naxos itself) that all Theori or envoys proceeling on saered missions to Greece, or returning from thence to Sicily, should offer sacrifice on this altar. (Thuc. l. c.; Appian, B. C. v. 109.) It is singular that none of the writers nbove cited allude to the mrigin of the name of Niaxos; but there can be little doubt that this was derived, as stated by Hellanicus (ap. Steph. B. s. v. Xaגkis), from the presence among the original settlers of a body of colonists from the island of that name.

The new coluny must have been speedily joined by fresh settlers from Greere, as within six years atter its first establishment the Clalcidians at Nitas were able to send out a fresh colony, which foundel the city of Leontini, u. C. 730; and this was speedily followed by that of Catana. Theocles hinnelf became the Oekist, or recugnised founder, of the furner, and Euarehus, probably a Chalcilic citizen, of the Latter. (Thue. l. c.; Symn. Ch. 283-2ی6; Strab. vi. p. 268.) Strabo and Seymnus Chius both represent Zancle also as a colony from Nasos, but no allusion to this is found in Tbncylides. But, as it was certainly a Chalcidic culony, it is probable that some settlers from Nasos joined those from the pareut country. (Strab. vi. p. 268; Scymn. Ch. 286: Thuc. vi. 4.) Callipolis aloo, a city of uncertain site, and Which ceased to esist at an early period, was a colony of Naxos. (Strab. vi. p. 272; Scymn. (Ch. L c.) But notwithstanding these evilences of its early prosperity, we bave very little information as to the carly history of Nasos; and the first fuets transmitted to us concerning it relate to disasters that it sustained. Thus Herodotus tells us that it was one of the citics which was besieged and taken by IJippocrates, desput of Gcla, about b.c. 498-491 (1lerod. vii. 154); and his expressions would lead us to infer that it was reduced by him under permanent subjection. It appears to have afterwards successively Inssed undor the authority of Gelon of Syracuse, and his brother Hieron, as we find it subject to the latter in B.C. 476. At that time Hieron, with a view to strengthen his own power, remosed the inhabitants of Nasos at the same time with those of Catana, and settled them together at Leontini, wbile be repeopled the two eties with fresh colonists from other quarters (1)iol. xi, 49). The name of Nasos is not specifically mentioned during the revolutions that ensned in Sicily after the death of Hieron; but there seems no doubt that the city was restored to the old Chalcidic citizens at the same time as these were reinstated at Catana, B.C. 461 (Jd. xi. 76); and honce we find, during the ensuing jeriod, the three Chakcillic cities, Naxos, Leontini, and Catana, genemally united by the bonds of amity, and maintaining a chase alliance, as opposed to Syracuse and the other D) ric cities of Sicly. (1d. siii. 56, xiv. 14; Thuc, iii. 86 , iv. 25.) Thus, in n.c. 427 , when the Lemtini were harl pressed by their neighbours of Syraeves, their Chateidic hrethren afforded them all the as istance in their power (Thue iii. 86): and when the first Athenan expedition arrived in Sicily under Luches and ('haromdes, the Naxims immeliately jowed theit allance. With them, as well as with I the Ribegins on the oprosite side of the slraits, it is
probable that enmity to their neighbours at Messana w.is a strung motive in inducing them to join the Athenians; and during the hostilities that ensucd, the Messanians having on one occasion, in B.c. 425 , made a sudden attack opon Nasos both hy land and sei, the Naxians vigorously repulsed them, and in their turn inflicted heavy loss on the assailants. (Id. iv. 25.)

On occasion of the great Athenian expedition to Sicily (b.c. 415), the Naxians from the first espoused their alliance, even while their tindred cities of Rhegium and Catana held aloof; and not only furnished them with supplies, but receired them freely into their city (Diod. xiii. 4: Thuc. vi. 50). Heace it was at Naxos that the Athenian fleet first touched after crossing the straits; and at a later period the Nasians and Catanaeans are ennmerated by Thucydides as the only Greek cities in Sicily which sided with the Athenians. (Thnc, vii. 57.) After the failure of this expedition the Chalcidic cities were naturally involred fur a time in hostilities with Syracuse; but these were suspended in 8.c. 409 , by the danger which seemed to threaten all the Greek cities alike from the Carthaginians. (Diod. siii. 56.) Their position on this occasion preserved the Naxiams from the fate which befell Agrigentum, Gela, and Camarina; but they did not long enjoy this immnnity. In B.c. 403, Dionysius of Syracuse, deeming hinself secure from the power of Carthage as well as from domestic sedition, deternived to turn his arms against the Chalcidic cities of Sicily; and having made himself master of Naxos by the treachery of their general Procles, he sold all the inhabitants as slaves and destroyed both the walls and buildings of the city, while he bestowed its territory upon the meighbouring Siculi. (Diod. siv. $14,15,66,68$.)
It is certain that Naxos never recolered this blow, nor rose again to be a place of any consideration: but it is nut easy to trace precisely the events which followed. It appears, however, that the Siculi, to whom the Naxian territory was assigned, scon after formed a new settlement on the hill called Mount Tuurus, which rises immediately above the site of N:xus, and that this gradually grew up into a considerable town, which assumed the name of Tauromenium. (Diod. sir. 58,59 .) This took place about 1..c. 396; and we find the Siculi still in passession of this stronghold some years later. (Ib.88.) Meanwhile the exiled and fagitive inhabitants of Naxos and Catana formed, as usual in such cases, a considerahle body, who as far as possible kept together. An attempt was made in B. c. 394 by the Rhegians to settle them again in a hody at Mylae, but without surcess; for they were speedily expelled by the Messumians, and from this time appear to bave been dispersed in various parts of Sicily. (Diod. xiv, 87.) At length, in n. c. 358 , Andromachus, the father of the historian Timaens, is said to have collected tonether aggain the Naxian exiles from all parts of the island, and established them on the hill of Tauromenium, which thus rose to be a Greek city, and became the successor of the ancient Nasos. (Diod. xvi. 7.) Hence Pliny speaks of Tnuromeninm as having been formerly called Naxos, an expression which is not strictly correct. (Plin, iii. 8. s. 14.) The fortunes of the new city, which quickly rose to be a place of importance, are relited in the article Tumomenicm. The site of Nazos itself seems to lave been never acain inliabited; but the aitar and shrine of Apollo Archegetes continned to mark the spot where it had stood, and are mentioned
in the war between Octavian and Sextns Pompey in Sicily, в. c. 36. (Appian. B. C. v. 109.)

There are no remains of the ancient city now extant, but the site is clearly marked. It occupied a low hut rocky beadland, now called the Capo di Schisoे, formed by an ancient stream of Java, immediately to the N. of the Alcantara, one of the most considerable streams in this part of Sicily. A small hay to the N. affords good anchorage, and separates it from the foot of the bold and lofty bill, still occupied by the town of Taormina; but the situation was not one which enjoged any peculiar natiral advantages.
The coins of Naxos, which are of fine workmanship, may almost all be referred to the period from B. C. 460 to B.c. 403 , which was probably the most flourishing in the listory of the city. [E. H.B.]

COIN OF NAXOS IN SICILT.
NATOS or NAXUS (Nágos, Suid. s. v.), a town of Crete, according to the Scholiast (ad Pind. Isth. vi. 107) celebrated for its whetstones. Hück (Kreta, vol. i. p. 417) considers the existence of this city very problematical. The islands Crete and Nasos were famed for their whetstones (Plin. xxxvi. 22; comp. xriii. 28), and hence the confusion. In Mr. Pashley's map the site of Naxos is marked near Spina Loinga.
[ E B. J.]
NANOS or NAXUS(Nágos: Eth. Náguas: Naxia), the largest and most fertile of the Cyclades, situated in the middle of the Aegean sea, about halfway between the coasts of Greece and those of Avia Minor. It lies east of Paros, from which it is separated by a channel about 6 miles wide. It is described by Pliny (iv. 12. s. 22) as 75 Roman miles in circumference. It is about 19 miles in length, and 15 in breadth in its widest part. It bore several other namies in ancient times. It was called Strongyle ( $\Sigma \tau \rho o \gamma \gamma i \lambda \eta$ ) from its round shape, Dionysias ( $\Delta$ rovvaias) from its excellent wire and its consequent connection with the worship of Diongsus, and the Smaller Sicily ( $\mu u k \rho \dot{\alpha}$ ミike入ia) from the fertility of its soil (Flin. iv. 12. s. 22; Diod. r. 50-52); but the prets frequently give it the name of Dia ( $\Delta i a ;$ comp. Ov. Met. ii. 690, viii. 174.) It is said to have been originally inlakited by Thracians, and then by Carians, and to have derived its name from Naxus, the Carian chieftain. (Diod. v. 50, 51; Steph. E. s. v. $\mathrm{N} \alpha \dot{\xi} o s$.$) In the historical ages it was colonised by$ Ionians from Attica (Herod. viii. 46), and in consequence of its position, size, and fertility, it became the most powerfol of the Cyclades. The government of Naxos was orignally an oligarchy, but was overthrown by Lygdamis, who made himself tyrant of the island. (Aristot. ap. Ath. viii. p. 348.) Ly ydamis, howerer, appears not to have retained his power long, for we find him assisting Peisistratus in his third resteration to Athens, and the latter in return subluing Naxos and committing the tyranny to Lygdamis. (Herod. i. 61, 64: comp. Aristot. Pol. v. 5.) But new revolations followed. The
aristocratical party appear to have amain gat the upper hand; but they were after a short time expelled by the penple, and aptlied for assistance to Atintagoras of Miletus. The P'ersians, at the persmasion of Aristagoras, sent a large force in E.c. 501 to subduc Naxos: the expedition proved a failure; and Aristagoras, fearing the anger of the Persian conrt. persaaled the Ionians to revolt from the great king. (Hicrod. v. 30-34.) At this period the Naxiars hat 8000 hurdites, many ships of war, and nomerous slaves. (Herod. v. 30, 31.) From the solou boplites we may conclude that the free propulation amounted to 50,000 souls, to which numfirt we may ald at least as many slaves. In r. C . 490 the Persians under Datis and Artaphernes landed upon the island, and in revenge for their former faillue land it waste with fire and sword. Must of the imbabitants took refuge io the mountains, hut thwee who remained were reduced to slavery, and their city set on fire. (Herod. vi. 96.) Nasos became a du-n lency of Peria; but their foor ships, which wwre sent to the P'ersian fleet, deserted the latter and f. Igit on the side of Grecian independence at the battle of Silamis. (Heroxl. siii. 46.) They also took part in the battle of Plataeae. (Diod. v. 52.) After the Persian wans Nisos became a member of the confederacy of Delos under the hadship of Athens; but about B. C. 47 t it revolted, and was subdued by the Athenians, who reducel the Naxians to the condition of subjects, and establislied 500 Athenian Cleruchs in the islanil. (Thue. i. 98, 137; Plut. Perich. 11 ; Paus. i. 27. § 6.) From this time Naxos is soldom mentioned in ancient history. It was off Naxos that Chabrias gained a signal victory over the Lacedaemonian fleet in 1. c. 376 , which rostorel to Athens the empire of the sea. (Xen. Hell. v. 4. § 60, seq.: Diod. sv. 34.) During the ciil wars of R me Nawns was for a short time subepct to the Rholians, (Appian, B. (: v. 7.)

After the capture of Constautin ple by the Latins 19 1204, the Aegapan spa fel to the lot of the Venetians: and Marro Saudo, in 1207, took possession of Namos, and fonnded there a powerful state under the title of the Duchy of the Aegaean sea (Dux Araei Pelagi). He built the large cartle above the tnwn, now in ruins, and fortified it with 12 towers. Ific dynatsty ruled over the greater part of the C5Whele for 360 years, and was at length overthrown :y the Turks in 1.566. (Fi: lay, Hedieval Grecce, if 320 , seq.) Naxus now belonis to the new kingd. 1 of Girece. Its pepulation does not exceed 12,000 , and of these 300 or 400 are Latins, the desconllants of the Venrtian settlers, many of whom bear the names of the nublest fanilies of Venice.

The ancient capital of the island, also ralled Naros, was nituated upun the NW. const. Its site is ox ufied by the monern capital. On a strall detithat rock, called Pultit, about 50 yards in front A: tace larb, tur, are the ruins of a temple, which tradimun calls a teluple of Dionysus. The we tern phatal st 11 remains, consisting of three huge marble Thim, two perpenticular ant one linil across, and is of rlezant, though simple workmanship. A drawing of it is, iven by T urneriot. Stephanus B. mentions anther thien in Naxos called Tracia or Tracaea ( $s, v$. Tpayia), but which lioss belieses to be the boall island Makares, betwern Nasos an 1 DO 1 Wesc. Arrstotle also (up. then. viii. p. 34 s ) mentionel a place, named Lestadse (Ajoráoual), of wl ich nothing further is known.

In the cuttre of the island a mountain, now called

Zia, rises to the height of 3000 feet. From its sumn it 22 islands may be counted ; and in the distance may be seen the outline of the mountains of Asia Minor. This mountain appears to have been ealled Drios ( $\Delta$ pios) in antiquity (Diod. v. 51) ; its modern name is probably derived from the ancient name of the island (Dis). On it there is a enrions Hellenic tower: and near the bottom, on the road towards Philoti, an inscription, $8 p o s \Delta i d s$ M $\eta \lambda \omega \sigma$ iov. Another mountain is called Köronon ( $\tau \delta$ K $\delta$ povov), which is evidently an ancient name, and reminds one of the Naxian uymph Coronis, who brought op the young Dionysus (Diod, v. 52). The mountains of Naxos consist partly of granite and partly of marble, the latter being searcely inferior to that of Paros. Good whetstones were also obtained from Niaxos. (Hesych. 8. v. Nakia 入itos; Plin. xxxvi. 6. s. 9.) There are several streams in the island, one of which in accient times was called Biblus (Bi6גos, Steph, B. s. r. Bıf $\overline{i v} \eta$ ).

The fertility of Naxos has been equally celebrated is ancient and modern times. Herodotus says that it excelled all other islands in prosperity (v, 2s). It produces in abundance corn, oil, wine, and frnit of the finest description. In consequence of the excellence of its wine Nasos mas celebrated in the legends of Dionysus, particularly those relating to Arialne. [See Dict of Biogr. art. Armadse.] Mloreover, the priest of Dionysins gave his name to the year, like the Archon Eponymus at Atbens. (Bückh, Inscr. 2265.) The finest wine of Naxos is now produced at a place called Aperáthos. It is a superior white wine, and is celcbrated in the islands of the Aegacan under the name of BacchusHine.

The plant which prodaces ladanam is foand at Naxus; and in Therenot's time it was collected froin the beards of goats, in the manner described by Herodutus (iii. 112). Emery is also found there, particularly in the soutbern part of the island, and forms an article of export. The goats of Naxis were celebrated in antiquity. (Athen. xii. p. $5 \$ 0$.)

One of the most remarkable curiosities in the island is an unfinished colnssal figure, still lying in an ancient marble quarry near the northern extrenity of the island. It is abont 34 feet in length, and thas always been called by the inhabitants a figure of Apollo. On the side of the hill, at the distance of five monutes from the statue, we still find the in-
 jectures that the statue may have been intended as a ledicatory offering to Delos. (Therenot, Tracels, p. 103, Eugl. transl.; Tournefort, Foyage, vol. i. p. 163, Eurl. transl. ; Leake, Northern Greece, vol. iii. p. 93; Ross, Reisen anf den Griceh. Inseln, vol. i. p. 22, seq.; (iriter, De Naxo Insala, Hal. 1833. Curtius, Naxos, Berl. 1846.)

COIN OF THE ISIAND OF NAXOS.
NAX1 AN.1 (Nogováva, Pul. v. 13. § 12), a rity on the N. bank of the river Araxes, now Nachdyer in, a eity of some importance in Armenian lisMicrosoft (e)
tory, and connected, by tradition, with the first habitation of Nuah, and the descent of the patriarch from the ark. (Comp. Joseph. Antig. i. 35 ; St. Martin, Mém. sur l' Armenie, vol. i. p. 131 ; Ritter, Erdkuade, vol. x. p. 363 ; Cbesney, Exped. Euphrat. rol. i. p. 145.)
[E. B. J.]
NAZAARETH (Na̧apé日: Eth. Na̧apquós, Na(apaios), a city of Galilee, celebrated in the New Testament as the residence of our Lord for thirty years, before He commenced His public ministry (S. Mark, i. 9 ; S. Luke, iv. 16, 29), from which circumstance he was called a Nazarene. (S, Mark; i. 24, xiv. 67 ; S. Mott. xxvi. 71.) It was appareutly in bad repute, exen ameng the despised GaliJeans themselves. ( $S . J o h n$, i. 46.) It was visited by our Lord immediately on His entering on Ilis ministry, when an attempt was tuade upon 1tis life (S. Luke, iv. $16-30$ ) ; and lle appears only to have visited it once subsequently, again to exemplify the proverb, that "no prophet is accepted in his country." (S. Matt. xiii. $54-58$; S. Mark; vi. 1-6.) It.s site is well described by Eusebins as over against Legio, 15 miles distait from it towards the E., near to Nount Tabur. Its site has never been lost in Cbristian times, and in all ages travellem have made mention of it. (Keland, Palaestina, pp. 905907.) "The town of Nazareth, called in Arabic En-Nusirah, lies upon the western side of a narrow oblong basin, extending about from SSW. to NNE., perhaps 20 minntes in length by 8 or 10 in breadth. The honses atand on the lower part of the slope of the western hill, which rises steep and high above them. Towards the N . the hills are less high; on the E, and S. they are low. In the SE. the basin contracts, nud a valley runs ont narrow and winding to the great plain." The precipitons rocky wall of this valley is called the Mennt of Precipitation. The clevation of the valley of Nazareth is given as 821 Paris feet abose the sea, and that of the monntains above Nazareth 1500 or 1600 feet ; but Dr. Robinson thinks this estimate too high. The houses of the town are well built of stonc. The population amounts to abont 780 taxable males, of whom 170 are Moslems; the remainder, Christians of various denominations. (Biblical Res. vol. iii. pp. 183185.)
[G. W.]
NAZIANZUS (Na(̧av(ós), a town in the southwest of Cappadocia, in the district called tharsauria, 24 miles to the south-cast of Archelais. The place is not mentioned by the early writers, and owes its celebrity to the fact that it was the place where Gregory of Nazianzus was educated, and where be afterwards became bishop. (Hierocl. p. 700; Socrat. Mist. Eecles. jv. 11 ; Greg. Naz. 1 Ïta Carm. v. 25, Epist. 50 ; Cone. Const. ii. p. 97 ; It. Ant. p. 144; It. Hieros. p. 577 , where it is miswritten Nathiangus; comp. Diocaesameia.) Hamilton (Researches, vol. ii. p. 228) is inclined to believe that the modern place called Euran Sheher, near Haval Dere, marks the site of Nazianzus, tbough others identify the village of Mimisu with it.
[L. S.]
NEAF (Néac), a small island near Lemnos, in which Philectetes, according to some anthorities, was bitten by a water-snake. (Steph. B. s. c.; connp. Antig. Caryst. Mirab. c. 9.) Pliny places it between Lemnos and the Hellespont (ii. 87. s, 89). It is called in the charts Stratia, and by the modern Girecks "A jios $\sigma \tau p a \tau \eta \gamma$ ós, the holy warrior, that is, St. Miehuel. (Walpole, Travels, fc. p. 55.$)$

NEAE PATRAE. [Hypata.]
 Theocr.: Naviaitos, Lycophr.), a river on the E, coast of Bruttium, falling into the gulf of Tarentum abont 10 miles N. of Crotona, still called the Nieto or Neto. Strabo derives its name from the circumstance that it was bere that the Trujan women who were conducted as captives by a Greek fleet, sot fire to the ships of the victors, and thus compelled them to settle in this part of Italy. (Strab. vi. p. 262; Plin. iii. 11. s. 15.) It is well kuown that the same legend is transferred by other writers to many different localities, and appears to have been one of those which gradually travelled along tho coast of ltaly, in the same manner as the myths relating to Aeneas. The form of the name Nav́autos employed by Lycophron (Alex. 921) points evidently to the same fancifnl derivation (from vaîs and $a \neq \omega)$. Tbeoeritus alludes to the rich and varied herbage which grew on its banks (1d. iv. 24), and for which, according to a modem travelier, it is still remarkable. (Swinburne, Travels, vol, i. p. 313.)
[E. H. B.]
NEANDREIA, NEANDRIUM, NEANDRUS
 or Neavopieús), a town in Troas, probably founded hy Aeolians; in the time of Strabo it had disappeared, its inhabitants, together with those of other neishbouring places, having removed to Alexaudreia. (Strab. xiii. pp. 604, 606.) According to Scylax (p. 36) and Stephamas Byz. (s. v.), Neandreia was a maritime town on the Hellespont; and Strabo might perhaps be suppesed to be mistaken in placing it in the interior above Hanaxitus ; but be is so explicit in his description, marking its distance from New llinm at 130 stadia, that it is scarcely possible to conceive lim to he in the mrong. Hence Leake (Asia Minor. p. 274), adopting him as his guide, seeks the site of Neandreia in the lower valley of the scamander, ocar the molern town of Ene.
[L. S.]
NEANDRIA. [Nea.]
NEANISSUS (Neaviaбós or Navearós), a tomm in Armenial Minor, on the sonth east of Plureata, and between this latter town and Diocaesareia. (1'tol, x. 6. § 14.) No further particulars are known about the place.
[L. S.]
NEA'POLIS, i. e, "the New City:" 1. In EV rope. 1. (Neámodis: Eth. Neamu入itrls, Strab. and Steph. B.; but coins have Nєotoגíns, Neapolitanus: Napoli ; in French and English Naples), one of the most considerable cities of Campania, situated on the northern shore of the gulf called the Crater or Sinus Cumanus, which now derives from it the name of Bay of Naples. All aneient writers agree in representing it as a Greek city, and a colony of the neighbouring Cumae; but the circumstances of its foundation are rery obseurely related. Scymous Chius tells us it was founded in pursuance of an oracle; ad strabo calls it a Cumaean colony. but adds that it subsequently received an additional body of Chalcidic and Athenian colonists, with some of the settlers from the neighbouring islands of the Pithecusac, and was on this account called Neapolis, or the New City. (Strab. v. p. 246; Scymn. Ch. 253; Vell. Pat. i. 4.) Its Chalcidic or Euboean origin is repeatedly nilluded to by Statius, who was himselt a native of the city (Sile, i. 2.263, ii. 2.94, iii. 5.12); but these expressions probably refer to its being a colony from the Chalcidic city of Cumae. The nane itself sufficiently points to the fact that it was
a more recent settlement than soms 0 m prew ing existing in the same ocighbourhonl：and that thas did not refer merely to the parmo ofy of Cumae，is proved by the fact that we find momion（thongh only at a cooparatively late period）of a place called Pilafpols or＂the Ohd City＂（Liv．viii．22．） But the relations between the two are very obscure． Dis fireck author mentions Palaepolis，of the existence of 1 I ich we should be ignorant were it aut for Livy． who tells us that it was not far from the sitc of Nea－ pulis．From the passuge of Strabo above cited，it seems elear that this was the miximal settlenent of the Cumaens colonists；and that the name of Noapolis was given to the liter culony of Chalci－ dians and ot hers who establinhed themselves on a site at no great distance from the former one．A dif－ frwit ression of its history，but of＇much more dubions nuthority，is cited by Philargyrius from the histurian Lutatius，aceurding to which the Cu－ namans abanlund their first colony from mn appre－ hension lest it shuld eclipse the parent city，but were commanded ly an orarle to restore it，and gave to the c 小ony thins fimmed ancw the name of Neapolis． （1＇hancyr，at Gearg．iv，564．）The original name of I＇alanpulis（which obriously coull nut be so de－ signated until after the foumbation of the new city） a］pusts to lave been Parthenope（ Plin ．iii．5．s． 9 ； 1＇hiaryyr．l．c．）a name which is used by the Roman pros as a piotical appellation of Neapolis．（Virg． Gitarg．iv．564；Oxid，Met．xs，711，\＆e．）Ste－ Fhans of Byzantinm notices I＇arthenope as a eity if Opicia（the ancient designatino of Cumpania）； lut it is singular enongh tlat buth he and Strabo call it a endany of the Eholians，without neentioniog either the Clakidians or Comactons，（Siteph．B． s．r．，Strab．sir．1．6．54．）On the other hand，Ly－ 1 中hron allubes to the plare where the Siren Parr－ thennice was cast on shote，by the name of Falerum （\＄arri，pou тipats，Lyemphr．Alar．717）；and Ste－ fhem सs also stys that Ihaleram was a city of （）anfin，the ：ame which was afterwards catled Nea－ 1 К．（Steph．B．s．is．Фa入tipor．）The name of Fithetmu has a Tyrrbenian or I＇clasgic aspect：and it In mins momala＇le，as suggested ly Abeken（Mit－ tel Itelitil．p．110），that there was oricinally a Tyr－ rhmon settlment on the spot．The legendary ＂מamention of tle siren l＇arthempe with the site or Amehthmorhous of Neaphlis wats well established，and
 city a－she ahume of l＇arthonp－；and Strabo tells us that men in his time hor tomb was still shown then，and wame ergetarated in her honome．（Sirab． v．1．246；1）ngys．Per．358；Eustath．ad lue； 1＇m．iii．5．s．9．）

The site of the miginal semtement，or OID City （Pahaet dis），is nowhere indiantul，but it seems most fre at le that it stond on the hill of l＇ausilypus or Tosilopo，a long riden of moderate clevation，which splatrates the bay of Pozewhic or Baise from that of Ximples itself．The new tuwn，on the contray，ad ju sed the river Nebehow，a amall stream still called the silntor，and rast，therefore，have occupied the satme ste with the more eantrily porting of the mod rn city of Naples．（Alsken，Mittel Italien， P．111：Nielthor，vol．ii．p．1\％9．）The latter city seems rajpilly to have usen to great jusperity，and， in great measure，eelysed the hlowsettoment；but it is clear fron Levy that l＇ala pulis eontimued to subsist by the side of the new erlus $y$ ，until they both fell under the dominion of the Sampites．It deres not appear that entier the old or the new city was redued
by force of arms by the Campanian conquerors；they seem rather to have eotered into a compromise with them，and adoritted a body of the Canppanians to the rights of citizenship，as well as to a share of the government．（Strab．v．p．246．）But notwith－ standing this，the Greek element still greatly pre－ dominated；and both Palaepolis and Neapolis were， according to Livy，completely Greck cities at the time wheo they first came ioto contact with Rome， nearly a ceotury after the conquest of Campania by the Sumnites．（Liv．viii．22．）

On that occasion the Palaepolitans，who bad bad the temerity to prosoke the hostility of Rome by io－ cursions upon the neighbouring Campanians，alarmed at the declaration of war which followed（B．C．328）， adositted within their walls a garrison of 2000 troops from Nola，and 4000 Samnites；and were thus enabled to withstand the arms of the consul Publilius Philo，who occupied a post between the two cities so as to prevent all communication between them，while he laid regular siege to Palaepolis． Tbis was protracted into the following year；but at length the Palaepolitans became weary of their Sam－ mite allies，and the city was betrayed into the hands of the Fomans by Charilans and Nymphius，two of the chief citizens．（Liv．tiii．22，23，25，26．）The Keapulitans would appear to have follomed their ex－ ample withont offering any resistance；and this cir－ cumstance may explain the fact tbat while l＇ublilius celelrated a triumph over the Palaepolitans（Liv． viii． 26 ；Fast．Capit．），the Neapolitans were allnitted to parce on favourable terms，and their liberties sectred by a treaty（foedus Neapolitanum，Liv．L．c．） From this time all mention of Palaepolis disalpears from history．Liry tells us that the chief authority， which appars to have bcen previonsly eojoyed by the older city，was now transferred to Xeapolis；and it is probable that the former town sank gradually into insignificance，while the community or＂popu－ lus＂was merged in that of Neapolis．So completely was this the ca－c，that Dionysius，in relating the com－ mescemeat of this very war，spenks only of the Nen－ pulitans（Dionys，Exc．Leg．pp．2314－2319）；while Livy，evideatly folluwiog the language of the older anoalists，distioguishes them from the Palaepolitans， though he expressls tells us that they formed only one community（＂duabus urbibus populus idem ha－ bitabat，＂Liv．Tiii．22）．

Fromo this time Neapolis became，in fact，a mere dejendency of Nome，though retaining the honour－ able title of an allied state（foederata civitas），and thinging the protection of the powerful republic， with lnt a small share of the burdens nsnally thrown ujun its dependent allies．So favourable，indeed， was the condition of the Neapolitans under their treaty that，at a later period，when all the cities of Italy obfained the Lioman franchise，they，as well as the lleracleans，were long muwilling to accept the proffered bom．（Cic．pro Balb．8，24．）Hence it is no wonder that they continued throughout faithful to the Roman alliance，though wore than once threatened bev hastile armics．In 13．．．280，1＇yarhus approached the walls of Neapolis，with the viow of making him－ self master of the city，but withdrew without ac－ eomplishing his purpuse（Zonar．viii．4）；and in the Sccond I＇unic War，Hamibal，though he re－ peatedly ravaged its tenitory，was deterred by the strenuth of it fortifieations from assailing the city itself．（Liv，axiii．1，14．15．xxiv．13．）Like the other maritime allies of Lome，the Neapolitans con－ timued to furnish ships ：und sailors for the loman
fleels throughont the long wars of the Reputilic. (Pol, i. 20; Liv. xxxy. 16.)

Though Neapolis thus passed gradually into the condition of a mere provincial town of the Roman state, and, after the passing of the Lex Julia. hecame an ordinary municipal tonn (Cic. pro Balb. 8, ad Fam. xiii. 30), it continned to be a flomrishing and populous place, and retained, to a far greater extent than any other city in this part of Italy, its Greek culture and institutions; while its popalation was still almost exclusively Greek. Thus Strabo tells us that, in his time, though they bad become Roman citizens, they still bad their gymnasia and quinquemial granes, with contests of masic and gymnastic exercises after the Greek fashion; and retained the division into Pbratries, a circmonstance attested also by inscriptions still extant. (Strab. v. p. 246; Varr. L. L. v. 85 ; Boeckh, C. I. val. iii. p. 715.) Before the close of the Republic, the increasing love of Greek manners and literature led many of the apper classes among the Romans to resort to Neapolis for education, or cultivation of these pursuits; while many more were attracted by the delightfnl and Juxnrious climate or the surpassing beanty of the scenery. It passcssed also hot springs, similar to those of Baiae, though inferior in number (Strab. $l$. c.); and all these causes combined to render it ore of the favourite resorts of the Roman nobility. Its prosperity received a rude shock, in B. C. 82 , dnriug the Civil War of Marios and Sulla, when a body of the purtisans of the latter, having been admitted by treachery into the city, made a general massacre of the inhabitants (Appian, B. C. i. 89); but it seems to have quickly recovered this blow, as it was certainly a flourishing city in the time of Cicero, and continued such throughout the period of the Roman Empire. It is not improbable that it received a body of fresh colonists under Sulla, but certainly did not then assume the title of a Colonia, as it is repeatedly alluded to by Cicero as a Snnicipinm. (Cic, ad Fam. siii. 30, ad Att. x. 13.) Under the Eupire we find it in inscriptions bearing the title of a Colonia (Gruter, Inscr. p. 110. 8, p. 373. 2); but there is much doubt as to the period when it obtained that rank. It is, howerer, noticed as such by Petronius, and would seem to have first receired a colony under Clandius, to which subsequent additions trere made under Titus and the Antonines, (Lib. Colon. p. 235; Zumpt, de Colon. pp. 259, 384: Petron. Satyr. 44, 76; Beeckh, C. 1. vol. iin. pp. 717, 718.)

Bevides its immediate territory, Neapolis had formerly possessed the two important islands of Ca preac and Aenaria (Ischiu); but the latter had been wrested from it by force of arms, probably at the period of its first war with Rome. Capreac, on the other hand, continued subject to Neapolis without interruption till the time of Augustus, who, baving taken a fancy to the island, annexed it to the imperial dumain, giving np to the Neapolitans in exclange the richer and more important island of Acnaria. (Suet. Aug. 92; Dion Cass. lii. 43.)

The same attractions which had rendered Neapolis a farourite residence of wealthy Romans under the Republic operated with still increased force under the Empire. Its gymnasis and public games continued to be still celebrated, and the emperors themselves condescended to preside at them. (Suet. Aug. 98. Ncr. 40; Vell. Pat. ii. 123 ; Dion Cass. Ixiii. 26.) Its strong tincture of Greek manners, which caused it to be frequently distiuguished as "the Greek
city," attracted thither many grammarians and others; so that it came to acquire a reputation for learning, and is called by Martial and Columella "docta Parthenope" (Martial, v. 78. 14; Colmon. x. 134); while its soft and luxurions clinate rendered it the favomite resort of the indolent and effeminate. Hence Horace terms it " otiosa Neapolis;" and Orid, still more strongly, "in otia datam Parthenopen." (Hor. Epod. 5. 43 ; Ovid, Met. sv. 711; Stat. Silv. iii. 78-88; Sil. Ital. xii. 31.) The coasts on both sides of it were lined with villas, anong which the most celelrated was that of Vedins Pollio, on the ridge of bill between Neapolis and Puteoli, to which he had given the aame of Pansily pus (Пavai入umos); an appellation afterwards extended to the whole hill on which it stood, and which retains to the present day the name of Monte Posilipo. (Dion Cass. liv. 23; Ilin. is. 53. s. 78.) Neapolis was a favonrite residence of the emperor Nero, as mell as of his predecessor Clandius; and it was in the theatre there that the former made his first appearance on the stage, before be ventured to do so publicly at liome. (Tac. Ann. xiv. 10, xv. 33; Dion Cass. Ix. 6.) It is well known also that it was for a considerable period the residence of Virgil, who composed, or at least finished, his Georgics there. (Virg. Georg. iv. 564.) Thither, also, bis remnins were transferred after his death; and his tomb was still extant there in the time of the poets Statius and Silias Italicus, who paid to it an almost superstitious reverence. The last-Damed poet himself died at Neapolis, where be had a villa, which was his favoarite place of residence, as it was also that of Statios, who, in several passages, appears to allude to it as the place of his tirth. (Donat. Tizt. Virg.; Plin. Ep. iii. 7; Martial, si. 49 ; Stat. Silv. iii. 5. 13, iv. 4. 51-55.)

It is clear that Neapolis was at this period a provincial city of the first class; and though we meet with little historical mention of it during the later ages of the Empire, inscriptions sufficiently prove that it retained its consideration and importance. It appears to have escaped the rarages of the Goths and Vandals, which inflicted such severe blows apon the prosperity both of Capua and Nola (Hist. Miscell. xv. p. 553); and under the (iothic king Theodoric, Cassiodorus speaks of it as still possessing a numerous population, and abounding in every kind of delight, buth by sea and land. (Cassiod. Tar. vi. 23.) In the Gothic wars which followed, it was taken by Belisarius, after a long siege, and a great part of the inlabitants put to the sword, A. D. 536. (Procop. B. G. i. 8-10.) It $\pi$ as retaken by Totila in A. D. 542 (Ib. iii. 6-8), but again recovered by Narses soon after, and contioued from this time subject to the supremacy of the Byzantine Empire, as a dependency of the exarchate of Ravenna, but under the government of its own dukes. In the eighth century Paulus Diaconus still speaks of it as one of the "opulentissimae urbes" of Campania. (IIist. Long. ii. 17.) It was about this period that it threw off the yoke of the Byzantine emperors, and continued to enjoy a state of virtual independence, until it was conquered in A. D. 1140 by the Normans, and became thenceforth the capital of the kingdom of Naples.

It is certain that the ancient city of Neapolis did not occupy nearly so great a space as the modern Naples, which is the largest and most populous city in ltaly, and contaios above 400,000 inhabitants. It appears to have exteoded on the E. as far as the river Sebethus, a small stream still called the Sebeto,
thongh more comumanly known as the Fiume della Maddalena, which still firms the extreme limit of the suburbs of Naples on the E. side; from thence it prubably extended as far as the mole and old eastle, which bound the port on the W. Pliny speaks of the small island which he calls Megaris, and which can be no other than the rock now ocenpied by the Castel dell Coro, as situated between l'ausilypus and Neapolis (Plin. iii. 6. s. 12) ; it is therefore clear that the city did not extend so far as this point. Immediately above the ancient portion of the eity rises a steep hill. now crawned by the Custle of St. Elmo; and from thence there runs a narrow folcanic rilge, of no great elevation, but steep and ubrupt, which continues withont interruption in a SW. direction, till it ends in a headland inmedintely opposite to the island of Nesis or Nisidn. It is the western portion of this ridge which was known in ancent times as the Moss P'Aesilypts, and is still called the Hill of Posilipo. It formed a marked harrier between the immediate envircns of Neapolis and those of Puteoli and Baiae, and mnst have been a great ubstacle to the free communication between the two cities; hence a tunnel was opened through the hill for the passage of the high-road, which has nervel that purpose ever since. This passage, called in ancient times the Crypta Neapolitana, and now known as the Grotta di Posilipo, is a remarkable work of its kind, and has been described by many modern travellers. It is 2244 feet long, and 21 fert lowad: its height is unequal, but, towards the entrance, is not less than 70 feet. It is probable, however, that the work bas been much enlarged in later times. Seneca, in one of his letters, gives a greatly exaggerated view of its fancied horrors, arising from the darkness and dust. (Sen. Ep, 57.) Strabo assizus its construction th. Cocceins, probably the A1. Cocceins Nerra, who was superintendent of aypelucts muder Fiberius, and who constructed a similar tumel from the lake Avernus to Cumae (Srab. v. p. 245): and there is no reason to doubt this atatement, thongh many Jtalian antiquarians have maintained that the work must be much more ancient. On the hill immediately above the E. entrance of the grotto is an ancient sepulchre designated by trulition as the tumb of Virgil ; and though popnlar tradition is a very unsate guiue in such cases, there seems in this instance no sufficiont reason to teject its testimnny. Whe know, from the froise statement of Donatus, that the poet was hmiel on the raad to Patenli, within less than two ". hin from Naples ("via I'uteelama intra lapidem Entulem," Duhat, I'it. Jiog.; Miemn. Chron, ad (11. 190), which agrees well with the site in questian, espectally if (as is probable) the liigh-road at that tume pased over the hill, and not thirongh the frott, hemeath. The argument of Cluverins, who iufored, from the deseription of Statius (Silr, iv, 4. $50-5.5$ ), that the tomb of Virgil was sitnated at the fout of Mount Vesuvins, is certainly untenable. (Cliwner. Itat. , 1133: Enstace's Clossical Tour., vil. ii. Pr. $370-380$; Jorio, Guida di Poszumli, 111. 118.80 )

Nuar the Ciapo di Pusilipo, as the headland ol pasite in Nixith is now callel, are the watemsive ruins of a lamen villa, wheh arie suppo-vil to be thase of the colvbrated villa of Velme Dillio, which eave matne to the whole loll, and whith lie lequeathed by 1., will to Angustus. (1)in Cos. is. 23; Plin. is 53. s. 78.) Immediately oppowite to the headlan l, between it and the island of Nivila (Nesis),
lie two small islets, or rather rocks, one of which now verves for the Lazzaretto,-the other, which is unimhabited, is called La Gajola; these are supprosed to be the islands called by Sratins Limon and Euploca. (Stat. Silc. i. 2. 79, iii. 1. 149.) From their trifling size it is no wonder that they are not neticed by any other author. Recent excarations on the supposed site of the villa of Pollio have brought to light far more extensive remains than Tere previonsly known to exist, and which afford a strong illustration of the magnificent scale on which these edifices were constrncted. Among the ruins thns bronght to light are those of a theatre, the seats of which are cut out of the tufo rock; an Odeon, or theatre for music; a Basilica; besides namerons porticees and other edifices, and extensive reservoirs for water. But the most remarkable work connected with these remains is a tunnel or gallery pierced through the promontory, which is actually longer than the Grotta di Posilipo. This mork appears from an inscription to have been restored by the emperor Honorins; the period of its construction is wholly uncertain. (Bullett. d. Inst. Arch. 1841, pp. 147-160; Avellino, Bullett. Archeol. Napol. 1843, Nos, 4-6.) Many writers have nssigned the extensive roins visible on the hill of Pusilipo to a villa of Lncullus; and it is certain that that statesman had a Neapolitan villa distinct from that at Misenum (Cic. Acud. ii. 3), bnt its site is nowhere indicated; and the supposition that it was the same which afterwards passed into the hands of Vedius Pullio is not warranted by any ancient anthority.

Though the neighbenrhood of Noples ahounds on all sides in ancient remains, those which are still extant in the city itself are inconsiderable. Two arches of a Rman theatre in the street called Anticaglin, a fragment of an nqueduct known by the naine of the Ponti Rossi, and the remains of a temple dedicated to Castor and Pollux, incorporated into the church of S. Paolo, are all the ancient ruina now visible. But the inscriptions which have been discovered on the site, and are for the mnst part preserved in the musenm, are numerous and interesting. They fully confirm the account given by ancient writers of the Greek character so long retained by the city, and notice its division into Plratries, which most liave continued at least as late as the reign of Halrian, since we find one of them named after his fivourite Antinous. Others bore the names of Enmelidae, Eunostidne, \&c., the erigin of which may prolalily be traced back to the first foundation of the Cumacan colony. From some of these inseriptions we luarn that the Greek language continued to be used there, even in public documents, as late as the second contury after the Christian era. (Bueckh, C. I. vol. iii. Pp. 714-750; Mommsen, Inser. Kegn. Neap. pp. 127-131.)

COIN OF NEAPOLIS IN CAMISNAA.
2. ( ( the most cunsiderable places in that island, was situated on the W. coast, at the seuthern extremity of
the gulf of Oristano. The Itineraries place it 60 niles from Sulci, and 18 from Othoca (Oristano). (Itin. Ant. p. 84.) The name would clearly seem to point to a Greek origin, but we have no account of its foundation or history. It is noticed by Pliny as one of the inost important towns in Sardiuia; and its name is found also in Ptolemy and the Itineraries. (Plin. iii. 7. s. $13 ;$ Ptol, iii. 3. §ु 2 ; Itin. Ant. l. c.; Tab. Peut.; Geogr. Rav. v. 26.) Its ruins are still visitle at the mouth of the river Pa billonis, where that strcam forms a great estuary or lagoon, called the Stagno di Marceddi, and present c.insiderable remains of ancient brildings as well as the vestiges of a Boman road and aqueduct. The spot is marked by an ancient charch called Sta Maria di Nabui. (De la Marmora, Voy. en Sardaigne, vol. ii. p. 357.)
The Aquae Neapolitanae, mentioned by Ptolemy as well as in the Itinerary, which places them at a considerable distance inland, on the road from Othoca to Caralis, are certainly the mincral sources now known as the Bagni di Sardara, on the highroad from Cagliari to Oristano. (Itin. Ant. p. 82; Ptol. iii. 3. § 7 ; Geogr. Rav. v. 26; De la Marwora, l. c. p. 406.)
3. A city of Apulia, not mentioned by any ancient writer, but the existence of which is attested by its coins. There seems good reason to place it at Pulignano, between Barium and Egnatia, where mumerons relics of antiquity hare been discorered (Romanelli, vol. ii. p. 148-152; Millingen, Numism. de $\mathrm{l}^{\prime}$ 'talie, p. 147.)
[E. H. B.]
4. A town on the isthmus of Pallene, on the E. coast, betweeu Aphytis and Aege. (Herod. vii. 123.) In Leake's map it is represented by the modern Polijkhrono.
5. A town of Macedonia, and the haven of Philippi, from which it was distant 10 M. P. (Strab. vii. p. 330; Ptol. iii. 13. §9: Scymn. 685; Plin. iv. II; Hierocl.; Procop. Aed. iv. 4 ; Itin. Hierosol.) It probably was the same place as Datuar ( $\Delta$ d́tov), fanmos for its gold-mines (Herod. ix. 75; comp. Biekkh, Pub. Ecom.of A thens, pp. 8,228, trans.), and a seaport, as Strabo (vii. p. 331 ) intinates: whence the proverb which celebrates Dutum for its " good things." (Zenob. Prov. Graec. Cent. iii. 71; Harpoerat. s. v. $\Delta$ áros.) Scylax ( p . 27 ) does, indeed, distinguish between Neapolis and Datum; but, as he adds that the latter was an Athenian colony, which conld not bave been true of his original Datum, his text is, perhaps, corrupt in this place, as in so many others, and his real meaning may have been tbat Neapolis wis a colony which the Athenians had established at Datum. Zenohius (l. c.) and Eustathius (ad Dimys. Pericg. 517) both assert that Datum was a colony of Thasos; which is highly probable, as the Thasians had several colonies on this coast. If Neapolis was a settlement of Athens, its foundation Was, it may be inferred, later than that of Amphipulis. At the great struggle at Philippi the galleys of Brotus and Cassius were moored off Neapolis. (Appian, B. C. iv. 106; Dion Cass. xlvii. 35.)
It was at Neapolis, now the small Turkish village of Kuvallo (Leake, North. Greece, vol. iii. P. 180, comp. pp. 217, 224), that Paul (Acts, xvi. 11) lauded. The shore of the mainland in this part is low, bat the mountains rise to a considerable height belind. To the W. of the channel which separates it from Thasos, the coast recedes and forms a bay, witbin which, on a promontory with a port nn each side, the town was situatcd. (Conybcare asd Howson,

Life and Epist. of St. Poul, voi. i. p. 308.) Traces of paved military roads are still found, as well as remains of a great aqneduct on two ticrs of Foman arches, and Latin inscriptions. (Clarke, Trav. vol. viii. p. 49.) For coins of Neapolis, see Eckhel, vol. ii. p. 72; Rasche, vol. iii. pt. i. p. 1149.

coin of neapolis in macedonia.
6. A tomn of the Tanric Chersonesus, and a fortress of Scilurus. (Strab. vii. p. 312 ; Bückh, Inser. vol. ii. p. 147.) Dubois de Montperrenx ( Ioyaje Autour du Caucase, vol. v. p. 389, vol. vi. pp. 220,378 ) has identified this place with the roins found at Kermentchilb near Simpheropol. [E. B.J.]
NEA'POLIS. Il. In Asia. 1. An important city of Palaestine, commonly supposed to be identical with the Srenem or Shechem of the Old Testament. Thus Epipbanius uses the names as synonymons
 Haeres. lib. iii. tom. i. p. 1055, comp. 1068). Ensebius and St. Jerome, however, place Sichem ( (iwíua, Zvкè $\mu, \Sigma \nu \chi \dot{\epsilon} \mu$ ) in the suturbs of Neapolis (Onomast. s.vv. Terebinthus, Sychem) ; and Luz is placed near to, and, according to the former, viii. M. P., according to the latter, iii. M. P., from Neapolis (s. v. Aoísa), which would imply a considerable interval hetween the ancient and the modern city. In order to reconcile this discrepancy, Reland snggests that, while the ancient city gradually decayed, the new city was estended by gradual accretion in the opposite direction, so as to widen the interval; and he cites in illustration the parallel case of Ctrecht and Teehten. (Palaestina, Pp. 1004, 1005.) Another ancient name of this city occurs only in one passage of St. John's Gospel (iv. 5), where it is called Sichar ( be a corropt reading for Sychem (Fpitaph. Paulae, Ep. lxxsvi. $O$ p. tom, iv, p. 676, Quaest. in Genes. c. xlviii. ver. 22 , tom ii. p. 545), his correction of wlat he allows was an ancient and common error, even in his age, las no anthority in any known codex or version. Another of its ancient names which has exercised the ingenuity of the learned, occurs in Pliny, who reckons among the cities of Samaria, "Neapolis qnod antea Mamortha dicebatur" (v. 13), evidently a mistake for Mabortha, which Josephns gives for the native name of Neapolis (B. J. iv. 8. § 2); unless, as Reland conjectures, both readings are to be corrected from coins, which he shrewdly remarks are less lialle to corroption than MSS., and which read Morthia (Mop日ia), which that learned writer takes to be the classical form of the Hebrew word Moreh, which was associated with Sichem, both in the Old Testament and the Rabbinical commentaries. (Gen. xii. 6; Deut. xi. 30; Reland, Dissertationes Miscell. pars i. pp. 138-140.) The same writer explains the name Sichar, in St. John, as a name of reproach, contemptnously assigned to the city by the Jews as the seat of error (the Hebrew שֶup signifying mendacium, falsum), and borrowed from the prophet Habalkuk, where the two words Morth Shaker (מָּרֶּ טָּרֶ) occur in convenient

 me i the oplu lie of Josefh.- which, having been dientronel athl sman with salt by Ahmelech, was Th wrin ly Jerotumn (comp. Judges. ix. 45, with 1 Kimses xii. 25), whe, Jioephns says built his palace 1thore ( 1 mt . viii. 8.84 ) - and the city of refoge in M wnt E: hraion, which they assign to Manasseh, and, with strange ineonsistency, immediately identify with the preceding by the fact that Joseph's bones were buind there. (Onomast. s. v. इuxé $\mu$ ) The anthor of the Jerusalem Itinerary places it x1. M. P. from Jerus:alem.

The modern tomu of Nablis is situated in a valley lying between Mouat Ebal on the N., and Mourt Gevi im on the S, giving to the valley a directiva from E. to W. On the E., the Nublis valley opens into a much wider valler, about 2 miles from the town : this valley is called Erd-. 1 Hillhas Where the Nablis valley meets the Erch-3uikhna, at the NE. ba-c of 11 ont Gerizin, is Jacob's well, and, bard by the well, is the traditionary site of Juseph's tomb, buth of them close to the Sioslem village of Askar, situatel at the SL, base of M rast Ebal. lossibly this Askar may mark the site of ancient Sychar, the natues present only an anagrammatical variation. This would satisfy the laguage of Eusebius and St. Jerome, cited at the commencenent of the article, and remove the obrions difficulty of supposing the well so far distant from the city as is Nabliis, partieularly as Nablis abounds with running streans, and there are copi us fountains between it and the well. One of these, not noticed by any traveller, situated about mid-way betreen the well and the them, in the miidale of the valley, is called Ain Dichlinc, to named, no donbt, at the time when Girceks imhatited Neapolis, from the infanous froutan and grove near Antioch. The modern Nublis is a large and well-built turn, containing a population of from 12,000 to 14,000 sonls, almost ewirely Mohammedans: the Samaritans having been retuced to something under 200 of all ayes and both 4exes. (Raumer, Palistina, pp. 144-148, notes; Rubiuson, Bib. Res. vol. iii. pp. 95-136.)
The coins of Neapolis are very frequent under the ea perors fr $m$ Titus to Volusianns. The common inscription is $\$ \Lambda . N \in A C \Pi O A \in \omega C$, more rardy фAAOT, as in the one below, in which is also added, as in many exanuples, the name of the region. The mors unatid emblein on the reverse is a tenple sitnated on the sumnit of a moontain, to which is an ascent ty many steps. The temple is durbtless that mentimed by Damasius as $\Delta$ bios 'Niotov áywiutatov iesion (ip. Ph t. Bibl. p. 1055), the steps thone alln leil thby the Bondeaus Pilarim in A. D. $333:-$

the nane of the city written amon its branehes. (W. .kich, vol. iii. pp. 433-435: see Gerizim, Vol. I. p. 992. a.)
[G. W.]
2. A town of Colebis, south of Dioscurias, and nontly of Phasis, on the river Chotos or Chorsos. (Seyl. p. 27; Ptol. v. 10. § 2.)
3. A town on the coast of Ionin, south of Ephesns, on the road between Anaea and Marathesium. It was a small place which at first belonged to the Ephesians, and afterwards to the Samians, who received it in exclange for Marathesium. (Strab. xiv. p. 639.) Most writers identify its site with the mudern Scala Nota, at a distance of abont three hours' walk from the site of ancient Eplesas ; but Cal. Leake (Asia Minor, p. 261) believes that this place marks the site of the aneient Maratbesium, and that the ancient remains found about halfway between Sala Nora and Tshangli, belong to the ancient town of Neapolis. (Comp. Tonrnefort, Letters, xx. p. 402; Fellows, Journal of an Exc. in As. Min. p. 271, who identifies Neapolis with Tshangli or Changli itself.)
4. A town in Caria, between Orthosia and Aphrodisias, at the foot of Mount Cadmus, in the neighbombond of Harpasa. (Ptol, v. 2. § 19 ; Hierocl. p. 688.) Richter ( Wallfalirlen, p. 539) identifics it with the modern Jenibola, near Arpas Kalessi, the ancient Harpaza. Another town of the same name is mentioned on the coast of Caria Ly Mela (i. 16) and Pliny (v. 29); and it is clear that this cannot be the same town as that near Harpas ; it is probably ouly another name for New Myndus [Mrnids].
5. A town in risidia, a few miles sooth of Autioch. (Ptol. v. 4. § 11 ; Hierocl. p. 672. ) Pliny (x. 42) mentions it as a town of the Roman province of Galatia, which embraced a portion of Pisidia. Franz (Fünf Inschriften, p. 35) identifies its site with Tutinek, where some ancient remains still exist.
[L. S.]
6. A small place situated on the Euphrates, at the distance of 14 schoeni (ubout 40 miles) below Besechana. Mitter las tried, but unsuccessfilly (if the prosent numbers be correet) to identify it with Maida. (INid. Mans. Parth. i. I2, ed. Müller, 1835.)
[V.]
XeA'polis. III. In Africa. 1. In Egypt. [Camertolis.]
2. A town of Cyrenaica, wbich Ptoleny (iv. 4. § 1i) places in $31^{\circ} 10^{\circ}$ lat. and $49^{\circ}$ long. The town of Mabny or Mably, with whieb it has been identifiel, and which appears to be a corruption of the oid name, with no other change than what night be expected from the Arab prononciation, dues not quite agree with the pasition assigned by Ptoleny to Neapolis. (Bechey, Exped. to the N. Coast of Af rica. p. 350; Barth, W'anderungen, pp. 391. 405.)
3. [Leptis Migea.]
4. A town of Zengitana with a harbour (Scylax, p. 47; Stadiasm. § 107), the same as the Macom.ness of Pliny (v. 3; Makóqu. $\delta \alpha$, Ptol. iv. 3 § Il); a "municipium," as it appears from the Antonine ltiverary ("Macomades Minores," Peut. Tab.; Geog. lav. iii. 5): this latter name indicates a Phoencician oritin. (Aüvers, Phoeniz, Alterth. vol, ii. p. 494.) It has been identified with Kass'r Oungu, on the N. of the Gulf of IIanmamét.
5. A factory of the Carthaginians upon the Sists Nisarolitaxes, from whieh it was the shotest distance to Sicily - a voyage of two days and a niight. (Thuc. vii. 50; Seylas, p 49; Stadiasm. \& 107; Strab. xrii. p. 834.) It was taken by Agathocles in
his African campaign. (Diolot, xx. 17.) Under tho earlier emperors it was a "liberum oppidom " (Plin. v. 3 ), afterwards under Hadrian a " colonin." (Ptol. iv. 3. § S; Itin.Anton.; Peut. Tub.; Geog. Rar. v. 5.) The old name is retained in the modern Naibel, where Barth (11 onderungen, p. 141; cump. Shaw. Trav. p. 161) found some remains of nntiquity. [E. B. J.] nebis. [Gallaecta, Vol. I. p. 933, a.]
NEBO. 1. (Nabav̂, LXX.), the moontain from which the patriarch Moses was permutted to view the Promised Land. Its situation is thus described: -"Get thee up into this mountain Alarim, unto Mount Nebo, which is in the land of Moak, that is over against Jericho" (Deut. xxxii. 49); "and Moses went up from the plains of Moat onto the mountain of Nebo, to the top of Pisgah, that is over against Jericho." We have here three names of the mount, of whieh, however; Abarim may designate tbe range or mountain region rising from the high table-land of Moab (comp. Numbers, xxvii. 12, xxxiii. 47); while Pisgah is an appellative for a hill, -as it is rendered in our maryin, wherever the name occurs in the text (Numb. xxi. 20; Deut. iii. 27 , axxiv. 1), and in several oriental versions
 one particular peak. This name is regarded by IL . Quatremère as of Aramaic origin, identical with that of the celebrated Chaldean divinity (Isaich, slvi. 1) so frequently componded with the names of their most eminent kings, \&c.; and he discovers other names of like orign in the same parts. (Ménoire sur les Nabateens, p. 87.) It is placed by Eusebius and St. Jerume 6 miles west of Esbus (Heshbon), over against Jericho, on the road from Livias to Esbus, near to Mlonut Phogor [PEor]: it was still called by its ancient name (Onomast. s. vv: Nabau, Abarim). Dr: Fohinson has truly remarked that over aguinst Jericho "there is no peak or point perceptibly higher than the rest; but all is apparently one level line of summit, without peaks or gaps." . . " Seetzen, Burckhardt, and also Irby and Miangles, bave all found Mount Nebo in Jebel Attôras, a high mountain soutb of the Zürka Main" (Aruon). This, however, is far south of the latitade of Jericho. (Bib. Res. vol. iii. Pp. 306, 307).
2. A town of the trile of Reuben, mentioned with Heslibon, Elealeh, and others (Numb. xxxii. 38); doubtless the site now marked by Nebr in the Belka, sonth of Es-Salt (Rooinson, Bib. Res. vul, ii. p. 307, n. 1, vol. iii. appendix, p. 170), i. e. in the same district with Ifesbin and EL-'Al, the modern representatives of Heshbon and Elealeh. Whether this town was connected with the synonymous mountain is very uncertnin.
3. A town in Judah. (Eera, ii. 29; Nehem. vii. 33.)
[G. W.]
NEbrisSA. [N.briss..]
NEBRODES MONS ( $\tau \grave{a}$ Neupós $\eta$ üp $\eta$, Strab.: Monti di Mudonia), one of the most considerable rances of mountains in Sicily. The mame wals evidently applied to a part of the range which commences near Cape Pelorns, and extends along the northern side of the island, the wbole way to the neighhourhood of Panormos. Though broken into various mountain groups, there is no real interruption in the chain thruaghout this extent, and the names applied to different parts of it seem to have been employed (as usual in such case.) with mnch vagueness. The part of the chain nearest to Cape 1 'clorus, was called Mons Neptunios, and therefore the Mons Ncbrodes must bave been further to the
west. Strabo spenks of it as rising opprail to Aetna, so that he would seem to apply the nume to the mountains between that peak and the northern coast, which are still eovered with the extensive forests of Caronia. Silims Italicus, on the otber land, tells us that it was in the Mons Nebrodes the two rivers of the name of limera had their sources, which can refer only to the more westerly group of the Monti di Madomia, the innst lifty range in Sicily after Aetna, and this indentification is generally adopted. But, as alrealy obsersed, there is no real distmetion between the two. Silius Italicus speaks of the Mons Nebrodes as covered with forests, nu 1 solinus derives its nume from the number of fiwns that wandered throagh them; an etymology obvionsly fictitions. (Strab. vi. p. 274 ; Solin. 5. §§ 11, 12: sil. 1tal. xiv. 236; Cluver. Sicil. p. 364; Fazell. de Reb. Sic. . . 2. p. 414.) [E. H. B.]

NEOTIBELES: [MAUMETANLA.]
NEDA (Niōa), now Biazi, a river of Peloponnesus, rises in Mt. Cerausium, a branels of Mt. Lycaens in Arradia, and flows with many windings in a westerly direction past Phigalia, first forming the boundary between Arealia and Messenia, and afterwards between Elis and Mewenia. It falls into the Iomian sea, and near its mouth is navi_able for small lonts. (1'aus, iv. 20. §§ 1, 2, iv. 36. §7, v. 6. § 3, viii. 38. $\$ 3$, viii. 41 . SS 1,2 ; Strah, viii. pp 344, 348 ; Leake, Morea, vol. i. pp. 56, 485; Ross, Reisen im Pelopornes, p. St ; Curtius, Peloponnesos, rol. ii. pp. 152. 185.)

NEDAD, a river of Pamonia, mentioned ouly by Jurnandes (le Reb. Get. 50), as the river on the banks of whit, the Hums were defrated by the Gepidae. The name is in some MSS. Nivlao, and the river is believed to be the modern Neytra. [L.S.]

NEDISU31 (Ní反ivav, Ptol. ii. 16. §10; Geog. Rav. is. 16; Neditae, Orelli, Inscr. 3452), a towa of the Lihurni, on the roud from Siscia to Ialera (Peut. $T u b$.), identified with the ruins near Nadin. Orelli (l. c.) refers the inscription to Norighoul. (Hilkinsom, Detmutin and. Wontenegro, vol. i. p. 93.) [E.B.J.]

NE:DuN. [MesseviA, p. 342, b.]
NF:CTA. [MarsyabaE. 1p. 284, 285.]
 e.l. Miiller, IS55), a port on the W. cosst of India, in the province callel Limyrica, without doubt the sane is that now called Neliserame it is in lat. $1.2010^{\prime} \mathrm{N}$. It is mentioned in vari mus authorities under names slightly moditied one from the other: thus, it is the Melcynda of Ptulemy (vii. 1. §9), in the country of the Aii; the "portus gentis Neacyndint " of Miny (vi. 26, s. 104), which was also called Bacare or Barace; the Nincylda of the l'eutinserion Table; and Nilemima if the Geogr. J.aten. (ii. 1). The mame is cortainly of Indan orisin, tand tmay las dirived, its suggested by Ritter (r. 1.515) from Nilakluadu, the bluc connty. Other dimastions, however, have been propased for it. ( 'ucent, I'erijplus, ii. p. 445 ; Remuti, Mem. Mindustim. p. 48 ; jusselin, iii. p. 227.)

NELELS, [EUDOEA, Vol. 1. p. 872, a.]
NEL1A (Ny入ia), a town of Maynesia in Thessilly, between which and Ielens Demetrias was situatud. Leake identifies it with the remains of a small Hellenic town above Lekhomia. (Strah, ix. p. 436: Leake, Northeme Greece, vol. iv. 14.379.)

NELO, a small river of Hispana Tarraconmais, in the territory of the Astures, and on th (1. coast of spain; probably the Rio de la P'unte. (Plin, iv. 20. s. 34; kert, sol. ii. pt. 1. p. 299.) [1.11.D.]

NEMALONI, an Alpine people. In the Trophy of the $\mathrm{Al}_{\mathrm{ps}}$ the name of the Nemaloni occurs between the Brodiontii and Edenates. (Plin. iii. 20.) The site of this people is uncertain. It is a mere gases to place them, as some do, at Miolans, in the valley of liarcelonette.
[G. L.]
NEMAUSL's (Népavgos: Eth. N $\epsilon \mu$ uúquos, Nemansensis: Nimes), a city of Gallia Narbonensis on the ruad from Arelate (Arles) threngh Narbo (Varbonne) into Spain. I'tolemy (ii. 10. है 10) calls it Nemausus Colonia, hut he places it in the same latitude as Arausio (Orange), and more than a degree north of Arelate; which are great blunders. Numausus was the chief place of the Voleae Arecomici: " with respect to number of foreigners and those engaged in trade (says Strab. iv. p. 186) much inferior to Narbo, hut with respect to its population much superior; for it has snhject to it twenty-four villages of people of the same stock, populons villnges which are contributory to Nemausus, which has what is called the Latium (Jus Latii or Latinitas). By virtue of this right those who bave oltained the honour of an sedileship and quaestorship in Nemausus become Roman citizens; and for this reason this people is not under the orders of the governors from Nome. Now the city is situated on the road from Iberia iote Italy, which road in the summer is easy travelling, but in the winter and spriog is muddy and washed by streams. Some of these streams are passed by boats, and others by bridges of wood or stone. The wintry torrents are the canse of the trouble from the water, for these torrents sometimes as late as the summer descend from the Alps after the melting of the snowr."

Strabo fixes the site of Nemansus about 100 stadia from the Rhone, at a point opposite to Tarascon, and 720 stadia from Narbo. In another place (iv. p. 178) Strabo estimates the distance from Narbo to Nemausus at 88 M. P. One of the Itio. routes makes it 91 M. P. from Narbo to Nemansus. Strabo's two distances do not agree, for 720 stiviia are $90 \mathrm{M} . \mathrm{P}$. The site of the place is certain. In the middle are documents the name is written Nemse ( $D^{\prime}$ Anville). There seems to be no anthority for writing the modern ome 3 Hismes; and yet Nimes, as it is now properly written, supposes a prior form Nismes. Nimes is the prescut capital of the arrondissement of Giard, the richest in Roman remains of all the districts of France.

The twenty-fonr smaller places that were attached (attributa) to Nemausus are mentioned by Pliny (iii. 4). The territory of Nemausus produced good cheese, which was carried to Rome (Plin. xi, 42). This cheese was made on the Cercnnes, and Pliny appears to include Mons Lesura in the territory of Nemausus, Latera [Latera] on the Ledus (Lez) west of Nemausus was io the territory, which probably extended throngh Ugernum eastward to the Rhome, Nemausus was an old Gallic town. The name is the same that Strabo gives with a slight variation (Nemossus) to Augustonemetum or Chermont in Auceryne. The element Nem appears in the name of several Gallic towns. Nemansus was made a Colonia probably by the emperor Augustus. An inseription on une of the gates, called the gate of Augustus, recorils the eleventh or tiselfth consulship of Aunustus, and that he gave gates and walls to the culony. There is a bronze medal of Nemausus in the Duseum of Avignon, the so called Fied de Bicke, on one side of which there is the legend coL. NEM. with a crocodile chained to a paln-
tree, which may probably commemonate the conquest of Esypt ; on the other are trwo heads, supposed to be Augustus and $\mathrm{A} s$ rippa, with the inscription imp. p. p. ptyt. f. This medal has also been found in other places. It is figured below.

COLN OF NEMAUSUS,
Nimes contains many memorials of its Roman splendoor. The amplitheatre, which is in good preservation, is larger than that of Verona in Italy ; and it is estimated that it monld contain 17,000 persons. It stands in an open space, cleared of all buildings and obstractions. It has not the massive and imposing appearance of the amphitheatre of Arles; but it is more complete. A man may make the circuit on the flat which runs round the upper story, except for abont one-sixth of the circuit, where the cornice and the flat are brokea down.

The greater diameter is about 437 English feet, which includes the thickness of the walls. The exterior height on the uutside is nearly 70 English feet. The exterior face of the building consists of a ground story, and a story above, which is crowned by an attic. There are sixty well proportioned
arches in the ground story, all of the same size except fonr entrances, larger than the rest, which correspood to the fonr cardinal points. These arches open on a gallery, which runs all round the interior of the bnilding. The story above has also sixty arches. All along the circunference of the attic there are consoles, placed at equal distances, two and two, and pierced in the middle by round boles. These holes received the poles which supported an awniog to shelter the spectators from the sun and rain. When it was complete, there were thirty rows of seats in the interior. At present there are ouly seveuteen. The stones of the npper seats are of enormons dimensions, some of them 12 feet lung, and 2 feet in width.

The temple now called the Maison Carree is a parallelogram on the plan, about 76 English feet long, and 40 wide. It is what is called psendoperipteral, with thirty Corintliian fluted pillars, all of which are engaged in the walls, except six on the face and two on each side of the frout portico, ten in all. The portico has, consequently, a considerable depth compared with the width. The columns are ten diameters and a quarter in height. The temple is highly enriched in a good style. Séguier (1758) attempted to prove that this temple was dedicated to C. and L. Caesar, the sons of Agrippa by Julia the daaghter of Augustus. But M. Auguste Pélet has within the present century showa that it was dedicated to 11. Aurelins and L. Verns. The excavations which have been made round the Maison Carrée since 1821 show that it was once surrounded by a colonoade, which seems to have been the bonndary of a forum, within which the temple was placed. The Maison Carrée, after laaving passed through many hands, and been applied to many purposes, is now a museum of paiating and antiquities. Arthur Young (Travcls in France, 2nd ed. vol. i. p. 48) says "that the Maison Carrée is beyond comparisou the most light, elegant, and pleasiog building I ever beheld." Nubody will contradict this.

temple at nemarses, now called the maison carrée.

The famous fountain of Nemausus, which Auso nius meutions (Ordo Nob. U'rb., Burdigala) -
"Non Aponus potu, vitrea non luce Nemansus
Parior"-
still exists; and there are some traces of the aucient construction, though the whole is a modern restoration. But the great supply of water to Nemansus was by the aqueduct now called the Pont dus Gard, and it is said that this acqnednct terminated by a
subterraneons passage in the side of the rock of the fountain. A bnilding called the Temple of Diana, and a large edifice called Tour Mogne (Turris Magna), which appears to have been a sepulchral monument, the gate of Augustus, and the gate called of France, are the chief remaining monuments of Nemausus.

The noblest Roman monnment in France is the aqueduct called the Pont dut Gard, which is between three and four leagues from Nimes. Over this aque-
duet the waters of the sprincs of the Eirm min 18 wa nuar C'sis, were bronght to Nemausus. Tivity Gordom, the ancient Vardo, is derep jont atore bie nepnduct. The channe! is sank betwern rave: 1ala. on which seaterel slirubs krow. The 1 iner rise ath the Circmers, and is subject to flonds, whats would have dentryed a less solid structure than this Foman lifile. The bridee is built whese the ralley is contracted by the rocks, and in its ordinary state all the water patsecs under one arch. The best view of the bridee is from the side above it. The otiser side is disficured by a modern structare of the sane durensions as the lower range of arelies; it is a th lace attached to the Jower arches of the loman boudec, and is uned for the pasore of cats and horen over the Ciardon.

There are thrie tiers of arches. The lowest tier consiats of six arelien, that noller which the water It ms is the laremet. The width of this arch is said ta be: ulanit 50 linglish feet, and the height from the surfaee of the water is ahout 65 feet. The secmal tier onntains cheven arches, sis of which corrop pud to thome below, but they appear ti" he wider, :umi the piers ano not oo thiek as those of the lowest tier. The hei tht of the second tier is said to be athout 64 fint ; bet . .nte of the e dipensions may at be very aceruate. The third tier has thirty-five
ary hat it ther.ivuts, making a length, as it is said, of nbout 870 Enylish feet. It is about 26 frot hisis to the top of the great slabs of stono which cover it. These slabs lie across the chamel in which the water was conveyed over the river, and they project a little so as to form a cornice. The whole huight of the three tiers, if the veveral dimensions are correctly given, is about 155 feet. It is generally said that the bridge is entirely built of stones, without mortar or cement. The stunes of the two lower tiers are withont cement; but the arches of the lighest tier, which are built of much smaller stones, are cemented. At the north end of the aquodnet the lighest tier of arehes and the water chanuel are higher than the ground on which the aqueduct abuts, and there must have been a continuation of small arches along the top of this hill; but there are no traces of them, at least near the bridge On the opposite or sonth side the agueduct abuts azainst the hill, which is higher than the level of the channel. There is no trace of the hill having been piereed; and an intellizent man, who lives near the bridge, says that the aqneduct was carried round the bill, and that it pierced another hill further on, where the tunnel still exists.

 (vii. P. 375). 1 a, vather five in a drection
 mibs lone, an If from hali to three panter if a mic in treadth It is shut in n erery voe by mom-
tains, and is hence called by Pindar a deep vale ( $\beta \alpha \theta u u_{\pi} e \delta o s$, Nim. iii. 18.) There is a remarkable nountain on the NE, called in ancient times Alpisas ('A $\pi \dot{\epsilon} \sigma a s$ ), now Fukia, pearly 3000 fect hich, with a flat summit, which is visible from Argus and Corinth. On this mountain l'erseus is said to have lirst sacrifieed to \%eus Aposantius. (Iaus. ii, 15. § 3: Steph. 13. s. v. 'A $\pi$ ' $\sigma \alpha$ s; Stat. Theh. iii. 460, seq.) Theocritus pives Nemea the epithet of - well-watered " (èvôôpou Ne $\epsilon$ è力s $\chi$ âpos, Theocr. xxv, 182). Several rivulets descend from the surrouding mountains, which collect in the plain, and frim a river, whieh flows northward throngh the Iilues of Apesas, nad falls into the Corinthian gulf, forming in the lower part of its source the boundary Wutway the territories of Sicyon and Corinth. This river also bore the name of Nemea (Ntrab, viii. p. 382, 1)id. xiv. 83; Liv, xxxiii. 15); but as it was deperulent for its supply of water upon the setson if the year, it was sometimes called the Nemean Charmira. (Acseh, de Fiuls. Leg. § 168 , ed.
 memtain-, which enclose the valley, have several matural eaterns, one of which, at the distance of 15 stadia from the sacred [rove of Nemea, and on the read named Trutus, from the latter place to Alycenae, was pointed out is) the cave of the Nemean lion. (1'ans, ii. 15. § 2.)

The name of Nomea was strictly applied to the sacred grove in which the games were celebrated. Like Olympia and the sanctuary of the Corinthiam

Isthmus, it was not a town. The sacred grove contained only the temple, theatre, stadium, and other monuments. There was a villace in the neighburrlood called Bemsisa (B' $\mu \mathrm{K} \omega \sim$ ), of which, howerer, the exact site is uaknown. (Strab, viii. p. 377; Steph. B. s.v.) The baunts of the Nemean lion are said to have beea near Bembina. (Theocr. xxv. 202.)
The chief building in the sacred grove was the temple of Zens Nemeius, the patron god of the place. When visited by Pausanaias the roof bad fillen, and the statue no longer remained (ii. $15 . \S_{2}$ ). Three columus of the temple are still standing, amidst a vast heap of ruios. "Two of these columns beJonged ta the prosisos, and were placed as usual between notac; they are 4 feet 7 inches in diameter at the base. and still support their architrave. The third column, whicl belonged to the onter range, is 5 feet 3 inches in diameter at the base, and about 34 feet high, including a capital of 2 feet. Its distance from the corresponding column of the pronaos is 18 feet. The total height of the three members of the entablature was 8 feet 2 inches. The general intercolumination of the peristyle was 7 feet; at the angles, 5 feet 10 inches. From the front of the pronacs to the extremity of the cell within, the length was 95 feet; the breadth of the cell withio, 31 feet; the thickness of the walls, 3 feet. The temple was a hexastyle, of about 65 feet in breadth on the upper step of the stylobate, which consisted of three steps: the mumber of columns on the sides, and consequently the length of the temple, I could not ascertain." (L.eake.) Though of the Doric order. the columns are as slender as some of the specimens of the lonic, and are so different from the oider Doric examples, that we ought probably to ascribe to the temple a date subsequent to the Persinn wars.
Among the other monuments in the sacred grove were tbe tombs of Opleeltes, and of his father Lycurgus. The former was surrounded with a stone enchsore. and contained certain altars; the latter was a mound of earth. (Paus, ii. 15. § 3.) Tausanias also mentions a fountain called Adrasteia. The latter is, doubtless, the source of water near the Turkish fountain, which is now without water. At the foot of the mountain, to the left of this spot, are tbe remains of the stadium. Berween the stadium and the temple of Zeus, on the left of the path, are some Hellenic foundations, and two fragments of Doric columns. Near the temple are the ruins of a small church, which contsins some Doric fragments. (Leake, Morea, vol. iii. p. 327, seq.; Curtius, Pelopmanesos, vol. ii. p. 505 , seq.)
For as account of the Nemean festival, see Dict. of Antiq. s. $v$.
NEMENTURI, one of the several Alpine peoples enomerated by Pliny (iii. c. 20) among the names inscribed oo the Trophy of the Alps. Their position is unknown.
[G. L.]
NEMESA, a river of Gallia mentioned by Ausnoius (Mosella, v. 353), is the Nims, which joins the Pronsea ( $T_{\text {rum }}$ ). The united streams flow into the Sura (Sour), and the Sura ioto the Mosella.

NEMETACLM or NEMETOCENNA (Arras), the chief town of the Atrebates, a Belgic people. Capsar ( $B . G$. viii. 46 ) spent a winter at Nemetocenna at the close of his Gallic eamprigns. In the inscription of Tangern there is a route from Castellum (Casel) to Nemetracum, whicb is the same place as

Nemetocenna. The distance from Cassel through Bethune to Arras is $43 \mathrm{M} . \mathrm{P}$. The distance aconding to the Antonine Itin. from Cassel througls Minariacum [Minafiacum] is 55 M . P. There is also a route from Tarueona (Thérouenne) of 33 M. P. to Nemetacum. There is no place where these roads can meet except Arras. In the Greek texts of Ptolemy (ii. 9. § 7 ) the capital of the Atrebates is Origiacum (Oprifinkoy); but it is said that the Palative MLS. has Metacon, and all the early editions of Ptolemy lave Metacam. It seems possible, then, that Ptolemy's Metacum represents Nemetacum. But Ptolemy incorrectly places the Atrebates on the Seine; he also places part of their territory on the sea-coast, which mas be true. Origiacum is supposed to be Orchies, between Tournai and Douai. The town Nemetacum afterwards took the name of the people Atrehates or Atrebatii, and the name was finally corrupted ioto Arras. [AtreBATES]

The traces of the Roman mads from Arros to Therouenne and to Cambrai are said to exist. It is also snid that some remains of a temple of Jupiter have been discovered at Arras, on the Place dus Cloitre; and that there was a temple of 1sis on the site of the Mötel-Dicu. (D'Anville, Notice, ofc., Walckenaer, Géog. fc. vell i. p. 431.) [G. L]
Nemetatae. [Gallafcia, Vol. 1. p. 933, a.] NEME'TES ( $\mathrm{N} \epsilon \mu \hat{\mathrm{n}} \tau \alpha \mathrm{c})$. This name first appears in Caesar (B. G. i. 51), who speaks of the Nemetes as one of the Germanic tribes in the army of Ariovistus. In another passage (B.G.vi. 25) he describes the Hercynia Silva as conmencing on the west at the borders of the Helvetii, the Nemetes, and the Rauraci ; and as he does not mention the Nemetes as one of the nations on the left bank of the Rhine (B.G. iv. 10), we may probably infer that in his time they were on the east or German side of the Rhine. The Yangiones and Nemetes were afterwards transplanted to the west side of the Rhine. (Tac, Germ, c. 28.) Ptolemy makes Noviomazus (Speyer) the capital of the Nemetes, but be incorrectly places them north of the Vangiones, whase capital was Borbetomagus ( Forms). Pliny (iv. 17) mentions the Nemetes, Tribocci, and Tarigiones in this order; bnt Tacitus mentions thems just in the inverse order, Vangiones, Tribocei and Nemctes. From none of these writers coold we determine the relative positions of these peoples; but the fact that Nurionagus (Noubuaros) is mentimed by Ptolemy as the chief tomn of the Nemetes. and that Noviomagus is proved to be Speyer by the Itineraries along the west hank of the Pbine, determine the position of the Nemetes.

In Amminnus Marcellinus (xv, 11) and the Not. Imp., Noxiomacus appears under the name of the people Nemetes or Nemetac. Amminnus calls it a municipium, by which ine probahly means a Roman town. In the Notitia of the Gallic provinces, Civitas Nenetum belongs to Germania Prima. In some later writings the expression occurs " civitas Nemetum id est Spira." The name of Speyer is from the Speycrbach, which flows into the Rbine at Speyer. (D) Anville, Notice, d g c.; Walckenaer, Géog. कc. vol. ii. p. 277.)
[G. L.]
NEMETOBRI'GA (Nє $\mu \in \tau \delta \delta \rho!\gamma a$ ), a town of the Tiburi in Asturia, on the read from Bracara to Asturica, now Mendoya, in the district of Tribis. (Ptol. ii. 6. § 37 ; llin. Ant. p. 428 ; Ukert, vol. ii. pt. 1. p. 442.)
[T. H. D.] NEMETOCENNA [Nemetacum.]

NEOKOMIM．［Coms．］
 of Planei，ail to liare been huilt after the Trojan War（Sitrah，is．p．4：39），wal situatel at the froot of Mr．＇ithorea，one of the peaks of Mt．Parnassus． Herodutus iclates that，when the Persian army in－ waldel Plocis，many of the Plocians took refuge in T －horea mar Neon（viii．32），and that the later 1：Y was deatroyed by the Perxians（viii．33）．It was，however，afterwards rebuilt ；but was acain de－ strined，with the other lhocian tomns，at the end of the surred War．（l＇ans．x．3．§ 2．）In its nei＿hharthond，Philonelns，the Phocian genera＇，was iteriaterel，ahl perished in the flight by throwiog Lumaif dinw from ：lofty rock．（Paus．x．2．§ 4．） Nom tom disappears from listory，and in its place we real of a town Trmones，which is described by Pansmias（ $\mathrm{x}, 32, \$ 8$, srq．）．This writer regards Tithoraz as situated on the same site as Neon；and relatrs that Tithorea was the name anciently applied to the whide district，anil that when the inhabitants of the netzhbouring villagen were cultected in the city，the name of Tithorea was snhstituted for that of Neon．This，howeser，is not in accordance with the statement of Ilutarch，aceoreling to whom Ti－ thures，in the tume of the Mithridatic war，wis a fortiess surronaled by precipite ins rocks，where the Phocians tonk refuge from Xerses．He further states that it was ont buch a city as the one ex－ i．thoy in his day．（Illut．Sull．15．）If the view of Plotarel is carrect，il at the fortress，the site of WIn ho whas afterwards ocempiel by the city Ti－ thorea，was the flace where the lhocians took re

## NEONTETCHOS．

fuge from Nerxes，we may conclude that Tithorea and Neon were two different places．

The city，which existed is the time of Plntarch and Pausanias，was a place of some importance， though it had begun to decline for a geacration be－ fore the time of J＇ausanias．The latter writer men－ tions，however，a theatre，the enclosure of an ancient agora，a temple of Athera，and the tomb of Autiope and Phocus．A river flowed by Tithorea，called Cachales（Kaxó $\lambda \eta$ ）），to which the inhabitauts bad to descend in order to obtain water．In the territory of Tithorea，but at the distance of 70 stadia from the city，was a temple of Asclepius，and also，at the distance of 40 stadia，a shrine of 1sis．（Paus．x． 32 ． §§ s－13．）The name is writter Titopea in Hero－ dotus and Paosanias，Titopaia in Stephanus B．， Ti日ópa in Plutarch，bat Ti日6ppa in inscriptions． The Ethnic name in Pausanias is Tı $\theta$ opetus，in Ste－ phanus Titopateís，but in inscriptions Ti日opeés．

The roins of Tithorea are situated at lelitza，a rillage at the NE．foot of Mt．Parnassus．The site is fised by an inscription found at l＇elitza，in which the name of Tithorea occurs．Two－thirds of the modern village stand within the rained walls of the ancient city．A considerable portion of the walls， and many of the towers，still remain．The town was carefully fortified towards the W．and NW．．and was sufficiently protected towards the NE，and E． by the precipitous banks of the Cachales，and to－ wards the S．by the steep sides of Mt．Parnassns， The walls are almost 9 feet broad．The Cachales， which now bears the name of Kakoreuma，or the evil torrent，flows in a ravine below the village，and thas illustrates the statement of Pansanias，that the inhabitants descended to it in order to obtain water． Behind 1＇clitza，ascending the Cachales，there is a cavern on the steep side of the rock，which，during the lant war of independence，received a great number of fugitives．It is very spacious，is supplied with excellent water，and is quite impregnable．This is probably the place where the inbabitants of Neon and the surrounding places took sefuge in the Per－ sian invasion，as the Delphians did in the Corycian cave［see Vol．1．p．768］，more especially as the heicht immediately abore Jelitza is not adapted for such a purpise．A difficalt mule path leads at present through the ravioe of the Cachales across the heights of Parnassus to Delphi．In the time of Pausanias there were two roads from Tithorea across the mountain to Delpbi，one direct，the other longer， but practicable for carriages．Pausanias assigns 80 stadia as the length of the shorter road；but this number cannot be correct，as Leake observes，sioce the direct distance is bardly less than 12 geogra－ phical miles．

Most modern writers have followed Pansanias in identiffing Tithorea and Neon ；but Ulrichs．for the reasons which have been already stated，suppose them to have been different cities，aod places Nenn at the Hellenic ruins on the Cephissus，called Paled Fira，distant $1 \frac{1}{2}$ hour，or $3 \frac{1}{2}$ English miles，from V＇e－ Tita．（Leake，Northern Grecce，vol．ii．p．77，seq－； Ulrichs，in Rheinisches 3 useum，1843，p．544，seq．）

NEOATEICHOS（Néoy teixos）．an Aeolian town aut far from the coast of Mysia，situated between the Hermus and the town of Larissa，from which its distance was only 30 stadia．It is said to have been founded by the Acolinos，as a temporary furt on their first arrival in Asia．According to Strabo （xiii．p．621），the place was more ancient eren than Cyme ；but according to a statement in the Vita

Homeri (c. 10), it was hnilt eight years later than Cyme, as a protection against the Pelasgians of Larissa. (Plin. v. 32 ; Herod. i. 149 ; Scyl. p. 28 ; Steph. B. s.v.) Remains of this town, says Cramer, ought to be sought for on the right bank of the Hermns, and above Quisel-Hissar, on the road from Smyrna to Bergamah.
[L. S.]
NEONTEICHOS (Néov $\tau \in i ̂ \chi o s)$, a fortress on the cast of Thrace, mentioned by Scylas (p. 28) and by Xenophon (Anab. vii. 5. §8), supposed to be the modern Ainadsjik.
[T. H. D.]
 Strab. vii. p. 306), a place on the NW. coast of the Euxine, 120 stadia from the river Tyras, and the same distance from Cremnisci (Anon. Peripl. p. 9), now Akkerman.
[E. B. J.]
NE'PETE (Néлeta Ptol.; Nenita, Strab.: Eth. Nepesinus: Nepi), a city of Etruria, situated in the southern part of that province, at a distance of 30 miles from Rome and 8 miles E. of Sutrium. There is no doubt that it was an ancient Etruscan town, though certainly not a city of the first raok, and was probably a dependency of Veii. Hence we meet with no meation of the name, any more than of its neighbour Sutrium, until after the fall of Veii; but from that period these two cities became places of much importance as the frontier fortresses of the Roman dominion on the side of Etruria (Liv, vi. 9). The name of Nepete is first mentioned in B.C. 386, when it was in alliance with Rome, and being attacked by the Etruscans, sent to sue for assistance from the Romans. But hefore the military tribunes Valerius and Furius could arrive to their support, the city had surrendered to the Etruscan arms, and was occupied with a strong garrison. It was, however, speedily retaken, and the leaders of the party who bad been iastramental in bringing about the surrender were executed (Liv. vi. 9, 10). A few years later a more effectual step was taken to secure its possession by sending thither a Roman colony. The establishment of this is fixed by Livy in n.c. 383, while Velleius Paterculus would date it 10 years later, or 17 years after the capture of Rome by the Gauls (Liv, vi. 21 ; Vell. Pat. i. 14). It was a Latia colony like most of those established at this period. In B.c. 297, Nepete is again mentioned as one of the frontier towns oo this side against the Etruscans (Liv. x. 14); but with this exception we hear no more of it during the wars of the Romans in Etruria. In the Second Punic War it was one of the twelve Latin colonies which declared themselves exhausted with the burdens of the war, and unable to furnish any forther supplies: for which it was punished, before the end of the war, by the imposition of double contributions (Liv, xxvii. 9, xxix. 15). From this time Nepete seems to have sunk into the condition of a subordinate provincial town. Like the other Latin colonies, it obtained the Roman franchise by the Lex Julia, in e. c. 90, aod became from thenceforth a municipiam; which rank it appears to have retained under the Empire, though it is said in the Liber Coloniarum to have received a colony at the same time with that sent to Falerii (Fest. s.r. Municipium, p. 127; Grater, Inscr.p. 308. 2, p. 441. 7 ; Lib. Col. p. 217 ; Zumpt, de Colon. p. 337). Its existence as a municipal town throughout the period of the Roman Empire is proved by inscriptions as well as by Pliny, Ptolemy, and the Tabula (Strab. v. p. 226 ; Plin. iii. 5. s. 8; Ptol. iii. 1. § 50; Tab. Peut.; Orell. Inscr. 879, 3991); hut no mention occors of it in history till after the fall of the Western Empire, when it figures in the Gothic
wars as a place of some importance from its strength as a fortress, and was one of the last strongholds maintained by the Goths against Narses (Procop. B. G. iv. 34). It early became an episcopal see, a dignity which it has retained without intermission till the present time, thongh now but an insignificant town with about 1500 inhabitants.

The only remains of antiquity now visible at Nepi are some ancient sepulchres bewn in the rock, and some portions of the ancient walls, much resembling in their construction those of Sutrium and Falerii. These are considered by Dennis as belonging to the ancient Etruscan city ; but it is more probable that they date only from the Roman colony. (Dennis's Etruria, vol. i. p. 111; Nibby, Dintorni, vol. ii. p. 398.)
[E. H. B.]
NEPHELIS (Nєфe入(s), a small town on the coast of Cilicia, situated, according to Ptolemy (r. \&. § 1), between Antioch and Anemuriam; but if, aa some suppose, it be the same place as the Zeфé $\lambda \iota o v$ mentioned in the Stadiasmus Maris Magni (§§ 181, 182), it onght to be looked for between Selinus and Celenderis. Near the place was a promontory of the same name, where, according to Livy ( $x x$ xiii. 20), the fleet of Antiechns the Great was stationed, when, after reducing the towns of Cilicia as far as Selinus, he was engaged in the siege of Coracesium, and where be received the ambassadors of the Phodians. (Comp. Leake, Asio. Minor, p. 119.) [L. S.]

NE'PHERIS (N ${ }^{\prime}$ คєрts), a natural fortress situated on a rock, 180 stadia from the tewn of Carthage. (Strab. xrii. p. 834.)
[E. B. J.]

## NEPTU'NIUS DIONS. [Pelores.]

NEQU'NUM. [NARNIA.]
NEREAE, a tribe, meationed with several others, who are equally unknown, by Pliny, and placed by bim in the neighbourlood of the Insuls Pattalene, the modern Saurashtrin (vi. 20. s. 23). [V.]

NERE'TUM, or NERITUM (Nípntov, Ptol. Eth. Neretinus: Nardo), a city of the Sallentini, in the ancient Calabria, mentioned both by Ptolemy and Pliny among the inland towns of that people. Its name is also found in the Tabula, which fixes its position 29 M . P. from Manduria on the road to Usentum (Cgento), and 20 ML. P. from the latter city. These data enable us to identify it with certainty with the modern town of Nardoे, a considerable place about 9 miles N. of Gallipoli. It is clear from Pliny that it was a town of municipal rank, and the same thing is confirmed by inscriptions; but there are no ancient remains at Nardo. (Plin. iii. 11. s. 16; Ptol. iii. 1. § 76; Tab. Peut.; Orell. Inscr. 310s. Other inscriptions, with the name of music., nerit. puhlished by Muratori, vol. ii. pp. 1113, 1120, and by Romanelli, vol. ii. pp. 49, 50, are probably spurious. See Orelli, 138.)
[E. H. B.]
NE'RICUS. [Leveas.]
NERIGOS. Pliny (ir. 16, s, 30), in speaking of the islands in the north of Britain, says that, according to some, Nerigos was the largest, and that from it people used to sail to Thule. As besides this passage we have no other information, it is impossible, with absolute certainty, to say what island is meant; but as Norway is in Danish still called Norge, and in Swedish Norrige, it is now generally assumed that Nerigos is the modern Norway; the southwestern headland of which, projecting into the sea, might easily lead the ancients to the belief that it was an island. In the same passage Pliny mentions the island of Bergi, which may possibly be only the
north-western coast of Norwery, the mast important conmercial town in that part still bearing the name of Bergen. The island of Dumma lastly, which is mentioned along with those spoken of above, has been identified with Junoen, belonging to the abbey of Dronthim. But all this is very doubtful, as I'liny, besides being very vagne, may have blundered here as in other parts of his work ; for, according to some. Berciom seems to liave been an ancient name of Ilibernia or Frelend (P. Mel. ii. 5. § 4); and 3umbes is distinctly ealled by I'tolemy (ii. 3. \& 31, viii. 3. § 10), ato island off the north of Britain. [Comp. Oss ADES.]
[L..s.]
NERIS. [E'yмitma.]
NE'AltLs. [Itinica.]
NE'RHOM. [Antabkl]
NDRO'NIA. [Alsianati.]
XERTEREANF (Neprepiaves) a small German Whe, which is mentioned at a late period in tiee c-umiry , nce ofeupied by the Chatti, on the east of Mus A Abscha (I'thl, ii, 11. § 22).
[L.S.]
NEFIOBRHiA ( N ертס́eptra). 1. A town of Hi-ponia Bantica (1'tot. ii. 4. § 13), also called by Ilsy (iii. 1. . . 3) Concorlia Julia, the modera Valera la riejat. It is named 'Epoósposa in the cuphes of Polybius (xxxv, 2), by an ondission of the N. (Ckert, vol, ii. pt. 1. , ). 3s1.)
2. A town of the Celtiberi in Hispania Tarracoriemsis, on the rud from Emerita to Caesarangnsta. It a callel by Aupan Neprosprya (II isp. 50), and biy Suilas Nepyópryes : now Almunia. (1'tol. ii. 6. §58: Fluru-, ii. 17 ; Avt. Itin. 437: Ukert, vol. i. pt. 1. P. 460.)
[T. H. D.]
NERI'A (Nepot́a. Ptol, ii. 6. § i), a small river in the X. of Ili pania Tarracunnos, io the territory it the Antrigones; according to Likert (vol. ii. pt. 1. it (\%an), the mindern Ordunna, near Bitbow; though by wher writers it is variously identified with the Blemes and the Virpions.
[T. H. D.]
SERIICANCS TRACTUK, is mentioned in the Not. Imp. as a continuation of the Armoricanns Tractus. There is also a middle age authority for the exreesion "Nervici littoris tractus." A port on : Lis cuast, named lortus Acpatiaci, was guarded by a the Nerrian troops according to the Notitia. WAnville coneludes that the Nerrii extended from thuir inland ponition to the coast, and had part of it beracen the Morini and the mouth of the Sch-lde; a : in lusion for which there is little evidence, and a toual datagainst it. [Mosaput; Monisi.] [G.L.]

NE'lilll (Nepotion, Nepfios), a mation of Belcien, Viuar captal aceoding tul ltolony (ii.9. § 11) was 1ha :armil (Burai). Whon Caesar was preparing ( $13 . C .57$ ) to march againat the Belgian confederates, ha was informed that the Nervii had promised to finfly 50,000 men for the generad defence, and that they were considered the mint savame of all the - ufederates. (B. G. ii. 4.) The neizhbouns of the Nirrii on the south wore the Ambiani. (B. G. ii. 15.) In Cawsar' time the Nervii had not allowed "memeatores" to come into their conntry; they winf I not let wine be inproted and other things whels emesurazed luxary: When Caesar had 11 arehed for three days tirmgh their territory, he learred that he was not more than 10 homan miles from the Sabis (Sandre), and the Nervii were watiting for him on the other side with the Atrebates and feromandui, their border people. Thas we arevtain that the Atrobates, whose chief town is Arrer, and the Veemandui, whoe chief place was St. Quentin, were also neighbours of the Nervii.

The Nervii had no cavalry, and their conntry was made ahnost impenctrable to any attack from the cavalry of their neighbours by quickset heiges which a man could not get through, and indeed hardly see through them. (B. G. ii. 17.) On the banks of the Sambre Caessar had a desperate fight with the Nervii, commanded by Bodnognatus. During this invasion the old men, the women, and cinildred of the Nervii, were removed to the aestuaries and marshes, somewhere near the coast. The Nervii lnst a great number of men in this battle : "the nation and the name were nearly destroyed." (B. G. ii. 27.) Their " senatores" as Caesar calls them, their chief men, were reduced from 600 to three, and out of the 60,000 who were in the battle there were said to be only 500 left capable of bearing arms. After this terrible slaughter the Nervii rose again in arms against Caesar (u. C. 54), when they joined the Ehurones and others in the atlack on Quintus Cicero's eamp. (B. G. v. 38.) Some of the commentators have found a difficuity about the appearance of the Nervii again in B.c. 54 , atter having been nearly destroyed in B. c. 57 . We mast suppose that Caesar wrote of the events as they occurred, and that he did not alter what he had written. In b.c. 57 he supposed that be had destroyed most of the fighters of the Nervii. In B.c. 54 he found that he was mistaken. In e.c. 53 the Nervii were again preparing to give trouble to the lloman governor; but he entered their country in the wiater season, and before they had time to rally or to eseape, he took many prisoners, drove off many head of eattle, and ravaged their land, and so compelled them to come to terms. (B. G. vi. 2.) When the meeting of the Gallic states in B. c. 52 Was settling the forces that each nation should sead to the relief of Alesia, the contingent of the Nerrii was 5000 men. (B. G. vii. 75.)
Some of the nations between the Seine, the sea, and the Rhine, were Germans in Caessr's time, but these Germans were invaders. The Nervii (Tac. Germ. c. 28) elaimed a Germanic origin, and they may lave been a German or a mixed German and Gallic race; but there is no evidence which can settle the question. Appian (de Bell. Gall. i. 4) speaks of the Nervii as descendants of the Teutones and Cimbri; but this is worth very little. Appian had probally no anthority except Caesar, whom he used carelessly; and he may have applied to the N.rvii what Casar says of the origin of the Adnntuci. (B. G. ii. 29.) Strabo (p. 194) also saya that the Nervii were a Germanie nation, but he does not even knew the position of the Nervii, and he misplaces them.

Caesar mentions some smaller tribes as depeadent on the Nervii (B. G. v. 39) : these tribes were Grudii, Levaci, Pleumoxii, Geiduni, of all whom we know uothing.

Pliny (iv. 17) mentions in Belgica as imland people, the Castologi (apparently a corrupted name), Atrebates, Nervii Liberi, Veromandui ; an order of enumeration which corresponds with the position of the Nervii letween the Atrebates and the Veromandui ; for the chief place of the Atrebates is Arras, of the Nervii Barai, and of the Veromandui St. Quentin. [Acgusta Ifromanduorem.] As Pliny calls the Nervii liberi, we must suppose that in lis time they were exempt from the payment of taxes to the Romans, and retained their own internal government ; probably in I'liny's time the Romans had not yet fully reduced their country.

The territory of the Nervii did not extend beyond the limits of the old diocese of Cambrai, which was, however, very large. The capital of the Nervii was Bagacum (Bavai), but Cambrai was also a town of the Nervii. [Camaracum.]

NERULUM, a tow in the interior of Lncania, mentioned by Livy during the wars of the Romans in that country, when it was taken by assault by the consul Aemilius Barbula, e. c. 317 (Liv. ix. 20). The only other notice of it is found in the Itineraries, from which we learn that it was situated on the highroad from Capua to Rheginm, at the point of junction with another line of road which led from Venusia by Potentia and Grumentum towards the frontiers of Brattium (Itin. Ant. Pp. 105, $110 ;$ Tab. Peut). The names and distances in this part of the Tabula are too corrupt and confosed to be of any service: the Itinerary of Antoninus places it 14 miles (or according to another passage 16 miles) N. of Muranum, the site of which is clearly ascertained. If the former distance be adopted as correct, it must have beea situated at, or in the neighbourhood of, La Rotonda, near the sources of the river Lao (Holsten. Not. ad Cluv. p. 293 ; Romanelli, vol. i. p. 389).
[E. H. B.]
NERU'SII (Nepoviotot). This name of a people occurs in the Troply of the Alps (Plio. iii. 20. s. 24), between the Oratelli and Velauni. Ptolemy (iii. I. § 41) places them within bis Italy among the Maritime Alps. Their chief town was Vintium, which is Vence, on the west side of the Var, and not far from Nicaca (Nizza).
[G. L.]
NESACTIUM (Nєбáктор, Ptol.), a town of Istria, situated to the E. of Pola, on the Flanaticus Sinus, and not far from the river Arsia, which was the bonodary of Istria on this side. Heace Ptolemy calls it the last eity of Italy. It is mentioned by Livy as a city of the Istrians before their conquest by Rome, and a strong fortress, so that it stood a long siege, and was only takeo by the Roman consul C. Claudius Pulcher, by cutting off its supply of water (Liv. xii. 11). It afterwards appears both in Pliny and Ptolemy as a municipal town of Istria under the Romans, and seems to have survived the fall of the Western Empire, but the period of its destrnction is unknown (Plin. iii. 19. 8. 23; Ptol. iii. 1. § 27 ; Tab. Peut.; Anon. Rav. iv. 31). The fact of its proximity to the Arsia (Arsa), combined with Livy's meution of a river flowoing by the walls, render it probable that it was situated immediately on the right bank of the Arsia; but its exact site has not beeo determined.
[E. H. B.]
NESAEA (N $\eta \sigma a i a$ ), a district mentioned in two places in Strabo, with slightly differing descriptions : 1. as a country belogging to Hyrcania, and watered by the Ochus, now Tedjen (xi. p. 509); 2. as a distinct and independent land (xi. p. 511). The geographer probably meant to imply a narrow strip of land, whose boundaries were Hyreania, Ariana, and Parthia respectively, and corresponding with the present Khorisan. It may be identified with the existing Nissa, a small town to the N . of the Aburz ehain of mountains, between Asterabad and Meshed. (Wilson, Ariana, pp. 142148.)

There has been some donbt as to the orthography of the name, which, io some of the editions, is called Noraia; but, on the whole, the above is probably the best. It is not unlikely that the place called by Isidorns Parthaynisa, "which the Greeks call Nisaea," must also be identified with the present

NESTUS.
Nissa. The same district answers to the " regio Nisiaea Parthyenes mobilis " is Pliny (ri. 25. s. 29).
[V.]
NESCANIA, a municipal town in Hispania Bactica, stood on the site of the modern village El Valle de Abdelaciz, 2 leagues W. from Antequera. It is still famed for its mineral springs, the existence of which io ancient times is attested by inscriptions. (Ukert, vol. ii. pt. 1. p. 363.)
[T. H. 1).]
 a district of Asiatic Sarmatia, formed by the windiogs of the river Rha, and occopied by the Asaez, Materi, and Phtheirofhagi.
[E. B. J.]
NESIS (Nisida), a small island oo the coast of Campania, between Puteoli and Neapolis, and directly opposite to the extremity of the ridge called Mons Pausilypus (Seneca, Ep,53). It may be considered as forming the eastern headland of the bay of Baiae or Puteoli, of which Cape Msenum is the western limit. The island is of small extent, but considerable elevation, and undoubtedly constituted at a remote period one side of the crater of a volcano. This must, however, Jave been extinct before the period of historical memory; but it appears that even in the days of Statius and Lucan it emitted sulphureous and noxious rapours, which has long ceased to be the case (Stat. Silv. ii. 2. 78 ; Lncan, vi. 90). It was nevertheless, like the adjoining hill of Pausilypus, a pleasant place of residence. Brutus had a villa there, where he was visited by Cicero shortly after the death of Caesar, and where they conferred, together with Cassius and Libo, upon their future plans (Cic. $a d$ Att. xvi. 1-4). Pliny tells ns that it was fanous for its anparagus, i celebrity which it still retains (Plin. xix. 8. s. 42) ; but the wood which crowned it in the days of Statius (Silv, iii. 1. 148), bas long since disappeared.
[E. H. B]
NESIS (Nîous, Arrian Peripl. p. 18), a small river, 60 stadia from the Borgys, which discharges itself into the Euxine by the Prom. Herculis, Cape Constantiouski (Cape A dler of Gauttier's may). where there is now a river called Mesioumta. [E. B. J.]

NESSON. [Nessonis Laces.]
NESSO'NIS LACUS (i) Neaawvis $\lambda i \mu \nu \eta$ ), a lake of Pelasgiotis in Thessaly, lying east of Larissa, now called Karatjair or Mavponi $\mu \nu \eta$. In summer it is ooly a marsh, and contains very little water, but in winter it is filled by the overflowing of the Pencius. When the basin is filled, its superfluons waters are conducted by a channel into the lake Boeleis, now called Karla. (Strab. ix. p. 440 ; Leake, Northern Greece, vol, i. p. 445 , vol. iv. p. 403.) Strabo regarded the lakes Nessonis and Boebeis as the remains of the great lake which corered Thessaly, before the waters found an outlet througb the vale of Tempe to the sea; but he is mistakeo in saying that Nessonis is larger than Boelveis. (Strab. ix. p. 430.) Nessonis received its name from a town Nesson, which is mentioned only by Stephanus B. (s.v. N $\epsilon \sigma \sigma \omega v)$.

NESTAEI. [NEsti.]
NESTANE. [Mantineia, Vol. Il. p. 264, b.]
NESTI, NESTAEI (Néotoı, Scylax, p, 8 ; Ne= $\sigma \tau a i ̂ o t$, Eratosthenes, ap. Schol. Apollon. Rhod, iv. 1296), a people of Illyricum, with a town of the same name, near the river Nestus (Néatos, Scylax, l. c.; Artemidorus, ap. Steph.B. s.v.), which has been identified with the Kerki.
[E. B. J.]
NEsTUS or NESSUS (Né $\sigma \tau a s$, Scyl. pp. 8, 29 ; Scymn. 672; Pomp. Mela, ii. 2. §§ 2, 9; Plin.
iv. 11, viii. 16; Néaros, 1lesiod. Thicog. 341; Ptul. iii. 12. § 2, iit. 13. § 7: Méotos, Zonar. ix. 28 : Nesto, Turkish Karasii), the river which constituted the bonmlary of Thrace and Stacedonia in the time of Philip and Alexander, an arrangement which the Jimans eontinned on their conquest of the latter country. (Strab. vii. p. 331 ; Liv. slv. 29.) Thucydides (ii. 96) states that it took its rise in Mt. Scomius, whenee the 1 februs descended; being, in fact, that clustor of great summits between Ghiustencit and Sifis, which sends tributaries to all the सreat rivers of the N. of European Turkey. It discharged itself into the sea near Abdera. (Herod. vii. 109: comp. Theophrast. II. P. iii. 2; Leake, N"orthern Greece, vol, iii. p. 215.) [E. B. J.]
XESE LILM (N $\eta \sigma 0$ out $10 \nu$ ), a harbour on the coast of Cilicia, between Cetenderis and Seleucia, 60 stadia (ant of Mylae. (Stadiasntus Mar. Mag. §S 166, 167.)
[L.S.]
NETOPIIAH (Netwфd), a town of Judah, mentiond by Ezra (ii. 22) and Nehemiah (vii. 26), between Bethlehem and Anathoth, if anything can he concluided from the order in which the names oceur, which is so questionable, that Beit-Nittif may be, perhaps, sately regarded as its modern representative. It is situated on the highest point of a lufty ridge, towards the NW. of the ancient tribe of Julals. (Robinson, Bib. Res. vol. ii. Pp. 341347: Reland, Polacstina, pp. 650, 909.) [G. W.]

NETLEM or NEETC'M (Néntov, Ptol. iii. 4. §13: Netum, Cic., Sil. Ital.: Eth, Netious, Cic., Plm.: Noto Jecchio), a considerable town in the S. of sucily, near the sources of the little river Asinarin. (Falconara), and ahout 20 miles SW. of Syractse. We find no mention of it in early times, lut it was probably subject to Syracuse; and it is in accordance with this, that, by the treaty conclulet in s.c. 263 between the liomans and Hieron king of syractise, Nectum was noticed as one of the citus leet in subjection to that monarch. (Diod. xxini. Exe. 1I. 1. 502. ) Wie have no acerunt of the circumstances which subsequently earned for the Nitini the peculiarly privileged position in which we afterwards find them: but in the tlays of Cicero Netum enjosed the rights of a "foelerata civitis" like Messama and Tauromenius ; while, in Pliny's time, it still retained the rauk of a Latin town (rivitns Latinae conditionis), a favour then enjoyed ly valy three cities in the island. (Cic. Verr. is. 2 2t, v. 22, 51; 1llin. iii. 8. s. 14; 1'tol. l. c. ; sil. 1t.1. siv. 268.) Ptulemy is the last ancient writer that mentinus the name: but there is no donht that it continull to exist throughout the middle ases; and muler the Norman king rose to be a place of great inpurtance, and the capital of the southern prownce of Sicily, to which it pave the name of Jid di Noto. But having suffered repeatedly from cartliquakes, the inhabitants were induced to emigrate to a site nearer the sea, where they founded the molern city of Noto, in 1703. The old site, which is now known us Noto Jecchio, was on the sury if if a lufiy bill abont 8 miles from the modern tuwn and 12 from the sea-cuast: sume remain of the aveient amphitheratre, and of a building 1. I I a gymnasiom, are still visille, mud a Greek 1.ow iptini, which belomps to the time of llieron 11. (Fardll dr Reb. Sic. iv. 2; Castell. Inscr Sicil, p. 101.)
[E. 11. B.]
NELDRES (Neîôpos, Arrimn, Indic. c. 4), a small streatn of the l'anjib whimh tlowed into the Hydrates (Iinri or Irarati) Irom the comutry of the

Attaceni. It has not heen identified with moy modern niver.
[V.]

## NEVIRNUM [Novioduxwm.]

NEUT:I (Neupoi) a romad people of the N. of Europe, whom Ilerodotus (iv. 17,51, 100, 125) places in the centre of the region which now comprises Poland and Lithuania, about the river-basin of the Bug. They occupied the district (זìv $\mathrm{N} \in u p(\bar{\delta} \alpha \gamma \bar{\eta} \nu)$ which lay to the NW. of the lake out of whick the Tyras rises, and which still bears the name in Slavonic of Nurskazemja, with its chief town Nur, and a river Nuretz, Some time before the expedition of Dareius, they had been obliged to quit their original seats, on account of a quantity of serpents with which it was infested, and bad taken rafuge with the Budini in the district about the Bug, which had till then belonged to that people. Though not of the same origin, in customs they resembled the Scythians, and bore the reputation of being enchanters ( $\gamma$ óvTєs), like the "Schamas" among the Siberian nomads of the present day. Once a year - so the Scythians and the Greeks of Olbia told Herodotus-epach of them became for a few days a wolf; a legend which still lingers among the prople of Folhymia and White Russia. Pomponius Mlela (ii. 1. $\$ \$ 7,13$ ) repeats this story from Herodotus. (Comp. 1'lin. riii. 34; Creuzer, Symbolik, vol. ii. p. 131.) The Sarmatian Navari of Ptolemy (Naúapol, iii. 5. §25) are the same as the Neuri, the name appearing in a Grecized form; but there is some difficulty in harmonising his statements, as well as those of Eaphoras (ap. Anon. Poet. (vulgo Scymn. Ch.), v. 843 ; Anon. Peripl. p. 2) and of Anmianus Marcellinus ( $x \times x i .2$. § 14), with the more trustworthy accounts of Herodotus. Schafarik (Slav. Alt. vol, i. pp. 194-199) refers the Neuri to the Wendish or Servian stock. [E. B. J.]

NIA (Nia), a river of Interior Libya, disebarging itself into the Hesperian bay, in $13^{\circ} 30^{\prime}$ E. tong. and $90^{\circ}$ N. lat. (Ptol. iv. 6. § 7). Colonel Leake (Journ. Geog. Suc, vol. ii. p. 18) has identified it with the Kio Grande, which takes its rise on the horder of the hichland of Sinegambia, according to Mollien's map (Trav. in the Interior of Africa, 1820), in $10^{\circ}$ $37^{\prime} \mathrm{N}$. lat. and $13^{\circ} 37^{\prime} \mathrm{W}$. long.
[E. B. J.]
NICAE, NICE (Niк $\eta$ ), or NICAEA (Niкaia), a town of Thrace, not far from Alrianople, the scene of the defeat and death of the emperor Valens by the Goths in A. D. 378 . (Amm. Marcell. xaxi. 13; Cedren. it. p. 183; Suzom. ir. 19; Theoph. p. 772.) It has been rariously identified with Kuleli and кintulers.
[T. H. D.]
NICAEA. I. In Asia. 1. (Ninala; Eth. Nikaieús or Nukatis: Ishitik), one of the most important towns of Bithynia, of which Strabo (xii. p. 565 ) even calls it the metropolis, was sitnated on the eastern shore of lake Accania or Ascanins, in a wide and fertile plain, which, however, was somewhat unhealthy in summer. The place is said to have been colonised by Bottiaeans, and to have originally borne the name of Ancore (Steph. B. s. v.) or Helicore (Gieggr. Min. p. 40, ed. 17ulson); but it was subsequently destroyed by the Mlysians. A few years after the death of Alexander the Great, Antigonus, probably after his victory over Eumenes, in 1. C. 316 , rebuilt the town, and called it, ufter himself, Antigoneia. (Steph. B. l. c.; Eustath, ad IIom. Il. ii. 863). Not long after Lysimachus, haring made himself master of a great pait of Asia Minor, changed the name of Antigoneia into Nicaea, in honour of his wife Nicaea, a daughter of Autipater. (Steph. B., Eustath., Strab., ul. cc.)

According to another account (Memnon, ap. Phot. Corl. 224. p. 233, ed. Bekker), Nicaea was founded by men frum Nicaea near Thermopylae, who had served in the army of Alexander the Great. The town was bniit with great regularity, in the form of a square, measuring 16 stadia in circumference; it had four gates, and all ita streets intersected one another at right angles, so that from a monnment in the centre all the four gates could be seen. (Strab. xii. pp. 565 . Sc.) This mooument stood in the gymnatiuin, which was destroyed by fire, but was restored with increased magnificence by the younger Pliny (Epist. x. 48), when he was governor of Bithynia,
Soon after the time of Lysimachns, Nicaea became a city of great importance, and the kiogs of Bithynia, whose era begins in B. C. 288 with Zipoetes, often resided at Nicaea, It has already been mentioned that in the time of Strabo it ia called the metropolis of Bithynia; an bonour which is also assigned to it on some coins, thongh in later times it was cujoyed by Nicomedeia. The two cities, in fact, kept up a long and vehement dispute abont the precedence, and the 38th oration of Dion Chrysostomus was expressly composed to settle the dispute. From this oration, it appears that Nicomedeia alone had a right to the title of metropolis, but both were the first cities of the country. The younger Pliny makes frequent mention of Nicaea and its public buildings, which he undertook to restore when gavernor of Bithynia. (Epist. x. $40,48, \& \mathrm{c}$.) It was the birthplace of the astronomer Hipparchus and the listorian Diun Cassius. (Suid. s. v. "I $\pi \pi a \rho \chi$ os.) The numerous coins of Nicaea which still exist attest the interest taken in the city by the emperors. as well as its attachment to the rulers ; many of them commemorate great festivals celehrated there in honour of gods and emperors, as Olympia, Isthmia, Dionysia, Pythia, Conmodia, Severia, Philadelphia, \&c. Thronghont the imperial period, Nicaca remained an important place; for its situation was particularly favaurable, being only 25 miles distant from Prusa (Plio. v. 32), and 44 from Constantinople. (It. Ant. p. 141.) When the last mentioned city became the capital of the Eastern Empire, Nicaea did not lose in importance ; for its present walls, which were erected dnring the last period of the Empire, enclose a much greater space than that ascribed to the place in the time of Strabo. In the reign of Constantine, A. D. 325, the celebrated Council of Nicaea was held there against the Arian heresy, and the prelates there assembled drew up the creed called the Nicene. Some travellers have telieved that the council was held in a charch still existing; but it has been shown by Prokesch (Erinnerungen, iii. p. 234) that that church was built at a later period, and that the council was probably held in the now ruined mosque of Orchan. In the course of the same century, Nicaea suffered much from an earthquake; but it was restored in A. D. 368 by the emperor Valens. During the middle ages it was for a long time a strong bulwark of the Greek emperors against the Turks, who did not conquer it until the year 1078. During the first crusade, in 1097, it was recovered from them by the Christians, but in the peace which was afterwards concluded it was ceded to the Torks. In the 13th century, when Constantinople was the capital of the Latin empire, Theodore Lascaris made Nicaea the capital of Western Asia; in the end, however, it was finally conquered and incorporated with the Ottoman empire by Orchan. Many of its public buildings were then
destroyed, and the materials used by the conquerors in erecting their mosques and other edifices. The modern Isnik is a very poor place, of scarcely more than 100 houses, while in Pucocke's time, there still existed about 300 . The ancient walls, with their towers and gates, are in tolerably good preservation ; their circumference is 14,800 feet, being at the base from 15 to 20 feet in thickness, and from 30 to 40 feet in height; they contain four large and two sinall gates. In most places they are formed of alternate courses of Roman tiles and large square stones, joined by a cement of great thickness. In some places have been inserted columns and other architectural fragmenta, the ruins of more ancient edifices. These walls seem, like those of Constantinople, to lave been built in the fourth century of our era. Some of the towers have Greek inscriptions. The ruins of mosques, baths, and houses, dispersed among the gardens and cornfields, which now occupy a great part of the space within the Greek fortifications, show that the Torkish town, though now so inconsiderable, was once a place of importance; but it never was so large as the Greek city aod it seems to have beeo almost entirely constructed of the remains of the Greek Nicaea, the walls of the ruined mosques and baths being full of the fragments of Greek temples and churches. On the north-western parts of the town, two moles extend into the lake and form a harbour; but the lake in this part has moch retreated, and left a marshy plain. Outside the walls remnants of an ancient aquednct are seen. (Comp. Leake, Asia Minor, pp. 10, foll.; Vun Prokesch-Osten, Eriainerungen, iii. pp. 321 , foll.: Pococke, Journey in Asia Minor, iii. pp. 181, foll. ; Walpole, Turkey, ii. 1. 146; Eckhel, Doctr. Num. i. pp. 423, foll.; Rasche, Lexic. Rei Num. iii. 1. pp. 1374, foll.)
[L. S.]

COIN OF NICAEA IN BITHYNIA.
2. (Níkata, Arrian, v. 19 ; Strah, xv. p. 698 ; Curt. ix. 3. 23), a city in the Panjab, on the barks of the Hydaspes (or Jelum), built by Alexander the Great to commemorate his victory over Porus, who ruled the flat country intermediate between that river and the Acesines. It was at Nicaea or Bucephalia, which appears to have been on the opposite bank, that Alexander (according to Strabo, l. c.) built the fleet which Ncarchns suhisequently commanded, the country in the immediate neighhourhood having abundance of wood fit for ship-building. No town now exists which can with any probability he identified with it. [V.]

NiCAEA. II. In Europe. 1. (Níkaa: Eth. Ntкaueús: Nizza, in French Nice), a city on the coast of Liguria, situated at the foot of the Maritime Alps, near the frontier of Gallia Narbonensis. On this account, and because it was a colony of Massilia, it was in early times commonly reckoned as belonging to Gaul (Steph. B. s. v.) ; and this attribution is still followed by Mela (ii. 5. § 3) : but from the time that the Varus became fixed as the limit of Italy, Nicaea, which was situated about 4 miles

E E 4

NICAFA.
to the E. of that river, was naturally jwh laton mo Itals, and is aceordingly so deseribel by Mtrath 1'ling, and Ptoleny: (Strab, iv, p. 184; Plin. m. 5. s. 7: 1ptul. iii. 1. § 2.) We have no account of its early history, beyond the fact that it was a colony of Massilia, and appears to have continned always in a state of dependency mom that city. (Strib. is. 1p. 180, 184; Plin. I. c.: Steph. B.s. c.) It was situated on the horders of the Ligurian tribes of the (2xybit and 1) ciates: and, as well as its hoizhituur Autipulis, was continaally hurassed by the invurim of theme harbarians. In 18. C. 154 1.nth mitios wern actually besieced by the lieurians, and the Massilians, fiuding themsclves unable to rephlae the assailants, atplied to Rume for thastance; the consul (2. Opimin- who was despatclied with an army to their sumenor, quickly compelled the lizurims to lay down their ams, and deprived them of a comsiderabie part of their territory, which was annexed to the depemdency of Massilia. (Pol, xxxiii. 4. 7 ; Liv. Epuit. Alvii.) From this time, nothing mate is heard in history of Nicaen, whicb contimued t, hel oug to the jurisiletion of Massilia and, even atoor it came to bue subject to the Romans, and of tut lod gengraphically in Italy, was still for munici14 parpuses depmondent unon its parent city. (Strab.

1. 184.) At a later perivd, the new divisiun of tho jurvines again trabserred to Gaul the towns of Nisma and Cmmenclium, together with the whole district of the Maritime Alps, westratel of the Tripmea Dugnti. Hence, we fint Nieaea described by Ammians ( $\mathrm{x} ., 11$. § 15) as belonciog to Ganl: aod fluins the deeline of the Enpire, after it had lucoma :an miongal sec, the names of its lishops are fount ammer the (inuli-h predates. It does not appear to hawe ceor been a town of much importance tumber the loman Empire; and was apparently edhpest by the city of Cemenclium (Cimiez), in its immediate nequbburlmok. But it had a good Pirt, which must always have secured it some share of properity, anl after the fall of Cemenclim, it rone to be the mant impert:unt eity in this part of Gaul, and became the eapital of an independent district callod pian Contetere th Xioce ('omonty of Niec). This eventually fell into the hatork of the Howse of Savoy. :aty I new formess part of the dominions of the king of Sardma. Niar itwolf is a flourshing place, with ab ent 30,000 inhabitants, but has no remains of ant "uity. The ancint city probably oceupied the low he, how the site of the evistle, and the immediate michlomerlumel of the port, which though small, - morme. Sice is sitnated at the month of the river Papfaner, a comsilmable mountain torrent, evilatly the streath mallet I'ateon by Pliny and Math. (I'lon. l. c: Ma, ii. 4. §9.)

Abnat 2 mike E . of Nice is a deep bay or inlet butwern two rucke promontories, furming a spacinus nutemal, harlimer nuw known as the Gulf of Villafirmen, from at tumn of that mame, which has hownere esisted only since the 13th century. This is pullally the Portes Otrveta of the Maritime ltinmar: (p. 501). The Anso Pumters of the same Itmesary is probally a small cove, forming a well-shultered h.arhour for small vessids on the E. side of the licadlamd, callel ('upe di S. Ospicio, which forms the castern beundary of the Giulf of Iilluffanca. A similar cove a fow miles forther E. just burbw the 1 midern village of $E a$, is probably the Avisu) Poterts of the same anthaty; but the dntances given between these pints atro greatly overstated.
[1.. II 1 .].]

## NICER.

2. (Ninala: Fth. Niкateís), a fortress of the Locri lipienemidii, situated upon the sea, and close to the pass of Thermopylae. It is described by A sechines as one of the places which commanded the pass. (De Fals. leg. p. 45, ed. Steph.) It was the first Lacrian town after Alpenos, the latter being at the very entrance of the pass. The surrender of Nicaes by Phalaceas to Philip, in B. C. 346 , made the Macedonian king master of Thermopylae, and brought the Sacred War to an end. (Jiod. xvi. 59.) Philip kept possession of it for some time, but sulamequently gave it to the Thessalians along with Natnevil. (Dem. Phil. ii. p. 153. ed. Reiske: Aesch. c. Ctesiph. p. 73, ed. Steph.) But in B. C. 340 we agnin find Nicaca in the possession of Pluilip. (Dem. in I'hil. Ep. p. 153.) According to Memnon (ap. Phot. P. 234, a., ed. Bekker ; c. 41 ; ed. Orelli) Nintea was destroved by the Phocians, and its inHalitants founded the Bithynian Nicaca. But even if this is true, the town must have been rebuilt soon afterwards, since we find it in the hands of the Aetolians during the Roman wars in Greece. (Polyb. x. 42, xvii. 1: lir. xxviii. 5. xxxii. 32.) Subsequently the town is only mentioned by Strabo (ix. p. 426). Leake identifies Nieaea with the castle of Pundonitza, wbere there are Hellenic remains. (Northem Grecce, vol. ii. p. 5, seq.)
3. In Illyria [Castra, Vol. I. p. 562, a.]
4. In Thrace. [Nicae.]

NICAMA (Niкка $\alpha$ ), a place on the SW. coast of ludia, called a metropolis by Ptoleny (vii, 1. § 12). It was in the district of the Bati, within the territury of king Pandion. It was very prohably on the site of the present Cottopatam. [V.]

NICA'SIA (Niкaбia), a small island near Naxos. (Steph. B. s. v.)

NICEPHO'RIUM (NıкךфGpıo, Strab. хтi. p. 747; 1'tol. v. IS. §6; Steph. B. s. v.), a place of ennsilerable importance in Mesopotamia, on the river Euphrates. According to Isidorus (Jons. Parth. i. ed. Mitler) and Pliny (v. 24. s. 21. vi.26. s. 30), it owed its foundation to Alesander the Great: according, bowever, to Appian, to Selcucus I., which is much more likely (Syriuc, e. 57). It is mentioned by Dion Cassius ( x 1.13 ) and by Tacitus (Amn. vi. 40), but simply as one of many towns frunded by the Macedonians. Strabo calls it a town of the Mygdonians in Mesopotamia (xvi. p. 747). Nuthing is known of its intermediate history; but Justinian erected a fortress here (Prorop. de Aedif. ii. 7); and the emperor Len, who probably alded several new works to it, is said to liare chanced its name to Lebntopolis. (Cf. Ilierorl. p. 715; and Cluron. Eless. ap. Assemani, i. p. 40.5.)
[V.]
NICEP'PIORTII:S, an affluent of the Tigris, which waslecel the walis of Tigranocerta (Tac. Ann. sv. 4), now the Bitlis-chuï, which rises at Bash Khin, on the S. of Jibel Jimruil, and W, of Lake Jian. (Cliesney, Firperd. Euplirat. vol. i. p. 18: Ritter, Erolkumite, vol. x. p. R8.) Kiepert's map identifies it with the Jezerchiane Sir.
[E. B. I.]
NICER (the Neclare), a tributary of the Rhine, havine its sourees not fir from those of the Dannte, and discharcing iteelf into tho Rhine in the neighbourhood of Manheim. Its course forms a sort of semicircle, as it first flows in a north-eastern and afterwards in a north-western direction. The Niece is not memtioned until a late perind of the Roman Eimpire. In A. n. 319, the emperor Val-atinian lad to make great effirts in turning sime part of the
river into a new channel for the purpose of protecting the walls of a fort erected on its banks from being undermined and washed away by its waters．（Amm． Marc．$x \times r i i i .2$ 2；Vopisc．Prob．13，where it is called Niger ；Auson．Mosell． 423 ；Sidon．Apollin．Paneg． ad Avit．324；Eumen．Paneg．Const．13；Symmach． Laud．in l＇alent．ii．9，10．）The remaias of Roman antiquities on the lanks of the Nicer are very numerous，and a few of its tributaries，such as the Armisin（Erms）and Murra（Murr），are men－ tioned in inscriptions found in the country．［L．S．］

NI＇ClA．［Castra，Vol．I．p． 562 ，a．］
 iv．5．§9），a principal town in the Nomos Proso－ pites of Lower Aegypt，lay just above Nomemphis and nearly midway between Nemphis and Alex－ andreia．It was one of the military stations on the main road between those cities which ran nearly parallel with the Canopic arm of the Nile．［Proso－ prits．］
［W．B．D．］
 Isnikmùl or Ismid），the capital of Bithyoia，sitnated on the north－eastera coast of the Sinas Astacenus，a part of the Propontis．The town of Astacns，a little to the sonth－east of Nicomedeia，was destroyed，or greatly damaged，by Lysimachus；and some time after，e．c． 264，Nicomedes I．bnilt the town of Nicomedeia，to which the inhabitants of Astacus were transferred （Steph．B．s．v．；Stral，sii．p．563；Paus．v．12．§5； Enseb．Chron．O1．129．1）．The founder of the new city made it the capital of his kingdom，and in a short time it became one of the largest and most flourishing cities，and contimned to prosper for more than six ceaturies．Pliny，in his letters to the em－ peror Trajan，mentions several puhlic buildings of the city，such as a senatc－honse，an aqueduct，a furwo， a temple of Cybele，\＆c．，and speaks of a great fire， during which the place suffered much（Epist．x．42， 46）．Respecting its rivalry with Nicaea，see Ni－ c．aea．According to Pliny（v，43），Nicomedeia was $62 \frac{1}{2}$ miles to the south－cast of Chalcedon，while ac－ carding to others it was only 60 or 61 miles distant （ft．Ant．pp．124，140；1t．Nieros．p．572；Tab． Peut．）Under the Roman Empire Nicomedeia was often the residence of the emperors，such as Diocle－ tian and Constantine，especially when they were en－ gaged in war against the Parthians or Persians． （Aurel．Vict．de Caes． 39 ；Nicephor．vii．in fin．） The city often suffered from earthquakes，hut owing to the munificence of the emperors it was always re－ stored（Amm．Marc．xvii．7；Pliflostorg．iv．p．506）． It also suffered much from an invasion of the Scy－ thians（Amm．Narc．$x$ xii． $9,12,13$ ）．The orator Libanius（Orat．62，tom．iii．p．337，ed．Reiske） mourns the loss of its thermae，basilicae，temples， gymnasia，schools，pnblic gardens，\＆c．，some of which were afterwards restored by Justinian（Procop．de Acd．г． 1 ；comp．Ptol．v．1．§3，viii． 17. § 4 ；Hierocl． p．691）．From inscriptions we learo that in the later

coin of nicomedeia．
period of the empire Nicomedeia enjoyed the hononr of a Roman colony（Orelli，Inscript，No，1060）．The city is also remarkable as being the native place of Arrian，the historian of Alexander the Great，and as the place where Hannibal put an end to his che－ quered life．Constantine breathed his last at his villa Ancyron，vear Nicomedeia（Cassiod．Chron． Const．；Philostorg．ii．p．484）．The modern Ismid still contains many interesting remains of antiquity， respecting which see Pococke，vol．iii．p．143，\＆c．．； Description de l＇A sie Mineure，tom．i．；comp．Rasche， Lexic．Rei Num，iii．1．p． 1435, \＆c．［L．S．］

 the Nicon of the Periplas．These towns must be placed in the Bura Somauli，or the land of the Somauli，or Shuimali，a mild people of pastoral ha－ bits，coufined to the coast，which they occupy from the Red Sea to the river Juba．The＂Port of Sa－ rapion＂corresponds with Markah，while the ＂Pun of Nicon＂agrees with the point called Torre in Owen＇s map．（Nerrative of Voyages to explore the Shores of Africa，Arabia，and Madagasear， performed in H．N1．ships Leven and Barracouta， London，1833；comp．Cooles，Claudius Itolemy and the Nile，p．64．）
［E．B．J．］
N1CO＇NIUD（Nucéniov，Scylas，p．29），a city of Europeaa Sarmatia，which Strabo（vii．p．306）places at 180 stadia from the month of the Tyras，while the anonymous Coast－describer（ p .9 ）fixes it at 300 stadia from the Isiacorum Portus，and 30 stadia from the Tyras on the coast．Stephanus of Byzantiam（s．v．）states that it was at the mouth of the 1ster，but for＂ $1 \sigma \tau \rho o v$ ，Típou should probably be read．Ptolemy（iii．10．§ 16）has remored it from the coast，and placed it too far to the N．Its posi－ tion must be looked for near Ovidiopol．［E．B．J．］

NICO＇POLIS（Nıко́то入ıs ：Eth．Nıколи入ín！s）， i．e，the＂City of Victory．＂I．In Asio．1．A town of Bithynia，on the coast of the Bosporus，a few miles north of Chalcedon．（Plin．v．43；Steph． B．s．v．）

2．A town in Cappadocia or Armenia Minor， founded by Pompey on the spot where he had gained lis first decisive victory over Mithridates．（Strab．sii． p． 555 ；Appian，Mithrid．101， 105 ；Dion Cass． xxxy． 33 ；Caes．Bell．Alex． 36 ：Plin．vi．10．）It was situated in a valley of the river Lycus，a tribu－ tary of the Iris（Acta Mfartyr．tom．iii．Jul．p．46）， at a distance of 100 miles to the north－west of Sa－ tala，and 98 to the north－east of Sehastia．It was a populous town as early as the time of Strabo；but during the last period of the Empire it appears to have suffered much，and its decayed walls were restored by Justiuian．（Procon．de Acd．iii．4；comp．Ptol．v．7．
§ 3; Itin. Ant. pp. 183, 207, 215; Hierocl p. 703: Sieph. B. s.v.). Nist travellers and antiquaries are agreed, that Nio pulis is represented by the roodern Turkish town of Derriki; but as this place is ituated un a tributary of the Euphrates, the opinion is opposed to the statements of our authorities, espe. cially the "Acta Martyrum." Others are incliaed to regand Kard-hissar, on the Lycus, as marking the site of Nicopolis; but still the rontes indicated in the 1tineraries are in favour of Derriki; whence DAusille too identifies this place with Nicopolis, assoming that the error lies with the author of the "Acta Martyram," who expressly places Nicopolis on the river Lycus.
3. An episcopal see of uncertain site, in Lydia or lotia, mentioned by Iherocles (p. 660). [L. S.]
4. A town in Cilicia. [Issc's.]
5. A town in Palestine. [Emblacs, No. 2.]

NICo'polis. 11. In Africa. A toma in Aczypt, founded by Aogustus Caesar, in b. c. 24, on the ficld where be defeated, for the last time, M. Antonims, and in commemoration of the surrender of Alexandreia. (Strab. xvii. P. 795 ; Joseph. E. Jud. iv. 11 ; Dion Cass. li. 18; Steph. B. s. v.) The cunqueror was at the moment bighly inceased with the Alexandrians; and, by the funudation of a Roman town io their immediate neighboarisood, songht to inflict a permanent blow on their political and commercial supremacy. Nicopolis was built a little W. of the Delta pruper, on the banks of the canal which connected Canopos with the capital, and about three and a half miles from its eastern gate. That it was intended for a city of the first rank appears from its ground plan, which, bowever, was never executed. Its founder built an amphitheatre and a dianlos, and established there Ludi Quinquennales, in hooour of his victory ('Alegavopeia, Spanleim, Epist. v. § 3, ed Morell.); and coins bear on their abverse the legend NIKOHOAIE. ミEBAミT. KTIET.

He also desigued to erect several temples, and to transfer to them the principal sacrinices and priestcolleges of the Macedonian capital. But the whole scheme was a failure ; the natural adrantages of Alsamdreia were incontestable; and the lioman "Ciry of Victory" was never more than than a suburb of its rival. Within less than a century after its foundation, the name of Nicopolis disappears from history. A towo called Juliopols, mentioned by lliny atone (vi. 23, s. 26), as scated on the same canal, and about the same distance ( $20-30$ stades) from Alexandrega, is apparently Nicopolis (see Maunert, vul. x. p. 62 6).
[W, B. D.]
NICOPOLls. 11I. In Europe. 1. Acity of Epeirus, ere ted by Aunustus, in commemoration of the victory of Actiunn, y.C. 31. It was situated near the entrance of the Ambraciot golf, on the promontory of Epcirns, which is immediately opposite that of Actium in Atarnania. The extrenity of the Epeirot promontury is naw oceupied by the thwn of I'riresa; and Nicop lis lay 3 miles to the N . of this town, mata isthe or separatims the I nian sea from the Ainbraciot gulf. It was apon this isthmms that Aucustus was encamped befcre the battle of Actimu. His own tent was pitched upon a height immediately above the isthuns, from whence he could see both the outer sea towards Pasi, and the Aubraciot golf, as well as the farts towarls Nic polis. He fortified the canme, and cumected it by walls with the outer port, called C marus. (Din Cias. 1. 12.) After the battle he surrounded with stones the place where his own teut had been pitched, nderned it with naval
trophies, and built within the enclosure a sauctanry of Neptune open to the sky. (Dion Cass. 1i. 12.) But, according to Suetonius ( 4 ug. 18), he dedicated this place to Nuptnne nod Mars. The city was peopled ly inhabitants taken from Ambracia, Anactorium, Thyrium, Argos Amphilorhicum, and Calydon. (Dion Cass. li. 1 ; Suet. Aug. 12; Strab. vii. pp. 324, 325 : P'sus. v. $23 . \S 3$, vii. 18. § 8, x. 38. § 4.) Augustus instituted at Nicopolis a quinquermial festival, called Actia, in commemoration of his victory. This festival was sacred to Apullo, and was celebrated with music and gymaastic gannes, horse-racing and sea-fights, It was probably the revival of an old festival, since there was an ancient temple of Apollo on the promontory of Actinm, which is mentioned by Thncydides (i. 29), and was enlarged by Augustus. The festival was declared by Augustus to be a sacred contest, hy which it was made equal to the foar great Grecian games; it was placed under the superiatendeace of the Lacedaemonians. (Dion Cass., Suet., Strab., ll. cc.) Angustus caused Nicopolis to be admitted into the Amphictyonic council (Paus. x. 38. § 3), and made it a Roman colony. (Plia. iv. 1. s. 2 ; Tac. Ann. v. 10.) A Cbristian church appears to have been founded at Nicopolis by the Apostle Paul, since lie dates lis letter to Titus from Nicopolis of Macedonia, which was most probably the colony of Aulgastus, and not the town in Thrace, as some have supposed. Nicopolis continged to be the chief city in Western Greece for a long time, but it bad already fallea iato decay in the reign of Julian, since we find that tbis emperor restored botb the city and the games. (Jlamertia, Julian. 9.) At the begianing of the fifth centary it was plundered by the Goths. (Procop, B. Goth. iv, 22.) It was again restored by Justiaian (de Aedif. iv. 2), and was still in the sistlu century the capital of Epeirus. (Hicrocl. p. 651, ed. Wessel.) , Ia the middle ages Nicopolis sunk into insigoificance, and the town of Préresa, built at the extremity of the promontory, at letigth absorbed all its inhabitants, and was doubtless, as in similar cases, chiefly constructed oat of the ruins of the ancient city.

The rains of Nicopolis are still very considerable. They stretch across the marrowest part of the isthmus already described. Strabo (vii. p. 324) erroneously describes the isthmus as 60 stadia in breadth; but the broadest part, from the southeastern estremity of the lagoon called Mazoma to Miytika, is only three miles; while the narrowest part is less than half that distance, since the eastern halt of the istbmus is occupied by the lagoun of Mazoma. This lagoon is separated from the Ambraciut gulf only by a narrow thread of land, which is a mile long, and has openings, where the fish are caught in great numbers, as they enter the hagoon in the winter and quit it in the summer. This illustrates the statement of an ancient geographer, that fish was so plentifol at Nicopolis as to be almost disfusting. (Geogr. Gracc. Min, vol. iii. p. 13, ed. Hudsoa.) Nicopolis had two harhours, of Which Strabo (vii. p. 324) says that the nearer and smaller was called Comarus (K $\delta \mu a p o s)$, while the forther, and larger, and better one, was near the month of the gulf, distant about 12 stadia from Nicopolis. It would appear, that Strabo conceived bath the ports to have been on the western cosst out-ide the golf; but it is evident from the nature of the western const that this caanot have been the c:ac. Mreover, Dion Cassius (1. 12) calls Comarus

NICOPOLIS.
NIDUM.
the onter port; and there can be little douht that the second harbour, intended by Strabo, was the port of Jathy within the gulf, the distance of which from Nicopolis corresponds to the 12 stadia of Strabo, and where there are some Roman ruins a little within and on the eastern shore of the creek. The port of Comarus was doubtless at Mýtika, but the name of Gomaro is now given to the wide bay north of Mýtika

The rains of Nicopolis are now called Paleoprévesa. On approaching them frem Prevesa, the traveller first comes to some small arched buildings of brick, which were probably sepulchres, beyond which are the remains of a strong wall, probably the southern enclosure of the city. Near the sonthwestern extremity of the lagoon Mazoma, is the Paleokastron or castle. It is an irregular pentagenal enclosure, surrounded with walls and with square towers at intervals, about 25 feet in beight. On the western side, the walls are most perfect, and here too is the principal gate. The extent of the enclosure is abont a quarter of a mile. The variety of marble fragments and even the remains of inscriptions of the time of the Roman Empire, inserted in the masonry, prove the whole to have been a repair, though perhaps upon the site of the original acropolis, and restored se as to have been sufficiently large to receive the diminished population of the place. It may have been, as Leake conjectures, the work of Justinian, who restored Nicopolis.

Three hondred yards westward of the Paleókastron are the remains of a small theatre but little dilapidated. Col. Leake says that it appears to be about 200 feet in diameter; but Lieut. Wolfe describes it as only 60 feet in diameter. Being built upon level gronnd, the back or highest part is entirely supported upon an arched corridor. Between this

theatre and the shore, are the ruins of a quadrangular building of brick, which was perhaps a palace, as it has numerous apartments, with many niches in the walls for statues, and some remains of a stone parement. It stands just within an aqueduct, supported upon arches, which entered Nicopolis on the nerth, and was 30 miles in length. Considerable remains of it are met with in different parts of Epeirus.

Farther north, at the foot of a range of hills, are the remains of the great tbeatre, which is the most conspicuons object among the ruins. It is one of the best preserved Roman theatres is existence. The total diameter is about 300 feet. The scene is 120 feet long, and 30 in depth. Tbere are 27 rows of seats in three divisions. From the back of the theatre rises the hill of Mikhalitzi, which was undoubtedly the site of the tent of Augustus before the battle of Actium, Close to the theatre are the ruins of the stadinm, which was circular at both ends, unlike all the other stadia of Greece, but similar to several in Asia Minor, which have been constructed or repaired by the Romans. Below the stadium are some ruins, which are perhaps those of the gymnasium, since we know from Strabe (vii. p. 325) that the gymnasium was near the stadium. The accompanying map is taken from Lieut. Wolfe's survey. (Leake, Northern Greece, vol. i. p. 185, seq.; Wolfe, in Journal of Geogr. Soc. vol, iii. p. 92 , seq.)

COLN OF NICOPOLIS IN EPERLLS.
2. A town of Thrace, not far from the month of the Nessus, and therefore called by Ptolemy (iii. 11.
 to have been founded by Trajan, as it is surnamed Ulpia upon coins. The Scboliast upon I'tolemy says that it was subsequently named Christopolis ; but it is still called Nicopolis by Socrates (H.E. vii. 36) and Hierocles (p. Є35).
3. A town of Thrace at the foot of Mt. Haemus. (Ptol, iii. 11. §§ 11.)
4. A town of Tlirace, situated at the place where the Iatrus flows into the Danube, and erected by Trajan in memory of his victory over the Dacians. (Amm. Mare. xxxi. 5 ; Jomand. de Reb. Get. c. 18; IIierocl. p. 636.)

NICO'TERA (Nicotera), a town of Bruttium, known only from the Antonine Itinerary (pp. 106, 111), which places it $18 \mathrm{M} . \mathrm{P}$. sonth of Vibo Valentia, en the road to Rhegium. It is repentedly mentioned in the middle ages, and still exists under its ancient name as a considerable tuwn and an episcopal see.
[E. H. B.]
NIDUM or NIDUS, a tomn of Britain, situated according to the Itinerary (p. 484), on the rond from Isea Dumnuniorum to Isca Silurum, and consequently in the territory of the Belgae. This site, however, is in all probability false; and it appears rather to have been a town of the Silures, the modern Neath, on the river of that name in Glamerganshire. (Camden, p. 735.)
[T. II. D.]

NTF: (Nor, 1silor. Parth. 16. ed. Mïller), a small place in Ariana, probably the present $N \mathrm{~N} h$, in Kiz histun.
[V.]
NIGEIR or NIGIR (Níretp, Ptal. iv, 6. \$ 14: Nírıp. Acathem. ii. 10; Niser, gen. Nivrís, Plin. v. 4. 8, viii. 32), a great river of interior Libya, flowing from W. to E. It has long been a moot point among geographers whether the Nigeir of the ancients should be identified with the river now known as the Djolibi or Quorra, which, after taking its course through the vast plains or lowlands of Ceatral Africa, turns southmards towards the Bight of Bemin, where it enters the sea. For instance, (insellin (Geographic des Anciens, vol. i. pp. 125-135) came to the conclusion that the ancients possessed no knowledge of NW. Africa to the S. of the river Sun. Wahkenaer (Récherches Géographiques sur TInteriear de l'Afrique Septentriomente, Paris, 18-21) also, who has carefully discussed this point, sums up the result of his inquiries by asserting that none of Ptolemy's rivers can be the same as the folibit or any other stream of the Biledu-l-Sudan, as that region was quite unknown to antiquity, and was, in reality, discovered by the Ar.tus, Following in the same track, Mr. Cooley (C'taulius Ptolemy and the Nile, London, 1854) regards the Nigeir as a hypothetical river, representing collectively the waters of the Biledu-l-derid. On the other band, Colonel Leake (Journ. Geog. Suc. vol. ii. Ip. 1-28), whose views are adopted in the present article, considers that Ptolemy's information on the Djolithi or Quorra, although extremely imperfect, was real. There scems, indeed, to be reason for believing that its diseorery may be placed at a much earlier perini, and that its banks were reached by the young Nasamones. [Jasamoxes.] Ptolemy's statements (l, c.) are annesed, from which it will be scea thatt the arguments in favour of the identity of his Niscir with the Quorra are very stroag. He believed that the parth was spberical; he divided the great circle into $360^{\circ}$; of these degrees he placed the same number in the breadth of N. Africa, that modern olservations confirm; in the length of the same country he erred only ope-tenth in excess. While in the interior, proceeding from a pwint of the W. coast, where his positions approximate to molern geograplyy, he placed a great river, flowing from W. to E., exactly in the latitude where the (2urra flows in that direction.*

In coosidering the exact meaning of this passage,

In the t atin
and
it should be remembered that the mond $\epsilon \kappa \tau \rho \circ \pi 幺$, translated " divergent," simply indicates the point of junction of two streams, withont any reference to the course of their waters. At present, our acquaintance with the Quorvas is too limited to identify any of its divergents ; and even were there data, by which to institute a complarison, the imperfection of Itolemy's information will probably leave these particulars in obscurity. After having stated that the Geir and Nigeir are the two principal rivers of the interior, he describes the one, as yoking together
 Usargala; and the latter, as uniting in the same way Mt. Mandrus with Mt. Thala. It is plain that lie considers them to be rivers beginning and ending in the iaterior, without any connection with the sea, If two opposite branches of a river, rising in two very distant mountains, flow to a common receptacle, the whole may be described as joining the two mountains. Of the general direction of the current of the Nigeir there can be no doubt, as the latitudes and longitudes of the towns on its banks (\$§ 2428) prove a general bearing of E. and W.; and from its not being named among the rivers of the W . canst ( $\$ 7$ ), it must have been supposed to flow from W. to E. The lake Libye, to which there was an E. divergent, though its position falls 300 geog. miles to the NW. of Lake Tschad, may be presumed to represent this, the prineipal lake of the interior; it was natural that Ptolemy, like many of the moderns, should have been misinformed as to its position, and communication of the river with the lake. It is now, indeed, known that the river does not communicate with Lake Tschad, and that it is not a river of the interior in Ptolemy's sense; that its sources are in a very different latitnde from that which he has given; and its course varies considerably from the enormons extent of direction to the E., which results from his position of the towns on its banks. But recent investigations have shown that the difference of longitude between his source of the river and the W. coast is the same as that given by modern observations, - that Thamompacaina (Cauиуōárava, $\S 28$ ), one of his towns on the Nigeir, ctiucides with Timbukiti, as laid down by M. Jomard from Caillic, - that the length of the course of the river is nearly equal to that of the Quonra, as far as the mountain of Kiong, with the addition of the Shaclda or Shary of Funda, - while Mt. Thala is very near that in which it may be supposed that the Shadda has its origin. In the imperfect state of our information upon the countries between Bornit and Ilarfiir, it would be hazardous to identify the lakes Cheb nides and Nuba. In comparing P'tolemy's description of the central country between the Nile and Nigeir, there are reasons for conclnding that he had acquired an obscure knowledge of it, similar to that which had reached Europe before the discoveries of Denham, Clapperton, and Lander. The other great river, the Genk or Gin ( $\Gamma$ eip, § 13), is the sutue as the river called Misselid by Browne, and Om Teymain, in Arabic, by Burckhardt; while the indigenous name Dijpr recalls thiat of Ptolemy, and which takes a general course from SE, to NW. Burekhardt adds, that this country produces ebony, which agrees with what is stated by Claudian (Idyll. in Nifum, 19), who, as an African, ought to the am authority, though, like an African, he confounds all the rivers of his country with the Nile; but, in another pas-ace (I. Consul. Stilich. i. 252), he represents the Gir as a separate river, rivalling
the Nile in size. Claudian conld not have intended by this river, the Ger of Pliny (v. 1), at the foot of Mit. Atlas, and a desert of black sand and burnt rokks (Jun?), at which Paullinus arrived in a few days' journey from the maritime part of Mauretaoia; though it is probable that he may have intended, not the Geir of Itolemy, but the Nigeir. The termination Ger was probably a generic word, applied to all rivers and waters in N. Africa, as well as the prefix Ni ; both were probably derived from the Semitic, and came through the Phoenicians to the Greeks. By a not uanatural error, the word became comected with the epithet "Niger," and thus the uame Nigritae or Nigretes was synonymous with Suictan (the Blacks); the real etymology of the name tends to explain the common belief of the Africans, that all the waters of their country flow to the Nile. It is from this notion of the identity of all the waters of N. Africa that Pliny received the absurd account of the Nile and Niger, from the second Juba of Namidia. He reported that the Nile luad its origin in a mountain of Lower Nauretania, not far from the Ocean, in a stagnant lake called Nilis; that it flowed from thence through sandy deserts, in which it was concealed for several days; that it reappeared in a great lake in Mauretania Caesariensis; that it was again hidden for twenty days in deserts; and that it rose again in the sources of the Nigris, which river, after having sepamated Africa from Aethiopia, and then flowed through the middle of Aethiopia, at length became the branch of the Nile called Astapus. The same fable, though without the Nigeir being mentioned, is alluded to by Strabo (xvii p. 826; comp. Vitruv. viii. 2. §16); while Mela (iii. 9. §8) adds that the river at its source was also called Dara, so that the river which now bears the name El-Dhara would seem to be the stream which was the reputed comruencement of the Nile. The Niger of Pliny was obviously a different river, both in its nature and position, from the Ger of the same author. It was situated to the S. of the great desert on the line separating Africa from Aethiopia; and its magnitude and productions, such as the hippopotamus and crocodile, carnot be made to correspond to any of the small rivers of the Atlas. Neither do these swell at the same seasoo as the Nile, being fod, not by tropical rain, falling io greatest quantity near the summer solstice, but by the waters of the maritime ridges, which are most abundant in winter. The Niger is nut mentioned by the Geographer of Ravenna, nor the Arabs, until the work of Joannes Leo Africanus -a Spanish Moor - which was written at Rome, and published in Latin, A.D. 1556. Though his work is most valuable, in being the only account extant of the foundation of the Negro empires of Sudan, yet he is in error apon this point, as thoogh he had sailed on the river near Timbukth; ; he declares that the stream does nut flow to the E., as it is known to do, but to the W. to Genia or Jenne. This mistake led Liuropeans to look for its estuary in the Senegal, Cirmbia, and Rio Grande. The true course of the river, which has now been traced to its mouth, confirms the statements of the aocients as to the great river which they uniformly describe as flowing from W. to E.

NigEIRA. [Nigritae.]
NIGER-PULLUS, Nigropullum, or Nigropullo, it North Gallia, is placed by the Theodosian Table on a road from Luđdunum Batavorum (Leiden) to Noviomagus (Nymeguen). The distance is marked

11 from Albiniana (Alfen), ascending the Thine. Ukert (Gallien, p. 533) quotes a Dutch author, who says that there is a village near Woerden still called Zwarte Kuikcnbuurt. (D'Anville, Notice, gc.)
[G. L.]
NIGRITAE, NIGRETES (Nırpitat, Strab. ii.
p. 131, xvii. p. 826 ; Ptol. iv. 6. § 16 ; Agathem. ii. 5 ; Meln, i. 4. § 3, iii. 10. § 4 ; Plin. v. 8; Niүp $\uparrow \tau \in s$, Strab. xvii. p. 828; Dionys. v. 215 ; Steph. B.), an African tribe who with the Pharnsii were said to have destroyed the Tyrian settlements on the coast of the Atlantic, and though adjacent to the W. Aethiopians, were distant only thirty journeys from Linx or Lixus (El-Araish). Strabo, as it appears, had no knowledge, or, at least, placed no confidence, in any information which may have reached him as to the countries more to the S . than Fezzán. But if he was so ignoraot of Libya, and particularly of the position of the W. Aethiopians (comp. p. 839), no great weight can be attached to his testimony, that the Nigritae and Pharusii, whom be expressly states to have been oear those Aethiopians, were only thirty journeys from Lixus, particularly when he accompanies the remark with the doubtful word $\phi a \sigma l$, and with his marvellons stories about the prodactions of Mauretania. Ptolemy (l.c.) places them on the N. of the river Nigeir, from which they took their name. It may be inferred, therefore, that they are to be sought in the interior between the Quorra or Djolibd and the Sūhăra in the Biledu-l-Siddin. Their chief town was called
 the Nigritis Laces (Nıypitıs $\lambda i \mu \nu \eta, \S 14$ ) may be ideotified with the lake Dibbeh to the SW. of Timbuktú.

NILI PALUDES (ai tỗ Neí $\lambda_{o v} \lambda i \mu \nu \alpha$, Ptol. iv. 9 . $\S 3$; Strab. xvii. p. 786) were described by the ancient geographers as two immense lagoons, which received the first floods of the periodical rains that from May to September fall upon the Abyssinian highlands, and swell all the rivers flowing northward from that table-land. From these lagoons the Astapus (Bahr-el-Azrel;, Blue River) and the Bahr-el-Abiad, or White River, respectively derived their waters; and since they were the priocipa) tribntaries of the Nile, the lakes which fed them were terned the Nilotic Marshes. The ancients placed the Nili Paludes vaguely at the foot of the Lnuae Montes; and the exploring party, sent by the emperor Nero, described thera to Seneca the philosopher as of boundless extent, covered with floating weeds, and contaioing black and slimy water, impassable either by boats or by wading. There is, however, some probability that this exploring party saw only the series of lagoons produced ly the level and sluggish stream of the White River, since the descriptions of modern travellers in that region accord closely with Seneca's narrative (Nat. Quaest. vi. 8). The White River itself, indeed, resembles an immense lagoon. It is often from fire to seven miles in width, and its banks are so low as to be covered at times with slime to a distance of two or three miles from the real channel. This river, as less remote than the Abyssinian highlands from the ordinary road between Syene and the S. of Meroe (Semaar), is more likely to have fallen under the nutice of Nero's explorers ; and the extent of sliny water overspread with aquatic plants, corresponds
with Seneca's deseription of the Nill Paludes as " immensas quarnm exitus nec incolae naserant nee sperare qui-quam putest." [Niles.] [W. B. D.]

NILU'POLIS (Nei入oúroגts, Ptol. r. 5. \$57; Steph. B.s.e. : N $\in$ ( Acgrpt, built upon an island of the Nile, in the It racleopolite nome, and about eight miles NE. of Heracleopilis Magna. Nilupolis is sometimes called simply Nilus, and appears to be the town mentioned under the latter name by llecataens (Fragment. 2:7). It was existing as late as the 5 th century A. D., since it is mentimed in the Acts of the Council of Ephesns, A. D. 430.
[W. B. D.]
NILUS ( $\delta$ Neinas), the river Nile in Egrypt. Of all the more impoitant rivers of the glabe known to the Girek and Foman writers, the Nile was that whi h from the remotest periods arrested their liveJiest curiosity and attention. It ranked with them as nest in mugnitude to the Gances and the Indus, and as surpassing the Dannbe in the length of its course and the volume of its waters. (Strab. sv. P. 7(12.) Its physical phenomena and the pecoliar civilisation of the races inhabiting its banks attracted nlike the historian, the mathematician, the satirist, and the romance-writer: Herodotus and Diodorns, Eratostlenes and Strabo, Lucian and Ileliodorus. expatiate on its marrels; and as Aegypt was the resort of the scientific men of Grecce io general, the Nile was more accorately surreyed and described than any other river of the earth.

The word Nilus, if it were ant indigenons, was of Semitic origin, and probably trapsmitted to the Greeks by the Phoonicians. Its epithets in various languages-e. E. the Hebrew Sihhor (Isaiah, sxiii. 3; Jerem. ii. 18), the Segyptian Chemi, and the Greuk $\mu$ é̉as (Servius, ad I'ígil. Georg. iv. 291)print to the same peculiarity of its waters, the hne imparted by their dark slime. The Hebrews entitled the Nile Nahal-Mistatim, or river of Aegypt; but the natives called it simply p -iero (whence probably the Nubian kier) or the ri er (i. e, of rivers). Luvlus (le Mensibus, c. 8) says that it was somethines termed llas or dark; and Pliny (v. 9. s. 9 ; (oup. Pionys. Perieg. v. 213) observes, somewhat vanuely, that in Aethiopia the river was called Siris, and did not acquire the appellation of Nilus before it reached Syone. With tew exceptions, however, the Greeks recagnised the name of Nilus as far south as Mreve: and above that mesoputamian region they merdy d al teel to which of its tributaries they shonk nosirn the principal name. Homer, indeed (Od. iii. 300 , iv. $477, \& r$ ), calls the river Aegyptus, from the arivelhation of the land which it intersects. But Henimi (Theng. 33s) and Hecatacus (Fragm. 279280), and suteceating poets and hist or ans umturmly descuate the ruter of Aecypt as the Nile.

It is unneressary to dwell on a theory at one time received, but generally diseredited by the ablest of the ancient eregrapbers- that the Nile rose in Lower Manretaria, not far from the Western Ucean (Juba, ap. Min. v. 9. s. 10; Dion Cass. Ixxv. 13; Solin. c. 35); that it flowed in an easterly direction; was enculpled by the sands of the Säheira; reappeated is the Nicir: acam sunk in the earth. aoil came to litht once more near the Great Lake of Jebuiga as the proper Nile.

Ilistorially, the Nile derives its principal importance from the civilisation, to wheh it contributel so materially, of the races inhabitinz its shores, from the $S$. of Meroe northwards to the Mediterranean. But for gen raphical purposes it is necessary to cx-
amine its course, in the first instanec, through less known regions, and to ascertain, if possible, which of its feeders abose Merve was regarded by the aneients as the true Xile. The course of the stream may be divided into three heads:-(1) the river S. of Meroe; (2) between Meroe and Syene; and (3) between Syene, or Philae, and the Mediterranean.
(1.) The Nile above Meroe.-The ancients briefly described the Nile as springing from marnhes (Nili Palndes) at the foot of the Mountains of the Moon. But as all the rivers which flow morthward from the Abyssioian highlands rise from lagoons, and generally expand themselves into broad marshes, this description is too rague. Neither is it clear whether they regarded the White River, or the Blue, or the Astaboras (Tacazzi), as the channel of the true Nile. The ammes of rivers are often given capriciously: it by no means follows that they are imposed upon the principal arm or tribatary ; and hence we can assign neither to the Astapus nor to the White lliver, usnally consilered as the main stream, the distinction of being absolutely the " trae Nile,"

The Nile, as Strabo sagaciously remarks (xi. p. 493). was well knowo because it was the channel of active commerce; and lis ohserration, if applied to its sonthern portions, may lead us to the chamel which was really reganded as the principal river even in remotest ages. The stream most frequented and accessible to aavigation, and whose banks were the most thickly peopled, was doubtless the one which earliest attracted attention, and this we believe to have been the Astapus (Balur-el-Azrek; or Blae River).

As the sources botb of the Blue Biver and of the Bahr-el-Abiad or the White River are uncertaio, it will be proper to examine these streams above their point of junction near the modern military station at Khartium, lat. $15^{\circ} 37^{\prime} \mathrm{N}$., long. $33^{\circ} \mathrm{E}$. The Astaboras (Tacazá) may for the present be dismissed, both as an inferior tributary, aad as below the meeting of the two main streams.

The White River, which has been often designated as "the true Nile," las at no period been either a road for traffic nor favourable to the settlement of man un its banks. It is rather an immense lagnoun than a river, is often from 5 to 7 miles in breadth, and its sides are in geoeral so low as to be covered at times with allnvial deposit to a distance of from 2 to 3 miles beyond the stream. On its shores there is meither mny town, nor any tradition of there baving ever been one; nor indeed, for many leagnes up the stream, do there oceur any spots suited either to the habitation of men, to pastare, or to tillage. On the contrary, it is represented by travellers much in the same terns io which Seneca (Natur. Quaest. vi. 8) speaks of the Nili Paludes, as seen by Nero's surveyors. The latter are described by the Remao philosopher as "inmensas paludes, quarum exitus uee incolae noterant. nec sperare quisquam potest, ita implicitae aquis herbse snnt," \&c.; the former by recent exploren as "an interminable sea of grass," "a fetid stagnant marsh," \&c. As the White River indeed approaches the hipher table-land of the S., its banks become less depressed, and are inhabited ; but the weedy lagoons extend nearly 100 miles SW: of Khartim.

But il we trace upwards the channel of the Blue River, a tutally different spectacle presents itself.

The river nearly resembles in its natural features and the cultivation of its banks the acknowledged Nile below the juaction lower down. The current is swift and regular: the banks are firm and well defined: populous villages stand in the midst of clumps of date-trees or felds of millet (dhourra), and both the land and the water attest the activity of buman enterprise.

A difference corresponding to these features is observable also in the respective curreats of these rivers. The White River moves sluggishly along, without rapids or cataracts: the Blue River runs strongly at all seasons, aod after the periodical rains vith the force and speed of a torrent. The diversity is seeu also on the arrival of their waters at the point of junction. Although the White River is ted by early rains near the equator, its floods ordinarily reach Khartün three weeks later than those of the Blue River. And at their place of meeting the superior strength of the latter is apparent. For while the stronger flood discharges itself through a broad chanoel, free from bars and shoals, the White River is contracted at its mouth, and the more rapid cursent of its rival has thrown up a line of sand across its influx. Actual measurement, too, has proved the breadth of the Blue River at the point of junction to be 768 yards, while that of the White is only 483, and the body of water poured down by the former is double of that discharged by the latter. From all these circumstances it is probable that to the Bahr-el-Aarek rather than to the Bahr-el-Abiad belongs the name of the "true Nile;" and this supposition accords with an ancient tradition among the people of Sennaar who hold the Blue River in peculiar vencration as the "Father of the Waters that run into the Great Sea."

The knowledge possessed by the ancients of the upper portions and tributaries of the Nile was not altogether in a direct proportion to the date of their intercourse with those regions. Indeed, the earhier track of commerce was more favourable to acquaintance with the interior than were its later clannels. The overland ronte declined after the Ptolemies transferred the trade from the rivers and the roads across the desert to Axume, Adulis, Berenice, and the ports of the Red Sea. Eratosthenes and other geographers, who wrote while Aethiopia still flourished, had thas better means of information than their successors in Roman times, Strabo, Ptolemy, \&c. Diodorus (i. 30), for example, says that a royage up the Nile to Meroe was a costly and hazardous undertaking; and Nero's explorers (Plin. v. 9. s. 10; Senec. N. Q. vi. 8) seem to hare fonnd in that once populous and fertile kiogdom only solitude and decay. At the close of the third century A. D. the Romans abandoned every station on the Nile above Pbilae, as not worth the cost and care of defence, - a proof that the river-traffic, beyond Aegypt, must have dwindled away. As the trade with Arabia and Taprobane (Ceylon) by sea developed itself, that with Libya would become of less inportance; and in proportiun as the Red Sea was better known, the branches and sources of the Nile were obscurcd.
(2.) The Sile below the point of junction.-The two streams flow io a common bed for several miles N. of Khartum, without, however, blending their waters. The Baler-Abiad retains its white soapy lue, both in the dry season aud during the inundations, while the Bahr-Azrek is distinguished by its dark colour. For 12 or 15 miles below the point of junction the Nile traverses a narrow and gloomy
defile, ontil it emerges among the inmense plaina of herbace in the mesopotamian district of Meroe. Beyond Meroe, already described [Meroz], the Nile receives its last considerable affluent, the Astaboras or Tacazze; the only other accessions to its stream in its course northward being the torrents or wadys that, in the rainy season, descend from the Arabian hills. From the N. of Mleroe to Syene, a distance of about 700 miles, the river enters upon the region of Cataracts, concerning which the ancients invented or credited so many marvels. (Cic. Somn. Scip. 5; Senec. N. Q. iv. 2.)

These rapids are seven in nnmber, and are simply dams or weirs of granite or porphyry rising tlirough the sandstone, and, being little affected by the attrition of the water, resist its action, divide its stream, and render its fall per mile double of the average fall below Philae. So far, however, from the river descending lofty precipices with a deafening noise, even the steepest of the rapids may be shot, though not without some danger, at ligh water; and at the great Cataract the entire descent in a space of 5 miles is only 80 feet. [Philas.] Increased by the stream of the Astaboras, the Nile, from lat. $17^{\circ} 45^{\prime}$ N., flows in a northerly direction for 120 miles, through the land of the Berbers. Then comes its great SW. elbow or bend, commencing at the rocky island of Mogreb (lat. $19^{\circ} \mathrm{N}$. ), and continving nearly to the most northem point of Meroe. During this lateral deflection the Nile is bounded W. by the desert of Bahioula, the region of the ancient Nubae, and E. by the Arabian Desert, inbabited, or rather traversed, by the nomade Blemmyes and Megabari. [Macromi.] Throughout this portion of its course the navigation of the river is greatly impeded by rapids, so that the caravans leave its banks, and regan them by a road crossing the eastern desert at Derr or Syene, between the first and second Cataracts. No monuments connect this region with either Meroe or Aegypt. It must always, indeed, have been thinly peopled, since the only cultivable soil consists of strips or patches of land extending about 2 miles at furthest beyond either bank of the Nile.

While skirting or intersecting the kingdom of Meroe, the river flowed by city and necropolis, which, according to some writers, inuparted their forms and civilisation to Aegypt, according to others derived both art and polity from it. The desert of Bahiouda severs the chain of monuments, which, however, is resumed below the fourth Cataract st Nouri, Gebel-el-Birkel, and Mcrawe. (Lat. $20^{\circ} \mathrm{N}$.) Of thirty-five pyramids at Nouri, on the left hank of the riser, about half are in good preservation ; but the purpose which they served is uncertain, since no ruins of any cities point to them as a necropolis, and they are without sculptures or hieroglyphics. On the western side of Gebel-el-Birkel, abont 8 miles lower down, and on the right bank, are found not only pyramids, hnt also the remains of several temples and the restiges of a city, probably Napata, the capital of Candace, the Aethiopian queen. [Napata.] (Cailliaud, $l^{\prime}$ Isle de Meroe, vol. iii. p. 197 ; Hoskins, Travels, p. 136-141.) About the 18 th degree of N. latitude the Nile resumes its northerly direction, which it observes generally until it approaches the second Cataract. In resuming its direct course to N., it enters the kingdom of Dongola, and most of the featnres which marked its channel through the
desert now disappear. The rocky banks sink trem. the inuudation fertilises the borders to a considerable distance ; and for patchee of arable soil fine pastures shound, whence both Arabia and Apgypt imported a breed of excellent horses. (Kusegger, Karte von Nubien.) But after quitting Naputa (?) no remains of antiquity are found beffre we arrive at the Giagrades thsula of Pliny (vi. 29. s. 35), lat. $19^{\circ} 35^{\prime}$, the modern Aryo, a little above the third Cataract. The quarries of this island, which is about 12 miles in length, and causes a consilerable edly in the river, were worked both by Actliopians and Aegypti:ms, A little to N . of this island, and below the third Cataract, the Nile makes a considerable bend to the E., passing on its right bank the ruins ot 'Seghi, or Sesché. On its left bank are found the umains of the temple of Solteb, equally remarkable for the beauty of its arechitecture, and for its picturesque site upon the verge of the ricls land, "the raver's gitt," and an illimitable phain of sand stretchhive to the horizon. (Cailliand, $l^{\prime}$ sle de Meroe, nil. i. p. 375; Hokkins, Travels, p. 245.) The Nilc is once again divided by an island called Sais, and a little lower down is contracted by a wall of Fmanite on either side, so that it is hardly a stone'sthrow across. At this ppint, aod for a space of several miles, mavigation is practicable only at the seatoo of the lighest fivouls.

Below Sais are found the ruins of the small templo of Amara, and at Semneh those of two temples which, from their oppasite eminences on the right and left hanks of the river, probably served as fortresses alon at this narrom pass of the Nile. That a city of ereat strength once existed bere is the more probable, becranse at or near Semneh was the frontier between Aethiopia and Aegypt. We have now arrived at the termination of the porphyry and granite rocks: henceforwarl, from about lat. $21^{\circ}$ N., the river-laaks are composed of sandstone, and arquire a less ruggel aspect. The next remarkable feature is the Cataract of Wadi-Halfa, the Great Cataract of the ancient geographers. (Strab. xvii. p. :86.)

In remute ante-historic periods a bar of primitive ruck, piercing the sandstone, probatily -pumed the Nile at this print (lat. $22^{\circ} \mathrm{N}$.) from - lime to alore. But the original barrier las been liwith by sume natural agency, and a series of - benk now diviles the strean which rushes and 1. A1 - betwern them. It is indeed less a single fall ar. -lmot of water than a saccession of rapids, and
 Wham. (Trurels in Nubia, p. 85.) The roar of - loo nuturs, may be heard at the distance of half a leasen: and the deyth of the fill is greater than that of the first Cataract at Syene. On the left thank of the river a city once stond in the immediate wifthourhood of the raphids; and three temples, - Whibiting on therit walls the names of Sesortacen, 4 hushmes 111 ., and Amenophis HI., have been parUally survegen here. Indere, with the scend Cathat, we may be said to muter the propyanea of Aesgt itwif For themeffirward to syene - a dhtance of 220 miles eillur bank of the Nile furcelts a surcestion of templa, cither excavated in the saludatome or solyrate ntructures, of various -ans and atylis of ar hilecture. Of these the most romarkathe and the munt thomenchly explarel is that

 Cataract. This temple was first el aned of the iu-
enmbent sand by Belzoni (Researcles, val. i. p. 316), and aftervarls more completely explored, and identificd with the reign of Rameses III., by Champollion and Rosellini. Primis (Ibrim) is one day's journey down the strean; and below it the sandstone bills compress the river for about 2 miles within a mural escarpment, so that the current seems to force itself rather than to flow through this barrier.
(3.) The Nile below Syene. - At Syene (As. sonan). $24^{\circ} 5^{\prime} 23^{\prime \prime} \mathrm{N}$. lat., the Nile enters Aegypt Prgler ; and from this point, with occasional curvatures to the E.. or Nill., preserves generally a due northerly direction as far as its bifurcation at the ajee of the Delta. Its bed presents bat a slight declivity, the fall being only from 500 to 600 feet from Syene to the Mediterranean. The wilth of the valley, hewever, through which it flows varies considerably, and the geological character of its banks undergoes several changes. At a short distance below Sjene begins a range of sandstone rocks, which pass into limestone below Latopolis, lat. $25^{\circ} 30^{\prime} \mathrm{N}$.; and this formation continues withnut any resumption of the sandstone, until botb tho Libyan and the Arabian bills diverge finally at Cercaworum. The river thus flows beneath the principal quarries out of which the great structures of the Nile valley were built, and was the ligh-road by which the blocks were conveged to Thebes and A pollinopolis, to Sais and Bubastis, to the Great Lahyrintli io the Arsinoite nome, to the Pyramids and Memphis, and, tinally, to the Greek and Roman arclitects of Alexandreia and Antinoopolis. Again, from Syene to Latepolis, the shores of the river are sterile and dreary, since the inundation is clecked by the rock-walis E . and W . of the stream. But at Apollioepolis Magna, lat. $25^{\circ}$, and at Latopolis, $25^{\circ} 30^{\prime}$, the rocks leave a broader serge for the fertilising deposit, and the Nile floms through richly cultivated tracts. At Thebes, for the first time, tho barks expaod into a broad plain, which is again closed in at the N. end by the hills at Guurmah. Here the river is divided by small islands, and is a mile aod a quarter in breadth. It has hitherto followed a northerly direction ; but at Coptes, where a rand connected the stream with the ports of the Red Sen [Berextee], it bends to the NW., and follows this inclidation for some distance. At Panopolis, bowever, it resumes its general N. bearing, and retains it to the fork of the Delta.
Near Diospolis Parva (How), on the left hank, and opposice Cbenoboscium, on the right. begins the canal, or, perhaps, an ancient branch of the Nile, called the Canal of Joseph (Bchr-Jusuf). This lateral stream flows in a direction nearly parallel to the main one, through the Arsinoite nome ( $\mathrm{E} / \mathrm{F}$ F'youm). From this point the Nile itself presents no rennarkable feature until it reaches Speos-Artemidos, or the grottos of Benikassan, where the eastern hills, apiruaching close to the river, limit its inundation, and consequeatly also the cultivable land. In lat. $29^{\circ} \mathrm{N}$, the Libyan hiilh, for a space, recede, and curving at first NW., but soon resuming a SE. direction, embrace the Arsinoite nome. Lastly, a little below Memplis, and after passing the liills of Gebel-el-Mokattam, both the eistern and western chains of rocks finally diverge, and the river exjrinds upan the great alluvial plain of the Delta.
At Cercasorum, where the bifurcation of the river bee ins, or, purlaps, at a remoter period, still rearer Memphis, the Nile probably met the Mediterrancall, or at least an estuary, which its annual deposits of
slime have，in the course of nges，converted into Lower Aegypt．In all bistorical periods，however，the river has discharged itself into the sea by two main arms，forming the sides of an isosceles triangle，the bonndaries of the Delta proper，and by a number of brauches，some of which ran down to the sea，while others discharged their waters into the principal arms of the main stream．The Delta is，indeed，a net－work of rivers，primary and secondary ；and is further intersected by numerous cauals．The pri－ mary channels were nsually acconnted by the an－ cients seven in number（Herod，ii．17；Scylax， p． 43 ；Strab．xvii．p． 801 ，seq．；Diodor．i．33；Ptol． iv．5．§ 10 ；Plin．v．10．s． 11 ；Nela，i．9．§ 9 ； Aummianns，xxii．15，16；Wilkinson，M．\＆C．，Mod． Erypt and Theles，§c．），and may be taken in the order following．They are denominated from some rincipal city seated on their banks，and are enume－ rated from E．to W．

1．Beginning from the E．．was the Pelusian
 Ostium Pelasianm，Plin．v．9．s．9）．This has now become dry；and even when Strabo wrote a little before the first century A．D．，Pelnsinm，which stood on its banks，and from which it derived its name，was nearly $2 \frac{1}{2}$ miles from the sea（svii．p． 806）．The remains of the city are now more than four times that distance．Upon the banks of the Pelnsian arm stood，on the eastern side，and near the apex of the Delta，Heliopolis，the On of Scrip－ ture；and 20 miles lower down，Bubastus（Tel Basta）．
 さaifukdy，Herod．ii．17；comp．Strab．xvii．p． 802 ； Mela，i．9．§ 9．Catapystum）．The present canal of Moueys probably coincides nearly with the Tanitic branch；which，however，together with the Ostinm Bucolicum，has been absorbed in the lower portion of its conrse by the lake Menzaleh．It derived its name from Tanis，the Zoan of Scripture，the modern San，in lat． $31^{\circ}$ ，one of the oldest cities of the Delta．

3．The Mendesian arm（ $\tau \grave{\infty}$ Mevòj́azoy oróua， Strab．，\＆c．）was a channel rnnning from the Nebed－ nytic Nile－arm．It is now lost in the lake Men－ saleh．

4．The Phatnitic or Pathmetic arm（ $\tau \delta$ Фat－ עıтикд̀ атóयа，Strab．；Фаттıкд̀，Diod．i． 33 ； Пä $\mu \eta \tau i k \grave{\nu}$, Ptol．iv． $5 . \$ \$ 10,40$ ；Pathmeticnm， Mela，i．9．§ 9．）This was the Bouка入ıк̀̀ $\sigma \tau$ ópa of Herodotus（ii．17）；but it seems doubtfnl whether it were an origioal channel，and not rather a canal． It corresponds with the lower portion of the present Damiella branch of the Nile．
5．The Sebennytic arm（ $\tau \delta \Sigma \in E \in \nu v u \tau$ ккд̀ $\sigma \tau\langle ́ \mu a$ ） derived its name from the city of Sebennytus，the present Semenhoud．As far as this city the Dami－ efta branch represents the ancient Sebennytic；bnt northward of this point，lat． $31^{\circ}$ ，the earlier channel is lost in the marshes or sands，which separate the present Delta from the Mediterranean；and its month， which was nearly dne N．of Memphis，is now covered by the lake of Bourlos．The Sebennytic arm，con－ tinuing in the direction of the Nile before its divi－ sion，i，e．running nearly in a straight conrse from N．，has some claims to be regarded not so mnch as one of the diverging branches as the main stream itself．This channel，together with the most easterly， the Pelusian，and the most westerly，the Canopic， were the three main arms of the Nile，and carried down to the sea by far the greater volumes of water．

6．The Bolbitic or Bolbitine arm（ $\tau \delta$ Bo入biturày $\sigma \tau \delta ́ \mu a$, Strab．xvii．p．803；Scyl．p．43；or Bu入6ıтเтえे， Heroi．ii． 17 ；Diodor．i．33：Bo入6ituvay．Ptol．iv， 5．§§ 10，43：Bolbitionm，Mela，i．9．§ 9；Am－ mian．sxii．15），was，like the Phatnitic，originally an artificial canal，and scems in the tinse of Hero－ dotns to bave been a branch connecting the Seben－ nytic with the Canopic channels（ii．17），having， however，an ontlet of its own，probally as a back－ water dnring the ioundation，to the Mediterranear． The Bolbitic arm is now represented by so much of the Rosetta branch of the Nile as runs between the sea and the ancient conrse of the Ostium Cano－ picum．

7．The Canopic arm（ $\tau \dot{\delta}$ Kavшsuкду $a \tau \delta \mu a$ ，Strab． l．c．；comp．Aristot．Meteorol．i．14；Ostium Cano－ picum，Mlela，i，9．§ 9；Plin．v．10．s．11）was also termed the Nancratic arm of the Nile，Ostium Nan－ craticnm（Plin．l．c．），from the city of Naucratis， which was seated on its left bank．This was the most westerly，and one of the three great branches of the Nile（see Pelnsian，Sebennytic）．In the first portion of its descent from the point of the Delta the Canopic arm skirted the Libyan desert．At the city of Tere－ nuthis（Teranieh），a road，abont 38 niles in length， throngh the calcareons ridge of hills，connected it with the Natron Lakes．On its right bank，below this point，stood the ancient city of Sais，and a few miles lower down，Nancratis．From its vicinity，at first，to this city，the Canton of Aegypt，and after－ wards，by means of the canal which connected it with the lake Mareotis on the one hand，and Alex－ andreia on the other，the Canopic brancls retained its importance；and its embankments were the care of the goverament of Aegypt long after its rival branches，the Sebennytic and Pelnsian，were deserted or had been suffered to flow uselessly into the tnarshes．It is now represented in the upper por－ tion of its channel by the Rosetta branch ot the Nile． But they diverge from cach other at lat． $31^{\circ}$ ，where the elder arm turned off to the W．，and disclarged itself into the Mediterradean near the present bay and foreland of Aboukir．Its mouth is now covered by a shallow lagoon，intersected by strips of sand and allu－ vial deposit，called the lake of Madieh．The Ca－ nopic arm of the Nile，although not actually the western boundary of Aegypt，was，at least，in the Pharaonic era，the limit of its commerce on the NW． base of the Delta，since beyond it，nntil the building of Alexandreia，there was no town of any importance．

The canals which were derived from the Nile for the convenience of local intercourse and irrigation， were very numerons；and the prosperity of Aegypt， especially on the Arabian side of the river，depended io great measnre upon their being kept in gond re－ pair，and conveying to the arid waste a sufficient snpply of water．Heoce the condition of the canals was almost synonymons with the good or bad admi－ nistration of Aegypt；and we find that among the first cares of Augustus，after adding this kingdom to his provinces，in B．C．24，was to repair and rehabr－ litate the canals，which had fallen into decay undet the misrule of the later Ptolemies．（Suet．Aug． 18 ； Dion．li．68；Anrel．Vict．Epit．i．5．）For national commerce，however，there were only two of these artificial channels upos a large scale between Srene and the sea．（1．）The canal called，in different ages，the river of Ptolemy（IIто入єдaios moтapús， Diodor．i．33；Plin．v．29．s．23），and the river of Tri－ jan（T $\rho a i a \nu$ vòs $\pi$ тотанós，Ptol．iv．5．§ 54）．This had been commenced by Pharaoh Necho II．（B．c． 480 ），was
vol． It ．
continged by Darcius Irstacpis (n. C. 520-527), but nly completed by Ptolemy Philalelphus ( $\mathrm{n} . \mathrm{C}$. 2:4). It hegan in the Pelnsiac branch of the Nile, a little above the city of Buhastus ( $T_{t}$ - -Basta), and jassing by the city of Thoum or Patamus, was earrivd by the l'ensians as far as the Bitter Lakes, NE. of the Dolta. Here, however, it was suspended by the troubles of both Acgypt and Persia, under the anceessors of Datreius, and wats, in a great measure, choked up with sand. (Herod. ii. 158.) At lenyth Plilatelphos, after cleansing and repairing the clannel, carried it onsrard to Arsinoe, at the head of the Sinus Heroopolites. (Plin. ri. 29. s. 33.) The Prolemaic canal, bomever, suffered the fate of its prodecessor, and even before the reign of Cleopatra had become useless for navigation. The connection by water between Ar-inve and the Xile was renewed hy Traian, A. D. 10G; but his engineers altered the dilection of the catting. They bronght the stream from a higher part of the river, in order that the current might run into, instead of from, the Red Sial, and that the intervening sandy tracts migbt be ivigated by fresh instead of partially salt water. The canal of Trajan accordingly hegan at Babylon, on the eastern bank of the Nile, opposite Memphis, and, passing by Heliopolis. Scenae Veteranorum, Hemupplis, and Scrapion, entered the Red Sea about 20 nites S. of Arsinoe, at a town called Klysmon, from the locks in its neizhbonrhood. The work of Traian was either more carefully preserved than that of the Ilaceinnian aud Persian kings of Aegypt bad heen, or, if like them, it fell into decay, it was repaired and reopeneld by the Mabommedan conquernrs of the country. For, seven centuries after Trajan's docuase, we read of Cbristian pilerims sailing slong his canal on their ronte from England to Palestine. (Dieqeil, de M-nsur. Orbis, vi. ed Letronne.)
2. The Canopic canal (i) Kavwsukो) $\delta i \omega ́ p v \xi$, Strab. xrii. p. 800 : Stoch. B. s. r.) connected the city of Canopus with Alexandreia and the lake Mareotis. It, banks were covered with the country honses and amone of the wealthy Alexndrians, and formed a I:ul of mater snburt to hoth the Aegoptian and Muelonian cities. [Cinorts.]

## Physical Character of the Nile.

The civilisation of all conntries is directly influeneed by their rivers, and in none more so than in A"- ypt. wlich has been truly called the gift of the Nik (Hemud. ii. 5; Strab. si. p. 493.) To its streatn the land orved not only its peculiar cultirathon, but its existene also. Withont it the Libyan Wuste would hase estended to the shores of the Real Sea. The limestone which lies under the mil of Aegypt, the sands which hound it to E. and W.. were rendered by the deposits of the river fit for the habitation of mas. The Delta, indeed, was Almonutely created by the Nile. Its periodical floods at first narrowed a bay of the Dlediterranean into an extuary, and nest fillel up the extnary with a plain of teeming alunvial soil. The religion. and many of the peculiar intitutions of Angypt, are derived from its river; and its physiral characteristics have, in all ares, attraeted the attention of historians and geographers.

Its characteristics may be considered under the heads of (1) its deposits : (2) the quality of its waters; and (3) its jeriodical imandations.
(1.) Its deposits.- Borings made in the Delia to the depth of 45 feet, hare shown that the soil consiats of regetable matter and an earthy depusit, snch
as the Nile now brings down. The ingredienis of this deposit are elay, line, and siliceous sand; but their proportion is affected by the soil over which the river flows. Caleareous and argillaceous matter abonnd in the neighbourhood of Cairo nnd the Delta; silex preponderates in the granitie and sandstone districts of Upper Aegypt. The amount of this deposit corresponds generally to the slope of the banks and the distance from the river. In lower Nubia and Upper Aegypt alluwial cliffs are formed to the beight of 40 feet; in Middle Aegypt they sink to 30; at the point of the Delta to abont eighteen. The earthy matter is deposited in a convex form; the larger quantity lying clase to the stream, the stnaller at the verge of the inondation. As a consequence of this fall from the banks towards the desert, the limit to which the inundation reaches is slowly exextending itself; but as the Nile raises its own bed as well as its banks, their relative proportion is preserved. The deposit of the Nile is found to consist of (1) clay, constituting 48 in 100 parts ; (2) carbon, 9 parts; (3) carbonate of lime 18 parts, and 4 parts of carbonate of magnesia, besides portions of silicia and oxide of iron. These form a compost so rich, that the land on which they are perennially deposited requirea no other manare, and produces withont further renovation successive barvests of corn. (Athen, ii. 41, 42; Plin. xviii. 19. s. 21.)
(2.) The quality of its waters.- The water itself is not less important to Aegspt than the ingredients which it precipitates or holds in solution. Except some short streams in the Arabian hills, torrenta at one season and dry at another, the Nile ia the only river in Aegypt. Natmral springs do not exist in the opper country; and the wells of the Delta afford only a torbid and brackish fluid. The river is accordingly the single resonce of the inhabitants; and the frequent ablutions enjoined by their religion rendered a copions sopply of water more than ordinarily important to them. Between its lighest and lowest periods, the water of the Nile is clear. When lowest, it is feculent (Athen. ii. 42); and at the beginning of the ioundation is covered with a greenish regetable matter, that is said to cause ernptive disease. But even when most tarbid, it is not unwholesome, and is olways capable of filtration, The water in its mediurn state was pure and delicions to the taste. The Persian kings, after the eonquest of Aegypt. imported it for their own drinking to Suss and Echatana (Athen. ii. 54. 67); and the emperor Pescennins Niger replied to his soldiers' demand for wine, "Have jon not the water of the Nile." (Spartian. ap. August, Hist. Script. Pescenn. Viger. c. 7.) These changes in the lue and quality of the water were ascribed to the overflowing of the Nubian lakes, or to the passace of the strearn nrer rarions strata. But until the channels of the White and Blue Rivers have been explored to their sources, we must be content to remain ignorant of the real canses of these phenomena.
(3.) Its periodicul inundations. - The causes of the imundation early attracted the curiosity of ancient observers ; and various theories were devised to account for them. It was believed to arise from the melting of the snow on the Abyssiuian mountains (Schol, in Apoll. Rhod. iv. 269: Eurip. Helon. init.) : and Herodotus rejects this supposition, because, as he conceived, although erroneously, that snow was unknown in Aethiopia (ii. 22). It was ascribed to the Etesian winds, which, blowing from the N . in summer, force back the waters
from the mouth of the river npon the phin of the Delta. (Dixdor. i. 38-40.) This, howeyer, though partially true, will not account for the innndation of Upper Aegypt, or for the periodical rising of the rivers N. of Aethiopia. It was attributed to the convection of the Nile with the great Southern Ocean, whose waters, from long exposure to the sun, were deprived, it was thought, of their salise ingredients is their course through the Nile-valley. (Diodor. i. 40.) By Ephorus (ed. Marx, p. 23) it was derived from exudation through the sands; while Herudotus suggested that the vertical position of the sun in winter reduced the waters of Southern Libya to the lowest ebb. But this hypothesis kept out of sight their overfow in summer. Agatharchides of Cuidus, who wrote in the second century n. C., was the frst to divine the true cause of the inundation. The raius which fall in May upon Aethiopia occasion the rise of the rivers that fiow northward from it. As the sun in his progress from the equator to the tropic of Cancer becomes successively vertical over points N . of the equator, the air is heated and rarified, and the cold currents set in from the Mediterranean to restore the equilibrium. They fass over the beated plains of Aegypt ; but as soon as they reach the lofty mountains of Abyssinia, they descend in torrents of rain. Sheets of water fall impetuously from their northern slope apon the grand tableau, from the grand tableau upon the plains which contais the sources of the White and Blue Rivers, and through their channels and confluents pass into the Nile. Io the last days of June, or at the beginning of July, the rise is visible in Aegypt: about the middle of August the dykes are cut, and the flood drawn off E. and W. by innnmerable canals ; and hetween the 20th and 30th of September the maximum height is attained. For a fortuight the flood remains stationary : about the loth of November, it has perceptibly diminished, and continues to decrease slowly until it attains its minimum; at this time its depth at Cairo is not more thao 6 feet, and in the Delta its waters are nearly stagnant. In the time of Herodotus (ii. 13) the heigbt of a good Nile mas 15 or 16 cubits; and around the statue of the Nile, which Vespasian brought from Aegypt and set up in the Temple of Peace, were grouped sixteen diminutive figures emblematic of these measures. (Plin. xxxvi. 9. s. 14.) The rise of the Nile mas carefally noted on the Nilometers at Primis (Ibrim), Elepbantine, and Memphis; and the progress or decline of the inundation was reported by letters to different parts of Aegypt, in order that the farmers might calculate on the time when sowing might commence. A flood of the height of 30 feet is ruinous, - undermining houses, sweeping away cattle, and destroying the produce of the fields. The land, also, is rendered too spongy for the ensuing seed-time; the labours of tillage are delayed; and epidemic diseases arise from the lingering and stagnant waters. On the other hand, if the waters do not rise 24 feet, the harvest is scanty; and if they are below 18 , terrible famines are the consequence, such as that of which Diodorus speaks (i. 84), and which are not unknown in more recent times (Voloey, Joyage en Syrie et en Egypte, rol. i. ch. 11; Abdallatiph's Hist. of Eggpt, p. 197, White's edit.), during which the starving population have been driven to feed on human flesh.

Upper and Middle Egypt during the inundation presect the appearance of a vast inland lake, bounded by mountains. But the usual means of intercourse are not interrupted, since the immediate banks of the
river are seldom under water, which is dischargel through the frequent apertures of the dykes, at first upon the verge of the desert, and afterwards upon the land nearer the flood. The Delta. howerer, being devoid of bills, is, during an extraordinary rise, laid entirely under water, and the only means of communication hetween the towns and villages are boats and rafts Herodotus (ii. 97) compares the appeaance of Lower Aegypt at this season to the Aegean sea, studded by the Sporades and Cyclades,

As the direct highway between the Mediterranean and Meroe, the Nile, in all periods, at least during the prosperous ages of Aecypt, presented a busy and animated spectacle. The Aegyptians, who shunned the sea as the element of the destroying Typhon, regarded their river with affection and reverence, as the gift and emblem of the creating and preserving Osiris. Its broad and capacious besom was in all seasons of the year studded with river-craft, from the raft of reeds to the stately Baris or Nile barges. UP the Nile to the markets of Diospolis passed the grain and fruits of the Delta; and down the stream came the quarried limestone of the Thebaid to the quays of Sais and Canopus. No bridge spanned the river during its course of 1500 miles; and the ferrying over from bank to bauk was an incessant canse of life and movement. The fishers and fowlers of the Nile diversified the scene. Respecting the qualities of the fish there is considerable discrepancy among ancient writers - :ome describing it as coarse or insipid, others as highly zutritive and delicate in its flavour. (Athen, vii. p. 312.) Fifty-two species of fish are said to be found in the Nile. (Russegger, Reisen, rol. i. p. 300.) Of these the genus Silurus was the most ahundant. Fish diet is well suited to the langnid appetites of a hot climate; and the Israelites, wheu wandering in the desert, regretted the fish as well as the vegetables of Aegypt. (Numbers, xi. 5.) They were caught in greatest abundance in the pools and lakes during the season of inundation. In the marsiny districts of the Delta, where grain, owing to the spongy and bibulous character of the soil, could not be raisel, the inbahitauts lived principally upon fish dried in the sun; and, in later times at least, they were salted, and exported in great quantities to the markets of Greece and Syria. The modes of catching them are represented in the paintings, and were the line, the net, and the prong. (See Abdallatiph, ap. Rosellini, M. C. vol, i. p. 230.) The great extent of marsh land in Aegy $1^{t}$, and the long continuance of the inundation, cansed it heyond all other countries to abound in waterfowl. The fuwlers are represented in the paintings as spreading nets, or as rowing in their boats amun the aquatic plants, in which the birds vestle!? and knocking them down with sticks. The ose of decoy-hirds was not unknown; and smoked or salted wild-fowl were an article of export. The edible water-forl are mostly of the goose and duck (anas) tribe; the quail also is mentioned hy Herodotus (ii. 77) as among the species that were dried in the sun and slightly salted for home consumption and export.

The Fauna of the Nile were the hippopotamus and the crocodile, with many lesser species of the saurian genos. In the more remote ages both were found through the whole course of the river (Diodor, i. 35 ), although at preseot the hippopotanus rarely descends below the second Cataract, or the crocodile below $27^{\circ} \mathrm{N}$. lat. The chase of the
hippopotamns is represented on the monuments of the Thebaid, bnt not on those of Miltle or Lower Aegypt. The crocodile was canght with a hook baited with the chine of a pig (Herod. ii. 68), or with nets. (Diodor, i. 35.) It was an oljeet of worship in some nomes [Atisnvos; Onnos], of ahhurrence in others [Textyma.]

The buats of the Nile, as represented on the monuments, exhibit n great variety of size and form. There was the canue, mate of a single trunk; the shallop of papyrus, renderel water-tight by bitumen; and thre were even veisels constmited of light suthenware. (Juven. Sut. xy. 129.) The most usual species of craft, however, is a boat whose bow and stern are high out of the water, square rigged, with satils either of eanvass or papyras, a single 1. Ast that could be lowerel io high winds, and a st ill w keel, in order to allow of easy extrication of ther reanel should it run aground. But the most atriking and capacions boat employed on the Nile was the large Baris, used for the transportation of stouds. (Herod. ii. 96.) It was built of the hard wood of the sumt (Acanthe); the sauls were made of papyrus, and the seams canked with an rakuu composed from the fibres of that plant. These barges were propelled by as many as forty rowers ranged on the same level, and their tonnage nomounted to three, fiur, and even five hundred tons. These Baris wer- towed up the stream, if, the wind were not strong enough to impel them against it, or floated down it, with combined action of sail atul oars, and steerel ly one or more large paddles at the stern. Parties of pleasure, visits of ceremony, and marriage processions, alike added to the floating population of the river; but perhaps the most impresive spectacles which it presented were the pomp, and circumstance of funerals. On the tombs of Speas Artemidus (Benihassan) is depictured the barge of Atmenembe conveying the females of his house it has an awning like a gondola, aml is one of the half-decked boats ( $\sigma$ кápat Na入au7roi) of which Strabo speaks (svii. p. 800). In =t cha a ressel Cassar intended, but for the indigmant murmurs of his legions, to have acended the Xilr with Cleopatra from Alexandreia to the first Cataract. (Sueton, Jul. 58.) The tomb of Rameses IN: at Thelers exhibits a royal barge. The ball, the cabin ( $Э \dot{d} \lambda \alpha \mu \omega s$ ), the rudder, and the masts are painted of a gold evour; the sails are diapered and frinced with various brilliant hoes; the phoenix and the volture are embruidered upon them. The eye of Oarns is fainted on the rudder, and its handles reprosent the royal emblems-the uraens and the pschent, or head of a divinity. The splendour of He- Baris on the monuments recalls that of the vessel whedr caried Cle patra up the Cydnus to meet 11. Adtunius at Tarsus. (Plut. Anton. c. 26.) It was a farourite amusement of the Aegyptians, in later times esperially, to rotr rapidly in boats, and lurl and thrn-t at one another as they passed himt javelits or jorids. Such a scene is repreventeit on the turnt of lmai at frizeh, one of the oldes: monuments of Acryyt. They delighted also in sulave up and down the river-arms and lakes of the Delta, and feas ing under the shalow of the tall reed, and Acgyptim bean, which there attains a beicht of many fert. (Strah. xvii. p. 823, and generally Rosellini. Momumenti ('ivili.)

The Nile was also frequently the stage on which the great religious festivals or panggyries were celebrated. On such solemnities the population of
entire nomes ponred thenselves forth. On the day of the feast of Arternis at Bulastis, the inlabitants of the Delta thronged the canals and main streams, while thou ands descended from the middle country and the Thebaid to be present at the ceremonies. The deeks of the Baria were crowded with devotees of either sex, and the lond music of the pipe and cymbal was accompanied by songs and hymns, and clapping of hands. As they neared nny town the passengers ran the barges along shore and recruited their numbers with fresh votaries. As many as 700,000 persons, exclusive of children, were sometimes assenbled at Bubastis, or at the equally popular festival of lsis nt Busiris. Numerons sacrifices were offered in the temples of the godilesses, aod, whetber in libations or in revelry, more wine was consumed on these occasions than in all the rest of the year. (Comp. Herod. ii. 61.62 , with Clemens Alesand. Cohort, vol. i. p. 17.)

That the Nile should bave been an ohject of worship with the Aegyptians, and that its image and phenomena should bave entered deeply iato their whole religious system, was unaruidable. As regarded its external aspect, it flowed between sand and rock, the sole giver and sustainer of life in that valley of death: it was, buth in its increment and its decrease, in its course through vast solitudes, and thronged populations alternately, the most suggestive and expressive of emblems for a religion which represented in such marked contrast, the realms of creation and destruction, of Osiris and Typhon. The Nile-as Oceanus, or the watery element was a member of the first Ogdoad of the Aegyptian theology (Diodor. i. 6-26), the opponent of Phtah, the elemental fire, and the companion of the earth (Demeter), the air (Neith), Zeus or Amun, the quickening spirit, Osiris aod lsis, the Sun and Moon. It was thus one of the primitive essences, bigher than any member of the second 0 gdoad, or the visible objects of adoration. (Heliod. Aethiop. ix. 9: Schol. in Pind. Pyth, iv. 99.) It bad its own bieratic emblem on the monuments, sometimes as the ocean embracing the earth, sometimes, as in the temple of Osiris at Philae, as the assistant of Pbtah in the creation of Osiris. The wild crocodile was an emblem of Typhon (Plutarch, Is. ot Osir. p. 371); but the tamed crocodile was the symbol of the gently swelling, beneficent Nile. (Euseb. Praep. Evangel. iii. 11.) Osiris is sometimes, bnt incorrectly, said (Tiball. Eleg. i. 7, 27) to be the Nile itself (Plut. Is. et Osir. c. 33): there is no donht, bowever, that it was personified and received divine honours. A festival called Nilos was celebrated at the time of the first rise of the waters, i. e. abont the summer solstice, at which the priests were accustomed to drop picces of coin, and the Roman prefect of the Thebaid golden omaments, into the river near Philae (Sence. Nat. Quacst. iv. 2. 7) : indeed there must have been a priesthood specially dedicated to the great river, since, according to Herodotus (ii. 101), none but a priest of the Nilc could bury the corpse of a person drowned in its waters. Temples were rarely appropriated to the Nile alone; yet Hecatacus (ap. Steph. s.v. Neinos) speaks of one, in the town of Neilus, which stood io the Heracleopolite nome, ncar the entrance of the Fyoum. In the quarries at Silsilis several stelac are inserihed with acts of adoration to the river, who is joined with Phre and Phtah. Its symbol in hieroglyphics is read Moou, and the last in the group of the claracters composing it, is a symbol of water. According

NINUS.
to Lucian, jndeed (Jupiter Tragaed. § 42), the Aegvptians sacrificed to the element of water, not locally, but universally. Pictorially, the Nile was represented under a round and plump figure, of a hlue colour, and sometimes with female breasts, indicative of its productive and nutritive powers. On the thase of the throne of Amenophis-Memson, at Thebes, two figures represent the Nile, similar in all other respects, except that one is crowned with lotus to denote the upper courses of the river, the other with papyrus to designate the lower. [See Aegrptes, p. 37.] (Rosellini, Mon. del. Cult.; Kenrick's Ancient Aegypt, vol. i. pp. 349 -463.) [W.B.D.]

NiNIVE. [Nulus.]
ninnitaci. [Minaticem.]
NINUS ( $\eta$ Nivos or Nivos, Herod i. 193, ii. 150; Ptol. vi I. § 3; Nivos ì kai Nıvevt, Ptol. viii. 21. § 3; Nıveún, Joseph. Ant. Jud. ix. 10. § 2; Nious, Tacit. Ann. xii. 13; Ninive, Amm, Marc. xviii. 7, xxiii. 6: Eth. Nivios, Steph. B. s.v.), a great city, and for many centaries the capital of ancient Assyria. It will be convenient to notice here such accounts as we have from the Bible and ancient historians, and then to state succinetly the curious results of the recent discoveries of Mr. Layard, Colonel Ruwlinson, aad uther modera travellers.
I. Nincveh is first mentioned in tbe Bible anong the eight primeral cities in Genesis (x.11), and is there stated to have been founded either by Nimrod himself, or, according to another reading, by his Jieutenant, Assur, the 'A $\sigma \sigma$ oúpas of Joseph. Ant.Jud. i. $6 . \S 4$, and the Eponymus of Assyria. The latter view is the most agreeable to the constraction of the Ilebrew text. From this period we have no mention of it in Holy Scripture for more than a thousand years; and when it is noticed again, on Jonak being sent thither to preach repentance, it is described as a "city of three days" journey" (Jonah, iii, 3), and as "that great eity wherein are six score thousand persons, that cannot diseern between their right hand and their left hand." (Jonah, iv. 11.) Subsequently to this time, it is not referred to by name, except in 2 Kings, xix. 37, and Isaiah, xxxvi. 37, as the residence of Sennacherib, after his retorn from the invasion of Judaea; in the prophets Nabum and Zephaniah, who predict its speedy downfal; and in the apocryphal books of Tonit and Judith, the former of whom long lived in the great city.
II. The earliest chassical mention of Nineveh is by Herodotus, who places it on the Tigris (i. 193, ii. 150), but does not state on which bank it stood; in this he is confirmed by Arrian (Hist. Ind. c. 42) and Strabo, who in one place calls it the metropolis of Syria, i.e. Assyria (ii. p. 84), in another states it to have been a city more vast than even Babylon, lying in the plain nf Aturia (a dialectical change of name for A A - yria), beyond the Lyeus (or Great Zoub) with reference to Arbela (xvi. p. 737). Pliny places it on the east bank of the Tigris "ad solis occasum spectans" (vi. 13. s. 16); Ptolemy, along the Tigris, but withont accurate definition of its position (vi. 1 . $\S 3$ ). The same may he said of the notice in Tacitus (Annal. xii. 13), and in Ammianus, who calls it a vast city of Adiabene. On the other band, Diodorus, professing to copy Ctesias, places it in the Euplarates (ii. 3, 7), which is the more remarkable, as a fracment of Nicolaus Danaascenus, who has preserved a portion of Ctesias, is still extant, in which Nineveh occupies its correct pasition on the Tigris. (Frag. Hist. Graec. vol. iii. p. 858, ed.

Mïller.) It may be remarked that in much later times the name appears to have been applied to more than one town. Tbus Ammianus in one passage seems to think that Hierapolis was the "vetus Ninus" (xiv. 8). Philostratus (J'it. Apoll. Tyan. i. 19) speaks of a Ninus on this side of the Euphrates; and Eusebins, in his Chronicon, asserts, that in his time it was called Nisibis. No doubt much of the obscnrity in the minds of ancient writers, both as to its position and the real history of the empire of which it was the capital, arose from the circumstance that its entire overthrow preceded the earliest of the Greek historians by nearly 200 years, and tbat it does not appear to have been rebuilt at any period of the classical ages. So complete was its destruction, that, though Xenophon marched withio a few miles of it, he was not aware of its existence, thougb, ia his allusion to the "Median city of Mespila," he doubtless is descriting one of the creat ontworks of the Assyrian capital (Anob. iii. 4. § 10); while, with the exception of Arian, none of the historians of the campaigns of Alexander, who, like Xenophon, must have passed it on bis way to fight the battle of Arbela, allude to it. That the ancients generally believed in its entire destruction, is clear from Pausanias, who classes it with Mycenae, Thebae, and other ruined cities (viii. 33. § 2); from Lucian (Charon. c. 23), and from Stuabo (xvi. p. 737). The last, indeed, has an argument that Homer, who mentions Thebes in Egypt, and the wealth of Phoenicia, could not have omitted Babylon, Nineveh, and Ecbatana, had he ever heard of them (xv. p. 735). But though so eariy a ruin, the ancients generally had a correct idea of the wonderful greatness of Nineveh, and many pasagges are scattered through the classical writers, giving a manifest proof of this belief of the people. Thus Strabo bimself, as we bave seen, considered Nineveh greater than Babylon (xvi. p. 737); while Divdorus has a long and exaggerated narrative of the vast extent of Ninus's capital (which, as we stated before, he places incorrectly on the Euphrates, ii. p. 7). Some curious incidental facts are preserved. Thus, the vast mound Semiramis erected as a tonib for her husband Ninus, by the river-side, is alnost certainly the Pyramid at Nimriud, though the results of Mr. Layard's last excavations have not proved that this structure was a tomb. (Diod. ii. 7; comp. with Layard, Nineceh and Babylon, p. 128). Again, Amyntas (as quoted by Athenaens) states, that at the town of Ninus was a high mounil, which was thrown down by Cyrus when he altacked the city, that this was traditionally the tomb of Sardanapalus, and had a stêle on it inscribed with Chaldaic (i. e. Assyrian) letters, (Amynt. Fragm p. 136, ed. Mitiller; cf. also Polyaen, vii. 25.) Nor must we omit the presence of what has been held by all numismatists to be a traditional representation of this celebrated tomb on the Tetradrachms of Antiocbus VIII., king of Syria, which were struck at Tarsus, and on the imperial coins of Anchalus (hoth places connected with the name of Sardanapalns). Again we have the legend of Diodorus, that the Assyrians sent assistance to the Trojans against the Greeks (ii. 22; cf. Plat. Leg. p. 296, ed. Bekker), -the "busta Nini" of Ovid (Metan. iv. 88), tbough referwed by him wrongly to Babylon, - and the occurrence, in several of the poets, of the name of Assaracus (now known through Colonel Nawlinson's interpretations to be a Graecized form of the genuine Assyrian Assalac, the A $\sigma \alpha \alpha^{\prime} p a x$
or 'Eøópax of the LXX., Rawlinson, As. Journ. 1850), as in Iliad, xx. 232; Rost. Homeric, vi. 145; Virg. Aen. v. 127; Juven. Sat. x. 259, \&c. It is therefore, perhaps, less remarkable, that though Ninevels had sa early in history ceased to be a city of any importance, the tradition of its former existence should remain in its own country till a comparatively recent period. Thus, as we have seen, Tacitus and Amminus allude to it, while coins exist (of the class termed by numismatists (ireek (mperial) struck onder the Roman emperors Chadius, Trajan, Mastiminus, and Gordianus L'ius, proving that, during that period, there was a Leman colony ostablished in A syria, bearing the mame of Niniva Claudiopolis, and, in all probability, occupying its site. (Sistimi, Mus. de Chandoir, tab. ii. fig. 12, Clas. General, p. 159.) In later times the name is still extant. Thus, Ihn Athir (quoting from Beladheri, in the annals of those years) speaks of the forts of Nincuri to the east, and of S/osul to the west, of the Tigris, in the campaigus of Abd-allah lbn Mo'etemer; A. in. 16 (A. D. 637), and of Otheh Ibn Furkad, A. Af. 20 (A. D. 641). (Rawlinson, As. Journ. 1850.) Again, Benjamin of Tudela, its the tweifin century, speaks of it as oppesite to Musul (Tratels, p. 91, ed. Asher, 1840) ; and Abultaraj notices it in his Hist. Dynast. (pp. 404-441) under the name of Ninue (cf. also his Chromicom, p. 464). Lastly, Assemani, in his necount of the mission of Salukuh, the patriarch of the Chaldaeans, to Rome, in A. i. 1552 , when describing Mosul, says of it, " a qua ex altera ripae parte alest Ninive bis mille 1assibus" (Bibl. Orient. i. p. 524). In the same Work of Ascmani are many notices of Nineveh, as a Chnistian bishoprivk, first uuder the metropolitan of $M_{\text {ossul, }}$ and subsequently under the bishup of Assy ria and Arliabene (Bibl. Orient. vol. ii. 1. 459, vol. ni. pp. 104, 269, $344,8 \mathrm{c}$.).
We have already noticed under Assyma the chief puints recorded in the Bible and in the classical historians relative to the history of Nineveh, and have stated that it is impossible entirdy to reconcile the various conflicting statements of nucient authors. It only remains to mention bere, as briefly as possible, the general results of the remarkable discoveries which, withiu the last few years, have thrown a Howd of light upon this most obscure part of turient history, and have, at the same time, afforded the most complete and satisfactory confirmation of those notices of Assyrian history which have been preserved in the Bible. The names of all the Assyrim kings mentioned in the Bible, with the excrption, perhaps, of Shalinaneser, who, bowever, occurs under his name in Issiath, Sargon, are nuw clearly real upon the Assyrian reconls, besides a grat many othors whose titles have not as yet been identifiel with those in the lists preserved by the Greck and kuinan chronologists.
111. It is well kuawn that in the neighbourhood of Wusul tavellers had long observed some remarkable tontuds, resembling small hills ; and that Mr. Much had, thirty years ago, called attention to one called Koyunjik, in whicb fragosents of sculpture and puttery had been frequently discovered. In the year 1843, N. Butta, the French consulat Mosal, at the suguestion of Mr: Layard, commenced his excavations, -first, with little success, at Koyunjik, and then, with mach greater good fortume, in a mound catled Khorsabuic, a few miles N2. of Mosud. To M. Butti's surcess at Khoursabuid the French owe all the Assyrian monuments in the cellection of the

Louvre. In 1845, Mr. Layard began to dig into the still greater mound of Ninriud, about 17 miles S. of $M$ ostul; and was soon rewarded by the extensive and valuable collection now in the British Nuseum. These researches were continued by Mr. Layard during 1846 and part of 1847 , and again during 1850 and 1851 ; together with a far more satisfactory examination of the remains at Koyunjils than bad been made by M. Betta. Some other sites, too, in the neighbourhood were partially explored; but, thongh of undoubted Assyrian origin, they yielded little compared with the greater mounds at Nimruid, Khorsabàd, and Koyanjik. It would be foreign to the object of this work to enter into any details of the sculptured monuments which have been brought to light. A vast collection, however, of inscriptions bave been disinterred daring the same excavations; and from these we bave been enabled by the labours of Colonel Rawlinson and Dr. Hincks to give names to many of the localities which bave been explored, and to reconstruct the history of Assyria aud Babylonia on a foundation more secure than the fragments of Ctesias or the bistory of Herodutus. It is also necessary to state that very extensive researches bave been made during 1854 in Southern Balyylonia by Messrs. Loftus and Taylor in mounds now called Harka and Maqueyer; and that from these and other excavations Colonel Rawlinson has received a great number of inscribed tablets, which have aided Lim materially in drawing upa précis of the earliest Babylonian and Assyrian history, Muqueyer ho identifies as the site of the celebrated "Ur of the Chaldecs." From these various sources, Colonel Rawlinson has concluded that the true Nineveh is represented by the mounds opposite to Mosul, and probably by that one which bears the local name uf the Nabi Yunas; that this eity was built about the middle of the thirteenth century B. c.; and that, from it, the name of Nioeveh was in after times tramsferred to several other sites ia the neighbourhood. The great work of Nimrud (the seat of Mr. Layard's chief labours), which it was natural, on the first extensive discoveries, to suppose was the real Nineveh, is proved beyond question by both Col. Rawlinson and Dr. Hincks to have beer called by the Assyrians Calah, or Calach. We caunot doubt but that this is the Calah of Genesis (x. 12), and the urigin of tbe Calachene of Strabo (xi. p. 529. xvi. p. 735), and of the Calaciue of Ptolemy (vi. 1. § 2). From the inscriptions, it may be gathered that it was founded about the middle of the twelfth century B.c. The great ruin of Khorsubdd (the scene of the Frencb excavations), which has also been thought by some to have formed part of Ninevelt, Colunel Rawlinson has ascertained to bave been built by the Sargen of 1saiah ( rx . 1), the Shalmaneser of 2 Kings, axii. 3,-abont the year B. C. 720 ; and he has shown from Yacit that it retained the name of Surghoun down te the time of the Muhammedan conquest. Koyanjik, the principal ruin opposite to $1 /$ osul, and adjoining the Nabi Yuans, we know from the inscriptions to have been constructed by Sentacherib, the sun of Shalmaneser, about B. C. 700 . The whole of this district has been surveyed with great care and minuteness by Capt. Jones, within the last few years; and his accomnt, with three elaborato maps, has been published in the Journal of the Asiatio Society for 1855. From this we leani that the whole enclusure of Koyunjik and the Nabi Yunas (which we may
fairly presume to have been, in an especial sense, the city of Nineveh) compreliends abont 1800 English acres, and is in form an irregular trapezium, about $7 \frac{1}{2}$ miles round. The two mounds occupy respectively 100, and 40 acres of this space, and were donbtless the palaces and citadels of the place. Capt. Jones calculates that, allowing 50 square yards to each inhabitant, the population may have amounted to about 174,000 souls.
Fron an elaborate exanination of the inscriptions preserved on slabs, on cylioders, and on tablets, Colonel Rawlinson has arrived at the following general conclnsions and identifications in the history of the Babylonian and Assyrian empires.
He considers that the bistorical dates preserved by Berosus, and substantiated by Callisthenes ( $w$ bo sent to Aristotle the astrunomical observations he had found at Babylon, extending as far back as 1903 years before the tinoe of Alexander, i. e. to E. c. 2233), are, in the main, correct; and hence that autbentic Babylonian clronology ascends to the twenty-third centary n.c. The Chaldaean monarchy which fullowed was cstablished in B. c. 1976, and continned to B. C. 1518 ; and to this interval of 458 years we must assign the bnilding of all the great cities of Babylonia, in the rnina of which we now fiud bricks stamped with the names of the Chalddean fuunders. At the present time, the names of about twenty monarchs have been recorered from the bricks found at Sippara. Niffer, Warkia, Senkereh, and Muqueyer (Ur), belongiog to the one gempine Chaldaean dynasty of Berosns, which reigned from n. c. 1976-1518. Among the Scriptural or historical names in this series, may be noticed those of Anvaphel and Arioch, Belus and Horus, and possibly the Thilgamns of Aelian. An Arab family succeeded from B. c. 1518 to B. c. 1273, of whom, at present, no certain remains lave been found. The independence of Assyria, or what is ussually called the Ninus dynasty, commenced, Colonel Rawlinson believes, in B. c. 1273,245 ycars after the extinction of the first Chaldaean line, and 526 years before the aera of Nabonassar in e.c. 747. Of the kings of this series, we have now nearly a complete list; aod, thongh there is some difference in the reading of parts of some of the names, we may state that the identificatioos of Dr. Hinclss and Colonel Ratrlissoo agree io all important particulars. To the kings of this race is attributable the foundation of the principal palaces at Nimr rid. The series comprechends the nanes of Aslurbanipal, probably the warlike Sardanapalus of the Greeks, the founder of Tarsus and Aochiale (Schol. ad Aristoph. Aves, 1021), and the contemporary of Ahab, about b.c. 930; and Plal-ukla, the $\Phi \dot{d} \lambda \omega \chi$ of the LXX., and the Pul of 2 Kings (xv. 19), who received a trihnte froin Menahem, king of Israel; and Semiramis, the wife of Phal-ukha, whose name with ber hushand's has been lately found on a statue of the god Neto, excavated from the SE. palace at Nimrid.

Colonel Raxlinson coosiders the line of the family of Nious to have terminated with Phal-ukha or Pul in B. c. 747, and that the celebrated aera of Nabonassar, which dates front this year, was established by Semiramis, cither as a refugee or as a conqueror, in that year, at Babylon. The last or Scriptural dynasty, according to this system, commences with Tiglath Pileser in B. c. 747. It is probable that he represents the Baletar of Polyhistor and Ptolemy's Caoon, and possilly the Belesis of Ctesias, who is said (Diod. ii. 27) to bave
been the actual taker of Niaeveh. From this period the names on the Assyrian inscriptions are coincident with those in the Bible, thongh, naturally, many additional particulars are noticed on them, which are not recorded in Sacred History. Some of the iodividual facts the inscriptions describe are worlly of notice: thus, the campaigns with the king of Samaria (Hoshea) and with a son of Rezin, king of Syria, are mentioned in those published by the British Musenm (pp. 66-72); the names of Jelu and of Hazael have been read (independently) by Colonel Rawlinson and Dr. Hincks oo the black obelisk from Nimrud, the date of which, therefore, most be early in the ninh centnry n.c.; and the hatter scholar has detected on other monnments the names of Menahem and Manasseb, kings respectively of Istael and Jodalh. Lastly, the same students have discovered in the Annals of Scnoacherib (which are preserved partly on slabs and partly oo cylinders) an acconnt of the celebrated campaign against Hezekiah (described in 2 Kings xviii. 14), in whicb Senuacherib states that he touk from the Jewish king " 30 talents of gold," the precise amount mentioned in Scripture, besides much other treasure and spoil.
There is still considerable donbt as to the exact year of the final destruction of Ninereh, and as to the name of the monarcb then on the throne. From the narratives in Tobit and Judith (if iodeed these can be allowed to have any historical value), compared with a prophecy io Jeremial written in the first jear of the Jewish captivity, B. c. 605 (Jerem, xxv. 18 -26), it might be inferred that Nineveb was still standing in e.c. 609 , hat bad fallen in e.c. 605. Colonel Rawlinson, however, now thinks (and his view is confirmed by the opiaion of many of the elder chronologists) that it mas overthrowa B. c. 625 , the Assyrian sovereigaty being from that time merged in the empire of Babylon, and the Canon of Ptoleny giving the exact dates of the various succeeding Babylonian kings down to its capture by Cyrus in B. c. 536 , in conformity with what we now know from the inscriptions. We may add, in conclusion, that among the latest of the discoveries of Colonel Rawlinson is the nodoubted identification of the name of Belshazzar as the son of Nabouidus, the last king of Bubyloo; and the findiog the names ot the Greek kings Selencus and Antiochus written io the enneiform character on tablets procured by Mr. Loftns from Warka. (Rawliason, As. Journ. 1850, 1852, 1855; Athenaeum, Nos. 1377, 1381, 1383, 1388; Hincks, Roy.Soc. of Liter. vol. iv.; Trans. Roy. Irish Acad. 1850, 1852, 1855; Layard, Ninereh and Babylon; and, for an entirely new view of the Assyrian cbronology, Busaoquet, Sacred and Profane Chronology, Lond. 8vo. 1853.)
[V]
NINUS river. [Daedala.]
NIPHA'TES ( $\delta$ Nı $\downarrow a ́ t \eta s$, Strab. xi. pp. 522 , 523, 527, 529; Ptol. v. 13. § 4, vi. 1. § 1; Mela, i. 15. § 2; Plin. v. 27 ; Amm. Marc. xxiii. 6. § 13; Virg. Geog. iii. 30; Horat. Carm. ii. 9. 20: the later Roman poets, by a curious mistake, made Niphites a river; comp. Lncan, iii. 245; Sil. Ital. xiii. 775; Juven. vi. 409), the "snowy range" of Armewia, called by the native writers Nebad or Nbadagan (St. Martin, Mèm, sur TArmenie, vol. i. p. 49). Taurus, stretching E. of Commageve (Ain Tab) separates Sophene (Kharput Davassi), which is contained between Tanrus and Anti-Taurus (Strab. xi. p. 521), from Osroene (Urfah), and then divides itself into three portions. The most northerly, and bighest, are the Niphates (Asi Kür) in Acilisene.

## NISYRUS.

The structure of this elevated chain, consisting of the lofty groups of Sir Serah, the peaked glacier of Mut Khän, the Ali Tagh, Sapan, Nimruid, and Darkish. Tuighs, which are probably the highest range of Jaurus, rising above the line of perpetnal show ( 10,000 feet?), remains yet undetermined. Limestone and gypsum prevail, with basalt and other volcanic rocks. Dep vallegs separate the parallel ridies, and also break their continuity by occasional preses from the N . to the S. sides. (Ainsworth, Assyria, Babylonia, and Chaldaca, p. 18 : Chesney, Lrped. Euphrat. vol. i. p. 69; Kitter, Erdkunde, vol. x. p. 911.)

NISA. [1ses.]
NISA. [Nysi.]
NISAEA. [NFSAEA.]
NisaEA. [Megaka.]
NISAEI CAMPl, plains of considerable extent in the mountain district of Media, which were famons for the production of a celebrated breed of borses. Acrording to Stralo, they were on the road of those wh travelled frum Peris aod Babylon in the direction of the Caspian Gates (xi. p. 529), and fed 50.000 brood mares for the royal stables. In another place. the same geographer states that the Nisaean home were reared in the plains of Armenia (xi. p. :330), from which we infer that the plains themselves extended from Armenia southward through Media. Acain, in the Eppitome of Strabo (iii. p. 536. ed. Kraner), the Nisaean plain is stated to be near the Caspian Gates, which lead into Parthia. T ie fact is, the district was not accurately defined. Herudutus states that the place, from which the best white horess (which were reserved for the use of the kinz) c:ame, was a great plain in Media (vii. 40). Aul the same vicw is taken by Eustathius io lis Commentary on Dimysius (v. 1017), and confirmed by the notice in Arrian's account of Alexander's march (vii. 13). Ammianus, on the other hand, states that the Nisaean horses were reared in the plains S. of M. Cormaus (now Demawerd). It af pears to have been the custom on the most solema necasiuns to sarrifice these horses to the sun (Philostr. Vit. Apoll. i. 20); and it may be inferred from Herodotus that they were ako used to draw the chariot of the Sun (vii. 40.) (Cf. also Steph. B. s. v.; Synes. Epist. 40; Themist. Orat. r. p. 72; Heliodor. Aethiop. ix. p. 437 ; said. s.r. Nifatov.) Colonel Ruwlinson has examined the whole of this geographical question, which is much perplexed by the ignorance of the ancient writers, with his nsual alsility; and has concluded that the statements of Strabo are, on the whole, the most trustworthy, while they are, ia a great degree, borne out by the existing character of the country. He states that in the rich and estensive plains of Alishtar and Khuroah be recognises the Nisacan phains, whirh were visited by Alexamber on lis way from Baghistane to Susa and Eeckatalas ; and he thinks that the Nisaran horse came ury finally from the Nisnea of K/2orásan, which is still famoms for its Turkman horses. Colunel Rawlinson furtber believes that IIerndotus, who was impertiotly ampuasted with Median geograph; transfermed the name Nisaen from Khorisan to Media, and hence was the cause of muth of the ennfinsien which has arisen. Strabes, on the other hand, describes correctly the great hone pastures as extembing alung the whole line of Molta, from the rond which led from Babylon to the Caspian Gates to that condu ting from Babylon into Persia. The
whole of this long district, nuder the names of Khówah, Alishtar, Hurú, Silickhúr, Burbuiruid, Jupalak, and Feridun, is still famous for its excellent grazing and abundance of horses. Colonel Rawlinson, indeed, thinks that Strabo's epithet, immóboros, is a translation of Silakhir, which means "a full manger." It was from this plain that Python brought his supply of heasts of burtheo to the camp of Aotigonus (Diod. xix. 2) after the perilous march of the Greeks across the mountains of the Cossaeans. (Rawlinson, Royal Geogr. Journ. vol. ix. pt. i. p. 100.)
[V.]
NISIBIS (Nugleis). 1. A small place ia Ariana, mentioned by Ptolemy (v, 18, § 11) and Ammianus (xxiii. 6). It would appear to have been at the foot of the chain of the Paropamisus. There are some grounds for supposiog it the same place as the Nii of Jidorus [NII], and that the latter has undergone a cootraction similar to that of Bitasa into Bis.
2. The chief city of Mygdonia, a sinall district in the NE. ead of Mlesopotamia, about 200 miles S. of Tigranocerta; it was situated in a very rich and fruitful country, and was long the centre of a very extensive trade, and the great northem emporiom for the merchandise of the E. and W. It was situated on the small stream Mygdonius (Julian, Orat. i. p. 27 ; Justin. Excerpt. e. Legat. p. 173), and was distant about two days' journey from the Tigris. (Procop. Bell. Pers, i. 11.) It was a town of such great antiquity as to have been thought by some to have been one of the primeval cities of Geoesis, Accad. (Hieron. Quaest. in Genes. cap. s. v. 10 ; and cf. Michael. Spicileg. i. 226.) It is probable, therefore, that it existed long before the Grerks came into Mesopotamia; and that the tradition that it was funded by the Macedonians, who called it Antiocheis Mly zuoniae, ought rather to refer to its rebuilding, or to some of the great works erected there by some of th:e Selencid princes. (Strab. $x v i$. p. 747; Plut. Lucull. c. 32 ; Plin. ri. 13. s. 16.) It is first meationed io history (under its name of Antiocheia) io the narch of Antiochus against the satrap Molon (Polyh. v. 51); in the later wars between the Romans and Parthians it was constantly taken and retakeo. Thus it was taken by Lucullus from the brother of Tigranes, after a long siege, which lasted the whole summer (Dion Cass. sxxx. 6, 7), but, according to Plutarch, towards the close of the autumn, without much resistance from the enemy. (Plut. l.c.) Again it was taken by the Romans under Trajan, and was the cause of the title of " Parthicus," Which the senate decreed to that emperor. (Dion Cass. Ixviii. 23.) Subsequently to this it appears to have been besieged by the Osroeni and other tribes who had revolted, but who were subdued by the arms of Sept. Severus. Nisibis became on this occasion the head-quarters of Severus. (Dion Cass. lxxv, 2, 3.) From this period it appeurs to have reozained the adranced outpost of the Romans agaiost the East, till it was surrendered by the l'ersians on the treaty which was made with that people by Jovian, after the death of Julian. (Zosim, iii. 33: Amm. Marc. sxv. 9.) Its present name is Nisibin, in the neighbourhood of which are still extensive ruins of the aocient city. (Xiebulir, vol. ii. p. 379.)
[V.]
N'SYRU'S (Níqupas), a rocky island opposite to Cnidus, between Cus in the north and Telus in the sonth, about $12 \frac{2}{2}$ Loman miles distant from Capo Triopion in Caria. (Plin. v. 36; Strab. siv. p. 656,

NISIRUS.
x. p. 488 ; Steph. B. s. v.) It also bore the name of Porphyris, on account of its rocks of porphyry. The island is almost circular, and is only 80 stadia in circumference; it is said to have been formed by Poseidon, with bis trident, knocking off a portion of Cos, and throwing it upon the giant Polybotes (Strab. x. p. 489 ; Apollod. i. 6. § 2; Paus. i. 2. § 4 ; Eustath. ad Dion. Perieg. 530, ad Hom. Il. ii. 676.) The island is evidently of roleanic origin, and was gradually formed by volcanic ernptions of lara from a central crater, which in the end collapsed, leaving at its top a lake stroogly impregnated with sulphar. The highest montrain in the north-western part is 2271 feet in height; another, a little to the northeast, is 1800 , a ad a third in the sonth is 1700 feet high. The bot springs of Nisyrus were known to the ancients, as well as its quarries of millstones and its excellent wine. The island has no good harbour; but near its north-western extremity it had, and still bas, a tolerable roadstead, and there, on a small bay, was sitnated the town of Nisyrus. The same spot is still occupied by a little town, at a distance of abont 10 miontes' walk from which there are very coosiderable remnants of the ancient acropolis, consisting of mighty walls of black trachyte, with square towers and gates. From the acropolis two walls ruo dowo towanls the sea, so as to cmbrace the lower town, which was built in terraces on the slope of the hill. Of the town itself, which possessed a temple of Poseidon, very little now remains. On the east of the town is a plain, which anciently was a lake, and was separated from the sea by a dike, of which considerable remains are still seea. The hot springs ( $9 \in p \mu \alpha$ ) still exist at a distance of about half nin hour's walk east of the town. Stephanus B. (s.v.) mentions another small town in the south-west of Nisyrus, ealled Argos, which still exists under its ancient name, and in the neighbourhood of which hot vapours are coastantly issuing from a chasm in the rock.

As regards the bistory of Nisyrns, it is said originally to have been inbabited by Carians, until Thessalus, a son of Heracles, occupied the island with his Dorians, who were governed by the kings of Cos. (Diod. v. $54 ;$ Hom. Il. ii. 676.) It is possille that, after Agamemnon's return from Troy, Arcives settled in the island, us they did in Calymous, which wonld acconnt for the name of Argos occarring in both islands; Herodotus (vii. 99), moreover, calls the inhabitants of Nisyrus Epidaurians. Subsequeotly the island lost most of its iohabitants duning repeated earthquakes, but the population was restored by inhabitants from Cos and Rbodes settling in it. Dnring the P'ersian War, Nisyrus, togetber with Cos and Calymnus, was governed by queen Artemisia (Herod. l. c.). In the time of the Peloponnesian War it helonged to the tributary allies of Atheos, to which it had to pay 100 drachmae every month: subsequently it joined the rictorions Lacedremonians; bnt atter the victory of Cnidos, B. c. 394, Conon induced it to revolt from Sparta. (Diod, xiv. 84.) At a later period it was for a time probably governed by the Ptolemies of Egypt. Throughout the historical period the iohabitants of Nisyms were Dorians; a fact which is attested by the inseriptions found in the sland, all of which are composed in the Deric dialect. An excellent account of Nisyrus, which still bears its ancient name Nioupos or Nioupa, is found in L. Ross, Reisen auf den Griech. Inseln, vol. ii. Pf 67 - 81 .
[L. S.]
NISIRUS, a town in the island of Carpatius.

Nitriat.
NITAZI (It. Ant. p. 144), Nitazo (Geogr. Rav. ii. 17; Tab. Peut.), or Nitalis (It. Hieros. p. 576 ), a town in Cappadocia, on the road between Mucissus and Archelais, but its site is nocertain. [L. S.]

NIIIOBRIGES (Nitiu8pı $\gamma \epsilon$ ), a people of Aqnitania. In Pliny (iv. 19) the name Antobroges occurs: " rursus Narbonensi provinciae contermini Ruteni, Cadarci, Antobroges, Tarneque amne discreti a Tolosanis Petrocori." There is no dunbt that Antobroges is an error, and that the true reading is Nitiohroges or Nitiobriges. The termination briges appears to be the same as that of the word Allobroges. The chief town of the Nitiobriyes, Aginoum (Agen), is mentioned by Ptolemy (ii. 7. § 4), who places them next to the Petrocorii on one side, and to the Va-atii on the other. Strabo eonmerates them between the Cadurci and the Petrocorii (Strah. iv. p. 190): " the Petrocorii, and next to them the Nitiobriges, and Cadnrei, and the Bitnriges, who are named Cubi." The position of the Nitiobriges is determised by these facts and by the site of Aginnnm, to be on the Garonne, west of the Cadurci and south of the Petrocorii. D'Anville makes their territory extend beyond the then limits of the diocese of Agen, and into the diocese of Condom.

When Caesar (B. G. vii. 46) surprised the Galli in their encamproent on the bill which is connected with the platean of Gergovia, Teutomatns king of the Nitiobriges narrowly escaped being made prisoner. The element Teut in this king's name is the name of a Gallic deity, wbom some authorities suppose to be the Gallie Merenrius (Lactant. De falsa Relig. i. 21 ; and the Schol. on Lucan, i. 445 , ed. Ondendorp). Others have observed that it is the same element as Teut in the Teutonic langnage, and as Dis, frotn whom the Galli pretended to spring (Pellvatier, IIist. des Celtes Liv. i. c. 14). The Nitiobriges sent 5000 men to the relief of Alesia when it was blockaded by Caesar (B. G. vii. 75). [G. L.]

NITRA (Nitpa), a place which Itolemy calls an $\dot{\epsilon} \mu \pi \dot{\rho}$ poo, on the W. cuast of Hindostón, in the proxince of Limyrica. There can be no donbt that it is the same as that called by Pliny Nitrias (ri. 23. s. 26), which he states was held by a colony of pirates. The anthor of the Periplus speaks of a place, in this immediate neighbourhood, named Nanra, and which is, in all probability, the same as Nitrae. (Peripl. Mar. Erythr. § 58, ed. Muiller.) It is most likely the present Honaver.
[V.]
NI'TIILAE (Nıтpiat, Strab. xvii. p. 803; Sozomen, H. E. vi. 31 ; Socrat, H. E. iv. 23 ; Steph. B.s. v.; Ntтptŵtal, Ptol. iv. 5. § 25; Nitrariae, Plin, xxxi. 10. s. 16: Eth. Niтpín $\begin{gathered}\text { and Nitptút } \eta \mathrm{s}) \text {, the Natron Lakes }\end{gathered}$ (Birket-el-Duarah), were six in number, lying in a valley SW, of the Aegyptiar: Delta. The valley, which is buunded by the limestone terrace which skirts the edge of the Delta, runs in a NW. direction for about 12 miles. The sands which stretch aronnd these lakes were formerly the bed of the sea, and were strongly impregaated with saline matter, e. g. mnriate, snlphate, and carbonate of soda. Rain, tbough rare in Aegypt, falls in this region during the months of December, Jamary, and Felruary; and, consequently, when the Nile is lowest, the lakes are at higb water. The salt with wbich the sands are encrusted as with a thin coat of ice (Vitruv, viii. 3), is carried by the rains into the lakes, and beld there in solution during the wet season. But in the summer months a strong exaporation takes place, and a glaze or crust is deposited upon the surface and edges of the water, which, when collected, is employed by
the bleachers and glassmakers of Aegypt. Parallel with the Natron Lakes, and separated from them by a narrow ridge, is the Bahr-be-la-Ma, or Waterless River, a name given by the Arabs to this and other hollows which have the appearance of baving once been channels for water. It lias beeo surmised that the lake Moeris (Birket-el-Keroum) may have been connected with the Dediterranean at some remote period by this outlet. The Bahr-be-la-Ma contains auatised wood. (Wilkinson, Mod. Egypt and Thebes, vol. i. p. 300.)

The valley io which the Natron Lakes are contained, was denominated the Nitriote nome (vópos Nitpıйtts or Niтptétクs, Strab. xtii. p. 803; Steph. B. s. r. Nitpiai). It was, according to Strabo, a priocipal seat of the worship of Serapis, and the onily nome of Aegypt in which sheep were sacriticed. (Comp. Macrob. Saturn. i. 7.) The Serapeiao worship, indeed, seems to have prevailed on the western side of the Nile long before the Sinopic deity of that name (Zeus Sinopites) was introduced from Poutus by Ptolemy Soter, since there was a very ancient temple dedicated to bim at Rhacotis, the site of Alexandreia (Tac. Mist. is. 83), and another still mure celebrated outside the walls of Jlemphis. The monasteries of the Nitriote nome were notorions for their rigorous asceticism. Tbey were many of them strong-bnilt and well-guarded fortresses, and offered a successful resistance to the recruiting sprgeants of Valens, wheo they attempted to euforce the imperial rescript (Cod. Theodos, sii, tit. 1. lea. 63), which decreed that monastic vows should not excmpt men from serving as soldiers. (Phutius, P. S1, ed. Bekker; Dionss. P'erieg. v. 255; Eustath. ad loc; Pansan. i. 18; Strab. svii. p. 807 ; Clem. Alex. Strom. i. p. 43.)
[W. B. D.]
NIVARIA, a city of the Vaccaci io Hispania Tarraconeusis, lying N. of Cauca. (Itin. Ant. p. 435: Ukert, vol. ii. pt. 1. p. 432.) [T. H. D.]

NIVAR1A INS. [Fohtexatie Lis., Vol. 1. p. 906, b.]

NOAE (Nóar, Steph. B.: Eth. Noaios, Noaeus: Nonra), a city of Sicily, the name of which is not mer tioned in history, but is found in Stephanns of By/antium (s.v.), who cites it from Apullodorus, aod in Pliny, who enumerates the Noaei among the commonities of the interior of Sicily (Plin. iii. 8. s. 14.) We bave nu clue to its position, but the resemblance of name renders it probable that it is represented by the modern village of Noara, on the N. slope of the Neptunian mountaios, aboat 10 miles from the sea and 13 from Tyndaris. (Cluver. Sicil. p. 335.)
[E. H. B.]
NoARLS (Nóayos), a river of pannonia, into which, according to Strabo (vii. p. 314), the Dravus emptied itself in the district of Segestice, and which thence flowad into the Dannbe, after having received the waters of another tributary called the Colapis. This river is ont mentioned by any other writer ; and as it is well known that the Dravas flows directly into the Danube, and is not a tribntary to any other river, it has been supposed that there is some mistake in the text of strabo. (See Groskurd, Strabo, vul. i. pp. 357, 552.) [L. S.]

NUEGA (Nuira), a small city of the Astures, in Ihagania Tarracooensis, It was seated on the coast, not far from the river Jhelsns, and from an estuary which formed the bomadary between the Astures and Cantabri, in the neighbonrhool of the present Gijon. Hence 1'tolemy (it. 6. § 6), who gives it the ulditional name of U'cesia (Nor quvvéria), places it
in the territory of the Cantabri. (Stral. iii. p. 167; Mela, iii. 1; Plin, iv. 20. s. 34.) [T. H. D.]

NOEL.A, is town of the Capon in Hispania Tarracenensis, now Noya on the Tambre. (Min. iv. 20. s. 34; Ukert, vol. ii. pt. 1. p. 438.) [T. H. D.]

NOLODU'NCM (Notóסouvoy), was the chief city of the Liablintes [Dunlistes], or of the Aalircii Diaulitae, as the name appears io the Greek teats of Ptolemy (ii. $8, \S$, ). There is Do doubt that the old Gallic name of the town was exchanged for that of the people, Diablintes; which name io a middle age docmment, referred to by D'Anville, is written Jublent, and bence comes the corrupted name Juöleins, a small place a few leagues from Mayenne. There are said to be some Roman remains at Jubleins.

A name Sudionaum occurs in the Thendosian Table between Araegenns and Subdinnum ( $1 /$ uns), and it is marked as a capital town. It appears to be the Noeodunuon of the Diablintes.
[G. L.]
NOEOMAGC'S (Noıóparos), a town of Gallia Lugdanensis, and the capital of the Vadicaesii (Ptol. ii. 8. § 16). The site is uncertain. D'Aavillo sapposes tbat it may be Vez, a name apparently derived from the Viducasses. Others suppose it to be Neuville, apparently because Neurille means the same as Noeomagus.
[G. L.]
NOES (Nóns, Herod. iv. 49) or NOAS (Vuler. Flace. ri. 100), a river which takes its souree in Mount Haemus, io the territory of the Corbyzi, and flows into the Danube. It has not been satisfactorily identified.
[T. H. D.]
NOIODENOLEX, a place in the conntry of the Helvetii, which is shown by inscriptions to be lieure Chátel, near Neuf fhaitel. Foundations of old buildings, pillars and coins bave been foand there. One of the inscriptions cited by Lkert (Gallien. p. 494 ) is: " P'abl. Dlartids Miles V'eteranus Leg. sxi. Civium Noiodenolicis curator."
[G. L.]
NO1ODU"NUM. [Colosha Equestias Nohoduxum.]

NOLA (N $\bar{\omega} \lambda a:$ Eth. Nwaä̀s, Nolanus: Nola), an ancient and important city of Campania, sitnated in the interior of that proviace, in the plain between Mt. Vesuvius and the foot of the Apeanincs. It was distant 21 miles from Capua and 16 from Niaceria (Itin. Ant. p. 109.) Its early history is very obscure; and the acconuts of its origin are contradictory, thongh they may be in some degree reconciled by a due regard to the successive populations that occupied this part of Italy. Hecatacus, the earliest author by whom it is mentioned, appears to have called it a city of the Ausones, whom he regarded as the earkiest inbabitants of this part of Italy. (Hecat. ap. Steph. Byz. s. v.) On the other hand, it mast bave received a Greek colony from Cumae, if we can trust to the anthority of Justio, who calls both Nola and the neighbouring Abella Clalcidic colonies (Justin, xx, 1); and this is confirmed by Silins ltalicus (Chalcidicam Nolam, sii. 161.) Other anthors assigned it a Tyrrhenian or Etruscan origiu, thongh they differed widely in regard to the date of its foundation; some writers referring it. together with that of Capua, to a date as early as e. c. 800 . while Cato bruaght them both down to a perind as late as n. c. 471. (Vell. Pat. i. 7. This question is morc fully discussed under the articlo Capta.) But whatever be the date assigned to the establishment of the Etrascans in Campania, there seems no doubt that Nola was one of the cities which they then occupied, in the same manner as the
neighbouring Capus (Pol. ii. 17); though it is most probable that the city already existed from an earlier period. The statement of Solinus that it was founded by the Tyrians is clearly erroneous: perbaps, as suggested by Niebuhr, we should read "a Tyrrbenis" for "a Tyriis." (Solin, 2. § 16; Niebuhr, vol. i. p. 74, note 235.). We bave no account of the manner in which Nola afterwards passed into the hands of the Samnites; but there can be little doubt that it speedily followed in this respect the fate of Capua [CapuA]; and it is certain that it was, at the time of the first wars of the Romans in this part of ltaly, a Campanian city, occupied by an Oscan people, in close alliance with the Samnites. (Liv, viii. 23.) Dionysius also intimates clearly that the inhabitants were not at this period, like the Neapolitans, a Greek Feople, though be tells us that they were much attached to the Greeks and their institutions. (Dionys. Fr. sv. 5. p. 2315. R.)
We may probably infer from the ahore statements, that Nola was originally an Ausonias or Oscan town, and subsequently occupied by the Etruscans, in whose hands it appears to have remained, hike Capua, until it was conquered by the Samnites, who subsequestly assumed the name of Campanians, about B. c. 440 . The eridence in favour of its having ever received a Greek colony is very slight, and is certainly outweighed by the contrary testimony of Hecatacus, as weil as by the silence of all other Greek writers. The circumstance that its coins (none of which are of early date) have uniformly Greek inscriptions (as in the one figured below), may be sufficiently accounted for by that attachment to the Greeks, which is mentioned by Dionysius as characterising the inlabitants. (Dionys. l. c.)
The first mention of Nola in history occurs in B.c. 328 . just before the beginning of the Second Sumnite War, when the Greek cities of Palaepolis and Neapolis baving rashly pr.voked the hostility of Rome, the Nolans sent to their assistance a body of 2000 troops, at the same time that the Samnites furnished an auxiliary force of twice that amount. (Liv. viii. 23.) But their effirts were frustrated by disaffection among the Palaepolitans; and the Nolans retired from the city on finding it betrayed into the hands of the Romaus. (Ib. 25, 26.) Notwitbstanding the provocation thus given, it was long before tine Romans were at leisure to avenge themselves on Nola; and it was not till B. c. 313 that they luid siege to that city, which fell into their hands after but a short resistance. ( $/$ d. ix. 28.) It appears certain that it continued from this period virtually subject to Rome, though enjoying, it would scem, the privileged condition of an allied city (Liv. xxiii. 44; Festus, s.v. Municipium, p. 127); but we do not meet with any subsequent notice of it in listory till the Second Punic War, when it was distinguished for its fidelity to the Roman cause, and for its successful resistance to the arms of Hanribal. That general, sfter making bimself master of Capua in e.c. 216, hoped to reduce Nola in like mauner by the cooperation of a party within the walls. But though the lover peopie in the city were ready to invite the Carthaginian general, the senate and nobles were faithful to the alliance of Rome, and sent in all baste to the praetor Marcellus, who threw bimself into the city with a considerable force: Hannibal in consequence withdrew from before the walls; but shortly after, having taken Nuceria, he renewed the attempt upon Nola, and continued to threaten the city for some time, until Marcellus, by a sudden sally, in-
flicted upon him considerable loss, and led him to abandon the enterprise (Liv. xxiii. 14-17; Plut. Marc. 10, 11; Eutrop. iii. 12; Flor. ii. 6. § 29.) The advantage thns obtained, though inconsiderable in itself, was of importance in restoring the spirits of the Romans, which had been almost crushed by repeated defeats, and was in consequence magnified into a great victory. (Liv. l. c.; Sil. 1tal. xii. 270280.) The next year (n.c. 215) Hannibal again attempted to make himself master of Nola, to which be was encouraged by fresh overtures from the democratic party within the city; but be was again anticipated by the vigilance of Marcellus, and, baving encamped in the neighbourhood of the tuwn, with a view to a more regular siege, was attacked and defeated by the Roman general (Liv. xxiii. 39, 4246 : Plut. Marc. 12.) A third attempt, in the following year, was not more successful; and by these successive defences the city earned the praise bestowed on it by Silius Italicus, who calls it " Poeno non pervia Nola." (Sil. Ital, viii. 534.)

Nola again bears a conspicuous part in the Social War. At the outbreak of that contest (r. c. 90) it was protected, as a place of importance from its proximity to the Samnite frontier, by a Roman garrison of 2000 men, under the command of the praetor L. Postumius, but was betrayed into the lhands of the Samnite leader C. Papius, and liecame from thenceforth one of the chief strongholds of the Samnites and their allies in this part of Italy. (Liv, Epit. 1xxiii-; Appian, B. C. i. 42.) Thus we find it in the following year (n. c. 89) affording shelter to the sbattered remaina of the army of L. Cluentius, after its defeat by Sulla (Appian, l. c. 50); and eren after the greater part of the allied nations had made peace with Rome, Nola still held out; and a Roman army was still occupied in the siege of the city, when the civil war first broke out between Marias and Sulla. (Vell. Pat. ii. 17, 18; Diod. xxavii. Exc. Phot, p. 540.) The new turn thus given to affairs for a while retarded its fall: the Saranites who were defending Nola joined the party of Marius and Cinna; and it was not till after the final triumph of Snlla, and the total destruction of the Samnite power, that the dictator was able to make bimself master of the refractory city. (Liv. Epit. Inxxix.) We cannot doubt that it was severely punished: we learn that its fertile territory was divided by Sulla among his victorions soldiers (Lib. Colon. p. 236), and the old inhabitants probably altogether expelled. It is remarkable that it is termed a Colonia before the outbreak of this war (Liv. Epit, Ixxiii.); but this is probably a mistake. No other author mentions it as such, and its existence as a municipium, retaining its own institutions and the use of the Oscan language, is distinctly attested at a period long subsequent to the Second Punic War, by a remarkable inscription still extant. (Nommsen, U'nter Ital. Dial. p. 125.) It afterwards received a second colony under Augustus, and a third uoder Vespasian ; hence Pliny enumerates it among the Coloniae of Campania, and we find it in inscriptions as late as the time of Diocletian, hearing the titles of "Colonia Felix Augusta Nolana." (Lib. Colon. l. c.; l'lin. iii. 5. s. 9; Zumpt, de Colon. pp254, 350; Gruter, Inscr. p. 473. 9, p. 1085. 14.)

It was at Nola that Augustus died, on his return from Beneventum, whither be had accompanied Tiberius, A. D. 14; and from thance to Borillae his funeral procession was attended by the senators of the cities through which it passed. (Suet. Aug. 98; Dion Cass. Ivi. 29, 31; Tac. Aun. i. 5; Vell. I'at. ï.
123.) The bouse in which be died was afterwards consecrated as a temple to his memory (Dion Cass. lvi. 46). From this time we find mo historical mention of Nola till near the close of the Roman Empire; but there is no doubt that it continued throughout this period to be one of the most flourishing and considerable cities of Campania. (Hrab, v. pp, 247, 249 : Ptol. iii. 1. § 69 ; Itin. Ant. p. 109 ; Orell. Inscr. 2420, 3855, \&e.; Mommsen, Inscr. R. N. pp. 101 -107.) Its territory was ravaged by Alaric in A. D. 410 (Augustin, Cib. Dei. 1. 10): but the city itself would seem to have escaped, and is said to Lave been still very wealthy ("urbs ditissima ") as late as A. 1. 455 , when it was taken by Genseric, king of the Vandals, who totally destroyed the city, and sold all the inhabitants into captivity. (Hist. Miscell. xv. pp. $552,5.33$.) It is probable that Nola never recovered this bluw, and sank into comparative insignificance in the middle ages ; but it never ceared to exist, and is still an episcopal city, with a population of about 10,000 souls.

There is no doubt that the ancient city was situated on the same site with the modern one. It is deseribed both by Livy and silius Italiens as standing in a level plain, with no natural defences, and owing its strength as a fortress solely to its malls and towers (Lir, sxiii. 44; Sil. Ital. xii. 163); a circumstance which renders it the more remarkable that it should have held ont so long against the Ruman arms in the Social War. Scarcely any remains of the ancient city are now visible; but Ambrnsius Leo, a local writer of the early part of the 16 th century, deseribes the remains of two amphitheatres as still existing in his time, as well as the foundations of several ancient buildings, which he considered as temples, beattiful mosaic pavements, \&c. (Ambrosii Leonis de Lrbe Nolce, i. 8, ed. Venet. 1514.) All these have now disapjeared; but numerous inscriptions, which have been discovered on the spot, are still preserved there, together with the interesting inscription in the Oscan larguage, actually dicowered at Abella, and thence commonly known as tbe Cippus Abellanus [Adella ]. From this curions monument, which records the terms of a treaty between the two cities of Nola and Abella, we learn that the name of the former city was written in tbe O-can langnage "Nuvla." (Mimmisen, Unter. Ita?. Dialekte, pp. 119-127.) But the name of Nola is must celeirated among antiquarians as the place from whence a countless multitude of the painted Greek vases (commonly known as Etruscan) bave been supplied to ahmost all the museums of Europe. These vases, which are uniformly found in the ancient sepulchres of the neighbourhood, are in all probability of (ireek origin: it has been a subject of inuch controversy whether they are to be regarded as productions of native art, manufactured on the spot, or as imported from some other quarter; but the latter supposition is perhaps no the whole the most probable. The great love of these whjects of (ireek art which appears to have prevailed at Nola maty be sufficiently accounted for by the stronit (ireek predilections of the imhabitants, noticel by Dionysins (Exc. Leg. p. 2315), without admitting the existence of a Greck coluny, for which (as already stated) there exists no sufficient authority: (Kiramer, uber den Styl. $u$, die Iterkunfl Griechischen Thongefusse, pp. 145-159; Abeker, Mittel Italien, pp. 332-339.)

Nola is celebrated in ecelestastical history as the see of St. Pualinus in the 5th century; and also as the place where, according to tradition, the we of
bells was first introluced in churches; whence tere derived the names of " nola" and "campana," usually applied to such bells in the middle ages. (Du Cange, Glossur. s. v.)

The territory of Nola, in common with all the Campanian plain, was one of great natural fertility, Accordug to a well-known anecdote related by Aulus Gellius (vii. 20), it was originally mentioned with great praise by Virgil in the Georgics (ii. 225); but the people of Nola having given offence to the poet, he afterwards struck out the name of their city, and left the line as it now stands.
[E. H. B]

COLN OF NOLA.
NOLIBA or NOBILI, a town of the Oretani in Hispania Tarraconensis, probably situated between the Anas and Tagus ; but its site cannot be satisfactorily determined. It is inentioned only by Lisy (xxxy, 22).
[T. II. D.]
NOMADES. [Numidla.]
NOMAE (Nóuai), a tomn of Sicily, mentioned only by Diodorus (xi. 91) as the place where Ducetius was defeated by the Syracnsans in E. C. 451 . Its site is wholly uncertain. Some authors identify it with Noae [NOAE]; but there is no autbority for this.
[E. H. B.]
NOMENTUM (Núpevtov: Eth. N $\omega \mu$ evtîvas, Steph. B.; Nomentanus: Mentana), an ancient city of Latium, situated on the Sabine frontier, about 4 miles distant from the Tiber, and $14 \frac{1}{2}$ from Rome, by the road which derived from it the name of Iia Nomentana. It was included in the territory of the Sabines, according to the extension given to that district in later times, and betice it is frequently reckoned a Sabine town; but the autborities for its Latin origin are decisive. Virgil enumerates it among the colunies of Allia (Acn. vi. 773); and Dionysius also calls it a colony of that city, founded at the same time with Crustumerium and Fidenae, buth of which are frequently, but erroneonsly, called Sabine cities. (Dionys, ii. 53.) Still more decisive is the circumstance that its name occurs among the cities of the Prisci Latini which were reduced by the elder Tarquin (Liv. i. 38 ; D2mys, iii. 50 ), and is found in the list given by Dionysius (v, 61) of the cities which concluded the league against Rome in B. c. 493. There is, therefore, no doubt that Nomentum was, at this period, ore of the 30 cities of the Latin League (Niebuhr, vol. ii. p. 17, unte); nor dines it appear to have ever fallen into the hauds of the Sabives. It is again mentioned more than once during the wars of the Romans with the Fidenates and their Etruscan allies; and a victory was gained under its walls by the dictator Servilius Priscus, n. C. 435 (Liv. iv. 22, 30, 32) ; but the Xomentani themselves are not noticed as taking any part. Ther, however, joined with the other cities of Latium in the great Latin Wiar of B. c. 3.38 ; and by the peace which followed it obtained the full rights of Roman citizens. (Liv, viii. 14.) From this time we hear no more of Nimentuin in listory; but it scems to bave continued a tulerably flourisbing towa; and wo
find it retaining its municipal privileges down to a late period. Its territory was fertile, and produced excellent wine; which is celebrated by several writers for its quality as well as its abondacoce. (Plin. xiv. 4. s. 5 ; Colom. R. R. iii. 3; Athen. i. p. 27, b; Martial, x. 48. 19.) Seneea had a conotry house and farm there, as well as Martial, and his fiiends Q. Ovidius and Nepos, so that it seenis to have been a place of some resort as a country retirement for people of quiet habits. Martial contra:ts it in this respect with the splendonr and luxury of Baiae and other fahionable watering-places; and Cornelius Nepos, in like manner, terms the villa of Atticns, at Nomentum, "rusticum praedium." (Sen. Ep. 104; Martial, vi. 27, 43, x. 44, sii. 57; Nep. Att. 14.)

Even under the Roman Empire there is much discrepancy between our authorities as to whether Nomentum was to be reckoned a Latin or a Sabine town. Strabo ascribes it to the latter people, whose territory he describes as extending from the Tiber and Nomeatum to the confines of the Vestivi (r. p. 228). Pliny, who appears to bave considered the Sabines as bounded by the Anio, maturally includes the Xomentani and Fidenates among then (iii. 12. s. 17); though be elserrhere coumerates the former among the still existing towns of Latium, and the latter among those that were extinct. In like manner Virgil, in enumerating the Sabine followers of Clausus (Aen. vii. 712), ioclades "the city of Nomentum," thongh he hadelserwhere expressly assigned its fuundation to a colony from Alba. Ptolemy (iii. 1. §62) distinctly assigns Nomentum as well as Fidenae to Latium. Architectural fragments and other existing remaios prove the continned prosperity of Nomentum under the Rorman Empire: ;its name is found in the Tabola; and we learn that it becane a bishop's see in the third century, and retained this digoity down to the tenth. The site is now occupied by a village, which bears the name of La Mentana or Lamentana, a corruption of Civitas Nomentana, the appellation by which it was known in the muddle ages. This stands on a small hill, somemhat steep and difficult of access, a bitle to the right of the Tia Nonientana, and probably occupies the sume situation as the ancient Sabine town: the Roman one appears to have extended itself at the foot of the hill, along the high road, which seems to have passed through the midst of it.
The road leading from Rome to Nomentum was known in apcient times as the Via Nomentana. (Urell. Inscr. 208; Tab. Reut.) It issued from the Purta Coliioa, where it separated frou the Via Salaria, crossed the Anio by a bridge (known as the Pons Nomentanus, and still called Ponte Lamen(ama) immediately below the celebrated Mons Sacer, and from thence led almost in a direct line to Nomentum, passing on the way the site of Ficolea, from whence it bad previously derived the name of Yia Ficulensis. (Strah. v. p. 228; Liv. iii. 52.) The remains of the adcient pavement, or other unquestionable marks, trace its conse with accuracy throughont this distance. From Nomentum it continued in a straight line to Eretum, where it rejoined the Via Salaria. (Strab. l. c.) The Tabula gives the distance of Nomentum from Rome at xiv, M. P.; the real distance, according to Nibby, is balf a mile more. (Niibby, Dintorni, vol. ii. p. 409, rol. iii. p. 635.)

Nomima. [Lrcaevs.]

country of the Marcomanni (Bohemia), not far from the banks of the Albis; bat its site cannot be determined. (Ptol. ii. 11. § 29 ; Wilbelm, Germanien, p. 222.)
[L. S.]
NONA'CRIS (Núvakpis: Eth. N $\omega$ rakpiarns, N $\omega$ vakpués). 1. A tomn of Arcadia, in the district of Pheneatis, and NW. of Phenens, which is said to have derived its name from Nonacris, the wife of Lycaoo. From a lofty rock above the twwn rose the waters of the river Styx. [STYx.] Pliny speaks of a mountain of the same name. The place was in ruins in the time of Pausanias, and there is no trace of it at the present day. Leake conjectures that it may have occopied the site of Mesorighi. (Herodvi. it ; Paus. viii. 17. § 6 ; Steph. B. s. v.; Plin. iv. 6. s. 10; Sen. Q. N. iii. 25 ; Leake. Morea, rol. iii. pp. 165, 169.) From this place Hernes is called Nonacriates (Nwakpiains, Steph. B. s. v.), Evander Nonacrius (Or. Fast. v. 97), Atalapta Nonacria (Ov. Met. viii. 426), and Callisto Nonacrina virgo ( 0 v . Met. ii. 409) in the general sense of Arcadian.
2. A torn of Arcadia in the territory of Orebomenus, which formed, together with Callia and Dipoena, a Tripolis. (Paus, viii. 27. § 4.)

## Noorda. [Mearda.]

NORA (Nêpa: Eth. Napavós, Steph. B.; Norensis: Copo di Pulo), a city of Sardinia, situated on the S . coast of the island, on a promootory nuw called the Capo di Pula, about 20 miles S. of Cagliari. According to Pausanias (x. 17. §5) it was the most ancient city in the island, laving been founded hy an Iberian colony under a leader named Nurax, who was a grapdson of Geryones. Without attaching mnch value to this statement, it seems elear that Nora was, according to the traditions of the natives, a rery ancient city, as well as one of the most considerable in later times. Pliny dotices the Norenses among the most important towns of the island; and their name occurs repeatedly io the fragments of Cicero's oration in defence of M. Aemilius Scaurus. (Cic. pro Scaur. 1, 2, ed. Orell.; Plin. iii. 7. s. 13; Ptol. iii. 3. § 3.) The position of Nora is correctly given by Ptolemy, though his anthority had been discarded, without any reason, by several modern writers; but the site has been clearly established by the recent researches of the Comte de la Marmora: its rnins are still extant on a small peniosular promontory near the village of Pulu, marked by an ancient church of St. Effisio, which, as we learn from ecclesiastical records, was erected on the ruivs of Nora. The remains of a thestre, an aqueduct, and the ancient quays on the port, are still visible, and coofirm the notion that it was a place of importance under the Roman guvernment. Several Latin inscriptions with the name of the city and people have also been found; and others in the Phoebician or Punic character, which must belong to the period of the Carthaginian occupation of Sardioia. (De la Marmora, Ioyage en Sardaigne, vol. ii. p. 355.)

The Antouine Itiverary (pp. 84. 84), in which the name is written Nura, gives the distance from Caralis as 32 M. P., for which we should certainly read 22: in like manner the distance from Sulci should be 59 (instead of 69) miles, which agrees with the true distance, if we allow for the windings of the coast. (De la Marmora, ib. p. 441.) [E. H. B.]

NORA ( $\tau \dot{\alpha}$ N $\hat{\omega} \rho a$ ), a moontain fortress of Caypadocia, on the frontiers of Lycaonia, at the foot of Moont Tanrus, in which Lomenes was for a whole
winter besieged by Antigonas. (Diod. xviii. 41; Plut. Eum. 10; Corn. Nep. Eum. 5; Strab. xii. p. 537.) In Strabo's time it was called Neroasus (Nipoaarós), and served as a treasury to Sicinus, who was striviag to obtain the sovereignty of Cappadocit.
[L. S.]
NORBA (Nâp\&a: Eth. Neppsavòs, Norbanus: Normar), an ancient city of I atimm, situated on the border of the Volscian mountains, overlonking the Pontine Mashes, and about midway betweea Cora and Setia. There seems no doubt that Norba was an ancient Latin city; its name is found in the list given by Dionysius of the thirty cities of the League; and acain, is another passage, he expressly calls it a city of the Latin oation. (Dionys. r. 61, vii. 13; Nicbuhr, rol. ii. note 21.) It appears, indeed, certain that all the three cities, Cora, Norha, and Setia, were originally Latin, before they fell into the hands of the Volscians. The statemeot that Norba received a fresh colony in B. C. 492, immediately after the conclusion of the league of Rome with the Latins, points to the necessity, already felt, of strengthening a position of mucb importance, which was well calculated, as it is expressed by Livy, to be the citadel of the surrounding country (") quae arx in Pomptino esset," Liv. ii. 34 ; Dionys. vii. 13). But it seems probable that Norba, as well as the adjoining cities of Cora and Sctia, fell into the hands of the Volscians during the height of their power, and received a fresh colony on the hreakiog up of the latter. (Niehulir, vol. ii. p. 108.) For it is impossible to believe that these strong fortresses bad continued in the hands of the Romans and Latins througbout their wars with the Volscians so mnch nearer home; while, on the other hand, when their names reappear in history, it is as ordinary " coloniace Latinae," and not as independent cities. Hence aone of the three are mentioned in the great Latin War of B. ©. 340 , or the settlement of affairs by the treaty that followed it. But, just before the breaking ont of that war, and again in B. c. 327 , we find the territories of Com, Norba, and Setia ravazed by their neighbours the Priveraates, whose incursioas drew upon them the venceance of Lime. (Lir. vii. 42, viii. 1, 19.) No further mention occurs of Norba till the period of the Second Punic War, when it was one of the eighteen Latin colonies wbich, in ת. с. 209, expressed their readiness to bear the continued burtheas of the war, aod to whowe fidelity on this occasion Livy ascribes the prevervation of the Ruman state. (Liv, xxvii. 10.) It seems to have leen chosen, from its strong and secluded pasition, as one of the places where the Carthaginian hostages were kept, and, in consequence, was involved in the servile conspiracy of the year B. C. 198 , of which the neirhbouring town of Setia was the centre. (1.iv, xxaii. 2, 26.) [Sema.]

Norba played a more inpurtant part during the civil wars of Marios and Sulla: having leea ocenpied by the partisnos of the former, it was the last rity of ltaly that held out, even after the fall of Praeneste and the death of the younger Marius,乃. c. 82. It wa at last betrayed into tho hands of Amilius Leppilus, the general of Sulla; but the garrison put themelves and the other inhabitants to the sword, and wit fire to the town, which was so entirely destroved that the conquerors could earry off no booty. (Appian, B. C. i. 94.) It seems certain that it was never rebnilt: Strabo omits all notice of it, where he meations all the other towns that bordered the Pontine Marshes (v. p. 23i); and,
though Pliny meations the Norbani among the existing "populi" of Latium, in another passage he rockons Norba ainong the cities that in his time had altogether disappeared (iii. 5. s. 9. §§ 64, 68). The absence of all subsequent notice of it is confirmed by the evidease of the existing remains, which belong exelusively to a very early age, without any traces of buildings that caa be referred to the period of the Roman Empire.

The existing ruins of Norha are celobrated as one of the most perfect specimens remaining in Italy of the style of construction commonly known as Cyclopean. Great part of the circuit of the walls is still entire, composed of very massive polyconal or rudely squared blocks of solid limestone, without regular towers, though the principal gate is flasked by a rude projecting mass which serves the purpone of ooe; and oo the E. side there is a great square tower or bastion projecting considerably in adrance of the general line of the walls. The position is one of great natural strength, and the defences have been skilfully adapted to the natural outlines of the hill, so as to take the follest adrantage of the ground. On the side towards the Pontine Marshes the fall is very great, and as abrupt as that of a cliff on the sea-coast: on the other sides the cscariment is less considerahle, hut still enough to render the hill in great mensure detached from the ardjoining Volscian mountains. The only remains within the circuit of the ancient walls are some foundations and substructions, in the same massire style of construction as the walls themselves: these probably served to support temples and other public buildings; but all traces of the structures themselves have disappeared. Tbe site of the ancient city is wholly uniohabited, the modern village of Norma (a very poor place) being situated about half a mile to the S. on a detached hill. In the middle ages there aruse, in the plain at the foot of the hill, a sinall town which took the name of Ninfa, from the sources of the river of the same name (the Nymphaeus of Pliny), clase to which it was situated; but this was destroyed in the 13 th century, and is now wholly in ruins. The remains of Norba are described and illustrated in detail in the first volume of the Annali dell Instituto di Curnispondenza Archeologica (Rome, 1829); and views of the walls, gates, \&ce will be fomul ake is Dodwell's Pelasgic Remains (fol. Lond. 1834, pl. 72-80).
[E. H. B.]
NORBA CAESARIA'NA or CAESARE'A (NÄp. Ea Kauซd́peta, 1'tol. ii. 5. § 8, viii. 4. § 3), 3 Roman colony in Lusitania, on the left bank of the Tagus, lying NW: of Emerita Augusta, and mentioned by l'liny (iv. 20. s. 35) as the Colonia Norbensis Caesarima. It is the modern Alcantara, and still exhibits some Romnn remaias, especially a bridge of six archos over the Tagns, built by Irajan . This structure is 600 feet long by 28 broml, and 24.5 feet above the usual level of the river. One of the arches was blown up in 1809 by Col. Alayne, to prevent the French from passing : hut it was repaired in 1812 by Col. Stargeon. It is still a striking monument of Roman magnificence. The architect, Caius Julins Lacer, was buried near the bridge; and at its eatrance a chapel still exists containing an inscription to his memory. (Ford, Handhook of Spain, p. 272 ; (iruter, Inser. p. 162 ; Muratori, Noo. Thes. Inser. 1064,6 ; Ukert, vol. ii. pt. 1. p. 396: Sestini, Moncta J'etus, p. 14; Florez, Fisp. S. xiii. p. 122.)
[T. II. D.]
NOlRE1A (Nappiela or Nopqía), the ancient
eapital of the Taurisci in Noricum, which province seems to have derived its name from it. The tomn was situated a little to the south of the river Murius, on the road from Virunum to Ovilaba, and formed the central point of the traffic in gold and iron in Noricum ; for in its neighbourhood a considerable quantity of gold and iron was obtained. (Strab, v. p. 214; Tab. Peut.) The place is celebrated in history on account of the defeat there sustained, in 1.. c. 113 , by Cn . Carbo against the Cimbri, and on acconnt of its siege by the Boii about B. c. 59 . (Sirab. l. c.; Liv. Epit. lib. lxiii.; Caes. B. G. i. 5.) Mliny (iii. 23) mentions Noreia among the torns which had perished in his time; but this mast be a mistake, for Noreia is still mentioned in the Peutingerian Table, or else Pliny confounds this place with another of the same name. The site of the ancient Noreia is now occopied by the town of Neumark in Styria. (Muchar, Noricum, i. p. 271.) [L. S.]

Nóricull (Noricus ager, N $\omega \rho(\kappa \dot{\partial} \nu$ ), a country (in the snuth of the Danube, bordering in the west on lihaetia and Vindelicia, from which it was separated by the river Aenns; in the north the Danube separated it from Germania Magna; in the east it bordered no Pannonia, the Mons Cestius forming the boundary, and in the sooth on Pannonia and Italy, from which it was divided by the river Savus, the Alpes Carnicse, and mount Ocra. It accordingly conuprised the modern Upper and Lower Austria, between the $I n n$ and the Danube, the greater part of Slyria, Carinthia, and portions of Carniola, Bavaria, Tyrol, and tbe territory of Salzburg. (Ptol, ii. 13.)

The name Noricum, is traced by some to Norix, a son of Hercules, but was in all probability derived from Noreia, the capital of the country. Nearly the whule of Nuricum is a mountainous country, being surrounded in most parts by mountains, sending their ramifications into Noricum ; while an Alpine range, called the Alpes Noricae, traverse the whole of the country in the direction from west to east. With the exception of the north and soatb, Noricum has scarcely any plains, but numerous valleys and rivers, the latter of which are all tributaties of the Danube. The climate was on the whole rough and eold, and the fertility of the soil was not very great; but in the plains, at a distance from the Alps, the character of the country was different and its fertility greater. (Isid. Orig. ziv. 4.) It is probable that the Romans, by draining marshes and rooting out forests, did much to increase the productiveness of the country. (Comp. Clandian, Bell. Get. 365.) But the great wealth of Noricum consisted in its metals, as gold and iron. (Strab. iv. pp. 208, 214; Ov. Met. xiv, 711, \&c.; Plin. xxxiv, 41 : Sidon. Apoll. v. 51.) The Alpes Noricae still contain numerons traces of the mining activity di-played by the Fomans in those parts. Norican iron and steel were celebrated in ancient times as they still are. (Clem. Alex. Strom. i. p. 307; Horat. Carm. i. 16. 9, Epod. xrii. 71; Martial, iv. 55. 12; Rutil. Itin. i. $351, \& \mathrm{c}$.) The produce of the Norican iron mines seems to have been sufficient to supply the material for the manufactories of arms in Pannonia, Mloesia, and Northern Italy, which owed their origin to the vicinity of the mines of Noricum. There are also indications to show that the Romans were not unacquainted with the salt in which the country abounds; and the plant called Saliunea, which grows abundantly in the Alpes Noricae, was well known to the Romans, and used by them as a perfume. (Plia. xxi. 20.)

The inhabitants of Noricum, called by the general name Norici (Nupopol, Plin. iii. 23; Polyb, xxxiv. 10; Strab. iv. pp. 206. 208), were a Celtic race (Strab. vii. pp. 293. 296), whose ancient name was Taurisci (Piin. iii. 24.) The Celtic character of the people is sufficiently attested also by the names of several Norican tribes and towns. About the year z. c. 58 , the Boii, a kindred race, emigrated from Boiohemum and settled in the northern part of Noricum (Caes. B. G. i. 5). Strabo (v. p. 213) describes these Boii as hating come from the north of Italy. They had resisted the Cimbri and Tentoncs, but were afterwards completely annihilated by the Getae, and tbeir conntry became a de-ert. Ptolemy does not mention either the Norici or the Boii, but enumerates several smaller tribes, such as the Seraces (£eovakes) in the west, the Alauni or Halauni ('Aravyol) in the south, and the Ambisontii ('A $\mu \mathrm{B}$ เбобтtot), the inhabitants of the banks of the 1sonta. In the east the same authority mentions the Norici (Nwptкoi) together with two other small tribes, the Ambidravi ('A $\mu$ Siopavol, i. e. dwellers abont the Dravus) and the Ambilici ('A $\mu \mathrm{t} \boldsymbol{\lambda}$ скоо, or dwellers abont the Liens or Lichias, or Lech). It most be observed that, in this enumeration of Ptolemy, the Norici, instead of forming the great body of the population, were only one of the six snaller tribes.
As to the history of Noricum and its inhabitants, we know that at first, and for a long time, they were governed by kings (Caes. B. C. i. 18; Strab. vii. pp. 304, 313); and some writers speak of a regnum Noricum even after the country had been incorporated with the Roman Empire. (Vell. Pat. ii. 39, 109 ; Suet. Tib. I6.) From early times, the Noricans had carried on considerable commerce with Aquileia (Strab. iv. p. 207, vii. p. 314) ; but when the Romans, under the command of Tiberius and Drnsus, made themselves masters of the adjoining countries south of the Danube, especially after the conquest of Rhaetia, Noricum also was subdued; and about 11. C. 13, the country, after desperate struggles of its inhabitants with the Romans, was conquered by Tiberins, Drusus, and P. Silins, in the course of one suramer. (Strab. iv. p. 206; Diou Cass. liv, 20.) The country was then cbanged into a Roman province, probably an imperial one, and was accordingly governed by a procurator. (Tac. Mist. i. 11, Ann. ì. 63.) Partly to keep Noricum in subjection, and partly to protect it against foreign invasions, a strong body of troops (the legio ni. Italica) was stationed at Laureacum, and three fieets were kept on the Danube, viz. the classis Comaginensis, the cl. Arlapensis, and the cl. Laureacensis. Roads were made through the country, several Roman colonies were founded, as at Laureacum and Ovilaba, and fortresses were built. In the time of 1'toleny, the province of Noricum was not yet divided; but in the subseqnent division of the whole empirc into smaller provicees Noricum was cut into two parts, Noricum Ripense (the northern part, along the Danube),and Noricum Mediterraneum (embracing the sonthern and more mountainous part), each of which was governed by a praeses, the whole forming part of the diocese of Illyricam. (Not. Imp. Occid. p. 5, and Orient. p. 5.) The more important rivers of Noricum, the Sivts, Draves, Menus, Ahlape, Ises, Jovavus or Isonta, are described under their respectire beads. Tbe ancient capital of the country was Nonhia; but, besides this, the country under the Roman

Eimpire, contained a great many towns of more or les, importance, as Borontued, Joviacum, Ovitaba, 1.fatha, Laumeacta, Arelitte or Ablabe, Namare, Cetiem, Bebaied, Jevayum, Vibenim. Celema, Agunum. hovelum, and Tenexia.

An excellent work on Noricum in the time of the Rumans is Muchar, Das Rämische Joricunt, in two vols. Graet/a 1825; compare also Zenss, Die Deutschen, p. 240. \&c.
[L. S.]
NOLUSBES. [Nomossts.]
NuROSSI. [Nomessis.]
Nult)ist's (Nopoafor opos, Ptol. ri. 14. §§ 5, 11), a mountain of Scythin intra Imam, near which were the tribes of Nomusbes (Nopoafieis) Nonossi (Nópoafor) and Cachiagae (Kaxd́रat). It must be referred to the S. purtion of the great meridian chain of the $L_{\text {rabl }}$.
[E. B. J.]
NOSALENE (Nooaxjun), a tomn of Armenia Niwor, on the nurthern slope of Nount Amanus, in the district called Laviamesine. (Ptol. y. 7. § 10.)
[L, S.]
NOTL-CORNU (Nótou кépas, Strab. xyi. p. 7it; It al. iv. 7. § 11), or South Horn, was a promontory on the eastern coast of Atrica. I'toleny was the first to name this healland Anomata. [IV, B. D.]

NOTI-CORNU (Nörou képas, Hamo, ap. Geogr. Grotec, Man. p. 13, ed. Miller: Ptol, iv. 7. § 6), a promuntury on the W. canst of Libya. The Gieck version of the vogage of Hanno gives the following statement: - "On the third day after our departure from the Chariot of the Gods ( $\Theta \in \omega \bar{\omega} \nu$ $\dot{\partial} \chi \eta \mu a)$, having sailed by those streans of fire (previously described), we arrived at a bay called the Sonshern Hurn, at the buttom of which lay an island : :ke the former, having a lake, and in this lake arother islaud, full of savage prople, the greater part of whom were women, whose bodies were hairy, and whom our interpreters called Gion rilla. Thuugh we pursued the isen, we conid not scize any of them; but all fled from us, escaping over the precipices, and defenaing themselves with stunes. Three women were, bowever, taken; but they attacked their conductors with their teeth and hands, and could not be prevailed upoa to accompany us. Having killed them, we flayed them, and bronght their skins with us to Carthage. We did not s.iil further on, our provisions failing us." A simular story is told by Euduzus of Cyzicus, as quated by Mela (iii. $9 ;$ comp. Plin. v. 1.) These fires do nut prove volcanic action, as it must be recollicted that the common castom in those countries -ats, for instance, among the Mandingos, as reported liy Mlangon Park-of setting fire at certain seasons to the formosts and dry grass, might have given rise to the statuments of the Carth:yinian navigator. In our own times, the island of Amsterdam was set dorrn as vilumic from the same mistake. (Datheny, Finkanoes, 1. 440.) The " Chariot of the Gods" hats heen jumutitial with Sagres; the distance of three days' sat agrees sery well with Sherboro, to the S. of Simra Lemu, white Hanno's iskand coincides with that: called Macendey in the charts, the peculiarity of which is, that it has on its $S$. shore, or sea face, a lake of pure fresh water of considerable extent, just withn high-water mark; and i7side of, and close to it, another still larger, salt. (Journ. Geng. Sice vol. ii. P. 89.) The fiuritlae, no doubt, belansed to the family of the authropoid apes; the Mandingus still call the "Otang-Ontan" by the name " Toorilla," which, as Kluge (ap. Muilker, l.c.), the latest editur of Hammo, observes, might
easily assume the form it hears in the Greck text.
[1: B. J.]
NOTIUM (NÓtop áxpoy, Ptol. ii. 2. §5), the SW. cape of Ireland, now Missen Head. (Camdem, p. 1:36.)
[T. H. D.]
NotiUn. [Calyman].
NOTLUM. [CoLomon.]
NOVA AUGUSTA (Noouסavyoúara, or Nooîa A íroviota, P'(bl. ii. 6. § 56), a town of the Arevaci in Hispania Tarraconcnsis, the site of which camot be identified. (Plin. iii. 3. s. 4.) [T. H. D.] NOVAE (Noov̂as, I'tol. iii. 10. § 10 ; called Nobai by Procop. de Acdif. iv. 12. p. 308, and Hiervel. p. 636 ; and Noyensis Civ. by Marcellin. Chron. ad an. 487), a town of Lower Moesia on the Damube, and according to the Itin. Ant. (p. 221) and the Not. Imp. (c. 29), the station of the legio 1. Italica. It is identified cither with Norograd or Gourabeli. At a later period it obtained the name of Eustesium. (Jornand. Gel. 18.) [T. H. D.]

NOVANA, a town of licenum, mentioned orly by Pliny (iii. 13. s. 18), who appears to place it in the neighborrhood of Ascolum and Cupra. It is probably represented by Moute di Nove, about 8 miles N. of Ascoli. (Cliver, Ital. p. 741.) [E.H.B.]

NoVANTAE (Nuovávraz, Ptol. ii. 3. § 7 ). a tribe in the sW. of Britannia Barhara, or Caledonia, occupying Wigtonshire. Their chief towns were Leucopibia and Rebigonium. [T. II. D.] NOVANTARUM PRONONTOLIUM (Noovavт $\hat{\nu}$ ánpov, Ptol. ii. 3. § l), the must N. point of the peninsula of the Novantae in Britannia Barbara, now Corsill Point, in Iligtonshire. (Marcian, p. 59, Huilson.)
[T. H. D.]
NOVANUS, a small river of the Vistini, mentioned only by Pliny (ii. 103. s. 106), who phaces it in the territiry of Pitinum, and nutices it for the peculiarity that it was dry in winter and full of water in summer. This circunstance (evidiently arising fron its being fed by the snows of the highest Apennines) scems to identify it with the strean flowing from a soarce called the Laghetto di Fetrgo. (Tomanelli, vol. iii. p. 281.) [E. II. B.]
NOVA'RIA (Nouzpia, Ptol. : Nozara), a considerable city of Cisalpioe Ganl, situated on the highroad from Mediulanum to Vercellae, at the distance of 33 miles from the former city. ( Itin. Aut. pp, 344, 350.) It was in the territory of the Insubres (Ptol iii. 1. $\$ 33$ ); bot its foundation is ascribed by lliny to a poople whom he calls Vertacomacori, who were of the tribe of the Visontii, a Gaulish race, according to Pliny, and not, as asserted by Cato, a Ligurian inc. (Plin. iii. 17. s. 21.) No mention is foond in listory of Nuvaria previous to the Roman conquest; but it seems to have been in the days of the Empire a considerable municijal town. It is reckoned by Tacitus (IIist. i. 70) among the "firmissima Transpadanae recionis municipia " which declared in favaur of Vitellius, A. D. 69: and was the native place of the rhetorician C. Alhucios Silus, who exercised municipal fanctions there. (Suet. Rhet. 6.) Its municipal rank is confirmed also by inseriptions (Gruter, Inser. p. 393. \&, \&c.); and we learn from Iliny that its territory was fertile in vines (xvii. 23. s. 35). After the fall of the Western Empire Novaria is apain mentioned as a fortitied town of some importaner; and it seems to have retained ita consideration under the Lombard rale. (I'rocop. B. G. ii. 12; 1. Diac. IIist. Lang. vi. 18.) The modern city of Norara is a floursshing place, with about 16,000 inhabitants, but has no ancient remains. [E. H. B.]

NOVAS, AD, a tortress of Upper Moesia, situated on the Danube, and on the road from Viminacium to Nicomedia. (Itin. Ant. p. 218.) It lay abont 48 miles E. of the former of those towns. It is identified with Kolumbatz, where there are still traves of ancient fortifications. [T. H. D.]

NOVAS, AD, a station in lllyricum (Anton. Itin.), which has been identified with Runovich in the Imoschi, where several Latin inscriptions have heen found, principally dedications to Jupiter, from suldiers of the Ist and 13th legions, who were quartered there. (Wilkinson, Dalmatia and Montenegro, vol. ii. p. 149.)
[E. B. J.]
NOVEM CRARIS, in Sonth Gallia, is placed by the Jerusalem Itin. between Lectoce [Lectoce] and Acunom, supposed to be Anconne on the Thote.
[G. L.]
NOVEM PAGI is the name given by Pliny (iii. 5. s. 8) to a "populus" or community of Etruria, the site of which is very uncertain. They are generally placed, but withont any real authority, in the neighbourhond of Forum Clodii. (Dennis's Etruria, vol. i. p. 273.)
[E. H. B.]
NOVE'SIUM, a fortified place on the Gallic side of the Rhine, which is often mentioned by Tacitus (Hist. iv. 26, 33, 35, \&c., v. 22). It is also mentioned in the Antonine Itin. and in the Table. There is no difficulty about the position of Novesinm, whicb is Neuss, between Colonia Agrippina (Cötn) and Gelduba (Gelb or Gellep). [Gelduba.] Novesium fell into ruins, and was repaired hy Julian, A, D. 359. (Amm. Marc. xviii. 2.)
[G. L.]
NOVIMAGUS, in Gallia, is placed in the Table after Mosa (Meuvi). Mosa is placed hy the Antonine Itin, on the road between Andomatunum (Langres) and Tullum (Toul). Novimagos is Neufchateau, on the same side of the river Mosa as Meuvi, but the distance in the Table is not correct.
[G. L.]
NOVIODU'NUM (NoouTaסouvóv). 1. A town of the Bituriges, in Gallia. Caesar, after the capture of Genabum (Orléans), B. c. 52 , crossed the Loire, to relieve the Boii, who were attacked by Vercingetorix, The position of the Boii is not certain [BoII]. On his march Caesar came to Noviodunum of the Bituriges (B. G. vii. 12), which surrendered. But on the approach of the cavalry of Vercingetorix, the townsmen shut their gates, and manned the walls. There was a cavalry fight between the Rumans and Vercingetorix before the town, and Caesar got a victory by the help of the German horse. Upon this the town again surrendered, and Caesar marched on to Avaricum (Bourges).

There is nothing in this narrative which will determine the site of Noviodunnm. D'Anville thinks that Caesar must have passed Avaricum, leaving it on his right; and so he supposes that Nouam, a name something like Noviodunum, may be the place. De Valotis places Noviodunum at Neury-sur-Berenjon, where it is said there are remains ; but this proves nothing.
2. A town of the Aedui on the Loire. The place was afterwards called Nevirnmm, as the name appears in the Antonine Itin, In the Table it is corrupted into Ebrinum. There is no doubt that Nevirnum is Nevers, which has its name from the little river Nï̀vre, which flows into the Loire.

In n. c. 52 Caesar had made Noviodunum, which he describes as in a convenient position on the banks of the Loire, a depôt (B. G. vii. 55). He bad bis hostages there, corn, his military chest, with the money in it allowed him from home fur the war, his
own and his army's baggace, nnd a great number of horses which had been bouglit for him in Spain and Italy. After his failure before Gergovia, the Aedui at Noviodonnm massacred those who were there to look after stores, the negotiatores, and the travellers who were in the place. They divided the money among them and the horses, carried off in boats all the corn that they conld, and burnt the reat or threw it into the river. Thinking they could not hold the town, they burnt it. It was a regular Gallic outbreak, performed in its true national style. This was a great loss to Caesar; and it may seem that he was improdent in leaving such great stores in the power of treacherous allies. But he was in straits during this year, and probably he could not do otherwise than he did.

Dion Cassius (xi. 38) tells the story out of Caesar of the affair of Noriodunum. He states incorrectly what Caesar did on the occasion, and he shows that he neither understood his origiual, nor knew what he was writing about.
3. A town of the Suessiones, mentioned by Caesar (B. G. ii. 12). Caesar (e. . . 57), atter leaviny the Axona ( $A$ isne), entered the territory of the Suessiones, and making one day's long march, reached Noviodunum, which was surrounded by a bigh wall and a broad ditch. The place surreudered to Caesar. It has been conjectared that Noviodunum Suessionum was the place afterwards called Augusta [Augusta Suessionum], but it is by no means certain.
[G. L.]
NOVIODU'NUM (Noovióouvod). 1. A place in Pannonia Superior, on the great road leading from Aemona to Siscia, on the sonthern bank of the Savus. (Ptol. ii. 15. §̧ 4 ; Itin. Ant. p. 259; Geogr. Rar. ir. 19, where it is called Novindum.) Its modern name is Novigrad.
2. A town and fortress in Lnwer Moesia, a little above the point where the Danube divides itvelf into several arms. (Ptol. iii. 10. § 11.) Near this town the emperor Valens constructed a bridge over the Danube for his expedition against the Greuthungi. (Amm. Marc. xxvii. 1.) Some writers have suppused, without any good reason, that Noviodunum is the point at which Darins ordered a bridge to be built when he set out on his expedition against the Scythians. The town, as its name indicates, was of Celtic origin. According to the Antonine Itincrary (p. 226) Noviodndum was the station of the legio II. Herculea, while according to the "Notitia Imperii" it bad the legio 1. Jovia for its garrison. During the later period of the Western Empire, the furtifications of the place had been destroyed, but they were restored by Justinian (Procop. de Aed. iv. 11 ; comp. Hierocl. p. 637 ; and Constaut. Porph. de Them. ii. 1, where the place is called Nabióouvos and Nabióסouvoy). The Civitas Nova in Jornandes (Get. 5) is probably the same as Noviodumm; and it is generally believed that its site is occupied by the molern Isaczi.
[L. S.]
NOVIOMLAGUS (Notó $\mu$ a 0 ). 1. A town in Gallia, which afterwards bad the name Lexovii [Lexovin], which was that of a people of Celtica. In the Greek text of Ptolemy (ii. 8. § 2), as it is at present printed, the werd Limen ( $\lambda, \mu \hat{\eta} \nu$ ) is put after tbe name Noeomagus. But this is not true, for Noviomagns is Lisieux, which is not on the sea, tbough the territory of the Lexorii extended to the sea.
2. Afterwards Nemetes, in Gallia, the capital of the Nemetae or Nemetcs [Nemetes.] The name

G G
is Nocomagus in Ptolemy (ii. 9. § 17). In Ainmianus Jlarcellinus (xv. 11, xvi. 2) and the Notitia Inp. it occurs under the name of the people. Nemetes or Nemetae. It is now Speier, near the small stream ealled Speierbach, which flows into the Phine. In some of the late Notitine we read " civitas Nemetnm, id est, Spira." (D'Anville, Notice, fc.)
3. A town of the Batavi, is the Dutch town of Nymegen, on the Valalis (Haat). It is marked in the Tahle as a chief town. D'Anville observes that the station Ad Duodecimuth [Deodecimem, An] is placed by the Table on a Ronan road, and next to Noviomagus ; and that this shows that Noviomagns had a territory, for capital places nsed to reekon the distances from their city to the limits of their territory.
4. A town of the Bitariges Vivisci. (Ptol. ii. 7. §8.) [Bitcriges Vimisci.]
5. A town of the Remi, is placed by the Table on a road which, leadine from Durocortorum (Reims) to a pasition named Mosa, must cross the Mars at Mouson [Mososuguts.] Noviomagns is xii. from Durocortorum, and it is supposed by D'Anville to be Aeuville.
6. A torn of the Treviri, is placed in the Antonine Itin. xiii. from Trier, on the Mosel. In the Table it is riii., but as viii. is far from the trath, D'Anville supposes that the $v$. in the Table should be x. The river bends a good deal below Trier, and in one of the elbows which it forms is Neumagen, the representative of Noviomagus. It is mentioned in Ausonius's prem (Mosella, v. II):-

## " Novimagum divi castra inelita Constantini."

It is said that many Reman remains have been found at Neamagen.
7. A town of the Veromanduri. In the Antonine Itin. thi- place is fised at 27 M. P. from Soissons, and 34 MP . from A miens. But their distances, as 1)'Antille says, are not exact, for Noriodunum is Soymn, which is farther from Amiens and nearer to Noussons than the Itin. fises it. The alteration of tho name Noviomagus to Noyon is made clearer when we know that in a middle age document the n:tne is Noviomum, from which to Noyon the change is easy.
[G. L.]
NOVIOMAGUS (Notóua才os, Ptol. ii. 3. § 28 ), capital of the Hequi in Britannia l'rima, marked in the 1tin. Ant. (p. 472) as the first station on the roal from London to Durovernum, and as 10 miles distant from the furmer tinm. It bas been variously phaced at Woodbote in Surrey, and Holwood Hill in Kiut. Cainden, who mutupts the former site in bis desaription of Surrey (p. 192), seems in his descriptron of Kint (p. 219) to prefer the latter ; where (it) the little river Ravensboum, there still remain traces of ramparts and ditches of a rast extent. This site would also agree better with the distances in the Itinerary.
[T. H. D.]
Novionegiom, in Gallia, is placed by the Antonint l:it, on a roal from Burdigala (Bordeaux) to Dediulaum Santonum (Saintes); and hetween Tammun (Talmen or Tallemont) and Meliolanum. D'Anville suppmes Noviorezun to be Royan on the north side of the Giroule ; but this place is quite wht of the direct rowl to Sctintes, aa D'Anville admits. He has to correct the distance also in the Itin. beiween Tamnum and Noviorwum to make it acree with tho distance between Talmon and Royan.
[G. L.]
NOVICM (Noốiov, Ptol. ii 6 \& 22) a town
of the Artabri in Hispania Tarraennensis, identified by some with Porto Mouro, by others with Nuya.
[T. H. D.]
NOV1US (Nooútos, Ptol. ii. 3. § 2), a river on the W. cuast of Britannia Barbara, or Caledonia, flowing into the estuary Ituna (or Solway Firth), now the Nith.
[I. H. D.]
NOYUS COMUM. [Cosum.]
NUAESIUM (Novaictov), a town of Germany, mentioned only by Ptolemy (ii. 11. § 29). It was probably situated in the country of the Chatti, in the neighbourhood of Fritzlar, though others identify its site with that of castle Nienhus in Westphalia, near Neheim. (Wilbelm, Germanien. p. 188.) [L.S.]

NUBA LACUS. [Nigerk.]
NUBAE (Noūtat, Strab. xxvii. pp. 786, 819 ; Ptol. iv. 7. § $30 ;$ Steph. B. s. $v$; ; also Noubaivt and Noutáठes; Nubei, Plin. vi. 30. s. 34), were a negro race, situated S . of Meroe on the western side of the Nile, and when they first appear in history were composed of independent clans governed by their several chieftains. From the Nubae is derived the modern appellation of Nubia, a region which properly does not belong to adcient geography; yet the ancient Nubae differed in manr respects, both in the extent of their country and their national eharacter, from the modern Nnbians.

Their name is Aegyptian, and eame from the Nile-valley to Europe. From remote periods Acgypt and Aethiopia imported from the regions $S$. of Serve ivory, ebony, and gold; and gold, in the language of Aegypt, was Nouh; and thus the goldproducing districts S. of Sennaar (Meroe), and in Kordofon, were designated by the merehants trading with them as the land of Noub. Even in the present day the Copts who live on the lewer Nile call the inbabitants of the country above Assouan (Syene) Nubah,-a name indeed disowned by thase to whom it is given, and of which the origin and import are unknown to those who give it. Kordofan, separated from Aegypt by a desert which can be easily erossed, and containing no obstructing population of settled and warlike tuibes, lay almost within view of Aethiopia and the eountry N. of it; and the Nubae, though of a different race, were familiarly known by all who drask of the waters of the Lower Nile. The occupations of the Nubse bronglit them into immediate contact with the mercantile classes of their more civilised neighbours. They were the water-carriers and earavan-guides. They were employed also in the trade of Libya interior, snd, until the Arsbian eonquest of Eastera Africa, were generally known to the ancients as a nomade people, who roaned over the wastes between the S. of Merce and the shores of the Red Sea. Nor, indeed, were they without settled habitations: the country immediately N. of Kordofan is not entirely barren.but lies within the limit of the periodical rains, and the lhamlets of the Nubae were scattered over the meadow tracts that divide the upper bramehes of the Nile. The independence of the tribes was probably owing to their dispersed habitations. In the third century A. D. they seem to have become more compact and civilised; for when the Romans, in the reign of Diocletian, A. v. 285305, withlrew from the Nile-valley above Pllilae, they placed in it and in the stations up the river colonics of Nobatae (Nubae, Noubádes) from the western desert. These settleinents may be regarded as the germ of the present Nubia. Supperted hy the Romans who needed them as a barrier against
the Blemmyes, and reiuforced by their kindred from SW, civilised also in some measure by the introduction of Christianity arnong them, these wandering negroes became an agricultural race, maintained themselves against the ruder tribes of the eastern deserts, and in the sixth centary A. D. were firmly established as far S. perbaps as the Second Cataract. (Procop. Bell. Persic. i. c. 15.) In the following century the Nabae were for a time overwhelnued by the Arabs, and their growing civilisation was checked. Their employment as cararan-guides was diminished by the introduction of the camel, and their numbers were thinned by the increased activity of the slare-trade; since the Arabian inraders foond these sturdy and docile negroes a marketable commodity on the opposite shore of the Red Sea. But within a centory and a half the Nubae again appear as the predominant race on the Upper Nile and its tributaries. The entire ralley of the Nile, from Dongola inclusive down to the frontier of Aegypt, is in their hands, and the name Nubia appears for the first time in geography.

The more ancient Nahae were settled in the hills of Kordofan, sW. of Meroe. (Rüppell, Reisen in Nubien, p. 32.) The langoage of the Nubians of the Nile at this day is radically the same with that of nortbern Kordofan; and their numbers were possibly underrated by the Greeks, who were acquainted with such tribes only as wandered northward in quest of service with the caravans from Coptos and Pbilse to the barbours of the Red Sea. The ancient geographers, indeed, mention the Nubae as a scattered race. Pling, Strabo, and Ptolemy each assign to them a different position. Ptolemy (iv. 6. § 16) dissevers them from the Nile, doubtless erroneously, and places them W. of the Abyssinian mountains, near the river Gir and in close contact with the Garamantes. Strabo (xxii. p. 819) speaks of them as a great nation of Lrbia, dwelling in numerous independent cummunities betreen the latitude of Merve and the great bends of the Nile, i. e. in Dongola. Lastly, Pliny (vi. 30. s. 34) sets them 8 days W . of the island of the Semberritae (Sennaar). All these accounts, howerer, may be reconciled by assuming Kordofon to have been the original home of the Nubae, whence they stretched themselves N. and W. accordingly as they foond room for tillage, caravan routes, or weaker tribes of nomades.

The Pharaohs made many settlements in Nubia, and a considerable Aesyptian population was introduced among the native Aethiopian tribes as far S. as the island of Gacaudes (Argo), or even Gebel-el-Birkel. (Lat. $18^{\circ} 25^{\prime} \mathrm{N}$. ) It is not certain whether any of the present races of Nubia can be regarded as descendants of these colonists. Their presence, however, is attested by a series of monuments embracing nearly the whole period of Aegyptian architecture. These monuments represent three eras in architectural bistory. (1) The first comprebends the temples cut in the sides of the mountains ; (2) the second, the temples which are detached from the rocks, but emulate in their massive proportions their original types; (3) the third embraces thase smaller and more graceful edifices, such as are those of Gartaas and Dandour, in which the solid masses of the first style are wholly laid aside. Of these structures, howerer, thongh seated in their land, the Nobae were not the authors ; and they mnst be regarded either as the works of a race cognate with the Aegyptians, who spresd their civi-
lisation northward throngh the Nile-valley, or of colonists from the Thelaid, mho carred upon the walls of Jpsambul. Semneh, and Soleh the titles and victories of Rameses the Great. [W. B. D.]

NUCE'RLA (Noukepia: Eth. Noukepĩos or Nouкрîvos: Nucerinus). 1. Surnamed Alfaterixa (Nocera dei Pagani), a considerable city of Campania, situated 16 uiles SE. from Nola, on the hanks of the river Sarnus, about 9 miles from its mouth. (Strah. r. p. 247; Plin. iii. 5. s. 9; Itin. Ant. p. 109.) The origin of its distinctive appellation is unknown; the analogous cases of Teanum Sidicioum and others would lead us to suppose that the Alfaterni were a tribe or people of which Nuceria was the clief tuwn; but no mention is found of them as such. Pliny, however, notices the Alfaterni among the "populi" of Campania, apart from Nuceria (Plin. iii. 5. s. 9); and we learn from their coins that the inhabitants themselves, who were of Oscan race, uised the designation of Nucerini Alfaterni (" Nufkrinum Alafaternum"), which we find applied to them both by
 калоуді̀m, Dicd. six. 65; Nuceria Alfiterma, Liv. ix. 41: Friedländer, Oskische Münzen, p. 21). The first mention of Nuceria in history occurs in B.c. 315, during the Second Samnite War, when its citizens, who were at this time on friendly terms with the Romans, were induced to abandon their all ance, and make common cause with the Samnites (Diod. xiz. 65). In B.c. 308 they were ponished for their defection by the consul Falius, who invaded their territory, and laid siege to their city, till be compelled them to an unqualifed sobrnission. (Liv, ix. 41.) No subsequent notice of it occurs till the Second Punic War, when, in e.c. 216. Hannibal, having been foiled in his attempt apon Nola, turned his arms against Nuceria, and with moch better success; for though the citizens at first offered a vigorous resistance, they were soon compelled by famine to surrender: the city was given up to plunder and totally destrojed, while the surviriug inbabitarts took refuge in the other cities of Campania. (Liv. xxiii. 15; Appian, Pun. 63.) After Hannibal bad been compelied to abandon lis hold on Campania, the fugitive Nucerians were restored (в.c. 210); but, instead of being again established in their native city, they were, at their own request, settled at Atella, the inhabitants of tbat city being transferred to Calatia. (Liv. xxrii. 3; Appian. Annib. 49.) How Nuceria itself was repeopled we are not informed, but it is certain that it agrain became a fourishing municipal tomn, with a territory extending down to the sea-coast (Pol., iii. 91), and is mentioned by Cicero as in his day one of the important towns of Campania. (Cic. de Leg. Agt. ii. 31.) Its territory was ravaged by C.Papius in the Social War, B.c. 90 (Appian, B. C. i. 42); and if we may trust the statement of Florus, the city itself was taken and plundered in the same war. (Flor. iii. 18. §11.) It agnin suffered a similar calamity in B.c. 73, at the hands of Spartacus (Id. iii. 20. § 5) ; and, according to Appian, it was one of the towns which the Triamvirs assigned to their veterans for their ocenpation (Appian, B. C. iv. 3): but from the Liber Coloniarum it would appear that the actual colony was not settled there until after the establishment of the Ennpire udder Augustus. (Lib. Colon. p. 235.) It is there termed Noceris Constantia, an epithet found also in the Itinerary. (Itin. Ant. p. 129.) Ptolemy aiso attests its colonial rank (Ptol. iu. 1. §69) ; and we learn from Tacitus

angles to its former course, runs to the W., and after passing through the great fresh-water lake of Debaid, enters the sea at Cape Nun. The mame of this cape, 50 ceiebrated in the Portuguese discoveries of the 15 th century, appears to have a much older origin than has been supposed, and goes back to the time of I'tulemy. Edrisi speaks of a town, $N_{\nu l} l$ or Wadi Nun, somewhat more to the S., and three days' journcy in the interior: Leo Africanus calls it Belad de Non. (Humboldt, Aspects of Nature, vol, i. pp. I18-120, trans.)
[E. B. J.]
NUMLANA (Nov́uava: Eth. Numanas: U'mana), a town of Piceaum, situated on the seat-coast of that province, 8 miles S . of Ancona, at the sonthern extremity of the mountain promontory called Mons Cumerus. (Plin. iii. 13. s. 18; Ptol. iii. 1. § 21 ; Mel. ii. 4. § 6 ; Itin. Ant. p. 312.) Its foundation is ascribed by Pliny to the Siculi; but it is dunbtful whether this is not a mistake; and it seems probablo that Numana as well as Ancona was colonised by Sicilian Greeks, as late as the time of Dionysius of Syracuse. No mention of it is fonnd in history; but Silins Italicus ennmerates it among the towns of Picenum in the Second Punic War ; and we learn from inscriptions that it was a municinal town, and apparently one of some consideration, as its name is associated with the importaot cities of Aesis and Auximum. (Sil. Ital. viii. 431; Gruter, Inscr. p. 446. 1. 2 ; Orell. Inscr. 3899, 3900.) The Itineraries place it 8 miles from Ancona and 10 from Potentia. (Itin. Ant. p. 312; Tab. Peut.) It was in early ages an episcopal see, but this was afterwards united with that of Ancona. The ancient city was destroyed by the Lombards in the eighth century; and the modern Cmana is a poor place.
[E. H. B.]
NUMANTIA (Nou $a$ a: ria, Ptol. ii. 6. § 56 ; Nopavtia, Steph. B. s. v.), the capital of the Arevaci in Hispania Tarraconensis, and the most famous city in all Celtiberia, according to Strabo (iii. p. 162) and Mela (ii. 6). Pliny however (iii. 3. 8. 4), places it in the territory of the Pelendones, which also agrees with the Itin. Ant. (p. 442). It is represented as situated on an eminence of moderate height, hat great steepress, and approachable only on one side, which was defended by ditches and intrenchments. (Flor. ii. 18; Ores. v. 7 ; Appian, B. Hisp. 76, 91.) The Durius flowed near it, and also another small river, whose name is not mentioned. (Appian, B. Hisp. 76 ; Dion Cass. Fr. 82, ed. Fabr, i. p. 35.) It was on the road from Asturica to Caesaraugusta (Itin. Ant. l. c.), and had a circumference of 24 stadia (Appian, B. Hisp. 90; Oros. l. c.) ; but was net surrounded with walls. (Florus, l, c.) Its memorable siege and destruction by Scipio Africanns, B. c. 134, are related by Appian (48-98), Eutropius (iv. 17), Cicero (de Off. i. 11), Strabo (l. c.), \&c. The ruins at Puente de Don Guarray probably mark the site of this once famous city. (Aldrete, Ant. Hisp. i. 6; Florez, Esp. S. vii. p. 276; D'Anville, Mém. de $l^{\prime}$ Acad. des Inser. vol. xl. p. 770, cited by Ukert, vol. ii. pt. 1. p. 455.$)$
[T. H. D.]
NUSIE'NIUS (Noopínıov, Stadiasm. 298), a small island with a spring of fresh water, 55 stadia from Paphos; perhaps the same as that deseribed by Pliny ("contra Neampaphum Hierocepia," v. 35). Strabo (xiv. pp. 683, 684) has ae inland town Hieroxepia.
[E. B. J.]
NCMI'CLUS (Noнikios: Rio Turto), a small river of Latium, flowing into the sea between Lavininm
and Ardea. It is mentioned almost cxelusively in reference to the legendary history of Acneas, who, aceording to the poetical tradition, adopted also by the Roman historians, was buried on its hanks, where he was worshipped under the name of Jupiter lodiges, and had a sacred grove and Ileroutn. (Liv. i. 2; Dionys, i. 64 : Vict. Orig. Gent. Rom, 14 : Ovid. Met. xiv. 598-608; Tibull. ii. 5.39-44.) Immediately aljoining the grove of Jupiter Indiges was one of Ama Perenna, orginally a Roman divinity, und probably the tutelary nymph of the river, but who was brought also into connection with Aeneas by the legends of later times, which repre-cnted her as the sister of Dido, queen of Carthage. The fables connected with her are related at full by Ovid (Fust. iii. 545-564), and by Silius Italicus (viii. 28201). Both of these poets speak of the Xumicius as a small stream, with stagnant waters aod reeily banks: but they afford no clue to its situation, befond the general intimation that it was in the Laurentine territory, an appellation which is sometimes used, by the poets especially, with very vague latitude. But Pliny, in enumerating the places along the coast of Latium, mentions the river Numicius between Laurentum and Ardea; and from the 1 arrative of Dionysins it woold seem that he certainly conceived the battle in which Aeneas was slain to have been fought between Lavinium and Ardea, but nearer the furmer city. Hence the Rio Torto, a small river with a sluggish and wioding stream, which forms a considerable marsh near its outlet, may fairly be regarded as the ancient Numicius. It would seem frem Pliny that the Lucus Jovis Indigetis was situated on its right bank. (Plin, iii. 5. s. 9 ; Dionys. i. 64; Nibby, Dintorni, vol, ii. p. 418.)
[E. H. B.]
NUMI'DIA, the central tract of country on the N. coast of Africa, which furms the largest portion of the country now occupied by the French, and called Algeria or Algérie.

## I. Name, Limits, and Inhabitants.

The centinneus system of highlands, which extends along the coast of the Mediterravean, was in the earliest period occupied by a race of people connisting of many tribes, of whom, the Berbers of the Algerive territories, or the Kabyles or Quabuily, as they are called by the inhabitants of the cities, are the representatives. These peoples, speaking a language which was once spoken from the Fortunate Islands in the W. to the Cataracts of the Nile, and whirh still explains many names in ancient African topugrapliy, and embracing tribes of quite different characters, whites as well as blacks (though not negroes), were called by the Romans Numidae, not a proper name, but a common denomination from the Greek furm vo ád́єs. (Strab. ji. p. 131, xvii. pp. 833. 837.) Afterwards Nemuda and Nesudi. (Novpioia and $\dot{\eta}$ Nouadia or Nouasuḉ, Ptol. iv. 3: Pomp. Mcla, i. 6 ; Plin. v. 2, vi. 39) became the name of the nation and the conntry. Sunctines they were called Marresil Numidae (Maupoúaiot Nopádes, Appian, B.C. ii. 44), while the later writers always speak of them under the general name of Machi (Amm. Mare. xxix. 5; Procop. B. V. ii. 4.) The most powerful among these tribes were the Massyli (Mafoúniot, Polyb. iii. 44 ; Strab, ii. p. 131, xvii. p. 829 ; Donys. 187; Máau入eís, Polyb. vii. 19; Massyli, Sil. Jtal. xvi. 170; Massyla gens, Liv, xxiv. 48), whose territories extended from the river Ampsags to Tretum Prom. (Seba Ruis) ; and the Massaesyli (Ma木-

बatのúltor, Polyb. iii. 33; Strab. ii. p. 131, ธvii. ppo $827,829,833$; Dionys. 187; Sull. Jug. 92; Plin. v. 1; Massexyli, Liv, xxviii. 17), ofcupying the country to the W. as far as the river Mnluclas. Nomad life, under all the differences on time and space, prescuts one uniform type, the "armentarius Atir" of Virgil (Georg. ii. 344), and Sallust (Ing. 18), who, as governor of Numidia, had opportunity for olservation, may be recognised in the modern Kabyle. These live in buts made of the branches of trees and coverel with clay, which resemble the "magalia" of the old Numidians, spread in Fittle gronus over the side of the mountains, and store away their grain in boles in the gronnd. Numidia, a nation of horsenen, supplied the Carthacinians with the wild cavalry, who, without saddle and bridle, scoured the country, as if horse and rider were one creature. Mlasinisa, who, till the age of ninety, could spring upon his Larsès back (Appian, Pun, 107), represents the true Numidian; faithless, merciless, unscrupulous, he is a man of barbaric race, acquiring the tastes and the polish of civilisation without any deeper reformation. Agriculture and the arts of life were introduced under Maxinis as, and still more by Micipsa. After the fall of C.rrthage, the Romans presented the Numidian kinse with its library; but Punic influence mnst have bech vary slight. Procopins (B. V. ii. 10), indeed, says, of the inlabitants of both Mauretania and Numidia, that they used the Phoenicion langnage in his time; but it is extremely improbable that they ever used I'unic, nor can it be supposed that Procopius pursessed the infornation requisite for ascertaining the fact. They used a language anoong themstlves, uni telligible to the Greeks and Romans, who inagined it to be Punic, while there can be Jittle doubt that it was the jidion which they spoke before the arrival of the Phoenician colonists, and which continurd to be their vernacular dialect long atter the Carthayinims and humans lad ceased to b. knuwn among then, even by name, Latin would be the lamguage of the cities, and must have been sery generally intellisille, as the Christian teachers never appear to have used or to have thought it necessary to learn any other language.

## II. Physical Geography.

Liecent investigation luas shown that the distincfion butwen what was calleal the "Grater and the Lesser Arlas" must be ahandoned. There is only one Atias, formerly called in tho native language "Invis;" and this natne is to be applied to the foldints, or suctenoiun of crests, which form the division betwern the waters flowing to tha Mediterrumean and those which flow towards the Sahara lowland. The E. prolungation of the snow-covered W, annmits of the Atlas, has a direction or strike from E. to W. Nimerous projections from this chain run out into the sen, and forn abrupt promontories: the first of thene in a direction from $\mathbf{E}$. to W., was Hipre I'mos, ( ${ }^{\circ} 1 \pi \pi o u$ ákpa, Ptol. iv, 3. § 5: C. de Ga;de, or Raisel-INamrah); then Sto.
 Mirdiil): Ristcada; Collois Mages; at Trea f'tom, or the ove at Seba Rhis, the sisces Numimuts (Noupıסiкus кб́ $\lambda \pi$ os, Ptol. iv, $3 . \S 3$ ), into which the rivers Ampaga, Audus, and Sisar dischargeri themselves, with the heallind Igucuta (hactudscheli) and SaldaE (C. Ciurhon, Bougie, Bectachidiche): after prasing Itestethest and $C$. Natifi or Kas Timendfina, the bold shores of the Bay of Alyiers, to whel the ancients gave no name,
sueceed. The chief rivers were the Tusca, the boundary between Numidia and the Roman prom vince, the Rubricate's or Libes, and the Aursaga. The S. bombaries, towards the widely extended low region of the Silhara, are still but little known. From the revearches of MD. Fonrnel, Renon, and Carette, it appears that the Sahara is composed of several detached basins, and that the number and the population of the fertile oases is much greater than bad been imagined. Of larger wild animals, only gazelles, wild askes, and ostriches are to be met with. The lion of the Numidisn desert exists ouly in imagnation, as that animal naturally seeks spots where food and water can be found The camel, the "ship of the desert," Tas unknown to the ancient horsemen of Numidia; its diffusion must be attributed to the period of the Ptolemies, wbo employed it for commercial operations in the valley of the Nile, whence it spread thr ugh Cyrene to the whole of the NW. of Africa, where it was first bronght into military use in the train of annies in the times of the Caesars. The later introduction of this carrier of the desert, so important to the nomadic life of nations, and the patriarehal stage of development, belongs to the Mohammedan epuch of the conquering Arabs. The maritime tract of this country displays nearly the same vegetable forms as the coasts of Audalusia and Valencia. The olive, the orange-tree, the arhorescent ricinus, the Chamaerops homilis, and the date-tree flourish on both sides of the Mediterranean; and when the warmer sun of N. Africa produces different species, they are generally belonging to the same fanilies as the European tribes. The marble of Numidia, "giallo antico," golden yellow, with reddish veins, was the most highly prized at Rome for its colour. (Plin. xxxr. 1, xxxvi. 8.) The pavement of the Cominium at Rome consisted of slabs of this beautiful material. (Niebuhr, Lect. on Anc. Geog. vol. ii. p. 80.)

## IIE. History and Political Geography.

The Romans became acquainted with these tribes in the First Punic War, when they served as the Carthaginian cavalry. After the great victory of Regulus, the Numidians threw off the yoke of Carthage. (Polyb. i. 31 ; Diwd. Fragm. 'Vat, xxiii, 4.) The wild array of their honsemen was the mest foruidable arm of Hamibal, and with the half-caste Mutines at their bead, carried destruction throughout Sicily. In the great struggle of the Second Punic War the Romans made use of these faithless barbarians witb Ereat success. The services of Masinissa prince of the E. Nunidians, were not unrewarded, and, at the end of the war, he obtained the dominions of Syphax, his rival, and prince of the W . tribes, the Massaesyli, and a great part of the Carthaginian territory; so that his kingdom extended from the Mulucha on the W., to the Cyrenaica on the E, completely surroonding the small strip allowed to Cartbage on the evast. (Appian, Pun. 106). When Masinissa died he left liis kingdom to his three sons, Gulussa, Micipsa, and Mastanabal. Gulussa and Mastanabal died; the latter left no legitimate children, but only Jugurtha and Ganda, sons hy a concubine; and thus the vast domizions of Numidis fell into the hands of Micipsa, the Philhellene. He had two sons, Adherbal and Hiempsal, with whom he associated Jugurtha in the throne. The latter, spurning a divided empire, murdered IIiempsal, and compelled Adherbal to tly to Rome, where he appealed to the senate against the usurqation of his cousin. The
senators, many of whom were bribed by Jugurtha, tent commissicners, who divided the kingdom in such a manner that Jugurtha obtained the most warlike and most productive portion of it. New quarrels broke out between the rival princes, when Jugurtha besieged Adherbal in Cirta, and, after compelling bim to surrender, put him to a cruel death. War was declared against Jugurtha by Rome, which, after being carried on with rarying success, was finished by his capture and death in в. с. 106. The kingdom was given to Hiempsal II., who was succeeded by his son Juba I., who in the civil wars allied himself to the Pompeians. On the death of Juba I., B. c. 46, Numidia was made a Roman provioce by Julius Caesar, who put it in the hands of Sallust, the historian. A. D. 39, Caligula changed the government of the province, giving apparently, co-ordinate powers to the proconsul and the legatus. [See the article Afric., Vol. I. p. 70, where the arrangements are fully described.] The "legatus Ang. pr.pr. Numidiae" (Orelli, Inscr. 3672) reided at Cirta, the capital of the old Numidian kings, which, since the time of Angustus, had acquired the "jus coloniae." Besides Cirta, there were many other "coloniae," of which the following names are known:-Sicca: Thasiucadis; Aphrodisiem; Calcua; Tabraca; Tibioa; Tybidromem; Tuburnica; Theveste; Medatra; Ammedera; Sinttu; Rusicade; Hippo Regius; Mlleum; Lambaesa; Thelepte Lares. Bulla Recia was a "biberum oppidom." The number of towns must have been considerable, as, according to the "Notitia," Numidia hed in the fifth century 123 episcopal sees. (Marqnardt, in Bekker's Handbuch der Röm. Alt. pt. iii. p. 229.) During the Roman occupation of the conntry, that peopie, according to their nsual plan, drove sereral roads throngh it. Nomeroas remains of Roman pusts and stations, which were of two kinds, those which secured the roads, and others which guarded the estates at some distance from them, are still remaioing (I.ondon Geog. Journ. vol. viii. p. 53) ; and such was their excellent arrangement that, at first, one legion, "IIIa Ang.," to which afterwards a second was added, " Macriana liberatrix" (Tac. Hist, i. 11), served to keep the African provinces secure from the incursions of the Moorish tribes. The long peace which Africa enjoyed, and the flonrishing corn trade it carried on, hal converted the wild Numidian tribes into peaceful peasants, and had opened a great field for Christisn exertion. In the fourth century, Numidia was the closen seat of the Donatist schism. The ravages of the Circamcellions cootrihuted to that destruction, which was finaily consummated by the Vandal invasion. Justinian sent furth his troops, with a view of putting down the Arians, more than of wiming new provisces to the empire The work was a complete one; the Vandals were exterminated. Along with the temporary rule of Constantinople, the native population of Africa reappeared. The most signal victory of the cross, as it appeared to that generation, prepared the way for the victory of the crescent is century afterwards.
[E. B. J.]
NLMidiA NOVA. [AFRLCA, Vol. I. p. 71, a.]
Nemidicus sinus. [Nemida.]
NUMISTRO (Novpi $\sigma \tau \rho \omega \overline{ }$, Ptol.; Noul $\kappa \tau \rho \omega v$ Plut.: Eth. Numestranus), a town of Lucania, apparently near the frontiers of Apulia, near which a battle was fonght between Hannibal and Marcellus, in R.c. 210, without any decisive result (Liv. xxvii.

2: Plut. Marc. 24). From the parrative of Livy, which is copied by Plutareb, it is clear that Numistro was situated in the northern part of Lneania, as Marcellus marched out of Samnium thither, and Hannibal after the battle drew off his forces, and wittdrew towards Apulia, but was overtaken by Marcellus near Yenusia. Pliny also enumerates the Numestrani (evidently the same peaple) among the monicipal towns of Lucania, and places them in the neighbourbeod of the Volcentani. Hence it is certainly a mistake on the part of Ptolemy that he trausfers Numistro to the interior of Bruttium, mnless there were two towns of the name. which is scarcely probahle. Cluverius, however, fullows Ptolemy, and identifies Numistro with Nicistro in Calabria, but this is certainly erroneous (Plin. iii. 11. s. 15; Ptol. iii. 1. § 74; Claver Ital. p. 1319). The site conjecturally assigned to it by Romanelif, near the modern Muro, about 20 miles NII. from Potenza. is plansible enough, and agrees well with P'liny's statement that it was united for municipal purpones with Volceii (Buccino), which is about 12 miles distant from Muro (Romanelli, vol. i. p. 434). Some ancieot remains and inscriptions have been found on the spot.
[E. H. B.]
Nura. [Baleares, p. 374, a.]
NU'RSIA (Novpaia: Eth. Nursinus: Norcia), a city of the Sabines, situated in the apper part of the valley of the Nar, at the foot of the lifty group of the Apennines, now known as the Monti della Sibilla. The coldness of its climate, resulting from its position in the midst of high mountains, is celebrated by Virgil and Silius Italicus. (Virg. Aen. vii. 716; Sil. Ital. viii. 417.) The first mention of it in history is in the Second Punic War (b. c. 205), when it was one of the cities wheh came formard with volunteers for the armaments of Scipio. (Lir. xxviii. 45.) As on this oceasion the only three cities of the Sabines mentioned by name are Nursia, Reate, and Amiternum, it is probable that Nunsia was, as well as the other two, one of the most considerable places among the Sabines. It was a municipal town under the Roman government (Orell. Inscr. 3966 ; Plin. iii. 12. s. 17; Ptol. iii. 1 § 55), and we learn that its inhabitants were punishen by Octavian for their zealons adherence to the republican party, and the support they afforded to L. Antonius in the Perusian War. (Suet. Aug. 12; Dioh Cass. xlviii. 13.) It was the birthplace of Vespasia Polla, the mother of the emperor Vespasian; and the monuments of her family existed in the time of Snetonius at a place called Yespasiae, 6 miles from Nursia on the road to Spoletium. (Suet. l'esp. 1.) The "ager Nursinus" is mentioned more than once in the Liber Coloniarum (pp. 227, 257), but it does not appear that it ever received a regular colony. We learn from Columella and Pliny that it was celebrated for its turnips, which are also alluded to by Martial (Colom. x. 421; Plin. xviii. 13. s. 34; Martial, xiii. 20.) From its secluded position Nursia is not mentioned in the Itiperaries, but there is no donbt that it contimed to exist throughout the period of the Roman Empire. It became an episcopal see at an early period, and is celebrated in ecclesiastical history as the birthplace of St. Benedict, the foonder of the first great monastic order.

It is said that remains of the ancient walls still exist at Norcia, in the same massive polygonal style as those near Reate and Amiternum (Petit-Fadel, Anu. d. Inst Arch. 1829, p. 51), but they bave never been described in detail.
[E. II. B.]

NYCBII. [Syrtica.]
NyGbeNl. [Syrtica.]
NYMPHAEA, NYMPHAETM. I. (Nvuфala, Scylax. p. 29; Nó $\neq$ quev, Strab. vii. p. 309 ; Appian, B. Mithr. 108; 1'tol. iii. 6. §3: Anon. Peripl. p. 5; Plin. iv. 26; Craterus, ap. Harpocrat. s. v.; Nymphae. Geog. Rav. r. 2), a Milesian colony of the Tauric Chersenese, with is good harbour. (Strah. l. c.) The rains of this town are to be found on the S. puint of the gulf now called the tuke of TehonerSache. (Dubois de Montperreux, Voyage Autour du Caucase, vol. v. pp. 246-251; Marigny Taitboot. Portalan de la Mer Voire, p. 74.) Pallas (Reise in d. Sudl. Statthalt. Russland's, vol. ii. p. 341) fixes it between the Poulufka Buttery and Kamyschburmu,
2. The harbonr of Lissus in Illyrionm, and $3 \mathrm{M} . \mathrm{P}$. from that town (Cuevar, B. C: iii. 26), on a promontory of the same name. (Plin. iii. 26.) [E.B.J.]

NYIIPHAEA (Nャ $\mu$ рaia), a snuall island off the coast of lonia, is mentioned only by Pliny (v. 37). Respecting Xymplasea as a Dame of Cos, sen Cos.
[L. S.]
NYMPHAEUM (Nóuфurov. Strab. vii. p. 330 : Ptul. in. 13. § 11), the promontory to the S. of the pemmsula if Acte, from whence Mt. Athos rises abruptly to the very summit. It is now called Küra Häghio Gliinrghi. (Lenke. North. Greece, vol. iii. pp. 114, 149.)
[E. B. J.]
NYMIPHAEUH (Nvpфaiov.) 1. A place on the eastern cnast of Bithynia, at a distance of 30 stadia west of the mouth of the Oxines (Arrian, Peripl. Pont. Eux. p. 14), or, according to the Periplas of the Anonymus (p. 4), 45 stadia from Tynlaridne.
2. A place in Cilicia, between Celenderis and Soli, is mentioned only by Pliny (v. 22).
[L. S.]
NYMPHAEU's (Amm. Marc. xvii. 9. § 3 ; Nípфoos. Irucop. B. P. i. 8. 21 ; Snidas, s. v.), an nflluent of the Tiseris, 240 stadia from Amida, and the boundary between the foman and the Persian empires. Ritter (Erdkunde, vol. x. p. 98) identifies it with the Zibeneh Si.. (London Geog. Journ. vol. x. p. 363; cump. St. Martin, Mém. sur l. Irmenie, vol. i. p. 166; Le Bean, Bas Empire, vol. v. p. 248.)
[E. B. J.]
NYMPHAFUS (Viufa) a small river of Latium, mentioned unly by L'liny (iii. 5. s. 9), who describes it as flowing into the seat between Astora and Circeii. There can br ne doubt that the stream meant is the une still called the Ninfa, though this does not now flow into the sea at all, but within a few miles of its suarce (which is at the foot of the Volscian monntains, immediatoly below the site of Norba, forming a poul or small lake of beantifully clear water) stagnates, and lowes itself in the Pontine Marshes. A town called Nunfu arose, in the middle ares, close to its source, but this is now in ruins. We have no accunt of any :uncient town on the site. [E.H.B.]

NYMBILAS. [Mes:atamons, p. 309, b.]
NYMPHA'SIA. [METHMmata.]
NiSA or MYSSA (Nuita or Novaa), is shid to have been the names of the place in which the grod Dinnysus was born, whence it was transferred to a great many towns in all parts of the world which were distinguished for the cultivation of the vine.
I. In Asin. 1. A town in Caria, on the southern slope of monnt Mesagio, on the north of the Maesender, and about midway between Thalles and Antioch. The meuntain torrent Enden, a tribatary of the Maeander, flowed through the middle of the town by a decp
ravine spanned by a bridge, connecting the two parts of the town. (Sitrab. xiv. p. 650; Hom. Hymn. iv. 17; Plin. v. 29 ; Ptol. v. 2. § 18; Hicrocl. p. 659; Steph. Byz. s.v.) Tradition assigned the foundation of the place to three brothers, Athymbrus, Athymlradus, and Hydrelus, who emigrated from Sparta, and founded three towns on thie north of the Maeander; but in the conrse of time Nysa absorbed them all; the Nysaeans, however, recognise more especially Athymbras as their founder. (Steph. B. s. v. *Avou5pa; Strab. l. c.) The town derived its name of Nysa from Nysa, one of the wives of Antiochus, the son of Selencus (Steph. B. s. v. 'Avrió X (a), having previonsly been called Athymbra (Steph. B. s. v. "A $\theta o \mu 6 \rho \alpha$ ) and Pythopolis (Steph. B. s. v. Пvө́o$\pi 0 \lambda(s)$.

Nysa appears to bave been distinguished for its cultivation of literature, for Strabo mentions several eminent philosophers and rhetoricians; and the geographer himself, when a youth, attended the lectures of Aristodemns, a disciple of Panaetios; another Aristodemns of Nysa, a consin of the former, had been the instructor of Pompey. (Strab. l. c.; Cic. ad Fan. xiii. 64.) Hierocles classes Nysa among the sees of Asia, and its bishops are mentioned in the Councils of Epbesus and Constantimople. The coins of Nysa are very numerons, and exhibit a series of Roman emperors from Augustns to Gallienns. The site of Nysa bas been recognised by Chandler and other travellers at Sultan-hissar, above the plain of the Maeander, on a spot much resembling that described by Strabo; tho also mentions a theatre, a forom, a gymnasinm for youtbs, and another for men. Remains of a theatre, with many rows of seats almast entire, as well as of an amphitheatre, gymnasium, $\$ c$, were seen by Cbandler. (Leake, Asia Minor, p. 248; Fellows, Discover. Pp. 22, foll. ; Hamilten, Researches, i. p. 534.) The country round Nysa is described as bearing evidence of the existence of subterraneons fires, either by exhalations and vapours, or by its hot miseral springs.

## COLY OF XYSA IN CARLA.

2. A place in the district of Milyas in Pisidia, situated on the river Xanthus, on the sonth of Podalaes. (Ptul. v. 3. \& 7 ; Hierocl. p. 684, where the name is misspelt Mi $\sigma a \mathrm{a}$.)
3. A town in Cappulocia, in the district called Muriane, nut far from the river Halys, on the road from Ancyra to Cacsarcia. (I'tol. v. 7.§8; It. Ant. pp. 505,506 ; Hierocl. p. 699 ; Nicephor. xi. 44.) Its site is now occupied by a village bearing the name of Nirse or Nissa (Hanilton, Researches, ii. p. 265.$)$
[L. S.]
N1^A (Nv̂ $\sigma a)$. 11. In Europe. 1. A village in Bocotia un Mt. Ilelicon. (Strab. ix. p. 405 ; Steph. B. s. v. Nôras.)
4. A town in Thrace, in the district between the rivers Strymon and Nistus, which subsequently formed part of Mlacedunia. It is called Nyssos by Pliny. (Steph, B. s. v:; 1'lin. is. 10. s. 17.)
5. In Euboea, where the vine was said to put forth leares and bear fruit the same day. (Steph. B. l. c.)
6. In the island of Naxos. (Steph. B. s.v.)

NYSsOs. [Nrs., in Europe, No. 2.]

## 0.

OAENEUSI, a town of the Penestae, situated on a road leading into the country of the Labeates, which overlooked a narrow pass, formed by a mountain and the river Artatus. It was taken by Perseus in the campaign of e. c. 169 . (Liv. xliii. 19.)
[E. B. J.]
OAEONES (Mela, iii. 6. § 8; Solin. 19. § 6) or conae (Plin. iv. 13. s. 27), islands in the Baltic off the coast of Sarnatia, the inhabitants of which were said to live on the eggs of birds and wild oats.
OANUS ("Ravos, Pind. Ol. v. 25; Frascolari), a small river on the S. canst of Sicily, flowing beneath the wails of Camarina. [Camariva.] [E. H.B.]
oaracta. [Ogyris.]
oarts. [Rial]
OASES ('Oáreis or Aùácets, Strab. ï. p. 130, xvii. pp. 790 - $\bar{i} 91$ : A B. s.v.: Eth. A $\dot{\alpha} \alpha \sigma i t \eta s$ or Aliadìts), was the general appellation among ancient writers given to spots of habitable and cultivable land lying in the midst of sandy deserts; but it was more especially applied to those verdant and well-watered tracts of the Libyan deert which connect like stepping-stones Eastern with Western and Southern Africa, The word Oasis is derived from the Coptic Ouah (mansio), a restingplace. (Peyron, Lexie. Ling. Copt. s. v.) Kant, irdeed (Phys. Geog. vol. ii. pt. 1. p. 349), traces it, with less probability, to the Arabic Howa, a habitation, and $S i$ or $Z i$ a wilderness (comp, the Hebrew Ziph). Their physical circumstances, rather than their form, sire, or position, constitute an Oasis; and the term is applied indifferently to kingdoms like Augila and Plazania (Fezzun) and to petty slips of pasture, snch as the Oasis of El-Gerah. which is only four or five miles in circumference. The ancient writers described them as verdant islands, rising abore the ocean of sand, and by their elevation escaping from being buried by it with the rest of the cultivable suil. Herodotus, for example (iv. 182), calls thera кол $\omega$ voí.
But, so far from rising above the level of the desert, the Oases are actaally depressions of its surface, dints and hollows ia the general bed of limestone which forms its basis. The bottom of the Oases is of sandstone, on which rests a stratum of clay or marble, and these retain the water, which either percolates to them through the surrounding sand, or desceads from the edges of the limestone rim that encircles these isolated spots, like a battlement. Within these moist hollows springs a vegetation presenting the most striking contrast to the general barrenness of the encircling wilderness. Timber, of varioas kinds and considerable girth, wheat, millet, date and fruit trees, flourish in the Oases, and combined with their verdant pastures to gain fur them the appellation of "the lslands of the Blest." (Herod. iii. 26.) Both commercially and politically, the Oases were of the greatest importance to Aethiopia and Aegypt, which they connected with the goid and irory regions of the south, and with the active traffic of Carthage in the west. Yet, although these kingdonns lost no opportanity of
pushing their emporia or colonies eastward towards the Red Sea and the Regio Aromatum, there is no positive monamental proof of their baving ocenpied the Oases, at least while under their native rulers. Perhaps the difficulty of crossing the desert before the camel was introduced into Aegypt - and the camel never appears on the Pharanonic monu-ments-may have prevented them from appropriating these outposts. The Persians, after their conquest of Aegypt iu E. c. 523 , were the first permanent occupants of the Oases. Camblyses, indeed, failed in his attempt to reach Ammonium (Siwah); but his successor Dareius Hystaspis establisbed his authority securely in many of them. At the time when Herodotns visited Aegrpt, the Oases were already military or commercial stations, permeating Libya from the Red Sea to the Atlautic Ocean. Under the Ptolemies and the Caesars, they were garrisoned by the Greeks and Pomans, and were the seats of a numerous fixed population, as well as the halt-ing-places of the caravans; under the persecutions of the Pagan emperors, they afforded shelter to fugitives from the magistrate; and when the church became supreme, they shielded heretics from their orthodox opponents.
The natural productions of these desert-islands will be enumerated under their particular names. One article of commerce, indeed, was common to them. Their alum was imported by the Aecyptians, as essential to many of their manufactures. Amasi, arcording to Herodotus (ii. 180), contributed 1000 talents of alum towards the rebuilding of the temple at Delphi ; and the alnm of El-Khargeh (Oasis Magna) still attracts and remards modern specolators. Herodotus describes the Oases as a chain extending from E. to W. through the Libyan Desert. He indeed comprehended under tois term all the habitable spots of the Sühara, and says that they were in general ten days' journey apart from one another (iv. 181). But it is more usual to consider the following only as Oases proper. They are, with reference to Aegypt, bive in number; although, indeed, Strabo (xviii. p. 1168) speaks of only three, the Great, the Lesser, and that of Ammon.

1. Amsonius (El-Sivoll), is the moost northerly and the most remote from the Nile. There seem to hare been two roads to it from Lower Aegypt; for when Alesander the Great visited the oracle of Ammon, he followed the coast as far as Paraetonium in Libya, and then proceeded inland almost in a direct northerly line. (Arrias. Anab. iii. 4 ; Quint. Curt. iv. 33.) He appears, however, to have returned to the neighbourhood of Memphis by the more usual ronte, viz. a WSW. road, which passes the Natron Lakes [Nitriae] and runs to Teronieh, on the Rosetta branch of the Nile. (Minutoli, Journey to the Temple of Jupiter A mmon.) There is some difficolty in understanding Herodotus's account of the distance between Thebes and Ammonium. He says that they are ten days' journey apart. (Rennell, Geogr. of Herod. val, i. p. 577.) But the actual distance between them is 400 geographical miles; and as the day's juorney of a carazan never exceeds twenty, and is seldom more than sixteen of these miles, double thic time allowed by him not ten, but twenty days-is required for performing it. Either, therefore, a station within ten days' journey of Upper Aegypt has been dropt out of the text of Herodotus, or he must intend another Oasis, or El-Siwah is not the ancient Amnonium. If we bear in mind, however, that the Greater Oasis ( El -

Khargeli) and the Lesser (El-Dakkel) were b, th accounted nomes of Apgypt, we may fairly infer that the ten days' journey to Ammoniom is comphted from one ef them, i. e. from a point considered as proper Aegyptian ground. Now, not only does the roud from Thebes to Ammonimin he through or beside the Greater and Lesser Oasis, but their respective distances from the extremities of the journey will give nearly the numher of days reqnired. For I K-Khargeh, the Great Oasis, is seren days" joneney from Thebes; and thirty hours, or $(15 \times 2)$ nearly two days more, are required for reaching the Leaser Oasis; from whence to Ammonium is a journey of eight days, which, allowing two days for passing through the Owsers themselves, give just the twenty days requisite for pertirming the distance. There were two roads which led from Thebes to Oasis Magna. The shorter one bearing N. by Abydus, the other bearing s. by Latopolis. For the former forty-two hours, for the latter fifty-two, were required, to reach the Great Oasis. (Cailliaud, Voyage a t Oasis de Thibes, 1813.) The uasis of Ammonium is about six miles in length, and three in breadth. The soil is strongly impregnated with salt of a fine quality, which was anciently in great request, both for teli, ions purpnses and the tables of the Persian kings. (Arrian, Anab. iii. 41.) But notwithstanding its saline ingredients, the ground is abundantly irricated by water-springs, one of which, "the Fountain of the Suo," attracted the ronder of Herodotus, and ancient travellers generally (iv. 181; comp. Wilkinson, Mod. Egypt and Thebes, vol. ii. p. 358). It rises in a grove of dates, $S$. of the Temple of Ammon, and was probably one of those tepid springs, found in other Oases also, the high temperature of which is not obsersed during the heat of the day, but which, by night, are perceptibly wamer than the surrounding atmospbere. $\Lambda$ swall brook running from this fountain flows soon into anotber spring, also arising in the date-grove; and their onited waters run towards the temple, and, probably becanse their ancient ontlets are blocked up, end in a swamp. The ricinity of these brows ennfirms the statement of Herodotus, that in Ammonium are tuany wells of fresb water (iv. 181).

The early and high cultivation of this Oasis is still attested by the abundance of its dates, pomegranates, and other fruits. The dates are obtained in rast quantities, and are of very fine flarour. In favourable seasons the whole area of Ammonium is covered with this fruit, and the annual prodace amnunts to from 5000 to 9000 camel-loails of 309 piunds each. Osen and sheep are bred in censiderable numbers; but the camel dees not thrive in Anmonimin, probably becanse of the dampness of the soil. The inhalitants accordingly do not export their own harrests, but awtait the caravans whicb convey thern to Aegypt and the Mediterranean ports. (Minutoli, pp. 89, 90, 91, 174, 175, \&c.) The present population of this Oaxis is about 8000 ; but anciently, when it was at onee the seat of an eracle, the centre of attraction to innumerable pilgrims, and one of the ;rincipal stations of the Libyan landtrade, the permament as well as the casual population most have been much more considerable. The rains of the Temple of Ammon are fuand at $\$ 'mmebeda, sometims: called Einbé,-the C'marangeir of 1lurnemann (Tyarele, vol. i. p. 106), atont 2 miles from the pritupipal vilame and castle. Its style and arrangement bevpak its Aeoypti in orizin and its appropriation to the Worslip of Anfur, the rambeaded god of

Thebes; yet the buildings (the oracle itself was much older) are probably not earlier tban the Persian era of Aegryt. The remains of the Ammoninm consist of two parts - a pronasos and a sekos, or sanctuary proper. The walls are entirely cemposed of hewn stones, obtained from quarries abont 2 miles off. The surface of the temple, both within and witbont, was covered with bieroglypbics emblematic of the story and transtigurations of Zeus-Ammon. The plain surface of the walls was bigbly coloured; and thongb many of the scalptures are moch defieed, the blne and green colours are still bright. Tbo temple itself was of moderate size, and the curtilage or enclosure of the whole is not more than 70 paces in length and 66 in breadth.

The population of this Oasis was, in the time of Herodotus (ii. 32), partly Aegyptian and Jartly Aethiopian,-both nations agreeiog in their devotion to Zeus-Anmon. The Greeks, indeed, who must bave become aequainted with Ammonium soon after their colonisation of Cyrene in the seventh century B. c. put in their claims to a share, at least, in its foundation. According to one tradition, Danaus led a colony tbither (Diodor. svii. 50); according to another, its oracle was established conternporaneonsly with that at Dodona, the most ancient oracle of Greece. (Herod. ii. 54.) The name of the king, Etearchus, mentioned by Herodotus in his story of the Nasamones, if the form be correctly given, has also a Greck aspect. (Herod. ii. 32.) There can be no donht, however, that Ammonium was jeopled from the East, and net by colonista frem Europe and the North.

At the present day El-Sivah contains fonr or five tewns, of which the principal is Kebir ; and about 2 miles from Kebir is an ancient fortress named Shargieh, old enough to have been occupied by a Roman garrison. (Minntoli, pp. 165-167). It is governed by its own chiefs or shieks, who pay a small anmual tribute to the viceroy of Aesypt. This Oasis, tbough known to Arabian writers of the thirteenth ceatury A. D., was first reopened to Europeans by the travels of Browne and Homemann in the last century.
2. I'roceeding in a SW, direction, and approaching nearer to Aegypt, we ceme to the Oasis now called El-Farafieh, but of which the ancient name is not recorded. It lay nearly N. of Oasis Minor, at a distance of abeut 80 miles, and served as an intermediate station both to Ammonium and Oasin Magna.
3. Oasis Minor ('Oagts $\mu$ k kpá, Ptol, iv. 5. § 37 ;
 Or. c. 143: the modern El-Dakkel), was situated SE. of Ammeniorn, and nearly duc W. of the city of Oxyrynchns and the Arsinoite nome (El-Fyoum), lat. $29^{\circ} 10^{\circ} \mathrm{N}$. Like El-Sircah, the Lesser Owis contains warm springs, and is well irrigated. Under the Ronians it was celebrated for its wheat; but now its chief productions are dates, olives, pomegranates, and other fruits. It has a temple and tombs of the Ptolemaic era. The Lesser Oasis is separated from the Greater by a high calcareous ridge, and the station between them was probably at the little temple of Ain Amour. (Caillisud, Minutoli, \&c.) Oasis Minur reems to be the same with that entitled by some Clristian writers (e.g. Palladius, I'it.
 "Oasa, ubi gens est Mazicorum" (Joann. in l"it. Patrom, e. 12), the Mazyci of the Regio Marmarica being the Im I le indicated.
4. OAsis Trinytueos, or the Oasis of El-Ba-
charieh, is the nearest of these desert-islands to the frontiers of Aegypt, and nearly due N. from Oasis Magna. It lies in lat. $28^{\circ}$, a little below the parallel of the city Hermopolis in Middle Aecypt. There is a road to it from Fyoum, and its pritecipal village is named Zabou. The soil is favourable to frnit; but there are no traces of its permanent nccupation either by the Aegyptians or the Persians ; and its carliest monuments are a Roman triumphal arch, and the ruins of an aqueduct and hypocaea, containing sarcophagi. In this Oasis was made the discovery of some ancient artesian wells.

The description of the wonders of the Oases by an historian of the tifth century A. D. (Olympiodor. ap. Phot Bib. p. 61, ed. Belkker) leaves no doubt of the existence of sucb artificial springs; but as their construction was unknown to the Greeks and Romans no less than to the Aegyptians, the secret of it was probably inported from the East, like the silkworm, at some periud anterior to A. w. 400. Several of these wells have recently been discovered and reopened (Russegger, Reisen, vol. ii. pp. 284, 399); and the depth disclosed does not materially differ from that mentioned by Olympiodorns (supra), viz., from 200 to 500 cubits. This far exceeds the bore of an ordinary well; and the spontaneons rise of the water in a rushing stream shows that no pump, siphon, or machinery was employed in raising it to the surface. In this Oasis, also, alum abounds. (Kenrick, Anc. Egypt, vol. i. p. 74.)
 27 ; $\dot{\eta} \pi \rho \omega \dot{\tau} \eta$, Strab. xvii. p. 813; 六äv $\omega$, Olympiod. ap. Phot. Bill. p. 212, ed. Bekker), the Great Oasis, sumetimes denominated the Oasis of Thebes, as its centre lies nearly opposite to that city, is called ELKhargeh by the Arabs, from the name of its principal tomn. This, also, is the $\pi \dot{\prime} \lambda t s$ 'Oáors and $\nu \tilde{j o o s} \mu a k a \dot{\rho} \rho \omega \nu$ of Iterodotus (iii. 26), and is meant when the Oases are spoken of indiscriminately, as by Josepbans (c, Apionn. ii. 3). In the hieroglyphics its name is Heb, and in the Notitia Imperii Orient. (c. 143) its capital is termed Hibe. The Oasis Magna is distant about 6 days' jonrney from Thebes, and 7 from Abydos, being abont 90 miles from the western bank of the Nile. It is 80 miles in length, and from 8 to 10 broad, stretching from the lat. of Tentyra, $25^{\circ} \mathrm{N}$., to the lat. of Abydos, $26^{\circ} 6^{\prime} \mathrm{N}$. Anciently, indeed, owing to more extensive and regular irrigation, the cultivable land reached further N . The bigh calcareous ridge, which separates it from the Lesser Oasis, here becomes precipitons, and girds the Oasis with a steep wall of rock, at the base of which the acacia of Ezypt and the dhoum palm form thick woods. The Great Oasis must have received a Greek colony at an early period, since Herodotus (iii. 26) says that the "city Oasis" was ocenpied by Samians of the Aeschrionian tribe, who had probably settled there in consequence of their alliance with the Greek culonists of Cyrene (Id. iv. 152). Yet none of its numerous monaments reach back to the Pharaonic era. It was garrisoned by the Persians; for the names of Dareius and Amyrtaeus are inscribed on its rnins (Wilkinson, Mod. Egypt and Thebes, vol. ii. p. 367 ); but the principal buildings which remain belong to the Macedonian, if not indeed to the Roman era. Its great temple, 468 feet in length, was dedicated to Aminn-Ra. The style of its architecture resembles that of the temples at Hermonthis and Apollinopolis Magoa, Like other similar spots in the Libyan Desert, the Great Oasis was a place of
banishment for political offenders (Dig. xlviii. tit. 22. 1. 7. § 4), and for Christian fugitives from the lagran emperors. (Socrat. ii. 28.) At a later period it abounded with monasteries and churclies. The Greater and the Lesser Oasis were reckoned as forming together a single nume, but by the Roman emperors were annexed to the prefecture of the Thebaid. (Plin. v. 9. s.9, dno Oasitae; Ptol. iv.
 see Hoskins, Visit to the Gireat Oasis; Lanyles, Mém. sur les Oasis; Ritter, Erdkunde, vol. 1. p. 964.)
[W. B. D]
OAXES, OAXUS. [Axus.]
OBILA ('Osina, Ptol. ii. 5. § 9), a town of the Vettones in Hispania Tarraconensis, the site of whicl it is difficult to determine, but it is supposed to be the modern Avilu. (llieron, de Vir. Ill. c.121, and Florez, Esp. S. xiv. 3, ap. Ukert, vol. ji. pt. 1. p. 431.) Reichard, bowever, identifes it with Oliva.
[T. H. D.]
obilaE. [Marmarica.]
OBLIMUM, a place in Gallia Narbonensis, written Obilonna in the Table, on a ruad which passes through the Tarentaise to the pass of the Alpis Graia, or Little St. Bernard. The site is uncertain, but the distance is marked iin. from Ad Publicanos. [Publicanos, Ad.] [G. L.]

OBLIVIONIS FLUMIEN, called also Limins, Limias, Limaea, \&c. [Gahlaecia, Vol. 1. p. 933.] O'BOCA ('Oठока, Ptol. ii. 2. §8), a river on the W. coast of Irelard, now the Boyne. [T. H. D.]

OBRIDLAS, a river of Pbrygia, an eastern tribntary of the Maeander, had its sources, according to Livy (xxxviii, 15), on the eastern side of llount Cadmas, near the town of Asporidos, and flowed in the neighbourhood of Apamea Cibotus (Plin. v. 29.) This is all the direct information we possess abont it; but from Livy's account of the expedition of Manlius, who bad pitched his camp there, when be was visited by Selencus from Apamea, we may sather some farther particnlars, which enable us to identify the Obrimas with the Sandukli Chai. Manlius had marched direct from Sagalassus, and must bave led his army through the plaius of Dombai, passing in the rear of Aparnes. Thus Selencus wonld easily bear of the consul being in his neighbourbood, and, in his desire to prepitiate him, would bave started after him and overtaken him the next day (postero die.) Manlins, moreover, at the sources of the Obrimas reqnired guides, becanse he found limself hemmed in by monntains and nnable to find bis way to the plain of Metropolis. All this agrees perfectly well with the supposition that the ancient Olrimas is the modern Sandukli Chai (Hanilton, Researches, ii. p. 172, \&c.). Franz (Funf Inschriften, p. 37), on the other hand, supposes the Kiodsha Chai to correspond with the Obrimas. Arundell (Discov. is Asia Min. i. p. 231), again, believes that Livy has confounded the sources of the Marsyas and Maeander with those of the Obrimas,
[L. S.]
OBRINGA ('Ǫpiरikas). Ptolemy (ii. 10. § 17) makes the Obringas river the houndary between Lower and Upper Germania. The most southern place in Lower Germania according to his nuap is Moguntiacnm (Moкоутıaкóv), Muinz. He places in the foilowing order the cities of Upper Germania, which are south of the Obringas:- Noeomagns (Speier), Borbetomagus (Worms), Argentoratum (Strassburg), and so on. But llorms is north of Speier ; and the relative position of these two places is therefore wrong in Ptolemy. He has also placed

Mosentiacum in Lower Germania，but it was the ch．．ef place of Upper Germania．Ptulemy has not tu－1／－ tioned the Musella（17osel），and some geographer． have assumed that it is the Obringas；but if this is so，the position of Mainz is wrong in Itolemy，for Irainz is south of the Mosel．D＇Ansille observes that，according te the Notit．Imp．，the district of the general whe resided at Mainz comprehended Antunnacum or Andernach，on the Rhine，which is beliw the junction of the Mosel and the Rhine．If Andernach was always in the Upper Germania，and if the boundary between the Lower and the Upper Gernania was a river－valley，there is none that seeres su likely to bave beeo selected as the rugged valley of the Ahr，which lies between Bonn and Andernach，and separates the netherlands or low－ lands on the north from the hilly country on the suth．
［G．L．］

## OCEANLS SEPTENTRIONALIS

1．The nume and divisions．－According to a fracment of Phavorinns the word＇תkeavos is not Greek，but ene borrowed frem the barbarians（Spohn， de Nicephor．Blemm．Gcogr．Lips．1818，p．23）； but there seems reason tor believing it to be con－ nected with the Sanscrit roots＂ogha＂and＂ogh．＂ （Humboldt，Cosmos，vol．ii．aote 210，traus．）When the peoples living on the cossts of the Interier Sea passed，as Herodotus（iv．152）significantly adds，＂not witheut divine direction，＂through the gate into the Ocean，and first saw its primeral waters，the origin as they believed of all waters，the sea that washed the shores of the remote North was long regarded as a miry，shallew，misty sea of darkness，lying under ＂the Bear，＂whe alone is never batbed in the Ocean； and bence the names Septentrionalis（ $\delta$ Bópecos ©okeavós．Plut．Camill．15；Agathem，i．14：Tac． Germ． 1 ：Plin．iv．27；$\delta$ גрктькus $\dot{\omega}$ ．，Agathem．
 Scythicus（Plin．vi．14）；theugb this，according to Agatbemerus（ $l$ ．c．）is the E．division of the Nurth－ ern Ocean，while the Mare Germanicum and Mare Britaonicum formed the W．This sea appears with the epithets＂Oceanns glacialia＂（Juv．iii．1）； ＂Jare congelatum＂（Varre，R．R．i．2．§ 4；Plio． ir．27．s．30）；＂cencretum＂（Plin．l．c．；方 $\pi \in \pi \eta \gamma^{\text {via }}$ Өa入．，Strab．i．p．63；$\pi$ óvtos $\pi \epsilon \pi \eta \gamma \omega \bar{s}$ ，Dionys．J＇er．
 （Tac．Agr．13，Germ．45）；＂mortuum＂（Plin．iv． ${ }^{27}$ ；Agathenl．l．c．；Dieays．Per．33）．Its divisions were：－Mare Germanicum（Plin．iv． 30 ；Peol．ii． 3. § 5），or M．Cimbricnm（＂Cymbrica Tethys，＂ Claudian，de Bell．Get．335），or the German Ocean， onited by the Fretum Gallicum（Straits of Doeer， Pas de Calais）with the M．Britanaicum（Plin．is． 33 ：English Channel），and by the Codanus Sinus（Kattegattet．Ore Sund）and Lagnas Bimus （Store Belt，Lille Belt），with the M．Sarmaticum （ इapдатькі̀s 山̈к．，Ptol．sii．5．§§̀ 2，6）or Suevicurn （Tac．Germ．45：Oster Sien，or Baltic）．A divisien of this latter was the Sinus Venedicus（Oveved ords к $\delta \lambda \pi$ os，1＇tol．iii． $5 . \S 19$ ：Gulf of Danzig）．The M．Amalchinm，accurding to Hecatacus（ap．Plin． iv． 27 ），commences with the river Parepamisus；the Cimbri，accerding to Philemen（ap．Plin．l．c．）， called it Merimarusa，which he interprets by M． mortuons；beyond was the sea called Cronium，or the sea isto which the river Chrenos（Niemen） flowed，or what is now called the Kurisches Haff， off Memel．（Schafarik，Slav．All．vol．i．p．496．）

2．Progress of discovery．－The enterprise of the Phoenician navigaters brought them into contact with those countries，in the N．of Europe，from whence tin was brought；but it was the trade in amber which must have been mest effectual in opening up a knowledge of these coasts．This amber was brought by sea，ai first，ooly from the W．Cimbrian coast，and reached the Mediterraneant chiefly by sea，being brought across the intervening countries by means of barter．The Massilians，who under Pytheas followed the Phoenicians，laardly went beyond the rouths of the Weser and the Elbe． The anober islamds（Glessaria or Austrania）are laced by Pliny（iv． 27 ）decidedly W．of the Cim－ briam promentory in the German Ocean；and the cennection with the expedition of Germanicus sufficiently shaws that so island in the Baltic is uot meant．Moreover the effects of the ebb and flood tides in the estuaries which throw up amber，where， according to the exprension of Survius，＂Mare vicissim tum accedit tum recedit，＂suits the cuast
between the Helder and the Cimbrian peninsula； but does not suit the Baltic，in which Timaeus places the island Baltia．（Plin．xxxvii．11．）Aba－ lus，a day＇s journey from an＂aestuarium，＂cannot therefore be the Kurische Nehrung．Pytheas pro－ bably sailed to the W．shores of Jatland．Tacitus （Germ．45），not Plioy，is the first writer acquainted with the＂glessum＂of the Baltic shores，in the land of the Aestyans and the Venedi．The more active，direct communication with the Samland coast of the Baltic，and with the Aestyans by means of the overland route through Pannonia by Car－ nuntum，which was opened by a Roman knight under Nero（Plin．l．c．），appears to have belonged to the later times of the Roman Caesars．The re－ lation between the Prussiat cuast，and the Milesian colonies on the Euxine，are shown by the evidence of tine coins，probably struck more than 400 years n．c．，which have been fuund in the Nefiz district． （Humbollt，Cosmos，vol．ii．note 171，trans．） A curious story is related by Cornelius Nepos （Fragm．vii．1，ed．Van Staverea ；comp．Mela，iii． 5．§ 8；Plin．ii．67）of a king of the Boii，others say of the Suevi，having giren some shipwrecked dark－coloured men to Q．Netellus Celer when he was Proconsul of Ganl．These men，who are called Indians，were，if any credence is to be given to the stery，most probably natives of Labrador or of Grcenland，who had been driven on these coasts by the effect of currents such as are known now in these seas，and violent NW．winds．
［E．B．J．］
OCELIS（О $\mathrm{O} \kappa \eta \lambda t s$ द̇ $\mu \pi \sigma$ ótov），a port of Arabia Felix，placed by Ptolemy（i．7．§ 4，i．15．§ 11， vi．7．§ 7，viii． $22, \S 7$ ）a little to the north of the straits of the Red Sea（Bab－el－Mandeb）．Its geographical position，according to his system，was as follows：Its longest day was $12_{24}^{11}$ hours．It was $1^{\prime}$ east of Alexandria，between the trapics， $52^{\circ} 30^{\prime}$ remored from the summer tropic．It is placed by the author of the Periplus 300 stadia from Musa，and is identical with the modern Ghella or Cella，which has a bay immediately withio the straits，the en－ trance to which is two milcs wide，and its dejth little short of three．（Vincent，Periplus，p．288； Forster，Arabia，vol．ii．p．148．）Ocelis，according to the Periplus，was not so much a port as an an－ chorage and watering－place．It belonged to the Elisari，and was subject to Cholebus．（Hudson， Geog．Min．tom．i．p． 14 ；Ptol．vi．7．§ 7．）The sume author places it 1200 stadia from Arabia Felix（Aden）；but the distance is two short．（Gos－ selin，Réchercles，tom．iii．p．9．）
［G．W．］
OCELLODU＇RUM，a town of the Vaccaei in Hispania Tarraconensis，on the road from Emerita to Caesaraugnsta（Ant．Itin． $\mathrm{pp} .434,439$ ）；va－ rionsly identified with Zamora，Toro，and Fer－ mosel．
［T．H．D．］
 Gaul，mentioned by Caesar as the last place in that province（＂citeriorisprovinciae extremum，＂Caes．B．G． i．10）from whence he had to fight his way through the independent tribes which held the passes of the Alps．In Strabo＇s time Ocelum was the frontier town of the kingdom of Cottius towards the proviuce of Cisalpine Gaul（Strab．iv．p．179）；and it was from thence that a much frequented road led over the pass of the Mont Genevre by Scingomagus （Sezume），Brigantium（Briançon），and Ebrodunum （Embrun），to the territory of the Vocontii．D＇Anville has clearly shown that Ocelum was at $C$ reau，a viliage in the valley of Fenestrelles，and not，as sup．
posed by previons writers，at Oulx in the valley of the Dora．（D＇Aoville，Notice de la Giaule，p． 500．）
［E．H．B．］
O＇CELUM（＂Окє入o ${ }^{\circ}$ P Ptol．ï．5．§ 9）．3．A town of the Vettones in Lusitania，whose inhahitants are called by Pliay（iv．22．s．35）Ocelenses and Lanci－ enses．Identified by some with Caliubria，by uthers with Fermoselle or Ciudad Rodrigo．（Ukert，vol．ii． pt．1．p．431．）

2．A town of the Callaïci Lucenses in Gallaecia （Ptol．ii．6．§ 23）．

3．（＇Oкé入o人 ¿кроу，Ptol．ii．3．§ 6），a promon－ tory on the NE．coast of Britannia Romana，and N．of the mouth of the river Abus or Hunaber；probably Spurn Head．
［T．H．D］
OCHE．［EvboEa．］
OCHOSBANES（＇O Øortávns）or Ochtho－ MANEs，a small river of Paphlagonia，falling into the bay of Armene，a little to the aorth of Sinope． （Marcian．Heracl．p． 72 ；Anonym．Peripl．Pont． Eux．p．7．）This is probably the same river which Scylax（p．33）calls Ocheraenus．
［L．S．］
OCHRAS，a place in Cappadocia．（It．Ant．p． 202．）P＇olemy（v．6．§ 12）mentions a place Odogra or Odoga，in tbe district of Chammanene in Cappadocia，between the river Halys and Munat Argaeus，which is possibly the same as the Ochras of the Antonine Itinerary：
［L．S．］
OCHUS（ $\delta^{\top} \Omega$ xos．Strab．xi．p．509；Ptol．vi． 11. §§ 2，4；Amm．Marc，xxiii．6），a river of Central Asia，which has been attributed to the provinces of Hyreania and Bactriana by Strabo and Ptolemy respectively，as flowing through them both．It took its rise on the NW．side of the Paropamisus （or Hindu－Kuish），and flowed in a NW．direction through part of Bactriana totwards the Caspian Sea， and parallel with the Oxus．Pliny makes it a river of Bactriana，and states that it and the Oxus flow from opposite sides of the same mountain（vi． 16. § 18）．There can be no reason for doubting that it is represented by the present Tedjen．It is clear that in this part of Asia all Ptolemy＇s places are thrown too much to the east by an error in longi－ tude．（Wilson，Ariana，p．145．）
［V．］
OCHUS MONS（ ${ }^{\circ} \Omega$ Øoe，Arrian，Indic．c． 38 ），a monntain in Persis，mentioned by Arrian，supposed by Forbiger to be that now called Nakhilu．［V．］

OCILE（＇Oкi入t，Appian，B．Hisp．75），a town of Hispania Baetica，probably near llipa or Ilipla， besieged by the Lusitanians，and relieved by Mum－ mius（Ukert，vol．ii．pt．1．p．372）．［T．H．D．］

OClLIS（＂Okidis，Appian，B．Hisp．c．47，sqq．）， a town of the Celtiberi，which served the Romans as a magazive in the time of the Celtiberian war．It was prolably in the SE．part of Celtiberia，and Reichard identifies it with Ocanu．［T．H．D．］

OCLNARUS（＇$\Omega$ kivapos），a river on the W．cuast of Brattium，mentioned only by Lycophroa（Alex． 729,1009 ），who tells us that i：flowed by the city of Terina．It is generally supposed to be the same with the Salatus of the Itineranies（the modern Saruto）：but its identification depends apon that of the site of Terina，which is very uncertain． ［Teniva］．
［E．H．B．］
OCITIS（＂Okitis，Ptol．ii．3．§31），an island on the N．cosst of Britain，avd NE．from the Orkneys， probably Ronaldsa．
［T．H．D．］
OCRA MONS（ $\eta$＂OKра），is the mame given by Straho to the lowest part of the Julian or Carnic Alps， over which was the pass leading from Aquileia to Acmona（Laybach），and from thence into Pannonia

nid the cinatries on the Danube. (Strim in fin 207 , vii. p. 314.) The monntaio meant is whatif that between Aldelsh rg and Laybach, whiris wam in all uges have been the principal line of enomen, eation from the batube and the valley of the Nore with Italy,
[E.H.B.]
OCRICULLUM (oi "Orркклан, Strab.; 'Oкр́íко入a, Steph. B.; 'Oxpikoגov, 1'tol.: Eth. Ocriculanus and Ocriculanus: Otricoli), a considerable town of Umbria, situated on the Via Flaminia, near the left latink of the Tiber. It was the southernmost tornn of Umbria, and distant only 44 miles from lione. (Ilin. Ilìr. p. 613 ; Westphal, Köm. Kemp. p. 14.5.) We learn from Livy that Ocriculum was a native Umbrian city, and in B, e. 308 it appears to lave separated from the other cities of the confederacy, and concluded an alliance with Rome. (Liv. ix. 41.) This is the only notice that we find of it prior t., the conquest of Umbria by the Remans; bat after that period it figures repeatediy in history as a manicipal town of some importance. It was here that in t. c. 217 Fabits Maxionus tuok the command of tice army of Servilius. after the battle of the lake Trasimenus. (Id. xxii. 11.) In the Social War (Icriculum suffered severely ; and, according to Fiorus, was laid waste with fire and swerd (Flor. iii. 18. §11); but it seems to have quickly recovered, and in Strabo's time was a censiderable and flourishing town. It is mentioned in Tacitus as the place where the arny of Vespasian balted after the smirender of the Vitellian legiens at Narnia (Tac. Hist, iii. 78). Fronn its position on the Flamician Wray it is repeatedly mentioned incidentally under the Reman Empire (Plin. Ep. vi. 25; Ainm. Marc. xvi. 10. $\S 4, x \leq v i i i .1 . \S 22$ ); and it is evident that it was iodebted to the same ciremmstance for its cuntinued prosperity. The name is found in I'liny and Proleny, as well as in the Itinerajes; and its municipal inportance down to a late period is attested also by inscriptions, in some of which it bears the title of "splendidissima civitus ") "ricolana." From these combincd, with the still extant remains, it is evident that it was a more considerable tuwn than we conld have inferred from the acconats of : ancient writers (Plin. iii. 5. s. 9, 14. s. 19; Ptol. iii. 1. § 54: Itin. Ant. Pp. 125, 311: Gruter, Inser. p. 422. 8, 9 ; Orell. Inscr. 3852, 3857; Marini, Atti dei Fratelli Arcali, vol. ii. p. 582). The site of the ancient city is distant about 2 miles from the modern village of Otricoli, in the plain naver the Tiber. The ruins of ancient edifices are, in their prosent state, of but little interest: hut exFavations which were carried on upon the spot in 1780 brompht to light the remains of several puilic buildings on a splendid scale, the plan and arramgement of which could be traced with little difticulty; amony these were a Basilica, a theatre, an amplitheatre, Therumae, and several temples, besides wther buildings, of which tbe purpose could nut be determined. The benuty of many of the ar hitecturai decorations and works of art diseovered on thas orcasion (especially the celebrated mosaie flow now in the Vatican, and the colossal head of Jupiter in the same musemm) prove that Ocriculum must have been a manicipal town of no ordinary st lendour. (Wistllal, Romisclic Kampagne, p. 144 ; Giuctani, Momumuti Inditi, 1784, where the results of the cexavation are deseribed in detail and nocompanied with a phan of the anciont remtins.) Its proxinity to Rome frolably caused it to le resorted to by wealthy nobles from the city; and as
early as the time of Ciccre we learn thrat hiiu had a villa there. (Cic. pro Mil. 24.) The periml of the destruction of the ancient city is uncertain. In A. D). 413 it witnessed a great defeat of Heraclianos, Count of Africh, by the armies of Honorius (1dat. Chrom, ad ann.), and it is mentioned as an episcopal see after the fall of the Western Empire. But the circumstances that led the inhabitants to migrate to the modern viilage of Otricali, on a hill overlouking the Tiber, are not recorded. The cerruption of the name appears to have commenced at an early date, as it is written Utriculum in the Itineraries and in many Mss. of the classical authors. [E. H. B.] OCRINUM. [Damnonicm.]
OCTAPLTARUM ('Oкталitapò äкpò, Ptol. ii. 3. §3), a very prominent headland above the estuary of the Sabrida, or Serern, on the W. coast of Britain, now St. David's Head.
[T. II. D.]
OCTODU'RUS (Martinach, or Martigny, as the French call it), is in the Swiss canten of 11 allis or Valais, on the left bank of the Khome, near the bend where the river takes a nerthern course to the lake of Genera. The Drance, one branch of which rises at the foot of the Great St. Bernard, joins the left bank of the Rhone at Martigny. The road over the Alps from Martigny ascends the valley of the Drance, and the summit of the road is the Alpis Pennina, or Great St. Bernard. This pass has been used from a time older tban any bistorical records. When Caesar was in Gallia (B. c. 57-56) he sent Servius Galba with the twelfth legion and some cavalry inte the country of the Nantuates, Veragri, and Seduni. His parpose in sending this force was to epen the pass over the Alps, the pass of the Great St. Bermard, "by which road the mercatores bad been used to travel at great risk, and with the payment of great tolls." (B. G. ini. 1.) The people of the Alps allowed the Italian merchants to pass, because if they plundered them the merchants would not come; but they get as much out of them as they could. Galba, after taking many strong places, and receiving the submission of the people, sent off two cohorts iste the country of the Nantuates, and with the remaining cohorts determined to winter " in a town of the Veragri natoed Octodurus, which town being situated in a valley with ne great extent of level gromed mear it, is confined on all sides by very lofty mountains." There is some level ground at Martigny, and the valley of the Rhone at this part is not very narrow. Cuesar says that the town of Octodurus was divided into parts by a river, but he does not mention the river's name. It is the Drance. Galba gave one part of the town to the Galli to winter in, and assigned the other to his troops. He fortified bimself with a ditch and rampart, and tbought he was safe. He was, however, suddenly attacked by the Galli before his defences were complote or all his supplies were bruaght inte the camp. The Romans obstinately defended themselves iti a six hours' fight; when, secing that they could ne longer keep the enemy ont, they made $\pi$ sortie, which was successtul. The Romans estimated the Galli at more than 30,000 , and Carsar says that more than a third part wero destroyed. The slanghter of the enemy was prodigious, which has been made an objection to Cacsar's veracity, or to Galba's, who made his report to the commander. It has also been objected that the valley is not wide enongh at Martigny to hold the 30,000 men. There may be error in the namber that attacked, and alse in the nmmber who perished.

But it is not difficnlt to answer some of the objections made to Caesar's narrative of this fight. Roesch has answered the criticism of General Warnery, who, like many other of Caesar's critics, began bis work by misunderstanding the author. (Roesch, Commentar über die Commentarien, ofc. p. 220, Halle, 1783.) After this escape Galba prudently withdrew his troops, and marching throngh the country of the Nantuates reached the land of the Allobroges, where he wintered.

The position of Octodurus is determined by Caesar's narrative and by the Antonine Itin. and the Table. Pliny (iii. c. 20) says that the Octodurenses received the Latinitas (Latio donati). In the Notit. Prov, the place is called "Civitas Vallensium Octodurus." The modern names Wallis and Valais are formed from the word Vallenses. At a later period it was called Forum Claudii Vallensium Octodurensium, as a inscription shows. One authority speaks of the remains of a Roman aqueduct at Martigny. Many coins, and other memorials of the Roman time, have been found abont the place.

The name Octodur is manifestly Celtic. The second part of the name is Dur, "water." The first part, probably some corrupt form, is not explained. The distances on the Roman road from Angnsta Praetoria (Aosta) in Italy to Octodurus are stated in Yol. I. p. 110.
[G. L.]
OCTOGESA, a town of the Ilergetes, in Hispania Tarraconensis, seated on the river Iberus (Caes, B. C. i. 61). It is identified by some with Mequinensa; but Ukert (vol. ii. pt. 1. p. 452) seeks it to the S. of the Sicoris (or Segre), in the neighbourhood of La Granja.
[T. H. D.]
OCTOLOPHUS. 1. A place belonging to the Lyncestae, in Macedonia, to which the consul Sulpicius moved his camp in the campaign of r. c. 200, agairst king Philip. (Liv. sxsi. 36; comp. Castra, Vol. I. p. 562 , a.)
2. A place in Perrhaebia, from which Persens had retired, and which was afterwards occupied by the consul Q. Marcins Philippas, in his daring march over the mountain ridge of Olympus, B. c. 169. (Liv, sliv. 3.) It was probably near the issue of the Tituresius or Elassonitiko, from DIt. Olympus into the valley of Elassona. (Leake, Northern Gireece, vol. iii. pp. 308, 310, 417.) [E. B. J.]

ODESSUS ('O $\bar{\eta} \eta \sigma \sigma$ 's, Strab, vii. p. 319 ; Scymn. 748 ; Diod. xix. 73, xx. 112; Appian, Ill. 30; Arrian, Per. p. 24; Anon. Per. p. 13; Ptol. iii. 10. § 8, viii. 11 § 6 ; Stepb. B. s. $v . ;$ Mela, ii. 2. § 5 ; Plin. iv. 18; Ovid, Trist, i. 9. 37: the reading
 'Ojmods $\pi \dot{\delta}$ ins, for the name was written both with the single and the doulle $\sigma$; the latter form ocenrs on the autonomous coins, the former on those of the Empire: 'Oóvaad́s, Hierocl.; Procop. de Aed. iv. 11; Odissos, Amm. Marc. xxii. 8. § 43), a torn on the W. coast of the Euxine, at the mouth of the river Panysus, 24 M. P. (Anton. Itin.), or 34 MI. P. (Peut. Tab.), from Diodysopolis, and 360 stadia from the E. termination of Haemus (Emineh Burnu). Odessus was founded by the Nilesians (Strab. l. c.; Plin. l.c.). if credit may be given to the anthor of the poera which goes under the name of Scymnns (l.c.), as early as the reign of Astyages, or B.c. 594-560. (Clinton, F.H.; Raoul-Rochette, Col. Gr. vol. iii. p. 786.) From the inscriptions in Böckh (Inscr. Nos. 2056, a, b, c), it would seem to have been under a democratic form of government,
and to have presiled over the union of five Greek cities on this coast, consisting of Odessus, Tomi, Callatis, Mesambria, and Apollonia When tbe Bulgarians swept over the Damubian provinces in A. D. 679 they are found occupying Farna (B $\dot{\rho \nu} a$, Theophan. p. 298; Niceph. p. 23; Cedren. vol. i. p. 440), which is descrihed as being near Odessus. (St. Martin, ap. Le Beau, Bas Empire, vol. xi. p. 447; Schafarik, Slav. Alt. vol. ii. P. 217.) The antonomons coins of Odessus exhibit "types" referring to the worship of Serapis, the god imported by Ptolemy into Alexandreia, from the shores of Pontus. The series of imperial coins ranges from Trajan to Salonina, the wife of Gallienus. (Eckhel, vol, ii. p. 36; Rascbe, vol. iii. pt. 2. p. 51 ; Miomet, Deser. des Med. vol. i. p. 395, Suppl. vol. ii. p. 350.) [E.B.J.]

## COIN OF ODESSUS.

 Thuc. ii. 101, v. 6; Steph. B. s. v.; Odomantes, Plin. iv. 18), a Paeonian tribe, who occupied the district, called after them, Odomantice ('Oठouay-
 Steph. B.) This tribe were settled npon the whole of the great mountain Orbelns, extending along the NE. of the lower Strymonic plain, from abont Meleniko and Demirissir to Zikkna inclnsive, where they bordered on Pangaens, the gold and silver mines of which they worked with the Pieres and Satrae. (Herod. l. c.) Secure in their inaccessible pasition, they defied Megabazns. (Herod. v. 16.) The NW. portion of their territory lay to the right of Sitalces as he crossed MIt. Cercine; and their general situation agrees with the description of Thncydides (ii. 101), according to whom they dwelt heyond the Strymon to the N., that is to say, to the N. of the Lower Strymon, where, alone, the river takes snch a course to the E. as to justify the expression. Clcon invited Polles, their chieftain, to juin him with as many Thraciau mercenaries as could be levied. (Thuc. v. 6; Aristoph. Acharn. 156, 164; Suid. s. v. а̀потєӨрlaкєv: Leake, Northern Grcece, vol. iii. pp. 210, 306, 465.)
[E. B. J.]
ODONANTIS. [SOPHENE.]
O'DRYSAE ('O $\delta p \dot{v} \sigma a l$ ), a people seated on both banks of the Artiscus, a river of Thrace, which discharges itself into the Hebrus. (Hervd. iv. 92.) Their territory, however, mnst undoubtedly have extended considerably to the W . of the Artiscus ; since Pliny (iv. 18) informs us that the Hebrus had its source in their country ; a fact that is corroborated by Ammianus Marcellinus ( $\mathrm{x} x$ vii. 4, 10). They appear to have belonged to that northern swarm of barbarians which invaded Thrace after the Trojan War; and their names are often funnd interworen in the ancient myths. Thas the Tliracian singer Thamyris is said to have becu an Odrysian (Pans. iv. 33. § 4) ; and Orpheus is represented as their king. (Conon, ap. Phot. p. 140.)

A rude and barbarous people like the Odrysians
ramot be expected to have had many towns; and in fact we find none mentioned either by Thucydides or Xenophon. The first of their towns recorded is Pbilippopolis, founded by Pliilip 11. of Macedonia, as there will be occasion to relate in the sefucl; and it may be presumed that all their towns of any importance were built after they had lost their independence.

The name of the Odrysae first occurs in history in contrection with the expedition of Dareius Hy -Sta-pis against the Acythians. (Hered. l. c.) Whilat the Persians oppressed the southern parts of Thrace, the Olrysians, protected by their monntains, retained their independence: and the strenath wheh they thus acquired enabled Teres to incorperate many Thracian tribes with his suhjects. He estended his kingdom te the Euxine in spite of a signal defeat whech lie sustained in that quarter frotn the Thyni (Xem. Anab. vii. 2. § 22); and the dominion of his son Sitalces embraned the ereater part of Thrace; having been bounded on the X. hy the Dannbe, and estending from Abdera on the II. To the Enxine on the E. (Thucrd. ii. 96-98.) Indecd, so powerful was this monarch that his allance wats cagerly courted both by the Athenians :and Lavedamonians at the breaking out of the Filupomesian War. (Tbucyd. ii. 29; Herod. vii. 137: Aristoph. Acharn. 136-150.) The expethion whinh he undertook in B. C. 429, at the in: tance of the Athenians, and of Amyntas, pretender to the throme of Macedonia, against Perdiccas II., the reicning sovercign of that country, is also a striking proof of the power of the Odrysians at that 1eriokl; as the army which Sitalces assembled on that occasion amounted, on the lowest estimate, to 150,000 men, of which one-third were cavalry. (Thue, ii. 98 : Dive. sii. 50.) For the latter force, indeed, the Odrysians were renowned, and the extensive plains of the Hebrus afforded pastore for an excellent breed of horses, (Thuc. l. c. : Polyb. xxiv. 6; Liv. sliv. 42.) With this army Sitalces overran Chalcidice, Antbemus, Crestonia, and Mygdonia: but the non-appearance of the Athenian custingent, conpled with the approach of winter, obliged him hastily to retire after a month's camp.is.n. In R. c. 424 Sitalces fell in an engagement with the Trihali, and was succeeded by bis nephew Siruthm 1. Under his reign the Odrysians attained the bichest pitch of their power and prosperity. Their yaarly revenuc amounted to 400 talents, bes'lic an eyual sum in the shape of presents and contributions, (Thue. ii. 97, iv. 101.) But from thas pernad the power of the Odrysians began sensilly to wanc. After the death of Seuthes we find hus dominions divided among three sovereigns. Mivlocus, or Amadocus, who was most probably his soll. rulel the ancient seat of the monarchy ; Marsades, brother of Medocus, reigned over the Thyni, Melanditac, and Tramipsae; whilst the rerion above Byzantime called the 1relta was governed by Teres. (Xim Anal. vij. 2. § 32, vii. 5. § 1.) it was in the reica of Medocis that Xenophon and the Ten 'I hausand passed through Thrace on their return from the Persian expedition. and helped to restare Southes, son of the exiled Maesades, to his dominions. We gather from this writer that Seuthes exureised only a subordinate power under Medocus, with the title of Archon, or govermor, of the Const (vii. 3. § 16). Subsequently, however, he appears 1. have asoerted hiv clain to an independent sove$r$ suty, and to have waged open war with Medoctus,
till they were reconciled and gained over to the Athenian alliance by Thrasybnlus. (Xen. Hell. iv. 8. § 25 ; Diod. xiv. 94.) When we next bear of the Odrysians, we find them engaged in hostilities with the Athenians respecting the Thracian Chersonese. This was under their king Cotys I., who reigned from B. C. 382 to 353 . It was in the reign of the bame monarch (B. c. 376 ) that the Triballi invaded their territories, and penetrated as far as Abdera. (Died. xv. 36.) When Cersobleptes, the son and successor of Cotys, ascended the throne, the Odrysians aypear to have still retained possession of the country as far as the coast of the Euxine. But a civil war soen broke out hetween that monarch and Berisades and Amadocus, who were probably his brothers, and to whom Cotys lind left some portions of his kingdom. The Athenians availed themselves of these dissensions to gain possession of the Chersonese, which appears to have beeu finally ceded to them io B. C. 357 . (Dind. xvi. 34.) But a much more fatal blow to the power of the Odrysians was struck by Philip II, of Arcedon. After nine or ten years of warfare, Plilip at last succeeded (B. C. 343) in cenquering them, and reducing them to the condition of tributaries. (Diod. xvi. 71 ; Dem. de Chers. p. 105.) The exact nature of their relations with Philip cannot be ascertained; but that their subjugation must have been complete appears from the fact of his having founded colonies in their territory, especially Philippopolis, on the right bank of the Hebrus, and in the very beart of their ancient seat. Their subjection is further shown by the circumstance of their cavalry being mentioned as serving in the army of Alezander under Agathon, son of Tyrimmas. (Arrian, iii. 12. § 4.) But a still more decisive proof is, that after Alesander's lientenant Zophyrio had been defeated by the Getae, the Odrysians were incited hy their king, Seuthes 1II, to rebel against the Macedobians. (Curt. x. 1. §45; Justin, xii. 1.) After the death of Alexander, Sentbes took the field against Lysimachus, to whom Thrace lad derolved, with an army of 20,000 foot and 8000 borse, - a sad falling off from the forces formerly arrayed by Sitalces. (Diod. xviii. 14 : Pans. i. 9. §6.) The struggle with Lysimachus was carried on with varied success. Under Philip III. of Macedun, the Odrysians were stili in a state of revolt. In B. C. 211 that monarch assembled an army with the ostensible design of marching to the relief of Byzantium, but in reality to overawe the malcontent chieftains of Thrace. (Liv. xxxix. 35.) In 183 we find Philip undertaking an expedition against the Odrysians, Dentheletae, and Bessi. He succecded in taking Phiiippopolis, which the inhatitants deserted at his appruach, and where he established a garrison, which was expelled shortly after bis departure. (Liv. xxxis. 53: Polyb, Ex, Leg. xlviii.) It may be assumed from Livy that on this oceasion the Odrysians were supperted in their revolt by the Romans ( $\mathrm{xlii} .19, ~ x / v, 42$ ). After the fall of the Macedonian kingdom, the Odrysians appear to have been treated with consideration by the Romans, who employed them as useful allies against the newly-conquered districts, as well as aguinst the other Thracian tribes; amongst whom the Bessi had nuw raised themselves to some importance. After this period the history of the Olrysians is for some time involved in obscurity, though they were donbtless gradnally falling inore and more under the Roman dominion. In the year
B. C. 42 their king Sadxles, who had no children, bequeathed his kingdom to the Romans, and possession was taken of it by Brutas. (Caes, B. C. iii. 4; Dion Cuss. xlvii. 25 ; Lucan, v. 54.)

Augustus seems to have left the Odrysians the appearance of independence, In the year B.c. 29, in return for the friendly disposition which they had shown towards the Ronians, they were presented by M. Crassus with a territory hallowed by the worship of Bacclons, which he lad conquered from the Bessi (Dion Cass, 1i. 25). In the year b.c. 20, Rlsoematalces, who was administering the kingdom as guardian of the three infant sons of the deceased monarch Cotys 1 V ., succeeded, with the assistance of the Romaos under M1. Lollins, in redncing the Bessi (Id. liv. 20). A few years afterwards, the Bessi again rose under their leader Vologaeses, a priest of Bacchns, and drove Rhoematalces into the Chersonese: they were, however, soon rednced to submission by Lucius Piso; Rhoematalces was restored; and it would appear, from Tacitns, that under his reign the Odrysians acquired the dominion of all Thrace (Dion Cass. Liv. 34; Tac. Ann. ii. 64). This apparent prosperity was, however, entirely dependent on the Romans, by whose influence they were governed. Thus, after the death of Rhoematalces, we find Augnstus dividing his kingdom between his son Cotys and his brother Rhascnporis (Tac. l.c.; Vell. Pat. ii. 98). Again, after the murder of Cotys by Rhascuporis, Tiberins partitioned the kingdom between the children of Cotys and Rhoematalces, son of Rhascuporis, at the same time appointing a Roman, Trebellienns Rufus, as guardian of the former, who were not of age (Tac. Ann. ii. 67 , iii. 38). But, in spite of their subjection, the spirit of the Odrysians was not subdned. Two years after the event just recorded, they rose, in conjunction with the Coeletae, against the Romans, as well as against their own king Rhoematalces, whom they besieged in Pbilippopolis. This rebellion, which was undertaken by leaders of little distinction, and condncted withont cancert, was soon quelled by P. Velleins (Tac. Ann. iii. 39). A more formidable one took place A.D. 26, which Tacitus ascribes to the unsillingness of the Thracian tribes to supply the Roman army with recrnits, as well as to the native ferocity of the people. It occasioned the Romans some trouble, and Poppaeus Sabinns was rewarded witb the triumphal insignia for lis services in suppressing it (Ib. iv. 46-51). At length, under the reign of Vespasian, the Odrysians were finally deprived of their independence, and incorporated with the other provinces of the Roman empire (Suet. Vesp. 8; Eatrop. vï. 19).

In the preceding sketch those circumstances only have been selected which illustrate the history of the Odrysians as a people, withont entering into the personal history of their monarchs. The following is a list of the dynasty; an account of the different kings who compose it will be found in the Dict. of Biogr. and Mythol. noder the respective beads. 1. Teres. 2. Sitalces. 3. Senthes I. 4. Medocus (or Amadocns) with Maesades. 5. Senthes 11. 6. Cotys I. 7. Cersobleptes, with Amadocns and Berisades. 8. Seuthes III. 9. Cotys II. 10. Cotys II1. 11. Sadales. 12. Cotys IV. 13. Rhoematalces 1. 14. Cotys V. and Rhascuporis. 15. 1iboemataices II. 16. Cotys V1.

The manners of the Odrysians partook of that wildness and ferocity which was common to all the Thracian tribes, and which made their name a by-
word among the Grecks and Romans; but the horrible picture drawn of them by Ammians Marcellinus ( $\mathrm{x} x$ rii. 4. § 9 ) is probably overcharged. Like most other barlarous nations of the north, they were addicted to intoxication, and their long drinking bouts were enlivened by warlike dapees performed to a wild and barbarons music. (Xen. Anab. vii. 3. \& 32.) Hence it is characteristic that it was considered a mark of the highest distinction to be a table companion of the king's; but whoever enjoyed this honour was expected not only to drink to the king, but also to make him a present (Ib. 16, seq.) Among such a people,we are not surprised to find that Dionysus seems to have been the deity most worshipped. They had a custom of buying their wives from their parents, which Herodotos (v. 6) represents as prevailing amons all the Thracian tribes.
[T. H. D.]
ODRYSUS. [HadRlanorolis.]
ODYSSE1A ('Oठ̊' $\sigma \sigma \epsilon เ a$, Strab. iii. pp. 149, 157; 'Oסuaбєis, Steph. B. s. v.). a town of Hispania Baetica, lying N. of Abdera, and, according to tradition, built by Ulysses, together with a temple to Athene. By Sulinns (c. 23) and others it has been absurdly identified with Olisipo (Lisbon); hut its site, and even its existence, are altogether uncertain. [T. H. D.]

OEA (Pomp. Nela, i. $7 . \S 5$; Oeensis civitas, Plin. v. 4; Tac. Hist. iv. 50. Solio. 27; Amm. Marc. xxviii. 6; 'Ewa, Ptol. iv. 3. § 12), a town in the district of the Syrtes, which, with Leptis Magna, and Sibrata, formed the African Tripolis. Although there had probably been an old Pheenician factory here, yet, from the silence of Scylax and Strabo, the foundation of the Roman colony ("Oeea colonia," Itin. Antun.) must be assigned to the middle of the first centory after thrist. It flonrished under the Romans artil the fonrth century, when it was greatly injured by the Libyan Ausuriani. (Amm. Marc. l. c.) At the Saracen invasion it would scem that a new town sprang up on the ruins of Oea, which assumed the Rowan name of the district - the modern Tripoli; Tráblis, the Moorish name of the town, is merely the same word articulated throngh the medinm of Arab pronunciation. At Tripoli there is a very perfect marble trinmphal arch dedicated to M. Aurelins Antoninus and L. Aurelins Verns, which will be found beautifully figured in Captain Lyons' Travels in N. Africa, p. 18. Many other Roman remains have been found here, especially glass urns, some of which have been sent to Eogland.

For some time it was thought that a coin of Antonims, with the "epigraph" COL. AYG. oce., was to be referred to this town. (Eckhel, vol. iv. p. 131.) Its right to claim this is now contested. (Duchalais, Restitution à Olbasa de Pisidie, à Jérusalem et aux Contríes Occ. de la Haute Asie de trois Monnaies Coloniales attribuées à Océa, Remue Numismatique, 1849, pp. 97-103; Beechey, Exped. to the Coast of A frica, pp. 24-32; Barth, Wanderungen, pp. 294, 295, 391.) [E. B. J.]

OEA (Ora, Ö̈). 1. A town in Aegina. [Vol. I. p. 34, a.]
2. A town in Thera. [Thera].

OEANTHELA or OEANTHE (Oiánéca, Hellanic. ap. Steph. B., Polyb., Pans.; Oiáveך, Hecatac. ap. Steph. B., Plin. iv. 3. s. 4; Evavels, Scylax, p. 14: Euxybia, Itol. iii. 15. § 3: Eth. Oiavecu's: Galaxidhi), an important town of the Locri Ozolse, situated at the western entrance of the Crissacm gulf. Polybins says that it is opposite to Aereira in Achaia (iv. 57, comp. 5. 17), which agrees with

## OENIADAE.

the situation of imlaxidhi. The Ocanthaans (OiavAtis) are inntioned among the Locri Ozolae by Thacydides (iii. 101). Siylax calls the town Enauthis: and sinee Strabo says (vi. p. 259) that Iocri Kpizephyrii in Italy was founded by the Loeri Ozolac, under a leader named Enanthes, it has been eonjectured that Oeantheia or Euantheia was the $\mathrm{I}^{\text {bace }}$ where the emigrants embarked. Ocantheia appears to have been the only maritime city in Locris remaining in the time of Pansanias, with the exception of Niupactus. The only objects at Oeantheia mentionel by I'ansanias were a temple of Aphrolite, and one of Artemis, sitnated in a grove above the tomn ( $\mathrm{x}, 38$, § 9). The town is mentioned in the Tab. Pent, as sitnated 20 miles from Niupactus and 1.5 from Anticyra. The remains of antiquity at Ciuluxithi are very few. There are some ruins of Hellenic walls; and an inscription of no importance has been discosered there. (Böekh, Inver. No. 1764.) The modern town is inhabited by an active seafaring population, who possessed iso ships when Ulifichs visited the place in $183 \%$. (Leake, Northern Greece, vol. ii. p. 594 ; Ulrichs, Reisen, fr. p. 5.)

OE'ASO. OEASSO (Oiarẃv, Strab. iii. p. 161; Oian by Pliny (iii. 3, s. 4, iv, 20, s. 34), was a maritime town of the Vascones in Hispania Tarraconensis, ncar the promontory of the same name, and on the river Magrada (Mela, iii. 1), most probably Oyarco in. Oyarzan, near Irun and Fuentearabia. In an 1nacr. we find it witten Oeasmna. (Grut. p. 718; Oienhart, Not. Vasc, ii. 8: Florez, Esp. S. xxiv. pp. 15. 62, and xxsii. p. 147.) [T. H. D.]

OEASSO (Oiz $\sigma \sigma \dot{\omega}$, Ptol. ii. 6. § 10, ii. 7. § 2), a promontory of Hispania Tarraconensis, in the territory of the Vascones, formed by the N . extremity of the Prrenees, now C. Higuera. [T. H. D.]

OECHALLA (OixaNia: Eth. Oixa入teús), the name of several ancient towus in Greece. 1. In Messemia, in the plain of Stensclerus. It was in rnins in the time of Eparminodas (l'aus. iv. 26. §6). an! its position was a inatter of dispute in later times. Strabo identified it with Andania, the ancient residence of the Messenian kings (viii. pp. 339, $350.360, ~ x$. p. 448), and Pausmins with Carnasium, which was only 8 stadia distant from Andania, and upon the river Charadrus. (Paus. is. 2. $\S 2$, iv. 33. §4.) Carnasinm, in the time of Pausanias, wats the name given to a grove of eypresses, in which were statues of Apsiln Carneins, of Hermes Criophorus, and of lersephene. It was here that the mystic rites of the great guddemes were celebrated, and that the urn was prowervel containing the bones of Eurytus, the soth of Melanens (l'aus. ic. 33. S§ 4. 5.)
2. In Euboea, in the district of Eretria. (Hecat ap. Paus. iv, 2. § 3 ; Soph. Trach. 74 ; Strab. ix. 1. 43N, x. p. 448 ; Stoph. D. s. r.)
3. In Thessaly, on the Penuins, between Pelinna to the east and Tricea to the west, ant far from Ithome. (Strab, viii. pp. 339, 350, ix. p. 438, x. p. 448: Paus, iv, 2. § 3: Steph. 13. s. v.)
4. In the territory of Truchis. (Nitrab. viii. p. 339, x. p. 448: Stephl. B. s. r.)
5. In Actolia. (Stral), x. p. 448.) Each of these cities was considered by the respective inhabitants as the resilence of the eelebrated Eurytus, who was conquered by Horcules, and the capture of whose city was the su ject of an epir poem called Oixadias äincots, which was ascribed to Honer or Cresphy-

ference of statement npon the subject. The Messenian Oechalia was called the city of Eurytus in the lliad (ii. 596) and the Olyssey (xxi. 13), and this statemicnt was followed hy l'herecydes (ap.Schol. ad suph. Trach. 354) and Paussnias (iv. 2. §3). The Eithoean city was selected by the writer of the poem on the Capture of Oechalia (Schol. ap. Soph. l. c.), by Hecataeus (ap. Paus. l. c.), and by Strabo ( $\mathrm{x}, \mathrm{p}, 448$ ). The Thessalian city is mentioned as the resideace of Eurytus in another passage of the lliad (ii. 730 ); and K. O. Mïller supposes that this was the city of the original fable. (Durians, vol. i. p. 426, sea., transl.)

OECHARDES (Oľđápōns, Ptol. vi. 16. §§ 3, 4), a river of Serica, the sourees of which Ptolemy ( $L \mathrm{c}$.) places io the Auxasii M., Asmiraei M., and Casii M., the latter of which mountain ranges we may safely identify with the cbain of Kaschgar. The statement of Ptolemy, coming through Marinns, who derived his knowledge of the trading route of the Seres from Titisnus of Macedonia, also called Maës, the son of a merchant who had sent his commercial agents into that country (Ptol. i. 11. §7), indicates a certain amount of acquaintance with that singular depression in Ceatral Asia which lies to the E. of Pamir, the structure of which has been inferred from the direction of its water-courses. The Oecbardes may be considered to represent the river formed by the union of the streams of Khotan, Yarkand, Kaschgar, and Ushi, and which flows close to the bills at the base of Thian-Schar. The Oechladae (Oixápoóa, Ptol. vi. 16. § 4) deriving their rame from the river must be assigned to this district. [Serica.]
[E. B. J.]
OEDANES. [Dyardanes.]
OENEANDA. [OENOANDA.]
OENEON (Oiveẃv), a town of the Locri Ozolae, east of Niupactus, possessing a port and a ssered enclosnre of the Nemeian Zeus, where Hesiod mas said to bave been killed. It was from this place that Demosthenes set ont on bis expedition iato Aetolia, in B. C. 426 , and to which be returned with the remnant of his forces. Leake supposes that the territory of Oeneon was separated from that of Naupactus by the river Morno, and that Oeneon perhaps stood at Muguila, or near the fountain Ambla. (Tbue, iii. 95, seq.; Steph. B. s. v.; Leake, Northcrn Greece, vol. ii. p. 616 .)

OENEUS (Oivev́s), a river of Pannonia. a tribntary of the Savus (1'tol. ii. 17. § 2). In the Penting Tahle it is called Indenes, and now bears the name of Unna.
[L. S.]
OENI'ADAE 1. (Oivcáóou, Thuc, et alii; Oivecáous, Steph. B. s. v.: Eth. Oivúdou: Trikurdho), a town in Acarnania, situated on the W. bank of the Achelous, about 10 miles from its month. It was one of the most important of the Acarnanian towns, being strongly fortified both by mature and by art, and commanding the whole of the south of Acamania. It mas surrounded by marshes, many of them of great extent and depth, which rendered it quite inaccessible in the winter to an invading force. Its territory appears to have extended on both sides of the Achelous, and to have consisted of the district ealled l'aracheloitis, which was very fertile. It seems to have derived its name from the mythisal Oeneus, the great Aetolian hern. The town is first mentioned ribut B. C. 4.55 . The Messenians, who Lad been settled at Naupactus by the Athenians at the end of the Third Messenian War (455), shortly Bfforvards myle fit (aly dition against Oeniadac,
which they took; but after holding it for a year, they were attacked by the Acarnanians and compelled to abandon the town. (Paus. iv. 25.) Oeniadae is represented at that time as an enemy of Athens, which is said to have been one of the reasons that induced the Messenians to attack the place. Twenty-three ycars before the Peloponnesian War (n. C. 454) Pericles laid siege to the town, bnt was unable to take it. (Thuc. i. 11 l ; Diod. xi. 85.) In the P'eloponnesian War, Oeniadae still continued opposed to the Athenians, and was the only Acarnanian towu, with the exception of Astacus, which sided with the Lacedaemonians. In the third year of the war (429) Phormion made an expedition into Acarnania to secure the Athenian ascendancy ; but though he took Astacus, he did not continue to march against Oeniadae, because it was the winter, at which season the marshes secured the town from all attack. In the following year (428) his son Asopius sailed up the Achelons, and ravaged the territory of Oeniadae; but it was not till 424 that Demosthenes, assisted by all the other Acarnanians, compelled the town to join the Athenian alliance. (Thuc. ii. 102, iii. 7, iv. 77.) It continued to be a place of great importance during the Macedonian and Roman wars. In the time of Alexander the Great, the Aetolians, who had extended their dominions on the W. bank of the Achelous, succeeded in obtaining possession of Oeniadae, and expelled its inlabitants in so cruel a manner that they were threatened with the vengeance of Alexander. (Diod. xviii. 8.) Oeniadae remained in the hands of the Aetolians till 219, when it was taken by Philip, king of Macedonia. This monarch, aware of the importance of the place, strongly fortified the citadel, and commenced uniting the harbour and the arsenal with the citadel by means of walls. (Polyh. iv. 65.) In 211 Oeniadae, together with the adjacent Nesus ( $\mathrm{N} \hat{\mathrm{j}}$ oos) or Nasus, was taken by the Romans, under II. Valerius Laevinus, and given to the Aetolians, who were then their allies; but in 189 it was restored to the Acarnanians by virtue of one of the conditions of the peace made between the Romans and Aetolians in that year. (Pol. ix. 39; Liv. xxvi. 24; Polyb. xxii. 15; Liv. xxxviii. 11.) From this period Oeniadae disappears from history; but it continued to esist in the time of Strabo ( $x$. p. 459).

The exact site of Oeniadae was long a matter of dispute. Dodwell and Gell supposed the rains on the eastern side of the Achelons to represent Oeniadae; hat these ruins are those of Pleuron. [Pleuros.] The trae position of Oeniadae has now been fixed with certainty by Leake, and his account has been confirmed by DIure, who has since visited the spot. Its ruins are found at the modern Trikardho, on the W. bank of the Achelous, and are surrounded by morasses on every side. To the N. these swamps deepen into a reedy marsh or lake, now called Lesini or Katokhi, and by the ancients Melite. In this lake is a small island, probably the same as the Nasos mentioned above. Thucydides Is not quite correct in his statement (ii. 102) that the marshes around the city were cansed by the Achelous alone; he appears to take no notice of the lake of Melite, which afforded a much greater protection to the city than the Achelons, and which bas no connection with this river. The city ocenpied an extensive insulated bill, from the southern extremity of which there stretches out a long slope in the directiou of the Achelons, connecting the bill with the plain. The entire circuit of the fortifications still
exists, and cannot be much less than three milcs. The walls, which are chiefly of polygonal construction, are in an excellent state of preservation, often to a height of from 10 to 12 fcet. Towarda the N. of the city was the port, communicating with the sea by a deep river or creek running up through the contiguous marsh to Petala on the coast.

Leake discovered the ruins of a theatre, which stood near the middle of the city ; but the most interesting remains in the place are its arched posterns or sallyports, and a larger arched gateway leading from the port to the city. These arched gateways appear to be of great antiqnity, and prove that the arch was known in Greece at a much earlier period than is usually supposed. Drawings of several of these gateways are given by Mure. (Leake, Northern Greece, vol. iii. p. 556, seq.; Mure, Journal of a Tour in Greece, vol. i. p. 106, seq.; see also, respectirg the arches at Oeniadae, Leake, Peloponnesinca, p 121.)

Strabo (x. p. 450 ) speaks of a town called Old Oenia ( $\grave{\eta}$ тancuà Oivaia*), which was deserted in his time, and which he describes as midway between Stratus and the sea. New Oenia ( $\bar{\eta} \nu \bar{\nu} \nu$ Oivaia), which he places 70 stadia ahove the mouth of the Achelons, is the celebrated town of Oeniadae, spoken of above. The history of Old Oenia is unknown. Leake conjectures that it may possibly have been Erysiche ( $\mathrm{E} p \boldsymbol{\mathrm { v }}$ ($(\chi \eta$ ), which Stephanus supposes to be the same as Oeniadae; but this is a mistake, as Strabo quotes the authority of the poet Apollodorns to prove that the Erysichaei were a people in the interior of Acarnania. Leake places Old Oenia at Palea Mani, where he found some Hellenic remains. (Steph. B. s.v. Oiveıáóaı; Strab. x. p. 460 ; Leake, Northern Greece, vol. iii. p. 524, seq.)
2. A city of Thessaly, in the district Oetaea (Strab. ix. p. 434; Steph. B. s.v.)

coin of oeniadae.
OENIUS (Ơ̌hos), also called Oenö̈ (Oivón, Arrian, Peripl. Pout. Eux. p. 16), $n$ small river of Pontus, emptying itself into the Euxine, 30 stadia east of the mouth of the Thoaris. (Anonym. Peripl. Pont. Eux. p. 11.)
[L. S.]
OENOANDA (Oivoá $\nu \delta \alpha$ ), a town in the extreme west of Pisidia, belonging to the territory of Cibyra, with which and Balbura and Bubon it formed a tetrapolis, a political confederacy in which each town had one vote, while Cibyra had two. (Strals, xiii. p. 631 ; Steph. B. s. $v . ;$ Liv. $x$ s.viii. 37 ; Plin. v. 28 ; comp. Cibyra.) The town is mentioned as late as the time of Hierocles, who, however (p. 685), calls it ly the corrupt name of Enoanda. [L. S.]

[^18]Digitized by Microsoft ©

OEXOOBARAS (OivoGápas or Oivomápas), a river of the plain of Autioch, in Syria, at which, according to Stuabo (xvi. p. 751). P'tolemy Philometer, baving conquered Alexander Balas in battle, died of his wounds. It has been iflentified with the Lphrenus, modern Aphreen, which, rising in the roots of Auams Mons (. Imadaghy), runsouthward through the plain of Cyrrhestica, until it falls into the small lake, which receives also the Lahotas and the Areenthus, from which their united waters run westward to join the Grontes coming from the suth. The Oenoparas is the eastermmat of the three streams. It is unguestionably the Afrin of Abulfeda. (Tabule Syr., Supplementa. 1. 152. ed. Koehler; Chesnes, E.xpectition, wol, i. 1p. 407, 423.)
[G. W.]
OE'SOE (Oiron). 1. A small torn on the narthweat eratt of the island of Iearis. (Strab. xis. p. 639 ; Steph. B. s.v. ; Athen. i. p. 30.) This town was probably situated in the fertile plain below the modern Mesaria. The name of the town seems to be derived from the wine grown in its neighbourhood on the slopes of Mount Pramnus, though others beliese that the learian Oenoë was a colony of the Attic town of the same name. (Comp. Ross, Reisen avf den Griceh. Inseln, ii. Ip. 159, 162.)
2. A port-town on the coast of Pontus, at the mouth of the river O-nius, which still bears its ancient name of Oenoï under the corrupt form Unieh. (Arrian, Peripl. Pont. Eux. p. 16: Auonym. Peripl. p. 11 ; comp. Hamilton, Researches, i. p. 271.)
3. An ancient name of the island of Sicinus. [sictint*] [ $\mathrm{I}, \mathrm{S}$, . $]$
OE'MOE (Oivón: Eth. Oivoaños, Oivaîos). 1. An Attic demus near Marathon, [Marathos.]
2. An Attic demus near Eleutherae, upon the confioes of Bocotia. [Yol. I. p. 329 , No. 43.]
3. A furtress in the territory of Corinth. [Vol. I. p. 685, b. $]$
4. Or Oexe (Otyn. Steph. B. s, v.), a small town in the Arceia, west of Argos, on the left bank of the river Cbaradrus, and on the southern (the Priiiis) of the two ruads laading from Argos to Mantineia. Abuse the town was the mountain Artenisium (Malerús), with a temple of Artemis on the summit, worshipped by the inbabitants of Oenoe under the name of Oenoatis (Oivwätıs). The t wh was named by Diomedes after his grandfather Ocmeas, who died lere. In the reighbourhood of thi town the Athenians and Argives gained a victory orer the lacedaemonians. (Paus, ii. 15. § 2 , i. $15 . \S 1, \mathrm{x} .10$. § 4 : Aphllod. i. \&. § 6; Steph. B. s.v.) Leake orikinally placed Onne naar the left bank of the Charsulrus ; but in his later work he has changed his opinion, and supposes it to have stood near the right bank of the Inachus. His original supposition, however, seems to be the correct one; since there can lie little doubt that Ross has rightly described the eourse of the two ruads leading from Aryos to Mantintia. (Leake, Morea, vol. ii. P. 413, Pelopon. p. 266; Row , Reisen im Pelopmnurs, p. 133.)
5. Or Boeosos, a tomn of Elis, near the Homeric Effyra. (Strab. viii. p. 338.) [Vol. I. p. 839. b.]
()FNOLADOX (Oivo入ásur, Stacliasm. §96), a riser in the distriet of the African Syrtes, hear the town of Amallaen ('Auapaía, Sturliasm. l. c.). where there was a tuser and a cove. Barth (Handerungen, pp. 300,359 ) refers it to the Warly Msid. where

th. sandy waste; and Muiller, in his map to illustrate the Coast-describer (Tab. in Geog. Graec, Min. Par. 18.55), places Amaraea at Ras-al-Homrak; where Admiral Smyth (Mediterranean. p. 456) marks cove ruins, and Admiral Beechey (Exped. to N. Coast of Africa, p. 72) the ruins of sereral baths with tesselated pavements, to the W. of which there is a stream flowing from the IV'ady Mata. [E. B. J.] OENONE or OENO'PIA. [AEGINA.]
OENO'PHYTA ( $\tau$ à Oivóфuta), a place in Breotia, where the Athenians under Myronides gained a signal victory over the Boeotians in B. C. 456 . As this victory was followed by the destruction of Tanagra, there can be little dunbt that it was in the territory of the latter city, not far from the frontier of Attica. Its name, moreover, shows that it was the place where the wine was chiefly produced, for which the territory of Tanagra was celebrated. Leake therefore places it at l'nia (written OInia, perbaps a corruption of Oivб́ $\varphi v T a$ ), which stands in a commanding position near the left bank of the Asopus, between Tanagra and Oropus. (Thue. i. 108, iv. 95 ; Leake, Jorthern Greece, vol. ii. p. 463.)

OENO'TRIA (Oivatpia), was the name given by the Greeks in very early times to the southernmost portion of Italy. That country was inhabited at the period when the Greeks first became acquainted with it, and began to colonise its shores, hy a people whom they called Oenotri or Oenotrin (Oinwtpol or Oivérpiot). Whether the appellation was a national une, or was even known to the people themselves, we have no means of judging; but the Greek writers mention several other tribes in the same part of Italy, by the names of Chones, Morgetes, and Itali, all of whom they regarded as of the same race with the Oenotrians; the two former being expressly called Oenotrian tribes [Chones; Morgetes], while the name of ltali was, according to the account generally received, applied to the Oenotrians in general. Antiochas of Syracuse distinctly spoke of the Oenotri and Itali as the same people (op. Strab. vi. p. 254), and defined the boundaries of Oenotria (under which name he inclnded the countries subsequently known as Lucenia and Bruttium exclusive of lapygia) as identical with those of Italia (ap. Strab. l. c.). A well-known tradition, adopted by Virgil, represented the Oenotrians as taking the name of ltalians, from a chief or king of the name of lalus (Dionys. i. 12, 35; Virg. Aen. i. 533 ; Arist. Pol. vii. 10); but it seems probable that this is only one of the mythical tales so common among the Greeks: and whether the name of 1tali was only the native appellation of the people whom the Greeks called Oenotrians, or was originally that of a particnlar tribe, like the Chones and Sorgetes, which was gradually extended to the whole nation, it seems certain that, in the days of Antiochns, the names Oenotri and 1tali, Oenotria and Italia, were regaraed as identical in significa. tion. The former names, however, bad not yet fallen into disuse; at least llerodotus employs the name of Oenotria, as one familiar to his readers, to designate the cuuntry in which the Phocaean colnny of Velia was founded. (Herod. i. 167.) But the gradual extension of the name of Italia, as well as the conquest of the Oenotrian territory by the Sabellian races of the Lucanians and Bruttians, naturally led to the disuse of their name: and though this is still employed by Aristotle (Pol, vii. 10), it F/olly in reforeaceft the ancient customs and
labits of the people，and does not prove that the name was still in corrent use in bis time．Scymnus Chius uses the name Oenotria in a different sense， as distingnished from Italia，and confines it to a part only of Lucania；but this seems to be certaialy op－ posed to the common usage，and probably arises from some misconception．（Scymn．Ch．244，300．）

There seems no donbt that the Oenotrians were a Pelasgic race，akin to the population of Epirns and the adjoining tract on the E．of the Adriatic．This was evidently the opinion of tbose Greek writers who represented Oenotrus as one of the sons of Lycaon， the son of Pelasgus，who emigrated from Arcadia at a very early period．（Pherecydes，ap．Dionys．i． 13；Pans，viii．3．§5．）The statement of Pausa－ nias，that this was the most ancient migration of which he had any knowledge，shows that the Oeno－ trians were considered by the Greeks as the earliest inhabitants of the ltalian peninsnla．But a more conclusive testimony is the incidental notice in Ste－ phanus of Byzantinm，that the Greeks in Southern Italy called the native population，whom they bad reduced to a state of serfiom like the Penestac in Thessaly and the Helots in Laconia，by the name of Pelasgi．（Steph．Byz．s．v．Xĩou．）These serfs conld be no other than the Oenotrians．Other argu－ ments for their Pelasgic origin may be deduced from the recurrence of the same names in Southern Italy and in Epirus，as the Chones and Chaones，Pan－ dosia，and Acheron，\＆c．Aristotle also notices the custom of $\sigma v \sigma \sigma$ itiau，or feasting at public tables，as subsisting from a very early period among the Oeno－ trians as well as in Crete．（Arist．Pol．vii．10．）

The relation of the Oenotrians to the other tribes of Italy，and their subjection by the Lucanians，a Sabellian race from the north，have been already given in the article Italia．
［E．H．B．］
 were two small islands off the shore of Lacania， nearly opposite Velia．（Strab．vi．p． 252 ；Plin．iii． 7．s．13．）Their individual names，according to Pliny，were Pontia and Iscia．Cloverins（Ital．p． 1260）speaks of them as still existing under their ancient names；hut they are mere rocks，too small to be marked on ordinary modern maps．［E H．B．］

OENUS（Oivoûs：Eth．Oivoúvtios），a small town in Laconia，celebrated for its wine，from which the river Oenns，a tributary of the Eurotas，appears to have derived its name．From its being de－cribed by Athenaens as near Pitane，one of the divisions of Sparta，it was probably sitnated near the junction of the Oemus and the Eurotas．（Steph．B．s，v，；Athen． i．p．31．）The river Oenus，now called Kelefina， rises in the watershed of MI．Parnon，and，after flowing in a general south－westerly direction，falls iuto the Eurotas，at the distance of little more than a mile from Sparta．（Polyh．ii．65， 66 ；Liv．xxxiv． 28．）The principal tributary of the Oenns was the Gorgylus（「＇́pqu入os，Polyb．ii．66），probably the river of Irestenó．（Leake，Peloponnesiaca，p．347．）

OENUSSAE（Oivô̂oruu，Oivoioal）．1．A gronp of islands off the coast of Messenia．［Vol． II．p．342，b．］

2．A group of islands between Chios and the Asiatic coast．（Herod．i． 165 ；Thne．viii． 24 ；Steph． B．s．v．）They are five in number，now called Spol－ madores or Ergonisi．Pliny（v．31．s．38）mentions only one island．
oeroe．［Platafae．］
OESCUS．1．（O／̄ $\sigma$ коs，Ptol．iii．10．§ 10 ，viii． 11．§6），a town of the Triballi in Lower Moesia，
seated near the mouth of the river of the same name， and on the road from Viminacium to Nicomedia， 12 miles E．from Valcriana，and 14 miles IV．from Utnm．（Itin．Ant．p．220．）It was the station of the Legio V．Maced．Prucopins，who calls the town ＇I $\alpha \kappa \delta \delta$ ，says that it was fortified by Jastini：an（de Aed．iv．6）．Usually identified with Oreszoritz， though some hold it to be Glava．

2．A river of Lower Moesia，called by Thacydides （ii．96）${ }^{\text {ºnktos，and by Herodotus（iv，49）ミ̌kios．}}$ Pliny（iii．26．s．29）places its sonrce in Mount Rhodope；Thncydides（l．c．）in Mount Scomins， which adjoined Rhodope．Its true source，however， is on the W．side of Haemus，whence it pursues its course to the Danube．It is now called the Isker or Esker．
［T．H．D．］
OESTRYMNIDES．［Britannic．ae Insulie， Vol．I．p．433．］

OESYME（Oiaúpm，Thuc．iv．107；Scyl．p． 27 （the MS．incorrectly $\Sigma$ さ $\sigma v{ }^{\prime} \mu \eta$ ）；Nicymn．Ch．655； Diod．Sic．xii． 68 （by an error of the MIS．$\Sigma \dot{v} \mu \eta$ ）； Ptol．iii．13．§9；Plin．iv． 18 ；Armenidas，ap． Athen．p． 31 ：Eth．Oiovpaîos，Steph．B．），a Tha－ sian colony in Dieris，which，with Galepsus，was taken by Brasidas，after the capture of Amphipolis． （Thuc．l．c．）Its position must be sought at some point on the coast between Nefter and the mouth of the Strymon．（Leake，Northern Greece，vol．iii．P． 179；Consinery，Joyage dans la Mucedoine，vol．ii． p．69．）
［E．B．J．］
OETA（Oítn：Eth．Oitaios），a monntain in the sonth of Thessaly，which branches off from Mt． Pindns，runs in a south－easterly direction，and forms the northern barrier of Central Greece．The only entrance into Central Greece from the north is throngh the narrow opening left between Mt．Oeta and the sea，celebrated as the pass of Thermopylae． ［Thermopylae］．Mt．Oeta is nom called Fataró－ thra，and its bighest summit is 7071 feet．（Journal of Geogr．Soc．vol．vii．p．94．）The monntain im－ mediately above Thermopylae is called Callidromon buth by Strabo and Livy．（Strab，ix．p．428；Liv． xxxvi．15．）The latter writer says that Callidro－ mon is the highest summit of Mt．Oeta；and Strabo agrees with him in describing the summit nearest to Theruopylae as the highest part of the range；but in this opinion they were both mistaken，Mt．Patrio－ tiko，which lies more to tbe mest，being considerably higher．Strabo describes the proper Oeta as 200 stadia in length．It is celebrated in ing thology as the scene of the death of Hercules，whence the Roman poets give to this hero the epithet of Oetaens．From this mountain the southern district of Thessaly was called Oetaea（Oitaia，Strah．ix．pp．430，432．434）， and its inhabitants Octaei（Oitaiot，Herod．vii．21\％； Thuc．iii． 92 ；Strab．ix，p．416）．There was also a city，Oeta，said to have been founded by Amphissus， son of Apollo and Dryope（Anton．Liberal．c．32）， which Stephanas B．（s．v．）describes as a city of the Malians．Leake places it at the foot of $\mathrm{M} / \mathrm{L}$ ．Patri－ ótiko，and conjectures that it was the same as the sacied city mentioned by Callimachus．（Hymn，in Del．287．）［See Vol．II．p．255．］（Leake，Northern Greece，vol．ii．p． 4, seq．）

OETENSII（Oíñ́vatot，Ptol．iii．10．§9），a tribe in the eastern part of Mocsia Inferior．［T．H．D．］ oETYLUS（Oйтu入as，Hom．，Paus，，Stejh．B； Beitulos，Böckh，Inscr．no．1323；Bitu入a，Ptol．iii．
 Strab．viii．p．360，corrected in accordance with the inscription），a town of Laconia on the eastern side
of the Mlessenian gulf, represented by the modern town of Jitylo, which has borrowed its name from it. Pausanias says that it was 80 stadia from Thalamae and 150 from Messa; the latter distance is too great, hut there is no doubt of the identity of Octylus and I'itylo; and it appears that Pausamias made a mistake in the names, as the distance between Octylus and Caenepolis is 150 stadia. Octylus is mentioned by llomer, and was at a later time one of the Eleuthero-Laconian towns. It was still governed lyy its ephors in the third century of the Christian era. I'ansanias san at Oetylus a temple of Sarapis, and a worden statue of Apmllo Carneins in the acora. Anong the modern bouses of Jelylo thi* are remains of Hellonic uralls, and in the church a licantiful fluted lonic column supporting a beam at one end of the aisle, and three or four lonic capitals in the wall of the churelh, probally the remains of the temple of Sarapis, ( H m. Il. ii. 585 ; Strab, viii. p. 360 ; Paus, iin. 21. § 7, 25. § 10,26 . § 1; Steph. 1. s. I.; P’ul. l. c.; Bückh, l. c.; Morritt, in Walpole's T'urkry, p. 54 ; Leake, $1 /$ orea, vol. i. p. 313 ; Bublaye, Rechurches, ffc. p. 92 ; Curtius, Pcloponnesos, vol. ii. p. 283.)

OEUA1 (OTov), a momntain fortress situated in castern Locris, alune opas, and destroyed by an earthquake. (Ntrab. i. p. 60.) According to Gell its ruins are to be seen on a steep hill, 25 miautes above Livanitis. (Itin. p. 232.)

OEUNI or IUAI (Oióv, Oion 'lóp: Eth. Oiátns, 'Iárəps), the chirf town of the distriet Sciritis in Laconia, commanded the pass through which was the ronil from Tegea to Sparia. It probally staod in the Klisura, or narrow pass throngh the watershed of the mountains forming the natural boundary between Laconia and Arcadia. When the Theban anny mulder Epraninondas first invaded Laconia in four divisions, by four different passes, the only division which encomtered any resistance was the one which barched through the pass defended by Oeum. But the Spartan Ischolaus, who commanded a body of trong at this place, was overpowered by superior numbers; and the invading force thereapon prorechel to Sollasia, where they were joined hy the other divisims of the aruy. (Xen. Mell. vi. 5. §§ 24-26.) In Xemophon the town is called 'Ióv and the imhabitants 'iutat; but the form Oiòv or Olop is prabably mare errrect. Surh towns or villages, sitnated unom monatainous lewhts, are frequently (alled Ocum or Owa. (Comp. Harperat. s. $r$. Olov.) Irobably the Oeum in sciritis is referred to in Ste-
 Murtuis' oi roдitas סiâral.
()eum is not mentioned subsequently, unless we smupse it to be thu same place is lasi's (Ia.aos), whith P'ansunias dencrithes as situated within the frentiers of Laconia, but lelonging to the Achaeans. (Pans, vii. 13. § 7 : compl, Suil. $s, x^{\text {. }}$ "laros; Leake, Morea, val.it. p. 30 ; lisos, Litizn im I'eloponnes, p. 179: Cutms, I'elopenmesus, val. ii. p. 264.)

oglasti, a small intand in the Tyrthenian or I.igutian sea, between Corsiat and the const of Bitmia. ( $1 \times \mathrm{lm}$. iii. 6. s, t2.) It is nuw ealled Nante Cristo.
[E. 1I. B.]
O(i)"'tid (' $\Omega \gamma v \gamma i n$ ) is the name vixen ly Homer in the Odyevey to the inkand inl ahited lay the nymph C'alypso. He dercituris it ity bhe eontrial pint or

other lands; and the only clue to its position ilat he gives us is that Ulymes reached it after being borne at sea for eight days and nights after he had escaped from Charybdis; and that when he quitted it again he sailed for seventeen days and nights with a fair wind, laving the Great Bear on his left hand (i.c. in an easterly direction), until be came in sight of the land of the Phaeacians. (Hom. Odyss, i. 50, 85, v. $55,268-280$, xii. 448 .) It is hardly necessary to obsurve that the llomeric geooraphy in regard to all these distant lands must be considered as altogether fabulous, and that it is impossible to attaen any value to the distances above given. We are wholly in a loss to account for the localities assigned by the Grucks in later days to the seenes of the Odyssey : it is certain that nothing can less accord with the data (such as they are) supplied hy Homer than the identifications they adopted. Thus the island of Calypso was by many fixed on the const of Bruttimm, near the Lacinian promontory, where there is nothing but a mere rock of very small size, and cluse to the shore. (Plin, iii. 10. s. I5; Swinhurne's Travels, vol. i. p. 225.) Others, again, placed the abode of the goddess in the island of Gatulos (or Gozo), an opinion apparently first adsanced by Callimachus (Strab. i. p. 44, vii. p. 299), and which has at least some semblance of probubility. But the identification of Phaeacia with Corcyra, though more generally adopted in antiquity, has really no more foundatiou than that of Ogygis witb Gaulos: so that the only thing approaching to a geograpbical statement fails on examination. It is indeed only the natural desire to give to the creations of poetic fancy a local habitation and tangible reality, that could ever have led to the associating the scenes in the Ody:sey with particular spots in Sicily and ltaly; and the view of Eratosthenes, that the gengraphy of the voyage of Ulysses was wholly the creation of the poet's fancy, is certainly the only one tenable. At the same time it camot be denied that some of the fables there related were founded on rague rumours brought by voyagers, probably P'hoenicians, from these distant lands. Thins the account of Scylla and Charybdis, however esaggerated, was doubtless based on truth. But the very character of these marvels of the far west, and the tales concerning them, in itself excludes the idea that there was any aceurate geograplical knowledge of them. The ancients themselves were at varjance as to whether the wanderings of Llysses took place within the limits of the Dediterramean, or were extended to the orean beyond. (Strab. i.p. 22-26.) The fact, in all probability, is that llomer had ne conception of the distinction oetween the two. It is at least very doubrtul whether he was acquainted even with the existonce of Italy; and the whole expanse of the sea beyond it was undoubtedly to him a region of mystery and fable.

The various opitions put forth by ancient and modern writers conceming the Homeric geografthy are well reviewod by Ukert (Gcographic der Griechen u. Romer, vil. i. part ii. pp. $310-319$ ); and the inferences that maty really be drawn from the hatguaze of the poet himself are elcarly stated by him. (Il. part i. pp. 19-31)
[E. H. B.]
OGYRIS (' $\Omega$ yuprs, Strab, xvi. p. 766), an island, off the sonthern coast of Camania about 2000 atalia, which was traditionally said to contain the tomb of king Erythras, from which the whole sea was

## OISPORIS.

OLBLA.
states that he ohtained this story from Nearchus and Orthagoras (or Pythagoras), who learnt it from Mithrupastes, the son of a Plirygian satrap, to whom he had given a passage in his fleet to Persia. The same name is given to the island in many other geographers (as in Mel. iii. 8. § 6; Dionys. Per. 607; Flin. vi. 28. s. 32; Priscian, Perieg. 605; Fest. Avien. 794 ; Steph. B. s.v.; Suidas, s. v.). The other editions of Strabo read Tup’ṕp $\nu \eta$ and Tvp’ $\hat{\prime} \nu \eta \eta_{1}$ -possibly a corruption of ' $\Omega \gamma u p i v \eta$ or $\Gamma$ rupion ,- the form which Vossius (in Melam, l.c.) has adopted. 'The account, however, preserved in Arrian's Voyage of Nearchus (Indic. 37), differs much from the above. According to him, the fleet sailing westward passed a desert and rocky island called Organa; and, 300 stadia beyond it, came to anchor beside another island called Ooracta; that there the tomb of Erythras was said to exist, and the fleet obtained the aid of Mazene, the chief of the island, who volunteered to accompany it, and pilot it to Susa. It seems generally admitted, that the Organa of Arrian and Ptolemy (vi. 7. §46, who, placing it along the Arabian coast, has evidently adopted the distances of Strabo) is the modern Hormuz, which bears also the name of Gerun, or Jemun. Vincent, however, thinks that it is the modern Arek; or L'Arek. (Joy. Nearchus, i. p. 348.) The distance in Strabo is, perhaps, confounded with the distance the fleet had sailed along the coast of Carmania. Again Nearchus places the tomb of Erythras, not in Organa, but in Ooracta : and Austlaarchides mentions that the land this king reigned over was very fertile, which applies to the latter, and not to the former. (Agatharch. p. 2, ed Hudson.) The same is true of what Pliny states of its size (l. c.). Curtius, withont mentioning its name, evidently alludes to Ogyris (Ormuz), which he places close to the contivent (x. 2), while the Geographer of Pavenna has preserved a remembrance of all the places onder the head of "Colfo Persico," in which be places "Ogiris, Oraclia, Durcadena, Rachos, Orgina" Ooracta is called in Strabo (l.c.) $\Delta$ ф́paктa; in Pliny, Oracla (vi. 28. s. 98) ; in Ptolemy, Oúapó $\chi$ Oa (vi.8.§ 15 ). The ancient name is said to be preserved in the modern Jroct, or Broct. It also derives the name of Kiskmi from the quantity of grapes now found on it. Edrisi calls Jesireh-tuileh, the long island (i. p. 364; cf. also Wellsted's Travels, vol. i. p. 62). The whole of this complicated piece of geography has been fully examined by Vincent, Toy. of Nearchus, vol. i. p. 348, \&c.; Ritter, vol. xii. p. 435.
[V.]
Ol'SPORIS (Olomopls, Ptol. iv. 3. § 14: Opirus, Peut. Tab.; ${ }^{\text {E }}$ E $\quad$ クpos, Stadiasm. § 86), a town of the Greater Syrtis, which Barth (Wanderungen, pp. 368, 378) identifies with Liman Naim, where there is a sandy bay into which ships might send their boats, with alnost all winds, for water, at three wells, situated near the beech. (Beechey, Exped. to N. Const of A frica, p. 173.) The tower, of which the Const-descriher speaks, must be the rnins at Rais Eski, to the E. of Naim.
[E. B. J.]
OLBASA ("OABaca). 1. A town in Cilicia Anpera, at the foot of Mount Taurus, on a trilutary of the Calycadnus. (Itol. v. 8, § 6.) Col. Leake (Asia Minor, p. 320 ) identifies the town of Olhas: with the Olle mentioned by Strabo (xir. p. 672); while in another passage ( p .117 ) he conjectures that Ollasa may at a later period have clanged its name into Clandiupulis, with which accordingly he is inclined to identify it. The former supposition is
possible, lout not the latter, for Strabo places clibe in the interior of Cilicia, between the rivers Lamus and Cydnus, that is, in the monntainous districts of the Taurns. According to tradition, Olbe lum been huilt by Ajax, the son of Teucer; it contained a temple of Zcus, whose priest once ruled over all Cilicia Aspera. (Strab. l. c.) In later times it was recarded as belonging to Isauria, und was the seat of a bishop. (Hierocl. p. 709 ; Basil. I't. Thecleae, ii. 8.) We still possess coins of two of those priestly princes, Polemon and Ajax. (Eckhel, Doctr. Num. vol. iii. p. 26, \&c.) It shonld be observed that Stephanns Byz. (s. v. 'Oג6ia) calls Olbasa or Olbe Olbia.
2. A town in the Lxeamian distriet Antiochiana, in the sonth-west of Cybistra. (Ptol. r. 6. § 17 ; Hierocl. p. 709.)
3. A town in the northern part of Pisiuia, between Pednelissus and Selge. (Ptol, v. 5. §8; Hierocl. p. 680.)
[L. S.]
olbe. [Olbasa, No. 1.]
OLLBIA ('OA6ia, Strab. iv. p. 200, vii. p. 206; Srymn. 806; Ptol. iii. 5. § 28; Artian, Per. p. $20 ;$ Anon. Per. p. 8; Mela, ii. $1 . \S 6$; Jornand. B. Get. 5 ; with the affix Sahia, Ea6ia, Anon. l. c.; on coins in the lonic form always 'OגEin). Pliny (iv. 26) says that it was anciently called Olbropolis, and Miletorolis: the former of these names does not occur elsewhere, and is derived probably from the ethuic mame Olniorolitae ('Onetomoníal, Herod. iv. 18; Snid. s. v. Пoбet $\delta \dot{\omega} \nu t o s)$, which appears on coins as late as the date of Caracalla and Alexander Severus. (Kohler, Mèm. de l'Acad. de St. Petersb. vol. xiv. P. 106 ; Blaramberg, Choic des Méd. Antiques dr Olbiopolis ou d Olbia, Paris, 1822; Mionnet, Descr. des Méd. vol. i. p. 349.) Although the inhatitants always called their city Olbia, strangers were in the habit of calling it by the name of the chief river of Scythia, Borystheaes (Bopuatè injs, Bopoatevis), and the people Borystuesitae (Bopoo $\theta \in \nu \in i t a t$, Herod. l. c.; Dion Chrys. Orat. xzsri. vol. ii. p. 74 ; Lucian, Toxar. 61; Menand. ap. Schol. ad Dionys. Perieg. 311 ; Steph. B. s.v.; Amm. Narc. xxii. 8. §40; Nlacrob. Sat. i. 10). A Grecian colony in Scythia, on the richt bank of the Hypanis, 240 stadia (Anon. l. c.; 200 stadia, Strab. p. 200; 15 M. P., Plin. l. c.) from its mouth, the ruins of which are now found at a place on the W . hank of the Bug, called Stomogit, not far from the village Ilginskoje, about 12 Eng. miles Lelow Nicholaev. This important settlement, which was situated among the Scythian tribes of the Callipidae and Alazones, owed its origin to the Ionic Diletus in B. c. 655. (Anon. Peripl. l. c.; Euseb. Chon.) At an early perind it became a point of the highest importance for the inland trade, which, issuing from thence, was carried on in an easterly and porthern direction as far as Central Asia. It was visited by Herodotus (iv. $17,18,53,78$ ), who oltained his valualle information about Scythia from the Greck traders of Oltia. From the important series of inscriptions in Böckl's collection (Inscr: 20582096), it appears that this city, althongh at times dejendent upon the Scythian or Sarmatian princes, enjoyed the privileges of a free governument. with institutions framed upon the lonic model. Among its eminent names occur those of l'oscidonins (Suidus, s. v.), a sophist and historian, and Splaserus the stoic, a disciple of Zeno of Citiom. (Plnt. Cleom. 2.) There has been much controvers as to the date of the famous inscription (Böckli, No. 20j8)

## OLBIANUS SINUS．

which records the exploits of Prutogenes，who，in the extreme distress of his native city，aided it both with lis purse and person．This inscription，ap－ parently belunging to the period B．c．218－201， mentions the Galatians and Sciri（perhaps the same as those who are afterwards found united with the IIenli and Rugii）as the worst enemies of Obia，a elear proof that in the third century B．c．Celtic tribes had penetrated as far to the E．as the Borysthenes． Dion Cluy＇sustom（ 1 rat．xxxvi．1．76），who came to Olbia when he escaped from Danitim＇s edict， relates how it had been destroyed by the Getae about 150 years before the date of lis arrival，or about in．C． 50 ，but had bern restored by the whin－ haditants．Frou the inseriptions it appears that Angustus and Tiberins conferred favours on a cer－ tain Abatias of Olbia（No，2060），who，in gratituie， erected a portico in their honom（No．2087），whale Antoninus Piusasinted them against the Tauro－Scy－ thians．（Jut．Capit．Autom．9）The citizens erected statues to Caramalia and Geta（No．2091）．The city was in all prob．bility destroyed in the invasion of the Goths A．D．250，as the name does not occur hence－ forth in history．For coins of Olbia，besides the works alrealy iquoted，see Eekbel，vol．ii．p． 3. （Pallas，Reise，wol．ii．p． 507 ；Clarke，Trav．vol，it． 1． 351 ；Murawien Apmolis Keise，p．27；Bückh， Inser．vol，ii．एp．86－89；Niebuhr，Kleine Schrift．p．352：Schafarik，S＇uc．Alt．vol．i．p． 397 ； Creuzer，Heidelbery．Jihnobuch，1822，p．1235； Bäbr，Eiscursus nd Herod．iv．18）［E．B．J．］

COLS OF OLBLA．
O＇LB1A（O＾Eia：Eth．＇One九ayós，Othiensis： Tervanora），one of the most considerable cities of Sardmia，situated on the E coast of the island not far from its NE．extremity，in the immermost recess or light of a deep bay now called the Golfo di Ter－ ranora．Accorling to Pansanias it was one of the mont ancient cities in the island，having been founded hy the colony of Thespiadac under Iolaus，the com－ punion of Horcules，with whom were associnted a busly of Athenians，who founded a separate city， which thuy named ogryle．（Paus，x．17．\＆ 5 ； Diol．iv． 29 ；Solin．1．§61．）The name of Olbia ceraminly seems to indieate that the city wais of Greck mizin：lout，with the exception of this myth－ ical legend，we have no acemunts of its fomblation． After the Roman conquest of the ivland it hecame one of the mast important towns in Sardinia；and from its proximity to ltaly and its opportnne port， became the oriinary paint of communication with the islum，and the phew where the Roman governors and others who vivited Surdinia uxnally landed． （Cic．ud（2．F），ii，3．§7，6．§7．）In the l＇irst Punie Wir it was the seene of a naval engagenent be－ tween the consal Cornelins and a Carthaginian fleet，which hal taken refoge in its sparimes port； but was attacked and defeated there ly Comelins， who followed up his alvantage loy taking the city， n．c． 259 ．（\％onar，viii． 11 ；Flor．ii． 2 ．\＆ 16 ；Val． Max．v．1．§ 2．）In the Scrand Punic War（n．c． 210）its territory wasemavard dy a Cartiaginiay
fleet．（fiv：xxvii．6．）Under the reign of Ho－ norius，Olbia is still mentioned by Claudian as one of the priucipal sea－ports of Sardinia；and the Itine－ raries give more than one line of rond proceeding from thence towards different parts of the ishand． （Claudian，B．Gild． 519 ；Itin．Ant．pp，79，80，82．） The name is there written Ulbis：in the middle ages it came to be known as Civita，and obtained its modern appeliation of Terranova from the Spaniards．
l＇tolemy distinguishes the port of Olbia（＇OX－ Giavos $\lambda u \mu \hat{\eta} v$ ，iii．3．§ 4）from the eity itself：lie probably applies this name to the whole of the ：prious bay or inlet now known as the Gulf of Terranova，and the position given is that of the entrance．
［E．H．B．］
0＇LBIA（＇O入вia：Eth．＇O入6ьomu入íns，and＇Oג－ Gravós）．Stephanus（s．v．＇OגEia）speaks of one city of this name as a Lirurian city，by which he means the Olhia on the Ligurian coast of Gallia； for the name Ollia appears to be Greek．Mela（ii． 5），who proceeds from cast to west in enumerating the cities on the Mediterranean coat of Gallia，places Ollia between Forum Julii（Frejus）and Massilia （Murseille）．The order of place is this：Forum Julii， Athenopolis，Olbia，Tanruis，Citharistes，Massilia． Strabo（iv．p．184），who procceds from west to east int his enumeration of the cities of this cuast，mentions Massilia，Taurontinm，Olbia，and Autipolis，and Nicaca．He adds that the port of Augustus，which they call Formm Julii，is between Olbia and An－ tipolis（Antibes）．The Massaliots built Olbia，with the other places un this coast，as a defence against the Salyes and the Ligures of the Alps．（Strab． p．180．）Ptolemy（ii．10．§ 8）places Olbia be－ tween the promontory Citharistes（Cap Cicier） and the mouth of the river Argenteus（ $A$ rgenets）， west of Frejus．There is nothing that fixes the site of Oilhia with precision ；and we must accept D＇Anville＇s conjecture that OIbia was at a place now called Eoube，between Cap Combe and Bréganson． Furbiger accepts the conjectnre that Olbia was at Et．Trapez，which he supports by saying that S：rabo places Oibia 600 stadia from Massilia ；but Strabo places Forum Julii 600 stadia from Massilia．［G．L．］
ólB1A（＇Oגsia）．1．A town in Bithynia，on the bay called，after it，the Sinus Olbianus（commonly Sinus Astacenns），was in all probability only another name for Astacus［Astacts］．Pliny（v，43）is prubably mistaken in saying that Olbia was the ancient name for Nicaca in Bithynia；he seems to confound Nicaera with Astacus．

2．The westernmost town on the coast of Pam－ phylia．（Strab．xiv．pp．666，foll．；Plin．v．26．） 1toleny（v．5．§ 2），consistently with this description， places it between Phaselis and Attaleia．Stephnnus 13．（s．v．）blames Philu for ascribing this town to P＇amphylia，since，as he axserts，it was situated in the territory of the sulymi，aml its real name was Olba； lont the critic is here himself at fault，confounding Olbia with the Pisidan Olbasa．Strabo describes our Ollia as a strong fortress，and its inhabitants colonised the S．ycian town of Cyilrema．

3．A town of Cilicia，mentionel only by Stephanus Byz．（s．v．），who may possibly have been thinking of the Cilician Ollasa or Olte．
［L．S．S．］
OLBIA．［Ot．1BA．］
OLBIA＇NI S SINUS（＇OגGiavès kóx $\pi$（os），only amother name for the simus Asmacenus，the town of Ohbia lecing nko called Astacus．（Scylax．p．35；

O＇LCADES（＇OAsádes），a people of Hispania Baetica，dwelling N．of Carthago Nova，on the upper course of the Anas，nnd in the E．part of the territory accupied at a later date by the Oretani．They are mentioned only in the wars of the Carthaginians with the Iberisns，and after that period vanish en－ tirely from history．Haunibal during his wars in Italy transplanted a colony of them into Alrica． Their chief town was Althaea．（Polyb．iii．14．23， and 13． 5 ；Liv．xxi． 5 ；Steph．B．s．v．：Suidas， s．v．）
［T．H．D．］
OLCI＇NIUM（Oú入kívoy，Ptol ii．17．§ 5；Ol－ chinium，Plin．iii．26：Eth．Olciniatne），a town of some importance in Illyricum，which surrendered to the Romans at the commencement of bostilities with Gentius，and which，in consequence，received the rrivilege of freedom and immunity from taxation． （Liv，xlv．26．）Dulcigno or Clkin，as it is still called．is identified with this town．（Hahn，Alba－ nesische Studien，p．262．）
［E．B．J．］
oLEARUS．［Olmancs．］
OLEASTRUSI（＇OגÉaбtpov，Ptol．ii．4．§ 14）． 1．A town in Hispania Baetica，in the jurisdiction of Gades，with a grove of the same name near it． （Mela，iii．1．§ 4 ；Plin．iii．I．s．3．）

2．A town of the Cosetani in Hispania Tarraco－ nensis，on the road from Dertosa to Tarraco（Itin． Ant．399）．Probably the same town mentioned by Strabo（iii．p．159），but erroneously placed by him near Saguntum．It seems also to have given name to the lead mentinned by Pliny（xxsiv．17．s．49）． Variously identified with Bolaguer，Miramar，and S．Lucar de Barrameda（Marca，Ifisp．ii．11．p． 142．）
［T．H．D．］
OLEASTRUM PROM．（＇Oגéa⿱\zh7тpov，Y＇tol．iv． 1. § 6），a promontory of Mauretanix，between Russadir and Ahyla，called in the Antonine Itinerary，Ban－ nari Prom．，now Punta di Mazari，in the bight of Titàwán，or Tetuán．
［E．B．J．］
OLE＇NACUMI，a fortress in the N．of Britaonia Romana，and the station of the Ala Prima Herculer （Sot．Prov．）It lay close to the Picts＇wall，and Camden thinks（p．1022）that it occupied the site of Linstoc Castle in the barony of Crosby，not far from Carlisle．Horsley，however（p．I12）takes it to be Old Carlisle，near Wigton，where there are some conspicnous Roman remains．
［T．H．D．］
OLENUS（＊$\Omega \lambda \in \nu 0 s)$ ，$\pi$ town in Galatia，in the west of Ancyra，and belonging to the territory of the Tectosages，is mentioned only by Ptolemy（v． 4. § 8 ）．
［L．S．］
O＇LENUS（＇$\Omega$ גevos：Eth．＇$\Omega \lambda$ évios）．1．An ancient town in the S ．of Aetolia，between the Achelous and the Evenus，was named after a son of Zeus or Hephaestus，and is mentioned in the Homeric catzlogue．It was situated near New Pleuron，at the foot of Mount Aracynthus；but its exact site is uncertain．It is said to have been destroyed by the Aeolians；and there were only a few traces of it in the time of Strabo．（Strab．x．pp．451，460；Hom，Il． ji． 638 ；Apollod．i．8．§ 4 ；Hyg．Poët．Astron． 2. § 13；Stat．Theb．iv．104；Steph．B．s．v．）The Roman poets use Olenius as equivalent to Aetolian： thus Tydeus of Calydon in Aetolia is called Olenius Tyrleus．（Stat．Theb．i．402．）

2．A town of Acbria，anl originally one of the 12 Achaean cities，was situated on the coast，and on the left bank of the river Peirus， 40 stadia from Dyme，and 80 stadia from Patrae．Oa the revival of the Achaean Leagne in B．c． 280 ，it appears that Olenus was still in existence，as Strabo says that it
did not join the league；but the inhabitants subse－ quently abandoned the town，and retired to the neighbouring villages of Peirae（ $\Pi$ єipai），and Eury－ teiae（Euputciai），and to Dyme．In the time of Polybius，however，Olenns was no longer inhabited； and in the time of Strabo it was in ruins，and its territory belonged to Dyme．There are some remains of the ancient city at Kato or Palea－Akhuia．（Herod． i． 145 ；Pol．ii． 41 ；Strab．viii．pp．384，386，388； Paus．vii．18．§ 1 ，vii．22．§ 1 ；Plin．iv．6，Olenum； Leake，Morea，vol．ii．p．157，Peloponnesiaca，p． 208 ；Thirlwall，Hist．of Greece，vol．viii．p．82．）

O＇LERUS＇（＇anєpos，Xenion，ap．Steph．B．s．v．： Eth．＇$\Omega \lambda$ épros，Böckh，Inser．vol．ii．No．2555；Eus－ tath．ad Il．ii．p．664），a town of Crete，situated on a hill，with a temple to Athene．In the struggle betreen Caossus and Lyctus，the people of Olerus sided with the latter．（Polyb．iv．53，where the reading＂Optot appears to be a mistake．）In the Descrizione dell Isola di Candia，A．D． 1538 （ap． Mus．Class．Antiq．vol．ii．p．271），the site is occupied by a place called Castel Messelerius．（Hück， Kreta，vol．i．pp．17，424．）
［E．B．J．］
OLGASSIS（＂Oג sible monntain on the frontiers of Paphlagonia and Galatia，extending from the Halys in a south－western direction towards the Sangarius，and containing the sources of the Parthenius．The surrounding country was filled with temples erected by the Paphlagonians． （Strab．xii．p．562．）The mountain mentiuned by Ptolemy（v．4．§ 4）under the name of Licas，Gigas， or Oligas，is probably the same as the Olgassys of Strabo．It still bears its ancient name in the corrupt form of Ulgaz，and modern travellers state that some parts of the monntain are covered with snow nearly all the yenr．
［ $\mathrm{L} . \mathrm{S}$ ．］
OLl＇ARUS（＇תגíapos，Olearus，Plin．，Virg．：Eth．
＇$\Omega \lambda$ tápios：Avtiparo），an island in the Aegaean sea， one of the Cyclades，said by Heracleides to have been colonised by the Sidonians and to be 58 stadia from Paros．（Heracleid．ap．Steph．B．s．v．；Strab． x．p． 485 ；Plin．iv．12．s． 22 ；Virg．Aen．iii． 126．）It possesses a celebrated stalactitic cavern， which has been described by several modern travel－ lers．（Tournefort，Voyage，gc．vol．i．p．146，seq．， Eng．transl．；Leake，Northern Greece，vol．iii．p． 87，seq．；Fiedler，Reise durch Griechenland，vol．ii． p．191，seq．）

OLIBA（＇OXiba，Ptol．ii．6．§55），a town of the Berones in the N．of Hispania Tarraconensis．Ukert （vol．ii．pt．1．p．458）takes it to be the same town as Olbia in Iberia，mentioned by Steph．B．［T．H．D．］

OLI＇CANA（＇Oגikava，Ptol．ii．3．§ 16），a town of the Brigantes in the N．of Britannia Romana；ac－ curding to Camden（p．867）：Ilkley，on the river Wherf in Forkshire．
［T．H．D．］
OLIGYRTUS（＇Oxívoptos，Polyb．iv．11．70； ＇Ovórupros，Plut．Cleom．26），a mountain and fur－ tress situsted in a pass between Stymphalus and Caphyac，Leake places it on a small advanced height of Mt．Skipezi，projecting into the Stympha－ lian plain，on the crest of which are the foundations of a Hellenic wall，formed of large quadrangular stones．（Leake，Morea，vol．iii．p．Il4；Boblaye， Récherches，g̣c．p．154；Curtius，Pelopornesos，vol． i．p．217．）

OLINA．［Gallaecti，p．934，b．］
OLINAS（＇Oגiva потацо仑̂ èrbo入ai）．I＇tolemy （ii．8．c．2）places the mouth of the Olinas river on the const of Celtogalatia Lugdunensis in the country of the Veneli or Unelli ；and the nest place which
he mentions north of the mouth of the Olinas is Nocomagus，or Noriomagus，of the Lexuvii or Lexovii．This is the Orne，which flows into the Athatic below Cam in the department of Calrados． 1）＇Anville says that in the middle age writings the name of the river is Olm，which is easily changed into Orne．Gosselin supposes the Olinas to be the Savie，and there are other conjectures；but the identity of name is the only cridence tlat we can trust in this case．
［G．L．］
OLINTIGl，a maritime town of Hispania Bae－ fica，lying E．of Onoba，（Mela，iii．1．§ 4．）1ts real name seems to have bern Oluntini，as many eoins are found in the neiglibonrhood bearing the inscription olost．（Florm，Med．ii．pp．495，509， iii．p．103；Miomet，Sup．i．p．111，ap．Ukert，vol． ii．p．1．p．340．）Variously identified with Mo－ guer and I＇alos．
［T．H．D．］
OLISIP＇O（＇Oגcogeímon，Ptul．ii．5．§ 4），a city of Lusitania，on the riyht bank of the Tagus，and not far from its month．The name is varionsly written．Thus Pliny（iv，35）has Olisippo：so also the Jin．Ant．If．416，418，req．In Jela（iii． 1. §6），Sulims（c．23），\＆ce，we find Clyssippo，on ae－ count jrobably of the legend mentioned in Strabo， which ascribed its foundation to Ulysses，but which is more correctly reforred to Odysseia in Hispania Batica．［Odrssela．］Umler the Romans it was a municipium，with the additional name of Felicitas Juliat（I＇lin．l．c．）The neighbourhocd of Olisipo was colebrated for a breed of horses of remarkable flectness，which gave rise to the fable that the mares were impregnated by the west wind．（I＇lin．vili．67； Varr．R．R．ii．1，19；Col．vi．27．）It is the molern Lisboa or Lisbon．
［T．H．D．］
 town of Magnesia in Thensaly，mentionel by Homer， who gives it the epithet of＂rigged．＂（Hom．Il，ij． 717．）It possessed a harhour（Scylax，p．25）；and as it was opposite Artemisium in Eubvea（Plut． Them．8），it is placed by Leake on the isthmus commerting the peninsula of Trikhiri with the rest of Magnesia．（Strab．is．p．436；Plin．iv．9．s． 16 ； $\$ \mathrm{~s} \mathrm{~m}_{\mathrm{p}}$ ．B．s．v．；Leake，Northem Greece，vol．iv．p． 384．）

O＇LLLIUS（ Oglin），a river of Cisalpine Gand，and whe of the more considerable of the northern tribu－ tarnes of the Padus．It rises in the Alps，at the foot of the Monte Tonale，flows through the $I$＇al Comomicn（the district of the ancient Camuni），and forms the extensive lake called by Pliny the Lacus Schims，now the Lago d＇${ }^{\prime}$ seo．From thenec it has a coutse of about 80 miles to the Padus，reeciving on its way the tributary streans of the Mela or M／dla，and the Clasins or Chicse．Thoogh one of the most important risers of this part of Italy，its name is mentioned only by Pliny and the Googra－ fher of Ravema．（Ilm．iii．I6．s．20．19．s．23； （iengr．Rav．iv．36．）
［E．II．B．］
OLMiEll＇s．（Boentri，Vol．I．p． 413 a．］
OTMMAE．［＇onaxtit＇s，Vol．I．p．683，a．］
 village in Beeotia，situated 12 stadia to the left of （opace，and 7 stadia from Ilyettus．It derised is name from Olmens，the son of sisyphus，but con－ tained nothing worthy of notice in the time of lau－ ：anias．Forchlhmmer places Olmones in the small istand in the lake Cugai．，SW：of Copuc，now called Treto－Yami．［See the Map，Vol．1．p．411，where the Wand lies SW，of No．10．］（P＇ans，is．24．§ 3 ；

## OLYMPENE．

OLOCRLS（ $\tau$＇OAórpol ǒfos，Plut．Aem，Paul． 20），a mountain near l＇ydna，in Macedonia，repre－ sented by the last falls of the leights between Ayoun and Elifihero－khơri．（Leake，Northern Greece， vol．iii．p．433．）
［E．B．J．］
 town of Perrlacbia in Thessaly，mentioned by Ilomer， who gives to it the epithet of＂white，＂from its white argillaceons soil．In Procopius the name occurs in the corrupt form of Lossones．It is now called Elassoince，and is a place of some im－ portance．It is situated on the edge of a plain near Tcmpe，and at the foot of a hill，on which there is a large ancient monastery，defended on cither side by a deep ravine．The ancicnt town，or at least the citadel，stood upon this hill，and there are a few fragments of ancient walls，and some foundations behind and around the monastery．（Ilom．IL．ii． 739 ；Sirab．ix．p． 440 ；Lyorphr． 905 ；Steph．B． s．v．：Procop．de Aedif．iv．14；Leake，Northern Greece，vol．iii．p．345．）

OLOPHYXLS（Oגóøuそ̧os，Herod．vii． 22 ； Thuc．iv．109；Scyl．p．27；Strab．vii．p．331； Stepls．B．），a town on the peninsula of Acte，the site of which is probably represented by the Arsand of Khilandari，the tenth and last monastery of the E． shore of the Munte Santo．It is reported that here there were Hellenic remains found，in particular those of a mole，part of which is now left．（Leake， Northern Greece，vol，iii．p1．141，151．）［E．B．J．］
 tress on the Ambracian gulf，in the femitory of Argos Amphilochicum．［Sce Vol．1．pp．207，208．］
2．A fortress of the Lueri Ozolae，the position of which is uncertain．（Thnc，iii．I01．）

OLTIS．De Valois suggested，and D＇Anville adopts his opinion，that we ought to read Oltis in－ stead of Clitis in the verse of Sidonius AIplliuaris （Propenpt．）：－

## ＂Clitis，Elaris，Atax，Vacalis．＂

D＇Anville observes that the same river is named Olitis in a poem of Theodulf of Orleans．Accord－ ingly the river ought to be named Olt or L＇Olt； but usage has attached the article to the name，and we now speak of Le Lot，and so use the article twice． The Lot rises near Mont Lozire on the Civennes， and it has a general west course past 1 fende and Cahors．It joins the Garonne a few miles below Aglen，which is on the Garonne．
［G．L．］
OLURIS，［DomiUm．］
oLU＇RUS．［PELhene．］
（HLUS（＂OXous，Scyl．p．19：Xeuion，ap．Steph． B．s．v．；I＇vl．iii．IT．\＆ 5 ；al．＂Oגou入us；Stadiasm． 350：Eth．＇O入oúriol，＇Oגoúvt），a town of Crete，the citizens of which had entered into a treaty with those of Lato，（Bückh，Inscr．vol．ii．No．2554．） There was a tcmple to Britomartis in this city，a wooden statue of whom was creeted by Dacdalus， the mythical ancestor of the Daedalidae，and father of Cretan art．（l＇ausan，ix． $40 . \S 3$ ．）Her effigy is represented on the coins of Olus．（Eckhel，vol．in． p．316：Miomet，Deser．vol．ii．p． 289 ；Combe， Mrus．Ifunter．）There is considerable difficulty in making out the position of this town；but the site may probably be represented by Aliétha near Spina Loinga，where there are mins．Mr．Pashley＇s map erroneonsly identifies these with Naxes．（Comp． Hörk，Krela，vol，i．p．417．）
［E．B．J．］
 on the notheru sloge of Munt Olympus，from which
it derived its name．（Strab．xii．Pp．571，576．） The inbabitants of the district were called Olympeni （＇Oגvमппроi，Strab．xii．p． 574 ；Ptol．v． 2. § 15 ）or Olympieni（＇Oגvитıๆvol，Herod．vii．74；comp． Miscia）．
［L．S．］
 grove of Zeus Olympins，situated at a small distance west of Pisa in Peloponnesus．It originally belonged to Pisa，and the plain，in which it stood，was called in more ancient times the plain of Pisa；but after the destruction of this city by the Eleians in B．c．572， the name of Olympia was extended to the whole dis－ trict．Besides the temple of Zeus Olympius，there were several other sacred edifices and public buildings in the sacred grove and its immediate neighbourhood； but there was no distinct town of Olympia．

The plain of Olympia is open towards the sea on the west，hut is surrounded on every other side by liills of no great licight，yet in many places abrupt and precipitons．Their surface presents a series of sandy cliffs of light yellow colour，covered with the pine，ilex，and other evergreens．On entering the valley from the west，the most conspicuous object is a bold and neariy insulated eminence rising on the north from the level plain in the form of an irregular cone．（Mure，vol．ii．p．281．）This is Mount Cnonius，or the hill of Cromus，which is frequently noticed by Pindar and other ancient writers．（ $\pi a \rho$＇ eùdetétod Kpóviad，Pind．Ol．i． 111 ；$\pi$ áyos Kpóvou， Ol．xi． 49 ；ú $\psi \eta$ 入oio $\pi \dot{\epsilon} \tau \rho a$ à $\lambda i ́ \sigma a \tau o s ~ K p o v i o v, ~ O l . ~ . ~$
 Kрóvelos，Xen．Hell．vii．4．§ 14 ；тò ŭpos тò Kpó－ y tov，Paus．v．21．§ 2，vi．19．§ 1，vi．20．§ l； Ptol．iii．16．§ 14．）The range of hills to which it belongs is called by most modern writers the Olym－ pian，on the authority of a passage of Xenophon． （Hell．vii．4．§ 14）．Leake，however，supposes that the Olympian hill alluded to in this passage was no other than Cronins itself；but it would alpear，that the common opinion is correct，since Strabn（viii．p．356）describes Pisa as lying be－ tween the two mountains Olympns and Ossa．The hills，which bound the plain on the south，are higher than the Cronian ridge，and，like the latter，are covered with evergreens，with the exception of one bare sum－ mit，distant about half a mile from the Alpheins． This was the ancient Typaeus（TuTaiov），from which women，who frequented the Olympic games， or crnssed the river on forbidden days，were con－ demned to be hurled leadlong．（Pans．v．6．§ 7．） Another range of hills closes the vale of Olympia to the east，at the foot of which runs the rivulet of Miraika．On the west the vale was bounded by the Cladeus（K入áסeas），which flowed from north to sumth along the side of the sacred grose，and fell into
 vii．4．§ 29．）This river rises at Lala in Mount Pholve．The Alpheins，which flows along the south－ ern edge of the plain，constantly changes its course， and has lumied beneath the new alluvial plain，or carried into the river，all the remains of buildings and monuments which stood in the southern part of the Sacred Grove．In wiuter the Alpheius is full，rapid， and turbid；in summer it is scanty，and divided into several torrents flowing between islands or sand－ banks over a wide gravelly hed．The vale of Olympia is now called Andilalo（i．e．opposite to Jala），and is uninhabited．The soil is naturally rich，but swampy in part，owing to the inundations of the river．Of the numerous buildings and count－ less statues，which once covered this sacred spot，
the only remains nre those of the temple of Zeus Olympins．Pausanias has devoted nearly tro books， and one fifth of his whole work，to the description of Olympia；bnt he does not ennmerate the buildiugs in their exact topographical order ：owing to this cir－ cnmstance，to the absence of ancient remnins，and to the changes in the surface of the soil by the fluc－ tuations in the course of the Alpheins，the topo－ graphy of the plain must be to a great extent con－ jectural．The latest and most able attempt to elucidate this subject，is that of Colonel 1，eake in his Peloponnesiaca，whose description is here chiefly followed．

Olympia lay partly within and partly ontside of the Sacred Grove．This Sacred Grove bore from the most ancient times the name of Altis（i） ＊A入ris），which is the Peloponnesian Aeolic form of b̈hoos．（Pans，v．10，§ 1．）It was adorned with trees，and in its centre there was a grove of planes． （Paus．v．27．§ 11．）Pindar likewise describes it
 Ol．viii．12）．The space of the Altis was measured out by Hercules，and was surrounded by this hero with a wall．（Pind．Ol．xi．44．）On the west it ran along the Cladens；on the south its direction may be traced by a terrace raised ahove the Al－ pheins；on the east it was bonnded by the stadinm． There were severai gntes in the wall，but the prin－ cipal one，through which all the processions passed， was sitnated in the middle of the western side，and was called the Pompic Entrance（ $\grave{\eta}$ Поцлькो）ёбобos， Pans．v．15．§ 2）．From this gate，a road，called the Pompic Way，ran across the Altis，and entered the stadium ly a gateway on the eastem side．

1．The Olympieium，Olympium，or temple of Zeus Olympins．An oracle of the Olympian god existed on this spot from the most ancient times（Strab． viii．p． 353 ），and here a temple was doubtiess built， even before the Olympic games became a Pan－Hel－ lenic festival．But nfter the conquest of Pisa and the surrunnding cities by the Eleians in B．c． 572 ， the latter determined to devote the spoils of the conquered cities to the erection of a new and splen－ did temple of the Olympian god．（Paus．v． 10. §§ 2，3．）The architect was Libon of Elis．The temple was not，however，finished till nearly a century atterwards，at the period when the Attic school of art was supreme in Greece，and the l＇arthenon on the Athenian Acropolis had thrown into the shade all previous works of art．Nhortly after the dedi－ cation of the Parthenon，the Eleians invited Phei－ dias and his school of artists to remove to Elis，and adorn the Olympian temple in a manner worthy of the king of the gods．Pheidins probably remained at Olympia for four or five gears from about B．c． 437 to 434 or $\mathbf{4 3 3}$ ．The colossal statue of Zeus in the cella，and the figures in the pediments of the temple were executed by Pheidias and his associ－ ates．The pictorial embellishments were the work of his relative Panaenus．（Strab，viii．1．354） ［Comp，Dict．of Biogn：Vol．111．p．248．］Pausanias has given a minnte description of the temple（v．10）； and its site，plan，and dimensions have heen well as－ certained by the excavations of the French Cornmis sion of the Dlorea．The foundations are now exposed to view ；and several fine fragments of the sculp－ tures，representing the labours of Hercules，are now in the museum of the Louvre．The temple stend in the south－western portion of the Altis，to the right land of the Pompic entrance．It was built of the native limestone，which Pausanias called poros，and
which was covered in the mere finished parts by a surface of stucco, which gave it the appearance of marble. It was of the Duric order, and a peripteral hexastyle building. Accordingly it had six columns in the front and thirteen on the sides. The columns were fluted, and 7 ft . 4 in . in diameter, a size greater than that of any other existing columns of a Grecian temple. The length of the temple was 230 Greck feet, the breadth 95, the lieight to the summit of the prdiment 68 . The rouf was covered with slabs of l'entelic marble in the form of tiles. At each end of the perdiment stond a gilded vase, and on the apex a gilded statue of Nike or Victery; below which was a golden shield with the head of Medusa in the middle, dedicated by the Lacediemomians on account of their victory over the Athenians at Tanagra in B. c. 457 . The twe pediments were filled with figures. The eastern pediment had a statue of Zeus in the centre, with Oenomans on his right and Pelops on his left. prepared to contend in the charint-race; the figures on cither side consisted of their attendants, and in the angles were the two rivers, Cladeus to the right of Zeus, and Alpheins
to his left. In the western pediment was the contest of the Centaurs and the Lapithae, Peiritheus oceupying the central place. Ont the metopes over the doors at the eastern and western ends the labours of Hercules were represented. In its interior construction the temple resembled the Parthenen. The cella censisted of two chambers, of which the eastern contained the statue, and the western was called the Opisthodomns. The colossal statue of Zeus, the master-work of I'heidias, was made of ivory and gold. It stood at the end of the front clamber of the cella, directly facing the entrance, so that it at once showed itself in all its grandeur to a spectator entering the temple. The appreach to it was between a double row of columns, supporting the roof. The god was seated on a magnificent throne adorned with scillptures, a full debcription of which, as well as of the statne, has been given in another place. [Dict. of Biogr. Vol. 111. p. 252.] Behind the Opisthodomus of the temple was the Callistephanus or wild olive tree, which furnished the garlands of the Olympie victors. (Prans, v. 15. § 3.)

GROLND HLAN OF THE OLYMPIELUM.
2. The Prlopium stood opposite the temple of Zeus, on the other side of the Pompic way. Its position is defined by Pausanias, who stys that it stond to the right of the entrance into the temple of Z.eus and to the nerth of that building. It was an coclosure, containing trees and statues, having an openine to the west. (Jaus, v, 13. § 1.)
3. The Ilcracum was the most important temple in the Altis after that of \%eus It was also a Doric peripteral ouilding. Its uimensions are unknemn. Pausanias says (v. 16, § 1) that it was 63 feet in length; but this is clearly a mistike, since no peripteral buidding was so small; and the nomernas statnes in the cella, deseribed by Pansanias, clearly show that it must have been of considerable dimensions. The two mont remarkalle monuments in the Herneum were the table, on which were placed the garlands prepared for the victors in the Olympic contests, anil the enlebrated chest of Cypselus, covered with fienres in relief, of which pausamias Inss given an elaborate dpecription (v.17-19) . W learn from a passate of Dion Chrysostom (Orat. xi. 1. 163), cited by Leake, that this clest stood in the opisthodomns of the Heraenm ; whence we may infer that the cella of the temple consisted of two apartnewts.
4. The Great Attur of Zeus is described by Patasanias as equidistant from the P'elopium and the lleraeum, and as latiof in fituriz of drouphoth.
(Paus. v. 13. §8.) Leake places the Heraeum near the l'ompic entrance of the Stadinm, and supposes that it faced eastward; accordingly he cenjectures that the altar was opposite to the backfronts of the Pelopium and the Heraeum. The total beight of the altar was 22 feet. It had two platiorms, of which the upper was made of the ciuders of the thighs sacrificed on this and otlier altars.
5. The Column of Oenomaus strod between the great altar and the temple of Zous. It was said to have belonged to the house of Oenomans, and to have bern the only part of the building which eseapeed whel it was bornt by lightning. (Paus, v. 20. § 6.)
6. The $\mathbf{l}$ fetroum, or temple of the Mether of the Gods, was a large Doric building, sitnated within the Altis (laus. v. 20. § 9.) It is placed by Leake to the left of the I'ompic Way neatly opposite the If eraeum.
7. The Prytancium is placed by Pausanias within the Altis, near the Gymnasium, which was outside the sacred enclosure (v. 15. §8.)
8. The Boulcuterion, or Council-House, seems te have been near the Prytaneium. (Paus. v. 23. § 1, 24. § 1.)
9. The Philippeium, a circular kuilding, erected by I'hilip after the battle of Chaeroncia, was to the left in proceeding from the entrance of the Altis to the fitancius (1) (1us. y. 17.§ 4, v. 20. § 10.)

## OLYMPIA.

10. The Theecoleon, a building belonging to the 2enkónot or superintendents of the sacrifices (Yaus. v. 15. § 8). Its position is uncertain.
11. The Hippodamium, named from Hippodamcia, who was buried here, was within the Altis near the Pompic Way. (Paus. vi. 20. § 7.)
12. The temple of the Olympian Eileithyia (Lucina) appears to have stood on the neek of Mount Cronius. (Paus. vi. 20. § 2.)
13. The T'emple of the Olympian Aphrodite was near that of Eileithyia. (Paus. vi, 20. § 6.)
14. The Thesauri or Treasuries, ten in number, were, like those at Delphi, built by different cities, for the reception of their dedicatory offerings. Thay are described by Pausanias as standing to the north of the Heracum at the foot of Mount Cronius, upon a platform made of the stone poros (Paus, vi. 19. § 1).
15. Zanes, statues of Zeus, erected from the produce of fines levied upon athletae, who had violated the regulations of the games. They stood upon a stone platform at the foot of Mount Cronius, to the left of a person going from the Metroum to the stadium. (Paus, v. 21. § 2.)
16. The Studio of Pheidias, which was outside the Altis, and near the Pompic entrance. (Paus. v. 15. § I.)
17. The Leonidaeum, built by Leonidas, a native, was near the Studio of Pheidias. Here the Roman magistrates were lodged in the time of Pausanias (v. 15. §§ 1, 2).
18. The Gymnasium, also outside the Altis, and near the northern entrance into it. (Paus. vi. 21. §2) Near the Gymnasium was (19) the Palaestra.

20 and 21. The Stadium and the Hippodrome were two of the most important sites at Olympia, as together they formed the place of exhibition for all the Olympic contests. Their position cannot be determined with certainty; but as they appear to have formed a continued area from the circular end of the Stadium to the further extremity of the Hippodrome, the pasition assigned to them by Leake is the most probable. He places the circular end of

OLYMPIA.
477
the Stadium at the foot of the heiglits to the NE. of the summit of Mount Cronius, and the further end of the Hippolrome on the bank of the Alpheius.

The Stadium is described by Pausanias as a mound of earth, upon which there was a seat for the Hellanodicae, and over against it an altar of marble, on which sat the priestess of Demeter Chamyne to behold the games. There were two entrances into the Stadium, the Pompic and the Secret. The latter, tbrough which the Hellanodicae and the agonistae entered, was near the Zanes; the former probably entered the area in front of the rectilinear extremity of the Stadium. (Paus. vi. 20. $§ 8$, seq.) In proceeding towards the Hippodrome from that part of the Stadium where the Hellanodicae sat was the Hippaphésis or starting place of the horses ( $\dot{\eta}$ द̆ $\phi \in \sigma$ is $\tau \bar{\omega} \nu$ "in $\pi \omega \nu$ ). In form it resembled the prow of a sliip, the embolus or beak being turned towards the racecourse. Its widest part adjoined the stoa of Agnaptus. At the end of the embolus was a brazen dolphin standing upon a pillar. Either side of the Hippaphesis was more than 400 feet in length, and contained apartments, which those who were going to contend in the horse-races obtained by lot. Before the horses a cord was extended as a barrier. An altar was erected in the middle of the prow, on which was an eagle with outstretched wings. The superintendent of the race elevated this eagle by means of machinery, so as to be seen by all the spectators, and at the same time the dolphin fell to the ground. Thereupon the first barriers on either side, near the stoa of Agnaptus, were remored, and then the other barriers were withdrawn in like mantuer in succession, uutil all the horses were in line at the embolus.

One side of the Hippodrome was longer than the other, and was formed by a mound of earth. There was a passage through this side leading out of the Hippodrome; and near the passage was a kind of circular altar, called Taraxippus (Tapázızтos), or the terrifier of horses, because the hoses were frequently seized with terror in passing it, so that cha-

riats were broken. There was a similar object for frightening horses both at the Corinthian isthmus and at Nemea, in consequence of which the difficulty of the race was increased. Beyond the Taraxippus were the terminal pillurs, called vúroac, round which the chariots turned. On one of them stood a brazen statue of Hippodameis about to bind the taenia on Pelops after his victory. The other side of the Hippodromo was a natural height of no great eleration. On its extremity stood the temple of Demeter Chamyne. (Paus. vi. 20. § $15-\mathrm{r} .21$. § 1.) The course of the Hippodrome appears to have been two

 indeed (rol. ii. p. 327), understands $\mu \hat{\eta}$ кos in this passage to refer to the length of the area; but Leake (Peloponnesiaca, p. 94) maintains, with more probability, that it signifies the length of the circuit.
19. The Theatre is mentioned by Xenophon (IIell. vii. 4. $\$ 31$ ), but it does not occur in the description of Pausanias. A theatre existed also at the Isthmus and Delphi, and would have been equally useful at Olympin for musical contests. Xenophon conld hardly have been mistaken as to the existence of a theatre at Olympia, as he resided more than 20 years at Scillus, which was only three miles from the former spot. It would therefore appear that between the time of Xcrophon and Pausanias the theatre had disappeared, probably in consequence of the musical contests hating been discontioned.

Besides the buildings already mentioned, there was a very large number of statues in every part of the Sacred Grore, many of which were made by the greatest masters of Grecian art, and of which Pansanias has given a minute description. According to the vague computation of Pliny (xxxiv. 7. 8. 17) there were more than 3000 statues at Olympia. Most of these works were of brass, which accounts for their disappearance, as they were converted into objects of common atility upon the extinction of Paganism. The temples and other monuments at Olympia were, like many others in different parts of Greece, used as materials for modern buildings, more especially as quarries of stone are rare in the district of Elis. The chiefs of the powerful Albanian colony at Lala had in particnlar long emploged the ruins of Olympia for this purpose.
The present article is confined to the topography of Olympia. An account of the games and of everything connected with their celebration is given in the Dictionary of Antiquities.
(Stanhope, Olympia, Lond. 1824; Krause, Olym$z^{\text {nia, }}$ 1838; Mure, Tour in Greece, vol. ii. p. 280, seq.; Leake, Peloponnesiaca, P. 4, seq.; Curtius, Peloponnesos, vol. ii. p. 51, seq.)

OLYMPUS ("O $\lambda \nu \mu \pi o s)$. 1. One of the loftiest mountains in Grece, of which the southern side forms the boundary of Thessaly, while its northern base encloses the plains of Micedonia. Hence it is sometimes called a mountain of Macelonia (Strab. vii. p. 329; Ptol. iii. 13. § 19), and sometimes a mountain of Thessaly. (Herod. vii. 128; Plin. iv. 8. s. 15.) It forms the eastern extremity of the Cambunian range, and extends to the sea as far as the mouth of the Peneius, being separated hy the vale of Tempe from the heights of Ossa. Xenagoras, who measured the perpendicular height of Olympas from the town of Pythium, ascertained its elevation to be teo stadia and nearly one plethrum (Plut. Aemil. 15); which Holland, Dodwell, Leake, and
others regard as not far from the truth, since they estimatc its height to be between sis and seren thousand feet. But these writers have considerably undercaleulated its elevation, which is now ascentained to be 9754 feet. Herodotus relates that Mit. Olympus was scen by Xerses from Therma (vii. 128); and we know from modern travellers that in clear weather it is visible from Mt. Athos, which is 90 miles distant. (Journ. Geogr. Soc. vol, vii. p. 69.) All travellers, who have risited Mt. Olympus, dwell with admiration upon its imposing grandeur. One of the most striking descriptions of its appearance is given by Dr. Holland, who beheld it from Littokhoro at its base:- "We had not before been aware of the extreme vicinity of the town to the base nf Olympus: but when leaving it, and accidentally looking hack, we saw through an opening in the fog, a faint outline of vast precipices, seeming almost to overlang the place ; and so aierial in their aspect, that for a few minutes we doubted whether it might not be a delusion to the eye. The fog, however, dispersed yet more on this side, and partial orenings were made, through which, as through arches, we saw the sunbeams resting or the snowy summits of Olympus, which rose into a dark blue sky far above the belt of clonds and mist that hung upon the sides of the monntain. The transient view we had of the mountain from this point showed us a line of precipices of vast beight, forming its eastern front toward the sea; and broken at intervals by deep hollows or rarines, which were richly clothed with forest trees. The oak, chestnut, beech, planetree, \&c., are seea in great shundance along the base and skirts of the mountain ; ard towards the summit of the first ridge, large forests of pine spread themselves along the acclivities. Behind this first ridge, others rise up and recede towards the loftier central heights of Olympus. Almost opposite the town of Litokhoro, a vast ravine penetrates into the interior of the mountain, through the opening of which we saw, though only for a few minutes, what I conceive to be the summit, 一from this point of view, with a somewhat concave ascending line on each side." (Holland, Travels, vol. ii. p. 27.) Though the lower sides of Olympus are well wooded, the summit presents a wide extent of a bare lightcoloured rock. (Leake, Northern Greece, vol. i. p. 434.) The broad summit of Olympus is alluded to by Homer, who gives to it the epithet of $\mu \kappa \kappa \rho \phi^{\prime}$ more frequently than any other. Nest to that, is
 snow during the greater part of the year. Hesiod (Theog. 118) also gives it the epithet of viф́धєs. Below the summit its rugged outline is broken into many ridges and precipices, whence Homer describes it as $\pi o \lambda v o ̄ \epsilon t p \dot{\alpha} s$. (Il. i. 499, v. 754.) The forests, which covered the lower sides of Olympus, are frequently alluded to by the ancient poets. ( $\pi 0 \lambda v \dot{\delta} \epsilon \nu-$ סpos, Eurip. Bacch. 560; Ossae frondosum involvere Olympum, Virg. Gearg. 281; opacus Olympus, Hor. Carm. iii. 4. 52.) The mountain is now called $E^{\prime}$ lymbo, i. e. "E $\lambda \nu \mu \pi o s$, by the surrounding inhabitants, which name Leake observes is probably not a modern corruption, but the ancient dialectic form, for the Aeolic tribes of Greece often substituted the epsilon for the omicron, as in the instance of ' $O \rho \chi^{\circ} 0-$ $\mu \in \nu$ 's, which the Boeotians called 'Ep $\chi$ ouevós. (Dodwell, Tour through Greece, rol. ii. p. 105; Leake, Northern Greece, vol, iii. pp. 341, 407.) Olympus was beliered to be the residence of Zeus and the other gods; and as its summit rose above the clouds into
the calin ether, it was helieved that here was an opening into the vault of heaven, closed by a thick cloud, as a door. (IL. v. 751.) [See Dict. of Biogr. Vol. IIL. p. 25 ; Lididell and Scott, Greek Lex. s. v.]
2. A mountain in Laconia, near Selliasia. [SFLL.ISI.A.]
3. A momntain above Olympia io Elis. [OrvMP1.s, p. 475, a.]

OLYM1US ("O of Mysia, extending eastward as far as the river Sangarius, and dividiog Phrygia from Bithynia. To distinguish it from other monntains of the same name, it often is called the Mysian Olympus. Its heicht rises towards the west, and that part which is of the greatest height, is the highest mountain in all Asia Minor. The country around this mountain was well peoplel, but its heinhts were thickly clad with wood, and contained many safe retreats for robhers, bands of whom, under a rezular leader, often rendered the country unsafe. (Strab. xii. p. 5:4, comp, s. j. $4 \% 0$, xii. p. 571 ; Herod. i. 36, vii. 74 ; Ptol. v. 1. $\$ 10$; Steph. B.s.v.; Plin. v. 40.43; Pomp. Mela, j. 19 ; Amm. Marc. xxvi. 9, Schol, ad Apollon. Rhod. i. 598.) The lower regions of this great mountain are still covered with extuosive forests ; but the summit is rocky, devoid of vegetation, and during the greater part of the year covered with snow. The Turks generally call it Anadoli Dagh, though the western or bighest parts also bear the name of Keshish Dagh, that is, the Monk's Mountain, and the eastern Toumandji or Domoun Dagh. The Byzantioe historians mention several fortresses to defend the piasses of Olympus, such as Pitheca (Nicet. Chon. p. 35 ; B. Cinmim. p. 21), Acrunum, and Calogroea (B. Cinnam. l. c.; Cedren. p. 553 ; Auna Comm. P. 441 ; comp. Brown, in Walp sle's Turkey, tom, ii pp. 109, foll.; Pococke, Travels, ini. p. 178).
2. A mountain in the north of Galatia, which it separates from Bithynia. It is, properly speaking, only a continuation of the Mysian Olympus, and is remarkable in history for the defeat sustained on it by the Tolistoboii, in a battle against the Romans under Manlias. (Liv. xxsviii. 19. Ac. ; Polyb. xxii, 20, 21.) Its modern name is Ala Dagh.
3. A volcanic mountain in the east of Lycia, a Jittle to the north-east of Corydalla. It also bore the name of Phoenicus, and near it was a large town, likewise bearing the name Olympus. (Strab. xiv. p. 666.) In another passage (xiv. p. 671) Strabo speaks of a mountain Olympus and a strongbold of the same name in Cilicis, from which the whole of Lycia, Pamplyslia, and Pisidia conld be survered, and which was in his time taken possession of liy the laturian robber Zenicetas. It is, however, generally supposed that this Cilician Olympus is no other than the lycian, and that the geugrapher was led into his mistake by the fact that a town of the name of Corycus existed both in Lycin and Cilicia. On the Jycian Olympus stood a temple of Hephaestus. (Comp, Stadiasm. Mur. Vag. § 205; Ptul. v. 3. §3.) Scylax (39) dues not mention Olympus, but his Siderus is evidently wo other place. (Lake, Asia Minor, p. 189; Fellows, Lycia, pp. 212, foll. ; Spratt and Forbes, Tratels in Lycia, i. p. 192.) Mount Oympus now hears the oame Ianar Dagh, and the town that of Deliktosh; in the latter place, which was first identified by Beaufort, some ancient remains still exist ; but it does not appear ever to have been a large town, as Strabo calls it.

Ptol. ₹. 14. §5), a mountain range in the lofty island of Cyprus. On one of its eninences-hreastshaped ( $\mu a \sigma \tau 0 \in i o ̄ t s$ ) - was a temple to Aphrodite "of the beights" (akpaia), into which women were not permitted to enter. (Strab. l. c.) This probably implies that all but the "hierodulae" were excluded. (Comp. Claudian, Nupt. Hon, et Mar. 49-85; Acbill. Tat. vii. 13.) According to Po= cocko (Trav. vol. ii. p. 212; comp. Mariti, Jiaggi, vol. i. p. 206), tbis part of the chain is now called Hughios Starros, or Sta. Croce, from a convent dedicated to the Cross. (Enge), Ki/pros, rol. i. pp. $33-37$ )
[B.B.J.]
OLYXTA INS. (Oגv́vta, Scyl. p. 8; Solentii, It. Anton.; Peut. Tab.; Silenta, Geog. Rav.), a small island off the coast of Dollmatia, which now bears the name of Solta, and is famous for its honey. (Hilkioson, Dalnatia and Montenegro, vul. i. p. 187.)
[E. B. J.]
OLYNTHIACCS. [OlyNTILE.]
OLYNTHUS ("OAvvөas, Scyl. J. 26: Strab. vit. p. 330 ; Steph. B.; Pomp. Dlela, ii. 2. $\$ 9$; llin. iv. 17: Eth. 'OAúvөtos), a town which stood at the head of the Toronaic gulf, between the peninsulas of Pallene and Sithonia, and was surrounded by a fertile plain. Originally a Bottiaean town, at the time of the Persian invasion it had passed into the hands of the Chalcidic Greeks (Herod. vii. 122; Strab. $x$. p. 447), to whom, under (ritobulus of Torone, it was handed over, by the Persian Artabazus, after taking the town, and blaying all the inhabitants (Herod. viii. 127). Afterwards lerdiccas prevailed on many of the Chalcidian settlers to abandon the small towns on the sea-coast, and make Olynthus, which was several stadia from the sea, their central position (Thuc. i. 58). After this period the Bottiaei seem to have been the humble dependents of the Chalcidians, with whom they are found joined on two occasions (Thuc. i. 65, ii. 79). The expedition of Brasidas secured the independence of the Olynthians, which was distinctly recognised by treaty (Thuc. v. 19.) The town, from its maritime situstion, became a place of great importance, n. C. 392 . Owing to the weakoess of Amyntas, the Macedonian king, they were enabled to take ioto their alliance the smaller towns of maritime Macedonia, and gradually sdsanced so far as to include the larger cities in this region, including eren Pella. The military force of the Ulynthian confederacy had now become so powerful from the just and generous principles upon which it was framed, including full liberty of intermarriage of commercial dealings, and landed proprietorship, that Acanthus and Apollonia, jealous of Olynthian supremacy, and menaced in their independence, applied to Sparta, then in the height of its power, B.C. 383 , to solicit intervention. The Spartan Eudamidas was at once seut against Olynthus, with such force as could be got ready, to clieck the new power. Telentias, the brother of Agesilaus, was afterwards sent there with a force of 10,000 men, which the Spartan asscubly laal previously voted, and was joined by Derdis, prince of Elimeia, with +00 Macedonian hore. But the conquest of Olyuthus was no easy enterprise ; its cavalry was excellent, and enahled them to kecp the Spartan infantry at bay. Teleutias, at first successful, becoming over collfident. sustained a terrible defeat under the walls of the city. But the Spartaus, not disheartened, thought only of repairing their dishonour by fresh exertions. Agesipolis, their king, was placed in command, and ondexchtorrasequte thenar with vigour; the young
prinee died of a fever, and was succeeded by Polybiades as general, who put an end to the war, B.c. 379. The Olynthians were reduced to such straits, that they were obliged to sue for peace, and, breaking up their own federation, enrolled themselves as sworn members of the Lacedaemonian confederacy mader obligations of fealty to Sparta (Xen. IIell, v. 2. § 12, 3. § 18 ; Diodor. xv. 21 -23; Dem. de Fuls. l.eg. e. $75 . \mathrm{p} .425$ ). The subjugation of Olyuthus was disastrous to Greece, by remoring the strongest bulwark against Macedonian nggrandisement. Sparta was the first to crush the bright promise of the confederacy; but it was reserved for Athens to denl it the most deadly blow, by the seizure of Pydna. Methone, and Potidaea, with the region about the Thermaic gulf, between B.c. $368-363$, at the expense of Olymhus. The Olynthians, though bumbled, were not subdued; alarmed at Philip's conquest of Amphipolis, B.c. 358 , they sent to negutiate with Athens, where, through the intrigues of the Macedonians, they were repulsed. Irritated at their addrances being rejected, they closed with Philip, and receired at his hands the district of Antbemus, as well as the important Athenian possession of Potidaea. (Dem, Philipp. ii. p. 71. s. 22). Philip was tuo near and dangerous a neighbour; and, by a change of policy, Olynthus concluded a peace with Athens n.c. 352. After some time, during which there was a feeling of reciprocal mistrust betreen the Olynthians and lhilip, war broke out in the middle of B. c. 350. Overtures for an alliance lad been previously made by Athens, with which the Olynthians telt it prudent to close. On the first recognition of Olynthus as an ally, Demusthenes delivered the earliest of his memoraile harangues; two other Olynthiac speeches followed. For a period of 80 years Olynthus had been the enemy of Athens, but the eloquence and statesman-like sagacity of Demosthenes induced the people to send succours to their ancient fues: and yet he was not able to persuade them to assist Olynthus with sufficient vigour. Still the fate of the city was delayed; and the Ulynthians, had they been on their guard against treachery within, might perhaps have saved themselves. The detail of the capture is makaown, bat the struggling city fell, in B.c. 347 , into the hands of Philip, "callidus emptor Olynthi" (Juv. xiv. 47), through the treachery of Lasthenes and Enthycrates: its doon was that of one taken by storm (Vem. Philipp. iii. pp. 125-12s, Fals. Leg. p. 426 ; Diod. xvi. 53). All that survivedmen, women, and cbildren - were sold as slaves; the town itself was destroyed. The fall of Olynthus completed the conquest of the Greek cities from the Thessalian frontier as far as Thrace - in all 30 Chalcidic cities. Demosthenes (Philipp, iii. p. 117; cornp. Strab. ii. p. 121 ; Iustin. viii. 3), speaking of them alout fire years afterwards, says that they were so tboroughly destroyed, that it might be supposed that they had never been inhabited. The site of Olyntlus at A io Mamas is, bowever, known by its distance of 60 stadia from Potidaea, as well as by some restiges of the city still existing, and by its Ingoon, in which Artabazus slew the inhabitants. The name of this marsh was BoLyea ( $\boldsymbol{\eta}$ Bodukì 入 $\ \mu \nu \eta$, Hegisander. ap. Athens. p, 334). Two rivers, the Aurras ('Apiras) and Obvirmaces ('Onvyerakós), flowed into this lagoon from A pollonia (Athen. l. c.). Mecybenna was its harbour; and there was a spot near it, called Cantinamolethion (Kavea. pó̀ $\lambda \in \rho o y$, Strab. vii. p. 330 ; Plut. de An. Tranq. 475. 45; Arist. Mirab. Ausc. 120; Ilin. xi. 34), so
of Hadjar-selseleh. The more magnificent of the two stands upon the top of a sandy hill, and appears to have been a species of Pantheoz, since, according to extant iuscriptions, it was dedicated to Arocres ( $\mathrm{A} p \mathrm{ollo}$ ) and the other deitics of the Ombite nome by the soldiers quartered there. The smaller temple to the NW. was sacred to ksis. Buth, indeed, are of an imposing architecture, and still retain the brilliant colours with which their btilders adorned them. They are, bowever, of the Ptulemaic age, with the exception of a doorway of sandstone, built into a wall of brick. This was part of a temple built by Thothmes 11I. in honour of the crocodileheaded god Sevak. The monarch is represented on the door-jaubs, holding the measuring reed and chisel, the enblems of construetion, and in the act of dedieating the temple. The P'olemaic portions of the larger temple present an exception to an almest universal rule in Aegyptian architecture. It has no propylon or dromos in front of it, and the protico bas an uneven number of colnmns, in all tifteen, arranged in a triple row. Of these columss thirteen are still erect. As there are two prineipal entrances, the temple would seem to be two united in one, strengthening the supposition that it was the l'antheon of the Ombite nome. On a cornice above the doorway of one of the adyta is a Greek inscription, recording the erection, or ferbaps the restoration of the sekns by Ptolemy Philometor and his sister-wife Cleopatra, B. c. $180-145$. The bill on which the Ombite temples stand has been considerably excavated at its base by the river, which Lere strongly in lines to the Arabian bank.

The erocodile was beld in especial honour by the people of Ombi; and in the adjacent catacombs are occasionally found mummies of the sacred animal. Jusenal, in hi 15 th satire, bas given a lively description of a fight, of which he was an eye-witness, between the Onbitue and the inhabitants of Tentyra, who were hanters of the crocodile. On this oceusion the men of Ombi had the worst of it ; and one of their number, having stumbled in bis flight, was caught and eaten by the Tentyrites. The satirist, however, has represented Onbi as nearer to Tentyra than it actually is, these towns, in fact, beint nearly 100 miles from each other. The Roman coins of the Onbite nome exhilit the croconlife and the eftisy of the crocutile licaded god sirak.

The modern haulet of Koum-Ombos, or the hill If Otubus, corers part of the site of the ancient Ombi. The ruins have excitel the attention of many distinemished monlern travellers. Deseriptions of them will be fonnd in the following works:Pococke, Trutels, vol. iv. p. 186: Hamilton, Atogpliaca, p, 34; (hampollim, tEyypte, vol. i. p, 167: Denw. Iescription de l'Egzpte, vol. i. ch 4. p. 1, toll.; lsurekhardt, Subiu, 4:0, 1. 106: Bdami, Travels, vol. ii. p. 314. On the npposite side of the Nile was a suburb of Oabli, callet C'uutra-Omhos. [W.B.D.]

## 0.MBR10s 1Ns. [Fomexatas lxs.]

OMBI,OXES ('Opepaves, Ptol. iii. 5. Ş 21), a people of Eurapean Sumatia, whose seat appears to have been on the flanks of the Carqathions, about the sour es of the IZithlu. Schafarik (Slav. Alt. vol. i. pp, 389-391, 40\%) considers them to be a Celtic pmople, grounlitiz his arguments mainly upon the identily of their nane with that of the Certic as lie considers them to be- Uimbrians, or the 11 ost ancie it iuhabetants of the Italhan peminsula. Kecent inquiry bas thrown considerable doult upon the derivation of the Fublasens frumpa giaulisle
stock. [ITalia, Vol.II. p. 86,b.] This is one pronf, among others, of the futility of the use of nanes of nations in historical investigations; but, as there ean be no doubt that there were Gallic settlements beyond the Carpathians, names of these foreign hordes might still linger in the countries they had once occupied long after their return westwand in consequence of the movement of uations from the East.
[E. B. I.]
OMENO'GARA (O $\mu \in \nu \sigma$ 人apa), a tuwn in the district of Ariaca, in the division of India intra Gangem. There is no reason to doubt that it is the present Ahmed-nagar, celebrated for its rock fortress. (Ptol, vii. I. §82; comp, Pott. Etym Forsch. p. 78.)
[V.]
OMIPAS [ECPHRATES.]
OMPHA'LIUM ('O $\mu \phi \dot{\alpha} \lambda 10 \nu$ ), a plain in Crete, so named from the legend of the birth of the babe Zens from thea. The scene of the ineident is haid near Thenae, Cnossus, and the river Triton. (Callim. Hymn. ad Jov. 45 ; Diod. v. 70 ; Schol. ad Nicand. Alexipharm. 7; Steph. B. s. v.; Höck, Kreta, vol. i. pp. 11, 404; Prashley, Trav. vol. i. p. 224.)
[E. B. J.]
OMPHA'LILM ('O $\mu \phi \dot{d}^{\prime} \lambda \iota o v$ ), one of the inland cities of the Chaones in Epeirus. (Ptol. iii. 14. § 7.) Stephanus B. (s,v.) erroneonsly calls it a city of Thessaly. Leake places it at Premedi, in the valley of the Iiósa (the Aous). (Northern Greece, rol. iv. p. 120.)

ON. [Heliopolis.]
OXCAE. [THebiE.]
ONCFILM ( ${ }^{*} \mathrm{O} \gamma \kappa \in \iota L$ ), a place in Arcadia npon the river Laton, near Thelpusa, and containing a temple of Deneter Erinnys. (Paus, viii. 25. §4; Steph. B. s. r.) The Ladon, atter leaving this temple, passed that of Apollo Oncaeates on the left, and that of the boy Asclepius on the right. (Pans. viii. 25. § I1.) The name is derived by Pansanias from Onens, a son of Apollo, who reigned at this place. Leake supposes that Tumbiki, the only remarkable site on the right bank of the Ladon between Thelpusa and the Tutboa, is the site of the temple of Asclęitis. (Morea, vol. ii. p. 103.) Other writers mention a small town Oveae ("Oүкаи) in Arcadia, which is probably the same as Onceium. (I'zetzes, ad Lyrophr. 1225: Eitym. M. p. 613; Phavorin, s. r.)
 Chaonia in Epeirus, opposite the north-western point of Corcyra, and the next port upon the cuast to the sonth of Panormus. (Strab, vii. p. 324 ; Ptol. fiii. 14. \$2.) It seens to have been a place of importance in the time of Cicero, and one of the ordinary points of departure from Epeirns to ltaly, as Cicero calls the wind favourable for making that pasnge an Onchesmites. (Cic, ad Alt. rii. 2.) According to Dionysins of Kalicarnassus (Ant. Rom. i. 51) the real name of the place was the Port of Anchises ('A $\gamma \chi$ i完vv $\lambda_{1} \mu \dot{\eta} \nu$ ), named after Auchises, the father of Acneas ; and it was prubably owing to this tradition that the name Onchesmus assumed the form of Anchiasmus under the Byzantine emperors. Its site is that of the place now called the Forly Saints. (Leake, Northern Greece, vol. i. p. 11.)
 rios). an ancient town of Bueatia in the territory of Ifaliartus, said to have been founded by Onchestus, a som of Poseidon. (kaus. ix. $26 . \S 5$; Steph. B. s. v.) It possessed a celebrated temple and grove of Proseidon, which is mentioned by Homer ('Oy-

ii. 506), and subsequent poets. (Pind. Isthm. i. 44, jv. 32; Lycophr. 645.) Here an Amphictyonic council of the Boeotians used to assemble. (Strab. ix. p. 412.) Pausunias (l. c.) says that Onchestns was 15 stadia from the mountain of the Sphinx, the modern Fagú; and its position is still more aceurately defined by Strabo (l. c.). The latter writer, who censures Alcaens for placing Onchestus at the foot of Mt. Helicon, says that it was in the Haliartia, on a naked hill near the Teneric plain and the Copaic lake. He further maintains that the grove of Poseidon existed only in the imagination of the poets ; but Pausanias, who visited the place, mentions the grove as still existing. The site of Onchestus is probably marked by the Hellenic remains situated upon the low ridge which separates the two great Boeotian basins, those of lake Copais and of Thebes, and which comects Mount Fayd with the roots of Helicon. (Leake, Northern Grecee, vol. ii. p. 213 , seq.; Gell, Itiver. p 125.)
2. A river of Thessaly, flowing near Scotussa, through the battle-field of Cynoscephalae into the lake Boebeis. It was probably the river at the sources of which Deteriuni stands, but which bears no modern name. (Liv, xxxiii. 6; Polyb. xviii. 3; Steph. B. s. v.; Leake, Northern Greece, vol. iv. p. 473.) It is perhaps the same river as the Onochonus ('Ovóxwlos, Herod. vii. 129; Plin. iv. 8. s. 15), whose waters were exhansted by the army of Xerxes, It is true that Herodotus describes this river as flowing into the Peneius; but in this he was probably mistaken, as its course must have been into the lake Boebeis. (Leake, Northern Greece, vol. iv, p. 514.)
onlisa. [Corinthus, Vol. 1. p. 674]
ONEUN (Ovaîov, Ptol. ii. 16. § 4; Peut. Tab.; Geog. Rav.), a town of Dalmatia, which has been identified with Almissa, at the mouth of the Cettina. (Nieigebaur, Die Sul-Slaven, p. 25.)
[E. B. J.]
ONINGIS. [Aurinx.]
ONI'SIA, an island near Crete, on the E. side of the promontory Itanus. (Plin. iv. 12. s. 20.)

U'NOBA AESTUA'RIA ('OvoEa Ai $\sigma \tau$ ood́pıa, Ptol. ii. 4. § 5), called also simply ONobs (Strab. iii. p. 143; Mela, iii. 1. § 5). 1. A maritime town of the Turdetani in Hispania Baetica, between the rivers Anas and Baetis. It was seated on the estnary of the river Luxia, and on the road from the mouth of the Anas to Augusta Emerita. (Itin. Ant. p. 431.) It is commonly identified with Huelca, where there are still some Roman remains, especially of an aqueduct; the vestiges of which, however, are fast disappearing, owing to its being nsed as a quarry by the boorish agriculturists of the neighbourhood. (Murray's Handbook of Spain, p. 170.) Near it lay Herenlis Insula, mentioned by Strabo (iii. p. 170), called 'Hpák $\lambda \in i a$ by Steph. B. (s. v.), now Saltes. Onoba had a mint; and many coins have been found there bearing the name of the town, with a slight alteration in the spelling, Onuls. (Florez. Med. ii. pp. 510, 649; Niomet, i. p. 23, Suppl. p. 39; Sestimi, Med. Isp. p. 75, ap. Ukert, vel. ii. pt. 1. p. 340.)
2. Another town of Baetica, near Corduba. (Plin. iii. 1. s. 3.) In an inscription in Gruter (p. 1040. 5) it is called Conuba. Ukert (vol. ii. pt. 1. p. 366) places it near Yilla del Carpio.
[T. H. D.]

## (iNOBALAS. [Acksines, No. 1.]

ONOBRISATES, a people of Aquitania, as the name stands in the common texts of Pliny (iv. 19); who has "Onobrisates, Belendi . Saltus Pyreateus."

D'Anville (Notice, foc.) ingeniously supposes that Onobrisates onght to be Onvbusates, which is the least possible correction; and he thinks that he discovers the old name in the modern Nebousan, the name of a canton on the left side of the Neste towards the lower part of its course. The Neste is one of the branches of the Garonne, and rises in the Pyrenees.

## ONOCllu'NUS. [Onchestus, No. 2.]

ONUGNATHUS ("Onov $\gamma$ dóeos), "the jaw of an ass," the name of a peninsula and promontory in the south of Laconia, distant 200 stadia senth of Asopus. It is now entirely surrounded with water, and is called Elafonisi; but it is in reality a peninsula, for the isthmus, by which it is connected with the mainland, is only barely covered with water. It contains a harbour, which Strabo mentions ; and Pansanias savs a temple of Athena in ruins, and the sepulchre of Cinadus, the steersman of Menelans. (P'aus. iii. 22. § 10, iii. 23. § 1; Strab. viii. pp. 363, 364 ; Curtins, Peloponnesos, vol. ii. p. 295.)

ONE PHIS ('Oขouфts, Herod. ii. 166 ; Steph. B. s.v.; Ptol. iv. 5. § 51 ; Plin. v. 9. s. $9:$ Eth. 'Ovooф(ins), was the chief town of the Nomos Onuphites, in the Aegyptian Delta. The esact position of this place is disputed by geographers. D'Anville believes it to have been on the site of the modern Banoub, on the western bank of the Sebennytic arm of the Nile. Mannert (vel. x. pt. i, p. 573 ) places it south of the modern Mansour: Belley (JIem. de $l^{\prime}$ Acad, des Inscript. tom. xxviii. p. 543) identifies it with the present village of Nouph, in the centre of the Delta, a little to the E. of Buto, abont lat. $31^{\circ} \mathrm{N}$. Champollion, however, regards the site of this nome as altogether uncertain (l'Egypte sous les Pharaohs, vol. ii. p. 227). The Onuphite nome was one of those assigned to the Calasirian division of the native Aegyptian army, Coins of Onuphis of the age of Hadrian - obverse a lanreated hend of that emperer, reverse a female figure, probably Isis, with extended right hand - are described in Hasche (Lex. R. Num. III. pars posterior, s. v.). This town is mentioned by ecelesiastical writers, e.g. by Athanasius (Athanas. Opera, tom, i. pt. ii. p. 776 , ed. Paris, 1698 ; Le Quien, Oriens Christian. tom. ii. p. 526, Paris, 1740 ; comp. Pococke, Travels in the East, fol. vol. i. p. 423.) [W.B.D.]

OONAE. [OAEONEs.]
OPHALIUS, a small river of Sarmatia Asiatica, mentioned by Pliny (ri. 7. s. 7) as a tributary of the Lagous, which flowed into the Palus Maeotis. Herodutus mentions two streams, which he calls the Lycus and Oarus, which bad the same course and direction (iv. 123, 124). It is likely that the rivers in Pliny and Herodotus are the same. It is not possible now to identify them with acenracy.
[V.]
ophel. [Jerusalem, p. 20, b.]
OPHIO'DES ('Oфө́́s $\eta \mathrm{s}$, Strab. xvi. p. 770 ; Diod. iii. 39; Agatharel, ap. Hudson, Geog Graec. Min. p. 54), or Serpent-isle, was an island in the Fed Sea, in Foul Bay, nearly opposite the mouth of the harbour of Berenice; lat $24^{\circ} \mathrm{N}$. The topazes prodnced in this island were greatly prized loth in the Arabian and Aegyptian markets; and it scems from Pliny (v. 29. s. 34) to bave been hy some denominated Topaz-isle (Topazos). The cause of its more usnal name is donbtful; but there has always been a tradition in the East that serpents and precions stenes are found near one another. The island of Agathon, i. e. the good genius ('A 子átwvos
vīaos. I'tol, iv. 5. § 77 ) was probably the same with Ophiudes, and answers to the present Zamargat. The isle of Karnaka, opposite the hendland of Raseel-Anf, is, indenl, by wome gengraplers supposed to be the true Ophiodes Inamla. (Castro. Hist. Gen. ches Joyages, vil. i. p. 205.) [W.B.D.]

Ol'JllNLENSES or OllllENSEs. [Altoria, p. 65, a.]

Ol'IIIJ (Oüфip: Oüфєip; Zouфip; Zouфєip;

 a district, the name of which first occurs in the ethuegraphic table of Genesis, x. 29. Solomon caused a flect to be built in the Elomite ports of the Red Sa, and Hiram supplied him with Phoenician mariners well aequatinted with navication, and also Tyrian reasels, "ships of Tarshish." (1 Kings, ix. 28; 2 Chron. viii. 18.) The articles of merchandise which were brought back once in three years from Ophir were gold, silver, red sandalwood ("alumggim," I Kimys, s. 11; "algummim," 2 Chrom. ix. 10), precious stones, ivory, apes, (" kophim "), and jearocks (" thükym," 1 Kingls, s. 22; "thukyim," 1 (hiron ix. 21). The gold of Ophir was considered to be of the most precious quality. (Jub, xx. 11, 24. xxvili. $16 ; P_{\mathrm{s}}$, xlv. 9 ; 1 sa, xiii. 12; Eereles. vii. 18). In Jer. X. 9, "the gold from L phuz," and in Dan. x. 5, "the fine gold of Uphaz," is, by a slight change of pronunciation, the same as that of Ophir.

Many elaborate treatises have been written upon the details of these vorages. The researches of Gcsenius (Thrsaur. Linguae Hebr: vol. i. p. 141: and in Ersch und Griber's Encyrl. art. (ophir), Benfry (fudien, pp. 30-32) and Lassen ( Ind Alt. vul. i. Pp. 53:-539) have made it extremely proballe that the W. Shores of the Indian jeninsula were visited by the Phoenicians, who, by their colonies in the Persian Golf, and by their interoourse with the Gerrhaei, were early acquainted with the periudieally blursing monsonns, In favour of this Ithlian hypothesis is the remarknole circumstance that the names by which the articles of merchandise are designated are not Hebrew but Sanscrit. The paranck, too, is an exclusively Indian biud: althoush trom their gradual extension to the $\mathbb{W}$. they were offen called by the (ireeks *Median and Persian birdv:" the Somians even supposed them to have orizinally belomed to Samos, as the bird tras poned at finst in the sumenary delicated to Hera in that ishand. Silks, aloo, which are first mentioned in Prom bs, xxxi. 22, comld alone bave been hronght fum Intia. (Guatremere (Meim. de I.Acud. des Anser. vol. xv. pt. ii. 1s45, Pp. 349-402) agrees "ith 1 Peuren (hirsearches, vol. ii. 1f, 73, 74, trans.). whin placen (1phir on the E. coast of Africa, and exfhains "thokyin " to mean mot peacorks, but parioto or guinea-forls. 1'whemy (ri. 7. § 41) =praks
 Arahin, and a_zin of:s sot Pas:A (ฐoumápa, vii. 1. § 6) in ln ia, on the Barygazemos Simus, or Ciulf of Cumbray, a nane which in Somemit signilia "fair-shure." (Las-ent, hissert, de Tipprobame Ins. f. 18: compl. Int. Att. vol. i. p. 537.) Siffeta, on the F: cosist of Afrom, opposite to the island of Ma lagustar (Tomdon Geog. Journ, vol. iii. p. 207), in deventhed by Eliai (mi, Jablert, voi. i. p. 67) as a comenter ri $i \mathrm{i}$ in zuth, and subsequently by the Portheuce, atfor Gamets 1 oyture of tiscovery. The letthes $r$ and $l$ so fregrently interdhanced make the mane of the Afrimenglighted by

Sophara, which is used in the Septuagint with several other forms for the Ophir of Solomon's aud Hiram's flcet l'tolemy, it has been seen, has a Saphara in Arabia and a Sompara in India. The significant stmserit names of the mother-country had heen repeated or reflected on neighbouring ur (1) prosite coasts, as in the present day occurs in many instances in the Enghsh and Spanish Americas. The ratige of the trade to Ophir might thus he extended orer a wide space, just as a Phomician voyage to Tartessus might inelude touching at $\mathrm{C}_{y}$ rene and Carthage, Gadeira and Cerne. (Haraboldt, Cusmos, vul. ii. Pp. 132, 133, notes 179-182, trans.)
[E. B J.]
OPHIS ("Oфts), a river of Pontus, the mouth of which was 90 stadia to the east of port Hyssms, and which separated Colchis from the comntry of the Thianni. (Arrian, Perîpl. Pont. Eux. p. 6 ; Anonym. Peripl. p. 14. where it is ealied 'Oфoüs.) This river still bears the name of Of.
[L. S.]

## Ol’HlS. [Mastinfia.]

## OPHIUSA INS. [Pityesae.]

OPHIUSA, OPHIUSSA. 1. [Tiras.]
2. An island off the coast of Crete (Plin. iv. 20). which is probably represented by Giurdapoulo or Anti-Gozzo, unless it be the same as the OxEIA Ins. (Ogeta, Stadiasm, 321), which the anonymons Coast-describer places near Leben, [E. B. J.]
 Propontis, off the cuast of Mlysia , is mentioned only by Pliny (iv. 44) and Stephanus B. (s. v. BéoGukus, where it is called 'Офiof $\sigma \sigma \alpha$ ); it still bears its ancient name under the corrupt form of $A f$ zia. (1orucke, Trarel, iii. p. 167.)
[L. ...]
OPHLINIES ("O $\phi \lambda(\mu \circ s$ ), a branch of Mount Paryadres in the north-west of Pontus, enclosing with Mount Lithrus, the extensive and fertile diytrict called Planaroen. (Strab, xii. p. 556.) According to Hamilton (Researches, i. p. 439), it now bears the name of Kemer Dagh and Oktux Jogh.
[L. S.]
O)'HRADCS, a river mertioned by Pliny (vi. 25 . s. 23) as belonging to the province of Drangiana. Forbiger conjectures that it may be a tributary of the Erymandrus (Ilmend), now called the Khmsh Ruid.
[V.]
OPHRAH, a city of Benjamin, written 'Eфpa日à by the LXX. (Jushua, xviii. 23) and roфepa ( 1 Sam. xiii. 17). It is placed by Eusebius and s Jerome v. M.P. east of Bethel. (Onomast. s. e. Aphra.) 1)r. Kobinson suys that this accords well with the position of Et-Tcivibibeh, a village of Greek Chuistians, on a conical bill on a high ridge of land, which wuuld probably not lave been left unuceuphed in ancient times. (Bib. Res. vol, ii. 1p. 123-125.)
2. Ophralh of the Abiezrites ('Ефpa0d marpos тoū 'E.oठpi. LXX.; Juiges, vi. 11. 24, viii. 27 ; iu ver. 32. 'A6t 'Eoठ $\rho()$, a town in the half-tribe of Manaseh, west of Jordan, the native place of Gidemo, whem ala he was buried.
[G. W.]
O]lll:"N1LM ('Oфpivetov), a small town in the nouth of Truas, near lake 1'telcos, and between Dardams and Rhowteum, with a grave sacred to Ajax. (Herod. vii. 43 ; Xenoph. Anab, vii. 8. §5, where it is cailed 'Oqpóvov ; Stab, xiii. p. 595.) It is probably the madern Fren-Keri. (Comp. Rasclec, Lcxic. R(i Nıum, iii. 2. p. 136.)
[L.S.]
OPICI. [Owt]
OPIS (TOTIS, Jlerok. i. 189), a city of Bahylumis,

the river Tigris flowed by it. Xenophon, in the Retreat of the Ten Thonsand, speaks of it as a large city situated upon the Physcus (now Adhem), and ap. parently at some distance from its janction with the Tigris. Arrian, describing the return of Alexander from the East, states that be sailed up the Tigris to Opis, destroying on his way the dams which (it was snid) the Persians liad placed across the river to prevent any naval force ascending the stream. At Opis he is said to have held a great assembly of all his troops, and to have sent home those who were no longer fit to serve. (Anab. vii. 7.) Strabo speaks of it as in his time a sinall village, bot places it, like Herodotas and Arrian, upon the Tigris (ii. p. 80, xi. p. 529, xvi. p. 739). Captain Lynch, in his account of the Tigris between Bayhdded and Samarruh, cunsiders that sume extensive ruins be met with uear the angle formed by the Adhem and Tigris, and the remaias of the Nalr-awoin canal, mark the site of Opis. But the change in the course of the Tigris there obscrvable has led to the destruction of great part of the ancient city. (Lyncl, Geogr. Journ. ix. p. 472 ; comp. Rawlinson, Geogr. Journ. x. p. 95.)
 Oderzo), a city of Venetia, situated about 24 miles from the sea, midway between the rivers Plavis (Fiave) and Liquentia (Livenza), on a small strean (now called the Fratta) flowing into the latter. No mention of it is found belore the Romals conquest of Venetia ; but it appears to have under their rule become a considerable municipal town, and is seentioned by Strabo as a flourishing place, though not a city of the first class. (Strab. v. p. 214.) In the Civil War between Caesar and Pompey a body of troops furaished by the Opitergini is mentioned as displaying the most heroic valour, and offering a memoratle example of self-devotion, in a naral combat between the fleets of the two parties. (Liv. Ep. cx.; Flor. iv. 2. § 33; Lucan, iv, 462-571.) Tacitus also notices it as one of the more considerable towns in this part of Italy which were occupied by the generals of Vespasian, Primus, and Varus. (Tac. Hist. iii. 6.) It is mentioned by all the geographers, as well as in the Itineraries; and though Ammianns tells us it was taken and destroyed by an irruption of the Quadi and Marcomanni in A. D. 372 , it certainly recovered this blow, aad was still a considerable town under the Lombards. (Plin. iii. 19. s. 23 ; Ptol. iii. 1. § 30; Itin. Ant. p. 280 ; Tab. Peut.; Ammian. xxix. 6. § 1 ; P. Diac. iv. 40.) In an inscription of the reign of Alexander Severus, Opitergium bears the title of a Colonia ; as it is not termed such either by Pliny or Tacitus, it probably obtained that rank under Trajan. (Orell. Inscr. 72; Zampt, de Colon. p. 402.) It was destroyed by the Lombard king Rotharis in A. D. 641, and again, in less than 30 years afterwards, by Grimoaldus ( P . Diac. iv. 47, v. 28); but seems to have risen again from its ruins in the middle ages, and is still a considerable town and an episcopal see.

Opitergium itself stood quite in the plain ; bot its territory, which nust have been extensive, comprised a considerable range of the adjoining Alps, as Pliny speaks of the river Liquentia as rising "ex moatibus Opiterginis " (Plin. iii. 18. s. 22). The Itinerary gives a line of cross-roud which proceeded from Opitergiom by Feltria (Feltre) and the 1'al Sugana to Tridentun (Trent). (Itin.Ant. p. 280 .)

O'PIUS ('Ontoūs), a small port-town on the coast
of Pootos, probatly on or near the mouth of the river Ophis. (I'tol. v. 6. § 6; Tab. Peuting.) It is placed 120 stadia we.t of the river lehizins, althongh its uame seems to indicate that it was situated further west, near the river Ophis. [L. S.]
 § 11; Peripl. Mar. Erythr. p. 9), the modern IIafoon or Aftin, was a town situated upon the eastern const of Africa, immediately N . of the region called Azania (khaziyin), lat. $9^{\circ} \mathrm{N}$. The author of the Pcriplus, io his account of this coast, says that Opone stood at the conmencement of the highland called by the amcients Mount Elephas. He farther defines its position by adding that since there was only an opon roadsteal at the Aromatum Euporium - the cape Guardafui or Jerdoffion of modero charts - slips in bad weather ran duwn to Tabae for shelter,-the promontury nuw known as Ras Bannah, where stood the town callicd by Poleny
 of the Arabians. Fron thence a voyage of 400 stadia round a sharply projecting peninsula terminated at the emporium of Opone. Here ended to S. the Regio Aromata of the ancients.

Opone was eridently a place of some commercial importance. The region in which it stood was from remotest ages the seat of the spice trade of Libya. Throughout the range of Mumt Elephas the valleys that slope seawards produce frankincense, while inland the cassia or cinnamon of the ancients attained yerfection. But the Greeks, until a comparatively late period, were unacquainted with this coast, and derived from the Arabians its distinctive local appellations. Opone, which doubtless occnpied the site, probably, therefure, represeats also the Arabic name of a town called Afiin or Hafoon, i. e. A fuon, fragrant gums and spices; which, again, is nearly equivalent to the Greek designation of the spice-land of Eastern Libya - Aromata. And this derivation is rendered the more probable, whea taken in connection with the neighbouring bluff or headland of Guardafui or Jerdaffoon, since Afinn enters into the composition of both uames, and Jerd or Guard resembles the Ponic word Kartha, a Leadland. Thus Jerch-Affoon is the promontory of Opone. Ptoleny (iv. 7. § I1) places Opone too far S. of cape Jerdaffion. The anthor of the Periplos more correctly sets it a degree forther N., six days' voyage from a river which ruis at the soutlern base of Ȟudy Halfa, or Mount Elephas. The characteristics of the entire tract, of which Opone formed one extremity, are those of an elevated ridge lying between two seas, - the Red Sea and the ocean,-and which, from its elevation and exposure to the NE. moosson, is homid and fertile, affording a marked contrast to the generally sterile and arid shore above and below the highland of Elephas. S. of Opone there is no trace of ancient comurerce. The articles of export from thas emporium were, according to the anthor of the Periplus, cinnamon, distinguished as " native," aroma, fragrant gums generally, motò, or cinoamon of inferior quality ; slaves of a saperior kind ( $\Delta о \cup \lambda ı$ ка крєiббора), principally for the Aegyptian market; and tortoise-shefí of a suyerior quality and in great abuadance. (See Vinceut, Commerce and Navigation of the Ancients, vol. ii. p. 152-157.)
[W. B. D.]
OPPIDUM NOVUM ("O $\pi \pi i$ ion Néov, Ptol. ir.
2. $\S 25$ ), a town of Mauretania, colotised in the reign of the emperor Claudius, by the veterans (Plin. v. 1), which Ptolemy ' 2 . c.' plares $10^{\prime}$ ' to the E. of

Manliana，and the Antonine Itinerary 18 M．1．to the U．；Ptoleny＇s position nerees with the Siunab of Shaw（Tran，［．58），where that traveller found ruins on the W．bank of the Chinalaph．The town of the Itinerary corresponds with El Khdiduroh，the ＂Chadra＂of Elrisi（Geog．Nub．p．81），situated on a rising gronnd，on the brink of the same river，where there are also ruins
［E．B．I．］

OPTATIANA．［D．aCLA，Vol．I．p．． 44 ，b．］ OPU＇NTIUS SINTS［OrCs．］
O1］US＇（＇Onoûs，contr．of＇Oróets，Il．ii． 531 ：Eth．
 who were called from this place the Locri Opuntii． It stood at the head of the Opuntian enlf（ $\delta{ }^{\circ} \mathrm{O}$ тov́v－ toos кó入tos，Strab．ix．p．425；Opuntius Simes，I＇lin， iv．7．s．12；Mela，ii．3．§ 6），a little imland，being 15 stadia from the shore according to srmato（l．c．）， or only a mile according to Livy（ sxriii .6 ）．Opus was believed to be one of the most ancient towns in （ireece．It was said to have bren founded by Opus， as son of Lncrus and Protogeneia；and in its neigh－ bourhood Deucalion and l＇yrrha were reported to have resided．（Pind，otl，ix，62， 87 ；Schol．at lor） It was the native city of Patroclus．（Hom，1l．xriii． S26），and it is mentioned in the Homeric catalogue av one of the Locrian towns subject to Ajax，son of Wileus（ $I l$ ．ii． 531 ）．During the flonrishing period of Grecian bistory，it was regarded as the chief city of the eastern Locrians，for the distinction between the Opuntii and Epienemidii is not made either by Ilcrodutus，Tliucydides，or Polybius．Even Sirabo， from whon the distinction is chiefly derived，in one place describes Opus as the capital of the Epiene－ mindii（ $\mathrm{ix} . \mathrm{p} .416$ ）：and the same is confirmed by Pliny（iv．．7．s．12丷）and Stephanus（s．$v$ ．＇Onóets； from Leake，Northim Grece．vol．ii．p．181．）The （1puntii joined Leonidas with all their forces at Thermonylac，and sent seven ships to the Grecian flet at Artemisium．（Herod vii．203，viii I．）Sub－ sequently they belouged to the anti－Athenian party in（irecce．Accordingly，after the eonquest of Boectia liy the Athemians，which followed the battle of （））mophyta，B，c：456，the Athenians carried off 100 of the richest Opuntians as howares．（Thne，i．Jox．） In the ledonmasian War the Opmutian privateers amoyed the Athenian trade，and it was in order to wheek them that the A：honians fortificd the small island of Atalanta of the Opurtian coust．（Thue． ii．32．）In the war butween Antigonus and Cas－ sinder，（opus e－priased the camse of the latter，and Wus therefore hesieged by l＇toleny，the general of Autigonus．（Dhal．xix．is．）

The position of $O_{\text {pus }}$ is a disputed point．Mele－ tius has fallen into the error of identifying it with I＇undouita，which is in the territory of the Epienc－ midii．Many modern writers place Opus at $_{\text {put }}$ audanda， where are several Hellenic remains；lut Leake ob－ sorves that the distance of Tiilunela from the sea is much ton great to eorrespond with the testimony of strabo and Jixy．
at Karchlientzzu，a village situated an hour to the south－eustward of Tailanda，at a distance from the sea corresponding to the 15 stadia of Strabo，and where exist the reunins of an ancient city．（Vorthern Cireece，vol．ii．p． 173, seq．）

2．A town in the nmuntainous district of Acroreia in Elis，taken by the Spartans，when they invailed Elis at the close of the Peloponnesian War．The Schuliast on Pinular mentions a river Opus in Elis． The site of the fown is perhaps represented by the Hellenic ruins at skiadda，and the river Opus may be the streain which there flows from a small lake into the leneius．（1）iod．xiv．17：Steph．B．s．v．； Stral．ix．p． 425 ；Sthol．ad Find．Ol．ix．64：Leake， Peloponnesiacta，p．220；Curtius，Peloponnesus，vol． i．p．41．）

OLAA（＂Opa），a place mentioned by Ptolemy（vi． 8．§ 14）in Carmania，but apparently on the con－ fines of Giedrosia．It seems not improbable that he bas confounded it with Orte，or Oraen，which was eertainly in the latter province．Strabo（xv．p． 723）and Arrian（vi，24）both apparently quoting from the same authority，speak of a place of this name in Gedrosia，－the capital，probably，of the Oritae．
［V．］
ORA（ $\tau \alpha{ }^{\circ} \Omega p \alpha$ ），a town in the NW．part of Indin， apparently at no great distance from the Kubut river，of which Arrian describes the capture by Alexander the Great，on his march towards the Panjáb（iv．c．27）．It does not appear to have been identified with any existing ruins ；but it must have been situated，according to Arrian＇s notice，between the Guraei（ciauri）and the cclebrated rock Aornos．
［V．］
ORAE（ $\Omega$ pat，Arrian，vi．22，28），the chief town， in all probability，of the people who are generally called Oritae，though their name is written in different ways．It was situated in Gedrosia，and is most likely the same as is ealled in the P＇eriplas of the Erythracan Sca，the Emporium Oraea（c．37，ed． Miller）．The neighbouring comatry was rich in corn，wine，barler，and dates．
［V．］
ORATHA（＂Opa日a），a cily describeã by Stepha－ aus B．（s．v．）．as in the district of Mesene，on the Timris．As be does not state in which Mesenc lie supposes it to have been，it is impossible now to identify it．Some commentators have supposed that it is the same as＂Ur of the Chaldecs．＂It is，how－ ever，more likely that it is＂Ur castellum Penarum＂ （Anmm，Marc．xxv．\＆），now beiieved to be repre－ sented by the ruins of Al－Hathorr；or，perhaps，the Ura of Pliny（v．24．s．21）．
［1．］
ORBELC？（COp6ndos，Herod．v．IG：Strab．vii． p． 329 ；Dindor．xx． 19 ；Arrian，Anab．i．I．§ 5： Ptol，iii．9．§ 1，iii．11．§ 1；1＇on p．Mela，ii．2．§2； I＇lin iv．17），the great momtain on the frontiers of Tlirace and Macedonia，which，bejinning at the Strymonic plain mud lake，extends towards the sources of the Nirymon，where it unites with the summit called scomins，in which the river had its origin．The amphibious inbabitants of lake l＇rasi：a procured their planks and piles，on which they eon－ structed their dwellings，from this monntain．（ilemol． l．c．）Cassander，after having assisted Audoleon， king of Pueonia，ayainst the Illyrian Autariatac， and having conqnered them，transported $20,000 \mathrm{men}$ ， Wumen，and children to Mt．Orbelus．（Diodor，l c．） The epitomiser of Strabo（l．c．），who lived not leng before the commencement of the 11th century，al－ plics this name to the rilge of Haemus and Rhodenc；
p. 33; comp. Poppo, Prolegom. in Thuc. pars i. vol. ii. p. 321), in consequence, was inclined to believe that there were two mountains of this name. Kiepert (Karte der Europ. Türkei) identifies Orbelas with Perin Dagh. The district called Orbelia ('O $\rho$ $67 \lambda i a$, Ptol. iii. 13. § 25 ), with the town Garescus, derived its name from the mountain. (Leake, Northern Greece, vol. iii. pp. 211. 463.) [E.B. J.]
$0^{\prime}$ 'RCADEs (O (Oка́ $\delta \in s ~ \nu \grave{\eta} \sigma o t$, Ptol. ii. 3. § 31 ), a group of small islands lying off the northern extremity of Britamia Barbara. According to Ptolemy (l.c.) and Mela (iii. 6 . § 7) they were 30 in number ; ${ }^{\prime}$ liny (iv. 16. s. 30 ) reckons them at 40 ; Oraxias (i. 2) at 33 , of which 20 were inhabited and 13 uninhabited. This last account agrees very nearly with that of Jornandes (B. Get. 1), who makes them 34 in namber. See also Tacitus (Agric. 10) and the Itinerary (p. 50s). The modern Orkney and Shetland Islands.
[T. H. D.]
ORCAORICI ('Oркаорккоi), a place in a rough district of Galatia, devoid of a sofficient supply of water, near Pessinus, on the borders of Plarygia, if not in Phrygia itself (Strab. xii. pp. 567, 568, 576).
[L. S.]
ORCAS ('Opkás, Ptol. ii. 3. § 1), a promontory on the N. coast of Britannia Barbara, now Dunnet IIcoul. It should be remarked, however, that P'tolemy (l. c.) places it on the E. coast, and gives it the additional name of Tarvedum (Tapousסov́u).
[T. H. D.]
olicelis (Opкe入ís, Ptol. ii. 6. § 61). 1. A town of the Bastitani in Hispania Tarraconensis, sometimes, bat erroneonsly, ideatified with $O$ ribuela. (Nentelle, Esp. an. p. 186; Ukert, vol. ii. pt. I. p. 406. )
2. An inland town of Thrace. (Ptol. iii. 2. § 11.)
(Ptol. iii. 2 . §
$[$ T. H. D.]
ORCHE'NI ('O $\rho \chi \eta$ Voi'), a people of Arabia Deserta, placed by I'tolemy on the Persian Gulf, i.e. to the XE. of his Arabia Felis. (Ptol. v. 19. § 2.) They were perhaps the inhabitants of Orchue mentioned belor.
[G.W.]
ORCHISTE'NE (O $\rho \rho$ रı $\sigma \tau \eta \nu \eta \eta_{1}$ Strab. xi. p. 528), a canton of Armenia, which Strabo (l. c.) describes as abounding in horses, but does not mention its pasition.
[E. B. J.]
$0^{\prime} \mathrm{FCHOE}(\mathrm{O} \rho \chi 6 \eta)$, a city of southern Babylonia, placed by Ptolemy aurong the marshes in the direction of Arabia Deserta (vi. 20. § 7). There can he little doubt that it is to be identified with one of the great mounds lately excavated in those parts, and that the one now called Warka represents its pasition. It was snpposed that another mound in the immediate neighbourhood, Muqueyer, was the same as the " $U r$ of the Cbaldees;" and there is now good reason for identifying it as the site of that celebrated place. The name of Warka reads on inscriptions lately discovered by Mr. Taylor, Hur or Hurik, which is nearly the same with the 'O $O \in \chi$ of the LXX. and the ' $\mathrm{O}_{\rho} \boldsymbol{\chi}^{\prime 0} \eta$ of Ptolemy (l.c.). Moreover, IIur and Warka are constantly connected in the inscriptions, just as Erech and Accad are in the Bible. It is most probable that the Orcheni ('Op $\ \eta \nu 0$ !), described in Strato as an astronomical sect of Chaldzeans, dwelling near Babylon (xxi. p. 739) ; in Ptolemy, as a people of Arabia, living near the Persian Gulf (v. 19. § 2) ; and in Phiny, as an agricultaral pupulation, who banked op the waters of the Euplirates and cumpelled them to flow into the Tigris (vi. $27 . \mathrm{s}$. 31), were really the inbabitants of Orehoe and of
the district surrounding it. We now know that this comntry was ruled in very early times by a Chaldaean race, some of the kings of which Berosus has recorded. (Rawlinson, in Athenaeum, 1854, Ni, 1377: Euseb. Praepar. Evang. is. 17.) It is worthy of notice that Eusebius has preserved an ancient fragment from Eapolemus, who speaks of a city of Bahylonia,Camarina, " which some call Urie (Oípin)." As the Assyrian name of Warka is writteo with a monogram which signifies "the Moon," and as the name Camarina would naturally be derivable from the Arabic Kamar, "the Moon," there is an additional connection between the two names. (Euseb. l. c.) It is also clear from the inscriptions that the oames of the two cities were cunstantly interchanged.
[V.]
ORCHO'MLENUS. 1. ('OpXopevós ; in insc. and
 usually called the Minyean Orchomenus ('Op才o$\mu \in \nu$ òs Mavúecos, Ilom. Il. ii. 511 ; Thuc, iv, 76 ; Strab. ix. p. 414), a city in the north of Boeotia, and in ante-historical times the capital of the powerfal kingdom of the Minyae. This people, according to tradition, seem to bave come originally from Thessaly. We read of a town Minya in Thessaly (Sieph. B. s. v. Muvía), and also of a Thessalian Orchomenus Jlinyeus. (Plin. iv. 8. s. 15.) The first king of the Boeotian Orchomenus is said to bave been Andreus, a son of the Thessalian river Peneins, from whom the country was called Andreis. (Paus. ix. 34. § 6;
 A poll. Rhod. ii. 1190.) Andreus assigned purt of his territory to the Aetolian Athanas, who adopted two of the grandchildren of his brother Sisyphas: they gave their names to Haliartus and Coroncia. Andreus was succeeded in the other part of his territory by bis son Eteocles, who was the first to worship the Charites (Graces) in Greece. Upon the death of Eteocles the sovereignty devolved upon the farmily of Halmus or Almus, a son of Sisyplus. (Patos ix. 34. §7-ix.35.) Halmus had two daughters, Chryse and Chrysogeneia. Cbryse by the god Ares became the mother of Phlegyas, who succeeded the childless Eteocles, and called the conntry Phlegyantis after himself, He also gave his name to the fierce and sacrilegious race of the Phlegyac, who separated themselves from the other Orchomenians. and attempted to plunder the temple of Delphi. They were bowever all destroyed by the god, with the exception of a few who fied into Phocis. Phleryas died withont children, and was succeeded by Chryses, the son of Chrysogeneia by the god Poseidon. Cbryses was the father of the wealthy Minyas, who built the treasury, and who gave his name to the Minyan race. Minyas was succeeded hy his son Orchomenus, after whom the city was named. (Paus. ix. 36. $\$ \$ 1-6$.) Some modern scholars have supposed that the Minyae were Aeolians (Thirlwall, Hist. of Greece, vol. i. p. 91); hat as they disappeared before the historical period, it is impossible to predicate anything certain respecting thein. There is, however, a concurrence of tradition to the fact, that Orchomenas was in the earliest times not only the chief city of Bueotia, but one of the most powerful and wealthy cities of Greece. It has been observed that the genealogy of Orchomenus glitters with names which express the traditional opinion of his unbonoded wealth (Chryses, Chrysogeneia). Homer even compares the treasures which flowed into the city to those of the Egyptian Thebes (Il. ix. 381 ; comp. Eustath. l. c.) It would seem that at an early period Orchomenus ruled over
the whole of Northern Boeotia; and that even Thebes was for a time compelled to pay tribute to Eirginus, king of Orchomenus. From this tribute, however, the Thehans were delivered by Hercules, who made war upon Orchomenus, and greatly reduced its power. (Pats, ix. 37. § 2; Strab. ix. p. 414 ; Diod. iv. 18.) In the Homeric catalugue Urchomems is mentioned alung with Asplecion, but distinet from the other Buentian towns, and as sending 30 ships to the Trofan War (Il, ii. 511), sisty yeas after the Tro an War, according to the received chronology, the sovereignty of the Mingae seems to lave been overthrown by the boeotian immigrants from Thessaly; and Orchomenus became a nember of the $B$ neotian confederacy. (strab. ix. p. 401 : comp. Thuc. i. 12.) The city muw ceased to be the Minyeian and became the Boeotian Orchomenus (Thuc. iv. 76): but it still remained a powerful state, and throughout the whole historical period was second only to Thebes in the Boeotian confederacy. The town of Chaeroneia appears to have been always one of its dependencies. (Thne. iv. 76.) In the Persian War Orchomenus, together with the other Boentian towns, with the exception of Thespiae and Plataeae, deserted the cause of Grecian independence. Orchomenus possessed an aristocratical goverument, and continued on triendly terms with Thebes, as long as the aristoeratical party in the latter city had the direction of public affairs. But when, after the clase of the 1'doponnesian War, a revolution placed the gevernneut of Thebes in the hands of the democracy, Orchomenus hecame opposed to Thebes. Accordingly, when war broke out between Sparta and Thebes, and Lysander invaled Beeotia io n. c. 395 , Orchomenus revolted from Thebes, and sent troops to assist Lysander in his siege of Hdiartus (1'lut. Lyys. 28; Xen. IIell. iii. 5. § 6, „eq.: Diod. siv. 81 ; Corr. Nejas. Lys, 3.) In the following year (4. c. 39-4), when all the other Boeotians joined the Thebans and Athenians at the battle of Coroneia, the Orchomenians fought in the army of Azesilans, who arrayed them against the Thebans. (Xen. Kell. iv. 3. § 15 , Ages. 2. §9.) It was now the olject of the Spartans to deprive Thebes of her supremacy over the Boeotian cities. This they effected by the peace of Antalcidas, B. C. 397, by which Thebes was obliged to acknowledge the independence of Orchomenus and of the cities of Boeotia. (Men. Mell. v. 1. § 31.) The battle of L.enctra (3. c. 371) clanged the position of affairs, and made Thebes the undisputed master of Boeotia. Urehoments was now at the mercy of the Thebans, who were anxious to destroy the city, and rednce the imhabitants to slavery. Fpaminondac, however, dissuaded them from carrying their wishes into effect, and indaced them to pardon Orchomenus, and readmit it as a member of the Boentian confederation. (1)iod. xv. 57.) The Thebans ajpear to have vielded with reluctance to the cenerous advice of Epaminondas ; and they took sulvantage of his absence in Thessaly, in 1.e. 368, to carry their original design into effect. The pretext was that the 300 knights at Owhomenus liad enterod into at conspirary with some Theban exiles to uxurthrow the denocratical constitution of Thebes. It is nut improbable that the whule story was a fiction; but the Thebans eagerly listened to the acensation, condemmed the 300 Orchomenians, and decreed that the city should be destroyed. A Theban army was imunediately sent auminst it, which burnt it to the gronnd. put all the male inhalitants to the sword, and sold all the women

15. § 3.) This atrocious act of vengeance remained as an indelible stigma upon the Thethan cbaracter (Dem. c. Leptin. p. 490.)

Orchomenus remained a long time in roins, though the Athentans were ansious for its restoration, fur the purpose of lumbling Thebes. (Dem. Neyal. $\mathrm{pp} .203,208$.) It appears to have been rebuilt during the Phocian War, when the Phocians endeavoured to expel the Thebaos from the northern parts of Bocotia. In n. c. 353 we find the P'hocian Ieader Onumarchus in possession of Orchomenus and Coroneia (1)iod. xvi. 33, 35) ; and in the following year Phayllus was defeated in the neighbourhood of these towns. (Diod. xvi. 37.) Orchomenus, Curoneid, and Corsiae were the three fortified places in Boeotia, whicls the Pbocians had in their power (1)iod. xvi. 58); and from which they made their devastating inroads into the ether parts of Boeetia. On the conclusion of the Sacred War, B. C. 346 , Orehomenus was given by l'hilip to its implacable enemy the Thebans, who, under I'hilip's eyes, destroyed the city a second time, and sold all its inhabitants as slaves. (Aesch. de Fals. Leg. p. 309; Dem. Plai., ii. p. 69, de Pace, p. 62, de Fals. Leg. p. 375.) It did not, hottever, remain loog in ruins; for after the defeat of the Thebans and Athenians at the battle of Chaeroneia, B, C. 338, it was rebuilt by Philip's order (Paus. iv. 27. § 10, is. 37. §8; according to Arrian, Anub. i. 9, it was rebuilt by Alex:under the Great atter the destruction of Thebes). From this time the nane of Orchemenus is seldom mentioned in Listory Cuder the Rumans it shared the common fate of the Bueatian towns, all of which were, in Strabo's time, only rains aod names, with the exception of Thespiae and Taoagra.
Urchomenus was famous for the worship of the Charites or Graces, and for the festival in their hooour, celebrated with musical contests, in wbich poets and musicians from all parts of Greece took part. Hence Pindar calls Orchomenus the city of the Charites (Pyth. xii. 45), and Theocritus describes them as the goldesses who love the Minyeian Orchomenus (xvi. 104). An ancient juscription records the names of the vietors in this festival of the Charites. (Miller, Orchomenas, p. 172, seq.) Pimdar's fourterath Olympic ode, which was written to commemorate the victory of Asopichus, an Otchomenian, is in reality a hymn in honeur of these goddesses, and was probably sung in their temple. It was in the marshes in the neighbourhood of Orchomenus that the auletic or flute-reeds grew, which exercised an important influence upon the development of Greek music. [Sce Vol. 1. p. 414, b.]

The roins of Orchomenus are to be seen near the village of Skripu. The city stood at the edge of the marshes of the Copaic lake, und occupied the triangular face of a steep mountam. The Cephissus "winds like a serpent " round the southern lase of the mountain
 ap. Strab. ix. p. 424). At its northern base are the sources of the river Melas. [See Vul. I. p. 413 , a.] Leake observes that the "upper part of the hill, forning a very acute angle, was fortified differently from the customary moles. Instead of a consideralle portion of it having been enclosed to form an acropolis, these is only a small castle on the summit, baving a long narrow approach to it from the body of the town, between walls which, for the last 200 yards, are alunst parallel, and not more than 20 or 30 yards asunder. Below this approach

widens, and in the lowest part of the town the enclosed space is nearly square. It is defended on the lowest side by a wall, which crossed the slope of the hill along the crest of a ledge of rock, which there forms a division in the slope. In this wall, which is at three-fourths of the distance from the castle to the monastery, there are some foundations of the gate which formed the lower entrance into the city; and on the outside are many large masses of wrought stone, the remains, apparently, of some temple or other public building. The sonthern wall of the city, which follows a line parallel to the Cephissus, is traceable, with scarcely any intermission. through a distance of three-quarters of a mile; and in many places several courses of masonry are still extant. The wall derives its flank defence from square towers, laced for the most part at long intervals, with an intermediate short flank or break, in the line of wall. In a few places the masonry is of a very canly age, but in general it is of the third kind, or almost regular." The former belongs to the earlier Orchomenus, the latter to the later city, and dates from the time of its restoration either by Philip or the Phocians. "Towards the middle of the northern side the hill of Orchomenus is most precipituus, and here the walls are not traceable. The circumference of the whole was atout 2 miles. The citadel occupies a rock about 40 yards in diameter, and seems to have been an irregular hexagon; but three sides only remaio, no foundations being visible on the eastern Lalf of the rock. At the northern angle are the ruins of a tower, and parallel to the north-western side there is a ditch cut in the rock, beyond which are some traces of an outwork. The hill is commanded by the neighbouring part of Muunt Acontium, but not at such a distance as to have been of importance in ancient warfare. The access to the castle from the city was first by an oblique flight of 44 steps, 6 feet wide, and cut out of the rock; and then by a direct flight of 50 steps of the same kind."

PLAN OF OHCHOMENUS.
A A. The Cephissus.
B K. The Melas.
(1) Mount Acontium.
D. Orchgmenus.

1. The Acropolis.
2. Treasury of Milyas.
3. Monastery.
4. Village uí Skuripú.
a a. Road from I imadhia.
b b. Rosd to Tülanda.

The monuments, which lausanias noticed at Orchomenus, were temples of Dionysus and the Charites, - of which the latter was a very ancient buiding, - a fountain, to which there was a descent, the treasury of Mlinyas, tombs of Dlinyas and Hesiod, and a brazen figure bound by a chain of iron to a rock, which was said to be the glost of Actaeon. Seven stadia from the town, at the sources of the river Melas, was a temple of Hercules. The Treasury of Atreus was a circular building rising to a sunmit not very pointed, but terminating in ot stone, which was suid to hold together the entire bnilding. (Paus. ix, 38.) Pausanias expresses his admiration of this building, and says there was nothing more wonderful either in Greece or in any other country. The remains of the treasury still exist at the eastern extremity of the lill towards the lake, in front of the monastery. It was a building similar to the Treasury of Atreus at Mycenae. It was a circular viult of massive masonry embedded in the hill, with an arched roof, surmounted probably by a tumulus. The wbole of the stone-work of the vault has now disappeared, but its form is vouched for by the circular cavity of the ground and by the description of l'ausauias. It had a side-door of entrance, which is still entire, though completely embedded in earth up to the base of the architrave. There were probably two great slabs in the architrave, as at Mycenae, though one only is left, which is of white marble, and of which the size, according to Leake, is 16 feet in its greatest lengtlı, 8 in its greatest breadth, and 3 feet $2 \frac{1}{2}$ inches in thickness. The dianeter of the vault seems to lave been about 41 feet. Respecting the origin and destination of this, and other buildings of the same class, sume remarks are made under Mreenae. [Vol. II. p. 383.] Strabo remarks (ix. p. 416) that the Orchomenus of his time was supposed to stand on a different site from the more ancient city, the inundations of the lake having forced the inhabitants to retire from the plain towards It. Acontium. Aud Leake observes, that this seems to accord with the position of the treasury on the outside of the exinting walls, since it can hardly have been placed there originally. The acropolis, lowever, must always have stood upon the hill; but it is probuble, that the city in the height of its power extended to the Cephissus.

COIN OF ORCIIOMENUS.
The monastery of Skripi, which stands about midway between the treasury and the river, probaDly occupies the site of the temple of the Charites; for the pedestal of a tripod dedicated to the Charites, which is now in the church, was found in an excavation made upon the spot. Some very ancient inscriptions, of which two are now in the Britisha Museum, were fund in the church of the monastery. They are in the Orclomenian-Aeolic dialect, in which the digamma was used. (K. O. Ditiller, Orchomenos und die Minyer, Breslau, 1844, 2nd ed.; Jodwell, Classical Tour', vol. i. p. 227, seq.; Leake, Vorthern Gireece, vol. ii p. I44, seq.; Murc, Tour
in Greere, vol. i. p. 223, seq; Ulrichs, Reisen in Giricclentand, p. 178, seq.)
2. An ancient city of Areadia, called by Thuerfintes (v. 61) the Alcemphan ( $\delta$ 'Apreঠ́kós), to distinguish it from the Boootim town. It was situated in a plain surmonded on every side by mumtains. This plain was bomnded on the S. by a Jow range of hills, called Auchisin, which separated it from the territory of Nantincin; on the N. by a lufty chain, ealled Oliegrtus, through which lie the pases into the territorien of d'leneos and Stympha1as: and on the E. and W. by two parallel chains runniug from N. to S., whikh bore no specifie natue in antignity: the eastern rance is in one part 5100 fret hich. and the western ahout 4000 feet. The phain is divided into two by hills projecting on either side from tlic eastern and wentern langes, and which aypreach so close as to allow space tor only a narros ravine between them. The we-tern bill, on areoust of its rough and rugged form, was called Trachy (T $\rho \propto \chi v^{v}$ ) in antiquity; upon the summit of the western momatain stood the acropolis of Orchomenus. The northern plain is lower than the southern; the watars of the latter run through the ravine between Mount Trachy and that upon which Orchomenus stands into the nurthern plain, where, as there is no ontlet fur the waters, they form a considerable lake. (I'ans, viii. 13. §̧ 4.)

The acropulis of Orchomenos, stood upon a lofty; stecp, and insulated hill, senly 3000 feet ligh, revembling the strong fortress of the Mesvenian Ithome, and, like the latter, coumanding two plains. [see Viol. II. p. 338.] From its situation and its legendary history, we may conclude that it was onc of the mont powerful cities of Areadia in early times. P'ausamias relates that Orchomwins was founded by an epmymous hero, the son of 1 yean (vini. 3. § 3); but there was a trauition that, on the death of Arcas. his dominons were divided among his thrpe soms, of whom Elatus obtained Orchomemas as his portion. (Schol. ad. Diomus. Per. 415.) The kings of Orehotuenus are said to have rulol over nearly all Areadia. (Heraclid. Bont. aj, Jiog. Laurt. i. 94.) P'ausnnias also gives a hat of the kiugs of U.chmmenus, whon lie represents at tho same time as kines of Arcoulit. One of these kines, Aristocrates, the son of Aeclumis, was stoned to death lay lis people for violating the virgin puiestess of Artemis Hymuia. Aristocrates was succeeded by his son llicetas, and llieetas by his son Aristocrates 1I., who, having ahandened the Mesenians at the lonttle of the 'rench in tho second war agamst sjarta, experipucel the tie of his wrandfather, beine st med to death by the Arealians, lle appears to lave been the last king if thehumens, who reipned over Arcat ia. but his tomity was not deprived of the kingaton of OrehoAn+is, th in statted in sume aththorities, since we 1.4 lin sun Aristobman repreantel an king of the - 19. (1'anc, vit. 5; Polyb. is. 3; lerael. 1'ont. $\therefore$ ) It walid ripear, inded, that royalty continued 1. exist at Orchonem sh live after its abolition in mest ofher Cirecina citirs, simee Theophilus related that Peasistratus, king of Orchomenus, was put to Whath liy the aristocracy in the Pelopomesian War. (tlut. J'arall. 32.)

Orchomenas is mentioned br Homer, who gives it the epitber of moxúon入os ( 11 . ii. 605): and it is
 by Apoll unus Rhodius ( 11.512 ). In the J'ersian wars Orchomemas sent 120 men to Thermopylae

the Peloponnesian War, the Lacedaemonians depnsited in Orehomenus the hostages they had taken from the Arcadians; but the walls of the city were then in a dilapidated state; and accordingly, when the Athenians and their Peloponnesian allies advanced atainst the city in B. C. 418 , the Orchomenians dared not offer resistance, and surrendered the bostages. (Tlme, v. 61.) At the time of the foundation of Negalopolis, we find the Orchomenians exercising suprenaty over Theison, Dethydriom, and Teuthis; but the inhahimats of these cities were then transferred to Megalopolis, and their territories ussigned to the latter. (Paus. viii. 27. §4.) The Orchomenians, through their enmity to the Mantineians, refused to jim the Arcadian confederney, and made war upon the Mantineians. (Xen. Hell. vi. 5. § 11, seq.; Dud. xv. 62.) Henceforth Orchomenus lost its political importance; but, from its commanding situation, its possession was frequently an object of the belligerent powers in later times. In the war between Cassander and Pulysperchon, it fell into the power of the former, B. c. 313 . (Diod. xix. 63.) It sulseguently espoused the side of the Aetoliuns, was taken by Cleomenes (1'olyb. ii, 46), and was afterwards retaken by Antigonus Doson, who placed there a Macedonian garrison. (1'olyb. ii. 54, ir. 6; Plut. Arat. 5.) It was given back by Philip to the Achacans. (Liv. xxxii. 5.) Strabo mentions it among the Arcadian cities, which bad either disappeared, or of which there were searcely any traces left (viii. p. 338) ; but this appears from l'uusanias to have been an exaggeration. When this writer visited the place, the old city upon the summit of the mountain was in ruins, and there were only sone vestiges of the agora and the town walls; but at the foot of the mountain there was still an inhabited town. The upper town was probably deserted at a very early period; for such is the natural strengtb of its position, that we can bardly suppose that the Orchomeniaus were dwelling there in the Peloponnesian War, when they were unable to resist an invading force. Pausanias mentions, as the most remarkable objects in the place, a source of water, and temples of Poseidon and Aphrodite, with statues of stone. Close to the city was a woolen statue of Artemis, enclosed in a great cedar tree, and hence called Cedreatis. Below the city were several heaps of stones, said to have been erected to some persons slain in battle. (l'als, viii. 13.)

The village of Kutwiki stands on the site of the lower Urchomenus. On approaching the place frum the south the traveller sces, on his left, tamuli, chiefly enmposed of collections of stones, as described by l'ausanias. Just above Kalpúki are several pieces of white mathle columns, belonging to an ancient temple. There are also some remains of a temple at a rained churels below the village, near which is a copions fountain, which is evidently the one described by l'ausamias, On the summit of the hill are some renamins of the walls of the more ancient Orchamenus.
In the territory of Orchomemus, but adjoining that of Mantineia, consequently on the northern slope of Mt. Anchisia, was the temple of Artemis Hymmia, which was beld in high veneration by all the Areadians in the must ancient times. (Paus. viii. 5. § 11.) Its site is probably indicated by a chapel of the Virgin Mary, which stands cast of Lcridhi.

In the southern $\mathrm{p}^{\text {bin }}$ in an ancient canal, which Yipriucis the yaters fynde surrounding mountains
through the ravine into the lower or northern plain， which is＂the other Orchomenian plain＂of T＂au－ ganias（viii．13．§ 4）．After passing the ravine，at the distance of 3 stadia from Orchomenus，the road diviles into twa．One turns to the left along the northern side of the Orchomenian acropolis to Cn－ phyae，the other crosses the torrent，and passes under Mr．Tracly to the tomb of Aristocrates，be－ yond which are the fountains called Tenciae（ $\mathrm{T} \epsilon-$ $\nu \in i a l)$ ．Seven stadia furtlier is a place called Amilus（＂A $\mu$ iरos）．Here，in ancient times，the road divided into two，one leading to Stymphalus and the other to Plieneus．（Paus viii．13．\＆ 4 ，seq．） The above－mentioned fountains are visible just be－ yond Trachy，and a little further are some Hellenic ruins，which are those of Amilus．（Dodrell，Clas－ sical Tour，vol．ii．p．425，seq．；Leake，Morea， vul．iii．p．99，seq．；Bublaye，Récherches，gc． p． 149 ；Curtius，Peloponnesos，vol．i．p．219，seq．） 3．A town in Tbessaly．［Sce above，p．487．］
4．A town in Euboea near Carystos．（Strab．ix． p．416．）

ORCISTUS，a town in the north－east of Phrygia， near the borders of Galatia．It was the see of a hirhop（Geogr．Saer．p．256；Concil．Chalced．；Tab． Peuting）．It is placed by Cul．Leake（Asia Minor， p．71），on the authority of an inseription found there by Pococke，at Alckian，and，perbaps more enr－ rectly，by Hamilton（Rescarches，i．p．446）about 3 or 4 miles to the south－east of the villace of Alekiam，where considerable remains of antiquity are found．
［L．S．］

## ORDESUS．［Isiacorem Portcs．］ <br> ORDESUS．［ODESsts．］

ORDESSUS（＂O $\rho \delta \in \sigma \sigma o s$, Herod．iv．48），an af－ fluest of the Ister，which the commentators usually ilentify with the Sereth．（Schafarik，Sluw．Alt． vol．i．p．506．）
［E．B．J．］
ORDOVICES（＇Opסóvices，Ptol．ii．3．§ 18），a people on the W．coast of Britannia Romana，op－ prsite to the island of Mona．They occupied the NiV．portion of Wales，or that lying between Car－ digar Bay and the river Dee，viz．，Montgomery－ shire，Merionethshire，Caemarronshire，Denbigh－ slive，and Flintshire．（Camded，p． 777 ；Tac． Ann．xii．33，Agric．18．）
［T．H．D．］
OliEsCII（＇O $\dot{\rho} \dot{\eta} \dot{\sigma} \sigma t a t$ ），a people of Mwedonia or Thrace，known only from their coins．These have been by some writers referred to the Orestae；but it is more probable，as suggested by Leake，that they were one of the Thracian tribes who worked the silver mines of Pangreum；a circumstance which will account for our finding silver coins of large size and in considerable numbers struck by a people so obscare that their name is not mentioned by any ancient anthor（Leake，Northern Greece，val．iii．p． 213．Numismata Itellenica，p．81．）The coins in question，one of which is annexed，chosely resemble in style and fabric those of the Bisaltac and Edooi in the same neighbunrbood．
［E．H．B．］

COIN OF ORESCLI．
（טRESTAE（＇Opéo Thuc．ii． 80 ：Polyb．xviii． 30 ；Strab．vii．p． 326 ， i．．p． 434 ； 1 lin．iv．17），a people who are shown by Thucydides（l．c．）to have bordered upon the Macedonian Jaravaei，and who partly，perhaps，as having been originally an Epirote tribe（Steph．B． s．v．terms them a MLolossian tribe），were united with the other Epirots，under their prince Antiochus， in support of the expedition of Cnemus and the Am－ braciots against Acarnania．Aflerwards they were incorporated in the Macedonian kinydom，In the peace fually granted to Pliilip，B c．196，by the Romans，the Orestae were declared free，becanse they lad been the first to revolt．（Liv，xxxiii．34．）

Onestis（＇Opeotis，Ptol，iii．13．§§ 5，22；Steph． B．s．$v . ;$ Liv．xxvii． $33, x s x i .40$ ）or Orestlas （＇Opєotias，Strab．vii．p．326），was the name giveo to the district which they occapied，which，though it is not named by Livy and Diedorts among the countries which entered into the composition of the Fuluth Macedonia，was probably included in it，be－ cause the greater part，at least，of Orestis was situ－ ated to the E．of L＇indus．This subdivision of Upper Macedenia is represented by the modern districts of Gramista，Anasclitza，and Kasturia．（Leake， Northern Greece，vul．iii．p．305，vol．iv．pp．121－ 124）
［E．B．J．］
ORESTHA＇SIUM（＇Opєб大áбtov，Pans．；＇Opé－ ब日erov，Thuc．；＇Opéotelov．Her．，Eur．），a town in the suuth of Arcadia，in the district of Mrenalia，a little to the right of the road，leading from Megalopolis to Pallatiom and Tegea．Its inhabitants were re－ moved to Negalopolis on the foundation of the latter city．Its territory is called Oresthis by Thucydides （iv．134），and in it was situated Latoceia，which became a suburb of Megalopolis．［Lidocei．A．］ Leake places Oresthasium at or near the ridge of Tzimbaru，and conjectures that it may bave occu－ pied the site of the village of Jarmara or Marmá－ ria，a name ofteo attached in Greece to places where ancient mrought or sculptured stones have been found．（Paus，viii．44．§2，comp．viii．3．§ 1，27．§ 3．39．$\$ 4$ ；Hered．ix．II；Plut．Arist．10；Thuc．v． 64；Eurip．Orest．1642，Electr．1274：Steph．B． s．v．；Leake，Peloponnesiaca，p．24i．）

OLE＇STIS．［Urestae．］
ORE＇STIAS．［Hadnianopolis，Mo．1．］
ORETA＇NI（＇תpทtavoí，Ptol．ii．6．§59），a powerful people in the S．of Hispania Tarraconensis， inhabiting the territory E．of Baetica，as far as Car－ thago Nova，and spreading to the N．beyond the river Anas．The Baetis flowed through their country io its earliest enurse．（Polyb．x．38，xi． 30；Strab．iii．pp．152， 156 ；Plin．iii．3．s．4：LN． xxi．11，xxxv．7．）Thns they inhabited the E．part of Granada，the whole of Mencha，and the W．part of Murcia．Their chief city was Castulo，nuw ciazlona．
［T．H．D．］
ORE TUD GERMANOTLM（＂תрŋтоע Г $\subset \rho \mu \Omega-$ $\nu \hat{\omega} \nu$, Ptol．ii．6．§ 59）．Germani was another name for the Oretani（＂Oretani，qui et Germani nomi－ nantur，＂Plio．iii．3．s．4），and Oretum was one of their towns；probably the Orisia of Arternidorus， queted by Steph．B．（s．v．），and the Oria of Strabo （iii．p．152）．It has been identified with Granatula， a village near Almagro，where there is a bermitage still called De Oreto，and close by several ruins，a Foman bridge，太ic．（Morales，Ant 1，8，b．．p．76，a．； Florez，Esp．S．vii．p．2J5；Ukert，wol．ii．pt． 1 ． 1．152．）
［T．II．D．］

W'REUS ('תpeós: Fth. 'Speirns: the territury ' $\Omega$ pia, Strab, x. p. 445), furmerly called IILSIAAVA
 the north of Enboea, situated upon the river Callas, at the foot of Mt. Telethrium, and opposite Autron on the Thesadian coist. From this town the whole nurthern extrenity of Euboea was named Histiaestis ('I $\sigma$ riaı̂̂tıs, lon. 'I $\sigma$ rıaıク̄tıs, Herod. vii. 23). According to some it wats a colny from the Attic demus of Histiaea (Strab, x. [1. 44.5); accordiug to whers it was fomuded by the llumatam Perrhaebi. (Scymm. (\% . 578.) It wh one of the mast ancient and most import:unt of the Enboean cities. It accurs in Honter, who gives it the epithet of modu$\sigma \tau \alpha \dot{\phi} v \lambda o s(I l$ ii. 537 ); and Scylas mentions it as one of the four cities of Euboeat (p. 22). After the lattle of Artemisium, when the Greeian fleet sailed sonthwards, Histiaea was ucenpied by the Persians. (Herod. vii. 23.) Upon the expulsion of the I'ersians from Greece, lisistian, with the other Eubuean towns, because subject to Attica. In the revolt of Eubueat from Athens in B. C. 445 , we may conclude what LIistiaea took a prominent part, since Pericles, upun the reduction of the island, expelled the inhabitants from the city, and peopled it with 2000 Athenian colonists. The expelled Histizeans were said by Theepompus to Inave withdrawn to Maceduni.. (Tluac. i. 114: Diod. xii. 7, 22; Plut. Per. 23; Theupomp. ap. Strab. x. p. 445.) From this time we find the name of the town chanced to Greus, which was originally a demus dependent upon Ifistiaen. (Strab. l. c.; l'aus. vii. 26. \& 4.) It is true tiat Thucydides upon one occation subsequently calls the town lyy its ancient name (vii. 57 ); but he spesks of it as Oreus, in relating the second revolt of Euboea in 1. C. 411, where he says that it was the onlly town in the island that remained fatithful to Athens, (Thac, viii. 95.) At the end of the Pelo$\eta^{\text {unnesian }}$ War, Ureus became subject to Sparta; the Athenian colonists were donbtless expelled, and a portion at lenst of its ancient inhabitants restored; and accordingly we read that this tuwn remained faithful to Sparta and cheriohed a lasting hatred .r.unst Athens. (1hiod. sv. 30.) Nengenes, suppurted by Jison of Pherae, made himself tyrant of Thens for a time; but he was expelled by Theripfulas, the Lacedremomian commander; and the Athenian Chabrias endeavoured in vain to obtain forsession of the town. (Diod. l.c.) But shortly atterwards, before the battle of Lenctra, Oreus rewitted from sparta. (Nen. Hell. v. 4. § 56.) In the sulsequent war between Philip and the Athethams, a party in Orens was friendly to Philip; and by the add of this monareh lhilistides became tyrant If the city (5)em. P'hil. iii. J1p. 119, 127, de Cor. 1. 248; Sitrab. l. c.) ; but the Athenians, at the instization of Demostlienes, sent an exjerlition against Grens, which expelled Philistides, aml, according to Charas, put him to death. (1)em, the Cor: p. 252: ('haras, ap. Steph. s.r. '2péos.) th consequence of itn geographical prsition and its fonttications, Oreus tweame an impartant lare in the subsequent watrs. In the content between Antignons and Casander t was besieged by the lattes, who was, however, oblized tor retioe upon the aypoat hof Ptoleny, the general of Autigoms. ( Doul, xix. 75. 77.) In the first war between the Romans an d Philip, it was betrayed to the former by the commamber of the Maceromian farrism, B. c. 207. (1,is, xxviii. 6.) In the recond war it was taken toy the lomsans by assmit,

A. 1., 196, it was declared free by T. Quinctius Flaminimus along with the ether Grecian states. (Polyb. xviii. 28, 30; Liv. xxxiii. 31, 34.) Pliny mentions it among the cities of Eubora no longer existent in his time (Plin. iv. 21. s. 21), bat it still oecmrs in the lists of Pteleny, under the corrupt form of $\mathbf{\Sigma}$ wpeós (iii. 15. § 25).

Strabo says that Oreus was situated upon a lofty hill named Diymus (x, p. 445). Livy describes it as having two citadels, one overhanging the sea and the other in the middle of the city (xxviii. 6). There are still some remains of the ancient walls at the western end of the bay, which is still called the bay of Orevis. (Stephani, Reise, gc. pp. 33, seq.; Luke, Northem Girerce, vol. iv. p. 352.)

ORGANA. [OGYRAs.]
ORGAS ('Op $\bar{a} s$ ), a little tiibutary of the Macander in Phrygia, flowing into the main river on the south-east of Celaenae (Strab. xii. p. 578 ; Plin. v. 29, where it is called Orga). It is probably the stream crossed by Mr. Arundell (Discov. in Ass. Min. i. 1.185 ) between Dineir and the bridge of the Maeander near Digetzi; but its modern name is unknown.
[L. S. $]$
ORGESSUS, ORGYSUS. [Dassabetae, Vol. I.
p. 746, a.]
orila. [llergetes.]
orgocynl. [Taurica Chersonesus.]
ORIA, ORISLA. [ORETEM GERMANOREM.]
ORICLM, OR1CUS ('תpukós, Hecat. Fr. 75 ap. Steph. B. s. v.; Herod, ix. 92 ; Scyl. p. 10 ; Polyb. vii. 19; Scymm. 440; Eust. ad Dion. 321; " 2 pokov, Ptol. iii. 14. § 2; Pomp. Mela, ii. 3. § I2; Plin, iii. 26), a town and harbour of Hyricum, nat far from Apollonia and the month of the Aons. Legend ameribes its foundation to the Euboeans on their return from Troy (Scymm. l. c.) ; and Apollonias (Argon. iv. 1216) speaks of the arrival of a party of Colchians at this port ; and thus Pliny (l.c.) calls it a Colehian colony. Onicum is known in history as a haven frequented by the fomans in their communications with Greece, from its being very conveniently situated for the passage from Brundusium and Hydruntum. B. c. 214, the town was taken by Plilip V. of Macedonia; but it afterwards fell into the hands of the Romans and M. Valerins Lavinus, wha commanded at Brundusiam, with a single legion and a small fleet. (Liv, uxir. 40.) After the campaign of B. c. 167, Aemilius 1'aulus embarked his victoriuns troops from Oricum for Italy. (1lut. Aemil. Paul. 29.) Caesar, atter he had disembarked bis troops at Palieste (Lucan. iv. 460 ; comp. Caes. B. C. iii. 6, where the realing Pharalus or Pharsalia, is n mistake or corruption of the MSS.), or the sheltered beach of Palusa, surrounded by the dangerous pramontories of the Ceraunian menntains, witain one day of his lauding marehed to Orienm, where a squadron of the l'ompcian fleet wats stationed. (Caes, B. C. iii. 11; Appian, B. C: ii. S4.) The Uricii declared their unwillinguess to resist the loman consul; and Torquatus, the governor, delivered up the keys of the fortress to faesar. The small fleet in which he had brought his forces over was laid np at Oricum, where the harbour was blocked up by sinking a vessel at its mouth. Cnaens, the son of Pompeius, bude a spirited attack on this stronghald, and, cutting out four of the ressels, burat the rest. (Cucs. B. C, iii. 40.) It continued as an impertaut haven on the Adratic. (1ior. Carm, iii. 7.

name of its harbour was Paxonares (Máropuos, Strab. vii. p. 316). now Porto Ragusio ; while the Celyprts (Kidudzos, Ptol. iii. 13. $\$ \$ 2,5$ ) is identified with the river of Dukidhes. It would seem from Virgil (Aen. x. 136) that Orienm was famous for its turpentine, while Nicander (Ther. 516) niludes to its boxwood. The town was restored by the munificence of Herodes Atticus. (Philostr. Her: Atl. 5.) To the E. of the mouth of the river of Duikhides is a succession of lagoons, in the midst of which lies Oricum, on the desert site now called Erikho, occupied (in 1818) only by two or three huts among the vestiges of an aqueduct. (Smyth, Mediterranean, p. 46.) The present name ( 1 е $\rho \uparrow \chi \hat{\omega}$, Anna Cumn. siii. p. 389) is accented on the last syllable, as in the ancient word, and E substituted for 0 by a common dialectic change. (Puaqueville, loyage, vol. i. p. 264; Leake, North. Gireece, vol. i. pp. 36, 90.) A coin of Oricus has for type a head ut Apollo. (Eckhel, vol. ii. p. 167.) [E. B. J.]
origenomesci. [Abgexomesci.]
ORIGIACUAI ('Optriakóv). Ptulemy (ii. 9. § 7) makes this town the chief place of the Atribatii or Atrebates in Belgica. There is nothing that fises the position of Origiacum except its resemblance to the name Orchies, which Cluver suggested. Orchies is between Douay and Tournay, and appears to be beyond the linits of the Atrebates, whose chief town in Caesar's time was Nemetacum (Arras).
[G. L.]
oringis. [Aurinx.]
ORIPPO, a town of Hispania Baetica, on the road from Gades to Hispalis. (Plin. iii. 1. s. 3; Itin. Ant. p. 410.) Commonly identified with Fille de dos Hermaños, though some have mentioned Alcala de Guadaira and Torre de los IIerberos. Ancient coins of the place bave a bunch of grapes, slowing that the neighbourbood was ricb in wines, a character which it still preserves. (Caro, Ant. iii. 20; Florez, Esp. Sagr. ix. p. 111, Med. ii. p. 512 ; Mionnet, i. p. 23 , suppl. i. p. 39 ; Sestini, Mled. p. 77.)
[T. H. D.]

COLN OF ORTITO
ORITAE (' $\Omega \rho \in i$ īcu), a people inhahiting the seaenast of Gedrosia, with whom Alexander fell in on his march from the Indus to Persia. (Arrian, vi. 21, 22, 24, \&.c.) Their tervitory appears to have been bounded on the east by the Arabis, and on the west by a monutain spur which reacked the sea at Cope Moran. (Vincent, Moy. of Nearchus, i. p. 217.) There is considerable rariation in the manner in which their names are written in different authorities: thus they appear as Oritae in Arrian (Indic. 23. Exped. Alex. vi. 22); 'תpirat in Strabo ( $x$ v. p. i20), Dionysius Perieg. (v 1096), Plutareb (Akex, e. 66), and Stephanus B.: as Ori in Arrian (vi. 28) and Pliny (vi. 23. § 26) ; and Horitae in Curtius (ix. 10.6) ; yet there can be mon doubt that they are one and the same people. Arrian and Strabo have descyibed, them nt some
length. According to the former, they were an Indian nation (vi. 21 ; cf. Diod. xvii. 105), who wore the same arms and dress as those people, but differed from them in manners and institutions (Ind. c. 23). According to the latter they were : race living under their own Jaws ( $\mathbf{v}$. p. 720 ), and armed with javelins lardened at the phint by fire and prisoned (xr. p. 723). In another place Arrian appears to have given the true Indians to the river Arabis (or Purali), the eastern boundary of the Oritae (Indic. c. 22) ; and the same view is taken by Pliny (vii. 2). Pliny calls them "I Iehthyophagi Oritae" (vi. 23. s. 25); Curtius "Indi maritimi" (ix. 10.8). It is probable that the true form of the name was Horitae, as the Nuhian geographer places a town called Havir on the route to Firabuz in Mekrün. (Comp. D'Anville, Eelaircissements, gc. p. 42 ; Edrisi, Geog. Nub. p. 58.)
[V.]
oRIUNDUS, [B.ambana.]
ORME'NIUM ('Opцévool), a town of Thessaly, mentioned in the Catalngue of Ships along with Hyperein and Asterium as belonging to Earypylus (Hom. Il. ii. 734). It was said to have been founded by Ormenas, the grandson of Aeolus, and was the birthplace of Phoenix. (Demetr. Scepsius, ap. Stral. ix. p. 438 , seq.) Strabu identifes this town with a place in Magnesia named Orminium, situnted at the foot of Mt. Pelion, at the di-tance of 27 stadia from Demetrias, on the road passing through Iolens, which was 7 stadia from Demetrias and 20 trom Ormininm. (Strab. l. c.) Leake, however, observes that the Ormenium of Homer can hardly have been the same as the Orminium of Strabo, since it appears from the situation of Asterium that Eurypylus ruled over the plains of Thessaliotis, which are watered by the Apidans and Enipeus. (Leake, Northern Greece, vol. iv. p. 434, seq.)

ORMINIUM (Opuinoy öfos), a mountain in the north-eastern part of Bithynia, terminating in Cape Posidiun (I'tol. v. 1. $\S \$ 10,11$ ). Ainsworth supposes it to be the same as the mountuin now called Derne Jailafi.
[L. S.]
O'RNEAE ('O $\rho \nu$ '́at: Eth. 'Opveátns). a town in the Argeia, mentioned in the lliad (ii. 571), which is said to have derived its name from Omeus, the son of Ereelatheus. Orneae retained its ancient Cynurian inhabitants, when Argos was conquered by the Doilans. It continued independent of Argus for a long time; but it was finally conquered by the Argives, who remored the Orneatae to their own city. (Paus, ii. 25. § 6, viii. 27. § 1.) Thucydides mentions ( v .67 ) the Orneatae and Cleonaci as allics ( $\sigma 00 \mu \mu a \chi o r$ ) of the Argives in B. c. 418; and the same historian relates (vi. 7) that Orneae was destroyed by the Argives in B. c. 416. (Comp. Diod. xii. 81.) It might therefore be inferred that the destruction of Orneas by the Argives in B. C. 416 is the event referred to by Pausinias. But Miller concludes from a well-known pa:sage of Herodotus (viii. 73) that Orneae had been conquered by Argos long before; that its inbabitants were rednced to the cundition of Perioeci; nud that all the Periocei in the Argeia were called Ornentae from this place. But the Omeatae mentioned by Thacydides could not have been Periveci, since they are called allies; and the passage of Herodntus does not require, and in fact hardly admits of, Müiler's interpretation. "The Cynurians," says Herodotus (l. c.), "have become Doricized by the Argives and by time, being Ornentae nad Perioeci." These words would seem
de:uly to menn that, while the other Cynuman. and came Perioecti, the Omeatac continued indepmentant, -an interpretation which is in accordanee with the swcount of Thueydides. (Mülhor, Aeginetica, p. 48, seq.. Dorians, iii. 4. § 2; Arwhll, ad Thuc, v. 67.)
With respect to the site of Onnese we learn from Pausania (v. 2.5. §.5) that it was situated on the eonfines of Phaliania and Sicymia, at the distance of 120 stallia from Argos, being 60 stalia from Lyrceia, which was also 60 stadia from Argos. Sitrabo (viii. p. 3\&2) says that Ornere was situated on a river of the same name above the plain of the Sicyonians; for the otler pasage of Strabo (viii. p. 578 ), which states that Orweae lay between Corinth and Sioyom, and that it was not mentioned by llomer, is probably an interpolation. (Sie Kiramer's stratio. vol. ii. p. 186.) Orneac stiod on the northern of the two ruads, which led from Argos to Mantineia. This northern roul was callen Cimax, and followed the conrse of the Inarhus. [Aress, p. 201.] Ros supposes Orneae to have bepn sitnated on the river, which flows from the suuth by the village of Lionti and which helps to form the western arm of the Awpuss, Leake places it too far to the east of the direct ruad from Argos to Phlius. (Ross, Reisen in Peloponnes, p. 135: cump. Leake, Morea, vol. ii. p. 351, val. iii. p. 414.)
ORNI ( ${ }^{\circ} \mathrm{O}$, wos), a town of Thrace mentioned only by Hhemeles (p. 63:2).
[T. 11. D.]
ORN1AC1 (Opyakol, Ptol. ii. 6. §32), a tribe of the Astures in Hispania Tarraconensis. Their chief town wa Intercatiat.
[T. 11.1).]
ORSI THION POLIS ('Opviewv $\pi \dot{u} \lambda t s$ ), a city of the Silomions, aceordius to Seylax (ap. Reland, $f$ caluest. p 431 ). It is placed more exactly by Strabo between Tyre ant sulon (p, 758). Pliny mentions together " Sarepta et Ornithon oppida et
 " Tarnezola superior," which the Talmad places abore C.aesarea; Tarnegola in It ebrew being equivalont to the Ci:allus of Latin $=$ oupvida in Greck. (Pu'tust. p. 916.) Dr. linbins m, following Pororke, - mpecturn that it may be representell by an ancient Site on the shome of the 1 hoonician plain, where he wind "the trac"s of a former site extlod "Adlin, - जalalitime of confused heaps of stones, with several oli wats." There are alon "many sepulchual grout wo, hawn out of the hard limestone rock," in the pergituas have of the projecting montain who ha he appren hes the const.-fumshing clear thentimus of an anciont city in the vicinity. (1). As. v.l.iii. p. 411, and note 2: Poocke, Ohserrations, vol. ii. p. S4.)
[G.W:]
Uli()AND) a a town in the mountains of lisilla, utar the south-west, m sh re of lake Trositis (Lav. xxarni. 37,$39 ;$ llim. v. 24). From this town the wh tedistrict denime 1 tho mame of Oromineus tractus. the inhalitames of which, called Oroandensts or Oroandin ( 'Opoan Suroi or 'Opuarōeis). posscoved, Lexides the chit tomu Orowida, alno Mhethia and Papya (Liv, xaxvini. 18, 19; Polyts axii. 2.5; l'ol. s. 4 . §12). Hatnil on (Fisentrethes, i. 1. 4~; ) believes that the raits he foum on the slope of a hill near lake Ey redir, may mark the site of Uruamp: but it would seem that its remains must be looked for a little further east.
[I. S.]
OROATIS. [Arosts]
O)ko'blAE ('OpSEat) a tuwn on the western chast of linhuea, between Audequas athl Aegae, which pose sed an wacle of Apsille selimumios.

was partly destroyed by an earth whas an l an intindation of the sea in 18. c. 426 . ('1hur, iii, $\times 9$. ) This town serias to be the one mentioned by siephanus under the name of (rope ('Op(x) ), who Ain. scrubes it as "a city of Fuboea, lawing a very renowsed temple of $A$ pullo." (Steph. B. s. v. Koporm.) There are sume renains of the walls of Orwbiac at Rovie's, which word is only a cormption of the ancient name. (Leake, Jorthern Greece vol. ii. p. 1.6.)

OlRO'BII, a tribe of Cixalpine Ganls, mentioned milly by Pliny (iii. 17. s. 21), upon the authonity of Catu, who suid that Bergomum and Conimin had been founded by them, as well as Fontu Licinii, by which he must mean the Gaulias town that preceded the Roman settlement of that name. Their oricimal abode, according to Cato, was at a place callod Barra, situated hich up in the momatains; but he professed himself unable to point out 1 b ir origin and descent. The statement that thry were a Greek people, advanced by Cornelius Alexander (up. Plin. l. c.), is evidently a mere infirence from the name, wbich was probably corrupted or distorted with that very view.
[E. II. B.]
OHOBAS, or ORBLS ("Oposts), a river of Narbonensis in (i.llia. Itoleny (ii. 10. § 2) places the outket of the Orobis betwen the mouth of the Atax (Aude) and the Arauris (Hircoult), which shows that it is the Orbe. In Stralmis text (iv. p. 182) it is written. (bris, which Groskard unnecessarily corrects, for Orhis and Otris were probalily used indifferently, and it seems that obris is the origisal reading in Mela (ii. 5, ed. J. Vossius, note). Mrla says that the Urhis flows past Baeterrae (Beziers), anil Stratoo aloo places Buteterme on the Orbis. In the Ora Maritiria (v. 590) the name is Orabis. The Orbe rises in the Cieennes in the north-west part of the department of Herault, and has a very winding course in the upper part. It is abase 6t mills long.
[G. 1.]
OROLAUNCM, in the north part of Ciallia, is placed by the Antonine Itin, on a roud from lourocortormu (Rams) to Trair. It is placed lralfivay botween 1ipisum (Iptsch) and Andethama, which J'Anville sulqueres to be Fpternack, b": which lee meaus Echternarh: others place Andethannas ab ut Ancen. The name Afron clearly represents Orolammm, where Roman remains, as it is sail, have been found. Arton is in the duchy of Luremburg.
[I. L.]
OliomilisAcI, a people of North Gallia, whose prosition is thus described by Pliny (iv. c. 17), who is praceding in his werription trom the sebode
 funct ) patin quif (ios oriscus vocatur." In Hardu..is text the name is witten Oromatraci, and yet le siys that the Bis's. have Oromarsaci. The name is ofherwis. unkromu. D'Anville supposes that the natae Ona-marsati is xepresented by the name of a tract of comntry betnech Calais and Gratelines. whith is Mark or Mert, and borders on the Foutonnuis, in which the pagns Gessoriseus was. [Ges. surtactin.] This is mere guess, but it is all that we can lave.
[G. L.]
0):(ONI'LS ('Opóvtns), the most renowned rivet of Syrin, used by the poet Juvenal for the eountry " in Tiberim deflusit Orontes." (Jus: iii.) Its original name, according to Straho, was Typhot (T'upúv), and his acconnt both of its carliar :and later names, follows his deseription of Antinely
river rising in Coele-Syria, then sinking beneath the earth, agnin issues forth, and, passing through the district of Apamea to Antiocheia, after approaching the city, runs off to the sea towards Seleaceia. It received its name from one Orontes, who built a bridge over it, having been formeriy called Typhon, from a mythic dragon, who being struck with ligltning, fled in quest of a hidingplace, and after marking out the course of the stream with its trail, plunged into the earth, from whence forthwith issued the fountain." He places its embouchure 40 stadia from Seleuceia (xvi. p. 750). He elsewhere places the sonrce of the river more definitely near to Libanus and the Paradise, and the Egyptian wall, by the country of Apamea ( p .756 ). Its sources have been risited and described in later times by Mr. Barker in 1835. The river " is called by the people EL-A'si, 'the rebel," from its reffusal to water the fields without the compulsion of water-wheels, according to Abulfeda (Tab. Syr. p. 149), but according to Mr. Barker, " from its occasional violence and windings, during a course of about 200 miles in a northerly direction, passing through Hems and Hamah, and finally discharging itself into the sea at Suwëuliah near Antiocl." (Journal of the Gcog. Soc. vol. vii. p. 99.) The most remote of these sources is ouly a few miles north of Baabek, near a village called Lobreh, " at the foot of the range of Antilibsnus on the top of a hillock, near which passes a small stream, which has its source in the adjoining mountains, and after flowing for several hours through the plain, talls into the basin from which springs the Orontes." These fountains are about 12 hours nortin of Labweh, near the village Kurmul, where is a remarkable monument, " square, and solid, terminating above in a pyramid from 60 to 70 feet high. On the four sides lunting scenes are sculptured in relief, of which the drawing borders on the grotesque." (Robinson, Journal of Gieog. Soc. vol. xxiv. p. 32.) There can be no difficulty in connecting this monument with the Paradise or hunting park mentioned by Strabo near the source of the Orontes, similiar, no doubt, in origin and character, to these with whech the narrative of Xenophon abounds, within the territories of the Persian monarchs. The rise and course of this river and its various tributaries bas been detailed by Col. Chesney (Expedition, vol. i. pp. 394-398), and the extreme besuty of its lower course between Aotioelh and the sea has been described in clowing terms by Captains Irby and Mangles. (Travels, pp. 225, 226.)
[(6. W.]
ORONTES (Opóvtns, Ptol. vi. 2. § 4), a mountain chain of Mledia, which extended in a south-east direction, passing the Ecbatama of Greater Media (Ilamadan). It must be considered as an outlying portion of the still greater chain of the Zagros. It is now called the Erioend or Eluend. It is probable that the name is preserved in the celebrated mountain of Kurdistún, now called Rorcinudiz. In Armenian geograply this mountain district is called Erovintini; which is evidently connected with the ancient Orontes. (St. Martiu, Armenia, rol. ii. pp. $363,429$.
[1.]
OnONTES, a people of ancient Assyria, described hy Pliny as being to the east of Gaugamela (vi. 26 . s. 30). There can be no doubt that these are the present Rorcándi, a tribe living, as in ancient times, about the great mouitain Rovindiz, in Kurdistin, and doubtless connected with the Oroutes of Ptolemy
(vi. 2. § 4). They derive their name from Ervend, a pure old Persian root, which was usnally llwilenized into Orodes or Orontes. (Rawlinsom, Journ. of Geog. Soc. x. p. 73.)

 cording to Steplh B. 'Spwreús), a town on the borders of Attica and Boeotia, and the capital of a district, called after it Onopli ( $\bar{\eta} \times \Omega p \omega \pi i a$. ) This district is a maritime plain, through whieh the Asopus flows into the sea, and extends for 5 miles alous the shore. It is separatel from the inland plain of Tanagra by some hills, which are a continuation of the principal ebain of the Diacrian mountains. Orupus was originaily a town of Doeotia; and, from its position in the maritime plain of the Asopus, it naturally belonged to that country. (Paus. i. 34. § 1.) It was, however, a frequent subject of dispute between the Athenians and Boeotians; and the former people oltained pessession of it long before the Pelopamuesian War. It continued in their hands till e.c. 412 , when the Boeotians recoverel possession of it. (Thuc, viii. 60.) A tew years afterwards ( $\mathrm{n}, \mathrm{c} .402$ ) the Boeotians, in consequence of a sedition of the Oropii, removed the town 7 stadia from the sea (Diod. xiv. 17.) During the next 60 years the town was alternately in the hands of the Atbenians and Boeotians (comp. Xen. Hell. vii. 4. § 1, \&c.), till at length Philip after the battle of Chaeroncia gave it to the Athenians. (Paus. i. 34. § 1.) In n.c. 318 the Oropians recorered their liberty. (Diod. sviii. 56.) In e.c. 312 Cassander oltained posession of the city; but Polemon, the general of Antigonus, soon afterwards expelled the Macedonian garrison, and handed over the city to the Bueotians (Diod. xix. i7.) It has been concluded from a passage of Dicacarchus (p. 11, ed. Hudson) that Oropns continued to belong to Theles in the next century; but the expression oinia $\Theta \eta 6 \omega \nu$ is corrapt, and no safe conclusion can therefore bo drawn from the passace. Leake proposes to read
 Miller, the latest editor of Dicaearchus, reads ov$\nu$ оuкia $\theta^{\circ} \tau \bar{\omega} \nu$. Dxaearchus calls the inhubitants Athenian Boeotians, an epithet which he also applies to the inhabitants of Plataese. Strabo nlso descriles Oropus as a Boeotian town (is. p. 404); but Liry (xlv. 27), Pausanias (l. c.), and Pliny (iv. 7. s. 11) place it in Attica. How long the Oropii inlabited the inland city is uncertain. l'ausanias expresaly says that Oropus was upun the sea ( $\dot{\epsilon} \pi i$ गarajoons, i. 34 . § 1); and the inhabitants had protalily returned to their old town long befure his time.

Althongh Oropus was so frequently in the hands of the Athenians, its name is never found anong the Atheninn demi. Its territory, however, if not the tomn itself, appears to have been made an Attic denus under the name of Graea ( $\grave{\eta}$ Гpcia). In Homer Oropus does not occur, Lut Graea is mentioned among the Bocotian towns (Il. ii. 498); nnd this ancient name appears to have been revived by the Athenians as the official title of Oropns. Aristotle said that Oropns was called Graea in his time (ap. Steph. B. s. v. 'תpwiós); and accordingly we fiud in an inscription, belonging to this period, the $\Gamma$ pains ( (Patis) mentioned us a demus of the tribe P'andionis (Rass \& Meier, Lie Demen ron Altika, p. 6, seq.) In the passage of Thacydides (ii. 23) mapiontes $\overline{\delta \hat{\epsilon}}$

 the existing Mss. have Metpaikip, Lut Stephanus, who quotes the passage, reads $\Gamma$ paikin, which Peppo
and other mouirn editors have received info the test. It is, however, riglit to observe that the district of Oropas was frequently designated as the border country or country over the border ( $\tau \hat{\eta} s \pi \dot{\epsilon} \rho a \nu \gamma \hat{\eta} s$, Thuc, iii. 91).

According to Dicaearchus (l, c.) the Oropians were nutorious for their grasping exactions, levied upon all imports into their country, and were for this reason satirised by Xenon, a conic puet :-

##  <br> Kakin tènos yevorto tous 'תpantions.

The position of Oropus is thus defined by Strabo. "The beginning [of Bocotia] is Oropus, and the saered harbonr, which they call Delphiaium, opposite to which is old Eretria in Euboes, distant 60 stadia. After Delphimium is Oropus at the distance of 20 stadia, opposite to which is the present Eretria, distant 40 stadia. Then comes Delium." (Strab. ix. p. 403.) The mudern village of Oropó stands at the distance of nearly two miles from the sea, on the right bank of the Jouricin, anciently the Asopus: it contains some fragments of ancient buildings and sepulchral stones. There are also Hellenic remains at the $\Sigma \kappa \alpha \alpha^{\prime} \alpha$ or wharf upon the bay, from which persons manally e:nbark fur Euthoea: this place is also called ès roùs á yious ámooródous, from a ruined church dedicated to the "Holy Apostles." Leake origimally placel Oropus at Oropó and Delphinium at skila; but in the second edition of his Inemi he leaves the position of Oropas doubtful. It scems, however, most probable that (hopus originally stood upon the coast, and was remowed inland orly for a short time. In the Pelopounesian War Thncydiles spenks of sailing to and auchoring at Oropus (iit. 91, viii. 95); and Pansamias, as we have already seen, expressly states that (lropus was upon the coast. Hunce there can be little dombt that Skila is the site of Oropus, and that Oropo is the inland site which the Oropians occupied only for a timc. It is true that the distance of Orope from the sea is more than donble the 7 stailia assigned by Diodorns, but it is possible that he may have orjginally written 17 stadia. If Oropus stovid at Skila, Delphinium must have been move to the eastward ncarer the confines of Attiea.
lu the territury of ()ropus was the celthrated temple of the hero Auphiaraus. According to Pausanias (i. 34t. § 1) it was 12 stadia distant from Oropus. Strabo, places it in the district of Psophis, which voool lertween Rhatanus and Orapus, and which was suhaspuently an Attic demas (ix. p. 399). Livy falls it the temple of Amplitochns (x|v. 27), who, we know from I'masains, was worshippet conjointly with Ampliaratms. Livy further deseribes it as a phace rendered aztepable loy fombtains and rivers; which leads one to luok for it at one of two torrents which join the sea between Skala and Kizlamo, which is probably the ancient Psophis. The month of one of these tarrents is distant about a mile and a half foom skila : at latf a male from the mouth are some remains of amtiquity. The other torrent is abont three miles further to the castward; on which, at a mile abose the plain, are remains of ancinnt walis. This place, which is near Kilamo, is called Marro-Ihulissi, the epithet Marro (black) dintinzuishing it trom Jhilissi, the site of Delium. The distance of the Whellemie remains on the firstmentioned tarrent agree with the 12 stadia of I'ausanias : but, on the other hand. itseriptions have been found at Mange bithiziz and Sialome, jn
whit is the name of Amphiarans occurs. Dicaearchus (1.e.) describes the road from Alhens to (tripus as leading through bay-trees ( $\delta i \dot{\alpha} \delta a \phi \nu i \delta \omega \nu$ ) and the temple of Amphiaraus. Wordsworth very inteniously conjectures $\delta \iota^{\prime}$ 'A $\phi \delta \bar{\omega} \omega \bar{\nu}$ instead of $\delta i \dot{\alpha}$ סaфvi $\delta \omega \nu$, obscrving that it is not probable that a tepographer would have described a route of about. 30 miles, which is the distance from Athens to Oropus, by telling his readers that it passed through "bay-trees and a temple." Although this reading has been rejected ly leake, it is admitted into the text of Dicaearchus by C. Niiller. (Leake, Northern Greece. wol. ii. p. 444, seq., Demi of Altica. p. 112, seq.: Finlay, Remarks on the Topograplay of Oropia ond Diacria, in Transactums of the Royal Suciety of Literature, J839, p. 396, seq. ; Wordsworth, Athens and Attica, p. 22, seq.)

OROSINES, a river of Thrace, flowing into the Euxine. (1llin. iv. 18.)
[T. H. D.] (ORO'SPEDA (分 'Opó $\sigma \pi=\delta a$, Strab. iii. p. 161, seq.), called by Ptolemy Ortospeda ('Oorórate $\delta a$, ii. 6. § 21), a mountain chain in Hispania Tarraconerssis, the direction of which is described under Illsfaxid [Vol. I. P. 1086]. It is only necessary to add bere the following particulars. It is the hichest inland mountain of Spain (11,000 feet). at first very rugged and bald, but becoming wooded as it approaches the sea at Calpe. It abounds in silver mines, whence we find part of it called Mons Argentarins. [Alegentaric's Moss.] It is the present chain of Sirma del Mundo, as far as Sierrra de Alcarez and Sirma de Lionda.
[T. H. D.]
O'RREA. 1. (Oṕ̧̧a, Ptol, ii. 3. § 14), a town of the Venicones, ou the E. coast of Britamia Barbara. Husley (Brit. Rom. p. 373) identifies it with Orrock, on the little river Orewater in Fifishive.
2. A town in Nuesia Superior ( P tol. iii. 9. §5). [T. H. D.] (HRSA, a mountain with a bay, on the east con-t of Arabin, withont the straits of the Persian Guif. (I'liny, vi. 28. s. 32.) Mr. Forster explains the name to mean literally in Arabic " the transverse mountain." He adds: " Its position is effectually deternined from the linst India Company's Chari, where, about a third of a degree south of Daba, a great mountain, at right angles with the mountains of Lima, ruas right down to the sea, while at its base lies the port of Chorfakan." (Geog. of Arabiu, vol. ii. p. 228.)
[G. W.]
ORSINTS, a tributary of the Maeander, flowing in a north-western direction, and discharging itself into the main river a few miles below Antioch ( ${ }^{\prime}$ lin. v. 29). As some M1ss. of Pliny have Mossymus, and as Ilieroles (p.665) and other ecelen: astical $\pi$ riters (Nutit. Fipisc. Phryg. Pac. p. 2\%) speak of a town Mosyda in those parts, the river was pmbably calied Mnoynus. Its modern name is said to be Ifagisili, that is the river described by Cal. Leake (Asia M/inor, p. 249) as descending from Gheira and Kurajusu.
[L. S.]
(0)RTACEA, a snall stream of Elymais, which Pliny states flowed into the P'ersian frulf; its mouthes were blocked up and rendered natit for navigation by the umi it brought down (vi. 27. s. 31). [V.] ORTAGILEEA. [Mabosela.]
ORTHAGOlliA (Opeayo;ila), a lown of Macedonia, of with coins are extant. Pliny (iv. 11. s. 18) says that (Ortagurea was the ancient name of Maroueia; but we learn from an ancient geographer Hyulson Gicoyr Min Tol. iv. p. 42) that Orthia-
goria was the ancient name of Stageira，to which accordingly the coins are assigned．（Eckhel，rol．ii． p．73．）

COLY OF ORTHAGORLA．
ORTHE（＇O $\rho \theta \eta$ ），a town of Perrhaebia in Thes saly，mentioned by Homer（Il．ii．739），was said by Strabo（ix．p．440）to have become the acropolis of Phalauna．［Phalanya．］It occurs，however，in the lists of Pliny（iv．9．s．16）as a distinct town from Pbalauna．

ORTHO＇SLA（＇Opө由ria），a towu of Syria men－ tioned by Strabo and Ptolemy，near the tiver Eleu－ therus，contiguous to Simyra，hetween it and Tri－ poli．（Strab．xvi．p． 753 ；Ptol．v．15．§ 4．）The former makes it the northern extremity of Phoe－ nice，Pelusium being the southern（ p .756 ），a distance，according to Artemiderus，of 3650 stadia （p．760）．It was 1130 stadia south of the Orontes． （Il．）Ptolemy places both Simyra and Orthosia south of the Eleatherus ；but Strabo to the north of it：＂agreeable whereunto，＂writes Shaw，＂we still find，upon the north banks of this river（Nohr－el－ Berd），the ruios of a considerable city in a district named Ortosa．In Peutiuger＇s table，also，Or－ thosia is placed 30 miles south of Autaradus and 12 miles north of Tripoli．The situation of it is like－ wise further illustrated by a medal of Antoninus Pius，struck at Orthosia，npon the reverse of which we have the goddess Astarte treading upon a river； for this city was built upon a rising ground，on the nortbern bauks of the river，within half a furlong of the sea：and as the rugged eminences of Mount Libanus lie at a small distance，in a parallel with the sbore，Orthosia mast have been a place of the greatest importance，as it would bave hereby the entire command of the road（the only one there is） betwist Pboenice and the maritine parts of Syria．＂ （Travels，p．270，271．）The difficulties and dis－ crepancies of ancient authors are well stated by Pococke．（Observations，vol．ii．pp．204，205，notes d．e．）He assumes the Nahr Kibeer for the Eleutherus，and places Orthosia on the river Accar， between Nahr Kibeer and El－Berd．（Manodrell， Journey，March 8.
［G．W．］
ORTHO＇S1A（＇Opewoia），a town of Caria，not far from Alabanda，on the left bank of the Maeander， and apparently on or near a hill of the same name （Strab．xiv．p．650；Plin．xxxvii．25）．Near this town the Rhodiaus gained a victory over the Carians （P．llgb．xss．5；Liv．slv．25；comp．Ptol．v．2．§ 19 ； Plin．r．29，xaxvii．9，25；Hierocl．688）．The an－ cient remains near Karpusli probably mark the site of Orthosia（Leake，Asia Minor，p．234）；though others，reparding them as belonging to Alabanda， identify it with Dsheni－sheer：
［Ls．］
ORTHU＇RA（＂Optoupa，Ptol．vii．1．§ 91，viiu． $27 . \S 18$ ），a tomu on the eastern side of the penin－ sula of Hindostío，described by Ptolemy as the I＇alace of Surnax．It was in the district of the Soretes． and has been identified，conjectarally，by Forbiger with the present Utatur or Itacour．［V．］

URTO＇NA（＂Optwy）．1．An aacient city of

Latium，situated on the confines of the Aequian territory．It is twice mentioned during the wars of the Romans with the latter people：first，in th．C．48I， when we are distinctly told that it was a Latin city， which was besieged and takeo by the Aequians （Liv．ii．43；Dionys，viii．91）；and again in s．c． 457，when the Aequians，by a sudden attack，took Corbio，and，after putting to the sword the Koman garrison there，made themselves masters of Ortona also；but the consul Horatius engaged and defeated them on Dlount Algidus，and after driving them from that position，recovered possession both of Corbio and Ortoaa．（Liv．iii．30；Dionys．s．26．） From these accounts it seems clear that Ortona was situated somewhere in the neigbbourbood of Corbio and Monnt Algidus；but we have no more precise clue to its pasition．No mention of it is fuand in later times，and it probably ceased to exist．The name is much corrupted in buth the passages of Dionysius；in the first of which it is written＇Opoús， but the Vatican MS．bas＇Opêva for＇Opt⿳亠二口欠a：in the second it is written B $\iota \rho \bar{\omega} \mathrm{w}$ a．It is rery pro－ bable that the Hortenses，a people mentioned by Pliny（iii．5．s．9）among the＂populi Albenses，＂are the ichlabitants of Ortona；and it is possible，as
 otherwise wholly nnknown），who are fuund in Diouy－ sius＇s list of the thirty cities of the Latin League，may be also the same people．（Dionys．r． 61 ；Niebnhr， vol．ii．p．18，note．）The sites which have been assigned to Ortona are wholly conjectural．

2．（Ortona a Mare），a considerable torn of the Frentani，situated on the coast of the Adriatic，about midway between the mouth of the Ateraus（Pes－ cara）and that of the Sagrus（Sangro）．Strabo tells us that it was the principal port of the Fren－ tani（r．p．242）．He erroneously places it S．of the Sagrus；but the passage is evidently corrupt，as is one in which he speaks of Ortona or Histonium（for the reading is pucertain）as a resort of pirates． （Strab．l．c．，and Kramer ad loc．）Ptolemy correctly places it between the Sagrus and the Aternus； though he erroneonsly assigns it to the Peligni． Plioy mentions it among the municipal torns of the Frentani；aud there seems no doubt that it was one of the priocipal places possessed by tbat people． （Plin．iii．12．s． 17 ；Ptol．iii．1．§ 19．）Some in－ scriptions have been published in which it bears the title of a colony，but these are of dubious anthen－ ticity（see Zumpt，de Colon．p． 358 ，note）：it is not mentioned as such in the Liber Culoniarum The Itineraries place it on the road from the moutli of the Aternus to Abxanum（Lanciano）．The name is still retained by the modern town of Ortona；and antiqui－ ties found on the spot leave no donbt that it occupies the same site with the ancient one．（Itin．Ant．p． 313 ； Tab．Peut．；Romanelli，vol．iii．p．67．）［E．H．B．］

ORTOPLA（＂Opтөтла，Ptol．ii． $17 . \S 3$ ；Orto－ pula，Plia，iii．25），a town of the Liburni，identi－ fied with Carlopago or Carlobago，in the district of the Morlacca，wbere several Roman remains have been found．（Neigebaur，Die Sud－Slaven，pp．225， 228．）
［E．B．J．］
ORTOSPANA（Optбoтava，Strab．xi．p． 514, xv．p． 723 ；кápoupa ì ка．＇Oртóaтаva，Ptol．vi． 18. § 5；Amm．Marc．sxiii．6），an ancieot city of Bac－ triana，which there is good reason for supposing is identical with the modern town of Kibul．The name is written rariously in ancient authors Orto－ spana or Ortospanum；the latter is the form adopted by Pliny（vi．17．s，21）．Three principal ruads
leadine throach Bactriana met at this place; hence the nutice in Nitrabo (l. c.) of the it èk Bákтpwp toioóos. Groshord has (as appears to ns), on mu sufficient ground, identified Ortuspana with the present Koudahar. If the readins of some of the MSS. if Ptaleny be correct, Kitibl may be a conruption: of KáGoupa.

It is worthy of note, that in the earlier pelitions if P'oleny (vi. 1s. § 3) mention is made of a pupple whon he calls Kaboditat ; in the latest of Noble (Tanchnitz, 1s43) the name is changed to Beritas. It is not inuprohable that Ptolemy here is speaking of Kithot, as Lassen has observed. (Ind. Altorthuns. val. i. p. 29.) The three roails may be, the pass by Bamiim, that by the MindiKizh. and that from $A$ utervib to Khaioar. [V.]

ORTOSPEDA. [OROsPEDA].
orTY'G1A. [Delos.]
ONI Y'(ilA. [simactse.]
ORU'D11 ( $\tau$ à 'Opov́ธia öp p, Ptol. vii. 1. §§ 25.). 36). a chain of muntains in India intra Gangem, which were, arcording to l'toleny, the source of the river Tyuna (now Penvais). It is difficult now to identify then with certainty, but Forbiger conjectures that they may be represented by the present Nelli-Mtlla.
[V.]
GHIX. [Agcidia, Vol. I. p. 193, a.]
O:(1.A. 1. (Оока, Ptol. ii. 6. § 68), a town of the lbrgetes in tio N. of Hispauia Taraconensis, on the road from Tarraco and Ilenda to Caesararcuata (Itin. Ant. pp. 391, 451), and under the firmaliction of the last-named city. Pliny alore (iii. 33. s. 4) places the O-vensps in Vescitania, a distriet mentioned nowhere else. It was a Roman colony, and had a mint. We learn from Plutareh (Srot. e. 14) that it was a large town, and the place where Sertorins dieal. It is probably the town called lleosen ('infórkav) by strabo, in an apparently (orrupt fusaye (iii. p. 161; r. Ukert, vol. ii. pt. 1. p. 4i1) It seenio to have passessed silver mines (Liv. xxxiv, 10, 46, x1. 43), unless the " argentum Orrmes " here mentioned merely refers to the minted - Mlsat of the town. Flurez, however (Ded, ji. 520), has poistell ant the improsibility of one place sup!. Yiag suth vast quatutios of ninted silver as we find ceserfed is atmicut writors under the terms * a mentuan Osechse," " signatum Oscense ; " and is of aquan $^{2}$ that Ohense in these pharases means Spumith by a comrugtion from the national name, Sus-rara. (C'f. C'an B. C. i. 60; Vell. Pat, ii. 30.) It is the modurn Flueser in Avougn. (Florez, Ma, ii. p. 513. Sintim, p. 176; Mimmet, i. p. 46. Suphl. i. p. 92 ; Murray's Itundbouk of Spain, 1. 448 .)
2. A tuwn of the Turdetani in Hispania Baetica, whith stme have identifiel with Ifussar:, hut which I lkert (vol, ii. pt. 1. p. 370 ) thinks must be southt to the W. of that place. (Ptol. ii. 4. \& 12; Plik. ii. 1. s. 3.) The protemed coins of this town are not Eemmo. (Fluriz, Med. l. c.: Seatini, p. 78 ; Minemet, i. 1. $43, \mathrm{Suph}$ i. 1. 40 ; Smani, p. 78 ; Tkert. l. . .)

## OSc'ELA. [Lemontil.]

OS'I or OP'LCL (in Greek always "Oticot : the original furm of the name was Opseus, which was still used by Enaius, ap, Fest. s. r. p. 198), a nation of Coutral Italy, who at a very early period appear to have been spread over a considerable part of the peninaula. So far as we can ascertain they were the original occupants, at the carliest time of which we hwe anything like a definite account, of the central part of Italy, from Campania and the borders of Latium to the Aifriatic ; while on the $S$, they adjoined the Opnotrians, whom there is good reason to recard as a Pelasgic tribe. Throughout this extent they were subsequently conquered and reduced to snbjection by tribes called Sabines or Sibellians, who issued from the lufty mountain tracts of the Apennines N . of the territory then oecupied by the Oscans. The relation between the Sabellians and the Oecans is very obscure ; but it is probahle that the tormer were compramatively few in number, and adupted the language of the conquered people, as we know that the language buth of the Campanians and Samnites in later times was Oscan. (Liv, x. 20) Whether it remained unmised, or had been modified in any degree by the language of the Sibellians, which was probably a cognate dialect, we have no means of determining, as all our existing monuments of the language are of a date long subsequent to the Sabellian conquest. The ethnical affinities of the Oscans, and their relations to the Sabellian and other races of Central Italy, have been already considered noder the article lxiLna: it only remains to add a few words eoncerning what is known of the Uscan lancuage.

Niebuhr has justly remarked that "the Oscan language is by no means an inexplicable mystery, like the Etruscan. Had a single book in it been $1^{\text {reeserved, we should be perfectly able to decipher it }}$ ont of itself." (Nieb. vol. i. p. 68.) Even with the limited means actually at our command we are able in great part to translate the extant inscriptions in this language, few and mostly brief as they are; and though the meaning of many words remains uncertain or unknown, we are able to arrive at distinct conclusions concerning the gencral claaracter and affinities of the language. The Oscan was tlosely conniected with the Latin; not merely as the Iatin was with the Greek and other branches of the great Indo-Tentonic family, as offiloots from the sume original stork, but as cognate and nearly allied dialects. This affinity may be traced throughout the grammatical forms and inflections of the langunge mit less than in the vocabulary of single words. The Latin was, however, in all probalility a compasite language, derived from a combination of this ()scan element with noe more closely akin 10 the fireck, of of l'elasgic origin [I.athes, p. 137]: while the Oscan doubtless represents the language of Coutral Italy in its more mmixed form. In many enses the older and ruder specimens of the Latin retain Oscan forms, which were laid aside in the more refined stages of the language: such is the termination of the ablative in $d$, which is found in the Duilian and other old Latin inscriptions, and appears to have been universal in Gscan.

Tha few notices of Oscan words which have been precerved to us by Latin writers, as Varro, Festos,太.., are of comparatively little importance. Our chief knowledge of the language is derived from extant inscriptions; of which the three most important are:
neighbourhood of Bantia, on the borders of Apulia and Lucania, and which refers to the municipal affairs of that town ; 2, the Cippus Abellanus, so called from its having been found at Abella in Campania, and containing a treaty or agrecment between the two neighbonring cities of Nola and Abella; and 3. a bronze tablet recently discovered in the neighbourhoud of Agnone in northern Samnium, containing a dedication of varions sacred offerings. It is remarkable that these three monuments have been found in nearly the most distant quarters of the Oscan territory. By the assistance of the nomerous minor inscriptions, we may fix pretty clearly the linits within which the language was spoken. They include, besides Campania and Samnium Proper, the land of the Hirpini and Frentani, and the northern part of Apulia. No inscriptions in Oscan have been found in Lacania (except immediately on its borders) or Bruttium, thongh it is prubable that in both of these countries the Sabellian conquerors introduced the Oscan language, or one closely connected with it; and we are distinctly told by Festus that the Bruttians spoke Greek and Oscan. (Fest. p. 35, M.) We learn also with certainty that not only the vernacular, but even the official, use of the Oscan language continued in Central Italy long after the Roman conquest. Indeed few, if any, of the extant inscriptions date from an earlier period. The comic poet Titinius allades to it as a dialect still in common use in his time, about B. c. 170. (Fest. s.v. Opscrm, p. 189.) The coins struck by the Satmites and their allies during the Social War (B. c. $90-88$ ) have Oscan inscriptions ; but it is probable that, after the close of that contest and the general admission of the Italians to the Roman frauchise, Latin became universal as the official language of Italy. Oscan, however, must have continned to be spoken, not only in the more secluded mountain districts, but even in the towns, in Campania at least, until a mnch later period; as tre find at Pompeii inscriptions rudely scratched or painted on the walls, which from their hasty execution and temporary character cannot be supposed to have existed long before the destruction of the city in A. D. 79.
(Concerning the remains of the Oscan language see Monmsen, Vinter-Italischen Dialekte, 4to. Leipzig, 1850; Klenze, Fhilulogische Abhandlungen, 8ro. Berlin, 1839 ; and Donaldson, Varronianus, pp. 104-138.)

We have no evidence of the Oscans baving any literature, properly so called; but it was certainly from them that the Romans derived the dramatic entertainments called Atellanae, a kind of rude farces, probably bearing considerable resemblance to the performances of Pulcinello, still so popular at Naples and in its neighbourhood. When these were transplanted to Rome they were naturally rendered into Latin : but though Strabo is probably mistaken in speaking of the Fabulae Atellanae of his day as still performed at Rome in Oscan, it is very nataral to suppose that they were still so exhibited in Campania as long as the Oscan language continued in cummon use in that country. (Strab. v. p. 233 ; concerning the Fabulate Atellanae see Mommsen, l. c. p. 118 ; Bernhardy, R'omische Literatur, p. 378, S.c.; Munk, de Fabulis Atellanis, Lips. 1840.)
[E. H. B.]
OSCINEIUM, a name which appears in the Jerusalem Itin. on the road from Vasstae (Bazas) to Elusa (Eause). [Cossio; Elus.ates.] The order
of names is Vasatae, Tres Arbores, Oscineium, Sat ${ }^{-}$ tium or Sotium, and Elusa. Uscineium is marked at the distance viii. from the two places between which it lies. D'Anville finds on this road a place named Esquies, which in name and position sgrees pretty well with the Oscineinm of the Itin.
[G. L.]
OSERLATES ('Oбєpiates), a tribe of Pannonia Superior, dwelling on the banks of the river Dravus; but nothing is known about them but their nane. (Ptol. ii. 15. § 2 ; Plin. iii. 28.)
[L. S.]
OSI, a German tribe mentioned only by Tacitus (Germ. 28, 43), as dwelling beyond the Quadi, in a woody and mountainous country. But their national customs. as well as their language, were those of the Punnonians. They were, moreover, tributary to the Quadi and Sarmatae. The exact districts they in habited cannot be determined, nor do we know whether they had migrated into Germany from Pannonia, or whether they were an ancient remnant of Pamnonians in those districts.
[L. S.]
OSIANA, a town in the west of Cappadocia, between the river Halys and lake Tatta, on the road from Ancyra to Caesarea (It. Ant. p. 206). Its site must probably be looked for in the district of Jurkup or Crgub.
[L. S.]
OSLSMIt or OSISMIII ('O $\sigma i \sigma \mu t o t$ ), a Celtic peuple who joined the Veneti in the war against Cuesar, B. C. 56. (B. G. iii. 9.) There is nothing in Caesar which shows their position forther than this, that they were in the peninsula of Bretagne. Ptolemy (ii. 8, § 5) makes them extend as far south as the Gubaenm headland, and he names Vorganium as their chief city. [Gobaect.] If we accept the authority of Meia, who says (iii. 6) that the island Sena (Sein) is opposite to the shores of the Osismii, this will help us to determine the southern limit of the Osismiii, and will confirm the conjecture of Gobaeum being the headland called Raz Pointe, which is opposite to the small island Sein, or as it is improperly called Isle des Saints; or being somewhere near that headland. In another passage (iii. 2) Mela makes the great bend of the west coast of Gallia commence where the limits of the Osismii end: " ab illis enim iterum ad septentriones frons littornm respicit, pertinetque ad ultimos Gallicarum gentium Morinos." Pliny (iv. 18) describes this great peninsula of Bretogne thus: "Gallia Lugdunensis contains a considerable peninsula, which rons out into the ocean with a circuit of 625 miles, beginning from the border of the Osismii, the neck being 125 miles in width: south of it are the Nannetes." It is plain then that Pliny placed the Osismii along the north coast of Bretugne, and there is Mela's authority for placing them on the west coast of the peninsula. The neck of the peninsula which Pliny describes, may be determined by a line drawn from the bay of St. Brieuc on the north to Lorient on the sonth, or rather to some of the hays east of it, or Morbihan. It seems a fair conclusion, that the Osismii occupied a large part of the peninsula of Bretagne; or as Strabo (iv. p. 195) says: "Next to the Veueti are the Osismii, whom Pytheas calls Timii, who dwell in a peninsula which rons out considerably into the ocean, bnt not so far as Pytheas says and thase who believe him." He dors not tell us how far Pytheas said that the peninsula ran out into the sea, but if we had Pytheas' words, we might find that he knew something abont it. The conclusion of D'Anville is justified by the ancient authorities. He says: " It scems that it has been agreed up to the present time to limit the territory

OS.MIDA.
of the Osismii to the northern coast of Basse Bretagne, thougll tbere are the strongest reasons for thinking that they ncenpied the extremity of the same continent in all its breadth and that the dineese of Quimper was a part of the territory as well as the dincese of Lion." "Anville ohserves that there is no part of ancient Gaul the geography of which is more obscure.
G. L.]
 Crete, whith Mr. Pa-hley's map places at the sources of the Megálo-pitamo. (Hïck, Krota, vol. i. p, 396.)
[E. [. J.]
(ospHAGIS, a branch of the river Eirigon, in L-wncestis, unon which the consul Sulpicins pitched his camp in the campaign of s. C. 200 (Liv, axxi. 39) ; perhaps the same as the Schemnitad, an aftluent of the Frigon, which falls into it to the N of Bitolia.
[E. B. I.]
OSQLIDATES, one of the peoples of Aynitania mentioned by Pliny (iv. 19). He mentions (Osquidiates Montani and Osquidates Campestres, but he enumerates many names between the two, from which we may conelude that the Campestres did not border on the Montami, for if they had, it is probable that he would have cummerated the Camestres immediately alter the Montani instead of placing between them the names of eleren peoples. Beside this, we must look for the Montami on the north side of the Pyrenees and in the valleys of the Pyreneos, and the Campestres in the low country of Aquitania. There are no means for determining the position of either the Montani or the C'ampestres, except from the resemblance between the ancient and the modern mames in thin part of (rallia, which resemblance is often very ereat. Thus D'Amille supposes that the Orquidates Mmani may have ocempied the ralley of Ossau, which extends from the finot of the Pyrences to Otroon, on a brancla of the Aduar. This is probable cuongh, but lise attempt to find a position for the Campentren is unsuceessful.
[it. L.]
(OSRIMOENE, at small district in the NW, corner 1f M-"opntania (taken in its most extended sense), which there is some reason fir supposing would be mare corractly written Orthene. It dhes not appear in any writer carlier than the tumes of the Antotinc. and is not therefore mentioned by either - alala or I'tolemy. Provepius states that it de1.a. ! it name from a certain Orrow, wha ruled than. in furmer times ( $P$ ers. i. 17); and Dion Cas-- af hellares that the name of the man who be-- 1 d the Romam army under Crassus was Alygarus the Co. runnian (xl. 19; see for the same name. Is wiii. 18, thif lxxvii. 12.) Agrain, Herolian calls the perpine with dwelt in thrise parts 1) rocni (iii. 9. iv. 7, val. 1). Ammianus writes the name Odroene (xiv. 3, 8, xxiv. 1). The name prevaled in the country as late as the seventh contury. (llierocl. J. 713.) In the Notitia Inumeat. Orome was 1 lavel umber a " Prases Provinciae." and appears to have been sometumes induded in Mesopotamia surctim * kept separate from it. (See Justimata, Nutit. (it. § II; Joan. Malalas, xi. p. 274, ed. Bonn ; Nusis. de Fpoch. ii. 1. 110.) It is mo:t likely that the correct form of the name is (orrhoene: and that this is connented with the Mavsovoppa of Isiloras. (Stuthm. P'urth. 1.; amil ace Dion, 1xvini. 2, for the mane of Mannus, a chief of the Mewopotamian Arabs, whan gave himself mip to Trejunh.) Not impasibly, the Orurns of Pliny naty recer to the same district. (vi. 30, 119.) [Enes.]
()ssi (Oбca, I')

Bisalta", wbich, hefore the annexation of Bisaltia to the kingdom of Macedonia, must have been a place of some importance from the fact of its possessing an autonomons c vinage. (Eckhel, vol. ii. p. 73.) It has been jdentified with Sokho, a large village on the S. side of the Nigrita mountain, where some llellenic remains are found on the surrounding heights. Another ancient site at Lakhand, on tbe N. road from Serrés to Saloniki, has also clains to be considered the representative of Osea. (Leake, North. Greece, vol. iii. pp. 213, 233.) [E. B. J.]

COIN OF OSSA.
OSSA ( ${ }^{\circ} \mathrm{O} \sigma \sigma \alpha$ ), a lofty mountain in Thessaly on the coast of Mugnesia, separated from Olympus only by the narrow vale of Tempe. Hence it was supposel hy the ancients that these mountains were once united, and hat been separated by an earthguake. (Herod. vii. 129 ; Strab. ix. pp. 430, 442; Lucan, vi. 347 ; (Claudian, Rapt. Proserp. ii. 183.) Oosa is conical in form and has only one summit. Polybius mentions it as one of the lighest mountains in lireece ( $x \times x i v .10$ ); lnt it is considerabiy lower than Olympus, and according to Ovid even lower than l'elion. (Ov. Fast iii. 441.) Aceording to Donlwell, who speaks, however, only from conjecture, Oss.t is ahout 5000 feet high. To the south of Ossa rises Mt. Pelion, and the last falls of the two mountains are uinitel by a low ridge. (Herod. rii. 129.) Olympus, O*sa, and Pelion differ greatly in character; and the conical peak, standing between the other two, is well contrasted with the broad majesty of Olympns, and the extended outline of Pelion. The length of Ossa along the coast is said by Strabo to be 80 stadia (ix. p. 443). It is hardly necensary to allude to the passages in the poets, in which Ossa is mentioned, along with Olympus and Poliom, in the war of the giants and the gods. (Hom. Od, xi, 312, Virg. Fieorg. i. 282, \&c.) The modern name of Ossa is Kissaro. (Hulland, Trazels, \&u. vol. ii. pp. 3. 95: Dodwell, Clussical Tour, vol. ii. p. 106; Leake, Northern Grecee, vol. i. p. 434, vol. iv. 1p. 411, 513: Mézièros. Mémuire sur le Pélion et l'Ossa, Paris, 1853.)
2. A mountain in Elis near Olympia. [Vol. I. p. 817. h.]

OSRADIAE ('O $\sigma \sigma a ́ \delta i a u)$, a people who dwelt in the Pronjab aling the banks of the Acesines (Chenaib), and whor surrendened themeelves to Alexander the Great after the conquest of the Malli (Mutteir). (Arrian, vi. 15.)
[V.]
 барךрй, Interp.), a canton of Annetria situated on the banks of the river Cyrus. S: Martin (Mím. sur l'Armenie, vol. i. p. 81 ) is of opinion that it may be the same as the Gogarase of Strabo.
[E. B. J.]
()ssET, also called Julia Comstantia (Plin. iii. 3), a town of Bactica, on the rizht bank of the river Bartis, and opposite to Ilispalis. It is probably tho 1uydems. Jum che Alfuruche, near Castello de la

(Florez, Esp. S. ix. p. 106, Med. ii. p. 528 ; Mionnet, i. p. 25; Sestini, Mcd. Isp. p. 79.) [T. H. D.]

COIN OF OSSET.
OSSIGERDA or OSICERDA (O Onké $\rho \delta a$, Ptol. ii. 6. $\S 63$ ), a town of the Edetani in Hispania Tarraconensis. It was a municipium in the jurisdiction of Caesaraugusta. (Plin. iii. 3. s. 4, who calls the inhabitants Ossigerdenses.) It had a mint. (Florez, Med. ii. p. 532, iii. p. 109 ; Mionnet, i. p. 47. Suppl. i. p. 95 ; Sestini, p. 177.) Ukert (vol, ii. pt. 1. p. \$17) identifies it with Ossera, near Saragossa.
[T. H. D.]
OSSIGI LACO'NICUM, a town on the borders of Hispunia Baetica, at the place where the Baetis enters that country (Plin. iii. 3); now Marquiz, where there are Roman ruins and inscriptions. (Ftorez, Esp. S. xii. 367, y. 24.)
[T. H. D.]
 town of the Turdetani in Lusitania, between the rivers Tagus and Anas, on the road from Esuris to Ehora and Pax Julia. (Itin. Ant. pp. 418, 426.) [Lusitanis, p. 220, a.] It is the same town mentioned by Strabo in a corrupt passage (iii. P. 143), by Mela (iii. 1.§6), Pliny (iv. 21. s. 35), and others. Commonly identified with Estoy, lying a little N. of Faro, near the mouth of the Silves, where Roman ruins and inscriptions are still found. One of the latter las resp. osson. (Ukert, vol. ii. pt. 1. p. 387.)
[T. H. D.]
OSTEODES ('O $\sigma \tau \epsilon \omega \delta \eta$ ), a small island in the Tyrrhenian sea, lying off the N. coast of Sicily, and W. of the Aeolian Islands. Diodorus tells us that it derived its name (the Bone Island) from the circumstance of the Carthaginians having on one occasion got rid of a body of 6000 turbulent and disaffected mercenaries by landing thein on this island, whicb was barren and uninhabited, and leaving them there to perish. (Diod. v. 11). He describes it as situated in the open sea, to the west of the Liparaean or Aeolian Islands; a description which applies only to the island now called Ustica. The difficulty is, that both Pliny and Ptolemy distinguish Ustica (Oí $\sigma$ tica) from Osteodes, as if they were two separate islands (1'lin, iii. 8. s. 14 ; Ptol. iii. 4. § 17 ). The former writer says, "a Solunte 1xxv. MI. Osteades, contraque Paropinos Ustica." But as there is in fact but one island in the open sea W. of the Lipari Islands (all of which are clearly identibed), it seems certain that this must have been the Osteodes of the Greeks, which was afterwards koown to the Romans as Ustica, and that the existence of the two names led the geographers to suppose they were two distinct islands. Dlela does not mention Ustica, but notices Ostcedes, which he reckons one of the Aeolian gromp; and its name is found also (corruptly written Ostodis) in the Tabula, but in a mamer that affords no real clue to its position. (Mel. ii. $7 . \S 18$; Tab. Teut.)

Ustica is an island of volcanic origin, about 10 nuiles iu circunfercnce, and is situated about

40 miles N. of the Capo di Gallo near Palermo, and 60 miles W. of Alicudi, the westernmost of the Lipari Islands. It is at this day well inhabited, and existing remains show that it must have been so in the time of the Romans also. (Smyth's Sicily, p. 279.)
[E. H. B.]
O'STIA ('Roria: Eth. Ostiensis: Ustia), a city of Latimm, situated at the month of the Tiber, from which position it derived its name. It was on the left bauk of the river, at a distance of 16 miles from Rome, by the road which derived from it the name of Via Ostiensis. (Itim. Ant. p. 301.) All ancient writers agree in representing it as founded by the Roman king Ancus Marcius; and it seems certain that it always retained the position of a colony of Rome, and was at no period independent. From its position, indeed, it naturally became the port of Rome, and was essential to that city, not only for the purpose of maintaining that naval supremacy which it had established before the close of the regal period, but for securing its supplies of corn and other impurted produce which was carried up the Tiber. Ancus Marcius at the same time established salt-works on the site, which for a long time continued to supply both Rome itself and the neighbouring country in the interior with that necessary article. (Liv. i. 33 ; Dionys, iii, 44; Cic. de Rep. ii. 3, 18; Strab. r. p. 232; Flor. i. $4 ;$ Eutrop. i. 5; Fest. p. 197.). There can be no doubt that the importance of Ostia must have continued to increase with the growing prosperity and porrer of Rome; but it is remarkable that we meet with no mention of its nanue in history antil the period of the Second Punic War. At that time it appears as a commercial and naval station of the utmost importance; and mas not only the port to which the cora from Sicily and Sardinia was brought for the supply of Rome itself, as well as of the Roman legions in the field, but was the permanent station of a Roman fleet, for the protection both of the capital, and the neighbouring shores of Itnly. (Liv. xxii. $11,37,57$, xsiii. 38 , xxr. 20 , xxvii. 22.) It was at this time still reckoned one of the " coloniae maritimae;" but on account of its peculiar im:portance in relation to Rume, it ensoyed special privileges; so that in B. c. 207 , when the other maritime colonies endeavoured to establish a claim to exemption from levies for military service, this was allowed only in the case of Ostia and Antium; the citizens of which were at the same time compelled to be constantly present as a garrison within their own walls. (Liv. xxvii. 38.) On a subsequent occasion (n. C. 191) they attempted to extend this exemption to the naval service also; but their claim was at once disallowed by the senate. ( $I d$. xxxri. 3.) Even after the complete establishment of the naval power of the Roman Republic, Ostia seems to have continued to be the usual station of a Roman fleet: and in B. C. 67 it was there that a squadron, which had been assembled for the repression of the Cilician pirates, was attacked by the pirates themselves, and the ships either destroyed or taken. (Cic pro Leg. Manil. 12; Dion Cass. xxxvi. 5.) Ostia itself also suffered severely during the civil wars of Sulh and Marius, having been taken by the latter in B. C. 87 , and given up to plander and devastation by his soldiers. (Appian, B. C. i. 67 : Liv. Epit. Xxxix; Oros. v. 19, Flor. iii. 21. § 12.)

But its position at the month of the Tiber, as the port of Rome, secured it frum decay: and so in-
portant was the trade of Ostia become, especialle ion acconnt of the supplies of corn which it fumisheit to the capital, that it was made the place of residence of one of the fur quaestors of Italy, and gave nanu to one of the "provinchate guaestoriau" into whirls that enuntry was dividud. (Cie, pro Murrn, 8, mo Sest. 17 ; Suct. Claurl. 24.) But the inereasing comineres of ()-tia rendered its natural disadvantages as a port only the more scusible; and there can be little doubt that those disudvantages were themvelves continnally increasing. It had been origin:illy founded, as we are expressly told, clase to the muthth of the Tiber, frem which it is now distant abuve three miles; and the proeens of alluvial deposiciun. which las wrouglit this clange, has been untoubtedly going on throughout the intervening periad. Hence Strabo describes in strong terms the ilisadrantages of Ostia in lis day, and calls it *a cily withunt a punt, on aecount ot the alluvial deposits continually brought down by the Tiber, whach compellent the larger class of vessels to ride at ancloo in the ujen rondstead at great risk, wbile their carcenes were unloaded into boats or barges, by which they were carried up the river to Rome. ()ther ressels were themselves towed up the Tiber, after they had been lightened by discharging a part of their cargoes." (Sirab. v. pp. 231, 232.) Dionysius gives a more favourable view, but which dues not substantially differ from the preceding account. ( Himys. hi. 44.) These evils had already attraeted the attention of the dictator Cnesar, and annong the projects ascotbed to bim, was one for forming an artitioial port or basin at Ostia (PJut. Caes. 58): but this was neglected by his successors, nutil the

OSTLA.
increasing difficulty of supplying Rome with corn sanpelled Clandius to undertake the work.

That enperor, instead of attempting to cleanse and restore the original port of Ostia at the monti of the Tiber, determined on the construction of an entirely hew basill, which was excavated in the seatshore about two miles to the N. of Ostia, and which was male to communicate with the river by an artificial cut or canal. This port was protected and enlarged by two moles projecting out inte the sea, so as to enclose an extersive space, while in the interval letween them a breakwater or artificial island was thrown up, crowned by a lighthonse. (Dion Cass. 1x. 11; Suct. Claud. 20; Plin. ix. 6, xvi. 40, s. 76 ; Juv, xii. $75-81$ ) This great work was called the Portu's Av'gustt, on which account its construction, or at least commencement, is by some writers referred to the emperor Anguntus ; but there is no authority for this ; and Dion Cassius distinctly assigns the commencument as well as eompletion of it to Clandins. Nero, however, appears to have put the finishing hand to the work, and in consequence struck cains on which he claims it for lis own. (Eckbel, vol. vi. j. 276.) After this it was cunstaerably augmented by Trajan, who added an inner basin or dua $k$, of a lexagemal form, surrounded with quays and extensive ranges of buildings for magazines and stowehouses. This port was called by bim Portus Tienjasi; and hence we afterwards meet in inseriptions with the "Portus Augusti et Trajani," and sonetimes "Portas uterque " in the same sense. (Juv. l. c., et Schol. ad loc. ; Gruter. Inser. p. 308. 10, p. 441.3.) At the same time he enlarged or repaired the artificial chantel of communication with

the Tiber, which now assumed the name of Fossi Tmasana, and is mndonbtedly the same which still exists under the name of Fiumicino, and forms the right arm of the Tiher, from which it separates about a mile and a half above the site of Ostia.

The new port thas constructed soon gave rise to the growth of a new town around it, which was generally known by the name of Portus Ostiensis, sometimes also Portns Urbis or Portus Rumae, but more frequently, at least in later times, simply Ponrus. It seems to have been designed more particularly for the inportation of corn for the supply of the capital, sn object of which the importance became felt more and more, as the popnlation of Rome contioned to increase, while it became more absolntely dependent upon foreign produce. The adjoining district on the right bank of the Tiber was portioned out among a body of colonists before the time of Trajan (Lib. Colon. p. 222) ; and a new line of road was constructed along the right bank of the Tiber from Rome to the new port, which obtained the vame of Via Portuensis. In the reign of Constantine the city of Portus was erected iuto an episcopal see (Anastas, Fit. Silvestr. 34); and the same emperor surrounded it with strong walls and towers, which are still in considerable part extant.
Meaowhile Ostia itself was far from sinking into decay. Repeated notices of it during the earlier periods of the Roman Empire show it to have been still a flourishing and populous city, and successive emperors concurred in improving it and adorning it with public buildings. It was particularly indebted to the care of Hadrian (Gruter, Inscr. p. 249.7) and Septimius Severus, numerous inscriptions in honour of whom have been discovered among its ruins. (Nibby, Dintorni, vol. ii. pp. 434, 468.) Aurelian, also, we are told, adorned it with a Forum, which bore his natne, and which was decorated by his successor Tacitus with 100 colnmns of Numidic marble. (Vopisc. Aurel. 45 ; Tac. 10.) The existing remains confirm the inference which we should draw from these acconnts, and show that Ostia must have continued to be a flourishing town till towards the close of the Roman Einpire, and f.r superior in the number and spleodour of its public buildings to the neighbouring tuwn of Portns. But the secarity of the latter place, which was well fortified, while Ostia was wholly unprotected by walls (Procop. B. G. i. 26), must have contributed greatly to the advantage of Portus ; and the artificial port scems to have obtained an increasing preference over the natural month of the Tiber. Rutilius says that in bis time (about A. D. 414) the left arm, or main channel of the river, was so obstructed with sand as to be wholly deserted (Itin. i. 181) ; but this would appear to be an exaggerated statement, as Procupius more than a century later describes them as both navigable (Procop. l. c.). Ostia was, however, in his day already in a state of great decay, and the ruad which led from thence to Rome (the Via Ostiensis) was neglected and abandoned, while the Tia Portuensis on the other side of the Tiber was still the scene of considerable traffic. The importance of Portus became more developed when Rome itself became exposed to the attacks of hostile barbarians. In A. D. 409 Alaric, king of the Goths, made himself master of the port, and with it of the stores of com for the supply of the capital, which compelled the senate to capitulate on the terms that be chose to dietate (Zosim. vi. 6); and again during the wars of Belisarius and Vitiges (in 537 ) the Gothic king,
by making himself master of Portus, was able to reduce his adversary to severe distress (1rocop. B. (f. i. 26, \&cc.). The decline of Ostia continued thronghout the earlier part of the middle ares : in 827 it is described as altogether in ruins, and the continned incursions of the Saracens throughout that century seem to have completed its desolation.

But meanwhile the artificial ports of Clandius and Trajan were beginning in their turn to suffer from the deposit of satd which is constantly going on along these shores; and no attempt being made in these ages of confusion and disorder to arrest the progress of the evil, they were both gradually filled up so as to be rendered altogether nselcss. In the 10 th century, the port of Trajan was already reduced to a mere lake or $j^{n o l}$, altugether cut off from the sea, and only communicating by a ditob with the Tiber. (Uyhelli, Italia Sucra, vol. i. p. 134.) The consequence was that for a time the trade was again forced to have recourse to the left arm of the river; and the modern Ostic, where a castle or furt had been founded by P'ope Gregory 1V., a little above the ruius of the ancient city, became again for a period of some centuries the landing-place of travellers and the purt of Rome. It was not till 1612 that Pope Panl V. once more caused the canal of Trajan to be restored and cleared out, and continued to the present line of sea-coast, where a small port called Fiumicino was corstructed; and from this time the whole traffic carried on by the Tiker with Rome (which is however bnt inconsiderable) has been confined to this arm of the river. The main channel, on the other hand, haviug been completely neglected, has become so obstructed with sand near the mouth as to be wholly impracticable.

The modern village of Ostia is a very poor place, with the ruins of an old castle, but retains little more than 50 permanent inhabitants, who are principally employed in the neighbouring salt-works. 1ts chmate in summer is extremely unhealthy. The ruins of the ancient city begin about half a mile below it, and extend along the left bank of the Tiber tor a space of near a mile and a half in length, and a mile in breadth. Though extensive, they are for the most part in a very dilapidated and imperliçt state, so as to have little or no interest as atchescotural monuments; but among them may be distinctly tracel the remuios of a theatre, a temple of the Corinthiau order, the fornm, with several of the public buiblings that surrounded it ; and near the Torre Boracciana, close to the Tiber, are the ruins of buildings that appear to indicate this as the site of the actuad port or emporimm of Ustia in the imperial period. The great number and beanty of the statues and other works of art, which have been brought to light by the excuvations carried on at successive periods on the site of Ostia, are calculated to give a high notion of the opulence and prosperity of the ancient city.
The ruins of Portus, which are also very considerable, are of an entirely different character from those of Ostia. They are funnd on the right bank of the Tiber, about 2 miles from the present line of sea-coast at Fiumicino, and are still known as Porto; while the iuner basin of Trajan, the hexagonal form of which may be distinctly traced, though it is in great part fllled with sand, is still popularly known by the name of $1 l$ Trajano. The quays of solid masonry that surrounded it are still well preserved; while extensive, thongh shapeless, masses of ruins adjoining it appear to have been those of the magazines and storehouses attached to the purt. The
remains of the port of Claudins are less distinct ; the line of the moles which bounded it may, however, be traced, though they are altogether biried in sand; the tower of the lighthonse or Plarons was still visible in the 15 th cent:ary, when the ruins were visitel and described by Pope Pins II., lut has now entirely disappeared. A considerable part of the ancient walls with which the city was fortified by Constantine is still visble; they were strengthened with towers, and closely resemble in their style of construction the older portions of thase of Rome.

Between the site of Ostia and that of Portus is the iland, formed by the two branches of the Tiber, which is about 3 males in length by 2 in breadth. It is commonly known as the 1xstia Sioma, an appellation first given to it by Procopius, who describes it in detail (B. G, i, 26). The origin of the epithet is unknown, but it appears to have been in Cluistam times regarlel as consecrated, harving been, aucording to Anastaxius, bestowel by Constantine upon the chureh. It is discribed in exaggerated terms by a writer of the 5 th centary (Aethicus, (insmugr. p. 716, ed. Gronos.) for its beaty and fertility, whence he says it was termed "Libanus Almae Vemeris:" but in spring it is still covered with fine pastures abonmoing with beatiful flowers. The formation of this islami ohviously dates only from the construction of the right arm of the Ther, now knuwn as Il Finmicino, which, as already shown, is probably wholly artificial. No writer before the time of the Rioman Empire alludes to more than one month of the river.

The topography of Ostia and Portus, and the vicissitules and changes which the two ports at the nonth of the Tiber have undergone, are fully traced, and the existing ruins deseribed in detail. by Nibby (Dintorni di Roma, wol, ii. p. $+26-474,602-660$ ); as well as liy Proller, in the Bervichet der Siuchsischen
 preadugs than is copied from one given by the latter writer.

OSTCDIZL's (also witten Ostidizus and Ostodizus, Itin. Ant. Pp. 137, 230, 322; and in Hilar. viii. p. 1346, Ustudizum), a town in Thrace, on the road frum H:adriample to Constantinople. [F.H.D.]
()NTLRE, a town of Spain, not mentioned in any uncient writer, but which appears upon coins. There is still a place called Ostur near Alcora in Talencia, wheich has some Roman ruins, and which abounds with acorns,-the figure of which also appears upon the coins. (Florez, Med. ii. p. 535, iii. p. 113; Sestini, p. 179; Mionnet, i. p. 47, Suppl. i. p. 95, ap. Ukert, vol, ii. pt. 1. p. 416.) [1.H.D.]

OTADINT ( $\Omega$ tainvoi, Ptol. ii. 3. § 10), a British tribe on the E. cosst of Britanuia Barbara, in the frovince of Valentia, lying $S$. of the Boderia estuary, or Firth of Forth, down to the river Tyne; and therefore imhahiong the counties of IIaddington, Borwick, hoxburgh, and the greater part of Northumberland. Their clief cities were Curia and Bremenium.
[T. II. D.]
OTEXN: (' $\Omega \tau \eta v$ ', Ptol. v. 13. § 9 , where the reading $\mathrm{M} \omega \tau \eta \nu \nu^{\prime}$ is incorrect), a canton of Armenia, separated from Atropatene by the river Arazes, (1)lin. vi, 16) St. Martin (Mém. sur l'Armenie. vol, i. p. 86) identifies it with the province known to the native geugraphers by the name of Oudi, or what is now called Kara-buigh, to the N. of the Arases.
[E.B.J.]
OTESTA, a town of Cispadane (iau), knawn only from the mention of the Otesini by Pliny (iii. 15. s. 20) among the municipal turns of the Eighth Region. Bat an inscription given by Claverins makes mention of the " Respmblica Otesinorum;" and it is probahle that Aitwoia and 'Optıaia, which are foum in lhbegon amone the towns of the same part of Italy, are only corroptions of the same name. (Phlegon, Hacrobl, 1: Cluver. Atal. P. 282.) Lis site is wholly uncert.in.
[E. H. B.]
()TH1KIS ( $\dot{\eta}^{\circ}$ Oopus) a lofty chain of mountains, whidh shats in the plain of Thessaly from the sonth. It branches off from Nount 'Tymphestus, at summit in the range of lindus, and runs nearly due east throngh Plathiotis to the sea coast, thus separating the waters whicls flow into the I'eneins from thuse of the Spereheins. (Ntrab. ix. pp. 432, 433; comp. Herout, vii. 129 : Phn, iv. 8. s. 15.) On its northern side, many oll:houts extend into the plain of l'harsalns. It is lefty and covered with wool,

(Virg. Aen. vii. 675) and "nemerosus" (Lucan, vi. 337 ). It is now usually called Gura, from a lurge village of this name apon its sides; but its highest summit, which lies to the east of this village, is named Jeracorouni, and is 5669 feet above the level of the sea. The subsoil of the whole range is a limestone of various aod highly-joclined strata occasionally mixed with iron ore, amyanthe and asbestos. (Leake, Northern Greece, vol, ii. p. 17, vol. iv. p. 330, seq.; Journal of Geogr. Suciety, vol. vii. p. 92.)

OTIS, a town on the Euphrates below Babylon, just above the commencement of the Babylonian Marshes. (Plin. v. 26.)
[V.]
OTTOROCORRAS ('O $\tau \tau$ opokóṕpas, Ptol. vi. 16. §§ 2, 3), the E. termination of the Emodi Montes. This is an example of a Saascrit word which has been preserved in Ptolemy's geography, as it is merely the Greek form of the C'ttarakuru of the "MLháthárata," or the highland of the happy Indiao Hyperboreans, who lived there sheltered from the cold blasts, about whom, nnder the name of Attacorri, as Pliny (vi. 20) relates, a certain Amometus wrote a book, Ammianus (xxiii. 6. § 65), copying Ptolomy, has Opurocarra, and Orosius (i. 2) Ottorogorras. The sacred race of meo living in the descri of whom Ctesias (1nd. 8, ed. Babr) speaks, belong to this imaginative geography, which saw in the snow-capped summits of the Hinalaya the chosen habitation of the Gods and of the Blessed. According to Ptolemy (vi. 16. § 5, viii. $24 . \S 7$ ) there was a people of the Ottorocorrae, with a town of the same name, to the E. of the Casii Montes, or monntains of Kaschgar; as the city is one of Ptolemy's points of recorded astronomical observations, having almost 14 hrs. 45 min . in its longest day, and being 7 hrs . E. of Alexandreia, there must have been some real locality bearing this name, which must be assigned to E. Thibet. (Lassen, Ind. Alt. vol, i. pp. 511, 847.) [E. B. J.]

OVILABA (Hels on the river Traun), a town of Noricum, on the road from Laureacum to Angusta Vindelicorum. (Itin. Ant. pp. 235, 258, 277; Tab. Peut., where it is called Ovilia.) It is said, accordiog to an inscription, to have been a Roman colony under the name of Aurelia Antoniniana. (Muchar, Noricum, i. pp. 217, 238, 266, \&c., 285, \&c.) [L.S.]
OXELAE. [ECMNADES]
OXIA PALUS, a lake which was formed by two very large rivers, the Araxates (Jaxartes) and Dymas (probably the Demus of Ptolemy, vi. 12. § 3), at the foot of the Sugdii Nontes. (Amm. Marc. xxiii. 6. § 59.) This has been supposed to intimate, though very vaguely, the formation of the Sea of Aral; but there seems to be more reason for identifying it with the lake of Karakoul to the SSE. of Bokhara, formed by the Zur-afshun or "gold-seatteriog" river of Sitmiarcand, called also the Kohil;, or more correctly the river of the Kuh$a k$ or "hillock." This river is the I'olytimetu, which, according to Aristobulus (ap. Strab. xi. p. 518), traversed Sogdiasa, and was lost io the sands: while Q. Curtius (vii. 37) describes it as entering a cavern and continning its course under ground, thuugh it really discharges itself into this lake, which the Uabeks call Denghiz, the Turkish word fur "sea." The Greeks translated the indigenous name Soghd - the valley of which is one of the four l'aradises of the Persian pocts - into that of Polytimetus, "the very precious,"-an epithet which it well deserves from the benefits it showers upon this
region, the plain of Bokhara, famed for its gicantie melons. Ptolemy (vi. 12. § 3), if a correction be made in his latitudes, which are uniformly put too far forward to the N., gives the Oximal Pales ( $\Omega \xi \in i a \nu \eta\rangle \lambda \iota \mu$.) its true position butween Zariaspat and Tribactra (Bulkik and Bykiund). "From the mountains of the sogdii," says that geographer, "descend several rivers with no name, but which are confluents ; one of these forms the Oxiana Palus." The Sogdii Muntes of Ptolemy are the Asferah mountaios, by which the volcanic clauin of the Thian-Schan is prolonged to the W. beyond the N. and S. break of Bolor, and Kusuyrt. It is singular that Ptolemy does not connect the Polytimetus with his Oxian lake, but meations it (vi. 14. § 2) as one of the zivers dischauging itself into the Caspian between the Oxns and Jaxartes. Pliny knows nothing of the Polytimetus; and his Oxu's Laccs (vi. 18, xxxi. 39; Solin. 49) is either the crescent-shaped lake of Sirikol, on the Bami Dunya, or "terraced roof of the world," near the pass of Pumur; from which the infant Amú [Oxus] issues, or sone other Alpine lake in the Bolor chain, from which this river derives most of its waters. The marshes of the Massagetae, into which the Araxes of Herodutus (i. 202) flows, with the exception of one of its 40 channels, indicate some vacue notion of the Sea of Aral. Strabo (xi. p. 531), when he blames the opinioo of Herodutus and Callisthenes, about the 40 channels of the Araxes, also (p. 512) asserts that some of the Massagetae live in marshes formed by rivers and in islands; adding (p. 5;3) that this district is flooded by the Araxes, which is divided into many channels, of which ouly one discharges itself into the sea of Hyrcania, while the others reach the Northern Ocean. It is surprising that Strabo does not give to this river of the country of the Massagetae (which is undoubtedly the same as that of which Herodotus speaks) the name of Jaxartes, whicls be mentions so often (pp. 507, 509, 511, 517, 518), and carefully distinguishes (pp. 527-529) from the Araxes of the Matieni, or Armenian river, which was known to Hecataens ( Fr . 170). Strabo (p513) as well as Herodotus (i. 202) allude to the seals, with the skins of which the natives clothe themselves; and it is well known that these aninals are found in the Sea of Aral as well as in the Caspian, and the lakes Baikal and Oron; for these and other reasons it would seem that both Herodotus and Strabo were acquainted with that series of lagoons from which the Sea of Aral has been formed. This was the opinion of Bayer (Acta Petrop, vol. i. p. 398 ) and of D'Anville, who (Carte du Monde des Grecs et des Romains, 1763) deriguates the Aral by these words, "Palndes recipientes Araxen apod Herodotum." With Herodutus all this network of lagoons forms a basin of the interior, while Straho comnects it with the N. Ocean, directly, and not through the medium of the Hyrcanian seat, and the chanmel by which, according to the systematic cosmographers of Alexandreia, this sea was united to the Ocean. It must be observed that Strabo distinguishes clearly between the single mouth of the Araxes of the Massagetac (Jaxartes) and the numerous chanmels which go directly to the N. Ucean. This statement acquires great importance as implying traditions of a clannel of communication between the waters of the Aral and the Icy Sea; a communication which probably took place alung that remarkable depression of $5^{\circ}$ of longitude in length,
in a direction from SW. to NE., from the Aral to the " cmbouchure" of the Obi. The characteristic feature of this depression is an imnemse number of chams of small lakes, communicating with cuth other, artanfed in a eircular form, or like a neekiace. These lakes are probably the traters of 'sirabo's clatinel. The first distinct statement of the Sea of Aral, deseribed as a vast and broad lake, situated to the E. of the river Ural or Jaik, oceurs in Menander of Constannople, surnamed the "Protector," who lived! in the time of the emperor Maurice. (Henand. IIist. Leytit. Barbarorum ad Romanos, pp. 300, 301, 619, 623, 628 , ed. Bonn, 1829). But it is ouly witl the series of Arab gengraphers, at the head of whom must be placed Eil-1stacliry, that any positive information upon the topography of these regions commences. (Humboldt, Asie Centrale, vul. ii. pp. 121-364.)
[E. B. J.]
 §§ 1, 4). a chain of mountains between the rivers Oans and Jaxartes, in a direction from SW. to NE, and which separated Scytha from Sugdiana They are idntitied with the metalliferous group of Asfirall and Aktagh - the Botom, Botm, or Botam ("Mont Blanc") of Elrisi (ed. Janbert, vol. ii. 19p. 198-200). The Oxi Rutes of Strabo (' $\Omega \xi$ ou $\pi \in \tau \rho a$ p. 517 ), which be also calls the bill-fort of Arimazes (Q. Curt. vii. 11), has been identified by Droysen, as quoted by Thirlwall (IIst. of Greece, vol. ri. p. 300), with the pass of Kolugha or Derbend, in the Kara-tagh, between $K$ ish and Missore ; but as it is called the rock of the Oxus, it most be looked for on that river, and is probably Kirghan-Tippa on the Amui. (Wilson, Ariana, 1. 167 ; Ritter, Erdlkunde, vol. vii. p. 734 : Hnmbuldt. Asie Centrale, vol. ii. 14. 18-20.) [E.B.J.]

OXINES ('Ogivns), a small river on the coast of Bithynia, according to Arrian (Peripl. p. 14) between Horacleia and Phylliam, and according to Marcianus ( $\mathrm{p}, 70$ ) 90 stadia to the north-east of Cape J'osidium. (Comp. Anonym. Peripl. p.4, where, as in Arrian, its name is Uxinas.) It is prolably the modern Tsharuk.
[L.S]
()XINGIS, [Aumax.]

OXTH1RACAE: ('Ogөpáxat, Appinn, B. Misp. c. 58), a town of the Lusitani, and according to Appian the largest they biul; but it is mut mentroned by any uther author.
[T. H. D.]
OXIS ( $\delta$ "ngos, Polyb. x. 48 ; Strab. i. p. 73, xi. p1. $507,509,510,513,514,516-51 \mathrm{~s}$; 1'tul. vi. 9.
 §s $1,2,14,1 \div$. § 1 ; Agathem. ii. 10; Arrian. A uab. iii. $2 \mathrm{~S}, 29,30$, jv. 15 , viii. 10,16 ; Plut. Ak.e. 57 ; Dionys. 7t7; Pomp. Mela, iii, 5. S. 6; Plin. vi. 18; (2. Curt. vii. 4.5, 10. Aum, गare, $x \times x i i i$. 6. §52), a river of Central Asia, on the course of which there appears a considerable diserequncy between the statenents of ancient and nudion geomeaphers. Besides affirming that the ()xns flowed throuch Hyramia to the Caypian or Hyrranian se:t, Strabo (ix. p. 509) add, upon the athority of Aristobulns, that it was one of the largest rivers of Asia, that it was navigable, and that by it much valnable merchandise was convered to the Hyrematn sea, and thence to Allamia, and by the river C'yrus to the Euxine. Pliny (vi. 19) ako quotes M. Varry, who suys that it was ascertained at the time when l'onpelis was carrying on hostilities in the Ea-t against Mnthridates, that a juntwey of seven days trom the frontier of India bronght the traveller to the learos, which flosed into the Oxus; the 9 rigyspinged innothat
diver into the Caspian, and across it to the Cyrus, from whence a land journey of no more than five days carried Indian merchandise to Phasis in l'ontus. It would appear (Strab. L. c.) that Patrocles, the aluniral of Scleacus and Antiochus, had navigated the Caspian, and that the results of his observations were in perfect accord with these statements. With such definite accounts inistake is almost impossible; yet the country between the Caspian and the Osus has been crossed in several directions, and not only has the 0xus been unseen, but its course has been ascertained to take a direction to the NW. instead of to the SW.; and it flows not into the Caspian, but the sea of Aral. Nir A. Burnes (Trarels in Bokhara, vol. ii. p. 188) doubts whether the Uxus could incleed lave had any other than its present course, for physical obstacles oppose its entrance iuto the Caspian S. of the bay of Balkan, and N. of that puint its matural receptacle is the Aral ; and that this hats lecon the case for nine centuries at least there is the evidence of 1 lm Hawkil (Istachrs). (O)riental Geography, p. 239, ed. Uusely, London, 1800.) Singularly enough, Pompomius Hela (l. c.) describes very concisely the course of the Oxus almost as it is knuwn at present. "Jaxartes et Oxos per deserta Scythiae ex Sugdianorum regionibus in Sythicum sinum exeunt. ille suo fonte grandis, thic incursu aliorum grandior; et aliquandiu ad vecasum ab oriente currens, juxta Dahas primum inflectitur: cursuque ad Septentrionem converso inter Amardos et l'aesica as aperit."

The course of the (Oxus or Djikoun, as it is termed in the Turkish and Persian works that treat upon its basin, or Amii Deryú, as the natives on its banks call it, whether we consider the Balakchen brands or Kokeha to be its source, or that which rises in the Alpine lake of Sir-i-kol, on the snorrcovered heights of the Tarta ic Cmeasus of Pamir has a direction from Slis. to NW. The volnme of its watere takes the same course from $37^{\circ}$ to $40^{\circ}$ lat, with great regularity from Khoondooz to Chedris. Abont the parallel of $40^{\circ}$ the Oxus turns from LSE. to NNW., and its waters, dimitrished by the numerous channels of irrigation which trom the ditys of llerodotus (iii. 117) have been the only means of fertilising the barren plains of K/hwarizm, reaches the Aral at $43^{\circ} 40^{\circ}$. M:annert (vol, iv.p.452) and others have seen in the text of Pomponius Nela a convincing proof tbat in his time the Oxus had no longer communication with the Caspian. But it can liardly be supposed that the commerce of India by the Caspian and the Oxns had ceased in the little interval of time which separates Mela from Strabo and M. Varro. Besides, the statement of the loman geographer remains singoLarly isolated. 1'tulomy (l. c.), less than a century after Mfela, dinects the Caspian again from E. to II. into the Caspian. The lower course of the river, far from followng a direction from S . to N ., is represented, in the ancient maps, which are traced after P'tolemy's positions, as flowing trom ENE: - WSW: But a more convincing proof las been brought forward by M. Janbert ( $1 / \mathrm{cm}$. sur- l'Ancien Cour's de l'Osus, Iourh, Asintique, 1)ec. 1833, p. 498), who appores the authority of Hamdallah, a tamous geographer of the 14 th century, whona he calls the l'ersian liatosthenes, who asserted that while one branch of the Oxus had its debonche into the sea Khowarean (Aral), there was a brauch which pursued a W. course to the Caspian. (Purchas, vol iii. p. 236; Hakluyt, vol. i. p. 368.) It should be observed that JenkinMiflCgrinited thativ:gimo in 1559, also says that
the Oxus formerly fell into the gulf of Balkan. He is the author of the story that the Tarkomans, in the lope of preventing the diminution of its waters in the npper part of its course, dammed up the moath of the river. Evidence still more positive of the débouche into the Caspian of a considerable river which is now dry, is afforded by observations on the sen-coast, particularly in the Bay of Balkan. The earliest of these is the survey of that bay by Captain Woodrooffe, in 1743, by order of Nadir Shah, who lays down the embouchure of a river which be was told was the Oxus. (Hanway, Trov. vol.i.p. 130.) The accuracy of his survey has been confirmed by the more elaborate investigations of the Russian surveyors, the results of which are embodied iu the Periplus of the Caspian compiled by Eichwald (Alte Geogr. d. Casp. Meeres, Berlin, 1838), and these leave no donbt that a river, which conld have been no other than the Oxus, formerly entered the Caspian at the SE. of the Bay of Balkan by two branches : in one of these there are still pools of water; the other is dry. How far they may be traceable inland is yet to be ascertained; but enough has been determined to justify the belief of the ancient world, that the Oxus wa a chanvel of communication between India and W. Asia. The ancients describe Alexander as approaching the river from Bactra, which was distant from it 400 stadia; their estimate is correct, and there are no fables abont the breadth of the river. Arrian, who follows Aristobulus, says that it was 6 stadia. The very topography of the river's bank may almost be traced in Curtius; for there are low and peaked hillocks near tbat passage of the Oxus, while there are none below Kile'f. He adds that the Oxus was a muddy river that bore much slime along with it ; and Burnes (vol.ii. p. 7) found that one-tortieth of the stream is clay suspended in water. Polybins' (l.c.) statement about the impetuous course of the river and of its falls is uritrue, as its channel is remarkably free from rocks, rapids, and wbirlpools. He has a strange story about the manner in which tbe Aspasii enter Hyrcania, either moder the vault formed by the fall of the waters (comp. Strab. p. 50), or over its submerged stream. It is still a popular belief that the waters of the Aral pass by a subterraneons channel to the Caspian. At Kora Goombuz, where the caravans halt, between the two seas, it is said by some that the water is heard rushing beneath. (Burnes, vol. ii. p. 188.) The conclusions to which Vion Humboldt (Asie Centrole, vol. ii. pp. 162-197) arrived as to the physical canses which may bave interrupted the connection between the Caspian and the Oxus are given in the article Jaxartes. For all that concerns the modern geography of the basin of the Oxus the truvels of our countrymen, to whom we owe most of pur real knowledge of these countries, shonld be consulted - Wlphinstone, Burnes, Wood, and Lord. Professor Wilson (Ariana, pp. 142 145) bas treated this long-vexed question with great ability, and shown that there is every reason tir believing the statements of the ancients that the Oxus was once the great higbway of nations, and gave an easy access to the great Aralo-Caspian basio. [E. B. J.]

OXYBII (O§̇ט́stot), "a part of the Ligyes," as Stephanus says (s.v.), on the authority of Quadratus. Strabo (p. 185) terminates his description of the cuast of Gallia Narbonensis, in which be proceeds from west to east, by mentioning the harbour Oxybius, so called from the Oxybii Ligyes. The

Oxybii were a Ligurian people on the south coast of Gallia Narbonensis ; but it is not easy to fis their position precisels. They were west of the Var and not far from it, and they were near to or bordered on the Deciates. The Oxybii had a town Aegitna, but its position is unknown. A brief sketch of the bistory of this people is written under Deciatfes. Pliny (iii. c. 4) places the Oxybii east of the Argentens river ( 4 , rgents) and west of the Deciates. The Oxybii, therefore, occupied the coast east from Frejus as far as the border of the Deciates, who had the remainder of the coast to the Vir. Antipolis (Antibes) was in the country of the Dcciates.
[G. L.]
 the Panjab, who, with the Malli, occupied the banks of the Hydaspes and Acesines, and strenuonsly resisted the advance of Alexander through their country. It was a common belief of the ancients, that it was in a battle with these people that Ptolemy saved the life of Alexander, and bence obtained the nanie of Soter. (Steph. B.) Arrian, however, transfers the story to the siege of the Malli (Maltin), where Alexander was in imminent danger of his life and was severely wonnded (vi. 11). The name is written in different ways by different writers. Thus Strabo writes it Sydracae ( xv . p. 701), in which Pliny concurs (xii, 6), who makes their country the limit of Alexander's advance eastward; in Diodorus they appear under the form of Syracnsae (xvii. 98); lastly, in Orosius as Sabagrae (iii. 19). The name is clearly of Indian origin ; hence it has been conjectured by Pott, that the titles commencing in this manner represent the Hellenized form of the Sanscrit Csathro (king) corresponding with the Zend Csathra. (Yott, Etym. Forsch. p. lxvii.)
[V.]
OXYDRANCAE ('Oॄ̧ঠסр $\bar{\gamma} \gamma \kappa a \iota$ ), a tribe of ancient Sogdiana, appear to have occupied the district to the N . of the Oxns, between that river and the Jaxartes. (Ptol. vi. 12. § 4.) [V.]
oXYMAG1S ('Oģúuayts, Arrian, Indic. 4), a river which flowed into the Ganges, according to Arrian, in the territory of the Pazalae. The same people are mentioned by Pliny (vi. 19) and J'tolemy (vii. 2. § 35) under the name of Iassalae; and may be identified with the Sanscrit Pankala, and as dwelling near Canjacubga, in the plain conntry between the Sumna and the Ganges. In the immediate neighbourhood is the river Icumati, which has been donbtless Graecized into Oxumagis. The Sanscrit appellation means "abounding in sngarcane," which alphies perfectly to the land through which it flows. (Cf. Ritter, Asien, ii. p. 847; Schmanbeck, Fragm. Megastlienis, p. 28.) [V.]

OXYNEIA ('O $\xi \dot{v} v \in \epsilon a$ ), a town of Thessaly, situated on tbe Jon, a tributary of the Peneins, and perhaps the capital of the Talares, occupied probably the valley of Miritza. It is described by Strabo as distant 120 stadia from Azorns. (Strab. vii. p. 327; Leake, Northern Greece, vol. iv p. 279.)

OXIRYNCHUS ('Ǒ̧́purqos, Strab. xvii. p. 812; Ptol. iv. S. § 59 ; Steph. B. s. v.; Amm. Matc. xxii. 16; Oxyrinchum, It. Anton. p. 157. ed. l'arthey: Eth. 'Ogupv$\left.\gamma \chi^{i} i \tau \eta s\right)$, was the chief town of the Nomos Osyrynchites, in Lower Aegypt. The appellation of the nome and its capital was derived from a fish of the sturgeon species (Accipenser Sturio, Linnaens; Athen. vii. p. 312), which was an object of religious worship, and had a temple dedi-

## PACTYE.

cated to it. (Aclian, Hist. An. x. 4G; Plut. Is. et Osir. c. 7.) The town stond nearly opposite Cynopolis, between the western batuk of the Nile and the Juseph-canal, lat. $28^{\circ} 6^{\prime} \mathrm{N}$. At the village of Bekneseh, which stands on part of the site of Uxyrynchus, there are some remains - broken columns and cornices - of the ancient vity (Jomard. Descript. de l'E:gypte, vol. ii. di. 16. p. 55 ; Chatupomion, TWghte, vul. i. p. 303, sem.); and a single Corinthian column (1)énon, lliogpte, pl. 31), without leaves or volutes, partly burial in the sand, indicates a structure of a later period, probably of the age of Diocletian. Oxyrynchus became the site of an episcopal see, and Apollonins dnted from thence an epistle to the Council of Seleuceia (Epiphan. Hiceres. ixxiii.) Roman coins were minted at Oxyrynchus in the age of Hadrian and Antoninus Pius. (i.) Hadrian, with the reverse of Pallas, holding in her right hand a statuctte of Victory, in her left a spear; or, (2.) Serapis holding a stag itu his right hand. (3.) Antonims, with a reverse, Pallas holding in her right land an axe, in her left a statuette of Victory. (Eckliel, vol. iv. 1. 112.)
[W. B. D.]
OZE'Nł: ('Ŏ̧̧un, Peripl. M. Erythr. c. 48, ed. Mitler), the principal emporium of the interior of the district of W. India anciently called Limyrica. There can be no donbt that it is the Sanscrit $\{\ddot{j}$ jüni, the present Oujein. This place is beld by all ludian authors to be one of great antiquity, and a royal capital,-as Ptwheny calls $i t$,-the palace of a king Tiastanes (vii. 1. § 63). We know for certain that it was the eapital of Vikramaditya, who in B. C. 56 expelled the Sacae or Scythians from his country, and founded the well krown Indian aera, which has been called from this circumstance the Suca aera. (Lassen, de Pertap. p. 57 : Bohlen, Alfe Ind. i. p. 94: Ritter, v. p. 486.) The author of the Periplus states that great variety of commerce was sent down fiom Ozane to Barygaza (l. e.). [1.?
OZogARDANA, a town in the middle of Mesopotamia, reconded by Anmianus, in his account of the: adeance of Inlianus through that eomery (xxiv. c. 2). He states that the inhabitants preserve there a throne or seat of judgment which they say belonged to Trajan. The sume story is told in alnust the same worda by Zosimns of a place he calls Zaraparda (iii. 1i). The flace cannot now with certainty be identiffed : but Manmert thinks it the same is shortly afterwarls bare the name of Pa-
 kolds it to be the satue :s ls or 1/amesupulis (the present IFit).

## P.

## PACATIANA. [PHKYG1.]

I'ACIINABIC'NIS ( Пaxpauouvis, or ПaxpevMouvis, Ptol. 1v. 5. § 50 ; Пахขєнúns, Hicrocles. p. 724). the !pian pal town of tie Schentiytic nome in tho Aegyphion 1) Ata, lat. $31^{\circ} 6^{\prime} \mathrm{N}$. It stome on the eastera shane of the Lahe Butos, and sery near the umbern villare of Hantahar: (Champollion, [E:oppte val, ii. P. 206.): [W, 13. D.]

YAC11Y'N1: חáxuvos: (iqo Passuro), a aclebrated prombtoly of Soys, forminy the extreme Sl: print of the whole ishan i . and on of the three promantories which were sulpuad to have given to it the name of 'Trinamia, (O)vid, Finst, iv, 479, Met.

Pol. i. 42 ; Strab, vi. pp. 265,272, \&e., Plin, iii. 8. s. 14 ; Ptol. iii. 4. §8; Mela, ii. 7. § 15.)

All the ancient geagraphers correctly describe it as extending out towards the S. and E. so as to bo the point of Sicily that was the most vearly opposite to Crete and the Peloponnese. It is at the same time the sotthernmost point of the whole island. The headland itself is not lofty, but formed by bold projecting rocks (projectas suxa Puchyni, Virg. Aen. iii. 699), anl immediately off it lies a small rocky island of considerable elevation, which appears to have been geuerally regarded as forming the actual promontory. This explains the expression of Nomnts, who speaks of " the island rock of the seagirt lachynus." (Dionys. xiii. 322.) Lycophron also has a similar phrase. (Alex. 1181.)

We learn from Cicero (Verr. v. 34) that there was a port in the immediate neighbourhood of the promontory to which he gives the vame of Portus Fachynis it was here that the fleet of Verres was stationed under his officer Cleomenes, when the news that a squadron of pirates was in the neighbouring Port of Ulysses (Portus Odysseae) caused that commander to take to flight with precipitation. The Port of Ulysses is otherwise unknown; but Ptolemy gives the name of Promontory of Lilysses ('O $\bar{v} \sigma \sigma$ eia Kikpa, Ptol. iii. 4. § 7) to a point on the $S$. coast of the island, a little to the W. of Cape Pachynas. It is therefore probable that the I'ortus Pachyni was the one now called Porto di Palo, immediately adjoining the promontory, while the Portus Odysseas may be identified with the small bay or harbour of $L a$ Marze about 6 miles distant. There are, however, several rocky coves to which the name of ports may be applied, and the determination must therefore be in great measure eonjectural. (Smyth's Sicily, pp. 181,185,186.) The conventience of this port at the extreme SE. point of the inland caused it to be a frequent place of rendezrous and station for fleets approaching Sicily; and on one occasion, during the Second Punic War the Carthaginian commander Bomilcur appears to have taken up his post in the port to the W. of the promontory, while the Roman fleet lay immediately to the N. of it. (Liv. xxiv. 27, xxv. 27, xxxvi. 2.)
[E. H. B.].
PACTO'LUS (Пaкт $\omega$ 人 6 ) , a small river of Lydia, which flows down from Alount Tmolos in a northern direction, and, after passing on the west of Sadis, empties itself into the Hermus. (11erod. v. 101; Xenoph. (grop. vi. 2. § 1, vii. 3. § 4, Ages i. 30; Strab. xii. pp. 554, 521 , xiii. p. 625, foll.; Ptol. v. 2. $\leqslant$; Plin. v. 30.) In ancient times the Pactolus had carried in its mad, it is said, a great quantity of small | articles of gold-dust, which were carefully collected, and were believed to have been the source of the immense wealth pussessed by Croesus and his ancestors; but in Strabo's time "old-dust was no longer found in it. The gold of this river, which was hence called Chrysorrhoas, is often spoken of by the ppets. (Koph. Phit. 392 ; Dionys. Jerieg. 831 ; IIom, Itymn. in IVI. 249 ; Virg. Acr. x. 142 ; Horat. Epod. xv. 20; Os: Met, xi. 85, \&e.: Nellec. Phoen. 604; Juvent. xiv. 298 ; Silius $1 \mathrm{t}, \mathrm{i} .158$.) The hitte strean, which is oniy 10 feet in breadth and scarcely 1 towt deep, still carries along with it a quantity of a reddish mui, and is now called Sarabat. [L. S.]

PACTXE (Пaктín, Herol. vi. 36 ; Stal. vii. p. 33:31), a towa of the Thracian Chersmese, on the coast of the Propuntis, 36 stadia from Cardia, whither Alcibiades retirel after the Athenians liad foe the socumb hue slopryed him of the command.
(Diod. xxii. 74 ; Nepos, Alc. 7 ; cf. Plin. iv. 18 ; Scyl. p. 28.) Perhaps St. George. [T. H. D.]

PACTYICE (Пактйıки́), a district of NorthWestern India, which, there is every reason to suppose, must have been nearly the same as the nodern Kashmir, but probably estended west ward across the Indus. It is mentioned by Herodotus with that amount of uncertainty which attaches to almost all that be relates of the far East. Thus in the catalogue of the produce of the different satrapies of the Persian empire, Pactyice is reckoned after Bactriana, and is connected with the Armenians, which gives it an extent too far to the W. (iii. 93). Again, in his account of the army of Xerses, Herodotus mentions the Pactyes in connexion with the Sagartii, and places them under the command of a Persian (vii. 67). And in the subsequeat description of the former people, be states that their dress is the same as that of the Pactyes (vii. 8.5). Evidently, therefore, he here imagines the country and the people to have occupied a district to the N. and NE. of Persia. Again, Herodotus states (iii. 102) that the bravest of the Iodian tribes are those who are in the immediate neiglibourbood of the city of Caspatyrus and Pactyice; and he counects the same two places together where lie states (iv. c. 44) that the celebrated voyage of Scylax of Carynnda, which was promoted by Dareius, the son of Hystaspes, commenced from the same localities. Now we know that Hecataens (ap. Steph. B. s. r.) placed Caspatyrus in the country of the Gandarii (Fragm. p. 94, ed. Klansen): bence the strong inference that Pactyice was part of Gandarica, if not, as Larcher has supposed, actually the same.

PACYRIS. [Carctsa]
PADAEI. [lndia, p. 50, b.]
PADARGUS ( $\Pi$ ádoap yos, Arriaa, Indic. c. 39), a small stream of Persis, which appears to have flowed into the Persian Gulf near the preseat Abushir. It is not possible to identify this and some other names mentioned by Arrian from the Jonrnals of Nearchus, owing to the physical changes which have taken place in the coast-line.

PADINUM, a town of Gallia Cispadana, known only from Pliny, who mentions the Padinates among the monicipia of that region (Plin. iii. 15. s. 20). But he affords us no clue to its position. Cluver would identify it with Bondino, between Ferrara and Mirandola, but this is a mere conjecture. (Unver, Ital. p. 282.)
[E. H. B.]
PADUS ( $\Pi \dot{\delta} \delta o s: ~ P o$ ), the principal river of Northern ltaly, and much the largest river in Italy altogether. Hence Virgil calls it " fluviorum rex" (Georg. i. 481), and Strabo even erroneously terms it the greatest river in Europe after the Danube. (Strab, iv. p. 204.) It has its sources in the Monte $V$ iso, or Mons Vesulas, one of the highest summits of the Western Alps (Plin. iii. I6. s. 20 ; Mel. ii. 4. § 4). and from thence to the Adriatic has a course of above 400 miles. Pliny estimates it at 300 loman miles without including the windings, which add abont 88 more. (Plin. iii. 16. s. 20.) Both statements are beneath the trutb. According to nodern authorities its course, including its windings, is calculated at 380 ltalian, or 475 Roman miles. (Ranpoldi, Diz. Topogr. d' Italia, vol. iii. p. 284.) After a very short course through a mountain valley it descends into the plain a few miles from Saluzzo, and from thence fluws without interruption through a plain or hroad level valley all the way to the sea. Its course from Saluzzo, as far as Chi-
rasso (through the district of the ancient Vagienni and Taurini), is nearly NE ; but after rounding the hills of the Monferrat, it turns due E., and pursues this course with but little variation the whole way to the Adriatic. The great plain or valley of the $P o$ is in fact one of the most iraportant physical features of Italy. Bounded on the N. by tbe Alps, and on the S. by the Apennines, both of which ranges have in this part of their course a general direction from W. to E., it forms a gigantic trough-like basin, which receives the whole of the waters that flow from the southern slopes of the Alps and the northern ones of the Apennines. Hence, as Pliny justly observes (l.c.), there is hardly any other river whick, within the same space, receives so many and such important tributaries. Those from the nortb, on its left bank, are the most considerable, being fed by the perpetual snows of the Alps; and many of these form extensive lakes at the points where they first reach the plain; after quitting which they are decp and navigable rivers, thougl in some cases still very rapid. Pliny states that the Padus receives in all thirty tributary rivers, but it is difficult to know which he reckons as such; he himself enumerates only sereateen; but this number can be increased almost indefinitely, if we iaclude smaller streams. The principal tributaries will be here enumerated in order, beginning from the source, and proceeding along the left bank. They are: 1. the Clusius (Chiusone), not, noticed by Pliny, but the naroe of which is fonnd in the Tabula; 2. the Duris, commonly called Duria Minor, or Dora Riparia; 3. the Stura (Stura); 4. the Orgus (Orco) ; 5. the Duria Major, or Bantica (Dora Baltea), one of the greatest of all the tributaries of the Padus ; 6. the Sesites (Sesia) : 7. the Ticinus (Ticino), flowing from the Lacns Verbanus (Lago Ilaggiore); 8. the Lamber or Limbrets (Lambro), a much less considerable stream, and which does not rise in the ligh Alps; 9. the AdDUa (Adda), flowing from the Lacus Larius or Lago di Como; 10. the Ollius (Oglio), which flows from the Lacus Sebinus (Lago $d^{\prime}$ Iseo), and brings with it the tributary waters of the Mela (Mella) and Clusins (Chiese); 11. the Mivelus (Mincio), flowing from the Lago di Garda, or Lacoss Benacus. Below this the Po cannot be said to receive any regular tributary ; for though it commonicates at more than one point with the Tartaro and A dige (Athesis), the channels are all artiticial, and the balk of the waters of the Adige are carried out to the sea hy their own separate channel. [Athesss.]

On the snuthern or right bank of the Padus its principal tributaries are: 1, the Tavares (Tanaro), a large river, which has itself received the important tributary streams of the Stura and Bormida, so that it brings with it almost all the waters of the Maritime Alps and adjoining tract of the Ligurian Apennioes : 2. the Scrivia, a considerable stream, hut the ancient name of which is unknown; 3. the Trenil (Trebbia), flowing by Placentia; 4. the Tarus (Taro); 5. the Nicia (Enza): 6. the Gabellus of Pliny, called also Secia (Secchiu); 7. the Scultenva, now called the Panaro; 8. the Puevus (Reno), flowing near Bulugna. To these may be added sereral smaller streams, viz,: the ldex (Idice), Silarus (Silluro), Vatrenus (Plin., now Santervo), and Simns (Simno), all of which discharge themselves iato the sonthern arm of the Po, now called the Po di Primaro, and anciently known as the Spincticun Ostimm, below the point
where it separates from the main stream. Severa smaller tributaries of the river in the lighest part of its course are noticed in the Tabula or by the Geographer of Ravenua, which are not mentioned by any ancient suthor; but their names are for the most pirt corrupt and uncertain.

Though flowing for the most part through a great plain, the Palus thus derives the great mass of its waters directly from two great mountain rames, and the consequence is that it is always a stronge, rapil. and turnid strom, shd has been in all ages sulact to violent immbations. (Virg. Georg. i. 481 ; Ilin. l.c.) The whole smil of the lower valley of the $P$ o is indeed a pure alluvial dejusit, and may be considered, like the valley of the Miswissippi or the Delta of the Nile, as formed by the eradual acemmulation of mud, and, and gravel, brought down by the river itsclt and its tributary streams. Dut this process was for the most part long anterior to the historical period; and there can be no doubt that this portion of laly bad already acquired very minch its present character and configuration as early as the, time of the first Etruscan settlements. The valley of the Padus, as well as the river itself, are well described by Polybius (the earliest extant anthor in whom the Homan name of Padus is found), as well as at a later peried by Strabo and Pliny, (Pol. ii. 16 ; Strab. iv. 11. 203, 204, v. p. 212 ; Plin. iii. 16. s. 20.) Considerable changes have, however, taken place in the lower part of its course, near the Adriatic sea. Here the river forms a kind of great delta, analogous in many respects to that of the Nile; and the phenomonon is complicated, as in that case, by the existence of great lagunes bordering the coast of the Adriatic, which are bounded by nalrow strips or bars of sand, acparating them from the sea, though leaving open occasional cbannels of communieation, so that the lagunes are alvars salt and affected by the tides, which are more sensible in this part of the Adriatic than in the Mediterranean. (Strab. v. p. 212.) These hagorus, which are well dencribed by Strabo, extended in his time from Riavenna to Altinum, beth of whech cities stood in the lagunes or marshes, and were luilt on piles, in the same manner as the modern Penice. But the whole of these conld not be fairly considerem as belonging to the Delta of the Padus; the more northerly being formed at the mouths of other rivers, the Athesis, Meluach-, \&c., which lind no direct or matural conmunication with the great river. They all, however, communicated with the I'adus, and with one another, by chanmels or canals more or less artificial: and as this was already the case in the time of Pliny, that nuthor distinctly reckons the mouths of the Padus to extend from Lavema to Altimun. (Plin. l.c.) From the earliest perinit that this tract was orenpied by a settled people, the necrosity must have been felt of embank. ing the varions arnis and channels of the river, for protection ataimst inuudation, as well ats of constructing arlifelat cuts and channels, berth for car1 ying oft its supe ilhous waters and for prorposes of commonication. The earlient works of the kind are ancribed to the Etruscans (Plis, l.c.), and from that tinue to the present day, they have been carried of with oceasional interruptions. But in addition to these artificial clanges, the river has from time to time burst its hanks and forced for itself new channels, or diverted the mass of its waters into those which were previously mimportant. The most remarkable of these changes which is recorded with certainty, touk place ind152, when the min strean
of the Po, which then flowed S. of Ferrara, suddenly changed its course, and has ever since flowed about 3 miles N. of that city. Hence it is probable that all the principal modern mouths of the $I$ 'o, from the Po di Goro to the Po di Levante, were in ancient times conparatively inconsiderabic.

Polybius (ii. 16) descrihes the Padus as having only two principal months, which separated at it phace called Trigaboli (the sitc of which cannut be determined); the one of these is called by him Padna (חaōóa), and the other, which was the principal chaunel, and the one commonly narigated, he calls Olama or IIslana ("OXaya). This list is in all proLatrility the channel still called I'o di Jolano, which until the great inundation of 1152 above noticed, was still the principal mouth of the I'o. The other is probably the soutbernmost branch of the river, which separates from the preceding at Ferrara, and is carried at the present day by a whelly artificial clannel into the sen at Primaro, from whence it derives the name of Po di Primaro. Its present mouth is about 15 miles N. of Ravenna; but it seems that in the days of Pliny, and probably in those of Polybius also, it discharged itself into the lagunes which then surrounded Ravenna on all sides. Pliny terms it Padusa, but gives it also the name of Fossa Augusta, from its course laving been artificially regulated, and perhaps altered, by that emperor. ( 1 lin. iii. 16. s. 20.) The same author gives us a detailed enumeration of the munths of the l'adus as they existed in his day, but from the causes of change already ndverted to, it is very difficult, it not impassible, to identify them with certainty.

Tbey were, according to him: 1. the Padusa, or Fossa Augusta, which (he alds) was previously called Messinicus: this has now wholly ceased to exist. 2. The Portcs Viteeni, evidently deriving its name from being the moutb of the river Vatrenus, which flowed frem Forum Cornelii, just as the Po di Primaro is at the present day called the mouth of the Reno. This was also known as the Spineticum Ostium, from the once celebrated city of Spina, wlich was situated on its banks [SpINA]. It was probably the same with the modern Po di I'rimaro. 3. Ostium Caprasiae. 4. Sagis. 5. Vilane, previously called Olane: this is evidently tho Olana of Polybius, and the madern Po di Iolano; the two preceding cannot be islentified, but must have been openings communicating with the great lagunes of Conacchio. 6. The Carbonaria, perhaps the Podi Goro. 7. The Fussio Philistina, which seems to have been an artificial canal, conveying the waters of the Takranus, still called Tartaro, to the sea. This cannot be identified, the changes of the mouths of the river in this part being too considerable. The whele of the present delta, formed by the actual mouths of the Po (from the Po di Goro to the Po di Levante), must have been formed since the grat change of 1152 ; its progress for some centuries back can be accurately traced ; and we know that it has advancel not less than 9 miles in little more than two centuries and a lalf, and at least 15 miles sioce the $12 \mathrm{~h}_{\mathrm{h}}$ century. Beyond this the dilta belongs rather to the A dige, and nere northern streams than to the $P{ }^{\prime} 0$; the next mouth being that of the main stream of the Adige itself, and just beyond it the P'orto di Brondolo (the Brundulus Portus of Pliny), which at the present day is the mouth of the Brenta.*

* Much curious inforgnation concerning the delta of

The changes which bave taken place on this line of coast are due not only to the pushing forward of the coast－line at the actual mouths of the rivers，but to the filling up of the lagunes．These in ancient times extended beyond Ravemata on the S ；but that city is now surrounded on all sides by dry land，and the lagunes only begin to the N．of the Po di Pri－ maro．Here the lagones of Comacchio extend over a space of abore 20 miles in length，as far as the mouth of the Po di lolane；but from that point to the fort of Brondolo，where the Venetian lagunes begin，though the whole country is very low and marshy，it is no longer covered with water，as it obviotsly wns at no distant period．It is now； therefore，impossible to deternine what were the particular lagnnes designated by Pliny as the Sep－ tem Marla，and indeed the passage in which be alludes to them is not very clear；but as he calls them Atrianorum Paludes，they would seem to have heen in the neighbourhood of Adria，and may pro－ bably have been the extensive lagunes（now con－ veited into marsbes） s ．of Ariano．At a later period the name seems to have been differently used． The ltinerary speaks of the navigation＂per Septem Maria［a Ravenoa］Altinum usque，＂so that the name seems here to be applied to the whole extent of the la－ gunes ；and it is employed in the same sense by He－ rodian（viii．7）；while the Tabala，on the contrary，gives the name to a particular point or station on the line of route from Ravenna to Altinum．This line，which is giren in much detail，must have been by water， though not so specified，as there never could have been a road along the line in question；but it is im－ passible to identify with any certainty the stations or paints named．（Itin．Ant．p．126；Tab．Peut．） ［Tenetia．］

Polybins speaks of the Padus as navigable for a distance of 2000 stadia，or 250 Roman miles from the sea．（Pol．ii．16．）Strabo notices it as navi－ gable from Placentia downwards to Ravenna，with－ out saying that it was not practicable higher up： and Pliny correctly describes it as beginning to be navigable from Augusta Taurinorum（ $T_{\text {urin }}$ ），more tban I20 miles above Placentia．（Strab．v．p．217； Plin．iii．17．s．21．）Ancient writers already re－ marked tliat the stream of the Padus was fuller and more abundant in summer than in wister or spring， owing to its being fed in great part by the melting of the snows in the high Alps．（Pol．ii． 16 ；Plin．iii． 16．s．20．）It is not till after it has received the waters of the Duria Major or Dora Baltea，a stream at least as considerable as itsclf，that the $P_{0}$ becomes a really great river．Hence．it is about this point（as Pliny observes）that it first attains to a considerable depth．But at the present day it is not practicable for vessels of any considerable burden above Casale， about 25 miles lower down．

The origin of the name of Padns is uncertain． According to Metrodorus of Scepsis（cited by Pliny， l．c．）．it was a Celtic name，derived from the number of pine－trees which grew around its sources．The etymology seems very doubtful；but the fact that the name was of Celtic origin is rendered prolable by the circumstance that，according both to Polybius and Iliny，the name given it by the Ligurians（the most ancient inhabitants of its banks）was Bodincus
the $P_{0}$ ，and the changes which this part of the coast has undergone will be found in a lute appended to Cuvier＇s Discours sur les Révolutions de lo Surfóce du Globe，p．75，4to．edit．，Paris， 1825.
or Budencus（Bóderkos，Pol．ii．16；Plin．iii． 16. s．20），a name said to be derived from its great depth．It is well known that it was early identified by the Greeks with the mythical Emidaxes，and was commonly called by them，as well as by the Latin puets，hy that name，even at a late period， The origin and history of this name have been already given in the article Eridanes．It may be added， that the poplar trees which figure in the fable of Phaëton（in its later form）evidently refer to the tall and graceful trees，still commonly known as Lom－ hardy poplars，from their growing in abundance on the banks of the Po．
［E．H．B．］
PADUSA．［Padis．］
PADYANDUS（Haóvavóús），a town in Cataonia， or the southermonost part of Capprdocia，ahout 25 miles to the south－east of Faustinopolis，near the pass of Moant Taurus known by the name of the Cilician Gates．（P＇tol．v．7．§ 7．）The town，which was extended by the einperor Valens，is mentioned in the Itineraries，but its name assumes different forms ；as，Paduandus（Tab．Peut．），Podandos（It． Ant．p．145），Mansio Opodanda（It．Hieros．p．558）， and Thegepodandos（Hierocl，p 699）．The place is described by Basilius（Epist．74）as one of the most wretched holes on earth，It is said to bave derived its name from a small stream in the neighbourhood． （Const．Porphyr．Jit．Basil． 36 ；comp．Cedren．p． 575 ：Jo．Scylitz．Hist．pp．829，844．）The place is still called Podend．
［L．S．］
PAEA＇N1A．［Atrica，p．332，b．］
PAEANILM（חaıdvov），a town in Aetolia， near the Achelous，a little S．of Ithoria，and N．of Oeniadae，which was on the other side of the river． It was only 7 stadia in circumference，and was destroyed by Philip，в．c．219．（Polyb．iv．65．） Paeanium was perhaps rebuilt，and may be the same town as Phana（\＄áva），which was taken by the Achaeans，and which we learn from the narrative in Pausanias was near the sea．（Paus．x．18．） Stephanus mentions Plana as a town of ltaly ；but for Mó ${ }^{\prime}$ ss ${ }^{\text {I }}$ Ita入ias，we ouglot probably to read Пó入ts Airm入ías．（Sreph．B s．v．фávat．）

PAELO＇NTLLM（Пaı入óvtıov，Ptol．ii．6．§ 33）， a town of the Lungones in Asturia，variously identi－ fied with Aplaus，Pula de Lena，and Concejo de Pilonna．
［T．H．D．］
PAEMANI，mentioned in Cacsar（B．G．ii．4） with the Condrusi，Eburones，and Caervesi，and the four penples are included in the name of Germani． D＇Anville conjectures that they were near the Cun－ drusi，who probably held the country which is now called Condroz．［Cosdress．］The Paemani may have occupied the country called Pays de Fam－ menne，of which Durburg，Laroche on the Ourthe， and Rochefort on the Homme are the chief towns．
［G．L．］
PAEON（Пaıóv，Scyl．p．28），a town of Thrace， mentioned only by Scylax．
［T．H．D．］
PAE＇ONLS（חaioves，Hom．Il．845，xvi．287， xvii． $348, ~ x x i .139$ ；Herod．iv．33，49，v．1，13，98， rii． 113,185 ；Thuc．ii． 96 ；Strab．i．pp． 6,28 ，vii． pp．316，318，323，329，330．331 ；Arrian，Anub．ii． 9．§ 2，iii．12．§ 4 ：Plut．Alex．39；Polyaen．Strat． iv．12．§ 3 ；Eustath．ad Hom．Il．xvi． 287 ；Liv，slii． 51），a people divided into sereral tribes，who，before the Argolic colonisation of Emathia，appear to have occupied the entire country afterwards called Mace－ donia，with the exception of that portion of it which was considered a part of Thrace．As the Macedo－ nian kingdom increased，the district called Pakosia
(חasovia, Thric. ii. 99 ; Polyb. r. 97 , xxiv. 8 ; Strab. vii. jp. 313, 318, 329, 331 ; Ptol. iii. 13. § 28; Lir, xxxiii, 19, xxxviii. 17, xxxix, 54, x1, 3, xlv. 29; Plin. iv. 17, vi. 39) was curtailed of its dimensions, on every side, though the name still continued to be applied in a general sense to the great belt of interior country which covered Upper nod Lower Macedonia to the N. and NE., and a portion of which was a monarely nominally independent of Macedonia uatil fifty years after the death of Alesander the fireat. The bank of the "wide-flowing Axius" seem to have been the centre of the Paeonian power from the time when Prrachines and Asteropacus led the Paconians to the assistance of Priam (Hom. ll. ce.), down to the latest existence of the umardy. They appear neither as Macedonians. Thracians, or Illyrians, but professed to be descended from the Teucri of Troy. When Megabazus crossed the river Strymon, he conquered the Paronians, of whom two tribes, called the Siropaeones and I'ueoplac, were deported into Asia by express noler of Dareins, whose fancy had been struck at Sirdis by seeing a beauliful and shapely Paeonian woman carrying a vessel on her head, leading a horse to water, and spirning flax, all at the same time, (H-rod. v. 12-16.) Tliese tro tribes were Whe Preomians of the lower districts, and their country was afterwards taken possession of by the Thacifans. When the Temenidae had acquired Emathia, Almopia, Crestonia, and Mygdonia, the Jkinrs of Paeonia still cuntinued to rule over the country keyond the straits of the Axius, until Philip, snn of Anyntas, twice reduced them to terms, when weakened by the recent death of their king Agis; and they were at length subdued by Alexander (Diodor. xis. 2, 4. 22, xwii. 8); after which they were prob.bly subminsive to the M.wedonian sovereigns. An inveribed marble which hats been discovered in the acropolis of Athens recorls an interchange of good offives between the Athenians and Audoleon, king of Paennia, in the archonship of Diotimns, B. C. 354 , or a few years after the accession of Philip and Auduleon to their respective thrunes. The coins of Audoleon, whin reigned at that time, and adopted, after the thi" death of Alexander, the common types of that prince and his suceessors, - the head of Alexander in the chrracter of young Heracles, and on the obwerse the tizure of Zeus Abtophorns, - prove the ciwheatuon of Preonia under its kngs. Afterwards kings of Paennia are not leard of, so that their imjortance must have been ouly transitory ; but it is certain that durinz the troublous times of Macedonia, that is, in the regra of Cassander, the principality of the Patemians existed, and afterwards disappeared. At the Roman conquest the Iacontans on the W . of the Axius were inclulenl in Macedonia Secunda. Prumia extenled to the Dentheletae and Macdi of Thrace, and to the Dardani, Pencstae, and Dassaretii of Hyria, comprehen ling the various tribes who ocempied the upper valleys of the Erigom, Axins, Strymon and Aumtas as far S. as the fortile plain of suris. Its froipal tribes to the E. were the Olomanti, Acstraei, and Agrianes, parts of whose conntry were kwom by the names of Parstrymonia and Parorcola, the former containing probably the s alloss of the V1per Strgunn, and of its great tributary the river of strimitate, the latter the adjacent 20. illitains. On the W. Frotiter of Paeonia its sub(Nasiuns Lordering on the l'enestae and Dassaretii wwo. De ir pus and Pelagonia, which with Lyn1 oth comprelended fing ontive country witeged by
the Erigon and its branches. (Leake, Northern Greece, vol. iii. Pp. 212, 306, 462, 470.) [E. B. J.] PAEO'NIA. [PAEONEs.] PAEONIDAE. [ATTICA, p. 326, a.] PAEOPLAE. [PAEONEs.] PAESICI. [Astunes, p. 249.]
PAESTANUS SINUS. [PaEsTLM.]
PAESTUM ( Пaíarov, Ptol.; Пaıorós, Strab.: Eth. Пaıбтavós, Paestanus: Ruins at Pesto), a city of Lucania, on the Tyrrhenian sea, about 5 miles S . of the mouth of the Silarus, It was originally a Greek coiony, named Postbosia ( $\Pi$ oceiowvia: Eth. ח Sybaris, on the opposite coast of Lucania. (Strab, r. p. 251 ; Scymm. Ch. 245 ; Scy]. p. 3. § 12.) The date of its foundation is uncertain, but it may probably be referred to the period of the chief prosperity of Sybaris, when that city ruled over the whole of Lucania, from one sea to the other, or from 650 to 510 b.c. [Sybaris.] It may be observed, also, that Sulinus calls Posidonia a Doric colony; and though his anthority is worth little in itself, it is confirmed by the occurrence of Doric forms on coins of the city; bence it seems probable that the Doric settlers from Troezen, who formed part of the original colony of Sybaris, but were subsequently expelled by the Achaeans (Arist. Pol. v. 3), may hare mainly contributed to the establishment of the new colony. According to Strabo it was originally founded close to the sea, but was subsequently removed furtber inland (Strab. l.c.) ; the cbange, however, was not considerable, as the still existing ruins of the ancient city are little more than half a mile from the casst.

We know scarcely anything of the early history of Posidonia. It is incidentally mentioned by Herodotus (i. 167) in a manner that proves it ta bave been already in existence, aod apparently as a considerable town, at the period of the foundation of the neighbouring Velia, about b.c. 540 . But this is the only notice of Posidonia until after the fall of its parent city of Sybaris, B. C. 510 . It has beeo supposed by some modern writers that it receired a great accession to its population at that period; but Herodotus, who notices the Sybarites as settling on that occasion at Laijs and Scidras, does not allude to Posidonia. (Herod. vi. 21.) There are, indeed, few among the cilies of Magna Graecia of which we hear less in history; and the only evidence of the flourishing condition aml prosperity of Posidonia, is to be found in the mumbers of its coins and in the splendid architectural remains, so well known as the temples of Paestum. From its aortherly position, it must have been one of the first cities that suffered from the advancing power of the Lucanians, as it was certainly one of the first Greek colonies that fell into the hands of that people. (Strab. v. p. 251.) The date of this event is very uncertain; but it is probable that it unust have takien place before B.c. 390 , when the city of Laits was besiezed by the Lucanians, and had apparently become the bulwark of Magna Graecia on that side. [Magisi firiecta.] We learn from a carious passace of Aristosenus (ap. Athen. siv. p. 632) that the Greek inlabitants were not expelled, but compelled to subanit to the authority of the Lucanians, and receive a barbarian colony sithin their walls. They still retained many of their customs, and for ages afterwards continued to assemble at a certain festival every year with the express purpuse of hewailing their captivity, and reviring thectraditions of their prosperity. It would appar
frum Livy (viii. 17), though the pussage is not quite distinct, that it was recovered by Alexander, king of Epirus, as late as в. c. 330 ; but if so, it certainly soon fell again into the bands of the harbarians.

Posidonia passed with the rest of Lucania into the hands of the Romans. We find no mention of it on this occasion; but in e. C. 273 , immediately atter the departure of Pyrrhus from Italy, the Romans established a colony there for the security of their newly acquired territory on tbis side. (Liv. Epit. xiv.; Vell. Pat, i. 14; Strab. v. p. 251.) It was probably at this period that the name was changed, or corrupted, into Paestum, though the change may have already taken place at the time when the city fell into the hands of the Lucanians. But, from the time that it became a Roman colony, the name of Paestum seems to have exclusively prevailed; and even its coins, which are inscribed with Greek characters, have the legend MAII and maistano. (Eckhel, vol. i. p. 158.) We hear but little of Paestum as a Roman colony: it was one of the Coluniae Latinae, and distinguisbed itself by its unshaken fidelity throughout the Second Punic War. Tbus the Paestani are meationed as seading golden paterae as a present to the Roman senate just before the battle of Cannae (Liv. xxii. 36). Again in n. c. 210 they furnished ships to the sqaadron with which D. Quintius repaired to the siege of Tarentum; and the following year they were among the eighteen colonies which still professed their readiness to furnish supplies and recruits to the Roman armies, notwithstanding the long-continued pressure of the war (Liv, xxyi. 39, xxvii. 10.) Paestum was therefore at this period still a flourishing and considerable town, but we hear little more of it during the Roman Republic. It is incidentally mentioned by Ciceru in one of his letters (Ep, ad A(u. xi. 17); and is noticed by all the geographers as a still subsisting municipal town. Strabo, however, observes that it was rendered unhealthy by the stagnation of a small river which flowed beneath its walls (v. p. 251); and it was probably, therefore, already a declining place. But it was still one of the eight Praefecturac of Lucania at a considerably later period ; and inscriptions attest its continued existence throughont the Roman Empire. (Strab. L. c.; Plin. iii. 5. s. 10 ; Ptol. iii. 1. § 8 ; Lib. Colon. p. 209; Orell. Inscr. 135, 2492, 3078; Bull. d. Inst. Arch. 1836, p. 152.) In some of these it bears the title of a Colonia; but it is uncertain at what period it attained that rank: it certainly cannot refer to the original Latin colony, as that must have become merged in the municipal condition by the effect of the Lex Jolia. We learn from ecclesiastical authorities that it became a bishopric at least as early as the fifth century; and it is probable that its final decay and desolation was owing to the ravages of the Saracens in the tenth century. At that time the episcopal see was removed to the neighburing town of Capaccio, in an elevated situation a few miles imland.

Paestum was chiefly celehrated in ancient times for its ruses, which possessed the peculiarity of finwering twice a year, and were considered as surpassing all others in fragranec. (Virg. Georg. iv. t18; Ovid, Met. xv. 708; Propert. iv. 5. 59 ; Martial, iv. 41. 10, vi. 80. 6 ; Auson. Idyll. 14. 11.) The roses that still grow wild among the ruins are zaid to retain their ancient property, and flower regularly both in May and November.
vol. 1.

The site of l'aestum appears to have continued wholly uninhahited from the time when tbe episcopal see was removed till within a very recent period. It was not till the middle of the last century that attention was drawn to the ruins which are now so celebrated. Though they can hardly be said to have been then first discorered, as tbey must always have been a conspicuous object from the Bay of Salerno, and could not but have been known in their immediate neighbourlood, they were certainly unknown to the rest of Europe. Even the diligent Cluverius, writing in 1624 , notices the fact that there were ruins which bore the name of Pesto, without any allusion to their cbaracter and importance. (Cliver. Ital. p. 1255.) They seem to have been first visited by a certain Count Gazola, in the service of Charles VII., King of Naples, before the middle of the last century, and were descriled by Antonini, in his work on the topography of Lucania (Naples, 1745), and noticed by Mazzocchi, who has inserted a dissertation on the listory of Paestum in his work on the Heraclean Tables (pp. 499-515) published in 1754. Before the end of the century they became the subject of the special works of Magnoni and Paoli, and were visited by travellers from all parts of Europe. Among these, Swinburne in $17: 9$, has left a very accurate description of the rains; and their architectural details are given by Wilkins in his Magna Graecia (fol. Cambr. 1807).

The principal ruins consist of the walls, and three temples standing within the space eaclosed by them. The whole circuit of the walls can be clearly made out, and they are in many places standing to a considerable height ; several of the towers also remain at the angles, and vestiges of the ancient gates, which were four is number; one of these, on the E . side of the town, is nearly perfect, and surmounted by a regularly constructed arch. The whole circuit of the walls forms an irregular polygon, about 3 miles in circumference. The two principal temples stand not far from the southerngate of the city. The finest and most ancient of these is commonly known as the temple of Neptune; but there is no autbority for the name, heyond the fact that Neptune, or Poseidon, was onquestionably the tutelary deity of the city which derived from bim its ancient name of Posidonia. Tbe temple was hypaethral, or had its cella open to the sky, and is 195 feet long by 79 wide: it is remarkably perfect; not a single column is wanting, and the entablature and pediments are almost entire. The style of architecture is Doric, but its proportions are beavier, and the style altogether more massive and solid than any other extant edifice of the kind. On this account some of the earlier antiquarians disputed the fact of its Greek origin, and ascribed it to the Pboenicians or Etruscans : but there is not a shadow of foundation for this; we bave no trace of any settlement on the spot before the Greek colony; and the architecture is of pure Greek style, though probably one of the mast ancient specimens of the Doric order now remaining. About 100 yards from the temple of Neptune, and nearer to the south gate, is the second edifice, which on account of some peculiarities in its plan has been called a Basilica, but is unqnestionably also a temple. It is of the kind called psendo-dipteral; but differs from every other ancient building known in having nine columns at eacb end, while the interior is divided into two parts by a single range of columns running along the centre of the building. It was probably a temple consecrated to two different divinities, or rather, is
fact，two temples united in one．It has 18 co－ lunms in earh side，and is 180 fiet long by 80 in width．The third temple，which is at some distance from the other two，nearer to the N．gate of the town，and is commonly known as the Temple of Ceres or Vesta（though there is no reason for either mume），is much smaller than the other two，being only 108 feet in length by 48 in breadth：it presents no renarkable architectmal peculiarities，but is，as well as the so－called Basiliea，of much later date than the great temple．Mr．Wilkins，indeed，would issign them botls to the Roman period：but it is dif－ ficult to reconcile this with the history of the city， which never appears to have been a place of much importance under the Koman rule．（Swinburne＇s Trarels，vol．ii．pp．131－138；Wilkins＇s Magna Gracia，pp．55－67．）
The other remains are of littie importance．The restiges of an amphitheatre exist near the centre of the city；and not far from them are the fallen ruins of a fourth temple，of small size and clearly of Roman date．Excavations have also laid bare the foundations of many houses and other build－ ings，and the traces of a portico，which appear to indicate the site of the ancient forum．The remains of an aqueduct are also visible outside the walls； and numerous tombs（some of which are said to be of much interest）bave becn recently brought to light．

PIAN OF PAESTUM．
A．Temple of Neptune．
B．Temple，commonly called Basitica．
C．Smaller temple，of Vesta（\％）．
D．Amphithestre
F．Other ruins if Roman time．
${ }^{1}$ F．F．Gates nit the crty．
（i．River Salso．
The small river which（as alneady noticed by Strabo），by stagnatiosg under the walls of Paestum， romdered its sination so unhealliy，is now called the Sulso ：its mancient mame is not mentioned．It forms extensive drperits of a calcareous stone，resembling the lioman travertio，which forms an excellent buildines material，with which both the walls and edilices of the city have bees constrncted．The ma－ lavis，whith cansed the site to be wholly abamoned during the middle ares，has already semsibly dimi－ nished，since the resort of travellers has again at－ tracted a small pupulation to the spot，and given rise to some cultivation．

About five miles from Prestum，at the mouth of the Silarus or Selc，stood，in ancient times，a eele－ lorated temple of Junn，which，accorling to the tra－ dition alopted buth by Stralo and Pliny，was founded by the Argonauts under Jason（Strab．vi，p． 252 ；

Plin．iii．5．s．10）．It is probable that the worship of the Argive Hera，or Juno，was brought bither hy the Troezenian colonists of Pusidonia．Pliny places the temple on the N．bank of the Silarus ；Strabo， probably more correctly，on the S ．

The extensive gulf which extends from the pro－ montory of Minerva（the Punta della Campanello） to the headland called Posidiun（the Punta di Li－ cusa），and is now known as the Gulf of Salemo， derived its ancient name from the city of Paestum， being ealled by the Romans Paestanus Sixes，and by the Greeks the gulf of Posidonia（Побeto whad． т $\eta$ s ко́入тоs．（Strab．v．p． 251 ；Sinus Paestanus，

［E．H．B．］

COINS OF PAESTUM．
PAESU＇LA（Пatroīえx），a town of the Tardetani in Hispania Baetica．（I＇tol．ii．4．§ 13．）It is identified by Ukert with Salkeras，but its site is uncertain．

PAESUS（Пaraós），an ancient town on the coast of Troas，at the entrance of the Propontis，between Lampsacus and Parium．（Hom．Il．ii．828，v．612； Herod．v．117．）At one period it received colonists from Miletus；but in Strabo＇s time（xiii．p．589）the town was destroyed，aod its iulabitants had trans－ ferred themselves to Lamp－acus，which was likewise a Milesian colony．The town derived its name from the small river Paesus，on which it was sitnated， and now bears the name Beiram－Dere．［L．S．］
pagat．［Pegae．］
PAGALA（ $\tau \dot{\alpha}$ Пajá入a，Arrian，Indic．c．23，）a place on the coast of Gedrosia，to which the fleet of Nearchus came after leaving the river Arabis．It seems probable that it is the same as a place called Segada or Pegala hy Philostratus，and which was also in the country of the Oritae（ 1 it．Apoll．iii． 54）．It cannot he identifed with any existing spot．
［ V.$]$
PAGASAE（Пararal：also Pagasa，gen．－ae，Plin． iv．8．s．15；Mcla，ii．3．§ 6；Piop．i．20．17：Eth． Haraoaios，Pagasaeus：），a town of Magnesia in Thessaly，situated at the northern extremity of the bay named after it．（Паүабךтикдs ко́入лоs，Scylax， p．24；Nrab．ix．p． 438 ；आayaбitns，Dem．Phil Epist．159；I＇agasacus Sinus，Mela，L．c．；Pagasicus， Plin．l．c．）I＇agasae is celebrated in mythology as the port where Jason built the ship Argo，and from which he sailed upon his adventurous voyage：hence some of the ancients derived its naue from the con－ struction of that vessel（from $\pi \dot{r} \boldsymbol{\gamma} v o \mu_{1}$ ），but others from the numerous and abundant springs which were found at this spot．（Strab．ix．p．436．）Payssae was cenquered by Philip after the defeat of Ono－ marchus．（Dem．Ol．i．Pp．11，13；Diod．xvi．31， There fur Ilayai we ought probably to read Пayarai．）

On the foundation of Demetrias in B．c． 290 ，Pagasae was one of the towns，whose inhabitants were trans－ ferred to the new city；but after the Roman conquest Pagasae was restored，and again became an important place．In the time of Strabo it was the port of Pherae，which was the principal city in this part of Thessaly．Pagasae was 90 stadia from Pherae，and 20 from Iokcos．（Strab，l，c．）The ruins of the ancient city are to be scen near Volo，which has given the modern name to the bay．The acropolis occapied the summit of some rocky heights above Cape Angkistri，and at the foot of the rocks are many copious sources of water，of which Strabo speaks．But as these springs are rather saline to the taste，the city was provided in the Roman times with water from a distance by means of an aqneduct， the ruined piers of which are still a conspicuons object．（Leake，Northern Grecee，vol．iv．p．368， seq．）

PAgASAEUS SINUS．［Pagasie．］
PAGRAE（Má $\gamma \rho a$ ），a town of Syria．placed by Ptolemy in the district of Pieria，near the Syrian gates（v．15．§ 12），hut more particularly de－ scribed by Straho，as adjoining Gindarns，the acro－ polis of Cyrrhestice．Pagrae he places in the district of Antiochis，and describes as a strong place near the ascent of the Amanns，on the Syrian side of the pass called Amanides Pylae［Vol．1．p．113］，the Syrian gates of Ptolemy（l．c．）．The plain of Antioch，adds Strabo，lies nnder Pagrae，through which flows the Arceathns，the Orontes，and the Labotas．In this plain is also the dyke of Melea－ ger and the river Omoparas．Above it is the ridge of Trapezae，so called from its resemblance to a table，on which Ventidius engaged Phranicates，ge－ neral of the Parthians．（ $\mathrm{sxi} . \mathrm{p} .751$. ）The place is easily identified in medieval and modern geo－ grapliy by the aid of Abulfeda and Pococke． Baghras，writes the former，has a lofty citadel，with fountains，and valley，and gardens；it is said to be distant 12 miles from Antioch，and as many from Iskanderinn．It is sitnated on a monstain over－ hanging the valley of Charen，which Charem is distant two stages to the east．Baghras is distant lmss than a stage from Darbasak，to the south． （Tabula Syrize，p．120）Pococke is still more par－ ticular in his description．He passed within sight of it between Antioch and Baias．After passing Caramaut，he turned to the west between the hills． ＂We saw also，about 2 miles to the north，the strong castle of Pagras on the hills；this was the ancient name of it in the Itinerary［Antonini］，in which it is placed 16 miles from Alexandria and 25 from Antioch；which latter is a mistake，for the Jerusalem Joarney（calling it Paugrios）puts it more justly 16 miles from Antioch．As 1 have been informed，a river called Sowoda rises in the mountain to the west，runs under this place，$\ldots$ and falls isto the lake of Antioch，＂－also called from it Buthr－el－Souda，otherwise Bahr－Agoule，＂the White Lake，＂from the colour of its waters．This Soudd ＂seems to be the river Arceuthas mentioned by Strabo，immeliately after Pagrae，as running through the plain of Antioch．＂（Observations on Syria， vol，ii．p．173．）It is numbered 17 on the map of the gulf of Issus．［Vol．I．p．114．］
［G．W．］
PAGUS（Háyos），a bill of Ionia，a little to the north of Smyrna，with a chapel of Nemesis and a spring of excellent water．（Paus，v．12．§ु 1．）Dodern travellers describe the hill as betweer． 500 and 600 feet high，and as presenting the form of a cone from
which the point is cnt off．（Hamilton，Rescarches， i，p． 53 ，foll．）

PAGYR1＇TAE（Пaүvpítaц，Ptol．iii．5．§ 22），a people of European Sarmatia，whose position caunot be made ont．Schafarik（Slav．Alt．vol．i．p．211） connects the termination of their name with the word ＂gara，＂which the Poles and other Russo－Slavoniam stocks use for＂gora，＂＂mountain．＂［E．B．J．］

PALA＇CIUM（ Пa入áktov），a fortress in the Tauric Chersonese，bailt by Sciluras，king of the Tauro－ Scythians，to resist the attacks of Mithridates and his generals．（Strab．vii．p．312．）The name， which it scems to have taken from his son Palacus （Strab．pp．306，309），still survives in the modern Balakldara，which Dr．Clark（Travels，vol．ii．p．219） inaccurately supposes to be derived from the Genoese ＂Bella Clava，＂＂The Fair Harbour．＂Its harbour was the Symnolon Portcs（ $\Sigma \nu \mu \hat{\rho} \dot{\lambda} \lambda \omega \nu \quad \lambda \mu \mu \eta \nu$ ， Strab．vii．pp．308， 309 ；Arrian，Peripl．p．20；Ptol． iii．6．§2；Plin．iv．26），or the Cembaro or Cem－ balo of the middle ages，the narrow entrance to which has been deseribed by Strabo（l．c．）with such fidelity to nature．According to him，the harbour， together with that of Ctenns（Sebastopol），consti－ tuted by their approach an isthmos of 40 stadia； this with a wall fenced the Lesser Peniasula，having within it the city of Chersonesus The Sinus Portuosus of Pomponins Mela（ii．1．§ 3），from the position he assigns to it between Criumetopon and the next point to the W．，can only agree with Bala－ kldva，which is truly＂$\kappa \alpha \lambda \partial s \lambda_{1} \mu \eta \nu$ et promontoriis duobus includitar．＂Dubois de Montperenx（loyage autour du Caucase，vol．vi．Pp．115，220），in ac－ cordance with his theory of transferring the wander－ ings of Odysseus to the waters of the Euxine， discovers in Balakliva the harbour of the giant Laestrygones（Odyss．x．80－99）；and this opinion has been taken up by more thar one writer．It is almost needless to say that the poet＇s graphic pic－ ture of details freshly drawn from the visible world， is as true of other land－locked basins，edged in by cliffs，as when applied to the greyish－blue，or light red Jura rocks，which hem in the entrance to the straits of Balakláva．
［E．B．J．］
PALAE，a town of Thrace，according to Lapie near Moussaldja．（Itin．Ant．p．568．）［T．H．D．］

PALAEA．1．（Ma入aia），a place in the Troad on the coast， 130 stadia from Andeira．（Strab，xiii． p．614．）

PALAEBYBLOS（חa入aifuenos，Strab．sv．p． 755；Пa入aú́bu6入as，P＇tol．v．15．§ 21），a town of Phoenicia，which Strabo places after the Clismax or promontory called Ras－1 Watta－Salan，forming the N．extremity of the Bay of Kesmuan．The site， which is unknown，was therefure probably between the Climax，in the steep cliffs of which it was neces－ sary to cut steps－whence the name－and the river Lycus，among the hills which elosely burder the shore，and rise to the height of 1000 feet．Ptolemy （l．c．）calls it a city of the interior，and the Peu－ tinger Table places it $7 \mathrm{M} . \mathrm{P}$ ．from Berytus，but does not give its distance from Byblos．（Kenrick， Phoenicia，p．12，London，1855．）［E．B．J］

I＇ALAEMYNDUS．［MrxDis．］
PALAEOBYBLUS．［Palakaynlus．］
PALAEPHARUS，or PALAEPHARSALUS， that is eitice old Pharae or Pherae or old Pharsultus， according to the difference of the readings is the text of Livy（xxxii．13）．

PALALPOLIS．［NEarolis．］

PALAERL＇s（Пa入aıpós：Eth．Пa入aıpeús），a tawn on the W．const of Acarmania，on the lonian sea，which is placed hy Strabo between Leucas and Alyzia．Its exact site is unkmown．Leake places it in the valley of Lividlhi．In the first year of the Peloponthesim War（13，c．431）Palacrus was in al－ liance with the Athenians：and when the latter perple took the neighbouring town of Sollium， which was a Corinthian colony，they gave buth it and its territoly to the inhahitants of Palaerus． （Thuc．ii．30：Strab．s．pp．450．4．59．）

PALAESCEPSIS．［Scrists．］
PALAEsIMUNDUM（Plin．vi．22．5．24），a great town in the ancient Taprobane（Ceylon），an account of whicle was given to the Romans by Annius Plo－ camus，who spent sis months there during the reign of the emperor Clandus．According to him，it was situatted on a river of the same name，which，flowing from a great internal lake，entered the sea by three mouthis．It is probable that it is represented by the present Trincomulee，in the neighbourhood of which are the remains of enormous ancient works for the regulation of the course of the river－now called the Mahavilla－Ganga．（Brooke，Geogr．Journ．vol． iii．p 223．）The name necurs under the form Palaesimundu in the Periplus Mar．Erythr．，and in Marcian＇s l＇cripl．Maris Frteri as the name of the island itself．Thus the first speaks of vīqos $\lambda \in-$
 （c．61，el．Mitller）；and the second states that the island of Taprobane was formerly called Palaesi－ mundu，but is now called Salice（c．35，ed．Mither）． l＇tolemy．and Stephanns，who follows bim，state that
 さa入ıki（vil．4．§ 1）．It is very probable，however， that this is in both cases to be considered as an erroneous reading，and that the true name was Palaesimundum．Lassen considers that it is de－ rived from the Sanscrit words PilliSimanta，the Head of the Huly Law．（Dissert．de Insula Tapro－ ban．p．14．）

## ［V．］

PALAESTE，a town upon the const of Channia in Epeirus，at the southern twot of the Acroceraunian prak，where Cacas landed from Brundusium，in orler to carry on the war against Pompey in Illyria． （bucan，Phars，v． 460. ）In this vicinity there is a modern rillage，catled I＇aldisa；aod there can there－ fore be little doubt that I．ucan has preserved the real name of the place where Caesar landed，and tbat there is a mistake in the MSS，of Caesar．where the name is written Pharsalus．（Caes．B．C．iii． 6 ； comp．Leake，Northern Girerce，vol．i．p．5．）

P＇ALAESTYNA（ $\Pi \alpha \lambda \alpha \sigma \sigma T i \nu \eta$ ：Eth．Пa入al－ बTwods），the most commonly received and classical name for the country，atherwise called the Land of Canaan，Jodaca，the 1loly Land，\＆ce．This name has the authority of the prophet Isaiah，among the sacred writers：and was received by the earliest secnlar historians．Herodotus calls the Hebrews Syrians of Palestine；and states that the sea－border of Syria，inhatited，according to him，by Phoenicians fomi the Real Sca，was ealled l＇alaestina，as far as Jigypt（via．89）．Ile elowhere places Syria Palaes－ tina between Plonenice and Egypt；Tyre and Sidon in I＇hoenice：Ascalon，（＇aulytis，lemysts in Iralaesting Syriate；clocwhere he phaces Cadytis and Azotus simply in Syria（iv．39，iii．5，ii．116，137，i．105， iii．5）．

Tlae name，as derived from the old inhabitants of the land，originally described only the sea－border south of Mount Camel，ocenpied by the Bhilistines
from the very eartiest period，and during the time of the lsraelite kingdom（Exod，xiii，17）；although it would appenr that this district was partially occu－ pied by the cognate branches of the Camaanites． （Gen．x．14，19．）It afterwards came to be used of the inland parts likewise，and that not only on the west of the Jordan，but also to the east，as far as the limits of the children of Israel；and in this wider acceptation it will he convenient here to adopt it；although it deserves to be noted that even so late as Josephus the name Pulaestina was occasionally used in its more restricted and proper sense，viz． of that part of the coast inhabited of old hy the Philistines．（See the passages referred to in Reland， p． 41 ，who devotes the nine first chapters of his work to the qames of Palestine，pp．1－51．）

## I．General Botndaries，Soll，Climate．

The general honodaries of Palestine，in this wider acceptation of the name，are clearly defined by the Mediterranean on the west，and the great desert， now called the Hutran，on the east．［Hauras．］ The country，however，on the east of Jordan was not originally designed to form part of the land of lsrael；which was to have been bounded by the Jordan and its inland lakes．（Numb．xxxiv．6， $10-12$ ；comp．xaxii．）The northern and south－ ern boundaries are not so clearly defined；but it is probable that a more careful investigation and a more accurate survey of the country than has bitherto been attempted might lead to the recovery of many of the sites mentioned in the sacred books， and of natural divisions which might help to the elucidation of the geography of Palestine．On the south，indeed，recent investigations have led to the discovery of a well－defined mountain barrier，forming a natural wall along the south of Palestine，from the sonthern bay of the Dead Sea to the Mediterranean， along the live of which，at intervals，may be found traces of the names mentioned in the borders in the books of Muses and Jushua，terminating on the west with the river of Egypt（ Wady－el－Arish）at Rhinoco－ rema．（Numb．xxxiv．3－5；comp．Josh．xr．1－4； Williams，Holy City，vol．i．，appendix i．，note 1．p． 463 －468．）On the nortbern border the mention of Nount Her is perplexing；the point on the coast of ＂the great sea＂is not fixed；nur are the sites of Hamath or Zedad determined．（Numb．xxxiv．7，8； comp．Ezel：alvii．15，16．）But whaterer acconnt may be given of the name Hor in the northern borders of Palestine，the mention of Hermon as the northern extremity of the Israclites＇conquests in Deuteronomy（iii．9，v．48）would point to that rather than to Lebaoon，which Reland conjectures， as the mountain in question：while the fact that Sidon is assigned to the tribe of Asher（Judges，i． 21）would prove that the point on the coast must be fixed narth of that border town of the Canaanites． （Gen．x．19；Josh．xix．28．）The present IIamah， near to Homs（Emesa），is much too far north to fall in with the boundary of Palestine，and it toust be conreded that we have not at present sufficient data to enable us to determine its northern limits． （Reland，lib．i．cap．25，pp．113－123．）To this it must be added that the limts of Palestine varied at different periods of its listory，and according to the views of different writers（ib．cap．26，pp． 124 -127 ），and that the common error of confoupding the limits of the possessions of the Israclites with those assigned to their conquests bas still further embarrassed the question．Assuming，however，
those boondaries, as do the sacred writers and Josephus, we may now take a general view of its plyysical features wbich have always so mnch to do with the formation of the character of the inhabitants. It is well described in its principal features, in the book of Deuteronomy, as "a land of brooks of water, of fountains and depths, that spring out of valleys and bills; a land of wheat, and barley, and vines, and fig-trees, and pomegranates : a land of oil-olive, and honey; a land wherein thou shalt eat bread without scarceness; thon shalt not lack anything in it; a land whose stones are iron, and out of whose bills thon mayest dig brass" (viii. 7-9; comp. xi. 11, 12). The great variety of its natural prodactions must be ascribed to the diversified character of its surface and the natural richness of its snil, which was obviously taxed to the ntmost by the indastry of its numerous inhabitants; for there is no part of the hill conntry, however at present desolate and depopulated, which does not bear evideaces of aacient agricultural laboar in its scarped rocks and rained terrace-walls; while in the vicinity of its modern villages, the rude traditionary style of husbaadry, unimproved and unvaried for 3000 years, eaables the traveller to realise the ancient fertility of this highly favoured land, and the occupations of its inhabitants, as well as the genius of their poetry, all whose images are borrowed from agricultural and pastoral pursnits. As the peculiar characteristic feature in the geography of Greece is the rast proportion of its sea-border to its superticial area, so the pecnliarity of the geography of l'alestine nay be said to be the undue proportion of mountain, or rather hill country, to its evtent. In the districts of Tripoli, Akka, and Damascus, three descriptions of soil prevail. In general that of the mountainous parts of Palestine and central Syria is dry and stony, being formed in a great measure from the debris of rocks, of which a large portion of the surface of the districts of Lebanon, the Hauran, and Ledju, with the monatainoas countries of Judaea, are composed; it is mised, however, with the allnvinm constantly brought down by the irrigating streams. The second and richest district are the plains of Esdraelon, Zabulon, Baalbek, part of the Decapolis, aad Damascus, as well as the valleys of the Jurdan and Orootes, which for the most part consist of a fat loamy soil. Being almost without a pebble, it becomes, when dry, a tine brown earth, like garden mould, which, when saturated by the rains, is almost a quagmire, and in the early part of the summer becomes a marsh; when cnltivated, most sbundant errps of tobacco, cotton, and grain are obtained. The remainder of the territory chiefly consists of the plains called Barr by the Arabs, and Midbar by the Hebrews, both words sigaifying siomply a tract of land left entirely to nature, and being applied to the pasture tracts aboast almost every towa in Syria, as well as to those spots where vegetation almost eatirely fails. Such spots prevail in the tracts towards the eastern side of the country, where the soil is mostly an indurated clay, with irregular ridges of linestone hills separating different purts of the surface. The better description of soil is occasionally diversified by hill and dale, and has very much the appearance of some of our downs, but is covered with the liquorice plant, mixed with aromatic slirubs, and occasionally some dwarf trees, such as the tamarisk and acacia. Muy of the tracts eastward of the Jurdan (Petaea) are of this description, particularly those near the IIauran,
which, under the name of Roman Arabia, had Bozra for its capital. The inferior tracts are frequently coated with pebbles and black flints, having little, and sometimes no regetation. Sach are the greater portions of the tracts southward of Gaza and Hehron, and that part of the pashalick which borders upon Arabia Deserta, where scarcity of water has produced a wilderness, which at best is only capable of nourishing a limited namber of sheep, goats, and camels : its condition is the worst in summer, at which season little or no rain falls throughont the eastern parts of Syria.

Owing to the inequality of its surface, Palestine has a great variety of temperature and climate, which have been distributed as follows.-(1) The cold; (2) warm and humid; (3) warm and dry. The first belongs principally to the Lehanon range and to Monut Hermon, in the extreme north of the conntry, but is shared in some measure by the monntain districts of Nablüs, Jerasalem, and Hehron, where the winters are often very severe, the springs mild, and a refreshing breeze tempers the summer heat. The second embraces the slopes adjoining the coast of the Mlediterranean, together with the adjacent plains of Akka,Joffa, and Gaza; also those in the interior, such as Exdraplon, the valley of the Jordan, and part of Peraea. The third prevails in the south-eastern parts of Syria, the coatignity of which to the arid deserts of burning sand, exposes them to the furnace-blasts of the sirocco untempered by the humid winds which prevail to the west of the central highlands, while tbe depression of the southem part of the Jordan valley and the Dead Sea gives to the plain of Jericho and the districts in the vicinity of that sea an Egyptian climate. (Col. Chesney, Expedition to the Euphrates, syc. vol, i. pp. 533-537.)

## 11. Geology, Natural Divisions, and Prodections.

The geaeral geographical position of Palestine is well described in the following extract: - "That great monntain chain known to the ancieats under the various names of Imaus, Caveasus, and Taurus, which extends due east and west from China to Asia Minor; this chain, at the point where it enters Asia Minor, throws off to the southward a subordinate ridge of hills, which forms the barrier betweea the Western Sca and the plains of Syria and Assyria. After pursuing a tortuous course for some time, and breaking into the parallel ridges of Libanas and Antilibaans, it runs with many breaks and divergencies through Palestine and the Arabian peniosula to the Indian Ocean. One of the most remarkable of these breaks is the great plain of Esdraclon, the battle-field of the East. From this point . . . the ridge or monntainous tract extends, withoat interruption, to the sonth end of the Dead Sea, or further. This whole tract rises gradually towards the sooth, forming the hill conntry of Ephraim and Jodah, uatil, in the viciaity of Hebron, it attains an altitude of 3250 feet ahove the level of the Mediterranean. At a point exactly opposite to the extreme north of the Dead Sea, i.e. dae west from it, where the entire ridge has an elevation of about 2710 feet, and close to the saddle of the ridge, a very remarkable feature of this rocky process, so to call it, occurs. The appearance is as if a single, but rast wave of this sea of rock, rising and swelling gradually from north to south, had been suddenly checked in its advance, and, atier a
considersble subsidence below the general level, left standing perfectly isolated from the surrounding mass, both as to its front and sides. Add, that sbout the middle of this wave there is a sliglit depression, chanelling it from north-west to south-cast, and you have before yon the natural limestone rock which forms the site of Jerusalem." (Christian Remembrancer, No. lxvi. N. S., vol. xviii. pp. 425 , 426.) A few additions to this graphic sketch of the general geography of Palestine will suffice to complete the description of its main features, and to furnish a nomenclature for the more detailed notices which mnst follow. This addition will be best supplied by the naturalist Kussegger, whose travels have fumished a desideratum in the geography of lalestine. It will, however, be more convenient to consider below his third division of the comtry, comprehending the river Jordan and the Dead Ses, with its volcanic Phaenomena, as those articles have been reserved for this place, and the historical importance of them demands a fnller necount than is given in his necessarily brief summary. He divides the comntry as follows: -

1. The fruitful plain extending along the coast fron Guza to Juny, north-east of Beirüt.
2. The mountain range separating this plain from the valley of the Jordan, which, commencing with Jebit Khalil, forms the rocky land of Judaea, Samaria, and Galilee, and ends with the koot of mount.ains from which Libanus and Antilibanus extend towards the north.
3. The valley of the Jordan, with the basins of the lake of Tiberias and the Dead Sea, as far as Wwly-el-Ghor, the northern end of Wady-el-A raba.
4. The country on the east of the Jordan, as far as the parallel of Damascus.
(1.) The part of the eoast plain extending from the isthmus of Suez between the sea and the mountains of Judaea and Samaria, and bounded by the ridge of Carmel, belongs, in regard to its fertility, to the most beautiful regions of Syria. The vegetation in all its forms is that of the warmer parts of the shores of the Mediterranean; in the soutlieru districts the jalm flouri hes.

The mountains of Judaea and Samaria, which rise to the height of 2000 feet above the sea, follow the line of the plain notil they meet the ridge of Carmel. The coust distriet belongs partly to the older and newer pliocene of the marine depusits, and partly to the chalk and Jura formations of the neighbonring mountainous country.

To the north of Carmel the billy arable land (eccurs again.

Still further north, with the exception of a few strups of land about Acre, Sur, Seida, Beiruit, \&c., the coast phain becomes mure and more narrowed by the mountains, which extend towards the sea, until there unly remains here and there a very small strip of coast.

Several mountain streams, swollen in the rainy geasin to t.rrents, flow thruagh deep narrow valleys into the plain, in part fertilising it; in part, where there are no barriers to oppose their furce, spreading devastation tar and wide. Of these the principal are Nahr-cl-Kelb, Naher-ed-Damur, the Auli, the Sirharuunh, Nuthr-el-Kasimich. Nahr Mukivttu, \&c.

The mountain sides of Lecbanum, from Seida to birint, ure caltivated in terraces; the principal proluct of this kind of cultivation is the vine and mulbery; the secondary, tiys, oringes, pomegramates, and, in general, the so-called tropical fruits.

PALAESTINA.
The want of grass begins to show itself in Syria, and especially on the sides of the pronontory, ewing to the loug continued droughts. The Syrian meuntains along the coast north of Carmel, and especiaily the sides of Lebanon, are, with the exception of the garden-trees, and a few scattered pines, entirely devoid of wood.
(2.) The land immediately towards the east, which follows the line of coast from south to nerth, at a distance now greater now less, rises in the forn of a lofty mountain chain, the summits of which are for the most part ronnded, and rarely peaked; forming numerous plateanx, and including the whole space between the coast on the west, and the valley of the Jordan, with the Dead Sea and the lake of Tiberias, on the enst, having an average breadth of from 8 to 10 German miles.

This mountain chain commences in the south with Jebel Khalit, which, towarda the west and south-west, stretches to the plain of Gaza and the sandy deserts of the isthmns, and towards the sonth and south-east joins the monntain country of Arabis Petraea, and towards the east sinks suddenly into the hasin of the Dead Sea. Iminediately joined to Jebel Khalil are Jebel-el-Kods and the mountains of Ephraim, sinking on the east into tho valley of the Jordan, and on the west into the plain at Jaffa. Further north follows Jebel Nablis, with the other monntains of Samaria, bounded on the east by the valley of the Jordan, on the west by the eoast district; and towards the north-west extending to the sea, and forming the promentory of Carmel. North of $M_{\text {erj }} I b n$ 'Amir are the mountains of Galilee, Hermon, Tabor, Jebel Safed, Suron, \&c. This gronp sinks into the basin of the lake of Tiberias and the upper valley of the Jordan, on the east, on the west into the coast district of Acre and Sur, extends into the sea in several promentories, and is united to the chain of Lehanon at Seida, by Jebel-ed-Drus, and by the mountains of the Upper Jordan and of Hasbeia to Jebel-es-Sheich, or Jebel-et-Telj, and thus to the chain of Antulibanus.

The whole mountain chain in the district just described belongs to the Jura and clalk formation. Crystalline and plutonic rocks there are none, and volcanic formations are to le found only in the rountains surrounding the basin of the lake of Tiberias. The bighest points are situated in the northem part of the rauge, in the neighbourhood of Jebel-es-Sheich, and in the eastern and southeastero part of Galilee. (Jebel-es-Sheich is 9500 feet above the sca.) Further south the monntains become perceptibly lower, and the highest of tho mountains of Jud.ea are scarcely 4000 feet above the sea.

The character of the sonthern part of this range is very different from that of the northern. The plateaux and slopes of the central chain of Judsea are wild, rocky, and devoid of vegetation; the valleys nninerons, deep, and narrow. In the lowlands, wherever productive soil is collected, und there is a supply of water, there springs up a rich vegetation. All the plants of the temperate region of Europe Hourish together with tropical fruits in perfection, esjecially the vine and olive.

In Sannaria the character of the land is more genial; vegetation flomrishes on all sides, and several of the mountains are clothed with wood to their smmuits. With still greater benuty and grandeur does nature exhibit herself in Galilee. The mountails become higher, their form bolder and sharjer.

The great Hermun (Jebel-es-Sheich) rises high above the other mountains.
The valleys are no longer iohospitahle ravines; they become long and broad, and partly form plains of large extent, as Esdraeloo. A beantiful pasture land extends to the heights of the mountaios. Considerable mountain streams water the valleys.
(3.) To the east of this mountain chaio lies the valley of the Jordan, the most remarkable of all known depressions of the earth, as well on account of its great length as of its almost incredible deptb. [Sce below, 111. and 1V.]
(4.) On the east of the Dead Sea and the Jordan valley, with the sea of Tiberias. rises like a wall a stcep mountaio range of Jara limestone. On the top of this lies a broad plateau inhatited by nomadic Arabs and stationary tribes. The soothern part of these highlands is known by the name of Jebel Belka; further north, beyond the Zerka, in the neighbourbood of the lofty Ajluin, it meets the highlands of Ez-Zoueit ; and still further north begins the well-known plateaa El-Hauran, which, inhabited chiefly by Arabs and Druses, is bounded by Antilibanus and the Syriao desert, joins the platean of Damascus, and there reaches a height of 2304 Paris feet above the sea.

## III. The Jordan.

The most celebrated river of Judaea, and the unly strean of any considerable size in the country. Its etymology has not been successfully investigated by the ancieots, who propose a compound of Yor and Dan, and imagive two fountains heariog these names, from which the river derived its origin and appellatiou. S. Jerome (Onomast. s. v. Dan) derives it from Jor, which he says is equivalent to peitpov, flucius, and Dan the city, where one of its principal foutains was situated. But there are serious objections to hoth parts of this derivation. For in the first place 7 N : is the Hebrew form of the equivalent for fluvius, while the proper name is always in? ?-, and never 13 T, as the proposed etymoiogy wonld require; while the name Dan, as applied to the city Laish, is five centuries later than the first mention of the river in the book of Genesis; and the theory of anticipation in the nmmerous passages of the Pentateuch in which it occurs is scarcely admissible (See Judges, xviii.; Gen. xiii. 10, xxxii. 10; Job, xl. 23), although Dan is certainly so used in at least one passage. (Gen. xiv. 14.) Besides whicb, Reland has remarked tbat the vowel always written with the second syllable of the river is different from that of the monosyliatic city, $\$ 7$, and not $\dagger \uparrow$. He snggests another derivation from the root 7 scendit, labitur. so denotiog a river, as this, in common with other rivers which he instances, might be called кar' $t \xi_{0} \times \dot{\eta} \nu:$ and as Josephus does call it Tòv потaubv, without any distinctive name (Ant. 8. 1. $\S 22$ ), io describing the borders of $I$ ssachar. This is also adopted hy Gesenius, Lee, ard other moderns. (Lee, Lexicon, s. v.)

The source of this river is a question involved in mnch obscurity in the ancient recoro's; and there is a perplexing notice of Josephus, which has added considerably to the difficulty. The subject was fully investigated by the writer in 1842, and the results are stated below.
The Jordan has three principal sources: (1) at Bunias, the ancient Caesarea Philippi; (?) at Tell-
el-Kadi, the site of the ancient Dan, about two miles to the west of Banias; (3) at IIasbeia, some distance to the north of Tell-el-Kodi. These several sources require distinct notice.

1. The fountain at Banias is regarded by Josephus and others as the proper source of the Jordao, hut not with sufficient reason. It is indeed a copious fountain, apringing out from the earth in a wide and rapid but shallow stream, io front of a cave formerly dedicated to Pan; but not at all in the manoner described by Josepbus, who speaks of a yawning chasm in the cave itself, and an unfathomable depth of still water, of wbich there is weither appearance oor tradition at present, the cave itself being perfectly dry. (Bell. Jud. i. 21. § 3.) He states, however, that it is a popular error to consider this as the source of the Jordan. Its true source, he subsequently says (iii. 9. § 7 ), was ascertained to be at Phiala, which he describes as a circular pool, 120 stadia distant from Caesareia, not far from the road that led to Trachonitis, i. e. to the east. This pool, he says (named from its forin), was always full to the brim, but never overflowed, and its commection with the fountain at Paneas was discovered by Herod Philip the tetrarch in the following manner: - He threw claff into the lake Phiala, which made its appearance again at the foontain of Paneas. This circular, goblet-shaped pool, about a mile in diameter, is now called Birket-er-Ram. It is sitnated high in a bare mountain region, and strongly resembles the crater of an extinct polcano. It is a curious error of 1 lrby and Mangles to represent the surrounding hills as "richly wooded" (Travels, p. 287). The water is stagnant, nor is there any appearance or report amoug the natives of any stream issuing from the lake, or of any subterranean communication with the fountain of Paneas. The above-named travellers correctly represeut it as having " oo apparent supply or discharge." The experment of Pbilip is therefore atterly unintelligible, as there is no stream to carry off the claff. (For a view of Pliala, see Traill's Jusephus, vol. ii. p. 46, and lxxx. \&c.)
2. The second fountain of the Jordan is at Tell-el-Kadi. [Dav.] This is almost equally copious with the first-naoued; and issnes from the earth in a rapid stream on the western side of the woody hill, on which traces of the city may still be discuvered. The stream bears the ancient name of the town, and is called Nahr Ledän, "the river Ledann," sometimes misudderstood by travellers as the ancient name of the river, which certainly no longer exists among the natives. This is plainly the Daphue of Josephus, "having fountains, which, feeding what is called the little Jordan, under the temple of the golden calf, discharge it into the great Jordao." (Bell. Jud, iv. 1. § 1, conf. Ant. viii. 8. § 4 ; and see Reland, Paluestina, p. 263.)
3. A mile to the west of Tell-el-Kadi, ruos the Nalor Hasbanny, the Husbera river, little inferior to either of the former. It rises 6 or 8 miles to the nortb, near the large village of Ilasbeia, and being joined in its course by a stream from Mount Hermon, contributes considerably to the bulk of the Jordan. It is therefore somewhat remarkable that this tributary has been unvoticed until comparatively modern times. (Robinson, Bib. Rcs, vol, iii. p. 354, note 2.)

These three principal sources of the Jordan, as the natives affirm, do not intermingle their waters until they meet in the small lake now called Bakr-

## PALAESTINA.

c-Muteh, "the waters of Merom" of Scripture (Josh. xi. 5. 7), the Semechositis I'aters of Josephus (Aut. v. 5. § 1, Bell. Jul iii. 12. § 7, iv. 1. §1); but the plaiu between this lake and Paneas is hard to be explored, in consequence of numerous foustains and the rivulets into which the main streans are here divided. (Robinson, l. c. pp, 353. 354 : Biblintheca Sacra, 1843, pp. 12, 13.)

This poine was investigated by Dr. Rubinson in 18.52, and he found that both the Ledin and the Inasbiny unite their waters with the stream from Banins, some distance abose the lake, to which they run in one stream. (Journal R. Geog. Soc. vol. xxiv. p. 25, 1855.)

This region, now called Merj-el-Huleh, might
 marshes of Jordan," by which name, however, the author of the first book of Maccabees (1 Mucc. ix. 42) and Jusephus (\&ut. xiii. 1. §3) would seem to signify the marshy plain to the suuth of the Dead Sea. The waters from the three sources abovementioned being collected isto the small lake, and further amgmented by the nomerous land springs in the Bahr and Ard-el-Huieh, run off towards the south in one current towards the sea of Tiberias [Tiberias Mane], a distance, according to Josephos, of 120 stadia. They flow off at the southwestern extremity of this lake, and passing through a district well described by Josephus as a great
 called by the natives Et-Ghor, lose themselves in the Dead Sea.

Attention has been Iately called to a peculiar phonomenon exhibited by this river, the problems relating to which have been solved twice within the Jast few years by the enterprise of English and American sailors. In the spring of the year 1838 a series of barometrieal observations by M. Bertou gave to the Dead Sea a depression of 1374 feet below the level of the Mediterranean, and to the sea of Tiberias a depression of 755 feet, thus establishing a fall of 619 teet between the two lakes. At the close of the same year the observations were repented by Russegger, with somewhat different results; the depression of the Dead Sea being given as 1429 feet, the sea of Tiberias 666 feet, and the consequent tall of the Jordan between the two, 763 feet. Hear von Wildenbruch repeated the observations by barometer in 1845, with the following results:-Depression of the Dead Sea 1446 feet, of the sea of Tiberias 845 feet, difference 600 feet. He carried his observations further north, even to the sourre at Tcll-el-Kidi, with the following re-sults:-At Jacob's bridge, about $2 \frac{1}{2}$ miles from the suuthern extremity of Buthr. Huleh, be found the Jorian 899 fect above the Mediterranean; at the Raher. Huleh 100 feet; and at the source at Tell-elKudi 537 fuet: thus giving a fall of 1983 feet in a direct course of 117 miles:- the most rapid fall being between the bridge of Jawob and the sea of Tibesias, a distance of only 8 miles, in which the river falls 845 fret, or 116 feet per mile. Results so remarkable did not find easy credence, although they were further tested by a trigonometrical sursey, conducted by lient. Symonds of the Royal Fingineers, in 1841 , whech cohtirmed the barometrical observations for the Dead Sea, but were remarkably at variance with the statement for the sea of Tiberis, giving to the former a depression of 1312 fect, and to the latter of 32 N feet, and a difference of level betreen the two of 984 feet. The
whole subject is ably treated by Mr. Petermann, in a paper read before the Geographical Socicty, chiefly in answer to the strictures of Dr . Robinson, in a communication made to the same suciety, - both of which papers were subsequently published in the journal of the society (vol, xyiii. part 2, 1848). In consequence of the observations of Dr. Rubioson (Bib. Res. vol. ii. p. 595. n. 4, and vol. iii. p. 311, n. 3), the writer in 1842 followed the course of the jordan from the sea of Tiberias to the sea of Huleh, and found it to be a continuous torrent, rushing down in a narrow rocky channel between almost precipitous mountains. It is well described by Herr von Wildenbruch, who explored it in 18.45 , as a "continuous waterfall" (cited by Petermann, l. c. p. 103).

The lower Jordan, between the sea of Tiberias and the Dead Sca, was subsequently explored by Lieut. Molyneux in 1847, and by an American expedition under Lieut. Lynch in the following year. The fullowing extracts from the very graphic account of Lieut. Molyneux, also contained in the number of the Royal Geographical Society's Joumal (pp. 104123) aiready referred to, will give the best idea of the character of this interesting river, hitberto so little known. Immediately on leaving the sea of Tiberias they found the river upwards of 100 feet broad and 4 or 5 deep; bnt on reaching the ruins of a bridge, about 2 miles down the stream, they found the passage obstructed by the ruins, and their difficulties commenced; for seven hours they scarcely ever had sufficient water to $s$ wim the boat for 100 yards together. In many places the river is split into a number of small streams, and consequently withont much water in any of them. Occasionally the boat had to be carried upwards of 100 yards over rocks and through thomy bushes; and in some places they had high, steep, sandy cliffs all along the banks of the river. In other places the boat had to be carried on the backs of the camels, the strean being quite impracticable. The Ghor, or great valley of the Jordan, is about 8 or 9 miles broad at its upper end; and this space is anything but flat-notbing but a continuation of bare hills, with yellow dried-up weeds, which look when distant like corn stubbles. These hills, however, sink into insigoificance when compared to the ranges of the mountains which enclose the Ghor; and it is therefore only by compatison that this part of the Ghor is entitled to be called a valley. Within this broader valley is a smaller one on a lower level, through which the river runs; and its winding course, which is marked by luxurious vegetation, resembles a gigantic serpent twisting down the valley. So tortuons is its course, that it would be quite im. possible to give any account of its various turnings in its way from the lake of Tiberias to the Dead Sta. A little ahove Beisan the stream is spanned by an old cariously formed bridge of three arches, still in use, and here the Ghor begins to wear a much better and more fertile aspect. It appears to he composed of two different platforms; the upper one on either side projects from the foot of the hilis, whici form the great ralley, and is tolerably level, but barren and uncultivated. It then falls away in the form of rounded sand-hills, or whitish perpendicular cliffs, varying from 150 to 200 feet in beight, to the lower plain, which should more properly be called the valley of the Jordan. The river here and there washes the foot of the cliffs which enclose this smaller salley, but generally it winds in the must
tortuons manner betwcen them. In many places these cliffs are like walls. About this part of the Jordan the lower plain might be perhaps $1 \frac{1}{2}$ or 2 miles broad, and so full of the most rark and luxuriant vegetation, like a jungle, that in a few spots only can anything approach its banks. Below Beisan the higher terraces on either side begin to close in, and to narrow the fertile space below; the hills become irregular and only partly cultivated; and by degrees the whole Ghor resumes its original form. The zigzag course of the river is still prettily marked by lines of green foliage on its banks, as it veers from the cliff's on one side to those on the other. This general character of the river and of the Ghor is continued to the Dead Sea, the mountains on cither side of the upper valley approwhing or receding, and the river winding in the lower valley between bare cliffs of solt limestone, in some places not less than 300 or 400 feet high, having many shallows and some large falls. The American expedition added little to the information contained in the paper of our enterprising countryman, who only survived his exploit one month. Lient. Lyach's report, howover, fully confirms all Lieut. Molyneux's observations; and be sums up the results of the survey in the following sentence:-"The great secret of the depression between lake Tiherias and the Dead Sea is salved by the tortuons course of the Jordan. In a space of 60 miles of latitude and 4 or 5 miles of longitude, the Jordan traverses at least 200 miles, . . . We have plunged down twenty-seven threatening rapids, besides a great many of lesser magnitude." (Lynch, Narrative of the Enited States' Expedition to the Jordan, qc., p. 265.) It is satisfactory also to find that the trigonometrical surver of the officers attached to the American expedition confirms the results arrived at by Lieut. Symonds. (Dr. Robinson, Theological Review for 1848, pp. 764-768.)

It is obvious that these phaenomena have an important bearing on the historical notices of the river; and it is corious to observe (as Mr. Petermann has remarked), in examining the results of De Bertou, Kussegcer, and Von Wildenbruch, that the depression both of the Dead Sea and of the lake of Tiberias increases in a chronological order (with only one exception); which may perhaps iodicate that a continual change is going on in the level of the eutire Ghor, especially as it is well proved that the whole Jordan valley, with its lakes, not only has been but still is subject to volcmic action; as Rassegger las remarked that the monotains between Jerusalem and the Jordan, in the valley of the Jordan itself, and those around the Deal Sea, bear anequivocal evidence of volcanic agency, such as disruptions, upheaving, faults, \&c. \&c., - proots of which agency are still notorious in continual earthquakes, botsprings, and formations of asphalt.

One of the earliest historical facts connected with this river is its periodical overflow doring the season of barley-harvest (Josh. iii. 15; 1 Chron. xii. 15: Jeremiahh, xii. 5; see Blant's Cndesigned Coincidences, pp. 113, 114); and allasion is made to this fact atter the captivity. (Ecclus. xxiv. 26; Aristeus, Epist. ad Philocratem.) The river in the vicinity of Jericho was visited by the writer at all seasons of the year, but be never witnessed an overflow, nor were the Belouins who inhabit its banks acquainted with the phaenomenon. The American expedition went down the river in the montb of April, and were off Jericho at Easter, yet they wit-
nessed nothing of the kind, though Lieat. Lynch remarks, "the river is in the latter stage of a freshet; a few wceks earlier or later, and passage would bave been impracticatile." Considerably further north, howeser, not far below Beisan, Lient. Molynenx remarked "a quantity of deposit in the plain of the Jordan, and the marks of water in various places at a distance from the river, from which it was evident that the Jordan widely overflows its banks; and the sheikh informed him that in winter it is occasionally half a mile across; which acconnts for the luxuriant vegetation in this part of the Ghor" (l. c. p. 117). It would appear from this that the subsidence of the basin of the Dead Sea and the more rapid fall of the Jordan consequent upon it, which has also cut out for it a deeper channel, has prevented the overflow except in those parts where the fall is not so rapid.

Another change may also be accounted for in the same manner. "The fords of the Jordan" were once few and far between, as is evident from the historical notices. (Josh. ii. 7; Judges, iii. 28, vii. 24, xii. 5.) But Lient. Mulynenx says of the upper part of its course, "I am within the mark when I say that there are many hundreds of places where we might have walked across, without wetting onr feet, on the large rocks and stones " (p. 115).

The thick jungle on the banks of the river was formerly a covert for wild beasts, from which they were dislodged by the periodical overflow of the river; and "the lion coming up from the swelling of Jordan " is a familiar figure in the prophet Jeremiah (xlix. 19, 1. 44). It was supposed until very recently that not only the lion but all other wild beasts were extinct in Palestine, or that the wild boar was the sole occupant of the jungle ; but the seamen in company with Lient, Molynenx reported having seen "two tigers and a boar" in their passage down the stream (p. 118 ).

The principal tributaries of the Jordan join it from the east ; the most considerable are the Farmuk [Gadara] and the Zerka [Jannok].

This river is priacipally noted in sacred history for the miraculous passage of the children of Israel under Jushna (iii.), - the miracle was repeated twice afterwards in the passage of Elijah and Elisha (2 Kings, ii. 8, 14), 一and for the oaptism of oor Lord (St. Matt. iii. \&e.). It is honoured with scanty notice by the classical geographers. Strabo reckons it the largest river of Syria (xvi. p. 755). Pliny is somewhat more commonicative. He speaks of Paneas as its source, consistently with Josephus. "Jordanis amnis oritur è fonte Paneade, qui nomen dedit Caesareae : amnis amoenus, et quatenns locorum situs patitur ambitiosus, accolisque se praebens, velut invitus. Asphaltiden lacam dirum natura petit, a quo postremo ebibitur, aquasque laudatas perdit pestilentibus mistas. Ergo ubi prima convallium fuit occasio in lacum se fundit, quem plures Genesaram vocant, etc." (Hist. Nat. v. 15.) Tacitus, though more brief, is still more accurate, as he notices the Bahr Huleh as well as the sea of Tiberias. "Nec Jordanes pelago accipitor: sed unum atque alterum lacum, integer perflait: tertio retinetur." (Hist. v. 6.)

The ancient name for El-Ghor was Aulon, and the modern native name of the Jordan is Es Shiriah.
(Karl von Raumer, Palistina, 2nd ed., 1850, pp. 48-54, 449-452; Nitter, Erdhwnde, qc. West Asien, vol. 15, pp. 18t-556, A. D. 1850 , Der

## IV．The Dead Seal．

Of all the natural phaenomena of Palestine，the Dead sica is that which has most attracted the notice of geographers and naturalists both in ancient and modern times，as exhibiting peculiarities and sug－ gesting questions of great interest in a geological print of riew．

Names．－The earliest allusion to this sea，which， according to the prevailing theory，refers to its ori－ ginal formation，is found in the book of Genesis （xiv．3），where it is identified with the vale＂of Siddim，＂and denominated＂the Salt Sca＂（\％Ad－ $\lambda \alpha \sigma \sigma \alpha \tau \bar{\omega} \nu \dot{\alpha} \lambda \bar{\omega} \nu$, LXX．）；comp．Numb．xxsiv． 3，12）；which salt siea is elsewhere identified with ＂the sea of the plain＂（Deut．iii．17，iv． 49 ；Josh． iii．16，sii．3），जब่入 $\alpha \sigma \sigma \alpha$ Apaba，LXX．；called by the prophets Joel（ii．20），Zachariah（xir．8），and Eze－ kiel（xlvii．18），the＂former，＂or＂eastern sea．＂ Its common mame among the classical authors，first found in Diodorus Siculus（inf．cit．），and adopted by Jusephus，is＂Asphaltitis Lacus＂（ $\dot{\alpha} \sigma \phi \boldsymbol{\lambda} \tau \boldsymbol{i} \tau i s$ $\lambda i \mu \cdot \eta$ ），or simply ${ }^{\eta}$＇Aaфa入tītıs．The name by which it is best known among Europeans has the anthority of Justin（xxsvi．3．§ 6）and Pausanias
 Mare．＂lis modern native name is Buhr Liut， ＂the Sen of Lot，＂－therein perpetuating the me－ morial of the catastrople to which it may owe its furmation，or by which it is certain that its features were considerably altured and modified．The name assigned it by Strabo must be referred to a slip of the author；for it is too much to assume with Fal－ coner that the geographer bad written 玉obouns $\lambda_{i \mu \nu \eta}$ ，when tall the copies read $\Sigma_{\epsilon \rho 6 \omega \nu) s} \lambda$ ．

So copious are the modern notices of this remark－ afle inland sea，that it would be vain to atteropt even an abrilgoneat of them；and the necessity for doing so is in great measure superseded by thie late succesful surveying expedition，conducted by Lieut． Lynch of the American navy，whose published nar－ rative has set at rest many questions connected with its physiral formation．The principal ancient writers will be quoted in detail and in chrono－ logival order，that it may appear how far they have bormowed one fimm another，or may be reyarded as independent witnesses．Their notices will then be substantiated or controverted by modernwriters．The questions relating to the formation of the sea，its voleanic origin，and the other ignoons phatenomena in the country，will be reserved for another chap－ ter．

The earlist extant writer who has noticed at any length the marvels of the lead Sea，is biodorus Siculus（ss，（．4．i），who hits twiee described it ；first in his gengraplasal survery of the comitry（ii，48）， and suberquanty in hin woount of the expedition of 1 （emetrus ayainst then Nahataci（six．98），to which lint accuant a fow jartionlars are added， which were onitted in the earlier book．
＂We anght not to pres over the character of this bake（Aplatites）mmemtionel．It is situated in
the midst of the satrapy of Idumaea，in length ex－ tending about 500 stadia，and in breadth about 60 ． Its water is very salt，and of an extremely noxious smell，so that neither fish nor any of the other ordinary marine animals can live in it：and althongh great rivers remarkable for their sweetness flow into it，yet hy its smell it counteracts their effect． From the centre of it there rises every year a large mass of solid bitumen，sometimes more than 3 pletbra in size，sometimes a little less than one plethrum．＊For this reason the neighbouring bar－ bariatis usmally call the greater，bull，and the lesser， calf．The hitumen floating on the surface of the water appears at a distance like an island．The time of the rising of the bitumen is known abont twenty days before it takes place；for around the lake to the distance of several stadia the stoell of the bitumen spreads with a noxious air，and all the silver，gold，and brass in the neighbourhood loses its proper colour；wbich，bowever，returns again as soon as all the bitumen is ejected．The fire which burns beneath the ground and the stench render the in－ habitants of the neighbouring country sickly and very short－lived．It is nevertheless well fitted for the cultivation of palms，wherever it is traversed hy serviceable rivers or fountains available for the pur－ poses of irrigation．In a neighbouring valley grows the plant called balsam，which yields an abnudant income，as the plant grows in no other part of the world，and it is much used by physicians as a medicine．
＂The bitumen which rises to the sarface is car－ ried off by the inhalitants of both sides of the lake， who are hostilely inclined towards each other．Thiey carry away the bitumen in a singular manner with－ out hoats：they construct large rafts of reeds，which they launch into the lake．Upon each of these not more than three can sit，two of whom row with oars attuched to the raft，and the third，armed with a buw，drives off tbose who are sailing up from the opposite side，or who renture to use violence ；but when they come near to the bitumen they leap on it with axes in their hands，and，cutting it like soft stone，they lade their raft，and then return．If the raft break and any une fall off，even though he may be namble to swin，he does not sink ai in other water，but floats as well as one who could swim； for this water naturally supports any weight capable of expansion，or which contains air，but not solid substances，which have a density like that of gold， silver，and lead，and the like：but even these sink much more slowly in this water than they would if they were thrown into any other lake． This sounce of wealth the barbarians possess，and they tramspint it into Egypt and there sell it for the purposes of embalming the dead；for unless this bitumen is mised with the other spices，the bodies will not long remain undecayed．＂

It has been mentioned that Strabo（cir．A．D． 14）describes it under the name of Sirbonis Lacns， a palpable confusion，as revards the name，with the salt lake on the eastem confines of Eyypt［Sinnoxis Lacts］，as is evident from his statement that it stretched along the sea－coast，ns well as from the length which he assigns it，corresponding as it dues with the 200 stadia given by Pindras Siculus as the length of the true Sirbonis Lacas，which that anthor properly places between Coclesyria and
＊In book ii．he says the smaller masses were two plethra in size．

Egypt (i. 30). The mistake is the more unaccountable, as he not only describes the Dead Sea in a manner which shows that be was thoroughly acquainted with its peculiarities, but also cites the opinions of more ancient authors, who bad described and atterpted to explain its phaenomena. His notice is peculiarly interesting from the accounts which he gives of the formation of the bitumen, and the other indications which he mentions in the vicinity of the operation of roleanic agency, of which more will be said in the following chapter. The native traditions of the catastrophe of the cities of the phin, and the still existing monuments of their overthrow, are facts not mentioned by the earlier historian.
"The lake Sirbonis is of great extent: some have stated its circumference at 1000 stadia; it stretches along near the sea-coast, in length a little inore tban 200 stadia, deep, and with exceedingly heavy water, so that it is not necessary to swim, but one who advances into it up to his waist is immediately borne up. It is full of asphalt, which it vomits up at uncertain seasons from the midst of the depth, together with bubbles like those of boiling water, and the surface, curving itself, assumes the appearance of a crest. Together with the asphalt there rises much soot, smoky, and invisible to the sight, by which brass, silver, and everything shining, even gold, is tarnished; and hy the tarnishing of their vessels the inhabitants of the neighbourhood know the time when the asphalt begins to rise, and make preparations for collecting it by constructing rafts of reeds. Now the asphalt is the soil of the earth melted by heat, and bubbling ap, and again cbanged into a solid mass by cold water, such as that of the lake, so that it requires to be cut; it then floats on the surface by reason of the nature of the water, which, as I have said, is such that a person who goes into it need not swim, and indeed cannot sink, but is supported by the water. The people then sail up on the rafts, and cut and carry off as much as they can of the asphalt: this is what takes place. But Posidonius states that they being sorcerers use certain incantations, and consolidate the asphalt by pouring over it urine and other fonl liquids, and then pressing them out. After this they cut it; unless perhaps uritie has the same properties as in the bladder of those who suffer from stone. For gold-solder ( $\chi$ рибокóллa, borax) is made with the urine of boys. In the midst of the lake the phaenomenon may reasonably take place, because the source of the fire, and that of the asphalt, as well as the principal quantities of it, are in the middle; and the eruption is uncertain, becanse the movements of fire lave no order known to us, as is that of many other gases ( $\left.\pi \nu \operatorname{civ}^{\prime} \mu a \tau a\right)$. This also takes place in Apollonia of Epeirus. There are many other exidences also of the existence of fire bencath the ground; for several rongh burnt rocks are shown near Moasas [Mssada], and caves in several places, and earth formed of ashes, and drops of pitch distilling from the rocks, and boiling streans, with an unpleasant odour perceptible from a distance, and houses overthrown in every direction, so as to give prolability to the legends of the natives, that forincriy thirteen cities stood on this spot, of the principul of which, namely, Sodoma, ruins still remain about 60 stadia in circumference; that the lake was formed by earthquakes and the eballition of fire, and hot water impregnated with bitumen and sulphor; that the rocks took fire; and that some of the citics were swallowed up, and others were de-
sertea by those of their inhaoitants who could escape. Eratosthencs gives a different account, namely, that the country being marshy, the greater part of it was covered like the sea by the bursting out of the waters. Moreover, in the territory of Gadara, there is some pernicious lake-water, which when the cattle drink, they lose their hair, hoofs, and hoins. At the place named Tarichiae the lake affords excellent salt fish; it also produces fruit-trees, resembling apple-trees. The Egyptians use the asphalt for embalming the dead." (Lib. xvi. Pp. 763, 764.)
Another confusion most be remarked at the close of this passage, where Strabo evidently places Tarichiae on the Dead Sea, wbereas it is situated on the shores of the sea of Tiberias.

The next writer is the Jewish historian, who adds indeed little to the accurate information conveyed by his predecessors; but his account is evidently iodependent of the former, and states a few facts which will be of service in the sequel. Josephus wrote alout A. D. 71.
"It is worth while to deseribe the character of the lake Asphaltites, which is salt and mproductive, as I mentioned, and of such buoyancy that it sustains even the heaviest substances thrown into it, and that even one who endeavours to sink in it cannot easily do so. For Vespasian, having come to examine it, ordered some persons who could not swim to be bouod with their bands behind their backs, and to be cast into the deep; and it happened that all of them floated on the surface as if they were borne up by the force of a blast. The changes of its colour also are remarkable; for thrice every day it cbanges its appearance, and reflects different colours from the rays of the sun It also emits in many places black masses of bitumen, which float on the surface, somewhat resembling headless bulls in uppearance and size. The workmen who live by the lake row ont, and, laying hold of the solid masses, drag them into their boats; but when they have filled then they do not find it easy to cut the bitumen, for, by reason of its tenacity, the boat adheres to the mass until it is dctached by means of the menstruous blood of women or urine, to which alone it yields. It is used not unly for shipbuilding but also for medicinal purposes : it is mixed with several drugs. The lengtb of this lake is 580 stadia, as it extends as far as Zoara of Arabia: its breadth is 150 stadia. On the borders of the lake lies the territory of Sodom, formerly a fluarishing country, both on account of the abundance of its produce and the number of its cities; now it is all an arid waste. It is said that it was destroyed by ligbtning, on account of the wickedness of its inbalitants. The traces of the lieavenly fire and the ruins of five cities may still be seen; and ashes are found even in the fruits, which are of an appearance resembling the edible kinds, but which, when plucked, turu into smoke and ashes. Such confirmation do the legends concerning the land of Sodom receive from actual observation." (Juseph. B. $J$. iv. $8 . \S$ 4.)

The Dead Sea and its marvels was a subject suited to the inqniring sparit of the natualist; and Pliny's account, though brief, is remarkably clear and accurate, except that, in common with all writers, he greatly overstates its size. He wrote probably too soon (A. D. 74) after Josephus to avail himself of his account, end may, therefore, be regarded as an independent authority.
"This lake produces nothing but bitumen, from
which circumstance its name is derived. It receives no amimal body: bulls and camels float in it; and this is the origin of the report that nothing sinks in it. In length it exceeds 100 miles; its greatest breadth is 25 miles, its least 6 . On the east of it lies Arabia Nomadum, on the south Matcherds, formerly the second fortress of Judaea after derusalem. On the same side there is situatel a hot-spring, jussessing medicinal properties, named Callirrheii, indicating by its name the virtues of its waters." (Hist Nat. libs. v. 16.)

The last author who will be here cited is Tacitus, whose account may be given in the original. He appears in this, as in other passages, to have drawn largely on dosephus, but had certainly cossulted wher writers. 1le wrote A. d. 97 .
" Lacus immenso ambitu, specie maris, sapore corruptior, gravitate odoris accolis pestifer, neque vento impelitur, neque piscesaut suetas aquis volucres patitur. Incertae undae: superjacta, ut solido, ferunt: periti imperitique nandi perinde attolluntur. Certo anni, bitumen egerit: cujus legendi usum, ut ceteras artes, experientia docuit. Ater suapte naturâ liquor, et sparso aceto concretus, imatat: hunc mann captum, quibus ea cura, in summa navis trahunt. Inde, nullo juvante, isfluit, oneratque, donec abscindas: nec abscindere aere ferrore possis: fugit cruorem vestemque infectam sanguine, quo feminae per menses exsolvuntur: sic veteres auctores. Sed gnari locorum tradunt, undantes bitumine moles pelli, manuque trabi ad littus: mox, whi vapore terrae, solis inaruerint securibus cuneisque, nt trabes aut saxa, discindi. Haud procul inde campi, quas ferunt olim uberes, magrisque urbibus habitatos, fulminum jactu arsisse: et manere vestigia, terramque ipsan specie torridan, vim frugiferam perdidisse. Nam cuncta sponte edita, aut manu sata, sive herba tenus aut flore, sell solitam in speciem adulevere, atra et ioania velut in cinerem vanescunt Eigo sicut incly tas quondam urbes igne coelesti flagrasse cuncessprim, ita balitu lacus infici terram, corrumpi superfusum spiritum, eoque foetus segetum et autumni putrescere reor, solo corloque juxta gravi." (Hist. v. 6.)

This sea is subsequently noticed by Galen (A. D. 164) and Pausanius (cir. A. D. 174), but their accounts are evidently borrowed from some of thase abowe cited from Greek, Jewish, and Latin writers; in illustration of whose statements reference will now be made to modern travellers, who have had better opportunities of testing the truth than were presumed to thenn; and it will appear that those atatements, even in their most marsellous particnlars, are wonderfully trustworthy; and that the hyputhenes by which they endeavoured to account for the phenomena of this extraordinary lake are confirmed by the investigations of modern science.

1. Cieneral Acmarks.-It is deeply to be regretted that the wesults arrivel at by the Anderican exploring expedition, under Lieut. Lynch, have been given to the world only in the loome, tunstematic and thoroughly uisatisfactory notes scattered through the pernonal narrative publishod by that officer; and that his official report to his govermnent has not been made available for scientitic purposes. The few meagre facts worth chromicling have been extracted in a number of the Bibliotheca Sacra, from which they are liere copied. (Vol. v. p. 767, and vol. vii. 1. 396 .) The distance in a straight line from the fountain 'Ain-el-Feshlifuht, on the west, directly across to the castern shore, was nearly 8 statute miles. The somudings gave 696 feet as the greatest
depth. Another line was ran diagonally from the same point to the sonth-east, tow chasm forming the autlet of the hot-springs of Callirrhois. The bottom of the northern half of the sea is almost an entire phain. Its meridional lines at a short distance from the shore scarce vary in depth. The deepest soundings thus far are 188 fathoms, or 1128 feet. Near the shere the bottom is generally an incrustation of salt; but the intermediate one is soft, with many rectangular crystals, mostly cubes, of pore salt. The southern half of the sea is as shallow as the northern one is deep, and for about one-fourth of its entire length the depth does not exceed 3 fathoms or 18 feet. Its southern bed presented no crystals, but the shores are lined with iocrustations of salt. Thus, then, the bottom of the Dead Sea forms two submerged plains, an elevated and a depressed one. The first, its southern part, of sliny mud covered by a shallow bay: the last, its northern and largest portion, of mod with incrustations and rectangular erystals of salt, at a great depth, with a narrow ravine ruaning through it, corresponding with the bed of the river Jordan at one extremity and the Wady-el-Jeib at the other. The opposite shons of the peninsula and the west coast present evident marks of disruption.
2. Dimensions. - It will have been seen that the ancient authorities differ widely as to the size of the sea: Diodorns stating it at 500 stadia by 60 ; Pliny at 100 miles in length, by 25 miles in its widest, and 6 miles in its narrowest part; Josephus at 280 stadia by 150 . Strabo's measure evidently belongs to the Sirbonis Lacus, with which he confounded the Dead Sea, and is copied from Diodorus's description of that lake. Of these measures the earliest, viz. that of Diodorus, comes nearest to modern measurement. We bave seen that a straight line from 'A in-el-Feshkhah to the east shore meastared nearly 8 statute miles: from 'A in Jidy directly across to the mouth of the Arnon the distance was about 9 statute miles. The length of the sea does not seem to have been measured by the Americans, but the near agreement of their actual measurement of the width with the computation of Dr. Robinson may give credit to his estimate of the length also. Hlis observations resulted in fixing the breadth of the sea at 'A in Jidy at about 9 geographical miles, and the length about 39,-Ain Jidy being situated nearly at the milde point of the western coast. (Bib. Res. vol. ii. p. 21\%.)
3. Saltness and specific Gravity. - Its excessive saltness, noticed by Josephus, is attested by all travellers; and is indicated by the presence of crystals of salt in profusion over the bed of the sea, -" at one time Stellwagen's lead brought up nothing but erystals," - as well as by the district of rock-sult at the south-west quarter of the sea, where the American officers discovered "a lofty, round pillar, standing detached from the general mass, conposed of solid salt, capped with carbonate of lime, cylindrical in frout and pyramidal behind, about 40 feet high, resting on a kind of oval pedestal from 40 to 60 feet above the level of the sea." (Lyneh, Expedition, p. 307.) In the sonthern bay of the sea, where the water encroaches more or lesa according tu the scason, it dries off into shallows and small pools, which in the end depusit a salt as tine and as well bleached, in some instances, as that in regular salt-pans. In this part, where the salt water stagnates and evaporates, liby and Mangles "found severat persons engaged in
peeling off a solid surface of salt, several inches in thickness; they were collecting it and loading it on asses." (Travels, p. 139.) It has been sometimes asserted that the water is so saturated with salt that salt cannot be dissolved in it. The experiment was tried by Lieut. Lynch with the following result: - "Tried the relative density of the water of this sea and of the Atlantic - distilled water being as 1. The water of the Atlantic was 1.02 , that of this sea $1 \cdot 13$; the last dissolved $\frac{1}{1}$, the water of the Atlantic $\frac{1}{5}$, and distilled water $\frac{5}{17}$, of its weight of salt. The boats were found to draw 1 inch less water when afloat upon this sea than in the river." (Lynch, p. 377.) The experiment tried hy Vespasian has heen repeated by nearly all travellers, of course with the same result. The density and bunyancy of the waters is such that it is impossible to sink in it. "A muscular man floated nearly breast ligh, without the least exertioo." Sereral analyses of the waters have been made with various results, to be accounted for, as Dr. Robinson supposes, by the various states of the sea at different seasons; for its hody of water is increased to the height of 7 feet or more in the rainy season (Lynch, p. 289), or, according to Dr. Robinson, 10 or 15 feet; for he found traces of its ligh-water mark, at the sonth end, in the month of Nay, more than an hour south of its limit at that time. The following are the results of the analyses, the standard of emparison for the specific gravity being distilled water at 1000:-

(Rubioson, Bib. Res. ii. pp. 224, 225.)
Fussegger says:-" The excessive saltness of the Dead Sea is easily accounted for by the washing down of the numerons and extensive salt-beds, which are peculiar to the formation of the basin, in which also are found bituminous rocks in sufficient quantity to enable us, withont doing violence to science, to explain scveral chemical and physical peculiarities of this lake-water by the contioual contact of these rocks with water strongly impregoated with salt." (Reisen, p. 207.)
4. Evaporation. - The enormous quantity of water brought down by the Jordan, particularly in the rainy season, and by the otber streams around the Dead Sea, some of which are very considerable, - as e, g. the Aruon was found to be 82 feet wide and 4 feet deep at its mouth, - is all carried off by evaporation; and, when the small extent of the sea is considered, it is clear that the decomposition of its waters must be very rapid. The ancient writers speak of a noxious smell, of bubbles like those of builing water, of much soot, and an invisible vapour, tarnishing all metals, and deleterious to the inhabitants: aod its change of aspect tbrice a day may also lhe ascribed to the same canse. Now it is remarkable that nearly all tbese pbaenomena have been noticed by recent explorers, and the single one which is not confirmed is accounted for in a manner which must ezermpt the ancient geographers from
the charge of misrepresentation or exaggeration; and it may well be believed that the enormous chemical processes, perpetually going forward in the depths of the sea, may occasionally produce effects upon the surface which have not been chronicled by any modern traveller. Lient. Lynch, while eacamped near Engedi, remarked, "a strong smell of sulpharetted lydrogen," though there are no thermal springs in this vicinity; and again, " a foetid sulphureons odour in the night;"-" the north wind, quite fresh, and accompanied with a smell of sulphur." Lieut. Molyneux detected the same disagreeable smell the night he spent upon the sea, which he ascribed to the water (Journal of the R. Geog. Soc. vol. xviii. p. 127, 1848.) But Lieut. Lynch states that, "although the water was greasy, acrid, and disagreeable, it was perfectly ioodorous." He is therefore inclined to attribute the noxious smell to the foetid springs and marsbes along the shotes of the sea, increased, perhaps, by exhalations from stagnant pools in tbe flat plain which bounds it to the north. (Expedition, pp. 292, 294, 296, 300.) The "pale-blne misty appearance over the sea." "the air over the sea, very misty," and "the two extremities of the sea misty, with constant evaporation" (p. 294), are other notes indicating the unnatural state of the atmosphere surcharged with the gases disengaged by the process. On a stormy night "the surface of the sea was one wide sheet of phosphorescent foam, so that a dark object could bave been discerned at a great distance" (p. 281 ; comp. Molyneux, l. c. p. 129). A kind of mirage, noticed by many travellers, may be attributed to the same cause. "A thin haze-like vapour over the sonthern sea:-appearance of an island between the two shores" (p. 288). This phaenomenon is more fully noticed by Irby and Mangles: "This evening, at sunset, we were deceived by a dark shade on the sea, which assumed so exactly the appearance of an island that we entertained no doubt regarding it, even after looking throngh a telescope. It is not the only time that such a phaenomenon has presented itself to us; in two instances, looking np the sea from its southero extremity, we saw it apparently closed by a low, dark line. like a bar of sand to the northward ; and, on a third occasion, two small islands seemed to present themselves between a loug sharp promontory and the western shore. We were unable to account for these appearances, but felt little doubt that they are the same that deceired Mr. Seetzen into the supposition that be lad discovered an island of some extent, which we bave had opportunity of ascertaining, beyond all doubt, does not exist. It is not absolntely impossible, bowever, that he may have seen one of those temporary islands of bitumen, which Pliny describes as being several acres in extent." (Travels, p. 141.) Two effects of the heavy atmusphere of the sea remain to he noticed: one, the irresistible feeling of drowsiness which it induced in all wbo navigated it; the other, confirming, in a remarkable manner, the ancient testimonies, above cited, that the water appeared to be destrnctive to everything it touched, particularly metals; viz. that "everytbing in the boat was covered with a nasty slimy substance, iron dreadfully corroded, and looked as if covered with coal-tar." (Molyneux, l. c. p. 128.) The " huhbles like those of boiling water," mentioned by Strabo, may be identified with the curious broad strip of foum, lying in a straight line nearly north and sonth thronghout the whole length of the sea, which
aeemed to be constantly hubbling and in motion. (Nolyncux, p. 129: Lynch, pp. 288, 289.) And even the marvellous fact mentioned by Josephus, of the sea changing its colour three times a day, may derive some countenance from testimonies already cited, but more especially from the fullowing notice of Lieut. Iyneb: - " At one time, to-day, the sea assumed an aspect peculiarly sombre. . . The great evaporation enveloped it in a thin, transparent vapour, its purple tinge contrasting strangely with the extraordioary colour of the sea beneath, and, where they bleaded in the distance, giving it the appearance of smoke from burning salphur. It seemed a vast caldron of metal, fused but motionless" (p. 324): "in the forenoon it had looked like a shect of foam." In the afternoon, of the same day, it "verified the resemblance which it has been said to bear to molten lead;" "at night it had the exact hae of absintbe " (p.276). The earlier testimoay of Prime Radzivil may also he adduced, who, after citing losephus, adds, that be had had ocular proof of the fact: "Nam mave hahebat aquam nigricantem; meridie, sole intenso (sunt enim calores hic maximi) instar panni fit caerulea: ante occasum, ubi vis caloris remittit, lanquan luno permista, modice rubet, vel potius flavescit." (Ierosolymitana Peregrinatio, p. 96.) A familiarity aequired by three weeks' diligent esamioation did not remove the feeling of awe inspired by its marvels: "So sulden are the chauges of the weather, and so different the aspects it presents, as at times to seem as if we were in a world of enchantments. We are alternately beside and upon the brink and the surface of a linge and sonetimes seething caldron." (Lient. Lynch, Bib. Sacr. vol. v. p. 768.)
5. Bitumen. - It is to be regretted that the American expedition has thrown no new light on the production of the asphalt for which this sea was once so famous. Along almost the whole of the west coast numerons fragments of this substance are fond among the pebbles, but there is no record of any considerable masses or fields of it being seen by any European travellers in modern times; unless, as is suggested by lrby and Mangles, the imaginary islands may be so regarded. But it is curions that the traditions of the natives atill confinn the notice of Strabo that drops of pitch are distilled from rocks on the eastern shore;-a story repeated by varions Arab sheikhs to Seetzen, Burekhardt, and Robinson, the last of whom also meotions the fact of their belief that the large masses of bitumen appear only atter earthquakes. Thus, afterthe earthquake of 1834 . a lurge quantity was thrown upon the shore near tho south-wistern part of the sea, of which one tribe brought about 60 kuutârs into market (each kuntâr $=9 \mathrm{R}$ lhs.): and that after the earthquake of Jan. $1 \mathrm{st}, 183 \mathrm{~h}$, a Jarge mass of bitumen (one said like an island, anther like a house) was discovered floating on the sea, and was driven aground on the west side, nut far to the north of Usdum. The Arabs swam off to it, and ent it up with axes so as to bring it ashore; as Tacitus tells us was done in his times, though he mentions what he cousidered the less prohable account of its flowing as a black lipuid into the ships in a perjectual struam. (Robinson, Bib. R/3. vol. ii. pp. 228-231.) That the water of this sea is destructive of all minal life, as all the incients held, seems sufficiently proved; for althoughe shells have been found on the shore, they hove heen evidently washed down by the Jordan or o: her fresh water streaus, and their inmates de-
sfroyed by the rea water ; while the birds that bave been occasionally seen on its surface may bo regarded as denizens of those same streams: and no animal life bas been discovered in its waters.

## V. Volganic Phaenomexa.

Something must now be said of the various theories by which it has been attempted to acconut for the wonderful phaenomena above recorded of the depression of the Ghor, or Walley of the Jordan : amd of the formation and plysical constitution of the Dead sea. All theories suppose volcanic agency: and it is warthy of observation that, while the earliest historical and poetical records of the country bear witness to a familiarity with such phaenomena, the existing geological monuments confinn the testimony. Independently of the igneous agency by which the cities of the plaio were destroyed, much of the descriptive imagery of the psalmists and prophets is borrowed from volcanos and earthquakes ; while there are evidences of an eartbquake of very grrat and probably destructive riolence during the reign of Uzziah, king of Judah, which formed a kind of era in the history of the country, being alladed to after aut interval of 300 years. (Amos, i. I; Zechariak, xir. 5.) The existing phaenomena may be briefly mentioned, beginaing with one recently discovered by the American explorers, of whom " Ml . Aulick reports a volcanic formation on the cast shore, and brought specimens of Java" (p. 280). The monntain knowa as Jebel Misa, at the northeast of the Dead Sca, composed entirely of black bituminous limestone, which burns like coal, has not been investigated so fully as it deserves: bnt the hasaltic columns in the vicinity of the sea of Tiberias lave been frequently noticed by travellers. The thermal forntains of Callirrhoë, Gadara, and Tiberias complete the chain of evidence, and render it highly probable that the extinct volcano noticed by Dr. Rubinson at a short distance north-west of Safed, the Frank Mountain, and others, may bave been active during the listorical period, and furnished the pocts and prophets with the sublime imagery of the Bible. Having then discovered the agent of the geological changes that the country has passed through, it may be interesting to hear the opinion of two eminent and scientific writers on the grest problem uuder consideration.

Ruswegger, who has himself carcfully examined the phamomena of the country and tested the observations of preceding travellers, thas sums up the results (Reisen, p. 205):-
" From its exit from the lake of Tiberias to its entrance into the Dead Sea the Jordan has a tall of 716 Paris feet and thas lies ut the latter place 1341 Paris feet below the level of the Mediterranean sea. At the southen extremity of the Dead Sua lie the marshy lowhands of 31 ady-el-Ghor, the commencement of W'ady-el-Araba, and apparently very little higher than the Dead Sut itself. These lowlands join Wady-el-Araba, the bed of ahich rises gently to the watershed which separates the water system of the Dead sra from that of the lied Sea. As the watershed of Hady-el-Araba is spparently of no considerable height above the level of the sea, the length of this remarkable depression may be reckoned from the northern extremity of the plain EL-Butiheh (to the north of the sea of Tiberias) to this watershed, a distance of full three degrees. All the rock of this region consists of nor mal formations, anougst which those of the Jura and
chalk period prevail. It is in the northern part of this country alone that volcanic formations are found in considerable quantities. Nevertheless muck of the land in wbich volcanic rocks are not found bears evident marks of frequent rolcanic action, such as hot-springs; tbe crater-like depressions, such as the basin of Tiberias, and that of the Dead Sea, with its basaltic rocks ; the frequent and visible disturbances of the strata of the normal rocks, the numerous crevices, and especially the frequent and violent eartbquakes. The line of earthquakes in Syria includes Hebroa, Jernsalem, Nablus, Tiberias, Sofed, Baalbek, Aleppo, from thence takes a direction from southwest to north-east, follows the direction of the central chain of Syria, runs parallel to that of the valley of the Jordan, and bas its termination northwards, in the volcanic country on the slope of Tanrus (Giour Dogh ), and southwards in the mountain land of Arabia Petraea. At several places branches of this great roleanic crevice appear to stretch as far as the sea, and to tonch Jafju, Acre, Beirüt, Antioch, - unless,indeed, there be a second crevice, parallel to the first, running along the coast, and connecting the above places. I an of opinion that such is the case, and tbat there exists also a third crevice, coinciding with the direction of the valley of the Jordan, and united to the principal crevice above mentioned at its northern extremity. This supposition will account for the depression of the valley of the Jordan. At the time of the destruction of Sodom aod Gomorrah the surface of the crevice opened, and the great depression of the ground from Jebel-es-Sheich to the watershed in Wady-ll-Araba followed. The difference of the resistance arising from local circumstances, the volcanic eruptions connected with this phaenomenon, the local form of the land, and the differeat depths of the chasm then formed, caused a more or less extensive depression, and created along the clasm crater-like bollows, some of extraordinary depth, as the basin of Tiberias and that of the Dead Sea. These hollows, as is nsnal in snch cases, became filled with water, and formed a system of lakes. Next the waters from the sides of Jebel-es-Sheich forned the principal stream of Jordan connecting these lakes, baring overflowed them successively, This however was not the case with the Dead Sea. The watershed of Wady-el-Araba is probably much more ancient than the depression ; and as the Red Sea, judging by the geognostic nature of Wady-lAraba, formerly seems to have extended so far inland, this barrier mast have existed at the time of the depression, since otherwise the Red Sea would have barst into the hollow formed by the sinkiog of the land. If, bowever, there existed before the time of the depression a regular fall throughout the wbole valley to the Red Sea, it is natural to suppose that at that time the Jordan flowed into the Red Sea, and that when the depression took place its course was interrupted. However this may have been, after the depression the filling of the basin of the Dead Sea continued natil it became of such superficies, that the eraporation of the water was equal to the influx. The appearance of its sbores proves that, owing either to a greater influx of water during rainy seasons, or to a less copious evaporation caused by circumstances of temperature, the sea at one time was consideraby higber than at present."
Professor Danbeny introduces his theory with other notices of volcanic agenoy collected from modern books of travel. (Dr. Daubeny, A Description of aclice and extinct Volcanos, gc. 2nd ed. pp. 350-363.)
"If we proceed soutbwards, from the part of Asia Minor we have just been considering, in the direction of Palestine, we shali meet with abundant evidences of igueons action to corroborate the acconnts tbat bave beea handed down to us by ancient writers, whether sacred or profane, from both which it might be inferred that volcanos were in activity even so late as to admit of their being included within the limits of anthentic history. (Nahum, i. 5, 6: Micah, i. 3, 4; Isaiah, Ixiv. 1-3; Jer. li. $25,26$.
"The destruction of the five cities on the borders of the lake Asphaltitis or Dend Sea, can be nttributed, I conceive, to nothing else than a voleabic eruption, judging both from the description given by Moses of the manner in which it took place ( $G e n$. six. 24, 25, 28 ; Deut. xxix. 23), and from the present aspect of the conntry itself.
"Volney's description of the plesent state of this conntry fully coincides with this view, (Tracels in Egypt and Syria. vol. i. pp. 281, 282.)
"' The south of Syria', he remarks, 'that is, the hollow through whicb the Jordan flows, is a country of volcanos: the bituminous and sulphureons sources of the lake Asphaltitis, the lava, the pumice-stones thrown upon its banks, and the hot-baths of Ta baria, demonstrate that this valley bas been the seat of a subterraneons fire, which is not yet extinguisbed. Clouds of smoke are often observed to issue from the lake, and new crevices to be formed upon its banks. It conjectures in such cases were not too liable to error we might suspect that the whole valley las been formed only by a violent sioking of a country which formerly poured the Jordan ioto the Mediterranea. It appears certain, at least, that the catastropbe of five cities destroyed by fire must bave been occasioned by the cruption of a volcano then burning.
"' The eruptions themselves have ceased long since, but the efficets which nsually succeed them still continue to be felt at iotervals in this country. The coast in general is subject to earthquakes; and history notices several which have changed the face of Antioch, Laodicea, Tripoli, Berytus, Tyre, and Sidon. In our time, in the year 1759, there bappened one which caused the greatest ravages. It is said to lave destroyed in the valiey of Baaibec upwards of 20,000 persons; a loss which bas never been repaired. For three months the shock of it terrified the inhabitants of Lebanon so much as to make them abandon their honses and dwell under tents.'
" In addition to these remarks of Volney, a recent traveller, Mr. Legh (see his acconnt of Syria, attached to Macmichael's Journey from Moscow to Constantinople), states that, "on the soutb-east side of the Dead Sea, on the right of the road that leads to Kerak, red and brown hornstone, porphyry, in the latter of which the felspar is mach deewmposed, syenite, breccia, and a heavy black amygdaloid, containing white specks, apparently of zeolite, are the prevailing rocks. Not far from Shubec, where there were formerly copper mines, be observed portions of scoriae. Near the fortress of Shobec, on the left, are two volcanic craters; on the right, one. The Roman road on the same side is formed of pieces of lava. Masses of rulcanic rock also occur in the valley of Ellasar.
"The western side of the valley of the Jordan, according to Russegger, is composed of Jura limestone, intersected by numerous dykes and streams of basalt,
which, with its derp fissures, the eartinquakes to which it is subject, and the saline sulphureons springs, which have a temperature of $46^{\circ}$ cent., attest the volcanic origin of this depression.
" The other substances met with in the neighbonrhood are no less corroborative of the cunse assigned. On the shore of the lake Mr. Manndrell fonnd a kind of bituminons stone, which 1 infer from his description to be analogons to that of liadnsa in Sicily.
" it would appear that, even antecedently to the eruption mentioned io Scripture, bitnmen-pits abounded in the plain of Siddim. Thus, in the account of the battle between the kings of Sodom and Gomorrah and some of the neighbouring princes (Gen. siv.), it is said, 'And the vale of Siddim was full of slime-pits,' which a learned friend assures me ought to be translated fountains of bitumen.
"But besides this volcanic ermption, which brought about the destruction of the cities, it would appear that the very plain itself in which they stood was obliterated, and that a lake was formed in its stead. This is collected not only from the apparent nonexistence of the valley in which these cities were placed, but likewise from the express wurds of Scripture, where, in speaking of the wars which took place between the kings of Sodom and Gomorrah and certain adjoining tribes, it is added that the latter assembled in the vale of Siddim, which is the Salt (i.e. the Dead) Sea.
"It is therefore supposed that the lake itself occupies the site of this once fertile valley, and that it was produced by the waters of the Jordan, which, being without an ontlet, would fill the hollow until the surface over which they spread thenselves proved sufficiently large to canse the luss arising from evaporation to be equivalent to the accessions it received from the rains and snows of the mountains in which it took its rise.
"This hypothesis assumes that previously to the existence of the Dead Sea the Jurdan mist have had atl outlet, either into the Mediterraneas or into the Red Sea; and accordingly when it was discovered by Burckbardt, that there actually existed a lungitudinal valley, parallel to the course which the Jordan tuok before it reached the Dead Sea, as well as to the larger axis of that expanse of waters, ramning from north to south, and extending from the southern termination of the Dead Sea to the extremity of the gulf of Akaba, it was immediately concluded that this valley was in fact the former bod of the Jurlan, which river, consequently, prior to the catastrophe by which the Dead Sea was produced, bud flowed into this arm of the lied Sea.
"Bricfly, then, to recapitulate the train of phaenomena by which the destruction of the cities might have been brought about, I would suppose that the river Jordan. prior to that cvent, continued its course tsanquilly through the great longitudinal valley called $\begin{aligned} & \dot{L}-\text {-Arabah, into the gulf of Akaba; that a }\end{aligned}$ shower of stumes and sand from some neighbouring volcano first overwhelmed these places; and that its eruption was followed by a depression of the whole of the region, from some puint apparently intermediate between the lake of Tiberias and the mountains of Lebanon, to the waterslurd in the parallel of $30^{\circ}$, which oecurs in the valley of $E 2$-A rabah above mentioned. 1 would thence infer that the waters of the Jordan, pent up within the valley by a raupe of mountains to the east and west, and a barrier of elerated t.ble-land to the south. could find no ontlet.

PALAESTINA.
and consequently by degrees formed a lake in its most depressed portion; which, however, did nut occur at once, and therefore is not recorded by Scripture as a part of the catastrophe (see the passage in Ezekiel, xlvii. 8, indicating, if it be interpreted literally, the gradual manner in which the Dead sea was formed, and likewise perhaps the existence of a tradition that its waters once had their oxit in the Red Sea), though reference is made in another passage to its existence in what was before the ralley of Siddim.
"If, as Robinson states, extensive beds of salt occur immediately round its margin, the solntion of the contents of these by the wators of the lake would account for their present composition, its saltness increasing nearly to the puint of saturation, owing to the gradual accession of waters from above, which, on evaporating, would leave their salt behind; whilst the bitumen might either have existed there previonsly as a consequence of antecedent volcanic eruptions, or bave been produced by the very one to which reference is bere made.
${ }^{4}$ I do not, however, see what is gained ly attributing the destruction of these cities, as some bave preferred to do, to the combnstion of these beds if bitmmen, as the latter could have been inflamed by no natoral agent with which we are acquainted except the volcano itself, which therefore must in any case be supposed instrumental, and, being invoked, will alone enable us to explain all the facts recorded.
"It mast at the same time be confessed that much remains to be done before this or any other explanation can be received as established; and 1 an disappointed to find that anoongst the crowds of travellers who have resorted to the Holy Land within the last twenty years, so few bave paid that attention to the physical structure of the country which alone conll place the subject beyond the limits of doubt and controversy.
"Tbe geologist, for instance, wonld still find it worth his while to search the rocks which bound the Dead Sea, in order to discorer if possible whether there be any crater which might have been in a sta:e of oraption at the period alluded to; be should ascertain whether there are any proofs of $n$ sinking of the gronnd, from the existence of rapids anywhere along the course of the river, and whether sonth of the lake ean be discovered traces of the ancient bed of the Jordan, as well as of a barrier of lava stretching across it, which latter hypothesis Von Buch, 1 perceive, is still inclined to support; nor should be onit to examine whether vestiges of these devoted cities can be fuund, as some have stated, submerged beneath the waters, and buried, like Pompeii, under heaps of the ejected materials."

## V1. Ihtstomcal Geography.

1. Earliest period. - The first notice we have of the inhabitants of Palestine is in the days of Abraham's immigration, when the Camaanite was in the land, from whon it received its earliest appellation, "the land of Canaan." (Gen. sii. 5, 6, xiii. 7,12, sec.) The limits of their country are plainly defined in the genealogy of Canaan; hat its distribution among the various families of that patriarch is nowhere clearly stated. "Canaan begat sidon lis tirst-born, and Ileth, and the Jebusite, and the Atnorite, and the Girgasite, and the Hivite, and the Arkite, and the Sinite, and the Arvadite, and the Temarite, and the llamathite: and afterwands were the fanilies of the Canamites spread abroad. And
the border of the Canaanites was from Sidon, as thou comest to Gerar, unto Gaza; as thou goest wuto Sodom, and Gomorrah, and Adnah, and Zebrim, eren unto Lasha " (x. 15-19). As sereral of these names occur no more in the history of Palestine, we must suppose either that the places reappear under other names, or that these tribes, having originally settled within the limits here assigned, afterwards migrated to the north, where we certainly find the Arvadites and Hamathites in later times. Of the eleven families above named, the first six are found in the subsequent history of the country: the descendants of Sidon on the coust to the north; the children of Heth in Hebron, on the south; the Jehusites to the north of these, in the highlands about Jerusalem; the Amorites to the east of the Hittites, on the west of the Dead Sea; the Girgashites, supposed to be a branch of the Hivites next nanied, who were situated north of the Jebusites in Shechem and its vicinity. (Gen. xxxiv, 2.) The coast to the south was wrested from the Canaanites in very early times, if they ever possessed it; for throaghout the records of history the Philistines, descendants of Sizraim, not of Canaan, were masters of the great western plain (x. 14). The distribution of the country anong these tribes is involved in further confusion by the introduction of the Perizzites with the Canaanites as joint occupiers of the country (xiii. i), and by the fact of the Canaanites appearing as a distinct tribe, where the Hittites, the Amorites, the Girgashites, and the Jebusites, who were all alike Canaanites, are severally enumerated (xr. 19-21). It would appear also that while the name Canaanites was used in a more restricted sense in the last cited passage, the names of the particular families were sonetimes used in s wider acceptation; which may account for the Hittites, whose seats we have already fixed to the south of Jerusalem, being found to the north of that city, in the neighbourbood of Bethel. (Judges, i. 26.) It may be, bowever, that the seats of the several tribes in those early times were not fixed, but fluctuated with the tide of conquest or with the necessities of a pastoral people : an example of the former may be found in the victories of Chedorlaomer (Gen, xiv.), and of the latter in the many migrations of Abraham with his numerons dependents, and of his descendagts, which fially transferred the whole of bis posterity into Egypt for a period of four centuries (sii. 6-10, siii. 14,18, xx 1, xxri. 1, \&c.). To attempt to trace these variops migrations were a fruitless task with the very scanty notices which we possess ; but the nurnber and general disposition of the Canaanitish tribes at the periud of the Eisodus of the Israelites ander Joshua mny be approximately ascertained, and aid in the description of the distribution of the land among the latter. The tribes then in occupation of the land are said to be seven (Deut. vii. 1), and are thus enumerated:-"Canaanites, Hittites, Amorites, Perizzites, Hivites, Jebusites," only six (Exod. iii. 8, 17, xxxiii. 2); but in Deuteronomy (l.c.) and Joshua (iii. 10) the Girgashites are added, which completes the number. Of these the Amorites occupied the southern border, or probably shared it with the Armalekites, as it was with the latter that the Istaelites were first brought into collision. (Exod. xvii. 8,9 ; Numb. xiv. 25, 43-45.) This was therefure called "the Mount of the Amorites" (Deut. i. 19, 20); and their relative position with regard to the other tribes is thus clearly stated: -
"The Amalekites dwell in the land of the south, and the Hittites, and the Jelusites, and the Amorites (Joshua, xi. 3, adds the Perizzites) dwell in the mountains: and the Canaanites dwell by the sea, and hy the coast of Jordan." (Numb, xiii. 28.29.) The limits of the Amorite territory are further defined by the confederacy of the five sheikhs of Jerusalem, Hebron, Jarmuth, Lacbish, and Egion, all of whom were Amorites (Josh. s. 5) ; while the hill-country immediately to the north and west of Jerusalem, comprisiag Gibeon, Chephirah, Beeroth, and Kir-jath-jearim was held by the Hivites (ix. 3, 7, 17, xi. 19), who are also found, at the same period, far to the north, "under Hermbn in the land of Mizpel" (xi. 3; Judges, iii. 3), as two large and powerful kingdoms of the Amorites coexisted on the east of the Jordan [Amorress], the older inhabitants having been drivea out. It is worthy of remark that during the occupation of Palestine by these Canaanites it is already called "t the land of the Hebrews" or Heberites, which can only be accounted fur by an actual residence in it of Heber himself and his race, which goes far to prove that the Canaanitish tribes were only intruders in the Land of Promise. (Gen, x]. 15; see Christian Remembrancer, vol. xviii. p. 451.) For fuller details reference may be made to Reland (Palaestina, cap. xxvii. pp. 135-141) and Buchart (Phaleg. lib, iv. capp. 34-37).
2. Second period. - We have now to consider the division of Palestine among the twelve tribes of Israel, on the settlement of the land hy Joshua the son of Nun; and the Scripture statement compared with Josephus will furnish numerous landmarks, which a more careful survey of the country than bas yet heen made would probably bring to light at the present day. To begin with the cis-Jordanic tribes:-

Judah, Simeon, Dan.-The south border of Judah was bouoded by the country of Edom and the wilderness of Zin; the frontier being plainly defined by a chain of hills, of considerable elevation, forming a natural barrier from the southern bay of the Dead Sea on the east to the Mediterranean on the west, in which lice the following points are named, viz., the ascent or pass of Acrabhim, Zin, Kadesh-Bamea, Hezron, Adar, Karkaa, Azmon, the river of Egypt. The east border extended along the whole length of the Dead Sea to the mouth of the Jordan, from which the north horder was drawn to the Mediterranean along an irregular line, in which Jerusalem would be nearly the middle puint. The rand from Jerusalem to Jericho passes immediately within the line, and 'Ain-er-Ressüh, W'ady Kelt, Kulaat-edDammin, and 'Ain or Kusr Hajlah, are ea-ily identified with Enshemesh, the river, Adummim, and Beth-hogla. It passed south of Jerusalen, fiom Enrogel up the ralley of Hinnom, by Nepbtoah, Mount Eplion, Kirjath-jearim, Bethsbemesh, Timnah, Ekron, Stichron, and Jabneel. Tbeir cities were, as stated in the sumuary, 29 in number, in the south division of the tribe, on the borders of Edom; but the names, as recounted in the Enslish version, are 39. The discrepancy is to be accounted for, as Reland remarks, by several of the words, regarded as proper, or separate names, being eapable of translation as appellatives or as adjuncts to other names. In the valley, including under that name the declivity of the western plain and the plain itself, there were $14+16+9-39$ towns, with their villages, besides the cities of the Plulistiucs
vol. i.
between Fkrou and Gaza, whieh the 1sraelites did not occupy; in the mountains $11+9+10+6+2=$ 38 cities, with their villages; and in the wilderness, i. e. the western side of the Dead sea, 6 towns and their villages; in all, according to the Hebrew version, no less than 112 towns, exclosive of their future capital, of which the Jebusite still held possesaim. But the Septuagint version inserts the names of 11 other cities in the moontain district, anong which are the important towns Bethlebern anil Teken, which would make the totai 123 in the tribe of Judah alone, implying an enormons popoJation, even if we admit that these towns were only large villages with scatteied hamlets. It must be remarked, however, that the tribe of Simeon was compreliendel within the limits above assigned to the tribe of Judah; and that 17 cities in the south of Judid nre referred to Simeon, as is expressly stated: "Out of the portion of the children of Judah was the inheritance of the children of Simeon: for the part of the children of Jodah was too much for them: therefore the children of Simeon bad their inheritance withiu the inheritance of them" (Josh. xis. $1-9$.

As simeon possessed the sonthern part of the territory assigned to Jodah, so did the tribe of Dan impiuge upon its north-west border; and in the list of its seventeen cities are some hefnre assigned to Judah (Josh. xix. 41-46); a limited extent of territury on the confines of the plain of the Philistines, from which they early sent out a colony to the extreme north of the Holy Land, where their city, synonymous with their tribe, situated at the southern base of Mount Hermon, became proverbial in lstacl for the worship of the golden calf. (Judges, xviii.)

Benjaniin.-The tribe of Benjatnin wa, bonnded hy Judah on the south, by the Jurdan on the east, The nurthern line was diawn from Jericho westward through the mountains, by Bethel and Ata-roth-alar, to a hill that lay to the south of the Jower Beti-horon, from which point the boundary was drawn to Kujath-jearin of the tribe of Judah. They pnssessed twonty-six cities, inclading Jerusalom. (Jush. xviii. 11-28.) It is endent that Josephus is mistaken in stating that they extended in length from Jordan to the seat; tir it is clear that the tribe of Dan and the plain of Philistia lay between them and the Meliterranean. His remark that the width of their territory was least of nill, is more accurate, though his explanation of the fayt may be doubted, when he uscribes it to the truitfuhies of the land, wlinel, be adds, comprehemied Jericho and Jerualern.

Ephirain.-The tribe of Ephraim was conterminon un the south with the tribe of Benjamin, as f.ur as the western extremity of the latter: from whenee it passed hy Tapptah and the river Kauah to the sen. On the east side are named Ataroth. addar and Beth-horon the upper, and on the north, luginnine at the sea and goinz east, Michmethah, Taamath-shduh, Jan-hah, Ataroth, Naarath, Jericho, and the Jordan. The cities of Ephraim are not catalosned; that it is remaked that "the separate cities for the chaldren of Liphaim were amnong the atheritance of the children of Manasseh, all tho arties with their villages" (swi. 5-9). Arcording to Jusephens it extended in width from Bethel even to the great plain of Wedracthos.

Mranasseh.- The promim of Manacel on the west of Jurdan was contignou- 20 that of $\mathrm{E}_{1} \mathrm{~h}$ aim, and appears to bave been alloted to the two tribes
jointly, as the same boundaries are assigned to buth ( $x$ vi. I-4, comp. 5-8 with xvii. 7-10), hut in general the southern part was Ephraim, and the aorth Manasseh, which latter also possessed towns in the borders of Asher and Issschar, as Bethshean and Endor, on the east, in Issachar, and Taanach, Megiddo, and Dor, on the west, in Asher (ver. 1t). It will have been seen that these twin tribes did not extend as far as the Jordan eastward, but that their eastern boundary excluded the valley of the Jordan, and forned, with their northern boundary, a coived line from Jericho to the sea, south of Monnt Carmel.

Issachar:-This tribe cevered the whole of the north-east frontier of Manassels and Ephraim, and so comprehended the valley of the Jordan northward from Jerieho to Mount Tabor, and the eastern part of the plain of Esdraelon, in which Tabor is situated, containing sistees cities, among which were Shunem and Jezreel of Scriptore note, the latter for many years the capital of the kingdom of Isracl.

Asher-- To the west of Issachar was Asher, occopying the remaiader of the valley of Esdraelon, now the Plain of Acre, and extending along the coast of the Mediterranean, from Mount Carmel to Sidon. Our ignorance of the modern geography of Upper Galilee does not allow ns to assign its limits to the east; but there is little doubt that careful inquiry would still recoser the sites at least of some of their twenty-two cities, and so restore the eastern bondary of their territory, which extended along the western borders of Zebulon and Maphtali, which two tribes ocenpied the highlands of Galliee to the extremity of the Land of Promise.

Zebulun.- Of these two, Zebulun was to the snath, contiguous to Issachar, baving the sea of Tiberias for its eastern boundary, as far perhaps as the mouth of the northern Jordan. None of its twelve cities can now be identified with certainty; but Jiphia is probably represented by the modern village of Iapha, in the plain, not far to the soutla of Nazareth, which was certainly sitnated within the borders of this tribe; and Bethlehem may, with great probability, be placed at the modern village of Beitlahem, not far from the roins of Sepphouri to the north-west. [CaEsarea-Dio.]

Nuphtali,- The northermnost of the tribes was Naphtali, bounded by the Upper Jordan on the east, from its source to its month, near which was situated the city of Capernaum, expressly declared by St. Matthew to have been in the borders of Zebulum and Naphtali (iv. 13). On the south was Zebulun, on the west Asher, and on the north the roots of Libanos and the valley of Coelesyria, now called the Belkaa: Of their mineteen cities Kedenh is the must noted in Seriptare hustory; and its ruins, existing under the same name at this day, attest its ancient importance. Jusephos absurdly extends their tentitory to Damascos, if the reading be not corrupt, as Reland suspects.

Ilaving completed this sorvey of the tribes, it may be remarked in :unticipation of the following section, that the subsequent divisions of the country followed very much the divisions of the tribes: thus the district of Judara was formed by grouping together the tribes of Judah, Simeon, Dan, and Benjunin; Sunaria was coextensive with Ephraim and the lalf of Manasseh; Insachar and Asher necupied Lower Galitee; Zebnlun and Naphtali Upper Galilee.

Trans-Jorckanic tribss- $\mathbf{A}$ few wurds must be
added concerning the two tribes and a half beyond Jordan, althongh their general disposition has been anticipated in the account of the nations whom they dispossessed. [Amorites.]

Reuben, Gad, and half Manasseh.-The southern purt of the old Amorite conquests on the east of Jordan was assigned by Moses to the Renbenites, whose possessions seem to have been coextensive with the kingdom of Sihon, king of the Amorites, whose capital was at Heshbon. [Hzsbon.] There is, however, some apparent confnsion in the accounts; as while Reuben is said to have possessed "from Aroer by the river Arnon,... Heshbon, ... and all the kingdom of Sibon king of the Amorites," Gad is also said to bave had "the rest of the kingdom of Sihon;" and while Gad is said to have beld "all the cities of Gilead," Maoasseh is said to bave had "half Gilead." (Josh. xiii. comp. ver. 21 with 27, and 25 with 31 ); white from Numbers ( $x x$ xii. 39 -42) it wonld appear that Manasseh possessed the whole of Gilead. As the 1sraelites were not permitted to occupy the country which they found still in passession of the Ammonites, but only so much of it as had been taken from them by sihon king of the Amorites, the limits of the Israelite possessions tomards the Ammonites are not clearly defioed [Aumoxitae; Bashan]; and it may be doubted whether the distribution of the country among the two tribes and a half was not regulated rather by convenience or- the accident of conquest than by any distinct terntorial limits: certain it is that it wonld be extremely difficult to draw a line which should include all the cities belonging to any one tribe, and whose sites are fixed with any degree of certainty, aod yet exclude all other cities mentioned as belonging to one of the other tribes. Generally it may be said that the possessions of Gad aod Reuben lay to the south and west of the trans-Jordanic provinces, while those of Manasseh lay in the monntains to the east of the Jordan valley and the lake of Gennesaret. It is plain only that the Jordan was the border of the two former, and that of these the tribe of Gad held the northern part of the valley, to "the sea of Chinnereth." (Josh. xiii. 23, 27.) When the Gadites are said to have built nine cities, the Reubenites six, it can only be understood to mean that they restored them after they had been dismantled by their old inhabitants, as in the case of Machir the son of Manasseh it is expressly said that he occupied the cities of the dispossessed Amorites. (Numb. xxxii. 34-42.) It may, perhaps, be concluded from Deut. iii. 1-17 that, while the kingdom of Sihon was divided between the tribes of Gad and Renben, the whole kingdom of Og was allotted to the half-tribe of Janasseb; as, indeed, it is highly probable that the division of the land on the west of Jordan also followed its ancient distribution among its former inbabitants.

It is remarked by Reland, that the division of the land by Solomon has been too commonly overlooked, for, althongh it had regard only to the provision of the king's table, it is calculated to throw considerable light on sacred geography. The country was diviled into twelve districts, under superior officers, several of whom were allied to the king by marriage, each of which districts was made chargeahle with victualling the palace during one month in the year. Whether these divisions had any further political significancy does not appear, but it is difficult to imagine that any merely sumptaary exigences would have suggested such an elaborate araange-
ment. The divisions agree for the most part with those of the tribes. ( 1 Kings, iv. 7-19.)
3. Third Period.-We have no distinct accomnt of the civil division of the country on the return of the Jews from the captivity, and during its subsequent history, until it was reduced to a Roman province, Under the Persians, the title of "governor on this side the river," so frequent in the books of Neliemiah and Ezra, and the description of the strangers, colonists of Samaria, as "men on this side the river" (Eupbrates), probably indicates the only designation by which Palestine was known, as a comparatively small and insignificant part of one of the satrapies of that enormons kingdom. (Ezra, iv. 10,17, v. 20 , vi. 6, \&c.; Neh. ii. 7 , iii. $8, \& \mathrm{cc}$.) Among the Jews, the ancient divisions were still recognised, but gradually the larger territorial divisious superseded the tribual, and the political geography assumed the more convenient form which we find in the New Testament and in the writings of Josephns, illustrated as they are by the classical geographers Pliny and Ptolemy.

The divisions most familiar to the readers of the New Testament are, Judaea, Galilee, Samaria, Decapolis, and Peraea. in which is comprehended the whole of Palestine, with the exception of the seaborder, the northern part of which is called "the coasts of Tyre and Sidon" by the evangelists, and comprebended noder the name of Pbonice by Josephus and the classical geographers. The three first-named districts are very clearly described by Josephus; and his account is the more valuable as confirming the descriptions contained in the Bible of its extreme fertility and populonsness, which will, however, present no difficulty to the traveller who has had the opportunity of observing the natural fertility of the soil in the parts still rudely cultivated, and the numerons traces of the agricultural industry of ancient times.

Galike, Upper and Lower.- "There are two Galilees, one called Lower, the other Upper, which are surrounded by Phoenicia and Syria. On the side of the setting sun they are bounded by the frontiers of the territory of Ptolemais, and Carmel, a mountain furmerly belonging to the Galileans, but at present to the Tyrians; which is joined by Gaba, called the 'city of knights,' because the koights disbanded by Herod dwell there; and on the sonth by Samaris and Scythopolis, as far as the river Jordan. On the east it is bounded by Hippene and Gadaris, and Gaulanitis and the frontiers of Agrippa's kingdom. The northern limit is Tyre and the Tyrian territory That mlich is called Lower Galilee extends in length from Tiberias to Chabulon, near which on the sea-coast is sitnated Ptolemais. Its greatest breadth is from a village called Xaloth, situated in the great plain, to Berbase; from which place also the breadth of $L_{\text {Pper }}$ Galilee commeoces, extending to a rillage named Baca, which separates the Tyrian territory from Galilee. In leugth, Upper Galilee reaches to Meroth from Thella, a village near the Jordan.
"Now the two Galilees, being of such extent, and surrounded by foreign nations, have always resisted every hastile invasion; for its inbalitants are trained to arms from their iofancy, and are exceedingly numerons; and neither have the men ever been wanting in courage, nor the conntry suffered from pancity of inhabitants, since it is rich, and favourable for pasture, and planted with every rariety of tree; so that by its fertility it invites even those
who are least given to the pursuit of agricultare. Every part of it, therefore, has been put under cultivation hy the inhabitarts, and none of it lies idle; but it possesses numerous cities and maltitudes of villages, all densely populated on account of its tertility, so that the smallest of them has more thant 15.00 s inlabitants.

Perace.-"On the whole, then, although Galilee is inferior to Peraca in extent, yet it is superior to it in strength. For the former is all under cultivation, and productive in every part; but P'eraen, although much more extensive, is for the minst part rugged and barren, and too wild for the culture of tender praduce. Nevertheless, whereser the soil is soft it is very proluctive; and the plains are eovered with various trees (the greater part is planted with olives, vines, and palms), and watered by mountain torrents, and peremial mells sufficient to supply water whenever the mountain streams are dried up by the heat. Its greatest Iength is from: Machaerths t.1 Pella, and its breadth from Philadelphia to the Jurdan. It is bounded on the north by l'ella, whici we have mentioned; on the west by the Jordan. Its southern boundary is Muabitis, and its eastern is Arabia and silbonitis, and also Philadelphene and lierasa.

Samarit. - "The conntry of Samaria lies between Juluea and Galilee; for begioning at the village called Ginaea, situated in the great plain, it ends at the tingarchy of Acrabatta: its cbaracter is in no respect different from that of $\boldsymbol{J}$ udrea, for both abound in mountains and phains, and are suited for agriculture, and prowluctive, wooded, and full of fruits both wild and cultivated. They are not ahundantly watered; but much rain falls there. The springs are of an exceedingly sweet taste; and, on account of the quantity if good grass, the cattle there produce more milk than elsowhere. But the best proof of thrir richuess and fertility is that both are thickly populated.

Judaea.- "On the confines of the two countries stants the village Annath, otherrise called Borceos, the I oundary of Judaea on the north. The south of it, when me:isured by length, is bounded bs a village, which stands on the confines of Arabia, called hy the neighbouring Jews Jardan. In breadth it extends from the Jordan to Juppa, and in the centre of it lies the city Jernsalem; for which cause tire city is called by some, not without reason, the navel of the earth. Juiana is not deprived of the advanthger of the sea, as it extends along the sea-coast to 1tolembis. it is diviled into eleven districts, of which Jormsalem, as the seat of government, rules, taking precrilence over the surronnding country as the head over the horly. The other districts, after it. are distributed by toparclues. Guphna is second; after that, Acrabatta, then Thamna, Lydda, Ammais, Pella, Mhunara, Engaddae, Herodeum, Jerichus: then J.umbia and Jopp:, which take precedence of the neslanuming comery.
"Bevares these distrects, there are Gatmalitioa and (i,pulaniti). Batanawa, and Trachustitis, parts of the kingdom of Agrpas. Beximuing from Mount Libanus anat the suntece of the Jordan, this con-ntry reaches in broalth to the lake of Tiburias: its length is, trom a village ralled irpha tor Julias. It is inlabited by fewn and syriam mixed.
"Thus we have fiten an accutht, as short as was piscible, of Judata and the nei-hbouring regions."

Besiles this peneral dewription of the country according to its dusivins int the first century of the

Cluristian era, Josephus has inserted in his history special descriptions of several towns and districts, with details of great geographical interest and importance. These, however, will be found, for the most part, under their several names, in these volumes. [Aulon; Bashan; Esdraelon Vallis; Beles; Jemicho; Jertsalem; Tiaerias Mare, \&c.]

As the division of Gabinius does not appear to have had a permanent influence, it may be sufficient to notice it, before dismissing Josephus, who is our sole authority for it. He informs us that the Roman general having defeated Alexander the son of Aristobulus, and pacified the conntry, constituted five councils ( $\sigma v \nu \tilde{\delta} \bar{\delta} i \alpha$ ) in various parts of the country, which he distributed into so many equal divisions ( $\mu \mathrm{o}$ ipas). These seats of judicature were Jerusalem, Gadara, Amathus, Jericho, and Sepphoris in Galilee. (Ant. xiv. 5. § 4.) In the division of the country among the sons of Herod the Great, Judaea, Idutnaca (i.e., in the language of Josephus, the southern part of Judaca), with Samaria, were assigned to Archelauk, with the title of ethnarch. Aotipas had Galilee and Peraea, with the title of tetrarch, and Plilip, with the same title, Trachonitis, Auranitis, Batamea, and Paneas, mostly withont the limits of Palestine [rid. s. vr.]. (Aut. xvii. 13. § 4.) On the disgrace and banishment of Archelaus, in the 10th year of his reign, his government was added to tho province of Syria, and administered by a procurator subordinate to the prefect of Syria; the sume fate attended the tetrarelyy of Philip on his death in the twentieth year of Tiberius, until it was committed to Herod Agrippa by Cains Caligula, with the title of king, to which was added the tetrarchy of Lyssmias, and subsequently, on the banishment of Autipas, lis tetrarchy also; to which Claudius added besiles Judaea and Samaria, so that his kingdom equalled in extent that of his grandfather Herod the Great. On his death, his son, who was hut seventeen years old, was thought too young to succeed hito, and his dominions reverted to the province of Syria But on the death of Heroxl king ot Chalcis, that country was committed to the younger Agrippa, which was afterwards exchanged for the tetrarebies of Philip and Lysanias, to which Nero added the part of (iatilee about the sea of Tiberias, and Julias in the Deeapolis. After his death, in the third year of Trajan. there is no further mention of the tetrarchies (Reland, $P a$ luestina, lib. i. cap. 30, pp. 174, 175.)
The division into toparchies, mentioned by Josephas, is recognised also by Pliny, though their lists do not exactly coincide. Pliny reckons them as follows: -

1. Jericho.
2. Thamna
3. Emmaus.
4. Bethleptapbene.
5. Lydda.
6. Jорра.
7. Acrabata.
8. Oreine (in which was Jerasalem.)
9. Goplina.
10. Herodium.

Of these 8 and 9 are not reckoned by Josephus; but Reland is probably correct in his conjecture that 8 is identical with his Pella, and 9 with his Idumaea, as this district may well be deseribed as opewh, mounteinous. (Illin. Mist. Nat. v. 14.)

The other notices of Pliny are few and fracmentary, but agree in all essential partjculars with the synchronous but indejendent account of Josephus abovo cited.

Its geography had undergone little variation whea Ptoleny wrote in the following century, and the bricf notices of that yongrapice are as accurate as
nsual．He calls it Palaestina of Syria，otherwise called Judaea，and describes it as bounded by Syria on the north，by Arabia Petraea on the east and sonth．Independently of the coast of the Mediter－ rumean，he reckons the districts of Galilee，Samaria， Judaea，and Idumaea，but describes the Peraea，by a periphrasis，as the eastern side of Jordan，which may imply that the name was no longer in vogue．He names also the principal cities of these several divisions（v．16）．

The most valuable contributions to the abcient geography of Palestine are those of Eusebins and bis commentator S．Jerome，in the Onomasticon， composed by the former，and translated，with im－ portaot additions and corrections，by the latter，who has also interspersed in his commentaries and letters numerons geographical notices of extreme value． They are not，however，of such a character as to be available under this general article，but are fully cited under the names of the towns，\＆c．（See Reland．Polaest．lib．ii．cap．12，pp． $479,8 \mathrm{c}$ ．）

It remains only to add a few words concerning the partition of Palestine into First，Second，und Third，which is first found at the commencement of the fifth century of the Christian era，in the Cule of Theodosius（A．D．409）；and this division is observed to this day in the ecelesiastical documents of the Bastern Church，by which it was adopted from the first；as it is recognised in the Notitiae，political and ecclesiastical，of the fiftb and following centuries． （Quoted fully by Reland，l．c．capp．34，35，pp．204－ 234．）In this division Palaestina Prina compre－ hended the old divisions of Judaea and Samaria； Palaestina Secunda，the two Galilees and the western part of Peraea；Palaestina Tertia，otherwise called Salutaris，Idumaea and Arabia Petruea；while the greater part of the ancient Perasas was comprebended under the name of Arabia．

As the sourecs of geograpbical information for Palestine are far too numerous for citation，it may suffice to refer to the copions list of authors appended to Dr．Robinson＇s invaluable work（Bibl．Res．vol．iii． first appendix A．，Pp．1－28），and to the still more copious catalogue of Carl Ritter（Erdhunde，Palas－ tina， 2 tr B．1te Abt．1850，Pp．23－91），who in his four large volumes on the peninsula of Mount Sinai， Palestine，and Syria，has with his ustal ability systematised and digested the voluminons records of centuries，and completely exhausted a subject which could scarcely be tonched within the limits assigned to a general article in sucb a work as the present．
［G．W．］
PALAETYRUS，［TyRes．］
PALAMNUS（חá久auvos，Scyl．p．10），a river of Illyricum，which flowed into the sea near Epidam－ nus．This river has been identified with the PA－ Nyases（Пavoá（ $\sigma$ ）бov éк६．，Ptol．iii．13．§ 3）；but this latter corresponds better with the Gexusus （Tjernat or Skumbi）：the Palamnus is prohably the same as the Dartsch or Spirnata，to the S．of Du－ razzo．
［E．B．J．］
PALANDAS（ $\delta$ חa入ávóas），a small stream mentioned by Ptoleny in the Chersonesus Aurea （vii．2．§5）．It is supposed by Forbiger that it is the same as that which flows into the golf of Mar－ taban near Tavoy．Ptolemy votices also a town in the same neighbourhood which be calls Palanda（vii． 2．§ 25）．
［V．］
PALAS，a district in the pouth of Germany，on the borders between the Alomanmi and Burgundii； it was also called Capellatium；but as it is men－
tioned only by Amnianus Marcellinus（xvini，2），it is impossible with any degree of certainty to iden－ tify it．
［L．S．］
PALATIUM，a place in the Rhaetian Alps，on the road from Tridentum to Verona，still bears its ancient name in the form of Palazzo．（1t．Ant． p．275．）
［L．S．］
PALE（ $\Pi \dot{d} \lambda \eta$ ）Eth．Пa入eis，Пa $\lambda$ и̂s，Thuc．；Pa－ lenses：the city itself is usually called חa入eis：
 Cephallenia on the eastern side of a bay in the north－western part of the island．It is first men－ tioned in the Persian wars，when two handred of its citizens fought at the battle of Plataea，alongside of the Leucadians and Aractorians．（Herod．ix．28．） It also sont four ships to the assistance of the Corinthians against the Corcyrarans just before the commencement of the Peloponnesian War（Thuc．i． 27 ）；from which circumslance，together with its fighting along with the Corinthian Leacadians and Anactorians at the battle of Plataea，it has been conjectured that Pale was a Corinthian colony． But whether this was the case or not，it joined the Athenian alliance，together with the other tornss of the island，in B．C．431．（Thac．ii．30．）At a later period Pale esponsed the side of the Aetolians against the Actaseans，and was accordingly besieged by Philip，who would have taken the city hut for the treachery of one of his own officers．（Pol．v，3，4．） Polybius describes Pale as surrounded by the sea， and by precipitous heights on every side，except the one looking towards Zacynthus．He further states that it possessed a fertile territory，io which a con－ siderable quantity of corn was grown．Pale sur－ rendered to the Romans without resistance in $\mathrm{L}, \mathrm{C}$ ． 189 （Liv．xxxviii，28）；and after the capture of Same by the Romans in that year，it became the chief town in the island．It was in existence in the time of IIadrian，in whose reign it is called in an inscription èлevé́pa каі aviтóvo 0 s．（Börkh，Inscr． No．340．）According to Pherecydes，Pale was the Homeric Dulichium：this opinion was rejected by Strabo（x．p．456），but accepted by Pausanias（vi． 15．§ 7）．

The remains of Pale are seen on a small height， about a mile and a hall to the north of the modern Lixuri．Scarcely anything is left of the ancient city；but the name is still retained in that of Púlio and of Poliki，the former being the name of the plain around the ruins of the city，and the hatter that of the wbole peninsula．（Leake，Northern Greece，vol．iii．p．64．）

coIN OF PALE．
PALFURIA＇NA，a town of Hispania Tarraco－ nensis，by Ukert（rol．ii．pt．i．p．420）and others placed in the territory of the Ilercaunes；by For－ biger（vol．iii．p．73）in that of the Coctani．It was on the road from Barcino to Tarraco，and is usually identified with lendrcll．（Marca，Misp，ii， c．11．p．141；Florez，Esp．S．xxiv．43．）［T．H．D．］
 Lago di Naftia），a small voleanic lake in the inte－ terior of Sicily，near Palagonia，about 15 miles W．
of Leontini．It is a mere pool，being not more than 480 feet in cireumference，but carly attracted atten－ tion from the remarkable phenomena caused by two jets of volcanic gas，which rise nnder the water， causing a violent ebullition，and sometimes throwing up the water to a considerable heirsht．On this account the spot was，from an early period，con－ sidered sacred，and consecrated to the indigenons deities called the Palici，who had a temple on the $5_{p} \mathrm{mt}$ ．This enjoyed the privileges of an avylum for fugitive slaves，and was much resorted to also for deternining controversies by naths；ad oatb taken by the holy springs，or cratens as they are called， being considered to possess peenliar sanctity，and its viulation to be punished on the spot by the death of the offender．The remarkable phenomena of the locality are described in detail by Diodorns，as well as by several other writers，and notwithstanding some slight discrepancies，leave no donbt that the spot was the same now ealled the Lago di Jaftia，from the naphitia with which，as well as sulphur，the sources are strongly impregoated．It would，how－ ever，seem that in aocient times there were two separate pools or craters，sometimes termed foun－ tains（кpiेvar），and that they did not，as at the present day，form one more considerable pool or lake． Hence they are allnded to by Ovid as＂Stagoa Pali－ corum；＂while Virgil notices only the sanctnary or altar，＂pinguis et placabilis ara Palici．＂（Diod．xi． s9；Steph．Byz，s．v．Пaגıки́；1＇send．－Arist．Mirab． 58：Maeruh．Sat．v．19；Strab．vi－p．275；Ovid， Met．v．406；Virg．Aen．ix． 585 ；Sil．Ital．xiv． 219 ：Nomn．Diomys．siii．31I．）The sacred cha－ racter of the spot as an asylum for fngitive slaves caused it to be selected for the place where the great servile insurrection of Sicily io B．C． 102 was first discussed and arranged；and for the same reason Salvius，the leader of the insurgents，made splendid offarings at the shrine of the Palici．（Diod．xxxri． $3,7$.

There was not in early times any other settlement hesides the sanctuary and its appuitenances，adjoin－ ing the lake of the Palici；but in o．c． 453 ，Duce－ titls，the celebrated chief of the Sicnli，founded a city close to the lake，to which he gave the name of lalica（ Пadan ），and to which he transferred the mhabitants of Menaenum and other neighbouring towns．This city rose for a short time to consider－ able prosperity；but was destroyed again shortly after the death of Ducetius，and never afterwards restored．（Diod．si． 88,90 ．）Hence the notices of it in Stephanus of Byzantium and other writers can ouly refer to this brief period of its existence． （Steph．B．l．c．；Polemon，ap．Macrob．l．c．）The modern town of Palagonia is thought to retain the traces of the name of l＇ahica，but certainly does not occupy the site of the city of Ducetius，being situ－ atel in a lofty hall，at some distance from the Lago di Xaftion．Some remains of the temple and other buhbinge werp still risible in the days of Fazello in the neighbourhoni of the lake．The locality is fully dencribed by him，and more recently by the Abate Ferrara．（Fazell．de Reb．Sic．iii．2；Ferrara， Cummi Flegrei della Sicilia，pp 4s，105．）［E：11．E．］

1＇ALIMBOTHRA（Пa入iu6óvpa，Ptul．vii．1．§ 73；Steph．B．s．v．），a celebrated city of ancient In－ dia，situated at the junction of the Ganges and Iirannabuns（Ifirinjuruha），at prevent known by the nume of Patra．Strabro，who states（ii．p．70）that Megasthenes was sent to l＇alimbothra as an am－ bassalor to the king sindrocoltus（Chandrayuptu）．
describes it as a vast town，in the form of a paral－ lelogram 80 stadia in length and 15 in breadth， surrounded by a stockade，in which open spaces were ent to shoot through，and by a diteh．He adds that it was in the country of the Prasii（xv．p．702）． In another passage he places it，on the authority of Megasthenes，at 6000 stadia from the moutbs of the Ganges；or on that of Patrocles，who was sent as an ambassador to Allitrochades，the son of San－ drocottus（ii．p．70），at 5000 stadia（ $\mathrm{xv} . \mathrm{p} .689$ ）． Pliny approaches most nearly to the computation of the latter traveller，as be makes the distance from Palimbothra to the sea to be 638 N．P．，about 5100 stadia（vi．17．§ 21）．Arrian calls it the greatest of the cities of India，and apparentiy quotes the same description from Megasthenes which Straba must have had before him．（Indic c．10．）Dio－ dorus attributes to Hercules the boilding of its walls （ii．39）．Where Pliny says＂Amnis Jomanes in Gangem per Palibothros decurrit，＂he is evidently speaking of the people，and not，as some have sup－ posed，of the town（vi．19）．There seems no reasou to doubt that the ancient Sanscrit name of this town was Pataliputra．（Lassen，Indisch．Alterthum． i．p．137；Franklin，Inquiry into the ancient Pali－ bothra，Lond．1815，who，boweter，places it wrongly at Bhayalpir．）

PALINDROMUS PROMONTORIUM（Ha入ív． סpouos áкра），a promontory of the extreme SW．of the Arabian peninsnla，at the Straits of Bab－el－ Mandeb，placed by Ptolemy between Ocelis Empo－ rium and Posidium Promontorium，in long． $74^{\circ} 30^{\prime}$ ， lat． $11^{\circ} 40^{\prime}$（vi．7．§ 7）．It now bears the same name as the strait．（Moresby，Sailing Directions for the Red Sea，p．2．）
［G．W．］
PALINU＇RU＇S or PALINU＇RI PRONONTO＇－ RJUM1（IIa入ivoupos àкpwth́piov，Strab：：Capo Poli－ uro），a promontory on the coast of Lacania，on the Tyrrhenian sea，between Velia and Buxentum．It had a port of the same name immediately adjoining it， which still bears the name of the Purto di Pulinuro． Both beadland and port received their name from the well－known tradition，recorded by Virgil，and alluded to by many other Latin writers，that it was here that Palinorus，the pilot of Acneas，was cast on shore and buried．（Virg．Aen．v．833－871，vi， 337－381；Dionys．i．53；Lucan，ix．42；Mel．ii． 4．\＄9；Sulia．2．\＆13．）We learo from Servins that heroic bonours were paid him by the Lucanians （probably by the citizens of Velin），and that he had a cenotaph and sacred grove not far frorn that city． （Sery，ad Aen．vi．278．）It dues not appear that there was ever a town adjoining the headland；aod the port，which is small，though secure nod well sheltered，is mentioned only by Dionysius；but the promontory is noticed by all the geographers except Ptolemy，and is described by Pliny as forming the northern boundary of a great bay which might be considered as extending to the Colamna Rhegina，or the headland on the sicilian straits．It is in fast the most salient puint of the projecting mass of mountains which separate the gulf of Posidooia from that of Lauis or Policastro，and form the chief oatu－ ral feature of the coast of Lucania．（Plin．iii．5．8． 10；Mel．ii．4．§ 9；Strab．vi．„p．252；Oros．iv．9．） Sone ruins of ancient buildings are still visible on the sammit of the headland，which are popularly known as the tomb of l＇alinurus．The promontory still retains its ancient name．though vulgarly cor－ rupted into that of I＇alonudo．

Like most monntain promontories，that of Pali－
noras was subject to sudden and violent storms，and became，in consequence，on two occasions the scene of great disasters to the Roman fleets．＇The first was in B．C．253，when a fleet under the consuls Servilins Cacpio and Sempronius Blaesus，on its retura from Africa，was shipwrecked on the coast about Cape Palinurus，and 150 vessels lost with all the booty ou board．（Oros．iv．9．）The second was in B．©．36，when a considerable part of the fleet of Augustus，on its way to Sicily，having been com－ pelled by a tempest to seek refuge in the bay or roadstead of Velia，was lost on the rocky coast be－ tween that city and the adjoioing headland of Prili－ nurus．（Dion Cass，xlix．1；Appian，B．C．v． 98 ； Vell．Pat．ii．79．）
［E．H．B．］
PA＇L10（Palo），a town of Apulia，mentioned only by Pliny，who eaumerates the Palionenses among the＂populi＂of the interior of that region． （Hlin．iii．11．s．16．）Its site is prohably indicated by the modern village of Palo，about 5 miles south of Bitonto（Butuntum）．

PALLE'NE. [ATHTA, p. 327, a.]
PAl.MA. [Balkabks]
PALMAM, AD, a station on the const-road of Syrtica. 12 M. P. from Leptis Magna, and $15 \mathrm{M} . \mathrm{P}$. from Quintiliana (Peut. Tub.). This pwsition acrees with that of the ruins found at Seba' Burdj. (Barth, W'undernugen, p. 304.)
[E. B. J.]
P'ALMA'RIA (I'tlmaruola), a small island in the Tirrhoman sest, the most westerly of the group now known :as the I'onza Islands, or Isole di Ponza. It is betwren 3 and 4 miles long, and not more than a puarter of a mile broad : and was doubtless in :uncient, as well as moulern times, a dependency of the neithbouring and more considerable island of Puotia (I'onza), trom which it is only 5 miles dislant. (Plin. iii. 6. s. 12; Mel. ii. 7. § 18; Varr. R. R. ini. 5. § 7.)
[E. H. B.]
PALMATIS (חd́גuatis, Procop, de Aed, iv. 7. p. 293), a town of Moesia Inferior, betweea Dorostoran and Marcianmpolis (Tab. Peut.), perhaps Kutschuk-K"uinourdgitk. [T. H. D.]
 viii. 20. § 10; Appian, B. C. v. $9: \Pi a \lambda \mu f \rho \alpha$, Jouph. Ant. viii. 2; and Palmira, Plin. v. 25. s. 21 : Fith. Palmyrenus, or Palmirenus, Id. l. c.), a city of Syria, situated in $34^{\circ} 24^{\prime} \mathrm{N}$. lat., and $38^{\circ}$ $20^{\prime}$ E. long. Its Hebrew name, Tadmor, or Thadmor, denutes, like its Greek one, a city of palins; and this appellation is preserved by the Arabs, who still call it Tuimor. Tadmor was built, or more probably enlarged, by Solumon in the tenth century 13. c. (1 Kings, is. 18: 2 Chron. viii. 4), and its identity with l'alnyra is shown in the passage of Josephus befure cited. It is seated in a pleasant and fruitful oasis of the great Syrian desert, and is well watered by several small streams; but the river meationed by Ptoleny is nowhere to be fonnd. Its situation is fine, under a ridge of bills towards the W., and a little above the level of an extensive plain, which it commands on the E. (Wood, Ruins of Palmyra, p. 5), at a distance of about 140 miles ENE, of Dimacicus. It is not mentioned by Xenophom, who must have passed near it, nor in the accounts of the conquests of Alexander the Great. The first historical notice that we find of it is in Appian, who tells us that M. Antony, ander pretence uf furishing its equivocal conduct, but in reality to embeh his trows with the plunder of a thriving commercial city, directed his marels towards it, but was frustrated of his object by the inlahitants removing their soods to the other side of the Euphrates. (B. Cie. v. c. 9.) This account shows that it must have heen a town of considerable wealth; and indeed its adsantareous situation must hare loms rentered it ath entrepot for the traffic between the cast and Damasens and the Plovenician cities on the Mediterancan. Yet its name is not mentioned either by Strato or Mela. Under the first Lioman emperors it was an indrpendent city; and its situation on the burders of the Ruman and Iarthian empires gave it a political importance, which it seems to have prexervet by a well-jodged conrse of policy, thungh naturally exposed to much danger in the quarrels of two such formidable neighbours. ("Inter duo inperia summa, et prima in discurdia semper utrinque cura," Plin. l. c.) It is called a colonia on
the coins of Caracalla, and Ulpian mentioned it in his first book de Censilus as having the Jus Italicum. It appears, from an inseription, to have assisted the emperor Alexander Severus in his wars against the Persians. (Wood, Inscr, xix.) It is not, however, till the reign of Gallienus that we find Palmyra playing any important part in history: and at this period we have notices of it in the works of Zosimus, Vopiscns, and Trebellius Pollio. Odensthus, a noble of Palmyra, and according to Procopius (B. Pers. ii. c. 5) prince of the Saracens who inhabited the banks of the Eupbrates, for his great and splendid services against the Pirsians, received from Gallienus the title of Augustus, and was acknowledged by him as his colleazue in the ennpire. After the assassination of Odenathus by his nephew Maeonius, the celebrated Zenobia, the wife of the former, whose prudence and courage had been of great assistance to Odenathus in his former successes, ascended the vacant throne, and, assuming the magnificent title of Queen of the East, ruled with a manly vigour during a period of five years. Under this extraordinary woman, whose talents and accomplishments were equalled by her beauty, and whose love of literature is shown by her patronage of Longinus, Palmyra attained the highest pitch of its prosperity. She claimed to be descended from the Macedonian kings of Egypt, and her aehievements would not have disgraced her ancestry; though, according to other accounts, she was a Jewess, (Milman, Mist. of the Jeres, iii. p. 175.) Besides the sovereignty of Syria and Mesopotamia, she is said to have extended ber sway over Egypt (Zosim, i. c. 44); but by some critics this fact bas been questioned. Claudius, the successor of Gallienus, being engaged in the Gothic War, tacitly acknowledged her authority. But after the termination of the short reign of that emperor, the progress of Zenobia in Asia Minor was regarded by Aurelian with jealonsy and nlarn. Her arms and intrigues already menaced the security of Bithynia (Ib.c. 50), when Aurelian marched against her, and defeated ber in two great battles near Autioch and Emesa, at both of which she commanded in person. Zenubia now retreated to Palmyra, and prepared to defend her capital with vigour. The difficultics of the siege are described by Aurelian Limself' in an original letter preserved by Vopiscus. (Aurel. c. 26.) After defying for a long time the arms of the Roman emperor, Zenobia, heing disappointed of the succour which she expected to receive from the Persians, was ultimately compelled to fly, but was overtaken on the banks of the Euphrates by the light horse of Aurelian, and brought baek a prisoner. Shortly after this event her capital surrendered, and was treated with clemency by the conqueror, whe, huwever, sullied his fame by the cruel execution of Longinus and some of the principal citizens, whom Zenobia had denounced to him. The personal adventures of Zenobia we need not pursue, as they will be found related in the Dictionary of Biogrophy and Mythology. No sooner had Aurelian crossed the Jeflespont than he was recalled by the intelligence that the Palnyrenians had risen against and massacred the small garison which he had left in their city. The emperor immediately marehed acain to Palmyra, which now paid the fuil penalty of its rebellion. In an original letter Aurelian has himself recorded the unsparing execution, which extended even to old men, wonen, and children. (Vopisc. Aur. c. 31.) To the remuant of the Palmyreuians,
indeed, he granted a pardon, with permission to repair and inhabit their ruined city, aml especially discovered much solicitude for the restoration of the Temple of the Sun. But the effects of the blow were too heavy to be retrieved. From this period (A. D. 273) Palmyra gradually dwindled into an insignificant town, and at length became only a place of refuge for a few families of wandering Aralis. It served indeed for some years as a Roman military station; and Diocletian partially restored some of its buildings, as appears from an inscription preserved by Wood. About the year 400 the first Illyrian legion was quartered there (Not. Imp.); and Procopius tells us that it was fortified by Justinian (de Aed. ii. 2). But this is the last that we hear of Palmyra under the Romans; and the sinking fortunes of their empire probably soun led them to abandon it.

The remains of the buildings of Palmyra are chiefly of the Corinthian order, which was the favourite style of architecture during the two or three centuries which preceded Diocletian; whence we may infer that the splendour which it once exhibited was chiefly owing to Odenathus and Zenobia. For many centuries even the site of Palnyra remained totally unknown except to the roving Arabs of the desert, whose magnificent accounts of its ruins at length excited the cariosity of the English merchants settled at Aleppo. Under the anspices of the Levant Company, an expedition started in 1678 for the parpose of exploring them; but the persons who composed it were robbed and ill-treated by the Aratis, and compelled to return without having accomplished their object. In 1691 the expedition was renewed with better success, and an account of the discoveries then made was published in the transactions of the Royal Suciety. (Sellers, Antiquities of Palmyra, Pref.) Subsequently Palmyra was visited in 1751 by Wond and Dawkins, who published the results of their journey in a large folio volume with magnificent engravings. The account ia Volney (vol. ii.) is chiefly taken from this work. Among the more recent descriptions may be mentioned that of Irby and Mangles (Travels, ch. v.), who visited Palmyra in 1816. According to these travellers the plates of Wood and Dawkins have dune more than justice to the subject; and although the view of the ruins from a distance, with their line of dazzling white columns extending between one and two miles, and relieved by the contrast of the yellow sand of the desert, is very striking, yet, when examined in detail, tbey excite but little interest. Taken separately, not a single colnmn or architectural member is worthy of admiration. None of the former exceed 40 feet in height and 4 feet in diameter, and in the boasted avenue they are little more than 30 feet high. The remains of the Temple of the Sun form the most magnificent object, and being of the Ionic order, relieve the monotony of the prevailing Corinthian style. These columns, which are 40 feet high and 4 feet in diameter, are fluted, and formed of only three or four pieces of stone; and in former times were surmounted by brazen Jonic capitals. The façade of the portico consists of 12 coltums. like that of the temple of Baabbec, besides which there are other points of resemblance. On the whole, however, the rains are far inferior to those at Baalbec. At the time of Messis. Irby and Mangles' visit the peristyle conrt of the Temple of the Sun was occupied by the Aralian village of Tadnor; but with this exception, and the Turkisb
burial ground, the space was nnencumbered, and there was nothing to obstruct the researclies of the antiquary. In some places the lines of the streets and the foundations of the houses were distinctly visible. The scniptures are uniformly coarse and lad; the stone is of a perishable description, and scarcely deserves the name of marble. The sepulchres outside the walls formed perhaps the most interesting part of the remains. These consist of square towers, from three to five stories high, forming sepalchral cliambers, with recesses for the reception of the budies. In these tombs mummies and mummy cloths are found, prepared very much after the Egyptian manner; but there are no paintings, and on the whole they are far from being so interesting as the Egyptian sepulchres. There was a sculptured tablet in bas-relief, with seven or eight figures standing and cluthed in long robes, suppased to represent priests. Several Greek and Palinyrene inscriptions, and two or tliree in Latin and Hebrew, have been discovered at Palmyra. They will be found in Wood's Ruins of Palmyra, and the following works may also be consulted: Beroard and Sinith, Inscriptiones Graecae Palmyrenorum, Utrecht, 1698; Giorgi, De Inscriptionibus Palmyrenis quae in Musaeo Capitolino adservantur interpretandis Epistola, Rome, 1782; Barthélemy, in Mém de l.Académie des Inscr. tom. xxiv.; and Swinton, in the Pleilosophical Transactions, vol. xlvii.

With regard to the geweral history and antiquities of Palmyra, besides the works alrealy cited in this article, the following may be consulted: Seller, Antiquities of Palmyra, London, 1696 ; Huntington in the Philosophical Transactions, vol. six. Nos. 217, 218; a Dissertation by Dr. Halley in the same work; Gibbon's Decline and Fall. ch. xi.; St. Mart. Hist. de Palmyre, Paris, 1823 ; Addison's Damascus and Palmyra; Richter, Wallfahrt; Cassas, Voyage Pittoresque de la Sigrie; Laborde, Ioyage en Orient; \&c.
[T. H. D.]
 a district of Syria, so named after the city of Paimyra, and which extended S. from Chalybonitis into the desert. (Cf. Plin. v. 24, 8, 21.) [T. H. D.]

PALORUD PORTUS. [Malles and MaGAKsA.]

PALIUS (חá入тos: Eth. Пa入тทvós), a town of Syria apon the ccast, subject to the island of Aralas, which was at no great distance from it. Accurding to sume accounts Memnon was buried in the neighhourbood of Paltus. Pococke places it at Boldo; Shaw at the rains at the mouth of the Melleck, 6 miles from Jebilee, the sucient Gabala. (Strab. xv. Pp. 728, 735: Ptol, v. 15. § 3; Cic. ad Fam. xii. 13 ; Plin. v, 20. s. 18 ; Mela, i. 12: Steph. B. s. v.; Pococke, vol. i. p. 199: Shaw, p. 324, Oגf. 1738.)

PANBO'T1S LACUS. [DODONA, p. ت84.]
PAMlsLS (חapuซos). 1. The chief river of Messenia. [See Vol. 11. Pp. 341, 342.]
2. A river in Laconia, forming the ancient boundary between Messenia and Laconia. (Strab. vini. p. 361.) Strabo speaks of this river as near Lenctrum, but it flows into the sea at Peplinus, about 3 miles S. of Leactrom. [PEPHNtS.]
3. A tributary of the l'eneius in Thessaly, probably the modern BLiur or Piliurr. (Herod. vi. 129 ; Plin. iv. 8. s. 15 ; Leake, Northern Greece, vol. iv. Pp, 512, 514)

PA'MPHIA (II $\mu \not \subset i ́ a)$, a village of Actolia, on the road from Metapa to Thermum, and distant 30

Nadia from each, was burnt by Philip in B. c. 218. (Polyb, v. 8, 13 ; for details see Thekuess.)

PAMPHI'TIA (Пaцфvスia), a country on the south coast of Avia Mlinor, bordering in the west on Lycia, in the north on J'isidia, and in the east on Cilicia. The country, consisting of ouly a narrow strip of coast, forms an arch round the bay, which is called alter it the Pamplylins Sinus or the Pamphylium Mare. According to Pliny (r. 26) the country was originatly called Mopsopsia, from Mopsus, a leader of one of those bauds of Greeks who after the Trojan War are said to harve settled iu Pam$1^{\text {hhylia, Cilicia, ant Syria. (Strab. xiv. p. } 668 \text {; comp. }}$ Sicylax, p. 39 ; I'tol. v. 5 ; Diunys. Per. 850. \&c. ; Pomp. Mela, i. 14 ; Stadiasm. Mar. Mag. § 194, \&c.; Hieroel. p. $679 . \& \mathrm{c}$. ) P'amphylia, aceording to Strabo, extended from Olbia to Ptolemais, a line measuring 640 stadia, or about 18 geographical miles: the breadth of the country, from the coast towards the interior, was nowhere above a few miles. In later times, however, the Romans applied the name Pamplyylia in such a manner as to embrace Pisidia on both sides of Mount Taurus, which does not appear as a distinct province of the empire until the new division under Constantine was made. This accounts for the fact of Polybius (xxii. 27) doubting whether lamplylia (in the Roman sense) was one of the countries beyond or this side of Mount Taurus; for Pisidia, in its narrower sense, is unquestionably a country beyond Mount Tanrus. (Comp. Strab. xii. p. 570 , xiv. p. 632, xv. p 685.) In this latter sense Pamphylia was sepurated from Lycia by Mount Climax, and from Cilicia by the river Melas, and accordingly embraced the distriets called in modern times Telke and the coast district of Itshil. But these limits were not always strictly observed; for Ollia and Perge are described by some writers as belonging to Lycia (Seylax, p. 39); while Ptolemais, beyond the Mclas, which is generally regarded as lutonging to Pamplylia, is assigned by some to Cilicia. The country of Pamphylia is, on the whole, very mountaineus ; for the ramifications of Mount Taurus rise in sume parts on the coast itself, and in others at a distance of only a few miles from it. There is only one great promontory on the const, viz. Leucotheum, or Leucolla. The priocipal rivers, all of which discharge their waters into the Pamphylian hay, are the Catammetes, Cesteves, Eunymedon, and Melas, all of which are navigable. The const district between the Cestras and Farymedon contains the lake Capria, which is of considerable extent.

The inhabitants of Pamplylia, Pamphyli, that is, a mixtoro of various races, consisted of aborigines mixed with (illicians who bad immigrated: to these were added batuls of Grecks after the Trojan War, and later (ireck colunies. (Sitrab. l.c.; Enstath. ad Ihim. Per. 884 : Herod, vii. 91, viii. 68; l'aus. vii. 3. § 3; Aplim, IS. G. ii. 71, iv, 60; Liv, xliv. 14.)
 ПaцфíAor), accordingly, were in those parts what the Alemanmi were in Cimmany, though the eurrent tratitions related that thry were all descended from Pamphyie, a daughter of Hincius and Manto (Stepls. B. s. $v$. Mauфu入ia), or from ane Pamphylus (Eustath. ad Jion. Pir. l. c.). Others again, though without good reason, derive the name from $\pi$ äs and фú $\lambda \lambda o \nu$, becamse the country was rich in moond. The P'amplylims mever acquired any great power or political importance: they shared the fate of all the nations of Asia Minor, and in the war of Xerxes
against the Grceks their naval contingent consisted of only 30 ships, while the Lycians furnished 50 , and the Cilicians 100. (Herod. vii. 92.) After the Persian empire was broken to pieces by Alexander, the Pamphylians first became subject to Macedonia, and then to Syria. After the defeat of Antiochus the Great, they were annexed by tho Romans to the kingdom of Pergamns (Polyb, xxii. 27 ), and remained connected with it, nutil it was made over to the Romans. The Greek colonies, however, such as Aspendus and Side, remained independent repablics even under the Persian dominion (Arrian, Anab. i. 25, foll.); but we have no information it all about their political constitutions. Io their manners and social habits, the Pamphylians strongly resembled the Cilicians (Strab. xii. p. 570 , xiv. p. 670), and took part with them in their piratical proceedings; their maritime towns were in fact the great marts where the spoils of the Ciliciau pirates were disposed of. (Strab. xiv. p. 664.) Narigation seems to bave been their principal occupation, as is evident from the coins of several of their towns. Their language was probably a misture of Greek and some barbarous diaiects, which could scarcely be recognised as a dialect of the Greek. (Arrian, Anab. i. 26.) But their coins bear evidence of an intimate aequaintance with the gymmastic and agonistic arts, and with the gods of the Hellenes, among whom Zeus, Artemis, and Dionysus are often represented. The more important towns of Pamphylia were Lyrnas or Lymessus, Tenedus, Olbia, Coryens, Aspendus, Perge, Syllium, Side, Cibyra, Ptolemais, \&c. (Comp. Sestiui, Descript. Num. Fet. p. 388, foll.; Eckhel, Doctr. Num. i. 3, pp. 6, 14, \&c.) [L.S.] PAMPHY LIUM MARE, PAMPHY'LIUS SI-
 a large and deep bay formed by the curved form of the coasts of Lyeia, Pamphylia, and Cilicia, beginning in the west at the Cbelidonian promontory, and terminating in the east at Cape Anemurium. The distance from the Chelidocian cape to Olbia is stated by Strabo to be 367 stadis. (Strab, ii. pp. 121, 125 , xiv. p. 666 ; Agathem. i. 3, ii. 14 ; Stobaeus, i. p. 656 ; Plin. v. 26, 35 ; Flor. iii. 6.) This sea is now called the bay of Adalia
[L. S.]
PANACHATCUS MONS. [Achaia, p. 13, a.]
PANACTUDI. [ATTHA, p, 329, a.]
PANAEI (Mavaíot), a people of Thrace, whom Thucydides describes as dwelling beyond the Strymon towards the north (ii. 101). According to Steplianus B. (s.v.) they were a tribe of the Edones near Amphipolis.

PANAETOLIUM. [Aetolia, p. 63, b.]
PANA(iRA (חàa ${ }^{2} \rho a$ ), a tuwn in the interior of Libya, on the lake Libya, and near the Nigir. (1'tol. iv. 6. § 27.)

PANDAE (Plin. vi. 20. s. 23), a tribe of Indians mentioned by Pliny, who, according to him, were alone in the lialit of having female sovereigns, owing to a tradition prevailing among thens that they were desceuded from a daughter of Hereules. They would scem from his accont to have been a race of great power and wide dominion, and to have ocenpied some part at least of the P'anjub. Arrian (Indic, 8) tells uearly the same story of a dauglter of the Indian Hercules, whom he calls Pandaea. There can be no doubt that hoth are to be referred to the Indian dynasty of the Pandaras, tuaces of whose names are uet in several ancient nathors. [Paxpors Hegio.]
[V.]
PANDATARIA (חavסatapia: V'crdotena), a
small island in the Tyrrbenian sea, lying off the Gulf of Gaita, nearly opposite to the menth of the Vulturnus. (Plin. iii. 6. s. 12 ; Strab. ii. p. 123 ; Mela, ii. 7. § 18 ; P'tel. iii. 1. § 79.) Strabo says it was 250 stadia from the mainland, which is just about the truth (v. p. 233). Hc calls it a small island, but well peopled. It was not unfrequently made use of, as well as the neigbbenring Pontia, as a place of confinement for state prisoners or political exiles. Among these may be mentioned Julia, the daughter of Augustns, Agrippina, the widow of Germaniens, and Octavia, the first wife of Nero, of whom the two last were pat to death in the island. (Tac. Ann. i. 53, xiv. 63; Suet. Tib. 53.) Pandataria is about Inidway between Pontia (Ponza) and Aenaria (Ischia) ; it is of volcanic origin, like the group of the Ponza Islands, to which it is sometimes considered as belonging ; and does not exceed 3 miles in length. Varro notices it as frequented, like the neighborring islands of Pontia and Palmaria, by flocks of quails aod turtle-doves in their annual migrations. (Varr, R. R. iii. 5. § 7.) [E. H. B.]

PANDION, a beadland in the south-west of Caria, opposite the island of Syme. (Pomp. Hela, i. 16.) Pliny (v. 29) mentions on the same spet a stmall town Paridion, or according to another reading Parydon.
[L. S.]
PANDO'SIA (חavסooria: Eth. Пavס̃ooivos). 1. A city of Bruttima, situated near the frontiers of Lucania. Strabo describes it as a little above Consentia, the precise sense of which expression is far from clear (Strab. vi. p. 256); but Livy calls it "ituminentem Lacanis ac Brottiis finibus." (Liv. viii. 24.) According to Strabo it was originally an Oenotrian town, and was even, at one time, the capital of the Oenotrian kings (Strah. l. c.); but it serms to have certainly received a Greek colony, as Scylax expressly ennmerates it among the Greek cities of this part of Italy, and Scymnns Chius, though perhaps jess distinctly, asserts the same tbing. (Scyl. p. 4. § 12 ; Scymn. Ch. 326.) It was probably a colony of Crotons; though the statement of Eusebius, who represents it as founded in the same year with Mletapontum, would lead us to regard it as an isdependent and separate colony. (Euseb. Arm. Chron. p. 99.) But the date assigned by him of B. с. 774 seems certainly inadmissible. [Metapontum.] But whether eriginally an independent settlement or not, it must have been a dependency of Crotona during the period of greatness of that city, and hence we never find its name mentioned ameng the cities of Magna Graecia. Its only historical celebrity arises from ita being the place near which Alexander, king of Epirns, was slain in battle with the Brattians, B. c. 326. That monarch had been warned hy an oracle to avoid Pandosia, but he understood this as referring to the town of that name in Thesprotia, on the banke of the Acheron, and was ignorant of the existence of both a town and river of the same names in Italy. (Strab. vi. p. 256; Liv, viii. 24 ; Justin, xii. 2; Plin. iii. 11. s. 15.) The name of Pandosia is again inentioned by Livy (xxix. 3s) in the Second Punic War, ameng the Brattian tuwns retaken by the consul P. Sempronius, in n. C. 204; and it is there noticed, together witb Consentia, as opposed to the "ignobiles aliae civitates." It was therefore at this time still a place of some conseqnence; and Strabo seems to imply that it still existed in his time (Strab. l. c.), but we find no subsequent trace of it. There is great difficulty in determining its
position. It is described as a strong fortress, situated en a hill, which had three peaks, whence it was called in the oracle Marסooia тptкó̀ $\omega \nu$ (Strab, l. c.) In addition to the vague statements of Strabo and Livy above cited, it is enumerated by Scymnus Chius between Crotona and Thurii. But it was clearly an inlaud town, and must probably have stood in the meuntains between Censentia and Thorii, thongh its exact site cannot be determined, and those assigned by local topographers are purely conjectural. The proximity of the river Acherun affords us no assistance, as this was evidently an inconsiderable stream, the name of which is not mentioned on any other occasion, and which, therefere, cannet be identified.

Mach confuaion has arisen between the Bruttian Pandosia and a town of the same name in Lucania (No. 2.); and some writers have cven cousidered this last as the place where Alexander perished. (Romanelli, vol. i. pp. 261-263). It is true that Theopompns (ap. Plin. iii. 11. s. 15), in speaking of that event, described Pandosia as a city of the Lucanians, but this is a very natural error, as it was, in fact, near the boundaries of the two nations (Liv. viii. 24), and the passages of Livy (xxix. 38) and Strabo can leuve no doubt that it was really situated in the land of the Bruttians.
2. A town of Lucania, situated near Heraclea. It has often been confounded with the preceding; but the distinct existence of a Lacanian town of the name is clearly established by two autherities. Plntarch describes Pyrrhus as encamping in the plain between Pandosiu and Heraclea, with the river Siris in front of him (Plut. Pyrrh. 16); and the celebrated Tabulae Herackenses repeatedly refer to the existence of a town of the name in the immediate neighbourbood of Heraclea. (Mazocchi, Tab. Iferacl. p. 104.) From these notices we may infur that it was situated at a very short distance from Heraclea, but apparently further ioland; and its site has been fixed with some probability at a spot called Sta Maria d Anglona, about 7 miles from the sea, and 4 from Heraclea. Auglona was an episcopal see down to a late period of the middle ages, but is now wholly deserted. (Mazocchi, 2. c. pp. 104, 105; Romanelli, vol. i. p. 265.)
[E. H. B.]
PANDO'SIA (Пavסัoбia: Eth. Пapōoणseús). an ancient colony of Elis (Dem. Halonnes. p. 84, Rei ke), and a town of the Cassopaei in the district of Thesprotia in Epirus, situated upon the river Acheron. lt is probably represented by the rocky height of Kastri, on the summit of wbich are the walls of an acropolis, while those of the city descend the slopes on either side. (Strab. vii. p. 324 ; Liv. viii. 24 ; Justin, xii. 2; Plin. iv. 1; Steph. B. s.v. ; Leake, Northern Greece, vol. iv. p. 55.)

## COIN OF PANDOSIA.

PANDOVI REGIO (חavṓwov $\chi$ úpa, Ptol. vii. I. § 11), a district at the southern extremity of the Peninsula of Hindostion. The name is in some editions חavoíóvos, but there is every probability that the above (which was suggested by liramus) is the true reading. There is annther district of the satne name which is placed by Ptolemy in the Pan-
$j$ ib on the Bidaspes (Fipuisa) (vii. 1. § 46). It is clear from a comparison of the two names that they refer to the same original Indian dynasty, who were known by the name of the Pandavas, and who appear to have been extended very widely over India. At the time of the invasion of Alesander. the district in the Panjab belonged to king Porus. (Strab, xv. p. 686: Lassen, Ind. Alterth. Geschichte der Pandara, p. 652.)
[V.]
PANEAS, PANIAS, or PANEIAS (HavEds, Пavıas. Пavedás, Hierocl. p. 716), more usually called either Caesarela Paneas (Karáácia Maveás or Mavás, Joseph. Anf. xviii. 2. § 3. B. Jud. ii. 9. § 1 ; Ptol. v. 15. § 21 ; Plin. v. 15. s. 15 ;
 Пaveiq: in Steph. B. ine rrectly $\pi p o ̀ s ~ 7 \hat{\eta}$ Пaved $\delta_{r}$ )
 13: Jurk, vii. 27; Juseph. Ant. sx. 8. § 4. B. J. iii. 8. § 7, 2. § 1: Euseb. II. E. vii. 17), a city in the north of Palestine, called by Ptolemy and Hierocles ( $l l . c c$. ) a city of Phoenicia, sitnated apon one of the soorces of the Jordan, at the foot of Mt Panium, one of the branches of Lebanon. Mt Panium contained a cave sacred to Pan, whence it derived its name. (Philostorg. vii. 7.) At this spot Herod erected a temple in honour of Augustus. (Juseph. Ant. xx. 10.§ 3. B. J. i. 21. §3.) Paneas wis suppnsed by many to have been the town of Laish, afterwards called Dan; but Eusebins and Jerome state that they were separate cities, distant 4 miles from each other (Reland, Pataestina, p. 918, seq.) Paneas was rebuilt by Philip the Tetrarch, who called it Caesareia in bonour of tbe Roman emperor, and gave it the surname of Philippi to distinguish it from the other Caesareia in Palestine. (Juscph. Ant. xviii. 2. § 3, B. J. 1i. 9. § 1.) It was subvequently called Neronias by Herod Auripps in honour of the emperor Nero. (Joseph. Ant. xx. 8, Ş 4: Coins.) According to ectlesiastioal tradition it was the residence of the women diseased with an isste of blood. (Ifathl. ix. 20 ; linseh. H. E. vii. 18; Sozum. v. 21 ; Tbeoph. Chronogr. 41 ; lhot, cod. 271.) Under the Christians Paneas became a bishopric. It is still called Bäniüs, and contains now only 150 bouses. On the NE. side of the village the river, supposed to be the principal source of the Jordan, issues from a spaciums carern unler a wall of rock. Around this sumece are many hewn stones. In the face of the I wpendicular rock. directly over the cavern and in other parts, several niches have been ent, apparently to receive statues. Eath of these niches had once an inseription; and one of them, enpied by Barckbardt, appears to have been a dedication by a priest of Paw. There can be mo doubt that this cavern is the cave of Pan mentioned above; and the hewn stones aroum the spring may have belonged perhaps to the temph, of Augustux. This spring was consilured by Jusplinus to be the outlet of a small lake called Phiala, situated 120 stalia from l'ancas towards Trachantis or the NE. Kespectiug this lake see Vill. II. p. 519, b.
(B.thathI, Pellerstiun, p. 918, smq.; Eekhel, vol. iii. p. 339, seq.: Burckhardt. Suria. 1. 37, seq.; liobilum, Bibl. Kes. vol. ini. p. 347, =eq.)
P.ANE'PIII: SIS (Mavépuazs, l'tol. iv. 5. § 52), a town of Ferpt, atmentios by recont writers only, whth the single exceptinn of I'tolemy (Пavequaos, Cone Ephes p. 478 ; Пaveiфefos, Cassian. Collut. xi, 3). It probably ther fore bure another appellation in more ancient times. Mannert (vol. x.
pt. 2. p. 580) believes it to bave been the city of Dinspolis in the Delta; and he agrees with Champollion (IEgypte, vol. ii. p. 130) in identifying it with the modern Menzaleh. It stood between the Tanitic and Mendesian arons of the Nile, a little SF. of the Ostium Mendesium. Ptolemy ( $l, c$ ) says that it was the capital of a nome, which he alone mentions and denominates Neort. Panephysis may have been either the surviving suburb of a decayed Deltaic town, or one of the hamlets which sprang up among the ruins of a more ancient city.
[W. B D.]
PANGAEUMI, PANGAEUS ( $\tau \grave{l}$ חá $\gamma \gamma a, o \nu$ or Пaүүaîon ópos, $\delta$ Пáryaıos. Herod. v. 16. vii. 112, 113; Thuc. ii. 99; Aesch. Pers. 494 ; Pind. Pyth. iv. 320; Eurjp. Rhes. 922, 972: Dion Cass. xlvii. 35: Appian. B. C. iv. 87, 106; Plin. iv. 18; Virg. Georg. iv. 462 ; Lucan, i. 679), the great mountain of Macedonia, which, under the modern name of Pirniri, stretching to the E. from the left bank of the Strymon at the pass of Amplaipolis, bounds all the eastern portion of the great Strymonic basin on the S., and near Pracista meets the ridges which enclose tbe same basin on the E . Pangueum produced gold as well as silver (Herod. vii. 112; Appian, B. C. ir. 106); and its slopes were covered in summer with the Rosa centifolia, (Plin. xxi. 10: Theoph. H. P. ri. 6; Athen. xv. p. 682.) The mines were chiefly in the hands of the Thasians; the other peoples who, according to Herodotus (l.c.), worked Pangaeum, were the Pieres and Odomanti, but particularly the Satrae, who bordered on the mountain. None of their money has reached us; but to the Pangacan silver mines may be traced a large coin of Geta, king of the Edones. [Edoses.] (Leake, Northern Greece, vol. ïi. Pp. 176, 190, 212.)
[E. B. J.]
PANHELLE'NES. [Graecla, Vol. I. p. 1010.]
PANIO'NIUAI ( $\Pi$ àtáviov), a place on the western slope of Mount Mlycale, in the territory of Priene, containing the common national sanctuary of Poseidon, at which the lonians held their regular meetings, from whicb circumstance the place derived its name. It was situated at a distance of 3 stadia from the sea-coast. (Strab. xiv. p. 639; Herod. i. 141, foll.; Mela, i. 17 ; Plin. v. 31: Paus. vii. 5. § 1.) The Panionium was properly speaking only a grove, with such bnildings as were necessary to accommodate strangers. Stephanus B. is the only writer who calls it a town, and even mentions the Ethnic designation of its citizens. The preparations for the meeting and the management of the games devolved upon the inhabitants of Priene. The earlier travellers and geographers louked for the site of the lanionium in some place near the modern village of Tshangli; but Col. Leake (Asia Minor, p. 260) observes: " The uninbabitable aspect of the roeks and forests of Mycale, fron Cape Trogilium to the modern Tshangli, is such as to make it impossible to fix upon any spot, either on the face er at the foot of tiat mountain, at whicb Panionium can well be suppused to have stond. Tshangli, on the other hand, situated in a delightful and well watered valley, was admirably suited to the lanimian festival: and here Sir William Gell found, in a church on the sea-shore, an inscription in which he distinguished the name of Panionium twice. I conceive, therefore, that there can be little donbt of Tshangli being on the site of Panionium." [1..S.]

PANLSSA, a river on the E. coast of Tlrace. (1lin. iv. 11. s. 18.)
[T. H. D.]

PANIUM (חávtav, Hierorl. p. 632; Const. Porph. de Them. ii. 1. p. 47; Suidas, s. v.), a towa on the coast of Thrace, near Heracleia; perhaps the modern Bunndos.
[T. H. D.]
PA'NNONA (Hávvova), a town in the interior of Crete, S. of Cnossns, retaining the name of Panon. (Ptol. iii. 17. § 10.)

PANNO'NIA (Mavvovia, Ptol. ii. 1. § 12 ; or Havovia, Zosim. i. 43), one of the most important provinces of the Roman empire, on the sonth and west of the Daunbe, which forms its boundary in the north and east ; in the sonth it bordered on Illyricam and Moesia, while in the west it was separated from Noricum by Mount Cetius, and from Italy by the Julian Alps. The conntry ettended along the Danube from Vindobona (Vienna) to Singidunom, and accordingly comprised the eastern portions of Austriu, Carinthia, Carniold, the part of Hungary between the Danube and Save, Slavonia, and portions of Croatio and Bosnia. After its subjugation by the Romans, it was divided into Pamnonia Superior ( $\grave{j}$ ávo Mavvovia) and Pannonia Inferior ( $\grave{\eta} \kappa \alpha ́ \tau \omega ~ \Pi a \nu v o v i a)$, by a straight line runaing from Arabona in the nortb to Servitinm in the sontb, so that thie part west of this line constituted Upper Pannonia, and that on the east Lower Pannonia. (Ptol. ii. 15. § 16.) In conseqnence of this division the whole country is sometimes called by the plural name Pannodiae (Havvoviat, Ptol. ii. 16. § 1 ; Zosim. ii. 43 ; Plin. $x \leq x v i i .11$. s. 2). In the fourth century, the emperor Galerins separated the district of Lower Pannonia between the Raab, Dannbe, and Drare, and constituted it as a separate province under the name of Valeria, in honour of his wife who bore the same name. (Aar. Vict. de Coes. 40 ; Amm. Marc. xvi. 10, xxviii. 3.) But as Lower Pannonia seemed by this measure to be too much reduced, Constantine the Great added to it a part of Upper Pannonia, viz., the districts about the Upper Drave and Save; and Upper Pannonia was bencetortb called Patnonia Prima, and Lower Pannonia, Pannonia Secunda (Amm. Marc. xv. 3, xxii. 12.) All these three provinces belonged to the diocese of llyricum. It should be observed, however, that Pannonia Secnoda is sometimes also called Interamnia, Savia, or Ripensis. (Sext. Rof. Brev. 11 ; Notit, Imp.) The three provinces into which Pannonia was thns divided were governed by three different officers, a praeses residing at Sabaria, a consnlar residing at Sirmium, and a praefect who had his seat at Siscia. The part bordering npon Germany, which stood most in need of protection, had always the strongest garrisons, thougb all Pannonia in general was protected by nnmerons armies, which were gradually increased to seven legions. Besides these troops the fleet stationed at Vindohona was the strongest of the three fleets maintained on the Dannbe.

Dion Cassins (xlix. 36) mentions an unfortunate etymology of the name of Pannonia from "pannus," "a rag or piece of cluth," referring to a peculiar article of dress of the inhabitants, thongh be also states at the same time that the nativescalled themselves Pannonians, whence it follows that the name can liave nothing to do with the Latin pannns. As to the identity of the name with that of Paconians we shall lave occasion to speak presently.

In its physical configuration, Pannonia forms a vast plain enclosed only in the west and south by mountains of any considerable height, and traversed only by hills of a moderate size, which furm the terminations of the Alpine chains in the
west and south, and are for this reason called by Tacitus (Hist. ii. 28) and Tibullus (iv. 1. 109) the Pannonian Alps. The separate parts of these ramifcations of the Alps are mentioned under the names of Mont Carvincas, Cetius, Aldi Montes, Claudius, and Alma or Alsies. The monntains on the western and southern frontiers contain the sources of some important rivers, such as the Draves and Saves, which flow almost parallel and empty themselves into the Danobe. Only one northern tribntary of the Dravus is mentioned, viz;, the Murics ; wbile the Savus receives from the south the Nacportus, Carcorle, Colapis, Oeneus, Uleanes, Valdasus, and Drines. The only other important river in the north-west is the Abrano. The northern part of Pannodia contained a great lake called the Peiso or Peiso (the Plottensee), besides which we may notice some smaller lakes, the Ulcaer Laces, between the Save and the Drave, हear their mouth. The climate and fertility of Pannonia are described by the ancients in a manner which little corresponds with what is now known of those countries. It is said to have been a rough, cold, ragged, and not very productive country (Atrab. vii. p. 317; Dion Cass, xlis. 37 ; Herodian, i. 6), thongh later writers acknowledge the fertility of the plains. (Solin. 21 ; comp. with Vell. Pat. ii. 110.) Both statements, however, may be reconciled, if we recollect haw mach the emperors Probus and Galerins did to promote the prodnctiveness of the country by rootiog out the large forests and rendering the districts ocenpied by them fit for agriculture. (Plin. iii. 28; Appian, Illyr. 22; Hygin. de Limit. Const. p. 206; Anrel. de Caes. 40.) As the forests in those times were probably mach more extensive than at present, timber was one of the principal articles of export from Pannonia, and great quantities of it were imported into ltaly. (Solin. 22.) Agricultnre was not carried on to any great extent, and was for the most part confined to the rearing of barley and oats, from which the Pannonians brewed a kind of beer, called Sabaia (Dion Cass. slix. 36; Amm. Marc, sxvi. 8), and which formed the chief articles of food for the natives. Olives and vines do not appear, at least in early times, to have gromin at all in Pannonia, until the emperor Probus introduced the cultivation of the vine in the neighbourbood of Sirmium. (Vopisc. Prub. 1, 18 ; Eutrop. ix. 17; Aurel. Vict. de Caes. 37.) Among the valuable productions of the vegetable kingdom, the fragrant salinnca is mentioned (Plin. xxi. 20), and among the animals dogs excellent for the chase are spoken of by Nemenianns (Cymeg. 126), the cattae by Martial (siii. 69), and the charax or black-cock by Athenaeus (iz. p. 398). The rivers mnst have prorided the inhabitants with abundance of fish. The ancients do not speak of any metals fonod in Pannonia, either hecanse the mines were not worked, or becanse the metals imported from Pannouia were vaguely said to come from Noricnm, where mining was carried on to a great estent.

The inhabitants of Pannonia (Pannonii, חavyóvoor, Пáv⿻oves, or חaioves) were a very nomerous race, which, in the war against the Romans, could semd 100,000 armed men into the field. (Appian, Illyr. 22.) Appian (l. c. 14) states that the Romans regarded them as belonging to Illyricum. Sone bave inferred from this that the great body of the people were Illyrians: and some tribes, such as the Pyrustac, Mazani, and Daesitiatac, are actually described by some as Illyrian and by others as I'an-
nonian tribes．The fact that most Greek writers called them Paeonians，and that Tacitus（Germ．43） speaks of the Pannonian language as different from that of the German tribes，seems to favonr the sup－ position that they were a branch of the Thracian Paeonians，whu had gradually spread to the banks of the Danube and the confines of Italy．It must bowever be observed that Jion Cassius（xtix．36）， who knew the people well，denies that they were Paeonians．There cam，however，be no doubt that Celtic tribes also existed in the country，and in the early part of the Roman empire Roman civilisation and the Latin language had made considerable progress．They are described as a brave and war－ Jike people，which，at the time when the Romans be－ came acquainted with them，lived in a very low state of civilisation，and were notorions for cruelty and Jove of bloodsbed（1）ion Cass．l．c．；Appian，Illyr．It： Strab．vii．p． 318 ；Stat．Silv．iii．13），as well as for faithlessness and cuuning（Tibull．iv．1．8）．But since their subjugation by the Romans，the civilisa－ tion of the cenquerors produced considerable changes （Vell．Pat．ii，110）；and even the religion of the Paunonians（some of their gods，such as Latobius， Laburus，Chartus，are mentioned in inscriptions） gave way to that of the Romans，and Pannonian divi－ nities were identified with Ronan ones（Spart．Sever． 15 ；Lamprid．Ale．c．7）．The Romanisation of the country mas promoted and completed by the esta－ blishment of colonies and garrisons，so that at the time of the migration of nations，the country was completely Romanised．
The following are the principal tribes noticed by the ancients in Pannonia ；some of them，it must be ohserved，are decidedly Celtic．In Upper Pannonia we meet with the Azali，Cyiny，Bohi，Cole－ thani，Oserhates，Serretes，Serrapilli，San－ dizzetes，Latobict，and Vabchivi，and perhaps also the lapodes or Lapydes，the Colaptani and SCordisca，though some of these latter may have extended into Illyricum．In Lower Pannonia，we have the Arabisci，Herccindatae，Andiantes， Iasif，Brettct，Ashavtint（Anhntes），and Cor－ vicates．Lesides these，Pliny（iii．26）mentions the Abivates，Belgitfs，and Catari，of whom it is not known what districts they inbabited．Towns and rillages existed in the country in great numbers cven before its conquest by the Romans（Dion Cass． 1v． 29 ；Jornand．（iet． 50 ）；and Alpiar＇s statement （Illyr，22），that the Pannonians lived only in vil－ lages and isolated farms，probably applies only to sonne renote and more rugged parts of the conntry． The most inportant towns were Vindobona，Cas－ atintesi，Scambintta，Sababia，Arrabo，Pae－ tovels，Siscla，Arahosi，Natpontes；and in Lower l＇annolia，Buegetwo，Aquinct＇m，Mursta． Chbalae，Achmserm，Tatienem，and shemiem．

The history of l＇amonia previous to its conquest by the Romans，is little known．We learn foom Jostin（xxiv．4．xxxii．3，12）that some Celtic tribes，probahly 1cmarats of the hosts of Bremus， settled in the country．Most of the tribes seem to have been goverod by their own cliefs or kings． （Vell．Pat．ii．11t；Sext．Kuf．Brev．7；Jormaud． de Reg．Sue．50．）The obseurity which hangs over its history begins to be somewhat removed in the time of the trianvirate at leme，n．c．35，when Octavianns，for no other purpose but that of giving las troopo oceujation and mantaining then at the expertse of ohers，attacked the Pannonians，and by conjutering the town of Siscia breke the strength of
the nation．（Dion Cass．xlix．36；Appian，Ilyr． 13,22, foll．）His general Vibius afterwards com－ pleted the conqnest of the couutry：But not many years after this，when is war between Maroboduus， king of the Marcomanni，and the Romans was on the point of breaking out，the Pannonians，together with the Dalmatians and other lllyrian tribes，rose in a grent insurrection against their oppressors，and it was not till after a blondy war of several years du－ ration that Tiberins succeeded in reducing them， and changing the conntry into a Roman proviuce， A．D．8．（Dion Cass．Iv．24，28，29；Suet．Tib．15， 20；Vell．Pat．ii．110，foll．）Heuceforth a can－ siderable army was kept in Pannonia to secure the submission of the people．When the soldiers received the news of the death of Augustus，they broke out in open rebellion，but were reduced by Drusus．（Tac． $A n n$ ．i．15，foll． 30 ；Dion Cass．Ivii．4．）Doring the first century Pannonia formed only one province， under the administration of a lieutenant of the ens－ peror．Respecting its division in the second century， we lave already spoken．Until the time of the migration of natiens，Pannonia remnined a part of the Keman empire；many colonies and mnnicipia were establisbed in the country，and fortrenses were boilt jor its protection；military roads also were constructed，especially one along the Danabe，and a second through the central part of the country from Vindobona to Sirmium．The Romans did indeed much to civilise the Pannorians，but they at the same time derived great benefits from them；the militury valour of the natives was of great service to them，and formed always a considerable por－ tion of the Roman Jegions．About the middle of the fifth century Pannonia was lost to the Romans in consequence of the conquests made by the Huns， to whom the emperor Theodosius II，was obliged furnally to cede Pannonia．（Prisc．Exc，de Leg． p． 37 ，ed．Raris．）On the dissolution of the empire of the Huns by the death of Attila，the conntry fell into the hands of the Ostrogoths（Jornand．Get．50）， from whom it passed，about A．D． 500 ，into those of the Longobardi，who in their turn had to give it up to the Avari in A，D． 568.

The ancient authorities for the geography of Pan－ nonia are Ptolemy（ii． 15 and 16），Pliny（ii．28）， Strabo（iv．p．206，foll．，v．p．213，foll．，vii．p． 313 ， foll．），Dion Cassius（xlix．34－38，Iv．23，24）， Velleius Patercnius（ii． 110, toll．），Tacitus（Ann．i． 16，foll．），Appian，Jornandes（ll．cc．）．Among modern writers the following deserve to be consulted： Schionleben，Camiola antiqua et nora，and Annales Corniolue antiquere et nutac，Labacus，1681，fol．； Katanesich，Comment．in C：Plinii Sceundi Pan－ nomian．Buda， 1829 ；Atcoulrr，Lect on Ancient Ifist vol．i．p．164，toll．
［I．S．］
YANOPELS or PHANOTELS（Mavonevis，Hom． Sirab．I＇aus．；Пavoint，Hes．ap．Strab．ix．p． 424 ； Steph．B．s．$v . ;$ Us．Met．iii． 19 ；Stat．Theb．vii． 344；Пavoreat，Herod．viii． 34 ；中avotcús，said by Strab．，ix．p． 423 ，to be its name in his time， but the form also occurs in Thuc．iv． 89 ；中avótesa， Stepl3．B．s．v．；Planntea，Liv．axxii．18：Fth． Mavoteís，中avotev＇s），an uncient town of lhocis， near the frontier of Bocotia，and on the road from Dunlis to Chaeroneia．l＇ausanias says that Pane－ peus was 20 stadia from Chaeroneia，and 7 from Daulis（ix．4．ss 1，7）：but the latter number is obvously a mistake．Thie ruins at the village of Aio Thasi（äyos Bגá⿱宀s），which are clearly those of I＇anopeos，are distaut about 20 stadia from Ká－
purna (Chacroneia), but as much as 27 stadia from Dhavlia (Daulis). Panopens was a very ancient town, originally inhabited by the Pblegyae. Schedins, the king of Panopens, and lis brother, were the lesders of the Phocians in the Trojan War. (Paus, x. 4. § 1.) Panopens was also celebrated for the grave of Tityos, who was slain by Apollo at this place, because he attempted to offer violence to Leto on her way to Delphi. (Hom. Od, x. 576 ; Pans. x. 4. § 5.) l'anopeus was destroyed by Xerses (Hernd. viii. 34), and again by Philip at the close of the Sacred War. (Paus. x. 3. § 1.) It wats taken by the Romans in B. C. 198, on the first attack (Liv. xxxii. 18; Polyb. v. 96) ; and was destroyed for the third time in the campaign between Sulla and Archelans, the general of Mithridates. (Plat. Sull. 16.) Pausanias says that the ancient city was 7 stadia in circuit ; but in his time the place consisted of only a few hats, situated on the side of a torrent. There are still considerable remains of the ancient walls upon the rocky heights above Aio 17asi. The masonry is of different periods, as one might bave expected from the twofold destruction of the city. There are no longer any remains of the tomb of Tity ${ }^{2}$, which, according to Paussnias, was the third of a stadium in circuufference, and strod on the side of the turrent. Pansanias also mentions on the side of the Sacred Way a building of unbaked bricks, containing a statue of Pentelic marble, which was snpposed to be intended either for Asclepins or Prometheus. It was believed by some that Promethens made the haman race out of the sandy-colonred rocks in the neighbourhood, and that they still smelt like human flesh. (Dodwell, Classical Tour, vol. i. p. 207; Leake, Northern Greece, vol. ii. p. 109 ; Ulirichs, Reisen, gc. p. 151.)

PANO'POLIS (Mavótoגıs, Dindor. i. 18 ; Ptol. iv. 5. § 72; Пav $\omega \nu \pi \delta \lambda \iota s$, Strab. xvii. p. 813; חavòs móגis, Steph. B. s. v.; sometimes simply Mavós, Hierocl. p. 731; It. Anton. p. 166: Eth. Паvoroлitns), the Greek equivalent of the Aegyptian appellative Chemmis or Chemmo (Herud. ii. 91, 145, seq-; Diodor. l. c.), was a very aucient city of the J'hebaid, lat. $26^{\circ} 40^{\prime}$ N. [Chemmis.] Panopolis was dedicated to Chem or Pan, one of the first Octad of the Aegyptian divinities, or, according to a later theory, to the Panes and Satyri generally of Upper Aegypt. (Plat. Is. et Osir. c. 14.) Stephamns of Byzantiom describes the Chem or Pan of this city as an Ithypballic god, the same whose reqresentation occurs so frequently among the sculptares of Thebes. His face was human, like that of Ammun; his head-dress, like that of Ammon, consisted of long straight feathers, and over the fingers of his right hand, which is lifted np, is suspended a seourge; the body, like that of Ammon also, including the left arm, is swatbed in bandages. An inscription oo the Kosseir road is the ground for supposing that Chem and Pan were the same deity; and that Chemmis and Panopolis were respectively the Aegyptian and Greek names for the same city is inferred from Diodorus ( $l$. c.) Panopolis stood on the right bank of the Nile, and was the capital of the Nomos Panopolites. Accordiog to Strabo (l.c.) it was inhabited prineipally by stonemasons and linen-weavers; and Agathias (iv. p. 133) says that it wats the birthplace of the poet Nonnns A. D. 410. Althongh a principal site of Panic worship, Panopolis was celebrated for its temple of Persens. From Herodutus (vi. 53) we koow that the Durian chieftains
deduced their origis from Persens throagh Aegypt. It is difficult to say which of the native Aegyptian gods was represented by Perseus. From the root of the word- $\Pi \dot{\epsilon} \rho \theta \omega$, to barn-it is probable, howeter, that he is tbe same with the fire-god Hephaistos or Phtab. The Panopolite temple of Persens was rectangular, and surrounded by a wall aronnd which was a plantation of palm-trees. At the entrance of the enclosure were two lofty gateways of stone, and upon these were placed colossal statues in bumau form. Within the adytum was a statue of Persens, and there also was laid up his sundal, two cubits long. The priests of Panopolis asserted that Persens occasionally visited bis temple, and that his epiphanics were always the omens of an abnndant barvest to Aegypt. The sandals of Persens are described by Hesiod (Scut. Herc. 220), and their deposition in the shrine implied that, having left his abode for a season, he was traversing the land to bless it with especial fertility. The modern name of Panopolis is Akhmim, an evident corruption of Chemmis. The ruins, in respect of its ancient splendour, are inconsiderable. It is probable, indeed, that Panopulis, like Abydos and other of the older cities of Upper Aegypt, declined in prosperity as Thebes rose to metropolitan importance. (Champollion, l'Egypte, vol. i. p. 267 ; Pococke, Travels, p. 115 ; Minutoli, p. 243.)
[W. B. D.]
PANORMUS (Пávopuos: Eth. Пavopuitךs, Panornitanus: Palermo), one of the most important cities of Sicily, sitnated on the N. coast of the island, about 50 miles from its NW. extremity, on an exteosive bay, which is now known as the Gulf of Palermo. The name is evidently Greek, and derived from the excellence of its port, or, more strictly speaking, of the anchorage in its spacions bay. (Diod. xxii. 10.) But Panormus was not a Greek colony; it was nndoubtedly of Phoenician origin, and appears to have been one of the earliest settlements of that peuple in sicily. Hence, when the increasing power of the Greek colonies in the island compelled the Phoenicians to concentrate themselves in its more westerly portion, Panormns, together with Motya and Solus, became one of the chief seats of their power. (Thuc. vi. 2.) We find no meation of the Phoenician name of Panormns, though it may fairly be presumed that this Greek appellation was not that nsed by the colonists themselves, It would be natural enough to snppose that the Greek name was orly a translation of the Pboenician one; but the Punic form of the name, which is foond on coins, is read "Machanatb," which signifies "a camp," like the Roman Castra, and has no reference to the port. (Gesenins, Monum. Phoen. p. 288 ; Mover's Phönizier, rol. iii. p. 335.)

We have no account of the early bistory of any of these Phoenician colunies in Sicily, or of the process by which they were detached from the dependence of the mother country and became dependencies of Carthage; though it is probable that the change took place wheo Pboenicia itself became subject to the Persian monarchy. But it is certain that Carthage already held this kind of supremacy over the Sicilian colonies wheo we first meet with the name of Panormns in bistory. This is not till в. c. 480 , when the great Carthaginian armament under Hamilcar landed there and made it their head-quarters hefore advaucing against Himera. (Diod. xi 20.) From this time it bore an important part in the wars of the Carthaginians in Sicily, and seems to have gradually become the acknowledged capital of their

## IANORMUS.

dominion in the island. (Folyh. i. 38.) Thus, it is mentioned in the war of n. c. 406 as one of their principal naval stations (Diod. xiii. 88) ; and again in B. c. 397 it was one of the few cities which remained faithful to the Carthaginians at the time of the siege of Mlotya. (1d. xiv. 48.) In B. C. 383 it is again noticed as the head-quarters of the Carthnginians in the island (Id. xv. 17); and it is certain that it was never takea, either by Dienysius or by the still more powerful Agathecles. But in B. C. 276, Pyrrhus, after having subdued all the other cities in Sicily held by the Carthaginians, except Lilybatum and Panormus, attacked and made himself master of the latter city also. (Id. xxii. 10. p. 498.) It, however, soon fell again into the hands of the Carthaginians, who held it at the outbreak of the First Punic War, B. c. 264. It was at this time the most importiut city of their dominions in the island, and getierally made the head-ouarters both of their armies and fleets; but was nevertheless taken with but little difficulty hy the Roman consuls Atilius Calatims and Cu. Cornelius Scipio in B. c. 254. (Pólyb. i. 21, 24, 38 ; Zonar. viii. 14; Diod. xxiii. 18 p. 505.) After this it became one of the principal naval stations of the Romans throughout the remainder of the war, and for the same reason became a point of the utmost importance for their strategic operations. (Diod. xxiii. 19, 21, xxiv. 1; Polyb. i. $39,55, \& \mathrm{c}$.) It was immediately under the walls of Panormus that the Carthaginians under Hasdrubal were defeated by L. Caecilius Metellus in B. C. 250 , in one of the most decisive hattles of the whole war. (Pulyb. i. 40; Zonar. viii. 14; Orus. iv. 9.) It was here also tluat the Romans had to maintain a longcontinued struggle with Hamilcur Barca, who had seized on the remarkable isolated mountain called Ereta, forming a kind of natural fortress only about a mile and a half from Panormus [Ercti], and succeeded in maintaining himself there for the space of three years, notwithstanding all the efforts of the Rumans to dislodge him. They were in consequence compelled to matintain an intrenched camp in front of l'anormus, at a distance of only five stadia from the foot of the mountain, throughout this protracted contest. (Polyb. i. 56, 57.)

After the Roman conquest of Sicily, Panormus becume a municipal town, but enjuyed a privileged cundition, retaining its nominal freedom, and immunity from the ordinary burdens imposed on other tuwns of the province. (Cic. Verr, iii. 6.) It was in convequence a flourishing and populous town, and the place where the courts of Jaw were held for the whole surroumding district. (1d. ib. ii. 26, v. 7.) Cicero notices it at this time as one of the principal maritune and cotomercial cities of the island. (Ib. v. 27.) In the settlement of the affairs of Sicily which secms to have followed the war with Sextus Pompeius, Panormas lost its liberty, but received a Ruan colony (Strab. vi. p. 272), whence we find it bearing in inscriptions the title of "Colonia Augusta Panormitaborum." It would seem from Dion Cassius that it received this colony in n. c. 20) ; and coins, as well as the testimony of Strabo, prove incontestably that it became a colony mader Angustus. It is strange, therefore, that Pliny, who notices al the other colonies founded by that emperin in Sceily, has onvitted all mention of Panormus as such, and romk it merely as an ordinary municipal town. (Plin. ini. 8. s. 14: Dion Cass in. 7: Eikliel, vol. j. p. 232 ; Urell. Inser. 942,3760 .) It subsequently received an accession of military colnuiats
under Vespasian, and again under Hadrian. (Li.b. Colon. p. 211; Zumpt, de Colon. p. 410.) Numerous inscriptions prove that it continued to be a flourishing provincial town throngheut the period of the Roman empire ; and its name is repeatedly mentioned in the Itineraries (Itin. Ant. pp. 91. 97; Tab. Peat.; Castell. Inscr. Sicil. pp. 26, 27, \&e.); but it is certain that it did not attain in ancejent times to the predominant position which it now enjoys. It fell iuto the hands of the Guths, together with the rest of Sicily, and was the last city of the island that was wrested from them by Belisarius in A. 1. 535. (Procop. B. G. i. 5, 8.) After this it continned subject to the Byzantine empire till 835, when it was taken by the Saracens, who selected it as the capital of their dominions in the island. It retained tbis position onder the Norman kings, and is still the capital of Sicily, and by far the most populous city in the islaod, containing above 160,000 inhabitants.

The situation of Palermo almost vies in beauty with that of Naples. Its beautiful bay affords an excellent roadstead, from whence it donbtless derived its name; and the joner or proper harbour, though not larye, is well sheltered and secure. The ancient city probably eccupied the site immediately around the port, but there are no means of tracing its topography, as the ground is perfectly level, without any natural features, and all ancient remains have disappeared, or are covered by modern buildiugs, We learn that it consisted of an outer and immer city; the furmer, as might be supposed, being the more recent of the two, and tbence called the New City ( $\dot{\eta} \nu \in ́ a \pi \delta \dot{\lambda} t s$ ). Each had its separate enclosure of walls, so that when the outer city was taken by the Romans, the inner was still able for some time to withstand their efforts. (Polyb. i. 38; Diod. xxiii. 18.) The only ancient remains now visible at Palermo are some slight vestiges of an amphitbeatre near the Royal Palace; but numerons inscriptions, as well as fragments of sculpture and other objects of antiquity, have been discovered on the site, and are preserved in the museum at Pa lermo.

The coins of Padormus are numerous: the more ancient ones have Punic inscriptions, and belong to the period when the city was subject to the Cartbaginians, but the beanty of their workmanship shows the unequivocal influence of Greek art. The later ones (strnck after the Roman conquest, hut while the city still enjoged nominal freedom) have the Jegent in Greek letters IANOPMITAN. Still later are those of the Roman colony, with Latin legends. On these, as well as in inscriptiuns, the name is frequently written Panlormitanorum; and this orthography, which is found also in the best MSS. of Cicero, seems to bave been the usual uve in Ruman times. (Kekliel, vel. i. p. 232; Zumpt, ad Cic. Verr. ii. 26.)
[1. II. B.]

fhis of rasomuts.

PANORMUS (חávophos: Eth. Havopuit $\quad$ ). 1. A harbour of Achaia, 15 stadia E. of the promontory of Rhinm. The bay is now called Tekičh from a tekieh or tomb of a Turkish saint, which formerly stood upoa it. (Paus. vii. 22. § 10 ; Thuc. ii. 86 ; Polyb. v. 102 ; Ilin. iv. 5 ; Leake, Morea, vol. iii. p. 195.)
2. A harbour on the east coast of Attica. [Vol. I. p. 331, b.]
3. A harbour in the district Chaonia in Epeirus, sitnated nearly midway between Oricum and Onchesmus. (P'tol. iii. 14. § 2.) Strabo describes it as a great harbour in the midst of the Ceraunian mountains (vii. p. 324.) It is now called Palerimo. It must he distinguished from Panormas, the hatrlour of Oricum (Strab. vii. p. 316), now Porto Raguséo. (Leake, Northern Greece, vol. i. pp. 3, 79.)
4. A harbour in the istaud of Cephallenia. [CEphallenia.]
PANORMUS (Háropuos). 1. The port of Ephesus formed by the month of the Caystrus, near which stood the celebrated temple of the Ephesian Artemix. (Strab. xiv. p. 639 ; comp. Liv. xxxvii. 10, foll., especially 14. 15; Epriesus.)
2. A port on the north coast of the peninsula of Halicarnassus, 80 stadia to the north-east of Myndus. (Stadiasm. Mar. Mag. §§ $272,273,276$, foll.) It is no doubt the same port which Thucydides (viii. 24) calls חávop
[L. S.]
PANORMUS, a harbour at the extremity of tbe Thracian Cbersonesus, opposite to the promontory of Sigeum. (Plin, iv, 11. s. 18.) [T. H. D.]

PANTA'GIAS (Mavtanias, Thuc.; Пàvãos, Ptal.: Porciri), a sinall river on the E. coast of Sicily, flowing inte the sea between Catania and Syracnse, a few miles to the N. of the promontory of Sta Croce. It is alluded to both by Virgil und Ovid, who agree in distinctly placing it to the N. of Megara, between that city and the month of the Symaethus; thus confirming the anthority of Ptolemy, while Pliny inaccurately enumerates it after Megara, as if it lay between that city and Syracnse. Its name is noticed both by Silins Italicus and Claudian, but without any clue to its position; but the characteristic expression of Virgil, " vivo ostia saxo Pantagiae," leaves no donbt that the stream meant is the one now called the Porciri, which flows through a deep ravine between calcareous rocks at its mouth, affording a small but secure harbour for small ressels. (Virg, Aen. iii. 689 ; Ovid, Fost. iv. 471 : Sil. Ital, xiv. 231 ; Clandian, Rapt. Pros. ii. 58 ; Plin, iii. 8. s. 14; Ptol. iii. 4. § 9; Cluver. Sicil. p. 131.) It is but a small stream and easily fordable, as described by Silius Italicus, but when swollen by winter rains becomes a formidable torrent; whence Claudian calls it "saza rotantem:" but the story told by Servius and Vibius Sequester of its deriving its name from the noise cansed hy its tumultuous waters, is a mere grammatical fiction. (Serv. ad Aen. l. c.; Vib. Seq. p. 16.)

Thucydides tells us that the Megarian colonists in Sicily, previous to the foundation of the Hyblaean Megara, established themselves for a short time at a place called Trotilus, above the river Pantagias, or (as be writes it) Pantacias (Thuc, vi. 4) The name is otherwise wholly unknown, but the site now occupied by the village and castle of La Bruca, on a tongue of rock commanding the entrance of the larbour and river, is probably the locality meant. (Smyth's Sicily, p. 159.)
[E. H. B.]
Pantalia. [Pactala.]
PANTA
vol. H.

Crunca Kerteh is still called Bospor. The uld name, howeser, continued in usi for a long time: for in the Italian clants of the middle ares we find the town called P'undico or l'ondicu, as well as Buspro or Tospro.

The walls of the city were repaired by Justinian. (Prucop, de Aedif. iii. 7.)

The site of Panticapaeum is well described hy Stiabo, "Panticapaenin," he says, ${ }^{4}$ is a hill, 20 staila in circumference, covered with briklings on every sile ; towartis the east it has a harbour and docks for 30 ships ; it has also a citadel" (vii. p. 390). The bill is now callal the Arm-chair of Mithridates. The modern town of Kerteh stands at the foot of the liill, a great part of it upon allovial soil, the site of which was pritably covered by the sen in ancient times Hence the hay on the northernside of the city appears to bave adwanced originally much further juto the land; and there was probably at one time a second port on the southeru side, of which there now remains only a small lake, separated from the sea by a bar of sand. Foundations of atucient hoildines and heaps of briek and pottery are still seattered over the lill of Mithridates; but the most remarkable ancient remains are the numerons tumuli romul Kertch, in whicb many valuable works of art have been discovered, and of which a full account is given in the works mentioned below. The most extizordinary of these tumuli are those of the kiugs situated at the mountain called Altun-Obo, or the golden mountain, by the Tartars. One of the tumuli is in the form of a cone, $\mathbf{1 0 0}$ feet high and 450 fent in diameter, and cased un its exterior with large blocks of atone, cubes of 3 or + feet, placed without exment or mortar. This remarkable monament has been at all timas the subject of mysterinas lesums, bet the entrance to it was zut discovered till Is:32. This entrance led to a gallery, constructel of layers of worked stone withont cement. Go text long and 10 fret high, at the end of which was a vanted chanter, 35 feet bigh and 20 feet in diameter, the Hloor of which was 10 feet below the flur of the entiance. 'This chamber, bowever, was empty, thongh on the ground was a large square stunc, on which a sarcophagus might have rested. This tumulus stands at a sput where two brauches of at long rampart meet, which extends N. to the Sea of Azuff, and SE. to the Bospurns just above Nymphaemm." It was probably the ameient boundary of the territory of l 'antionpaemin and of the kingdom of the Bespurus, berine the conumest of Nymphaeum and Thenooia. Within the rampart, 150 paces to thi. L ., thure is annther momment of the same kind, but untini-luel. It consisto of a circular esplanade, 500 pawe roum and 166 in daneter, with an exterior roveniug of Cychupem masonry, built of worked :towes, 3 feot long and hish, of which there are only five layers. But the greatest discovery has luen at the holl, called by the Tartars Kul-Obo, or the hill of cindor, which is situated cutside of the makient rampurt, and 4 mites trom Kertch. Here is a tmunhas 16.5 feet in diameter; and as some -whors werre carrying atway from it in 1830 the stones with which it was coverel, they accidentally opunded a passage into the interior. A vestibule, 6 fert square, led into a tomb 15 feet longe and 14 broad, which comtaned lanen of a king and queen, gulden and slter vases, anil other ornaments. Below this tomb was anutber, still richer; and from the two no lees than 120 pamuds' weinht of gold ornaments are said to have been exthuted. From the
forms of the letters found here, as well as from other circumstances, it is supposed that the tomb wias erected unt later than the fourth centory u, c. (Dubois, Voyage mutour du Caucuse, vol. v. p. 113, seq. : Seymour, Fiussiat on the Black Sea, ic. p. 255, seq.; Neumam, Dic Ilellenen in Skythenlunde, vol. i. p. 478 , setp.)

## COIN OF PASTICAPAECM,

PANTICAPES (Пактud́лns), a river of European Sammatia, between the Borysthenes and the Tanais, rises in a lake, according to Herodotus, in the N., separates the agricultural and nomad Sorthians, flows through the district Hylaea, and falls into the Borysthenes. (Herod. iv. 18, 19, 47, 54 ; comp. Plin. iv. 12. s. 26 ; Mela, ii. 1. § 5.) Dionysius Per. (314) says that it rises in the Rhipaean mouutains. Many suppose it to be the Samara ; but it cannot be identified with certainty with any modern river. For the various opinions held on the subject, see Bilir, ad Ilerod, iv. 54 ; Ukert, vol. iii. pt. ii. p. 191. Stephanus B. erruneously states that the town of Panticapteom stuod apun a river Panticapes. [Panticapazedm.]

PANTICHIUN (ПavTi义tov), a small cuast-town of Bithynia, to the south-east of Chalcedon, on the coast of the Propontis. (It. Aut. p. 140; Hierocl. p. 571: Tab, Peut.) The place still bears the name of F'andik or Pandikhi.
[L. S.]
PANTOMATRIUM (Пavтouditptov: Eth. חavтopátpios; Steph. B. s. v.), a town on the N. cast of Crete, placed by Ptolemy (iii, 17. § 7) between Shithymna and the promontory of Diom, but by Pliny (iv. 20. s. 20) more to the W., between Apterum and Amphinalla: probably on the modern C. Retino. (Höck, Creta, i. Pp. 18, 394.) [T.H.D.]

PANYASUS. [Palamise.]
PANYSUS ( חavvo( $\sigma$ )ós, 1'tol, iii. $10 . \S 8$; Plin. iv. 11. s. 18), a river of Muesia Inferior, flowing into the Euxine at Ollessus (I'arna). [T. H. D.]

PAPHLAGO'N1A (Пафлауovia: Eth. Пафла$\gamma \omega^{v}$ ), a country in the north of Avia Minur, bordering in the west on Bithynia, in the east on Pontus, and in the suath on (ialntia, while the north is washed by the Euxine. The river Parthenius in the west divided it from Bithynia, the llalys in the east from l'ontus, and Mount Olgastys in the suluth from (ialatia. (llecat. Fragm. I40; Scylax, p. 34; Stral. xri. pp. 544, 563; Agathem. ii. 6.) But it the case of this, as of other countries of Asia Minor, the boundarics arc somewbat fluctuating. Strabo, for example, whes saying that Paphlagonia ubso bordered on Phrygia in the south, was moot probably thinking of those earlier times when the Galatiuns had not yet established themselves in Phrygia. Illiny (vi. 2) again includes Amisus heyond tho Halys in Paphlaconia, while Mela $(\mathrm{i}, 19)$ regards Sinope, on the wost of the Halys, as a city of Pontns. It in prubable, however, that in early times the Paphlagonians oreupied, besides l’aphlagonja proper, at considemble tract of country on the east of the Malys, perlaps as far as Themiseyna or even Cape Lasoniun (Xemonh. fuctb. v, 6. § 1; Strab. aii.
p. 548), and that the Halys did not become the permanent boundary until the consolidation of the kingdom of Pontus. The whole length of the country from west to east amounted to about 40 geagraphical miles, and its extent from north to south about 20. Paphlagonia was on the whole a somewhat rough and mountainous conntry, Moust Olgassys sending firth its ramifications to the north, sometimes even as far as the coast of the Euxine; but the worthern part nevertheless contains extensive and fertile plains. (Xenoph. Anob. v. 6. § 6, foll.; comp. Strab, xii. p. 543 ; Pococke, $T_{\text {ravels, iii. p. 138.) }}$ The Olgassys is the chief monntain of Paphłagonia. Its numerons brunches are not distinguished by any special names, except the Scorobas and Citones. Its most remarkable promontories are Carambis and Symis; its rivers, with the exception of the Hslys, are but small and have short courses, as the Sesimues, Ochosbanes, Evarchus, Zaleces, and Ammias. The fertility was not the same in all parts of the country, for the northern plains were not inferior in this respect to other parts of Asia Minor, and were even rich in olive plantations (Strab. xii. p. 546 ), but the southern, or mare mountninous parts, were rough and unproductive, though distinguished for their large forests. Paphlagonian horses were celebrated in the earliest times (Hom. Il. ii. 281, foll.) ; the mules and antelopes ( $\delta$ opká $\delta$ es) were likewise highly prized. In some parts sheepbreeding was carried on to a cousiderable extent, while the chase was one of the favourite pursuits of all the Papblagonians. (Strab. xii. p. 547 ; Liv. xxxviii. 18.) Stories are related by the ancients according to which fish were dug out of the earth in Paphlagonia. (Strab. xii. p. 562 ; Athen. viii. p. 331.) The forests in the south furnished ahundance of timber, and the boxus of Mount Cotyras was celebrated. (Theophr. II. P. iii. 15; Plin. xvi. 16; Catull. iv. 13; Val. Flace. v. 16.) Of mineral products we hear little except that a kind of red chalk was found in abundance.

The oame Paphlagonia is derived in the legends from Paphlagon, a son of Phineus. (Eustath, ad Hom. II, ii. 851, ad Dion. Per. 787 ; Steph. B. s. y.; Const. Porph. de Them. i. 7.) Some modern antiquaries lave bad recourse to the Semitic languages to find the etymology and meaning of the name ; but no certain results can be obtained. An ancient name of the country is said to have been Pylaemenia (Plin. vi. 2; Justio, sxxvii. 4), because the Paphlagonian princes pretended to be descendants of Pylaemenes, the leader of the Paphlagonian Heneti (Hom. Il. xi. 851) in the Trojan War, after whom they also called themselves Pylaemenes.

The Paphlagorians, who are spoken of even in the Homeric poerns (Il. ii. 851, v. 577, xiii. 656, 661), appear, like the Leucosyri on that coast, to have been of Syrian origin, and therefore to have belonged to the same stock as the Cappadocians. (Herod. i. 72, ii. 104 ; Plut. Lucull. 23 ; Eustath. ad Dionys. Per. 72.) They widely differed in their language and manners from their Thracian and Celtic aeighbours. Their language, of which Strabo (sii. p. 552) enumerates some proper names, had to some estent been adopted by the inhabitants of the enstern bank of the Halys. Their armour cunsisted of a peculiar kind of belmets made of wiekerwork, small shields, long spears, javelins, and dagreers. (Herol. vii. i2; Xenoph. Anab. v. 2. § $28,4 . \S 13$.) Their cavalry was very celebrated on account of their excellent horses. (Xenoph, Anab. v. 6. §8.)

The Paphlagonians are described by the ancients as a superstitious, silly, and coarse people, though this seems to apply to the inhabitants of the interior more than to those of the coast. (Xenoph. Anab. v. 9. § 6 ; Aristoph. Eq. 2, 65, 1॥2, 110; Lucian, Alex. 9. foll.) Besides the Paphlagonians proper and the Greek colonists on the coast, we hear of the Heneti and Macrones, concerning whose Dationality nothing is known : they may accordingly have been subdivisions of the Paphlagonians themselves, or they may have been foreign iminigrants.

Until the time of Croesus, the country was governed by native independent princes, hut that king made Paphlagonia a part of his empire. (Herod. i. 28.) On the conquest of Lydia by Cyrus, the Paphlagonians were incorporated with the Persian empire, is which they formed a part of the third satrapy. (Herod. iii. 90.) But at that great distance from the seat of the government, the satraps found it ensy to assert their independence: and independent Paphlagonian kings are accordingly mentioned as early as the time of Nenophon (Anab. v. 6. § 3, 9. § 2). In the time of Alexander the Great, whose expedition did not touch those nortbern parts. kings of Cappaducia and Paphlagonia are still mentioned. (Arrian, Anab. ii. 4. § 1 ; iii. 8. § 5; Diod. Sic. xiiii. 16.) But this independence, though it may bave been merely nominal, ceased soon after, and 1'aphlagonia and Cappadocia fell to the share of Eunzenes. (Diod. Sic. xviii. 3 ; Justin, xiii. 4, 16.) After Eumenes' death, it was again governed hy native princes, until in the end it was incorporated with the kingdom of Pontus by Mithridates. (Arrian, ap. Phot. p. i2, ed. Bekker ; Diod, Eclog. sxxi. 3 ; Justin, $\operatorname{Ixx}$ vii. 1 ; Strab. xii. p. 540 ; Appian, Mithrid. 11, 12.) Mithridates, bowever, soon afterwards divided Paphlngania with his neighbour Nicomedes, who made his son, under the nume of Palaemenes, king of Paphlagonia. (Justin, xxsvii. 3, 4.) After the conquest of Mithridates, the Romans united the const districts of Paphlagonia with Bithynia, but the interior was again governed by native princes (Strab. l.c.; Appian, B. C. ii. 71 ; Plut. Pomp. 73) ; and whed their race became extinct, the Romans incorporated the whole with their empire, and thenceforth Paphlagonia formed a part of the province of Galatia. (Stıab. vi. P. 288, xii. pp. $541,562$. ) In the new division of the empire in the fourtl century, Paphlagonia became a separate province, only the eastermmost part being cut off and added to Pontus. (Hierocl. pp. 695, 701.) The principal coast towns were Amastris, Eivithini, Chomina, Citorus, Agelalus, Aboniticisos, Cibiolis, Sterhane, Potam, Athene, Slyope, and Carusa. The whale of the interior of the country was divided, according to Strabo, into nine districts, viz. Blaene, Domanetis, Pimolisene, Cimiatene, Timonitis, Gezatorigus, Marmolitis, Sanisene, and I'otania. The interior contained only few towns, such as Pompeiopolis, Gangra, and some mountain fortresses.
[L. S.]
PAPHUS (Ptol. viii. 20. § 3, \&c.: Eth. and Adj. Máфıos. Paphins, and Paphiacus), the name of two towns seated on the SW. extremity of the coast of Csprus, viz., Old Paphos (Пáфos màaad, Ptol. v. 14. § 1; or, in one word, Пaлaínaфos, Strab. xiv. p. 683 ; Palaepaphos, Plin, v. 31. s. 35) and New Paphos (Mápos Nia, I'tol, l. c.; Nea l'aphos Plin. l.c.). The mame of Paphos, without any adjunct, is used by poets and by writers of pruse to
demote bath il I anl New Paphos, but with this di. . thation, that in prose writers it commonly meams Now Paphes, whilst in the peets, on the enntrary, for whon the name of l'alaepraphos would have been unwieldy,-it generally signifies ohd Paphos, the more greculiar seat of the wurship of Aphrodite. In ineriptious, alon, both towns are c:lled Máфos. This indiscriminate use is sometimes productive of ambiyuity, especially in the Latin prose authors.

Old Paphos, now Krukla or Kimuklia (Engel, Kypros. vol. i. p. 125), nas satil to have been foundel) by Cinyris, the father of Adonis (Apollod. iii. 14); thuagh according to anuther logend jreserved by Strabo (xi. p. 505),-whone text, bowever, varies, - it was founded by the Amazons. It was seated on an eminence ("celsa l'aphus," Virg. Aer. x. 51 ), at the distance of about 10 stadia, or $1 \frac{1}{4}$ mile, from the sea, on which, however, it had a roadstead. it was not far distant from the promontory of Zephyrium (Stral. xiv. p. 683) and the mouth of the little river Bocarus. (Heqs.h.s. $r$. Bürcapos.) The fable ran that Venus lad landed there when she rose from out the sea. (Tac. Hist. ii. 3; Mela, ii. 7; Lucan, viii, 456.) According to Pausanias (i. 14), hor worship was introduced at Paphes from A $\sim y$ ria; lut it is much more probable that it was of Ploemidian orizin. [Phozsieti.] It had been very uncieutly establinhed, and hefure the time of Humer, as the crove and altar of Aphrodite at Paphos are mentioned in the Odyssey (viii. 362). Here the worslup of the goildess centred, not for Cypros alone, that for the whole earth. The Cinyradae, or de--rombunts of C'ingras,-Greek by name, but of Ploedarian oricin,-were the chief priests. Their power and antlarity were very streat; but it may be inferred from certail itsoriptions that they were cuntroiled tiv a sentate and an assembly of the people. There was ano an eh whe bew. (Enteli.p. 483.) Few cities have ever heen so much sume and glorified by the poets. (Cf. Aucht. Suppl. 525 ; Virg. Aen. i. 415 ; Hor. (1d. i. 19, 30, i11. 26: Su;t. Sile. i. 2. 101, Aristuph. Lysis, 833. \&c: \&c.) The remains of the vast templo of Aplarodte are still ilicernible, its circumferente being marked by huge foundation wall. After It, overthrow by an earthquake, it was rebuilt by Vispasiam, on whowe coin it is represented, as well an un earlier and later ones, and especially in the :ur it perfect style of those of Septimius Severns. (Vingel, vol. i. p. 130.) From these representations, and from the exutumg romains. Hetseh, an architect of Copwhagen. has attempted to reatore the buildinc. (Miflus Archuol. \& 2:39, 1. 261; Eckhel, vol. iii. p. 86. )

New Puhlos, now Raffit, was spated on the sea, woar the werteme ustremty if the island, and posiv ord a cond harb ur. It lay about foo stadia, or lurwon 7 and 8 usles NW: of the ancient city. (Srah. xiv. p. 683.) It was satil to have been fonmond hy Assmmer, thiof of the Arcodians at the siese of Trov (HItH. IC. ii. ©09), whe, after the the rapture of tiont town, was driven by the stomm, whith acphrated the (itectim fleet. on the coast of Cyprise (Patre viit. 5. S. 3.) We fint Agapemor mentionel as kme of the Paphoms in a Greck dis-
 and Hermbitas (vii. 90) alluder to an Arcalian culony in Cyprus. Like it anciont naumake, Nia Pathens was alat di-timsturhand for the worship of Venns, and containel sownul matnifiont tenples de. rated to that goodi -s. Yet in this respect the ill city secms to have aluay retainel thie pre-
eminence: and Strabe tells us, in the passage lu. fore cited, that the road leading to it from Niva laphos was annuaily crowded with male and female votaries resorting to the more ancient slirine, and coming mot only from the latter place itself, but also from the other towns of Cyprus. When Seneca says (N. Q. vi. 26, Ep. 91) that Paphos was nearly destroyed by an earthquake, it is difficult to say to which of the towns he refers. Dion Cassius (iiv. 23) relates that it was restored by Augustus, and called Augusta in his honour; but though this name has been preserved in inscriptions, it never supplanted the ancient mee in popular use. Paphos is mentioned in the Acts of the Apostles (xiii. 6) as having been visited by St. Paul, when it appears to have been the residence of the Roman govern\%:. Tacitus (Hist. ii. 2, 3) records a visit of the youthful Titus to Paphos before lie acceded to the empire, who inquired with much curiosity into its history and autiquities. (Cf. Suet. Tit, c. 5.) Under this name the historian doubtless included tbo ancient as well as the more molem city: and among other traits of the worship of the temple he record, with something like surprise, that the only image of the geddess was a pyramidal storie,-a relie, douhtless of Phnenician origin. There are still considerable ruins of New Paphos a mile or two from the sea; among which are particularly remarkable the remains of three temples which had been erected on artificial erninences. (Engel, Kypros, 2 vols, Berlip, 1841.)
[T. H. D.]
PAPIRA or PAPYRA, a town in the west of Galatia, on the road between Ancyra and Pessinus. (It.Ant. p. 201.)
[L. S.]
PAPLISCA. a town of the Libmi (Geog. Rat. iv. 16). which has been jdentified with Jablanatz on the mainland facing the S . of the island of Arbe. (Neigebaur, Die Sud-Slacen, p. 225.) [E. B. J.]

PAPPA (Пג́лतa), a town in the northern part of Pisidia (Ptol. v. 4. §12; Hieroel. p. 672; Concil. Nic. pp, 358. 575.$)$

PAPPUA MONS (Пantov́a, Procup. B. I. ii. 4.7), the inaccessibie mountain country in the interior of Numidia, where the conquest of Africa was completent by Belisarias, in the spring of A. D. 534, aod where Gelimer, the last of the Vandal kings, was taken. (Le Beau, Bas Empire, vol. viii. p. 248; Gilbon, c. sii.)
[E. B. J.]
PAIREAIS (חáтрๆpas, Herod. ii. 59, 71), is mentioned by Herodotus alore, and appears to have been seated in the western parts of Lower Aegypt. Mantiert (x. pt. i. pp. 517-519), without very good grounds for his supposition, believes it to have been another name for Xots. (Comp. Champoll. l'Egypte, vol. ii. p. 213.) Papremis was the capital of a nome called l'apremites (Herod. ib. 165), one of the districts assigned to the ITermotybian divisien of the Angyptian army. A deity corresponding in his attributes to the Greek Ares was warshipped in this mome; anl the river-horse was sacred to him. His festivals were of a sanguinary character, in which opposite parties of priests contended with staves, and inflicted on one another sometimes death, and usnally arrious wounds. Now the river-horse was among the emblens of Typhon, the destroying principle; and the festivals of the Papremite deity savoured of violence and destruction. He may accordingly hare Wen one of the forms of Typhon, whose worslip was widely spread over the 1)chat There is indeed an Acgptian gool named Kamp) (Wilkiuson, 3M, \& C' 11. 69, 70), whose attributes answer to those of

Ares, aul who may, accordingly, have been the object of Papremite worship. In the Papremite nome a battle was fonght between the Persians and Aecyptians, in which the satrap Achaemenes was defeated by Inarns, king of Lower Aegypt, B. C. 460. (Herod, iii. 12, comp. vii. 7: Ctesias, Excerpt. Persic. c. 32; Thuc. i. 104, 109.) It is aseless to speculate which of the rarious mounds of ruins in the Delta cover the site of a town whose exact situation cannot be discovered.
[W. B. D.]

## PARACANDA. [Maracanda.]

PARACHELOI'TIS. [AETOLIA, p. 63, a.]
 $\S 3,4$. § 1), the great south-eastern chain of the Tanrus, which under various names extended from the Caspian Sea to the province of Persis. The portion so called appears to have been the central part hetween the mountains of Media Atropatene on the N. and those of Persis on the S. Of this portion ML. Orontes (now Elwend) was the most considerable. Ancient geographers are not clear as to the extent to which the local names prevailed. Thus Strabo evidently places the Parachoathras far to the N., and seems to have considered it a prolongation of the Anti-Taurns in the direction of N. Media and Hyreania (xi. pp. 511, 514, 522). Ptolemy seems to have considered it a continnation towards the $S$. of the portion of the Anti-Tanrus which was called M. Jasonins.

PARADA, a town in Africa Propria, on the road from Thapsus to Utica. (Hirt. B. Afr. 87.) It may perhaps be identical with the town of \$apá, mentioned by Strabo (xvii. p. 831). Mannert (土. 2. p. 374) places it on Mount Zowan. [T. H. D.]

PARAEBA'SIUM. [Megalopolis, p. 310, b.]
PARAEPAPHI'TIS (Парarmaфitıs), a district of aocient Carmania Deserta (now Kirmún) mentioned by Ptolemy (vi. 8. § 12).

PARAETACE'NE (Параıтак $\nu^{\prime} \gamma^{\prime}$ ), a district of ancient Persis whicb extended along the whole of its N. frontier in the direction of Media Magna, to which, indeed, it in part belonged. The name is first mentioned by Herodotus, who calls one of the tribes of the Medians Paraetaceni (i. 101). The same district comprehended what are now called the Bakhtyari mountains and tribes. The whole country was rugged and mountainons (Strab. ii. p. 80, xi. p. 522, xv. p. 723 ; Plin. vi. 27. s. 31), and appears to have been inhabited, like the adjacent province of Cossaes, by wild and robber tribes (xvi. p. 744). The inhabitants were called Paraetaceni (Herod. l. c.; Strab. l. c. xv. p. 732) or Paraetacae (Strab. xv. p. 736 ; Arrian, iii. 19). There has been considerable discussion with regard to the origin of this name. The best determination seems to be that it is derived from a Persian word, Paruta, signifying mountain; and this again from the Sanscrit Purrata. It will be observed that while Herodotus gives the Paraetaceni a Median origin (l. c.), and Stephanus B. calls Paraetaca a Median town, Strabo gives one portion of the district so named to the Assyrian province of Apullnuiatis or Sittacene (xvi. p. 736). There were, howeser, other places of the same name at considerable distances from the Median or Persian province. Thus, one is mentioned b.tween Bactriana and Sogdiana, between the Oxus and Jaxartes (Arrian, iv. 21; Curt. viii. 14. 17), and another between Drangiana and Arachosia. (Isid: Char. p. 8.) In India, too, we find the Paryeti Montes, one of the outlying spurs of the still greater chain of the Paropamisus (or Hindii Kuish). (Las-
sen, in Ersch and Gräber, Eacycl. s. v. Paraeta-
cene.) cene.)
[V.]
PARAETONIUM (חapaitóvtov, Scyl. p. 44 ; Strab. xvii. p. 799 ; Pomp. Mela, i. 8. § 2; Plin. v. 5 ; Ptol. iv. $5 . \S 4$; Steph. B.; Itin. Anton.: Hierocles), a town of Marmarica, which was also called Ammonia. ('A $\mu \mu \omega \nu i a$, Strab, l. c.) Its celebrity was owing to its spacious barbour, extending to 40 stadia (Sirab. l. c.; consp. Diod. i. 31), but which appears to have been difficult to make. (Lucian, Quomodo listoria sit conscribenda, 62.) Paraetonium was 1300 stadia (Strab. l. c.; 1550 stadis, Stadiasm. § 19) from Alexandreia. From this point Alexander, B. c. 332 , set out to visit the pracle of Ammon. (Arrian, Anab. iv. 3. § 3.) When the "world's debate" was decided at Actium, Antonius stopped at Paraetonium, where some Roman troops were slationed under Pinarius f r the defence of Aegypt. (Plnt. Auton. 70; Flor. iv. 11.) The name occurs in Latin poetry. (Ovid, Met. ix. 7i2, Amores, ii. 13. 7; Lucan. iii. 295.) Justinian fortified it as a frontier fortress to protect Aegypt from attacka on the W. (Procop. de Aed. vi.2.) An imperial coin of the elder Faustina bas been assigned to this place, but on insufficient gronnds. (Eckhel, vol. iv. p. 116.) When the Aoulad Aly were sovereigns over this district, the site, where there were ancient remains, retained the name of Baretoun; but after their expulsion by the pasha of Aegypt, it was called Berek Marsah. (Pacho, Voyage dans la Marmarique, p. 28.) [E. B. J.]
PARAGON SINUS (Hapd́ywv кó $\lambda \pi$ ros, Ptol. vi. 8. § 7; Marcian, c. 28. ed. Müller), a gulf on the shore of Gedrosia, a little way beyond the Prom. Carpella (now Cape Bombareek), according to Ptolerny. Marcian states that it was of considerable size, and extended as far as the promontory called Alambater (now Ras Guadel) and the island of Liba or Ziba. It appears to bave been in that part of Gedrosia which was inhabited by the I hthyophaci: it is not, however, noticed in Nearchus's voyage. [V.]

PARALA'TS (Mapa入ais), a town of Lycaonia, and, as its name seems to indicate, situated near a lake. (Ptol. v. 6. § 16.) There are coins bearing the inseription "Jul. Ang. Col. Parlais" (Eckhel, vol. iii. p. 33. foll.), from which it appears that the place was made a Roman colony. But as the town and its elevation to the rank of a colony is not mentioned elsowhere, it has been supposed that the coins are either forged or have been incorrectly read [L.S.]

PaRALIA, or PA'RALUS. [Atrica, p. 322 .]
paratla, para'xia [Chalcidice, Vol. l. p. 598, a.]

PARAMBOLE (Paramwole, Itin. Hieros. p. 568 ; Parembole, Acta S. Alex. Wessel. p. 568), a town of Thrace, on the river Hebrus, still called Paremlolis, accoraing to Palma.
[T. H. D.]
PARAP1O'TAE (Паралı $\omega$ тat), an Indian tribe mentioned by Ptolemy (vii. $1 . \S 65$ ), and placed by him on the slopes of the Vindius M. (I'indhya Ms.) along the banks of the Namadus (Nerbudda). Lassen, in his Map of Ancient India, places them along the apper sources of the same river. [V.]

PARAPOTA'MII (Паралотápıot, Strab. Paus. ; Паратотаціа, Steph. B. s.v.: Eth. Паратот $\dot{\mu} \mu$ оо), a town of Phocis on the left bank of the Cephissus (whence its name), and near the frontier of Breotia. Its position is described in a passage of Theopompus, preserved by Strabo, who says that it stood at a distance of 40 stadia from Chaeroneia, in the entrance from Boeotia into Phucis, on a height of
minderate elevation, sitnated between Parrassus and Mome lledylium; he alds that these two mountuins were separated from each other by an interval of 5 stadia, through which the Cephissus flowed. (Strab. ix. p. 4.24.) Parapotamii was destroyed by Xerxes (Herod. viii. 33), and again a second time by Philip at the conclusion of the Sacred War. (Pans. x. 3. § 1.) It was never rebuilt. Platarch in his lifo of Sullit (c. 16) speaks of the acropolis of the deserted city, which he describes as a stony leight surrounded with a precipice and separated trom Mt. Helylium only by the river Assus. (Leake, Northern Cirepce, vol. ii. pp. 97, 195.)
PAKASO'PIAS (חapauwtias), a town of Thessaly in the district Oetatal. (Strab. ix. p. 434.)
l'alayaki (חapaúaios, Thuc. ii. 80; Rhianus, ap. Steph. B. s. t.), an Epirut tribe, whose territories, conterminous with thase of the Orestae, were situated on the hanks of the Aus (Viosa), from which they turk their name. In the third year of the Peloponnesian War, a boily of them, under their chief Oroedus, joinell Cnemus (Thuc. l.c.), the Lacedaemonian cominander. Arrian (Anab. i. 7), describing the route of Alexander from Elimiotis (Grevend and Tjersembä) to Pelimaneum in Thessnly, which steod a little to the E. of Trikkale, remarks tbat Alexander passed by the hinhlands of Paravaea, - Luizari and Smólika, with the adjacent mountains.

The seat of this tribe mast be confined to the valleys of the main or E. branch of the Aous, and the mountains in which that river originates, exrending from the Ani Stenct or Klisira, as far S . as the bunders of Tymplaca and the Molossi, and ineluding the central and fertile district of Komitza, with the N. part of Zapöri. (Leake, Northern Grecen, wol. iv. Pp. 115-120, 195.) [E. B. J.]

PALEMBOLE (Парє $\mu \sigma \delta \boldsymbol{\lambda} \eta$, Melet. Brev. p. 188, Paramink, It. Ant. p. 161 : It. Mieros, p568) was a purt or castic (Castra, Plin. v. 9. s. 10) on the lorders of Acgypt and Aethiopia, and altermately attacheel to either kingdom. Purembale was sthated between Syene and Taphis, on the left bank ut' the Nile, lat, $23^{\circ} 40^{\prime} \mathrm{N}$. In Roman times it was one of the principal fortresses of the southern extremity of the entrire, and was asnally occupied by a leguon. On the recession of the Roman boundary in Ducletian's reign, Parembole was handed over to thin Nuhae, and was frequently assniled by the Homuyes from the opposite bank of the river. (1'rucop, R. Pers. i. 19.) The ruins of its temples +14y still be spen at the villave of Debot or Debou. I ion the square enclonure of brick found there it - i1! srem to have been a peral settlement for - Hutuds as well as a regular station for soldiers. (Lin+ellin. Mom. drl (ithlo, p. 189.) [W. B. D.]

PARE:NTIUM (ПарtעTIuv: I'arenzo), a city of strin, on the W. coust of the peninsula, about 30 mules N. of Pola. (Plin. iii. 19. s. 23 ; Ptol. iii. 1. §27; Itim. Aut. p. 271; Titb. Peut.; Anon. Rav. iv, 31.) Fron the mention of the name by Stephanus of Byzuntimen (s. v.) it is probable that it existed as ain Ittian town provions to the Roman settloment thers. I'luy calls it an "oppidum civimm Rumamomm," and it would seen that it was alrealy wise of the mone comsiterable town- in the province, thangh it did ant then enjing the rank of a colons. Bat we leara from insenpitions that it subsequentiy uttained this rauk under Trajan, and bore the titles of Colonia Upia Jurention (Orell. Inser. 72, 3729; 7.unpt, de (olon. p. 402.) In commun with the oflore cities of lotria, its most Howrishing
period belongs to the elose of the Western Einpire, The modern city of I'arenzo is a small place, but retains its episcopal see, which dates from a very carly period.
[E. H, B]
PARGYE"TAE (Пap cording to Ptolemy (vi. 18. §3), occupied part of the chain of the Paropamisus (Hindiu Küsh). There can be little doubt that they lived along what are now called the Solimain Koh, a great chain of mountains which extends rearly SW. from Cubul parallel with the Panjab. There is some donbt as to the correct orthography of their name ; and it seems most probable that the real form is Parsyetae or Paryetae, which is also given by Itolemy as the name of another portion of the chain of the Paropamisus. Both probably derive their name from the Sanscrit Porvata, which means mountains. [V.]

FARI'TION. [l'Andun.]
PARIENNA (חapieyva), a town of Germany, in the coontry of the Quadi, was probalily sitnated on the river Waag, on the site of the modern Barin or Varin. (Ptol, ii. 11. § 29.)
[L. S.]
PARIETINUM, a town of the Celtiberians in Hispania Tarraconensis, identified by some with $S$. Clementc. (Itin, Ant. p. 447).
[T. H. D.]
PARIN (Mápiv, lsidor. 1/ans. Petrth. c. 17, ed. 3iiller), a town mentioned by 1sidorus of Charns in Drangiana, er, as be calls it, Zarangiana. It has been conjectured by Forbiger that it is represented by the Modern Para; Müller, however, thinka it is the same as Bakoua.
[V.]
PARISI (Mapiool, Ptol. ii. 3. § 17), a British tribe dwelling on the NE. coast of Britannia Romana, and on the left bank of the Abus (Humber), consequently in tho Eust Riuting of Yorkshire. Their chief town was Petuaria (Merovapia, Ptol. l. c.), which is thought to be the same with the Praetorium of the Itinerary (pp. 464, 466), and whence there was a road througi Eboracum (York) to the Roman Wall. Respecting the site of Petuaria there bave been many conjectures, and it has been rarionsly identified with Beverley, Burgh. Auldly, $\& c$.
[T. H. D.]

## PARI'SII. [Letetla.]

PATIIUM (Mápıov: Eth. Mapıavós), a const-town of Mysia, on the Hellespont, on the west of Priapus, in the district called Adrasteia, from an ancient town which once existed in it (Strab, xiii. p. 588). Pliny, (v. 40) is mistaken in stating that Homer applied the name of Adrasteia to Parium, and the only trum that seems to lie at the bottom of his assertion is that a town Adrasteia did at one time exist between Priapus and Parimn, and that on the destruction of Adrasteia all the building materials were transferred to Parium. According to Strabo, Parium was a colony of Milesians, Erythraeans, and Parians; while laasanias (ix. 27. § i) calls it simply a colony of Erytbrae. Accmiding to the common traditions, it had reccived its name from Parius, a son of Jason, (Eustath. ad IIom. Od. v. 125, ad Dion. Per. 517; Steph. B. s.v.)

The barbour of Parrium was larger and better than that of the neightunurine Priapus ; whence the latter place decayed, while the prosperity of the former increased. In the time of Augustus, Pariun became a Roman eolony, as is attested by coins and inscriptions. It contained an altar construcied of the stmes of an oracular temple at Adrastein which had heen removed to I'arimu ; and this altar, the work of Hennocreon, is deseribed as very remarkable on account of its size and beauty. Strabo and Pliny (vii.
2) mention, as a ceriosity, that there existed at Pa-
 the members of which, like the Libyar. Psylli, had it in their power to cure the bite of a snake by merely tenching the person that had been bitten. Parium is also mentioned in Herod. v. 117 ; Xenoph. Anab. vii. 2. § 7, 3. § 16 ; Ptol. v. 2.§ 2 : Appian, Mithrid. 76 ; Mela, i. 19 ; Polyaen. ri. 24 . The present towo occupying the site of Parinm bears the name of Kemer or Kamares, and contains a few ancient remains. The walls fronting the sea still remain, and are bnilt of large square blocks of marble, witbout mortar. There are also ruins of an aqpednct, reserwoirs for water, and the fallen architraves of a portion. The modern name Kamares seems to be derived from some ancient subterraneous buildiogs (kaudpar) which still exist in the place. (Walpole, Turkey, p. 88 ; Sestini, Num. Vet. p. 73.) [L. S.]

coln of pabium.
PARMA (Íd́pua: Eth. Parmensis: Parma), a city of Gallia Cispadana, sitnated on the Via Aemilia, at the distance of 19 M. P. from Regium Lepidum, and 40 from Placentia. (Itin. Ant. p. 286.) It was about 15 miles distant from the Padus, on the banks of a small stream called the Parma, from which it probably derised its name; and abont 6 miles from the more considerable Tarus or Taro. We find no mention of the name before the establishmeat of the Roman colony, thongh it is very probable that there already existed a Gaulish town or village on the spot: but in в. c. 183, after the complete subjugation of the Boii, and the construction of the Via Aemilia, the Romans proceeded to strengthen their footing in this part of Gaul by founting the colonies of Mntina and Parma, along the line of the newly opened highway, which, in connection with the two previonsly existing colonies of Bononia and Placentia, formed a continuous chain of Roman towns, from one end to the other of the Via Aemilia. Parma was a "colonia civium," its settlers retaining their privileges as Roman citizens ; it received in the first instance 2000 colonists, each of whom obtained 8 jugera of land for his allotment. (Liv. xxxix. 55.) We hear little of Parma for some time after this: it is mentioned incidentally in B.C. 176, as the head-quarters of the proconsul C. Clandius (Id. xli. 17); but appears to have suffered little from the wars with the Gauls and Ligurians ; and bence rose with rapidity to be a flourisling and prusperons town. But its name is scarcely mentioned in history till the period of the Civil Wars, when it sustained a severe bow, having in 13, c. 43 taken a prominent part in favonr of the senatorial party against MI. Antony, in consequence of which it was taken by that general, and plnndered in the most nnsparing manner by his troops, (Cic. ad. Fam. x. 33, xi. 13, a., xii. 5, Phil. xiv. 3, 4) Cicern still calls it on this occasion a Colonia, and there can he no doubt that it still retained that rank; but nuder Angustus it received a fresh colony, from which it derived the title of Colonia Julia Augusta, which we find it bearing in inscriptions. (Gruter, Inscr. p. 492.5 ; /umpt, de Colon. p. 354.) Pliny also styles it a Colonia, and there seems no doubt
that it continned under the Roman Empire to be, as it was in the time of Strabo, one of the principal towns of this populous and flourishing part of Italy. (Plin, iii. 15. s. 20 ; Strab. v. p. 216 ; Ptol. iii. 1. § 46 ; Phlegon, Mocrob. 1.) Bnt its name is scarcely mentioned in history: a proof perhaps of the trumpillity that it enjoyed. Its territory was celebrated for the excellence of its wool, which according to Martial was inferior only to that of Apulia. (Martial, xiv. 155 ; Colum, vii. 2. § 3.) In A. D. 377 , a colony of Goths was settled by order of Gratian in the teriitory of Parma, as well as the adjoinitg districts (Ammian. xxxi. 9. § 4),-n proof that they were alrcady suffering from a decay of the population ; and it is probable that it did not escape the general devastation of the province of Aemilia by Attila. But it survived these calamities: it still bears a part as an important town during the wars of Narses with the Goths and their allies, and is noticed by P. Diaconus, as one of the wealthy cities of Aemilia after the Lombard conquest. (Agath. B. G. i. 14-17; P.Diac. Hist. Lang. ii. 18.) It retained its consideration throughout the middle ages, and is still a popnlons and flourishiog place with above 30,000 inhabitants, but has no remains of antiquity, except a few inscriptions.

The Roman poet Cassius Parnensis wonld appear from his name to have bees a native of Pama, bnt there is no distinct testimony to this effect.

The Itinerary (p. 284) mentions a line of crossroad which proceeded from Parma across the Apennines to Luca: this must have ascended the valley of the Parma, or the adjoining one of the Tarns, as far as the main tidge, and and thence descended the valley of the Mlacra to Luna. This passage, though little frequented in modern times, is one of the main lines of natural commanication across this part of the Apennines, and is in all probalility that followed by Hannibal on his advance into Etroria.
[E. H. B.]
PARMAECAMPI (Париаぃд́ $\mu$ тог), a tribe of Sonthern Germany, on the east of Mtomnt Ahnobat and the Danube; they probably occopied the district abont the town of Cham in Bavaria. (Ptol, ii. 11. § 24.)
[L. S.]
PARNASSUS (Mapvaaads) a towe in the northern part of Cappadocia, on the right bank of the Halys, and on or near a bill, to whicb it owed its name, on the road between Aneyra and Archelais, ahout 63 miles west of the Intter town. (Polyb. xxv. 4 ; It. Ant. pp. 144, 206; It. Hicros. p. 5 -6; Geogr. Sacr. p. 255.$)$
[L. S.]
PARNASSUS MONS. [DELPHi]
PARNES. [ATtica, p. 321, seq.]
PARNON. [Laconia, [1. 109.]
PARORCOPOLIS (Пaponóroरıs, Ptol. ii. 13. § 30), a town of Sintice, in Macedonia, on the right of the river Strymon. Nigrita, on the road from Saloniki to Seres, was either Thistolus (Tpíatoגos, J'tol. l. c.) or Paroecopolis, for these are the only two towns besides Heraclein which Ptolemy assigns to Sintice. If Nigrita be assigned to Tiistolus, Paroecopulis will be represented by Skafischa, which lies to the N. of the fonner town. (Leake, Northern Grecce, vol. iii. p. 229.) [E. B. J.]

PAROLISSUM ( Пaрó̀t $\sigma \sigma \circ \nu$, or Пupó̀a $\sigma \sigma o \nu$, Ptol. iii. 8. § 6; Parolissos, Tab. Peut.; cf. Orelli, Inscr. No. 3433), a municipal town of Dacia. seated at the termination of the lionan road towards tho N. According to Marsili (ii. p. 85). Micaza; according to Mannert (iv. p. 216), on the Marosch,
above T＇eissenburg；acconling to Lecharil，Vayy－ Banja．
［T．II．D．］
PAROPAMISADAE（Паротацเба́おar or Паро－ тañ ádal，Strab．xvi．p．691，\＆c．；Diod．xvii．82 ； Arrian，Aneb．v． 3 ；Ptol．vi． 18 ；Paropamisii． Mela，i．2．§5），the collective nathe of a Dumber of small tribes who lived alung the spurs of the great chain of the Paropanisus（Hindui Kush），and chiefly along its southern and eastern sides．The dis． trict they inhabited，which was called generally
 lounded on the W．by Ailima，on the N．by Bac－ triama，on the E，by the Indus and Panjub，and on the S．by Arachosia，It compreliended therefore the whole of Cabulisturn，and a considerable portion of Afghanistan．The two principal rivers of this district were the Dargamenes（now Gori）and Co－ phen（Ciibul river）．The population appears to have been a free independent mountain race，who never till the time of Alesander had been compelled to sabmit to a foreign ruler．During the Persian dominion of Asia，as the Paropamisalae are not mentioned，it may be presumed that they remained unsubdued．Their chief tribes were the Bolitae （jerliais Cabolitae，the inhabitants of Cábul），the Amhautae，Parsii，and Paryetae or Pargyetae （Ptol．vi．18，§ 3）．Their chief towns were Orto－ spanum（Cäbul），Alesandreia（perhaps Bamián）， G．uzaca，and Capissa or Caphusa．The valleys between the momtains，though exposed to great cold during the winter，were very fertile．（Strah． xvi．p． 725 ；Curt．vii．3．§ 15．）
［V．］
PAROPAMISL＇S（ $\delta$ חiapotápuoros，Strab．xv． p． 689 ；Парота́vィбоs，Ptol．ทi．11．§ 17 ；Парала́－ $\mu \mathrm{I} \sigma \mathrm{os}$ ，Arrian，Anab．«．4．§ 5 ；Парола́цьббо5， Steph．B．s．v．；Paropamisus，Mela，i．15．§ 2；Plid． vi．17．s．20），a great chaim of mountaibs extending from about $67^{\circ} \mathrm{E}$ ．long，to $73^{\circ} \mathrm{E}$ ．long．，and along $35^{\circ} \mathrm{N}$ ．lat．，and forming the connecting link between the Western Caucasus and the still more eastern Imaus or Himulaya．Their general modern name is Mindih Kish，but several of the most remarkable groups have their own titles：thus the great moun－ tains W．of Caibul are now called Koh－i－Baba，and those again N．of the Cabul river in the direction of Jellalubad bear the title of Nishadha．

The altutude of these mountains，though not so great as that of the Himulaya，varies from 15,000 to 18,000 feet．It is difficult to determine whence the（ireeks ubtained the name wherely thes have recorded these mountains，or which is the best othouraply to adopt．Yet it seems not unlikely thint l＇talemy is the most correct，and that in the firvelk larupanisus we have some traces of the San－ errit Jishadha．

The ancinnt writers are by no means clear in their accounts of these mountains，and there is a purpectalal confusion between the Taurus and the Cancanns．The reavon of this no doubt is，that， till the time of Alexander＇s invasion they were altogether unkn wis to the Grecks，and that then the efficers when described different portions of this celebrated expedition stmetimes considered the $\mathbf{I n}$－ dian chain as a continuation of the Taurus，and sometines of the Cauzans．Thus Strabo，in one phace，states that the Maredonians called all the mountains beyoul Ariana eastwarl，Cancasus，but that among the barbarous peophe they bore severally the names of Paropamisus，Emolus，and Imaus （xi．p．511）：in an ther，he appears to consider the range which bounded lath on the north to be the
extreme end of Taurus，which extended to eno Fastern Sea（xy．p．689）．Arrian appears to have thooght that Taurus ought to have been the true name of these，as he considers this great chain to extend across the whole of Asia from M．Mycate， which is opposite to Satuos．（Anab．v．5．）But he adds，that it was named Caucasus by the Mace－ donian soldiers to gratify Alexander，as though，in passing into Sogdiana through Bactrians，be had crossed the Caucasus．Under the double name ot Taurus and Cancasus，he states his belief that this chain is the watershed of all the great rivers of Asia．（l．c．）Again，in another place，he coincides with the description in Strabo，and asserts that the Indian names of Paropamisus，Emodus，\＆c．，are local titles of the extended chain of the Taurus． （lud．2．）Other ancient authors agree more or less with these determinations：thus Mela gives the whole ceDtral chain from E．to W．the name of Tanrus（i．15，iii．7）：Curtius calls it Caucasus （vii．3．§ 19，viii．9．§ 3）；Plıny，enumerating the several groups from E．to W゙．，gives the name of Caucasus to that portion W：of the IIindi Kish which connects the chain with the Caucasus and －Taurus of Western Asia（vi．17．s．21）：Ptolemy appears to bave considered the Paropamisus part of the Caucasus（vi．18．§ 1）；lastly，Polybius， speaking of the Oxus，states that it derived its waters from the Caucasus（x．46，xi．32）．It has been snggested that the present name of Hindi Kuish is derived from Indicus Cancasus．
［V．］
PARO＇PU＇S（Hápwtos：Eth．Paropinus），a town of Sicily mentioned by Polybius（i．24）during the First Punic War，in a manner that seems to indi－ cate its site betwreen Panormus and Thermae（Ter－ $\operatorname{mini}$ ）．It is not noticed by any of the geographers except Pliny，who mentions it in his list of the stipeodiary towns of Sicily（Plin．iii．8．s．14）； and in another passage（ $I b . \S 92$ ）speaks of the island of Ustica as lying＂contra Paropinos．＂This is all the clue we bave to its position，and its exact site cannot therefore be determined．［E．H．B．］
PAROREATAE．［Elis，p．818，a．］
PAROREIA．［Megalorolis，p．309，h．］
PARORE1A（Пар́́pela），a city of Thrace on the borders of Macedonia（Liv．xxxix．27，xlii．51），is called by Stephanus B．（s．v．）a city of Macedunia． Its inhabitants are mentioned by I＇liny（iv．10．s． 17）under the name of Paroraei．

## PARORIOS．［l＇hnyga．］

PAROS or PARUS（חdapos：Eth．Mápios： Paro），an island in the Accaean sea，and one of the largest of the Cyelades，lies west of Naxos，from which it is separated by a channel shout 6 miles wide．It was said to lave been originally inhabited by Cretans and Arcalliaus，and to have received its name from Parus，a son of the Arcadian Parrhasius． （Callinach．ap．Steph．B．s．v．）It was also re－ ported to bave borne the names of Pactia．Deme－ tuias，Zacynthus，Hylec̈sa，Minoa，and Cabarnis． （Nicanor，ap．Steph．B．s．v．）It was colonised by the lonians，and became at an early period so pros－ perous as to send colonies to Thasus（Thac：is． 104：Strab．x．p．485），to Pariom on the Propontis （Strab．l．c．），and to I＇harus on the Illyrian comot． （Strab．vii．p．315．）After the battle of Marathon， Miltiades in vam endeavoured to subjugate the island．（Herod．vii．133，seq．；Ephorus，ap．Steph．B． s．v．）The Parians did not take part in the hattlo of Salanis，but kept alow at Cythnus，watching the course of events．（1leror riii．67．）Ther es－
caped，however，punishment，by giving large bribes to Themistocles．（Herod．viii．112．）Along with the otber islands in the Aegaean，Paros shortly after－ w．urds became subject to Athens，and，according to an inscription，paid the imperial city the yearly tribute of 19，440 drachmas．（Franz，Elem．Epigr． Gr ．No．49．）Paros subsequently sbared the fate of the other Cyclades ；and there is nothing further in its history to require special mention．The poet Archilochas was a native of Paros．
The island consists of a single round mountain， sloping evenly to a maritime plain which surrounds the mountain on every side．It was celebrated in autiquity for its white marble，which was exten－ sively employed in architecture and sculpture，and was reckoned only second to that of M1t．Pentelicus． The best kind was called $\lambda i \theta_{o s} \lambda u \chi \nu i t \eta s, \lambda u \chi \nu \in \dot{\rho}$ ， or גíhōos．（Athen．v．p．205；Plin．xxxvi．5．s．14： Diod．ii．52．）The quarries were cbiefly in Mlt． Marpessa．（Steph．B．s．v．Máp $\quad \eta \sigma \sigma a ;$ Marpessia cautes，Virg．Aen，vi．471．）The Parian figs were also celebrated．（Athen，iii．p．76．）According to Scylax（p．22）Paros possessed two harbours．Its chief city，which bore the same name as the island， was on the western coast．It is now called Pa－ roikia，and contains several ancient remains．On a small bill SE．of the city Rass discovered in the walls of a house the inscription $\Delta \dot{\eta} \mu \eta \tau \rho o s$ Kapтофо́pov，and close by some ancient ruins． This was probably the site of the sanctuary of Demeter mentioned in the history of Miltiades，from which we learn that the temple was outside the city and stood upon a hill．（Herod．vi．134．） Paros had in 1835 only 5300 inhabitants．（Thiersch． Ueber Paros und Parische Inschriften，in the Ab－ kandl．der Bayrischen 4 kad ．of 1834，p．583，\＆c．； Ross，Reisen auf den Griech．Inseln，vol．i．p． 44 ； Leake，Northern Greece，vol．iii．p．85，\＆cc．）

COLN OF PAROS．
PARRHA＇SIA，PARRHA＇SII．［ARCADIA， p．192，b．］

PABSICI MONTES，a small chain of mountains in the western part of Gedrosia，beyond the river Arabres．Forbiger has conjectured that they are the same as the present Buskurd Mts．Connected doubtless with these mountains，and in the same district was the Parsis of Ptolemy（vi．21．§5）， which be calls a metropolis，an opinion in which Marcian assents（c．24，ed．Mitller），and another tribe whom Ptolemy calls the Parsirae or Parsidac （ri．21．§ 4）．It seems not unlikely that these are the same people whom Arrian calls Pasirae（Ind． c．26）and Pliny Pasires（vi．23．s．26）．［V．］

PaRTHALIS（Plin．vi．18．s．22），the name given by Pliny to the palace of the rulers of the Calingae，who lived at the months of the Ganges． Tite last edition of Pliny by sillig reads Protalis fur the older form，Parthalis．
［V．］
l＇ARTHANUA，a town in Rlactia，on the ruad from Laureacum to Veldidena，where，according to the Notitia buperii（in which it is called Parro－
donnm），the first Rhaetian cohort was stationed． （Itin．Ant．pp．257，275．）its site is generally ilentified with the modern Partenkirchen．［1．．s．］

PARTHE＇NI PARTHI＇NI（חapөqvoí，חapoıvoi， Пap日ivot，Strab．vii．p． 326 ；Appian，Illyr．1； Dion Cass．xli．49；Cic．in Pis．40；Pomp．Mrla， ii．3．§ 11 ；Piin．iii．26），a people of Grecian $1115-$ ricum，who may be placed to the N．in the neigh－ bourhood of Epidamnus，and，consequently，next to the Taulantii．They are often meationed in tho course of the war with Illyricum，B．c． 229 ，but as friends rather than foes of the Romans，having snbmitted at an early period to their arms．（Polyb． ii．11：Liv．xxix．12．）After the death of Philip， king of Macedon，they appear to have been added to the dominions of Pleuratns，an Illyrian prince allied to the Romans．（Polyb．xviii．30；Liv．xxx．34， xliv．30．）Their principal town was Parthis （Пáp $\theta$ os，Steph．B．s．v．），which was taken by Caesar in the course of his campsign with Pom－ peius．（Caes．B．C．iii．41．）In Leake＇s map the site is marked at Ardhenitza（？）．The double－hilled Dimallam，the strongest among the llyyian places， with two citadels on two heights，connected by a wall（Polyb．iii．18，vii．9），was withia their terri－ tory．There is no indication，however，of its precise situation，which was probably between Lissus and Epidamnus．Of Eugenius and Bargulum，two other fortresses noticed by Livy（xxix．12），notbing further is known．
［E．B．J．］

## PARTHE＇NIAS．［HARpina．］

PARTHE＇NIUM（ $\tau \delta$ חap日éviov ópos），a moun－ tain on the frontiers of Arcadia and Argolis，across which there was an important pass leading from Argos to Tegea．［See Vol．1．pp．201，202．］ （Paus．viii．6．§ 4 ；Strab，viii．Pp． 376,389 ；Po－ lyb．iv．23；Liv，xxxiv．26；Plin．iv，6．s．10．）It was sacred to Pan；and it was upon this mountain that the courier Pheidippides said that he had had an interview with Pan on returving from Sparta， whither he had gone to ask assistance for the Athenians shortly before the battle of Marathon． （Herud．vi． 105 ；Paus．i． 28. § 4，viii．54．§ 6．） The pass is still called Parthéni，but the whole mountain bears the name of Röino．It is 3993 feet in height．（Leake，Morea，vol．ii．p．329，seq．； Peloponnesiaca，p．203．）

PARTHE＇NIUM（Пapéévò），a town in Mysia， in the south of Pergamum．（Xenoph．Anab．vii． 8. §§ 15,21 ；Plin．v．33．）Its exact site has not been ascertained．
［L．S．］
PARTHE＇NIUM MARE（Парөєעाкò $\pi \dot{\epsilon} \lambda a \gamma o s$, Greg．Naz．Or．six．），the eastern part of the Mare Internum，between Egypt and Cyprus．（Amno． Marc．xiv．8．§ 10：from which writer it also ap－ pears that it was sometimes called the Issiac Sea－ ＂a vespera（Aegyptus）Issiaco disjungitnr mari， quod quidam nominavere Parthenium，＂xxii． 15. § 2.$)$
［T．H D．］
PARTHE＇NIUS（Hap日évos），the most important river in the west of Paphlagonia．It owes its Greek name probably to a similarity in the sound of its native appellation，which is still Bartan－Su or Bar－ tine；tbough Greek authors fabled that it derived its name from the fact that Artemis loved to bathe in its waters（Scymm．226，foll．）or to lanat on its banks，or from the purity of its waters．The river has its sonrces on mount Olgassys，and in its north－western course formed the boundary between Paphlagonia and Bithynia．It empties itself into the Euxine nbout 90 stadia west of Amastris．（Hom．

[L. S.]
PARTHE'NOPE. [Nearolis.]
PA'RTHIA (方 Mapөuafa, Strab, xi. pp 514.515, \&e.; i, Пapөunv̀े, Polyb. x. 28 ; Steph. B.s.v.; Curt.v. 12: Пapola, Ptol. vi, 5. §§ 1: P'arthia, Plin. vi. 15. s. 16), originally a small district of Western Asia, shut in on all sides by either mountains or deserts. It was Inounded on the W. by Media Atrupatene, on the N. by Myrcania, om the E by Ariana and MI. Masdoranus, and on the S. by C'arnania Deserta. M. Parachoatliras, and Persis. It comprehended, therefore, the southern part of Khorisun, almost all Kohistan, and some portion of the great Salt Desert. It was for the most part a mountainons and rugged district. The principal momotains were the labus or Labatas (probably part of the great range now known by the mane of the Elburs Mts.), the Parachoathras (or Etwend), and the Masdoranus. The few rivers which it possessed were little more than monntain straums, liable to vinlent and sadden floods on the inclting of the snow, but nearly dry during the summer: the only names which have been recorded of these streans are, the Zivheris or Stiboetes, the Rhidagus, and the Chuatres. The principal divisions of the land wer into Camisene, on the north; Parthyene, to the SW. of Camisene, extending along the eitece of the Caspian Sea, as far as the Caspian (i,ates, a district which some have supposed to have been the eriginal seat of the population, and that from which the whole country derived its name; Choarene, the western portion of the land, and for thir must part a fruitful valley along the fremtiers of Melia; Apararctere, to the S.; and Tahiene, along the borders of Carmania Deserta. There were no great towns in Parthia, properly so ealled, but history has preserved the manes of a few which played an inportant Iart at different periods: of these, the best known were Hecatompolis, the chief town of the larthians, and the royal residence of the dynasty of the Aracidae, and Apameia Rhagiana.

Little is known of larthian history at an early perioul; and it is probable that it was subject to the wreat empire of Persia, and subsequently to the first suceussors of Alesander, till the first Arsaces threw ( ff thie Sym-Macedonian rule, and established a 1utive dyunsty on the throne of Parthia in n. C. 256. Fisar this perind it grew rapidly more pewecful, till, ou ther final deeay of the house of the Nolencidae, the Arsuidan dynasty passessed the rule of the enater part of Western Asa. Their long wars with Dho Romans are well known mo Eastern race was Ahe to make so effecturd a resistance to the advance if tho koman arms, or vindicated with more conEnny and determination their natural freedom. Thie userthrow of 'rissus, I. c. 53, showed what eron the mudaciphand Parthian twenps eould do whon fighting fin froedom. (Dion ("ass. xl. 21.) Solmequent to this, the Romans were oncasionally -ancocifol. Tlens, in A. D, 34, Vonomes mas sent e3s hustace to Kome (Tacit. Anneal ii. 1) ; and tanally the proater fart of the conntry was subdoned, suecenively, hy the arms of Thajan, by AnEwor us, and Caracalli, till, at lempth, the rase of the IV. Sowamian, or mative dynasty of Persia, anter the conmand of Artaximes I. put int end to the Hin . of Arsaces (A. D. 22t). Sintisentuent to this

## PARYADRES.

period there is a constant cenfusion in ancient anthors between I'ersians and Parthians. The history of the Parthian kings is given at length in the Dict, of Biog. Vol. 1. p. 355, seq.

The inlabitants of Parthis were called Parthyaei (HapAvaiot, Polyb. x. 31 : Strab. xi. p. 509 ; Arrian, Anab. iii. 21; Ptol. iii. 13. § 41) or P'arthi (П́́pөa, Herod. iii. 93 : Strab. xi. p. 524 ; Plin. vi. 25. 8. 28 ; Amm. Marc. sxiii. 6), and were, in all probability, one of the many branches of the great Indo-Germanic family of nations. Their own tradition (if, indeed, faithfully reported) was that they cane out of Seythia - for they were wont to say that Parthian meant exile in the Scythian tongre. (Justin, zli. 1.) Herodotus, too. classes them with the people of Chorasmia and Sogdiana (iii. 39, vii. 66); and Strabo admits that their manners resembled those of the Scythians (xi. p. 515). On the other hand, modern research has demenstrated their direct connection with tbe Iranian tribes; their name is found in the Zend to be Pardu, in the Sanscrit Purada. (Benfey, Review of W'ilson's Ariana, Berl. Jahrb. 1842, No. 107.) According to Strabo, whe quetes Posidomus as bis antherity, the Parthians were governed by a double council, coniposed of the nobles or relatives of the king (according as the reading eújevôv or ouv$\gamma \in \nu \bar{\omega} \nu$ be adopted), and of the Magians (xi. p. 515). As a nation, they were famous for their skill in the management of the horse and for their use of the bow (Dion Casa, 5]. 15, 22; Dionys. 1045; Plut. Cross. c. 24), and for the peculiar art which they practised in shooting with the bow from horseback when retreating. This peculianty is repeatedly noticed by the Reman poets. (Virg. Georg. iii. 31; Horat. Carm. i. 19. 11, i. 13. 17; Ovid, Art. Am. i. 209.) In their treatment of their kings and nobles they were considered to carry their adulation even beyond the nsual Oriental excess. (Virg. Gicorg. iv. 211; Martial, Epigr. x. 72, 1-5.) [V.] PAlRTHI'NI. ['Anthe:s.]
PARTHUM (Háptov or Máptos, Appian, Pum. viii. 39), a town in the jurisdiction of Carthace, in the neighbourbood of Zama.
[T. II. D.]

## PARTHUS, in Illyricum. [Partheni.]

PARLS. [PAROS.]
PALU"TAE (Пapoutat, Ptol. vi. 17. §3), a trilie placed by Ptolemy en the outskirts of the Paropamisus in Ariana. It is probable that these people derive their name from the Sanscrit Parvata, mean ing mountain tribes.
[V.]
PARYADRES ( Пapváôpms, Пupváepts, or Пapv$\dot{\alpha} \rho \delta \eta s)$, a range of lofty and rugged montains in the north of Pontus, which is connected with Mount Taurus ami Mount Cancasus (Strab. xi. p. 497, xii. p. $548 ;$ I'lin. v. 27, vi. 9,11 ). It commences at the western extrenity of the Montes Mosehici, proceeds in a south-western direction round Pontus, and there forms the frontier between Armenia and Cappadocia. A more southern branch of the same muntuin is the Scoelises. I'tolemy (v, 13, §§ 5, 9) describes this mountain as containing the soorces of the Euphrates and Araxes, and accordingly includes within its rauge Mount Abus, from which others make those rivers flow. The Paryadrea contnins the sources of only snall rivers, of which the lareest is the Absarus. The mountain was in ancient times thickly onvered with wood, and the population noon and about it consisted of robbers (Strali, xii. p. 548). Dany parts of the mountain are extremely rugeced, and almest inaccessible, whence Mitlaridates of P'untus built many of his treasore-houses there, and
when pursued by Pompey, concealed hirmself in its fastnesses. In a climatic point of view the monntain divides Pontus into two distinct regions ; for while the north side is stern and cold, its southern side is delightfully warm. Hence the ancients called the point of transition in a pass betreen Trapezus and Satale, the Frigidarinm. The modern name of the mountain is generally Kuttag, but it is also called Kara Bel. (Touroefort, Voyage i. lettre 18. p. 107.)
[L. S.]

## I'ARYE'TAE. [Pangyetae.]

PASA'RGADAE (Пa $\alpha a \rho \gamma \dot{\delta} \sigma \iota$ ), necording to Herodutus, one of the three chief tribes of the ancient Fersians (i. 125); according to other writers, a people of the adjoining province of Carmania (Ptol. vi. 8. § 12; Dionys. v. 1069). The probability is, that they were the inhabitants of Pasargadae io Persis.
[V.]
PASA'RGADAE (Пaoap ${ }^{\prime}$ á $^{\delta a r, ~ S t r a b . ~ x v . ~ 730), ~}$ n great city of the early Persians, situated, according to the best authorities, on the small river Cyrus (now $K u ̈ r$ ), in a plain on all sides surrounded by mountains. It contained, according to Strabo, a paluce, the treasures, nad other memorials of the Persian people, and thoogh not so magnificent as P'ersepolis, was highly esteemed by that people for its antiquity ( $\mathrm{xv}, 728$ ). In another place the same geographer states that the most ancient palace was nt Pasargadae ; and in its immediate neighbourhood the tomb of Cyrus, who had a regard for the spot, as that oo which he finally overthrew Astyages the Molle (xr. 730). It is by the notice of the toinb of Cyras in Strabo (l. c.), and more fully in Arrian (vi. 29), that we are now enabled to identify the site of the ancient Pabargadae with the modern Murgháb. At Murgheib a building has been noticed by many mollern travellers, and especially by Morier and Ker Porter, which corresponds so well with the description in ancient anthors that they have not hesitated to pronounce it the tomb of Cyrus ; and the whole adjoining plain is strewed with relics of the once great eapital. Amoog other monuments still remaioing is a great mooolith, on which is a bas-relief, and above the relief, io cuneiform characters, the words "I am Cyras, the king, the Achaemeniao." The same iascription is found repeated on other stones. (Morier, Travels, i. p. 30, pl. 29 ; Ker Porter, i. p. 500; Lassen, Zcitschrift, vi. p. 152 ; Burnouf, Mémoire, p. 169; Ouseley, Travels, ii. pl. 49.) The name of the place is found in different authors differently written. Thus Pliny writes "Pussagarda" (vi. 26. s. 29), Ptolemy "Pasargada " (vi, 4. § 7). Sir W. Ouseley (l. c.) thinks that the original name was Parsagarda, the habitation of the Persians, on the analogy Dakub-yerd, Fiviz-gerd, \&c.
[V.]
I'AIDDA (Пá $\left.\begin{array}{r}\circ \\ 0\end{array}\right)$ ), a small port on the coast of Caramaoia, mentioned by Marcian ( Peripl. Ş 28). Furbiger thinks that it is the same as that callet in sume editions of Ptolemy Magida, io others, Masin (vi. 8, § 7).
[V.]
Pasinum, Pasinus. [Liburni.]
PASLRA ( $\tau \dot{a ̀ ~ П a \sigma i p a ́, ~ A r r i a n, ~ I n d . ~ c . ~ 25), ~ a ~ p l a c e ~}$ meationed by Arrian in Gedrosia, as tunched at by Nearchus in bis voyage. It is doubtful whether it is $t n$ be considered as distinet from another place he bas meationed just before, Bagisara. Kempthorne has identified the latter with a locality now known by the nane of Arabah or Hormarah bay, and thinks that a large fisling village in the iamediate neighbourhood may be that called ly Nearchus,

Pasira The inlabitants were called Pasime or Pasirces. Pliny places the Pasiras along the river Tomberon or Tomerus (vi. 25. s. 27). Nearchus, however, makes the Tomerne flow at a distance of 900 stadia from Pasira. It is probable that the Rhagirana of Ptolemy refera to Bagisaura or I'asiia (vi. 21. § 2).

PASITIGRIS. [TigRIS.]
PASSALAE (Пaбनáخat, Ptol. vii. 2. § 15), n tribe in India extra Gangem, placed by Ptolemy between the Imaus and the M. Bepyrrhus. They must therefore have occupied sotne of the mountainvalleys on the eastein side of Tibet. Pliny mentions them also (vi. 19. s. 22)
[V.]
PASSARON ( Maroavov), the ancient capital of the Molossi in Epeirus. where the kings and assembled people were accustomed to take mutual oaths, the one to govern according to the laws, the uther to defend the kingdom. (Plut, Pyrrh, 5.) The town was taken by the Roman praetur L. Anicius Gallus in B. c. 167 . (Liv. xlv. 26. 33, 34.) Its site is uncertain. but it was apparently on the gea-coast, as Anna Comnena mentions (vi. 5, p. 284, ed. Bonn) a harbour called l'assara on the coast of Epcirus. If this place is the same as the older I'ussaron, the ruins at Dhramisiuss, which lie inland in a SSW. direction from Iounnita, cannot lie those of the ancient eapital of the Molossi. Thuse ruins are very considerable, and contain among otber things a theatre in a very fine state of preservation. (Leake, Northern Greece, vol. iv. p. 81.)
PATARA (Пátapa: Eth. Пatapeús, Patarensis or Pataranus). 1. A small towa in Cappader is or Armenia Minor. (Tab. Peut.)
2. A flourishing maritime and commercial city on the south-west coast of Lycia. The place was large, possessed a good harbour, and was said to have been founded by Patarus, a son of Apollo. (Strab. xiv. p. 666 ; Steph. B. s.v.) It was situated at a distance of 60 stadia to the south-cast of the month of the river Xanthus. (Stadiusm. Mar. Mag.§ 219.) Patara was most celebrated in antiquity for its temple and oracle of Apollo, whose senown was inferior only to that of Delphi ; and the genl is often mentioned with the surname I'atareus (חaтapeús, Strab. L. c.; Lyeoph. 920; Hurat. Carm. iii. 4. 64; Stat. Thel. i. 696; Ov. Met. i. 515 ; Virg. Aen. iv. 143; Ponp. Mela, i. 15.) Herodotus (i. 182) says that the oracle of Apollo was delivered by a priestess only during a certain period of the ycar; and from Servius (ad Aen. l.c.) we learn that this period was the six winter months. It has been sujposed that the town was of Phoenician or Semitic urigin; bat whatever may be thought on this point, it scems certain that at a later period it received Dorian settlers from Crete; and the worship of Apollo was certainly Dorian. Strabo informs us that l'tulemy Philadelphus of Egypt, who enlarged the city, gave it the name of Arsinote, but that it nevertheless continued to be called by its ancient name, Iatara. The place is often Doticed by ancient writers as one of the principal cities of Lycia, as by Livy, xxxiii, 41, zxxvii. 15-17, xxxviii. 39; Polyb. xxii. 26: Cic. p, Flace. 32: Appian, B. C.iv, 52, 81, Mithr. 27 ; Plin. ii.112, v. 28 ; I'tol. v. 3 . § 3 , viii. 17. § 22; Dionys. I'er. 129, 507. Patara is mertioned among the Lycian bislopprics in the Acts of Councils (Hierocl. p. 684), and the name Patera is still attached to its mumerous ruius. These, according to the survey of Capt . Beaufort, are situated on the sea-shore, a little to
the eastward of the river Xanthus, and consist " of a theatre excavatel in the northern side of a somall liill, a ruined temple on the side of the same hill, and a deep circalar pit, of singular appearance, which may have been the spat of the oracle. The town walls surrounded an area of considerable extent; they may easily be traced, as well as the situation of a castle which commandel the larbonr, and of several towers which flanked the walls. On the cutside of the walls there is a multitude of stone sarcuphagi, most of them bearing inseriptions, but als open and empty; and within the walls, temples, altars, pedestals, and fragments of sculpture appear in profusion, but ruioed and mutilated. The situation of the harbour is still spparent, but at present it is a swamp, choked up with sand and bushes." (Beaufort, Karmania, pp. 2, 6.) The theatre, of which a plan is given in Leake's Asia Minor (p. 320), was built in the reign of Antorinus Pius; its diameter is 265 fect, and has about 30 rows of scats. There are also ruins of thermae, which, according to an inscription upon them, were built by Veopasian. (Comp. Sir C. Fellows, Tour in Asia Min. p. 222, foll.; Discow. in Lycia, p. 179, foll.; Texier, Descript. de l'Asie Min., which contains numerous representations of the ancient remains of Patara; Spratt and Furbes, Travels in Lyeia, i. p. 31, foll.)
[L.S.]
PATAV1SSA ( Пarpoui $\sigma \pi a$, Ptol, iii. 8, § 7 . wronely), a small town of Dacia, endowed by the emperor Severus with the jus colnnite. (Ulpian, Dig. i. 8. 9, where it is called Patavicensium vicus.) Variously identified with . Mar-C jerar, or with Ptovis or Toris, on the Marosch; also with Bogatz and St. Kiraly, on a tributary of the same river. [T.H.D.]
PATA'VIUM (Пataoútov: Eth. Patavinus: $P_{C-}$ dorut), one of the most ancient and important cities of Venetia, situated on the river Medoacus (Brenta), about 30 miles from its mouth. According to a tradition recorded by Virgil, and universally received in antiquity, it was fouaded by Antenur, who escaped thitber after the tall of Troy; and livy, himself a native of the city, confirms this tradition, though he dues not mention the name of Patavium, but dewribes the whole nation of the Veneti as having mierated to this part of Italy under the guidance of Antonor. He identibes them with the Heneti, who were mentioned by Homer as a Paphlagonian tribe. (1.iv. i. 1; Virg. Aen. i. 247; Strab. v. p. 212; Mel. ii. 4. § 2 ; Solin. 2. § 10.) The national aflinities of the Veneti are considered elsewhere [Vivent]. The story of Antencr may safely be ingretel as nythical; but we may infer from the anheral accorlane of ancient writers that l'atavium iterlf was a lithetian city, and apparently from an early pertion the capital or chiof place of the nation. We have very little information as to its history, beptire it brame subject to Rome, and we know waly the genural fice that it was at an early periow as opmient and flomivining city: Sirabo even tells in that it could send into the field an army of 120,000 men, but this is evidently an exageeration, and probahly refiers to the whole nation of the Vemeti, of which it was the capital. (Strab. r. p 213.) Whatever was the origin of the Veneti, there +eems no doult they were a people far more ndranead in civblisation than the neighbouring Giauls. with whom they were on terms of almost continual hostility. The viqilance renderal necesary by the incarsions of the fianls stoced them in atusd on oceasion of the unexyected attack of Cleonymus the

Lacedacmonian, who in B.e. 301 landed at the mantb of the Medoacus, but was attacked by the Patavians, and the greater part of his forces cut off. (Liv, x. 2.)

It was donbtless their continual hostility with the Gauls that led the Venetians to become the ullies of Rome, as soon as that power began to extend its arms into Cisolpine Gaul. (Pol. ii. 23.) No special mention of Patavium occurs daring the wars that followed; and we are left to infer from analogy the steps by which this independent city passed gradually under the dependence and protection of Rome, till it ultimately became an ordinary municipal town. In B, c. 174 it is clear that it still retained at least a semblance of independence, as we hear that it was distracted with domestic dissensions, which the citizens appealed to Rome to paciff, and the consul M. Acmilius was selected as deputy for the purpose. (Liv, xli. 27.) But the prosperity of Patavium continued unbroken: for this it was indebted as much to tbe manufacturing industry of its inhabitants as to the natural fertility of its territory. The neighhouring bills furnished abundance of wool of excellent quality; aod this supplied the material for extensive woollen manufactures, which seem to have been the staple article of the trade of Patarium, that city supplying Rome in the time of Augustus with all the finer and more costly kinds of carpets, hangings, \&c. Besides these, however, it carried on many other branches of inanufactures also; and so great was the wealth arising from these sources that, according to Strabo, l'atarium was the only city of Italy, except Rome, that could return to the census not less than 500 persons of fortunes entitling them to equestrian rauk. (Strah. iii. p. 169, ₹. pp. 213, 218.) We cannot wonder, therefore, tbat both he and Mela speak of it as noquestionably the first city in this part of Ituly, (id. r. p. 213 ; Mela, ii. 4. § 2.)

The Patavians had been fortunate in escaping the ravages of war. During the Civil Wars their name is scarcely mentioned; but we learn from Cicero that in B. C. 43 they took part with the senate against M. Antonius, and refused to receive his emissaries. (Cic. Phil. xii. 4.) It was probably in consequence of this, that at a later period they were severely oppressed by the exactions of Asinius Pollio. (Macrob. Sat. i. 11. § 22.) In A. 1. 69 Patavium was occopied without opposition by the gencrals of Vespacian, Prinıus, and Varus, during their advance into Italy. (Tac. Hist. iii. 6.) From its good fortune in this respect there can be no doubt that P'atavium continued down to a late period of the Empire to be a flonrishing and wealthy city, though it seems to have been gradually ecliped by the increasing prosperity of Aquileia and Mediolunum. Hence Ausonius, writing in the four!b century, does not even assign it a place in his Ordo Nobilium Urbium. But its long period of prosperity was abruptly brougbt to a close. In A. D. 452 it felt the full fury of Attila, who, after the capture of Aquileia, whicls had long resisted his arms, laid waste ahnost without opposition the remaining cities of Venetia. He is said to have utterly destroyed and razed to the ground l'atavium, as well as Concordia and Altinum (P. Diac. Hist. Miscell. xv. p. 549); and, according to a tradition, which, though not supprited by contemporary evidence, is probably well founded, it was on this occasion that a large number of fugitives from the former city took refuge in the islands of the lagunes, and there founded the
celebrated city of Venice. (Gibbon, ch. 35, note 55.) But Patavium did not cease to exist, and must have partially at least recovered from this calanity, as it is mentioned as one of the chief towns of Venetia when that province was everron by the Lombards under Alboin, in A. D. 568. (P. Diac. Hist. Lang. ii. 14.) It did not fall into the bands of that people till near 40 years afterwards, when it was taken by Agilnlf, king of the Lomhards, and burnt to the ground. (Id. iv. 24.) But it once more rose fiom its ashes, and in the middle ages again became, as it has contimued ever since, one of the most considerable cities in this part of Italy, though no longer enjoying its ancient preeminence.

It is probably owing to the calamities thus suffered by Patavinm, as well as to the eartbquakes by which it has been repeatedly visited, that it has now scarcely any relics of its ancient splendour, except a few inseriptions; and even these are mnch less mnmerous than might have been expected. One of them is preserved with great care in the town-hall as containing the name of T. Livins, which has been supposed to refer to the great historian of the name, who, as is well known, was a native of Patavium. Bat this is clearly a mistake; the inscription in question refers only to an obscure freedman; nor is there the slightest foundation for regarding the sarcophagus preserved with it as the tomb of the celebrated historian. (Biogr. Dict. Vol. I1. p. 790.) But at least the supposition was more plausible than that which assigns another ancient sarcophagns (discovered in 1274, and still preserved in the charch of S.Lorenzo) as the sepulchre of Antenor! Besides these sarcophagi and inscriptions, the foundations of ancient bnildings have been disccevered in varions parts of the modern city, but nothing now remains above ground.

Patavium was the birtbplace also of Thrasea Paetus, who was put to death by Nero in A.D. 66. One of the canses of offerice wlich he hal given was by assisting as a tragedian in certain games, which were celebrated at Patavinm every 30 years in bonour of Antenor, a custom said to be derived from the Trojan fonnders of the city. (Tac. Ann. xvi. 21 ; Dion Cass. 1xii. 26.) We learn also from Livy that in bis time the memory of the defeat of the Spartan Cleonymus was preserved hy an annual mack fight on the river which flowed through the midst of the town. (Liv. x. 2.) [E. H. B.]

PATA'VIUM (Maraoviov), a town of Bitlynia on the south of Lake Ascania, between the Sinns Astacenus and the Sinus Cianus. (Ptol. v. 1. § 13.)
[L.S.]
PATERNUM, a town on the E. coast of the Bruttian peninsula, mentioned only in the Itinerary of Antoninus ( p .114 ); from which we learn that it was situated 27 miles from Roscianum (Rossano), probably in the neighhourhood of the Capo dell' Alice, the ancient Cape Crimissa; but the supposition that it was the same place with the more ancient city of Crimissa is a mere conjecture; as is also its identification with the modern town of Ciro. The name of Paternnm again occurs in early ecclesiastical records as the see of a bishop, but afterwards wholly disappears, (Holsten. Not. ad Cluv. P. 207; Romanelli, vol. i. p. 213.) [E. H. B.]

## PATHISCUS. [Tibiscus.]

PATIGRAN (Ammian, xxiii. 6), one of the three principal towus mentioned by Ammianus Marcellinus in Media. This place is nowhere else
noticed; but it is not impossible that the name is a barbarons corruption of the 'Tigrana of P'olemy (vi. 2. §9).
[V.]
PATAIOS (Пátuos: Patmo), one of the Spamdes Insulae, in the south-east of the Aegean, to the wpst of Lepsia and sonth of Samas, is said to bave been 30 Roman miles in circumference. (Pliny, iv. 23; Strab. x. p. 488 ; Thucyd. iii. 23; Eustath. ad Dion. Per. 530.) On the north-eastern side of the island there was a town with a harbour of the same name as the island, and the southermmost point formed the promontory Amazonium (Stadiasm. Mar. Mag. p. 488, ed. Hoffimann). This little island is celebrated as the place to which St. John was banished towards the close of the reign of Donitian, and where he is said to have composed the Apocalypse (Revel. i. 9). A cave is still shown in Patmos where the apustle is beliesed to have received his revelations. (Comp. Iren. ii. 22; Euseb. Hist. Eccl. iii. 18; Dion Cass. 1siii. 1.) The island contains several churches and convents, and a few remains of the ancient town and its castle. (Walpole, Turkey, tom. ii. p. 43; Ross, Reisen auf den Gricch. Inseln, vol. ii. p. 123, foll.)
[L. S.]
PATRAE (Пátpal; in Herod. i. 145, Пatpées, properly the name of the inhabitants: Eth. Пaтpeús, Thnc.; Пatpatés, Pol. iv. 6; Patrensis: Patrasso, Patros, Patra), a town of Achaia, and one of the twelve Achaean cities, was situated on the ceast, W. of the promontury Rhium, near the opening of the Corinthian gulf. (Herod. i. 145; Pol. ii. 41 ; Strab. viii. p. 386.) It stood on one of the outlying spurs of Mount Panachaïcus (Fidhid), which rises immediately behind it to the height of 6322 feet. It is said to have been formed by an union of three small places, named Aroë ('A $\rho o ́ \eta$ ), Antheia (Av $\begin{gathered}\text { eia), and }\end{gathered}$ Mesatis (Meбáris), which bad been fonnded thy the Ionians, when they were in the occupation of the country. After the expnlsion of the Ionians, the Achaean hero Patrens withdrew the inhabitants from Antheia and Mesatis to Aroë, which be enlarged and called Patrae after himself. The acropolis of the city probably continned to bear the name of Aroë, which was often used as synonymons with Patrae. Strabo says that Patrae was formed by a coalescence of seven demi; but this statement perhaps refers to the restoration of the town mentioned below. (Pans. vii. 18. § 2, seq. - Strab. viii. p. 337.) It the Peloponnesian War Patrae was the only one of the Achrean cities which esponsed the Athenian cause; and in B.C. 419, the inhabitants were persuaded by Alcibiades to counect their city by means of long walls with its port. (Thuc. v. 52; Plut. Alc. 15.) After the death of Alexander the city fell into the hands of Cassander, but his troops were driven out of it by Aristodemns, the general of Antigonns, b.c. 314. (Diod. xix, 66.) In n.c. 280 Patrae and Dyme were the first two Achaean cities which expelled the Mlacedoniaos, and their example being shortly afterwards followed by Tritses and I'harae, the.Achaean League was renewed by these four towns. [Sue Vol. I. p. 15.] In the following year (n.c. 279) Patrae was the only one of the Achaean cities which sent assistance to the Aetolians, when their country was invaded by the Gauls. In the Social War Patrae is frequently mentioned as the port at which Philip landed in his expedition into l'eloponnesus. In the war between the Achaeaos and the Romaus Patrae suffered so severely, that the greater part of the inhabitants abandoned the city and took up their abodes in the surrounding villages of Mesatis, An-

## I'JTTALA.

theia, Bolina, Argyra, and Arba. (Pol. v. 2. 3, 28, N':-: Pus. vii, 18. §6; 1'ol. xl 3.) Of these places we know only the position of Bulina and Argyra. Bolina was a little S. of the promontory Drepanum, and gave its name to the river Bolinacus. (Pans. vii. 24. § 4.) Argyra was a little S. of the promontury Rhium. (Pans. vii. 23. § 1.) Patrae continued an insignificant town down to the time of Augustus, although it is frequently mentioned as the place at which persons landel going from Italy to Greece. (Cic. ad Fam. vii. 28, xvi. 1. 5, 6, ad .4tt. v. 9, vii. 2.) After the battle of Pharsalia (n.c. 48) P'atrae was taken possession of by Cato, but shortly afterwarls surrendered to Calenus, Caesa's lientegant. It was here ulso that Adtony passed the winter ( $32-31$ ) when preparing for the war against Augustus; and it was taken by Agrippa shortly before the battle of Aotium. (Dioe Cass. xhii. 13, 14, 1. 9, 13.) It owed its restoration to Augostus, who resolved after the battle of Actium to establish two Ruman colunics on the western coast of Greece, add lor this purpose anade choice of Nicopolis and Patrae. Angustus colonised at Patrae a considerable body of his soldiers, again collected its inlabitants from the surrounding villages, and added to them those of Rbypes. (Paus, vii. 18. §7; Plin. iv. 5.) He not only gave Patrae dominion over the neighbouring towas, sucb as Pharae (Pans. vii. 22. §1). Dyme (l'aus, vii. 17. §5), Tritaen (Paus, vii. 23. §6), but even over Locris. (Pans, x. 38, §9.) On erins it apperars as a Roman colony with the name of Colonia Augusta A roë Patrensis. Strabo describes it in lis time as a populous place witb a good anchorage, and Patuabias has devoted four chapters to an account of its public buildings. (Strab. viii. p. 387; Paus. vii. 18-21.) Of these the most important appear to lave been a temple of Artemis Laphria, on the acropolis, with an ancient statue of this goddess, removed from Culydan to Patrae by order of Augustus, and in whose honour an annual festival was celebrated; the Odenm, which was the most magnificent building of the kind in Greece, after the Odeum of Herodes at Athens; the theatre; and on the seaside a a cmple of 1emeter, which was remarkable on account if a well in front of it, which was supposed to foret. 11 the fate of sick persons; a mirror was suspended an the water, and on this mirror there were certain appearances indicating whether the person would lwe or die. In the time of Pausanias Patrae was noted for its manufacture of byssus or flax, which was gruwn in Elis, and was woven at Patrae into bead-
 umployed in this mamufacture, and so large was their a muber that the female prpulation was double that of the male; and as a naturat emsequence there was grat immorality in the town. (Paus. vii. 21. § 14.)

Patraw has continued down to the present day to be one of the most important towns in the Morea, becine admirably situated for commmilating with Italy and the Alriatic, and with eastern Girecece by urans of the E. If of Corinth. It is frequently wenthumed in the Byzantine writers. In A.D. 347 there was su archbishop of Patrae at the council of Sarduca. In the sixtheentury it was destroyed by an *arthynake. (1'weon, Gopth. is. 25.) It is subsefturntly meutioned as a dukedom of the Bytantine empire; it wis sold to the Venetinns in 120 s ; was taken ly the Turks in 1+16: was recovered by the Verectians in 1.533: hut was shortly afterwarts taken ayain by the Turks, and renamed in their I ands till the Greck revoluti $n$.

The comutry around Patras is a fine and fertile plain, and prodnces at present a large quantity of currants, which form an article of export. The modern town eccupies the same site as the ancient city. It stands upon a ridge sbont a mile long, the summit of which formed the acropolis, and is now ocenpied hy the ruins of the Turkish citadel. From the town there is a beautifol sea-view. "The outline of the land on the opposite side of the galf, extends from the snowy tops of Parnassus in the east, to the more distant mountains of Acarnamin in the same direction, while full in front, in the centre of the prospect, are the colossal pyranids of Kakiscala (the ancient Taphiassus) and Varizova (the anclent Chalcis), rising in luge perpendicular masses from the brink of the water." (Blure, Tour in Greece, vol. ii. p. 300.) There are very few remains of antiquity at Patrus. The modern citadel contaios some picces of the walls of the ancient acropolis, nnd tbere are ruins of the Roman aqueduct of brick. The well mentioned by Pansanias is still to be seen alout three quarters of a mile from the town under a vault belonging to the remains of a cburch of Nt . Andrew, the patron saint of Fatras. Before the Greek revolution, in which I'utras suffered greatly, its population was about 10,000 ; but its present pupulation is probaibly somenhat less. (Leake, Moreu, vvl. ii. p. 123, seq.)

## COLN OF PATEAE.

PATRAEUS (חatpaev́s), a place in the Cimmerian Bosporus, I30 stadis frum Corocondanc, and near the monument of Satyrus, the raler of the Bosporus. Klaproth places Patraeus at Akburun, 5 versts S. of Kertch. (Ntrah. xi. p. 494: Bückh, Inser. wal, ii. p. 163, n. 2127 ; Kluproth, NourJournal Asiatique, vol. i. pp. 67, 290; Ukert, vel. iii. pt. ii. p. 488.)

PATROCLL INSULA (Пatpóredou vīoos, Pans. i. 1. § 1, i. 35. § 1 ; Steph. B. s. v. ; Пarpóклov $\chi$ ג́pa $\xi$, Strab. ix. p. 398), a small i.vand off the southern casst of Atticn, west of the promontary Sunimm, so called from Patroclus, one of the generals of Ptolemy Philadelphns, who was sent by this king to assist the Athenians acainst the Macedonians, and who built a fortress in the inland. It is now called Gairlharonisi. (Leake, I)emi of $A l-$ tica, p. 62, 2nd ed.)

PATTALA ( чà Пartá̀a, Arvian, v. 4. vi. 17; $\dot{\eta}$ Пג́ra入ท, Ptol. vii. 1. §59), it town in Western India, situated at the pint of land wbere the western stream of the Indus is clivided off into two chief branches, wbich. flowing to the sea, enclose what has been popnlarly called the delta of that river: There ean be no doubt that this place is represented by the present Tatta. Arrian states that it derives its name from an Indian word, which sisnifies delta (v. 4: Ind. c. 2.) Alexander the Great appears to have spent some tiine there, and to have built a castle and docks ; and it was from this place that he male his first unfortunate but oltimateiy successful expedition in ships to the inouth of the Indus (Arrian, vi. 18). The real ludian meamin: of l'atala appea"e to be the West, in onposition to
the East，or land of the Ganges；or，mythologically， the Lower litgions（Ritter，v．p．4；6）．［V．］
 70 t ；Patalene，Пaтa入 $\eta \nu \dot{\eta}$, Ptol．vii．1．§ 55 ； I＇atale，Plia．vi．20，21．23），the delta－shaped dis－ trict comprebended between the arms of the Indus， and extending from its capital Pattala（now Tatta） to the Indian Ocean．It was a very fertile，flat， marshy country，liable to be constantly overflowed by the waters of the great river，The ancients gave， on the whole，a tolerably aceurate estimate of the size of this delta，Aristobulus stating that it was 1000 stadia from one arm of the river to another，and Nearclus considering the distance to be 800 stadia； they，however，greatly exaggerated the width of the river，at its point of separation，Onesicritus deeming this to have been as much as 200 stadia（Strab．xy． p．701）．We may presume this measure to bave heea made during a time of flood．By Marcian， lattalene is compreliended in Gedrosia；but there seems reason to suspect that the present test of Marcian has been tampered witb（c．34，ed．Nüller， 1855）．Arrian does not distinguish between the town and the district of which it was the capital， hat calls them both indiseriminately Patala（Anab． v．3）．The district probably estended along the coast from the present Kurdichi on the W．to Cutch on the $\mathbf{E}$ ．
［V．］
PATU＇MUS（Пáтovuos，Herod．ii．159），a town of Araoia，on the borders of Egypt，near which Necho conatructed a caual from the Nile to the Arabian Gulf．It is probably the Pithom of Scripture （Exod．i．It），not far from Bubastis，and near the site of the present Belbey．
［T．H．D．］
PAULO（Paglione），a river of Liguria，rising in the Maritime Alps，and flowing into the sea under the walls of Nicaea（Nice）．（Plin，iii．5．s．7； Mel．ii．4．§ 9．）It is now called the Paglione， and is a considerable mountain torrent in winter and spring．
［E．H．B．］
PAUS．［Cleitor］
l＇AUSLLE PUS MONS．［Nearotas，p．410．］
PAUSLLAE（Eth．Pausulunus），a town of Pi－ ceuam，mentioned only by Pliny（iii．13．s．I8）．It is placed by Holstenius at Monte dell＇Olmo，about 5 milea S．of Macerata，on the right bank of the river Clienti，the aucient Flusor．（Holsten．Not． ad Clurer．p．137．）
［E．H．B．］
PAUTA＇LIA（חauta入ia al，חapra入ia，Ptol． iii．11．§ 12，Peut．Tab．），a town in the district of Deutheleticu．Its position is the Table accords with that of the modern Djustendil or Ghiustendil； and the situation of this town at the sources of the strymon agrees remarkably with the figure of a river－god，accompanied by the＂legend＂$\Sigma_{2} \tau p \dot{\mu} \mu \omega \nu$ ， on some of the autonomous coins of Pautalia，as well as with the letters EN．MAIR．，which，on other coins，show that the Pautalistae considered them－ selves to be Paemians，like the other iobabitants of the baoks of that river．On another coin of Pam－ talia，the productions of its territory are alluded to， namely，gold，silver，wine，and corn（Eckhel，vol．ii． p．38），which accords with Ghiustendil．In the reign of Hadrian，the people both of Pautalia and Serdica added Ulpia to the name of their town，pro－ bably in cousoquence of some benefit received trom that eroperor．This title，in the case of Pautalia， would seem at first sight to warrant the supposition that it was the same place as Ulpiana，which，ac－ cording to l＇rocopius（de Aed．iv．I），was rebuilt by Justiman，with the aume of Justiniana Secoula；and
the modern name lends an appearance of confirna－ tion to this hypothesis by its reeemblance to Justini－ ana．But the fact that Procopins and Hierocles no－ tice Clpiana and Pautalia as distinct places，is an insurmoantable objection to this bypothesis［Urpi－ ANa．］Stephanus of Byzantium has a district called Paetalia（Mauta入ia），whicb be assigns to Thrace， probably a false reading．（Leake，Northern Greece， vol．iii．j．425．）
［E．B．J．］
PAX JULlA（Пà＇Iov入ía，Ptol．ii．5．§ 5 ：called in the Geogr．Rav．，iv．43，Pacea Julia），a town of the Turdetani，in the S．of Lusitania，and on the road from Esuris to Ebora（Itin．Ant．pp．426．427）． But on the sulject of this route see Lesitinis， Vol．I1．p．220．It was a Roman colony，aod the scat of a Conventus juridicus（Pliv．iv．35）；probably the ame town as that called Pas Augusta by Strabu （iii．p．151），－as many towns bore double natues in this manner－－notmithstanding that it is placed by him among the Celtici．（Ukert，vol．ii．pt．I．p．388， and the authorities there cited．）It lay on a hill N．of Julia Dlyrtilis，and is commonly identified with Beja．
［T．H．D．］
PAXI（Hakoi），the name of two small islands， now called Paxo and Antijaxo，situated between Corcyra and Leucas．（Polyb，ii．10；Plin．iv． 12. 5． 19 ；Dion Cass．1．12．）

PEDAEUM or PEDAFUS（חń $\delta \alpha=\nu$ ），a place mentioned by Homer（Il．xiii．172），which is said by Eustathius to have been a tuwn in Troas；but it is otherwise entirely unknown．
［L．．．．］
PEDA＇LIE，a place on the cnast of Cilicia，be－ tween Pinara and Ale，is mentioned oully by Pliny （v．22），and its exact site is unknown．［L．S．］

PEDALLUM（ $\left.\Pi \eta \delta \dot{\alpha} \lambda, o^{\prime}\right)$ ，a promontury in tie south－east of Caria，forming the southernmost puint of the western coast of the Sinus Glanens．（Jomp． Mela，i．16；Plin．v．29；Stadiasm．Mar．Mogn． $\S \$ 228,233,234$ ）Strabo（xiv．p． 651 ）gives to the same promontory the name of Artenisium，from a temple of Artenis，which stood upon it；its modern name is Bokomadhi．（Leake，Asia Minor， p．223，foll．）
［L．S．］
PE＇DASA（ $\Pi\left\langle\delta \alpha \sigma a: E t h\right.$ ．П $\eta \delta a \sigma e v{ }^{\prime}$ ）．also called PEDASUM（Plin．v．29），an ancient city of Caria， in which the Persians suffered a defeat daring the revolt of the Iodians．（Herod．v．121，vi．20．）It was once the chief seat of the Leleges．Alex：ander the Great deprived the place of its independence ly giving it over to the Halicarnassians，together with five other neighhenring towns．（Plin．l．c．）In thee timne of Strabo（siii．p．611）the town bad censed to exist，and the name of the district，Pedasis（IIn $\delta a$－ ris），was the only remaining memorial of the place． （Comp．Polyb．xxiii．27；Steph．B．8，v．）As He－ rodotus assigns to Pedasa a portion of the territory of Miletus，it is clear that the town must have heen situated between Miletns．Halicarnassus，and Struto－ niceia；but its exact site is still only matter of ean－ jecture，some placing it at the modern Melasso，and others at Arabi llissar，neither of which supposi－ tions is free from incousistencies．
［L．S．］
 on the river Satnioeis．which is mentioned by Humer （Il．vi．35，xx．92，sxi．87），but was deserted in the time of Strabo（xiii．p．605），who（p． 584 ）mentions it among the towns of the Leleges，which were de－ stroyed by Achilles．（Comp．Steph．B．s．v．חŋ $\quad \delta a \sigma a$ ． Pliny（v．32）imagines that Pedasus was the same place as that which subsequently bore the nanie of Adramyttium；but as Homer distinctly places it on
the river Satnivels，the suppasition is impossi－ ble
［1．s．］
PEDASUS．［Mvthone．］
PEDIAEUS（ $\Pi ⿺ \delta$ iaios），the largest river of Cy － prus，rising from the enstem side of Olympus，and flowing neur Salamis into the sea．（Ptol．v．I4．§ 3 ； Engel，Kypros，vol．i．p．37．）

PEDIEIS（ $\mathrm{n} \in \mathrm{\delta} t \mathrm{i} \mathrm{i}$ ），the inhabitants of one of the I＇hocian towns diestroyed by Nerses．（Ilerod． viii．33．）From the order in which it stands in the enumeration of Herodutus，it appears to have stond near the Cephissus，in some part of the plain be－ tween Tithorea and Elateia，and is perhaps re－ jresented by the ruins at P＇aleá F＇iva．（Leake， Northern（irece．vol．ii．p．89．）

PEDNELISSLS（Tte反rn入ı $\sigma \sigma 6$ ），a town in the interior of Pisidia，near the Eurymedon，above Aspen－ dus（Strab．xii．p．570：xiv．p．667；Steph．B．\＆．v．； Ptol．v．5．§ 8．）Hierocles（ p .68 F ），giving a greater extension to Pamphylia，assigns the town to this province．The town formed a small state by itself，but was always involved in war with the neighbourine Selge．（Polyb．v．72，\＆c．）it is also mentioned in the ecclesiastical annals and on coins．（Sestini，p．96．）Kellows（Asia Miner， p． $196,8 \mathrm{Sc}$ ．）is inclined to identify the extensive ruins near the village of Bolcascone with the an－ cient Pednelissus；these ruins，however，according to bis description，bear scarcely any trace of Greek origin，but belong to the Roman period，［L．S．］

I $^{\prime} E D O^{\prime} \mathrm{NLA}$（IT $\eta \delta \omega v(a)$ ，a town on the coast of Marmarica，before which lay an island of the same name．（Ptol．iv， 5 ．§s 32，75．）This island is also mentioned by Strabo，but in some editions under the name of Sidouia（xvii．p．799）．We may，however， conclude from Ptolemy that Pedonia is the correct realing．（hee Groskurd＇s Strabo，vol iii．p．357．）
 damus：Gialicano），an ancient city of Latiom，which appears to have been at one perind of considerable importance．It is mentioned by Dionysius as one of the cities which composed the league against Rome in E．C． 498 ；and there is no doubt that it was，in fact，orm of the thirty cities of the Latin League． （Dionys．v． $6 \mathbf{t}$ ；Niebulir，vol．ii．p．17．）It is next inentioned anong the cities which are said to have been taken by Coriolanus in the campaign of B，C． 488 ，where its natue is associated with those of Labicum and Corbio．（Liv．ii．39；Dionys，viii． 19 ； 1＇lut．Curiol．28．）Dionysius terms it at this time a small city（Ib．26）；and it is remarkable that its name does ant again oceur during the wars of the Lumans with the Aequians，notwithstanding its proximity to the frontier of the two nations．It is next mentioned in E．C． 358 ，when the Gianls，who had invaded Latium，encamped in its neighbour－ hond，where they sustained a severe defeat from the dictator C．Sulpicius．（Liv．vii．12．）During the last great struggle of the Latins with lhme，the Pedani bear a more considerable part．Their name， inded，is not nentioned at the first nutbreak of the war，thongh there can be no doubt of their having taken part in it：but，in n．c． 339 ．Pedum became for a time the centre of hostilities，being besieged by the Roman comsul Aemilius，and defended by the allied firces assembled from Tibur，Iraencate，Veli－ trae，Lanurium，and Antium．Aemilius on this occasion abandoned the enterprise；but the next year Camillus ayain adsanced to Podum，and，the forces of the Latins beine now divided，the Tiburtines and Pramestincs alone arrived for its protection．They
were defeated in a great battle by Cainillus，and the city of Pedun taken by assault immediately after－ wards．（Liv．viii．12，13；Fast．Capit．）In the general pacification that followed the Pedani ebtained the Roman franchise，but on the sume terms as the Lanuvians，that is to sny，without the right of the suffrage．（1b，14．）From this time not only does the name of the people disappear from history，but we find ne subsequent mention of the town of Pedum， which appears to have rapidly fallen inte decay． The＂Pedanus ager，＂or＂regio Pedann，＂is alluded to both by Cicero and Horace；bot in Pliny＇s time even the＂populus＂had become ntterly extinct．and we find no subsequent trace of the name．（Cic．ad Att．ix．15；Hor．Ep．i．4．2；Plin．iii．5．s．9．） Hence the orly clue to its position is derived from the passages already cited，and fron the statement of the old scholiast on Horace（Schol，Cruq．ad l．c．） that it was sitnated between Tibur and Praeneste． Its proximity to those cities is distinctly attested by Livy（viii．13），and there seems no reason to reject the opinion first advanced by Cluverius，and arlopted by Gell，Nibby，and Abeken，which would place Pedum on the site of Gallicono，theugh we lave certainly re conclusive evidence in its faveur．The modern village of Gallicano，the name of which first oceurs in the tenth centory，in all probability occupies an ancient site ；it stands on a narrow tongue of land projecting between two narrow valleys or ravines with lofty and precipitous banks；but，from the pe－ culiar nature of the country，this position almost exactly resembles that of Zugarolo and other Deigh－ bouring places．No ruins exist at Gallicano；and from the early decay of I＇edum we can hardly expect to meet with inscriptions，the only evidence that ean really set the question at rest．Gallicuno is $4 \frac{1}{2}$ miles from Palestrina（Praeneste），and abont the same distance fiom La Colenna（Labicum）；it is abont a mile on the left of the Via Praenestina，and 19 miles trom Rome．（Cluver，Ital．p．966；Gell，Top．of Rove．p． 340 ；Nibby，Jintorni，vol．ii．p． 552 ； Abeken，Mittel Italien，p．77．）
［E．H．B．］
PEGAE or PAGAE（חnrai，Dor．Hayal：Eth． Mayaios），a town of Megaris，on the Alcyonian or Corintlian gulf．It was the harbour of Degaris on the western const，and was the most important place in the conntry nest to the capital．According to Stratbo（viii．p．334）it was situated on the nar－ rowest pant of the Megaric isthmus，the distance from Pagae to Nisaea being 120 stadia．When the Megarians joined Athens in B．c．455，the Atherians garrisoned Pegae，and its harbour was of service to them in sending out an expedition against the northern coast of Peloponnesus．（Thuc，i．103，111．） The Athenians retained possession of Pegae a short time after Megara revolted from them in n．c．454； but，by the thirty years＇truce made in the same ycar，they surrendered the place to the Megarinos． （Thuc．i．114，115．）At one period of the Pelo－ pounesian War（B．C．424）we find Pegae held by the aristocratical cxiles from Megnra．（Thue．iv， 66．）Pegae continued to exist till a lato period， and under the Roman emperors was a place of suffi－ cient importance to coin its own money．Strabo
 I＇ausamias saw there a chapel of the hero Aegialens， who fell at Cilisas in the second expedition of the Argives against Thebes，but who was buried at this place．He also saw near the road to Pegac，a rock covered with marks of arrows，which were supposed to have been made by a body of the Persian cavalry
of Mardonius，who in the night had discharged their atrows at the rock under the impulse of Artemis， mistaking it for the enemy．In commemoration of this event，there was a brazen statue of Artemis Soteira at Perae．（Paus．i．44．§ 4．）Pegae is allo mentioned in the following passages：－Strab．is． pp．400，409；Paus．i． 41 ．§ 8 ；Ptol．iii．15．§ 6 ； Steph．B．s．v．；Mela，iii．3．§s 10；Plin．iv．7．s．11； Ilierocl．p．645；Tab．Peut，wherc it is called Pache． lts sile is now occupied by the port of Psathó，not far from the shore of which are found the remains of an ancient fortress．（Leake，Northern Greece，vol． ii．p．407．）
I＇EGASE＇UMI STAGNUM，a small lake in the Caystrian plain near Ephesus，from which issues the little river Phyrites，a tributary of the Caystrus． （Plin．v．31．）The district surrounding the lake is at present an extensive morass．（Comp．Arundell， Seren Churches，p．23，\＆c．）

PEIUM（Iniov），a fortress of the Tolistobooii，in Galatia，where Deietarus kept his treasures．（Strab． xii，p． 567 ．）
P＇ELAGO＇NIA（（Ie入arovia，Strab．vii．pp．326， 327；Пŋ入aүovia，steph．B．），a district of Macedonia， bordering on Illyricum，occupied by the Pelaoones （Пe入aरóves，Strab．vii．pp．327，331，Fr．38－40， 434；Ptol．iii．13．§ 34 ；Plin．iv．17）．Although Livy emplogs the name of Pelagonia，corresponding with the fertile plains of Bitólia，in his narrative of the campaigns of Sulpicius，as that of a large district contaioing Stymbara，it is evident，from his account of the division of Macedonia after the Roman con－ quest，that Pelagonia became the appellation of the chief town of the Pelagones，and the capital of the Fourth Mavedonia，which included all the prinitive or L＇pper Macedonia E．of the range of Pindus and Scardus．（Liv．x］v 29．）It was perhaps not spe－ cefically employed as the name of a town until the other two cities of Pelagonia were ruined；for that Pelagonia，or a portion of it，once contained three， may be inferred from the adjunct Tripolitis， given to it by Strabo（vii．p．327）．The town，which， from the circumstance of its having been the capital of the Fourth Macedonia，must have been of some importance，existed till a late period，as it is noticed in the Symecdemus of Hierocles，and by the Byzan－ tine histurian，Malchus of Philadelphia，who speaks uf the strength of its citalel（ap．Const．Torph． Excerpt，de Legat．p．81）．From its advantageons $p$ sition it was occupied by Manuel Comnenns，in the war with Geisa 11，and the Hungarians．（Nicet． p．67；Le Bean，Bas Empire，vol．xvi．p．141．）The Hame of Pelagonia still exists as the designation of the Greek metropolitan bishopric of Bitotia or MIo－ nestéri，now the chief place of the surromnding country，and the ordinary residence of the governor of Rumili．At or near the town are many res－ tiges of aucient buildings of Roman times．The dis－ trict was exposed to invasions from the Dardani， who bordered on the N ．，for which reasons the com－ munication（＂fances Pelargoniae，＂Lix，xxxi．34） were carefully guarded by the kings of Macedouia， being of great importance，as one of the direct ch－
trances from Illyricum into Macedonia hy the cource of the river Drilon．Between the NE．estremily， Mit．Ljubatrin，and the Kizisura of Decol，there are in the mighty and continuous cbain of Scardus （above $\boldsymbol{z 0 0 0}$ feet high）only two passes fit for ：m army to cross，one near the N．extremity of the chain from Kalkandele to Prisrendi or I＇ersserin， a very high＂col，＂not less than 5000 feet above the sea－level；the other considerably to the $S$ ，and lower as well as easier，nearly in the latitude of $A^{\prime}$ kridha． Leake（Northern Grece，vol．iii．Pp．318－322）is of opinion that the passes of Pelagonia，in which Per－ seus was stationed by bis father Philip，were this latter depression in the chain over which the modern road from Scodra or Scutari runs，and the Via Egnatia travelled formerly．The Ilyyian Autari－ atae and Dardani，to the N．of Pelngonia，no doubt threateved Macedonia from the former jass，to the NE．of the mountain－chain of Scardus．（Comp． Grote，Grecee，c．xxv．and the references there to Pouqueville，Boné，Griscbach，and Müller．）Stym－ bara or Stubara，was situated apparently on the Erigon，as also were most of the Pelayonian towns． Polybins（v．108）speaks of a Pelagonikn town named Pissaeva（Haбaiùv）．Ptolemy（l．c．）as－ signs to the Pelagones the two towns of Andra－ ristus or Euristus（Peut．Tab．，the orthography is not quite certain），and Stobi．［E．B．J ］
PELASGI（חe入acroi），an ancient race，widely sprewl over Greece and the coasts and islands of the Aegean sea in prehistoric times．We also find traces of them in Asia Minor and Italy．

1．The Pclasgians in Greece．－The earliest men－ tion of the Pelasgi is in Homer（Il．ii．681），who enumerates several Thessalian tribes as furnishing a contingent under the command of Achilles，and among them＂those who dwelt in l＇ela．gian Argus．＂ Homer also speaks of Epirus as a chief atoole of the Pelasgi；for Achilles addresses Zens as $\Delta \omega \bar{\omega} u v a \bar{\epsilon}$, ， $\Pi$ пла⿱㇒木火кє．（Il．xvi．233．）And this agrees with Hesiod＇s description of Dodona as the＂seat of the Pelasgi．＂（Fragm，xviii．）So in the Supplices of Aeschylus，the king declares himself to be ruler of the country throngh which the Algns and the Strymon flow，snd also of the whole of the land of the Perrbaebi，near the Paconians，and the Dodoneam mountains，as far as the sea．（Suppl．250，scy．）． Herodotus tells us he found traces of the Pelasgi at Dodona，where he says they worshipped all the gods， without giving a name to any（ii．52）．Compare bis mythic account of the two priestesses at．Dudomat （ii．56）with Homer＇s description of the Selli．（Il． xvi．234，seq．）

Strabo（v．p．221，C．）says：＂Nearly all are agreel about the Pelasgi，that they were an aucient trike （ $\phi \hat{\lambda} \lambda 0 \nu$ ）spread over the whole of Hellia，and e．pe－ cially by the side of the Acolians in Thessaly．．．． And that part of Thessaly is called Pelasgian Argos， which extends from the cosst between the outlet of the Peneius and Thermopylae as far as the mountain range of Pindus，because the Pelasgians were masters of that regizu．＂＊

We also hear of the Pelasgi in Boeotia，where they dwelt for a time，after having，in conjunction with the Thracians，driven out the Aones，Temmices， Leleges and Hyantes．Afterwards they were，in their turn，driven ont by the former inhabitants，and took refage at Athens under Mt．Hymettus，part of

[^19]the city being called after their nanc. (Strab, is. p. 401.) And Attic historiams speak of their residence there, and say that on accuant of their migratory disporsition they were called $\pi \in \lambda$ apyoi (storks) by the Attic people. (Strab, v. p. 221.) This is the character geoerally given to the Pelasgi. and it is curinus to find Herndotus (i. 56) cuntrasting the stationary habits of the Pelasgians, with the love of wandering exlibited by the Hellenic Ihorians. For even his own account of the Pelasgi disproves his general statement; since they could not have existed in so many different quarters as he assigns to them without several migrations, of - which he nowhere asserts-an almost universal extension over fireece and its dependencies. It is true that he says (ii. 56) that Hellas was formeriy called Pelascia, and Thucydides speaks (i.3) of the name Hellas being of comparatively recent date, and of the Pelasgic name being the most prevalent anong the tribes of Greece; but this does not account for the Pelasgi being found in Asia (Homn. Il. x. 429), and for their having introluced Egyptian rites into Greece. (Herod. ii. 51.) Their sojoura in Attica is related by Herodotus, who says (vi. 137) that they had a portion of ground under It Hymettus assigned them as a reward for their serrices in building the wall of the Acropolis at Athens. From this Hecataeus said they were driven out by the Athenians from envy, because their land was the best cultivated. The Athenians, hrowever, says Herodotus, ascribe their expulsion to their licentious conduct. Thucydides also (ii. 17) mentions the Pelasgic settlement beneath the Acro$p^{n+l i s}$, and the oracle relativg to it.

In the passages above quoted Herodotus speaks of the Pelasgi as of foreign extraction. In another passage (viii. 4t) he tells us that the Athenians were forneerly Pelasgians, and were so called, with the surname of Cravai. They were called succersively Cecropidae. Erechtheidae and loues.

Strabo (xiii, p. $6 \div 1$ ) nientions a legend that the inhabitants of Mit. Dhricion near Thermppylae made a discont upous the place where Cyme afterwards stimel, and found it in the possession of Pelasgians, who had suffered from the Trojin W'ar, but were nevertheless in passession of Larissa, which was about 70 stades from Cyine.

We find traces of the Pelasgi in several parts of the Podapoumese. Herodotus (i. 146) speaks of Arculian P'elagrans, and (vii. 94) tells us that the lomans in Arhaea were formerly called Pelasgian Aezialeans (or Pelaggians of the coast). Atter Jamans and Xuthus came to P'eloponnesus, they were cathed Ionians, from Iun, son of Xathus.

In the pasage of Aeschylns before referred to (Siupil. 250) Argos is callet l'clasgian; the king of Alfon is also called ávą̧ $\Pi \in \lambda a \sigma \gamma \overline{\omega \nu}$ (v. 32\%), and thm nehont the play the words Argive and Pelasgian are ural indiscrimiuately. So, tho, in the Promethous Vinctus (r. 860), Argolis is called "the P'elas in m lad." In a favment of Sophocles (Inachus) the king is adaressed as lord of Argos and of the Tyrrlami Pelangi.

Strabo (vii. p.321) spraks of Telasgians taking possession of part of the Pcloponnese, along with other barbarous tibes, and (v. p. 221) any that Ephorus, on Ile-ivel's authority, traces the origin of the Pelasgi to Lycam, som of Pelasgus, and that he dechares his own uginu to to be that they were oripinally Areadians, who chese a military life, and, by inducing many others to join thom, sprent the mame f:r and wide, both amoris the Greeks and whevever
they happened to come. "The Areadian divine or heroic pedigree," says Mr. Grote (Hist. Greece, vol. i. ch. ix.), "begios with Pelaszus, whom both Hesiorl and Asius considered as an indigenous man, though Arcesilans the Argeinn represented him as brother of Argos and son of Zens by Niobe, daugbter of Plooroneus: this logographer wished to establish a commnnity of origin betweeu the Argeians and the Arcadians." For the legend concerning Lycaon, son of Pelasgus, and his fitty soos, see Grote's Greece, vol. i. P. 239, note.
According 10 Dionysius, Lycaon, son of Pelasgus, lived eighteen cenerations before the Trojan War (lib. i. p. 30, ed. Reiske); and the migration of the Oemntians under Oenotrus, son of Lycaon, in the next generation, is, in the words of Pausanias (viii. 3, quoted by Niebuhr), "the earliest colony, whether of Greeks or barbatians, wherenf a recollection has been preserved."

Fansanias (viii. 2) gives the popular legend current among the Arcadians, that Pelasgus was the first man born there; on which he observes oaively: "But it is likely that other men were also born with Pelasgos; for bow could be have reigned without subject:?" According to this legend Pelasgus is a regular mythic hero, surpassing all his contenporaries in stature and wisdom, and teaching them what to chouse for food and what to abstain from. The use of beech-mast, which the Pythian oracle (Herod. i. 66) ascribed to the Arcadians, was taught them by Pelangus. His descendarts became numerous after three generations, and gave their names to various districts and many towns in Greece. Pausaniss also speaks of Pelasgians coming from Jolens to Pylos, and driving out the eponymic founder (iv. 36. 1).

Dionysius adoyts the Achaean legend, viz, that the first abode of the J'elasgi was Achaic Argos. There they were antochthons, and took their name from Pelasgus. Six generations afterwards they left Pelopounesus, and migrated to Haemonia, the leaders of the colony being Achaeus, and Phthius, and I'clasgus, sons of Larissa and Poseidon. These three gave names to three districts, Achaea, Phthiotis, and Pelasgiotis. Here they abode for five generations, and in the sixth they were driveo out of Thessaly by the Curetes and Leleges, who are now called Locrians and Aetolians, with whom were joined many others of the inluabitants of the district of MIt. Parnassus, led by Deucalion (i. 17. p. 46). They dispersed in different directions: sonse settled in Ilistiaeotis, hetween Olympus and Ossa; others in Boeotia, Phocis, and Euboea; the main body, however, took refuge with their kinsmen in Epirus, in the neighbourhood of Dodona (i. 18).

## We now come to

11. The Pelasyians in the Islands of the Aegean. -Homer (Od. xix. 17.5-177) mentions the Pelasgi (called $\delta \mathbf{\delta o t}$ ), as one of the five tribes in Crete, the remaining four being the Achaeans, Eteocretes, Cydones, and Dorians (called т $\rho 6 \chi$ ärkes). SceStıabo's comment on this passage (v. p.221), and x. pp. 475, 476), where twe different explanations of the epithet трıхäkes are given.

Iterodotus (ii. 51) speaks of Pelasgi living in Sanothrace where they performed the mysteries called samothracian orgies.

Leronos and Imbros were also inhabited by them (v. 26). Sin alsu Strabo (v. p. 221), quoting Auticleides. Thurydiles (iv, 109) speaks of the $1 \mathrm{yr}-$ rheni I'clasgi, wh) oceupied Lemnos ; and Pausauias
(vii. 2. § 2) says the Pelasgians drove ont the Minyans and Lacedaemonians from Lemmos. The perpetrators of the Lemoian massacre were Pelasgians. (Herod. vi. 138-140; compare Pind. Pyth. Od. iv. 448 [252, Bkh.]; Orph. Arg. v. 470 ; Stanley, Comm. in Aesch. Choêph, 631.)

Herodutus also reckons the inhabitants of seventeen islands on the coast of Asia as belonging to the Pelasgian race (vii. 95). According to Strabo (xiii. p. 621) Menecrates declared the whole coast of Iunis, beginning at Mycale, to be peopled by Pelasgi, and the neighbouring islands likewise: "and the Lesbians say they were under the command of Pylaeus, who was called by the poet the leader of the Pelasgi, and from whom their mountain was called Pylaeum. And the Chians say their founders were Pelasgi frem Thessaly."

Biooysius (i. 18) say's that the first Pelasgian colony was led by Macar to Lesbos, after the Pelasgi had been driven out of Thessaly.

Diodorns Siculus (v, 81) gives a different account of this colony. He says that Xanthus, the son of Triopus, chief of the Pelasgi from Argos, settled first in Lycia, and afterwards crossed nver with his followers into Leshos, which he found uroccupied, and divided among them. This was seven generations befure the flood of Dencalion. When this occurred Lebbos was desolated, and Macarens, graodson of Zeus (according to Hesiod), occupied it a second time, and the island received its name from his son-in-law. Scymnos of Chios (quoted by Kruse, Hellas) speaks of Pelasgians being in Sciathos and Scyros.

We next come to
III. The Pelasgians in Asia, - On this point we have Honer's authority that there were Pelasgians atoong the Trojan allies, ranked with Leleges, Cancounes, and Lycians, and called 反̌ot. (Il. x. 429.) One of these was killed by Ajax, in the battle over the body of Patroclus,-Hippothous, son of Lethus. (II. xvii. 288.)

Herodotus speaks (vii. 42) of Antandros as a Pelasgian city, and afterwards (vii. 95) says that the Aeolians were formerly called Pelasgians by the Hellenes, and that when they fought against the Greeks they wore Hellenic armour.

Strabo (v. p. 221 ) onotes Homer's statement that the seighbours of the Cilicians in the Troas were Pelasgians, and that they dwelt about Larissa. (Il. ii. 841.) This name probably signifies a fortress buitit on a precipice or overhanging rock, and is an indication, wherever it occurs, of the presence of Helasgi. There were several places of the same name in Greece and two or three in Asia Ninor, which are enumerated by Strabo (ix. p. 440, xiii. p. 620). According to this geographer most of the Carians were Leleges and Pelasgi. They first oceupred the islands, then the sea-coast. He argues, from Homer's expression "the tribes of Pelasgians" ( 11 ii. 840), that their number was considerable.

Dionysius (i. 18) says that the Pelasgi, on being driven out of Thessaly, crossed over into Asia and acquired many cities on the sea-coast.

Two cities were in existence in the time of Herodotus, namely, Scylace and Placie, on the Propoutis, which he believed to be Pelasgian cities, and which, be says (i. 57 ). spoke similar dialects, but unlike their neighbours. That dialect was, on Herodotas's testinony, not Greek, but resembling the dialect of the Crotoniatae, or rather Crestonians, a tribe among the Edones in Thrace.

Bishop Thirlwall, comparing this passage with
another, in which Herodotns is enumerating the dialects that prevailed among the Ionian Greekr, and uses the same terms, infers from the comparison that "the Pelasgian language which Herodotus heard on the Hellespont and elsewhere sounded to him a strange jargon; as did the dialect of Epliesus to a Milesian, and as the Bolognese does to a Flurentine" (rol. i. p. 53). Mr. Grote differs troun Bishop Thirlwall in his estimate of these expressions of Herodotas, who, he thinks, must have known better than any one whether a language which he heaid was Greek or not, and concludes that "Herodutus proaounces the Pelasgians of his day to speak a substantive langnage differing from Greek; but whether differing from it in a greater or less degree (e. g. in the degree of Latin or of Phoenician), we have no means of deciding" (vol. i. pp. 351353).

Heeren (Ancient Greece, p. 38, note) has some reinarks on Herodotus's opinion respecting the language spoken by the Pelasgians in his day, in which he seems to raise an imagimary dificulty that he may have the pleasure of overthrowing it.

Before quitting the coasts of the Aegean, it is necessary to quote Thacydides's observation (iv. 109), that "the Pelasgian race is said to be the most widely prevalent in the Chalcidic peoinsula and in the adjoining islands; " and the legend preserved by Athenaens (xiv. p. 639), "that Thessaly was, in the time of Pelasgus, suddenly converted by an earthonake from a vast lake into a fertile plain, irrigated by the Peneius, the waters of which Le~ fore had heen shut in by monntains."

The latter is a poetical rersion of a geological truth, which, thongh not falling witnin the province of history, recommends itself at ouce to the notice of the geographer.

## We now come to

IV. The Pelasgians in Italy.-Legendary bistory has connected the Pelasgic race with more than one portion of the Italic peninsula. The name Oenotria, by which the southern part of Italy was formerly known (see Aristotle, Pol. vii. 10) suggests an affioity between the early inhabitauts of that country and the Arcadian Pela-gians. The name Tyrrheni or Tyrseni, which we have seen is used identically with that of Pclasgi, suggests another link. L11numeratile legends, which furnished logographers with the subject-matter of their discomrse, conoected the Umbrians, the Peucetians, and other tribes in the forth of Italy and on the cosst of the Adriatic with the Pelasgiams from Epiras and Thessuly. Some of these are given by Strabo. He quotes Anticleides to the effect that some of the Leninian Pelasgians crossed over into Italy with Tyrrhenus, son of Atys (v. p. 221). Again, he quotes Hierunymus's assertion, that the Thessalian Pelargians were driven out from the neighbourhood of Larissia by the Lapithae, and took refuge in Italy (ix. p. 443).

Pausanias's account of the Pelasgian colony led by Oenotrus has already been given, Dionysius (i. 11. p. 30) confirms it, saying "Oenotrus son of Lycaon led a colony into Italy seventeen generations before the "Trojas War." According to Dionysius, a colony of Pelasgians came over from Thessaly and settled among the Aboriziues, with whom they waged war against the Sicels (i. 17. 1\% 45.)

Another body cave from the neighbourhood of Dodona, whence, finding the territory unable to sup-
port them, they crossed over in ship,- to [taty, calleel Satormia, in obedience to the oracl.: The winds bore them to Spines, on one of the montlis of the Po. where they established thomselves, ant by the help of their lieet aequired grat power. They were, however, eventualiy driven out by an insurrection of the neighbouring larbarians, who were in turn overpowered liy the Romans (i. 18). The Jodaspinns thence migrated inland, crosued the Apemines, and entered the cunntry of the Uinlirians, who bordered on the Aborigines, and extended over a great part of Italy, bring a numerons and powerfil people. Ilere they established themselves for some time. and took sonie sunall towns from the Umhrians; but, being overpowered by them, they removed into the country of the Aborigines. When they came to Cutyle, they recornised the spot where the oracle had told them they were to offer up a sacrifice to Jupiter, Pluto, and lhebus. On this they invited the Aborigines. who came to attack them, tu join alliance with them; which invitation they, being hard pressed by the Siculi, acceptel, and gave the Pelasgi Velia to dwell in. The latter then helped the Aborigines to ennguer Crotona in Umbria, and to drive the sicels ont of their land. Together they founded several citirs, Caere, Agylla, Pisa, Saturnium, and others, which were taken by the Tyrrremians. Dionysins says that Phalerium and Fescennia retainel in his time certain faint traces of the old Pelasgic popnlation, expecially in the weapons of war-viz. Argolic spears and slields-and the institution of fetials, and other religious rites. There was a temple of Hera at Falerium, exactly like that at Argus, where were similar sacrifices, and similar priestesses, cane${ }^{\text {thori. and choruses of maidens. }}$
The Pelasgi also occupied parts of Campania, driving out the Aurunci, and founded Larissa and uther cities: Some of thene remained, after undereving many changes of inhabitants, in Dionysins's time. Of larissn there was no memorial save the name. and this was not commonly known ; bnt its sito was mot far from Firum Popilii. (Plin. iii. 15.) They trok many cities from the Sicels, too, and established their power along the coast and inland.

The Pelagei, having driven ont the Sicels increased in power and extent of tirritory. Eventually, howWer, they incurred the anger of thr erods, and suffered tariums peralties at their hands. On consultine the orade, they were told that they had neglected to perform their waths, in not sacrifficing their first-born as well as the fruits of the fieh. Myrallus tells this Atary, alding that the Pelaspi were soon dispersed in different directions, some returning to Grecee, and ithers remainine in ltaly by the friesdly intervention of the Atwrigius. They were a warlike race, and ... gurred groat skill in maval matters fiom their resi1.wne with the Tyrrhemiass. On this sccomnt they were often insitud by uthr nations to serve as ausiliaties, and wro. called hy thim names Tyrrheni and Pelacei milismininately (i. 18-23).

Respective the f नher nome he says that it was
 bult. Ifellanicus of Leshus asy, that the Tyrtheni, formerly callemf Pelasei, rectivel the nathe whe ha they hear after their ammal in Italy. Fin the countertheory of Myrsilus spe Dim, s, is.

Danysius thinks all are mistaken wholloth the Tyrrleni and the Pelagki to be the -ame rac: Ile thinks no argumett can bu drawn fiom the fiet of ther rames bein rasel indiocriminately an that was very cummen, e. g., in tho case of the Th, ith an ?

1'lu, zians. Moreover, the fireeks called all Italianslatins. I'mbrians, Ausones, \&u-Tyrrleninns. Even Bome was helievel by many to he a Tyrrhene city. Dionysius quotes 1 Ierolotus (i. 57 ) in support of his opinion that the Pelasgians and Tyrrbemans are not of the same origin. It would be a wonderful thing, he says if the Crotomiatae spoke the same dialeet as the lhacieni on the llellespont, both being Pelasgians, but should nut speak the same dialect as the Tyrrhenians, if they were also Pelasgi. For the contrary of the proposition-if $\delta \mu \sigma \lambda \bar{\omega} \sigma \sigma o t$, then $\delta_{\mu 0 \in \theta v \in i s-h o l l s ~ g o n d: ~ i . ~ e . ~ i f ~}^{\alpha} \lambda \lambda a \gamma \lambda \omega \bar{\omega} \sigma \sigma o l$, then $\dot{\alpha} \lambda \lambda o \epsilon \theta v \hat{c} / s$. If the case were reversed, there might be a show of reason for helieving them of the same origin ; for it nuight be suid that distance had oh. literated early traces of resemblance: hut when they are so near each other as the Crotminatae and Tyrrbeni this supposition is untenable (i. 29).

Hence Dionysius believes the Pelasgians and Tyrthenians to be distinct. He sums up all by saying that those Pelasgians who sorvived the final dispersion and ruin of the race existed among the Aborigines, and their descendants helped them and other tribes to build Rome (i. 30).

It is unnecessary to remark the difference between Crntona in Uimbria aud Creston in Thrace, which Dionysins unsnspectingly passes over. The above somewhat lengthy estracts have been made from his Roman Antiquities, because thofy give us a very fair specimen of the way in which scattered traditions were ilressed up in a quasi-historical garb, and decked out with any stray evidence which local names or language might supply.

The common native tradition of the Latins only testifies to an immigration of so called Aborigines, not to auy misture of Pelasgi with them. On the other band, anotber, which has received the testimony of Varro, and which agrees in other respects with the narration of Dionysins, speaks of an immigration of Pelasgians, but says nothing of Aborigines mixed with or allied with them. Certain Roman historians bave combined these two traditions in a different way to that of Dionysius, making the Aborigines, namely, declare themselves to be one and the same peonle with the Pelasgians. This, for instance is, withont any doubt, the meaning of Cato's assertion that the Aborigines came over into Kaly many gencrations before the Trojan War, out of Achaia; for so the named the old Pelasgic Greece by the common appellation of his time. (Schwegler, Romische Gesch. iii. 2.) We find the same tradition of a Ielasgic immigration into Latinm confirmed by many other testimonies. Pliny declares that writing was brought into Latium by the I'elasgi. It is a question, however, whet her by these Pelasgi he means those who cane out of Thessaly and Dudona, or the Arcadians of Evander.

Other traditions assert the name of Fome to be Prascian, and derive the Saturnalia from a feast urizinally instituted by the Pelasgians who setted on the Saturnisu hill.

In other parts of Italy we stumble repeatedly." suy, Schwegler, " on the same wide-extended name. Thus, it is swid that the Hernici were descended from the Pelargi. Picemum also is said to have been occupied by the 1יhlagi. Report also savs that the towns of Nuceria, ILerculaneum, and Pompeii wore faunded loy them, or that they dwelt there for a certain time. Other instances have been already tiven of tewns and districts with which legendary linstory has :associated the name of the Pelasgi."

In short, the whole of Italy was, if' we are to believe the anthorities adduced, inhabited in ancient times by the Pelasgians. In later times they appear as vassals of the Italiots; the common fate of original races that have been sutjugated.

Upon these and similar traditions Niebuhr has gronnded a bypothesis, which at present is generally received, and against which conclnsive objections can only be raised from the side of comparative philology. According to Niehuhr, the Pelasgians were the original popnlation, not only of Greece, hat also of Italy. There was a time, he said, when the Pelasgians, formerly perhaps the most widely-spread people in Europe, inhabitod all the countries from the Arnus and Padus to the Bosporus; not as wandering tribes, as the writers of history represent it, but as firmlyrooted, powerful, honourable people. This time lies, for the most part, before the beginning of our Grecian history. However, at the time that the genealogists and Hellanicus wrote, there were only insulated, dispersed, and scattered fragments of this immense nation, -as of the Celtic race in Spain like mountain summits, which stand out like islands when the lowlands have been clanged by floods into a lake. These sporadic Pelasgic tribes did not seem to these logographers to be fragments and relics, but colonies that had been sent out and had migrated. like the equally scattered colonies of the Hellenes. Hence the numerons traditions about the expeditions and wanderings of the Pelasgi. All these traditions are without the slightest historical value. They are nothing bat a hypothesis of the logographers, framed out of the supposition that those scattered colonies of the Pelasgi had arisen and were produced by a series of anigrations. There is nothing historical abont them, except, indeed, the fact which lics at the bottom of the hypothesis, namely, the existence in later times of scattered Pelasgic tribes,-a fact which, however, implies mach more the original greatness and extension of the Pelasgic nation. If the Pelasgians vanish gradually as bistorical times begin, the cause of this is, that they were transformed into other nations. Thus, in Greece they became gradnally Hellenised, as a nation which, in spite of all distinction, was actually related to the Hellenes ; and even in ltaly they form a considerable portion of the later tribes of the peninsula which owed their origin in the main to the misture of races.

The half-Greek element which the Latin langaage contains, is, according to this view of Niebuhr's, Pelasgic, and owes its origin to the Pelasgian portion of the Latin nation, which Niebuhr and K. O. Mitller (Etrusker) agree in finding in the Siculians.

This hypothesis of Niebnhr's, generally received as it is, wants, nevertheless, a sound historical foundation. It has received at the hands of Schwegler (Röm. Gesch.) a careful examiuation, and is condemned on the following grounds:-

1. The absence of any indigenons name for the Pelasgians in Italy.
2. The evident traces of Roman writers on the subject having obtained their infurmation from the Greek logographers.
3. The contradietory accounts given hy different writers of the migrations of the P'elasgians, acentrling as they follow Hellanicus and Pherecydes or Myrsilus.
4. The absence of any historical monument of the Pelasgi in Italy, whether literary or of another kind.

It only remains to make a few general observations on the evidence for the existence of the l'elasgi, and on the views taken by modern writers on the subject.

1. The modern anthorities on the Pelasgi in Greece are: Larcher, Chronologie d Herodote, ch. viii. pp. 215-217; K. O. Miiller Etrusker, vol. i. Einleitung, ch. ii. pp. 75-100 ; Kruse, Hellas, vol, i. p. 398-425; Mannert. Geographie, part viii. introdnction, p. 4: Thirlwall, IIistony of Greece, ch. ii.; Grote, vol. i. ch. ix., vol. ii. ch. ii. sub finem. The latter bistorian treats of the lelaspi as belonging not to bistorical, but legendary Greece. He says, "Whoever has examined the many confficting systems respecting the Pelasgi,-from the literal belief of Cluvier, Larcher, and Raonl-Rochette, to the interpretative and half-incredulous processes applied by abler men, such as Niebahr, or O. Nuiller, or Dr. Tbirlwall, - will not be displeased with my resolution to decline so insoluble a problem. No attested facts are now present to us - none were present to Herodotus or Thucydides even in their age - on which to build trustworthy affirmations respecting the ante-Hellenic Pelasgians; and, when such is the case, we may withont impropriety apply the remark of Herodotus respecting one of the theories which he had heard for explaining the inundation of the Nile by a supposed connection with the ocean - that the man who carries up bis story into the invisible world, passes ont of the range of criticism." (Vol. ii. p. 345.) Those who think Mr. Grote's way of disposing of the question too summary, will find it treated with great patience and a fair spirit of criticism by Bishop Thirlwall. The point on which he and Mr. Grote differ namely, the question whether the langnage of the Pelasgi was a rough dialect of the Hellenic, or nonHellenic - has been already referred to. As we possess no pusitive data for determining it, it is needless to do more than refer the reader to the passages qnoted. Respecting the architectural remains of the Pelasgi in Greece, a very few words will suffice. The Gate of the Lions at Mycenae, mentioned by Pansamias (ii. 15-16), is the only monument of the platic art of Greece in prehistoric times. The walls of Tiryns, of polygonal masonry, appear to be of equal antiquity, and are ascribed to the Cyclopes. [Mrcevae.] These bear a strong resemblance to the Tyrrheno-Pelasgic remains in Italy, specimens of which are given in Dempster's Etruria Regalis, v. g. the walls of Casa, Segnia (Segni) and Faesulae (Fiesole). And a sinall amount of evidence is thereby afforded in favonr of Niebulrr's theory of an original Pelasgie popnlation existing in the peninsulas of Greece and Italy. But this is much diminished by the fact, that similar remains are found in parts of Asia Minor where no traces exist of any Pelasgic traditions. And we are obliged therefore to fall hack upon the view first adopted by A. W. Schlegel, that the peninsulas of Greece and Italy were successively peopled by branches of one original nation, dwelling once ajom a time in the central part of Western Asia, and speaking one language, ont of which, by successive nodifications, sprang the different Greek and Italian dialects.
2. The autborities on the Pelasgians in Italy are Niebaler (II. R. vol. i. p. 25, Tr.) : Müller, Etrusker (qnoted above) ; Lanzi, Saggio di Lingua Etrusca, ¢c., Flor. 1824 ; Lepsius, vibur die Tyrrhen. Pelasger in Etrurien, Leipz. 1\&42; Steub, wher die

I＇rbewolner Rätiens，gic．，1843：Mommsen，L＇n－ teritalischen Diulecte， 1850 ；D＇richard，Vatural History of Man，vol．iii．4；Hefter，Geschichte der I．atein Sprache，p．11；G．C．Lewis，Credibility of early Roman Ifistory，vol．i．p．282；and Schwe－ gler，as quoted abore．

The last－mentioned historian，after a careful re－ view of all that aucient and motern authorities have said on the subject，agrees with．Mr．Grote in eoncluding that there is no historical foundation for the conmonly received traditions about the I clasgi． Ile says：＂The traditional image of the Pelasgic race，everywhere driven out，nowhere settling them－ sulves for good，－of the racl which is everywhere athd nuwhere，always reappearing，and vanishing ：uain without leaving any trace，－the image of this Lipsey nation is to me so strange，that we mast viltertain doubts as to its historic existence．＂

After they becane a powerful nation in Italy，the tradition，which Dionysius follows，tells us that they suddenly dispersed．This is in itself strange：but， were any other conclasion of the Pelasgian migra－ tious invented，we should have to point out Pelas－ gians in Italy，which is ioupossible．Nothing re－ mains of them but a few names of places，which are manifestly Gireck．Lepsius thought an inscription frund at Agylla was Pelasgic，but Nommseo（ $C^{\prime} n$－ tevit．Dial．p．17）says it is nothing but old Etruscan．

It is not difficult to account for the presalence of traditions relating to Pelasgi in Italy．Schwegler lias ably analysed the causes of this，and disproved （10）bistorical and linguistic grounds the riews of Xiebuhr and 0 ．Mïller，whieh they set ap in oppo－ sition to the Roman grammarians．

There is considerable doubt，as he remarks，in what light we are to regard the name Pelasgi，－ whether in that of an ethographic distiaction，or in that of an epithet $=$ autochthones or aborigines． We have both in Greek and Latin words resembling it sulficiently in form to warrant this supposition，－ 1．．5．Ma入aius，Manaí $\theta^{\theta \omega \nu}$ ，and Priscus．The change from $\lambda$ to $r$ is so common as to need no illustration， and the termination－yos is nearly the same as－cus．

These remarks，though they apply with con－ salderable force to the indiscriminate use of the word I＇elangian as applied to Italian races，need not affect the statement of Herndutus concerning the townships of simlace，Ilacie，and Creston，which were accouoted in his time l＇elasgic，and spoke a different langunge to n their neighbours．

That the name Pelasgi once indicated an existing race we maty fairly allow ；but we cannot form any listurical conception of a people whon Herodotus －Ils stationary and others migratory，and whose ear－ lunt abude was between the mountains of Ossa and Olympus，and also in Arcadia and Argolis．On the whole we can partly appreciate Niebubr＇s feclings when he wrote of the I＇elasgi．－The name of this Peorle is irksome to the histurian，hating as he does that spurious phulong which raises pretensions to knowledge concerning races so completely buried in silence．＂（Remn．Mist．i．p．26，Transl．）

If the Pelasgs have any elaims on our attention above other extinct races，it is not because they have left more trastworthy memorials of their existence， but becnuse they occupy so considerable a space in the mythic record of Greece ant Italy．［G．B．］ PWiAsGlotis［Tinkssath．］

PELIGNI（ $\Pi$ e $\lambda(\gamma \nu 0 t)$ a people of Central Italy， occupying an inland district in the heart of the Apennines．They bordered on the Marsi towards the $W$ ．，on the Samnites to the S．，the Frentani on the E．，and the Vestini to the N．Their territory was of very small estent，being confined to the valley of the Gizio，a tributary of the Aternus，of which the ancient name is nowhere recorded，and a small part of the valley of the Aternus itsclf along its right bank．The valley of the Gizio is one of those upland valleys at a considerable elevation above the sea，running parallel with the course of the Apen－ nines，which furm so remarkable a featore io the configuration of the central chain of those mountains ［Apexsinuts］．It is separated from the Marsi and the basin of the lake Fucious on the W．by a nar－ row and strongly marked mountain ridge of no great elevation；while towards the S．it terminates in the lofty monntain group which connects the central ranges of the Apennizes with the great mass of the Majella．This last group，one of the most elevated in the whole of the Apennines，attaining a height of 9100 feet above the sea，rises on the SE．frontier of the Peligoi；while the Monte Morrone，a long ridge of scarcely inferior height，runs out from the point of its junction with the Majella in a NW．direction， forming a gigantic barrier，which completely shuts in the Peligni on the NE．，separating them from the Frentani and Marrucini．This mountain ridge is almost continuous with that which descends from the Gran Sasso towards the SE．through the country of the Vestini，bat the great mountain barrier thas formed is interrupted by a deep gorge，throagh which the Aternus forces its way to the sea，having turued abruptly to the NE．inmediately after re－ ceiving the river Gizio［Aternus］．The secluded district of the Peligni was thas shat in on all sides by natural barriers，except towards the N．，where they met the Vestini in the valley of the Aternus．

A tradition recorded by Festus（s．v．Peligni， p．222），but on wbat authority we know not，repre－ sented the Peligni as of Ilyrian origin；but this statement is far outweighed by the express testimony
of Ovid, that they were of Subine descent. (Ovid, Fast. iii. 95.) The authority of the poct, himself a native of the district, is strongly confirmed by the internal probabilities of the case, there being little doubt that all these upland ralleys of the Central Apennines were peopled by the Sabiaes, who, radiating from Amiternum as a centre, spread themselves towards the S. and E. in the same manner as they descended towards the valley of the Tiber on the W. and SW. Hence the Peligni were of kindred race with their neighbours, the Vestini, Marracini, and Marsi, and this circumstance, conpled with their geographical proximity, sufficiently explains the close union which we find subsisting in historical times between the four nations. It is probable, indeed, that these four tribes formed a kind of league or confederacy among themselves (Liv. viii. 29), though its bonds inust have been somewhat lax, as we find them occasionally engaging in war or concluding peace singly, though more frequently all four would adopt the same policy.

The first mention of the Peligni in Roman history occars in D. c. 343 , when we are told that the Latins, who bad been threatening war with Rome, turned their arms against the Peligni (Liv. vii. 38); but we have no acconnt of the causes or result of the war. Soom after we find the Peligni, as well as their neighbours, the Marsi, on friendly terms with the Romaus, so that they afforded a free passage to the Roman army which was proceeding through Samniam into Campraia (Liv. viii. 6); and even when their neighbours the Vestini declared themselves in favour of the Samnites, they seem to bave refused to follow the example. (Id. viii. 29.) Ia B. c. 308 , however, they joined the Marsi in their defection from Rome, and shared in their defeat by Fabius (Id. ix. 41); but a few years afterwards (B. c. 304) they were induced to sue for peace, and obtained a treaty, apparently on farourable terms. (Ib. 45 ; Diud. xx .101 .) From this period they became the faithful and steadfast allies of Rome, and gave a striking proof of their zeal in B. c. 295, by attacking the Samsite army on its retreat from the great battle of Sentinum, and cutting to picces 1000 of the fugitives. (Id. x. 30.) After the subjection of Italy by the Rumans, the Peligni are seldom mentioned in history; but it is certain that they continued to furnish regularly their contingents to the Roman armies, and, notwithstanding their small numbers, occupied a distinguished position amung the auxiliary troops, the Pelignian cohorts being ou several occasions mentioned with distinction. (Dionys. xx. Fr. Didet; Enains, Ann. viii. Fr. 6; Liv. xxv. 14. xliv, 40.) Their name is omitted by Polybins in his catalogne of the forces of the Italian alhes in B. c. 225 (Pol. ї. 24), but this is probably by mere accident. During the Second Punic War they maintaised unshaken their fidelity to Rome, though their territory was repeatedly ravaged by Hannibal; and besides furnishing their usual quota to the Roman annies, they were still able in в. C. 205 to raise volunteers for the armament of Scipio. (Liv. xxii. 9. xxvi. 11, xxviii. 45.) At the outbreak of the Social War, the Peligni, in conjnnction with their neighbours and confederates the Marsi, were among the first to declare themselves against Rome; and the choice of their chief city, Corfinium, to be the capital of the confederates, and therefore the destined capital of Italy, had their plans proved successful, at once assigned them a prominent place among the nations arrayed against Ronre. (Appian, B. C. i. 39 ; Liv.

Epit. 1xxii; Oros. v. 18; Vell. Pat. ii. 16; Diod. xxyvii. 2.) The choice of Corfinium was probably determined by its strength as a fortress, as well as by its central position in regard to the northern confederates; at a later period of the war it was abandoned by the allies, who transferred their senate and capital to Aesernia. (Diod. l. c.) The name of the Peligni is not often mentioned during the war, though it is certain that they continued to take an active part in it throughont, and it is probable that they were almost uniformly associated with the Marsi. But in B. c. 90 we are told that they sustained a severe defeat by Ser. Sulpicius Galla (Liv: Epit. 1xxiii); and before the close of the following year they were received to sulmission, together with the Marrucini and Vestini, by Ca. Pompeias Stralo, B. c. 88. (Liv, Epit. 1xxri.) It is certain that the Peligni, as well as their neighboars, were at this time, or very soon after, admitted to the Roman franchise, for the sake of which they hal originally engaged in the war: they were earolled in the Sergian tribe, together with the Marsi and Sabines. (Cic. in Vatin. 15; Schul. Bob. ad loe.) The Peligni again fggure in the history of the Civil War between Caesar and Pompey, в. C. 49, when their chief town, Corfiniam, was occupied by Domitias Ahenobarbus with twenty coborts, which he had raised for the most part among the Marsi and Peligni, and with which be at first cluecked the advance of Caesar; but the rapid spread of disaffection among bis own troops quickly compelled him to serrender. (Cues. B. C. i. 15-23.) Sulmo, which had heen also garrisoned by Domitios, yielded without resistance to Cachar. (Il. 17.) The Peligni, in coummon with the otber mountais tribes, seem to have retained to a considerable extent their national character and feeling, long after they had become merged in the condition of Roman citizens, and as late as the civil war between Vespasian and Vitellins (A. D. 69) tbey are mentioned as dectaring themselves, as a people, in favour of the former. (Tac. Hist. iii. 59.) This is the last notice of them which occurs is history; bat they are described by all the geographers as a distinct people, retaioing their separate nationality. (Strab, v. p. 241 ; Plib. iii. 12. s. 17 ; Ptol, iii. 1. § 64.) For administrative purposes they were included in the Fourth Region of Augustus (Plin. l. c.); and in the Later division of this part of Italy, tbeir territory was comprised, together with that of the Marsi, in the province called Valeria. (Lib, Colon. p. 228). It now forms a part of the province of Abruzzo Clteriore.
The position of the Peligni, surromeded on all sides by the loftiest ranges of the Apennines, while the valley of the Gizio itself is at a considerable elevation abore the sea, naturally rendered the climate one of the coldest in Italy. Horace uses the expression "Peligua frigoza," as one almost proverbial tor extreme cold; and Ovid, who was a native of Sulmo, repestedly alludes to the cold and wiutry climate of his native district. (Hor. Carm, iii. 19. 8; Orid, Fast. iv. 81, 685, Trist. jv. 9.) Oa the other land, it derived from the saine cause the advantage of heing watered by numeroas and perennisl streams, fed by the snows of the neighbouriog monntains, where they are said to lioger throughout the summer. (Orid, Amor. ii. 16, Fast. iv. 685.) The broad valley of the Gizio was, however, sufficiently fertile; it produced considerable quantities of corn, and wine in abuadance, though not of superior quality, and a few sheltered spots would even almit

## PELIUM．

of the growth of olives．（Ovid，Amwi 15．16．6， 7 ； Martial，i．27，5，siii．121．）Ot the diaracter of the Peligni，we know only that they were estecued as rivaling in bravery their neimbours the Marsi （Plin．iii．12．8．17；Cic．in Vatin．15；Sil．Ital． viii． 510 ），and that from their secluded pasition they always retained the primitive sinplicity of their habits．From an expression of Horace it would appear also that they shared with the Marsi the reputation of skill in magical ineantations．（Hor． Epod．17．60．）
The Peligni had only three principal towns，Cor－ fisies．Sclaso，and Scperaequest，of which the two first only are known historically，nnd were dhabtless much the nuost important places．But Pliny notices all three in his list of towns：and the same names an found also in the Liber Coloniarum． （Plin．L．c．；Lib．Colon．pp．228，229．）Hence these are obriously the three alluded to by Ovid， when he calls his native town of Sulmo＂Peligni pars terias ruris＂（Amor．ii．16）；and it thus ap－ pears there were no other places in the district which enjoged municipal rank and had a territory of their own．Cuculus，mentioned only by Strabo （v．p．241）as situated to the right of the Via Valeria，is evidently the modern Cucullo，and must have been in the territory of the Peligni，but was probably an insignificant place．Statclue，known only from the Tabula as a station on the Tia Valeria， Z miles from Corfiuium，on the E．of the Mons Jneus，mast have been situated at or near the vil－ 1．tye of Goriann．

The territory of the Peligni must always have heen an important point in regard to the communi－ cations of the different nations of Central laly．On the one side a natural pass，now known as the Forca Curuso，called in the Tabula the Mons heess， connected the basin of the Gizio and lower valley of the Aternus with the land of the Marsi and basin of the lake Fucinus；on the other the reniarkable 1 1ass or gorge through which the Aternus forces its way just below Popoli，afforded a natural outlet， through which these apland ralleys had a direct conmunication with the sea．These two puses，in conjunction with that which led from the basin of thie Fucinus to Carseoli，furmed a natural line of way from Rome and the Tyrrhenian sea to the Alriatic，which was undoubtedly frequented long betiore the Romans subdued the several nations though which it passed，and ayes before the Yia Yalefia was hid down as an artiticial raad．That highway，inlech，was not continued through the Lund of the l＇cligni，and thence to the sea，until the reign of the emperor Claudius［Cempessia］．In the other dirrectun ato the zalley of the Gizio， openiug into that of the Aternus，afforded direct means of commumication with Reate，Interamna，and the valley of the Tiber，while at its soutbern ex－ tremity a practicable pass led throogh the heart of the Apeonines into the valley of the Sagros，and thus opened a direct line of communication with the interior of Samium．The importance of this line of rute，as well as the wrily period at which it was frequented，is shown by the circumstance that it was followed by the Roman armies in B．c． 340 ， when the Sumnites，as well as the Marsi and P＇cligni， were frivendly，ard the revolt of the Latins cut off their natural line of march into Campania．（Liv． viii．6．）

This line of road，as given in the Tabula，led fivan $C$ rfinium by Sulmo to Autidena，athd thence
to Aeserriaia and Venafrum．At the distance of 7 miles from Sulno that itinerary places n station called＂Jovis Larene，＂evidently the site of $n$ temple， on the highest part of the pass．The spot is still called Campo di Giove，and it is probable that the true reading is＂Jovis Paleni，＂the adjoining moun－ tain being still called Monte dit Palena，and a village or small town at the foot of it bearing the same name．（Cluver，Ital．p．759；Holsten．Not．ad Cluter．p．145；Romanelli，vol．iii．p．165．）It thus appears that the ancient road followed a more cir－ cuituos but casier line than the modern highiruad， and thus avoided the passage of the Piano di Cinque Miglia，an upland valley at the highest part of the pass，much dreaded in winter and spring on ace－ count of the terrific storms of wind and snow ta which it is subject．（Craven＇s Abruzzi，vol．ii．pp． 45－50．）
［E．II．B．］

## PELINAEUS．［Chos．］

I＇ELINNA，more commonly PELINNAELAM （Пé̀uvva，Steph．B．s．v．；Plin．iv．8．s． 15 ；Пe－入ıvaiov，Scylax，1．25；1＇ind．Pyth．x． 4 ：Strab． ix．p． 437 ；Arrian，Anab．i． 7 ；Liv．xxxxi． 10 ； חौe入nuaiov on coins，Eckhel，vol．ii．p． 146 ：Eth． Medurvaios），a town of Thessaly，in the district Histiaeotis，a little above the left bank of the Peneius．（Strab．l．c．）It seems to have Leen a place of some inportance even in the tine of Pmar （l．c．）．Alexander the Great passed through the town in his rapid march from Illyria to Buevtia． （Arrian，l．c．）It did not revolt from the Mace－ donians together with the other Thessalians after the death of Alexander the Great．（Diod，aviii．11．） In the war between Antiochus and the Komans， B．C．191，Pelinnaeum was occupied by the Atha－ manians，but was swon afterwards recuvered by the Romans．（Liv．xxxri，10．14．）There are con－ siderable remains of Pelinnaeum at Old Kardhiki or Gardhiki．＂The city occupied the face of a rocky beight，together with a large quadrangular space at the fout of it on the south．The southern wall is more than half a mile in length，and tho whole circumference near three niles．＂（Lcake， Northern Grecee，vol．iv．p．288．）
PE＇LHUN（חé入入ıov，Arrian，Anab．i．5；חídoor， Quadratus，ap．Steph．B．s．v．；1．iv．xxxi．40），a town of the Dissaretii，on the Blacedonian foumtior， and cormunanding the pass which led iuto that country．Froms its situation it was a place of cou－ siderable inportance，and was atracked by Alex－ ander on his return from the expedition against the Getae，in the war against the two lllyrian kin，＇s Cleitus and Glancias．On the defeat of the llyyrims Cleitus set the town on fire．According to Arrian （ l．c．），Pelium was situated at the foot of a woody mountain，and close to a narrow defile through which the Eordaticus flowed，leaving in one pait space only for four slields abreast，a descriptiout which corresponds so exactly with the pass of Tzan－ gon，or Klisiura of Decól，both as to the river，and breadth of one part of the pass，that the ilentity can hardly be questioned．Pelium will then be either Iliussa or Porjani，but the former las the preference by its name，which seems to be a vulgur
 vol．iii．p．323．）The consul Sulpicius，in his first campaign against P＇ililip（Liv．l．c．），crossed frum Eordaea，or Sarightioli，which he had raraged over part of the phain of Grevend，and through Anaseliza to Kustoria，whence he diverged to Pelium，which he occupied，learing a strong garrion in it，is it
was an advantageons post for making excarsions into the enemy's teritory.
[E. B. J]
PE'LIUM (Пи́ $\lambda เ \frac{}{}$ ), a lofty mountain in Thessaly, extending along the coast of Magnesia. It rises to the sonth of Ossa, and the last falls of the two mountains are connected by a low ridge. (Herod. vii. 129.) It forms a chain of some extent, stretching from Mt. Ossa to the extremity of Magresia, where it terminates in the promontories of Sepias aad Aeantium. It attaias its greatest height above lolcos. According to Ovid it is lower than Ossa (Frist. iii. 441), which Dodwell describes as about 5000 feet high. In form it has a broad and extended oatline, and is well contrasted with the steeply conical shape of Ossa. On its eastern side MIt. Pelium rises alnost precipitously from the sea; and its rocky and inhospitable shore (äкrù̀ $\dot{\alpha} \lambda / \mu \in \nu 0 s \Pi_{\eta \lambda 100,}$ Earip. Alc. 595) proved fatal to the fleet of Xerses. (Leake, Northern Greece, vol. iv. p. 384.) Mt. Pelimm is still covered with venerable forests, to which frequent allasion is made in the ancient poets. Homer constantly gives it the epithet of єivo $\begin{aligned} & i \phi u \lambda \lambda o \nu \\ & \text { (Il. ii. 744. \&c.). Its }\end{aligned}$ northern summit is clothed with oaks, and its eastern side abonnds with chestuats; besides which there are lorests of beeches, elms, and pines. (Dicaearch. Descript. Mont. Pel. in Geogr. Graec. Min. p. 106, ed. Paris, 1855 ; Ov. Fast. v. 381 ; Valer. Flace. ii. 6.)

Mt. Peliam is celebrated in mythology. It plays an important part in the war of the giants and the gods: since the giants are said to bave piled Ossa upon Pelium, in order to scale Olympus. It has been observed that this part of the fable is well explaized by the respective forms of Ossa and Pelinm. As Peliam is viewed from the south, two summits are seen at a considerable distance from each other,- a concavity between them, bat so slight as almost to give the effect of a table-mountain, upon which fiction night readily suppose that another lill of the casical form of Ossa shoald recline. (Holland, Trarels, vol. ii. p. 96.) Mt. Peliam was said to be the residence of the Centaurs, and more especially of Cheiroa, the instructor of Achilles, a legend to which the number of medicinal plants found on the raountain perhaps gave rise. (Dicaearch. l.c.; Hom. Il. ii. 743, xvi. 143 ; Pind. Pyth. ii. 83, iii. 7; Virg. Georg. iii. 92.)

According to Dicaearchas ( $l . c$. ), the cave of Cheiron and a temple of Zeas Actaeas occupied the surmmit of the mountain. The same writer relates that it was the custom of the sons of the principal citizens of Demetrias, selected by the priest, to ascend every year to this temple, clothed with thick skins, on accoant of the cold. Between the two sumanits of ML. Peliam there is a fine cavern, now commonly known by the name of the cave of Achilles, and which accords with the position of the cave of Cheiron, mentioned by Dicawarchus. The same writer likewise speaks of two rivers of Mlt. Peliam, called Crausindon and Brychor. One of them is auw named Zervikhia, and falls into the gulf between Nckhöri and St. George. (Leake, Northern Greece, vol. iv. p. 384, seq.) Lastly, Pelium was comnected with the tale of the Argonauts, since the timber of which their ship was built was cut down in the forests of this mountain. The north-western summit of Mt. Pelium is now named Plessudhi; bat the mountain is frequently called Zngori, from the town of this name immediately belove the summit on the eastern side. (Leake, $l$. c.;

Mézières, Mémoire sur le Pélion et l'Ossa, l'aris, 1853.)

PELLAA (חसं $\lambda \lambda \alpha$, Jerod. vii. 123 ; Thuc. ii. 99 , 100; Strab. vii. pp. 320, 323, 330, Fr. 22, 23 ; Ptol. iii. 13. § 39, viii. 12. §8; Plia. iv. 17; Itin. Anton. ; Itin. Hierosol. ; Peut. Tab.; Пё $\lambda \lambda \eta$, Hierocles), the capital of Macedonin. At the time when Xerxes passed through Macedon, Pella, which Herodotus (l.c.) calls a $\pi 0 \lambda i \chi^{\nu}$ iov, was in the hands of the Bottiaeans. Philip was the first to make Pella, which Amyntas had been obliged to evacnate (Xen. Hellen. v. 2. § 13 ; comp. Diodor. xiv. 92, xv. 19), a place of importance (Dem. de Cor. p. 247), and fixed the royal residence there : there was a navigation from the sea by the Lydias, though the marshes, which was 120 stadia in length, exclusive of the Lydias. (Scyl. p. 26.) These marshes were called Bonnoros (Bópgopos), as appears from an epigram (Tbeocrit. Chins, ap. Plut. de Exil. vol. viii. p. 380 , ed. Reiske), in which Aristotle is reproached for preferring a resideace near them to that of the Academy. Archestratus (ap. Athen. vii. p. 328 , a.) related that the lake produced a fish called "chromis," of great size, and particularly fat in snmmer. From its position on a bill surrounded by waters, the metropolis of Philip, and the birthplace of Alexander (Juv. x. 168; Lacan, x. 20), soon grew into a coasiderable city. Had Alexander not been estranged from Macedonia, it would probably have attained greater importance. Antipater lived there as regent of Macedonia, but Cassander spent less of bis time at Pella, than at Thessalonica and Cassandreia; from the time of Antigomus Gonatas till that of Persens, a period of nearly a centary, Pella remained the capital, and was a splendid town. (Liv, xxvi. 25, sxxvii. 7, xhi. 41,51, 67, xliii. 43, xliv. 10.) Livy (xliv, 46) has left the following description, derived ondoubtedly from Polybius, of the constraction of the city towards the lake. "Pella stands upon a height sloping to the SW., and is bonnded by marslies which are impassable both in winter and summer, and are cansed by the overflowing of a lake. The citadel" (the word "arx" is wanting in oar copies of Livy, bot secms absolutely necessary butb to the sease and the grammar) "rises like an island from the part of the marsh aearest to the city, being built upon an immense embankment, which defies all injury from the waters; thongh appearing at a distance to be united to the wall of the city, it is in reality separated from it by a wet ditch, over which there is a bridge, so that no access whatever is afforded to an enemy, nor can any prisuner whom the king may confine in the castle escape, but by the easily gaarded bridge. In the fortress was the royal treasare." It was surrendered to Aemilius Paallus (Liv. siv. 45), and became, according to Strabo ( $\mathrm{p}, 323$ ) and the Itiaeraries, a station oa the Egnatian Way, and a coluny. (Plin. l.c.) Dion Chrysastomns (Orat. Tars. Prior. vol, ii. p. 12, ed. Reiske) says that Pella was a heap of ruins; but from the fact that there are coins of the colony of Pella, ranging from Hadrian to Philip, this mast be an exaggeration. The name of the city is fonud as late as the sisth century of our era, as it occurs in Hierocles. It would seem indeed as if the name had sarvived the rains of the city, and had reverted to the fonntain, to which it was originally attached; as at a small distance from the village named Neokhöri or Yenikiuy, which has bees identitiod with a portion of the ancient Pclla, there is a spring
called by the Bulgarians Pel ，and hy the Greeks חídiך．Below the fountain，are somer remains of buildings，said to have been baths，and still called т $\dot{\alpha}$ Moutpa．These baths are alluded to by the comic poet Jlachon（ap．Athen．viii．p．348，e．）as producing biliary complaints．Althourh litile re－ mains of Pella，a clear idea may be formed of its extent and peneral plan ly means of the description in Livy，compared with the existing traces，con－ sisting mainly of＂tumuli．＂The circumference of the ancient city has been entimated at about 3 miles．The sources of the fountaias，of which there are two，were probalily about the centre of the site； and the modern ruad may pussibly be in the exact line of a main street which traverses it from E．to W． The temple of Mmerva Alcidemus is the only public building mentioned in history（Liv，slii． 51 ），but of its situation nothing at present is known．Felis Beau－ jour，who was consul－general at Saloniki（Tableau dus Commerce de la Grece，vol．i．p．87），asserted that he saw the remains of a port，and of a canal communicating with the sea．Leake（Northern Greece，vol，iii．2p．261－266），who carefully went over the ground，could find no traces of a port，of wbich indeed there is no mention in ancient history： remains of a conal coold be seen，as be was told，is suminer．

An antomomoos coin of Pella has the type of an ox feeding，which explains what Steph．B．（s．$x$ ：； comp．Ulpian，ad．Dem．de Fuls．Leg．）reports，that it was formerly called Boyvoros．（Eckhel，vol．ii．p．73； Sustiui，Mon．Iet．p．37．）
［E．B．J．］

GOIN OF PELLA in MLACEDONLA
PELLA（ $\Pi$＇́̀ $\lambda \lambda a:$ Eth．$\Pi \in \lambda \lambda a \hat{o} o s)$ ．1．A city of Paiestine，and one of the towns of Decapolis in the Peraea boing the mast northerly place in the latter district．（Plin．v．18．s． 16 ；Joseph．B．J．iii． 3．§ 3．）Stejhams B．（s．v．）calls it a city of Cocle－Syria and Ptolemy（v．15．§ 23）also de－ seribes it as a city of Dicapolis in Cocle－Syria． Stephanus adds that it was also called Butis（ $\hat{\eta}$ Boĩts），which appellation seems to be preverved in its inodern name El－Bulschie．Its name Pelia shows that it was either built or colonisal by the Mace－ dasians．Pliny describes it as abounding in springs （＂aquis divitem，＂I＇lin．L．c．）．It was taken by An－ tiuchus the Girat（Polyb．v．70），and was atterwands destroyed by Alexander Jammens，hecanse its inlaa－ Litants would not areept the Juwish religion（Juseph， Ant．xiii． 15 （23）$\leqslant 3$, B．J．i．$\downarrow$ ．§ 8）：lut it was afterwards restured by Pompey．（Josepin．Ant，xiv． 4（7），§ 4．）Peda was the place to which the Christians of J．usitlem fled before the destruction of the latter city．（Euseb．H．I：iii． 5 ；Epiphan． de Mens．et Ponder．P．171；Reland，Palaestina， 1．924．）

2．A town of Syria，on the Orontes，better known under the name of Apaneia．［Arambaa，No．1．］

1＇ELLANA or PELLE＇XE（ $\boldsymbol{\eta}$ ПeגAava，laus． ini．20．§ 2；тà Mé入入ava．Strah，viii．p．386；Пє入－入inm，Xerl．Hell．vii．5．§ 9 ；Poly b．ir， 41 ，xvi． 37 ； Plut．Agis，8），a town of Laconia，un the Eurotas，
and on the road from Sparta to Arcadia．It was said to have been the residence of Tyndareas，wheo he was expelled from Sparta，and was subsequently the frontier－fortress of Sparta on the Eurotas，as Stlasia was on the Oenus．Polybius describes it （iv．81）as one of the cities of the Laconian Tripulis， the other two being probably Carystus and Bele－ mina．It had cessed to be a town in the tine of Pausanias，but he noticed there a temple of Asclepius， and two fountains，named P＇ellanis and Lanceis． Below Pellana，was the Characoma（Xapáкшнa），a fortification or wall in the narrow part of the valley； and near the fown was the ditch，which according to the law of Agis，was to separate the luts of the Spartans from those of the Perioeci．（Plut．L．c．）
Pau－anias says that Pellana was 100 stadia from Belemina；but he does not specify its distonce from Sparta，nor on which bank of the river it stood．It was probably on the left bank of the river at $M / t$ ． Burlid，which is distant 55 stadia from Sparta，and 100 from Mtt．Khelnous，the site of Belemina．Mit． Burliii has two peaked summits，on cach of which stands a chapel；and the bank of the river，which is only separated from the mouvtain by a narrow meadow，is supported for the lemgth of 200 yords by an Hellenic wall．Sume copious sources issue from the foot of the rocks．and from a strean which joins the river at the southern end of the meadow， where the wall ends．There are still traces of an aqueduct，which appears to have carried the waters of these fountains to Sparta．The acropolis of Pellana may have occupied one of tbe summits of the mountain，but there are no traces of antiqnity in eitber of the chapels．（Leake，Morea，vol．iii．p．13， seq．；Boblaye，Recherches，fic．p．76；Ross，Reisen im Peloponnes，p． 191 ；Curtius，Peloponnesos，vol． ii．p．255．）

PELLE＇XE．1．（ Пє入入ク́vク，Dor．Пe入入áva，Пe入－ $\lambda i v a$, Steph．B．s．v．：Eth．$\Pi \in \lambda \lambda \eta \nu \in \nu$ s，Pellenensis，Lir． xxsiv， 29 ；Pellenaeus，Ilin．iv． 6 ：Tzerkori，mr．Zu－ $g r u i)$ ，a town of Achaia，and the most easterly of the twelve Achaean cities，whose territory bordered upun that of Sicyon on the E．and upon that of Aegeira on the W．Pellene was situated 60 stadia from the sea， upon a strongly fortified hill．the summit of which rose into an inaccessible peak，dividing the city into two parts．Its rame was derived by the inhahitats thenselves from the giant lallas，and by the Argives from the Argive Pellen，a son of Pborbas．（Herod． i． 145 ；Pol．ii． 41 ：Strah．viii．p． 386 ；Paus．vii． 26. §§ 12－14；Apoll．Rhod．i．176．）Pellene was a city of great antiquity．It is mentioned in the Homeric catalogue ；and according to a tradition， preservell by Thucylides，the inhabitants of Scione in the peninsula of Pallene in Macedonia prufessed to be descended from the Achaean Yallenians，who were driven on the Macedonian const，on their return from Troy．（1Ium．IL ii．574；Tbuc，iv．120．）At the commencrment of the Peloponnesian War，Pellene was the only one of the Achaean towns which eapoused the Spartan cause，though the other states afterwards followed their example．（Thue，ii．9．） In the time of Alexander the Great，Pellene fell ander the dominion of one of its citizens of the name of Cbaeron，a distinguished athlete，who raised him－ self to the tyranny by Alexander＇s assistance．（I＇aus． vii． $27 . \S 7$ ．）In the wars which followed the re－esta－ blishment of the Achacan Learue，Yellene was several times taken and re－taken by the contending parties．（Pol．ii．52，iv．8， 13 ；Plut．Cleom 17， Arat．31，32．）The Luildings of Pellene are de－
scribed by Pansanias (vii. 2\%). Of these, the most important were a temple of Athena, with a statne of the goddess, said to have been one of the carlier works of Pheidias ; a temple of Dionysus Lampter, in whose honour a festival. Lampteria, was celebruted ; a temple of Apollo Theosenius, to whom a festival, Theoxenia, was celebrated; a gymnasium, \&c. Sixty stadia from the city was the Mysaenm (Müraiov), a temple of the Mysian Demeter; and near it a temple of Asclepius, called Cyrus (Kīpos): at both of these places there were copious springs. The ruins of Pellene are situated at Zugrá, and are now called Tzerkork. The two temples of Mysaeum and Cyrus are placed by Leake at Trikkala, SE, of the ancient city. (Leake, Morea, vol. iii. p. 215, Peluponnesiaca, p. 391.)

Between Aegium and Pellene, there was a village also called Pellene, celebrated for the manufacture of a particular kind of cloaks, which were given as prizes in the agonistic contests in the city. (Strab, viii. p. 386 ; Pind. Ol. is. 146 , with Schol.; Aristoph. Ar. 1421, with Schol.; Hesych. and Phot. s. v. He $\lambda \lambda \eta \nu u z a l \chi^{\lambda \lambda a i v a i .) ~ K . ~ O . ~ M u ̈ l l e r ~(D o r . ~ v o l . ~ i i . ~}$ p. 430), however, questions this second Pellene : he supposes that Strabo is describing Pellene as both sitadel and village, and he corrects the text, кeïrat
 $\lambda$ rívos ; but the contest renders this conjecture improbable.

The harbour of Pellene was called Amistonactae ('Apigtovaütaı), and was distant 60 stadia from l'ellene, and 120 from Aegeira. It is said to have been so called from the Argonauts laving landed there in the course of their voyage. (Paus, vii. 26. § 14, ii. 12. § 2.) It was probably on the site of the modern Kamári. (Leake, Morea, vol. iii. p. 384.) A little to the E., near the const, was the fortress Oncrus ('Oגoupos), dependent upon Pellene; Leake places it at Xylo-castro. It would thus have stood at the entrance of the gorge leading from the maritime plain into the territory of Pellene, and would have been a position of great importance to the safety of that district. (Xen. /Iell. vii. 14. §§ 17, 18 ; 1llin. iv. 6; Mel. iii. 3 ; Steph. B. s. $v$.; Leake, vol, iii. p. 224.) Near Aristonautae was Gonvisst or Goxoessa (Гovóe $\sigma \sigma a$ ), to which Homer gives the epithet of lofty ( $\alpha i \pi \epsilon i \nu \nu^{\prime}$ ). According to Pausanias its $\mathrm{I}^{\text {roper name mas Dosusss ( } \Delta \text { novoṽनa), }}$ which was changed by Peisistratus into Gonoëssa, when he collected the poems of Homer. Pausanias says that it was a fortress belonging to the Sicyonians, and lay between Aegeira and Pellene; but from its position we may infer that it was at one time dependent upon Pellene. Leake places it at Kimpfi, the lofty mountain, at the foot of which is Knmeiri, the ancient Aristonantae. (Hom. II. ii. 573 ; Pans, vii. 26. § 13 ; Leake, vol. iii. p. 385.)
2. A town in Laconia. [Pellana.]

COIN OF PELLENE.

## PELO'DES PORTUS. [Buthrotum.]

PELOP1S 1'NSULAE, nine small islands lying of Methana, on the Argolic coast. (Paus, ii. 34. §3.) They must be the islands lying between Eppidaurus and Acrina, of which Pityomnesus (An-
ghistri) is the largest. (Plin. iv. 12. s. 20; Leake, Morea, vol. ii. p. 455. )

PNLOPONNE'SLS. [Grabeia.]
PELO'RUS, PELO'RIS, or PELO'RTAS (HE $\lambda \omega p o s$ áкра, Ptol.; Пeגapis, Thuc., Dion. Fer ; Пeגwptas, Pol. Strab.: Copo di Faro), a celehrated promontory of Sicily, forming the NE. extremity of the whole island, and one of the three promontories which were considered to give to it the triangular form from which it derived the name of Trinacria. (Pol. i. 42; Strab, vi. pp. 265, 266; Diod. v. 2; Plin. iii. 8 s. 14 ; Dion. Per. $467-472$; Ovid. Met. xiii. 727. ) lt was at the same time the point which projected furthest towards the opposite coast of Italy; so that the narrowest part of the Sicilian straits was that which lay between Cape Pelorus and the conast adjoining the headland of Caenys (Punta del Pezzo) un the coast of Bruttium. [CaEnys.] A strange story is told by some Roman writers that it derived its name from the pilot of Hannibal, who was put to death by that general from a snspicion of treachery; thas overlooking the fact that it was known by that name to the Greeks for centuries before the time of Hannibal. (Mlel. ii. 7. § 17 ; Val. Max. ix. $8 . \S 1$; Sallust, ap. Serv. ad Aen. iii. 411.) The actual beadland of Pelorus, now called the Cano del Furo, is a low, sandy point ; but about 2 miles from its extremity there begins a ridge of hills which quickly rises into a range of mountains, of no great elevation, but steep and strongly marked. These continue in an unbroken range at the Lack of Messina, near which they attain a lieight of about 3000 feet, and flank the east coast of the island as far as the neighbourhood of Taormina, where they turn abruptly to the W. and stretch across in that direction without any real interruption, till they join the more lofty group of the Monte Madonia. It is to this range of mountains that the name of Mons Neptexies is applied by Solinus (5. § 12), and which that author describes as separating the Tyrrhenian and Adriatic (i. e. Sicilian) seas. But there is no real geographical line of separation between these mountains and those further W., which were known to the ancients as the Moss Nebrones.

The headland of Pelorus may thos be looked upon ns the extremity of a great mountain promontory, formed by the range of the Mons Neptunius, and extending from the neighbourhood of Messina to that of Milazzo (Mylae), or, in a still wider sense, from Tauromenium on the E. coast to Tyndaris on the N. Diodorus calls it 100 stadia from the promontory to Messana, and the distance is still commonly reckoned 12 miles, though it does not really exceed 8. (Diod. siv. 56.)

From its proximity to Messana and its position commanding the passage of the straits, Pelorns was an important naral station, and as such its name is frequently mentioned in history. Thus, in n.C. 425, when the Athenian fleet under Laches was established at Rhegium, the Syracusans and their allies took post with their fleet at Pelorus, where they were supported also by a land force. (Thue. iv. 25.) In B. c. 396 the Carthaginian general Himilco took post at Pelorns with his fleet and army, and, when the Messanians sallied out to attack him, by taking advantage of a north wind, sent his fleet down suddenly to Messana, which was surprised and taken before the troops could return to its defence. (Diod. xiv. 56,57.) Again, during the siege of Messana by the Carthagimians at the commencement of the First Punic War, it was at Pelorus that their flect was
stationed, with the view both of tireatening the city and preventing the Romans from crossing the straits. (Pol. i. 11.) And at a later period, duing the contest between Octavian and Sextus Pompey in the neighbourhood of Messana, the headland of P'elorus once more became an important post, being one of the puints sedulously guarded by lompey in order to prevent his alversary from eflecting a landing. (Appian, B. C. v. 105, 116.)

The actual promontory of P'elırus, as already mentioned, is a low spit or point of sand, about 2 miles in length, which has evidently been thrown up by the currents, which flow with great rapidity through the straits. (Symth's Sicily, p. 109.) A tradition, reported by Dodorus, but as ancient as the time of Hesiod, represented it as an artificial work constructed by the giant Orion. (Diod. iv. 85.) Within this saudy point, between the beach and the hills, are enclused two small lakes or pools which are famous for pridacing the best eels and cockles in Sicily (Sinyth, I. c. p. 106),-s reputation they already enjoyed in ancient times, as the " cockles of l'elurus" are repatedly nuticed by Athenaeus; and Solimus, who mentions the lakes in question, speaks of them as abounding in fish. There appear to have been three of them in his day, but the marvels which be relates of one of them are purely fabulous. (Athen. i. p. 4. c., iii. p. 92. f. ; Solin. 5. §§ 2-4.) A temple of Neptune stood in ancient times apon the promontory, as well as a lighthouse or Pharos, the memory of which is retained in the modern name of Punta del Faro, by which the cape is still known. This appellation seems to have indeed cone into use before the close of the Roman Empire, as Servins, in describing the width of the Sicilian strait, measures it "a Columna usque ad Pharon." (Serv. all Aen, iii. 411.) But no remains of either building are now visible.
[E. H. B.]
PELO'RUS (חé $\lambda$ wpos), a small river of Iberia, in Asia, probailly a trobutary of the Cyrus. (Dion Cass. xxxvii. 2 ; comp. Groskurd's strab. vol, ii. p. 375. )

PELSO (Aur. Vict. de Caes. 40) or PElSO (Plin. iii. 27), a considerable lake in the north of I'annonia. A large portion of it was drained by the emperor Galerius, who conducted its waters into the Danube, and thas reclaimed large tracts of land, which formed an impurtant addition to the frovince. (Aur. Viet. l. c.) The modern name of this lake is Plattensee: during rainy seasons it still overflows its bauks far and wide, and forms extensive marshes, which are probably the very districts that were drained by Galerius. Lake I'elso is mentioned under different modifications of this name, such as Lacus I'elsodis (Jornand. Get. 52, 53) and Pelsois (Geogr. Rav. iv. 19), while in the middle ages it was called Pelissa. Muchar (Noric, i. p. 3, \&c.) regards I'ciso and l'elso as two lakes, placing the former, with Pliny, near the Deserta Buiorum, and unotifying it with the Neusicellersee, while he admits the P'e'so to be the I'luttensee. This hypothesis, however, can handly be sumained, as it is pacty certain that the Niusiedlersee did not exist io the times of the Romans, bat was fommed at a later perriod (Comp). Schonwisher, Antiquitates et Ilistoriat Subariut, p 17, Su: ; Liechtenberg, (iengr. des Uester. Kaiserstruates, whl, ini p. 1245, \&.e.)
[1.S.]
1WLTAE: (TLètat: Fith. П-גтmroi, Pelteni), a comsiterable fown of Phrygia, was situated, according to Xenuphon (Anub. i. 2. § 10), at a dis-
tauce of 10 purasangs from Celaenae, at the head of the river Maeander. Xenophon describes it as a populous city, and states that the amy of Cyrus remained there three days, during which games and sacrifices were performed. The Peuting. Table, where the name is erroneously written Pella, places it, quite in accordance with Xenophon, 26 miles from Apamea Cibotus, to the conventus of which Peltae belonged. (Plin. v. 29: comp. Ptol. v. 2. § 25 ; Steph. B. s. v.) Strabo (xii, p. 576) mentions Peltae among the smaller towns of Plirygia, and the Notitiae name it among the episcopal cities of Plurygia Pacatiana. The district in which the town was situated derived from it the name of the
 xiii. p. 629). Kiepert (ap. Fran2, Funf. Inschriften, p. 36) fixes the site of Peltae at the place where Mr. Hamilton found ruins of an ancient city, about 8 miles south of Sandakli (Journal of the Roy. Geogr. Society, viii. p. 144); while Hamilton himself (Researches, ii. p. 203) thinks that it must lave been situated more to the south-west, near the modern Ishekli. But this latter hypothesis seems to place it too far west.
[L. S.]
P'ELTUI'NUM (Eth. Peltuinas, -ätis: Ansedonia), a considerable town of the Vestini, and one of the four ascribed to that people by Pliny (iii. 12. s. 17). Its name is not found in Ptoleny or the Itineraries, but its municipal importance is attested by varions inscriptions. One of these confirms the fact mentioned by Pliny, that the Aufinates were closely connected with, or dependent on, Peituinum, apparently the more important place of the two. We learn from the Liber Coloniarum (p. 229) that it attained the rank of a colony, probably under Augustus: but at a later period, as we learn from an inscription of the date of A. D. 242 , it was seduced to the condition of a Praefectura, though it seems to have been still a flourishing town. (Urell. Inscr. no. 4036 : Zumpt, de Coloniis, p. 359, not.) Its site was unknown to Cluverius, but can be fised with certainty at a spot called Ansedonia, between the villares of Castel Nuow and Prata, about 14 miles SE. of Aquila, on the road from thence to Popoli. The ancient name is retained hy a neighbouring church, called in ecclesiastical documents S. Paolo a Peltuino. A considerable part of the circuit of the ancient walls is still visible, with remains of various public buildings, and the ruins of an ampbitheatre of reticulated work. (Giovenazzi, Aveia, p. 119 ; limaneli, vol. iii. pp. 264-268; Orelli, Inser. 106, 3961,3981). [E. H. B.]

PELVA, a town of Dalmatia, which the Antonine Itinerary places on the road from Sirminat to SaJonae. Schafarik (Slav, Alt. vol. i. pp, 60, 247) identifies it with Plewa, a place in Bosnia, with a river of the same name, of which l'elva is the Latinised form.
[E. B. J.]
P'BLU'SITM (Пŋ入oúatov, Ptol. iv. 5. § 11, vii. 15. § 11 : Steph. B. s, v.; Strab, svii. p. 802, seq.: Eth.
 gypt, situated upon the eastermmost bank of the Niif, the Ostium P'clusiacum, to which it gave its naune. It was the Sin of the Hebrew Scriptures (Eark. xxx. 15): and this word, as well as its Argyptian appellation, l'eremoun or l'eromi, and its Greek ( $\pi \dot{\eta} \lambda \cup s$ ) import the city of the ooze or mud (mni, Coptic, mud). Pelnsium lying between the seaboard and the Deltaic marslies, about two and a half miles from the sea. The Ostiun Pelusiacum wus choaked by sand as early as the first century it. c.,
and the coast-line has now advanced far beyond its ancient limits, so tbat the city, even in the third century A. D., was at least four miles from the Mediterranean. The principal produce of the neighbouring lands was flax, and the linum Pelusiacum (Plin. xix. I. s. 3) was both abundant add of a very fine quality. It was, however, as a borderfortress on the frontier, as the key of Aegypt as regarded Syria and the sea, and as a place of great strength, that Pelusium was most remarkable. From its position it was directly exposed to attack by the invaders of Aegypt; several important battles were fought under its walls, and it was often besieged and taken. The following are the most memorable events in the bistory of Pelusium:

1. Semnacherib, king of Assyria, B. c. $720-715$, in the reign of Sethos the Aetbiopian (25th dynasty) advauced from Palestine by the way of Libna and Laclish upon Pelnsium, but retired without fighting from before its walls (lsaiuh, xxxi. 8 ; Herod. ii. 141 ; Strab. xiii. p. 604). His retreat was ascribed to the favour of Hephaestos towards Sethos, his priest. In the night, while the Assyrians slept, a hast of field-mice gnawed the bow-strings and shield-straps of the Assyrians, who fled, and many of them were slain in their flight by the Aegyptians. Herodotus saw in the temple of Hephaestos at Memphis, a record of this victory of the Aegyptians, viz. a statue of Sethos holding a mouse in bis hand. The story probally rests on the fact that in the symbolism of Aegypt the mouse implied destruction. (Comp. Horapoll. Hieroglyph. i. 50; Aelian, II. An. vi. 41.)
2. The decisive battle which transferred the throne of the Plaraohs to Cambyses, king of the MedoPersians, was fonght near Pelusium in B. c. 525. The fields around were strewed with the bones of the combatants when Herodotus visited Lower Acgypt; and the skulls of the Aegyptians were distinguishable from those of the Persians by their superior hardness, a fact confirmed by the mummies, and which the listorian ascribes to the Aegyptians shaving their heads from infancy, and to the Persians covering them up with folds of cloth or linen. (Herod. ii. 10, seq.) As Cambyses advanced at once to Memphis, Pelusium probably surrendered itself immediately after the battle. (Polyaen, Stratag. vii. 9.)
3. In B. c. 373, Pharnabazus, satrap of Phrygia, and Iphicrates, the commander of the Athenian armaneent, appeared before Pelusium, but retired without attarking it, Nectanehus, king of Aegypt, having added to its former defences by laying the neighbouring lands under water, and blocking up the navigable charmels of the Nile by embankments. (Diodor. xv. 42 ; Nepos, Iphicr. c. 5.)
4. Pelusium was attacked and taken by the Persians, B. c. 309 . The city contained at the time a garrison of 5000 Greek mercenaries under the command of Philophron. At first, owing to the rasbicss of the Thebans in the Persian service, the defendants had the advautage. But the Aegyptian king Nectanebus hastily venturing on a pitclied battle, his troops were cut to pieces, and Pelasium surrendered to the Theban general Lacrates on honourable conditions. (Diodor. xvi. 43.)
5. In в. c. 333, Pelusium opened its gates to Alexander the Great, who placed a garrison in it under the command of one of those officers entitled "Companions of the King." (Arrian, Exp. Ale.e. iii. 1, seq. ; Quint. Curt. iv. 33.)
6. In e. c. 173, Antiochus Epiphanes utterly
defeated the troops of Ptolemy Philometor under the walls of Pelusium, which be took and retained after he had retired from the rest of Aegypt. (Polyb. Legat. § 82 ; Hieronym. in Daniel. xi.; On the fall of the Syrian kingdom, howeser, if not earlier, Pelusium bad been restored to its rightful owners, since
7. In B. c. 55, it belonged to Aegypt, and Mlarcus Antonius, as general of the horse to the Roman proconsul Gabinius, defeated the Acgyptian army, and made himself master of the city. Ptolemy Auletes, in wlose behalf the Romans invaded Aegypt at this time, wished to put the Pelusians to the sword; but his intention was thwarted by Antonins, (Plut. Anton. c. 3: Val. Max. ix. 1.)
8. In B. C. 31, immediately after his victory at Actium, Augustus appeared before Pelusium, and was admitted by its governor Seleucus within its walls.

Of the six military roads formed or adopted by the Romans in Aegypt, the following are mentioned in the Itinerarium of Antoninus as connected with Pelusium:-

1. From Nemphis to Pelusimm. This road joined the great road from Pselcis in Nubia at Babylod, nearly opposite Memphis, and coincided with it as far as Scenae Veteranornm. The two roads, viz. that from Pselcis to Scenae Veteranorum, which turned off to the east at Heliopolis, and tbat from Memphis to Pelusium, connected the latter city with the capital of Lower Aegypt, Trajan's canal, and Arsinue, or Suez, on the Sinus Heroopulites.
2. From Acca to Alesandrcia, ran ulong the Mcditerranean sea from Raplia to Pelusium.

Pelusium suffered greatly from the Persian invasion of Aegypt in A. I). 501 (Eutychii, Annal.), but it offered a protracted, though, in the end, an ineffectual resistance to the arms of Amrou, the son of Asi, in A. D. 618. As on former occasions, the surrender of the key of the Delta, was nearly equivalent to the subjugation of Aegypt itself. The khalifs, however, neglected the harbours of their new conquest generally, and from this epoch Pelusium, which had been long on the decline, now almust disappears from history. Its ruins, which have no particular interest, are found at Tineh, near Damietta. (Champollion, l'Egypte, vol. ii. p. 82 ; Dénon, Descript. de l Egypte, vol. i. p. 208, iii. p. 306.)
[W. B. D.]

COLS OF 2FLUSIUM.
PEME (It. Ant. p. 156), probably the same as the Pempte (П $\mu \pi \tau \tau \eta$ ) of Stephauus B. (s.v.), a town of Aegypt, in the Hept:uromis, 20 miles above Mempbis, on the left bark of the Nile, now called Benibe. In the old editions of Pliny (v. 29. s. 35) we find a place called I'emma, belonging to the Nomads dwelling on the borders of Aegypt and Aethiopia; but Sillig, instead of "Cysten, P'emaum, Gadagalen." reads "Cysten, Macadagalen."

PENEI'US. 1. The chief river of Thrssaly. [Thessaha.]
2. The chief river of Elis. [Elis.]

PENESTAE, in Thessaly, Sec Dict.of Intiq. s.v.
PENESTAE, a people of Illyricum, who alpear
to have possessed a large traet of mounfainous country to the N. of the Dassaretac, and exteuling to the E. as far as the frontier of Macedonia, while on the W. and NW. it almost reached to the Labestes :und the dominions of Gentius. (Liv, xliii. pp. 20, 21, 22, 23, 25, xliv. 11.) The principal city of this warlike tribe was Uscans; besides which they had the two fortresses of Draudacem and O.aeneum.
[E. B. J.]
PENIEL or PENUEL (i. c. "Face of God," Eîos Өєoî, LXX.), a place beyond Jordan, where Jaecb wrestled with the angel (Gen. xxxii. 30), and where a town was afterwards founded by the tribe of Gad. (Julges, viii. 8.)

PE'NJU'S, a small river of Colchis, falling into the Euxine, on which stood a town of the same name. (Plin. iv. 4: Ov. ex Pont. iv. 10. 4\%.)

PENNELOCUS, in the Antonine litin, and PENNOLLCOS in the Peutinger Table, is a place in Gallia in the country of the Namtuates, between Vivisens (Ietay) and Tarnaja (St. Murrice). In the Itins. the distance of Pennelocus from Vivasens is marked viiii.; but it is uncertain whether they are Ronan miles or Gallic leagncs. It is generally asanmed that J'illeneure at the eastern ead of the Lake of Geneva is the site of Pennelocus, but the distance from levay does not agree. D'Anville found in ame old maps a place called Peme on the direction of the road, but the positiou of Perne does not agree with the distances in the Itins. Pennelocus was in the Vallis Pemina or the Valais.
[G.L.]
PENNINAE ALPES. [Alpes, p. 10s, a.]
PENNOCRUCIUM, a town in the tervitory of the Cornavii, in Britannia Romana, sometimes identified with Penkridge in Stafjordshive, but more probably Strctton. (Ition, Aut. p. 470 ; Camden, p. 636.)
[T. H. D.]
PENTADEM1'TAE (Пevтa $\AA \eta \mu i \tau \alpha l$ ), a tribe of Teutbrania in Mysia, which is meationed only by Ptolemy (v. 2. § 15).
[L.S.]
PENTA'POLIS. [CYIGENATCA.]
PENTEDA'CTYLOS (Ilin, vi. 29. s. 34 ; $\Pi$ evrǻкктvגov úpos, Ptol. iv. $5 . \$ 25$ ), a mountain in E:gyit, on the Arabian Gulf, S. of Berenice.

P'NTELE. [ATTICA, p. 327, 4.]
PENTELEIUM ( $\Pi$ evté $\operatorname{ciov}$ ), a fortress near Phencus, in the worth of Arcoulia, situated upon a mountain of the same name. For details see I'Henevs.

P1:NTELICLS MONS. [AtTICA, pp, 322, a., 323 , b.]

1'ENIRI (Hértpor), 2 tribe of the Samnites, and appurently one of the wost important of the sulsdivisons of that nation. Their capital city was Loviasrm (Liv. ix. 31), in the very heart of the Sumuite territory, and it is therefore probable that they occupied the whole of that rugged and mountainous district which extends from the frontiers of Latimm, in the valley of the Liris, to those of the Frentani, toward, the Adriatic. But it is impossible to deternine "heir vazet limits, or to separate their Listory from that of the remaining Samnites. It is probable, indeed, that, throughout the long wars of the Romans with the Sammites, the Pentri were the hatugg trike of the latter people, and ahways took paut in the war, whether specified or not. The ouly uecasion when we hear of their sequrating themselves from the rest of their countrymen, is daring the Second J'unic War, when we are told that all the other Samnites, exr pt the I'entri, cieclaredi in favour of IIanibai niter the battle of Canmer, 1.. c. 216 .
(Liv, xxii. 61.) This is the last nccasion on which we find their name in listory; all taice of the distinction between them and the other Sitmnites seems to lave been subsequently lost, and their name is not even mentioned by Strabo or lling. The gero graphical account of their country is given under the article Simsiem.
[E. H. B.]
PEOR (\$0y $\omega$ p, L.XX.), a mountain in the land of Mont. (Numb. xxiii. 28.) It is placed by Easebing (s.v. 'Apusio Mwis) between Livias and Esluts, over against Jericho.

## PEOS ARTE'MIDOS [Sreos Artemidos.]

 an island in the Aegaean sea, lying off the coast of Thessaly, to the east of Inalonnesus. Pliny describes it as 9 miles in circuit, and says that it was formerly called Eroenus (iv. 12. s. 23). It was said to have been colonised by some Cretans ander the command of Staphylos. (Scymn. Cl2. 579; Hom. Hymn, Apoll. 32.) Peparethus was an island of some inportance, as appears from its frequent mention in history, and from its pussessing three tuwns ( $\tau$ plлodis, Scylax, p. 23), one of which bare the same name as the istand. (Strab. ix. p. 436.) The town suffered from an earthquake in the Pelopounesian War, b. c. 426. (Thuc, iii. 89.) It was attacked by Aluzander of Phelae (Diod. xv. 95), and the jsland was laid waste by Philip, becanse the inhabitants, at the instigation of the Athenians, had taken pmossessiun of Halomesus. (Dem. de Cor. p. 248, Fipist. Thitl. p. 162.) In в. c. 207, Philip sent a garrison to the city of l'eparethns, to defund it against the Romans (Liv. xaviii, 5) ; but he destroyed it in s. C. 200, that it might not fall into the hands of the latter, (Liv, xxxi. 28.) Peparethus was celebrated in antiquity for its wime (Athen, i. p. 29; Heracl. Pont. Fragm. 13: Plin. xiv. 7. s.9) and oil. (Ov. Alet. vii. 4.0.) Diocles, the earlient Greek listotian who wrote ppon the foundation of Rume, was a native of I'eparethas. [See Dict. of Biogr. Vol. I. p. 1010.] Peparethus is now called Khilithromia, und still produces wine, which finds a good market on the mainland. (Leake, Northern (ireece, vol. iii. p. 112.)

PEPER1NE ( $\Pi \in \pi \in p i v \eta$ ), an island off the SW. coast of India, which undoubtedly derived its name from proincing pepper. (Ptol, vii. 1. § 95.)

PEPHNLS ( $\Pi \in \phi \nu o s$, Paus.: Пєфvóv, Steph. B.), a town of Laconia, on the eastem coast of the Dlessenian gulf, distant 20 stadia from Thalamae. In front of it was an island of the same name, which Pausanias describes as not larger than a great rock, in which stuod, in the open air, brazen statues of the Dioscuri, a foot high. There was a tradition, that the Diescuri were born in this island. The island is at the mouth of the river Milia, which is the minor Panisus of Strabo (viii. p. 361). In the island, there are two ancient tombs, which are called those of the Bioseori. The Messenians suid that their territories originally extended as far as Pephnus. [MLSSEMIA, p. 345, 2] (H'aus, iii. 26. §§s 2, 3; Gell, Itiner: of tha Jorea, p. 238; Leake, Morea, vol, i. p. 330, Peloponnesiaca, p. 178; Boblaye, Recherches, fre p. 93 ; Curtius, Peloponnesos, vol. ii. pp. 2×3.284.)

I'EPU'ZA ( $\Pi$ '́rouSa), a fown in the western part of I'hrygia, which is memtioned only by late writen. It gave its name to an obseure body of heretics noticed by Rpiphanius (Hacres, xiviii. 14): but they did not exist long, since their tomn was ruined and descried when be wrute. (Cimap. 1hilosto .

## PERAEA.

JERGAMLM.
Hist. Eccl. iv. 8, where it is called Petusa; Aristaen. Comm. in Can. 8, where its name is I'ezusa.) Kiepert (ap. Fradz, Fünf. Inschriften, p. 33) believes that its site may possibly be marked by the ruius found by Arundell (Discoveries in As. Min. i. pp. 101, 127) vear Besh-Shehr and Kalinkefi, in the south of Ushak:
[L. S.]
PERAEA (חepaia), the Dame of several districts lying beyond ( $\pi \dot{\epsilon} \rho a \nu$ ) a river or on the other side of a sea.

1. The district of Palestine lying beyond the Jordan, and more particularly the country between the Jordan on the W., the city of Pella on the N., the city of Philadelphia and Arabia Petraea on the E., and the land of the Moabites on the S. [PALaEstina, p. 532.3
2. ('H $\tau \hat{\omega} \nu$ 'Poठ̀ $\omega \nu \nu \pi \epsilon \rho a i a$, Strab. xiv. pp. 651, 652 ; Pulyb. xvii. 2, 6, 8, xxxi. 25; Liv. xxxii. 33,
 Scylax, p. 38), a portion of the S. coast of Caria, opposite to Rhodes, and subject to it. It commenced at Mt. Phoenix, and extended as far as the frontiers of Lycia. (Strab.l.c.) The peninsula containing Mt. Phoenix was called the Rbodian Cbersonesus. (Plin. Exxi. 2, 20; Diod. v. 60, 62.) For a description of this district, which is very beautiful and fertile, see Vol. I. pp. 519., b, 520, a.
3. (Hepala T T $\downarrow \in \delta i \omega \omega \nu$, Strab. xiii. p. 596), a small district on the coast of Mysia, opposite to Tenedus, and extending from the promoutory Sigeium to Alesandria Troas,

PERAEA. [Comnthus, p. 685, b.]
PERAETHEIS. [Megalopolis, p. 310, s.]
PERCEIANA (Itin. Ant. p. 432), a town of Hispania Baetica, lying S. of Merida. For its coins ste Sestini, p. 107.
[T. H. D.]
 cient town of Mysia, on the IIellespont, between Abydos and Lampsacus, and probsbly on the little river Percotes. (Hum. Il. it. 835, xi. 229 ; Xenoph. Heller. 5. 1. § 23.) Percote continued to exist long after the Trojan War, as it is spoken of by Herodutus (v. 117), Scylax (p. 35), Apollonius Rhodius (i. 932), Arrian (Anab. i. 13), Plioy (v. 32), and Stephanus Byz. (s.v.). Some writers mention it aunong the towas assigned to Themistocles by the king of Persia. (Plut. Them. 30: Athen. i. p. 29.) According to Strabo (xiii. p. 590) its ancient name had been Percope. Mlodern travellers are unanimous in identifying its site with Bergaz or Bergan, a small Tirkish town on the left bank of a small river, situated on a sloping hill in a charming district. (Sibthorpe's Juurnal, in Walpole's Turkey, i. p. 91 : Richter, 1 Yallfahrten, p. 434.) [L.S.].

PERCO'TES (Перк心т ${ }^{\prime}$ ), a small river of Mysia, flusing from Mount Ida into the Hellespont. (Hom. 11. ii. 835.) It is easily identified as the stream flowing in the valley of the modern town of Bergaz. [Comp. Percote.]
[L. S.]
PERDICES, a town in Mauretania Caesariensis, 25 M. P. from Sitifis, perhaps Ras-el-Ouad. (It. Ant. pp. 29, 36 ; Coll. Episc. c. 121.)

PERGA. [Peige.]
PE'RGAMUM. [1LIUM.]
PERGAMUM (пе́рүацод: Eth. Перүанךро́s, Pergamenus), sometimes also called I'ERGAMUS (Ptol. v. 2. § 14, viii. 17. § $10 ;$ Steph. B. s. v.), sn ancient city, in a most beautiful district of Teuthrmaia in Mysia, on the porth of the river Caïcus. Near tho point where Pergamum was situated, two other rivers, the Selinus and Cetius, emptied them-
selves into the Caïcus; the Selinus flowed through the city itself, while the Cetius washed its walls. (Strab. xiii. p. 619; Plin. v. 33 ; Paus, vi. 16. §§ 1 ; Liv, xxxvii, 18.) Its distance from the sea was 120 stadia, but communication with the sea was effected by the navigable river Caïcus. Pergamum, which is first mentioned by Xenophon (Anab. vii. 8. § 8), was origioally a fortress of considerable uatural strength, being situated on the summit of a conical hill, round the foot of which there were at that time no houses. Sabsequently, howerer, a city arose at the foot of the bill, and the latter then became the acropolis. We have no information as to the foundation of the original towa on the hill, but the Pergamenians believed themselves to be the descendants of Arcadians, who had migrated to Asia under the leadership of the Herseleid Telephus (Paus. i. 4. $\S 5$ ) ; they derived the name of their town from Pergamus, a son of Pyrrhus, who was believed to have arrived there with bis inother Andromache, and, after a successful combat with Arius, the ruler of Teuthrania, to have established himself there. (Paus. i. 11. § 2.) Another tradition stated that A-clepius, with a coluny from Epidaurus, proceeded to Pergamum; at all events, the place seems to have been inhabited by many Grreks st the time when Xenophon visited it. Still, however, Pergamum remained a place of not much importance until the time of Lysimachus, one of the generals of Alexander the Great. This Lysimachus chose Pergammn as a place of security for the reception and preservation of his treasures, which amounted to 9000 talents. The care and saperintendence of this treasure was intrusted to Philetaerus of Tium, an eunuch from his infancy, and a person in whom Lysimachus placed the greatest confidence. For a time 1 biletaerus auswered the expectations of Lysimachus, but having been ill-treated by Arsinoë, the wife of his master, he withdrew his allegiance and declared bimself independent, B. C. 283. As Lysimachus was prevented by domestic calamities from puvishing the offender, l'biletaerus remained in undisturbed possession of the town and treasures for twenty years, contriving by dexterous management to maintain peace with his ueighbours. He transunitted his principality to a nephew of the name of Euncues, who increased the territory he had inherited, and even gained a victory over Antiochus, the son of Seleucus, in the neighbourlood of Sardes. After a reigu of twenty-two years, from E. c. 263 to 241 , he was succeeded by his cousio Attalus, who, atter a great victory over the Galatians, assumed the tutle of king, and distinguished himseif by his talents and sound policy. (Strab. xiii. pp. 623, 624; Polyb. sviii. 24; Liv, xxxiii. 21.) He espoosed the interests of Rome against Pbilip of Macedonia, and in conjunction with the Rhodian fleet rendered important services to the Romans, It was mainly this Attalus that amassed the wealth for which his nume became proverbial. He died at an advanced age, int n.c. 197 , and was succeeded by his son Fumenes 11 ., from B. C. 197 to 159 . He continued his friendship with the Romans, and assisted them against Antiochus the Great and I'erseus of Macedonis; atter the defeat of Antiochus, the Fomans rewarded bis services by giving to him all the countries in Asia Minor west of Mount Taurus. Pergamum, the territory of which had litherto not extended beyond the gulfs of Elaea and Adramyttium, now became a large and powerful kingedom. (Sttab. l.c.; Liv. exaviii. 39.) Eumenes 111, was narly killed at
D. Iphi by assassins said to have been hired by Persens: yet at a later puriod he favoured the cause of the Macedonian king, and therehy incurred the ill-will of the Romans. Pergamum was mainly indebted to Eumenes 11. for its embellislument and extension. He was a liberal patron of the arts and sciences ; he decorated the temple of Zeus Nicephorus, which had been built by Attalus outside the city, with walks and plantations, and erected himself many other public buildings; but the greatest monument of his liberality was the great library which he founded, and which yielded only to that of Alexandria in extent and value. (Strab. l.c.; Athen, i. p. 3.) Ile was succeeded by his son Attalus 11.; but the government was carried on by the late king's brother Attalus, surnamed l'hiludelphus, from及. c. 159 to 138 . During this period the Pergamemans again assisted the liomans against the 1'sendo-1'hilip. Attalus also defeated Diegylis, king of the Thacian Caeni, and overthrew Prusias of Bithynia. On his death, his ward and nephew, Attalus 111., surnamed Philometor, undertook the reins of government, from B. C. 138 to 133, and in his death bequeatbed his kingdom to the Romans. Soon after, Aristonicus, a natural son of Eumenes 11 ., revolted and claimed the kingdom of Pergamum for himself; but in B. C. 130 he was vanquished aod taken prisoner, and the kingdom of Perganum hecame a liman province under the name of Asia. (Strab. L.c., siv. p. 646.) The city of Yergammm, however, contiaued to flourish and prosper under the Roman dominion, so that Pliny (l.c.) could still call it " longe clarissimum Asiae l'ergaman;" it remained the centre of jurisdiction for the district, and of commerce, as all the main-ronds of Western Asia converged there. Pergammin was one of the Seven Churches mentioned in the book of Revelations. Under the Byzantine emperors the greatness and prosperity of the city declined; but it still exists under the name of Bergamah, and presents to the visitor numerons roins and extensive renains of its ancient magnificence. A wall facing the south-east of the acropulis, of hewn granite, is at least 100 feet deep, and engrafted intis the rock; above it a course of Jarce substructions forms a spacious area, upon which once rose a temple unrivalled in sublimity of situation, being visible fron the rast plain and the Arroan sea. The ruins of this temple slow that it was built in the noblest style. Besides this there atre ruins of an ancient temple of Aesculapius, which, like the Nicephorion, was outside the city (Tac. Aun. iii. 63; Jaus. v. 13. §2); of a royal palace, whith was surrounded by a wall, and connected with the Caïcus by an aqueduct; of a prytancum, a theatre, a gymuasium, a stadium, an amphitheatre, and other public buildiugs. All these remains attest the numatal splendour of the ancient city, and all travellers xpak with admiration of their stuprendons grathes. The unmerous coins which we phans of l'erganum attest that Olympia were colubrated there; a vate foumd there represents a torch-1.we on hirseback; and I'lmy ( $\mathrm{x}, 25$ ) relates that pubsic cock-tiehts took plac there every year. 1'regranmon was celebrated for its manufature of ohntments (Athem, xv. p. tis9), pettery (Plin, xasr. 4if), and parchument, which derives its name (charta 1'erganema) from the city. The library of Pergamum, wheh is said to have convisted of no less than 200,000 volumes, wat ziven by Antumy to Cleppatra (Comp. Spon and Wheler, Voy. 1. p. 260, \&o.; Choiscul-Goutber, loyage P'ittoresque, ii. p. 25, \&...;

Arundell, Seven Churches, p. 281, \&c.; 1)illaway, Constentinople Anc. and Modern, p. 303; 1.eake, Asia Minor, p. 266; Fellows, Asia Miner; p. 34, \&c.; Richter, Wall fahrten, p. 488, \&e., E Eckhel, Doctr. Num. vol. iv., p. 445 ; A. G. Cupelle, Commentat. de Regilns et Antiquit. Pergamenis, Amstclodani, 1842,8vo.)
[1.. s.]

conn of perganles in mysta.
 tress in the Pieric hollow, by which Xerxes passed in his march, leaving Mlt. I'angacum on his right. It is identified with Právista, where the lower narit time ridge forms a junction with Pangaeum, and separates the Pieric valley from the plain of Philippi. (Leake, Northern Grecce, vol. iii. p.178.) [E. B.J.]

PE'RGAMUS (It $\rho \gamma \neq \mu o s$ ), a town of Crete, to which a mythical origio was ascribed. According to Virgil it was founded by Acneas (Aen. iii. 133), accordiag to Velleius l'aterculus (i. 1) by Agametnnon, and according to Servins by the Trojan prisoners belonging to the fleet of Agamemnon (ad Virg. Aen. l. c.). Lycurgus, the Spartan legislator, was said to have died at this place, aud his tomb was shown there in the time of Aristoxenus. (Plut. Dygo. 32.) It is said by Servius (l. c.) to have been hear Cyionia, and is mentioned by Pliny (iv. 12. s. 20) ut connection with Cydonia. Consequently it minst have been situated in tbe western part of the island, and is placed by Pashley at Plataniá. (Travels in Crete, vol. ii. p. 23.) Scylax say* (p. 18, IJuls.) that the Dictynnaeum stood in the territory of I'ergamus.

PERGA'NTIUM (Перүávtiov: Eth. Пepyávтios, Steph. B. s. v.), a city of the Ligures. It is the small island named Bregonson, on the south coast if France. It is separated by a narrow channcl from a point on the inainland which is turned towards. Mesr, one of the Stoechades or Isles dHières. [G. I..]

PERGE or PERGA (Пep $\eta$ : Eth. Пep $\alpha a i o s$ ), an ancient and important city of Pamphylia, between the rivers Catarrhactes and Cestrus, at a distance of 60 stadia from the month of the latter. (Sitrab. xiv. p. 667 ; Plin. v. 26 ; Pomp. Mel. i. J4: P'tul. v. 5. §.) It was renowned for the worship of Ar temis, whose temple stond on a hill outside the tuwn, and in whose honour ammal festivals were celebrated. (Strab. l. c.; Callim. Mymn. in Dian, 187 ; Scylax, p. 39; Dionys. I'er. 854.) The coins of Perge represent both the goddess and her tomple. Alexander the Great occupied l'erge with a part of his army afier quitting l'haselis, between which two towns the road is described as long and diffieult (Arrian, Anub. i. 26; comp, Polyh. v. 72, Asii. 25 ;

coin of metice.

Liv, xxxviii. 37.) We learn from the Acts of the Apostles (xiv. 24, 25) that Paul and Barnabas preached the gospel at Perge. (Comp. Acts, xiii. 13.) In the ecclesiastical notices and in Ilierocles (p. 679) Perge appears as the metropolis of Jamphylia. (Comp. Steph. B. s. v.; Eckhel, Doctr. Num. i. 3, p. 12.) There are considerable ruins of Perge abont 16 miles to the north-east of Adalia, at a place now called Eski-Kalesi. (Comp, Leake, Asia Minor, p. 132; Texier, Descript. de IAsie Min., where the rnins are figured in 19 plates; Fellows, Asia Minor, p. 190, \&.c.)
[L. S.]
PERIMUU'LA (Пєрípovлa, Ptol. vii. 2. §5), the name of a town of some commercial importance on the W. side of the Sinus Magnus (or gulf of Siam), on 3 tongue of land anciently called the Aures Chersonesus, and now known by the name of Malacca. Lasseo places it in lat. $7^{\circ} \mathrm{N}$. In its immediate neighbonrhood was a small bay or indentation of the coast, which was called the Sinus Perimnlicus

[V.]

## PERIMU'LICUS SINUS. [PERAMLla.]

PERINTHUS ( $\hat{\eta}$ Пépu®os, Ptol. iii. 11. § 6, viii. 11. § 7 ; Xenoph. Anab. vii. 2. § 8: Eth. Mepiveros), a great and flourishing town of Thrace, situated on the Propontis. It lay 22 miles W. of Selymbria, on a small peninsula (Plin. iv. 18) of the bay which bears its name, and was built like an amphitheatre, on the declivity of a bill (Diod. xri. 76.) It was originally a Samian colooy (Marcian, p. 29 ; Plut. Qu. Gr. 56), and, according to Syncellus ( p . 238), was founded about 13. c. 599. Panofka, however ( p .22 ), makes it contemporary with Sumothrace, that is abont B. c. 1000 . It was particularly renowned for its obstinate defence against Philip of Macedon (Diod. xvi. 74-77; Plut. Phoe. 14). At that time it appears to hare been a more important and flowisbing town even than Byzantium; aod being both a harbour and a point at which several maia roads met, it was the seat of an extensive commerce (Procop, de Aed. iv. 9). This circumstance explains the reason why so many of its coins are still extant; from which we learn that large and celebrated festivals were held bere (Nionnet, i. p. 399415 ; Eckhel, Doctr. Num, vol. iv, p. 445 ; Morell. Spec. Rei Num, tab. xiii. 143). According to Tzetzes (Chil. iii. 812), it bore at an early period the name of Mygdonia; and at a later one, but not before the fourth ceatury of our era, it assumed the name of Heracleia; which we find sometimes used alone, and sometimes with the additions H. Thraciae aad I. Perinthus. (Procop. l, e. and B. Vand. i. 12; Zosim. i. 62; Justin, svi. 3 ; Eutrop. is. 15 ; Amm. Marc. xxii. 2 ; Itin. Ant. pp. 175, 176, 323 ; Jurn. de Regn. Succ. p. $51, \& \mathrm{cc}$. On the variations in its name, see Tzschucke, ad Melam, ii. 2, vol. iii. pt. ii. p. 102, seq.) Justinian restored the old imperial palace, and the aquedncts of the city. (Procop. l.c.) It is nuw called Eski Fregli, and still con-

cons of pebistucs.
voL II
tains some ancient ruins and inscriptions. (See Clarke's Travels, viii. p. 122, sqq.) [T. H. D.]

PERISADIES (Пeptaaঠvés, Перtad̃óss), an I!lyrian people, near the silver mines of Damastium, whose name seems to be corrupt. (Strab, vii. p. 326; Kramer and Groskurd, ad loc.)

PERITUR, a place in Lower Pannonia (Itin. IIieros. p. 562), probably the same as the one mentioned in the Peuting. Table under the name of Piretis, and in the Antoaine Itinerary (p. 266) under that of l'yrri or Pyrram, and situated on the road from Petovio to Siscia. (See Wesseling, ad It. Hieros. l. c.)

PERIZZI'TES. [PALAESTINA, p. 529.]
PERMESSUS. [Boeotia, p. 413, s.]
PERNE ( $\Pi \in \rho \nu \eta$ ), a small island off the coast of Ionia, which, doring an eartbquake, became united with the territory of Miletus. (Plin. ii. 91.) There was also a town io Thrace of this name, which is mentioned only by Steph. B. (s.v.) [L. S.]

PERNICLACUM, or PERNACUM in the Table, in North Gallia, is placed on a road from Bagacum (Bavai) to Aduatuca (Tongern). The road passed from Bagacam to Geminiacum (Gemblow). From Geminiacam to Perniciacum is xii. in the Antun. Itin., and xiiii. in the Table; and from Perniciacum to Aduatuca is xiv. in the Itin. and xvi. in the Table. The road is generally straight, bnt there is no place which we can identify as the site of Perniciacum; and the geographers do not agree on any position.
[G. L.]
PERORSI (חé $\rho o \rho \sigma o t, ~ \Pi u ́ p o \rho \sigma o t, ~ P t o l . ~ i v . ~ 6 . ~ § § ~$ 16,17 ; Polyb.ap. Plin. v. 1. s.8, vi. 35), a people of Libya, subdued by Suetouius Paullinus, who inhabited a few fertile spots spread over the long extent of maritime country between the Canarii, who dwelt opposite to the Fortunate Islands, and the Pharusii, who ocenpied the banks of the Senegal. (Leake, London Geog. Journ. rol. ii. p. 17.)
[E. B. J.]
PERPERE'NA ( $\Pi \in \rho \pi \in \rho \eta \eta^{\nu}$ ) , a place in Mysia, on the south-east of Adramyttium, in the neighbourbood of which there were copper mioes and good vineyards. It was said by sonie to be the place in which Thucydides had died. (Strab. xiii. p. 607; Plin. v. 32 ; Steph. B. s.v. Пap $\begin{gathered}\text { ápw } \\ \text {, from whom }\end{gathered}$ we learn that some called the place I'erine; while Ptol. v. 2. § I6, calls it Perpere or Permere; Galen, Пєpl è̉ $\chi$ vuias, p. 358 ; comp. Sestini, p. 75.) Sonse, without sufficient reason, regard Perperena as identical with Theodosiupolis, mentioned by Hierocles (p. 661).

PERSABO'RA (П $\eta \rho \sigma a \delta \omega \rho \alpha$, Zosim. iii. 17), a very strong place in Mesopotamia, on the W. bank of the Euphrates, to which the emperor Julian catne in his march across that country. Zosimus, who gives a detailed account of its siege, states that it was io size and importance second only to Ctesiphon. Ammianas, speaking of the same war, calls the place l'irisabora (xxiv. c. 2); aod Lilanius Sopl. mentions a city of the same name as the then ruling king of Persia, evidently supposing that it derived its name from Sapor (or Shahpir). (Orat. Fun. p. 315.) Forbiger has conjectured that it is represented by the present $A u b a r$, and that it was situated near the part of the river Euphrates wLence the canal Nahr-sures flows, and no great distauce from the Sipphara of Ptolemy (v. I8, § 7). [V.]

PERSE'POLIS (Iepoéroals, Diod. xvii. 70 ; P'tol. vi. 4. § 4: Curt. v. 4. 6; Пepoainoגus, Strah. xv. 729 : Eth. Пepaєпо入i( $\quad \eta \mathrm{s})$, the capital of l'ersis at the time of the invasion of Alexaoder, and the seat of the chief palaces of the kings of l'ersia. It was situated at the opening of an extensive plain (now called Mardusht), and near the junction of two streans, the Araxes (Bendamir) and tbe Medus (Pulwain). The ruins, which are still very extensive, bear the local name of the Chel Minur, or Forty Columns. According to Diodorus the city was originally surrounded by a triple wall of great streneth and heauty (xvii. 71). Strabo states that it wa, after Susa, the richest city of the l'ersians, and that it contaioed a palace of great beauty ( $x v$. p. 729), and adds that Alesander burnt this building to avenge the Greeks for the similar injuries which had been inflicted on thern by the Persians (xv. p. 730). Arrian simply states that Alexander burnt the royal palace, contrary to the entresty of I'armenion, who wished him to spare this magnificent building, bot does not mention the name of Persepolis. (Anab. iii. 18.) Curtius, who probably drew his account from the many extant notices of Alexander's expedition by different officers who had aceonyanied him, has fully described the disgraceful lurruing of the city and palace at Persepolis by the Groek monarch and his drunken companions. He adds that, as it was chiefly built of cedar, the fire spread rapidly far and wide.

Great light bas been thrown upon the monuments which still remain at Persepolis by the researches of Niebuhr and Ker P'orter, and still more so by the interpretation of the cunciform inseriptions by Colonel Rawlinson and I'rof. Lassen. From the result of their inquiries, it seems doultful whether any portion of the present ruins ascend to so bigh a period as that of the founder of the Persian monarchy, Cyrus. The principal huildings are doubtless due to Dareius the sor of Hystaspes, and to Xerxes. The palace and city of Cyrus was at Pasarysada, while that of the later monarchs was at Perso pulis. (Rawlinson, Journ. (ff Roy. As. Soc. vol. x: Lassen, in Erseh and Gruber's Encycl. s.v.; Fergussum, Palaces of Xineveh and Persopolis Restored, Lond. 1851.) It has been a matter of some dontht how far Persepolis itself ever was the ancient site of the capital; and many writers have supposed that it was only the high place of the Persian numarchy where the great palaces and temples were gromped tugetber. On the whole, it seems most probible that the rock on which the ruins are now men wa- the place where the palaces and termples wore placed, and that the city was extended at its feot alone the circumjaceat plain. Subsequeat to the time of Alexander, Persepulis is not meationed in histary except in the second book of the Maccabees, where it is stated that Antioclens Epiphanes made a fruitless attempt to plander the temples. (2 Maccab. ix. 1.) In the later times of the Muharmedan rule, the fortsens of Istackr, which was about 4 miles from the ruins, seens to have occupied the place of Perseputio; bence the opinion of some writers, that Istakkr itsolf was part of the ancient eity. (Niebuhr, ii. p. 121: Chardin, Joyages, viii. p. 245; Kur Porter, vol. i. P. 576 ; Ouseley, Travels, ii. p. 222.)

 ii. p. $7 \mathrm{~N}, \mathrm{xv}, \mathrm{p} .727$; Ptol. vi. 3. § 1. 4. § 1, $\mu \nu \chi$ טis, Ptol. vi. 19. § ! ; そ̀ катà Miporas शá^aəra, Strab.

Mare Persicum, Plin. vi. 13. s. 16), the great gulf which, extending in a direction nearly NW. and SF., separated the provinces of Susiana and Persis, and the western portion of Caruania from the opposite shores of Aralia Felix. Tbere are great differences and great errors in the accounts which the ancients have left of this gulf: nur iadeed are the statements of the same anthor always consistent the one with the other. Tbus some writers gave to it the shape of the buman head, of which the narrow opening towards the SE. formed the neck (Mela, iii. 8; Plin. vi. 24. 8. 28.) Strabo in one place states that, at the entrance, it was only a day's sail acrosa (xv. p. 727), and in another (xvi. p. 765) that from Harmuza the opposite Arabian shore of Mace was visible, in which Ammianus ( xxiii. 6) agrees with him. He appears to have thought that the Persian Gulf was little inferior in size to the Euxine sea (l.c.), and reckons that it was abont 20,000 stadia in length. (Cf. Agathem. i. 3.) He placed it also, according to a certain system of parallelism, due S . of the Caspian (ii. p. 121, cf. also xi. p. 519). The earliest mention of the Persian Gulf would appear to be that of Hecalaeus (Steph. B.s. n. Kip ); but a doubt has been thrown upon this passage, as some MISS, read тóvzos instead of кó^лоs.
[V.]
PERALis ( $\grave{\eta}$ Mepais, Aeschyl. Pers. $60 ;$ Herod. iii. 19; Plin. vi. 23. s. 25 ; Armm. Marc. 8 xiii. 6, \&c.; $\dot{\eta}$ Пєрбкки, Herod. iv. 39 : Eth. Пépons, P'ersa), the province of Persis, which must be considered as the centre of the ancient realm of Persia, and the district from which the arms of the Pensians spread over all the neighbouring nations, was bounded on the N. hy Media and part of the chain of the Parachoathras M.; on the W. by Susiana, which is separated from Persis by the small strearn Arosis or Oroatis; on the S. by the Persian Gulf, and on the E. by the desert waste of Carmania. In the earlier periods of history this province was altogether unknown, and it was not till the wars of Alexander and of bis successors that the Greeks formed any real conception of the powition and character of the land, from which their ancient and most furmidable enemies took their name. The whole province was very mountainons, with few extended plains; it possessed, bewever, several ralleys of great beanty and fertility, as those for instance in the neighbourhood of Persepolis (Nerah. xv. p. $727 ;$ Arrian, Ind. c. $40 ;$ Amm. Marc. xxiii. 6; Chardia, Joy. iii. p. 255); the coast-line appears to bave been, as it is now, sandy and hot, and uvinllabitable, owing to the poison-bearing winds. (Plin. sii. 20.) The principal mountain chains bore the names of l'arachoathras (Elleend) and Ochus (perbaps Nakhilu), and were, in fact, prolongations to the sea of the still higher ranges of Modin. It was watered by no great river, but a number of smaller streaus are mentioned, sorne of them doubtless little more than mantain torrents. The chief of these were the Araxes (Bend-amir,) the Medus (Pulucin), and the Cyrus (Kuir), in the more inland part of the country ; and along the coast, the Bagrada, Padargus, Heratemis, Rhogonis, Oroatis, \&c. (Plin. vi. 23. s. 26 ; Alrian, Ind. c. 39 ; Anm. Msrc. xxiii. 6; Strab. xvi. p. $72 \%, 8 \mathrm{c}$ ) The principal cities of Persis were, l'asabgada, its earliest capital, and the sito of the tomb of its first monarch, Cyrus; l'easemolis, the far-faned seat of the palaces and temples of Darcins the son of Hystaspes, and his successors; (ianas, one of the residences of tha Persian kings; Tacees, and Aspasana.

The l'ersue were properly the native inhabitants
of this small district; though in later times the name was applied generally to the subjects of the great king, whose empire extended, under Dareius the son of Hystaspes, from Judia to the Mediterranean, In the earliest times of the Old Testament they are not mentioned by aame as a distinct people, and when, in the later days of the captivity, their name occurs, they must be takea as the iuhabitants of the great empire abuve noticed (Ezel. xxxviii. 5 ; Esth. i. 3-18; Ezra, iv. 5; 1 Maccab. i. 1, \&c.), and not simply of the limited district of Persis. According to Herodetus, the ancient people were divided into three leading classes, warriors, linsbandmen, and nomades. In the first class, the Pasargadae, Maraphii, and Maspii, were the must important subdivisions. The Achaemenidae, from whem their well-knewn line of kings descended, was one of the fanilies of the Pasargadae. The tribes of husbandmen bore the names of Panthialaei, Derusiaei and Germanii; those of the nomades were called, Dai, Mardi, Dropici and Sugartii. (Herod, i. 125) It is clear from this accomnt that Herodotus is describing what was the state of the Persae but a little while before his own times, and that his view embraces a territory far mere extensive than that of the small province of Persis. We must suppose, from his netice of the nemade tribes, that he extended the Persian race over a considerable portion of what is now called Khorásan; indeed, ever much of the country which at the present day ferms the realun of Persia. In still later times, other tribes or subdivisions are met with, as the Paraetaceni, Messabatae, Stabaei, Suzsei, Hippophagi, \&c. \&c. Herodotus states further that the most ancient name of the people was Artaei (Herod. vii. 6!), a form which modern philology has slown to be in close cennection with that of the Arii, the earliest title of their inmediate aeighbours, the Medes. Both alike are derived from the old Zend and Sanscrit Arya, signifying a people of neble desceat; a name still preserved is the modern I'rak (Ariaka). (Nuller, Journ. Asiat. iii. p. 299 ; Lassen, Jnd. Alterth. ii. p. 7.) There can be ne doubt that the name Persae is itself of Iodian origin, the earliest form in which it is found on the cuneitorm inscriptions beiog Parasa. (Lassen, Alt-Pers. Keil-Inser. p. 60.)

The Persian people seem to have been in all times noted for the pride and haughtiness of their language (Aeschyl. Pers. 795; Amm. Marc. xxiii. 6); but, is spite of this hahit of boasting, in their earlier listory, under Cyrus and his immediate successars, tbey appear to have made excellent soldiers. Herodetus describes fully the arms and accontrements of the foot-soldiers, archers, and lancers of the army of Xerxes (vii. 61), on which description the well-known sculptures at Persepolis afford a still living cemmentary. (Cf, alse Strab. xv. p. 734 ; Ien, Cyrop. vi. 3. §31.) Their cavalry also was celebrated (Herod. l. c. ix. 79,81 ; Xen. Cyrup. vi. 4. §1). Strabe, whe for the most part confines the name of Persae to the iahahitants of Persis, has fally described sone of the manners and customs of the people. On the subject of their religions worship Herodotus and Strabo are not at one, and each writer gives separate and unconnected details. The general conclusion to be drawn is that, in the remotest ages, the Porsians were pure fire-worshippers, and that by degrees they adopted what became in later times a characteristic of their religious system, the Dualistic arrangement of two separate principles of geod and evil, Ilormuzd and

Ahriman. (Strab. xv. p. $7 \geq 7-736$; Ilerud. i. 33, 133; Nen. Cyrop. i. 22.) Many of their ancient religious customs bave contianed to the present day; the fire-worshippers of India still contending that they are the lineal descendants of the ancient Persians. The language of the ancient people was strictly Indo-Germanic, and was nearly consected with the classical Sanscrit: the earliest specimens of it are the cuneiform inscriptions at Murghib, - the site of Pasargada, and the place where Cyrus was buried,-and these of Dareius and Xerxes at I'ersepolis and Behistan, which have been deciphered by Celonel Rawlinson and Professor Lassea. (Rawlinson, Jourr. As. Soc. vel. x.; Lassen, Zeitschrift f. Morgeal. vi. 1; Hitzig, Grabschrift d. Darius, Zurich, 1847 ; Benfey, Pers. Keil-Inscrift, Leipzig, 1847.)

The government of Persia was a rigid monarchy. Their kings lived apart from their subjects in weil secnred palaces (Esth. iv. 2, 6), and rejoiced in great parks ( $\pi \alpha \alpha^{\prime} \dot{0} \epsilon เ \sigma 01$ ), well stocked with game and animals for the clase (Cyrop. i. 3. § 14, viii. 1. § 38, Anab. i. 2. § 7; Curt. vili. 1. § 11), and passed (in later times, when their empire was most widely extended) their summer at Ecbatana, their spring at Susa, and their winter at Bahylon. (Nelien. i. 1; Dan. viii. 2; Esth. i. 2, 5; Xen. Anob. iii. 5. § 15, Cyrop. viii. 6. § 22.) Like other eastern monarchs, the Persian kings possessed a well appeinted harem, many curious details of which we gather from the history of Esther (cf. also Cart. iii. § 3; Athen. xiiu. P. 557; Plut. Artax. c. 43); and they were accustomed to receive from their subjects direct aderation ( $\pi \rho o \sigma \kappa v ́ v \eta \sigma \Delta s$ ), as the presumed descend:nnts or representatives of Hermuzd. (Plut. Themist. c. 7 ; Curt. vi. 6. § 2, viii. 5. § 6.) Their local government was a pure despotism; but in some extraordinary cases a sort of privy council was called of the seven chief princes, who stood around the royal throne, like the Amshaspands round the throne of Hormuzd. (Herod. vii. 8 , viii. $6 \ddot{7}$; Esth. i. 14, 19, vii. 14.) Whatever document hat once passed the king and had been sealed by the royal signet was deemed irrevocable. (Esth. i. 19, viii. 8; Dan. vi. 9. I6; cf. also Chardin, Yoy. iii. 418.) Over the individual provinces-which in the time of Dareius were said to bave been twenty in number (Her. iii. 89), but were subsequently much mere numerous (Esth. i. 1), probably trom the subdivision of the larger ones - were placed satrap:, whose business it was to superintend them, to cellect the revenues, and to attend to the progress of agriculture. (Her. iii. 89, 97 ; Joseph. Ant. xi. 3, \&c.) Between the satraps and the kimgs was a well organised system of conriers, who were called ăryapot orảoтávơaı (Plut. Fort. Alex. vii. p. 294 , ed. Reiske), who conveyed their despatches from station to station on horses, and had the power, wben nccessary, to press horses, boats, and even men into their service. As this service was very irksome and oppressive, the word àryapev́euv came to mean compulsion or detention under other circunstauces. (Joseph. Ant. xiii. 2. \& 3 ; Esth. iii. 13,15 , viii. 10, 14 ; Bentley's Menunder, p. 56.)

The history of the Persian empire need not he repeated here, as it is given under the names of the respective kings is the Dict. of Biogn. [V.]

I'ERTU'SA, a tewn of the llergetes in Hispanis Tarraconensis, which still exists nnder the old name on the Alcanoulre. (Itin. Ant. p. 391.) [T.H.D.]

PEHU'SJA ( $є p o v \sigma i a:$ Eth. 1'crusiaus: Perugia), one of the most important and powerful cities of

Etruria, situated nearly on the easten frontier of that country, on a lofty lill on the right bank of the Tibur, and overlonking the lake of Thrasymene which noss derises from it the name of layw di Perugia. It closely adpoins the frontiers of I matria. and hone the thadition reportel by Sorvius, that it was originally in Unbrian city, inbalited by the tribe callod Sursinates, is at lewst a very probable one (Sers ad Aon x. 201.) The same author has, however, preserved to us another tratition. which averibes the foumbation of lerusia to a bero named Auletes, the brother of Otsus, the reputed founder of Mantua. (Ib. x. 198.) Justin's assertion that it was of A hasam origin (xx. 1) may be safely rejocted as a mere fable; but whatever historical value may be attached to the statements of Servius, it seems problable that Pernsia, in common with the other chief places in the same part of Etruria, was in the first instance an Umbrian city, and subsepurently passed into the hands of tbe Etruscans, unies whom it rove to be a powerful and important city. and one of the chief members of the Etruscan conitideracy. It is nut till в. C. 310 , when the R.mans: bad carried their arms beyond the Ciminian forrest, that the name of l'erusia is heard of in history: but we are told that at that period it was ome of the must powerful cities of Etruria. (Liv. ix. 37.) The three neighbouring cities of Perusia, Cortona, and Arretium, un that oecasion united in concluding a peace with Rome for thirty years (Lis. l. c.: Ihod. sx. 35): but they seem to have broken it the very nest year, and shared in the great defeat of the Etruvans in general at the Vadimumian lake. This was followed by another defeat under the walls of Terusia itself, which compelled that city to sue for peace; but the statement that it surreudered at discretion, and was necupied with a Roman garrison, is one of thne obvious perversions of the truth that orcur so frequently in the limnan annals. (Liv, ix. 40.) When we next meet with the name of L'erusia, it is still as an independent and powerful state, which in B. c. 295, in conjunction with Clusium, was able fo renew the war with Rame; and thougb their conlaned forces wree defeated by Cn. Fulvius, the P'ernsians touk the lead in renewing the contest the uest year. on thus occasion they were again dofrated with heary loss by Fabius, 4500 of their tromps stan, and above 1700 taken prisoners. ( $1 \mathrm{~d} . x$. 30, 31.) In consuquence of this disaster they were compelled bifore the close of the year to sue for [ntuce, and, by the payment of a large suns of money, whainal a trwe for forty years, r. c. 294. (Id. x. 37.) At this time Livy still calls the three cities of Ternsia. Vol-miii, and Arretium (all of which made face at the same time) the three most powerful st.tes and chief cities of Etruria. (Id. l.c.)
W. find no other mention of Pernsia as an indepmodent state: and we have no explanation of the rinumustateen or terms minier which it ultimately bestur a dependency of Kome. But during the Somel Pume War it igures anong the athied cities which theo fo:med so important a part of the Roman pwwer: its colorts were serving in her armies (Liv. xxiii. 17), and towards the end of the contest it was one of the " papnth" of Ftruri.s which cane forwand with alacrity to furnish supplies to the fleet of Scipin. Its contributime consisted of corn, and timther for shiphuitding. (Id. xxviii. 45.) With this exception, we meet with no other mention of J'erusia till near the close of the republiman perind, when it bure so conspicuous a part in the cind war between

Octavian and L. Antonius, in B. C. 41, as to give fo that contest the name of Bellum J'erusinum. (Suct. Aug. 9 : Tac. Ann. v. 1; Oros. vi. 18.) It was shortly after the ontbreak of hostilities on that occasion that L. Antonius, tinding himself pressed on all sides by tbree armies under Agrippa, Salvidienus, and Octavian himselt, threw himself into Perusia, trusting in the great natural strength of the city to enable him to hold out till the antival of his generals, Ventidius and Asinius Pollio, to his relief. But whether from disaffection or incapacity, these officers failed in consing to his support, and Octavinn surrounded the whole hill on which the eity stands with strong lines of circumvallation, so as to cut him off from all supplies, especially on the side of the Tiber, on which Antonius had mainly relied. Famine soou made itself felt in the city; the siege was protracted through the winter, and Ventidins was fulled in an attempt to compel Octavian to raise it, and drew off his forces without success. L. Antonius now made a desperate attempt to break through the enemy's lines, but was repulsed with great slaughter, and found himself at length compelled to capitulate. His own life was spared, as were those of most of the Roman nohles who had accotnpanied him; but the chief citizens of l'erusia itself were put to death, the city given up to plunder, and an accidental conflagration liaving been spread by the wind, ended by consuming the whole city. (Appian, B. C. v. 3249; Jinn Cass. xlviii. 14; Vell. Pat. ii. 74; Flor. iv. 5 ; Suet. Aug. 14.96.) A story told by several writers of Octavian having sacrificed 300 of the prisnners at an altar consecrated to the memory of Caesar, is in all probability a fiction, or at least an exaggeration. (Dion Cass, l.c.; Suet. Aug. 15; Senec. de Clenn. i. 11 ; Merivale's Romas Empire, vol. iii. p. 227.)
l'erusia was raised from its ashes again by Angustus, who settled a fresh body of citizens there, and the city assumed in consequence the sumame of Augusta l'erusia, which we find it bearing in inscriptions ; but it did not obtain the rank or title of a colony; and its territory was confined to the district witbin a mile of the walls. (Dion Cass. xlviii. 14: Orell. Inscr: 93-95, 608.) Notwitbstanding this restriction, it appears to bave speedily risch again into a flourishing municipal town. It is noticed by strabo as one of the chief towns in the interior of Etruria, and its municipal consideration is atteated by numerous inscriptions. (Strab. v. p. 226; Plin. iii. 5. s. 8: Ptol, iii. 1. § 48 ; Tab. Peut.: Orell. Inscr. 2531, 3739, 4038.) From one of these we learn that it acquired under the Foman Empire the title of Colonia Vibia; but the origin of this is unknown, though it is probable that it was derived from tho emperor Trebonianus Gallus, who appears to lane bentowed sone conspicuous benefits on the place. (Vermiglioli, Iscriz. Perug. pp. 379-400; Zumpt, de Colun. p. 436.) The name of Perasia is not again mentioned in history till after the fall of the Loman Empire, but its natural strength of position rendered it a place of importance in the tronbled times that followed; and it figures conspicuously in the tiothic wars, when it is called by I'rocopius a strong fontress and the chief city of Etruria. It wals taken by Behsarius in A. D. 537 , and occupied with a strong garrison: in 547 it was besieged by Tutila, but beld out ngainst his arms for nearly tro years, and did not sumender till after Belisarius had imitted ltaly. It was again recovered by Narses in 552. (l'rocop. B. G' i. $16,1 \overline{\text { i }}$, iii. $6,25,35$, iv. 33.)

It is still mentioned by Paulus Diaconus (Hist. Lang. ii. 16) as one of the chief cities of Tuscia nonder the Lombards, and in the middle ages bccame an indejendent republic. Perugiu still continues a considerable city, with 15,000 iolabitants, and is the capital of one of the provinces of the Roman states.

The modern city of Perugia retaina considerable vestiges of its ancient grandeur. The most important of these are the remains of the walls, which agree in character with those of Chiusi and Toda, being composed of long rectangular blocks of travertive, of very regular masoury, wholly different from the rader and more massive walls of Cortona and Volterra It is a subject of much doubt whetber these walls belong to the Etruscan city, or are of later and Roman times. The ancient gates, two of which still exist, must in all probability he referred to the latter period. The most striking of these is that now known as the Arco $d$ Augusto, from the inscription "Angusta Perusia" over the arch: this prohably dates from the restoration of the city under Augustus, though some writers would assign it to a much more remote period. Another gate, known as the Porta Mfarzia, also retains its anciont arch; while several others, though more or less modernised, are certainly of ancieat construction as high as the imposts. It is thus certain that the ancient city was not more extensive than the modern one; but, like that, it occopied only the summit of the hill, which is of very considerable elevation, and sends down its roots and underfalls on the one side towards the Tiber, on the other towards the lake of Thrasymede. Hence the lines of circumvallation drawn roand the foot of the hill by Octavian enclosed a space of 56 stadia, or 7 Roman miles (Appian, B. C. v. 33). though the circuit of the city itself did not exceed 2 miles.

The chief remains of the ancient Etruscan city are the sepalchres without the walls, many of which lave been explored, and one-the family tomb of the Volumnii-has been preserved in precisely the same state as when first discorered. From the inscriptions, some of which are bilingual, we learn that the family uare was writted in Etruscan "Velimnas," which is rendered in Latin by Volumnins. Other sepulchres appear to have belonged to the families whose names assumed the Latin forms, Axia, Caesia, Petronia, Vettia, and Vibia. Another of these tombs is remarkable for the careful construction and regular masoary of its arclued vanlt, on which is engraved an Etrascan inscription of considerahle length. But a far more inportant monument of that people is an inscription now preserved in the museum at Perngia, which extends to forty-six lines in length, and is the only considerable fragment of the langnage which has been preserved to as. [Etruria, p. 858.] Numerous sarcophagi, urns, vases, and other relics from the various tombs, are preserved in the same museum, as well as many iescriptions of the Roman period. (Vermiglioli, Iscrizioni Perugine, 2 vals, 4 tn., Perugia, 1834; Id. Il Sepolcro dei Volunni, 4to., Perngia, 1841 ; Dennis's Etruria, vol. ii. pp. 458 489.)

We learn from ancient authors that Juno was regarded as the tatelary deity of I'erusia till after the burning of the city in n. c. 40 , when the temple of Valcan being the only edifice that escaped the conflagration, that deity was adopted by the surviving citizens as their peculiar patron. (Dion Cass. slviii. 14: Appian. B. C. v. 49.)
[ $\mathrm{F} . \mathrm{H} . \mathrm{B}$. ]
PESLA or P'ESCLA (Not. Imp. c. 28 , vol. i.
p. 75 , ed. Bücking), is probably the horder-fortress in the N. of the Thebaid, which Ptolemy (iv. 5. § 71)
 right bank of the Nile, and was the quarters of a German company (turma) of cavalry (D'Anville, Mém. sur l'Egypte, p. 190).
[W. B. D.]
PESSINUs, PESINUS ( Пє $\sigma \sigma \omega$ Doús, Пєสtyoûs: Eth. חeबбavoivtios), the principal town of the Tolistoboii, in the west of Galatia, sitnated on the southern slope of Mount Dindymns or Agdistis, near the left bank of the river Sangarios, fron: whose sources it was about 15 miles distant. (Pans, i. 4. § 5 ; Strab. siii. p. 567.) It was 16 miles south of Germa, on the road from Ancyra to Aworium. (It. Aut. pp. 201, 202.) It was the greatest commercial town in tbose parts, and was believed to have derived its oame from the image of its great patron divinity, which was said to have fallen ( $\pi \epsilon \sigma \epsilon i v)$ from heaven. (Herodian, i. 11; Anm. Marc, xxii. 9.) Pessinus owes its greatest celebrity to the goddess Rhea or Cybele, whom the natives called Agdistis, and to whom an immessely rich temple was dedicated. Her priests were anciently the rulers of the place; but in later times their honours and powers were greatly reduced. (Strab. l. c., x. p. 469 ; Diod. Sic. iii. 58 , \&c.) Her temple contaived ber image, which, according to some, was of stone (Liv. xxix. 10, 11), or, according to others, of wood, and was believed to have fallen from heaven. (Apollod. iii. 11 ; Amm, Marc. l. c.) The fame of the goddess appears to have extended all over the ancient world; and in E. C. 204, in accordance with a command of the Sibylline books, the Romavs sent a special embassy to Peesinus to fetch her statue, it being believed that the safety of Rome depended on its removal to Italy. (Liv. l. c.; Strab. xii. p. 567.) The statue was set up in the temple of Victory, on the Palatine. The goddess, however, continued nevertheless to be worshipled at Pessinas; and the Galli, her priests, sent a deputation to Manlins when he was encamped on the banks of the Sangarins. (Liv. xxxviii. 18; Polyb. xx. 4.) At a still later period, the emperor Julian worshipped the goddess in her ancient temple. (Anm. Marc. l.c.) The kings of Pergamnm adorned the sanctuary with a magnificent temple, and porticoes of white marble, and sorrounded it with a benutiful grove. Under the Roman dominion the town of l'essinus began to decay, although in the new division of the empire under Constantine it was made the capital of the province Galatia Salntaris. (Hierocl. p. 697.) After the sixth century the town is no langer mentioned in history. Considerable ruins of Pessinns, especially a well-preserved theatre, exist at a distance of 9 or 10 miles to the south-east of Seeri Hissar, where they were first disenvered by Texier. (Descript, de l'Asie Mineure). They extend over three hills, sepqrated by valleys or ravines. The marble seats of the theatre are nearly entire, but the scena is entirely destroyed; the whole district is covered with blocks of marble, shafts of columns, and other fragments, showing that the place must have been one of anusual magnificence. (Hamilton, Researches, i. p. 438, foll.; Leake, Asia Minor, p. 82 , foll., who seenis to be mistaken in loukine for Pessinus on the right bank of the Sangmius. [L. S.]

PETA'LIAE, incorrectly called I'etalia (IIeтa入ia) hy Strabo (x. p. 444), small islands off the coast of Euboca, at the entrance of the Euripus, now Fetalius. (Plin. iv. 12. s. 23; Leake, Northern Greece, rol. ii. p. 423.)

PETAVO'NICM (Hetaúviov, Ptul. ii. fi. § 35), a town of the Superatii in 1lispania Tarraconebsis, SE, of Asturica. (Itin. Ant. p. 423.) [T: H. D.]
 divos, Petelinus: Strongoli), an ancient city of Brattiom, situated ubout 12 miles N. of Crutona, and 3 miles from the E . coast of the peninsula. According to the Greek traditions it was a very ancient city, founded by Philoctetes after the Trojan War. (Strab. vi. p. 254 ; Virg. Aen. iii. 401 ; Serv. ad loc.) This legend prohably indicates that it was really a town of the Chones, an Oenotrian tribe; as the foundation of Chone, in the same neighbourhood, was al=o ascribed to Philoctetes. It was only a small place (Virg. l. c.), but in a strong situation. We have no account of its receiving a Greek colony, nor is its name ever montioned among tbe Greek cities of this part of Italy; but, like so many of the Oenotrian towns, became to a great extent HelJenised or imbued with Greek culture and manners. It was undoubtedly for a long time subject to Crotona, and comprised witbin the territory of that rity; aed probably for this reason, its name is Dever mentioned daring the early history of Magua Graecia. But after the irruption of the Lucanians, it fell iato the bands of that people, by whom it was strongly fortified, and became one of their mont important strongholds. (Stral. l. c.) It is apparently on this account, that Strabo calls it "the metropolis of the Lucanimss," though it cerfainly was not iocluded in Lucania as the term was understood in his day. Petelia first became conspicuons in history during the Sccond Punic War, when its citizens remained faitbful to the Roman alliance, notwithstanding the general defection of the Bruttians around then, n. C. 216 . They were in consequence besieged by the Bruttians as well as by a Carthaginian force under Himilco: but though abandoned to their fate by the Roman senate, to whom they had in vain sued for assistance, they made a desperate resistance; and it was not till after a siege of several months, in which they had suffered the utmost extremities of famine, that they were at length compelled to surrender. (Liv, xxiii. 20, 30; Polyb. rii. 1: Appian, Annib. 29 ; Frontin. Strat. iv. 5. § 18 ; Val. Max. vi. 6, ext. § 2; Sil. Ital. xii. 431.) The few inhabitants who escaped, were after the close of the war restored by the Rumans to their native town (Appian, l. c.), and were doubtless treated with especial farour; so that letelia rose agaik to a prosperous condition, and in the days of Sirabo was one of the few cities of Bruttium that was still tolerably flourishing and populous. (Strab. vi. p. 254.) We learn frum inscriptions that it still cuntinued to be a flourishing mumicipal town under the Roman Ernpire (Orell. Inser. 137, 3678,3939 : Nommsen, Inscr. R. N. $\mathrm{pp} .5,6$ ) : it is mentioned by all the geogra$\mathrm{p}^{\text {phers }}$ and its name is still found in the Tabula, which places it on the road from Thurii to Crotooa. (Mel. ii. 4. § 8 : Plin. iii. 10. s. 15 ; Ptol. iii. 1. $\$ 75$; Tab. Pcat.) But we are unable to trace its histery further: its identification with Strongoli is, however, satisfactonily made out by the inseriptions which have been found in the latter city. Strongali is an episcopal see, with alont 7 oroo inhabitants: its situation on a lofty and rugged hill, commanding the plain of the Niuto (Neaethus), corresponds with the accounts of Petelia, which is represented as occujying a position of great natumal strength. There are no ruitus of the ancient city, bat numerous
minor objects of antiquity have been found on the spot, besides the inscriptions above referred to.

The existence of a second town of the name of Petelia in Lucania, which has been admitted by several writers, rests mainly on the passage of Strabo where he calls Petclia the metropolis of Lucania; but he is certainly there speaking of the well-known city of the name, which was undoubtedly in Bruttium. The inscriptions published by Antonini, to prove that there was a town of this name in the mountains near Velia, are in all probability spurious (Mommsen, I. R. N. App, p. 2), though they have been adoptel, and his authority followed by Romanelli and Cramer. (Romanelli, vol. i. p. 348 ; Cramer's Italy, vol. ii. p. 367.)

The Petelini Montes ( $\tau$ à חetmiiva öp $\eta$ ), mentioned by Plutarch (Crass. 11), to wbich Spartacus retired after his defeat by Crassus, are evidently the rugged gronp of the Apennines S . of the Crathis, betreen Petelia and Consentia. [E. H. B.]

PETEON (Hérewv ; Eth. Пeтeஸ́vcos), a town of B reotia, mentioned by Homer (Il. ii. 500), was situated near the road from Thebes to Anthedon, (Strab. ix. p. 410.) Strabo contradicts himself in the course of the same page (l.c.), in one passago placing Peteon in the Thehais, and in another in the Haliartia, (Comp. Plut. Narr. Am. 4 ; Plin, iv. 7. s. 12 ; Steph. B. s.v.) The pasition of Peteon is uncertain. Leake supposes it may be represented by some ancient remains at the southern extremity of the lake Paralimni. (Northern Greece, rol. ii. p. 320.)

PETINESCA, in the coontry of the Helvetii, is placed in the Itins. between Aventicum (Avenches) and Sulodurum (Solothurn); at the distance of siii. in the Anton. Itim. from Aventicum ano xiiii. in the Tahle; and at the distance of $x$. from Salodurum in both the Itineraries. Some geographers have placed Petinesca at a place named Buren; but the distanco does not agree with that given by the Itins. between Petinesca and Salodurum, as D'Anville observes, who also says that the position of Bienne (Biel) corresponds to the ancient numbers, if we take them to indicate Gallic leagues. Cluver also placed Petinescs at Biel.
[G. L.]

## PETITARUS. [Achelous.]

PETOV1O ( Пotubiov, or Maravioy, Ptol. ii. 15. § 4: Pettau), also called Poetorio (Itin. Ant. p. 262 ; and in inscriptions ap. Orelli, n. 3592), Patavio, and Petaviona, was ao important town in Upper Pannonia, oo the river Dravus and the frontiens of Noricum. In inscriptions it is called a lioman colony, and bears the surname of Ulpia; whence it may be inferred that it received Roman colonists from either Trajan or Hadrian, who probably also extended the place. Its inportance is sufficiently attested hy the lact that it was the station of the Legio xui. Gemioa, and that ao imperial palace existed outside its walls. (Tac. Hist. iii. 1; Amm. Marc siv. 37 ; It. Hieros. p. 561 ; Geogr. Rav. iv. 19.) The modera town of Pettan is situated on the left bank of the Drave; and as coins, inscriptions, and other ancient remains are found only on the opposite side, it is probable that the ancient Petovio was situated on the right bank opposite to the modern Pettau. (Comp. K. Mayer, Versuch über Seyermärkische Alterthumer, Griz, 1782, 4to.; Muchar. Noricums. i. p. 364.)
[1. S.]
PETRA (Пє $\tau \rho \alpha$ ), "rock," the name of several towns. 1. In Furope. 1. Petre Pertesa, in Umbria. [Interelsa.]
2. (Métpa : Eth. Пєтpìvos, Petrims : Petralia), a city of Sicily, mentioned both by Pliny and Ptolemy among the inland towns of the island. Cicero also notices the Petrini among the communities that suffered from the exactions of Verres (Cic. Verr, iii. 39 ; Plin. iii. 8. s. 14 ; Ptol. iii. 4. § 14); and their name is mentioned at an earlier period hy Diodorus as submitting to the Romans during the First Punic War. (Dicd. xxiii. 18; Exc. H. p. 505.) The name is written Petraea by Silins Italicus (xiv. 248), and the Petrinae of the Antonine Itinerary is in all probability the same place. (Itin. Ant. p. 96.) Though so often mentioned by ancient authors, they afford very little clue to its position; but it is probable that the name is retained by the modern Petralia, a small town about 8 miles W. of Gangi, supposed to represent the ancient Engyum, [Engyum.] Ptolemy indeed places these two towns near one another, though he erroneously transters them both to the neighbourhood of Syracuse, which is wholly at variance with the mention of Petra in Diodorua among the towns subject to the Carthaginians as late as B. c. 254. (Cluver. Sicil. p. 36i.)
[E. H. B.]
3. A fortress of Macedonia, among the mountains beyond Libethra, the possession of which was disputed by the Thessalian Perrhaebi and the Macedonian kings. (Liv. xxxix. 26, xliv. 32.) It commanded a pass which led to Pythinm in Thessaly, by the back of Olympus. By this road L. Aemilius Paullus was enabled to throw a detachment on the rear of the Macedonian army which was encamped on the Enipeus, after the forces of Perseus had been overthrown at the pass of Petra by P. Scipio Nasica, who had been sent against it with the consul's eldest son Q. Fabius Maximus. (Liv, xiv, 41.) Petra was situated on a great insuhated rock naturally separated from the adjoining mountain at the pass which leads from Elasona or Sirvia into the maritime plains of Macedonia. Here, which is at once the least difficult and most direct of the routes across the Olympene barrier, or the frontier between Macedodia and Thessaly, exactly on the Zygos, are the ruins of Petra. (Leake, Northern Greece, vol. iii. pp. 337, 430.) [E. B. J.]
4. A fortress of the Maedi, in Thrace. (Liv. x]. 22.)
5. A town in Illyricum, situated upon a hill upon the coast, which had only a moderately good harbour. (Caes. B. C. iii. 42.)
6. A place in the Corinthia. [Vol. 1. p. 685, a.]
7. A place in the immediate neighbourhood of Elis. [Vol. 1. p. 821, a.]

PETRA. II. In Asia. 1. (Пéтpa, Ptol. v. 17. §5, viii. 20. § 19 ; Пétpa or Пétpai, Suid. s. v. TevéOlios ; the Sela of the Old Testament, 2 Kings,rxiv. 7; Isaiuh, xvi. 1: respecting its various names see Robinson, Biblical Researches, vol. ii. Notes and Ill. p. 653), the chief town of Arabia Petraea, once the capital of the Idumaeans and subsequently of the Nabataei, now I'rady Musa. [Nabataei.]

Petra was situated in the eastern part of Arabia Petraea, in the district called under the Christian emperors of Rome Palaestina Tertia (I'et. Rom. Itin. p. 721, Wessel.; Malala, Chronogr. xvi. p. 400 , ed. Bunn). According to the division of the ancieot gengraphers, it lay in the northern district, Gebalene; whilst the modern ones place it in the sontbern portion; Esh-Sherah, the Seir, or moun-tain-land, of the Old Testament (Genesis, xxxyi, 8).

It was seated between the Dead Sea and the Elanitic gulf; being, according to Diodorus Siculus (xix. 98), 300 stadia S. of the former, whilst the Tab. Pent. places it 98 Roman miles N. of the latter. Its site is a wilderness overtopped by Mount Hor, and diversified by cliffs, ravines, plaios, and Wadys, or watered valleys, for the most part but ill cultisated. Strabo (xvi. p. 779) describes it as seated in a plain surrounded with rocks, hemmed in with barren and streamless deserts, though the plain itself is well watcred. Pliny's description (vi, 32), which states the extent of the plain at rather less than 2 miles, agrees very nearly with that of Strabo, and both are confirmed by the reports of modern travellers. " lt is an area in the bnsom of a mountain, swelling into mounds, and intersected witb gallies." (lrby and Mangles, ch. viii.) It must not, however, be understood to be completely hemmed in with rocks. Towarda the N . and S . the view is open; and from the eastern part of the valley the summit of Mount Hor is seen over the western cliffs. (Rohinson, ii. p. 528.) According to Pliny (l.e.) Petra was a place of great resort for travellers.

Petra was subdued by A. Cornelins Palma, a lieutenant of Trajan's (Dion Cass. 1xviii. I4), and remained under the Roman dominion a considerable time, as we hear of the province of Arabia being enlarged by Septimius Severus A. D. 195 (id. Ixxv, 1,2 ; Eutrop, viii, 18). It must have been during this period that thoze temples and mausoleums were made, the remains of which still arrest the attention of the traveller; fur thongb the predominant style of the architecture is Egyptian, it is mixed with florid and over-loaded Roman-Greek specimens, which clearly indicate their origin. (Robinson, ii. p. 532.)

The valley of Wudy Musa, which leads to the town, is abont 150 feet broad at its entrance, and is encircled with cliffs of red sandstone, which gradually increase from a beight of 40 or 50 feet to 200 or 250 fcet. Their height has been greatly exaggerated, having been estimated by some travellers at 700 and even 1000 feet (lrby and Mangles, ch. viii.; Stephens, ii. p. 70; see Robinson, ii. p. 517 and note). The valley gradually contracts, till at one spot it becomes only about 12 feet broad, and is so overlapped by the cliffs that the light of day is almost excluded. The ravine or Sik of Wady Musa extends, with many wiudings, for a good English mile. It forms the priscipal, and was anciently the only avenue to Petra, the entrance being broken through the wall. (Diod. Sic. ii. 48, xix. 97 ; Robinson, ii. p. 516 ; Laborde, p. 55.) This valley contains a wonderful necropolis hewn in the rocks. The tombs, which adjoin or surmount oue ancther, exhibit now a front with six Ionic columns, now with four slender pyramids, and by their mixture of Greek, Roman, and Oriental architecture remind the spectator of the remains which are found in the valley of Jehoshaphat and in other parts of Palestine. The further side of the ravine is spanned by a bold arch, perhaps a triumphal one, with finely-sculptured niches evidently intended for statues. This, like the other remains of this extraordinary spot, is ascribed by the natives either to the Pharachs or to the Jins or evil genii. Along the bottom of the valley, in which it almost vanishes, winds the stream mentioned by Strabo and Pliny, the small but charming Wady Musa. In ancient times its bed seems to have been paved, as many traces still show. Its stream was spanned by frequent bridges, ita sides strengthened with stone walls or quays, and numerous small canals derived
from it supplied the inbabitants with water. But now its banks are overspread with hyacinths, eleanders, and other flowers and slaruhs, and overshadowed by lofty trees.

Opposite to where the Sik temminates, in a second ravine-like but broader valley, another momument, the finest one at Petra, and perlaps in all Syria, strikes the eye of the traveller. This is the Khuzneh,-well preserved, considering its age and site, and still exhibiting its delicate chiselled work and all the freshness and beauty of its colouring. It has two rows of six colunns over one another, with statues between, with capitals and sculptured priliments, the upper one of which is divided by a hittle round temple crowned with an urn. The Arabs imagine that the urn contains a treasure, -El Khuzweh, whence the name,-wbich they ascribeto Pharaoh (Robinson, ii.p. 519). The interior does ant correspond with the magnificence of the fayrade, boing a phain lifty hall, with a chamber adjoining each of its three sides. It was either a mausoleam, or, more probably, a temple.

From this spot the cliffs on both sides the Wady are pierced with numernus excarations, the chanbers of wbich are usually small, though the facoules are occasionally of some size and magnificence; all, however, so various tbat scarce two are exactly alike. After a gentle carre the Wady ex1amik, and here on its left side lies the theatre, entirely hewn out of the rock. Its diameter at the buttom is 120 fect (Irby and Mangles, p. 428), and it has thirty-three, or, according to another account, thirty-eight, rows of seats, capable of accommodating at least 3000 spectators. Strangely enougl, it is entirely surrounded with tombs. One of these is inscribed with the name of $Q$. Praefectus Florentinus (Laborle, P. 59), probably the governor of Arabia Petraea under Hadrian or Antoninus lias. Another has a Greek inscription, not yet deciphered. A striking effect is produced by the bright and lively tints of the variegated stone, out of which springs the wild fig and tanarisk, while creeping plats overspread tbe walls, and thorns and brambles cover the pedestals and cornices (Isaiah, xxxiv. 13). Travellers are angreed that these excarations were nostly tombs, though some think they may originally hare scrved as dwellings. A few were, doubtless, temples for the worship of Basl, but subsequently coruverted into Christian churches.
Proceeding down the stream, at about 150 paces from the theatre, the cliffs begin to expand, and soon varish ultogether, to give place to a small phain, about a mile square, surrounded with gentle eminences. The brook, which now turns to the W., traverses the middle of this plain till it reaches a ledge of sandstone cliffs, at a distance of rather more than a mile. This was the site of Petra, and is still covered with heaps of hewn stones, traces of paved streets, and foundations of houses. There are remains of several larger and stmaller temples, of a bridge, of at triumphal a.ch of dezenerate architecture, and of the walls of a graat public buildiug - Kusr Faron, or the palace of Pharaoh.
(On an eminence sonth of this is a single column (Zub Faron, i. C. hasta virilis Pharaonis). connected with the fuundation-walls of a temple whose pillars lie scattered around in broken fragments. Laborde ( p .59 ) thinks that the Acropolis occupied an ismlated hill on the W: At the NW. extretuity of the elifl's is the Deir, or cloister, hewn in the rock. A ravine, like the Sik, with many
windings, leads to it, and the approach is partly by ${ }^{4}$ path 5 or 6 feet broad, with steps cut in the rock with inexpressible labour. Its fuccade is larger than that of the Khuzneh; but, as in that building, the interior does not answer to it, consisting of a large square chamber, with a recess resembling the niche for the altar in Greek ecclesiastical architecture, and bearing evident signs of having been converted froun a heathen into a Christian temple. The destruction of Petra, so frequeutly prophesied in Scripture, was st length wronght by the Mabometans. From that time it remsined unvisited, except by some crusading kings of Jerusalem ; and perhaps by the single European traveller, Thetmar, at the beginning of tbe 13 th century. It was discovered by Burckhardt, whose account of it still continues to be the best. (Rubinson, ii. p. 527.) Laborde's work is chiefly valuable for the engravings. See also Irby and Mangles, Travels, ch.viii ; Robinson, Bibl.Researches, vol. ii. p. 512 , seq.
[T. H. D.]
2. A town in the land of the Lazi in Colchis, founded by Joannes Tzibus, a general of Justimian, in order to keep the Lazi in subjection. It wass situated upon a rock near the coast, and was very strongly fortified. (Procol. B. Pers. ii. 15, 17.) it was taken by Chosroes in A. D. 541 , and its subsequent siege by the Romans is described by Gilboun as one of the most remarkable actions of the age. The first siege was relieved; but it was again attacked by the Romans, and was at length taken by assault after a long protracted resistance, A. 1 . 551. It was then destroyed by the Romans, and from that time disappears from history. Its ruins, which are now called Oudjenur, are described by Dubois. (Procop. B. Pers. ii. 17, 20, 30, B. Goth. iv. 11, 12; Gilbbon, c. slii. vol. v. p. 201, ed. Suith; Dubois, Voyage autour du Caucase, vol. iii. p. 86, seq.)
3. A very strong fortress in Sogdiana, held by Arimazes when Alexander attacked it. (Curt. vii. 11; comp. Arrian, iv. 19; Strab, si. p. 517.) It is pribably the modern Kohiten, near the pass of Kolugha or Derbend. [See Dict. of Biogr. Vol. 1. 1. 286.] PETRAS MAJOR (Hexpas í $\mu$ é $\gamma a s$, Scyl. p. $45 ;$ Ptol iv. $5 . ~ § 3$; Stadiasm. § 33), a harhour of Marmarica, a day's sail from Plyni Portus, and the same as the large harbour which Strabo (xvii. p. 838) places near Ardanis Prom., and describes as lying opposite to Chersonesus of Crete, at a distance of 3000 stadia. It agrees in position with Port Bardiah, where there are springs to the W. of Marsa Suloum.
[E. B. J.]
PETRAS M1NOR (Пéтpas $\delta \mu$ ukpós, Scyl. l.c.: Ptol. iv. 5. § 2: Stadiasm. § 39), a harbonr of Marmarica, half a day's sail from Antipyrgus. It has been identified with Magharab-el-Heabes, where there are a great number of catacombs remarkable for their Graeco-Aegyptian style. These curions excavations, of which plans are given in l'acho (l'oyage dans la Marmaripue, Planches, pl. v.), are to be identified according to that traveller (p. 49), witl) the sinuous caverns of Bombaka (Bónвara), resembling the Aegyptian "hypogaca," which the Greeks called "Syringes," mentioned by Synesius (Ep. 104); but Barth (IVanderungen, p. 512) has shown that the description of the bishop of I'tolemais cannot be applied to these eatacombs and their locality. A coin with the epigraph ME-PA, which 1'ellerin referred to this port in Mlarmarica is by Eckhel (iv. 116) assigned to a Cretau mint
[1. IS. J.]

PETRIA'NA, a fortress in the N of Britannia Romana, between the Wall and the river 1 rthing, where the Ala Petriana was quartered. Camden (p. 1020) identifics it with Old Penrith; but Horsley (Brit. Rom. p. 107) and others fix it, with more probability, at Cambeck Fort or Castle-steeds. (Not. Imp.) It is called Banna by the Geogr. Rar. (Horsley, p. 498.)
[T.H.D.]
Petrina. [Petra, No. 2.]
PETROCORII (İтроко́loc, Ptol. ii. 7. § 12), a Gallic people, whom Ptolemy places in Aquitania. He names the chief city Vesunna, which is Perigord. Caesar mentions them (vii. 75) as sending a contingent of 5000 men to aid in raising the siege of Alesia; this is all that he says about them. The passage in Pliny (iv. 19. s. 33) in which be describes the position of the Petrocorii is doubtful: "Cadurci, Nitiobriges (a correction, see Nitiobriges), Tarneque amne discreti a Tolosanis Petrocorii., This passage makes the Tarnis (Tarn) the bnundary between the territory of Tolosa (Toulouse) and the I'etrocorii, which is not true, for the Cadurci were between the Petmeorii and the territory of Toulouse. Scaliger proposed to write the passage thus: "Cadurci, Nitiobriges, Tarne amni discreti a Tolosanis ; Petrocarii." But this is not true, for the Nitiobriges did not extend to the Tarn. Strabo (iv. pp. 190,191) mentions the Petrocorii among the people between the Garonne and the Loire, and as near the Nitiobriges, Cadurci, Lemovices, and Arverni. He says that there are iron mines in the country. The Petrocorii occupied the diocese of Perigueus and Sarlat (D'Ancille). Besides Vesumna their territory contained Corterate, Trajectus, Diolindum, and some other small places.
[G. L.]
PETRONANTALLAI, in Gallia, is placed by the Antonioe Itinerary on a road which runs from Caroeotinum through Rotomagus (Rozen) to Lutetia (Paris). It also appears on a road frum Caesaromagus (Beauvais) to Briva Isarae or Pontoise, on the Oise, a branch of the Seine. In the Table the name is written Petrumriaco. The site is uncertain. The nume bears some resemblance to that of Magni; but the site of Magni does not accurately correspond to the distances in the Itineraries.
[G. L.]
Petronil vicus, in Gallia Narbonensis. Honoré Bouche gives an inscription found at Pertuis, on the right bank of the Druentia (Durance), about 4 leagues north of Aquae Sextiae ( $A i x$ ), in which inscription the place is called "vicus C. Petronii ad ripam Druentiae." (D'Anville, Notice, \&r.) [G. L.]

PETROSACA. [Mantivela, p. 262, b.]
PETUARIA. [PARisl.]
PEUCE (Пєúk $\eta$, Ptol. iii. 10. § 2 ; Strab. vii. p. 305), an island of Moesia Inferior, formed by the two southernmost mouths of the Dasabe. It derived its name from the abundance of pine-trees which grew upon it. (Eratosth. in Schol Apollons. iv. 310.) It was of a triangular shape (Apolion. 7.e.), and as large as Rhodes. By Martial (vii. 84. 3) it is called a Getic island; by Valerius Flaccus (viii, 217) a Sarmatian one. It bas been identified with the modern island of Piczina or St. George, between Badabag and Ismail; lut we must recollect that these parts were but little known to the ancients, and that in the lapse of time the mouths of the Dannbe have undergone great alterations. (Plin. iv. 12. s. 24; Mela, ii. 7; Avien. Descr. Orb. 440; Dion. Perieg. 401; Claud. IV Cons. Honor. 630, \&e.)
[1. H. D.]
'ELCELAO'TIS (Hevke入aw̄tis, Artian, Anab.
iv, 22, Indic. 4; Пєиколӓітts, Strab. xv. p. 698 ; Plin. vi. 17. s. 21: Eth. Pencolaitae, Plin.; Mevкaגєis, Dionys. Per. 1142), a district of India on the NW. froutier, along the Cophen or Cabul river, in the direction of the Panjiib. The actual name of the town, which was probably Peucela, is nowhere found, but the form of the word lcaves no doubt that it is, like the majority of the names which have been preserved by Arrian, of genuine Sanserit or Indian origin. Strabo and Pliny both call the city itself Pencolaitis. Arrian in one place gives the name to a district (iv. 22), without mentioning that of the capital or chicf town ; in another he calls the capital Peucelaotis, or, according to the Florentine MIS., Peucela. (Iudic. c. 1.) There can be little doubt that this is the same place or district mentioned in Ptolemy under the form of Proclais (vii. 1. § 44), and in the Periplus Mar. Erythr. (c. 47). Buth are connected with the Gandarae, - the Sanscrit Gandaras, - and both are alike placed in NW. India. Prof. Wilson has shown that the Greek name is derived from the Sanserit Pushkara or Pyshkula, the Pushkalavati of the Hindus, which was placed by them in the country of the Gandharas, the Gandaritis of Strabo, and which is still represented by the modern Pekhely or Pakholi, in the neighbourhood of Pesháwour. (Wilson, Ariana, pp. 183, 184.)
[V.]
PEUCE'TII (Пеvкétiol), a people of Southern Italy, inhabiting the southern part of Apulia. This name was that by which they were known to the Greeks, but the Romans called them Poemicule, which, according to Strabo, was the national appellation employed also by themselves. (Strab. vi. Pp. 277,282.) Their national affinities and origin, as well as the geographical details of the country occupied by them, will be found in the article Apulla. [E.H. B.]

PEUCl'Nl (Пєuкivol, Ptol. iii. 5. § 19, 10. § 9 ; Strab. vii. p. 305, ser.; Plin. iv. 14. s. 28), a branch of the Bastarnae, inhabiting the island of Peuce. Tacitus (Germ. 46) and Jornandes (Goth. 16) write the name Peuceni, which also appears in several MSS. of Strabo; whilst Ammianus Marcellinus (xxii. 8. § 43) calls them Peuci, and Zosimus (i. 42) Пєи̂кац.
[T.H.D.]
Phabiranum (థastpayov), a place in the country of the Cbanci Ninores, that is, the district between the Albis and Visurgis (Ptol, ii. 11. § 27), is generally identified with the modern city of Bremen; though some, with more prohability, look for its site at Bremervörde. (Wilhelm, Germanien, p. 162.)
[L. S.]
PHA'CIUM (Фáktoy: Eth. Факाєús), a town of Thessaly, in the district Pelasgiotis, placed by Leake a little below the right bank of the Peneins at Alifaka, but by Kiepert upon the left bank. Brasidas marched through Pbacium in e.c. 424. (Thuc. iv. 78.) The town was laid waste by Philip, B. c. 198 (Liv. xxxii. 13), and was oceupied by the Roman practor Baebius in the war with Antiochus, B. c. 191. (Liv. xxxvi. 13.) Pbacium is probably the same place as Phacus, which Polybius (xxxi. 25) calls a town of Macedonia (Comp. Steph. B. 3. v.; Leake, Northern Greece, vol. iv. p. 493.)

PHACUSSA (Plin. iv. 12. s. 23 ; Фако仑िन $\alpha$, , pl., Steph. B. s. v.), an island in the Aegacan sea, one of the Sporades, now Fecussa.

[^20]or Vindelicia，in the southern bank nf the Danube is mentioned only by Ptolemy（ii．12．§ 4）．［L．S．］

PHAENO（\＄awé，Euscb．Onomast．s．v．фıvâv ； фaıvá，Hierocl．p．723），furmerly a city of Idumaca， and afterwards a village of Arabia P＇etraca，between Petra and Zoar，containing copper mines，where con－ demned criminals worked．It was identitied with Punon，one of the stations of the lsraelites in their wanderiugs．（Numb．xxxiii．42；see Reland，Pa－ laestina，p．951；Wesseling，ad Ilierocl．l．c．）

PHAESTUS．1．（中aıatós：Eth．中aiatios），a town in the S．of Cre＇e，distant 60 stadia from Gortyna， and 20 from the sea．（Strab，x．p． 479 ；Plio． iv．12．s．20．）It was said to have derived its name from an eponymous hero Phaestus，a son of Her－ cules，who migrated from Sicyon to Crete．（Paus． ii．6．§7；Steph．B．s．v．；Eustath．ad Hom．l．c．） According to others it was founded by Minos．（1）ind． v． 78 ；Strab．l．c．）It is mentioned by Homer（ $I l$ ． ii．648），and was evidently one of the most ancient places in the island．It was destroyed by the Gor－ lyuians，who took possession of its territory．（Strab． l．c．）Its port was Matalum，from which it was distant 40 stadia，though it was only 20 from the coant．（Sitrab．l．c．）We also learn from Strabo that Epimenides was a native of Phaestus．The in－ habitants were celebrated for their sharp and witty sayings．（Athen．vi．P． 261 ，e．）Phaestus is men－ tioned also by Scylax，p．18；Polyb，iv． 55.

Stephanus B．（s，v．Фaiatós）mentions in the territory of Phaestus a place called Lisses，which he identifies with a rock in the Odyssey（iii．293）， where in our editions it is not used as a proper name， but as an adjective，－入ıб市，＂stnouth．＂Strabo （l．c．）mentions a place Olysses or Olysse in the
 but this name is evidently corrnpt；and instead of it we ought probably to read Lisses．This place must ant be confoonded with Lissus，which was situated minch more to the W．（Kramer，od Strab．l．＇c．）

> foIN OF PHAESTUS.

2．A town of Thessaly in the district Pelasgiotis， a little to the right of the l＇eneins．It was taken by the laman practor Brebins in e．c． 191. （Liv．xaxvi．13．）

3．A town of the Lacri Ozolae in the interior， with a port called the port of Apollo Plasestius． （Plin，iv，3．s．4．）Leake places I＇harestus at I＇it－ hari，where are the ruins of a fortress of no great c＇stent，an！the port of Apollo near C．A nell romuithis． （Leake，Diorthern Grace，vol，ii．p．621．）

4．The later name of Plorixa in Truphyla in Elis． ［Pimixa．］

FHLAGRES（фáypns．Ilecat．ap．Stcph．B．s．v．； Herod．vii．112；Thuc，ii． 99 ：Scyl．p． 27 ：Strab． vii．p．331．Fr．33），a fortress in the Pieric hollow， and the first place alter the passuge of the Strymon． It is identified with the post station of Orfaná，on the great roud from（ircece to Constantinople，where Greck coins have been ofter found，and，umong
other small productions of Hellenic art，oval sling bullets of lead，or the＂glandes＂of which Lacan （vii．512）speaks in his description of the battle of Pharsalia．These are generally inscribed with Greek names in characters of the best times，or with some emblem，such as a thanderbolt．（Leake，Northern Greec6，vol．iii．p．176；Clarke，Travels，vol．viii． p．58．）
［E．B．J．］
PHAlA（ $\Phi$ aía，Stadiasm．§ 43 ；$\Phi 6 i a$, Ptol．iv． 5. § 2），a harbour of Mannarica，the name of which Olshausen（Phwenizische Ortsnamen，in Rhein．Mus． 1852, p． 324 ）connects with a Phoenician original． Barth（Reise，p．505）has identified it with a small basy upon the coast，a little to the $\mathbf{N}$ ．of Hady Temmineh．
［E．B．J．］
PHALA＇CHTHIA（ $\Phi a \lambda a \chi \theta i a$ ），a town of Thes－ saly in the district Thessaliotis．（Ptol．iii． 13. § 45．）

PHALACRA（\＄a入árpa），a promontory of Moant Ida，in Mysia，of which the exact position is un－ known．（Eustath，ad Hom．11．viii．47；Schol． ad Nicand．Alexiph．40；Tzetz．ad Lycoph．40， 1170．）Stephanus Byz．，who mentions it onder tbe name Phalacrae，states that all barren and ste－ rile mountains were called Phalacra．
［L．S．］

## Phalacrine．［Falacrinum．］

PhALACRUM．［Concyra，p．669，b．］
PHALAE＇SEAE（\＄a入a， town of Areadia，in the district Maleatis on the road from Megalopolis to Sparta， 20 stadia from the Hermaeum towards Belbina．Leake originally placed it near Gardhili，but subsequently a little to the eastward of Bura，where Gell remarked some Hel－ lenic remains among the ruins of the Bureika Ka． lyiviu．（Paus．viii．35．§ 3；Steph．B．s．v．；Leake， Morea，vol．ii．p． 298 ；Peloponnesiaco，p．237．）

PHALANNA（фá入ayva：Eth．Фa入ayvaios），a town of the Perrbaebi in Thessaly，situated on the left bank of the Peneius，SW．of Gomnus．Strabo says（ix．p．440）that the Homeric Orthe becama the acropolis of Phalanaa；hat in the lists of Pliny （iv，9，s．16）Orthe and Pbalanns occur as two distinct towns．Phalanna was said to hare derived its name from a danghter of Tyro．（Steph．B．s．v．） It was written Phalannus in Ephorus，and was called Hippia by Hecataeus．（Steph．B．）Pha－ lanna is meationed in the war between the Romans and Persens，8．C．171．（Liv．xlii．54，65．）Phan－ lanna probably stood at Kiaradjoli，where nre the remains of an ancient city upon a bill above the village．（Leake，Northern Greece，vol．iii．p．379， vol．iv．p．298．）

PHALANTHUM（фd́入avөov：Eth．фa入áveros），s town and mountain of Arcadia，in the district Orcho－ menia，near Methydrium．（Paus．viii．35．§9；Steph． B．s．v．；Leake，Peloponnesiaca，p．240．）

PHALARA．［LAMLA．］
I＇HALARLS．［Borotia，p．412，b．］
PHALASANNA（тà фa入á⿱apya：Eth．фa入a－ adipvos），a town of Crete，sitnated on the NII．side of the island，a little S ．of the promontory Cimarus or Coryons，described by Dicaearcbos as having a closed－up port and a temple of Artemis called Dic－ tyuna Strabo says that Phalasarna was 60 stadia from lolyrrhenia，of which it was the port－town； and Scylax observes that it is a day＇s sail across From Lacedaemon to the promontory of Crete，on which is I＇halasanin，being the first city to the west of the island．（Strab，x．pp．474，479；Scylax，pp． 17，18；Dicaearch．Descrip．Groec． 119 ；steph．B． s．v．；Plin．iv．12．s．20．）The Cydonians had at
one time taken possession of Phalasarna，hut were compelled by the Romans to give it up．（Polyb． $x$ xiii．15．）

There are considerable remains of the walls of Phalasarna．They exist in a greater or less degree of preservation，from its nortbern side，where it seems to have reached the sea，to its south－western point， cutting off the acropolis and the city along with it as a small promontory．There are other remains， the most curions of which is an enormous chair on the SW．side of the city，cut ont of the solid rock； the height of the arms above the seat is 2 feet 11 inches，and its other dimensions are in proportion． It was no doubt dedicated to some deity，probably to Artemis．Near this chair tbere are a number of tombs，hewn in the solid rock，nearly 30 in number． （Pashley，Travels in Crete，vol．ii．p．62，seq．）

PHALE＇RUM．［ATTICA，pp．304，305．］
PHALORLA（Liv．；$\Phi a \lambda \dot{\rho} p \eta, \Phi \propto \lambda \alpha ́ \rho \in i a$, Steph．B． s．e．：Eth．Фa入copev́s，Фa入apelivis），a town of His－ tiseotis in Thessaly，apparently between Tricca and the Macedonian frontier．Leake places it in one of the valleys which intersect the mountains to the northward of Trikkala，either at Skliatina or at Ardhaim，（Liv．sxxii．15，xxxvi．13，xxxix． 25 ； Leake，Northern Greece，vol．iv．pp．523，529．）

PHALYCUM（Фá入vкov），a town of Megaris mentioned by Theophrastus（Hist．Pl．ii．8），is clearly the same place as the Alycnm（＂A入vко⿱）of Plutarch，who relates that it derived its name from a son of Sciron，who was buried there．（Thes．32．） It perhaps stood at the entrance of the Scironian pass，where Dodwell（vol．ii．p．179）noticed some ancient vestiges，which be erroneously supposed to be thase of Tripodiscus．［Triponisces．］

PHANA，a town in Aetolia．［PAEANIA．］
PHANAE．［CHos，p．609．］
PHANAGO＇RLA（Фavaropia，Strab．xi．p． 494 ；
 ap．Steph．B．s．v．；Strab．xi．p． 495 ；Scymn．Ch． 891：Arrian，ap．Eustath，ad Dionys．Per．306， 549；Фauvajóp7，Dionys．Per．552；comp．Priscian， 565：Avien．753；фavarópa，Steph．B．s．v．Tav－ рккฑ่；фаvaүópov пó̀ts，Scylax，p． 31 ；Anonym． Periph，P．Eux．p．2；Phanagorus，Amm．Marc． xxii．8；Фavaroupis，Procop．B．Goth．iv．5：Eth．
 s．v．），a Greek city on the Asiatic side of the Cim－ merian Busporus，fomnded by the Teians under Phanagorus or Phanagoras，who fled thither from the Persians．（Eustath．ad Dionys．Per．；Scymn． Cb．，Steph．B．，Peripl．P．Eux．U．cc．）It was situated upon an island，now called Taman，formed by the main branch of the Anticites（Kuban），which flows into the Black Sea，and a smaller branch，which falls into the sea of $A z n f$ ．The main branch of the Kuban forms a lake betore it enters the sea，called in ancient times Corocondamitis（Strab，xi．p．494）， now the Kubanskoi Liman，on the left of which， entering from the sea，stood Planagoria．（Strab．xi． p．495；respecting Phanagoria being upon an island， see Steph．B．，Enstatb，Amm．Marc．，l．c．）The city became the great emporium for all the traffic between the coast of the Palus Maeotis and the countries on the sonthern side of the Cancasus，and was chosen by the kings of Bosporus as their capital in Asia，Panticapaeum being their capital in Europe． （Strab．，Steph．B，l．c．）It was at Phanagoria that the insurrection broke ont against Mithridates the Grest，shortly before bis death；and bis sons，who held the citadel，were obliged to surrender to the
insurgents，（Appian，Mithr． $108_{\text {；Dict．of Biengr．}}$ Vol．II．p．1102，b．）In the sixth centary of our ers，Phanagoria was taken by the neighbonring bar－ barians and destroyed．（Procop．B．Goth．ir．5．） The most remarkable bnilding in Pbanagoria scenis to have been a ternple of Aphrodite，snrnamed Apa－ torus（＇Anáтoupos），because the goddess，when at－ tacked by the giants in this place，is said to have summoned Hercules to her aid，and then to bave concealed him and to have landed over the giants
 Strab．xi．p． 495 ；Steph．B．s．v．＇Aлáтоupov； Böckh，Inscr．No．2120．）We learn from on in－ scription that this temple was repaired hy Sauro－ mates，one of the kings of Bosporns．The site of Phanagoria is now only a mass of bricks and pot－ ters；and there is no building above ground．One cause of the disappearance of all the ancient monu－ ments at Phenagoria was the foundation in its neighbourbod at an early period of the Russian colony of Tmutarakán．Dutoor noticed traces of towers towards the eastern extremity of the town， where the citadel probably stood．The town of $T a$－ man contains several ancient remains，inscriptions， tragments of colnmns，\＆c．，which bave been bronght from Pbanagoria．There are numerous tombs abuse the site of Phanagoria，but they bave not been ex－ plored like those at Panticapaeum．In one of them， however，which was npened towards the end of last centary there was found a bracelet of the purest massive gold，representing the body of a serpent， having two heads，which were studded with rubies so as to imitate eyes and also ornamented with rows of gems．It weighed three－qnarters of a pound． （Clarke，Trazels，vol．i．p．394．seq．；Pallas，Reisen， vol．ii．p．286，\＆c．；Dubois，Voyage autour du Cau－ case，vol．v．p．64，seq．－Ukert，vol．iii．pt．ii．p．491．）

PHANAROEA（ $\Phi$ avápoia），a broad and exten－ sive valley in Pontus，watered by the rivers Iris， Lycus，and Scylax，and enclosed between the chain of Paryadres to the east，and Monnts Lithrus and Ophlimus to the west．The soil there was the best in Pontus，and yielded excellent wine and oil and other produce in abandance．（Strab．ii．p． 73，xii．pp．547，556，559；Plin．vi．4：Ptol．v． 6. $\S 3$ ，where it is erroneonsly called Phanagoria．） Phanaroea contained the towns of Enpatoria，Cahira， Polemonium，and others．［Pontus．］［L．S．］

PHA＇NOTE（Eth．Фavoceús，Pol），a strongly fortified town of Chaonia in Epirus，and a place of military importance．It stood on the site of the modern Gardhiki，which is situated in the midst of a valley surrounded by an amphitheatre of mour－ tains，through which there are only two narrow passes．It lies about halfway between the sea and the Antigonean passes，and was therefore of im－ portance to the Romans when they were advancing from lllyria in R．c．169．（Liv，xliii．23；Pol． xxvii． 14 ；Leake，Northern Greece，vol．i．p． 72 ，seq．）

PHANOTEUS．［PANoPEUS．］
PHARAE（Фараi）．1．Sometimes Phara（фâpa， Strab．viii．p． 388 ；Pherae，Plin．iv． 6 ；Фqpeєs， Herod．i．145，properly the name of the penple：Eth． Фapueús，Strab．l．c．；Фapaieús，Polyb．iv．6；Steph． B．s．v．：the territory $\bar{\eta} \Phi$ apanki，Strab．l．c．；Polyb． iv．59），a town of Achaia，and one of the twelse Achacan cities，was situated on the river Pieros or Peirus， 70 stadia from the sea，and 150 stadia from Patrae．It was one of the four cities which took the lead in restoring the Achaean League in B．c． 280．In the Social War（B．c．220，seq．）it
suffered from the attacks of the Ietolians and Eleans．Its territory was annexed by Augustus to Jatrae，when the latter city was made a Roman colony aftor the battle of Actium．Pharae contained a large agora，with a carious statue of Hermes， The remains of the city have been fomid on the left bank of the Kamenitza，near Pretrzo．（Herod．i． 145；Strab，viii．pp． 386,388 ；1＇ol．ii．41，iv． 6,59 ， 60，v． 94 ；Paus．vii．22．\＆1，seq．；1 lin．iv．6； Leake，Ifurea，vol．ii．p． 158 ．）

2．（\＄apai，Strab．1＇ans．：Фทph́，llom．17．v．543； \＄npai，$I$ ．ix． 151 ；Фєpai，Kin．IIell．iv．8．§ 7：Eth． \＄apátचs，Strab，viii．p．388：Фapaáтךs，Pans．iv． 30．§ 3：K（tamuita），an ancient town of Dlessenia， sitnated apon a liil rising from the left bank of the river Nedon，and at a distance of a mile from the Mresenian gulf：Strabu describes it as situated 5 staulia from the sen（viii．p．361），and Pansanias 6 （iv．31．§ 3）；but it is probable that the earth deposited at the month of the river Nedon has，in the course of centricies，eneroaclied upon the sea． Pheme occnpied the site of Kulumata，the modern capital of Messeniat and in antiquity also it seems to have been the cuief town in the southern Messe－ nian plain．It was said to bave been founded by l＇laris，the son of Hermes．（Paus．iv．30．\＆2．） In the Iliad it is mentioned as the weli－built city of the wealthy Diorles，a vassal of the Atridae（v．543）， amil as one of the seven places offered by Agamem－ non to Achilles（ix．151）；in the Odysscy，Telema－ chus rests bere on his jonrney from Pylos to Sparta （iii．490）．After the capture of Messene by the Achaemis in B．C．182，Phame．Abia，and Thuria separated themselves from Messene，and became each a distinct member of the league．（Polyb．xxv． 1．）Pharae was anmered to Laconin by Angustus （Paus．iv．30．§ 2），but it was restored to Dlessenia by liherins．［Messexil，p，345．］Pansanias found at Plarae temples of Fortune，and of Nicomachus and Gorgasns，crandsons of Asclepius．Outsile the city there was a grore of Apnllo Carneius，and in it a fountain of water．（Paus．iv． 30 ．\＆ 3 ，seq，iv， 31. § 1．）Strabo correctly deseribes Pharue as having an anchorage，but only for summer（riii．p． 361 ）；and at present，after the month of September ships yetire for satety to Armyro，so called from a river strongly impregnated with salt flowing into the sea at this place：it is the viठwp $\dot{\alpha} \lambda \mu u p o v$, mentioned by I＇au－ sumias（iv．30．\＆2）as on the roud from Abia to 1＇har．ie．

There are no ancient remains at Krtamaita， which is not surprising，as the place has always been well occupied and inbabited．The height above the town is crowned by a ruined castle of the middle aeses．It was the resilence of several of the Latin chieftains of the Morea．William Villehardonin II． was born here．In 1685 it was conpuered and cularged by the Fenetians．It was the head－ quaters of the insurrection of 1770，and again of the revolution of 1821 ，which spread from thence oner the whole penmsula．（Leake，Morert，val．i． 1．342，seq．，IBoblayy，Lirtherches．ge．p． 104 ； （＇urtius，$P_{i}$ boponhesos，vil．it．p．15s．）

3．The liter name of the Homeric Phare or Pharis in lacania．［1＇แин：］

PllAliAN or l＇AFAN（drapay），the name of a desurt S．of l＇alestine，lertweern this country and Acrypt．（Gen，xxi．21；I Kinys，xi．18．）It is usually identified wath the Wady Fririn，a beantiful and well watered valley，surroumbed by mountains， NW．of Sinai，and near the western arm of the

Ted Sea（Niebubr，Reisebeschreibung，vol．i．p． 240 ， Arabien，p．402）；but though Feirán may lave preserved the ancient name of the desert，it ap－ pears from Nnmbers（ $\mathrm{x} .12,33$ ，xiii．26）that the latter was situated in the desert of Kadeah， which was npon the borders of the conntry of the Flomites，and which the lsraelites reached after their departure from ST ．Sinai，on their way towarda the land of Edom．（Burckhardt，Syria，p．618．）

In the Warly Feiran are the remains of an ancient church，assigned to the fifth century，and which was the seat of a bishoprie as early as A．D，4（0）． （Rohinson，Biblical Researches，vol．i．p．186．） This city is deseribed under the name of Feirun by the Arabie Edrisi，abont A．D．1150，and by Makrizi about A．D．1400．（Burckhardt，Syria， p．617．）It is apparently the same as Pharan（\＄a－ páv），described by Stephanus B．（s．v．）as a city between Aegypt and Arabia，and by Ptolemy（v． 17. §S 1，3）as a city of Arabia Petraes near the west－ ern arm of the Red Sea．A species of amethyst found in this falley had the name of Pharanitis． （Plin．xxxvii．9，s．40．）The valley of Pharan mon－ tioned by Josepbus（B．J．iv．9．§ 4）is obvionsly a different place from the Wady Firan，somewhere in the vicinity of the Dead Sea，and is perhaps con－ connected with the desert of Paran，spoken of above．（Robinson，Biblical Researches，vol．i．po 552．）

PHARBAETHUS（Фáp̧at审，Ptol，iv．5．§ 52； Steph．13．3．v．：Fth．\＄ap6ai日itns，Herod．ii．166； фар6ทritク5，Strab．svii．p．802），the capital of the Plarbaethite Nome in Luwer Aerypt．（I＇lin．v． 9. s．9．）It stood W．of the Pelusian arm of the Nile， 16 miles S．of Tanais．The nome was a Praefec－ tura under the Ruman emperors ；and under the Pharaols was one of the districts assigned to the Calasirian division of the Aegyptian army．Phar－ baethus is now Horbeyt，where the French Com－ mission found some remains of Aegyptian statnary （Champollion，$r$ Egypte，vol．ii．p．99）．［W．B．D．］

IHARCADON（Фарка $\delta \dot{\omega} \nu_{+}$Фаркך $\delta \dot{\omega} \nu: E / h$. Фаркךঠס́vzos），a city of Histiseotis in Thessaly， situated to the left of the Peneins，between Pelin－ nuenm and Atrax．It is probably represented by the ruins situated upon the slope of the rocky height above Gritaiuno．（Strab，ix．p．438；Steph．B． s．v．；Leake，Northern Greece，vol．iv，p． 316 ， seq．）

IHARE or PHARIS，afterwards called PHARAE （\＄áp, Фâpts，фapai），a town of Laconia in the Spartan plain，situated upon the road from Amyclae to the sea．（Haus．iii．20．\＆3．）It was men－ tioned in the Iliad（ii．582），nnd was one of the ancient Aclacan towns．It Inaintained its inde－ pendence till the reign of Teleclas，king of Sparta； and，after its conquest，continued to be a Lacedae－ monian town under the name of Pharac．（I＇ans． iii．2．§ 6．）It was said to have been plundered by Aristomenes in the Second Messenian War．（Paus． iv．16．§8．）It is also mentioned in a corrupt pasvago of Strabo（viii．p．364），and by other ancient writers．（Lycophr． 552 ；Stat．Theb．iv． 226 ；Steph．B．s．v．Фâpis．）Pharis has been rightly placed at the deserted village of Bufio， which lies sonth of the site of Amyclae，and con－ tains an ancient＂Treasury，＂like those of Mycenae and Orchomenus，which is in accordance with Pharis haviug been one of the old Achacan cities before the Dorian conquest．It is surprising that the Frenth Comanission have given no description or drawing of
this remarkable moanment. The only acconnt we possess of it, is by Mnre, who observes that "it is, like that of Mscenae, a tumalns, with an interior vault, entered by a door on one side, the access to which was pierced horizontally throngh the slope of the hill. Its situation, on the summit of a kuoll, itself of rather conical form, while it increases the apparent size of the tumulus, adds much to its general loftiness and grandeur of effect. The roof of the vaolt, with the greater part of its material, is ouw gone, its shape being represented by a round eavity or crater on the summit of the tamnlus. The doorway is still eotire. It is 6 feet wide at its upper and narrower part. The stone lintel is 15 feet in length. The vault itself was probably between 30 and 40 feet in diameter." Mare adds: "Menelaus is said to have beea buried at Amyclae. This may, therefore, have been the royal vault of the Spartan branch, as the Mycenaean modument was of the Argive branch of the Atridan family." But erea if we suppose the monument to have been a sepulchre, and not a treasury, it stood at the distance of 4 or 5 miles from Amyclae, if this town is placed at Agliza Kyriak;, and more than 2 miles, even if placed, according to the French Commission, at Sklawokhorri. [Amyclae.] In addition to this, Meaelans, according to other accounts, was buried at Therapne. (More, Tour in Greecc, vol. ii. p. 246 ; Leake, Morea, vol. iii. p. 3, Peloponnesiaca, p. 354; Curtius, Peloponnesos, vol. ii. p. 248.)

PHARMACC'SA (Фариакой $\sigma \sigma a$ ), a small island before the eatrance of the bay of lassus, not far from Cape Poseidion; its distance from Miletus is stated at 120 stadia. In this island Attalus was killed, and near it Jolius Caesar was once captured by pirates. (Stadiasm. Mar. Mag. p. 282; Stepb. B. a. v.; Suet. Caes. 4; Plut. Caes. 1.) It still bears its ancient name Farmaco. [L. S.]

PHARMATE'NUS (\$apmar $\quad \mathrm{L}$ os), a small coast river of Pontus, 120 stadia to the west of Pharnacia. (Arrian, Peripl. Pont. Eux. p. 17; Aanym. Peripl. P. E. p. 12.) Hamilton (Researches, i. p. 266) identifies it with the Bozacur $S_{u}$.
[L.S.]
PHARNA'ClA (фаруакía: Eth. Фарракєús), an important city on the coast of Pontus l'olemoniacus, was by sea 150 stadia distant from cape Zephyrium (Arrian, Peripl. Pont. Eux. p. 17; Anonym. Peripl. P.E. p. 12), but by land 24 miles. According to Pliny (vi. 4) it was 80 (180?) miles east of Amisus, and 95 or 100 miles west of Trapezas. (Comp. Tab. Peut., where it is called Carnassus for Cerasus, this latter city being confounded with Pharnacin.) It was evidently fonnded by one Plarosces, probably the grandfather of Mitliridates the Great; and the latter daring his wars with the Rontans kept his harem at Pharnacia. Its inhahitants were taken from the neighhouring Cotyura, and the town was strobgly fortified. (Strab. xi. p. 548 ; Plut. Lucull. 18.) The place acquired great prosperity through its commerce and navigation, and throngh the iron-works of the Chalybes in its vieinity. (Strab. xi. pp. 549, 551.) According to Scylax (p. 33) the site of this town had previously been occupied lyy a Greek colony called Choerades, of which, howeser, mathing is known. But that he actually conceived Choorades to have occupied the site of Pharnacia, is clear from the mention of the island of Ares ("A $A \in \omega s \nu \bar{\eta} \sigma 0 s$ ) in connection with it, for that island is known to have been situated off Pharnacia. (Arrian and Anonym. Peripl. l. c.) Arrian is the ouly one who affirms that Pharnacia occupied tho
site of Cerasns; and although he is copied in this instance by the anonymons geographer, yet that writer afterwards correctly places Cerasus 150 stadi: further east ( p .13 ). The error probably arose from a confusion of the names Choerades and Cerasus; but in consequence of this error, the name of Ceritsus was in the nyiddle ages transferred to Plarnacia, which hence still bears the name of Kerasunt or Kerasonde. (Comp. Hamilton, Researches, i. pp. 250, 261, foll.: Cramer, Asia Minor, i. p. 281.) Pbarnacia is also mentioned by Stephanns Byz. (s. v.), several times by Strabo (ii. p. 126, xi. p. 499, xii. pp. 547, 549, 560, xir. p. 677 ), and by l'toleny (v. 6.§5). Respecting its coins, see Eckhel (Doctr. Num. vol. iii. p. 357). Another town of the same name in Phrygia is mentioned by Stephanus Byz. (s. v.).
[L. S.]
PlLARODINI. [Yaring.]
pharos (\$ápos, Ephorus, ap. Steph. B., Fr: 151 ; Scyl. p. 8 ; Seymn. p. 427 ; Diodor. xv. 13 ; Strab. vii. p. 315), an island off the coast of IIlyricum, which was colonised by Greek settlers fromz Paros, who, in the first instance, gave it the name of their own island, which was afterwards changed to Pharos. In this settlement, which tork place B. c. 385, they were assisted by the elder Dinnysins. When the Romans declared war against the lllyrians B c. 229, Demetrins, a Greek of Pharos, betrayed his mistress, Queen Teuta, for which be was rewarded with the greater part of her deminions. (Polyb, ii. 11.) The traitor, relying on his connection with the court of Macedon, set the Romans at defiance; be soon brought the vengeance of the repnblic apon hinself and his native island, which was taken by L. Aemilius in s. C. 219. (Polyb. iii. 16 ; Zonar. viii. 20.) I'liny (iii. 30) and Ptolemy (ii. 17. § 14) speak of the island and city under the same name, Pharia (фapía), and Polybius (l.c.) says the latter was strongly fortified. The city, the ancient capital, stood at Stari Grad or Citta Decchia, to the N. of the island, where remains of walls have been found, and coins with the legend $\Phi A R 1 \Omega n$. After the fall of the Roman Empire the island continued for a long time in the hands of the Narentine pirates. Its Slavonic name is Huar, a corruption of Plaros; and in Italian it is called Lesina or La sina. For coins of Plarus see Eckhel, vol. ii. p. 160 ; Sestini, 1 Ionet. Jet. p. 42 ; Miomnet, vol. ii. p. 46. (Wilkinson, Dalmatio, vol. i. Pp. 243-251; Neigebanr, Die Sul-Slaren, 11]. 107 -111.)
[E. B. J.]
PHAROS ( $\Phi$ Apos, Strab. xvii. p. $\mathbf{7 9 1}$, seq.; Steph. B. s. v.: Eth. \$dipios), a loog narrow strip of rock Jying off the northern coast of Aegypt, having the New Port of Alexandreia E. and the Old Harbour SW. [Alexandreia, Vol. 1. p. 97.] Its nane is said to have been derived from a certain pilot of Menelaus, who, on his return from the Trojan War, died there from a serpent's bite. Pharos is mentioned in the Odyssey (iv. 355), and is descriled as one day's sail from Augypt. Tlis acconnt has caused etmsiderable perplexity, stnce Plaros is actually rather less than a mile from the seaboard of the Delta; and it is not probable that the land, in the course of centuries, has advanced or the sea receded materially. It is perfectly intelligible, however, if we suppose the anthor of the Oiyssey to mean by Aegyptus, nut the country itself but its river, since the Pharos is even now nearly a day's sail from the Caoopic arm of the Nile. Any other theory is untenable; for this portion of the coast of the Delta consists of rocky bars atid

PLIALPAR.
shelves, which remain unchanged, and, thongh its surface has been beightenel, its superficial area has nut been materially enlarged since the country was peopled. Pharos was inhabited by fishermen under the l'haraohs of Aegypt; but it first became a place of importance under the Macedonian kings. During his survey of the coast, B. c. 332 , Alexander the Great perceived that the island wonld fura, with the help of art, an excellent breakwater to the harbour of his projected capital. He accordingly cansed its sonthern extrenity to be connected with the mainland by a stone mole seven stadia, or sbont an Euglish mile, in length, which from this circumstance was called the Heptastadium or Sevenfurlong Bridge. At either end the mole was left open for the passage of slips, and the apertures were covered by suspension bridges. In later times a street of honses, erected on the mole itself, converted the inland of Pharos iato a snburb of Alexandreia, and a consideratbe portion of the modern city stands oa the foundatioas of the old Heptastadium.

Yet, long after its junction with the Delta, Pharos was spoken of as an island ( $\hat{\eta} \pi a \lambda a i ́ ~ \nu \eta \bar{\eta} \sigma o s, ~ A e l i a n, ~$
 The sontbera portion of this rocky ledge (xorpás) was the more densely populated; bat the celebrates lishthouse, or the Tower of the Pharos, stood at the NE. point, directly in a line with point Pharillon, ou the castern horn of the New l'ort. The lighthonse was erected, at a cost of 800 talents, in the reign of Ptolemy 1., but was not completed nutil that of his snecessor Philadelphos. Its architect was Sostratns of Caidns, who, according to Plioy (xxxvi. 12. s. 18), was permitted by his royal patron to inscribe his own name upon its base. There is iodeed another story, ia which it is related that Sustratus, being forbidden to engrave his name on his work, secretly cat it in deep letters on a stone of the building, which be then alroitly covered with sonee softer and perislable material, on which were inscribed the style and tithes of Ptoleany. Thus a few generations would read the name of the king, but posterity would bebold the autheatic impress of the architect. (Strab. xvii. p. 791 ; Suidas, s. v. Фápos; Stoph. B. s. v.; Luclan, de Conserib. Hist. c. 62.) Pharos was the seat of several temples, the most comspiconous wi which was one dedicated to Hephaestos, standing near the northera extremity of the Heptastadiun.

That Pharns, in common with many of the Deltaic cities, contained a considerable popplation of Jews, is rendered probable by the fact that here the translators of the Hebrew Scriptures resided during the prugress of their work. (Joseph. Antiq. xii. 2. § 13.) Julins Cassar established a coloay at Pharos, less perhaps to recroit a declining popalation than with a view to garrison a post so important as regarded the turbaleat Alesadrians. (Caesar, B. Civ.iii. 112.) Subsegnently the ishand seems to bave been comparatively doserted, and inthabited by fishermen alone. (Montfaucon, sur ke Phare dAlexandrie, Ném, de l'A cad. des Inscript. ix. p. 285.) [WI. B. D.]

PllARPAR. [DAMAMCE.]
PllAlRA'SH. [1'Risht]
PHARSA'LU'S (фápoa入os: E'th. фapoálios: the territory is 中apoaxia, Strab. in. p. 430), one of the most important cities of Thesaly, sitnated in tho district Thessaliotis near the contines of Phthiotis, upon the left bank of the Enipeus, and at the foot of Mt. Narthwium. The tuwn is first mentioned after

PILARSALUS,
the P'ersian wars; but it is probable that it existell mnch earlier, since there is no other locality in thia part of Thessaly to be compared to it for a comnbination of strength, resonces, and coavenience. Hence it has been supposed that the city was probably nauned Plithia at a remote period, and was the capital of Phthiutis. (See Leake, Northern Greece, vol. iv. p. 484.) Among its rains there are some remains which belong apparently to the most ancient times. On one side of the northem gateway of tho acropolis are the remnants of Cyclopian walls; and in the middle of the acropolis is a subterraneous construction, built in the same manoer as the treasury of Atrens at Mycenac. Leake observes that Pharsalus "is one of the most important military positions in Greece, as standing at the entrance of the most direct and central of the passes which lead from the plains of Thessaly to the vale of the Spercheius and Thermopylie. With a view to ancieat warfare, the place had all the best attribntes of a Helleaic polis or fortified town: a hill risiog gradually to tho height of 600 or 700 feet above the adjaceat plain, defended on three sides by precipices, crowned with a small level for an actopolis, watered in every part of the declivity by subterrancons springs, and still more abundantly at the foot by sources so copious as to form a perennial stream. With these local advautages, and one of the mat fertile plains in. Greece for its territory, Plarsalus inevitably attained to the bighest rank among the states of Thessaly, and became one of the largest cities of Grecce, as its rnined walls still attest." The city was nearly 4 miles in circuit, and of the form of an irregalar triangle. The acropolis consisted of two rocky tabular sumnits, united by a lower ridge. It was about 500 yards long, and from 100 to 50 broad, but stal narrower in the conaecting ridge. Livy speaks of I'abuepharsalus (xiiv. 1), and Strabo distingnishes between Old and New Pharsalas. (Strah. ix p. 431.) It is probable that at the time of these writers the acropolis and the upper part of the town tere known by the name of Palsepharsalus, and that it was only the lower part of the town which was then inhabited.

1'harsalus is mentioned by Scylax (p. 25) among the towns of Thessaly. In 13. c. 455 it was besieged by the Athcuian commanter Myronides, after his rictory in Boeotia, but without success. (Thuc. i. 111.) At the cummencement of the Peloponnesian War, Plarsalus was one of the Thessalian towns that sent suceonr to the Athenians. (Thuc, ii. 22.) Medius, tyrant of Larisaa, took Pharsalus by force, about a. c. 395. (Divi. xiv. 82.) Pharsalus, under the conduct of Polydamas, resisted Jason for a time, but subsequently formed an alliaace with him. (Jen. Hell. vi. 1. § 2, seq.) In the war between Antiochns and the Romans, Pharsalns was for a time in the possession of the Syrian moaarch; but on the retreat of the latter, it surrendered to the consul Acilius Glabrio, B. c. 191. (Liv. xxxvi. 14.)

Pharsalus, however, is chiefly celebrated for the memorable battle fought in its neighbourhood between Caesar and Pompey, 3, c. 48. It is a curions fact that Caesar has not mentioned the place where le gained lis preat victory; and we are indebted for the name to other authorities. The exact site of the battle las been printed out by Leako with his usual clearness. (Northern Gireece, vol, iv. p. 475, soq.) Merivale, in bis narrative of the battle (llistory of the Romans under the Empire, vol. ii. p. 286 , seq.), bats rained some difficulties in the in-
terpretatien of Caesar's description, which have been commented upon by Leake in an essay printed in the Transactions of the Royal Socity of Literature (vol. iv. p. 68, seq., 2nd Series), from which the following accoont is taken.

A few days previous to the battle Caesar had taken possession of Metropolis, a city westward of Plarsalus, and had encamped in the plain between these two cities. Meantime Pempey arrived at Larissa, and from thence advanced southwards towards Pharsalus; he crossed the Enipens, and encamped at the foot of the heights, which are adjacent to the modern Ficrsala on the east. Caesar's camp, or rather his last position befire the battle, was in the plain between Pharsalus and the Enipeus, at the distance of about 3 miles from the still extant north-western aogle of the walls of Pharsalus. There was a distance of 30 stadia, or about 4 Ronman miles, from the two camps. (Appian, B. C. i. 65.) Appian adds that the army of Pompey, when drawn up for battle, extended from the city of Pharsalus to the Enipeus, and that Caesar drew ap his forces opposite to tim. (B. C. ii. 75.) The battle was fought in the plain inmediately below the city of Pharalus to the north. There is a level of abont $2 \frac{1}{2}$ miles in hreadth between the Eoipeas and the elevation or bank apon which stood the nerthern walls of Pharsalus. Merivale is mistaken in saying that "the plain of Pharsalus, 5 or 6 miles in breadtl, extends along the left bank of the Enipeus." It is true that 5 or 6 miles is abont the breadth of the plain, but this breadth is equally divided between the two sides of the river; nor is there anything to support Merivale's conjecture that the conrse of the river may have changed sioce the time of the battle. Leake observes that the plain of $2 \frac{1}{2}$ miles in breadth was araply sufficient for 45,000 men drawn up in the usual manner of three orders, each ten in depth, and that there would be still space enough for the 10,000 cavalry, upon which Pompey funded chiefly his hopes of victory ; for the breadth of the plain beiog too great for Caesar's numbers, he thoaght hinself sure of being able, by lis commanding force ef cavalry, to turn the enemy's right.

At first Pompey drew up his forces at the foot of the hills; but when Caesar refused to fight in this position, and began to move towards Scotassa, Pompey descended into the plain, and arraanged his army in the positien already described. His rigbt wing being protected by the Enipens, which bas precipitoos banks, he placed his cavalry, as well as all his archers and slingers, on the left. Caesar's left wing was in like manner protected by the Enipeus; sod in the rear of his right wiog, behind his small budy of horse, he stationed six cohorts, in order to austain the anticipated attack of the enemy's cavalry. Pompey resolved to await the charge. Caesar's line advanced running, halted midway to recover their breath, and then charged the enemy. Wbile the twe lines were thus occapied, Pompey's cavalry on the left began to execute the movement upon which he placed bis hopes of victory; but after driving back Caesar's small body of herse, they were unexpectedly assailed by the six cohorts and put to flight. These cohorts now advanced against the rear of Pompey's left; while Caesar at the same time brought up to his frent the third line, which had been kept in reserve. Pompey's troops now gave way in every direction. Caesar then advanced to attack the fortified camp of the enemy, which was defended for seme time by the cohorts left in clarge
of it; bot at length they fled to the mountains at the back of the camp. Iompey proceeded straightway to Larissa, and from thence by night to the sea-coast. The hill where the Pompeiaos had taken retuge being without water, they soon quitted it and thok the rond towards Larissa. Caesar followed them with four legions, and, by taking a shorter ruad, came np with them at the distance of 6 miles. The fagitives now retired into another mountain, at the foot of which there was a civer; but Caesar having cut off their approach to the water before nightfall, they descended from their position in the morning and laid down their arms. Caesar proceeded on the same day to Larissa. Leake observes that the mountain towards Larissa to which the Pompeians retired was probably near Scotussa, sirice in that direction alone is any monntain to be funud with a river at the foot of it.
In the time of Pliny, Pharsalus was a firee state (iv. 8. s. 15). It is also mentioned by Hierocles (p. 642) in the sixth century. It is now named Férsala (т̀̀ фе் $\rho \sigma a \lambda a$ ), and the modern town lies at the foot of the ancient Acropolis.

COLX OF PHARSALT'S.
PHARU'SIl (Фapov́qiol, Strab. ii. p. 131, xxii. pp. 826, 828; Ptol. iv. 6. § 17 ; Polyb. ap. Plin. v. 1. s. 8, vi. 35), a perple on the W. coast of N. Africa, about the situation of whom Strabo, Pliny, and Ptolemy are in perfect agreement with one another, if the thirty jommeys of Strabo (p. 826) between them and Lixus (El-Araish), on the W. coast of Morocco, to the S. of Cape Spartel, be set aside as an error either of his information or of the text; which latter is not improbable, as numbers in MSS, are so often corrupt. Nor is this mere conjecture, because Strabe contradicts himself by asserting in another place (p. 828) that the I'harnsii had a great desert between then and Dlauretania, which they crossed, like natives of the present day, with bags of water hung from the bellies of their horses. (Leake, London Geog. Journ. vol, ii. p. 16.) This locality, estendiog from beyond Cape Bojader to the banks of the Senegal, was the seat of the many towns of the Tyrians, amounting, according to some (Strab. p. 826), to as many as 300 , which were destroyed by the Pharusii and Nigritae. (Comp. Humboldt, Cosmos, vol. ii. p. 129, note 123, trans.) Strabo reckons this number of 300 conumercial settiements, from which this part of the cnast of tha Atlantic received the name of Sinus Emporicus, as an exaggeration. He appears in this to have followed the criticism1 of Artemidoras apon Eratosthenes, whom Strabo depreciates. The number 300 may be an exaggeration, or one net intended to be literally taken; but it is incredible that Eratosthenes should represent a coast as covered with Phoenician factories where none existed.

When Ezekiel prophesies the fall of Tyre, it is said (xxvii. 10) "The men of Pheres (the common rersion reads Persia), and Lud, and Phut were in thine armies." These lheres thus joined with the Phut or Maurctanians, nnd the Ludim, whe were
nomads of Africa（the Scptuagint and the Volgate understand the Lydians），may be reasonably sup－ posed to belong to the same region．Without the vowel points，the name will represent the powerful and warlike trite whom the Greeks call I＇harusii． The similarity of the names seems to have given rise to the strange story which Sillust（B．J．18）copied from the Punic books，that Hercules had led an army of Persians into Africa．（＂Pharusii quondam P＇orsac，＂Plin．v． 8 ；comp．Pomp．Mela，iii．10．§ 3．） The fierce tribes of Africa thas furnisbed the Phoc－ nicians with ineshanstible supplies of mercenary tromps，as they afterwards did to Carthage．（Kien－ rick，Phoenicia．pp 135，277．）
［E．B．J．］
PHARYGAE．［TARPHE．］
PHARY＇GlLM（\＄apiztor），a promontory of l＇hocis，with a station for sbipping，lying E．of Anticyra，between Marathus and Myus，now called Aghiui．（Strab．ix．p．423；Leake，Worthern Greece， vel．ii．p．549．）

PHASAE＇LIS（פaбan入is，Joseph．，Steph．B．， s．v．；Фaan入ís，Ptol．v．16．\＄̧ 7；Phaselis，Plin．xiii． 4．s．19，sxi．5．s． 11 ：Eth．\＄adan入itns），a towa of Palestine built by Herod the Great in the Aulon or Ghor，N．of Jericho，by which means a tract for－ merly desert was rendered fertile and prodnctive． （Joseph．xvi．5．§ 2，xvii．11．§ 5，xviii．2．§ 2， B．J．i．21．§ 9．）＊The name seems still to have existed in the middle ages，for Brocardus，quoted by Robioson，speaks of a village oamed Pbasellom， situated a league N．of Duik，and corresponding to the position of EL＇A：jeh，where there are ruins． （Rubinson，Biblical Researches，vol．ii．p．305．）

PHASE＇LIS（фaбך入is：Eth．фaбך入iinns），a ma－ ritime town of Lycia，on the Pamphylian gulf， whence some say that it was a town of Pamphylia （Plin．v． 36 ；Steph，B．s v．；Eionys．Per． 855 ； Stadiusm，Mar．Mag．§ 205）；but Strabo（xiv．p． 667）distinetly iaforms us that Phaselis belonged to Lycia，and that Olbia was the first Pamplyylian town on the coast．Tbe town was a Dorian colony（Herod．ii．178），situated on a headland， and conspicuous to those sailing from Cilicia to 1hooles，（Liv．xxsvii．23；Cic．in Serr．ii．4．） Behind it rose a mountain of the same name．pro－ hably the same which is elsewhere called $\tau \grave{\alpha}$ ミ $\delta \hat{\lambda} v \mu a$ （Šritiusm．Mar．Mag．§ 204 ；Strab．siv．p．666）； and in its vicinity there was a lake and a monntain－ pas leading between Monnt Climax and the sea－ caist into Pamplylia．Phaselis had three harbours， and rose to a high degree of prosperity，though it did not beloog to the political confederacy of the onther Lycian tomans，bat formed an independent state by itself．It is mentioned by Thncydides（ii．69， comp．viii．88，89；1＇olyb．xxs．9）as a place of some importance to the commerce of the Athenians with Phoenicia and Cilicia．At a later period，having become the hatur of the pirates，it was attacked and taken by Servilins Isauricus．（Cic．in lerr． iv．10；lintrop．vi．3；Flor．iii．6．）Although it was renturd after this disaster，yet it never reco－ vered its ancient prosperity；and lucan（viii． 249. dev．）describes it as mearly deserted when visited by Iompery in his flight from 1harsalus．According to Athentarus（xiv．p．688）the town was celebr ted for the manufacture of rose－perfume，and Nicander （ 11 ．Athen，p．683）praised its roses．It was the common cpinion amone the ancients that the pha－ seli（ $\phi \dot{\alpha} \pi \eta \lambda o s)$ ，a kind of light sailing boats，were invented at Phuselis．whence all the coins of the town show the image of such a buat．Pausamias
（iii．3．§ 6）reports that the spear of Achulles was cxhibited in the teniple of Athena at I＇ha－ selis．In Hierocles（p．683）the name of the place is compted into Phasydes；and the Acts of Coun－ cils show it to have been the see of a bishop．It may also be remarked that Phaselis was the birth－ place of Theodectes，a tragic poet and rhetorician of some note．（Steph．B．s．v．；comp．Scylas，p．39； Ptol．v．3．§ 3，5．§ 2 ；Eckhel，Doctr．Num．iii， p．6．）There are still considerable rensins of tho ancient llhaselis．The lake in its vicinity，says Beavfort（Karcumania，p．56）．is now a mere swamp， occupying the middle of the isthmus，and was pro－ bably the source of those baneful exhalations which， according to Livy and Cicero，rendered Phaselis so unhealthy．The priocipal port was formed by a stone pier，at the western side of the isthmus；it projected about 200 yards into the sea，by which it bas been entirely overthrown．The theatre is scooped ont of the bill，and fronting it are the re－ mains of several large buildings．There are also numerous sarcophagi，some of them of the whitest marble，and of very neat workmanship．The modern name of Phaselis is Tckrova．（Comp．Fellows， Asia Minor，p．211，foll；Leake，Asia Minor， p．190．）
［L．S．］

COIN OF PIIASELIS．
PHASIA＇NI（\＄aбıavoi），a tribe in the eastern part of Pontus，on the river Phasis，from which both they and the district called Фaбiav＞＞$\chi$ ẃpa derived their names．（Xenoph．Anab．iv．6．§ 5，vii．8．§ 25 ；Diodor．sir． 29 ；Eustath．al Dionys．Per． 689．）
［L．S．］
PHASIS（ФÂøts），a navigable river in Colchis，on the east of the Euxine，which was regarded io arcient times as forming the boundary betreen Europe and Asia，and as the remotest point in the east to which a ssiler on the Euxiae could proceed．（Strab，xi．po 497 ；Eustath．ad Dimys．Per． 687 ；Arrian，Pcrin）． Tonc．Eur．p．19；Herod．iv．40；Plat．Phaed．If 109：Anonym．Pcripl．Pont．p．1；Procop．Bell． Goth．iv．2．6．）Suhseqpently it came to be looked upon as forming the boundary line betweeo Asia Dinor and C lelhis．Its sources are in the southert－ most part of the Dlontes Moschici（Plin．vi．4：Slin． 20）；and as these mountains were sometimes re－ garded as a part of Mlount Cancasas，Alistotle and others flace its sources in the Cancasus．（Strah． si．1． 492 ．xii．p． 548 ；Aristot．Met．i．13；P＇ru cop．l．c．；Geogr．Rav．iv．20．）Strabo（xi．p． 497 ； comp．Dionys．Per． 694 ：Seliol．ad Apollon．Rhemd． ii．401）makes the thasis in a general way flow from the mountains of Armenia，and Apollonius specifies its sources as existing in the country of the Ams－ ranti，in Colchis．For the first part of its conne westward it bore the name Boas（1＇rocop．Bell．Pers． ii．29），and zfter receiving the waters of its tribu－ taries Rhion，Gluucus，and Hippus，it discharges it－elf as a navigable river into the Eoxine，near the town of Phavis．（Strab．xi．pp．498，500；Plio． l．c．）Some of the mont ancient writers believed
that the Phasis was connected with the Northern Ocean. (Schol, ad Apollom. Rhod. iv. 259; Pind. Pyth, iv, 376, Isthm. ii. 61.) The length of its course was also erroneously estimnted hy some at 800 Roman miles (Jul. Honor. p. 697, ed. Gronov.), but Acthicus (Cosmogr. p. 719) states it more correctly to be only 305 miles. The fact is that its course is by no means very long, hut rapid, and of such a nature as to form almost a semicircle; whence Agathemerus (ii. 10) states that its mouth was not far from its sources. (Comp. Strab, xi. p. 500 ; Apollon. Shoi, ii. 401 ; Ov. Met. vii. 6; Armm. Marc. xxii. 8 ; Prisc. 673.) The water of the I'hasis is described as very cold, and as so light that it swam like oil on the Euxine. (Arrian, Peripl. Pont. Eux. p. 7. \&c.; Procop. Bell. Pers, ii. 30: comp. Hesiod. Theog. 340 ; Hecat. Fragm. 187; Herod. iv. 37, 45, 86; Scylax, p. 25 ; Polyb. iv. 56, г. 55 ; Ptol. v. $10 . \S \$ 1,2$.$) The different$ statements of the ancients respecting the sources and the course of this river probably arose from the fact that different rivers were understood by the name I'lasis; but the one which in later times was commonly designated by it, is undoubtedly the modern Rioni or Rion, which is sometimes also mentioned under the name Fachs, a corruption of Phasis. It has been conjectured with great prolability that the river called Phasis by Aeschylus (ap. Arrian, l. c.) is the Hypaois; and that the Phasis of Xenophon (Anab. iv. 6. §4) is no other than the Araxes, which is actually meutioned by Constantine Porphyr. (de Admin. Imp. 45) under the two names Erax and Phasis.
[L. S.]
PHASIS ( $\Phi \hat{a} \sigma t s$ ), the easternmnst town on the cnast of the Euxine, on the southern bank, and near the mouth of the river Phasis, which is said to have received this name from the town having previously been called Areturus. (Pint. de Fluv. s. v.; Eustath. ad Dion. Per. 689.) It was situated in a plain between the river, the sea, and a lake, and had been founded by the Dlilesians as a commercial establishment. (Strab. si. p. 498 ; Steph. B. s. v.) The country around it was very fertile, and rich in timber, and carried on a consideratle export commerce. In the time of Ammianus Jlarcellinus (xxii. 8), the place still existed as a fort, with a garrison of 400 picked men. It contained a temple of Cybele, the great goddess of the Phasiani. (Comp. Arrian, Peripl. Pont. Eux. p. 9: Scylax, p. 32; Sirah. xi. pp. 497, 500 ; Ptol. v. 10. § 2, viii. 19. § 4: Pomp. Mela, i. 19; Plin. vi. 4; Zosim. ii. 33.) some geographers regard Phasis and Sebastopolis as two names belonging to the same place [Sebastorouls]. The name of the town and river Phasis still survives in the lauguages of Europe in the wood pheasants (phasianae aves). these birds being said to liave been introduced into Europe from those regions as early as the time of the Argonauts. (Aristoph. Acharm. 726 ; Plin. ii. 39, 44, x. 67 ; Martial, iii. 57, 16; Suet. Jit. 13; Petroo. 93.) [L. S.]

PHASIS ( $\Phi u ̈ \sigma ı s)$, a river of Taprobane or Ceylon. It is clear from the statement of Ptolemy that it was on the N. side of the island; but like other rivers and places in that island, it is hardly possible now to ideatify it with any modern stream. Forbiger las conjectured that it is the same as the Averie. Lassen has supposed it to be the Ambá, in that portion of the island which was called Nagaduipa. If this be so, it flowed into the sea a little to the N . of the narrow ledge of rocks which connects Ceylon with the mainland of Hindustion. Forbiger further
supposes that this is the same river which Pliny calls Cydara in his account of the island of Taprobane (vi. 22. s. 24).

PllaURA. [Aitica, p. 330, b.]
PHAZANIA. [Gafamantes.]
PHAZE'MON ( $\Phi a \varrho \eta \mu \alpha{ }^{\prime} \nu$ ), a small town in the west of Pontus, south of Gazelonitis, and north of Amasia; it contained hot mineral springs, which, according to Hamilton (Researches, i. p. 333), are the modern haths of Cauvsa. (Strab. xii. pp. 553, 560, 561.) Pompey, after his victory over Mithridates, planted a colony there, and changed its Dame into Neapolis, from which the whole district was called Neapolitis, having previonsly been called Phazemonitis, (Strab. xii. p. 560 ; Steph. B. s. v. $\Phi$ a$\mu_{1}$ (Gív, for thus the name is erronconsly written.) Phazemon is generally supposed to correspond in situation with the modern town of Mozifun or Marsifun.
[L. S.]
PHECA or PHECADUD, a fortress near Gomphi in Thessaly. (Liv, xaxi. 41, xxsii. 14.) [Gompm.]

PHEGAEA. [ATTICA, p. 330, b.]
PHE'GIA. [Psormis.]
PHELA or PHEA (ai \$eiaí, Hom. Il. vii. 135, Od. xv. 297 ; $\Phi \in ı$ d́, Thuc. Strab; $\Phi \in \alpha ́$, Steph. B. s. v.: Eth. Фeárns, Steph. B.), a city of Elis io the Pisatis, situated upon the isthmus connecting the promontory Ichtlys (C. of Natuikolo) with the mainland. Strabo errodeously speaks of two promontories upon this part of the coast; one called Pheia, from the name of the neighbouring town, and another more to the south, of which he bas not given the name. (Strab, viii. 343.) Pheia is mentioned by Homer, who places it near the Iardanus, which is apparently the mountain torrent north of Ichthys, and which flows into the sea on the northern side of the lofty mountain Skaphidi. (Hom, l.c.) Upon a very conspicuons peaked height upon the 1sthmus of lelithys are the ruins of a castle of the middle ages, called Pontikoikastion, built upon the remains of the Hellenic walls of Pheia. On either side of Ichithys are two barbours; the northern one, which is a small creek, was the port of Pheia; the southern one is the broad bay of Katákolo. which is now much frequented, but was too opeo and exposed for ancient navigation. The fosition of these barbours explains the narrative of Thncydides, who relates that in the first year of the Peloponnesian Wiar (в. c. 431), the Athenian fieet, having sailed from Methone in Messenia, landed at Pheia (that is, in the bay of Katákolo), and laid waste the country; but a storm having arisen, they sailed round the promontory Ichthys into the harbour of Pheia. In front of the luarhour was a small island, which Polybius calls Pheias (Strab. l. c.; Polyb.iv. 9). About a mile north of the small creck at Pontikikastro, there is a harbour called Khortus, which Leake is disposed to identify with the port mentioned by Thucydides, on the ground that the historian describes it "not as the port of Pheia, but as a harbour in the district
 mose probable that the listorian intended the creek at the foot of Pontikokiastro. In any case llheia stood on the isthmus of Ichthys, and neitber at Khortuis nor at the mouth of the torrent of skaphidi, at one or other of which spots Pheia is placed by Boblaye, though at neither are there any ancient remains. (Leake, Morea, vol. ii. p. 189, seq., Peloponnesiaca, p. 213, seq.; Boblaye, Recherches, to. p. 131: Curtius, Peloponnesos, val. ii. p. 44, seq.)

IIIELLIA. [Laconli, p. 110, a.]

## 11IENEUS.

Phenens is mentioned lyy Homer (Il. ii. 605), and was more celebrated in mythical than in historical times. Virgil (Acn. viii. 165) rejresents it as the residence of Evander; and its celebrity in mythical times is indicated by its connection with Herenles. Pausanias found the city in a state of complete decay. The acropolis contaised a ruined temple of Athena Tritonia, with a brazen statue of Pobeidon Hippius. On the descent from the acropolis was the stadium ; and on a neighbouring hill, the sepujchre of Iphicles, the brother of Hercules. There was also a teinple of llermes, who was the principal deity of the city. (Paus, viii. 14. § 4 , seq.)

The lower slope of the mountain, opon which the remsins of Pheneus stand, is occupied by a village now called Fonia. There is, however, some difficulty in the description of Pausanias compared with the existing site. Pausanias says that the acropolis was precipitous on erery side, and that only a small part of it was artificially fortified; but the summit of the insulated bill, upon which the remains of Pheneus are fommd, is too small apparently for the acropolis of such an important city, and moreover it has a regular slope, though a very rugged surface. Hence Leake supposes that the whole of this bill formed the acropolis of Phenens, and that the lower town was in a part of the snijjacent plain; but, the entire hill is not of that precipitous kind which the deseription of Pausunias would lead one to sappose, and it is not impnossible that the acropolis may bave lieen on some other height in the neighbourhood, and that the hill on which the ancient remains are found maty bave been part of the Jumer city.

There were several roads from Pheneus to the surrounding towns. Of these the northern road to Achaia mon through the Pheneatic plain. Upon this roall, at the distance of 15 stadia from the city, was a temple of Apollo Pythins, which was in ruins in the time of Pausanias. A little above the tenuple the road divided, the one to the left leading across Mt. Crathis to Aegeira, and the other to the right runnine to Pellene: the boundaries of Aegeira and Pheneus were marked by a temple of Artemis Prronia, and those of Pellene and Pheneus by that which is called Porinas ( $\delta$ калои́pevos Mapivas), supposed by Leake to be a river. but by Cortins a rock. (Paus. vini. 15. §§ 5-9.)

On the left of the Pheneatic plain is a great mountain, now called Turtordina, but wbich is not mentioned by Pausanias. He describes, however, the two ralals whieh led westward from Phenens around this momntain. - that to the right or NW. leadine to Nonacris and the river Styx, and that to the left to Cleitor. (P'ans. viii. 17. §6.) Nonacris was in the tertitory of Pbencus. [Noxachis.] The road to Cleitor ran at first along the canal of Hercules, and then crossed the mountain, which formed the natural boundary between the Pheneatis and Cleitoria, clnse to the village of Lycuria, which still bears its ancient name. On the other side of the mountain the road passel by the sources of the river Ladun. (Paus. viii. 19. § 4, 20. § 1.) This mountain, from which the Ladon springs, was calted l'exterefa ( $\Pi$ evte入cia, Hesych. and Phot. s. v.)
 Plutarch says was near Phenens, must have been situated upon this mountain. (Plut. Arat. 39, Clem. 17.)

The southern road from Pheneus led to Orchomenus, and was the way by which Pau-anias came to the former city. The road passed frum the Or-
chomenian plain to that of Pheneus throngh a narrow ravine（ $\phi \dot{p} \rho a \gamma \xi$ ），in the middle of which was a fountain of water，and at the further extre－ mity the village of Caryae．The momntains on
 athis（ Exlatis），and at the foot of either was a $^{\text {a }}$ sttbterrancous channel，which carried off the water fron the plain．（Paus，viii．13．§6，14．§ 1．） This ravine is now called Göósa，from a village of this oame，which occupies the site of Caryae＊．The monntains on either side are evideatly the Oryxis and Sciathis of Pansamias，and at the foot of either there is a katavótlira，as he has remarked．

The eastern road from lhenens led to Stym－ phalus，across Mt．Geronteinm（now Skipézi），which formed the boundary between the territories of the （w）cities．

To the left of Mt．Geronteium near the road was a mountain called Tricrena（Tрiкр ${ }^{\text {wita }}$ ），or the three fountains；and near the latter was another monntaia called Sepia（ $\Sigma \eta \pi i a$ ），where Aepytus is said to have perished from the bite of a smake． （Pans．viii．16．§§ 1，2．）（Leake，Morea，vol．iii． p．135，seq．，Peloponnesiaca，p．385，seq．；Curtios， Peloponnesos，vol．i．p．185，seq．）

cons of rheneus．
PHERAE（ $\Phi$ épaı：Eth．$\Phi$ epaîos，Pheraeus）． 1. Une of the most ancient cities of Thessaly，was situated in the SE．corner of Pelasgintis，W． of the lake Boebeis，and 90 stadia from Pagasae， which served as its harbour．（Strab．ix．436．）It was celebrated in mythology as the residence of Admetus and his ano Enmelus，the latter of whom led from Pherae and the neighbouring towns eleven ships to the Trojan War．（Hom．Il．ii．711－715．） Pherae was one of the Thessalian towns which assisted the Athenians at the coinmencement of the Peloponnesian War．（Thuc．ii．22．）At this time it was under the government of an astoricracy；but towards the end of the war Lycophron established a tyramy at Pherae，and aimed at the dominion of all Thessaly．His designs were carried into effect by his son Jason，who was elected Tagus or general－ issimo of Thessaly abont B．c． 374 ，and exercised an importint influence in the affuirs of Greece．He had so firmly established lis power，that，after his assassination io n．c． 370 ，he was succeeded in the oftice of Tagus by his two brothers Polydorus and Polyphron．The former of these was shortly after－ wards assassimated by the latter ；and Polyphron was mardered in his turn by Alexander，who was either his nephew or his brother．Alexander go－ verned his native city and Thessaly with great cruelty till n．c． 367 ，when he likewise was put to death by his wife Thebe and her brothers．Two of these brothers，Tisiphonus and Lycophron，succes－

[^21]sively held the snpreme power，till at length in b．C． 362 Lycophron was deposed by Philip，king of Maredon，and Pherae，with the rest of Thessaly， became virtually subject to Mlacedonia．（For details and authorities see the Lrict．of Biogr．under the respective names above mentioned．）

In B．C． 191 Pherae surrendered to Antiochns， king of Syria，but it shortly afterwards fell into the hands of the Roman consul Acilias．（Liv．xxxvi． 9，14．）Situated at the ead of the Pelasgian plain， Pherale possessed a fertile territory．The city was surrounded with plantations，gardens，and walled eaclosures．（Polyb．xviii．3．）Stephanos B．（s．v．） speaks of an old and new Pherae distant 8 stadia from each other．

In the middle of Pherae was a celebrated fountain called Hyperein（＇ $\mathbf{T} \pi \kappa \in \in \in \sigma$ ，Strab．ix．p． 439 ； Piad．Pyth．iv． 221 ；Sophoel．op．Schol．ad Pind． l．c．；Plin．iv．8．s．15．）The fountain Messeis was also prebably in Pherae．（Strab．ix．p．432；Hom． Il．vi． 457 ；Yal．Flacc．iv． 374 ；Plia．l．c．）

The remains of Pherae are situated at lelestino， where the accient walls may be traced on every side except towards the plain．On the northern side are two tabular summits，below the easternmost of which on the southern side is the foantain Hy － pereia，which rashes from several openings in the rock，and inmediately forms a stream．Apollonius says（i． 49 ；comp．Schol．ad loc．）that Pherae was situated at the foot of Mt．Chalcodonium（XaNкw－ $\delta \delta v i o v$ ），which is perhaps the southern and highest summit of Mt．Karadagh．（Leake，Northern Greece，vol．iv p． 439 ，seq．）

2．In Messehia．［See limarie，No．2．］
PHERINUM，a fortress in Thessaly，of uncertain site．（Liv．xxxii．14．）

PHEUGARUM（ $\Phi$ ev́rapoy），a town io the northern part of Germany，probably in the territory of the Dulgubini．（Ptol．ii．11．§ 27．）Its site is commonly assigned to the vicinity of Paderborn in Westphalia（Wilhelm，Germanien，p．134）；but nothing certain can be said about it．［L．S．］

Phiala．［Palaestina，p．519，b．］
Phla＇lia．［Phigalia．］
PHIARA（фiapa），a town of the district Sarga－ ransena，in Cappadocia（Ptol．v．6．§ 13），appears to be the same as the one mentioned in the Anto－ nine Itinerary（p．205）under the name of Pliarasis， which was 36 miles west of Sebastia．［L．S．］

PHIBALIS．［Megara，p．317，a．］
PHICLUM．［BoEotla，p．412，a．］
PHIGALIA or PHIALIA（фrүa入ia，Paus．；
 Steph．B．s．v．；фia入ia，Paus．：фid́入eia，Polyb．： Eth．Фıràeŕs，Фia入eús，Фıra入eít $\eta s$ ），an ancient town of Arcadia，situated in the sonth－western cor－ ner of the country，close to the frontiers of Messenia， and upon the right bank of the Neda，abont half－ way between the sources and the mouth of this river． The name Phigalia was more ancient than that of Phialia，but the original name had again come into use in the time of Pausanias（viii．39．§ 2）．The city was said to have derived jts more ascient name from Phigalus，a son of Lyeaon，its original founder， and its later name from Phialus，a son of Lycaon， its second founder．（Pans．l．c．；Steph．B．）In B．C． 659 the inhabitants of Phigalia were obliged to sur－ render their city to the lacedaemonians，but they recovered possession of it again by the help of a chosen body of Oresthasians，who，according to an oracke，perished fighting against the Lacedaemmians．
（l＇aus．viii．39．§今 4，5．）In B．c． 375 l＇lngulia was rent astuder by hostile f．ctions：and the sap－ porters of the Lacedaemonian party，heing expelled from the city，took possession of a futress in the neighbourhood named Heraca，from which they made excmrsions agaimst Phigalia．（Diod，xra 40．）in the wars between the Astolians and Achasans，Phi－ galia became for some tione the head－quarters of the Aetolian troops，who from thence plundered Mes－ senia，till they were at lensth driten ont by Plilip of Nacelon．（1＇olyb．iv．3，seq．．79，seq．）The phigaleans possessed seterat peruliar cu－tums，re－ specting which Ilarnodins of Leproum wrote a special work．This author relates that they were given to excess both in eating and druking，to which their cold and unceuial climate may perlaps have con－ tributel．（Athen．iv．p．149，x．p．442．）

Phiealia rias still a place of importance when visited by Pausanias．He de－cribes it as sithated upon a lofty and precipitous hiil，the greater part of the walls being built ppon the rocks．There are still considerathe remains of the ancient walls above the modern sillare of Parlitza．The city was up－ wards of two miles in circamference．The ruck， unn which it stind，slopes domn towards the Neda； on the western xile it is bounded by a ravise and on the eastern by the torrent Lymax，which flows into the Nelda．Thw walls are of the usual thick－ noss，faced with masonry of the second order，and fillel in the midate with rubble．On the summit of the acropulis within the walls are the remains of a detachel citadel， 80 yards in length，containing a mund tower at the extromity，measuring 18 feet in the interior diameter．In ancient times a temple of Artemis Soteira stood on the summit of the acropolis． Oo the slope of the mountain lay the gymnasium and the temple of Dronysas Acratophoras ；and on the ground below，where the village of upper Páv－ litza stands，was the agora，adormod with a statue of the pancratiast Arrachinn，who lost his lite in the Olyupic games，and with the sepulchre of the Ores－ thasians，who perished to re－tore the Phignleans to their mative city．（Pans．viii．39．§§ $5,6,40$ ．§ 1．） Upon a rock，difficult of access，near the oniun of the Lemax and the Neda，was a temple of Eury－ noune，suppesed to be a sumame of Artemi－，which was upeued only once a year．In the same neigh－ burlhaxl，and at the distane of 12 stalia from the cuty，wore some warm hathx，traces of which，ac－ －riling to the Frepecty Cummission are visible at the －Whare of Traguit，hut the waters have long ceased to flow：（l＇ans．viii．41，§ 4．Neq．）

Phazalia was surrounded by mountains，of which J＇unsmias mentions two by iname，Cornar3（cो Kutidua）and Elafum（ $\tau \delta$＇EAdion），the former to the left of the city，at the distance of 30 stadia，
and the latter to the right at the distance of 30 stadia．As Cotilinm lies to the NE．of Phigalis， and Pansanias in this description seems to have looked towards the east，Mlt．Elienm shonld probably be placed on the opposite side of Phisalia，and conse－ quently to the south of the Neda，in which case it would correspond to the lofty monstain of Kirela． Mit．Elweurs contained a cavern sacred to Demeter the Black，sitnated in a grove of oaks．Of the po－ sition of Mtt．Cotilium there is no donbt．On it was sitnated the temple of Apollo Epicurius，which was bnilt in the Peloponnesian War by Ictinus，the arehi－ tect of the Parthenon at Atheris．It was erected by the Phigaleass in consequence of the relief afforded by Apullo during the plague in the Peloponnesian Wiar，whence he received the surname of Epienrius． The temple stood in a place called Bassae，and ac－ cording to Pausmias exceiled all the temples of Pelopumnesus，except that of Athema Alea at Tegea， in the beauty of the stone and the accuracy of its masonry．He particularly mentions that the roof was of stone as well as the rest of the building． （Paus．viii．41．§§ 7，8．）Tnis temple still remains almost entire，and is next to the Theseium at Atheris the best preserved of the tenples of Greece．It stands in a glen（whence the name Bärou，Dor， for $\mathrm{B} \eta \boldsymbol{\gamma} \sigma \eta, \mathrm{B} j \sigma \sigma \alpha_{1}$ ）near the summit of Mt ．Co－ tilinm，in the midst of a twilderness of rocks， studded with old knotty oaks．An eye－witness re－ marks that＂there is certainly no remmant of the architectural splendonr of Greece more calcu－ lated to fascinate the imagination than this temple； whether by its own size and beauty，by the contrast it offers to the wild desolation of the surrounding scenery，or the extent and variety of the prospect from its site．＂（Mure，Tour in Greece，vol．ii．p． 270．）A spring rises abont 10 minotes SW ．of the temple，and soon afterwards loses itself in the ground， as Pausanias has described．North of the temple was the highest stmmit of the mountain，which one reaches in 10 minutes＇time by a broad road con－ structed by the Greeks．This summit was called Cotilum（Ḱ́тi入oy），whence the whole monntain de－ rived the name of Cotilian；bere was a sauctnary of Aphrodite，of which there are still some traces． The grandeur of the ruins of the temple have given to the whole of tbe surrounding district the name of the Columns（ $\sigma$ Toùs aтúdous or кo入orvaus）．The temple is at least two hours and a half from the rums of the city，and consequently more than the 40 stadia，which Pansanias mentions as the distance from Phiralia to（＇otilium；but this distance per－ haps applies to the nearest part of the mountain from the city．

In modern times the temple remained long unknown， except to the shepherds of the country．Cliandler，in

Digitized by Microsoft ©

1765, was the first who gave any aecount of it ; it was subsequently visited and described by Gell, Dodwell, and otbers; and in 1812 the whole temple was very carefully examined by a body of artists and seholars, who cleared away the ruins of the cella, and thus became acquainted with the exact form of the interior of the building. The results of these labours are given by Stackelberg, Der Apollotempel zu Bassä in Arkadien, Rom. 1826. The temple was a peripteral building of the Doric order. The stone of which it is built is a hard yellowishbrown limestone, susceptible of a high polish. It faces naarly north and south, was originally about 125 feet io length and 48 in breadth, and bad 15 columns on either side, and 6 on either front. There were also 2 columns in the pronaos and 2 in the posticum; so that the total number in the peristyle was 42 , of which 36 are standing. The cella was too narrow to allow of interior rows of columns as in the Parthenon; but on either side of the cella five fluted Ionic semi-columns projected from the walls, which supported the timbers of the bypaethron. The frieze of the cella, representing contests between the Centamrs and the Lapithae, and between Amazons and Greeks, is now in the British Museum. (Leake, Morea, vol. i. p. 490, seq., vol. ii. p. 1, seq.: Ross, Keisen im Peloponnes, p. 98, seq.; Boblaye, Récherches, gee, p. 165; Curtius, Peloponnesos, vol. i. p.318, seq.)

PHIGAMUS (\$iүapoôs or Фvүauoús), a small coast river in Pontus, flowing into the Euxine 160 stadia west of Polemoninm. (Arrian, Peripl. Pont. Eux. p. 16; Anonym. Peripl. P. E. p. 11.) [L. S.]

PHILA, one of the small islands on the sonth coast of Gallia, which Pliny (iii. 5) enumerates between the Stoechades (Isles dHières) and Lero and Lerina (Les Lérins). Pliny's words are: "Tres Stoechades... Ab bis Sturinm, Pboenice, Pbila : Lero et Lerina adversmm Antipolim." There seem to be no means of determining which of the islets between the Isles d" Hieires and Sainte Marguerite represent these tbree small islands of Pliny. [Lerina; Leenow.]
[G. L.]
PHILA ( $\Phi$ ina), a frontier fortress of Macedonia towards Msgnesia, and distant 5 M. P. from Heracleis, which stood near the month of the Peneus, on the left bank. It was occupied by the Romans whea their army had penetrated into Pieria by the passes of Olymjus from Thessaly. (Liv. slii. 67, xliv. 2, 3, 7, 8, 34.) Stephanas of Byzantium (s.r.) asserts that it was built by Demetrius, son of Antigonus Gonatas, and father of Philip. who named it, after his mother, Phila.
[E. B. J.]
PHILADELPHE1A ( $\Phi \downarrow \lambda a \delta \bar{\epsilon} \lambda \phi \epsilon i a$ : Eth. $\Phi_{i \lambda \alpha-}$ $\delta \in \lambda \phi \in \cup ́ s)$. 1. An important city in the east of Lydia, on the north-western side of Mount Tmolns, and not far from the southern bank of the river Cogamus, at a distanee of 28 miles from Sardes. (Plid. v. 30; It. Ant. p. 336.) The town was founded by Attalns Philadelphns of Pergamum. (Sieph. B. 8.v.) Strabo (xiii. p. 628, comp. xii. p. 579 ), who places it on the borders of Catacecaumene, remarks that it freqnently suffered from violent shocks of earthquakes ; the wails and honses were constantly liable to be demolisbed, and in his time the place had become nearly deserted. During the great carthquake in the reigu of Tiherius it was again destroyed. (Tic. Ann. ii. 47.) But in the midst of these calamities Clristianity flourished at Pbiladelpheia at an early period, as is attested by the bouk of Revelations (iii, 7). The town, which is men-
tioned also by Ptolemy (v. 2. § 17) and Hierocles (p. 669), pallantly detended itself against the Turks on more thas one occasion, until at length it was conquered by Bajazid in A. D. 1390. (G. Pachym. p. 290; Mich. Duc. p. 70; Chalcond. p. 33.) It now bears the name Allahsher, but is a mean thongh considerable town. Many parts of its ancient walls are still standing, and its rpined charcbes amount to abont twenty-four. (Chatdler, Travcls, p. 310, foll.; Richter, Wallfahrten, p. 513, foll.)
2. A town in the interior of Cilicia Aspera, on the river Calycadnus, above Aphrodisias. (Ptol. v. 8. § 5 ; Hicrocl. p. 710 , who mentions it among the episcopal sees of Issuria.) Beaufort (Karamania, p. 223) supposes the site to be represented by the town of Mout or Mood, which Leake regards as the site once occupied by Claudiupolis (Asza Minor, p. 17).
[L. S.]
3. A town of Palestine in the district of Peraea, east of Jordan, near the river Jabbok, was the later name of Rabbath-Ammon, sometimes called Rabbah only, the ancient capital of the Ammonites. (Deut. iii. 11 ; Josh. xiii. 25.) It was besieged by Joab and taken by David. (2 Sanu, xi. 1, xii. 26-31; 1 Cluron. xx. 1.) It recovered its independence at a later period, and we find the prophets denouncing its destruction. (Jer. xlix. 3; Ezek. xxv. 5.) Subsequently, when this part of Palestine was subject to Aecypt, the city was restored by Ptolemy Philadelphus, who gave it the name of Pbiladelpheia. (Stepb. B. s. v. ; Euseb.
 it was originally called Ammaxa, atterwards Astarte, and lastly Philadelpheia. It is frequently mentioned under its new name hy Josephus (B. J. i. 6. § 3, i. 19. § 5, ii. 18. § 1), and also by Ptolemy (v. 17. § 23), Pliny (v. 18. s. 16), Hierocles (p. i22), and upon coins. (Eckhel, vol. iii. p. 351.) The old name, however, did not go ont of use, for l'olybius speaks of the city under the name of Rabbatamana ('Pa68aráuava, ャ. 7I); and the ruins are now called Anman, a name which they also bore in the time of Abulfeda. (Tab. Syr. p. 91.) Burckhardt has given a description of these rnins, with a plan. The most importunt are the remains of a large theatre. There are also remains of several temples, some of the columns being three feet and a half in diameter. A river flows throngh the roins of the town. (Burckbardt, Syria, p. 357.)

PHILAE ( $\Phi$ ı $\lambda a i$, Strah. i. P. 40 , xvii. pp. 803, 818,820 : Diod. i. 22 ; Ptol. iv. 5. § 74 ; Nenec. Quaest. Nat. iv. 1 ; Plin. v. 9. s. 10), was, as the number of the word both in the Greek and Latin denotes, the appellation of two small islands situated in lat. $24^{\circ} \mathrm{N}$., just above the cataract of Syene. Groskurd (Strab. vol, iii. p. 399) computes the distance between these islands and Syene at abont $6 \frac{1}{2}$ miles. Philae proper, althongh the smaller, is, from its numerous and picturesque ruins, the more interesting of the two. It is not more than 1250 English feet, or rather less than a quarter of a mile. long, and about 400 feet broad. It is composed of Syenite stone: its sides are steep and perhaps escarped by the laand of man, and on their summits was built a lefty wall encompassing the island. For Philae, being accounted one of the burying-places of Osiris, was held in bigh reverence both by the Aegyptians to the N. and the Aethiopians to the S.: and it was deemed profine for any tut pricsts to dwell therein, and was accordingly segnestered and denominated "the unapproachalile" (GGatos,

Plut. Is. et Osir. p. 359; Diod. i. 22). It was reported ton that neither birds flew over it nor fish approached its shores. (Sebec. (unaest. Nat. iv. 2.) These indeed were the traditions of a remote period; since in the time of the Nacedonian kiugs of Aecypt Phutae was so much resorted to, partly by pilgrims. to the tomb of Osiris, partly by persons on secular errands, that the priests petitioned Ptolemy Physcon (1s. c. $170-117$ ) to prothibit public functionaries at lest fron coming thither and living at their expense. The obelisk on which this petition was engraved w:as brought iuto England by Mr. Bankes, aod its hieroglyphics, compared wi:h thase of the Rusetta stone, threw great lieht upon the Aegyptian phonetic alphabet. The islands of Philae were not, howerer, merely sacerdotal abodes; they were the centres of commerce also between Meroä and Memphis. For the rapids of the cataracts were at most seasons impracticable, and the commodities exchanged between Aegypt and Apthiopia were reciprocally landed abd re-embarked at Syene and Philae. The neighbouring granite-quarries attracted hither also a numerous population of miners and stonemasons; and, for the convenience of this traffic, a gallery or road was formed in the rocks alone the E. baok of the Nile, portions of which are still extant. Philae is also remarkable for the singular effects of light and shade resulting from its position near the tropic of Cancer. As the sun approacties its northern lirnit the shadows from the projecting cornices and monldiags of the temples siak lower and lower down the plain sarfaces of the walls, until, the sun haring reached its highest altitude, the vertical walls are overspreal with dark shadows, forming a striking contrast with the fierce light wherh enbathes all surrounding objects. (Nitter, Erdlunde, vol. i. p. 680 , seq.)

The hieroglyphic name of the smaller island is Philuk, or boundary. As their southern frontior, the Pharauhs of Aezypt kept there a strong garrison, and, for the same reasoo, it was a barrack also for Macedonian and Itman soldiers.

The most con-picuous feature of both islands is their architectural wealth. Doomments of very various eras, extenling from the Phara ch s to the Caesars, occupy nearly their whole area. The principal stractures, however, lie at the S. eml of the minaller island. The most ancient, at present discovered, are the remains of a temple of Athor (Adhmodite), bnilt in the reiln of Nectancbus. The uther ruins are for the most part coeval with the I'turnaic times, more especially with the reigos of Plu ladelphas. Epiphanes, and Philometor (b. C. 282 -145), with many traces of Romat work as recent :a C laathons 1. (i. D. 4]-54). The chief temple in Mlulae, dedieated to Ammon-Osiris, was approaclied from the river through a doable colonnade. In front of the propyla were two colossal lions in granite, behand which stood a pair of obelisks, each 44 feet ligh. The propyla were pyramidal in form and colusal in dimensims. One stoud between the dromos ausd pronans, mother between the pronams anid the portico, while a smaller one led into the sekos or adytum. At each corner of the adytum stood a monmithat shrise, the case of a sacred hawk. Of these shrines one is now io the Lonvre, the other in the Mavom at Florence. Hight and left of the entrance into the yrucipal court are two small temples or rather chapels, oue of which, dedicated to Athor, is covered with sculptures representing the birth of P'tolemy Philometor, under the figure
of the god HIorus. The story of Oiris is everywhere represented on the walls of this temple, and two of its inner chambers are particularly rich in symbolic inagery. Upon the two great propyla are Greek inscriptions intersected and partially destroyed by Aegyptian figures cut across them. The inseriptions belong to the Macedonian era, and are of earlier date than the scalptares, which were probably inserted during that interval of renascence for the native religion which followed the extinction of the Greek dyoasty in Aegypt. (8. c. 30.) The monuments in both islands indeed attest, beyond any others in the Nile-valley, the survival of pure Aegyptian art centnries after the last of the Pharaobs had ceaced to reign. Great pains bave been taken to motilate the sculptares of this temple. The work of demolition is attribatable, in the first instance, to the zeal of the early Christians, and afterwards to the policy of the Iconoclasts, who carried favour for themselves with the Byzaotine court by the destruction of heathen as well is Christian images. The soil of Philae was carefolly prejared for the reception of its buildings. - beiog levelled where it was uneven, and supported by masonry where it was crumbling or insecure. For example, the western wall of the Great Temple, and the correspondiog wall of the dromos, are supported by very strong foundations, built below the level of the water, and resting on the granite which in this region forms the bed of the Nile. Here and there steps are hewn ont from the wall to facilitate the communication between the temple and the river.

At the S. extremity of the dromos of the Great Temple is a smaller temple, apparently dedicated to lsis; at least the few columns which remain of ic are sormounted with the head of that goddess. Its portico cunsists of twelve colurnns, four in front and three deep. Their capitals represent various forms an:1 combinations of the palm-branch, the dhoum-leat, and the lotus-flower. These, as well as the sculptures on the columns, the ceiliogs, and the walls, were painted with the most rivid colours, whieh, owiog to the dryness of the climate, bave lost little of their original brilliance.

Pluilae was a seat of the Christian religion as well as of the ancicnt Aegsptian faith. Ruins of a Christian church are still visible, add more than ous adytum bears traces of having beeo made to serve at different eras the parposes of a chapel of Osiris and of Christ. For a more particulay account of the architectural remaius of fhilac we must refer the reader to the works of Dénon, Gau. Rusellini, Rnssegger, and Hamiltoo (Axgyptaca). The latter Las minutely described this island- the Lonetto of ancient Aegypt. The Greek inscriptions found there are transcribed and elucidated by Letronne.

A little W. of Phlae lies a larger islaud, anciently ealled Snem or Nenmut, bat now by the Arabs Beghe. It is very precipitous, and from its most elevated peak nfforils a fine view of the Nile, from its smonth surface S. of the iblands to its plagre over the shelves of rock that form the linst Cataract. Philae, Beqhe, and another lesser island, divide the river into fuur prinespal streaus, and N. of them it takes a rapid turn to the W. and then to the N., wbere the cataract begins. Beghe, like Philae, was a boly island; its rocks are juscribed with the names and titles of Amunoph IIl., Raroesess the Great, Parmmitichus, Apries, and Amasis, together with memorials of the Macedunian aod Roman rulers of Aegypt. Its principal ruins consist of the propylon and two
columns of a temple，whicb was apparently of small dimensions，but of elegant proportions．Near them are the fragments of two colossal granite statues， and also an excellent piece of masonry of much later date，having the aspect of an arch belonging to somse Greek church or Saracen mosque．

PHILEROS．［MygDONIA．］
PHILIA（ $\Phi, \lambda i \alpha$ akpa．Ptol．iii．11．§ 4），a pro－ montory on the coast of Thrace， 310 stadia SE．of Salmydessus（Kara Burnu？），with a town of the same name．
［T．H．D．］
 Fios），a city of Macedonia，which took its name from its founder，Pbilip，the father of Alexander．Origin－ ally，it had been called Crexides（Kpmpióes，Strab． vii．p． 331 ；Appian，B．C．iv．105， 107 ；Steph．B．s．v． $\Phi$ in $1 \pi \pi o t$ ），or the＂Place of Fountains，＂from the numerous streams in which the Gangites takes its source．Near Crenides were the principal mines of gold in a bill called according to Appian（l c．） Diontsi Collis（ 1 ópos $\Delta$ iovívou），probably the sume mountain as that where the Satrae possessed an oracle of Dionysus interpreted by the Bessi． （Herud．vii．111．）Crenides does not appear to bave belonged to the Thasians in early times， although it was under their dominion in the 105th Olsmpiad（b．c．360）．When Philip of Macedon got possession of the mines，he worked them with so much success，that they yielded 1000 talents a year，although previously they had not been very productive．（Diodor．xvi，4－8．）The old eity was enlarged by Philip，after the capture of Am－
phipolis，Pydna，and Potidaea，and fortified to pro－ tect lis frontier against the Thracian mountainerers． On the plaid of Philippi，between Haemas and Pangaens，the last battle was lost by the republucans of Rome．Appian（l．c．）bas given a clear descrip－ tion of Philippi，and the position on which Cassius and Brutus encamped．The town was sitnated un a steep hill，bordered to the N．by the foreats through which the Cassian army advanced，－to the S．by a marsh，beyond which was the sea，to the E．by the passes of the Sapaei and Corpili，and to the W．by the great plains of Myrcinus，Drahescus， and the Strymon，which were 350 stadia in length． Nut far from Philippi，was the hill of Dionyoms， centaining the gold mines called Asyla；and Is stadia from the town，were two other heights． 8 stadia saunder ；on the one to the N．Biutus pitched his camp，and Cassius on that to the S ． Bratus was protected on his right by rocky hills， and the left of Cassius by a marsli．The river Gangas or Gangites flowed along the front，and the sea was in the rear．The camps of the two leaders， altbough separate，were ellclosed within a commun entrencbment，and midway between them was the pass，which led like a gate from Europe to Asia． The galleys were at Neapolis， 70 stadia distant，and the commissariat in Thasos，distant 100 stadia． Dion Cassins（ $x$ lvii．35）adds，that Philippi was near Pangaeus and Symbolum，and that symbolum， which was between Plilippi and Neapolis，was so called becanse it connected Pangaeus with another mountain stretching inland；which indentifies it with the ridge which stretches from Pracista to Kavala，separating the bay of Kavale from the plaiu of Philippi．The Pylae，therefore，could he no other than the pass over that momntain belsind Kavala．M．Antonius took up his position on the right．opposite to that of Cassius，at a distance of 8 stadia from the enemy．Octavius Caesar was opposed to Brutus on the＂left hand of the even field．＂ Here，in the autumn of B．C． 42 ，in the first engace－ ment，Brutus was successful against Octavins， while Antonius bad the advantage wer Cassius． Brutus，incompetent to maintain the discipline of his troops，was forced to fight again；and in an engagement which took place on the same ground， twenty days afterwards，the Republic peri－hed． Regarding the battle a curions nistake was re－ peated by the Roman writers（Manil．i． 908 ：Ovid， Met．xv． 824 ；Flor．iv． 42 ；Lucan，i．680，vii． 854 ，ix． 271 ；Juv．viii．242），who represented it as fought on the same ground as Pharsalia＿－a mistake which may have arisen from the ambiguity in the lines of Virgll（Georg．j．490），and favoured by the fact of the double encagement at Philippi．（Meri－ vale，Hist．of Roman Empire，vol．iii．p．214．） Augustus afterwards presented it with the privileges of＂a colonia，＂with the name＂Col．Jul．Aug．Philip．＂ （Orelli，Inscr．512，3658，3746，4064；and on coins ；Rasche，vol．iii．pt．2．p．1120），and con－ ferred upon it the＂Jus Italicum．＂（Dim Cass，li． 4．）It was here，in his second missionary journey， that St．Punl，accompanied by Silas，came into con－ tact with the itinerant traders io popular superatitions （Acts，xvi．12－40）；and the city was again visited by the Apostle on his departure from Greece．（Acts， xx．6．）The Gospel obtained a home in Europe here，for the first time；and in the autumn of A．D． 62 ，its great teacher，from his prisun，onder the walls of Nero＇s palace，sent a letter of grateful acknow－ ledgment to his Macedoniun converts．Philip！i was
on the Eumatian road， 33 M．I．from Amphipulis， and 21 N．1．from Acuntismat．（Itin．Anton．； Itin．Hierosol．）The Theoklowian Table presents two rusds from Plilippi to Heratleia Sintica．One of the roads passed round the N．side of the lake Cercinitis，meathring $55 \mathrm{M} . \mathrm{P}$. ，the other took the S．side of the lake，and measnred $52 \mathrm{M} . \mathrm{P}$ ． When Macedonia was divided into two provinces by Thendosius the Younger，Philippi became the ecclesiavtical head of Macedonia Prima（Neale． Hist．off East．Church，vol．i．p．92），and is men－ toned in the IIandbouk of Hierucles．
The site，where there are considerable remains of antiquity，is still known to the Greeks by its ancient mame：by the Turks the place is called Felibedjit． For coins of Philippi，see Ecthel，vol．ii．p．75．（Leake， Northem Greece，vol．iii．pp．215－223．）［E．B．J．］

con of philipit．
 § 8．i），a headland on the coast of the Great Syrtus， identical with the Hippi Prom，of Ptolemy（iv． 3. § 14），and with the remarkable projection of high cliff into the sea，oo which are traces of a strong firtress，at Räs Bergawid．Beechey（Erpectition to the N．Coast of Africa，p．188）identifies this cliff， which he calls Bengerwrid，with Euphrantas ；but this is a mistake，as is slown by Barth（1Hander． ungen，p．367），who refers the station An Turrem （ $P_{\text {rut．}}$ Tah．）to this headland．
［E．B．J．］
 11．\＄ 12 ；Polyh，v． 100 ；Stepli．B．s．v．），a tawn of Thrace，founded by Philip of Macedon，on the site of it previously existing town，called Eunolpias or 1＇onerupolis．（Amm．Mare xxvi．10．§4；Plin．ix．It． s．18．）From its situation on a hill with three preaks or summits，it was also called Trimontium． （Plin．Lc：；P＇tol．l．c．）It lay on the SE．side of the H－brus．The Thracians，however，regained possession of it（Polyb．l．c．；Liv．axxix．53），and it remained in their hands till thyy were subdued by the Komans．Its size unay be inferred from the fact of the Goths baving slanghtered 100,000 1ersons in it（Amm．Marc．xxxi．5．§ 17），theugh doubtless many persons from the environs had taken refuge therc．The assmption that it likewise bore the name of Iladriamopolis，rests only ans an interpolation in Ituleny．It is still called Thilippopoli，and con－ tinnes to be one of the most consiticrable towns of Thrace．（Tac．Atnn．iii．38；Itin．Ant．p．136； Hieroctl，p．6335．）

 Strab．vii．p．319），a maxitime town of Thrace，not far from the juncton of the Bosporns with the

Euxine, and close to the town of Phileac. It has been variously identified with Inimakale, Mauromolo, and Derkus. (Mela, ii. 2; Plia. iv. 11. s. 18, v. 32. s. 43.)
[T.H.D.]
PHI'NTIAS ( $\Phi$ wtias: Eth. Phintiensis: Alicata), a city on the S. coast of Sicily, situated at the mouth of the river Himera, aboat midway between Agrigentum and Gela. It was not an ancient city, but was founded aboat 280 In. c. by Phintias, tyrant of Agrigentum, who bestowed on it his own name, and laid it out on a great scale, with its walls, temples, and agora. He then peopled it with the inhabitants of Gela, which he utterly destroyed, compelling the whole population to migrate to his newly founded city. (Diod. xxii. 2, p. 495.) Phintias, however, never rose to a degree of importance at all to be compared to that of Gela: it is mentioned in the First Punic War (в. c. 249) as affording shelter to a Roman fleet, which was, however, attacked in the roadstead by that of the Carthaginians, and many of the ships sunk. (Diod. xxiv. 1, p. 508.) Cicero also alludes to it as a seaport, carrying on a considerabile export trade in corn. (Cic. Verr. iii. 83.) But in Strabo's time it seems to have fallen into the same state of decay with the other cities on the S. coast of Sicily, as he does not mention it among the few exceptions. (Strab. vi, p. 272.) Pliny, indeed, notices the Phintienses (or Plthinthienses as the name is written in some Mlsis.) among the stipeodiary towns of Sicily; and its name is found also in Ptolemy (who writes it $\$ \theta i \nu \theta i a$ ); but it is strange tbat hoth these writers reckon it among the inland towas of Sicily, thoogb its maritime position is clearly attested both hy Diodorus and Cicero. The Antonine Itinerary also gives a place called "Pliatis," doubtless a corrmption of Phistias, which it places on the road from Agrigeotum along the coast towards Syracuse, at the distance of 23 miles from the former city. (Itin. Ant. p 9.5.) This distance agrees tolerably well with that from Girgenti to Alicata, though somewhat below the trath; and it seems probable that the latter city, which is a place of some trade, though its harbour is a mere readstead, occupies the site of the ancient Pbintias. There is iadeed no doubt, from existing remains on the hill immediately above Alicata, that the site was occupied in ancient times; and, though these bare been regarded by local antiquarians as the ruins of Gelin, there is little darbt of the correctaess of the opinion advanced by Cluserius, that that city is to be placed on the site of Terranown, and the vestiges which rumain at Alicola are those of Plintias. (Cluver. Sicil. pp. 200, 214. See also the article Gela.) The remains themselves are of little interest. [E. H. B.]

PHINTON or PHINTONIS INSULA ( $\Phi$ ivtwoos vīaos, Ptol.), a small island in the strait hetreen Sardinia and Corsica, mentioned both by Pliny and Ptulemy, It is probably the one now called the Isola della Maddalena, the most considersble of the group so situated. (Plin, iii. 6.
3. 13; Ptol, iii. 3. §8.)
[E. H. B.]
PHLA ( $\Phi \lambda \lambda^{\alpha}$ ), an island in the lake Tritonis in the interior of Libya (Herod. iv, 178), which Stephasus B., copying from Herodotus, calls an island in Aepypt, confounding it with the island of Philae in the Nile.

1'HLEGRA. [Palleve.]
PHLEGRAEI CAMPI. [CAMPANLA, p. 491, a.]
PHLILS ( $\Phi \lambda \iota 0$ es: Eth. $\$$ diotos, the territory \$1ıaria), an independent city in the north-easterm
part of Peloponnestus, whose territory was bomnded on the N. by Sicyonia, on the W. by Arcadia, on the E. by Cleonae, and on the S. by Argolis. This territory is a small valley about 900 feet above the level of the sea, sarronnded by mountains, from which streams flow down on every side, joining the river Asopus in the middle of the plain. The mountaia in the southern part of the plain, from which the principal source of the Asopus springs, was called Carneates (Kapvєárns) in antiquity, now Polyffengo. (Strab, viii. p. 382.) The territory of Phlius was celebrated in antiquity for its wine. (Atben. i. p. 27, d.) According to Strabo (riii. p. 382), the ancient capital of the country was Araethy rea ('ApauBupéa) oo Mt. Celosse, which city is mentioned by Homer ( $I l$. ii. 571 ); but the inhabitants sabsequently deserted it and built Phlius at tbe distance of 30 stadia. Pausanias (ii. 12. $\S \S 4,5$ ), bowever, dues not speak of any migration, but says that the ancient capital was named Arantia ('Apavtía), from its founder Azas, an autochthon, that it was afterwards called Arsethyrea from a daughter of Aras, and that it finally received the name of Phlius, from Phlias, a sou of Ceisus and grandson of Temenus. The name of Arantia was retained in the time of Pausanias in the hill Arantinus, on which the city stood. Hence the stateozent of grammarians that both Arantia and Araethyrea were ascient names of Pblius. (Steph. B. s. vv. Фגivès, 'Apavria; Schol. ad Apoll. Rhod. i. 115.) According to Stephanus B. (s. v. $\Phi \lambda \iota o \hat{s})$ Phlius derived its name from Dionysus and Chthonophyle. Plilius was subsequently conquered by Dorians under Rhegnidas, who came from Sicyon. Some of the inlhahitants migrated to Samos, others to Clazomenae; among the settlers at Samos was Hippasus, from whom Pythagoras derived bis descent. (Paus, ii. 13. § 1, seq.) Like most of the other Doric states, Phlius was governed by an aristocracy, though it was for a time subject to a tyrant Leon, a contemporary of Pythagoras. (Diog. Laërt. i. 12, viii. 8 ; Cic. Tusc. v. 3.) Phlius sent 200 soldiers to Thermopylae (Herod. vii. 202), and 1000 to Plataea (ix. 28). Daring the whole of the Peloponnesian War it remained faitbful to Sparta and hostile to Argos. (Thuc. v. 57 , seq., vi. 105.) But before B. c. 393 a change seems to bave taken place in the government, for in that year we find some of the citizens in exile who profussed to be the frieuds of the Lacedaemonians. The Phliasians, however, still coatiaued faithful to Sparta, and received a severe defeat from Iphicrates in tibe year already meationed. So mach were they weakened by this blow that they were obliged to admit a Lacedaemonian garrison within their walls, which they lad been unwilling to do before, lest their allies should restore the exiles. But the Lacedaemonians did not betray the confidence placed in them, and quitted the city without making any change in the government. (Xen. Hell. iv. 4. § 15, seq.) Ten years afterwards (B. с. 383) the exiles induced the Spartan government to espouse their cause; and with the fate of Mantineia before their eyes, the Puliasians thought it more prudent to comply with the request of the Spartans, and received the exiles. (Xen. Hell. v. 2. §8, seq.) But disputes arising between the returned exiles and those who were io possession of the government, the former again appealed to Sparta, and Agesilaus was sent with an anny in B. c. 380 to reduce the city. At this period Phlius contained 5000 citizens. Agesilaus laid siege to the city, which held out for a year and eight moaths.
